Three expert witnesses testified for the defendants. They were Mr. Henry Roberts, a retired electrical engineer, Mr. Jim Coleman, an engineer who works for a defense contractor and has considerable experience with the design of electronic appliances used to measure velocity, and Mr. Paul S. Greenberg, an employee of the National Aeronautics and Space Administration who has considerable experience working with lasers to measure velocity in space applications. Each of these experts testified at considerable length with respect to a variety of conceptual and practical problems which they found with the application of laser technology [\*220] to the measurement of speed in motor vehicles. Unfortunately, none of the defense experts had the advantage of having worked with the laser speed detector involved in our case and none had conducted any testing of this detector.

The State presented [\*\*\*17] documentary evidence and testimony to the effect that the laser speed detector has been approved for use by law enforcement agencies in the United Kingdom, Sweden, Germany and Austria. It has also been approved for use by the Royal Canadian Mounted Police. The detector is being used by state and local law enforcement agencies in a fairly large number of states. In *Goldstein v. State of Maryland*, 339 Md. 563, 664 A.2d 375 (1995), Maryland's highest court has approved the general concept of admitting laser speed measurements into evidence in judicial proceedings in a case in which the LTI 20-20 Laser Speed Detection System was involved. The Court of Appeals did not reach the issue of the reliability of the particular device.

The State produced a certificate issued by the Office of the New Jersey State Superintendent of Weights and Measures which reads: "This certifies that Laser Speed Detection Instrument Serial Number 008999 has been compared with standards of the State of New Jersey in possession of the State Superintendent of Weights and Measures. The error found in the time base component will result in an error of less than 0.030 MPH at any speed. [\*\*\*18] Agency certified for New Jersey State Police."

The State has also presented a final report issued by the National Highway Traffic Safety Administration of the United States Department of Transportation, issued in February, 1995, establishing "Model Minimum Performance specifications for Lidar Speed Measurement Devices". (The laser speed detector is a lidar speed measurement device.) The Model Minimum Performance Specifications were developed in response to a request for standards made by the International Association of Chiefs of Police. Purportedly, the laser speed detector meets the standards embodied in the Model Minimum Performance Specifications and [\*221] it appears to have been recommended for inclusion on a list of products suitable for purchase by law enforcement agencies.

At first glance, the list of foreign governments which have in some way approved the laser speed detector for use by their law enforcement agencies, the list of states of the [\*\*376] United States which have allowed the detector to be used by law enforcement agencies, the certification issued by the New Jersey Superintendent of Weights and Measures, the issuance of Model Minimum Performance Specifications by the National [\*\*\*19] Highway Traffic Safety Administration and the approval of the general validity of using laser speed measurements in judicial proceedings by the Court of Appeals of Maryland appear to constitute a rather strong endorsement of the validity of the laser speed detector. However, on closer examination, the endorsements appear to be somewhat hollow in terms of using them to make a realistic assessment of the reliability of the detector. A number of American and foreign governmental agencies (or testing organizations working with them) have subjected mechanical components of the laser speed detector to limited testing and there has been some limited testing under conditions not reflective of actual highway circumstances of the detector's ability to measure the speed of a motor vehicle which was actually being driven towards the detector. There was also very limited testing in Colorado by two state police sergeants of the laser speed detector and a similar device made by a competitor under actual highway conditions. The officers tracked the same vehicles with competing laser speed measurement devices and compared the results. Less than 100 vehicles were tracked by the officers. The competing [\*\*\*20] laser speed measurement devices produced results which were roughly consistent with each other, although a few readings were widely inconsistent. The Colorado study is not particularly useful because the actual speeds of the vehicles were not known and they were not measured by any device other than the two competing laser

speed measurement devices.

[\*222] The certificate issued by the New Jersey State Superintendent of Weights and Measures quoted above on its face seems impressive. On analysis, the certification does not actually say much about the reliability of the detector. The testimony of Mr. Smith during our hearings established that what actually occurred was that the frequency of the time base component of the detector was measured and was found to be as stated. This means that the time base component of the detector is functioning as specified, and, *if every other component and program of the detector is functioning as it is supposed to*, then there will be no error greater than 0.030 MPH at any speed. The time base component is an important element in the detector. If it were not functioning properly, the results produced by the detector would be unreliable. However, the fact [\*\*\*21] that it is found to be functioning properly does not mean that the results produced by the detector are reliable, unless everything else works as it is supposed to, and no effort was made to test whether everything else did work as it was supposed to. In short, the certification turns out to be a very limited one.

The Model Minimum Performance Specifications issued by the National Highway Safety Administration also end up not being as impressive as they appear to be at first blush. One obvious deficiency is that the speed accuracy test called for by the Specifications does not approach the conditions which exist on real highways. The testing of the speed of actual vehicles contemplated by the Specifications is really testing under closed circuit test track conditions. A tripod is used to hold the device steady and retro-reflective areas may be temporarily affixed to the vehicle to increase the amplitude of the laser pulse echoes. The testing procedures involved might be a useful first step in a more comprehensive testing program, but the reality is that vehicles do not travel along our highways one at a time, tripods are not used and retro-reflective areas are not attached to vehicles [\*\*\*22] being driven along the highways. The reality is that the shape of motor vehicles is highly irregular and their surfaces reflect pulses off at many angles, with the result that most of the incoming pulse is not [\*223] sent back towards the detector. The challenge is to devise a program for the detector which can capture reliable pulses off the irregular shape of an actual motor vehicle. If the motor vehicle is equipped with a retro-reflective area which is affixed to the vehicle for the explicit purpose of making it more likely that a larger part of the incoming pulse will be reflected straight back at the detector, that renders the test largely meaningless in terms of the ability to [\*\*377] recapture and identify pulses reliably from motor vehicles as they are actually driven along our highways. The Model Minimum Performance Specifications also suffer from the serious deficiency that they do not require the manufacturer of the device to disclose the actual error trapping programs and mechanisms contained in its device.

Some of the objections posed by the defense experts, particularly by Mr. Roberts, seem to me to have been somewhat overstated. The defense experts appropriately pointed to many possible [\*\*\*23] errors in the application of laser to the measurement of motor vehicle speed, but they suggested at times that it was almost conceptually impossible for those errors to be overcome. I think it is fairly clear that at least the most egregious errors have probably been eliminated from the laser speed detector. In this regard, it is important to take note of the experience which members of the New Jersey State Police have had with the use of the laser speed detector on our highways.

Sergeant Ricker testified about the classroom training and field training which State Police officers receive before they are certified as being qualified to use the laser speed detector. He also testified about the field practice which they must have with the detector before they are able to issue summonses. He detailed the operational checks which are made on each individual laser speed detector every day by an officer before the unit is used. He also spoke of the experience which he and other members of the State Police have had in the months during which they have been using the detector. I note that Sergeant Ricker's testimony about the training of members of the State Police who use the detector [\*224] satisfies [\*\*\*24] me that the members of the State Police are adequately trained in the use of the detector and that it is not likely that errors will be made in its use because of lack of training or skill in the operator of the individual laser speed detector.

By this time, officers of the State Police operating under normal traffic enforcement conditions have obtained speed readings with the laser speed detector on thousands of motor vehicles. They do not keep comprehensive data with

314 N.J. Super. 211, \*224; 714 A.2d 370, \*\*377;  
1996 N.J. Super. LEXIS 533, \*\*\*24

respect to the conditions under which they are obtaining the readings, and they are not simultaneously taking readings on targeted vehicles with other kinds of devices which have previously been found to be reliable. Accordingly, the experience of the State Police does not establish the degree of accuracy of the laser speed detector. However, it seems clear to me that the State Police are getting readings from the detector which are at least broadly sensible. State Police officers who take readings on a target vehicle on an interstate highway where their experience leads them to believe that the flow of traffic is probably moving in the 65 to 75 mile an hour range and where their visual observation leads them to believe [\*\*\*25] that a particular vehicle is probably going around 70 miles an hour are not getting bizarre readings. They are not firing the laser speed detector device at a vehicle which they think is going around 70 miles an hour and getting readings in the range of 40 miles an hour or readings in the range of 95 miles an hour. They are getting readings which are fairly close to where they expect them to be. They are also not encountering many motorists who claim that the speeds being attributed to them are way out of line. This leads me to conclude that the error trapping mechanisms and programs contained in the laser speed detector are eliminating the most serious potential errors.

My own limited experience in observing Sergeant Ricker use the laser speed detector and my own limited experience in using it myself reinforced the view that the error trapping is in fact getting rid of at least the worst errors.

[\*225] The field view of the operation of the operation of the laser detector which I conducted on June 5 took place on Interstate Route 287 at a location a little south of Morristown. We were located in the center median of the highway and were taking readings on motor vehicles traveling in the [\*\*\*26] three northbound lanes. Sergeant Ricker and I used the same unit in succession. He was able to get a much higher percentage of speed readings from vehicles which he targeted than I was able to get from vehicles which I targeted. I frequently got an error [\*\*378] message from the detector when I targeted a vehicle. As noted in the report of Dr. Gezari quoted above, an error message does not mean that the detector has made an erroneous calculation of speed. It means that the detector does not make a calculation of speed because something has occurred (usually a mistake by the operator) which makes it impossible for the detector to compute the speed correctly. My getting frequent error messages was, of course, highly consistent with the fact that I had had no formal training in the operation of the device and no experience in using it. Also, the particular error messages which I got were consistent with my sense of what was occurring around me. For example, I found it much easier to get a speed reading on vehicles traveling in the left lane of the highway than on vehicles traveling in the center lane or the right lane. The relative ease of getting readings on vehicles in the left lane was what [\*\*\*27] I expected based on the testimony in this case, because I was able to get a much clearer and unobstructed shot on those vehicles, given the fact that I was standing in the center median of the highway. When I did get an error reading on a targeted vehicle in the left lane, it was usually "E03" which indicated poor aiming or panning, and when I got such a message I was frequently conscious of having been unsteady when I depressed the trigger. Although I was successful in getting some speed readings on vehicles in the right lane, I very frequently got error messages when I attempted to target them, and the message was usually "E02" which indicated that another vehicle intruded between me and the targeted vehicle. When I got such an error message, I was usually conscious of [\*226] the fact that I had mistimed my depression of the trigger in the sense that I was aware that an intervening vehicle in the center lane or left lane was closely crowding my line of sight to the targeted vehicle. I also notice that the speed readings which I did obtain were consistent with what I expected them to be based on my experience as a motorist and based on what I was observing with respect to the traffic moving [\*\*\*28] in front of me.

In urging me to find that the laser speed detector is a reliable device for measuring the speed of motor vehicles and in urging me to rule that the defendants may be convicted of motor vehicle violations based upon readings produced by the detector, the State points to the various approvals which have been granted to the detector by the agencies and organizations mentioned earlier in this opinion. The State has also pointed to the moderately widespread use of the detector in a number of state and local police departments in this country and in a number of law enforcement agencies in foreign countries. The State also urges me to take notice of the fact that the principle of using lasers to measure speed is broadly accepted as being scientifically sound.

The State has called my attention to cases such as *State v. Wojtkowiak*, 170 N.J. Super. 44, 405 A.2d 477 (*Law Div.*1979), *reversed*, 174 N.J. Super. 460, 416 A.2d 975 (*App. Div.*1980) (approving use of K-55 Doppler Radar device),

314 N.J. Super. 211, \*226; 714 A.2d 370, \*\*378;  
1996 N.J. Super. LEXIS 533, \*\*\*28

and *Romano v. Kimmelman*, 96 N.J. 66, 474 A.2d 1 (1984). It is argued that there has been wide acceptance of the scientific techniques involved in the laser speed detector [\*\*\*29] and there has been wide approval of the detector itself and that the Court should accept the detector as being a reliable device for measuring speed when used by a properly trained police officer. *State v. Wojtkowiak* and *Romano v. Kimmelman* can be read in a way which is broadly supportive of the State's position in the present case, but my view of those cases and others cited in the State's brief is that they do not require me to accept the laser speed detector as being reliable, given the proofs and analysis which have been presented in our present case.

[\*227] After considering all of the proofs and the analysis and the argument presented, I am satisfied that the general concept of using lasers to measure speed is widely accepted in the relevant scientific communities and is valid. I am, however, not satisfied that the laser speed detector device is accurate and reliable enough to be used for law enforcement purposes. Accordingly, I will not permit speed readings obtained by the use of the laser speed detector to be used in any of the motor vehicle law violation cases pending in the municipal courts of the Township of Rockaway and the Township of Parsippany-Troy Hills, and I will [\*\*\*30] also order that evidence [\*\*379] based on such speed readings may not be presented in any municipal court in the County of Morris or the County of Sussex at the present time.

I reach the conclusion just stated with considerable reluctance. If the laser speed detector were known to be accurate and reliable, it would, in my judgment, be markedly superior to radar in many situations that exist on the highways, roads and streets of New Jersey. New Jersey is a very densely populated state and its highways, roads and streets are crowded with traffic. Traffic flow along our interstate routes tends to be dense with traffic flow tending to be heavy in all lanes at almost all times. Wide beam radar under those circumstances requires the exercise of considerable skill and judgment by the operator in order to identify a speeding vehicle. The laser speed detector (assuming its accuracy and reliability) can much more readily target an individual vehicle in a heavy traffic flow than can radar. I am also aware of the fact that radar detectors are in very wide use among motorists, particularly among truckers, and they make it possible for chronic and persistent speeders to frustrate detection by radar. I [\*\*\*31] see the laser speed detector as being potentially an extremely useful tool in enforcing speed laws in New Jersey.

My frustration is deepened by the fact that I suspect that the laser speed detector may be accurate and reliable. The problem is that I cannot be reasonably sure that it is accurate and reliable under the proofs and analysis which have been presented in this [\*228] case. As I see it, there are two major obstacles to the acceptance of the laser speed detector as being accurate and reliable at the present time. The first obstacle is that no one other than the manufacturer knows the details of how the error trapping in the detector works. As noted above, the manufacturer has declined to release the details on the ground that this would compromise the confidentiality of proprietary information which is essential to its maintaining its business advantage over competitors. The lack of access to detailed information about error trapping is important because there are many factors which could interfere with an accurate calculation of speed by the laser speed detector. Error trapping programs must comprehensively deal with the wide range of potential sources of error and they must deal [\*\*\*32] with those potential errors pursuant to programs whose inner logic is sound. If no one other than the manufacturer knows the details of the error trapping mechanics and programs, there is no way of evaluating their conceptual validity through intellectual evaluation.

The absence of detailed knowledge about the workings of the error trapping procedures in the laser speed detector is not necessarily an insurmountable obstacle to accepting the detector as being accurate and reliable. Even if we did know all the details of the error trapping procedures and could subject them to thorough intellectual analysis, and even if that analysis showed that they were conceptually sound, we would still need to have adequate performance testing of the laser speed detector under conditions which exist on our highways before we could accept it as reliable. Indeed, if we had adequate operational testing of the laser speed detector under actual highway conditions, we might be able to accept the detector as being reliable even though we did not have complete details about the way in which the error trapping procedures are designed and programmed. Good performance testing might conceivably put us in a position [\*\*\*33] of being sure that the detector in fact worked reliably, although we were not sure precisely how it managed to achieve its results. This leads us to the lack of acceptable performance testing in this case.

314 N.J. Super. 211, \*228; 714 A.2d 370, \*\*379;  
1996 N.J. Super. LEXIS 533, \*\*\*33

[\*229] We know that there are many factors which could affect the accuracy of the laser speed reading. There is no way of knowing whether the laser speed detector successfully copes with those problems in the absence of detailed performance tests which deal rather comprehensively with potential error producing factors and which record results in a way which makes it possible for other persons to evaluate the tests and to replicate them.

In principle, it should be relatively easy to design performance tests which would let independent observers know how accurate the laser detector device truly is. The tests [\*\*380] would have to include vehicles of varying sizes and shapes. They would have to be conducted under various conditions of traffic flow along actual highways and roads. They would have to be conducted at different times of the day under varying climatic conditions. They would have to involve target vehicles whose speed was reliably established either by controlling the driver of the vehicle [\*\*\*34] or through simultaneous measurement of its speed by a reliable device other than the laser speed detector. The test data would have to be accurately recorded and reproduced for examination, analysis and replication by other persons and agencies. The factors that I have mentioned are illustrative, not exhaustive. Absent this kind of testing, I do not see how we can have any real confidence that the detector is sufficiently accurate.

I note that the Model Minimum Performance Specifications for Lidar Speed Measurement Devices issued by the National Highway Traffic Safety Administration in February 1995 state that the standard for speed measurement accuracy should be that the device would be within a tolerance of no more than one mile per hour in excess of the true speed and no more than two miles an hour below the true speed. The manufacturer in our case, Laser Technology, Inc., claims that the laser speed detector meets that standard. But there is no way in which we can be sure of that, in my judgment, under the present proofs. I do not think we can even be sure that the device is accurate over a wide range of conditions and with respect to a wide range of vehicles within a tolerance [\*\*\*35] of plus or minus five miles per hour. I suspect that the device is probably measuring speed within a [\*230] tolerance of plus or minus ten miles per hour, or we would be getting much more negative feedback from police officers and from motorists than has thus far been obtained.

The fundamental point is that there is no way of being sure under the present state of the proofs and analysis how accurate the detector is. I point out that [HN1] a belief that the device is broadly accurate is not sufficient. If I were presented with a reading in a particular case indicating that a motorist was traveling 72 miles an hour in a 55 mile an hour zone, I would feel quite confident that the motorist was exceeding the 55 mile an hour speed limit. I would not feel confident that he was going 72 miles an hour. I would not feel confident that he was going 70 miles an hour. I could probably satisfy myself that he was going at least 65 miles an hour, but I might have some slight reservation about that. Under the laws of our state (and under the laws of many states) the degree to which somebody is exceeding the speed limit is important. The penalties both in terms of fines and points against one's license increase [\*\*\*36] with the increase of speed in excess of the limit. If police officers and municipal court judges do not have a good handle on the range of accuracy of the detector, it becomes difficult to enforce the speeding laws in a way which is predictable, uniform and fair. I do not think it would be necessary to have a range as tight as the plus one mile minus two mile range of the Model Minimum Performance Specifications. Perhaps a range as wide as plus or minus five miles per hour would be sufficient. We do need to know what the range is.

I recognize that courts should not routinely require thorough performance testing of every conceivable device that might be used in the course of law enforcement, or of every conceivable device whose efficacy comes into question in civil litigation. Frequently, common knowledge or the rather conclusory testimony of informed experts might be sufficient. But we are dealing here with a major innovation in law enforcement techniques. We are [\*231] dealing here with something that could readily be tested in ways which would satisfy most reasonable observers that the device was reliable or not. Although I think there should be a number of comprehensive performance testing [\*\*\*37] programs carried out with respect to a device like the laser speed detector, I do not suggest that performance tests need be conducted by every state, much less by every local police department that might want to use the laser speed detector. If adequate tests were conducted by an agency or agencies outside of New Jersey, and if the detailed data with respect to those tests were published and were available for analysis and replication, there is no reason why [\*\*381] New Jersey or any other state or entity would have to conduct repetitious and expensive tests once there had been sufficient testing

314 N.J. Super. 211, \*231; 714 A.2d 370, \*\*381;  
1996 N.J. Super. LEXIS 533, \*\*\*37

to establish the reliability of the detector. I note that it probably is fair to expect the manufacturer itself to conduct performance testing and to have detailed data with respect to it. Laser Technology, Inc. has no recorded data.

I realize that courts should be hesitant about rulings which impose costs and burdens on litigants. However, it is important to note that highway safety and the fair and efficient enforcement of motor vehicle laws which are designed to promote highway safety are matters of very great concern and they are matters which involve enormous expenditures every year in this [\*\*\*38] country. In 1994, 40,676 lives were lost on the highways, roads and streets of the United States. I do not know what the exact figures are, but I am sure that in any given year various governmental entities in the United States spend billions of dollars on the enforcement of motor vehicle laws, health insurance companies pay billions of dollars to pay for the injuries received by people in motor vehicle accidents and casualty insurance companies pay billions of dollars for such injuries and for property loss. Surely, a society such as ours can figure out some way to come up with the very modest amount of money which would be involved in subjecting an important device such as the laser speed detector to adequate performance testing.

[\*232] I think it slightly ironic that at one point during the trial of the present case the State suggested that the defendants were somehow remiss for not having conducted adequate tests on the laser speed detector. That suggestion was made when I asked the prosecutor about the absence of meaningful performance testing by the manufacturer or by some governmental entity or some public interest testing group. The defendants in this case are people who are charged [\*\*\*39] with relatively minor traffic violations which would, if they were found guilty, result in modest fines, points against their licenses, insurance surcharges and, perhaps, in some cases, loss of a motor vehicle driver's license. The defendants, of course, have an interest in this case, but they do not begin to have an economic stake which would justify the kind of expenditures which would be involved, and they do not have the resources of time, talent and personnel to conduct the testing. There should be adequate performancetesting, but it would not be reasonable to expect it to come from the defendants or from people broadly situated as they are.

#### *ORDER*

For the reasons expressed in the foregoing Opinion, speed readings produced by the LTI Marksman 20-20 Laser Speed Detection System shall not be used in the prosecution of any case arising under the motor vehicle laws now pending in the Municipal Court of the Township of Rockaway or in the Municipal Court of the Township of Parsippany-Troy Hills.

IT IS FURTHER ORDERED that, until further Order of the Superior Court, no municipal court in Morris County and no municipal court in Sussex County shall receive in evidence a speed [\*\*\*40] reading generated by the LTI Marksman 20-20 Laser Speed Detection System in connection with any prosecution arising under the motor vehicle laws.

**STATE OF NEW JERSEY, PLAINTIFF-RESPONDENT, v. DOUGLAS  
WOJTKOWIAK, DEFENDANT-APPELLANT**

**APP. 81-78**

**Superior Court of New Jersey, Law Division (Criminal), Burlington County**

*170 N.J. Super. 44; 405 A.2d 477; 1979 N.J. Super. LEXIS 887*

**August 2, 1979**

**PRIOR HISTORY:** [\*\*\*1]

On appeal from Burlington Township Municipal Court.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a decision of the Burlington Township Municipal Court (New Jersey) that convicted defendant of speeding 68 miles per hour in a 55 miles per hour zone. Before the court was the scientific reliability of the K55 Radar Speed Detection Device a state trooper used to cite defendant for speeding.

**OVERVIEW:** Defendant challenged a trial court's decision that convicted defendant of speeding 68 miles per hour in a 55 miles per hour zone. The issue of the scientific reliability of the K55 Radar Speed Detection Device (K55) was before the court for a plenary trial de novo without a jury based on the trial judge's unchallenged assumption of reliability of the K55. The court held that a properly calibrated K55 installed in a car with a calibrated speedometer had a high degree of scientific and operational reliability when used in either stationary or moving mode and when used in the manual position by a person having at least three hours of classroom training and two to three hours of practical instruction together with some minimum experience prior to use in actual law enforcement. The court determined that the state trooper's 80 hours of experience was sufficient beyond doubt. If the trooper had operated the K55 in the automatic position, the K55's operational reliability would have been subject to greater question, and acceptance of readings while in that position would have hinged on detailed examination of the surrounding circumstances as well as the trooper's experience and training.

**OUTCOME:** The court held that there was a high probability that the K55 Radar Speed Detection Device a state trooper operated was scientifically and operationally reliable when used in stationary or moving mode and in the manual position. The trooper had at least three hours of classroom training and at least two to three hours of practical instruction. The trooper's 80 hours of experience prior to use in actual law enforcement was sufficient beyond doubt.

**CORE TERMS:** speed, frequency, target, signal, patrol car, radar, reliability, microwave, lock, processing, circuitry, trooper, transmitted, electronic, stationary, traffic, training, approaching, transmitter, automatic, distance, energy, high

frequency, identification, centerline, strongest, display, manual, cosine, radio

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > General Overview***

[HN1] *N.J. Ct. R. 3:23-8(a)* authorizes the appellate court to hold a plenary trial de novo without a jury where the rights of defendant were prejudiced below.

#### ***Evidence > Scientific Evidence > General Overview***

[HN2] Before the results of any scientific test may be admitted in evidence it must be shown that the equipment or the methodology used has a high degree of scientific reliability and that the test is performed by qualified persons.

#### ***Evidence > Scientific Evidence > General Overview***

[HN3] The operational reliability of the K55 Radar Speed Detection Device is largely dependent upon the training and experience of the policemen who use it. The average person engaged in traffic control work can learn to use the radar speedometer after about one and one-half hours of instruction.

### **COUNSEL:**

*Mr. George Ciszak* for respondent (*Mr. John J. Degnan*, Attorney General of New Jersey, attorney).

*Mr. Allen Etish* for appellant (*Messrs. Greenberg, Shmerelson, Weinroth and Etish*, attorneys).

### **JUDGES:**

Wells, J.S.C.

### **OPINION BY:**

WELLS

### **OPINION:**

[\*45] [\*\*478] This is an appeal from defendant's municipal court conviction for speeding 68 m.p.h. in a 55 m.p.h. zone. At the request of defendant, and with the State's consent, the court opened the record below for the sole purpose of determining the scientific reliability of the K55 Radar Speed Detection Device. Defendant's conviction rests on a speed reading displayed by the K55 in State Trooper Albert J. Dempster's troop car as he and defendant approached one another, Trooper Dempster in a northbound lane and defendant in a southbound lane, on Route 295.

Because defendant, unrepresented below, did not raise it, and because both defendant and the State, on this appeal, advised the court that questions about the reliability of the K55 were affecting the administration of justice in the municipal courts, the court believed limited reopening of the record was warranted. [HN1] [\*\*\*2] *R. 3:23-8(a)* authorizes the appellate court to hold a "plenary trial *de novo* without a jury" where "the rights of defendant were prejudiced below." Because prejudice to defendant could only have arisen from the municipal judge's unchallenged assumption of reliability of the K55, the trial *de novo* is limited to that issue. All other matters will be decided on the record below.

Further authority, by analogy, is found in two recent instances in which the Appellate Division, itself, returned

170 N.J. Super. 44, \*45; 405 A.2d 477, \*\*478;  
1979 N.J. Super. LEXIS 887, \*\*\*2

cases to the [\*46] trial court for plenary hearings on the scientific reliability of devices used in law enforcement. *State v. Hibbs*, 123 N.J. Super. 108 (App.Div.1972), on remand 123 N.J. Super. 152 (Cty.Ct.1972), aff'd 123 N.J. Super. 124 (App.Div.1973); *State v. Boyington*, 153 N.J. Super. 252 (App.Div.1977).

The legal criteria to be applied in admitting scientific evidence are well established. [HN2] Before the results of any scientific test may be admitted in evidence it must be shown that the equipment or the methodology used has a high degree of scientific reliability and that the test is performed by qualified persons. *State v. Chatman*, 156 [\*\*\*3] N.J. Super. 35, 38 (App.Div.1978).

Speed-measuring radar in various forms has been accepted since *State v. Dantonio*, 18 N.J. 570 (1955). See *State v. Overton*, 135 N.J. Super. 443 (Cty.Ct.1975) (Mark VIA), and *State v. Boyington*, [\*\*479] 159 N.J. Super. 426 (Law Div.1978) (Decatur Ra-gun); *State v. Musgrave*, 169 N.J. Super. 204 (Law Div.1979) (K55 Speed Detection Device held reliable). This last decision is, of course, entitled to, and has received, great respect as that of a court of coordinate jurisdiction, but it does not appear that Judge Wichman heard conflicting expert testimony and, accordingly, this court offers its opinion on the same issue to analyze the reliability of the K55 in light of expert criticism.

Four experts, two called by each side, testified. In addition, the State called Trooper Dempster. The State's witnesses were principals of MPH Industries, manufacturer and distributor of the K55. The first witness, Robert E. Patterson, who built a crystal radio at age 10, is "entirely responsible for the total technical design and construction and manufacture of the K55 radar." He is a high school graduate with two years of [\*\*\*4] college, graduated from the Army's Signal School at Fort Monmouth and ended his military career as head of maintenance of school equipment at the Missile Guidance School at Redstone Arsenal. This military career gave Patterson extensive theoretical and [\*47] practical knowledge of radar of all types. Patterson, after his military discharge, held successive jobs as chief electrical engineer at several companies in the electronics and radar industry in each of which degreed engineers reported to him. He holds five patents in various types of electronic circuitry design and built the first solid state cardiac monitors; he has also designed or contributed to the design of music amplification equipment, police radar (before the K55) and cardiac telemetry equipment. These devices depend on a common thread of theory and practical technology applicable to radar-informed speed measuring equipment and, in several instances, Patterson was in the forefront of the developing technology which finally emerged in various speed measuring radar devices.

The second State's witness was Edward Walker Sergeant. His qualifications are detailed in *State v. Musgrave*, *supra*. In this case Sergeant [\*\*\*5] testified solely about the training programs offered by MPH, and, in particular, about the one he gave to a class of New Jersey State Troopers among whom was Trooper Dempster.

The defense's experts were Andrew L. Soccio and Dr. Leo Nichols. Soccio's qualifications are outlined later in this opinion. Dr. Nichols possesses a B.S. in Electrical Engineering from Virginia Military Institute, a Master of Science in Electrical Engineering from Ohio State and a Ph.D. in the same subject from Virginia Polytechnic Institute. Although Dr. Nichols holds a license as a professional engineer in Virginia, his primary profession is that of teacher, having risen from an instructor to his present position as head of the Department of Electrical Engineering at Virginia Military Institute, a job he has held for 11 years. He has taught basic electric circuits, thermodynamics and microwave theory and techniques. He has testified as an expert many times in several states on the theory and operation of traffic radar.

It is from the testimony of these witnesses, and Trooper Dempster, that the court makes its findings on all aspects of the [\*48] theory and operational characteristics of the K55 [\*\*\*6] and, finally evaluates its reliability.

#### *Principles of Doppler Radar*

It is necessary to review certain basic ideas in order to understand the K55 and to describe its limitations.

Engineers generally depict radiant energy as moving in an undulating wave form pattern called "cycles." The number of cycles passing a given point in a given period of time is called "frequency." In music, the frequency at which sound reaches the ear determines the pitch people hear. Middle C on the piano, for example, when played, produces a

sound wave at a frequency of X cycles a second, and the C one octave above middle C will generate a sound wave at 2X cycles a second. The higher the frequency, the higher the pitch will be. Note at the outset that this relationship between frequency and pitch is direct and not affected [\*\*480] by other factors. For instance, it makes no difference how loudly or how softly you play middle C, or if you play it loudly and the octave C softly, the two sound waves produced will still reach the ear at the same frequency, X and 2X cycles a second. Nor does distance from the source of the sound make a difference. If a pianist in a concert hall plays middle [\*\*\*7] C, that note is heard as middle C whether a listener is in the front row or in the last balcony row.

So far, we have considered a stationary source of sound waves. Let us now take a moving source. Assume a passenger at a station awaiting a train. Down track the train approaches at 50 m.p.h. The engineer blows his whistle, which sounds a single high-pitched note. The awaiting passenger will hear that single note slide up the scale or, as we have just learned, its frequency increases. This natural phenomenon, imparting the vaguely romantic wailing sound of approaching or receding train whistles, is the Doppler effect (or "shift") at an audible frequency. Note once again the strength of the source (*i.e.*, [\*49] whether the whistle blows loudly or softly) or its distance from the listener has no bearing on the effect -- the pitch will slide up the scale, regardless of these factors as the train approaches. Furthermore, by definition, the Doppler effect cannot be heard from a stationary source. The frequency changes only with movement of the source.

All radar, including the K55, transmit or broadcast high frequency microwave energy which emanates from the transmitter [\*\*\*8] in the cycle pattern and "echoes" back to the source. Sound, of course, does this too, but the reflector must be quite large whereas, with microwaves, small objects can and do reflect them.

If either the source of the microwave transmission is moving or a reflecting object is moving, the Doppler shift occurs. Thus if a person sitting in the moving source could "hear" microwaves, he would note a change in frequency of the returning cycles: increased frequency if the reflector is moving toward him (as in the case of the road or an approaching car) and decreased frequency if the reflector is moving away. Physicists have measured the frequency change and expressed the measurements in one of those simple, elegant formulae to which all nature appears ultimately reducible:

$$f[\text{dop}] = 2vf/c$$

where f[dop] is the frequency of the returning microwaves, v is the velocity (speed) of the reflector, f is the transmitted frequency from the microwave source and c is the speed of light. Since c is always constant and the transmitter sends out microwaves of a known f, the only variable in this formula is v. Note, once again, that distance between source and reflector is absent from the [\*\*\*9] formula as is any factor for the strength of either the transmitted or echoed energy.

[\*50] *Description of the K55 -- Its Implementation of Doppler Principles*

The K55 unit is a small rectangular instrument which resembles a digital clock radio with switches, buttons and two windows on its face, one for patrol car speed and one for target vehicle speed. These readings appear as lighted, red digital numbers on a black background much as a digital clock or modern calculator. When no readings are being displayed, only the black background can be seen. The set is secured to the dashboard of the patrol car directly behind the steering wheel and can be readily seen either over or through the wheel. It is so small that it cannot obstruct the driver's vision through the windshield. The set can be plugged into the vehicle's power source in several ways, one of which is through the cigarette lighter, and it comes with an antenna and transmitter-receiver which is secured to the center of the dashboard.

The transmitter-receiver and antenna are constructed of standard components based on well known and accepted technology for the transmission and reception of high-frequency energy. [\*\*\*10] The K55 does not use any experimental, new or patentable component or process in the antenna or transmitter-receiver. [\*\*481] Every transmitter is factory-tested with instruments which derive their accuracy from the National Bureau of Standards in

170 N.J. Super. 44, \*50; 405 A.2d 477, \*\*481;  
1979 N.J. Super. LEXIS 887, \*\*\*10

Washington, D.C. The transmitter-receiver has also been tested by an independent concern to verify that it transmits at the frequency assigned to enforcement radar by the F.C.C.

When the set is turned on and calibrated n1 it may be operated in two modes: stationary and moving. n2 Each mode may be [\*51] controlled in either manual or automatic position. n3 With the antenna pointed straight out the windshield over the imaginary centerline of the patrol car and the power on, the transmitter will emanate a large lobe of high frequency microwave energy down the road. The set may be adjusted to give audible warning of a motorist approaching in excess of a predetermined speed; but the warning signal is not a prerequisite to reliable operation. The machine displays readings continuously for speeds between 20 m.p.h. and 99 m.p.h.

n1 Calibration is accomplished with the use of two tuning forks, the accuracy of which must be the subject of documentary proof. Use of the K55 does not eliminate the need for such proof. *Cf. State v. Overton, 135 N.J. Super. 443 (Ct.1975).*

[\*\*\*11]

n2 The "mode" of operation refers to what the patrol car does. In the stationary mode, the car is parked roughly parallel to the road directed at oncoming traffic. In the moving mode the patrol car operates in traffic and tracks vehicles approaching it in the opposite lane. All findings herein apply *equally* to both modes of operation.

n3 The difference is important and is explained in the text at pages 52-54.

As the patrol car moves over the road, the microwaves reflected from the road will arrive back at the receiver at a frequency, predicted by the Doppler formula, varying with the speed of the patrol car. Let us call that frequency, frequency "X". Now assume a target vehicle approaches the patrol car. Microwaves reflected from the target vehicle will arrive back at the receiver at a frequency predicted by the Doppler formula varying with the sum of the speeds of both cars. Let us call that frequency, frequency "Y". Virtually by definition, frequency X will always be less than frequency Y. In the stationary mode only the high frequency "Y" is received and computed into [\*\*\*12] a readable speed.

Thus, in the case of vehicles approaching one another ("closing") there are two returning frequencies, X and Y, both higher than the frequency originally transmitted, but Y always being greater than X. Because the transmitted frequency is constant, it can be dropped from further consideration and attention focused on the difference between X and Y, and they can now be called the low frequency (X) and high frequency (Y) returns.

We are now finished with the Doppler effect. All the rest of the K55 is devoted to processing the low and high frequency [\*52] return signals into a readable speed in miles per hour of the patrol car and target vehicle. But review what has been accomplished: Because of a single variable, speed, in one case relative to the road and, in another case, relative to a closing vehicle, two completely distinct frequencies have been generated, which can be computed into the speeds that generated them.

#### *Description of the K55 -- Signal Processing & Digital Units*

The high and low frequency returns from the receiver flow into the signal processing and digital unit of the K55. A precise technical description of the components and circuitry [\*\*\*13] of the signal processor would take hundreds of pages, but the court finds that all of its individual components are standard and used in the K55 within their respective design limitations. The components are manufactured by reputable concerns such as RCA and Texas Instruments and

are available generally on the wholesale or retail market for a wide variety of uses in electronic circuits, from radios and pacemakers to satellite telemetry. They all have known and accepted parameters of performance and durability in the industry.

Although the exact combination of components comprising the circuitry of the signal processing unit may be unique to the [\*\*482] K55 (in one case a patent is pending with respect thereto), the overall circuitry design is also within industry-known, and accepted, electronic theory and practice. Neither the function nor the efficiency of any component is frustrated by its particular use or placement within the design of the signal processing unit.

The signal processing unit has ten functions, all of which it performs more or less simultaneously and in milliseconds: (1) it amplifies the high and low frequency returns from the receiver; (2) it filters out [\*\*\*14] frequencies resulting in patrol car speed of less than 20 m.p.h.; (3) it separates the signal into low and high [\*53] frequency channels of parallel design, and as to each channel, (4) it filters random frequencies (commonly referred to as "noise") from the Doppler frequency being returned; (5) it tracks and locks on the Doppler frequencies and verifies them as the frequencies to be computed into vehicle speeds and, in the case of the high frequency channel; (6) it passes the now clear and verified signal into a subtractor, and in the case of the low frequency channel; (7) it passes one part of the signal directly to a digital computer unit which computes and displays patrol car speed in miles per hour; meanwhile (8) it passes the other part of the low frequency signal into the subtractor where, (9) it subtracts the high and low frequency signals and (10) it computes and displays the target speed in miles per hour.

The processing unit sweeps through these functions so quickly that a newly computed reading arrives at the viewing window about 15 times a second. In the manual mode the reverification and computing process is continuous throughout the time and distance the vehicles [\*\*\*15] are closing and thus permits the officer to lock in a reading manually when, in his judgment, the target has been properly identified and the reading stabilizes. In contrast, in the automatic mode, the K55 itself, automatically, locks in the first reading computed from a discerned signal. MPH does not recommend the use of this position and present State Police policy forbids it.

One of the most important overall operations of the machine that emerges from the ten-step process described above causes it to focus on or to tune to, precisely and automatically, the strongest frequencies being passed to it by the receiver. To use a mundane simile, also from the law enforcement field, the K55 acts like a well-trained bloodhound, who once given an example of the target scent, wants to, and can, filter out or discriminate between all the other distracting scents its nose senses and track the target scent. This simile, however, should not be misunderstood. The "strongest" signal to a radar may not mean the [\*54] fastest car. Thus, as we shall see, signal strength depends on proximity to the transmitter and thus a slower target may well dominate the radar to the exclusion of a faster, [\*\*\*16] but more distant, target.

#### *The Technical Challenge*

After extensive direct and *voir dire* examination, Andrew L. Soccio was permitted to testify for the defense as a highly experienced technician in the field of electronic circuits. Soccio is not a physicist, scientist or engineer; he has not designed a radar-informed speed measuring device from scratch. But he is entirely familiar with electronic circuitry, the various components that comprise modern circuitry and the various methods common in testing such circuitry. Soccio can build a complex electronic circuit from a schematic diagram; he can analyze its function; test performance of that function and evaluate its performance. The court believes that in certain cases Soccio has the experience to design or redesign electronic circuitry to improve its intended function or increase its efficiency. After a wide variety of experience in various jobs in the electronics industry, Soccio opened his own business which is devoted to troubleshooting and repair of traffic radars in South Jersey. He has not, under contract or otherwise, serviced the K55.

Soccio's qualifications did not include extensive or intimate knowledge [\*\*\*17] of the K55. He disassembled one in Florida this winter and examined certain parts of its signal processing unit for about an hour; he observed [\*\*483]

K55s in operation on police cars for about six hours, and he obtained and copied a partial schematic diagram of the signal processing unit issued by MPH to police departments for making repairs. Using this schematic, Soccio built, in his home laboratory, out of standard components, two elements of the circuitry in the signal processing unit and tested them. These elements were the "phase lock loops" and [\*55] related components used in the high and low frequency channels. (See step 5, pages 52-53, *supra*). Based on these tests it was Soccio's opinion that the phase lock loops in both the high and low frequency channels possessed too wide a latitude in which to monitor and lock on an incoming frequency. Depending on minute transient errors in voltage, the phase lock loops operating in such a latitude could lock on a wrong frequency and pass it through to be computed.

Patterson, called in rebuttal, challenged both the design of Soccio's home-made circuits because the schematic was incomplete, and his tests because they [\*\*\*18] were inadequate. It was his view that the overall design of components aligned after the phase lock loops in the circuit functioned together to nullify both the underlying assumptions of the Soccio tests and the test methods and equipment used.

Thus was framed the most important and difficult single issue in this case: to believe the architect of the K55 or the technically astute opposing witness. After due consideration the court is satisfied that the Soccio tests do not raise a reasonable doubt as to the technical capability of the signal processing unit of the K55 to turn the high and low Doppler frequencies into accurate readings of patrol car and target speeds. The court is not satisfied that there was sufficient similarity in all necessary respect between the Soccio prototypes and the actual, complete circuitry of the K55. Furthermore, the court does not believe the test methods used by Soccio were sufficiently accurate to ground the broad opinion he gave on the K55's potential for displaying undetected, erroneous readings to a reasonably skilled operator.

#### *The Operational Challenge*

The operational challenge to the K55 was grounded in the testimony of Dr. Nichols. [\*\*\*19] He highway-tested the K55 in both Ohio and Florida for about 20 hours altogether. On these occasions, accompanied by others, he operated the K55 himself [\*56] and observed others do so. All the participants were civilians with engineering training and experience. No K55-trained policemen assisted, nor had anyone performing the tests received training from MPH. In at least one instance the test was financed by Fuzzbuster, a manufacturer of traffic radar countermeasures.

In Florida six makes of radar were operated in a single vehicle, calibrated and tested for interference with internal noises such as generators, fans and the like. Then the vehicle, with the radars switched on in pairs, was driven on randomly selected highways in Miami and its environs. No written record of the tests were made, nor were any targets of known speed run through the radars. The radars were operated in both stationary and moving modes and in manual and automatic positions. Based on this experience and his own academic background Nichols' thoughts fell into four general problem areas: (1) problems of target identification where there were several possible targets approaching; (2) problems of [\*\*\*20] cosine error resulting in computation of lower-than-actual patrol car speed; (3) problems of internal and external mechanical, radio or microwave frequency interference, and (4) problems of a subjective nature. In all of these areas the K55 seemed to be most prone to potential error where it was switched to the automatic position.

Dr. Nichols identified two sources of difficulty relating to target identification. Both problems arise from the necessity to decide which of several possible targets is actually generating the speed readout.

As indicated on pages 53-54, one of the design characteristics of the K55 is to track, hold and verify the [\*\*\*484] strongest frequency being echoed to it. In practice, the strongest return frequency is usually that which is closest to the receiver. Thus, MPH in its Operator's Manual directs:

Care should be taken by the operator that he recognize the violator is traveling at a higher rate of speed than the norm, *that the vehicle is out in front, by itself, nearest the radar.* [Emphasis supplied]

[\*57] But Nichols testified that a large target, rather than one closer to the patrol car, may actually be reflecting

the strongest [\*\*\*21] signal. Thus, if a truck is following a Volkswagen the K55 may compute the truck's speed rather than the Volkswagen's, contrary to the above-quoted identification rule. He also pointed out that some materials and shapes are better reflectors than others and could result in a more distant target, producing the reading, if made of such materials or in such shapes.

The court is satisfied that this problem could and probably does occur in a very close-following situation, and policemen should be alerted to the possibility of an incorrect identification. But Dr. Nichols gave no guidance whatsoever as to what was "close following." He apparently could not and did not say whether at 50 feet, 25 feet or at what distance between the approaching truck or Volkswagen, the rearward truck would begin to produce the stronger signal. Thus, the court finds the above-quoted rule a reasonably reliable guide on which to base identifications in the situation described.

Dr. Nichols also sought to describe target-identification problems where a possible violator was closer to the centerline of the transmitted microwaves than a target nearer in distance to the transmitter. He (as well as other witnesses) [\*\*\*22] described the imaginary extended centerline of the patrol car (with the antenna so aligned) as the line of maximum transmitted power, and suggested that a return signal along that line would also be strongest. He pointed out that signal strength falls off far less as one moves away from that centerline than it does as one moves away from the transmitter. It has been found that one-half of the energy transmitted lies within an angle of 8 degree on either side of the centerline and, Dr. Nichols estimated, if the sides of that angle are carried out as much as 1500 feet from the patrol car, 85% of all the transmitted energy would lie within it. According, to Dr. Nichols, therefore, a target physically closer to the centerline, but more distant from the patrol car than the target nearest the patrol car, *might* produce a reading. An [\*58] unwary policeman *might* attribute that reading to the vehicle closest to the patrol car, thus resulting in an unjust arrest.

But Dr. Nichols' views in this respect were unsupported by any precise measurements or detailed tests. None of his highway tests was performed under controlled conditions. No experimental results or theoretical [\*\*\*23] models were adduced to demonstrate Dr. Nichols' theories, to any degree of scientific probability, that a nearer target would produce a signal less strong than a more distant one, notwithstanding such distant target's proximity to the centerline of the micro-move-energy lobe. In fact, in most situations presented him, Dr. Nichols appeared to believe the nearest vehicle to the patrol car would generate the reading. Because it is true that signal strength (not frequency and hence not accuracy of a reading) falls off by the square of the distance from the transmitter, the court finds it more probable that that distance is, in fact, the key one, and therefor, once again, finds the quoted rule of identification reasonably reliable.

Dr. Nichols described cosine error as that error in target speed, which results from the fact that the Doppler frequency reflects along the line between the target to the patrol car, whereas the target is actually moving, not straight at the patrol car, but at an angle to it. Because of the trigonometric function of the cosine, which is always less than 1, the error always favors the target, i.e., displayed target speed is less than the actual target speed. [\*\*\*24] But Dr. Nichols also theorized cosine error could reduce the display of patrol car speed. This is, potentially, a serious matter since reduced patrol car speed would result in false, [\*\*485] higher target speed readings. Thus, if a huge sign or a long building with a long reflective surface on the side of the road reflected a signal stronger than that of the road and thereby generated the low frequency return for computing the patrol car's speed, the angle of such an object relative to the motion of the car might theoretically reduce the patrol car's speed reading by the cosine error.

[\*59] However, the court determines such situation would be necessarily rare, and the reading generated, transitory. Moreover, an alert officer, checking his patrol car readout against his speedometer, should note dropping speed and reject any target speeds obtained in that situation. Accordingly, the court determines that while cosine error as it affects patrol car readout may be a theoretical problem, its significance in routine traffic situations is not such as to raise a reasonable doubt as to the reliability of the K55 when operated by a trained and experienced officer.

Dr. Nichols [\*\*\*25] also testified to internal and external sources of interference with the K55 which can produce spurious speed readings. The K55 possesses circuitry designed to filter out most internal and some external

interference. Like all radar devices, the K55 can, and does, receive signals other than that which it originally transmitted. A wide variety of devices in relatively common use transmit electromagnetic energy at frequencies at or close to those assigned by the F.C.C. to police radar. Depending on the strength of these signals, which again depends on how close the source is to the K55, a speed reading can appear.

The signal processing unit may itself reject the signal and cause the reading to go blank, or the reading will be erratic, or so high or low as to tip the operator off at once that electronic interference may be present. Nonetheless, troopers are trained not to use their own radios when patrolling for speeders and to be mindful of the use of CB radios in the vicinity of the patrol area. Airports and even low strung high tension wires may also be common trouble spots. State and local police may well be advised to begin to catalog, within their respective jurisdictions, [\*\*\*26] the existing sources, strength, frequency, range and direction of radiated energy which might intersect with or flow over the roads and highways. Armed with such information, tests could be run to determine the effect, if any, on the K55.

By so suggesting, however, the court does not wish to leave the impression that external radio or microwave interference [\*60] seriously detracts from the reliability of the K55. The court is satisfied that the chance of an undetected interference increasing a speed reading, to the detriment of a motorist, is so remote as not to raise a reasonable doubt under the "high degree" of reliability standard here at issue. Absolute perfection, of course, is not required.

As a result of his Florida tests, Dr. Nichols expressed certain subjective reservations about the K55. He expressed concern over the practical difficulties of target identification in the multiple-lane, heavy traffic situation, and surprise at the variety of response times in the various radars and the differences between them in the speed with which they repeated their readings. He stated the K55 did not give him "the personal satisfaction that it was as stable and as reliable [\*\*\*27] in the quickness with which it reached a reading that seemed to satisfy the physical situation as the others." He also stated, "it seemed to be more erratic to me. It went up too far or down too far. The swings were more violent. Ultimately it would stabilize and come back and give an adequate and satisfactory reading."

Considering the qualifications of Dr. Nichols, these observations are entitled to respect. In fact, to the extent he notes that the K55 did come to an "acceptable" reading as compared with other radars, he points to the sensitivity of the K55 in the manual position in rejecting spurious readings or other transitory phenomenon. Since Dr. Nichols was as critical of the automatic position, with its ability to lock in a transitory reading, as Patterson, the court finds it difficult to understand his subjective feeling about the K55. In any event, such feelings do not raise a reasonable doubt in [\*\*486] the court's mind as to the reliability of the K55 when operated in the manual position.

#### *Ghosts and Shadows*

Every law enforcement tool, whether it be a radar set or a bloodhound, must be understood and used within its inherent [\*61] limitations. The [\*\*\*28] K55, as all radar, has such limitations. Transmitted signals echo randomly from anything the microwaves reach and sometimes that signal, echoed from a tree, fence or billboard, will a second time be reflected from a moving object out of the trooper's visual range and be received and processed as a speed reading. These are "ghost" readings -- spurious speed readings of unseen vehicles or stationary objects. He who seriously reports tracking speeding trees with the K55 is either a fool or a knave, since such a report presents an inherent conflict with the underlying Doppler principle.

Such ghosts will be either so transitory or display such erratic readings that any experienced operator will at once recognize them. Moreover, ghosts will always be banished by a stronger signal because the K55 functions to find the lock on the strongest signal returning to it. Ghost readings cannot add to or detract from the speed of a real target. None of the experts challenged its reliability in that respect.

"Shadowing" occurs when the patrol car closely follows or is overtaken by a truck or large car with the K55 on in the moving mode. The signal usually returning from the road surface may [\*\*\*29] now be temporarily supplanted by

the stronger signal returning from the vehicle in front. Since that vehicle is traveling slower relative to the patrol car than the road was, the viewer will notice an apparent decrease in the speed reading of the patrol car. Any reading taken on a target vehicle under such conditions would be inaccurate. n4 But the evidence is clear that State Troopers are trained to check continually, while in the moving mode, the K55 display of patrol car speed with the speedometer. Any difference between the K55's reading and the speedometer is a trouble sign that will suggest caution on the part of the trooper in relying on a target speed reading.

n4 See, also, the discussion, at 58, regarding reduced patrol car speed as the result of cosine error.

#### [\*62] *Training*

The court finds that [HN3] the operational reliability of the K55 is largely dependent upon the training and experience of the policemen who use it. In *State v. Dantonio*, 18 N.J. 570, 573-574 (1955), the court [\*\*\*30] quotes a law review article stating that "the average person engaged in traffic control work can learn to use the radar speedometer after about one and one-half hours of instruction." Judged by that standard, the State Police get ample instruction in theory and practice on the K55. Trooper Dempster, for instance, received a full day of classroom and "hands on" practical instruction from MPH, Inc., representatives, and then "practiced" with the machine in his own patrol car 80 hours before he arrested violators. Such a level of instruction and experience acquaints the officers with the technical capability of radar as well as practical use in everyday traffic situations. For instance, like our bloodhound who cannot, having found the source of the scent, identify it as a vicious criminal or a lost child, so also cannot the K55 identify the speeding vehicle: the officer using it must do that. Troopers are taught a three-step procedure when the K55 displays a target speed: (1) identify the probable target producing the reading; (2) lock in the speed, and (3) compare visually the speed displayed with the officer's own estimate of the target's speed. This must be a complex procedure [\*\*\*31] requiring well-coordinated eye and hand movement as well as the exercise of quick judgment. The officer must, also, be monitoring his own speedometer with that of the K55's readout on patrol car speed and driving his car with safety. With some traffic patterns, such as heavy approaching traffic in multiple lanes where no [\*\*487] one car is clearly in front, it will always be difficult if not impossible to identify a target. But experience should quickly expose such situations.

In view of the above, however, and the high degree of skill and judgment required to operate the K55 reliably, it is the [\*63] court's view that periodic follow-up training be instituted in order to verify continuing qualification as a K55 operator. Moreover, the skill and judgment of troopers who themselves instruct in its use should be most carefully evaluated.

Finally, it is clear from the testimony of all the witnesses, that the K55 should not be operated in the "automatic" position in either the moving or stationary mode. That is present State Police policy and should remain so. By "automatic" in the sense used here, is meant that position on the K55 which "automatically" locks on the [\*\*\*32] first echo it receives and processes that echo to a readout and will not then process further echoes. Thus may be instantaneously captured an interfering signal or a ghost which would not be reflected from the visible target.

#### *Conclusion*

For all the reasons stated above the court determines that a properly calibrated K55 Speed Detection Device installed in a car with a calibrated speedometer has a high degree of scientific and operational reliability when used in either stationary or moving mode, in the manual position by a person having at least three hours of classroom training and two to three hours of practical instruction together with some minimum experience prior to use in actual law enforcement. The court, on the record before it, cannot specify what the minimum experience should be but holds that 80 hours is, beyond doubt, sufficient.

When operated in the automatic position the operational reliability of the K55 is subject to greater question, and

170 N.J. Super. 44, \*63; 405 A.2d 477, \*\*487;  
1979 N.J. Super. LEXIS 887, \*\*\*32

acceptance of readings while in that position must hinge to a far greater extent on detailed examination of the surrounding circumstances as well as the experience and training of the operator.

[\*64] In view of [\*\*\*33] the holding above, the court will shortly schedule argument on any and all other issues defendant may choose to raise on the record below relevant to his conviction.

**STATE OF NEW JERSEY, PLAINTIFF-RESPONDENT, v. DOUGLAS  
WOJTKOWIAK, DEFENDANT-APPELLANT**

**APP. 81-78**

**Superior Court of New Jersey, Law Division (Criminal), Burlington County**

*170 N.J. Super. 44; 405 A.2d 477; 1979 N.J. Super. LEXIS 887*

**August 2, 1979**

**PRIOR HISTORY:** [\*\*\*1]

On appeal from Burlington Township Municipal Court.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a decision of the Burlington Township Municipal Court (New Jersey) that convicted defendant of speeding 68 miles per hour in a 55 miles per hour zone. Before the court was the scientific reliability of the K55 Radar Speed Detection Device a state trooper used to cite defendant for speeding.

**OVERVIEW:** Defendant challenged a trial court's decision that convicted defendant of speeding 68 miles per hour in a 55 miles per hour zone. The issue of the scientific reliability of the K55 Radar Speed Detection Device (K55) was before the court for a plenary trial de novo without a jury based on the trial judge's unchallenged assumption of reliability of the K55. The court held that a properly calibrated K55 installed in a car with a calibrated speedometer had a high degree of scientific and operational reliability when used in either stationary or moving mode and when used in the manual position by a person having at least three hours of classroom training and two to three hours of practical instruction together with some minimum experience prior to use in actual law enforcement. The court determined that the state trooper's 80 hours of experience was sufficient beyond doubt. If the trooper had operated the K55 in the automatic position, the K55's operational reliability would have been subject to greater question, and acceptance of readings while in that position would have hinged on detailed examination of the surrounding circumstances as well as the trooper's experience and training.

**OUTCOME:** The court held that there was a high probability that the K55 Radar Speed Detection Device a state trooper operated was scientifically and operationally reliable when used in stationary or moving mode and in the manual position. The trooper had at least three hours of classroom training and at least two to three hours of practical instruction. The trooper's 80 hours of experience prior to use in actual law enforcement was sufficient beyond doubt.

**CORE TERMS:** speed, frequency, target, signal, patrol car, radar, reliability, microwave, lock, processing, circuitry, trooper, transmitted, electronic, stationary, traffic, training, approaching, transmitter, automatic, distance, energy, high

frequency, identification, centerline, strongest, display, manual, cosine, radio

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > General Overview***

[HN1] *N.J. Ct. R. 3:23-8(a)* authorizes the appellate court to hold a plenary trial de novo without a jury where the rights of defendant were prejudiced below.

#### ***Evidence > Scientific Evidence > General Overview***

[HN2] Before the results of any scientific test may be admitted in evidence it must be shown that the equipment or the methodology used has a high degree of scientific reliability and that the test is performed by qualified persons.

#### ***Evidence > Scientific Evidence > General Overview***

[HN3] The operational reliability of the K55 Radar Speed Detection Device is largely dependent upon the training and experience of the policemen who use it. The average person engaged in traffic control work can learn to use the radar speedometer after about one and one-half hours of instruction.

### **COUNSEL:**

*Mr. George Ciszak* for respondent (*Mr. John J. Degnan*, Attorney General of New Jersey, attorney).

*Mr. Allen Etish* for appellant (*Messrs. Greenberg, Shmerelson, Weinroth and Etish*, attorneys).

### **JUDGES:**

Wells, J.S.C.

### **OPINION BY:**

WELLS

### **OPINION:**

[\*45] [\*\*478] This is an appeal from defendant's municipal court conviction for speeding 68 m.p.h. in a 55 m.p.h. zone. At the request of defendant, and with the State's consent, the court opened the record below for the sole purpose of determining the scientific reliability of the K55 Radar Speed Detection Device. Defendant's conviction rests on a speed reading displayed by the K55 in State Trooper Albert J. Dempster's troop car as he and defendant approached one another, Trooper Dempster in a northbound lane and defendant in a southbound lane, on Route 295.

Because defendant, unrepresented below, did not raise it, and because both defendant and the State, on this appeal, advised the court that questions about the reliability of the K55 were affecting the administration of justice in the municipal courts, the court believed limited reopening of the record was warranted. [HN1] [\*\*\*2] *R. 3:23-8(a)* authorizes the appellate court to hold a "plenary trial *de novo* without a jury" where "the rights of defendant were prejudiced below." Because prejudice to defendant could only have arisen from the municipal judge's unchallenged assumption of reliability of the K55, the trial *de novo* is limited to that issue. All other matters will be decided on the record below.

Further authority, by analogy, is found in two recent instances in which the Appellate Division, itself, returned

170 N.J. Super. 44, \*45; 405 A.2d 477, \*\*478;  
1979 N.J. Super. LEXIS 887, \*\*\*2

cases to the [\*46] trial court for plenary hearings on the scientific reliability of devices used in law enforcement. *State v. Hibbs*, 123 N.J. Super. 108 (App.Div.1972), on remand 123 N.J. Super. 152 (Cty.Ct.1972), aff'd 123 N.J. Super. 124 (App.Div.1973); *State v. Boyington*, 153 N.J. Super. 252 (App.Div.1977).

The legal criteria to be applied in admitting scientific evidence are well established. [HN2] Before the results of any scientific test may be admitted in evidence it must be shown that the equipment or the methodology used has a high degree of scientific reliability and that the test is performed by qualified persons. *State v. Chatman*, 156 [\*\*\*3] N.J. Super. 35, 38 (App.Div.1978).

Speed-measuring radar in various forms has been accepted since *State v. Dantonio*, 18 N.J. 570 (1955). See *State v. Overton*, 135 N.J. Super. 443 (Cty.Ct.1975) (Mark VIA), and *State v. Boyington*, [\*\*479] 159 N.J. Super. 426 (Law Div.1978) (Decatur Ra-gun); *State v. Musgrave*, 169 N.J. Super. 204 (Law Div.1979) (K55 Speed Detection Device held reliable). This last decision is, of course, entitled to, and has received, great respect as that of a court of coordinate jurisdiction, but it does not appear that Judge Wichman heard conflicting expert testimony and, accordingly, this court offers its opinion on the same issue to analyze the reliability of the K55 in light of expert criticism.

Four experts, two called by each side, testified. In addition, the State called Trooper Dempster. The State's witnesses were principals of MPH Industries, manufacturer and distributor of the K55. The first witness, Robert E. Patterson, who built a crystal radio at age 10, is "entirely responsible for the total technical design and construction and manufacture of the K55 radar." He is a high school graduate with two years of [\*\*\*4] college, graduated from the Army's Signal School at Fort Monmouth and ended his military career as head of maintenance of school equipment at the Missile Guidance School at Redstone Arsenal. This military career gave Patterson extensive theoretical and [\*47] practical knowledge of radar of all types. Patterson, after his military discharge, held successive jobs as chief electrical engineer at several companies in the electronics and radar industry in each of which degreed engineers reported to him. He holds five patents in various types of electronic circuitry design and built the first solid state cardiac monitors; he has also designed or contributed to the design of music amplification equipment, police radar (before the K55) and cardiac telemetry equipment. These devices depend on a common thread of theory and practical technology applicable to radar-informed speed measuring equipment and, in several instances, Patterson was in the forefront of the developing technology which finally emerged in various speed measuring radar devices.

The second State's witness was Edward Walker Sergeant. His qualifications are detailed in *State v. Musgrave*, *supra*. In this case Sergeant [\*\*\*5] testified solely about the training programs offered by MPH, and, in particular, about the one he gave to a class of New Jersey State Troopers among whom was Trooper Dempster.

The defense's experts were Andrew L. Soccio and Dr. Leo Nichols. Soccio's qualifications are outlined later in this opinion. Dr. Nichols possesses a B.S. in Electrical Engineering from Virginia Military Institute, a Master of Science in Electrical Engineering from Ohio State and a Ph.D. in the same subject from Virginia Polytechnic Institute. Although Dr. Nichols holds a license as a professional engineer in Virginia, his primary profession is that of teacher, having risen from an instructor to his present position as head of the Department of Electrical Engineering at Virginia Military Institute, a job he has held for 11 years. He has taught basic electric circuits, thermodynamics and microwave theory and techniques. He has testified as an expert many times in several states on the theory and operation of traffic radar.

It is from the testimony of these witnesses, and Trooper Dempster, that the court makes its findings on all aspects of the [\*48] theory and operational characteristics of the K55 [\*\*\*6] and, finally evaluates its reliability.

#### *Principles of Doppler Radar*

It is necessary to review certain basic ideas in order to understand the K55 and to describe its limitations.

Engineers generally depict radiant energy as moving in an undulating wave form pattern called "cycles." The number of cycles passing a given point in a given period of time is called "frequency." In music, the frequency at which sound reaches the ear determines the pitch people hear. Middle C on the piano, for example, when played, produces a

sound wave at a frequency of X cycles a second, and the C one octave above middle C will generate a sound wave at 2X cycles a second. The higher the frequency, the higher the pitch will be. Note at the outset that this relationship between frequency and pitch is direct and not affected [\*\*480] by other factors. For instance, it makes no difference how loudly or how softly you play middle C, or if you play it loudly and the octave C softly, the two sound waves produced will still reach the ear at the same frequency, X and 2X cycles a second. Nor does distance from the source of the sound make a difference. If a pianist in a concert hall plays middle [\*\*\*7] C, that note is heard as middle C whether a listener is in the front row or in the last balcony row.

So far, we have considered a stationary source of sound waves. Let us now take a moving source. Assume a passenger at a station awaiting a train. Down track the train approaches at 50 m.p.h. The engineer blows his whistle, which sounds a single high-pitched note. The awaiting passenger will hear that single note slide up the scale or, as we have just learned, its frequency increases. This natural phenomenon, imparting the vaguely romantic wailing sound of approaching or receding train whistles, is the Doppler effect (or "shift") at an audible frequency. Note once again the strength of the source (*i.e.*, [\*49] whether the whistle blows loudly or softly) or its distance from the listener has no bearing on the effect -- the pitch will slide up the scale, regardless of these factors as the train approaches. Furthermore, by definition, the Doppler effect cannot be heard from a stationary source. The frequency changes only with movement of the source.

All radar, including the K55, transmit or broadcast high frequency microwave energy which emanates from the transmitter [\*\*\*8] in the cycle pattern and "echoes" back to the source. Sound, of course, does this too, but the reflector must be quite large whereas, with microwaves, small objects can and do reflect them.

If either the source of the microwave transmission is moving or a reflecting object is moving, the Doppler shift occurs. Thus if a person sitting in the moving source could "hear" microwaves, he would note a change in frequency of the returning cycles: increased frequency if the reflector is moving toward him (as in the case of the road or an approaching car) and decreased frequency if the reflector is moving away. Physicists have measured the frequency change and expressed the measurements in one of those simple, elegant formulae to which all nature appears ultimately reducible:

$$f[\text{dop}] = 2vf/c$$

where f[dop] is the frequency of the returning microwaves, v is the velocity (speed) of the reflector, f is the transmitted frequency from the microwave source and c is the speed of light. Since c is always constant and the transmitter sends out microwaves of a known f, the only variable in this formula is v. Note, once again, that distance between source and reflector is absent from the [\*\*\*9] formula as is any factor for the strength of either the transmitted or echoed energy.

[\*50] *Description of the K55 -- Its Implementation of Doppler Principles*

The K55 unit is a small rectangular instrument which resembles a digital clock radio with switches, buttons and two windows on its face, one for patrol car speed and one for target vehicle speed. These readings appear as lighted, red digital numbers on a black background much as a digital clock or modern calculator. When no readings are being displayed, only the black background can be seen. The set is secured to the dashboard of the patrol car directly behind the steering wheel and can be readily seen either over or through the wheel. It is so small that it cannot obstruct the driver's vision through the windshield. The set can be plugged into the vehicle's power source in several ways, one of which is through the cigarette lighter, and it comes with an antenna and transmitter-receiver which is secured to the center of the dashboard.

The transmitter-receiver and antenna are constructed of standard components based on well known and accepted technology for the transmission and reception of high-frequency energy. [\*\*\*10] The K55 does not use any experimental, new or patentable component or process in the antenna or transmitter-receiver. [\*\*481] Every transmitter is factory-tested with instruments which derive their accuracy from the National Bureau of Standards in

170 N.J. Super. 44, \*50; 405 A.2d 477, \*\*481;  
1979 N.J. Super. LEXIS 887, \*\*\*10

Washington, D.C. The transmitter-receiver has also been tested by an independent concern to verify that it transmits at the frequency assigned to enforcement radar by the F.C.C.

When the set is turned on and calibrated n1 it may be operated in two modes: stationary and moving. n2 Each mode may be [\*51] controlled in either manual or automatic position. n3 With the antenna pointed straight out the windshield over the imaginary centerline of the patrol car and the power on, the transmitter will emanate a large lobe of high frequency microwave energy down the road. The set may be adjusted to give audible warning of a motorist approaching in excess of a predetermined speed; but the warning signal is not a prerequisite to reliable operation. The machine displays readings continuously for speeds between 20 m.p.h. and 99 m.p.h.

n1 Calibration is accomplished with the use of two tuning forks, the accuracy of which must be the subject of documentary proof. Use of the K55 does not eliminate the need for such proof. *Cf. State v. Overton, 135 N.J. Super. 443 (Ct.1975).*

[\*\*\*11]

n2 The "mode" of operation refers to what the patrol car does. In the stationary mode, the car is parked roughly parallel to the road directed at oncoming traffic. In the moving mode the patrol car operates in traffic and tracks vehicles approaching it in the opposite lane. All findings herein apply *equally* to both modes of operation.

n3 The difference is important and is explained in the text at pages 52-54.

As the patrol car moves over the road, the microwaves reflected from the road will arrive back at the receiver at a frequency, predicted by the Doppler formula, varying with the speed of the patrol car. Let us call that frequency, frequency "X". Now assume a target vehicle approaches the patrol car. Microwaves reflected from the target vehicle will arrive back at the receiver at a frequency predicted by the Doppler formula varying with the sum of the speeds of both cars. Let us call that frequency, frequency "Y". Virtually by definition, frequency X will always be less than frequency Y. In the stationary mode only the high frequency "Y" is received and computed into [\*\*\*12] a readable speed.

Thus, in the case of vehicles approaching one another ("closing") there are two returning frequencies, X and Y, both higher than the frequency originally transmitted, but Y always being greater than X. Because the transmitted frequency is constant, it can be dropped from further consideration and attention focused on the difference between X and Y, and they can now be called the low frequency (X) and high frequency (Y) returns.

We are now finished with the Doppler effect. All the rest of the K55 is devoted to processing the low and high frequency [\*52] return signals into a readable speed in miles per hour of the patrol car and target vehicle. But review what has been accomplished: Because of a single variable, speed, in one case relative to the road and, in another case, relative to a closing vehicle, two completely distinct frequencies have been generated, which can be computed into the speeds that generated them.

#### *Description of the K55 -- Signal Processing & Digital Units*

The high and low frequency returns from the receiver flow into the signal processing and digital unit of the K55. A precise technical description of the components and circuitry [\*\*\*13] of the signal processor would take hundreds of pages, but the court finds that all of its individual components are standard and used in the K55 within their respective design limitations. The components are manufactured by reputable concerns such as RCA and Texas Instruments and

are available generally on the wholesale or retail market for a wide variety of uses in electronic circuits, from radios and pacemakers to satellite telemetry. They all have known and accepted parameters of performance and durability in the industry.

Although the exact combination of components comprising the circuitry of the signal processing unit may be unique to the [\*\*482] K55 (in one case a patent is pending with respect thereto), the overall circuitry design is also within industry-known, and accepted, electronic theory and practice. Neither the function nor the efficiency of any component is frustrated by its particular use or placement within the design of the signal processing unit.

The signal processing unit has ten functions, all of which it performs more or less simultaneously and in milliseconds: (1) it amplifies the high and low frequency returns from the receiver; (2) it filters out [\*\*\*14] frequencies resulting in patrol car speed of less than 20 m.p.h.; (3) it separates the signal into low and high [\*53] frequency channels of parallel design, and as to each channel, (4) it filters random frequencies (commonly referred to as "noise") from the Doppler frequency being returned; (5) it tracks and locks on the Doppler frequencies and verifies them as the frequencies to be computed into vehicle speeds and, in the case of the high frequency channel; (6) it passes the now clear and verified signal into a subtractor, and in the case of the low frequency channel; (7) it passes one part of the signal directly to a digital computer unit which computes and displays patrol car speed in miles per hour; meanwhile (8) it passes the other part of the low frequency signal into the subtractor where, (9) it subtracts the high and low frequency signals and (10) it computes and displays the target speed in miles per hour.

The processing unit sweeps through these functions so quickly that a newly computed reading arrives at the viewing window about 15 times a second. In the manual mode the reverification and computing process is continuous throughout the time and distance the vehicles [\*\*\*15] are closing and thus permits the officer to lock in a reading manually when, in his judgment, the target has been properly identified and the reading stabilizes. In contrast, in the automatic mode, the K55 itself, automatically, locks in the first reading computed from a discerned signal. MPH does not recommend the use of this position and present State Police policy forbids it.

One of the most important overall operations of the machine that emerges from the ten-step process described above causes it to focus on or to tune to, precisely and automatically, the strongest frequencies being passed to it by the receiver. To use a mundane simile, also from the law enforcement field, the K55 acts like a well-trained bloodhound, who once given an example of the target scent, wants to, and can, filter out or discriminate between all the other distracting scents its nose senses and track the target scent. This simile, however, should not be misunderstood. The "strongest" signal to a radar may not mean the [\*54] fastest car. Thus, as we shall see, signal strength depends on proximity to the transmitter and thus a slower target may well dominate the radar to the exclusion of a faster, [\*\*\*16] but more distant, target.

#### *The Technical Challenge*

After extensive direct and *voir dire* examination, Andrew L. Soccio was permitted to testify for the defense as a highly experienced technician in the field of electronic circuits. Soccio is not a physicist, scientist or engineer; he has not designed a radar-informed speed measuring device from scratch. But he is entirely familiar with electronic circuitry, the various components that comprise modern circuitry and the various methods common in testing such circuitry. Soccio can build a complex electronic circuit from a schematic diagram; he can analyze its function; test performance of that function and evaluate its performance. The court believes that in certain cases Soccio has the experience to design or redesign electronic circuitry to improve its intended function or increase its efficiency. After a wide variety of experience in various jobs in the electronics industry, Soccio opened his own business which is devoted to troubleshooting and repair of traffic radars in South Jersey. He has not, under contract or otherwise, serviced the K55.

Soccio's qualifications did not include extensive or intimate knowledge [\*\*\*17] of the K55. He disassembled one in Florida this winter and examined certain parts of its signal processing unit for about an hour; he observed [\*\*483]

K55s in operation on police cars for about six hours, and he obtained and copied a partial schematic diagram of the signal processing unit issued by MPH to police departments for making repairs. Using this schematic, Soccio built, in his home laboratory, out of standard components, two elements of the circuitry in the signal processing unit and tested them. These elements were the "phase lock loops" and [\*55] related components used in the high and low frequency channels. (See step 5, pages 52-53, *supra*). Based on these tests it was Soccio's opinion that the phase lock loops in both the high and low frequency channels possessed too wide a latitude in which to monitor and lock on an incoming frequency. Depending on minute transient errors in voltage, the phase lock loops operating in such a latitude could lock on a wrong frequency and pass it through to be computed.

Patterson, called in rebuttal, challenged both the design of Soccio's home-made circuits because the schematic was incomplete, and his tests because they [\*\*\*18] were inadequate. It was his view that the overall design of components aligned after the phase lock loops in the circuit functioned together to nullify both the underlying assumptions of the Soccio tests and the test methods and equipment used.

Thus was framed the most important and difficult single issue in this case: to believe the architect of the K55 or the technically astute opposing witness. After due consideration the court is satisfied that the Soccio tests do not raise a reasonable doubt as to the technical capability of the signal processing unit of the K55 to turn the high and low Doppler frequencies into accurate readings of patrol car and target speeds. The court is not satisfied that there was sufficient similarity in all necessary respect between the Soccio prototypes and the actual, complete circuitry of the K55. Furthermore, the court does not believe the test methods used by Soccio were sufficiently accurate to ground the broad opinion he gave on the K55's potential for displaying undetected, erroneous readings to a reasonably skilled operator.

#### *The Operational Challenge*

The operational challenge to the K55 was grounded in the testimony of Dr. Nichols. [\*\*\*19] He highway-tested the K55 in both Ohio and Florida for about 20 hours altogether. On these occasions, accompanied by others, he operated the K55 himself [\*56] and observed others do so. All the participants were civilians with engineering training and experience. No K55-trained policemen assisted, nor had anyone performing the tests received training from MPH. In at least one instance the test was financed by Fuzzbuster, a manufacturer of traffic radar countermeasures.

In Florida six makes of radar were operated in a single vehicle, calibrated and tested for interference with internal noises such as generators, fans and the like. Then the vehicle, with the radars switched on in pairs, was driven on randomly selected highways in Miami and its environs. No written record of the tests were made, nor were any targets of known speed run through the radars. The radars were operated in both stationary and moving modes and in manual and automatic positions. Based on this experience and his own academic background Nichols' thoughts fell into four general problem areas: (1) problems of target identification where there were several possible targets approaching; (2) problems of [\*\*\*20] cosine error resulting in computation of lower-than-actual patrol car speed; (3) problems of internal and external mechanical, radio or microwave frequency interference, and (4) problems of a subjective nature. In all of these areas the K55 seemed to be most prone to potential error where it was switched to the automatic position.

Dr. Nichols identified two sources of difficulty relating to target identification. Both problems arise from the necessity to decide which of several possible targets is actually generating the speed readout.

As indicated on pages 53-54, one of the design characteristics of the K55 is to track, hold and verify the [\*\*\*484] strongest frequency being echoed to it. In practice, the strongest return frequency is usually that which is closest to the receiver. Thus, MPH in its Operator's Manual directs:

Care should be taken by the operator that he recognize the violator is traveling at a higher rate of speed than the norm, *that the vehicle is out in front, by itself, nearest the radar.* [Emphasis supplied]

[\*57] But Nichols testified that a large target, rather than one closer to the patrol car, may actually be reflecting

170 N.J. Super. 44, \*57; 405 A.2d 477, \*\*484;  
1979 N.J. Super. LEXIS 887, \*\*\*20

the strongest [\*\*\*21] signal. Thus, if a truck is following a Volkswagen the K55 may compute the truck's speed rather than the Volkswagen's, contrary to the above-quoted identification rule. He also pointed out that some materials and shapes are better reflectors than others and could result in a more distant target, producing the reading, if made of such materials or in such shapes.

The court is satisfied that this problem could and probably does occur in a very close-following situation, and policemen should be alerted to the possibility of an incorrect identification. But Dr. Nichols gave no guidance whatsoever as to what was "close following." He apparently could not and did not say whether at 50 feet, 25 feet or at what distance between the approaching truck or Volkswagen, the rearward truck would begin to produce the stronger signal. Thus, the court finds the above-quoted rule a reasonably reliable guide on which to base identifications in the situation described.

Dr. Nichols also sought to describe target-identification problems where a possible violator was closer to the centerline of the transmitted microwaves than a target nearer in distance to the transmitter. He (as well as other witnesses) [\*\*\*22] described the imaginary extended centerline of the patrol car (with the antenna so aligned) as the line of maximum transmitted power, and suggested that a return signal along that line would also be strongest. He pointed out that signal strength falls off far less as one moves away from that centerline than it does as one moves away from the transmitter. It has been found that one-half of the energy transmitted lies within an angle of 8 degree on either side of the centerline and, Dr. Nichols estimated, if the sides of that angle are carried out as much as 1500 feet from the patrol car, 85% of all the transmitted energy would lie within it. According, to Dr. Nichols, therefore, a target physically closer to the centerline, but more distant from the patrol car than the target nearest the patrol car, *might* produce a reading. An [\*58] unwary policeman *might* attribute that reading to the vehicle closest to the patrol car, thus resulting in an unjust arrest.

But Dr. Nichols' views in this respect were unsupported by any precise measurements or detailed tests. None of his highway tests was performed under controlled conditions. No experimental results or theoretical [\*\*\*23] models were adduced to demonstrate Dr. Nichols' theories, to any degree of scientific probability, that a nearer target would produce a signal less strong than a more distant one, notwithstanding such distant target's proximity to the centerline of the micro-move-energy lobe. In fact, in most situations presented him, Dr. Nichols appeared to believe the nearest vehicle to the patrol car would generate the reading. Because it is true that signal strength (not frequency and hence not accuracy of a reading) falls off by the square of the distance from the transmitter, the court finds it more probable that that distance is, in fact, the key one, and therefor, once again, finds the quoted rule of identification reasonably reliable.

Dr. Nichols described cosine error as that error in target speed, which results from the fact that the Doppler frequency reflects along the line between the target to the patrol car, whereas the target is actually moving, not straight at the patrol car, but at an angle to it. Because of the trigonometric function of the cosine, which is always less than 1, the error always favors the target, i.e., displayed target speed is less than the actual target speed. [\*\*\*24] But Dr. Nichols also theorized cosine error could reduce the display of patrol car speed. This is, potentially, a serious matter since reduced patrol car speed would result in false, [\*\*485] higher target speed readings. Thus, if a huge sign or a long building with a long reflective surface on the side of the road reflected a signal stronger than that of the road and thereby generated the low frequency return for computing the patrol car's speed, the angle of such an object relative to the motion of the car might theoretically reduce the patrol car's speed reading by the cosine error.

[\*59] However, the court determines such situation would be necessarily rare, and the reading generated, transitory. Moreover, an alert officer, checking his patrol car readout against his speedometer, should note dropping speed and reject any target speeds obtained in that situation. Accordingly, the court determines that while cosine error as it affects patrol car readout may be a theoretical problem, its significance in routine traffic situations is not such as to raise a reasonable doubt as to the reliability of the K55 when operated by a trained and experienced officer.

Dr. Nichols [\*\*\*25] also testified to internal and external sources of interference with the K55 which can produce spurious speed readings. The K55 possesses circuitry designed to filter out most internal and some external

interference. Like all radar devices, the K55 can, and does, receive signals other than that which it originally transmitted. A wide variety of devices in relatively common use transmit electromagnetic energy at frequencies at or close to those assigned by the F.C.C. to police radar. Depending on the strength of these signals, which again depends on how close the source is to the K55, a speed reading can appear.

The signal processing unit may itself reject the signal and cause the reading to go blank, or the reading will be erratic, or so high or low as to tip the operator off at once that electronic interference may be present. Nonetheless, troopers are trained not to use their own radios when patrolling for speeders and to be mindful of the use of CB radios in the vicinity of the patrol area. Airports and even low strung high tension wires may also be common trouble spots. State and local police may well be advised to begin to catalog, within their respective jurisdictions, [\*\*\*26] the existing sources, strength, frequency, range and direction of radiated energy which might intersect with or flow over the roads and highways. Armed with such information, tests could be run to determine the effect, if any, on the K55.

By so suggesting, however, the court does not wish to leave the impression that external radio or microwave interference [\*60] seriously detracts from the reliability of the K55. The court is satisfied that the chance of an undetected interference increasing a speed reading, to the detriment of a motorist, is so remote as not to raise a reasonable doubt under the "high degree" of reliability standard here at issue. Absolute perfection, of course, is not required.

As a result of his Florida tests, Dr. Nichols expressed certain subjective reservations about the K55. He expressed concern over the practical difficulties of target identification in the multiple-lane, heavy traffic situation, and surprise at the variety of response times in the various radars and the differences between them in the speed with which they repeated their readings. He stated the K55 did not give him "the personal satisfaction that it was as stable and as reliable [\*\*\*27] in the quickness with which it reached a reading that seemed to satisfy the physical situation as the others." He also stated, "it seemed to be more erratic to me. It went up too far or down too far. The swings were more violent. Ultimately it would stabilize and come back and give an adequate and satisfactory reading."

Considering the qualifications of Dr. Nichols, these observations are entitled to respect. In fact, to the extent he notes that the K55 did come to an "acceptable" reading as compared with other radars, he points to the sensitivity of the K55 in the manual position in rejecting spurious readings or other transitory phenomenon. Since Dr. Nichols was as critical of the automatic position, with its ability to lock in a transitory reading, as Patterson, the court finds it difficult to understand his subjective feeling about the K55. In any event, such feelings do not raise a reasonable doubt in [\*\*486] the court's mind as to the reliability of the K55 when operated in the manual position.

#### *Ghosts and Shadows*

Every law enforcement tool, whether it be a radar set or a bloodhound, must be understood and used within its inherent [\*61] limitations. The [\*\*\*28] K55, as all radar, has such limitations. Transmitted signals echo randomly from anything the microwaves reach and sometimes that signal, echoed from a tree, fence or billboard, will a second time be reflected from a moving object out of the trooper's visual range and be received and processed as a speed reading. These are "ghost" readings -- spurious speed readings of unseen vehicles or stationary objects. He who seriously reports tracking speeding trees with the K55 is either a fool or a knave, since such a report presents an inherent conflict with the underlying Doppler principle.

Such ghosts will be either so transitory or display such erratic readings that any experienced operator will at once recognize them. Moreover, ghosts will always be banished by a stronger signal because the K55 functions to find the lock on the strongest signal returning to it. Ghost readings cannot add to or detract from the speed of a real target. None of the experts challenged its reliability in that respect.

"Shadowing" occurs when the patrol car closely follows or is overtaken by a truck or large car with the K55 on in the moving mode. The signal usually returning from the road surface may [\*\*\*29] now be temporarily supplanted by

the stronger signal returning from the vehicle in front. Since that vehicle is traveling slower relative to the patrol car than the road was, the viewer will notice an apparent decrease in the speed reading of the patrol car. Any reading taken on a target vehicle under such conditions would be inaccurate. n4 But the evidence is clear that State Troopers are trained to check continually, while in the moving mode, the K55 display of patrol car speed with the speedometer. Any difference between the K55's reading and the speedometer is a trouble sign that will suggest caution on the part of the trooper in relying on a target speed reading.

n4 See, also, the discussion, at 58, regarding reduced patrol car speed as the result of cosine error.

#### [\*62] *Training*

The court finds that [HN3] the operational reliability of the K55 is largely dependent upon the training and experience of the policemen who use it. In *State v. Dantonio*, 18 N.J. 570, 573-574 (1955), the court [\*\*\*30] quotes a law review article stating that "the average person engaged in traffic control work can learn to use the radar speedometer after about one and one-half hours of instruction." Judged by that standard, the State Police get ample instruction in theory and practice on the K55. Trooper Dempster, for instance, received a full day of classroom and "hands on" practical instruction from MPH, Inc., representatives, and then "practiced" with the machine in his own patrol car 80 hours before he arrested violators. Such a level of instruction and experience acquaints the officers with the technical capability of radar as well as practical use in everyday traffic situations. For instance, like our bloodhound who cannot, having found the source of the scent, identify it as a vicious criminal or a lost child, so also cannot the K55 identify the speeding vehicle: the officer using it must do that. Troopers are taught a three-step procedure when the K55 displays a target speed: (1) identify the probable target producing the reading; (2) lock in the speed, and (3) compare visually the speed displayed with the officer's own estimate of the target's speed. This must be a complex procedure [\*\*\*31] requiring well-coordinated eye and hand movement as well as the exercise of quick judgment. The officer must, also, be monitoring his own speedometer with that of the K55's readout on patrol car speed and driving his car with safety. With some traffic patterns, such as heavy approaching traffic in multiple lanes where no [\*\*487] one car is clearly in front, it will always be difficult if not impossible to identify a target. But experience should quickly expose such situations.

In view of the above, however, and the high degree of skill and judgment required to operate the K55 reliably, it is the [\*63] court's view that periodic follow-up training be instituted in order to verify continuing qualification as a K55 operator. Moreover, the skill and judgment of troopers who themselves instruct in its use should be most carefully evaluated.

Finally, it is clear from the testimony of all the witnesses, that the K55 should not be operated in the "automatic" position in either the moving or stationary mode. That is present State Police policy and should remain so. By "automatic" in the sense used here, is meant that position on the K55 which "automatically" locks on the [\*\*\*32] first echo it receives and processes that echo to a readout and will not then process further echoes. Thus may be instantaneously captured an interfering signal or a ghost which would not be reflected from the visible target.

#### *Conclusion*

For all the reasons stated above the court determines that a properly calibrated K55 Speed Detection Device installed in a car with a calibrated speedometer has a high degree of scientific and operational reliability when used in either stationary or moving mode, in the manual position by a person having at least three hours of classroom training and two to three hours of practical instruction together with some minimum experience prior to use in actual law enforcement. The court, on the record before it, cannot specify what the minimum experience should be but holds that 80 hours is, beyond doubt, sufficient.

When operated in the automatic position the operational reliability of the K55 is subject to greater question, and

170 N.J. Super. 44, \*63; 405 A.2d 477, \*\*487;  
1979 N.J. Super. LEXIS 887, \*\*\*32

acceptance of readings while in that position must hinge to a far greater extent on detailed examination of the surrounding circumstances as well as the experience and training of the operator.

[\*64] In view of [\*\*\*33] the holding above, the court will shortly schedule argument on any and all other issues defendant may choose to raise on the record below relevant to his conviction.

**The People of the State of New York, Plaintiff, v. Jamie J. Correia, Defendant**

[NO NUMBER IN ORIGINAL]

**Justice Court of New York, Village of Muttontown, Nassau County***140 Misc. 2d 813; 531 N.Y.S.2d 998; 1988 N.Y. Misc. LEXIS 488***July 21, 1988****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant contended that, where radar evidence was nonprobative, and where a police officer's independent estimate of defendant's speed occurred as a result of a faulty radar clocking and while the officer was in a stationary position, that estimate was necessarily tainted by the faulty radar reading, and was insufficient to sustain defendant's conviction for speeding.

**OVERVIEW:** Defendant challenged the sufficiency of the evidence after he was charged with speeding. The court held noted a speeding conviction could, but need not, result from a police officer's independent estimate, whether it occurred before or after a radar clocking, and whether the officer made his estimate while in a stationary as opposed to a pacing mode. The sufficiency of such evidence was to be determined on a case-by-case basis, in light of and considering the particular facts and circumstances presented. While the sequence of a faulty radar clocking and an officer's independent estimate of speed could affect the weight to be given to the officer's independent estimate, it did not necessarily render the independent estimate insufficient as a matter of law. However, in defendant's case where it was impossible to determine whether the officer was influenced by the faulty radar readout, the court could not say that the police officer's testimony alone was sufficient to prove defendant's guilt beyond a reasonable doubt.

**OUTCOME:** Defendant was found not guilty, because the evidence was insufficient where it was impossible to determine whether the police officer's independent estimate of defendant's vehicle's speed was influenced by a faulty radar readout.

**CORE TERMS:** estimate, speed, radar, police officer, clocking, readout, stationary, qualification, summons, miles, speeding, speedometer, unreliable, mechanical, faulty, tested, observance, testing, pacing, reliability, accuracy, traffic, matter of law, speed limit, case-by-case, estimating, training, verify, novel, beyond a reasonable doubt

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN1] Either a radar or other mechanical clocking or the police officer's independent estimate of a defendant's speed alone can suffice to produce and sustain a conviction. Both forms of evidence are not necessary for a conviction.

***Civil Procedure > Pleading & Practice > Service of Process > General Overview******Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN2] Doppler radar devices have been judicially accepted as probative evidence of speed provided they are properly used and are tested within a reasonable time period both before and after the summons in question is issued. However, not all uses of such equipment and not all radar or other speed measuring devices are, as yet, accepted as reliable.

***Civil Procedure > Pleading & Practice > Service of Process > General Overview******Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN3] Proper testing of radar generally consists of a series of tests with tuning forks and internal calibration devices within reasonable time periods both before and after the summons at issue was issued, sometimes coupled with verification against the speedometer of a companion police vehicle or the testing officer's own vehicle. Testing of a mechanical speed device requires similar before and after testing by the police officer within reasonable proximity to the incident in question, as well as outside verification of the reliability of the device. Where the radar or other mechanical speed device involved is not shown to have been properly or reliably tested, evidence based upon or generated from it is inadmissible and, even if admitted, is legally insufficient to sustain a conviction. In that circumstance, for a conviction to result, the People must prove their case, or at least corroborate the proffered radar or mechanical evidence, with other independent, legally sufficient evidence, that is, the police officer's estimate of speed.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN4] Where the People are relying upon an estimate, that is, opinion evidence, of the defendant's speed, the police officer must be shown to be qualified to make such an estimate. Proper qualification of the police officer requires evidence of his training to make such an estimate, his prior experience in doing so, and his established margin of accuracy or error.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN5] The mere fact that the defendant's alleged rate of speed may be extraordinarily high will not lessen the People's burden of proving the police officer's qualifications. However, the degree of excessiveness in speed may bear upon the weight to be given to the officer's opinion.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN6] How much experience and what amount of evidence are necessary to qualify an officer to give his estimate has not been definitively decreed, but rather is a matter for the court to decide on a case-by-case basis. Evidence that the police officer received proper training at the police academy and on the road, that he has spent considerable time on road patrol, that he has experience estimating speed and comparing his estimates against radar or mechanically calibrated speed readings, and that he has a historically established margin of error of only a few miles per hour, has often been held to be sufficient.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN7] Qualifying the police officer is only the first step in the court's review and consideration of his evidence. The defendant is entitled to challenge the police officer's qualifications, and the defendant may obtain pretrial disclosure thereof via a proper discovery request for that purpose. Where no objection is made to the admissibility of the police

officer's qualifications, his opinion must be considered by the court, but it can be given little weight. The court must weigh all circumstances of the case, including the nature and extent of the opportunity which the officer had to view the moving vehicle and the relative positions of the policemen and the approaching car. Thus, the court may reject or discount the police officer's evidence on the basis of the other facts and circumstances of the case, that is, where he was situated in relation to the defendant's vehicle, how long he observed the defendant, the nature of his observance, and how he went about estimating the defendant's speed.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN8] Where it is impossible for the court to determine whether a police officer was influenced, albeit unintentionally and perhaps only subconsciously, by the radar readout, the court cannot say that the police officer's testimony alone proves the defendant's guilt beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN9] Clocking on a speedometer while pacing the subject vehicle is considered sufficient to prove excessive speed if the police officer's experience and qualifications are established.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN10] The test in a traffic case is proof beyond a reasonable doubt. By contrast, in a license revocation proceeding, the test is merely proof by clear and convincing evidence.

**HEADNOTES: [\*\*\*1] Motor Vehicles -- Speeding -- Police Officer's Independent Estimate of Speed**

A police officer's independent estimate of speed is not insufficient, as a matter of law, to sustain a speeding conviction (*Vehicle and Traffic Law* § 1180 [b]) where that estimate was made following the officer's observance of a faulty or unreliable radar clocking of the defendant's speed, regardless of whether the officer made his estimate while in a stationary position, rather than while pacing the defendant's vehicle. The sufficiency of such evidence must be determined on a case-by-case basis in light of and considering the particular facts and circumstances presented including "the nature and extent of the opportunity which the officer had to view the moving vehicle", and the relative positions of the officer and the approaching car. Accordingly, although the ticketing officer is sufficiently qualified to estimate the speed of a vehicle, since he made a spur-of-the-moment estimate from a stationary position after being alerted by an unreliable radar readout, it is impossible to determine whether the officer was influenced by the radar readout and, thus, it cannot be said that the officer's testimony [\*\*\*2] alone proves defendant's guilt of speeding beyond a reasonable doubt.

**COUNSEL:**

*Joseph R. Carrieri* for plaintiff.

*David A. Mansfield* for defendant.

**JUDGES:**

Martin I. Kaminsky, J.

**OPINION BY:**

KAMINSKY

**OPINION:**

[\*813] [\*\*998] **OPINION OF THE COURT**

After trial of this traffic speeding case, novel questions are [\*814] presented regarding the legal sufficiency of a police officer's independent estimate of the defendant's speed, since the officer's estimate was made following and as the result of an unreliable and possibly inaccurate radar clocking of the defendant's speed and while the officer was in a stationary position, observing the defendant drive past him.

Defendant Jamie J. Correia was ticketed on the morning of April 3, 1987 for alleged speeding on Route 25A in the Village of Muttontown. Defendant is alleged to have been driving at 81 miles per hour in a 55 mile-per-hour zone, in violation of *section 1180 (b) of the Vehicle and Traffic Law*. Police Officer Peter Cusak, who issued the summons, first clocked the defendant on a Doppler radar unit in his police car, and then made an independent [\*\*999] estimate of the defendant's speed. Officer Cusak was monitoring traffic while in a stationary position, off the roadway. [\*\*\*3] He was alerted to the defendant's presence by the sound of the radar unit's readout. Officer Cusak looked down to see the radar readout. Then, Officer Cusak looked up, saw the defendant and made his own estimate of the defendant's speed, as the defendant crossed his field of vision.

Officer Cusak's testimony established that he has expertise in the use of Doppler radar equipment and extensive experience in making independent estimates of the speed of moving vehicles. He has had police academy and on-the-road training, and has been on road and traffic patrol for some years. Officer Cusak has regularly worked with and tested radar units, and has made hundreds or even thousands of independent estimates of speed. Checks of his independent estimates against radar units and his speedometer indicate that Officer Cusak's independent estimates are generally within about three miles of those readouts.

Officer Cusak tested the radar unit he was using twice on the day in question. He did so both before and after he issued a summons to the defendant. Officer Cusak checked the unit's readouts against two tuning forks and made internal calibration checks, noting the test results in a written [\*\*\*4] log which his department maintains with respect to the unit. The test results from one of the tuning fork tests conducted after the summons was issued, at least as recorded by the police officer, showed speed readouts outside the range permissible to verify the accuracy and reliability of the unit.

Defendant contends that (a) the radar unit in question was not properly or reliably tested, rendering the radar evidence [\*815] nonprobative, and (b) since Officer Cusak's independent estimate of the defendant's speed occurred after (indeed as a result of) the radar clocking and while the officer was in a stationary position, that estimate was necessarily tainted by the radar reading and is insufficient to sustain a conviction. In so arguing, defendant has presented a novel question, viz., is a police officer's independent estimate of speed insufficient, as a matter of law, to sustain a conviction where that estimate was made following the officer's observance of a faulty or unreliable radar clocking of the defendant's speed? A corollary novel question is whether the fact that the police officer's independent estimate was made while he was in a stationary position, rather than while [\*\*\*5] pacing the defendant's vehicle, necessarily affects the result.

Neither counsel nor the court have found a case directly in point on these issues. Based upon analogous authority (discussed below), the court holds that a conviction can, but need not, result from a police officer's independent estimate in these circumstances, i.e., regardless of whether that occurred before or after a radar clocking and whether the officer made his estimate while in a stationary as opposed to a pacing mode. The sufficiency of such evidence must be determined on a case-by-case basis, in light of and considering the particular facts and circumstances presented. In other words, while the sequence of a faulty radar clocking and an officer's independent estimate of speed may affect the weight to be given to the independent estimate, it does not necessarily render the independent estimate insufficient as a matter of law. The same is true with respect to the police officer's position relative to the defendant.

Generally, the court in a speeding case is presented with a combination of a radar or other mechanical (e.g., speedometer) clocking of the defendant's speed, corroborated by a Trooper's or police [\*\*\*6] officer's estimate (i.e.,

140 Misc. 2d 813, \*815; 531 N.Y.S.2d 998, \*\*999;  
1988 N.Y. Misc. LEXIS 488, \*\*\*6

opinion evidence) of the defendant's speed. (See, e.g., *People v Magri*, 3 NY2d 562, 564-565 [1958]; *People v Maniscalco*, 94 Misc 2d 915, 917-918; see also, *People v Smalley*, 64 Misc 2d 363, 364-365.) However, [HN1] both forms of evidence are not necessary for there to be a conviction. Either (a) a radar or other mechanical clocking (*People v Magri*, supra; *People v Perlman*, 89 Misc 2d 973, 977-978) or (b) the [\*\*1000] police officer's independent estimate of the defendant's speed (*People v Olsen*, 22 NY2d 230, 231; *Matter of Graf v Foschio*, 102 AD2d 891, 892; *People v Jeck-Tisch*, 133 Misc 2d 1090, 1091) [\*816] alone can suffice to produce and sustain a conviction.

[HN2] Doppler radar devices have been judicially accepted as probative evidence of speed for over 30 years (*People v Magri*, 3 NY2d 562, supra), provided they are properly used and were tested within a reasonable time period both before and after the summons in question was issued. (*People v Perlman*, supra, 89 Misc 2d, at 977-978.) [\*\*\*7] However, not all uses of such equipment and not all radar or other speed measuring devices are, as yet, accepted as reliable. For example, in *People v Conlon* (109 Misc 2d 729, 731-732), the court rejected evidence of an MR-9 radar clocking made while the police officer was "in a moving or verifying mode", on the ground that the reliability of "moving radar" has not yet been scientifically established to warrant the court's taking judicial notice thereof. In *People v Leatherbarrow* (69 Misc 2d 563, 566) the court rejected Vascar speed measurements altogether.

[HN3] Proper testing of radar generally consists of a series of tests with tuning forks and internal calibration devices within reasonable time periods both before and after the summons at issue was issued, sometimes coupled with verification against the speedometer of a companion police vehicle or the testing officer's own vehicle. (*People v Maniscalco*, supra, 94 Misc 2d, at 916; *People v Lynch*, 61 Misc 117, 119; *People v Stephens*, 52 Misc 2d 1070, 1072; see also, *Matter of Lovenheim v Foschio*, 93 AD2d 986, 987.) [\*\*\*8] Testing of a mechanical speed device requires similar before and after testing by the police officer within reasonable proximity to the incident in question, as well as outside verification of the reliability of the device. (*Government of Virgin Is. v Rodriguez*, 300 F Supp 909, 910 [New York law applied]; *People v Marsellus*, 2 NY2d 653; see also, *People v Cunha*, 93 Misc 2d 467, 469, affd 96 Misc 2d 522 [App Term, 2d Dept].) Where the radar or other mechanical speed device involved is not shown to have been properly or reliably tested, evidence based upon or generated from it is inadmissible and, even if admitted, is legally insufficient to sustain a conviction. (*People v Cunha*, 93 Misc 2d 467, 468-469, affd 96 Misc 2d 522 [App Term, 2d Dept], supra.) In that circumstance, for a conviction to result, the People must prove their case, or at least corroborate the proffered radar or mechanical evidence, with other independent, legally sufficient evidence (e.g., the police officer's estimate of speed). (*People v Heyser*, 2 NY2d 390, 393; *People v Higley*, 55 Misc 2d 460, 461-462.)

[\*817] [\*\*\*9] Here, as noted earlier, the results of the tuning fork tests after the summons was issued exceeded the tolerances permissible to verify the accuracy of the unit. Whether that is because the unit was faulty or the tester made an error (either in conducting the test or recording its results) is irrelevant. Regardless of the reason, the test evidence does not and cannot provide assurance of the reliability of the radar unit at the time of the clocking of the defendant's vehicle. Although the defendant did not move to strike the faulty radar evidence, he argued that it should be disregarded as unreliable. The court agrees and finds that evidence to be nonprobative and insufficient to prove the People's case. Hence, the People's case depends upon the sufficiency of Officer Cusak's estimate of the defendant's speed.

[HN4] Where, as here, the People are relying upon an estimate (i.e., opinion evidence) of the defendant's speed, the police officer must be shown to be qualified to make such an estimate. Proper qualification of the police officer requires evidence of his training to make such an estimate, his prior [\*\*1001] experience in doing so, and his established margin of accuracy or [\*\*\*10] error. (*People v Olsen*, supra, 22 NY2d, at 231-232; *People v Cunha*, supra, 93 Misc 2d, at 470-471.) Thus, in *Leatherbarrow* (supra, 69 Misc 2d, at 565), the defendant was acquitted when the Trooper "failed to specifically indicate or particularize his experience and accuracy in judging the speed of moving vehicles". However, as the court explained, if the Trooper had "properly established his qualifications with regard to estimating speed", his testimony alone would have sufficed to result in a conviction. n1

n1 [HN5] The mere fact that the defendant's alleged rate of speed may be extraordinarily high will not

140 Misc. 2d 813, \*817; 531 N.Y.S.2d 998, \*\*1001;  
1988 N.Y. Misc. LEXIS 488, \*\*\*10

lessen the People's burden of proving the police officer's qualifications. In *People v Leatherbarrow* (69 Misc 2d 563, 565), for example, the alleged speed was 90 miles per hour, demonstrably in excess of the speed limit. But compare *People v Olsen* (22 NY2d 230, 231) where the Court of Appeals observed that the degree of excessiveness in speed (i.e., number of miles over the speed limit) may bear upon the weight to be given to the officer's opinion. (See also, *People v Cunha*, 93 Misc 2d 467, 470 ["the variance of 40 to 45 miles over the speed limit of 30 miles per hour was clearly sufficient for the court to give it the weight necessary to establish the People's case"].)

[\*\*11] [HN6] How much experience and what amount of evidence are necessary to qualify an officer to give his estimate has not been definitively decreed, but rather is a matter for the court to decide on a case-by-case basis. Evidence that the police officer received proper training at the police academy and on [\*818] the road, that he has spent considerable time on road patrol, that he has experience estimating speed and comparing his estimates against radar or mechanically calibrated speed readings, and that he has a historically established margin of error of only a few miles per hour, such as the People have introduced here, has often been held to be sufficient. (*People v Higley*, supra, 55 Misc 2d, at 461; *People v Wimmer*, 15 Misc 2d 568, 569; compare, *People v Page*, 32 Misc 2d 179, 180-181.) Indeed, it seems apparent that a great deal of proof in this regard is not required. For example, in *People v Dusing* (5 NY2d 126, 127 [1959]), a conviction was sustained on the basis of conclusory testimony by a motorcycle officer that he had two years' experience, had arrested drivers for speeding "many times", and [\*\*12] was able to estimate speed on the basis of his experience as a policeman and a driver. n2

n2 The rule is the same in civil cases. For example, in *Senecal v Drollette* (304 NY 446 [1952]), a 12-year-old boy was permitted, in a civil tort case, to give an estimate of speed based on his having ridden in automobiles and having observed speedometers. But compare *Swoboda v We Try Harder* (128 AD2d 862, 863) where a lay opinion on speed was held to be inadmissible because the witness's qualifications were not established.

[HN7] Qualifying the police officer is only the first step in the court's review and consideration of his evidence. The defendant is entitled to challenge the police officer's qualifications, and the defendant may obtain pretrial disclosure thereof (via proper discovery request) for that purpose. (*People v Gutterson*, 93 Misc 2d 1105, 1108-1109.) Where no objection is made to the admissibility of the police officer's qualifications, his opinion must be [\*\*13] considered by the court, but it can be given little weight. (*People v Cunha*, supra, 93 Misc 2d, at 470.) The court must weigh all circumstances of the case, including "the nature and extent of the opportunity which the officer had to view the moving vehicle" (*People v Olsen*, supra, 22 NY2d, at 232) and "[the] relative positions of the policemen and the approaching car" (*People v Dusing*, supra, 5 NY2d, at 128). Thus, the court may reject or discount the police officer's evidence on the basis of the other facts and circumstances of the case, e.g., where he was situated in relation to the defendant's vehicle, how long he observed the defendant, the nature of his observance, and how he went about estimating the defendant's speed. Credibility is, of course, also a factor to be taken into account. (*People v Clark*, 33 Misc 2d 390, 393.)

[\*\*1002] In this case, Officer Cusak was a forthright and credible witness, both in his demeanor and the clarity of his recitation [\*819] of the facts. However, the police officer was situated in a stationary position when he first observed the defendant; and he saw the potentially [\*\*14] inaccurate radar readout before he even observed the defendant, much less made his independent estimate of speed. Indeed, it was the radar readout which called the police officer's attention to the defendant in the first place. Officer Cusak did not pace the defendant, and, thus, did not verify his estimate on his speedometer or by an extended or continued observance. (Compare, *People v Conlon*, supra, 109 Misc 2d, at 733-734.) n3 Rather he made essentially a spur-of-the-moment estimate, relatively in an instant, as the defendant proceeded by him. [HN8] It is impossible for the court to determine whether, in doing so, the police officer was influenced, albeit unintentionally and perhaps only subconsciously, by the radar readout. In these circumstances,

140 Misc. 2d 813, \*819; 531 N.Y.S.2d 998, \*\*1002;  
1988 N.Y. Misc. LEXIS 488, \*\*\*14

the court cannot say that the police officer's testimony alone proves the defendant's guilt beyond a reasonable doubt. n4 (See, e.g., *People v Perlman*, 89 Misc 2d 973, 980-981, *supra*, overruled on other grounds in *Matter of Graf v Foschio*, 102 AD2d 891; *People v Greenhouse*, 4 Misc 2d 692, 693; compare, *People v Clark*, *supra*, 33 Misc 2d, at 393.)

n3 [HN9] Clocking on a speedometer while "pacing" the subject vehicle is considered sufficient to prove excessive speed if the police officer's experience and qualifications are established. ( *People v Heyser*, 2 NY2d 390, 394; *People v Conlon*, 109 Misc 2d 729, 733-734.)

n4 [HN10] The test in a traffic case is proof "beyond a reasonable doubt". ( *People v Cunha*, 96 Misc 2d 522, 523; *People v Baker*, 2 Misc 2d 600, 602 [Ct Spec Sess, App Part, 1st Dept].) By contrast, in a license revocation proceeding, the test is merely proof by "clear and convincing evidence". ( *Vehicle and Traffic Law* § 227 [1]; *Silver v State of New York Dept. of Motor Vehicles*, 108 AD2d 848, 849; *Matter of Graf v Foschio*, 102 AD2d 891, 892.)

[\*\*\*15] Accordingly, the court finds the defendant not guilty. The clerk of the court is directed to enter judgment dismissing the summons.

**The People of the State of New York, Plaintiff, v. Jamie J. Correia, Defendant**

[NO NUMBER IN ORIGINAL]

**Justice Court of New York, Village of Muttontown, Nassau County***140 Misc. 2d 813; 531 N.Y.S.2d 998; 1988 N.Y. Misc. LEXIS 488***July 21, 1988****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant contended that, where radar evidence was nonprobative, and where a police officer's independent estimate of defendant's speed occurred as a result of a faulty radar clocking and while the officer was in a stationary position, that estimate was necessarily tainted by the faulty radar reading, and was insufficient to sustain defendant's conviction for speeding.

**OVERVIEW:** Defendant challenged the sufficiency of the evidence after he was charged with speeding. The court held noted a speeding conviction could, but need not, result from a police officer's independent estimate, whether it occurred before or after a radar clocking, and whether the officer made his estimate while in a stationary as opposed to a pacing mode. The sufficiency of such evidence was to be determined on a case-by-case basis, in light of and considering the particular facts and circumstances presented. While the sequence of a faulty radar clocking and an officer's independent estimate of speed could affect the weight to be given to the officer's independent estimate, it did not necessarily render the independent estimate insufficient as a matter of law. However, in defendant's case where it was impossible to determine whether the officer was influenced by the faulty radar readout, the court could not say that the police officer's testimony alone was sufficient to prove defendant's guilt beyond a reasonable doubt.

**OUTCOME:** Defendant was found not guilty, because the evidence was insufficient where it was impossible to determine whether the police officer's independent estimate of defendant's vehicle's speed was influenced by a faulty radar readout.

**CORE TERMS:** estimate, speed, radar, police officer, clocking, readout, stationary, qualification, summons, miles, speeding, speedometer, unreliable, mechanical, faulty, tested, observance, testing, pacing, reliability, accuracy, traffic, matter of law, speed limit, case-by-case, estimating, training, verify, novel, beyond a reasonable doubt

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN1] Either a radar or other mechanical clocking or the police officer's independent estimate of a defendant's speed alone can suffice to produce and sustain a conviction. Both forms of evidence are not necessary for a conviction.

***Civil Procedure > Pleading & Practice > Service of Process > General Overview******Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN2] Doppler radar devices have been judicially accepted as probative evidence of speed provided they are properly used and are tested within a reasonable time period both before and after the summons in question is issued. However, not all uses of such equipment and not all radar or other speed measuring devices are, as yet, accepted as reliable.

***Civil Procedure > Pleading & Practice > Service of Process > General Overview******Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN3] Proper testing of radar generally consists of a series of tests with tuning forks and internal calibration devices within reasonable time periods both before and after the summons at issue was issued, sometimes coupled with verification against the speedometer of a companion police vehicle or the testing officer's own vehicle. Testing of a mechanical speed device requires similar before and after testing by the police officer within reasonable proximity to the incident in question, as well as outside verification of the reliability of the device. Where the radar or other mechanical speed device involved is not shown to have been properly or reliably tested, evidence based upon or generated from it is inadmissible and, even if admitted, is legally insufficient to sustain a conviction. In that circumstance, for a conviction to result, the People must prove their case, or at least corroborate the proffered radar or mechanical evidence, with other independent, legally sufficient evidence, that is, the police officer's estimate of speed.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN4] Where the People are relying upon an estimate, that is, opinion evidence, of the defendant's speed, the police officer must be shown to be qualified to make such an estimate. Proper qualification of the police officer requires evidence of his training to make such an estimate, his prior experience in doing so, and his established margin of accuracy or error.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN5] The mere fact that the defendant's alleged rate of speed may be extraordinarily high will not lessen the People's burden of proving the police officer's qualifications. However, the degree of excessiveness in speed may bear upon the weight to be given to the officer's opinion.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN6] How much experience and what amount of evidence are necessary to qualify an officer to give his estimate has not been definitively decreed, but rather is a matter for the court to decide on a case-by-case basis. Evidence that the police officer received proper training at the police academy and on the road, that he has spent considerable time on road patrol, that he has experience estimating speed and comparing his estimates against radar or mechanically calibrated speed readings, and that he has a historically established margin of error of only a few miles per hour, has often been held to be sufficient.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN7] Qualifying the police officer is only the first step in the court's review and consideration of his evidence. The defendant is entitled to challenge the police officer's qualifications, and the defendant may obtain pretrial disclosure thereof via a proper discovery request for that purpose. Where no objection is made to the admissibility of the police

officer's qualifications, his opinion must be considered by the court, but it can be given little weight. The court must weigh all circumstances of the case, including the nature and extent of the opportunity which the officer had to view the moving vehicle and the relative positions of the policemen and the approaching car. Thus, the court may reject or discount the police officer's evidence on the basis of the other facts and circumstances of the case, that is, where he was situated in relation to the defendant's vehicle, how long he observed the defendant, the nature of his observance, and how he went about estimating the defendant's speed.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN8] Where it is impossible for the court to determine whether a police officer was influenced, albeit unintentionally and perhaps only subconsciously, by the radar readout, the court cannot say that the police officer's testimony alone proves the defendant's guilt beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN9] Clocking on a speedometer while pacing the subject vehicle is considered sufficient to prove excessive speed if the police officer's experience and qualifications are established.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN10] The test in a traffic case is proof beyond a reasonable doubt. By contrast, in a license revocation proceeding, the test is merely proof by clear and convincing evidence.

**HEADNOTES: [\*\*\*1] Motor Vehicles -- Speeding -- Police Officer's Independent Estimate of Speed**

A police officer's independent estimate of speed is not insufficient, as a matter of law, to sustain a speeding conviction (*Vehicle and Traffic Law* § 1180 [b]) where that estimate was made following the officer's observance of a faulty or unreliable radar clocking of the defendant's speed, regardless of whether the officer made his estimate while in a stationary position, rather than while pacing the defendant's vehicle. The sufficiency of such evidence must be determined on a case-by-case basis in light of and considering the particular facts and circumstances presented including "the nature and extent of the opportunity which the officer had to view the moving vehicle", and the relative positions of the officer and the approaching car. Accordingly, although the ticketing officer is sufficiently qualified to estimate the speed of a vehicle, since he made a spur-of-the-moment estimate from a stationary position after being alerted by an unreliable radar readout, it is impossible to determine whether the officer was influenced by the radar readout and, thus, it cannot be said that the officer's testimony [\*\*\*2] alone proves defendant's guilt of speeding beyond a reasonable doubt.

**OPINION BY:**

KAMINSKY

**OPINION:**

[\*813] [\*\*998] **OPINION OF THE COURT**

After trial of this traffic speeding case, novel questions are [\*814] presented regarding the legal sufficiency of a police officer's independent estimate of the defendant's speed, since the officer's estimate was made following and as the result of an unreliable and possibly inaccurate radar clocking of the defendant's speed and while the officer was in a stationary position, observing the defendant drive past him.

Defendant Jamie J. Correia was ticketed on the morning of April 3, 1987 for alleged speeding on Route 25A in the Village of Muttontown. Defendant is alleged to have been driving at 81 miles per hour in a 55 mile-per-hour zone, in violation of *section 1180 (b) of the Vehicle and Traffic Law*. Police Officer Peter Cusak, who issued the summons, first clocked the defendant on a Doppler radar unit in his police car, and then made an independent [\*\*999] estimate of the defendant's speed. Officer Cusak was monitoring traffic while in a stationary position, off the roadway. [\*\*\*3] He was alerted to the defendant's presence by the sound of the radar unit's readout. Officer Cusak looked down to see the radar readout. Then, Officer Cusak looked up, saw the defendant and made his own estimate of the defendant's speed, as the defendant crossed his field of vision.

Officer Cusak's testimony established that he has expertise in the use of Doppler radar equipment and extensive experience in making independent estimates of the speed of moving vehicles. He has had police academy and on-the-road training, and has been on road and traffic patrol for some years. Officer Cusak has regularly worked with and tested radar units, and has made hundreds or even thousands of independent estimates of speed. Checks of his independent estimates against radar units and his speedometer indicate that Officer Cusak's independent estimates are generally within about three miles of those readouts.

Officer Cusak tested the radar unit he was using twice on the day in question. He did so both before and after he issued a summons to the defendant. Officer Cusak checked the unit's readouts against two tuning forks and made internal calibration checks, noting the test results in a written [\*\*\*4] log which his department maintains with respect to the unit. The test results from one of the tuning fork tests conducted after the summons was issued, at least as recorded by the police officer, showed speed readouts outside the range permissible to verify the accuracy and reliability of the unit.

Defendant contends that (a) the radar unit in question was not properly or reliably tested, rendering the radar evidence [\*815] nonprobative, and (b) since Officer Cusak's independent estimate of the defendant's speed occurred after (indeed as a result of) the radar clocking and while the officer was in a stationary position, that estimate was necessarily tainted by the radar reading and is insufficient to sustain a conviction. In so arguing, defendant has presented a novel question, viz., is a police officer's independent estimate of speed insufficient, as a matter of law, to sustain a conviction where that estimate was made following the officer's observance of a faulty or unreliable radar clocking of the defendant's speed? A corollary novel question is whether the fact that the police officer's independent estimate was made while he was in a stationary position, rather than while [\*\*\*5] pacing the defendant's vehicle, necessarily affects the result.

Neither counsel nor the court have found a case directly in point on these issues. Based upon analogous authority (discussed below), the court holds that a conviction can, but need not, result from a police officer's independent estimate in these circumstances, i.e., regardless of whether that occurred before or after a radar clocking and whether the officer made his estimate while in a stationary as opposed to a pacing mode. The sufficiency of such evidence must be determined on a case-by-case basis, in light of and considering the particular facts and circumstances presented. In other words, while the sequence of a faulty radar clocking and an officer's independent estimate of speed may affect the weight to be given to the independent estimate, it does not necessarily render the independent estimate insufficient as a matter of law. The same is true with respect to the police officer's position relative to the defendant.

Generally, the court in a speeding case is presented with a combination of a radar or other mechanical (e.g., speedometer) clocking of the defendant's speed, corroborated by a Trooper's or police [\*\*\*6] officer's estimate (i.e.,

140 Misc. 2d 813, \*815; 531 N.Y.S.2d 998, \*\*999;  
1988 N.Y. Misc. LEXIS 488, \*\*\*6

opinion evidence) of the defendant's speed. (See, e.g., *People v Magri*, 3 NY2d 562, 564-565 [1958]; *People v Maniscalco*, 94 Misc 2d 915, 917-918; see also, *People v Smalley*, 64 Misc 2d 363, 364-365.) However, [HN1] both forms of evidence are not necessary for there to be a conviction. Either (a) a radar or other mechanical clocking (*People v Magri*, supra; *People v Perlman*, 89 Misc 2d 973, 977-978) or (b) the [\*\*1000] police officer's independent estimate of the defendant's speed (*People v Olsen*, 22 NY2d 230, 231; *Matter of Graf v Foschio*, 102 AD2d 891, 892; *People v Jeck-Tisch*, 133 Misc 2d 1090, 1091) [\*816] alone can suffice to produce and sustain a conviction.

[HN2] Doppler radar devices have been judicially accepted as probative evidence of speed for over 30 years (*People v Magri*, 3 NY2d 562, supra), provided they are properly used and were tested within a reasonable time period both before and after the summons in question was issued. (*People v Perlman*, supra, 89 Misc 2d, at 977-978.) [\*\*\*7] However, not all uses of such equipment and not all radar or other speed measuring devices are, as yet, accepted as reliable. For example, in *People v Conlon* (109 Misc 2d 729, 731-732), the court rejected evidence of an MR-9 radar clocking made while the police officer was "in a moving or verifying mode", on the ground that the reliability of "moving radar" has not yet been scientifically established to warrant the court's taking judicial notice thereof. In *People v Leatherbarrow* (69 Misc 2d 563, 566) the court rejected Vascar speed measurements altogether.

[HN3] Proper testing of radar generally consists of a series of tests with tuning forks and internal calibration devices within reasonable time periods both before and after the summons at issue was issued, sometimes coupled with verification against the speedometer of a companion police vehicle or the testing officer's own vehicle. (*People v Maniscalco*, supra, 94 Misc 2d, at 916; *People v Lynch*, 61 Misc 117, 119; *People v Stephens*, 52 Misc 2d 1070, 1072; see also, *Matter of Lovenheim v Foschio*, 93 AD2d 986, 987.) [\*\*\*8] Testing of a mechanical speed device requires similar before and after testing by the police officer within reasonable proximity to the incident in question, as well as outside verification of the reliability of the device. (*Government of Virgin Is. v Rodriguez*, 300 F Supp 909, 910 [New York law applied]; *People v Marsellus*, 2 NY2d 653; see also, *People v Cunha*, 93 Misc 2d 467, 469, affd 96 Misc 2d 522 [App Term, 2d Dept].) Where the radar or other mechanical speed device involved is not shown to have been properly or reliably tested, evidence based upon or generated from it is inadmissible and, even if admitted, is legally insufficient to sustain a conviction. (*People v Cunha*, 93 Misc 2d 467, 468-469, affd 96 Misc 2d 522 [App Term, 2d Dept], supra.) In that circumstance, for a conviction to result, the People must prove their case, or at least corroborate the proffered radar or mechanical evidence, with other independent, legally sufficient evidence (e.g., the police officer's estimate of speed). (*People v Heyser*, 2 NY2d 390, 393; *People v Higley*, 55 Misc 2d 460, 461-462.)

[\*817] [\*\*\*9] Here, as noted earlier, the results of the tuning fork tests after the summons was issued exceeded the tolerances permissible to verify the accuracy of the unit. Whether that is because the unit was faulty or the tester made an error (either in conducting the test or recording its results) is irrelevant. Regardless of the reason, the test evidence does not and cannot provide assurance of the reliability of the radar unit at the time of the clocking of the defendant's vehicle. Although the defendant did not move to strike the faulty radar evidence, he argued that it should be disregarded as unreliable. The court agrees and finds that evidence to be nonprobative and insufficient to prove the People's case. Hence, the People's case depends upon the sufficiency of Officer Cusak's estimate of the defendant's speed.

[HN4] Where, as here, the People are relying upon an estimate (i.e., opinion evidence) of the defendant's speed, the police officer must be shown to be qualified to make such an estimate. Proper qualification of the police officer requires evidence of his training to make such an estimate, his prior [\*\*1001] experience in doing so, and his established margin of accuracy or [\*\*\*10] error. (*People v Olsen*, supra, 22 NY2d, at 231-232; *People v Cunha*, supra, 93 Misc 2d, at 470-471.) Thus, in *Leatherbarrow* (supra, 69 Misc 2d, at 565), the defendant was acquitted when the Trooper "failed to specifically indicate or particularize his experience and accuracy in judging the speed of moving vehicles". However, as the court explained, if the Trooper had "properly established his qualifications with regard to estimating speed", his testimony alone would have sufficed to result in a conviction. n1

n1 [HN5] The mere fact that the defendant's alleged rate of speed may be extraordinarily high will not

140 Misc. 2d 813, \*817; 531 N.Y.S.2d 998, \*\*1001;  
1988 N.Y. Misc. LEXIS 488, \*\*\*10

lessen the People's burden of proving the police officer's qualifications. In *People v Leatherbarrow* (69 Misc 2d 563, 565), for example, the alleged speed was 90 miles per hour, demonstrably in excess of the speed limit. But compare *People v Olsen* (22 NY2d 230, 231) where the Court of Appeals observed that the degree of excessiveness in speed (i.e., number of miles over the speed limit) may bear upon the weight to be given to the officer's opinion. (See also, *People v Cunha*, 93 Misc 2d 467, 470 ["the variance of 40 to 45 miles over the speed limit of 30 miles per hour was clearly sufficient for the court to give it the weight necessary to establish the People's case"].)

[\*\*11] [HN6] How much experience and what amount of evidence are necessary to qualify an officer to give his estimate has not been definitively decreed, but rather is a matter for the court to decide on a case-by-case basis. Evidence that the police officer received proper training at the police academy and on [\*818] the road, that he has spent considerable time on road patrol, that he has experience estimating speed and comparing his estimates against radar or mechanically calibrated speed readings, and that he has a historically established margin of error of only a few miles per hour, such as the People have introduced here, has often been held to be sufficient. (*People v Higley*, supra, 55 Misc 2d, at 461; *People v Wimmer*, 15 Misc 2d 568, 569; compare, *People v Page*, 32 Misc 2d 179, 180-181.) Indeed, it seems apparent that a great deal of proof in this regard is not required. For example, in *People v Dusing* (5 NY2d 126, 127 [1959]), a conviction was sustained on the basis of conclusory testimony by a motorcycle officer that he had two years' experience, had arrested drivers for speeding "many times", and [\*\*12] was able to estimate speed on the basis of his experience as a policeman and a driver. n2

n2 The rule is the same in civil cases. For example, in *Senecal v Drollette* (304 NY 446 [1952]), a 12-year-old boy was permitted, in a civil tort case, to give an estimate of speed based on his having ridden in automobiles and having observed speedometers. But compare *Swoboda v We Try Harder* (128 AD2d 862, 863) where a lay opinion on speed was held to be inadmissible because the witness's qualifications were not established.

[HN7] Qualifying the police officer is only the first step in the court's review and consideration of his evidence. The defendant is entitled to challenge the police officer's qualifications, and the defendant may obtain pretrial disclosure thereof (via proper discovery request) for that purpose. (*People v Gutterson*, 93 Misc 2d 1105, 1108-1109.) Where no objection is made to the admissibility of the police officer's qualifications, his opinion must be [\*\*13] considered by the court, but it can be given little weight. (*People v Cunha*, supra, 93 Misc 2d, at 470.) The court must weigh all circumstances of the case, including "the nature and extent of the opportunity which the officer had to view the moving vehicle" (*People v Olsen*, supra, 22 NY2d, at 232) and "[the] relative positions of the policemen and the approaching car" (*People v Dusing*, supra, 5 NY2d, at 128). Thus, the court may reject or discount the police officer's evidence on the basis of the other facts and circumstances of the case, e.g., where he was situated in relation to the defendant's vehicle, how long he observed the defendant, the nature of his observance, and how he went about estimating the defendant's speed. Credibility is, of course, also a factor to be taken into account. (*People v Clark*, 33 Misc 2d 390, 393.)

[\*\*1002] In this case, Officer Cusak was a forthright and credible witness, both in his demeanor and the clarity of his recitation [\*819] of the facts. However, the police officer was situated in a stationary position when he first observed the defendant; and he saw the potentially [\*\*14] inaccurate radar readout before he even observed the defendant, much less made his independent estimate of speed. Indeed, it was the radar readout which called the police officer's attention to the defendant in the first place. Officer Cusak did not pace the defendant, and, thus, did not verify his estimate on his speedometer or by an extended or continued observance. (Compare, *People v Conlon*, supra, 109 Misc 2d, at 733-734.) n3 Rather he made essentially a spur-of-the-moment estimate, relatively in an instant, as the defendant proceeded by him. [HN8] It is impossible for the court to determine whether, in doing so, the police officer was influenced, albeit unintentionally and perhaps only subconsciously, by the radar readout. In these circumstances,

140 Misc. 2d 813, \*819; 531 N.Y.S.2d 998, \*\*1002;  
1988 N.Y. Misc. LEXIS 488, \*\*\*14

the court cannot say that the police officer's testimony alone proves the defendant's guilt beyond a reasonable doubt. n4 (See, e.g., *People v Perlman*, 89 Misc 2d 973, 980-981, *supra*, overruled on other grounds in *Matter of Graf v Foschio*, 102 AD2d 891; *People v Greenhouse*, 4 Misc 2d 692, 693; compare, *People v Clark*, *supra*, 33 Misc 2d, at 393.)

n3 [HN9] Clocking on a speedometer while "pacing" the subject vehicle is considered sufficient to prove excessive speed if the police officer's experience and qualifications are established. ( *People v Heyser*, 2 NY2d 390, 394; *People v Conlon*, 109 Misc 2d 729, 733-734.)

n4 [HN10] The test in a traffic case is proof "beyond a reasonable doubt". ( *People v Cunha*, 96 Misc 2d 522, 523; *People v Baker*, 2 Misc 2d 600, 602 [Ct Spec Sess, App Part, 1st Dept].) By contrast, in a license revocation proceeding, the test is merely proof by "clear and convincing evidence". ( *Vehicle and Traffic Law* § 227 [1]; *Silver v State of New York Dept. of Motor Vehicles*, 108 AD2d 848, 849; *Matter of Graf v Foschio*, 102 AD2d 891, 892.)

[\*\*\*15] Accordingly, the court finds the defendant not guilty. The clerk of the court is directed to enter judgment dismissing the summons.

**The People of the State of New York, Plaintiff, v. Jose Cancel, Defendant****[NO NUMBER IN ORIGINAL]****Criminal Court of the City of New York, New York County*****137 Misc. 2d 260; 520 N.Y.S.2d 509; 1987 N.Y. Misc. LEXIS 2683*****October 15, 1987****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant, charged with driving while intoxicated, moved for a trial order of dismissal pursuant to *N.Y. Crim. Proc. Law § 290.10* at the conclusion of the prosecution's case and at the close of all the evidence.

**OVERVIEW:** Defendant, in his motion for a trial order of dismissal, argued that because his breathalyzer test reading was .10, and the breathalyzer machine had a margin of error of plus or minus .001, there was a reasonable doubt which precluded a jury verdict of guilty. The court reserved decision and defendant was found guilty. In ruling on defendant's motion, the court found that the jury's resolution of the issue against defendant was amply supported by the other evidence in the case regarding the accuracy and reliability of the breathalyzer machine together with the arresting officers' eyewitness testimony of defendant's intoxication. The prosecution presented documentary evidence demonstrating that the breathalyzer machine had been tested and calibrated shortly before it was used on defendant, and there was testimony that defendant swerved from lane to lane without signaling and smelled of alcohol from five feet away.

**OUTCOME:** The court denied defendant's motion for a trial order of dismissal in a prosecution for driving while intoxicated and held that the breathalyzer machine provided an accurate reading of his blood alcohol level.

**CORE TERMS:** breathalyzer, machine, reasonable doubt, margin of error, intoxication, lane, intoxicated, driving, alcohol, feet, evidence of intoxication, documentary evidence, unreliable, arrested, tested, guilt, minus, blood alcohol, signalling, bloodshot, ampoule, necessary to support, eyewitness testimony, prima facie evidence, legislative history, attempt to prove, amply supported, proof beyond, jury verdict, machine used

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General***

**Overview**

[HN1] The sole burden placed upon the people is to place into evidence legally probative breathalyzer or other chemical test results, in compliance with *N.Y. Veh. & Traf. Law § 1194*, evidencing a breathalyzer count of .10 or more.

**Criminal Law & Procedure > Appeals > Standards of Review > General Overview**

[HN2] A jury's verdict will not be set aside on the grounds of reasonable doubt so long as the evidence in the case is sufficient to support the jury's conclusion.

**HEADNOTES:** [\*\*\*1]**Motor Vehicles -- Chemical Tests**

Defendant's breathalyzer test reading of .10 of 1% by weight of alcohol in his blood, given the breathalyzer machine's margin of error of plus or minus .001, did not create a reasonable doubt which precluded a jury verdict of guilty of driving while intoxicated pursuant to *Vehicle and Traffic Law § 1192 (2)*. If the breathalyzer test was the sole evidence utilized to attempt to prove defendant's guilt, and the machine was demonstrated to be unreliable, then reasonable doubt would exist. When a violation of section 1192 (2) is at issue, defendant's behavior and physical condition is irrelevant, the sole evidence necessary to support a conviction under that statute being a breathalyzer reading of .10 or more. Here, the jury's conclusion that the breathalyzer reading of .10 was accurate, given the margin of error, is amply supported by both documentary evidence that the machine had been tested and calibrated shortly before its use on defendant and that it was working properly, and the arresting officers' eyewitness testimony of defendant's intoxication.

**COUNSEL:**

*Caesar Cirigliano* and *Andria Leeds*, for defendant.

*Robert M. Morgenthau*, [\*\*\*2] *District Attorney (Maggie Pasquale* of counsel), for plaintiff.

**JUDGES:**

Michael A. Gary, J.

**OPINION BY:**

GARY

**OPINION:**[\*261] **OPINION OF THE COURT**

[\*\*509] Defendant Jose Cancel was arrested and charged with driving while intoxicated pursuant to *Vehicle and Traffic Law § 1192 (2)* and (3). In a jury trial held before me, at the conclusion of the People's case and at the close of all the evidence, defendant moved for a trial order of dismissal pursuant to *CPL 290.10*. [\*\*510] Defendant contended the evidence was legally insufficient to establish the charge of *Vehicle and Traffic Law § 1192 (2)*. Defendant argued that since his breathalyzer test and reading was .10 of 1% by weight of alcohol in his blood, hereinafter .10, and the breathalyzer machine had a margin of error of plus or minus .001, there was a reasonable doubt which precluded a jury verdict of guilty of this charge. This court reserved decision and defendant was convicted of violating *Vehicle and Traffic Law § 1192 (1)*, as a lesser included offense of section 1192 (3), and section 1192 (2). For the reasons stated herein, defendant's motion for a trial order of dismissal is denied.

TRIAL EVIDENCE

Police Officers [\*\*\*3] Palladino and Hernandez, experienced officers assigned to Highway 1, testified they were patrolling 125th Street on a driving-while-intoxicated assignment on December 22, 1986. They observed defendant, operating a tan Dodge station wagon east on 125th Street at approximately 30 miles per hour, change from the right to left lanes, then back to the right lane, without signalling. Approximately 500 feet later, defendant repeated this swerving motion without signalling. The police patrol followed defendant for a five-minute period about 1 to 1 1/2 car lengths behind defendant in the right lane, observing defendant drive several hundred feet. No cars obstructed their view of defendant's car. Traffic was very light and defendant did not cut off any other cars when changing lanes.

The officers directed defendant to pull over. Police Officer Palladino testified defendant readily complied, parking his car at a bus stop, in a smooth, steady manner. Police Officer Palladino approached defendant's car on the driver's side, at which time defendant exited the vehicle. Police Officer Palladino testified he smelled alcohol on defendant from a distance of five feet, defendant's eyes were watery, [\*\*\*4] red and bloodshot. He requested defendant to walk to the adjacent sidewalk and [\*262] observed defendant using the car to support himself. Defendant walked in an unsteady manner. Under cross-examination, Police Officer Palladino testified he did not request defendant perform any coordination tests because he was sure defendant was driving while under the influence of alcohol. Police Officer Hernandez testified he observed defendant leaning on the car to support himself. He described defendant's gait as uncoordinated and staggering, that defendant had a strong odor of alcohol, watery and bloodshot eyes and his clothing was slightly disarrayed.

Police Officer Palladino further testified defendant indicated he had had a few beers and was going to Connecticut. Defendant understood Police Officer Palladino's directions, had a Spanish accent and exhibited slurred speech. Upon request, defendant produced a class 4 chauffeur's license and registration for the car. Defendant is not the owner of the car. Police Officer Hernandez testified he moved defendant's vehicle into a legal parking space and that no search of the car was made.

Defendant was arrested at approximately 7:30 [\*\*\*5] p.m. He was driven to the 25th Precinct. Police Officer Palladino read defendant the *Miranda* rights en route. At the 25th Precinct, Police Officer Palladino completed pedigree forms with the assistance of defendant, defendant's personal property was vouchered, and he was transported to the 28th Precinct for the breathalyzer test. At the 28th Precinct, defendant informed Police Officer Palladino he had consumed two 16-ounce beers around 5 o'clock and stopped drinking at 6 o'clock.

Police Officer Palladino testified he observed defendant from the time of arrest until their arrival at central booking and did not see him belch, hiccup, regurgitate or eat during that period of time. Police Officer Hernandez similarly testified he observed defendant from his arrest until their arrival at the 28th Precinct and did not see him belch, hiccup, smoke or place any foreign substance in his mouth.

The People submitted documentary evidence that the breathalyzer machine and ampoule were in proper working condition and thus able to accurately reflect the [\*\*511] blood alcohol level of defendant. The certificate of breathalyzer analysis documents the fact that the test ampoules were checked [\*\*\*6] and found to contain the proper chemical solution. The police department maintenance unit performed calibration tests at intervals of 41 days and 3 days prior to the date defendant's breath was tested and determined the machine was functioning [\*263] properly. Simulator tests were run 126 days prior to defendant's breath test and 4 days afterward and the machine was found to be working properly.

Police Officer Delgado, a Highway 1 officer, radar section, administered the breathalyzer test to defendant at approximately 8:30 p.m. This witness is a certified breathalyzer operator with 50-60 hours of training who was recertified in February 1985. He has administered approximately 100 breathalyzer tests. Police Officer Delgado testified he informed defendant of his right to refuse to take the breathalyzer test and the consequences thereof under *Vehicle and Traffic Law § 1194*. Defendant agreed to submit to the test but refused to take a coordination test. Defendant was videotaped before and after the breathalyzer test. This videotape was shown to the jury.

137 Misc. 2d 260, \*263; 520 N.Y.S.2d 509, \*\*511;  
1987 N.Y. Misc. LEXIS 2683, \*\*\*6

Prior to administering the test, Police Officer Delgado ascertained all radios on that floor of the building were turned [\*\*\*7] off to prevent any interference with the functioning of the breathalyzer. This witness, using a picture of the breathalyzer as a visual aid, explained how to administer the breathalyzer test and the New York City Police Department procedures that must be followed. He testified he complied with all departmental requirements; that the breathalyzer machine is always left on (to avoid delays caused by the need to warm up the machine) so he did not have to turn it on. Police Officer Delgado is not responsible for or involved in the maintenance of the machine and has no expertise in that area.

In answer to the court's question, Police Officer Delgado testified the margin of error for this unit is .001. Moreover, he testified that hiccupping, belching, smoking or placing any foreign substance in defendant's mouth could affect the test results. The breathalyzer result might register a blood alcohol content, hereinafter BAC, of .099 or .101. Defendant's breathalyzer test result was .10. In this witness's opinion, defendant was intoxicated.

The defendant presented no evidence.

#### LEGAL ANALYSIS

The results of scientific tests for alcohol content have been admissible since 1941 to prove [\*\*\*8] driving while intoxicated. (*See, People v Cruz*, 48 NY2d 419 [1979].) However, the legislative history of *Vehicle and Traffic Law* § 1192 (2) begins in 1960 and is cogently set forth in *People v Schmidt* (124 Misc 2d 102 [\*264] [Crim Ct, NY County 1984]) and *People v Fox* (87 Misc 2d 210, 214-220 [North Castle Justice Ct, Westchester County 1976]). This court has read the legislative history of the statute and agrees with the court in *Fox* that: "The Legislature has been most concerned with evidence as to the effect that large quantities of alcohol have on a driver. Accordingly, the Legislature has increased the scope of the Judge's power to punish for such offense. It also has provided that the offense is a per se offense, so as to eliminate the uncertainty that prima facie tests invariably create. Originally, the per se offense was established only by a relatively high level of blood-alcohol, but the Legislature has repeatedly lowered the alcohol level requisite for conviction." (*People v Fox, supra, at 220.*) It should be noted that when the New York Legislature set the present level of .10 of blood alcohol content for intoxication, it was reacting [\*\*\*9] to the fact that by 1972 that was the standard recommended by the National Highway Safety Bureau after extensive testing. Moreover, 42 States had already enacted legislation which reduced the blood alcohol level to .10 or less and 2 States had even lowered it to .08. (1972 NY Legis Ann, at 289.)

[\*\*512] Defendant cites two decisions for the proposition that the breathalyzer reading of .10, given the machine's margin of error, does not constitute proof beyond a reasonable doubt. In *People v Hellwig* (22 Misc 2d 286 [Schenectady County Ct 1960]), the County Court, acting as an appeals court, reversed the conviction of a defendant found to have had a blood alcohol content of .16 at a time when the statute provided that a reading of .15 was prima facie evidence of intoxication. *Hellwig* is easily distinguished on the law and on the facts as well. First, as to the applicable law, defendant concedes that, in 1960, *Vehicle and Traffic Law* § 1192 (2) provided that the test results were only prima facie evidence not per se evidence of intoxication, as has been the case since 1971. Second, the court in *Hellwig* specifically found that the prima facie value of the blood [\*\*\*10] test was contradicted by other evidence which showed defendant had operated his car safely through congested traffic before the accident and that his unsteady walk may have been the result of an arthritic condition. Given the conflicting factual inferences presented from the test results and the other evidence of the defendant's intoxication, the court accorded the benefit of the doubt to the defendant.

In the recently reported decision of *People v Schaefer* (135 Misc 2d 554 [Yonkers City Ct, Westchester County 1987]), the [\*265] defendant was found not guilty after a bench trial of violating *Vehicle and Traffic Law* § 1192 (2). The prosecution arose out of an accident in which the defendant's car struck and killed a young child and the Grand Jury returned a no true bill on a reckless assault charge (Penal Law § 120.05 [2]). The breathalyzer reading was .10 on the Smith and Wesson Model 900A, the same machine used in the instant case. The court credited a defense expert's testimony that the breathalyzer machine has an error factor of .001, plus or minus. Defendant points to certain language

in *Schaefer* that he urges should be dispositive of the facts before this [\*\*\*11] court: "This [a breathalyzer reading of precisely .10] is the lowest possible reading one must have in his system in order to be convicted of the crime charged. If the machine is susceptible to the slightest error, the benefit of the error must inure to the defendant. If there is the slightest possibility of human error in the operation of the instrument, that error must inure to the benefit of the defendant." ( *People v Schaefer, supra, at 555.* )

This court does not reach this same conclusion for the reasons cited below. Moreover, a thorough examination of *Schaefer (supra)* reveals a radically different set of facts than the case at bar.

To begin with, the *Schaefer* court emphasized that "the breathalyzer test was the sole evidence utilized to attempt to prove the defendant's guilt" ( *People v Schaefer, supra, at 555* ). Except for a slight smell of alcoholic beverage, the investigating detective at the accident scene testified that the defendant exhibited none of the usual indicia of intoxication, i.e., slurred speech, glassy eyes or unsteadiness on his feet. In fact, the witness stated the defendant appeared "fine in all respects" ( *People v Schaefer, supra, [\*\*\*12] at 556* ).

In sharp contrast to the *Schaefer* court's finding that there was no evidence of intoxication besides the unreliable breath test result, the evidence of intoxication before this jury included the following: testimony of the arresting officers that the defendant swerved from lane to lane without signalling; that he smelled of alcohol from five feet away; that he staggered and had bloodshot eyes; and, in the opinion of Police Officer Delgado, that he appeared intoxicated nearly two hours after being arrested. Indeed, the jury found by its verdict that there was proof beyond a reasonable doubt that the defendant was driving while impaired.

However, a subjective analysis of defendant's behavior and [\*266] condition is irrelevant when a violation of *Vehicle and Traffic Law § 1192 (2)* is at issue. Although critical elements of *Vehicle and Traffic Law § 1192 (1)* and (3) crimes, the legislative intent behind enacting *Vehicle and Traffic Law § 1192 (2)* was to create a crime provable solely by objective scientific criteria. ( *People v [\*\*513] Schmidt, supra, at 108.* ) [HN1] The sole burden placed upon the People is to place into evidence legally probative breathalyzer [\*\*\*13] or other chemical test results, in compliance with *Vehicle and Traffic Law § 1194*, evidencing a breathalyzer count of .10 or more.

Equally important, the *Schaefer* court found that the particular breathalyzer machine used to test the defendant had been sent to Albany for a major overhaul twice; the first time a little over a year before defendant's test and, significantly, just 18 days afterwards. Both times the machine was found to be in terrible condition; acid stained and filthy ( *People v Schaefer, supra, at 557-558* ). The defense expert testified that because the machine had to be rebuilt twice in a period of slightly more than one year, this indicated it had been abused and the reading could not possibly be true. In his uncontradicted opinion, the internal damage reflected in the machine's records was the result of the mishandling of the test ampoule, permitting some of its fluid to escape and drip into the machine. ( *People v Schaefer, supra, at 558.* )

Not surprisingly on this set of facts, the *Schaefer* court found that it was dealing not so much with the issue of the margin of error's significance on a true reading of .10, but rather with a totally unreliable [\*\*\*14] machine: "The reported condition of the machine is such that no reasonable person could give it any credence whatsoever. In the condition that the machine was reported to be in, it is doubtful that its reliability could be useful in a DWI prosecution with readings of .15 or .20, much less for a reading of .10. This is not the quality of evidence necessary to support a criminal conviction." ( *People v Schaefer, supra, at 559.* )

The court goes on to list six reasons for its finding of reasonable doubt as to the defendant's guilt, including the breathalyzer machine's margin of error. It also opines that any of the six reasons standing alone is sufficient to establish reasonable doubt. This court regards the actual holding of *Schaefer (supra)*, as limited by its facts, to be contained in the above-quoted finding that the evidence was insufficient due to the breathalyzer's proven unreliability. All else is mere dicta.

137 Misc. 2d 260, \*266; 520 N.Y.S.2d 509, \*\*513;  
1987 N.Y. Misc. LEXIS 2683, \*\*\*14

[\*267] A BAC of .10 represents a significant loss of one's ability to safely operate a motor vehicle. In this case, the People's documentary evidence demonstrated, to the obvious satisfaction of the jury, that the breathalyzer machine here had been tested [\*\*\*15] and calibrated shortly before its use on defendant and that it was working properly. [HN2] A jury's verdict will not be set aside on the grounds of reasonable doubt so long as the evidence in the case is sufficient to support the jury's conclusion. Here, the jury was clearly confronted with the issue of whether the breathalyzer reading, given the possibility that the margin of error came into play, was really .10, .099, or even .101. This court finds the jury's resolution of this issue against the defendant is amply supported by the other evidence in the case regarding the accuracy and reliability of the breathalyzer machine together with the above-mentioned eyewitness testimony of defendant's intoxication.

**The People of the State of New York, Plaintiff, v. Jose Cancel, Defendant****[NO NUMBER IN ORIGINAL]****Criminal Court of the City of New York, New York County*****137 Misc. 2d 260; 520 N.Y.S.2d 509; 1987 N.Y. Misc. LEXIS 2683*****October 15, 1987****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant, charged with driving while intoxicated, moved for a trial order of dismissal pursuant to *N.Y. Crim. Proc. Law § 290.10* at the conclusion of the prosecution's case and at the close of all the evidence.

**OVERVIEW:** Defendant, in his motion for a trial order of dismissal, argued that because his breathalyzer test reading was .10, and the breathalyzer machine had a margin of error of plus or minus .001, there was a reasonable doubt which precluded a jury verdict of guilty. The court reserved decision and defendant was found guilty. In ruling on defendant's motion, the court found that the jury's resolution of the issue against defendant was amply supported by the other evidence in the case regarding the accuracy and reliability of the breathalyzer machine together with the arresting officers' eyewitness testimony of defendant's intoxication. The prosecution presented documentary evidence demonstrating that the breathalyzer machine had been tested and calibrated shortly before it was used on defendant, and there was testimony that defendant swerved from lane to lane without signaling and smelled of alcohol from five feet away.

**OUTCOME:** The court denied defendant's motion for a trial order of dismissal in a prosecution for driving while intoxicated and held that the breathalyzer machine provided an accurate reading of his blood alcohol level.

**CORE TERMS:** breathalyzer, machine, reasonable doubt, margin of error, intoxication, lane, intoxicated, driving, alcohol, feet, evidence of intoxication, documentary evidence, unreliable, arrested, tested, guilt, minus, blood alcohol, signalling, bloodshot, ampoule, necessary to support, eyewitness testimony, prima facie evidence, legislative history, attempt to prove, amply supported, proof beyond, jury verdict, machine used

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General***

**Overview**

[HN1] The sole burden placed upon the people is to place into evidence legally probative breathalyzer or other chemical test results, in compliance with *N.Y. Veh. & Traf. Law § 1194*, evidencing a breathalyzer count of .10 or more.

**Criminal Law & Procedure > Appeals > Standards of Review > General Overview**

[HN2] A jury's verdict will not be set aside on the grounds of reasonable doubt so long as the evidence in the case is sufficient to support the jury's conclusion.

**HEADNOTES:** [\*\*\*1]**Motor Vehicles -- Chemical Tests**

Defendant's breathalyzer test reading of .10 of 1% by weight of alcohol in his blood, given the breathalyzer machine's margin of error of plus or minus .001, did not create a reasonable doubt which precluded a jury verdict of guilty of driving while intoxicated pursuant to *Vehicle and Traffic Law § 1192 (2)*. If the breathalyzer test was the sole evidence utilized to attempt to prove defendant's guilt, and the machine was demonstrated to be unreliable, then reasonable doubt would exist. When a violation of section 1192 (2) is at issue, defendant's behavior and physical condition is irrelevant, the sole evidence necessary to support a conviction under that statute being a breathalyzer reading of .10 or more. Here, the jury's conclusion that the breathalyzer reading of .10 was accurate, given the margin of error, is amply supported by both documentary evidence that the machine had been tested and calibrated shortly before its use on defendant and that it was working properly, and the arresting officers' eyewitness testimony of defendant's intoxication.

**COUNSEL:**

*Caesar Cirigliano* and *Andria Leeds*, for defendant.

*Robert M. Morgenthau*, [\*\*\*2] *District Attorney (Maggie Pasquale* of counsel), for plaintiff.

**JUDGES:**

Michael A. Gary, J.

**OPINION BY:**

GARY

**OPINION:**[\*261] **OPINION OF THE COURT**

[\*\*509] Defendant Jose Cancel was arrested and charged with driving while intoxicated pursuant to *Vehicle and Traffic Law § 1192 (2)* and (3). In a jury trial held before me, at the conclusion of the People's case and at the close of all the evidence, defendant moved for a trial order of dismissal pursuant to *CPL 290.10*. [\*\*510] Defendant contended the evidence was legally insufficient to establish the charge of *Vehicle and Traffic Law § 1192 (2)*. Defendant argued that since his breathalyzer test and reading was .10 of 1% by weight of alcohol in his blood, hereinafter .10, and the breathalyzer machine had a margin of error of plus or minus .001, there was a reasonable doubt which precluded a jury verdict of guilty of this charge. This court reserved decision and defendant was convicted of violating *Vehicle and Traffic Law § 1192 (1)*, as a lesser included offense of section 1192 (3), and section 1192 (2). For the reasons stated herein, defendant's motion for a trial order of dismissal is denied.

TRIAL EVIDENCE

Police Officers [\*\*\*3] Palladino and Hernandez, experienced officers assigned to Highway 1, testified they were patrolling 125th Street on a driving-while-intoxicated assignment on December 22, 1986. They observed defendant, operating a tan Dodge station wagon east on 125th Street at approximately 30 miles per hour, change from the right to left lanes, then back to the right lane, without signalling. Approximately 500 feet later, defendant repeated this swerving motion without signalling. The police patrol followed defendant for a five-minute period about 1 to 1 1/2 car lengths behind defendant in the right lane, observing defendant drive several hundred feet. No cars obstructed their view of defendant's car. Traffic was very light and defendant did not cut off any other cars when changing lanes.

The officers directed defendant to pull over. Police Officer Palladino testified defendant readily complied, parking his car at a bus stop, in a smooth, steady manner. Police Officer Palladino approached defendant's car on the driver's side, at which time defendant exited the vehicle. Police Officer Palladino testified he smelled alcohol on defendant from a distance of five feet, defendant's eyes were watery, [\*\*\*4] red and bloodshot. He requested defendant to walk to the adjacent sidewalk and [\*262] observed defendant using the car to support himself. Defendant walked in an unsteady manner. Under cross-examination, Police Officer Palladino testified he did not request defendant perform any coordination tests because he was sure defendant was driving while under the influence of alcohol. Police Officer Hernandez testified he observed defendant leaning on the car to support himself. He described defendant's gait as uncoordinated and staggering, that defendant had a strong odor of alcohol, watery and bloodshot eyes and his clothing was slightly disarrayed.

Police Officer Palladino further testified defendant indicated he had had a few beers and was going to Connecticut. Defendant understood Police Officer Palladino's directions, had a Spanish accent and exhibited slurred speech. Upon request, defendant produced a class 4 chauffeur's license and registration for the car. Defendant is not the owner of the car. Police Officer Hernandez testified he moved defendant's vehicle into a legal parking space and that no search of the car was made.

Defendant was arrested at approximately 7:30 [\*\*\*5] p.m. He was driven to the 25th Precinct. Police Officer Palladino read defendant the *Miranda* rights en route. At the 25th Precinct, Police Officer Palladino completed pedigree forms with the assistance of defendant, defendant's personal property was vouchered, and he was transported to the 28th Precinct for the breathalyzer test. At the 28th Precinct, defendant informed Police Officer Palladino he had consumed two 16-ounce beers around 5 o'clock and stopped drinking at 6 o'clock.

Police Officer Palladino testified he observed defendant from the time of arrest until their arrival at central booking and did not see him belch, hiccup, regurgitate or eat during that period of time. Police Officer Hernandez similarly testified he observed defendant from his arrest until their arrival at the 28th Precinct and did not see him belch, hiccup, smoke or place any foreign substance in his mouth.

The People submitted documentary evidence that the breathalyzer machine and ampoule were in proper working condition and thus able to accurately reflect the [\*\*511] blood alcohol level of defendant. The certificate of breathalyzer analysis documents the fact that the test ampoules were checked [\*\*\*6] and found to contain the proper chemical solution. The police department maintenance unit performed calibration tests at intervals of 41 days and 3 days prior to the date defendant's breath was tested and determined the machine was functioning [\*263] properly. Simulator tests were run 126 days prior to defendant's breath test and 4 days afterward and the machine was found to be working properly.

Police Officer Delgado, a Highway 1 officer, radar section, administered the breathalyzer test to defendant at approximately 8:30 p.m. This witness is a certified breathalyzer operator with 50-60 hours of training who was recertified in February 1985. He has administered approximately 100 breathalyzer tests. Police Officer Delgado testified he informed defendant of his right to refuse to take the breathalyzer test and the consequences thereof under *Vehicle and Traffic Law § 1194*. Defendant agreed to submit to the test but refused to take a coordination test. Defendant was videotaped before and after the breathalyzer test. This videotape was shown to the jury.

Prior to administering the test, Police Officer Delgado ascertained all radios on that floor of the building were turned [\*\*\*7] off to prevent any interference with the functioning of the breathalyzer. This witness, using a picture of the breathalyzer as a visual aid, explained how to administer the breathalyzer test and the New York City Police Department procedures that must be followed. He testified he complied with all departmental requirements; that the breathalyzer machine is always left on (to avoid delays caused by the need to warm up the machine) so he did not have to turn it on. Police Officer Delgado is not responsible for or involved in the maintenance of the machine and has no expertise in that area.

In answer to the court's question, Police Officer Delgado testified the margin of error for this unit is .001. Moreover, he testified that hiccupping, belching, smoking or placing any foreign substance in defendant's mouth could affect the test results. The breathalyzer result might register a blood alcohol content, hereinafter BAC, of .099 or .101. Defendant's breathalyzer test result was .10. In this witness's opinion, defendant was intoxicated.

The defendant presented no evidence.

#### LEGAL ANALYSIS

The results of scientific tests for alcohol content have been admissible since 1941 to prove [\*\*\*8] driving while intoxicated. (*See, People v Cruz*, 48 NY2d 419 [1979].) However, the legislative history of *Vehicle and Traffic Law* § 1192 (2) begins in 1960 and is cogently set forth in *People v Schmidt* (124 Misc 2d 102 [\*264] [Crim Ct, NY County 1984]) and *People v Fox* (87 Misc 2d 210, 214-220 [North Castle Justice Ct, Westchester County 1976]). This court has read the legislative history of the statute and agrees with the court in *Fox* that: "The Legislature has been most concerned with evidence as to the effect that large quantities of alcohol have on a driver. Accordingly, the Legislature has increased the scope of the Judge's power to punish for such offense. It also has provided that the offense is a per se offense, so as to eliminate the uncertainty that prima facie tests invariably create. Originally, the per se offense was established only by a relatively high level of blood-alcohol, but the Legislature has repeatedly lowered the alcohol level requisite for conviction." (*People v Fox, supra*, at 220.) It should be noted that when the New York Legislature set the present level of .10 of blood alcohol content for intoxication, it was reacting [\*\*\*9] to the fact that by 1972 that was the standard recommended by the National Highway Safety Bureau after extensive testing. Moreover, 42 States had already enacted legislation which reduced the blood alcohol level to .10 or less and 2 States had even lowered it to .08. (1972 NY Legis Ann, at 289.)

[\*\*512] Defendant cites two decisions for the proposition that the breathalyzer reading of .10, given the machine's margin of error, does not constitute proof beyond a reasonable doubt. In *People v Hellwig* (22 Misc 2d 286 [Schenectady County Ct 1960]), the County Court, acting as an appeals court, reversed the conviction of a defendant found to have had a blood alcohol content of .16 at a time when the statute provided that a reading of .15 was prima facie evidence of intoxication. *Hellwig* is easily distinguished on the law and on the facts as well. First, as to the applicable law, defendant concedes that, in 1960, *Vehicle and Traffic Law* § 1192 (2) provided that the test results were only prima facie evidence not per se evidence of intoxication, as has been the case since 1971. Second, the court in *Hellwig* specifically found that the prima facie value of the blood [\*\*\*10] test was contradicted by other evidence which showed defendant had operated his car safely through congested traffic before the accident and that his unsteady walk may have been the result of an arthritic condition. Given the conflicting factual inferences presented from the test results and the other evidence of the defendant's intoxication, the court accorded the benefit of the doubt to the defendant.

In the recently reported decision of *People v Schaefer* (135 Misc 2d 554 [Yonkers City Ct, Westchester County 1987]), the [\*265] defendant was found not guilty after a bench trial of violating *Vehicle and Traffic Law* § 1192 (2). The prosecution arose out of an accident in which the defendant's car struck and killed a young child and the Grand Jury returned a no true bill on a reckless assault charge (Penal Law § 120.05 [2]). The breathalyzer reading was .10 on the Smith and Wesson Model 900A, the same machine used in the instant case. The court credited a defense expert's testimony that the breathalyzer machine has an error factor of .001, plus or minus. Defendant points to certain language

in *Schaefer* that he urges should be dispositive of the facts before this [\*\*\*11] court: "This [a breathalyzer reading of precisely .10] is the lowest possible reading one must have in his system in order to be convicted of the crime charged. If the machine is susceptible to the slightest error, the benefit of the error must inure to the defendant. If there is the slightest possibility of human error in the operation of the instrument, that error must inure to the benefit of the defendant." ( *People v Schaefer, supra, at 555.* )

This court does not reach this same conclusion for the reasons cited below. Moreover, a thorough examination of *Schaefer (supra)* reveals a radically different set of facts than the case at bar.

To begin with, the *Schaefer* court emphasized that "the breathalyzer test was the sole evidence utilized to attempt to prove the defendant's guilt" ( *People v Schaefer, supra, at 555* ). Except for a slight smell of alcoholic beverage, the investigating detective at the accident scene testified that the defendant exhibited none of the usual indicia of intoxication, i.e., slurred speech, glassy eyes or unsteadiness on his feet. In fact, the witness stated the defendant appeared "fine in all respects" ( *People v Schaefer, supra, [\*\*\*12] at 556* ).

In sharp contrast to the *Schaefer* court's finding that there was no evidence of intoxication besides the unreliable breath test result, the evidence of intoxication before this jury included the following: testimony of the arresting officers that the defendant swerved from lane to lane without signalling; that he smelled of alcohol from five feet away; that he staggered and had bloodshot eyes; and, in the opinion of Police Officer Delgado, that he appeared intoxicated nearly two hours after being arrested. Indeed, the jury found by its verdict that there was proof beyond a reasonable doubt that the defendant was driving while impaired.

However, a subjective analysis of defendant's behavior and [\*266] condition is irrelevant when a violation of *Vehicle and Traffic Law § 1192 (2)* is at issue. Although critical elements of *Vehicle and Traffic Law § 1192 (1)* and (3) crimes, the legislative intent behind enacting *Vehicle and Traffic Law § 1192 (2)* was to create a crime provable solely by objective scientific criteria. ( *People v [\*\*513] Schmidt, supra, at 108.* ) [HN1] The sole burden placed upon the People is to place into evidence legally probative breathalyzer [\*\*\*13] or other chemical test results, in compliance with *Vehicle and Traffic Law § 1194*, evidencing a breathalyzer count of .10 or more.

Equally important, the *Schaefer* court found that the particular breathalyzer machine used to test the defendant had been sent to Albany for a major overhaul twice; the first time a little over a year before defendant's test and, significantly, just 18 days afterwards. Both times the machine was found to be in terrible condition; acid stained and filthy ( *People v Schaefer, supra, at 557-558* ). The defense expert testified that because the machine had to be rebuilt twice in a period of slightly more than one year, this indicated it had been abused and the reading could not possibly be true. In his uncontradicted opinion, the internal damage reflected in the machine's records was the result of the mishandling of the test ampoule, permitting some of its fluid to escape and drip into the machine. ( *People v Schaefer, supra, at 558.* )

Not surprisingly on this set of facts, the *Schaefer* court found that it was dealing not so much with the issue of the margin of error's significance on a true reading of .10, but rather with a totally unreliable [\*\*\*14] machine: "The reported condition of the machine is such that no reasonable person could give it any credence whatsoever. In the condition that the machine was reported to be in, it is doubtful that its reliability could be useful in a DWI prosecution with readings of .15 or .20, much less for a reading of .10. This is not the quality of evidence necessary to support a criminal conviction." ( *People v Schaefer, supra, at 559.* )

The court goes on to list six reasons for its finding of reasonable doubt as to the defendant's guilt, including the breathalyzer machine's margin of error. It also opines that any of the six reasons standing alone is sufficient to establish reasonable doubt. This court regards the actual holding of *Schaefer (supra)*, as limited by its facts, to be contained in the above-quoted finding that the evidence was insufficient due to the breathalyzer's proven unreliability. All else is mere dicta.

137 Misc. 2d 260, \*266; 520 N.Y.S.2d 509, \*\*513;  
1987 N.Y. Misc. LEXIS 2683, \*\*\*14

[\*267] A BAC of .10 represents a significant loss of one's ability to safely operate a motor vehicle. In this case, the People's documentary evidence demonstrated, to the obvious satisfaction of the jury, that the breathalyzer machine here had been tested [\*\*\*15] and calibrated shortly before its use on defendant and that it was working properly. [HN2] A jury's verdict will not be set aside on the grounds of reasonable doubt so long as the evidence in the case is sufficient to support the jury's conclusion. Here, the jury was clearly confronted with the issue of whether the breathalyzer reading, given the possibility that the margin of error came into play, was really .10, .099, or even .101. This court finds the jury's resolution of this issue against the defendant is amply supported by the other evidence in the case regarding the accuracy and reliability of the breathalyzer machine together with the above-mentioned eyewitness testimony of defendant's intoxication.

**The People of the State of New York, Plaintiff, v. Robert S. Gutterson, Defendant**

[NO NUMBER IN ORIGINAL]

**Justice Court of New York, Village of Lattingtown, Nassau County***93 Misc. 2d 1105; 403 N.Y.S.2d 998; 1978 N.Y. Misc. LEXIS 2182***April 6, 1978****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant filed a written application, on notice to the People, requesting information, documents, etc., that he deemed necessary for his defense to the charge of operating his motor vehicle within a village at a speed of 52 miles per hour in a 40 mile per hour zone in violation of Village of Lattingtown, N.Y., Ordinances, art. 2, § 230.02.

**OVERVIEW:** Defendant sought information to aid him in his defense against a speeding charge. He requested a bill of particulars specifically stating the means by which the officer determined that defendant exceeded the speed limit, service and maintenance records on any radar unit used, and personnel records of the arresting officer. The court found that defendant was entitled to a supporting deposition under *N.Y. Crim. Proc. Law § 100.25(2)*, by the officer containing factual allegations of an evidentiary character that supplemented the simplified traffic information and supported the belief that defendant committed the offense. The court found that defendant was entitled to the manufacturer and model name and number of any radar device used, but was not entitled to maintenance and calibration records. The court held that the officer's personnel records bearing on the officers' ability to estimate speeds of moving vehicles was not protected.

**OUTCOME:** The court ordered the police officer to file a supporting deposition and the prosecuting attorney to serve a bill of particulars upon defendant specifying the means by which the officer determined the defendant exceeded the speed limit. The court denied defendant's request for maintenance and calibration information for any radar used. The court ordered the officer's personnel records to be produced to the court for inspection.

**CORE TERMS:** speed, personnel, disclosure, police officer, estimate, traffic, speeding, detection, motor vehicles, deposition, simplified, prepare, prosecuting attorney, speed limit, cross-examination, manufacturer, calibration, exceeded, radar, patrolman, Freedom of Information Law, continued employment, issue of credibility, public disclosure, absolute right, personnel file, final arbiter, lawful rate, cross-examine, materiality

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Reports of Examinations & Tests***

[HN1] A defendant must be fully apprised of the facts and law which he is being accused of having violated. In a traffic matter, the defendant is entitled to receive, in addition to the simplified traffic information with which he was served, a supporting deposition, *N.Y. Crim. Proc. Law § 100.25(2)*, by the police officer containing factual allegations of an evidentiary character which supplements the simplified traffic information and supports the belief that defendant committed the offense charged. The defendant has an absolute right to a supporting deposition before the commencement of trial.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination***

[HN2] The opinion evidence of police officers, uncorroborated by mechanical devices, will be sufficient to sustain a speeding conviction. A police officer's estimate of speeds based upon his experience may be one means therefore of demonstrating that a defendant has been guilty of speeding. In order for the trier of the facts to be fully cognizant of all factors relevant to the patrolman's experience and ability to estimate the speeds of moving vehicles, a defendant may properly present evidence or cross-examine the officer in relation to his training, etc. In addition, in order to obtain a fair trial, the defendant should be prepared to cross-examine the police officer on his ability to estimate the speed of moving vehicles and the requested information is germane to that ability.

***Governments > Local Governments > Police Power******Governments > State & Territorial Governments > Employees & Officials***

[HN3] The Civil Rights Law provides a means to obtain all personnel records, used to evaluate performance toward continued employment or promotion, under the control of any police agency or department of the state or any political subdivision thereof as may be mandated by lawful court order. *N.Y. Civ. Rights Law § 50-a*. This legislation establishes a uniform rule in relation to the production of police personnel records. The enactment further provides certain procedural safeguards to protect against the unbridled disclosure of said personnel records.

**HEADNOTES: [\*\*\*1]****Motor Vehicles -- Speeding**

1. Defendant has an absolute right to receive a supporting deposition by the complainant police officer ( *CPL 100.25*, subd 2) prior to trial containing factual allegations of an evidentiary character which supplements the simplified traffic information charging him with speeding and supports the belief that defendant committed the offense. In addition, since a statement that defendant was traveling a certain speed above the designated lawful rate is insufficient to inform the defendant so that he may be able to properly prepare and conduct his defense, the prosecuting attorney is directed to serve a bill of particulars upon the defendant specifying the means by which the police officer determined that defendant exceeded the speed limit and, if a speed detection device was employed to clock defendant's speed, the name of the manufacturer, model and number of said device. There is no need to disclose to defendant the maintenance and calibration records of such speed detection device.

**Motor Vehicles -- Speeding**

2. A defendant charged with a speeding traffic violation is entitled to disclosure of certain personnel records of the arresting [\*\*\*2] police officer relating to the officer's ability to use radar equipment and to visually estimate the speed of moving vehicles as an aid in cross-examination on the issue of credibility. The information sought by defendant in the officer's personnel records is properly discoverable under *section 50-a of the Civil Rights Law*, which provides a means to obtain all "personnel records, used to evaluate performance toward continued employment or promotion, under the control of any police agency or department", and is not exempted from public disclosure under any provisions of the Freedom of Information Law (Public Officers Law, art 6). To protect against the unbridled disclosure of police personnel records, each determination of applications for disclosure must be made on an *ad hoc* basis with the court

being the final arbiter as to whether the defendant has demonstrated the relevancy and materiality of the information in the personnel records to warrant disclosure.

**COUNSEL:**

*Matthew P. Brady* for plaintiff.

*Robert S. Gutterson*, defendant *pro se*.

**JUDGES:**

William R. Humburg, J.

**OPINION BY:**

HUMBURG

**OPINION:**

[\*1106] **OPINION OF THE COURT**

[\*\*999] On February 25, 1977, the defendant, [\*\*\*3] Robert S. Gutterson, was issued a uniform traffic summons by a member of the Nassau County Police Department which charged said defendant with a violation of section 230.02 of article 2 of the Ordinances of the Village of Lattingtown in that he allegedly operated his motor vehicle within the Village of Lattingtown at a speed of 52 miles per hour in a 40 mile per hour zone.

The defendant appeared *pro se* before the Village Court in Lattingtown and requested certain documents from the Nassau County Police Department which he believed would aid him in the preparation of his defense to the alleged violation. This court advised the defendant to make a written application to the court, on notice to the People, requesting the information, documents, etc., which the defendant deemed necessary for his defense. The defendant has complied with the court's directive by serving his requests and the reasons therefor on the prosecuting attorney for the village. The defendant's requests are as follows:

1. A bill of particulars specifically stating the means by which the police officer arrived at the determination that the defendant exceeded the speed limit.

[\*\*1000] 2. If a radar unit [\*\*\*4] was used to measure the speed of defendant's automobile, defendant seeks to obtain service records for said unit and when it was last calibrated before February 25, 1977, as well as records for maintenance and calibration thereafter.

3. Finally, defendant requests personnel records of the arresting officer, i.e., test scores or grades in determining or measuring his ability to use equipment for recording the speed of motor vehicles, test scores or grades measuring his ability to visually estimate the speed of motor vehicles, the deficiencies [\*1107] and margins of error therein and the dates when said patrolman was given refresher or training courses in the use of such equipment and/or his ability to estimate speeds of moving vehicles.

It is fundamental to our system of justice that [HN1] a defendant must be fully apprised of the facts and law which he is being accused of having violated. In this matter, the defendant is entitled to receive, in addition to the simplified traffic information with which he was served on February 25, 1977, a supporting deposition ( *CPL 100.25*, subd 2) by the police officer containing factual allegations of an evidentiary character which supplements the [\*\*\*5] simplified traffic information and supports the belief that defendant committed the offense charged ( *CPL 100.20*, *100.25*, subd 2). The defendant has an absolute right to a supporting deposition before the commencement of trial. ( *People v De Feo*,

93 Misc. 2d 1105, \*1107; 403 N.Y.S.2d 998, \*\*1000;  
1978 N.Y. Misc. LEXIS 2182, \*\*\*5

77 Misc 2d 523, 524.) Accordingly, the complainant police officer is directed to file a supporting deposition with this court and cause a copy thereof to be served upon the defendant.

In addition, in order that the defendant may be able to properly prepare and conduct his defense in this matter (see *CPL 100.45, 200.90*), this court is satisfied that defendant is entitled to more particularization about his alleged violation than is contained in the simplified traffic information. Therefore, the prosecuting attorney is directed to serve a bill of particulars upon the defendant specifying the means by which the police officer determined the defendant exceeded the speed limit. Simply to state that a defendant was traveling a certain speed above the designated lawful rate is insufficient to inform the defendant so that he may prepare his defense. In addition to a police officer's independent estimate of the defendant's speed, there are [\*\*\*6] a number of instruments or devices which may be employed to accomplish the same objective. As Judge Namm noted in *People v Perlman (89 Misc 2d 973, 976)*, radar detection of speed has made great advances and various types of "radar devices have gained wide acceptance in all courts". If a speed detection device was employed to clock defendant's speed, he should be apprised of the manufacturer and model name and number of said device in the bill of particulars. This is at least necessary in keeping with the spirit of affording a defendant an adequate opportunity to prepare for his defense. In order to properly defend himself, is a defendant in a traffic matter required to bear the unreasonable burden of coming to [\*1108] court prepared to try his case, anticipating every available device on the market employed by the police departments to detect speeds of motor vehicles?

Defendant's request for information relative to the maintenance and calibration records of a speed detection device, if one was used to measure defendant's speed, is denied. The previous direction to provide defendant with the name of the manufacturer, model and number of said device is ample disclosure [\*\*\*7] to assist defendant in preparing his defense.

Finally, defendant requests disclosure of certain personnel records of the arresting officer in the custody of the Nassau County Police Department which would bear on the officer's ability to estimate the speeds of moving vehicles. It is well settled in this State that [HN2] the opinion evidence of police officers, "uncorroborated by mechanical devices, will be sufficient to sustain a speeding conviction." (*People v Olsen, 22 NY2d 230, 231*; see, also, *Matter of Sulli v Appeals Bd. of Admin. Adjudication Bur., 55 AD2d 457, 461.*) A police officer's estimate [\*\*1001] of speeds based upon his experience may be one means therefore of demonstrating that a defendant has been guilty of speeding. In order for the trier of the facts to be fully cognizant of all factors relevant to the patrolman's experience and ability to estimate the speeds of moving vehicles, a defendant may properly present evidence or cross-examine the officer in relation to his training, etc. In addition, in order to obtain a fair trial, the defendant should be prepared to cross-examine the police officer on his ability to estimate the speed of moving vehicles and [\*\*\*8] the requested information is germane to that ability.

There has been no demonstration that the records requested, if they exist, constitute investigatory files compiled for law enforcement purposes and which thereby would be exempt from disclosure (*Marshall v New York State Police, 89 Misc 2d 529*). Traditionally, records of law enforcement agencies have been exempted from public disclosure and only recently through the "Freedom of Information Law" (Public Officers Law, art 6) has that restriction been relaxed. However, access to an agency's records under this law is not without limitation (*Public Officers Law, § 87, subd 2*; see *Matter of Westchester Rockland Newspapers v Mosczydlowski, 58 AD2d 234*). The information sought by the defendant in this action does not fall within any of the protected areas under this statute.

Courts have recently permitted disclosure of records of the [\*1109] complaints and investigations of civilian complaints against a police officer (*Walker v City of New York, 90 Misc 2d 565*); a copy of the "rap sheet" or arrest record in respect to the People's witnesses (*People v Howard, 89 Misc 2d 911*); and "a number of courts have granted [\*\*\*9] discovery of a wide range of official documents, including police arrest, investigative and incident reports [cases cited]" (*People v Simone, 92 Misc 2d 306, 312*).

In addition, the Legislature in 1976 amended [HN3] the Civil Rights Law so as to provide a means to obtain "[all]

93 Misc. 2d 1105, \*1109; 403 N.Y.S.2d 998, \*\*1001;  
1978 N.Y. Misc. LEXIS 2182, \*\*\*9

personnel records, used to evaluate performance toward continued employment or promotion, under the control of any police agency or department of the state or any political subdivision thereof \* \* \* as may be mandated by lawful court order" (*Civil Rights Law*, § 50-a). This legislation established a uniform rule in relation to the production of police personnel records. ( *Guzman v City of New York*, 91 Misc 2d 270, 271.) The enactment further provides certain procedural safeguards to protect against the unbridled disclosure of said personnel records.

An ample opportunity has been afforded the People to be heard on defendant's application. This court is satisfied that information relative to the patrolman's ability to estimate the speeds of moving vehicles which may be contained in the officer's personnel file is material which may be necessary for the defense during the trial of this matter and to aid [\*\*\*10] in cross-examination on the issue of credibility. (See *People v Sumpter*, 75 Misc 2d 55.) This decision is not a license nor shall it serve as an authorization that in every instance a defendant will be permitted to conduct an unfettered or untrammelled search of a police officer's personnel file. The determination of such applications must be made on an *ad hoc* basis with the court being the final arbiter as to whether the defendant has demonstrated the relevancy or materiality of the information in the personnel records to warrant disclosure (cf. *People v Lugo*, 93 Misc 2d 195).

Accordingly, the Nassau County Police Department is directed to produce the personnel records of the officer involved to the Trial Judge sealed, for examination and determination by said Judge as to whether any information contained in such records should be made available to defendant to aid in cross-examination or for other use at the time of trial. (See *People v Sumpter*, *supra*, p 61; *People v Simone*, *supra*, p 315.)

**JUDGES:**

William R. Humburg, J.

**OPINION BY:**

HUMBURG

**OPINION:**[\*1106] **OPINION OF THE COURT**

[\*\*999] On February 25, 1977, the defendant, [\*\*\*3] Robert S. Gutterson, was issued a uniform traffic summons by a member of the Nassau County Police Department which charged said defendant with a violation of section 230.02 of article 2 of the Ordinances of the Village of Lattingtown in that he allegedly operated his motor vehicle within the Village of Lattingtown at a speed of 52 miles per hour in a 40 mile per hour zone.

The defendant appeared *pro se* before the Village Court in Lattingtown and requested certain documents from the Nassau County Police Department which he believed would aid him in the preparation of his defense to the alleged violation. This court advised the defendant to make a written application to the court, on notice to the People, requesting the information, documents, etc., which the defendant deemed necessary for his defense. The defendant has complied with the court's directive by serving his requests and the reasons therefor on the prosecuting attorney for the village. The defendant's requests are as follows:

1. A bill of particulars specifically stating the means by which the police officer arrived at the determination that the defendant exceeded the speed limit.

[\*\*1000] 2. If a radar unit [\*\*\*4] was used to measure the speed of defendant's automobile, defendant seeks to obtain service records for said unit and when it was last calibrated before February 25, 1977, as well as records for maintenance and calibration thereafter.

3. Finally, defendant requests personnel records of the arresting officer, i.e., test scores or grades in determining or measuring his ability to use equipment for recording the speed of motor vehicles, test scores or grades measuring his ability to visually estimate the speed of motor vehicles, the deficiencies [\*1107] and margins of error therein and the dates when said patrolman was given refresher or training courses in the use of such equipment and/or his ability to estimate speeds of moving vehicles.

It is fundamental to our system of justice that [HN1] a defendant must be fully apprised of the facts and law which he is being accused of having violated. In this matter, the defendant is entitled to receive, in addition to the simplified traffic information with which he was served on February 25, 1977, a supporting deposition ( *CPL 100.25*, subd 2) by the police officer containing factual allegations of an evidentiary character which supplements the [\*\*\*5] simplified traffic information and supports the belief that defendant committed the offense charged ( *CPL 100.20*, *100.25*, subd 2). The defendant has an absolute right to a supporting deposition before the commencement of trial. ( *People v De Feo*,

93 Misc. 2d 1105, \*1107; 403 N.Y.S.2d 998, \*\*1000;  
1978 N.Y. Misc. LEXIS 2182, \*\*\*5

77 Misc 2d 523, 524.) Accordingly, the complainant police officer is directed to file a supporting deposition with this court and cause a copy thereof to be served upon the defendant.

In addition, in order that the defendant may be able to properly prepare and conduct his defense in this matter (see *CPL 100.45, 200.90*), this court is satisfied that defendant is entitled to more particularization about his alleged violation than is contained in the simplified traffic information. Therefore, the prosecuting attorney is directed to serve a bill of particulars upon the defendant specifying the means by which the police officer determined the defendant exceeded the speed limit. Simply to state that a defendant was traveling a certain speed above the designated lawful rate is insufficient to inform the defendant so that he may prepare his defense. In addition to a police officer's independent estimate of the defendant's speed, there are [\*\*\*6] a number of instruments or devices which may be employed to accomplish the same objective. As Judge Namm noted in *People v Perlman (89 Misc 2d 973, 976)*, radar detection of speed has made great advances and various types of "radar devices have gained wide acceptance in all courts". If a speed detection device was employed to clock defendant's speed, he should be apprised of the manufacturer and model name and number of said device in the bill of particulars. This is at least necessary in keeping with the spirit of affording a defendant an adequate opportunity to prepare for his defense. In order to properly defend himself, is a defendant in a traffic matter required to bear the unreasonable burden of coming to [\*1108] court prepared to try his case, anticipating every available device on the market employed by the police departments to detect speeds of motor vehicles?

Defendant's request for information relative to the maintenance and calibration records of a speed detection device, if one was used to measure defendant's speed, is denied. The previous direction to provide defendant with the name of the manufacturer, model and number of said device is ample disclosure [\*\*\*7] to assist defendant in preparing his defense.

Finally, defendant requests disclosure of certain personnel records of the arresting officer in the custody of the Nassau County Police Department which would bear on the officer's ability to estimate the speeds of moving vehicles. It is well settled in this State that [HN2] the opinion evidence of police officers, "uncorroborated by mechanical devices, will be sufficient to sustain a speeding conviction." (*People v Olsen, 22 NY2d 230, 231*; see, also, *Matter of Sulli v Appeals Bd. of Admin. Adjudication Bur., 55 AD2d 457, 461.*) A police officer's estimate [\*\*1001] of speeds based upon his experience may be one means therefore of demonstrating that a defendant has been guilty of speeding. In order for the trier of the facts to be fully cognizant of all factors relevant to the patrolman's experience and ability to estimate the speeds of moving vehicles, a defendant may properly present evidence or cross-examine the officer in relation to his training, etc. In addition, in order to obtain a fair trial, the defendant should be prepared to cross-examine the police officer on his ability to estimate the speed of moving vehicles and [\*\*\*8] the requested information is germane to that ability.

There has been no demonstration that the records requested, if they exist, constitute investigatory files compiled for law enforcement purposes and which thereby would be exempt from disclosure (*Marshall v New York State Police, 89 Misc 2d 529*). Traditionally, records of law enforcement agencies have been exempted from public disclosure and only recently through the "Freedom of Information Law" (Public Officers Law, art 6) has that restriction been relaxed. However, access to an agency's records under this law is not without limitation (*Public Officers Law, § 87, subd 2*; see *Matter of Westchester Rockland Newspapers v Mosczydlowski, 58 AD2d 234*). The information sought by the defendant in this action does not fall within any of the protected areas under this statute.

Courts have recently permitted disclosure of records of the [\*1109] complaints and investigations of civilian complaints against a police officer (*Walker v City of New York, 90 Misc 2d 565*); a copy of the "rap sheet" or arrest record in respect to the People's witnesses (*People v Howard, 89 Misc 2d 911*); and "a number of courts have granted [\*\*\*9] discovery of a wide range of official documents, including police arrest, investigative and incident reports [cases cited]" (*People v Simone, 92 Misc 2d 306, 312*).

In addition, the Legislature in 1976 amended [HN3] the Civil Rights Law so as to provide a means to obtain "[all]

93 Misc. 2d 1105, \*1109; 403 N.Y.S.2d 998, \*\*1001;  
1978 N.Y. Misc. LEXIS 2182, \*\*\*9

personnel records, used to evaluate performance toward continued employment or promotion, under the control of any police agency or department of the state or any political subdivision thereof \* \* \* as may be mandated by lawful court order" (*Civil Rights Law*, § 50-a). This legislation established a uniform rule in relation to the production of police personnel records. ( *Guzman v City of New York*, 91 Misc 2d 270, 271.) The enactment further provides certain procedural safeguards to protect against the unbridled disclosure of said personnel records.

An ample opportunity has been afforded the People to be heard on defendant's application. This court is satisfied that information relative to the patrolman's ability to estimate the speeds of moving vehicles which may be contained in the officer's personnel file is material which may be necessary for the defense during the trial of this matter and to aid [\*\*\*10] in cross-examination on the issue of credibility. (See *People v Sumpter*, 75 Misc 2d 55.) This decision is not a license nor shall it serve as an authorization that in every instance a defendant will be permitted to conduct an unfettered or untrammelled search of a police officer's personnel file. The determination of such applications must be made on an *ad hoc* basis with the court being the final arbiter as to whether the defendant has demonstrated the relevancy or materiality of the information in the personnel records to warrant disclosure (cf. *People v Lugo*, 93 Misc 2d 195).

Accordingly, the Nassau County Police Department is directed to produce the personnel records of the officer involved to the Trial Judge sealed, for examination and determination by said Judge as to whether any information contained in such records should be made available to defendant to aid in cross-examination or for other use at the time of trial. (See *People v Sumpter*, *supra*, p 61; *People v Simone*, *supra*, p 315.)

In conclusion, for the above reasons, the convictions of both defendants are reversed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendants appealed from a judgment of the Justice Court, Town of Union, New York, and the Justice Court, Town of Vestal, New York, which convicted defendants under *N.Y. Veh. & Traf. Law § 1192* for driving while under the influence of alcohol.

**OVERVIEW:** The appeals presented the issues of whether a breath test, to be considered valid in the State, was required to be performed according to certain Department of Health rules and regulations, and whether the testing and equilibration of a breathalyzer machine was adequate to prove the validity of a breath test result where no competent evidence was presented at trial to establish the alcoholic content of the reference solution used to test and equilibrate the machine. The court noted, in the case of one defendant, evidence at trial revealed that the result of the analysis of the reference sample immediately following the analysis of defendant's breath differed from the purported reference solution value by .03 percent weight per volume. Regarding the other defendant, the variance was .02 percent weight per volume. The convictions were reversed, because in neither case was the standards stipulated in 10 *N.Y. Comp. Codes R. & Regs. tit. 10, § 59.5(d)* met.

**OUTCOME:** The court reversed the judgment.

**CORE TERMS:** breathalyzer, breath, analyses, weekly, machine, department of health, violation of subdivision, driving, alcoholic content, breath test, regulations, testing, chemical, alcohol, purported, blood, intoxicated, calibration, motorist, certificate, immediately following, competent evidence, equilibrate, alcoholic, volume, laboratory, deviation, reliable, working order, simplified

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Evidence > Scientific Evidence > Blood Alcohol***

***Evidence > Scientific Evidence > Toxicology***

[HN1] *N.Y. Veh. & Traf. Law* § 1192(2) states that: no person shall operate a motor vehicle while he has .12 of one per centum or more by weight of alcohol in his blood as shown by chemical analysis of his blood, breath, urine or saliva, made pursuant to the provisions of § 1194.

***Evidence > Scientific Evidence > Blood & Bodily Fluids***

***Evidence > Scientific Evidence > Toxicology***

***Governments > Legislation > Interpretation***

[HN2] *N.Y. Comp. Codes R. & Regs. tit. 10, § 1194* reads: the department of health shall issue and file rules and regulations approving satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct and supervise chemical analyses of a person's blood, urine, breath or saliva. If the analyses were made by an individual possessing a permit issued by the department of health, this shall be presumptive evidence that the examination was properly given. The provisions § 1194 do not prohibit the introduction as evidence of an analysis made by an individual other than a person possessing a permit issued by the department of health.

***Evidence > Scientific Evidence > Toxicology***

***Governments > Legislation > Interpretation***

[HN3] *10 N.Y. Comp. Codes R. & Regs. tit. 10, § 59.1(a)* defines "techniques or methods" as used in *N.Y. Veh. & Traf. Law* § 1194(5), as the collection, processing and determination of the alcoholic content of body fluids such as human blood or urine as well as methods for the determination of the alcoholic content of breath or alveolar air by approved methods.

***Governments > Legislation > Interpretation***

[HN4] *10 N.Y. Comp. Codes R. & Regs. tit. 10, § 59.5* provides that: breath testing techniques and methods must meet the following criteria: (d) the result of an analysis of a suitable reference sample, such as air equilibrated with a reference solution of alcoholic content of greater than 0.08 percent weight per volume at a known temperature, must agree with the reference sample value within the limits of plus or minus 0.01 percent weight per volume, or such limits as set by the State Commissioner of Health. This analysis shall immediately follow the analysis of the breath of the subject and shall be recorded.

***Constitutional Law > Separation of Powers***

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

***Governments > Legislation > Interpretation***

[HN5] In making a determination as to the meaning of a statute, the court must construe the language of the statute as the court finds it, or as it is written not as the court believes it should have been written. Under the doctrine of separation of powers, it is fundamental that courts may not legislate, nor may they change legislation. Freedom to construe a statute is not freedom to amend it. In determining legislative intent, the court may interpret the law in the light of its historical background or the circumstances leading to its enactment. The court may consider the objects and purposes which the Legislature sought to accomplish by such legislation and the policy which induced its enactment. Also, as an aid to statutory construction, the court may resort to decisions of courts of other states construing language of similar import.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Defenses > Intoxication***

***Governments > Legislation > Interpretation***

[HN6] *N.Y. Veh. & Traf. Law § 1194(5)* was enacted to provide that the Department of Health would establish qualifications for the certification of operators and analysts to assure that tests would be properly conducted and analyzed and that such persons would be competent to testify as to the procedures followed. The issuance of a permit by the Department of Health presumptively qualifies such person and his testimony.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

***Evidence > Scientific Evidence > Toxicology***

[HN7] Absent a provision of *N.Y. Veh. & Traf. Law § 1194* excluding the evidence in criminal prosecutions, or absent an express provision at least requiring compliance with the Department of Health regulations, and in view of the circumstances and policy considerations which prompted the statute's passage, the Legislature did not intend *N.Y. Veh. & Traf. Law § 1194(5)* to make the validity of breath test results depend upon, or to condition the admission in evidence of test results upon, compliance with 10 N.Y. Comp. Codes R. & Regs. Tit. 59.5(d). The validity of such tests is to be determined in accordance with medical and scientific standards generally and that intrinsic evidence, rather than standards fixed by departmental rules, properly measures reliability and accuracy of test results.

***Evidence > Demonstrative Evidence > Foundational Requirements***

***Evidence > Scientific Evidence > Blood Alcohol***

***Evidence > Scientific Evidence > Sobriety Tests***

[HN8] At the outset the court notes that the admissibility in evidence of any breath test result depends upon presenting an adequate foundation. It further appears that the elements of a necessary foundation are: (1) that there was compliance with any statutory requirement, *N.Y. Veh. & Traf. Law §§ 1193-a* and 1194; (2) that a specified type of breath testing device was used to analyze a breath sample and that such device is scientifically reliable for measuring the percent of alcohol in the blood through a chemical analysis of a subject's breath, unless such reliability has been judicially recognized; (3) that the testing device was in proper working order; (4) that the person giving and interpreting the test was properly qualified; (5) that the chemicals used in the test were of the proper kind and mixed in the proper proportions. In this regard the court notes that a random sampling of the particular lot the ampoules were from is probably sufficient to show such propriety; (6) that the test was properly conducted.

***Evidence > Scientific Evidence > Toxicology***

[HN9] A determination regarding the proper functioning of a breathalyzer must be made on a case-by-case basis and must rely on the intrinsic evidence presented at trial. Each case must be looked at anew and each must stand or fall on its own facts and no judicial formula can be conjured up to supplant what appears on the face of the record of an individual case.

***Evidence > Scientific Evidence > Blood Alcohol***

***Evidence > Scientific Evidence > Toxicology***

[HN10] The court recognizes that the breathalyzer is scientifically reliable for determining the percentage of alcohol in the blood if tests are conducted in accordance with proper procedures.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements***

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

**Evidence > Scientific Evidence > Toxicology**

[HN11] Even a reading from an untested breathalyzer machine is admissible in a prosecution for driving while ability impaired or driving while intoxicated in violation of *N.Y. Veh. & Traf. Law* §§ 1192(1) or 1192(3). However, such evidence cannot alone be sufficient for conviction under §§ 1192(1) or 1192(3), and the deficiency in proof can be supplied by the opinion testimony of qualified observers of the defendant's conduct, speech and demeanor to establish the fact of the defendant's impaired ability or intoxication.

**Criminal Law & Procedure > Guilty Pleas > General Overview****Criminal Law & Procedure > Trials > Judicial Discretion****Criminal Law & Procedure > Sentencing > Concurrent Sentences**

[HN12] *N.Y. Veh. & Traf. Law* § 1196 reads: a driver may be convicted of a violation of § 1192(1), (2) or (3), notwithstanding that the charge laid before the court alleged a violation of § 1192(2) or (3), and regardless of whether or not such conviction is based on a plea of guilty. *N.Y. Veh. & Traf. Law* § 1192(2) and (3) were intended to be separate crimes, neither mutually inclusive nor exclusive. Moreover, they may be joined as multiple counts in one indictment since they are based upon the same criminal transaction. After the trial of a multiple count indictment containing concurrent counts only those on which only concurrent sentences could be imposed and if those counts are noninclusory when the offense charged is not one greater than any of those charged in the others and when the latter are not all lesser offenses included within the greater, the court may in its discretion submit one or more or all thereof to the jury.

**HEADNOTES: Motor vehicles -- driving under influence of alcohol -- if only evidence is breathalyzer reading, breathalyzer must be proved to have been in proper working order when it was used to test accused motorist's breath -- when motorist is accused of driving while intoxicated, he cannot lawfully be convicted of violating more than one of three subdivisions (*Vehicle and Traffic Law*, § 1192, subds. 1, 2, 3).**

1. Evidence that a motorist was driving while he was intoxicated or while his ability was impaired by the consumption of alcohol (*Vehicle and Traffic Law*, § 1192 *et seq.*) may consist of the testimony of qualified observers of his conduct, speech and demeanor, plus a reading from even an untested breathalyzer or other breath-analyzing machine or device. But, if the only evidence offered is a reading from such a machine or device, then proof is required that medical and scientific standards were complied with in the method or technique which was used to test this particular motorist's breath. The method or technique need not be the one which has been promulgated by the State Department [\*\*\*2] of Health (in *10 NYCRR* 59.5 [d]); nor need there be competent evidence of the percentage of the alcoholic content of the reference solution which was used to test and equilibrate the breathalyzer or other breath-analysis device; nevertheless, there must be competent proof that the breathalyzer or other breath-analysis device was in proper working order when it was used to test this particular motorist's breath.

2. When the accusatory instrument is only one simplified traffic information charging intoxication only (*Vehicle and Traffic Law*, § 1192, subd. 3), the accused motorist can be convicted of violating either subdivision 1 or subdivision 2 or subdivision 3 of said section 1192 (cf. § 1196), but he cannot lawfully be convicted of violating more than one of those three subdivisions.

**COUNSEL:**

*Richard A. Battaglini* for William H. Meikrantz, appellant.

*Scanlon, Vetrano & Ringwood* (*Vincent P. Vetrano* of counsel), for Joseph W. Kopesky, appellant.

*Patrick D. Monserrate*, District Attorney (*Jon S. Blechman* of counsel), for respondent.

**JUDGES:**

Stephen Smyk, J.

**OPINION BY:**

SMYK

**OPINION:**

[\*892] [\*552] Appeals (1) by defendant William H. Meikrantz from the judgment of [\*\*\*3] the Justice Court, Town of Union, New York, convicting him of a violation of subdivision 2 of *section 1192 of the Vehicle and Traffic Law*; [\*553] and (2) by defendant Joseph W. Kopesky from the judgment of the Justice Court, Town of Vestal, New York, convicting him of a violation of subdivisions 1, 2, and 3 of *section 1192 of the Vehicle and Traffic Law*.

These appeals present three questions of first impression. First, whether a breath test, to be considered valid in this State, must be performed according to certain Department of Health [\*893] rules and regulations. Second, are the testing and equilibration of a breathalyzer machine adequate to prove the validity of a breath test result where no competent evidence is presented at trial to establish the alcoholic content of the reference solution used to test and equilibrate the machine. Finally, can a defendant charged only with a violation of subdivision 3 of *section 1192 of the Vehicle and Traffic Law* be properly convicted, pursuant to section 1196 of that law, of violations of subdivisions 1, 2, and 3 of section 1192. Because these and other cases not yet ready for decision call for a thorough evaluation of the procedure [\*\*\*4] which should be followed in traffic cases involving the use of breath testing instruments, we take occasion to write at some length on all three points.

In considering the first issue, we must examine relevant sections of the Vehicle and Traffic Law and look to pertinent provisions of part 59 of the Administrative Rules and Regulations of the New York State Department of Health, in title 10 of the Official Compilation of the Codes, Rules and Regulations of the State of New York (*10 NYCRR 59.1 et seq.*).

[HN1] Subdivision 2 of *section 1192 of the Vehicle and Traffic Law* states: "No person shall operate a motor vehicle while he has [.12] \* .10 of one per centum or more by weight of alcohol in his blood as shown by chemical analysis of his blood, breath, urine or saliva, made pursuant to the provisions of section eleven hundred ninety-four of this chapter."

\* Chapters 450 and 451 of the Laws of 1972, eff. Jan. 1, 1973. Note: Material bracketed [] was in effect until Dec. 31, 1972.

[HN2] Subdivision 5 of section 1194 [\*\*\*5] (L. 1971, ch. 928) reads: "The department of health shall issue and file rules and regulations approving satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct and supervise chemical analyses of a person's blood, urine, breath or saliva. If the analyses were made by an individual possessing a permit issued by the department of health, this shall be presumptive evidence that the examination was properly given. The provisions of this subdivision do not prohibit the introduction as evidence of an analysis made by an individual other than a person possessing a permit issued by the department of health."

[\*554] [HN3] Section 59.1(a) (*10 NYCRR 59.1[a]*) defines "techniques or methods" as used in subdivision 5 of section 1194 (L. 1971, ch. 928) of the Vehicle and Traffic Law, as "the collection, processing and determination of the alcoholic content of body fluids such as human blood or urine as well as methods for the determination [\*894] of the alcoholic content of breath or alveolar air by approved methods."

[HN4] Section 59.5 (*10 NYCRR 59.5*) provides, in relevant part: "Breath testing techniques and methods must meet the following [\*\*\*6] criteria: \* \* \* (d) the result of an analysis of a suitable reference sample, such as air equilibrated with a reference solution of alcoholic content of greater than 0.08 percent weight per volume at a known temperature, must agree with the reference sample value within the limits of plus or minus 0.01 percent weight per volume, or such

limits as set by the State Commissioner of Health. This analysis shall immediately follow the analysis of the breath of the subject and shall be recorded."

In the case of defendant Meikrantz, evidence at trial revealed that the result of the analysis of the reference sample immediately following the analysis of defendant's breath differed from the purported reference solution value by .03 percent weight per volume. Regarding defendant Kopesky, the variance was .02 percent weight per volume. Hence, in neither case were the standards stipulated in *10 NYCRR 59.5(d)* met.

The defendants argue that the Legislature, in enacting subdivision 5 of section 1194 (L. 1971, ch. 928) of the Vehicle and Traffic Law, conferred upon the New York State Department of Health the authority to promulgate approved "techniques or methods" for determining the alcoholic [\*\*\*7] content of breath. They contend that *10 NYCRR 59.5* was the result of this delegation of authority. They further maintain that pursuant to subdivision 5 of section 1194 (L. 1971, ch. 928), a chemical analysis of a person's breath, to be considered valid, must be performed according to those "techniques or methods." In other words, they contend that the Legislature intended subdivision 5 of section 1194 (L. 1971, ch. 928) to condition the admission in evidence of breath test results upon compliance with *10 NYCRR 59.5(d)*. We disagree.

At the outset, there can be no serious dispute that the language of subdivision 5 of section 1194 (L. 1971, ch. 928) is somewhat ambiguous and inarticulate. However, where there is doubt as to the meaning intended to be expressed by a statute, resort may be had to various rules for determining such meaning.

[HN5] In making such a determination, we must construe the language of the statute as we find it, or as it is written (*People v. Friedman*, 302 N. Y. 75; *People v. Kupprat*, 6 N Y 2d 88), not as we believe it should have been written (*People v. Olah*, 300 N. Y. 96). Under the [\*\*555] doctrine of separation of powers, it is fundamental [\*\*\*8] that courts may not legislate, nor may they change [\*895] legislation. Freedom to construe a statute is not freedom to amend it (*Sexauer & Lemke v. Burke & Sons Co.*, 228 N. Y. 341).

In determining legislative intent, we may interpret the law in the light of its historical background or the circumstances leading to its enactment (*Matter of Stupack*, 274 N. Y. 198). We may consider the objects and purposes which the Legislature sought to accomplish by such legislation (*Matter of Hogan v. Culkin*, 18 N Y 2d 330), and the policy which induced its enactment (*MVAIC v. Eisenberg*, 18 N Y 2d 1). Also, as an aid to statutory construction, we may resort to decisions of courts of other States construing language of similar import (*Williams v. Tompkins, Inc.*, 208 App. Div. 574).

Aside from the question of whether subdivision 5 of section 1194 (L. 1971, ch. 928) properly delegates authority to the Department of Health to establish rules and regulations approving satisfactory techniques or methods governing the conduct of chemical analyses, the People argue that, had the Legislature intended to make the validity of breath test results depend upon compliance [\*\*\*9] with such techniques or methods, it could easily have found apt words to express it (*Hennessy v. Walker*, 279 N. Y. 94). We note in this regard that the North Carolina Legislature apparently had no difficulty expressing itself in a similar statute which reads: "Chemical analyses of the person's breath or blood, to be considered valid under the provisions of this section, shall have been performed according to methods approved by the State Board of Health and by an individual possessing a valid permit issued by the State Board of Health for this purpose. The State Board of Health is authorized to approve satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct such analyses, and to issue permits which shall be subject to termination or revocation at the discretion of the State Board of Health; provided, that in no case shall the arresting officer or officers administer said test." (*N. C. Gen. Stat.*, § 20-139.1, subd. [b], cited in *People v. Powell*, 279 N. C. 608, 610-611, 184 S. E. 2d 243, 244; see, also, W. Va. Code, ch. 17C, art. 5A, §§ 1-5 cited in *People v. Hood*, 184 S. E. 2d 334, 336-337.) Certainly, [\*\*\*10] no language is present in said subdivision 5 of section 1194 which even remotely suggests such import. Furthermore, said subdivision 5 of section 1194, unlike a similar California statute, fails to even expressly require that chemical tests be performed according to rules and regulations adopted by the Department of Health [\*\*556] (see Cal. Codes, Health and Safety [\*896] Code, § 436.52 cited in *People v. Foulger*, 26 Cal. App. 3d

*Supp. 1, 3).*

On its face, said subdivision 5 of section 1194 provides for the issuance of permits by the Department of Health to persons deemed competent to conduct chemical tests for alcohol, and further provides that if such an analysis is made by a person possessing such a permit, it shall be presumptive evidence that such a test was properly given. The statute also provides that the Department of Health shall issue and file rules and regulations approving satisfactory methods to ascertain the competence of individuals to conduct and supervise chemical analyses for alcohol. It specifically allows the introduction of test results made by persons not holding permits, but in such cases the presumption of propriety does not apply.

Prior [\*\*\*11] to the passage of the section, the qualification of persons who conduct chemical tests for intoxication in charges of violations of *section 1192 of the Vehicle and Traffic Law* often resulted in long drawn-out testimony and cross-examination, sometimes distracting from the main issue of the trial, the alcoholic content of the defendant's breath. In some areas, the court's insistence upon expert testimony of what is described as a routine procedure (*People v. Donaldson, 36 A D 2d 37*) resulted in the clogging of court calendars and a reluctance to proceed to trial in these cases. Also, some operators of chemical test devices did not have sufficient training to be able to provide sound testimony as to the validity of the procedures which they followed. [HN6] Hence, we are persuaded that subdivision 5 of section 1194 was enacted to provide that the Department of Health would establish qualifications for the certification of operators and analysts to assure that tests would be properly conducted and analyzed and that such persons would be competent to testify as to the procedures followed. The issuance of a permit by the Department of Health presumptively qualifies such person and [\*\*\*12] his testimony. We feel the intended result, therefore, was the more expeditious and proper handling of driving-while-intoxicated cases. However, the defense is still able to introduce evidence in a situation in which the test may not, in fact, have been properly given.

Accordingly, [HN7] absent a provision of the statute excluding the evidence in criminal prosecutions, or absent an express provision at least requiring compliance with the Department of Health regulations, and in view of the circumstances and policy considerations which prompted the statute's passage, we do not believe the Legislature intended said subdivision 5 of section [\*897] 1194 to make the validity of breath test results depend upon, or to condition the admission in evidence of test results upon, compliance with *10 NYCRR 59.5(d)*. We further believe that the validity of such tests is to be determined in accordance with medical and scientific standards generally and that [\*\*557] intrinsic evidence, rather than standards fixed by departmental rules, properly measures reliability and accuracy of test results (*People v. Monahan, 25 N Y 2d 378*).

However, the result we reach does not affect defense counsel's [\*\*\*13] right to make any proper use of the noncompliance of a given breath test with the Department of Health rules and regulations in an attempt to persuade the trier of fact that the test result was invalid. We note in this regard that it may even be proper for defense counsel to read pertinent provisions of the regulations in evidence (*Executive Law, § 106*).

We turn now to the question of whether it is a necessary foundation, for the admission in evidence of breath test results, to prove by competent evidence the alcoholic content of the reference solution used to test and equilibrate breath testing instruments. By "testing" and "equilibrating" we mean both the weekly testing of breathalyzers by local police forces and the analysis of a reference sample which immediately follows the analysis of a subject's breath pursuant to current police procedure.

In testing and equilibrating, analyses are conducted using a suitable reference sample, such as air equilibrated with an alcoholic reference solution (usually 0.15% weight per volume at a known temperature). The reference solution is delivered monthly in a sealed bottle to local police stations directly from the manufacturer. Upon its [\*\*\*14] arrival, the reference solution is poured into an electric simulator assembly resembling a canning jar, and the assembly is plugged in to warm the solution to the proper temperature (usually 34 degrees C). Accompanying the reference solution is a manufacturer's laboratory certificate of analysis showing that the lot from which the bottled solution was taken was random sampled with stated results, and that the alcohol and water used in the solution were found to be free of any

interfering substances. A label showing the alcoholic content or value of the new reference solution as found by the laboratory is also enclosed and is affixed to the front of the simulator assembly at the station. A reference sample, vapor from the predetermined alcoholic solution simulating breath, is then passed through the breathalyzer machine [\*898] in order to obtain a reading on the gauge and verify the reference solution value.

A weekly test is actually comprised of several successive analyses using reference samples. Between each test the breathalyzer machine is flushed or purged with clear air. The test conducted immediately following the subject's test is a single analysis and is preceded [\*\*\*15] by a similar purge of the machine. The result of each analysis should equal or closely approximate the purported value of the reference solution and the result of the analyses comprising a weekly test should be identical. In this way, the breathalyzer operator can determine if [\*\*558] a breathalyzer machine is functioning properly and the results it yields are accurate and reliable.

Defendants argue, and the People concede, that at neither of these trials was competent evidence adduced to establish the alcoholic content of the reference solution used to test and equilibrate their breathalyzers. The defendants contend that this lack of proof renders the breath test invalid and that, consequently, the admission of the test results in evidence was reversible error. Hence, they maintain that unless it is clearly demonstrated that the reference solution is of the value it purports to be it cannot be scientifically determined if a breath testing instrument is functioning properly or the test results it renders are accurate and reliable.

The point raised is well taken, but we do not believe it necessary for the People to prove by competent evidence the value of the reference solution [\*\*\*16] in all breathalyzer cases.

[HN8] At the outset we note that the admissibility in evidence of any breath test result depends upon presenting an adequate foundation. It further appears that the elements of a necessary foundation are:

- (1) that there was compliance with any statutory requirement (see *Vehicle and Traffic Law*, §§ 1193-a and 1194);
- (2) that a specified type of breath testing device was used to analyze a breath sample and that such device is scientifically reliable for measuring the percent of alcohol in the blood through a chemical analysis of a subject's breath, *unless* such reliability has been judicially recognized (e.g., *People v. Donaldson*, 36 A D 2d 37, *supra* [the breathalyzer]);
- (3) that the testing device was in proper working order;
- (4) that the person giving and interpreting the test was properly qualified (e.g., *People v. Donaldson*, *supra*);
- (5) that the chemicals used in the test (i.e., the ampoules used in a breathalyzer) were of the proper kind and mixed in the [\*899] proper proportions (*People v. Donaldson*, *supra*). In this regard we note that random sampling of the particular lot the ampoules were from is probably sufficient [\*\*\*17] to show such propriety (see *People v. Coffman*, 502 P. 2d 605 [Ore.]; *State v. Baker*, 56 Wn. 2d 846);
- (6) that the test was properly conducted.

All elements of a proper foundation must be met and each is aimed to insure that the results of a given subject's breath test are accurate and reliable. The present allegation of error is directed toward the third element alone, namely, and more particularly, whether the breathalyzer used in the defendants' tests was proven to be in proper working order. We feel this element has special significance in regard to the validity of test results.

[\*\*559] [HN9] A determination regarding the proper functioning of a breathalyzer must be made on a case-by-case basis and must rely on the intrinsic evidence presented at trial. Each case must be looked at anew and each must stand or fall on its own facts and no judicial formula can be conjured up to supplant what appears on the face of the record of an individual case. With this in mind, we turn to the records of the instant cases.

At the trial of defendant Meikrantz, the prosecution offered and the court admitted into evidence, presumably under *CPLR 4518* (subd. [c]), two photocopies [\*\*\*18] of calibration records (certificates of calibration) made by the New York State Police laboratory in Albany. The term "calibration" refers to an adjustment of the breathalyzer machine as distinguished from a mere test of the machine. If a weekly test at the station indicates a machine malfunction, it is sent to the laboratory to be calibrated. However, one of the certificates therein was dated two and one-quarter years before the defendant's test, while the other was made three months thereafter. Consequently, the defendant's specific objections on the grounds of remoteness on the one hand and irrelevancy on the other should have been sustained and the records suppressed.

Two weekly test records (alcohol breath simulator records) were then introduced, as a business records exception to the hearsay rule. These records apparently showed the results of two weekly tests conducted three days prior to the defendants' test and four days subsequent thereto. However, the results of these weekly tests are not set forth on the record.

Finally, the analysis immediately following the defendant's test was testified to. The witness police officer stated that the value of the alcoholic reference [\*\*\*19] solution was 0.15% while the [\*900] result obtained was 0.12%. The witness never adequately explained the reason for the deviation of 0.03%.

On the other hand, in the case of defendant Kopesky, two separate breathalyzer tests were conducted and the results of both tests were identical, 0.19%.

Testimony was admitted that the reference solution used to test and equilibrate the breathalyzer in question was prepared by a private hospital laboratory and that its purported value was 0.15%. The probability of deterioration of the alcoholic reference solution over a period of time was amply covered in the testimony, as was the consequence that the weekly test results were slightly lower than the purported value of such solution. In this regard, an alcohol breath simulator record was admitted in evidence showing the results of weekly tests conducted at the police station for the six weeks immediately prior to the defendant's tests and for the five weeks immediately following them. The results of the successive [\*560] analyses comprising each weekly test were demonstrated to be nearly identical. The same exhibit also showed that an analysis of the reference sample was conducted [\*\*\*20] immediately following each of the defendant's tests, with the same results.

Finally, testimony revealed that a certificate of calibration made by the manufacturer of the breathalyzer was delivered with the machine in question when it was purchased nine months prior to the defendant's tests.

We note that in *Kopesky* a recorded history of the results of weekly tests conducted within a reasonable time before and after the defendant's test was compiled and introduced, while in *Meikrantz* evidence of only two such weekly tests was introduced, one of which was conducted after the fact.

In both cases, the results of the analyses which follow the subjects' breath test were admitted and in each instance there was a deviation from the purported value of the reference solution. Only in *Kopesky*, however, were the deviations adequately explained in terms of the probable deterioration of the alcoholic solution.

Furthermore, in *Kopesky* the results of all tests and equilibrations, both before and after the defendant's tests, were demonstrated to have closely approximated the purported reference solution value (with any deviation accounted for) and the results of the analyses comprising [\*\*\*21] each weekly test were shown to be nearly identical. No such showing was made on the record in *Meikrantz*.

[\*901] Finally, at defendant *Kopesky's* trial testimony was admitted concerning a manufacturer's certificate of calibration dated nine months before defendant's test while the calibration certificates introduced in *Meikrantz* were remote.

While our higher courts have not spelled out the exact limits to which an accused drunken driver may go to plumb

the accuracy of the testing devices and solutions, we are not prepared to cast the burden on the People in all cases of offering proof of the accuracy of the reference solution's value, beyond the comparative analyses made in *Kopesky*. We are persuaded that in *Kopesky* there was "reasonable proof" of the reliability of the reference solution and the accuracy of the breathalyzer itself. Such proof was lacking in the case of defendant *Meikrantz*.

Accordingly, at this point the conviction of defendant *Meikrantz* is reversed, since the proper functioning of the breathalyzer was not sufficiently shown.

We feel that the conclusion we have reached regarding defendant *Kopesky*'s case is well-grounded in reason. [\*\*\*22] [HN10] We recognize that the breathalyzer is scientifically reliable for determining the percentage of alcohol in the blood if tests are conducted in accordance with [\*\*561] proper procedures ( *People v. Donaldson*, 36 A D 2d 37, *supra*). Furthermore, in *Kopesky* we believe it to be more than coincidental that the results of the several analyses comprising each weekly test were nearly identical and that the results of all tests and equilibrations closely approximated the purported value of the reference solution with deviations explained on the record. To us it is inconceivable how the breathalyzer and the reference solution could both be inaccurate to the same degree (cf. *People v. Stephens*, 52 Misc 2d 1070).

We further believe that in view of the possible presumption of propriety applicable in breathalyzer cases under the aforesaid subdivision 5 of section 1194 and in light of previous Court of Appeals opinions regarding untested speedometers and radar devices ( *People v. Magri*, 3 N Y 2d 562 and *People v. Dusing*, 5 N Y 2d 126), that [HN11] even a reading from an untested breathalyzer machine is admissible in a prosecution for driving while ability impaired [\*\*\*23] or driving while intoxicated in violation of subdivision 1 of section 1192 or subdivision 3 of *section 1192 of the Vehicle and Traffic Law*. However, such evidence cannot alone be sufficient for conviction under these sections, and the deficiency in proof can be supplied by the opinion testimony of qualified observers of the defendant's conduct, speech and [\*902] demeanor to establish the fact of the defendant's impaired ability or intoxication (see *People v. Morris*, 63 Misc 2d 124, 127).

The third and final issue for consideration, is raised on behalf of *Kopesky* alone. He contends that his conviction must be reversed because of an erroneous jury charge at his trial. We agree.

The defendant was arrested and charged with driving while intoxicated in violation of subdivision 3 of *section 1192 of the Vehicle and Traffic Law*. At his trial on that charge, the court instructed the jury that the defendant could be found guilty of one or more of the following: driving while ability impaired in violation of subdivision 1 of section 1192, driving with .12 of one percentum or more by weight of alcohol in his blood in violation of subdivision 2 of section 1192 and driving while [\*\*\*24] intoxicated in violation of subdivision 3 of section 1192. The defendant was subsequently found guilty of violating all three of the subdivisions.

[HN12] Section 1196 reads: "A driver may be convicted of a violation of subdivisions one, two *or* three of section eleven hundred ninety-two, notwithstanding that the charge laid before the court alleged a violation of subdivision two *or* three of section eleven hundred ninety-two, and regardless of whether or not such *conviction* is based on a plea of guilty." (Emphasis ours.)

Subdivisions 2 and 3 of section 1192 were intended to be separate crimes, neither mutually inclusive nor exclusive ( *People v. McDonough*, 39 A D 2d 188; *People v. Rudd*, 41 A D 2d 875). Moreover, they may be joined as [\*\*562] multiple counts in one indictment since they are based upon the same criminal transaction ( *CPL 200.20*, subd. 2, par. [a]; *People v. Rudd*, *supra*). As the court said in *Rudd*, *supra*, p. 876: "After the trial of a multiple count indictment containing concurrent counts only (those [on] which only concurrent sentences could be imposed) and if those counts are noninclusory (when the offense charged is not one greater [\*\*\*25] than any of those charged in the others and when the latter are not all lesser offenses included within the greater), the court may in its discretion submit one or more or all thereof to the jury ( *CPL 300.40*, subd. 3, par. [a])."

Our examination of the *Rudd* decision persuades us that, for a defendant to be convicted of both driving under the influence of alcohol in violation of subdivision 2 of section 1192 and driving while intoxicated in violation of subdivision 3 of section 1192, it is necessary for the police to serve two uniform traffic tickets and file two simplified informations or otherwise follow [\*903] a procedure having the effect of a multicount indictment. Where, however, only one uniform traffic ticket is served and one simplified information is filed, for example, charging a violation of subdivision 3 of section 1192, section 1196 provides that a defendant may be found guilty of but one of the enumerated subdivisions of section 1192 (see *People v. Kaepfel*, 74 Misc 2d 220, 222).

Nevertheless, at least one lower court in New York has indicated that even this restricted interpretation of section 1196 violates the United States Constitution, Sixth Amendment [\*\*\*26] and *section 6 of article I of the New York State Constitution* (*People v. Fielder*, 75 Misc 2d 446). For this reason we believe the safer course for the People to follow in driving-while-intoxicated cases is either:

(1) Immediately file an information charging subdivision 3 of section 1192. When the necessary additional factual allegations become available to support subdivision 2, a second information may be filed charging subdivision 2 of section 1192, and thereafter an application can be made to consolidate both informations pursuant to *CPL 200.20* (subd. 4) and *CPL 100.45*. Under such circumstances the court should have no difficulty in exercising its discretion in granting said application as provided in *CPL 200.20* (subd. 5); or

(2) immediately filing a misdemeanor complaint charging violation of both subdivisions 2 and 3 of section 1192 (*CPL 100.05*, subd. 4) and then subsequently filing a supporting deposition supplying the necessary factual allegations to support the charge of subdivision 2 of section 1192 (*CPL 170.65*, subs. 1 and 2).

Incidentally, it may be stated that subdivision 1 of section 1192 need not be included in the information, in that the same would be [\*\*\*27] a lesser included charge (*CPL 360.50*).

[\*\*563] In the case of defendant *Kopesky*, we find that, because only one simplified information was filed -- that charging a violation of subdivision 3 of section 1192 -- the charge below was erroneous and improper. Further, we cannot say that such error was merely technical and did not affect the substantial rights of the defendant (see *CPL 470.05*, subd. 1). Accordingly, defendant *Kopesky's* conviction is set aside.

In conclusion, for the above reasons, the convictions of both defendants are reversed.

**The People of the State of New York, Respondent, v. William H. Meikrantz,  
Appellant. The People of the State of New York, Respondent, v. Joseph W. Kopesky,  
Appellant**

[NO NUMBER IN ORIGINAL]

County Court of New York, Broome County

*77 Misc. 2d 892; 351 N.Y.S.2d 549; 1974 N.Y. Misc. LEXIS 1267*

January 8, 1974

**DISPOSITION:** [\*\*\*1]

In conclusion, for the above reasons, the convictions of both defendants are reversed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendants appealed from a judgment of the Justice Court, Town of Union, New York, and the Justice Court, Town of Vestal, New York, which convicted defendants under *N.Y. Veh. & Traf. Law § 1192* for driving while under the influence of alcohol.

**OVERVIEW:** The appeals presented the issues of whether a breath test, to be considered valid in the State, was required to be performed according to certain Department of Health rules and regulations, and whether the testing and equilibration of a breathalyzer machine was adequate to prove the validity of a breath test result where no competent evidence was presented at trial to establish the alcoholic content of the reference solution used to test and equilibrate the machine. The court noted, in the case of one defendant, evidence at trial revealed that the result of the analysis of the reference sample immediately following the analysis of defendant's breath differed from the purported reference solution value by .03 percent weight per volume. Regarding the other defendant, the variance was .02 percent weight per volume. The convictions were reversed, because in neither case was the standards stipulated in 10 *N.Y. Comp. Codes R. & Regs. tit. 10, § 59.5(d)* met.

**OUTCOME:** The court reversed the judgment.

**CORE TERMS:** breathalyzer, breath, analyses, weekly, machine, department of health, violation of subdivision, driving, alcoholic content, breath test, regulations, testing, chemical, alcohol, purported, blood, intoxicated, calibration, motorist, certificate, immediately following, competent evidence, equilibrate, alcoholic, volume, laboratory, deviation, reliable, working order, simplified

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Evidence > Scientific Evidence > Blood Alcohol***

***Evidence > Scientific Evidence > Toxicology***

[HN1] *N.Y. Veh. & Traf. Law* § 1192(2) states that: no person shall operate a motor vehicle while he has .12 of one per centum or more by weight of alcohol in his blood as shown by chemical analysis of his blood, breath, urine or saliva, made pursuant to the provisions of § 1194.

***Evidence > Scientific Evidence > Blood & Bodily Fluids***

***Evidence > Scientific Evidence > Toxicology***

***Governments > Legislation > Interpretation***

[HN2] *N.Y. Comp. Codes R. & Regs. tit. 10, § 1194* reads: the department of health shall issue and file rules and regulations approving satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct and supervise chemical analyses of a person's blood, urine, breath or saliva. If the analyses were made by an individual possessing a permit issued by the department of health, this shall be presumptive evidence that the examination was properly given. The provisions § 1194 do not prohibit the introduction as evidence of an analysis made by an individual other than a person possessing a permit issued by the department of health.

***Evidence > Scientific Evidence > Toxicology***

***Governments > Legislation > Interpretation***

[HN3] *10 N.Y. Comp. Codes R. & Regs. tit. 10, § 59.1(a)* defines "techniques or methods" as used in *N.Y. Veh. & Traf. Law* § 1194(5), as the collection, processing and determination of the alcoholic content of body fluids such as human blood or urine as well as methods for the determination of the alcoholic content of breath or alveolar air by approved methods.

***Governments > Legislation > Interpretation***

[HN4] *10 N.Y. Comp. Codes R. & Regs. tit. 10, § 59.5* provides that: breath testing techniques and methods must meet the following criteria: (d) the result of an analysis of a suitable reference sample, such as air equilibrated with a reference solution of alcoholic content of greater than 0.08 percent weight per volume at a known temperature, must agree with the reference sample value within the limits of plus or minus 0.01 percent weight per volume, or such limits as set by the State Commissioner of Health. This analysis shall immediately follow the analysis of the breath of the subject and shall be recorded.

***Constitutional Law > Separation of Powers***

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

***Governments > Legislation > Interpretation***

[HN5] In making a determination as to the meaning of a statute, the court must construe the language of the statute as the court finds it, or as it is written not as the court believes it should have been written. Under the doctrine of separation of powers, it is fundamental that courts may not legislate, nor may they change legislation. Freedom to construe a statute is not freedom to amend it. In determining legislative intent, the court may interpret the law in the light of its historical background or the circumstances leading to its enactment. The court may consider the objects and purposes which the Legislature sought to accomplish by such legislation and the policy which induced its enactment. Also, as an aid to statutory construction, the court may resort to decisions of courts of other states construing language of similar import.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Defenses > Intoxication***

***Governments > Legislation > Interpretation***

[HN6] *N.Y. Veh. & Traf. Law § 1194(5)* was enacted to provide that the Department of Health would establish qualifications for the certification of operators and analysts to assure that tests would be properly conducted and analyzed and that such persons would be competent to testify as to the procedures followed. The issuance of a permit by the Department of Health presumptively qualifies such person and his testimony.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

***Evidence > Scientific Evidence > Toxicology***

[HN7] Absent a provision of *N.Y. Veh. & Traf. Law § 1194* excluding the evidence in criminal prosecutions, or absent an express provision at least requiring compliance with the Department of Health regulations, and in view of the circumstances and policy considerations which prompted the statute's passage, the Legislature did not intend *N.Y. Veh. & Traf. Law § 1194(5)* to make the validity of breath test results depend upon, or to condition the admission in evidence of test results upon, compliance with 10 N.Y. Comp. Codes R. & Regs. Tit. 59.5(d). The validity of such tests is to be determined in accordance with medical and scientific standards generally and that intrinsic evidence, rather than standards fixed by departmental rules, properly measures reliability and accuracy of test results.

***Evidence > Demonstrative Evidence > Foundational Requirements***

***Evidence > Scientific Evidence > Blood Alcohol***

***Evidence > Scientific Evidence > Sobriety Tests***

[HN8] At the outset the court notes that the admissibility in evidence of any breath test result depends upon presenting an adequate foundation. It further appears that the elements of a necessary foundation are: (1) that there was compliance with any statutory requirement, *N.Y. Veh. & Traf. Law §§ 1193-a* and 1194; (2) that a specified type of breath testing device was used to analyze a breath sample and that such device is scientifically reliable for measuring the percent of alcohol in the blood through a chemical analysis of a subject's breath, unless such reliability has been judicially recognized; (3) that the testing device was in proper working order; (4) that the person giving and interpreting the test was properly qualified; (5) that the chemicals used in the test were of the proper kind and mixed in the proper proportions. In this regard the court notes that a random sampling of the particular lot the ampoules were from is probably sufficient to show such propriety; (6) that the test was properly conducted.

***Evidence > Scientific Evidence > Toxicology***

[HN9] A determination regarding the proper functioning of a breathalyzer must be made on a case-by-case basis and must rely on the intrinsic evidence presented at trial. Each case must be looked at anew and each must stand or fall on its own facts and no judicial formula can be conjured up to supplant what appears on the face of the record of an individual case.

***Evidence > Scientific Evidence > Blood Alcohol***

***Evidence > Scientific Evidence > Toxicology***

[HN10] The court recognizes that the breathalyzer is scientifically reliable for determining the percentage of alcohol in the blood if tests are conducted in accordance with proper procedures.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

**Evidence > Scientific Evidence > Toxicology**

[HN11] Even a reading from an untested breathalyzer machine is admissible in a prosecution for driving while ability impaired or driving while intoxicated in violation of *N.Y. Veh. & Traf. Law* §§ 1192(1) or 1192(3). However, such evidence cannot alone be sufficient for conviction under §§ 1192(1) or 1192(3), and the deficiency in proof can be supplied by the opinion testimony of qualified observers of the defendant's conduct, speech and demeanor to establish the fact of the defendant's impaired ability or intoxication.

**Criminal Law & Procedure > Guilty Pleas > General Overview****Criminal Law & Procedure > Trials > Judicial Discretion****Criminal Law & Procedure > Sentencing > Concurrent Sentences**

[HN12] *N.Y. Veh. & Traf. Law* § 1196 reads: a driver may be convicted of a violation of § 1192(1), (2) or (3), notwithstanding that the charge laid before the court alleged a violation of § 1192(2) or (3), and regardless of whether or not such conviction is based on a plea of guilty. *N.Y. Veh. & Traf. Law* § 1192(2) and (3) were intended to be separate crimes, neither mutually inclusive nor exclusive. Moreover, they may be joined as multiple counts in one indictment since they are based upon the same criminal transaction. After the trial of a multiple count indictment containing concurrent counts only those on which only concurrent sentences could be imposed and if those counts are noninclusory when the offense charged is not one greater than any of those charged in the others and when the latter are not all lesser offenses included within the greater, the court may in its discretion submit one or more or all thereof to the jury.

**HEADNOTES: Motor vehicles -- driving under influence of alcohol -- if only evidence is breathalyzer reading, breathalyzer must be proved to have been in proper working order when it was used to test accused motorist's breath -- when motorist is accused of driving while intoxicated, he cannot lawfully be convicted of violating more than one of three subdivisions (*Vehicle and Traffic Law*, § 1192, subds. 1, 2, 3).**

1. Evidence that a motorist was driving while he was intoxicated or while his ability was impaired by the consumption of alcohol (*Vehicle and Traffic Law*, § 1192 *et seq.*) may consist of the testimony of qualified observers of his conduct, speech and demeanor, plus a reading from even an untested breathalyzer or other breath-analyzing machine or device. But, if the only evidence offered is a reading from such a machine or device, then proof is required that medical and scientific standards were complied with in the method or technique which was used to test this particular motorist's breath. The method or technique need not be the one which has been promulgated by the State Department [\*\*\*2] of Health (in *10 NYCRR* 59.5 [d]); nor need there be competent evidence of the percentage of the alcoholic content of the reference solution which was used to test and equilibrate the breathalyzer or other breath-analysis device; nevertheless, there must be competent proof that the breathalyzer or other breath-analysis device was in proper working order when it was used to test this particular motorist's breath.

2. When the accusatory instrument is only one simplified traffic information charging intoxication only (*Vehicle and Traffic Law*, § 1192, subd. 3), the accused motorist can be convicted of violating either subdivision 1 or subdivision 2 or subdivision 3 of said section 1192 (cf. § 1196), but he cannot lawfully be convicted of violating more than one of those three subdivisions.

**COUNSEL:**

*Richard A. Battaglini* for William H. Meikrantz, appellant.

*Patrick D. Monserrate*, District Attorney (*Jon S. Blechman* of counsel), for respondent.

**JUDGES:**

Stephen Smyk, J.

**OPINION BY:**

SMYK

**OPINION:**

[\*892] [\*552] Appeals (1) by defendant William H. Meikrantz from the judgment of [\*\*\*3] the Justice Court, Town of Union, New York, convicting him of a violation of subdivision 2 of *section 1192 of the Vehicle and Traffic Law*; [\*553] and (2) by defendant Joseph W. Kopesky from the judgment of the Justice Court, Town of Vestal, New York, convicting him of a violation of subdivisions 1, 2, and 3 of *section 1192 of the Vehicle and Traffic Law*.

These appeals present three questions of first impression. First, whether a breath test, to be considered valid in this State, must be performed according to certain Department of Health [\*893] rules and regulations. Second, are the testing and equilibration of a breathalyzer machine adequate to prove the validity of a breath test result where no competent evidence is presented at trial to establish the alcoholic content of the reference solution used to test and equilibrate the machine. Finally, can a defendant charged only with a violation of subdivision 3 of *section 1192 of the Vehicle and Traffic Law* be properly convicted, pursuant to section 1196 of that law, of violations of subdivisions 1, 2, and 3 of section 1192. Because these and other cases not yet ready for decision call for a thorough evaluation of the procedure [\*\*\*4] which should be followed in traffic cases involving the use of breath testing instruments, we take occasion to write at some length on all three points.

In considering the first issue, we must examine relevant sections of the Vehicle and Traffic Law and look to pertinent provisions of part 59 of the Administrative Rules and Regulations of the New York State Department of Health, in title 10 of the Official Compilation of the Codes, Rules and Regulations of the State of New York (*10 NYCRR 59.1 et seq.*).

[HN1] Subdivision 2 of *section 1192 of the Vehicle and Traffic Law* states: "No person shall operate a motor vehicle while he has [.12] \* .10 of one per centum or more by weight of alcohol in his blood as shown by chemical analysis of his blood, breath, urine or saliva, made pursuant to the provisions of section eleven hundred ninety-four of this chapter."

\* Chapters 450 and 451 of the Laws of 1972, eff. Jan. 1, 1973. Note: Material bracketed [] was in effect until Dec. 31, 1972.

[HN2] Subdivision 5 of section 1194 [\*\*\*5] (L. 1971, ch. 928) reads: "The department of health shall issue and file rules and regulations approving satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct and supervise chemical analyses of a person's blood, urine, breath or saliva. If the analyses were made by an individual possessing a permit issued by the department of health, this shall be presumptive evidence that the examination was properly given. The provisions of this subdivision do not prohibit the introduction as evidence of an analysis made by an individual other than a person possessing a permit issued by the department of health."

[\*\*554] [HN3] Section 59.1(a) (*10 NYCRR 59.1[a]*) defines "techniques or methods" as used in subdivision 5 of section 1194 (L. 1971, ch. 928) of the Vehicle and Traffic Law, as "the collection, processing and determination of the alcoholic content of body fluids such as human blood or urine as well as methods for the determination [\*894] of the alcoholic content of breath or alveolar air by approved methods."

[HN4] Section 59.5 (*10 NYCRR 59.5*) provides, in relevant part: "Breath testing techniques and methods must meet the following [\*\*\*6] criteria: \* \* \* (d) the result of an analysis of a suitable reference sample, such as air equilibrated with a reference solution of alcoholic content of greater than 0.08 percent weight per volume at a known temperature, must agree with the reference sample value within the limits of plus or minus 0.01 percent weight per volume, or such

limits as set by the State Commissioner of Health. This analysis shall immediately follow the analysis of the breath of the subject and shall be recorded."

In the case of defendant Meikrantz, evidence at trial revealed that the result of the analysis of the reference sample immediately following the analysis of defendant's breath differed from the purported reference solution value by .03 percent weight per volume. Regarding defendant Kopesky, the variance was .02 percent weight per volume. Hence, in neither case were the standards stipulated in *10 NYCRR 59.5(d)* met.

The defendants argue that the Legislature, in enacting subdivision 5 of section 1194 (L. 1971, ch. 928) of the Vehicle and Traffic Law, conferred upon the New York State Department of Health the authority to promulgate approved "techniques or methods" for determining the alcoholic [\*\*\*7] content of breath. They contend that *10 NYCRR 59.5* was the result of this delegation of authority. They further maintain that pursuant to subdivision 5 of section 1194 (L. 1971, ch. 928), a chemical analysis of a person's breath, to be considered valid, must be performed according to those "techniques or methods." In other words, they contend that the Legislature intended subdivision 5 of section 1194 (L. 1971, ch. 928) to condition the admission in evidence of breath test results upon compliance with *10 NYCRR 59.5(d)*. We disagree.

At the outset, there can be no serious dispute that the language of subdivision 5 of section 1194 (L. 1971, ch. 928) is somewhat ambiguous and inarticulate. However, where there is doubt as to the meaning intended to be expressed by a statute, resort may be had to various rules for determining such meaning.

[HN5] In making such a determination, we must construe the language of the statute as we find it, or as it is written (*People v. Friedman*, 302 N. Y. 75; *People v. Kupprat*, 6 N Y 2d 88), not as we believe it should have been written (*People v. Olah*, 300 N. Y. 96). Under the [\*\*555] doctrine of separation of powers, it is fundamental [\*\*\*8] that courts may not legislate, nor may they change [\*895] legislation. Freedom to construe a statute is not freedom to amend it (*Sexauer & Lemke v. Burke & Sons Co.*, 228 N. Y. 341).

In determining legislative intent, we may interpret the law in the light of its historical background or the circumstances leading to its enactment (*Matter of Stupack*, 274 N. Y. 198). We may consider the objects and purposes which the Legislature sought to accomplish by such legislation (*Matter of Hogan v. Culkin*, 18 N Y 2d 330), and the policy which induced its enactment (*MVAIC v. Eisenberg*, 18 N Y 2d 1). Also, as an aid to statutory construction, we may resort to decisions of courts of other States construing language of similar import (*Williams v. Tompkins, Inc.*, 208 App. Div. 574).

Aside from the question of whether subdivision 5 of section 1194 (L. 1971, ch. 928) properly delegates authority to the Department of Health to establish rules and regulations approving satisfactory techniques or methods governing the conduct of chemical analyses, the People argue that, had the Legislature intended to make the validity of breath test results depend upon compliance [\*\*\*9] with such techniques or methods, it could easily have found apt words to express it (*Hennessy v. Walker*, 279 N. Y. 94). We note in this regard that the North Carolina Legislature apparently had no difficulty expressing itself in a similar statute which reads: "Chemical analyses of the person's breath or blood, to be considered valid under the provisions of this section, shall have been performed according to methods approved by the State Board of Health and by an individual possessing a valid permit issued by the State Board of Health for this purpose. The State Board of Health is authorized to approve satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct such analyses, and to issue permits which shall be subject to termination or revocation at the discretion of the State Board of Health; provided, that in no case shall the arresting officer or officers administer said test." (*N. C. Gen. Stat.*, § 20-139.1, subd. [b], cited in *People v. Powell*, 279 N. C. 608, 610-611, 184 S. E. 2d 243, 244; see, also, W. Va. Code, ch. 17C, art. 5A, §§ 1-5 cited in *People v. Hood*, 184 S. E. 2d 334, 336-337.) Certainly, [\*\*\*10] no language is present in said subdivision 5 of section 1194 which even remotely suggests such import. Furthermore, said subdivision 5 of section 1194, unlike a similar California statute, fails to even expressly require that chemical tests be performed according to rules and regulations adopted by the Department of Health [\*\*556] (see Cal. Codes, Health and Safety [\*896] Code, § 436.52 cited in *People v. Foulger*, 26 Cal. App. 3d

*Supp. 1, 3).*

On its face, said subdivision 5 of section 1194 provides for the issuance of permits by the Department of Health to persons deemed competent to conduct chemical tests for alcohol, and further provides that if such an analysis is made by a person possessing such a permit, it shall be presumptive evidence that such a test was properly given. The statute also provides that the Department of Health shall issue and file rules and regulations approving satisfactory methods to ascertain the competence of individuals to conduct and supervise chemical analyses for alcohol. It specifically allows the introduction of test results made by persons not holding permits, but in such cases the presumption of propriety does not apply.

Prior [\*\*\*11] to the passage of the section, the qualification of persons who conduct chemical tests for intoxication in charges of violations of *section 1192 of the Vehicle and Traffic Law* often resulted in long drawn-out testimony and cross-examination, sometimes distracting from the main issue of the trial, the alcoholic content of the defendant's breath. In some areas, the court's insistence upon expert testimony of what is described as a routine procedure (*People v. Donaldson, 36 A D 2d 37*) resulted in the clogging of court calendars and a reluctance to proceed to trial in these cases. Also, some operators of chemical test devices did not have sufficient training to be able to provide sound testimony as to the validity of the procedures which they followed. [HN6] Hence, we are persuaded that subdivision 5 of section 1194 was enacted to provide that the Department of Health would establish qualifications for the certification of operators and analysts to assure that tests would be properly conducted and analyzed and that such persons would be competent to testify as to the procedures followed. The issuance of a permit by the Department of Health presumptively qualifies such person and [\*\*\*12] his testimony. We feel the intended result, therefore, was the more expeditious and proper handling of driving-while-intoxicated cases. However, the defense is still able to introduce evidence in a situation in which the test may not, in fact, have been properly given.

Accordingly, [HN7] absent a provision of the statute excluding the evidence in criminal prosecutions, or absent an express provision at least requiring compliance with the Department of Health regulations, and in view of the circumstances and policy considerations which prompted the statute's passage, we do not believe the Legislature intended said subdivision 5 of section [\*897] 1194 to make the validity of breath test results depend upon, or to condition the admission in evidence of test results upon, compliance with *10 NYCRR 59.5(d)*. We further believe that the validity of such tests is to be determined in accordance with medical and scientific standards generally and that [\*\*\*557] intrinsic evidence, rather than standards fixed by departmental rules, properly measures reliability and accuracy of test results (*People v. Monahan, 25 N Y 2d 378*).

However, the result we reach does not affect defense counsel's [\*\*\*13] right to make any proper use of the noncompliance of a given breath test with the Department of Health rules and regulations in an attempt to persuade the trier of fact that the test result was invalid. We note in this regard that it may even be proper for defense counsel to read pertinent provisions of the regulations in evidence (*Executive Law, § 106*).

We turn now to the question of whether it is a necessary foundation, for the admission in evidence of breath test results, to prove by competent evidence the alcoholic content of the reference solution used to test and equilibrate breath testing instruments. By "testing" and "equilibrating" we mean both the weekly testing of breathalyzers by local police forces and the analysis of a reference sample which immediately follows the analysis of a subject's breath pursuant to current police procedure.

In testing and equilibrating, analyses are conducted using a suitable reference sample, such as air equilibrated with an alcoholic reference solution (usually 0.15% weight per volume at a known temperature). The reference solution is delivered monthly in a sealed bottle to local police stations directly from the manufacturer. Upon its [\*\*\*14] arrival, the reference solution is poured into an electric simulator assembly resembling a canning jar, and the assembly is plugged in to warm the solution to the proper temperature (usually 34 degrees C). Accompanying the reference solution is a manufacturer's laboratory certificate of analysis showing that the lot from which the bottled solution was taken was random sampled with stated results, and that the alcohol and water used in the solution were found to be free of any

interfering substances. A label showing the alcoholic content or value of the new reference solution as found by the laboratory is also enclosed and is affixed to the front of the simulator assembly at the station. A reference sample, vapor from the predetermined alcoholic solution simulating breath, is then passed through the breathalyzer machine [\*898] in order to obtain a reading on the gauge and verify the reference solution value.

A weekly test is actually comprised of several successive analyses using reference samples. Between each test the breathalyzer machine is flushed or purged with clear air. The test conducted immediately following the subject's test is a single analysis and is preceded [\*\*\*15] by a similar purge of the machine. The result of each analysis should equal or closely approximate the purported value of the reference solution and the result of the analyses comprising a weekly test should be identical. In this way, the breathalyzer operator can determine if [\*\*558] a breathalyzer machine is functioning properly and the results it yields are accurate and reliable.

Defendants argue, and the People concede, that at neither of these trials was competent evidence adduced to establish the alcoholic content of the reference solution used to test and equilibrate their breathalyzers. The defendants contend that this lack of proof renders the breath test invalid and that, consequently, the admission of the test results in evidence was reversible error. Hence, they maintain that unless it is clearly demonstrated that the reference solution is of the value it purports to be it cannot be scientifically determined if a breath testing instrument is functioning properly or the test results it renders are accurate and reliable.

The point raised is well taken, but we do not believe it necessary for the People to prove by competent evidence the value of the reference solution [\*\*\*16] in all breathalyzer cases.

[HN8] At the outset we note that the admissibility in evidence of any breath test result depends upon presenting an adequate foundation. It further appears that the elements of a necessary foundation are:

- (1) that there was compliance with any statutory requirement (see *Vehicle and Traffic Law*, §§ 1193-a and 1194);
- (2) that a specified type of breath testing device was used to analyze a breath sample and that such device is scientifically reliable for measuring the percent of alcohol in the blood through a chemical analysis of a subject's breath, *unless* such reliability has been judicially recognized (e.g., *People v. Donaldson*, 36 A D 2d 37, *supra* [the breathalyzer]);
- (3) that the testing device was in proper working order;
- (4) that the person giving and interpreting the test was properly qualified (e.g., *People v. Donaldson*, *supra*);
- (5) that the chemicals used in the test (i.e., the ampoules used in a breathalyzer) were of the proper kind and mixed in the [\*899] proper proportions (*People v. Donaldson*, *supra*). In this regard we note that random sampling of the particular lot the ampoules were from is probably sufficient [\*\*\*17] to show such propriety (see *People v. Coffman*, 502 P. 2d 605 [Ore.]; *State v. Baker*, 56 Wn. 2d 846);
- (6) that the test was properly conducted.

All elements of a proper foundation must be met and each is aimed to insure that the results of a given subject's breath test are accurate and reliable. The present allegation of error is directed toward the third element alone, namely, and more particularly, whether the breathalyzer used in the defendants' tests was proven to be in proper working order. We feel this element has special significance in regard to the validity of test results.

[\*\*559] [HN9] A determination regarding the proper functioning of a breathalyzer must be made on a case-by-case basis and must rely on the intrinsic evidence presented at trial. Each case must be looked at anew and each must stand or fall on its own facts and no judicial formula can be conjured up to supplant what appears on the face of the record of an individual case. With this in mind, we turn to the records of the instant cases.

At the trial of defendant Meikrantz, the prosecution offered and the court admitted into evidence, presumably under CPLR 4518 (subd. [c]), two photocopies [\*\*\*18] of calibration records (certificates of calibration) made by the New York State Police laboratory in Albany. The term "calibration" refers to an adjustment of the breathalyzer machine as distinguished from a mere test of the machine. If a weekly test at the station indicates a machine malfunction, it is sent to the laboratory to be calibrated. However, one of the certificates therein was dated two and one-quarter years before the defendant's test, while the other was made three months thereafter. Consequently, the defendant's specific objections on the grounds of remoteness on the one hand and irrelevancy on the other should have been sustained and the records suppressed.

Two weekly test records (alcohol breath simulator records) were then introduced, as a business records exception to the hearsay rule. These records apparently showed the results of two weekly tests conducted three days prior to the defendants' test and four days subsequent thereto. However, the results of these weekly tests are not set forth on the record.

Finally, the analysis immediately following the defendant's test was testified to. The witness police officer stated that the value of the alcoholic reference [\*\*\*19] solution was 0.15% while the [\*900] result obtained was 0.12%. The witness never adequately explained the reason for the deviation of 0.03%.

On the other hand, in the case of defendant Kopesky, two separate breathalyzer tests were conducted and the results of both tests were identical, 0.19%.

Testimony was admitted that the reference solution used to test and equilibrate the breathalyzer in question was prepared by a private hospital laboratory and that its purported value was 0.15%. The probability of deterioration of the alcoholic reference solution over a period of time was amply covered in the testimony, as was the consequence that the weekly test results were slightly lower than the purported value of such solution. In this regard, an alcohol breath simulator record was admitted in evidence showing the results of weekly tests conducted at the police station for the six weeks immediately prior to the defendant's tests and for the five weeks immediately following them. The results of the successive [\*560] analyses comprising each weekly test were demonstrated to be nearly identical. The same exhibit also showed that an analysis of the reference sample was conducted [\*\*\*20] immediately following each of the defendant's tests, with the same results.

Finally, testimony revealed that a certificate of calibration made by the manufacturer of the breathalyzer was delivered with the machine in question when it was purchased nine months prior to the defendant's tests.

We note that in *Kopesky* a recorded history of the results of weekly tests conducted within a reasonable time before and after the defendant's test was compiled and introduced, while in *Meikrantz* evidence of only two such weekly tests was introduced, one of which was conducted after the fact.

In both cases, the results of the analyses which follow the subjects' breath test were admitted and in each instance there was a deviation from the purported value of the reference solution. Only in *Kopesky*, however, were the deviations adequately explained in terms of the probable deterioration of the alcoholic solution.

Furthermore, in *Kopesky* the results of all tests and equilibrations, both before and after the defendant's tests, were demonstrated to have closely approximated the purported reference solution value (with any deviation accounted for) and the results of the analyses comprising [\*\*\*21] each weekly test were shown to be nearly identical. No such showing was made on the record in *Meikrantz*.

[\*901] Finally, at defendant *Kopesky's* trial testimony was admitted concerning a manufacturer's certificate of calibration dated nine months before defendant's test while the calibration certificates introduced in *Meikrantz* were remote.

While our higher courts have not spelled out the exact limits to which an accused drunken driver may go to plumb

the accuracy of the testing devices and solutions, we are not prepared to cast the burden on the People in all cases of offering proof of the accuracy of the reference solution's value, beyond the comparative analyses made in *Kopesky*. We are persuaded that in *Kopesky* there was "reasonable proof" of the reliability of the reference solution and the accuracy of the breathalyzer itself. Such proof was lacking in the case of defendant *Meikrantz*.

Accordingly, at this point the conviction of defendant *Meikrantz* is reversed, since the proper functioning of the breathalyzer was not sufficiently shown.

We feel that the conclusion we have reached regarding defendant *Kopesky*'s case is well-grounded in reason. [\*\*\*22] [HN10] We recognize that the breathalyzer is scientifically reliable for determining the percentage of alcohol in the blood if tests are conducted in accordance with [\*\*561] proper procedures ( *People v. Donaldson*, 36 A D 2d 37, *supra*). Furthermore, in *Kopesky* we believe it to be more than coincidental that the results of the several analyses comprising each weekly test were nearly identical and that the results of all tests and equilibrations closely approximated the purported value of the reference solution with deviations explained on the record. To us it is inconceivable how the breathalyzer and the reference solution could both be inaccurate to the same degree (cf. *People v. Stephens*, 52 Misc 2d 1070).

We further believe that in view of the possible presumption of propriety applicable in breathalyzer cases under the aforesaid subdivision 5 of section 1194 and in light of previous Court of Appeals opinions regarding untested speedometers and radar devices ( *People v. Magri*, 3 N Y 2d 562 and *People v. Dusing*, 5 N Y 2d 126), that [HN11] even a reading from an untested breathalyzer machine is admissible in a prosecution for driving while ability impaired [\*\*\*23] or driving while intoxicated in violation of subdivision 1 of section 1192 or subdivision 3 of *section 1192 of the Vehicle and Traffic Law*. However, such evidence cannot alone be sufficient for conviction under these sections, and the deficiency in proof can be supplied by the opinion testimony of qualified observers of the defendant's conduct, speech and [\*902] demeanor to establish the fact of the defendant's impaired ability or intoxication (see *People v. Morris*, 63 Misc 2d 124, 127).

The third and final issue for consideration, is raised on behalf of *Kopesky* alone. He contends that his conviction must be reversed because of an erroneous jury charge at his trial. We agree.

The defendant was arrested and charged with driving while intoxicated in violation of subdivision 3 of *section 1192 of the Vehicle and Traffic Law*. At his trial on that charge, the court instructed the jury that the defendant could be found guilty of one or more of the following: driving while ability impaired in violation of subdivision 1 of section 1192, driving with .12 of one percentum or more by weight of alcohol in his blood in violation of subdivision 2 of section 1192 and driving while [\*\*\*24] intoxicated in violation of subdivision 3 of section 1192. The defendant was subsequently found guilty of violating all three of the subdivisions.

[HN12] Section 1196 reads: "A driver may be convicted of a violation of subdivisions one, two *or* three of section eleven hundred ninety-two, notwithstanding that the charge laid before the court alleged a violation of subdivision two *or* three of section eleven hundred ninety-two, and regardless of whether or not such *conviction* is based on a plea of guilty." (Emphasis ours.)

Subdivisions 2 and 3 of section 1192 were intended to be separate crimes, neither mutually inclusive nor exclusive ( *People v. McDonough*, 39 A D 2d 188; *People v. Rudd*, 41 A D 2d 875). Moreover, they may be joined as [\*\*562] multiple counts in one indictment since they are based upon the same criminal transaction ( *CPL 200.20*, subd. 2, par. [a]; *People v. Rudd*, *supra*). As the court said in *Rudd*, *supra*, p. 876: "After the trial of a multiple count indictment containing concurrent counts only (those [on] which only concurrent sentences could be imposed) and if those counts are noninclusory (when the offense charged is not one greater [\*\*\*25] than any of those charged in the others and when the latter are not all lesser offenses included within the greater), the court may in its discretion submit one or more or all thereof to the jury ( *CPL 300.40*, subd. 3, par. [a])."

Our examination of the *Rudd* decision persuades us that, for a defendant to be convicted of both driving under the influence of alcohol in violation of subdivision 2 of section 1192 and driving while intoxicated in violation of subdivision 3 of section 1192, it is necessary for the police to serve two uniform traffic tickets and file two simplified informations or otherwise follow [\*903] a procedure having the effect of a multicount indictment. Where, however, only one uniform traffic ticket is served and one simplified information is filed, for example, charging a violation of subdivision 3 of section 1192, section 1196 provides that a defendant may be found guilty of but one of the enumerated subdivisions of section 1192 (see *People v. Kaepfel*, 74 Misc 2d 220, 222).

Nevertheless, at least one lower court in New York has indicated that even this restricted interpretation of section 1196 violates the United States Constitution, Sixth Amendment [\*\*\*26] and *section 6 of article I of the New York State Constitution* (*People v. Fielder*, 75 Misc 2d 446). For this reason we believe the safer course for the People to follow in driving-while-intoxicated cases is either:

(1) Immediately file an information charging subdivision 3 of section 1192. When the necessary additional factual allegations become available to support subdivision 2, a second information may be filed charging subdivision 2 of section 1192, and thereafter an application can be made to consolidate both informations pursuant to *CPL 200.20* (subd. 4) and *CPL 100.45*. Under such circumstances the court should have no difficulty in exercising its discretion in granting said application as provided in *CPL 200.20* (subd. 5); or

(2) immediately filing a misdemeanor complaint charging violation of both subdivisions 2 and 3 of section 1192 (*CPL 100.05*, subd. 4) and then subsequently filing a supporting deposition supplying the necessary factual allegations to support the charge of subdivision 2 of section 1192 (*CPL 170.65*, subs. 1 and 2).

Incidentally, it may be stated that subdivision 1 of section 1192 need not be included in the information, in that the same would be [\*\*\*27] a lesser included charge (*CPL 360.50*).

[\*\*563] In the case of defendant *Kopesky*, we find that, because only one simplified information was filed -- that charging a violation of subdivision 3 of section 1192 -- the charge below was erroneous and improper. Further, we cannot say that such error was merely technical and did not affect the substantial rights of the defendant (see *CPL 470.05*, subd. 1). Accordingly, defendant *Kopesky's* conviction is set aside.

In conclusion, for the above reasons, the convictions of both defendants are reversed.

[NO NUMBER IN ORIGINAL]

County Court of New York, Orleans County

*33 Misc. 2d 908; 227 N.Y.S.2d 165; 1962 N.Y. Misc. LEXIS 3475*

April 20, 1962

**DISPOSITION:** [\*\*\*1]

The judgment of conviction is reversed, the fine remitted, and the information dismissed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed his conviction from the Court of Special Sessions in the Town of Barre, Orleans County, New York for speeding in violation of *N.Y. Veh. & Traf. Law § 1180(b)(2)*.

**OVERVIEW:** The arresting officer allegedly observed defendant speeding. The officer testified that when he saw defendant's car, he believed it to be travelling at 70 miles per hour. When the officer "clocked" defendant later, he was traveling at a rate of 60 miles per hour. Defendant alleged that he slowed down in a restricted speed zone to below 50 miles per hour and then accelerated to 50 miles per hour after leaving the restricted zone. Based on evidence relating to the accuracy of the officer's speedometer and the officer's observations, defendant was convicted of speeding. He was fined and his license was suspended. Defendant appealed. The court reversed, holding that the proof was insufficient to support defendant's conviction. The court explained that there was not a proper foundation for admitting evidence of a speed deviation record, which related to the accuracy of the officer's speedometer. The person who tested the accuracy of the speedometer was never called as a witness. Further, the officer failed to qualify himself as a person able to judge and estimate speed of motor vehicles. Thus, he was an unqualified observer of defendant's speed.

**OUTCOME:** The court reversed defendant's conviction for speeding. The court ordered that the fine be remitted and the information be dismissed.

**CORE TERMS:** speed, speedometer, deviation, observer, arresting officer, accuracy, miles, speeding, untested, radar, qualify, proper foundation, estimating, signature, arresting, zone, motor vehicles, estimation, Traffic Law, personal observation, burden of proving, motor vehicle, particularize, unqualified, calibration, introduce, witnessed, remitted, supplied, clocking

Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview*  
[HN1] Evidence of a reading in an untested speedometer is admissible, but is not, without more, sufficient for a speeding conviction. Additional proof can be supplied by the testimony of qualified observers.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Testimony > Experts > General Overview*  
[HN2] A witness should particularize his experience in judging and estimating the speed of moving vehicles so the trier of the facts can determine as to whether or not such witness is a qualified observer.

**HEADNOTES: Motor vehicles -- speeding -- defendant's conviction for speeding was reversed where there was reading of untested speedometer plus opinion of nonqualified observer as to speed.**

Defendant's conviction for speeding in violation of section 1180 (subd. [b], par. 2) of the Vehicle and Traffic Law was reversed, the fine was remitted and the information was dismissed. A speed deviation record of the speedometer on the arresting officer's automobile was received in evidence without the laying of a proper foundation therefor. The arresting officer's testimony as to testing the speedometer by radar did not establish the accuracy thereof. The speedometer was considered an untested speedometer requiring additional testimony by qualified observers to support the conviction and such evidence was not here supplied. The arresting officer failed to particularize his experience in judging and estimating the speed of moving vehicles and was therefore an unqualified observer. The People failed to meet the burden of proving defendant's guilt.

**COUNSEL:**

*Ellsworth M. Murray* for appellant.

*Franklin [\*\*\*2] B. Cropsey, District Attorney*, for respondent.

**JUDGES:**

J. Kenneth Serve, J.

**OPINION BY:**

SERVE

**OPINION:**

[\*908] [\*\*166] On February 13, 1962, the defendant was convicted by a Court of Special Sessions in the Town of Barre, Orleans County, New York (Alvin G. Peglow, J), of speeding, in violation of section 1180 (subd. [b], par. 2) of the Vehicle and Traffic Law, and was fined \$ 100 and his license suspended.

Upon this appeal, the defendant claims that substantial errors were committed at his trial in that evidence was admitted as to the "clocking" of the defendant without proper proof of the accuracy of the speedometer in the car of the arresting officer, and further that the witness, who testified as to the speed of the defendant's car, was not a qualified observer.

[\*\*167] The arresting officer, who was the sole witness for the People, testified that, based upon his personal observation of the defendant's car, it was his opinion that the defendant was operating [\*909] the same at 70 miles per hour, and that when he clocked the defendant, the defendant was traveling at a rate of 60 miles per hour. The officer's opinion as to the speed of defendant's car was based on his [\*\*\*3] observation north of the hamlet of Barre Center, while the alleged violation for which the defendant was arrested and tried occurred south of Barre Center, and several miles distant from the place where the officer estimated the defendant's speed to be 70 miles per hour.

It is important to note that the officer testified that Barre Center constituted a restricted speed zone, and that the defendant slowed down in such speed zone, and after the defendant left Barre Center, the officer started, for the first time, to clock the defendant. The defendant testified he reduced his speed below 50 miles per hour in the Barre Center restricted speed zone, and then increased the speed of his vehicle to 50 miles per hour after he left and travelled south of Barre Center. The defendant's testimony on this point was uncontradicted and in fact the arresting officer also testified that the defendant reduced speed through the hamlet of Barre Center. The arrest was based on the speed that the defendant allegedly operated his motor vehicle at while the officer clocked him. The officer did not testify as to his personal opinion of the speed of the defendant's car for the period and in the location [\*\*\*4] while the clocking was being done.

In an effort to prove the accuracy of the speedometer on the car of the arresting officer, there was received in evidence, over the defendant's objection, an exhibit entitled "Speed Deviation Record". On this exhibit appeared a signature over a line, which was apparently that of the arresting officer, and indicated such officer to be the driver of the car at the time of the test, and also the signature of an officer over a line which identified such officer as the "Observer". No testimony was offered as to the validity of either signature. In reference to the deviation record, the witness testified that he witnessed the calibration test. The witness did not state what he observed nor how the speedometer deviation test was made. Neither did he state, from his own personal observation of the test, what the results of the test were. The witness merely stated that "This car being calibrated on the 26th day of November, 1961, myself being the witness to calibration and driver of the car, I would like to introduce in evidence a speed deviation record, which I witnessed as an observer to the visual meter." Based on such testimony, the speed deviation [\*\*\*5] record was admitted into evidence. The last-quoted testimony does not constitute a proper foundation for the admission into evidence of the [\*910] speed deviation record. At no time was the person who conducted such test called as a witness. Based upon the testimony [\*\*168] in this case, it was error to admit into evidence the speed deviation record.

No effort was made to lay a proper foundation to introduce the speed deviation record into evidence under the provisions of section 374-a of the Civil Practice Act.

The arresting officer also testified that "Just prior to using that car, that car was tested by myself on radar on which I was radar pick-up man. No difference in tally of speed." This testimony does not meet the standard of establishing the accuracy of the speedometer in the officer's car.

Without the speed deviation record, and there being no other competent evidence as to the accuracy of the speedometer in the arresting officer's car, for the purposes of this case such speedometer must be considered an untested speedometer or at most a speedometer which had been tested but with no results of the test being properly received in evidence.

[HN1] Evidence of the reading [\*\*\*6] in an untested speedometer is admissible, but is not, without more, sufficient for a speeding conviction (*People v. Heyser*, 2 N Y 2d 390). The additional proof can be supplied by the testimony of qualified observers (*People v. Magri*, 3 N Y 2d 562).

The arresting officer attempted to qualify himself as a person competent to judge the speed of a moving automobile by testifying as follows: "I based the estimation of speed on the fact that I had 4 years and 10 months as a member of the State Police, I drive a motor vehicle 50,000 miles a year, 30,000 of that mileage on Division of State Police cars and I am ruled experienced on speed by the New York Traffic Division. A radar operator for a length of time on the job and

33 Misc. 2d 908, \*910; 227 N.Y.S.2d 165, \*\*168;  
1962 N.Y. Misc. LEXIS 3475, \*\*\*6

have had a number of occasions to judge the accuracy and establishment of speed while observing cars from off road parking and use of radar." By such testimony, the witness has established that he has had ample opportunity to observe motor vehicles, but he has failed to testify as to the nature of the observations in the field of estimating speed; and further, if he did make observations of motor vehicles in order to estimate their speed, he has omitted [\*\*\*7] to state what the results of his observations were and if his estimation of speed at such times was substantially correct when checked against recognized devices for measuring speed. No other testimony was offered to qualify the witness to render an opinion as to speed of moving vehicles. [HN2] The witness should particularize his experience in judging and estimating [\*911] the speed of moving vehicles so the trier of the facts can determine as to whether or not such witness is a qualified observer. The witness in this case has failed to properly qualify himself as a person able to judge speed of moving automobiles, and his opinion of the speed of the defendant's automobile should be disregarded. (*People v. Tanner*, 6 Misc 2d 1007.)

[\*\*169] Leaving out the speed deviation record, which was erroneously received in evidence, the only evidence in the record is the testimony of the reading of an untested speedometer, plus the opinion of an unqualified observer as to the speed. This amount of proof is clearly insufficient to sustain the People's burden of proving the defendant's [\*\*\*8] guilt.

The judgment of conviction is reversed, the fine remitted, and the information dismissed.

[\*908] [\*\*166] On February 13, 1962, the defendant was convicted by a Court of Special Sessions in the Town of Barre, Orleans County, New York (Alvin G. Peglow, J), of speeding, in violation of section 1180 (subd. [b], par. 2) of the Vehicle and Traffic Law, and was fined \$ 100 and his license suspended.

Upon this appeal, the defendant claims that substantial errors were committed at his trial in that evidence was admitted as to the "clocking" of the defendant without proper proof of the accuracy of the speedometer in the car of the arresting officer, and further that the witness, who testified as to the speed of the defendant's car, was not a qualified observer.

33 Misc. 2d 908, \*908; 227 N.Y.S.2d 165, \*\*166;  
1962 N.Y. Misc. LEXIS 3475, \*\*\*2

[\*\*167] The arresting officer, who was the sole witness for the People, testified that, based upon his personal observation of the defendant's car, it was his opinion that the defendant was operating [\*909] the same at 70 miles per hour, and that when he clocked the defendant, the defendant was traveling at a rate of 60 miles per hour. The officer's opinion as to the speed of defendant's car was based on his [\*\*\*3] observation north of the hamlet of Barre Center, while the alleged violation for which the defendant was arrested and tried occurred south of Barre Center, and several miles distant from the place where the officer estimated the defendant's speed to be 70 miles per hour.

It is important to note that the officer testified that Barre Center constituted a restricted speed zone, and that the defendant slowed down in such speed zone, and after the defendant left Barre Center, the officer started, for the first time, to clock the defendant. The defendant testified he reduced his speed below 50 miles per hour in the Barre Center restricted speed zone, and then increased the speed of his vehicle to 50 miles per hour after he left and travelled south of Barre Center. The defendant's testimony on this point was uncontradicted and in fact the arresting officer also testified that the defendant reduced speed through the hamlet of Barre Center. The arrest was based on the speed that the defendant allegedly operated his motor vehicle at while the officer clocked him. The officer did not testify as to his personal opinion of the speed of the defendant's car for the period and in the location [\*\*\*4] while the clocking was being done.

In an effort to prove the accuracy of the speedometer on the car of the arresting officer, there was received in evidence, over the defendant's objection, an exhibit entitled "Speed Deviation Record". On this exhibit appeared a signature over a line, which was apparently that of the arresting officer, and indicated such officer to be the driver of the car at the time of the test, and also the signature of an officer over a line which identified such officer as the "Observer". No testimony was offered as to the validity of either signature. In reference to the deviation record, the witness testified that he witnessed the calibration test. The witness did not state what he observed nor how the speedometer deviation test was made. Neither did he state, from his own personal observation of the test, what the results of the test were. The witness merely stated that "This car being calibrated on the 26th day of November, 1961, myself being the witness to calibration and driver of the car, I would like to introduce in evidence a speed deviation record, which I witnessed as an observer to the visual meter." Based on such testimony, the speed deviation [\*\*\*5] record was admitted into evidence. The last-quoted testimony does not constitute a proper foundation for the admission into evidence of the [\*910] speed deviation record. At no time was the person who conducted such test called as a witness. Based upon the testimony [\*\*168] in this case, it was error to admit into evidence the speed deviation record.

No effort was made to lay a proper foundation to introduce the speed deviation record into evidence under the provisions of section 374-a of the Civil Practice Act.

The arresting officer also testified that "Just prior to using that car, that car was tested by myself on radar on which I was radar pick-up man. No difference in tally of speed." This testimony does not meet the standard of establishing the accuracy of the speedometer in the officer's car.

Without the speed deviation record, and there being no other competent evidence as to the accuracy of the speedometer in the arresting officer's car, for the purposes of this case such speedometer must be considered an untested speedometer or at most a speedometer which had been tested but with no results of the test being properly received in evidence.

[HN1] Evidence of the reading [\*\*\*6] in an untested speedometer is admissible, but is not, without more, sufficient for a speeding conviction (*People v. Heyser*, 2 N Y 2d 390). The additional proof can be supplied by the testimony of qualified observers (*People v. Magri*, 3 N Y 2d 562).

The arresting officer attempted to qualify himself as a person competent to judge the speed of a moving automobile by testifying as follows: "I based the estimation of speed on the fact that I had 4 years and 10 months as a member of the State Police, I drive a motor vehicle 50,000 miles a year, 30,000 of that mileage on Division of State Police cars and I am ruled experienced on speed by the New York Traffic Division. A radar operator for a length of time on the job and

33 Misc. 2d 908, \*910; 227 N.Y.S.2d 165, \*\*168;  
1962 N.Y. Misc. LEXIS 3475, \*\*\*6

have had a number of occasions to judge the accuracy and establishment of speed while observing cars from off road parking and use of radar." By such testimony, the witness has established that he has had ample opportunity to observe motor vehicles, but he has failed to testify as to the nature of the observations in the field of estimating speed; and further, if he did make observations of motor vehicles in order to estimate their speed, he has omitted [\*\*\*7] to state what the results of his observations were and if his estimation of speed at such times was substantially correct when checked against recognized devices for measuring speed. No other testimony was offered to qualify the witness to render an opinion as to speed of moving vehicles. [HN2] The witness should particularize his experience in judging and estimating [\*911] the speed of moving vehicles so the trier of the facts can determine as to whether or not such witness is a qualified observer. The witness in this case has failed to properly qualify himself as a person able to judge speed of moving automobiles, and his opinion of the speed of the defendant's automobile should be disregarded. (*People v. Tanner*, 6 Misc 2d 1007.)

[\*\*169] Leaving out the speed deviation record, which was erroneously received in evidence, the only evidence in the record is the testimony of the reading of an untested speedometer, plus the opinion of an unqualified observer as to the speed. This amount of proof is clearly insufficient to sustain the People's burden of proving the defendant's [\*\*\*8] guilt.

The judgment of conviction is reversed, the fine remitted, and the information dismissed.

**The People of the State of New York, Plaintiff, v. Edmund Sarver, Defendant****[NO NUMBER IN ORIGINAL]****City Court of New York, New Rochelle, Sitting as Court of Special Sessions*****205 Misc. 523; 129 N.Y.S.2d 9; 1954 N.Y. Misc. LEXIS 2346*****March 31, 1954****PRIOR HISTORY:** [\*\*\*1]

Prosecution for speeding in violation of ordinance.

**DISPOSITION:**

Defendant's motions to dismiss are denied and the defendant is found guilty as charged.

**CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant moved to dismiss the prosecution against him for operating a motor truck at a rate of speed of 36 miles per hour in violation of an ordinance which fixed the maximum rate of speed at 25 miles per hour.**OVERVIEW:** Defendant was charged with operating a motor vehicle at a rate of speed higher than the maximum speed allowed under an ordinance. In support of the charge of violation of the ordinance made by a police officer, the city offered a graph recording made on a radar-type device which purported to measure the speed of vehicles. Defendant contended that the ordinance in question required the speed limit to be exceeded for a distance of one eighth of a mile before a conviction could be had and he also contended that the speed meter was inaccurate and unreliable and the evidence of the graph output could not be used to sustain the charge against him. The court denied defendant's motion to dismiss the charge and the court found defendant guilty as charged. The court concluded that the radar device was sufficiently accurate to make admissible the recording made by it. The testimony of an engineering expert and the tests and calibrations performed by the police conclusively showed that the radar or electromagnetic speed meter was an accurate and reliable instrument for the measurement of a vehicle's velocity. As such, the evidence was sufficient to support the charge against defendant.**OUTCOME:** The court denied defendant's motion to dismiss the prosecution against him for speeding and the court found defendant guilty as charged.**CORE TERMS:** speed meter, speed, radar, electromatic, graph, mile, approaching, truck, wave, ordinance, zone, feet,

[HN2] The radar speed meter is no different than any other scientific device. Admissibility of tests made by it depends entirely on its accuracy and reliability.

**HEADNOTES: Motor vehicles -- speeding -- radar speed-checking device -- (1) radar-type instrument known as electromatic speed meter shown to be accurate and reliable instrument for measurement of velocity of motor vehicles; graph recording made thereon admissible in evidence in prosecution for speeding; defendant found guilty -- (2) operation of electromatic speed meter explained; "zone of influence" of meter extends for thirty feet; contention that wording of ordinance of City of New Rochelle under which prosecution was had required speed limit to be exceeded for one eighth of mile disposed of adversely to defendant on motion to dismiss information made prior to trial -- (3) officer in "radar car" notified arresting officer ahead that green truck traveling at excessive speed had approached and passed his car; circumstances conclusively established defendant's identity and no further identification necessary -- (4) information charging defendant properly sworn to by arresting officer, who testified that defendant's car approached him at [\*\*\*2] stated speed in excess of permissible limit; were city's evidence of speed confined solely to speed meter graph, officer operating speed meter would have been logical person to swear to information.**

1. A radar-type instrument known as an electromatic speed meter having been shown to be an accurate and reliable instrument for the measurement of velocity of motor vehicles, a graph recording made thereon was admissible in evidence in a prosecution for speeding. Defendant was found guilty as charged.

2. The electromatic speed meter operates in this fashion: A police car from which the radar speed meter operates parks alongside the road. A transmitter in the shape of a box is placed at the rear of the car or on the ground facing oncoming traffic. This transmitter sends out sound waves that strike the oncoming cars and return to a receiver which is part of the speed meter. By measuring the change in frequency in these sound waves as they return compared with their frequency when sent out, the device is able to record the speed of an approaching car. The "zone of influence", the zone through which the speed of the car is measured, extends for approximately 30 feet and is approximately [\*\*\*3] 175 feet away from the speed meter device. When the approaching car reaches a point about 175 feet away from the transmitter, the sound waves returning after hitting the approaching car are permanently recorded on a graph and in this way record the speed of the approaching car as it passes through the "zone of influence". As the defendant's green truck went by the parked police car from which the speed meter was operated, an officer therein notified an officer in a police car parked a quarter of a mile ahead, and the officer in that car stopped the truck and issued a summons to the defendant. The contention that the wording of the ordinance of the City of New Rochelle charged to have been violated required the speed limit to be exceeded for a distance of one eighth of a mile before a conviction might be had, was disposed of adversely to the defendant on a motion to dismiss the information made prior to the trial.

3. The officer in the "radar car" notified the arresting officer ahead that a green truck traveling at an excessvie speed

had approached and passed his car. The circumstances conclusively established the defendant's identity and no further identification was necessary. [\*\*\*4]

4. The information charging the defendant was properly sworn to by the arresting officer, who testified that the defendant's car approached him at a stated speed in excess of the limit prescribed by the ordinance. *It seems*, that were the city's evidence of speed confined solely to the speed meter graph, the officer who was operating the speed meter would have been the logical person to swear to the information.

#### **OPINION BY:**

KENNEDY

#### **OPINION:**

[\*524] [\*\*10] The defendant, Edmund Sarver, is charged with operating a motor truck along Wilmot Road in the city of New Rochelle at a rate of speed of thirty-six miles per hour on July 30, 1953, in violation of an ordinance [\*525] which fixes the maximum rate of speed at twenty-five miles an hour.

In support of the charge of violation of the ordinance made by a police officer of the City of New Rochelle, the city has offered a graph recording made on a radar-type device which purports to measure the speed of vehicles. This device is [\*\*\*5] known as an electromatic speed meter and is manufactured by the automatic signal division of Eastern Industries, Inc., at Norwalk, Connecticut. The city offered evidence as to the manner in which the electromatic speed meter operated and as to its accuracy.

As an expert witness, Dr. John Kopper of the faculty of Johns Hopkins University was called by the city. The witness stated that he received a Doctor's degree in Electrical Engineering from Johns Hopkins University in 1944, that he practiced electrical engineering for over twenty years, and that he taught courses in electrical engineering at Johns Hopkins for twelve years. He stated the electromatic speed recorder was a radar-type of instrument which measured velocity by a radar method.

Simplifying the substance of his testimony, it may be said that the electromatic speed recorder operates in this manner: The police car from which the radar speed meter operates parks alongside of the road. A transmitter in the shape of a box is placed at the rear of the car or on the ground in back of the car facing the oncoming traffic. This transmitter sends out sound waves that strike the oncoming cars and return to a receiver which is part [\*\*\*6] of the speed meter. By measuring the change in frequency in these sound waves as they return compared with their frequency when sent out, the device is able to record the speed of an approaching car. The "zone of influence" or the zone through which the speed of the car is measured extends for approximately 30 feet and is approximately 175 feet away from the speed meter device. In other words, when the approaching car reaches a point about 175 feet away from the transmitter, the sound waves returning after hitting the approaching car, are recorded on a graph and in this way record the speed of [\*\*11] the approaching car as it passes through the "zone of influence" a distance of approximately 30 feet.

205 Misc. 523, \*525; 129 N.Y.S.2d 9, \*\*11;  
1954 N.Y. Misc. LEXIS 2346, \*\*\*6

If the oncoming car had been stopped in the "zone of influence" there would be no change in the wave frequency between transmission and reception. However, there is always a change or frequency shift between transmission and reception when the oncoming car is moving.

[\*526] The moving car coming into the stream of sound waves, makes the waves bounce back to the receiver, something in the manner in which an echo is produced. The change in their frequency indicates the rate of [\*\*\*7] speed of the approaching automobile.

A permanent record of the speed is made on a graph by the electromatic speed meter.

The city called three police officers who were used in apprehending the defendant. Officer Thomas Rabbitt had charge of operating the electric speed meter itself. He holds the United States Government Radio Telephone Operator's License First Class, and was a chief radioman in the Navy, and studied electrical engineering for two years at New York University.

As the defendant's green truck went by the parked car in which Thomas Rabbitt was seated operating the electromatic speed meter, Rabbitt noticed the graph indicated excessive speed. He called and motioned to officer Barnett seated in the same car that the defendant's green truck should be stopped. Officer Barnett called by telephone to officer William Burkhardt who was in another police car a quarter of a mile ahead. Officer Burkhardt stopped the defendant's green truck and issued a summons to the defendant.

At the conclusion of the city's case and at the end of the trial, the defendant moved to dismiss the information on various grounds. In support of his contentions, defendant's counsel has submitted a [\*\*\*8] brief which extensively covers the authorities on the points raised.

The argument that the wording of the ordinance in question requires the speed limit to be exceeded for a distance of one eighth of a mile before a conviction may be had was first made on a motion to dismiss the information prior to the trial. In deciding this motion the court ruled otherwise. The defendant's contentions in this respect have been disposed of in the court's opinion on the preliminary motion. No further comment is necessary here.

Defendant contends that officer Rabbitt, who directed the arrest, could not identify the defendant. The testimony showed that officer Rabbitt saw a green truck which approached and passed him at an excessive rate of speed as recorded on the speed meter's graph. This information was passed on to officer Burkhardt, who arrested the driver of the green truck, who is the defendant. The circumstances conclusively established the defendant's identity. No further identification is necessary.

[\*527] [\*\*12] Defendant's contention that the speed meter was inaccurate and unreliable is not sustained by the evidence. Dr. Kopper testified that the electromatic speed meter was [\*\*\*9] accurate to within a possible variation of one or two miles per hour. In an extreme case a diathermy machine in the immediate vicinity of the speed meter could be responsible for an error of from three or four miles per hour.

The evidence shows that the meter was calibrated or tested on the morning of the day when the defendant was ticketed by the police officers using it. A police car was run past the radar car. The reading on the speedometer of this car was compared with the recording on the graph of the electromatic speed meter. The speed meter was found to be accurate when compared with the conventional speedometer in the police car. The electromatic speed meter had been acquired some six months before the day in question by the New Rochelle police department. It had been frequently tested during the six months' period and found to be accurate.

In this case the information charging the defendant with violation of the ordinance was sworn to by the arresting officer, officer Burkhardt. He testified that the defendant's car approached him at a speed of approximately thirty-five miles per hour, so that he could be said to have personal knowledge of the violation. If the city's evidence [\*\*\*10] of speed was solely confined to the speed meter graph, it would seem that officer Rabbitt, who was operating the speed

meter, would be the logical person to swear to the information.

[HN1] The use of ordinary speedometers or other scientific devices for determining the speed of motor vehicles has long been accepted in this and other States. (*City of Spokane v. Knight*, 96 Wash. 403, 165 P. 105; *Commonwealth v. Buxton*, 205 Mass. 49, 91 N.E. 128; *Carrier v. Commonwealth*, 242 S.W.2d 633 [Ky].)

Speaking of radar speed meter in *City of Rochester v. Torpey* (204 Misc. 1023, 1026, 128 N.Y.S.2d 864), the Monroe County Court said: "The use of radar is comparatively new as a means of bringing about the arrest of violators of ordinances pertaining to the speed of automobiles and until such time as the courts recognize radar equipment as a method of accurately measuring the speed of automobiles in those cases in which The People rely solely upon the speed indicator of the radar equipment, it will be necessary to establish by expert testimony the accuracy of radar for the purpose of measuring speed."

[\*528] In *People v. Offermann* (204 Misc. 769, 125 N.Y.S.2d [\*\*\*11] 179), an Erie County Special Term reversed a judgment of conviction because there was no competent evidence as to the accuracy and reliability of the radar speed meter. Such is not the case here. On the other hand, the City Court of Yonkers in *People v. Katz* (205 Misc. 522), recently found defendant guilty on evidence [\*13] supplied by a radar or electromatic speed meter, holding the speed meter to be "a scientifically reliable device which if properly operated and properly functioning falls in the category of recognized instruments used to determine the speed of moving vehicles."

On the evidence before the court, it conclusively appears that the radar or electromatic speed meter is an accurate and reliable instrument for the measurement of velocity. It must take its place along with the ordinary mechanical speedometer as a device which accurately measures the speed of a moving vehicle. Over the years the courts have accepted the use of many scientific instruments and devices. Recently the use of a machine known as the "drunkometer" designed to measure the sobriety of those tested by it has been upheld by this court. (*People v. Spears*, 201 Misc. 666, 114 N.Y.S.2d [\*\*\*12] 869.) [HN2] The radar speed meter is no different than any other scientific device. Admissibility of tests made by it depends entirely on its accuracy and reliability.

On all the evidence, the court is convinced that the device is sufficiently accurate to make admissible the recordings made by it.

Defendant's motions to dismiss are denied and the defendant is found guilty as charged.

#### **OPINION BY:**

KENNEDY

#### **OPINION:**

[\*524] [\*\*10] The defendant, Edmund Sarver, is charged with operating a motor truck along Wilmot Road in the city of New Rochelle at a rate of speed of thirty-six miles per hour on July 30, 1953, in violation of an ordinance [\*525] which fixes the maximum rate of speed at twenty-five miles an hour.

In support of the charge of violation of the ordinance made by a police officer of the City of New Rochelle, the city has offered a graph recording made on a radar-type device which purports to measure the speed of vehicles. This device is [\*\*\*5] known as an electromatic speed meter and is manufactured by the automatic signal division of Eastern Industries, Inc., at Norwalk, Connecticut. The city offered evidence as to the manner in which the electromatic speed meter operated and as to its accuracy.

As an expert witness, Dr. John Kopper of the faculty of Johns Hopkins University was called by the city. The witness stated that he received a Doctor's degree in Electrical Engineering from Johns Hopkins University in 1944, that he practiced electrical engineering for over twenty years, and that he taught courses in electrical engineering at Johns Hopkins for twelve years. He stated the electromatic speed recorder was a radar-type of instrument which measured velocity by a radar method.

Simplifying the substance of his testimony, it may be said that the electromatic speed recorder operates in this manner: The police car from which the radar speed meter operates parks alongside of the road. A transmitter in the shape of a box is placed at the rear of the car or on the ground in back of the car facing the oncoming traffic. This transmitter sends out sound waves that strike the oncoming cars and return to a receiver which is part [\*\*\*6] of the speed meter. By measuring the change in frequency in these sound waves as they return compared with their frequency when sent out, the device is able to record the speed of an approaching car. The "zone of influence" or the zone through which the speed of the car is measured extends for approximately 30 feet and is approximately 175 feet away from the speed meter device. In other words, when the approaching car reaches a point about 175 feet away from the transmitter, the sound waves returning after hitting the approaching car, are recorded on a graph and in this way record the speed of [\*\*11] the approaching car as it passes through the "zone of influence" a distance of approximately 30 feet.

205 Misc. 523, \*525; 129 N.Y.S.2d 9, \*\*11;  
1954 N.Y. Misc. LEXIS 2346, \*\*\*6

If the oncoming car had been stopped in the "zone of influence" there would be no change in the wave frequency between transmission and reception. However, there is always a change or frequency shift between transmission and reception when the oncoming car is moving.

[\*526] The moving car coming into the stream of sound waves, makes the waves bounce back to the receiver, something in the manner in which an echo is produced. The change in their frequency indicates the rate of [\*\*\*7] speed of the approaching automobile.

A permanent record of the speed is made on a graph by the electromatic speed meter.

The city called three police officers who were used in apprehending the defendant. Officer Thomas Rabbitt had charge of operating the electric speed meter itself. He holds the United States Government Radio Telephone Operator's License First Class, and was a chief radioman in the Navy, and studied electrical engineering for two years at New York University.

As the defendant's green truck went by the parked car in which Thomas Rabbitt was seated operating the electromatic speed meter, Rabbitt noticed the graph indicated excessive speed. He called and motioned to officer Barnett seated in the same car that the defendant's green truck should be stopped. Officer Barnett called by telephone to officer William Burkhardt who was in another police car a quarter of a mile ahead. Officer Burkhardt stopped the defendant's green truck and issued a summons to the defendant.

At the conclusion of the city's case and at the end of the trial, the defendant moved to dismiss the information on various grounds. In support of his contentions, defendant's counsel has submitted a [\*\*\*8] brief which extensively covers the authorities on the points raised.

The argument that the wording of the ordinance in question requires the speed limit to be exceeded for a distance of one eighth of a mile before a conviction may be had was first made on a motion to dismiss the information prior to the trial. In deciding this motion the court ruled otherwise. The defendant's contentions in this respect have been disposed of in the court's opinion on the preliminary motion. No further comment is necessary here.

Defendant contends that officer Rabbitt, who directed the arrest, could not identify the defendant. The testimony showed that officer Rabbitt saw a green truck which approached and passed him at an excessive rate of speed as recorded on the speed meter's graph. This information was passed on to officer Burkhardt, who arrested the driver of the green truck, who is the defendant. The circumstances conclusively established the defendant's identity. No further identification is necessary.

[\*527] [\*\*12] Defendant's contention that the speed meter was inaccurate and unreliable is not sustained by the evidence. Dr. Kopper testified that the electromatic speed meter was [\*\*\*9] accurate to within a possible variation of one or two miles per hour. In an extreme case a diathermy machine in the immediate vicinity of the speed meter could be responsible for an error of from three or four miles per hour.

The evidence shows that the meter was calibrated or tested on the morning of the day when the defendant was ticketed by the police officers using it. A police car was run past the radar car. The reading on the speedometer of this car was compared with the recording on the graph of the electromatic speed meter. The speed meter was found to be accurate when compared with the conventional speedometer in the police car. The electromatic speed meter had been acquired some six months before the day in question by the New Rochelle police department. It had been frequently tested during the six months' period and found to be accurate.

In this case the information charging the defendant with violation of the ordinance was sworn to by the arresting officer, officer Burkhardt. He testified that the defendant's car approached him at a speed of approximately thirty-five miles per hour, so that he could be said to have personal knowledge of the violation. If the city's evidence [\*\*\*10] of speed was solely confined to the speed meter graph, it would seem that officer Rabbitt, who was operating the speed

205 Misc. 523, \*527; 129 N.Y.S.2d 9, \*\*12;  
1954 N.Y. Misc. LEXIS 2346, \*\*\*10

meter, would be the logical person to swear to the information.

[HN1] The use of ordinary speedometers or other scientific devices for determining the speed of motor vehicles has long been accepted in this and other States. (*City of Spokane v. Knight*, 96 Wash. 403, 165 P. 105; *Commonwealth v. Buxton*, 205 Mass. 49, 91 N.E. 128; *Carrier v. Commonwealth*, 242 S.W.2d 633 [Ky].)

Speaking of radar speed meter in *City of Rochester v. Torpey* (204 Misc. 1023, 1026, 128 N.Y.S.2d 864), the Monroe County Court said: "The use of radar is comparatively new as a means of bringing about the arrest of violators of ordinances pertaining to the speed of automobiles and until such time as the courts recognize radar equipment as a method of accurately measuring the speed of automobiles in those cases in which The People rely solely upon the speed indicator of the radar equipment, it will be necessary to establish by expert testimony the accuracy of radar for the purpose of measuring speed."

[\*528] In *People v. Offermann* (204 Misc. 769, 125 N.Y.S.2d [\*\*\*11] 179), an Erie County Special Term reversed a judgment of conviction because there was no competent evidence as to the accuracy and reliability of the radar speed meter. Such is not the case here. On the other hand, the City Court of Yonkers in *People v. Katz* (205 Misc. 522), recently found defendant guilty on evidence [\*\*13] supplied by a radar or electromatic speed meter, holding the speed meter to be "a scientifically reliable device which if properly operated and properly functioning falls in the category of recognized instruments used to determine the speed of moving vehicles."

On the evidence before the court, it conclusively appears that the radar or electromatic speed meter is an accurate and reliable instrument for the measurement of velocity. It must take its place along with the ordinary mechanical speedometer as a device which accurately measures the speed of a moving vehicle. Over the years the courts have accepted the use of many scientific instruments and devices. Recently the use of a machine known as the "drunkometer" designed to measure the sobriety of those tested by it has been upheld by this court. (*People v. Spears*, 201 Misc. 666, 114 N.Y.S.2d [\*\*\*12] 869.) [HN2] The radar speed meter is no different than any other scientific device. Admissibility of tests made by it depends entirely on its accuracy and reliability.

On all the evidence, the court is convinced that the device is sufficiently accurate to make admissible the recordings made by it.

Defendant's motions to dismiss are denied and the defendant is found guilty as charged.

**State of Ohio, Appellee v. Kenneth R. Cook, Jr., Appellant****Court of Appeals No. WD-04-029****COURT OF APPEALS OF OHIO, SIXTH APPELLATE DISTRICT, WOOD COUNTY***2006 Ohio 6062; 2006 Ohio App. LEXIS 6006***November 17, 2006, Decided**

**PRIOR HISTORY:** [\*\*1] Trial Court No. TRC-0311259A. *State v. Cook, 2005 Ohio 1550, 2005 Ohio App. LEXIS 1514 (Ohio Ct. App., Wood County, Mar. 31, 2005)*

**DISPOSITION:** JUDGMENT AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant's motion to reopen his appeal was granted by the court after it affirmed his conviction for driving with a prohibited alcohol level (DUI) and his sentence thereon. The court rendered its decision upon reopening.

**OVERVIEW:** Defendant was charged with DUI, speeding, and weaving. His motion to suppress the results of his field sobriety tests (FSTs) and BAC DataMaster test (BACD) results was denied. The trial court had determined that the police officer had correctly administered the FSTs, that the BACD machine was in proper working order, and that the officer had probable cause to arrest defendant based either on the results of the FSTs or upon the officer's own observations of defendant. Defendant thereafter entered a no contest plea and he was convicted of DUI. The first appeal resulted in an affirmance, in part, based on the presumption of regularity of the suppression proceedings, as no transcript was submitted. The court granted defendant's reopening request and the suppression transcript was filed. The court held that the trial court did not err in finding substantial compliance by the police officers involved with the applicable regulations for purposes of conducting the FSTs and the BACD. The State met its burden on a number of issues of showing proper administration and maintenance of the tests, the machinery, and the records. There was probable cause to arrest in the circumstances.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** administered, sobriety, motion to suppress, manual, probable cause to arrest, regulation, testing, calibration, machine, breath, influence of alcohol, driving, assignments of error, assignment of error, breath test, substantially complied, judicial notice, administering, standardized, alcohol, substantial compliance, strict compliance, admissible, admitting, lung, deep, packet, arrest, minute, air

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence******Criminal Law & Procedure > Trials > Burdens of Proof > Defense******Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

[HN1] The law applicable to a motion to suppress is as follows. A motion to suppress must provide a prosecutor with notice of the basis for the challenge. However, the basis need not be set forth with minute detail, only with sufficient particularity to put the prosecution on notice of the nature of the challenge. Once a defendant sets forth a sufficient basis for a motion to suppress, the burden shifts to the State to demonstrate proper compliance with the regulations involved.

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence******Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > Motions to Suppress******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN2] When reviewing a trial court's ruling on a motion to suppress, an appellate court must accept the trial court's findings of fact if they are supported by competent, credible evidence. An appellate court must independently determine, without deferring to a trial court's conclusions, whether, as a matter of law, the facts meet the applicable standard.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility******Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause******Evidence > Scientific Evidence > Sobriety Tests***

[HN3] The Supreme Court of Ohio has held that in order for the results of a field sobriety test to serve as evidence of probable cause to arrest, the police must have administered the test in strict compliance with standardized testing procedures. Subsequently, by amending *R.C. § 4511.19(D)(4)*, the Ohio General Assembly mandated a "substantial compliance" standard for the admission of field sobriety test results and their use as evidence of probable cause. The Supreme Court of Ohio has acknowledged that "substantial compliance" is now the standard.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview******Evidence > Judicial Notice > Scientific & Technical Facts******Evidence > Scientific Evidence > Sobriety Tests***

[HN4] The Ohio Second District Court of Appeals has recognized that trial courts may take judicial notice of the National Highway Traffic and Safety Administration (NHTSA) manual. A trial court may take judicial notice of the NHTSA standards governing the administration of field sobriety tests, including the horizontal gaze nystagmus (HGN) test. The applicable testing procedures in Ohio are set forth in the DWI Detection Standardized Field Sobriety Testing Student Manual published by NHTSA. These standards are not subject to reasonable dispute because they are capable of accurate and ready determination by reference to the NHTSA manual itself, a source whose accuracy cannot be questioned given its status as the seminal authority in this area. As a result, NHTSA standards governing the administration of the HGN test are subject to judicial notice under *Evid. R. 201(B)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause******Criminal Law & Procedure > Arrests > Warrantless Arrest***

[HN5] The United States Supreme Court has held that probable cause for a warrantless arrest is based on whether, at a particular moment, the facts and circumstances within a police officer's knowledge and of which the officer had reasonably trustworthy information were sufficient to warrant a prudent man in believing that a petitioner had committed an offense. In making this determination, the Ohio Supreme Court in Homan noted that while field sobriety tests must be administered in strict (now substantial) compliance with standardized procedures, probable cause to arrest does not necessarily have to be based, in whole or in part, upon a suspect's poor performance on one or more of these tests. The totality of the facts and circumstances can support a finding of probable cause to arrest even where no field sobriety tests were administered or where the test results must be excluded for lack of strict (now substantial) compliance.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***  
***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN6] Pursuant to the decision of the Supreme Court of Ohio in Edwards, judicial officials at suppression hearings may rely on hearsay and other evidence to determine whether alcohol test results were obtained in compliance with methods approved by the Ohio Director of Health, even though that evidence would not be admissible at trial.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***  
***Criminal Law & Procedure > Trials > Burdens of Proof > General Overview***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN7] It is well-established that before the results of a breathalyzer test can be admitted into evidence to establish alcohol concentration under a *R.C. § 4511.19* prosecution, the State must show that it substantially complied with the methods approved by the Ohio Director of Health (ODH) in the administration of the test. Those methods approved by the ODH are set forth in the Ohio Administrative Code. Once the State introduces evidence of substantial compliance with the applicable regulations, the burden shifts to the defendant to show that he was prejudiced by anything less than complete technical compliance with the challenged regulation.

***Criminal Law & Procedure > Trials > Burdens of Proof > General Overview***  
***Evidence > Authentication > Chain of Custody***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN8] Ohio Admin. Code 3702:53-06(A) and (B) address chain of custody issues and the requirement that laboratories successfully complete a national proficiency testing program. It is well-settled that the prosecution is not required to affirmatively demonstrate substantial compliance with every Ohio Department of Health regulation as a precondition to admitting alcohol concentration results. The prosecution's burden arises when a defendant has placed the operator's compliance with a particular regulation at issue.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN9] See Ohio Admin. Code 3701:53-02(C).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN10] As the Ohio Supreme Court has noted, the reason for waiting 20 minutes before testing a suspect with an

alcohol breath test is to eliminate the possibility that the test result is a product of anything other than the suspect's deep lung breath. Because the accuracy of the test results can be adversely affected if the suspect either ingests material orally, like food or drink, or regurgitates material internally, by belching or vomiting, the suspect must be observed for 20 minutes to verify that no external or internal material may cause a false reading. Where the testing officer waits the mandatory time period before administering the breath test, observes the suspect during that time period, and receives no indication that the breath testing device was malfunctioning, a trial court does not err in concluding that the State substantially complied with the Ohio Department of Health regulation requiring testing of deep lung breath.

**COUNSEL:** Kevin A. Heban and Gerald E. Galernik, for appellee.

Mark Gardner, for appellant.

**OPINION BY:** Mark L. Pietrykowski

**OPINION:**

#### **DECISION AND JUDGMENT ENTRY**

PIETRYKOWSKI, J.

[\*P1] This case is before the court following our decision and judgment entry of August 10, 2005, granting the motion of defendant-appellant, Kenneth R. Cook, Jr., to reopen his appeal from a judgment of the Perrysburg Municipal Court. That judgment of conviction and sentence was entered after appellant entered a plea of no contest to a charge of driving with a prohibited alcohol level.

[\*P2] The facts of this case were set forth in our decision and judgment entry of March 31, 2005, in which we affirmed appellant's conviction and sentence. See *State v. Cook, 6th Dist. No. WD-04-029, 2005 Ohio 1550*. For purposes of this reopening, however, we will restate them as follows.

[\*P3] In December 2003, appellant was charged with driving with a prohibited alcohol level ("DUI"), speeding and weaving. Appellant filed a combined motion [\*\*2] in limine, to dismiss, and to suppress on the following grounds: (1) the officer had no lawful basis to stop him and no probable cause to arrest him; (2) he was coerced into submitting to alcohol testing; (3) the alcohol testing was not conducted in accordance with applicable statutes and regulations; (4) the officer obtained statements from him in violation of his *Fifth* and *Sixth Amendment* rights; and (5) the field sobriety tests were not conducted in strict compliance with applicable standards. Appellee, the state of Ohio, opposed the motions.

[\*P4] Following a hearing, the trial court issued a decision and judgment entry denying the motion to suppress. Regarding the field sobriety tests, the court held that the arresting officer, Officer Randall Baker, administered the horizontal gaze nystagmus test and the walk and turn test in strict compliance with the standards approved by the National Highway Traffic and Safety Administration ("NHTSA") and that probable cause to arrest appellant for DUI could have been based on the results of these tests alone. Nevertheless, the court further concluded that probable cause to arrest appellant was warranted under the totality of the circumstances [\*\*3] given appellant's erratic driving, the odor of alcohol about his person, and Officer Baker's own observations of appellant's behavior, including appellant's performance on non-standardized tests. Regarding appellant's challenge to the BAC DataMaster test results, the court held that evidence admitted at the hearing demonstrated that the machine was in proper working order when the test was administered to appellant. After the lower court denied the motion to suppress, appellant pled no contest to and was convicted of the DUI charge.

[\*P5] Appellant subsequently appealed his conviction and sentence to this court in which he raised four assignments of error challenging various aspects of the trial court's denial of his motion to suppress. Under his first assignment of error, appellant challenged the trial court's admission of State's Exhibit 1 into evidence. That exhibit is a packet of documents certifying that the breath test machine (the BAC DataMaster) was functioning properly and that the officer performing the test was certified to do so. The packet also contained appellant's breath test results. The entire packet was accompanied by the affidavit of Detective Franklin Shinaver, [\*\*4] who averred that the records were true copies of documents made and kept in the ordinary course of business and were public records. Appellant argued that the lower court erred in admitting State's Exhibit 1 into evidence because admitting such evidence without live testimony violated his rights under the *confrontation clause of the Sixth and Fourteenth Amendments to the United States Constitution* and because the affidavit was not admissible under the Ohio Rules of Evidence. In our review of this assignment of error, we rejected appellant's arguments and held that the exhibit was admissible. Appellant also raised three additional assignments of error: that the state failed to introduce evidence that the breath test was properly conducted or that the machine had its calibration properly checked as required by Department of Health requirements; and that the state failed to establish probable cause to arrest appellant for driving under the influence of alcohol; and that the court erred in finding probable cause to believe that appellant was operating a vehicle under the influence of alcohol. Because the remaining assignments of error were dependent upon the transcript from the hearing [\*\*5] on the motion to suppress for resolution, and because appellant failed to file a transcript from that hearing, we presumed the regularity of the proceedings below, rejected the three assignments of error and affirmed the trial court's denial of appellant's motion to suppress.

[\*P6] In a decision and judgment entry of August 10, 2005, we granted appellant's motion to reopen his appeal for the purpose of considering the original second, third and fourth assignments of error. Appellant filed the transcript from the suppression hearing and now articulates his assignments of error as follows:

[\*P7] "Error I. The court committed substantial prejudicial error by finding that the breath testing machine was properly checked for calibration.

[\*P8] "Error II. The state failed to establish probable cause to arrest the defendant for driving under the influence of alcohol."

[\*P9] We will first address the second assignment of error in which appellant asserts that the state failed to establish that Officer Randall Baker had probable cause to arrest him for driving under the influence of alcohol and, as such, the lower court erred in denying his motion to suppress.

[\*P10] [\*\*6] [HN1] The law applicable to a motion to suppress is as follows. A motion to suppress must provide a prosecutor with notice of the basis for the challenge. *Xenia v. Wallace (1988)*, 37 Ohio St.3d 216, 524 N.E.2d 889, paragraph one of the syllabus. However, the basis need not be set forth with minute detail, only with sufficient particularity to put the prosecution on notice of the nature of the challenge. *State v. Shindler (1994)*, 70 Ohio St.3d 54, 57-58, 1994 Ohio 452, 636 N.E.2d 319. Once a defendant sets forth a sufficient basis for a motion to suppress, the burden shifts to the state to demonstrate proper compliance with the regulations involved. *State v. Johnson (2000)*, 137 Ohio App.3d 847, 851, 739 N.E.2d 1249, citing *State v. Plummer (1986)*, 22 Ohio St.3d 292, 294, 22 Ohio B. 461, 490 N.E.2d 902.

[\*P11] [HN2] When reviewing a trial court's ruling on a motion to suppress, an appellate court must accept the trial court's findings of fact if they are supported by competent, credible evidence. *State v. Guysinger (1993)*, 86 Ohio App.3d 592, 594, 621 N.E.2d 726. An appellate court must independently determine, without deferring to a trial court's conclusions, whether, as a matter of law, the facts meet the applicable [\*\*7] standard. *State v. Klein (1991)*, 73 Ohio App.3d 486, 488, 597 N.E.2d 1141.

[\*P12] In support of his assertion that Officer Baker lacked probable cause to arrest him for DUI, appellant contends that Officer Baker relied on two non-standardized field sobriety tests in determining appellant's level of

intoxication and that the state failed to establish that the standardized field sobriety tests that Officer Baker administered to him were conducted in compliance with the NHTSA standards. As such, appellant asserts that the tests could not be relied upon as a basis for establishing probable cause to arrest him for DUI.

[\*P13] In *State v. Homan (2000)*, 89 Ohio St.3d 421, 2000 Ohio 212, 732 N.E.2d 952, at paragraph one of the syllabus, [HN3] the Supreme Court of Ohio held "[i]n order for the results of a field sobriety test to serve as evidence of probable cause to arrest, the police must have administered the test in strict compliance with standardized testing procedures." Subsequently, by amending *R.C. 4511.19(D)(4)*, the General Assembly mandated a "substantial compliance" standard for the admission of field sobriety test results and their use as evidence of probable cause. The Supreme Court of Ohio has acknowledged that "substantial compliance" is now the standard. *State v. Schmitt, 101 Ohio St.3d 79, 2004 Ohio 37, at P 9, 801 N.E.2d 446*.

[\*P14] At the hearing on the motion to suppress, Officer Baker of the Rossford Police Department testified as follows. On December 4, 2003, at approximately 3:30 a.m., he was on standard patrol on I-75 in Wood County, Ohio when he observed a car traveling southbound at a high rate of speed. He then activated his radar unit and followed the car for approximately one-half to three-quarters of a mile. The radar unit indicated that the car Officer Baker was following was traveling at 77 m.p.h. in a 65 m.p.h. zone. Also over that distance, Officer Baker saw the car weave within its lane three times. Officer Baker then activated his overhead lights and pulled over the vehicle. Officer Baker approached the driver's side of the car and asked the driver, appellant, for his driver's license. As he spoke to appellant, Officer Baker noticed an odor of alcohol about appellant's person and appellant admitted that he had been drinking. While appellant remained seated in the car, Officer Baker conducted an initial horizontal gaze nystagmus ("HGN") test on him, which indicated that appellant was under the influence of alcohol. Officer Baker then removed appellant from the vehicle and readministered the HGN test while appellant was standing straight up with his head looking straight forward. Officer Baker testified that he administered the test twice on each eye, that he instructed appellant to watch his pen as he moved it in front of his eyes and that he watched appellant's eyes as appellant tried to track the pen. Officer Baker stated that in administering the test, he observed appellant's eyes drifting, that there was a lack of smooth pursuit, and that they demonstrated a nystagmus before reaching the 45 degree mark. Officer Baker also administered the portion of the test dealing with the nystagmus at maximum deviation. He testified that appellant registered all six clues on the HGN test and that based on his training and experience, he believed that appellant was under the influence of alcohol at the time he was detained.

[\*P15] Officer Baker also asked appellant to perform the walk and turn test. Officer Baker told appellant to imagine a line on the road, explained how to do the test and demonstrated the test. In performing this test, appellant went off balance when pivoting and raised his arms from his sides six inches. The impaired driver report that Officer Baker completed to document appellant's performance of the standardized tests also indicates that appellant did not touch his heel to his toe and that he stepped off of the line while walking. He did not ask appellant to perform the one legged stand test after learning that appellant had a knee problem. Finally, Officer Baker administered two non-standardized field sobriety tests, the alphabet test and the finger test. He asked appellant to recite the alphabet from A to Z. Three times, appellant stopped at the letter W and could not continue. Officer Baker demonstrated the finger test for appellant but appellant could not pass the test. Officer Baker then placed appellant under arrest for operating a motor vehicle while under the influence of alcohol.

[\*P16] Officer Baker testified that he was trained in alcohol detection at the Toledo Police Academy as well as through other courses and that in administering the field sobriety tests to appellant, he complied with those training requirements. Officer Baker further testified that the Alcohol Detention Apprehension and Prosecution ("ADAP") manual under which he was trained was consistent with the NHTSA manual. Officer Baker, however, never testified as to the NHTSA requirements, or for that matter the ADAP requirements, for the field sobriety tests that he administered, and neither manual was admitted into evidence at the hearing below. Nevertheless, during Officer Baker's testimony, appellant's counsel asked the court to take judicial notice of the NHTSA manual. After discussing the issue with the parties, the court stated that it needed to research the issue.

[\*P17] In his decision and judgment entry ruling on appellant's motion to suppress, the lower court determined that Officer Baker administered the HGN and walk and turn tests in strict compliance with the NHTSA testing methods. It therefore appears that the trial court took judicial notice of the requirements of the NHTSA manual. [HN4] The Ohio Second District Court of Appeals has recognized that trial court's may take judicial notice of the NHTSA manual. In *State v. Stritch*, 2d Dist. No. 20759, 2005 Ohio 1376, at P 16, the court held:

[\*P18] "Upon review, we now agree that [\*\*12] a trial court may take judicial notice of the NHTSA standards governing the administration of field sobriety tests, including the HGN test. In [*State v.*] *Shepard* [2d Dist. No. 2001-CA-34, 2002 Ohio 1817], we recognized that the applicable testing procedures in Ohio are set forth in the DWI Detection Standardized Field Sobriety Testing Student Manual published by NHTSA. These standards are not subject to reasonable dispute because they are capable of accurate and ready determination by reference to the NHTSA manual itself, a source whose accuracy cannot be questioned given its status as the seminal authority in this area. As a result, NHTSA standards governing the administration of the HGN test are subject to judicial notice under *Evid.R. 201(B)*."

[\*P19] See, also, *State v. Knox*, 2d Dist. No. 2005-CA-74, 2006 Ohio 3039; *State v. Radford*, 2d Dist. No. 2005-CA-58, 2006 Ohio 1610.

[\*P20] This case differs from our earlier decision in *State v. Nickelson* (July 20, 2001), 6th Dist. No. H-00-036, 2001 Ohio App. LEXIS 3261, in which we found that field sobriety tests should have been suppressed. In that case, the state introduced [\*\*13] testimony of officers as to which tests were conducted and how they were conducted but it did not introduce any evidence to prove that the tests were conducted in a standardized manner as provided by the NHTSA, no witness testified as to those guidelines, and the manual itself was not admitted. Similarly, in *State v. Purdy*, 6th Dist. No. H-04-008, 2004 Ohio 7069, we held that where an officer only testified that the field sobriety tests were conducted in accordance with his training, and the manual was not admitted into evidence to document the NHTSA guidelines, the results of the field sobriety tests should have been suppressed. The courts, however, in those cases neither expressly nor impliedly took judicial notice of the NHTSA guidelines.

[\*P21] In the present case, Officer Baker testified that he administered the standardized field sobriety tests in conformance with his training, that the manual under which he was trained was consistent with the NHTSA manual and the trial court appears to have taken judicial notice of the manual. Under these circumstances, we find that the court did not err in finding that Officer Baker substantially complied with the NHTSA [\*\*14] requirements in administering the field sobriety tests and did not err in relying on the results of those tests to find that Officer Baker had probable cause to arrest appellant for DUI.

[\*P22] Assuming arguendo that the court should have suppressed the results of the field sobriety tests, we further find that Officer Baker had probable cause to arrest appellant for DUI. In [HN5] *Beck v. Ohio* (1964), 379 U.S. 89, 91, 85 S. Ct. 223, 13 L. Ed. 2d 142, the United States Supreme Court held that probable cause for a warrantless arrest is based on " \* \* \* whether at that moment the facts and circumstances within their knowledge and of which they had reasonably trustworthy information were sufficient to warrant a prudent man in believing that the petitioner had committed the offense." In making this determination, the court in *Homan*, *supra* at 427, noted: "[w]hile field sobriety tests must be administered in strict [now substantial] compliance with standardized procedures, probable cause to arrest does not necessarily have to be based, in whole or in part, upon a suspect's poor performance on one or more of these tests. The totality of the facts and circumstances can support a finding [\*\*15] of probable cause to arrest even where no field sobriety tests were administered or where \* \* \* the test results must be excluded for lack of strict [now substantial] compliance."

[\*P23] Officer Baker testified that his decision to arrest appellant was based on all of the facts and circumstances present at that time. Those facts included that appellant was driving erratically (speeding and weaving within his lane), that appellant had an odor of alcohol about his person and admitted to drinking, and Officer Baker's general observations of appellant as appellant attempted to perform the field sobriety tests administered. Based the facts and circumstances surrounding appellant's arrest, we conclude that Officer Baker had probable cause to arrest him for DUI

and the second assignment of error is not well-taken.

[\*P24] In his first assignment of error, appellant challenges the validity of the breath test administered to him after he was arrested, and the trial court's denial of his motion to suppress the results of that test. Appellant first asserts that the documents admitted into evidence at the hearing below failed to establish that the BAC DataMaster was properly checked [\*\*16] for calibration as required by the Ohio Department of Health Regulations. More specifically, appellant asserts that State's Exhibit 1 was not certified by proper affidavit or attested to by a representative of the Ohio Department of Health and therefore should not have been given any weight by the trial court in its determination as to whether the state's chemical tests complied with the methods approved by the Director of Health.

[\*P25] Initially, we note that in our prior decision of March 31, 2005, we already determined that admitting State's Exhibit 1 did not violate appellant's right to confront witnesses against him and that Detective Shinaver's affidavit was admissible to authenticate the documents as business records. To the extent that appellant raises these issues again, we find the argument not well taken under the doctrine of res judicata and note that in granting appellant's motion to reopen his appeal, we only authorized him to raise certain issues not previously addressed.

[\*P26] Nevertheless, it is noteworthy that we recently addressed this same issue in the case of *State v. Stoner, 6th Dist. No. OT-05-042, 2006 Ohio 2122*, in which the appellant [\*\*17] argued that the calibration solution certificate for the batch and bottle was not certified and not authenticated by anyone from the Department of Health as a true copy and therefore was inadmissible. In rejecting the appellant's argument we held, *P 31*:

[\*P27] [HN6] "Pursuant to the decision of the Supreme Court of Ohio in *State v. Edwards, 107 Ohio St.3d 169, 2005 Ohio 6180, 837 N.E.2d 752*, judicial officials at suppression hearings may rely on hearsay and other evidence to determine whether alcohol test results were obtained in compliance with methods approved by the Director of Health, even though that evidence would not be admissible at trial. See also *Maumee v. Weisner (1999), 87 Ohio St.3d 295, 298, 1999 Ohio 68, 720 N.E.2d 507; United States v. Raddatz (1980), 447 U.S. 667, 679, 100 S. Ct. 2406, 65 L. Ed. 2d 424; United States v. Matlock (1974), 415 U.S. 164, 173-174, 94 S. Ct. 988, 39 L. Ed. 2d 242*. Therefore, the trial court in this case did not err by admitting into evidence the test-solution certificate to determine whether the state's chemical results complied with the director's regulations even if the Rules of Evidence governing authentication and hearsay would preclude admission of the certificate [\*\*18] at trial."

[\*P28] Appellant further argues that the results of the BAC DataMaster test administered to him should not have been admitted into evidence at the hearing below and relied upon by the lower court because the state failed to prove that it substantially complied with the regulations governing the administration of such tests.

[\*P29] [HN7] It is well-established that before the results of a breathalyzer test can be admitted into evidence to establish alcohol concentration under a *R.C. 4511.19* prosecution, the state must show that it substantially complied with the methods approved by the Ohio Director of Health ("ODH") in the administration of the test. *Defiance v. Kretz (1991), 60 Ohio St.3d 1, 3, 573 N.E.2d 32; Plummer, supra*. Those methods approved by the ODH are set forth in the Ohio Administrative Code. Once the state introduces evidence of substantial compliance with the applicable regulations, the burden shifts to the defendant to show that he was prejudiced by anything less than complete technical compliance with the challenged regulation. *Plummer, supra*.

[\*P30] Officer Baker testified at the [\*\*19] hearing below that after he arrested appellant he took him to the police station and administered a breath alcohol test using a BAC DataMaster. Officer Baker is a certified senior operator of the instrument and stated that he has used it at least 100 times. During Officer Baker's testimony, the state introduced State's Exhibit 1, the packet of documents discussed above which we determined in our earlier decision was admissible. Officer Baker testified that Officer Franklin Shinaver is the officer in charge of the BAC DataMaster and the records; that the logs are kept in the regular course of business by the Rossford Police Department; that pursuant to the logs, the machine was calibrated on November 28, 2003; that on December 4, 2003, a breath test was administered to appellant using that machine which produced a reading of .105; the test was given within two hours of appellant's

arrest; that prior to administering the test, Officer Baker observed appellant for 20 minutes; that on December 5, 2003, the machine was again calibrated using the same batch solution as was used on November 28, 2003; that the calibrations on both November 28 and December 5 were within the range of plus or [\*\*20] minus .005 grams per 210 liters of the target value for that instrument check solution; that the calibration solutions are stored in a refrigerator; and that when he administered the test to appellant there was no indication that the machine was functioning incorrectly. On cross-examination, Officer Baker stated that he was not present when the calibrations were conducted.

[\*P31] Appellant first asserts that the state failed to prove that the results of all tests, maintenance records and calibration checks documents were kept by the Rossford Police Department for a period of three years as required by *Ohio Adm. Code 3701-53-02(C)* and *3701-53-01(A)*. The record contains the affidavit of Detective Franklin Shinaver, a sergeant with the Rossford Police Department, which was attached to and authenticated State's Exhibit 1. The affidavit reads in relevant part:

[\*P32] "I, Franklin D. Shinaver, hereby certify that \* \* \* I am the custodian of all the records relating to the BAC DataMaster and the operation thereof, and that I am authorized to certify and do hereby certify that the attached are true copies of the log book [\*\*21] kept for the BAC DataMaster operated at the Rossford Police Department pursuant to the rules and regulations of the Ohio Department of Health. Other attached records and documents are routinely made and kept pursuant to and required by the rules and regulations of the Ohio Department of Health and/or requirements of the Rossford Prosecutor's Office and/or the Rossford Police Department and are maintained at the Rossford Police Department in Rossford, Wood County, Ohio."

[\*P33] By attesting that the Rossford Police Department routinely keeps and maintains the log books for the BAC DataMaster as required by the rules and regulations of the Ohio Department of Health, Shinaver essentially asserted that the records were maintained for three years as required by the Ohio Administrative Code. As such, the state introduced evidence that it had substantially complied with the applicable regulations and the burden shifted to appellant to show that he was prejudiced by anything less than strict compliance. He did not do so.

[\*P34] Appellant next asserts that the state failed to introduce evidence at the hearing below that a copy of the operator's manual for the BAC DataMaster was [\*\*22] kept at the testing location as required by *Ohio Adm. Code 3701-53-01(B)*. Although appellant's motion to suppress sufficiently raised a number of issues regarding compliance with alcohol testing to warrant a hearing, see *Purdy, supra*, including that the "machine was not properly installed pursuant to the owners and operators manual for the machine and with proper documentation maintained as required by *OAC 3701-53-06(A)* and *(B)*," it did not allege that the state failed to keep an operator's manual at the testing location. [HN8] *Ohio Adm. Code 3701-53-06(A)* and *(B)* address chain of custody issues and the requirement that laboratories successfully complete a national proficiency testing program. It is well-settled that "[t]he prosecution is not required \* \* \* to affirmatively demonstrate substantial compliance with every ODH regulation as a precondition to admitting alcohol concentration results. \* \* \* The prosecution's burden arises when the defendant has placed the operator's compliance with a particular regulation at issue." *State v. Luhrs (1990), 69 Ohio App.3d 731, 736, 591 N.E.2d 1251, 7 Anderson's Ohio App. Cas. 363* (citations omitted). Accordingly, appellant has waived [\*\*23] his right to challenge the admission of the BAC test results on this ground.

[\*P35] Appellant further asserts that there was no evidence introduced to establish that the air tested by the police was "deep lung (alveolar) air" as required by *Ohio Adm. Code 3701-53-02(C)*. That regulation reads:

[\*P36] [HN9] "Breath samples of deep lung (alveolar) air shall be analyzed for purposes of determining whether a person has a prohibited breath alcohol concentration with instruments approved under paragraphs (A) and (B) of this rule. Breath samples shall be analyzed according to the operational checklist for the instrument being used and checklist forms recording the results of subject tests shall be retained in accordance with paragraph (A) of rule *3701-53-01 of the Administrative Code*. The results shall be recorded on forms prescribed by the director of health."

[\*P37] The record reveals that appellant's breath sample was analyzed according to the operational checklist for

the BAC DataMaster and that the form used contains the seal of the Ohio Department of Health. Moreover, Officer Baker testified that when administering the test to appellant, there [\*\*24] was no indication that the machine was functioning incorrectly. In *State v. Douglas*, 4th Dist. No. C-030897, 2004 Ohio 5726, at P 9, the court discussed the requirement of "deep lung" air as follows:

[\*P38] [HN10] "As the Ohio Supreme Court noted in *State v. Steele* [(1977), 52 Ohio St.2d 187, 190, 370 N.E.2d 740], the reason for waiting twenty minutes before testing a suspect is to eliminate the possibility that the test result is a product of anything other than the suspect's deep lung breath. Because the accuracy of the test results can be adversely affected if the suspect either ingests material orally, like food or drink, or regurgitates material internally, by belching or vomiting, the suspect must be observed for twenty minutes to verify that no external or internal material may cause a false reading."

[\*P39] Where, as in the present case, the testing officer waits the mandatory time period before administering the breath test, observes the suspect during that time period, and receives no indication that the breath testing device was malfunctioning, the trial court does not err in concluding that the state substantially complied with the ODH regulation [\*\*25] requiring testing of deep lung breath. See *State v. Moss* (Mar. 15, 1996), 4th Dist. No. 95CA2089, 1996 Ohio App. LEXIS 1096.

[\*P40] Finally, appellant asserts that the state produced no evidence that the particular bottle of calibration solution used to run calibration checks on the BAC DataMaster at issue was kept refrigerated when not in use as required by *Ohio Adm.Code 3701-53-04(C)*. To the contrary, Officer Baker specifically testified that the calibration solutions are stored in the refrigerator. The state therefore demonstrated substantial compliance with *Ohio Adm.Code 3701-53-04(C)*.

[\*P41] Accordingly, the state substantially complied with the methods approved by the ODH in the administration of the breathalyzer test and the trial court did not err in denying appellant's motion to suppress the results of that test. The first assignment of error is not well-taken.

[\*P42] On consideration whereof, the court finds that appellant was not prejudiced or prevented from having a fair trial and the judgment of the Perrysburg Municipal Court is affirmed. Appellant is ordered to pay the court costs of this appeal pursuant to *App.R. 24* [\*\*26] . Judgment for the clerk's expense incurred in preparation of the record, fees allowed by law, and the fee for filing the appeal is awarded to Wood County.

JUDGMENT AFFIRMED.

A certified copy of this entry shall constitute the mandate pursuant to *App.R. 27*. See, also, *6th Dist.Loc.App.R. 4*.

**State of Ohio, Appellee v. Kenneth R. Cook, Jr., Appellant****Court of Appeals No. WD-04-029****COURT OF APPEALS OF OHIO, SIXTH APPELLATE DISTRICT, WOOD COUNTY***2006 Ohio 6062; 2006 Ohio App. LEXIS 6006***November 17, 2006, Decided**

**PRIOR HISTORY:** [\*\*1] Trial Court No. TRC-0311259A. *State v. Cook, 2005 Ohio 1550, 2005 Ohio App. LEXIS 1514 (Ohio Ct. App., Wood County, Mar. 31, 2005)*

**DISPOSITION:** JUDGMENT AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant's motion to reopen his appeal was granted by the court after it affirmed his conviction for driving with a prohibited alcohol level (DUI) and his sentence thereon. The court rendered its decision upon reopening.

**OVERVIEW:** Defendant was charged with DUI, speeding, and weaving. His motion to suppress the results of his field sobriety tests (FSTs) and BAC DataMaster test (BACD) results was denied. The trial court had determined that the police officer had correctly administered the FSTs, that the BACD machine was in proper working order, and that the officer had probable cause to arrest defendant based either on the results of the FSTs or upon the officer's own observations of defendant. Defendant thereafter entered a no contest plea and he was convicted of DUI. The first appeal resulted in an affirmance, in part, based on the presumption of regularity of the suppression proceedings, as no transcript was submitted. The court granted defendant's reopening request and the suppression transcript was filed. The court held that the trial court did not err in finding substantial compliance by the police officers involved with the applicable regulations for purposes of conducting the FSTs and the BACD. The State met its burden on a number of issues of showing proper administration and maintenance of the tests, the machinery, and the records. There was probable cause to arrest in the circumstances.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** administered, sobriety, motion to suppress, manual, probable cause to arrest, regulation, testing, calibration, machine, breath, influence of alcohol, driving, assignments of error, assignment of error, breath test, substantially complied, judicial notice, administering, standardized, alcohol, substantial compliance, strict compliance, admissible, admitting, lung, deep, packet, arrest, minute, air

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence******Criminal Law & Procedure > Trials > Burdens of Proof > Defense******Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

[HN1] The law applicable to a motion to suppress is as follows. A motion to suppress must provide a prosecutor with notice of the basis for the challenge. However, the basis need not be set forth with minute detail, only with sufficient particularity to put the prosecution on notice of the nature of the challenge. Once a defendant sets forth a sufficient basis for a motion to suppress, the burden shifts to the State to demonstrate proper compliance with the regulations involved.

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence******Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > Motions to Suppress******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN2] When reviewing a trial court's ruling on a motion to suppress, an appellate court must accept the trial court's findings of fact if they are supported by competent, credible evidence. An appellate court must independently determine, without deferring to a trial court's conclusions, whether, as a matter of law, the facts meet the applicable standard.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility******Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause******Evidence > Scientific Evidence > Sobriety Tests***

[HN3] The Supreme Court of Ohio has held that in order for the results of a field sobriety test to serve as evidence of probable cause to arrest, the police must have administered the test in strict compliance with standardized testing procedures. Subsequently, by amending *R.C. § 4511.19(D)(4)*, the Ohio General Assembly mandated a "substantial compliance" standard for the admission of field sobriety test results and their use as evidence of probable cause. The Supreme Court of Ohio has acknowledged that "substantial compliance" is now the standard.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview******Evidence > Judicial Notice > Scientific & Technical Facts******Evidence > Scientific Evidence > Sobriety Tests***

[HN4] The Ohio Second District Court of Appeals has recognized that trial courts may take judicial notice of the National Highway Traffic and Safety Administration (NHTSA) manual. A trial court may take judicial notice of the NHTSA standards governing the administration of field sobriety tests, including the horizontal gaze nystagmus (HGN) test. The applicable testing procedures in Ohio are set forth in the DWI Detection Standardized Field Sobriety Testing Student Manual published by NHTSA. These standards are not subject to reasonable dispute because they are capable of accurate and ready determination by reference to the NHTSA manual itself, a source whose accuracy cannot be questioned given its status as the seminal authority in this area. As a result, NHTSA standards governing the administration of the HGN test are subject to judicial notice under *Evid. R. 201(B)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause******Criminal Law & Procedure > Arrests > Warrantless Arrest***

[HN5] The United States Supreme Court has held that probable cause for a warrantless arrest is based on whether, at a particular moment, the facts and circumstances within a police officer's knowledge and of which the officer had reasonably trustworthy information were sufficient to warrant a prudent man in believing that a petitioner had committed an offense. In making this determination, the Ohio Supreme Court in Homan noted that while field sobriety tests must be administered in strict (now substantial) compliance with standardized procedures, probable cause to arrest does not necessarily have to be based, in whole or in part, upon a suspect's poor performance on one or more of these tests. The totality of the facts and circumstances can support a finding of probable cause to arrest even where no field sobriety tests were administered or where the test results must be excluded for lack of strict (now substantial) compliance.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***  
***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN6] Pursuant to the decision of the Supreme Court of Ohio in Edwards, judicial officials at suppression hearings may rely on hearsay and other evidence to determine whether alcohol test results were obtained in compliance with methods approved by the Ohio Director of Health, even though that evidence would not be admissible at trial.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***  
***Criminal Law & Procedure > Trials > Burdens of Proof > General Overview***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN7] It is well-established that before the results of a breathalyzer test can be admitted into evidence to establish alcohol concentration under a R.C. § 4511.19 prosecution, the State must show that it substantially complied with the methods approved by the Ohio Director of Health (ODH) in the administration of the test. Those methods approved by the ODH are set forth in the Ohio Administrative Code. Once the State introduces evidence of substantial compliance with the applicable regulations, the burden shifts to the defendant to show that he was prejudiced by anything less than complete technical compliance with the challenged regulation.

***Criminal Law & Procedure > Trials > Burdens of Proof > General Overview***  
***Evidence > Authentication > Chain of Custody***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN8] Ohio Admin. Code 3702:53-06(A) and (B) address chain of custody issues and the requirement that laboratories successfully complete a national proficiency testing program. It is well-settled that the prosecution is not required to affirmatively demonstrate substantial compliance with every Ohio Department of Health regulation as a precondition to admitting alcohol concentration results. The prosecution's burden arises when a defendant has placed the operator's compliance with a particular regulation at issue.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN9] See Ohio Admin. Code 3701:53-02(C).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***  
***Evidence > Scientific Evidence > Sobriety Tests***

[HN10] As the Ohio Supreme Court has noted, the reason for waiting 20 minutes before testing a suspect with an

alcohol breath test is to eliminate the possibility that the test result is a product of anything other than the suspect's deep lung breath. Because the accuracy of the test results can be adversely affected if the suspect either ingests material orally, like food or drink, or regurgitates material internally, by belching or vomiting, the suspect must be observed for 20 minutes to verify that no external or internal material may cause a false reading. Where the testing officer waits the mandatory time period before administering the breath test, observes the suspect during that time period, and receives no indication that the breath testing device was malfunctioning, a trial court does not err in concluding that the State substantially complied with the Ohio Department of Health regulation requiring testing of deep lung breath.

**COUNSEL:** Kevin A. Heban and Gerald E. Galernik, for appellee.

Mark Gardner, for appellant.

**JUDGES:** PIETRYKOWSKI, J. Peter M. Handwork, J., Mark L. Pietrykowski, J., Dennis M. Parish, J., CONCUR.

**OPINION BY:** Mark L. Pietrykowski

**OPINION:**

#### **DECISION AND JUDGMENT ENTRY**

PIETRYKOWSKI, J.

[\*P1] This case is before the court following our decision and judgment entry of August 10, 2005, granting the motion of defendant-appellant, Kenneth R. Cook, Jr., to reopen his appeal from a judgment of the Perrysburg Municipal Court. That judgment of conviction and sentence was entered after appellant entered a plea of no contest to a charge of driving with a prohibited alcohol level.

[\*P2] The facts of this case were set forth in our decision and judgment entry of March 31, 2005, in which we affirmed appellant's conviction and sentence. See *State v. Cook, 6th Dist. No. WD-04-029, 2005 Ohio 1550*. For purposes of this reopening, however, we will restate them as follows.

[\*P3] In December 2003, appellant was charged with driving with a prohibited alcohol level ("DUI"), speeding and weaving. Appellant filed a combined motion [\*\*2] in limine, to dismiss, and to suppress on the following grounds: (1) the officer had no lawful basis to stop him and no probable cause to arrest him; (2) he was coerced into submitting to alcohol testing; (3) the alcohol testing was not conducted in accordance with applicable statutes and regulations; (4) the officer obtained statements from him in violation of his *Fifth* and *Sixth Amendment* rights; and (5) the field sobriety tests were not conducted in strict compliance with applicable standards. Appellee, the state of Ohio, opposed the motions.

[\*P4] Following a hearing, the trial court issued a decision and judgment entry denying the motion to suppress. Regarding the field sobriety tests, the court held that the arresting officer, Officer Randall Baker, administered the horizontal gaze nystagmus test and the walk and turn test in strict compliance with the standards approved by the National Highway Traffic and Safety Administration ("NHTSA") and that probable cause to arrest appellant for DUI could have been based on the results of these tests alone. Nevertheless, the court further concluded that probable cause to arrest appellant was warranted under the totality of the circumstances [\*\*3] given appellant's erratic driving, the odor of alcohol about his person, and Officer Baker's own observations of appellant's behavior, including appellant's performance on non-standardized tests. Regarding appellant's challenge to the BAC DataMaster test results, the court held that evidence admitted at the hearing demonstrated that the machine was in proper working order when the test was administered to appellant. After the lower court denied the motion to suppress, appellant pled no contest to and was convicted of the DUI charge.

[\*P5] Appellant subsequently appealed his conviction and sentence to this court in which he raised four assignments of error challenging various aspects of the trial court's denial of his motion to suppress. Under his first assignment of error, appellant challenged the trial court's admission of State's Exhibit 1 into evidence. That exhibit is a packet of documents certifying that the breath test machine (the BAC DataMaster) was functioning properly and that the officer performing the test was certified to do so. The packet also contained appellant's breath test results. The entire packet was accompanied by the affidavit of Detective Franklin Shinaver, [\*\*4] who averred that the records were true copies of documents made and kept in the ordinary course of business and were public records. Appellant argued that the lower court erred in admitting State's Exhibit 1 into evidence because admitting such evidence without live testimony violated his rights under the *confrontation clause of the Sixth and Fourteenth Amendments to the United States Constitution* and because the affidavit was not admissible under the Ohio Rules of Evidence. In our review of this assignment of error, we rejected appellant's arguments and held that the exhibit was admissible. Appellant also raised three additional assignments of error: that the state failed to introduce evidence that the breath test was properly conducted or that the machine had its calibration properly checked as required by Department of Health requirements; and that the state failed to establish probable cause to arrest appellant for driving under the influence of alcohol; and that the court erred in finding probable cause to believe that appellant was operating a vehicle under the influence of alcohol. Because the remaining assignments of error were dependent upon the transcript from the hearing [\*\*5] on the motion to suppress for resolution, and because appellant failed to file a transcript from that hearing, we presumed the regularity of the proceedings below, rejected the three assignments of error and affirmed the trial court's denial of appellant's motion to suppress.

[\*P6] In a decision and judgment entry of August 10, 2005, we granted appellant's motion to reopen his appeal for the purpose of considering the original second, third and fourth assignments of error. Appellant filed the transcript from the suppression hearing and now articulates his assignments of error as follows:

[\*P7] "Error I. The court committed substantial prejudicial error by finding that the breath testing machine was properly checked for calibration.

[\*P8] "Error II. The state failed to establish probable cause to arrest the defendant for driving under the influence of alcohol."

[\*P9] We will first address the second assignment of error in which appellant asserts that the state failed to establish that Officer Randall Baker had probable cause to arrest him for driving under the influence of alcohol and, as such, the lower court erred in denying his motion to suppress.

[\*P10] [\*\*6] [HN1] The law applicable to a motion to suppress is as follows. A motion to suppress must provide a prosecutor with notice of the basis for the challenge. *Xenia v. Wallace (1988)*, 37 Ohio St.3d 216, 524 N.E.2d 889, paragraph one of the syllabus. However, the basis need not be set forth with minute detail, only with sufficient particularity to put the prosecution on notice of the nature of the challenge. *State v. Shindler (1994)*, 70 Ohio St.3d 54, 57-58, 1994 Ohio 452, 636 N.E.2d 319. Once a defendant sets forth a sufficient basis for a motion to suppress, the burden shifts to the state to demonstrate proper compliance with the regulations involved. *State v. Johnson (2000)*, 137 Ohio App.3d 847, 851, 739 N.E.2d 1249, citing *State v. Plummer (1986)*, 22 Ohio St.3d 292, 294, 22 Ohio B. 461, 490 N.E.2d 902.

[\*P11] [HN2] When reviewing a trial court's ruling on a motion to suppress, an appellate court must accept the trial court's findings of fact if they are supported by competent, credible evidence. *State v. Guysinger (1993)*, 86 Ohio App.3d 592, 594, 621 N.E.2d 726. An appellate court must independently determine, without deferring to a trial court's conclusions, whether, as a matter of law, the facts meet the applicable [\*\*7] standard. *State v. Klein (1991)*, 73 Ohio App.3d 486, 488, 597 N.E.2d 1141.

[\*P12] In support of his assertion that Officer Baker lacked probable cause to arrest him for DUI, appellant contends that Officer Baker relied on two non-standardized field sobriety tests in determining appellant's level of

intoxication and that the state failed to establish that the standardized field sobriety tests that Officer Baker administered to him were conducted in compliance with the NHTSA standards. As such, appellant asserts that the tests could not be relied upon as a basis for establishing probable cause to arrest him for DUI.

[\*P13] In *State v. Homan (2000)*, 89 Ohio St.3d 421, 2000 Ohio 212, 732 N.E.2d 952, at paragraph one of the syllabus, [HN3] the Supreme Court of Ohio held "[i]n order for the results of a field sobriety test to serve as evidence of probable cause to arrest, the police must have administered the test in strict compliance with standardized testing procedures." Subsequently, by amending *R.C. 4511.19(D)(4)*, the General Assembly mandated a "substantial compliance" standard for the admission of field sobriety test results and their use as evidence of probable cause. The Supreme Court of Ohio has acknowledged that "substantial compliance" is now the standard. *State v. Schmitt, 101 Ohio St.3d 79, 2004 Ohio 37, at P 9, 801 N.E.2d 446*.

[\*P14] At the hearing on the motion to suppress, Officer Baker of the Rossford Police Department testified as follows. On December 4, 2003, at approximately 3:30 a.m., he was on standard patrol on I-75 in Wood County, Ohio when he observed a car traveling southbound at a high rate of speed. He then activated his radar unit and followed the car for approximately one-half to three-quarters of a mile. The radar unit indicated that the car Officer Baker was following was traveling at 77 m.p.h. in a 65 m.p.h. zone. Also over that distance, Officer Baker saw the car weave within its lane three times. Officer Baker then activated his overhead lights and pulled over the vehicle. Officer Baker approached the driver's side of the car and asked the driver, appellant, for his driver's license. As he spoke to appellant, Officer Baker noticed an odor of alcohol about appellant's person and appellant admitted that he had been drinking. While appellant remained seated in the car, Officer Baker conducted an initial horizontal gaze nystagmus ("HGN") test on him, which indicated that appellant was under the influence of alcohol. Officer Baker then removed appellant from the vehicle and readministered the HGN test while appellant was standing straight up with his head looking straight forward. Officer Baker testified that he administered the test twice on each eye, that he instructed appellant to watch his pen as he moved it in front of his eyes and that he watched appellant's eyes as appellant tried to track the pen. Officer Baker stated that in administering the test, he observed appellant's eyes drifting, that there was a lack of smooth pursuit, and that they demonstrated a nystagmus before reaching the 45 degree mark. Officer Baker also administered the portion of the test dealing with the nystagmus at maximum deviation. He testified that appellant registered all six clues on the HGN test and that based on his training and experience, he believed that appellant was under the influence of alcohol at the time he was detained.

[\*P15] Officer Baker also asked appellant to perform the walk and turn test. Officer Baker told appellant to imagine a line on the road, explained how to do the test and demonstrated the test. In performing this test, appellant went off balance when pivoting and raised his arms from his sides six inches. The impaired driver report that Officer Baker completed to document appellant's performance of the standardized tests also indicates that appellant did not touch his heel to his toe and that he stepped off of the line while walking. He did not ask appellant to perform the one legged stand test after learning that appellant had a knee problem. Finally, Officer Baker administered two non-standardized field sobriety tests, the alphabet test and the finger test. He asked appellant to recite the alphabet from A to Z. Three times, appellant stopped at the letter W and could not continue. Officer Baker demonstrated the finger test for appellant but appellant could not pass the test. Officer Baker then placed appellant under arrest for operating a motor vehicle while under the influence of alcohol.

[\*P16] Officer Baker testified that he was trained in alcohol detection at the Toledo Police Academy as well as through other courses and that in administering the field sobriety tests to appellant, he complied with those training requirements. Officer Baker further testified that the Alcohol Detention Apprehension and Prosecution ("ADAP") manual under which he was trained was consistent with the NHTSA manual. Officer Baker, however, never testified as to the NHTSA requirements, or for that matter the ADAP requirements, for the field sobriety tests that he administered, and neither manual was admitted into evidence at the hearing below. Nevertheless, during Officer Baker's testimony, appellant's counsel asked the court to take judicial notice of the NHTSA manual. After discussing the issue with the parties, the court stated that it needed to research the issue.

[\*P17] In his decision and judgment entry ruling on appellant's motion to suppress, the lower court determined that Officer Baker administered the HGN and walk and turn tests in strict compliance with the NHTSA testing methods. It therefore appears that the trial court took judicial notice of the requirements of the NHTSA manual. [HN4] The Ohio Second District Court of Appeals has recognized that trial court's may take judicial notice of the NHTSA manual. In *State v. Stritch*, 2d Dist. No. 20759, 2005 Ohio 1376, at P 16, the court held:

[\*P18] "Upon review, we now agree that [\*\*12] a trial court may take judicial notice of the NHTSA standards governing the administration of field sobriety tests, including the HGN test. In [*State v.*] *Shepard* [2d Dist. No. 2001-CA-34, 2002 Ohio 1817], we recognized that the applicable testing procedures in Ohio are set forth in the DWI Detection Standardized Field Sobriety Testing Student Manual published by NHTSA. These standards are not subject to reasonable dispute because they are capable of accurate and ready determination by reference to the NHTSA manual itself, a source whose accuracy cannot be questioned given its status as the seminal authority in this area. As a result, NHTSA standards governing the administration of the HGN test are subject to judicial notice under *Evid.R. 201(B)*."

[\*P19] See, also, *State v. Knox*, 2d Dist. No. 2005-CA-74, 2006 Ohio 3039; *State v. Radford*, 2d Dist. No. 2005-CA-58, 2006 Ohio 1610.

[\*P20] This case differs from our earlier decision in *State v. Nickelson* (July 20, 2001), 6th Dist. No. H-00-036, 2001 Ohio App. LEXIS 3261, in which we found that field sobriety tests should have been suppressed. In that case, the state introduced [\*\*13] testimony of officers as to which tests were conducted and how they were conducted but it did not introduce any evidence to prove that the tests were conducted in a standardized manner as provided by the NHTSA, no witness testified as to those guidelines, and the manual itself was not admitted. Similarly, in *State v. Purdy*, 6th Dist. No. H-04-008, 2004 Ohio 7069, we held that where an officer only testified that the field sobriety tests were conducted in accordance with his training, and the manual was not admitted into evidence to document the NHTSA guidelines, the results of the field sobriety tests should have been suppressed. The courts, however, in those cases neither expressly nor impliedly took judicial notice of the NHTSA guidelines.

[\*P21] In the present case, Officer Baker testified that he administered the standardized field sobriety tests in conformance with his training, that the manual under which he was trained was consistent with the NHTSA manual and the trial court appears to have taken judicial notice of the manual. Under these circumstances, we find that the court did not err in finding that Officer Baker substantially complied with the NHTSA [\*\*14] requirements in administering the field sobriety tests and did not err in relying on the results of those tests to find that Officer Baker had probable cause to arrest appellant for DUI.

[\*P22] Assuming arguendo that the court should have suppressed the results of the field sobriety tests, we further find that Officer Baker had probable cause to arrest appellant for DUI. In [HN5] *Beck v. Ohio* (1964), 379 U.S. 89, 91, 85 S. Ct. 223, 13 L. Ed. 2d 142, the United States Supreme Court held that probable cause for a warrantless arrest is based on " \* \* \* whether at that moment the facts and circumstances within their knowledge and of which they had reasonably trustworthy information were sufficient to warrant a prudent man in believing that the petitioner had committed the offense." In making this determination, the court in *Homan*, *supra* at 427, noted: "[w]hile field sobriety tests must be administered in strict [now substantial] compliance with standardized procedures, probable cause to arrest does not necessarily have to be based, in whole or in part, upon a suspect's poor performance on one or more of these tests. The totality of the facts and circumstances can support a finding [\*\*15] of probable cause to arrest even where no field sobriety tests were administered or where \* \* \* the test results must be excluded for lack of strict [now substantial] compliance."

[\*P23] Officer Baker testified that his decision to arrest appellant was based on all of the facts and circumstances present at that time. Those facts included that appellant was driving erratically (speeding and weaving within his lane), that appellant had an odor of alcohol about his person and admitted to drinking, and Officer Baker's general observations of appellant as appellant attempted to perform the field sobriety tests administered. Based the facts and circumstances surrounding appellant's arrest, we conclude that Officer Baker had probable cause to arrest him for DUI

and the second assignment of error is not well-taken.

[\*P24] In his first assignment of error, appellant challenges the validity of the breath test administered to him after he was arrested, and the trial court's denial of his motion to suppress the results of that test. Appellant first asserts that the documents admitted into evidence at the hearing below failed to establish that the BAC DataMaster was properly checked [\*\*16] for calibration as required by the Ohio Department of Health Regulations. More specifically, appellant asserts that State's Exhibit 1 was not certified by proper affidavit or attested to by a representative of the Ohio Department of Health and therefore should not have been given any weight by the trial court in its determination as to whether the state's chemical tests complied with the methods approved by the Director of Health.

[\*P25] Initially, we note that in our prior decision of March 31, 2005, we already determined that admitting State's Exhibit 1 did not violate appellant's right to confront witnesses against him and that Detective Shinaver's affidavit was admissible to authenticate the documents as business records. To the extent that appellant raises these issues again, we find the argument not well taken under the doctrine of res judicata and note that in granting appellant's motion to reopen his appeal, we only authorized him to raise certain issues not previously addressed.

[\*P26] Nevertheless, it is noteworthy that we recently addressed this same issue in the case of *State v. Stoner, 6th Dist. No. OT-05-042, 2006 Ohio 2122*, in which the appellant [\*\*17] argued that the calibration solution certificate for the batch and bottle was not certified and not authenticated by anyone from the Department of Health as a true copy and therefore was inadmissible. In rejecting the appellant's argument we held, *P 31*:

[\*P27] [HN6] "Pursuant to the decision of the Supreme Court of Ohio in *State v. Edwards, 107 Ohio St.3d 169, 2005 Ohio 6180, 837 N.E.2d 752*, judicial officials at suppression hearings may rely on hearsay and other evidence to determine whether alcohol test results were obtained in compliance with methods approved by the Director of Health, even though that evidence would not be admissible at trial. See also *Maumee v. Weisner (1999), 87 Ohio St.3d 295, 298, 1999 Ohio 68, 720 N.E.2d 507; United States v. Raddatz (1980), 447 U.S. 667, 679, 100 S. Ct. 2406, 65 L. Ed. 2d 424; United States v. Matlock (1974), 415 U.S. 164, 173-174, 94 S. Ct. 988, 39 L. Ed. 2d 242*. Therefore, the trial court in this case did not err by admitting into evidence the test-solution certificate to determine whether the state's chemical results complied with the director's regulations even if the Rules of Evidence governing authentication and hearsay would preclude admission of the certificate [\*\*18] at trial."

[\*P28] Appellant further argues that the results of the BAC DataMaster test administered to him should not have been admitted into evidence at the hearing below and relied upon by the lower court because the state failed to prove that it substantially complied with the regulations governing the administration of such tests.

[\*P29] [HN7] It is well-established that before the results of a breathalyzer test can be admitted into evidence to establish alcohol concentration under a *R.C. 4511.19* prosecution, the state must show that it substantially complied with the methods approved by the Ohio Director of Health ("ODH") in the administration of the test. *Defiance v. Kretz (1991), 60 Ohio St.3d 1, 3, 573 N.E.2d 32; Plummer, supra*. Those methods approved by the ODH are set forth in the Ohio Administrative Code. Once the state introduces evidence of substantial compliance with the applicable regulations, the burden shifts to the defendant to show that he was prejudiced by anything less than complete technical compliance with the challenged regulation. *Plummer, supra*.

[\*P30] Officer Baker testified at the [\*\*19] hearing below that after he arrested appellant he took him to the police station and administered a breath alcohol test using a BAC DataMaster. Officer Baker is a certified senior operator of the instrument and stated that he has used it at least 100 times. During Officer Baker's testimony, the state introduced State's Exhibit 1, the packet of documents discussed above which we determined in our earlier decision was admissible. Officer Baker testified that Officer Franklin Shinaver is the officer in charge of the BAC DataMaster and the records; that the logs are kept in the regular course of business by the Rossford Police Department; that pursuant to the logs, the machine was calibrated on November 28, 2003; that on December 4, 2003, a breath test was administered to appellant using that machine which produced a reading of .105; the test was given within two hours of appellant's

arrest; that prior to administering the test, Officer Baker observed appellant for 20 minutes; that on December 5, 2003, the machine was again calibrated using the same batch solution as was used on November 28, 2003; that the calibrations on both November 28 and December 5 were within the range of plus or minus .005 grams per 210 liters of the target value for that instrument check solution; that the calibration solutions are stored in a refrigerator; and that when he administered the test to appellant there was no indication that the machine was functioning incorrectly. On cross-examination, Officer Baker stated that he was not present when the calibrations were conducted.

[\*P31] Appellant first asserts that the state failed to prove that the results of all tests, maintenance records and calibration checks documents were kept by the Rossford Police Department for a period of three years as required by *Ohio Adm. Code 3701-53-02(C)* and *3701-53-01(A)*. The record contains the affidavit of Detective Franklin Shinaver, a sergeant with the Rossford Police Department, which was attached to and authenticated State's Exhibit 1. The affidavit reads in relevant part:

[\*P32] "I, Franklin D. Shinaver, hereby certify that \* \* \* I am the custodian of all the records relating to the BAC DataMaster and the operation thereof, and that I am authorized to certify and do hereby certify that the attached are true copies of the log book [\*\*21] kept for the BAC DataMaster operated at the Rossford Police Department pursuant to the rules and regulations of the Ohio Department of Health. Other attached records and documents are routinely made and kept pursuant to and required by the rules and regulations of the Ohio Department of Health and/or requirements of the Rossford Prosecutor's Office and/or the Rossford Police Department and are maintained at the Rossford Police Department in Rossford, Wood County, Ohio."

[\*P33] By attesting that the Rossford Police Department routinely keeps and maintains the log books for the BAC DataMaster as required by the rules and regulations of the Ohio Department of Health, Shinaver essentially asserted that the records were maintained for three years as required by the Ohio Administrative Code. As such, the state introduced evidence that it had substantially complied with the applicable regulations and the burden shifted to appellant to show that he was prejudiced by anything less than strict compliance. He did not do so.

[\*P34] Appellant next asserts that the state failed to introduce evidence at the hearing below that a copy of the operator's manual for the BAC DataMaster was [\*\*22] kept at the testing location as required by *Ohio Adm. Code 3701-53-01(B)*. Although appellant's motion to suppress sufficiently raised a number of issues regarding compliance with alcohol testing to warrant a hearing, see *Purdy, supra*, including that the "machine was not properly installed pursuant to the owners and operators manual for the machine and with proper documentation maintained as required by *OAC 3701-53-06(A)* and *(B)*," it did not allege that the state failed to keep an operator's manual at the testing location. [HN8] *Ohio Adm. Code 3701-53-06(A)* and *(B)* address chain of custody issues and the requirement that laboratories successfully complete a national proficiency testing program. It is well-settled that "[t]he prosecution is not required \* \* \* to affirmatively demonstrate substantial compliance with every ODH regulation as a precondition to admitting alcohol concentration results. \* \* \* The prosecution's burden arises when the defendant has placed the operator's compliance with a particular regulation at issue." *State v. Luhrs (1990), 69 Ohio App.3d 731, 736, 591 N.E.2d 1251, 7 Anderson's Ohio App. Cas. 363* (citations omitted). Accordingly, appellant has waived [\*\*23] his right to challenge the admission of the BAC test results on this ground.

[\*P35] Appellant further asserts that there was no evidence introduced to establish that the air tested by the police was "deep lung (alveolar) air" as required by *Ohio Adm. Code 3701-53-02(C)*. That regulation reads:

[\*P36] [HN9] "Breath samples of deep lung (alveolar) air shall be analyzed for purposes of determining whether a person has a prohibited breath alcohol concentration with instruments approved under paragraphs (A) and (B) of this rule. Breath samples shall be analyzed according to the operational checklist for the instrument being used and checklist forms recording the results of subject tests shall be retained in accordance with paragraph (A) of rule *3701-53-01 of the Administrative Code*. The results shall be recorded on forms prescribed by the director of health."

[\*P37] The record reveals that appellant's breath sample was analyzed according to the operational checklist for

the BAC DataMaster and that the form used contains the seal of the Ohio Department of Health. Moreover, Officer Baker testified that when administering the test to appellant, there [\*\*24] was no indication that the machine was functioning incorrectly. In *State v. Douglas, 4th Dist. No. C-030897, 2004 Ohio 5726, at P 9*, the court discussed the requirement of "deep lung" air as follows:

[\*P38] [HN10] "As the Ohio Supreme Court noted in *State v. Steele [(1977), 52 Ohio St.2d 187, 190, 370 N.E.2d 740]*, the reason for waiting twenty minutes before testing a suspect is to eliminate the possibility that the test result is a product of anything other than the suspect's deep lung breath. Because the accuracy of the test results can be adversely affected if the suspect either ingests material orally, like food or drink, or regurgitates material internally, by belching or vomiting, the suspect must be observed for twenty minutes to verify that no external or internal material may cause a false reading."

[\*P39] Where, as in the present case, the testing officer waits the mandatory time period before administering the breath test, observes the suspect during that time period, and receives no indication that the breath testing device was malfunctioning, the trial court does not err in concluding that the state substantially complied with the ODH regulation [\*\*25] requiring testing of deep lung breath. See *State v. Moss (Mar. 15, 1996), 4th Dist. No. 95CA2089, 1996 Ohio App. LEXIS 1096*.

[\*P40] Finally, appellant asserts that the state produced no evidence that the particular bottle of calibration solution used to run calibration checks on the BAC DataMaster at issue was kept refrigerated when not in use as required by *Ohio Adm.Code 3701-53-04(C)*. To the contrary, Officer Baker specifically testified that the calibration solutions are stored in the refrigerator. The state therefore demonstrated substantial compliance with *Ohio Adm.Code 3701-53-04(C)*.

[\*P41] Accordingly, the state substantially complied with the methods approved by the ODH in the administration of the breathalyzer test and the trial court did not err in denying appellant's motion to suppress the results of that test. The first assignment of error is not well-taken.

[\*P42] On consideration whereof, the court finds that appellant was not prejudiced or prevented from having a fair trial and the judgment of the Perrysburg Municipal Court is affirmed. Appellant is ordered to pay the court costs of this appeal pursuant to *App.R. 24 [\*\*26]* . Judgment for the clerk's expense incurred in preparation of the record, fees allowed by law, and the fee for filing the appeal is awarded to Wood County.

JUDGMENT AFFIRMED.

A certified copy of this entry shall constitute the mandate pursuant to *App.R. 27*. See, also, *6th Dist.Loc.App.R. 4*.

**STATE OF OHIO, Plaintiff-Appellee, - vs - SARAH M. PERL,**

**CASE NO. 2006-L-082**

**COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT, LAKE  
COUNTY**

*2006 Ohio 6100; 2006 Ohio App. LEXIS 6026*

**November 17, 2006, Decided**

**PRIOR HISTORY:** [\*\*1] Criminal Appeal from the Painesville Municipal Court, Case No. 06 TRC 01134.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of the judgment of the Painesville Municipal Court (Ohio), which convicted her of operating a vehicle in excess of the posted speed limit and operating a motor vehicle while under the influence of alcohol. Defendant contended that the trial court erred in overruling her motion to suppress.

**OVERVIEW:** At the hearing on defendant's motion to suppress, a state trooper testified that he observed a vehicle traveling 13 miles per hour over the posted speed limit. The trooper stopped the vehicle, and upon defendant's admission that she had consumed alcohol, the trooper conducted various field sobriety tests. The trooper testified that defendant failed the tests. At the conclusion of the hearing, the trial court overruled the majority of defendant's motion to suppress. On appeal, defendant challenged the trooper's five-step demonstration of the walk-and-turn test as opposed to the nine-step requirement for the actual test. However, the trooper testified that, although he only demonstrated five steps, he advised defendant that, in order to complete the test, she would need to perform nine steps. *R.C. § 4511.19* required that the administration, not the demonstration, of field sobriety tests be conducted in substantial compliance with the national standards. While the trooper did not bring his radar certification with him to the suppression hearing, he was not required to do so because there was no evidence that defendant subpoenaed the certificate from the trooper.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** trooper, motion to suppress, radar, suppression hearing, demonstration, certification, substantially complied, assignment of error, field-sobriety, sobriety, manual, motion to dismiss, investigatory, cross-examination, walk-and-turn, calibration, calibrated, complied, evening, substantial compliance, strict compliance, underlying case, police officer, initial stop, articulable, hunch, speed, odor of alcohol, probable cause, traffic stop

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence*

*Criminal Law & Procedure > Appeals > Deferential Review > Credibility & Demeanor Determinations*

***Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > Motions to Suppress***

[HN1] An appellate court reviews a ruling on a motion to suppress giving due deference to the trial court's assignment of weight and inferences drawn from the evidence. The appellate court must accept the trial court's factual determinations when they are supported by competent and credible evidence. However, the appellate court reviews the application of the law to those facts pursuant to a de novo standard.

***Constitutional Law > Bill of Rights > Fundamental Rights > Search & Seizure > Probable Cause******Criminal Law & Procedure > Search & Seizure > Seizures of Persons******Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN2] The investigative stop exception to the Fourth Amendment warrant requirement allows a police officer to stop an individual if the officer has a reasonable suspicion, based upon specific and articulable facts, that criminal behavior has occurred or is imminent. Investigatory stops based on "hunches" are invalid stops as they are not based on articulable facts. However, observation of traffic violations extend beyond an investigatory stop; they constitute probable cause. When a police officer witnesses a motorist in transit commit a traffic violation, the officer has probable cause to stop the vehicle for the purpose of issuing a citation.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Procedures***

[HN3] *R.C. § 4511.19* requires that the administration, not the demonstration, of field-sobriety tests be conducted in substantial compliance with the National Highway Transportation Safety Administration standards. § 4511.19(D)(4)(b).

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN4] A motion to suppress must state its legal and factual bases with sufficient particularity to notify the prosecutor and the court of the issues to be decided.

**COUNSEL:** Joseph M. Gurley, Painesville City Law Director, Painesville, OH (For Plaintiff-Appellee).

Sandra A. Dray, Painesville, OH (For Defendant-Appellant).

**JUDGES:** CYNTHIA WESTCOTT RICE, J. DONALD R. FORD, P.J., concurs, COLLEEN MARY O'TOOLE, J., concurs in judgment only.

**OPINION BY:** CYNTHIA WESTCOTT RICE

**OPINION:** CYNTHIA WESTCOTT RICE, J.

[\*P1] Appellant, Sarah M. Perl, pleaded no contest to operating a vehicle in excess of the posted speed limit in violation of *R.C. 4511.21(C)* and operating a motor vehicle while under the influence of alcohol in violation of *R.C. 4511.19(A)(1)(a)*. Appellant was found guilty of both violations by the Painesville Municipal Court. Prior to the plea, appellant had filed a motion to suppress/motion to dismiss on March 31, 2006. The trial court denied the motion in part and granted the motion in part. Appellant appeals the denial of the remaining portion of appellant's motion to suppress. For the reasons that follow, we affirm.

[\*P2] Appellant's motion to suppress/motion to dismiss was based on the argument that [\*\*2] the stop, detention and arrest of appellant was without probable cause and in violation of appellant's Fourth and Fourteenth Amendment rights. A hearing on appellant's motion to suppress was held at the trial court on April 3, 2006. At the hearing, Trooper Kevin Harris, Ohio State Highway Patrol, testified that on February 17, 2006 at approximately 1:00 in the morning, he was driving west on Route 84 when he observed a vehicle traveling east at what he perceived to be a high rate of speed. Trooper Harris used his radar equipment and clocked the vehicle driving at 48 miles per hour in a 35 mile per hour

zone. n1 Based on these observations, Trooper Harris initiated a traffic stop of the vehicle.

n1 Trooper Harris also testified that he had calibrated the radar instrument at the beginning of his shift that evening. According to the trooper, the calibration revealed the equipment was functioning properly.

[\*P3] The trooper further testified that during his initial contact with the driver, appellant herein, [\*\*3] the trooper detected a "strong odor of alcohol." Appellant exited the vehicle upon the trooper's request. Trooper Harris informed appellant that he detected an odor of alcohol. At that point, appellant admitted to Trooper Harris that she had consumed "three beers and a shot" that evening.

[\*P4] The trooper then conducted a series of field sobriety tests; namely the Horizontal Gaze Nystagmus (HGN), the one-leg-stand and the walk-and-turn tests. As to the HGN, the trooper testified that he was familiar with the National Highway Traffic Safety Administration (NHTSA) standards and identified exhibit three as the written compliance standards and methods for the HGN. However, on cross-examination, the trooper could not identify the standards for the HGN test, although he maintained that he had substantially complied with those standards.

[\*P5] The trooper also identified exhibits one and two, the NHTSA standards for the other tests. However, these exhibits were never admitted into evidence. Trooper Harris described the requirements of the NHTSA and testified that he complied with those standards when directing appellant to perform the three field sobriety tests. According to [\*\*4] the trooper, appellant failed each of the three tests. Trooper Harris testified on cross-examination that he substantially complied with the NHTSA standards for the one-leg-stand test by demonstrating to appellant how to perform the test. He also testified that he complied with NHTSA standards for the walk-and-turn test by demonstrating the test through five step seven though the test requires nine steps. n2 Trooper Harris testified he advised appellant she would be required to take nine steps as opposed to his five steps of demonstration.

n2 During the suppression hearing, a videotape was played which depicted a portion of the field sobriety tests conducted on appellant as well as the trooper's demonstration.

[\*P6] At the close of the suppression hearing, the court found that there was sufficient evidence to stop appellant for speeding. The court also found that the trooper had substantially complied with the field sobriety test standards, with the exception of the HGN test. Therefore, the court granted [\*\*5] the motion to suppress in regard to the HGN test and overruled the motion as to the additional evidence.

[\*P7] Appellant's single assignment of error is:

[\*P8] "[1.] BASED ON THE TESTIMONY OF THE TROOPER AT THE HEARING, THE TRIAL COURT ERRED IN ITS FAILURE TO GRANT THE APPELLANT'S MOTION TO SUPPRESS THE EVIDENCE AND DISMISS THE CASE."

[\*P9] We [HN1] review a ruling on a motion to suppress giving due deference to the trial court's assignment of weight and inferences drawn from the evidence. *State v. Hummel*, 154 Ohio App.3d 123, 2003 Ohio 4602, at P11, 796 N.E.2d 558. "We must accept the trial court's factual determinations when they are supported by competent and credible evidence." *Id.* However, we review the application of the law to those facts pursuant to a de novo standard. *Id.*

[\*P10] Appellant claims that the initial stop of her vehicle was a "fishing expedition" and was not based on legally sufficient facts to justify an investigatory stop. [HN2] "The investigatory stop exception to the Fourth Amendment warrant requirement allows a police officer to stop an individual if the officer has a reasonable suspicion, based upon specific and articulable facts, that criminal [\*\*6] behavior has occurred or is imminent." *State v. Gedeon* (1992), 81

*Ohio App.3d 617, 618, 611 N.E.2d 972*, see, also, *Terry v. Ohio (1968)*, 392 U.S. 1, 88 S. Ct. 1868, 20 L. Ed. 2d 889. Appellant is correct that investigatory stops based on "hunches" are invalid stops as they are not based on articulable facts. *State v. Rucker (1990)*, 63 Ohio App.3d 762, 580 N.E.2d 59. However, there is nothing in the record to support appellant's contention that the initial traffic stop of appellant's vehicle was based on the hunch of Trooper Harris that something foul was afoot. On the contrary, the testimony at the suppression hearing showed that Trooper Harris observed appellant's vehicle traveling at a perceived high rate of speed which was then confirmed by a properly calibrated radar instrument. n3 Observation of traffic violations extend beyond an investigatory stop; they constitute probable cause. "[W]hen a police officer witnesses a motorist in transit commit a traffic violation, the officer has probable cause to stop the vehicle for the purpose of issuing a citation." *State v. Teter (Oct. 6, 2000)*, 11th Dist. No. 99-A-0073, 2000 Ohio App. LEXIS 4656, \*10; see, also, [\*\*7] *State v. Graham, 11th Dist. No. 2005-P-0096, 2006 Ohio 4184, at P15*. Therefore, we conclude that the initial stop of appellant's vehicle was lawful.

n3 The trooper testified at the hearing that he was certified to conduct calibration checks on the radar equipment used in this instance. He further testified that he had calibrated this specific instrument at the beginning of his shift. According to the trooper, the calibration revealed the instrument "\*\*\* passed internal function and tuning fork\*\*\*.

[\*P11] During his initial contact with appellant, Trooper Harris noted that she had red and bloodshot eyes. There was no notation of slurred speech. Trooper Harris requested appellant exit the vehicle. She complied and indicated to the trooper that she had consumed "three beers and a shot" that evening.

[\*P12] Trooper Harris then proceeded to administer the field-sobriety tests. Appellant challenged the administration of these tests. Specifically, appellant asserts on appeal that the prosecution's [\*\*8] failure to admit the NHTSA manuals as exhibits was a fatal flaw. During the prosecution's case-in-chief, Trooper Harris identified the NHTSA manual for each field-sobriety test. These manuals were provided to the trooper in the form of exhibits one, two and three. There was no objection to these exhibits, however, they were not admitted into evidence.

[\*P13] Appellant compares these facts to those present in *State v. Brown, 166 Ohio App.3d 638, 166 Ohio App. 3d 638, 2006 Ohio 1172, 852 N.E.2d 1228*, wherein this court reversed the trial court's denial of " a motion to suppress. We conclude the facts sub judice are not on the same page with the facts present in *Brown*. n4 First, unlike in *Brown*, Trooper Harris did identify the NHTSA manual. Second, Trooper Harris explained the requirements of the NHTSA as it relates to the administered tests. Third, Trooper Harris did testify that he substantially complied with the standards of the NHTSA in administering the tests. n5

n4 Likewise, the facts in the underlying case are also distinguishable from *State v. Nickelson (July 20, 2001)*, 6th Dist. No. H-00-036, 2001 Ohio App. LEXIS 3261. The facts in *Nickelson* are akin to those present in *Brown* where there was no testimony whatsoever regarding the NHTSA standards or compliance with those standards.

[\*\*9]

n5 We confine our review of appellant's assignment of error to the trial court's denial of the motion to suppress and therefore do not address the trial court's decision to grant appellant's motion to suppress as to the HGN test.

[\*P14] More importantly, appellant does not challenge the administration of the field-sobriety tests on appeal as noncompliant with the NHTSA standards. Rather, appellant challenges the demonstration procedures utilized by

Trooper Harris in preparation for the administration of these tests. Specifically, appellant challenges the trooper's five-step demonstration of the walk-and-turn test as opposed to the nine-step requirement for the actual test. Trooper Harris testified that although he only demonstrated five steps for appellant, he advised her that in order to complete the test, she would need to perform nine steps. [HN3] *R.C. 4511.19* requires that the administration, not the demonstration, of field-sobriety tests be conducted in substantial compliance with the NHTSA standards. n6 See, *R.C. 4511.19(D)(4)(b)*.

n6 Actually, appellant argues throughout her brief that strict compliance is the required standard for administration of field sobriety tests. As we stated in *Brown*, supra, *R.C. 4511.19* was amended effective April 9, 2003 and no longer requires strict compliance. Rather, the proper standard is substantial compliance.

[\*\*10]

[\*P15] Appellant takes issue with the fact that Trooper Harris failed to bring his radar certification with him to the suppression hearing. Appellant cites no proper authority for this argument. Trooper Harris did testify that he was certified to use the Python radar, the same radar in the patrol car. Furthermore, we note that appellant did not raise a radar certification issue in her motion to suppress/motion to dismiss. [HN4] "A motion to suppress must state its legal and factual bases with sufficient particularity to notify the prosecutor and the court of the issues to be decided." *State v. Duncan*, 11th Dist. No. 2004-L-065, 2005 Ohio 7061, at P17. Furthermore, a review of the record shows that appellant's counsel did not raise an objection to the trooper's radar qualifications at trial. Certainly, counsel questioned the trooper regarding the certification on cross-examination, yet failed to lodge a complaint that he was not qualified. During this line of questioning, the trooper stated that he was certified on the same type of equipment that was used in the underlying case. In addition, there is no evidence that appellant subpoenaed the certification from the trooper. [\*\*11] Therefore, the trooper was not required to bring any documentation with him to the suppression hearing.

[\*P16] Appellant's single assignment of error is without merit.

[\*P17] For the reasons stated in the Opinion of this court, the assignment of error is not well taken. It is the judgment and order of this court that the judgment of the Painesville Municipal Court is affirmed.

STATE OF OHIO, Plaintiff-Appellee, - vs - SARAH M. PERL,

CASE NO. 2006-L-082

COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT, LAKE  
COUNTY*2006 Ohio 6100; 2006 Ohio App. LEXIS 6026*

November 17, 2006, Decided

**PRIOR HISTORY:** [\*\*1] Criminal Appeal from the Painesville Municipal Court, Case No. 06 TRC 01134.**DISPOSITION:** Affirmed.**CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant sought review of the judgment of the Painesville Municipal Court (Ohio), which convicted her of operating a vehicle in excess of the posted speed limit and operating a motor vehicle while under the influence of alcohol. Defendant contended that the trial court erred in overruling her motion to suppress.**OVERVIEW:** At the hearing on defendant's motion to suppress, a state trooper testified that he observed a vehicle traveling 13 miles per hour over the posted speed limit. The trooper stopped the vehicle, and upon defendant's admission that she had consumed alcohol, the trooper conducted various field sobriety tests. The trooper testified that defendant failed the tests. At the conclusion of the hearing, the trial court overruled the majority of defendant's motion to suppress. On appeal, defendant challenged the trooper's five-step demonstration of the walk-and-turn test as opposed to the nine-step requirement for the actual test. However, the trooper testified that, although he only demonstrated five steps, he advised defendant that, in order to complete the test, she would need to perform nine steps. *R.C. § 4511.19* required that the administration, not the demonstration, of field sobriety tests be conducted in substantial compliance with the national standards. While the trooper did not bring his radar certification with him to the suppression hearing, he was not required to do so because there was no evidence that defendant subpoenaed the certificate from the trooper.**OUTCOME:** The court affirmed the judgment of the trial court.**CORE TERMS:** trooper, motion to suppress, radar, suppression hearing, demonstration, certification, substantially complied, assignment of error, field-sobriety, sobriety, manual, motion to dismiss, investigatory, cross-examination, walk-and-turn, calibration, calibrated, complied, evening, substantial compliance, strict compliance, underlying case, police officer, initial stop, articulable, hunch, speed, odor of alcohol, probable cause, traffic stop**LexisNexis(R) Headnotes***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence**Criminal Law & Procedure > Appeals > Deferential Review > Credibility & Demeanor Determinations*

***Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > Motions to Suppress***

[HN1] An appellate court reviews a ruling on a motion to suppress giving due deference to the trial court's assignment of weight and inferences drawn from the evidence. The appellate court must accept the trial court's factual determinations when they are supported by competent and credible evidence. However, the appellate court reviews the application of the law to those facts pursuant to a de novo standard.

***Constitutional Law > Bill of Rights > Fundamental Rights > Search & Seizure > Probable Cause******Criminal Law & Procedure > Search & Seizure > Seizures of Persons******Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN2] The investigative stop exception to the Fourth Amendment warrant requirement allows a police officer to stop an individual if the officer has a reasonable suspicion, based upon specific and articulable facts, that criminal behavior has occurred or is imminent. Investigatory stops based on "hunches" are invalid stops as they are not based on articulable facts. However, observation of traffic violations extend beyond an investigatory stop; they constitute probable cause. When a police officer witnesses a motorist in transit commit a traffic violation, the officer has probable cause to stop the vehicle for the purpose of issuing a citation.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Procedures***

[HN3] *R.C. § 4511.19* requires that the administration, not the demonstration, of field-sobriety tests be conducted in substantial compliance with the National Highway Transportation Safety Administration standards. § 4511.19(D)(4)(b).

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN4] A motion to suppress must state its legal and factual bases with sufficient particularity to notify the prosecutor and the court of the issues to be decided.

**COUNSEL:** Joseph M. Gurley, Painesville City Law Director, Painesville, OH (For Plaintiff-Appellee).

Sandra A. Dray, Painesville, OH (For Defendant-Appellant).

**JUDGES:** CYNTHIA WESTCOTT RICE, J. DONALD R. FORD, P.J., concurs, COLLEEN MARY O'TOOLE, J., concurs in judgment only.

**OPINION BY:** CYNTHIA WESTCOTT RICE

**OPINION:** CYNTHIA WESTCOTT RICE, J.

[\*P1] Appellant, Sarah M. Perl, pleaded no contest to operating a vehicle in excess of the posted speed limit in violation of *R.C. 4511.21(C)* and operating a motor vehicle while under the influence of alcohol in violation of *R.C. 4511.19(A)(1)(a)*. Appellant was found guilty of both violations by the Painesville Municipal Court. Prior to the plea, appellant had filed a motion to suppress/motion to dismiss on March 31, 2006. The trial court denied the motion in part and granted the motion in part. Appellant appeals the denial of the remaining portion of appellant's motion to suppress. For the reasons that follow, we affirm.

[\*P2] Appellant's motion to suppress/motion to dismiss was based on the argument that [\*\*2] the stop, detention and arrest of appellant was without probable cause and in violation of appellant's Fourth and Fourteenth Amendment rights. A hearing on appellant's motion to suppress was held at the trial court on April 3, 2006. At the hearing, Trooper Kevin Harris, Ohio State Highway Patrol, testified that on February 17, 2006 at approximately 1:00 in the morning, he was driving west on Route 84 when he observed a vehicle traveling east at what he perceived to be a high rate of speed. Trooper Harris used his radar equipment and clocked the vehicle driving at 48 miles per hour in a 35 mile per hour

zone. n1 Based on these observations, Trooper Harris initiated a traffic stop of the vehicle.

n1 Trooper Harris also testified that he had calibrated the radar instrument at the beginning of his shift that evening. According to the trooper, the calibration revealed the equipment was functioning properly.

[\*P3] The trooper further testified that during his initial contact with the driver, appellant herein, [\*\*3] the trooper detected a "strong odor of alcohol." Appellant exited the vehicle upon the trooper's request. Trooper Harris informed appellant that he detected an odor of alcohol. At that point, appellant admitted to Trooper Harris that she had consumed "three beers and a shot" that evening.

[\*P4] The trooper then conducted a series of field sobriety tests; namely the Horizontal Gaze Nystagmus (HGN), the one-leg-stand and the walk-and-turn tests. As to the HGN, the trooper testified that he was familiar with the National Highway Traffic Safety Administration (NHTSA) standards and identified exhibit three as the written compliance standards and methods for the HGN. However, on cross-examination, the trooper could not identify the standards for the HGN test, although he maintained that he had substantially complied with those standards.

[\*P5] The trooper also identified exhibits one and two, the NHTSA standards for the other tests. However, these exhibits were never admitted into evidence. Trooper Harris described the requirements of the NHTSA and testified that he complied with those standards when directing appellant to perform the three field sobriety tests. According to [\*\*4] the trooper, appellant failed each of the three tests. Trooper Harris testified on cross-examination that he substantially complied with the NHTSA standards for the one-leg-stand test by demonstrating to appellant how to perform the test. He also testified that he complied with NHTSA standards for the walk-and-turn test by demonstrating the test through five step seven though the test requires nine steps. n2 Trooper Harris testified he advised appellant she would be required to take nine steps as opposed to his five steps of demonstration.

n2 During the suppression hearing, a videotape was played which depicted a portion of the field sobriety tests conducted on appellant as well as the trooper's demonstration.

[\*P6] At the close of the suppression hearing, the court found that there was sufficient evidence to stop appellant for speeding. The court also found that the trooper had substantially complied with the field sobriety test standards, with the exception of the HGN test. Therefore, the court granted [\*\*5] the motion to suppress in regard to the HGN test and overruled the motion as to the additional evidence.

[\*P7] Appellant's single assignment of error is:

[\*P8] "[1.] BASED ON THE TESTIMONY OF THE TROOPER AT THE HEARING, THE TRIAL COURT ERRED IN ITS FAILURE TO GRANT THE APPELLANT'S MOTION TO SUPPRESS THE EVIDENCE AND DISMISS THE CASE."

[\*P9] We [HN1] review a ruling on a motion to suppress giving due deference to the trial court's assignment of weight and inferences drawn from the evidence. *State v. Hummel*, 154 Ohio App.3d 123, 2003 Ohio 4602, at P11, 796 N.E.2d 558. "We must accept the trial court's factual determinations when they are supported by competent and credible evidence." *Id.* However, we review the application of the law to those facts pursuant to a de novo standard. *Id.*

[\*P10] Appellant claims that the initial stop of her vehicle was a "fishing expedition" and was not based on legally sufficient facts to justify an investigatory stop. [HN2] "The investigatory stop exception to the Fourth Amendment warrant requirement allows a police officer to stop an individual if the officer has a reasonable suspicion, based upon specific and articulable facts, that criminal [\*\*6] behavior has occurred or is imminent." *State v. Gedeon* (1992), 81

*Ohio App.3d 617, 618, 611 N.E.2d 972*, see, also, *Terry v. Ohio (1968)*, 392 U.S. 1, 88 S. Ct. 1868, 20 L. Ed. 2d 889. Appellant is correct that investigatory stops based on "hunches" are invalid stops as they are not based on articulable facts. *State v. Rucker (1990)*, 63 Ohio App.3d 762, 580 N.E.2d 59. However, there is nothing in the record to support appellant's contention that the initial traffic stop of appellant's vehicle was based on the hunch of Trooper Harris that something foul was afoot. On the contrary, the testimony at the suppression hearing showed that Trooper Harris observed appellant's vehicle traveling at a perceived high rate of speed which was then confirmed by a properly calibrated radar instrument. n3 Observation of traffic violations extend beyond an investigatory stop; they constitute probable cause. "[W]hen a police officer witnesses a motorist in transit commit a traffic violation, the officer has probable cause to stop the vehicle for the purpose of issuing a citation." *State v. Teter (Oct. 6, 2000)*, 11th Dist. No. 99-A-0073, 2000 Ohio App. LEXIS 4656, \*10; see, also, [\*\*7] *State v. Graham, 11th Dist. No. 2005-P-0096, 2006 Ohio 4184, at P15*. Therefore, we conclude that the initial stop of appellant's vehicle was lawful.

n3 The trooper testified at the hearing that he was certified to conduct calibration checks on the radar equipment used in this instance. He further testified that he had calibrated this specific instrument at the beginning of his shift. According to the trooper, the calibration revealed the instrument "\*\*\* passed internal function and tuning fork\*\*\*.

[\*P11] During his initial contact with appellant, Trooper Harris noted that she had red and bloodshot eyes. There was no notation of slurred speech. Trooper Harris requested appellant exit the vehicle. She complied and indicated to the trooper that she had consumed "three beers and a shot" that evening.

[\*P12] Trooper Harris then proceeded to administer the field-sobriety tests. Appellant challenged the administration of these tests. Specifically, appellant asserts on appeal that the prosecution's [\*\*8] failure to admit the NHTSA manuals as exhibits was a fatal flaw. During the prosecution's case-in-chief, Trooper Harris identified the NHTSA manual for each field-sobriety test. These manuals were provided to the trooper in the form of exhibits one, two and three. There was no objection to these exhibits, however, they were not admitted into evidence.

[\*P13] Appellant compares these facts to those present in *State v. Brown, 166 Ohio App.3d 638, 166 Ohio App. 3d 638, 2006 Ohio 1172, 852 N.E.2d 1228*, wherein this court reversed the trial court's denial of " a motion to suppress. We conclude the facts sub judice are not on the same page with the facts present in *Brown*. n4 First, unlike in *Brown*, Trooper Harris did identify the NHTSA manual. Second, Trooper Harris explained the requirements of the NHTSA as it relates to the administered tests. Third, Trooper Harris did testify that he substantially complied with the standards of the NHTSA in administering the tests. n5

n4 Likewise, the facts in the underlying case are also distinguishable from *State v. Nickelson (July 20, 2001)*, 6th Dist. No. H-00-036, 2001 Ohio App. LEXIS 3261. The facts in *Nickelson* are akin to those present in *Brown* where there was no testimony whatsoever regarding the NHTSA standards or compliance with those standards.

[\*\*9]

n5 We confine our review of appellant's assignment of error to the trial court's denial of the motion to suppress and therefore do not address the trial court's decision to grant appellant's motion to suppress as to the HGN test.

[\*P14] More importantly, appellant does not challenge the administration of the field-sobriety tests on appeal as noncompliant with the NHTSA standards. Rather, appellant challenges the demonstration procedures utilized by

Trooper Harris in preparation for the administration of these tests. Specifically, appellant challenges the trooper's five-step demonstration of the walk-and-turn test as opposed to the nine-step requirement for the actual test. Trooper Harris testified that although he only demonstrated five steps for appellant, he advised her that in order to complete the test, she would need to perform nine steps. [HN3] *R.C. 4511.19* requires that the administration, not the demonstration, of field-sobriety tests be conducted in substantial compliance with the NHTSA standards. n6 See, *R.C. 4511.19(D)(4)(b)*.

n6 Actually, appellant argues throughout her brief that strict compliance is the required standard for administration of field sobriety tests. As we stated in *Brown*, supra, *R.C. 4511.19* was amended effective April 9, 2003 and no longer requires strict compliance. Rather, the proper standard is substantial compliance.

[\*\*10]

[\*P15] Appellant takes issue with the fact that Trooper Harris failed to bring his radar certification with him to the suppression hearing. Appellant cites no proper authority for this argument. Trooper Harris did testify that he was certified to use the Python radar, the same radar in the patrol car. Furthermore, we note that appellant did not raise a radar certification issue in her motion to suppress/motion to dismiss. [HN4] "A motion to suppress must state its legal and factual bases with sufficient particularity to notify the prosecutor and the court of the issues to be decided." *State v. Duncan*, 11th Dist. No. 2004-L-065, 2005 Ohio 7061, at P17. Furthermore, a review of the record shows that appellant's counsel did not raise an objection to the trooper's radar qualifications at trial. Certainly, counsel questioned the trooper regarding the certification on cross-examination, yet failed to lodge a complaint that he was not qualified. During this line of questioning, the trooper stated that he was certified on the same type of equipment that was used in the underlying case. In addition, there is no evidence that appellant subpoenaed the certification from the trooper. [\*\*11] Therefore, the trooper was not required to bring any documentation with him to the suppression hearing.

[\*P16] Appellant's single assignment of error is without merit.

[\*P17] For the reasons stated in the Opinion of this court, the assignment of error is not well taken. It is the judgment and order of this court that the judgment of the Painesville Municipal Court is affirmed.

DONALD R. FORD, P.J., concurs,

COLLEEN MARY O'TOOLE, J., concurs in judgment only.

TRUMBULL COUNTY**

*166 Ohio App. 3d 638; 2006 Ohio 1172; 852 N.E.2d 1228; 2006 Ohio App. LEXIS  
1053*

**March 10, 2006, Decided**

**PRIOR HISTORY:** Criminal Appeal from the Warren Municipal Court, Case No. 2004 TRC 04100. *State v. Brown, 2005 Ohio 562, 2005 Ohio App. LEXIS 575 (Ohio Ct. App., Trumbull County, Feb. 11, 2005)*

**DISPOSITION:** Reversed and judgment entered for appellant.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** After his motion to suppress was denied, defendant pled no contest to speeding, a minor misdemeanor, in violation of *Ohio Rev. Code Ann. § 4511.21(C)*, and driving under the influence of alcohol (DUI), a misdemeanor of the first degree, in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*. The Warren Municipal Court (Ohio) found him guilty and sentenced him accordingly. Defendant appealed.

**OVERVIEW:** Defendant argued that the trial court erred in finding that standardized field sobriety tests were conducted in substantial compliance with the National Highway Traffic Safety Administration (NHTSA) standards. The appellate court held that the results of the field sobriety tests should have been suppressed because the State failed to prove that the tests were conducted in substantial compliance with the NHTSA manual. Defendant's motion and memorandum were specific enough to give the State notice of the basis for his challenge and were sufficient to shift the burden to the State to demonstrate that the field sobriety tests were properly conducted. The State did not carry its burden at the hearing as it failed to produce any evidence to prove that the tests were conducted in a standardized manner as provided by the NHTSA, and did not admit the manual. Further, the totality of the circumstances, when the results of the field sobriety tests were excluded, did not establish that probable cause existed for the DUI arrest. The trooper's observations amounted at most to a reasonable suspicion to believe that defendant may have been under the influence of alcohol.

**OUTCOME:** The judgment of the trial court was reversed and judgment was entered in favor of defendant.

**CORE TERMS:** sobriety, trooper, arrest, motion to suppress, standardized, manual, driving, probable cause,

**OPINION:** [\*\*\*1228] [\*639] DONALD R. FORD, P.J.

[\*\*P1] Appellant, Marvin J. Brown, appeals from the February 7, 2005 judgment entry of the Warren Municipal Court, in which he was sentenced for speeding and driving under the influence of alcohol ("DUI").

[\*\*P2] [\*\*\*1229] On June 8, 2004, a complaint was filed against appellant charging him with three counts: one count of speeding, a minor misdemeanor, in violation of *R.C. 4511.21(C)*; one count of DUI, a misdemeanor of the first degree, in violation of *R.C. 4511.19(A)(1)*; and one count of failure to wear a safety belt, a minor misdemeanor, in violation of *R.C. 4513.263*. On June 11, 2004, appellant entered a plea of not guilty at his initial appearance.

[\*640] [\*\*P3] On June 21, 2004, appellant filed a motion to suppress. n1 A suppression hearing was held on August 20, 2004. n2

n1 In his motion to suppress, appellant alleged a lack of probable cause and/or illegal basis to make an arrest in violation of his *Fourth* and *Fourteenth Amendment* rights under the United States Constitution and under *Article I, Section Fourteen*, of the Ohio Constitution. Further, appellant moved the court to suppress any

evidence including testimony and statements made concerning drunk driving, and field sobriety tests.

n2 The parties stipulated that the suppression hearing would be limited to the probable cause for the arrest and the procedures used for the standardized field sobriety tests which led to the arrest of appellant.

[\*\*P4] At that hearing, Trooper Erik Golias ("Trooper Golias") with the Ohio State Highway Patrol, Warren post, testified for appellee, the state of Ohio, that he was on duty on June 8, 2004, and came in contact with appellant. Trooper Golias was traveling in his marked cruiser southbound on State Route 46 ("Route 46") and appellant was driving northbound on Route 46. The speed limit on Route 46 in the area in question is forty miles per hour. Trooper Golias indicated that he is trained and certified in operating a radar. n3 He clocked appellant at 2:16 a.m. traveling at a speed of fifty miles per hour. n4 At that time, he initiated a traffic stop of appellant's vehicle.

n3 Trooper Golias stated that he has an Electronics Speed Measuring Devices ("ESMD") certification.

n4 Trooper Golias testified that prior to operating the radar, he checked the calibration at the beginning of his shift as well as after appellant was arrested. He maintained that the calibration check revealed that it was in proper working order both prior to his shift and immediately after appellant's arrest.

[\*\*P5] Upon approaching appellant's car, Trooper Golias noticed a strong odor of alcohol, and indicated that appellant's eyes were glassy and bloodshot but made no mention regarding appellant's speech. He stated that appellant fumbled through cards and papers and dropped his wallet on his lap. Trooper Golias asked appellant for his license and registration. He said that after appellant located his license, he dropped it on the seat. At that point, Trooper Golias ordered appellant out of his vehicle. He administered three field sobriety tests, including the Horizontal Gaze Nystagmus ("HGN"), the one-legged stand, and the walk and turn. n5 Trooper Golias testified that appellant failed all three tests. He then read appellant his Miranda rights, arrested him for DUI, and transported him to the station. En route to the station, Trooper Golias indicated that appellant said that he had consumed seven beers. At the station, appellant refused to take a breathalyzer test.

n5 Trooper Golias testified that he was trained in conducting those tests prior to graduating in September 2000, from the Highway Patrol Academy. In addition, he indicated that he had opportunities to perform those tests on prior occasions.

[\*641] [\*\*P6] On cross-examination, Trooper Golias testified that appellant made the comment about drinking seven beers after the arrest, and that he did not use that statement for his probable cause determination. Trooper Golias indicated that most of his testimony was not made from [\*\*\*1230] independent recollection but rather from reviewing his notes on the witness stand. After asked whether he had his ESMD certification with him, Trooper Golias responded that he did not.

[\*\*P7] On September 7, 2004, appellant filed a supplemental memorandum in support of his motion to suppress. n6 Appellee filed a response on September 20, 2004.

n6 In his supplemental memorandum, appellant alleged that appellee failed to establish the standardized manner of conducting field sobriety tests as required by the NHTSA. Also, appellant argued that the case should be dismissed for lack of probable cause.

[\*\*P8] Pursuant to its September 27, 2004 judgment entry, the trial court denied appellant's motion to suppress. The trial court determined that probable cause existed for the DUI arrest and that the field sobriety tests were conducted in strict compliance with the National Highway Traffic Safety Administration ("NHTSA") standards.

[\*\*P9] On October 13, 2004, appellant entered a plea of no contest regarding the DUI charge and asked that his sentence be stayed pending appeal. The trial court found appellant guilty of DUI and speeding, and dismissed the failure to wear a safety belt charge. Sentencing was deferred pending appeal. On October 20, 2004, appellant filed a notice of appeal from the October 13, 2004 judgment.

[\*\*P10] On February 7, 2005, the trial court sentenced appellant to one hundred eighty days in jail, one hundred seventy days suspended; ordered him to pay a fine in the amount of \$ 350; suspended his driver's license for two years; and placed him on three years non-reporting probation.

[\*\*P11] On February 14, 2005, this court issued a memorandum opinion in which we sua sponte dismissed appellant's appeal due to lack of a final appealable order. This court indicated that because no sentence had been rendered, there was no final appealable order.

[\*\*P12] On February 17, 2005, appellant filed a motion to reinstate the appeal. Pursuant to this court's March 30, 2005 judgment entry, we granted appellant's motion to reinstate the appeal, and instructed the clerk of courts to substitute the October 13, 2004 judgment entry with the new appealed judgment of February 7, 2005. It is from the February 7, 2005 judgment that appellant makes the following assignments of error: n7

[\*642] [\*\*P13] "[1.] The trial court erred in finding that standardized field sobriety tests were conducted in substantial compliance with NHTSA standards.

[\*\*P14] "[2.] The trial court erred in finding probable cause for [appellant's] DUI arrest."

n7 We note that appellee did not file an appellate brief. Also, appellant's notice of appeal is limited to DUI and does not reference the speeding charge. Thus, since appellant has not brought forth any argument regarding speeding, we conclude that it has not been advanced for purposes of this appeal. In addition, pursuant to this court's December 9, 2005 judgment entry, we indicated that the February 7, 2005 sentencing order may not have been a final appealable order since it was issued by the trial court while the appeal was still pending. Accordingly, we ordered that this case be remanded to the trial court for a period of ten days for the sole purpose of the trial court issuing a new sentencing order. The trial court filed a new sentencing order on December 15, 2005, in which appellant's sentence was identical to the foregoing February 7, 2005 order.

[\*\*P15] In his first assignment of error, appellant argues that the trial court erred in finding that standardized field sobriety tests were conducted in substantial compliance with the NHTSA standards. Appellant contends that appellee failed to establish the standardized manner of conducting such field sobriety tests as [\*\*\*1231] required by NHTSA, therefore, the field sobriety tests should have been suppressed.

[\*\*P16] This court stated in *State v. Jones, 11th Dist. No. 2001-A-0041, 2002 Ohio 6569, at P16*, that:

[\*\*P17] [HN1] "at a hearing on a motion to suppress, the trial court assumes the role of the trier of facts and, therefore, is in the best position to resolve questions of fact and evaluate the credibility of witnesses. *State v. Mills (1992)*, 62 Ohio St.3d 357, 366, 582 N.E.2d 972 \*\*\*. When reviewing a motion to suppress, an appellate court is bound to accept the trial court's findings of fact if they are supported by competent, credible evidence. *State v. Guysinger (1993)*, 86 Ohio App.3d 592, 594, 621 N.E.2d 726 \*\*\*. Accepting these findings of facts as true, a reviewing court must independently determine as a matter of law, without deference to the trial court's conclusion, whether they meet the appropriate legal standard. *State v. Curry (1994)*, 95 Ohio App.3d 93, 96, 641 N.E.2d 1172 \*\*\*." (Parallel citations

omitted.)

[\*\*P18] Appellant relies on *State v. Ryan, 5th Dist. No. 02-CA-00095, 2003 Ohio 2803*, for the proposition that if the state does not prove that field sobriety tests were conducted in strict compliance with the NHTSA manual, the results should be suppressed. n8 In *Ryan*, the appellant was stopped [\*643] for speeding, given field sobriety tests, and arrested for DUI. *Id. at P2*. The trooper acknowledged that he failed to perform the HGN test in strict compliance with the NHTSA manual, and did not remember some of the specifics of the testing procedure. *Id. at P3*. The state did not introduce the NHTSA manual at the hearing on appellant's motion to suppress. *Id. at P4*. While not accepting the HGN test, the trial court relied on the trooper's testimony without the actual NHTSA manual in denying the motion. *Id. at P5*.

n8 We note that [HN2] amended *R.C. 4511.19*, effective April 9, 2003, no longer requires an arresting officer to administer field sobriety tests in strict compliance with testing standards for the test results to be admissible. Rather, substantial compliance is required, which we will apply here. *State v. Delarosa, 11th Dist. No. 2003-P-0129, 2005 Ohio 3399, at P45, fn. 4; State v. Boczar, 11th Dist. No. 2004-A-0063, 2005 Ohio 6910, at P31-36*. On January 21, 2004, although the Supreme Court of Ohio in *State v. Schmitt, 101 Ohio St.3d 79, 2004 Ohio 37, 801 N.E.2d 446*, applied the strict compliance standard, we stress that it dealt with an arrest which took place prior to the passage of S.B. 163, and the court acknowledged its application was limited in light of S.B. 163. *Id. at P9, fn. 1*.

[\*\*P19] In *Ryan*, the Fifth District indicated that while the trooper testified regarding his certification to administer the tests, he failed to testify as to the standardized requirements of the NHTSA guidelines. *Id. at P20*. The court held "that the state therefore failed in its burden as to the evidence required to oppose the motion to suppress and that the burden had not shifted to appellant to establish the standardized manner of conducting such tests as required by the NHTSA by impeaching the trooper. By placing this burden on appellant, he was required by impeachment or introduction of the NHTSA manual to carry the burden required of the state." *Id. at P21*.

[\*\*P20] A similar instance occurred in *State v. Nickelson (July 20, 2001), 6th Dist. No. H-00-036, 2001 Ohio App. LEXIS 3261*. In *Nickelson*, the appellant's vehicle was parked with its motor running, blocking the entrance of a bar. *2001 Ohio App. LEXIS 3261 at \*1*. A police officer proceeded to the appellant's car on foot and noticed indicia of intoxication. *2001 Ohio App. LEXIS 3261 at \*2*. After given field sobriety tests, the appellant was placed under arrest for DUI. *Id.* The appellant pleaded not guilty and later moved to suppress the evidence against [\*\*\*1232] him on the grounds that his stop and arrest were unconstitutional. *2001 Ohio App. LEXIS 3261 at \*2-3*. After a hearing, the trial court granted the appellant's motion to suppress regarding the walk-and-turn test because the police officer did not demonstrate that test for him. *2001 Ohio App. LEXIS 3261 at \*3*. However, the appellant's motion to suppress was denied in all other respects. *Id.* The appellant changed his plea to no contest and was found guilty of DUI by the trial court. *Id.*

[\*\*P21] On appeal, the appellant in *Nickelson*, argued, inter alia, that the trial court erred by failing to suppress all field sobriety tests due to the fact that they were not properly administered. *2001 Ohio App. LEXIS 3261 at \*4*. The appellant stressed that the results of those tests should have been suppressed because the police officer did not perform them in a standardized manner and in conformity with the NHTSA manual. *2001 Ohio App. LEXIS 3261 at \*8*.

[\*\*P22] The Sixth District agreed and stated *2001 Ohio App. LEXIS 3261 at \*10*:

[\*\*P23] "in this case, appellant's motion to suppress was specific enough to give appellee notice of the basis for challenging the seizure: appellant cited in his memorandum the constitutional provisions he believed were violated, and he cited [\*644] the [NHTSA manual], which he also believed was violated. Appellant provided case citations as well. In short, appellant's motion and memorandum were enough to shift the burden to appellee to demonstrate that, in this instance, the field sobriety tests were conducted properly. \*\*\* Appellee did not carry this burden at the hearing. While

appellee introduced testimony of officers as to which tests were conducted and how they were conducted, it did not introduce any evidence to prove that the tests were conducted in a standardized manner as provided by the [NHTSA]. No witness testified as to these guidelines, and the manual itself was not admitted. Because appellee did not prove that the field sobriety tests were conducted in accordance with the manual, the results of the field sobriety tests should have been suppressed. See *State v. Homan (2000)*, 89 Ohio St.3d 421, 2000 Ohio 212, 732 N.E.2d 952 \*\*\*, paragraph one of the syllabus[.] \*\*\* Accordingly, appellant's third assignment of error is well-taken." (Parallel citation omitted.)

[\*\*P24] With regard to the case at bar, again, in appellant's motion to suppress, he alleged a lack of probable cause and/or illegal basis to make an arrest in violation of his constitutional rights as well as moved the court to suppress any evidence including testimony and statements made concerning drunk driving, and field sobriety tests. After the hearing, in his supplemental memorandum in support of his motion to suppress, appellant contended that appellee failed to establish the standardized manner of conducting field sobriety tests as required by the NHTSA. Thus, appellant's motion and memorandum were specific enough to give appellee notice of the basis for his challenge and were sufficient to shift the burden to appellee to demonstrate that the field sobriety tests were properly conducted. Appellee did not carry its burden at the hearing. Also, in appellee's response to appellant's motion to suppress, appellee conceded that Trooper Golias failed to make a conclusory affirmation that the tests were administered in compliance with the NHTSA manual, but that the technical requirement in *Ryan* should not be adopted by the trial court.

[\*\*P25] We believe that the rationale of the Fifth and Sixth Districts should apply here. Although appellee introduced testimony of Trooper Golias as to which tests were conducted and how they were administered, it failed to produce any evidence to prove that the tests were conducted in a standardized manner as provided by the NHTSA, and did not admit the manual. Trooper Golias's testimony that he conducted the field sobriety tests in conformity [\*\*\*1233] with the manner and procedures with which he was taught is not the same as testifying that he administered the tests in substantial compliance with the guidelines set forth in the NHTSA manual. Trooper Golias failed to testify regarding the standardized requirements. Thus, pursuant to *Ryan* and *Nickelson, supra*, because appellee failed to prove that the field sobriety tests were conducted in substantial compliance with the NHTSA manual, the results of the tests should have been suppressed. Appellant's first assignment of error is with merit.

[\*645] [\*\*P26] In his second assignment of error, appellant alleges that the trial court erred in finding probable cause for his DUI arrest. Appellant maintains that since the standardized field sobriety tests were not performed in substantial compliance with the NHTSA standards, the trial court should have made a determination regarding whether probable cause for arrest existed exclusive of the field sobriety tests at issue.

[\*\*P27] Based on our analysis in appellant's first assignment of error, because we believe that the results of the field sobriety tests should have been suppressed, we must decide whether Trooper Golias had probable cause to arrest appellant absent the tests. See *Homan, supra*, at 427.

[\*\*P28] Appellant relies on *State v. Beagle, 2d Dist. No. 2002-CA-59, 2003 Ohio 4331*. In *Beagle*, the appellant crossed the right lane line by a tire's width two times and almost hit another vehicle; came very close to hitting a light post; had an odor of alcohol on his person; and admitted to consuming "three shots of Jack." *Id.* at P38. However, the Second District determined that the police officer had, at most, a reasonable suspicion that the appellant may have been under the influence of alcohol. *Id.* at P40. The court agreed with the appellant that the totality of the circumstances, excluding the field sobriety tests, did not rise to the level of probable cause to believe that the appellant was under the influence of alcohol. *Id.*

[\*\*P29] In the instant matter, appellant was stopped for traveling ten miles over the speed limit. There was no evidence submitted as to any erratic driving such as weaving, swerving, and/or driving left-of-center. Again, upon approaching appellant's vehicle, Trooper Golias noticed a strong odor of alcohol, indicated that appellant's eyes were glassy and bloodshot, and that appellant fumbled through cards and papers, dropped his wallet on his lap, and after locating his license, dropped it on the seat. Appellant did not admit that he consumed seven beers until *after* his arrest. Considering the foregoing facts in their totality, Trooper Golias's observations, without considering the field sobriety

tests, amounted at most to a reasonable suspicion to believe that appellant may have been under the influence of alcohol. We agree with appellant that the totality of the circumstances, when the results of the field sobriety tests are excluded, does not establish that probable cause existed for the DUI arrest. Appellant's second assignment of error is with merit.

[\*\*P30] For the foregoing reasons, appellant's assignments of error are well-taken. The judgment of the Warren Municipal Court is reversed and judgment is entered for appellant.

CYNTHIA WESTCOTT [\*646] RICE, J., concurs,

DIANE V. GRENDALL, J., dissents with a Dissenting Opinion.

**DISSENT BY:** DIANE V. GRENDALL,

**DISSENT:** DIANE V. GRENDALL, J., dissents with a Dissenting Opinion.

[\*\*P31] I concur with the majority's conclusion, under the first assignment of error, [\*\*\*1234] that the State failed to establish that Trooper Golias conducted the field sobriety tests in accordance with the National Highway Traffic Safety Administration standards.

[\*\*P32] I disagree, however, with the majority's conclusion, under the second assignment error, that Trooper Golias did not have probable cause to arrest appellant for driving under the influence of alcohol.

[\*\*P33] "In determining whether the police had probable cause to arrest an individual for DUI," the reviewing court must consider "whether, at the moment of the arrest, the police had sufficient information, derived from a reasonably trustworthy source of facts and circumstances, sufficient to cause a prudent person to believe that the suspect was driving under the influence. \*\*\* In making this determination, [the court] will examine the 'totality' of facts and circumstances surrounding the arrest." *State v. Homan*, 89 Ohio St.3d 421, 427, 2000 Ohio 212, 732 N.E.2d 952 (citations omitted).

[\*\*P34] In the present case, there is abundant information sufficient to cause a prudent person to believe that appellant was driving under the influence. Appellant was stopped for speeding in the early morning hours. There was a "strong odor" of alcohol coming from appellant's person. Appellant's eyes were "glassy" and "blood-shot." Appellant "fumbled through cards and papers" while looking for his license and registration. Appellant dropped his wallet in his lap and, after locating his license, dropped his license as well. Appellant was unable to stand on one foot for longer than thirteen seconds. Appellant was unable to maintain his balance walking in a straight line. n9

n9 Although the results of the field sobriety tests Trooper Golias performed must be suppressed, it is well-established "[a] law enforcement officer may testify at trial regarding observations made during a defendant's performance of nonscientific standardized field sobriety tests." *State v. Schmitt*, 101 Ohio St.3d 79, 2004 Ohio 37, 801 N.E.2d 446, at syllabus. Accordingly, Trooper Golias' observations as to how appellant performed these tests may be considered when determining probable cause. *Id.* at P14.

[\*\*P35] The majority notes that Trooper Golias did not observe appellant driving erratically. The observation of erratic driving, however, is not essential to arrest for driving under the influence. What is essential is evidence that appellant's ability to operate a motor vehicle has been impaired by the consumption of alcohol. In the present case, there are numerous indications that [\*647] appellant's coordination was impaired to a degree that would affect his ability to drive.

[\*\*P36] This court has held, in numerous instances, that probable cause to arrest exists where the results of the

166 Ohio App. 3d 638, \*647; 2006 Ohio 1172, \*\*P36;  
852 N.E.2d 1228, \*\*\*1234; 2006 Ohio App. LEXIS 1053

field sobriety tests are not considered and where the officer has not observed erratic driving. See *State v. Duncan*, 11th Dist. No. 2004-L-065, 2005 Ohio 7061; *Kirtland Hills v. Deir*, 11th Dist. No. 2004-L-005, 2005 Ohio 1563; *State v. Lynch*, 11th Dist. No. 2002-L-177, 2004 Ohio 5014; *State v. Dohner*, 11th Dist. No. 2003-P-0059, 2004 Ohio 7242.

[\*\*P37] There is no reason for departing from these precedents in the present case. Accordingly, I respectfully dissent.

**STATE OF OHIO, Plaintiff-Appellee, - vs- MARVIN J. BROWN,  
Defendant-Appellant.**

**CASE NO. 2004-T-0123**

**COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT,  
TRUMBULL COUNTY**

*166 Ohio App. 3d 638; 2006 Ohio 1172; 852 N.E.2d 1228; 2006 Ohio App. LEXIS  
1053*

**March 10, 2006, Decided**

**PRIOR HISTORY:** Criminal Appeal from the Warren Municipal Court, Case No. 2004 TRC 04100. *State v. Brown, 2005 Ohio 562, 2005 Ohio App. LEXIS 575 (Ohio Ct. App., Trumbull County, Feb. 11, 2005)*

**DISPOSITION:** Reversed and judgment entered for appellant.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** After his motion to suppress was denied, defendant pled no contest to speeding, a minor misdemeanor, in violation of *Ohio Rev. Code Ann. § 4511.21(C)*, and driving under the influence of alcohol (DUI), a misdemeanor of the first degree, in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*. The Warren Municipal Court (Ohio) found him guilty and sentenced him accordingly. Defendant appealed.

**OVERVIEW:** Defendant argued that the trial court erred in finding that standardized field sobriety tests were conducted in substantial compliance with the National Highway Traffic Safety Administration (NHTSA) standards. The appellate court held that the results of the field sobriety tests should have been suppressed because the State failed to prove that the tests were conducted in substantial compliance with the NHTSA manual. Defendant's motion and memorandum were specific enough to give the State notice of the basis for his challenge and were sufficient to shift the burden to the State to demonstrate that the field sobriety tests were properly conducted. The State did not carry its burden at the hearing as it failed to produce any evidence to prove that the tests were conducted in a standardized manner as provided by the NHTSA, and did not admit the manual. Further, the totality of the circumstances, when the results of the field sobriety tests were excluded, did not establish that probable cause existed for the DUI arrest. The trooper's observations amounted at most to a reasonable suspicion to believe that defendant may have been under the influence of alcohol.

**OUTCOME:** The judgment of the trial court was reversed and judgment was entered in favor of defendant.

**CORE TERMS:** sobriety, trooper, arrest, motion to suppress, standardized, manual, driving, probable cause,

#### *Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > Motions to Suppress*

#### *Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > Motions to Suppress*

[HN1] At a hearing on a motion to suppress, the trial court assumes the role of the trier of facts and, therefore, is in the best position to resolve questions of fact and evaluate the credibility of witnesses. When reviewing a motion to suppress, an appellate court is bound to accept the trial court's findings of fact if they are supported by competent, credible evidence. Accepting these findings of facts as true, a reviewing court must independently determine as a matter of law, without deference to the trial court's conclusion, whether they meet the appropriate legal standard.

**OPINION BY:** DONALD R. FORD

**OPINION:** [\*\*\*1228] [\*639] DONALD R. FORD, P.J.

[\*\*P1] Appellant, Marvin J. Brown, appeals from the February 7, 2005 judgment entry of the Warren Municipal Court, in which he was sentenced for speeding and driving under the influence of alcohol ("DUI").

[\*\*P2] [\*\*\*1229] On June 8, 2004, a complaint was filed against appellant charging him with three counts: one count of speeding, a minor misdemeanor, in violation of *R.C. 4511.21(C)*; one count of DUI, a misdemeanor of the first degree, in violation of *R.C. 4511.19(A)(1)*; and one count of failure to wear a safety belt, a minor misdemeanor, in violation of *R.C. 4513.263*. On June 11, 2004, appellant entered a plea of not guilty at his initial appearance.

[\*640] [\*\*P3] On June 21, 2004, appellant filed a motion to suppress. n1 A suppression hearing was held on August 20, 2004. n2

n1 In his motion to suppress, appellant alleged a lack of probable cause and/or illegal basis to make an arrest in violation of his *Fourth* and *Fourteenth Amendment* rights under the United States Constitution and under *Article I, Section Fourteen*, of the Ohio Constitution. Further, appellant moved the court to suppress any

evidence including testimony and statements made concerning drunk driving, and field sobriety tests.

n2 The parties stipulated that the suppression hearing would be limited to the probable cause for the arrest and the procedures used for the standardized field sobriety tests which led to the arrest of appellant.

[\*\*P4] At that hearing, Trooper Erik Golias ("Trooper Golias") with the Ohio State Highway Patrol, Warren post, testified for appellee, the state of Ohio, that he was on duty on June 8, 2004, and came in contact with appellant. Trooper Golias was traveling in his marked cruiser southbound on State Route 46 ("Route 46") and appellant was driving northbound on Route 46. The speed limit on Route 46 in the area in question is forty miles per hour. Trooper Golias indicated that he is trained and certified in operating a radar. n3 He clocked appellant at 2:16 a.m. traveling at a speed of fifty miles per hour. n4 At that time, he initiated a traffic stop of appellant's vehicle.

n3 Trooper Golias stated that he has an Electronics Speed Measuring Devices ("ESMD") certification.

n4 Trooper Golias testified that prior to operating the radar, he checked the calibration at the beginning of his shift as well as after appellant was arrested. He maintained that the calibration check revealed that it was in proper working order both prior to his shift and immediately after appellant's arrest.

[\*\*P5] Upon approaching appellant's car, Trooper Golias noticed a strong odor of alcohol, and indicated that appellant's eyes were glassy and bloodshot but made no mention regarding appellant's speech. He stated that appellant fumbled through cards and papers and dropped his wallet on his lap. Trooper Golias asked appellant for his license and registration. He said that after appellant located his license, he dropped it on the seat. At that point, Trooper Golias ordered appellant out of his vehicle. He administered three field sobriety tests, including the Horizontal Gaze Nystagmus ("HGN"), the one-legged stand, and the walk and turn. n5 Trooper Golias testified that appellant failed all three tests. He then read appellant his Miranda rights, arrested him for DUI, and transported him to the station. En route to the station, Trooper Golias indicated that appellant said that he had consumed seven beers. At the station, appellant refused to take a breathalyzer test.

n5 Trooper Golias testified that he was trained in conducting those tests prior to graduating in September 2000, from the Highway Patrol Academy. In addition, he indicated that he had opportunities to perform those tests on prior occasions.

[\*641] [\*\*P6] On cross-examination, Trooper Golias testified that appellant made the comment about drinking seven beers after the arrest, and that he did not use that statement for his probable cause determination. Trooper Golias indicated that most of his testimony was not made from [\*\*\*1230] independent recollection but rather from reviewing his notes on the witness stand. After asked whether he had his ESMD certification with him, Trooper Golias responded that he did not.

[\*\*P7] On September 7, 2004, appellant filed a supplemental memorandum in support of his motion to suppress. n6 Appellee filed a response on September 20, 2004.

n6 In his supplemental memorandum, appellant alleged that appellee failed to establish the standardized manner of conducting field sobriety tests as required by the NHTSA. Also, appellant argued that the case should be dismissed for lack of probable cause.

166 Ohio App. 3d 638, \*641; 2006 Ohio 1172, \*\*P7;  
852 N.E.2d 1228, \*\*\*1230; 2006 Ohio App. LEXIS 1053

[\*\*P8] Pursuant to its September 27, 2004 judgment entry, the trial court denied appellant's motion to suppress. The trial court determined that probable cause existed for the DUI arrest and that the field sobriety tests were conducted in strict compliance with the National Highway Traffic Safety Administration ("NHTSA") standards.

[\*\*P9] On October 13, 2004, appellant entered a plea of no contest regarding the DUI charge and asked that his sentence be stayed pending appeal. The trial court found appellant guilty of DUI and speeding, and dismissed the failure to wear a safety belt charge. Sentencing was deferred pending appeal. On October 20, 2004, appellant filed a notice of appeal from the October 13, 2004 judgment.

[\*\*P10] On February 7, 2005, the trial court sentenced appellant to one hundred eighty days in jail, one hundred seventy days suspended; ordered him to pay a fine in the amount of \$ 350; suspended his driver's license for two years; and placed him on three years non-reporting probation.

[\*\*P11] On February 14, 2005, this court issued a memorandum opinion in which we sua sponte dismissed appellant's appeal due to lack of a final appealable order. This court indicated that because no sentence had been rendered, there was no final appealable order.

[\*\*P12] On February 17, 2005, appellant filed a motion to reinstate the appeal. Pursuant to this court's March 30, 2005 judgment entry, we granted appellant's motion to reinstate the appeal, and instructed the clerk of courts to substitute the October 13, 2004 judgment entry with the new appealed judgment of February 7, 2005. It is from the February 7, 2005 judgment that appellant makes the following assignments of error: n7

[\*642] [\*\*P13] "[1.] The trial court erred in finding that standardized field sobriety tests were conducted in substantial compliance with NHTSA standards.

[\*\*P14] "[2.] The trial court erred in finding probable cause for [appellant's] DUI arrest."

n7 We note that appellee did not file an appellate brief. Also, appellant's notice of appeal is limited to DUI and does not reference the speeding charge. Thus, since appellant has not brought forth any argument regarding speeding, we conclude that it has not been advanced for purposes of this appeal. In addition, pursuant to this court's December 9, 2005 judgment entry, we indicated that the February 7, 2005 sentencing order may not have been a final appealable order since it was issued by the trial court while the appeal was still pending. Accordingly, we ordered that this case be remanded to the trial court for a period of ten days for the sole purpose of the trial court issuing a new sentencing order. The trial court filed a new sentencing order on December 15, 2005, in which appellant's sentence was identical to the foregoing February 7, 2005 order.

[\*\*P15] In his first assignment of error, appellant argues that the trial court erred in finding that standardized field sobriety tests were conducted in substantial compliance with the NHTSA standards. Appellant contends that appellee failed to establish the standardized manner of conducting such field sobriety tests as [\*\*\*1231] required by NHTSA, therefore, the field sobriety tests should have been suppressed.

[\*\*P16] This court stated in *State v. Jones, 11th Dist. No. 2001-A-0041, 2002 Ohio 6569, at P16*, that:

[\*\*P17] [HN1] "at a hearing on a motion to suppress, the trial court assumes the role of the trier of facts and, therefore, is in the best position to resolve questions of fact and evaluate the credibility of witnesses. *State v. Mills (1992)*, 62 Ohio St.3d 357, 366, 582 N.E.2d 972 \*\*\*. When reviewing a motion to suppress, an appellate court is bound to accept the trial court's findings of fact if they are supported by competent, credible evidence. *State v. Guysinger (1993)*, 86 Ohio App.3d 592, 594, 621 N.E.2d 726 \*\*\*. Accepting these findings of facts as true, a reviewing court must independently determine as a matter of law, without deference to the trial court's conclusion, whether they meet the appropriate legal standard. *State v. Curry (1994)*, 95 Ohio App.3d 93, 96, 641 N.E.2d 1172 \*\*\*." (Parallel citations

omitted.)

[\*\*P18] Appellant relies on *State v. Ryan, 5th Dist. No. 02-CA-00095, 2003 Ohio 2803*, for the proposition that if the state does not prove that field sobriety tests were conducted in strict compliance with the NHTSA manual, the results should be suppressed. n8 In *Ryan*, the appellant was stopped [\*643] for speeding, given field sobriety tests, and arrested for DUI. *Id. at P2*. The trooper acknowledged that he failed to perform the HGN test in strict compliance with the NHTSA manual, and did not remember some of the specifics of the testing procedure. *Id. at P3*. The state did not introduce the NHTSA manual at the hearing on appellant's motion to suppress. *Id. at P4*. While not accepting the HGN test, the trial court relied on the trooper's testimony without the actual NHTSA manual in denying the motion. *Id. at P5*.

n8 We note that [HN2] amended *R.C. 4511.19*, effective April 9, 2003, no longer requires an arresting officer to administer field sobriety tests in strict compliance with testing standards for the test results to be admissible. Rather, substantial compliance is required, which we will apply here. *State v. Delarosa, 11th Dist. No. 2003-P-0129, 2005 Ohio 3399, at P45, fn. 4; State v. Boczar, 11th Dist. No. 2004-A-0063, 2005 Ohio 6910, at P31-36*. On January 21, 2004, although the Supreme Court of Ohio in *State v. Schmitt, 101 Ohio St.3d 79, 2004 Ohio 37, 801 N.E.2d 446*, applied the strict compliance standard, we stress that it dealt with an arrest which took place prior to the passage of S.B. 163, and the court acknowledged its application was limited in light of S.B. 163. *Id. at P9, fn. 1*.

[\*\*P19] In *Ryan*, the Fifth District indicated that while the trooper testified regarding his certification to administer the tests, he failed to testify as to the standardized requirements of the NHTSA guidelines. *Id. at P20*. The court held "that the state therefore failed in its burden as to the evidence required to oppose the motion to suppress and that the burden had not shifted to appellant to establish the standardized manner of conducting such tests as required by the NHTSA by impeaching the trooper. By placing this burden on appellant, he was required by impeachment or introduction of the NHTSA manual to carry the burden required of the state." *Id. at P21*.

[\*\*P20] A similar instance occurred in *State v. Nickelson (July 20, 2001), 6th Dist. No. H-00-036, 2001 Ohio App. LEXIS 3261*. In *Nickelson*, the appellant's vehicle was parked with its motor running, blocking the entrance of a bar. *2001 Ohio App. LEXIS 3261 at \*1*. A police officer proceeded to the appellant's car on foot and noticed indicia of intoxication. *2001 Ohio App. LEXIS 3261 at \*2*. After given field sobriety tests, the appellant was placed under arrest for DUI. *Id.* The appellant pleaded not guilty and later moved to suppress the evidence against [\*\*\*1232] him on the grounds that his stop and arrest were unconstitutional. *2001 Ohio App. LEXIS 3261 at \*2-3*. After a hearing, the trial court granted the appellant's motion to suppress regarding the walk-and-turn test because the police officer did not demonstrate that test for him. *2001 Ohio App. LEXIS 3261 at \*3*. However, the appellant's motion to suppress was denied in all other respects. *Id.* The appellant changed his plea to no contest and was found guilty of DUI by the trial court. *Id.*

[\*\*P21] On appeal, the appellant in *Nickelson*, argued, inter alia, that the trial court erred by failing to suppress all field sobriety tests due to the fact that they were not properly administered. *2001 Ohio App. LEXIS 3261 at \*4*. The appellant stressed that the results of those tests should have been suppressed because the police officer did not perform them in a standardized manner and in conformity with the NHTSA manual. *2001 Ohio App. LEXIS 3261 at \*8*.

[\*\*P22] The Sixth District agreed and stated *2001 Ohio App. LEXIS 3261 at \*10*:

[\*\*P23] "in this case, appellant's motion to suppress was specific enough to give appellee notice of the basis for challenging the seizure: appellant cited in his memorandum the constitutional provisions he believed were violated, and he cited [\*644] the [NHTSA manual], which he also believed was violated. Appellant provided case citations as well. In short, appellant's motion and memorandum were enough to shift the burden to appellee to demonstrate that, in this instance, the field sobriety tests were conducted properly. \*\*\* Appellee did not carry this burden at the hearing. While

appellee introduced testimony of officers as to which tests were conducted and how they were conducted, it did not introduce any evidence to prove that the tests were conducted in a standardized manner as provided by the [NHTSA]. No witness testified as to these guidelines, and the manual itself was not admitted. Because appellee did not prove that the field sobriety tests were conducted in accordance with the manual, the results of the field sobriety tests should have been suppressed. See *State v. Homan (2000)*, 89 Ohio St.3d 421, 2000 Ohio 212, 732 N.E.2d 952 \*\*\*, paragraph one of the syllabus[.] \*\*\* Accordingly, appellant's third assignment of error is well-taken." (Parallel citation omitted.)

[\*\*P24] With regard to the case at bar, again, in appellant's motion to suppress, he alleged a lack of probable cause and/or illegal basis to make an arrest in violation of his constitutional rights as well as moved the court to suppress any evidence including testimony and statements made concerning drunk driving, and field sobriety tests. After the hearing, in his supplemental memorandum in support of his motion to suppress, appellant contended that appellee failed to establish the standardized manner of conducting field sobriety tests as required by the NHTSA. Thus, appellant's motion and memorandum were specific enough to give appellee notice of the basis for his challenge and were sufficient to shift the burden to appellee to demonstrate that the field sobriety tests were properly conducted. Appellee did not carry its burden at the hearing. Also, in appellee's response to appellant's motion to suppress, appellee conceded that Trooper Golias failed to make a conclusory affirmation that the tests were administered in compliance with the NHTSA manual, but that the technical requirement in *Ryan* should not be adopted by the trial court.

[\*\*P25] We believe that the rationale of the Fifth and Sixth Districts should apply here. Although appellee introduced testimony of Trooper Golias as to which tests were conducted and how they were administered, it failed to produce any evidence to prove that the tests were conducted in a standardized manner as provided by the NHTSA, and did not admit the manual. Trooper Golias's testimony that he conducted the field sobriety tests in conformity [\*\*\*1233] with the manner and procedures with which he was taught is not the same as testifying that he administered the tests in substantial compliance with the guidelines set forth in the NHTSA manual. Trooper Golias failed to testify regarding the standardized requirements. Thus, pursuant to *Ryan* and *Nickelson, supra*, because appellee failed to prove that the field sobriety tests were conducted in substantial compliance with the NHTSA manual, the results of the tests should have been suppressed. Appellant's first assignment of error is with merit.

[\*645] [\*\*P26] In his second assignment of error, appellant alleges that the trial court erred in finding probable cause for his DUI arrest. Appellant maintains that since the standardized field sobriety tests were not performed in substantial compliance with the NHTSA standards, the trial court should have made a determination regarding whether probable cause for arrest existed exclusive of the field sobriety tests at issue.

[\*\*P27] Based on our analysis in appellant's first assignment of error, because we believe that the results of the field sobriety tests should have been suppressed, we must decide whether Trooper Golias had probable cause to arrest appellant absent the tests. See *Homan, supra*, at 427.

[\*\*P28] Appellant relies on *State v. Beagle, 2d Dist. No. 2002-CA-59, 2003 Ohio 4331*. In *Beagle*, the appellant crossed the right lane line by a tire's width two times and almost hit another vehicle; came very close to hitting a light post; had an odor of alcohol on his person; and admitted to consuming "three shots of Jack." *Id.* at P38. However, the Second District determined that the police officer had, at most, a reasonable suspicion that the appellant may have been under the influence of alcohol. *Id.* at P40. The court agreed with the appellant that the totality of the circumstances, excluding the field sobriety tests, did not rise to the level of probable cause to believe that the appellant was under the influence of alcohol. *Id.*

[\*\*P29] In the instant matter, appellant was stopped for traveling ten miles over the speed limit. There was no evidence submitted as to any erratic driving such as weaving, swerving, and/or driving left-of-center. Again, upon approaching appellant's vehicle, Trooper Golias noticed a strong odor of alcohol, indicated that appellant's eyes were glassy and bloodshot, and that appellant fumbled through cards and papers, dropped his wallet on his lap, and after locating his license, dropped it on the seat. Appellant did not admit that he consumed seven beers until *after* his arrest. Considering the foregoing facts in their totality, Trooper Golias's observations, without considering the field sobriety

166 Ohio App. 3d 638, \*645; 2006 Ohio 1172, \*\*P29;  
852 N.E.2d 1228, \*\*\*1233; 2006 Ohio App. LEXIS 1053

tests, amounted at most to a reasonable suspicion to believe that appellant may have been under the influence of alcohol. We agree with appellant that the totality of the circumstances, when the results of the field sobriety tests are excluded, does not establish that probable cause existed for the DUI arrest. Appellant's second assignment of error is with merit.

[\*\*P30] For the foregoing reasons, appellant's assignments of error are well-taken. The judgment of the Warren Municipal Court is reversed and judgment is entered for appellant.

CYNTHIA WESTCOTT [\*646] RICE, J., concurs,

DIANE V. GRENDALL, J., dissents with a Dissenting Opinion.

**DISSENT BY:** DIANE V. GRENDALL,

**DISSENT:** DIANE V. GRENDALL, J., dissents with a Dissenting Opinion.

[\*\*P31] I concur with the majority's conclusion, under the first assignment of error, [\*\*\*1234] that the State failed to establish that Trooper Golias conducted the field sobriety tests in accordance with the National Highway Traffic Safety Administration standards.

[\*\*P32] I disagree, however, with the majority's conclusion, under the second assignment error, that Trooper Golias did not have probable cause to arrest appellant for driving under the influence of alcohol.

[\*\*P33] "In determining whether the police had probable cause to arrest an individual for DUI," the reviewing court must consider "whether, at the moment of the arrest, the police had sufficient information, derived from a reasonably trustworthy source of facts and circumstances, sufficient to cause a prudent person to believe that the suspect was driving under the influence. \*\*\* In making this determination, [the court] will examine the 'totality' of facts and circumstances surrounding the arrest." *State v. Homan*, 89 Ohio St.3d 421, 427, 2000 Ohio 212, 732 N.E.2d 952 (citations omitted).

[\*\*P34] In the present case, there is abundant information sufficient to cause a prudent person to believe that appellant was driving under the influence. Appellant was stopped for speeding in the early morning hours. There was a "strong odor" of alcohol coming from appellant's person. Appellant's eyes were "glassy" and "blood-shot." Appellant "fumbled through cards and papers" while looking for his license and registration. Appellant dropped his wallet in his lap and, after locating his license, dropped his license as well. Appellant was unable to stand on one foot for longer than thirteen seconds. Appellant was unable to maintain his balance walking in a straight line. n9

n9 Although the results of the field sobriety tests Trooper Golias performed must be suppressed, it is well-established "[a] law enforcement officer may testify at trial regarding observations made during a defendant's performance of nonscientific standardized field sobriety tests." *State v. Schmitt*, 101 Ohio St.3d 79, 2004 Ohio 37, 801 N.E.2d 446, at syllabus. Accordingly, Trooper Golias' observations as to how appellant performed these tests may be considered when determining probable cause. *Id.* at P14.

[\*\*P35] The majority notes that Trooper Golias did not observe appellant driving erratically. The observation of erratic driving, however, is not essential to arrest for driving under the influence. What is essential is evidence that appellant's ability to operate a motor vehicle has been impaired by the consumption of alcohol. In the present case, there are numerous indications that [\*647] appellant's coordination was impaired to a degree that would affect his ability to drive.

[\*\*P36] This court has held, in numerous instances, that probable cause to arrest exists where the results of the

166 Ohio App. 3d 638, \*647; 2006 Ohio 1172, \*\*P36;  
852 N.E.2d 1228, \*\*\*1234; 2006 Ohio App. LEXIS 1053

field sobriety tests are not considered and where the officer has not observed erratic driving. See *State v. Duncan*, 11th Dist. No. 2004-L-065, 2005 Ohio 7061; *Kirtland Hills v. Deir*, 11th Dist. No. 2004-L-005, 2005 Ohio 1563; *State v. Lynch*, 11th Dist. No. 2002-L-177, 2004 Ohio 5014; *State v. Dohner*, 11th Dist. No. 2003-P-0059, 2004 Ohio 7242.

[\*\*P37] There is no reason for departing from these precedents in the present case. Accordingly, I respectfully dissent.

**CITY OF CLEVELAND, Plaintiff-appellee vs. MARK SANDERS,  
Defendant-appellant**

**NO. 83073**

**COURT OF APPEALS OF OHIO, EIGHTH APPELLATE DISTRICT,  
CUYAHOGA COUNTY**

*2004 Ohio 4473; 2004 Ohio App. LEXIS 4057*

**August 26, 2004, Date of Announcement of Decision**

**PRIOR HISTORY:** [\*\*1] CHARACTER OF PROCEEDING: Criminal appeal from Cleveland Municipal Court, Case No. TRC-103929

**DISPOSITION:** Judgment of the Municipal Court reversed; cause remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from an order of the Cleveland Municipal Court (Ohio), which denied his motion to suppress evidence. Defendant was charged with driving under the influence, driving with a blood alcohol content reading over 0.17 (DBAC), and speeding. He entered a no contest plea to the DBAC charge, the other two counts were nolle prossed, and defendant was found guilty of the DBAC offense.

**OVERVIEW:** Defendant was stopped for exceeding the speed limit, and he was thereafter arrested and charged with multiple offenses arising from being intoxicated while driving. Defendant's suppression motion was denied. Thereafter, defendant pleaded no contest to one charge and the others were nol prossed. On appeal, defendant contended that the denial of suppression was error. The court found that the officer had reasonable suspicion that defendant was operating his vehicle in violation of the law, based on the excessive speed clocked by the officer's radar device, together with the officer's 30 years of experience. Accordingly, the vehicle stop was lawful. However, the court found that defendant's arrest for drunk driving was improper because the trial court's findings on the probable cause issue were against the manifest weight of the evidence. Although the officer testified to defendant's condition, which "appeared to be intoxicated," he also testified that defendant did not weave in his vehicle, his other actions were not indicative of one who was intoxicated, the field sobriety tests were not administered until after defendant was arrested, and the breath analyzer test was inadmissible.

**OUTCOME:** The court reversed the order of the trial court and remanded the matter for further proceedings.

**CORE TERMS:** arrest, driving, probable cause, intoxicated, sobriety, breath, analyzer, alcohol, influence of alcohol, arresting officer, bloodshot, probable cause to arrest, assignment of error, speeding, smell, odor of alcohol, videotape,

totality, indicia, glassy, drink, motor vehicle, intrusion, detainee, erratic, driver, beer, articulable suspicion, reasonable suspicion, drunk driving

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > General Overview***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN1] When addressing a suppression ruling, a reviewing court defers to the finder of fact as long as those facts are supported by competent, credible evidence. If the court's findings of fact are supported by credible competent evidence, the reviewing court then reviews the court's application of the law to those facts under a de novo standard.

#### ***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN2] In order for a vehicle stop to be proper, an officer must have a reasonable and articulable suspicion that a driver is either engaged in criminal activity or operating his motor vehicle in violation of the law. The reasonableness of the stop is viewed in light of the totality of the surrounding circumstances. The officer stopping the defendant must be able to articulate specific facts which, along with the reasonable inferences arising from those facts, reasonably warrant the intrusion which the stop comprises.

#### ***Constitutional Law > Bill of Rights > Fundamental Rights > Search & Seizure > Probable Cause***

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge***

#### ***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Exigent Circumstances > Reasonableness & Prudence Standard***

[HN3] Because an arrest is the ultimate intrusion upon a citizen's liberty, an arresting officer must have more than a reasonable, articulable suspicion of criminal activity. He must have probable cause to believe an individual has committed a crime. Further, an arrest without a warrant is constitutionally invalid unless the arresting officer had probable cause to make it at that time. To have probable cause, the arresting officer must have sufficient information derived from a reasonably trustworthy source to warrant a prudent man in believing that a felony has been committed and that it has been committed by the accused.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements***

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause***

#### ***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN4] For an arrest for driving under the influence of alcohol or with an illegal alcohol level, in determining whether an arresting officer had probable cause to arrest a defendant for driving with an alcohol blood level above the legal limit, a court must address the facts available to the officer at the time of the arrest. If, at the moment of the arrest, the facts and circumstances were trustworthy enough to induce a prudent person to believe that the defendant indeed had a blood alcohol above the legal limit while driving, then the officer had probable cause for the arrest. If, however, the officer lacked probable cause to arrest, then any evidence obtained as a result of that arrest is inadmissible.

#### ***Civil Procedure > Appeals > Standards of Review > De Novo Review***

#### ***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN5] Following an adverse ruling on a suppression motion, there are three methods to challenge a trial court's ruling.

First, the appealing party may challenge the findings of fact. This challenge requires a reviewing court to decide whether the court's findings are against the manifest weight of the evidence. Second, an appellant may argue that the trial court failed to apply the appropriate test or correct law to the findings of fact. In that case, an appellate court may reverse the trial court for committing an error of law. If the trial court has not erred in its findings of fact and "has properly identified the law to be applied," the appealing party can still challenge the court's final determination in its ruling on the law. When reviewing this type of claim, an appellate court must independently determine, without deference to the trial court's conclusion, whether the facts meet the appropriate legal standard in any given case. As the United States Supreme Court has held, as a general matter determinations of reasonable suspicion and probable cause should be reviewed de novo on appeal.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Criminal Law & Procedure > Arrests > Probable Cause  
Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN6] In reviewing adverse rulings on a suppression motion in drunk driving cases, the courts have traditionally evaluated the totality of the facts and circumstances. An arrest for driving under the influence need only be supported by the arresting officer's observations of indicia of alcohol consumption and operation of a motor vehicle while under the influence of alcohol. In determining whether adequate indicia existed at the time of the arrest, the courts examine a number of factors, including: (1) the time and day of the stop (Friday or Saturday night as opposed to, e.g., Tuesday morning); (2) the location of the stop (whether near establishments selling alcohol); (3) any indicia of erratic driving before the stop that may indicate a lack of coordination (speeding, weaving, unusual braking, etc.); (4) whether there is a cognizable report that the driver may be intoxicated; (5) the condition of the suspect's eyes (bloodshot, glassy, glazed, etc.); (6) impairments of the suspect's ability to speak (slurred speech, overly deliberate speech, etc.).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Criminal Law & Procedure > Arrests > Probable Cause  
Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN7] In reviewing adverse rulings on a suppression motion in drunk driving cases, the courts have traditionally evaluated the totality of the facts and circumstances. An arrest for driving under the influence need only be supported by the arresting officer's observations of indicia of alcohol consumption and operation of a motor vehicle while under the influence of alcohol. In determining whether adequate indicia existed at the time of the arrest, the courts examine a number of factors, including: (7) the odor of alcohol coming from the interior of the car, or, more significantly, on the suspect's person or breath; (8) the intensity of that odor, as described by the officer ("very strong," "strong," "moderate," "slight," etc.); (9) the suspect's demeanor (belligerent, uncooperative, etc.); (10) any actions by the suspect after the stop that might indicate a lack of coordination (dropping keys, falling over, fumbling for a wallet, etc.); and (11) the suspect's admission of alcohol consumption, the number of drinks had, and the amount of time in which they were consumed, if given. All of these factors, together with the officer's previous experience in dealing with drunken drivers, may be taken into account by a reviewing court in determining whether the officer acted reasonably. No single factor is determinative.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol  
& Field Sobriety > Admissibility  
Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable  
Cause  
Evidence > Scientific Evidence > Sobriety Tests***

[HN8] Several courts have barred the portable breath analyzer (PBT) tests for probable cause purposes. As the Ohio Court of Appeals, Third Appellate District, explained, the results of the PBT are inadmissible because the Ohio Department of Health no longer recognizes the test. Therefore, the results of the PBT cannot serve as probable cause to arrest an appellant for driving under the influence of alcohol.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Arrests > Probable Cause***

***Evidence > Scientific Evidence > Blood Alcohol***

[HN9] For an arrest for driving while intoxicated or with an excessive blood alcohol to be valid, a suspect need not display every possible indication that he is intoxicated. Nonetheless, the courts require a police officer to administer field sobriety tests or to have sufficient indication of intoxication before an arrest is made. Once the officer has stopped the vehicle for some minor traffic offense and begins the process of obtaining the offender's license and registration, the officer may then proceed to investigate the detainee for driving under the influence if he or she has a reasonable suspicion that the detainee may be intoxicated based on specific and articulable facts, such as where there are clear symptoms that the detainee is intoxicated. Nonetheless, an analysis of an investigatory stop leading to an arrest requires careful attention to each stage of the detention in order to make sure that the extent of the intrusion represented by each stage is warranted by the officer's reasonable and articulable suspicion at that point.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause***

[HN10] Investigating a detainee for possible inebriation includes administering field sobriety tests like the "finger to nose" test, the Horizontal Gaze Nystagmus test, the "walk and turn" test, and the "one leg stand" test. The portable breath analyzer test has, in the past, also been considered a test providing probable cause. The law prohibits driving under the influence of alcohol; it does not prohibit driving after the mere consumption of an alcoholic beverage. Just the smell of alcohol is not enough to establish driving under the influence. Nor is a defendant's admission of having had a drink. Glassy or bloodshot eyes, along with the smell of alcohol and an admission of having had a drink, may not be sufficient to arrest but are sufficient to merit further investigation in the form of field sobriety tests.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Arrests > Probable Cause***

[HN11] An arrest for driving while intoxicated can be made without sobriety tests first being performed, if there are sufficient indicia of intoxication apart from any sobriety tests. Thus the totality of the circumstances may support the finding that probable cause existed for an arrest even without a field sobriety test. These cases are inherently fact-sensitive.

**OPINION BY:** DIANE KARPINSKI

**OPINION:** AND

## JOURNAL ENTRY AND OPINION

KARPINSKI, J.

[\*P1] Defendant, Mark Sanders, appeals the trial court's denial of his motion to suppress following a suppression hearing. Defendant was charged with driving under the influence, driving with a blood alcohol content reading over 0.17, and speeding, in violation of Cleveland City Ordinances. Following the court's denial of his motion to suppress, he pleaded no contest to and was found guilty of operating a vehicle with a high alcohol concentration in violation of Cleveland Ordinance 433.01(a)(6). The other two counts were nolle.

[\*P2] Defendant appealed, stating one assignment [\*P2] of error with seven issues listed under that assignment. The assignment of error states:

[\*P3] THE TRIAL COURT ERRED TO THE PREJUDICE OF APPELLANT BY DENYING APPELLANT'S MOTION TO SUPPRESS EVIDENCE.

[\*P4] The first issue listed under this assignment of error states:

[\*P5] WHETHER THE ARRESTING OFFICER CONDUCTED AN IMPROPER WARRANTLESS STOP OF THE APPELLANT'S VEHICLE; THUS RENDERING ALL SUBSEQUENTLY OBTAINED EVIDENCE THE FRUIT OF AN UNCONSTITUTIONAL SEARCH AND SEIZURE IN VIOLATION OF THE RIGHTS GUARANTEED APPELLANT BY THE *FOURTH* AND *FOURTEENTH AMENDMENTS TO THE UNITED STATES CONSTITUTION* AND *ARTICLE I, SECTION 14 OF THE OHIO CONSTITUTION*.

[\*P6] Defendant claims that his stop was not justified because the officer lacked an articulable suspicion that criminal activity took place at the time of the stop. Because he believes that the officer lacked probable cause to stop him, he argues that any evidence obtained as a result of that stop is not admissible.

[\*P7] [HN1] When addressing a suppression ruling, a reviewing court defers to the finder of fact as long as those facts are supported by competent, credible evidence. *State v. Gibson (Mar. 17, 2000), Ross App. [\*\*3] No 99 CA 2516, 2000 Ohio App. LEXIS 1197*, citing *State v. Medcalf*. If the court's findings of fact are supported by credible competent evidence, the reviewing court then reviews the court's application of the law to those facts under a de novo standard.

[\*P8] [HN2] In order for a stop to be proper, the officer must have a reasonable and articulable suspicion that the driver is either engaged in criminal activity or operating his motor vehicle in violation of the law. *State v. Howell (Nov. 13, 1995), Warren App. No. CA95-06-057, 1995 Ohio App. LEXIS 5014*, citing *Delaware v. Prouse (1979), 440 U.S. 648, 663, 59 L. Ed. 2d 660, 99 S. Ct. 1391*; *State v. Brandenburg (1987), 41 Ohio App.3d 109, 110, 534 N.E.2d 906*. The reasonableness of the stop is viewed in light of the totality of the surrounding circumstances. *Id.*, citing *State v. Bobo (1988), 37 Ohio St.3d 177, 178, 524 N.E.2d 489*. The officer stopping the defendant must be able to articulate specific facts which, along with the reasonable inferences arising from those facts, reasonably warrant the intrusion which the stop comprises. *Terry v. Ohio (1968), 392 U.S. 1, 21-22, 20 L. Ed. 2d 889, 88 S. Ct. 1868*.

[\*P9] Defendant argues that the officer did not have a reasonable [\*P4] suspicion of illegal activity to justify the stop. The officer testified, however, that he had measured defendant's speed at 48 MPH in a 25 MPH zone with a radar device. The officer also testified that he had been a police officer for thirty years. The officer's experience, coupled with the readout from the radar device, provide a reasonable suspicion that defendant was operating his motor vehicle in violation of the law. This portion of the assignment of error is without merit.

[\*P10] Defendant also argues that his arrest for drunk driving was improper. He states the issue as follows:

[\*P11] WHETHER THE ARRESTING OFFICER CONDUCTED AN IMPROPER ARREST OF THE APPELLANT FOR DRIVING UNDER THE INFLUENCE OF ALCOHOL; [SIC] THUS RENDERING ALL

SUBSEQUENTLY OBTAINED EVIDENCE THE FRUIT OF AN UNCONSTITUTIONAL SEARCH AND SEIZURE IN VIOLATION OF THE RIGHTS GUARANTEED APPELLANT BY THE *FOURTH AND FOURTEENTH AMENDMENTS TO THE UNITED STATES CONSTITUTION AND ARTICLE I, SECTION 14 OF THE OHIO CONSTITUTION*.

[\*P12] Defendant argues that the arresting officer lacked probable cause to arrest him for driving under the influence of alcohol. [HN3] "Because an arrest is the ultimate intrusion upon [\*\*5] a citizen's liberty, the arresting officer must have more than a reasonable, articulable suspicion of criminal activity. He must have probable cause to believe the individual has committed a crime." *State v. Evans (1998)*, 127 Ohio App. 3d 56, 64, 711 N.E.2d 761.

[\*P13] Further, "an arrest without a warrant is constitutionally invalid unless the arresting officer had probable cause to make it at that time. To have probable cause, the arresting officer must have sufficient information derived from a reasonably trustworthy source to warrant a prudent man in believing that a felony has been committed and that it has been committed by the accused." *State v. Timson (1974)*, 38 Ohio St.2d 122, 311 N.E.2d 16, paragraph one of the syllabus.

[\*P14] Similarly, [HN4] for an arrest for driving under the influence or with an illegal alcohol level, in determining whether an arresting officer had probable cause to arrest a defendant for driving with an alcohol blood level above the legal limit, the court must address the facts available to the officer at the time of the arrest. If, at the moment of the arrest, the facts and circumstances were trustworthy enough to induce a prudent person to [\*\*6] believe that the defendant indeed had a blood alcohol above the legal limit while driving, then the officer had probable cause for the arrest. *Beck v. Ohio (1964)*, 379 U.S. 89, 91, 13 L. Ed. 2d 142, 85 S. Ct. 223. If, however, the officer lacked probable cause to arrest, then any evidence obtained as a result of that arrest is inadmissible. *State v. Timson (1974)*, 38 Ohio St.2d 122, 311 N.E.2d 16, paragraph two of the syllabus.

[\*P15] [HN5] Following an adverse ruling on a suppression motion, there are three methods to challenge the trial court's ruling. First, the appealing party may challenge the findings of fact. This challenge requires the reviewing court to decide whether the court's findings are against the manifest weight of the evidence. *State v. Barrett (Feb. 26, 2001)*, Licking App. No. 00CA-47, 2001 Ohio App. LEXIS 692, at \*4. "Second, an appellant may argue the trial court failed to apply the appropriate test or correct law to the findings of fact. In that case, an appellate court may reverse the trial court for committing an error of law." *Id.* If the trial court has not erred in its findings of fact and "has properly identified the law to be applied, [\*\*7] " the appealing party can still challenge the court's final determination in its ruling on the law. *Id.*

[\*P16] When reviewing this type of claim, an appellate court must independently determine, without deference to the trial court's conclusion, whether the facts meet the appropriate legal standard in any given case. \*\*\* As the United States Supreme Court held in *Ornelas v. U.S. (1996)*, 517 U.S. 690, 116 S. Ct. 1657, 134 L. Ed. 2d 911, "as a general matter determinations of reasonable suspicion and probable cause should be reviewed de novo on appeal."

[\*P17] *Id.* at \*4-5.

[\*P18] [HN6] In reviewing drunk driving cases, the courts have traditionally evaluated the totality of the facts and circumstances. *State v. Medcalf (1996)*, 111 Ohio App.3d 142, 147, 675 N.E.2d 1268. "An arrest for driving under the influence need only be supported by the arresting officer's observations of indicia of alcohol consumption and operation of a motor vehicle while under the influence of alcohol." *Id.*, citations omitted. In determining whether adequate indicia existed at the time of the arrest, the courts examine a number of factors:

[\*P19] \*\*\* These factors include, but [\*\*8] are not limited to: (1) the time and day of the stop (Friday or Saturday night as opposed to, e.g., Tuesday morning); (2) the location of the stop (whether near establishments selling alcohol); (3) any indicia of erratic driving before the stop that may indicate a lack of coordination (speeding, weaving, unusual braking, etc.); (4) whether there is a cognizable report that the driver may be intoxicated; (5) the condition of

the suspect's eyes (bloodshot, glassy, glazed, etc.); (6) impairments of the suspect's ability to speak (slurred speech, overly deliberate speech, etc.); [HN7] (7) the odor of alcohol coming from the interior of the car, or, more significantly, on the suspect's person or breath; (8) the intensity of that odor, as described by the officer ("very strong, "strong," "moderate," "slight," etc.); (9) the suspect's demeanor (belligerent, uncooperative, etc.); (10) any actions by the suspect after the stop that might indicate a lack of coordination (dropping keys, falling over, fumbling for a wallet, etc.); and (11) the suspect's admission of alcohol consumption, the number of drinks had, and the amount of time in which they were consumed, if given. All of these factors, together [\*\*9] with the officer's previous experience in dealing with drunken drivers, may be taken into account by a reviewing court in determining whether the officer acted reasonably. No single factor is determinative. *State v. Evans (1998), 127 Ohio App.3d 56, 63, fn. 2, 711 N.E.2d 761.*

[\*P20] The first question, then, is whether the court's findings were against the manifest weight of the evidence. The officer testified that defendant "appeared to be intoxicated." The only facts the officer cited to support his statement that defendant appeared intoxicated was, "His eyes were dilated. He had an odor of alcoholic beverage on his breath. \*\*\* I asked him if he had been drinking. He said yes. He had one drink." Id.

[\*P21] The officer, who had been a policeman for thirty years, also testified that he has made thousands of DUI arrests. He stated that he "tested [defendant] on the probable cause device, the portable breath analyzer. And in my estimate and the totality of the circumstances, lead me to arrest him for the DUI." Tr. 9. He agreed with the prosecutor's statement that because of the results of the breath analyzer, which he has used for seven or eight years, along with defendant's [\*\*10] driving, demeanor, smell of alcohol and his dilated eyes, he believed that defendant was "substantially impaired" such that he could not safely operate a motor vehicle.

[\*P22] The officer admitted on cross-examination that defendant did not weave, that he properly executed a lane change including using his signal, that he was cooperative, that he did not fumble when retrieving his driver's license, and that he was steady and did not sway or weave when standing outside the vehicle. The officer admitted, moreover, that he did not administer the field sobriety tests until after he arrested defendant. He decided to arrest "because he was intoxicated." Tr. 20. The officer repeatedly referenced his years of experience in arresting drunk drivers.

[\*P23] The officer also admitted that he was aware that the breath analyzer he used was not approved by the Ohio Department of Health, that he did not have any calibration records for that analyzer with him in court, and that he could not remember the manufacturer of the device. He also testified that the field sobriety tests, administered after the arrest when the defendant was back at the station, are subjective tests which do not [\*\*11] have numbered clues, so that the results are "based on experience and common sense." Tr. at 28. He stated that all the test results are subjective and denied any objective criteria for interpreting the sobriety tests. The officer also admitted that he arrested defendant after observing him for less than two minutes.

[\*P24] The issue, therefore, is whether the officer's observations were adequate to provide probable cause for the arrest. The videotape of the arrest shows that the officer arrested defendant immediately after taking the breath analyzer reading. The trial court ruled that this reading was not admissible. The only reason the court gave for barring this evidence was "on some point that defense counsel raised." Tr. at 70. We note, however, that [HN8] several courts have barred the portable breath analyzer tests for probable cause purposes. As the Third Appellate District explained, "the results of the PBT are inadmissible because the Ohio Department of Health no longer recognizes the test. Therefore, the results of the \*\*\* PBT could not serve as probable cause to arrest the appellant for driving under the influence of alcohol." *State v. Ferguson, Defiance App. No. 4-01-34, 2002 Ohio 1763.* [\*\*12] See also *State v. Anez (2000), 108 Ohio Misc. 2d 18, 738 N.E.2d 491*; *State v. Keith, Guernsey App. No. 02CA01, 2003 Ohio 2354* (where officer did not identify type of portable analyzer he used.)

[\*P25] Without that test, we are left with limited evidence of intoxication. The videotape shows that defendant walked steadily, spoke clearly, and followed the officer's orders promptly. Defendant was not driving erratically when he was stopped. And when he was told to exit his vehicle, he did not stumble or weave. Police had not received a report that defendant was intoxicated, nor was there any testimony that his eyes were bloodshot or glassy, though they were

dilated. The officer did not report any slurred speech. He did state there was the smell of alcohol on defendant's breath. Defendant readily admitted to drinking one cocktail, but the record does not indicate at what time he had it. Few, if any, of the factors listed in *Evans, supra*, therefore, justified the arrest for drunk driving.

[\*P26] [HN9] For an arrest for driving while intoxicated or with an excessive blood alcohol to be valid, a suspect need not display every possible indication that he [\*\*13] is intoxicated. *State v. Barrett (Feb. 26, 2001), Licking App. No. 00CA-47, 2001 Ohio App. LEXIS 692*. Nonetheless, the courts require the officer to administer field sobriety tests or to have sufficient indication of intoxication before an arrest is made.

[\*P27] "Once the officer has stopped the vehicle for some minor traffic offense and begins the process of obtaining the offender's license and registration, the officer may then proceed to investigate the detainee for driving under the influence if he or she has a reasonable suspicion that the detainee may be intoxicated based on specific and articulable facts, such as where there are clear symptoms that the detainee is intoxicated." *1996 Ohio App. LEXIS 3361 at \*8.*" *State v. Evans*, quoting *State v. Yemma, (Aug. 9, 1996), Portage App. No. 95-P-0156, 1996 Ohio App. LEXIS 3361*.

[\*P28] Nonetheless, "an analysis of an investigatory stop leading to an arrest requires careful attention to each stage of the detention in order to make sure that the extent of the intrusion represented by each stage is warranted by the officer's reasonable and articulable suspicion at that point." *State v. Spillers (Mar. 24, 2000), Darke App. No. 1504, 2000 Ohio App. LEXIS 1151, [\*\*14] at \*7*.

[\*P29] [HN10] Investigating a detainee for possible inebriation includes administering field sobriety tests like the "finger to nose" test, the Horizontal Gaze Nystagmus test (HGN), the "walk and turn" test, and the "one leg stand" test. The portable breath analyzer test has, in the past, also been considered a test providing probable cause. Except for the breath analyzer test, which has been barred for consideration for probable cause, the officer used none of these tests prior to arresting defendant.

[\*P30] As Judge Fain has noted, "The law prohibits driving under the influence of alcohol; it does not prohibit driving after the mere consumption of an alcoholic beverage." *U.S. v. Frantz (2001), 177 F. Supp. 2d 760, 762*, quoting *State v. Spillers 2000 Ohio App. LEXIS 1151, at \*3*; see also *State v. Dixon 2000 Ohio App. LEXIS 5661, at \*2*; *State v. Taylor (1981), 3 Ohio App.3d 197, 198, 3 Ohio B. 224, 444 N.E.2d 481*. As the court in *Dixon* noted, just the smell of alcohol is not enough to establish driving under the influence. Nor is the defendant's admission of having had a drink. In *Frantz*, the court noted that glassy or bloodshot [\*\*15] eyes, along with the smell of alcohol and an admission of having had a drink, may not be sufficient to arrest but are sufficient to merit further investigation in the form of field sobriety tests. *Frantz at 763*.

[\*P31] In a case similar to the case at bar, the Second Appellate District found that when a defendant had admitted to having a couple of beers, had glassy, bloodshot eyes, gave off a strong odor of alcohol, and was speeding well in excess of the speed limit, "although these facts, by themselves, may not rise to the level of probable cause for an arrest, they are sufficient to justify the lesser intrusion of requiring [the defendant] to perform field sobriety tests." *State v. Cooper, Clark App. No. 2001-CA-86, P25, 2002 Ohio 2778*; *State v. Cowell, Montgomery App. No. 19119, 2002 Ohio 5126*, holding that the officer's hearing defendant's truck hit the curb, coupled with an odor of alcohol, an admission to having two or three beers, and the presence of a can of beer in the passenger door was sufficient to justify asking defendant to perform field sobriety tests. See also *State v. Downey (1987), 37 Ohio App.3d 45, 523 N.E.2d 521*; *State v. Evans, (1988) 127 Ohio App.3d 56, 711 N.E.2d 761*. [\*\*16] In the case at bar, the officer did not perform the sobriety tests until after the arrest.

[\*P32] [HN11] An arrest for driving while intoxicated can never be made without sobriety tests first being performed, if there are sufficient indicia of intoxication apart from any sobriety tests. *State v. Homan (2000), 89 Ohio St.3d 421, 2000 Ohio 212, 732 N.E.2d 952*. Thus the totality of the circumstances may support the finding that probable cause existed for an arrest even without a field sobriety test. *Id.* "These cases are inherently fact-sensitive." *Cooper*,

*supra*.

[\*P33] On the other hand, the First Appellate District found that speeding and the odor of alcohol, without more, did not provide probable cause to arrest. *State v. Taylor (1981)*, 3 Ohio App.3d 197, 3 Ohio B. 224, 444 N.E.2d 481. The Fourth Appellate District court also found that bloodshot eyes, a little difficulty exiting a vehicle, less than fluid speech, admission to having a couple of drinks, without an observation of erratic driving, was insufficient to provide probable cause for an arrest. *State v. Theiss (Dec. 17, 2001)*, Athens App. No. 01CA37, 2001 Ohio 2630.

[\*P34] In a case in which no traffic violation occurred, [\*\*17] but rather the defendant's car lacked a license plate light, the court found that because the officer "did not observe erratic or impaired driving on the part of" the defendant, who did not "appear to have any problem pulling the vehicle to the side of the road," the mere presence of bloodshot and watery eyes and moderate odor of alcohol did not justify an arrest for driving under the influence of alcohol. Despite the defendant's poor performance on the HGN test, from the totality of the circumstances, the court could not "rationally conclude that there was probable cause to arrest \*\*\*." *State v. Sanders, Marion App. No. 9-2000-56, 2000 Ohio 1813, 2000 Ohio App. LEXIS 6232, \*7-8*. But see *State v. Ousley (Sept. 20, 1999)*, Ross App. No. 99CA-2476, 1999 Ohio App. LEXIS 4459, at \*7-8.

[\*P35] In the case at bar, although defendant was speeding, the videotape shows no erratic driving. Rather, defendant safely maneuvered his car from the left lane to the right, using his turn signal, turned onto a side street, again using his turn signal, and pulled into a parking lot with no difficulty. The officer stated merely that he knew defendant was intoxicated [\*\*18] without any other indicia than the speeding and the dilated pupils. These circumstances do not justify an arrest for driving under the influence of alcohol.

[\*P36] In *State v. Dixon (Dec. 1, 2000)*, Greene App. No. 2000-CA30, 2000 Ohio App. LEXIS 5661, the court held that the smell of alcohol, along with glassy, bloodshot eyes and the admission that the defendant had one or two beers was insufficient to justify even administering the field sobriety tests. Although the defendant in *Dixon* had not committed a traffic violation but rather was stopped for tinted windows, the facts in *Dixon* are otherwise similar to the case at bar.

[\*P37] The determination of whether probable cause existed to arrest for driving while intoxicated, as we previously noted, is very fact specific. In the case at bar, after reviewing the videotape of defendant's arrest, and, even taking into consideration the fact that the videotape could not convey the strong smell of alcohol the officer noted on defendant, we find that at the time of the arrest, the officer lacked sufficient evidence of intoxication to provide probable cause to justify an arrest for drunk driving. This assignment of error has merit.

[\*P38] [\*\*19] Because the arrest was improper, the evidence resulting from the arrest was not admissible. We conclude that the trial court erred in overruling defendant's motion to suppress the evidence. This case is reversed and remanded for further proceedings consistent with this opinion. n1

n1 This court's decision in Assignment of Error I renders the remaining issues moot.

3. WHETHER THE TRIAL COURT ERRED IN FAILING TO SUPPRESS EVIDENCE AT TRIAL THE RESULTS [sic] OF APPELLANT'S PERFORMANCE ON THE ONE LEG STAND TEST, THE WALK AND TURN TEST, THE FINGERS TO NOSE TEST, AND THE ALPHABET TEST BASED UPON THE ARRESTING OFFICER'S FAILURE TO ADMINISTER AND EVALUATE SAID TESTS IN STRICT COMPLIANCE WITH THE NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION OR N.H.T.S.A. STANDARDS GOVERNING STANDARDIZED FIELD SOBRIETY TESTING.

4. WHETHER THE ARRESTING AGENCY ADMINISTERING THE TEST OF APPELLANT'S BREATH ALCOHOL LEVEL SUBSTANTIALLY COMPLIED WITH OHIO ADMINISTRATIVE CODE SECTION

3701-53-04(A)(2).

5. WHETHER THE ARRESTING AGENCY ADMINISTERING THE TEST OF APPELLANT'S BREATH ALCOHOL LEVEL SUBSTANTIALLY COMPLIED WITH *OHIO ADMINISTRATIVE CODE SECTION 3701-53-04*.

5. WHETHER THE ARRESTING AGENCY ADMINISTERING THE TEST OF APPELLANT'S BREATH ALCOHOL LEVEL SUBSTANTIALLY COMPLIED WITH *OHIO ADMINISTRATIVE CODE SECTION 3701-53-04(E)*.

7. THE STATE OF OHIO HAS FAILED TO SUBSTANTIALLY COMPLY WITH THE TIME LIMITS AND REGULATIONS IN *R.C. 4511.19(B)* AND *OAC 3701-53-02*, INCLUDING THE OPERATOR'S CHECKLIST INSTRUCTIONS ISSUED BY THE OHIO DEPARTMENT OF HEALTH INCLUDED IN THE APPENDICES TO *OAC 3701-53-02*.

[\*\*20]

[\*P39] This cause is reversed and remanded.

It is, therefore, ordered that appellant recover of appellee his costs herein taxed.

It is ordered that a special mandate be sent to said court to carry this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

JAMES J. SWEENEY, J., CONCURS; ANN DYKE, P.J., CONCURS IN JUDGMENT ONLY;

DIANE KARPINSKI

JUDGE

N.B. This entry is an announcement of the court's decision. See *App.R. 22(B), 22(D)* and *26(A)*; *Loc.App.R. 22*. This decision will be journalized and will become the judgment and order of the court pursuant to *App.R. 22(E)* unless a motion for reconsideration with supporting brief, per *App.R. 26(A)*, is filed within ten (10) days of the announcement of the court's decision. The time period for review by the Supreme Court of Ohio shall begin to run upon the journalization of this court's announcement of decision by the clerk per *App.R. 22(E)* [\*\*21] . See, also, *S. Ct. Prac.R. II, Section 2(A)(1)*.

**CITY OF CLEVELAND, Plaintiff-appellee vs. MARK SANDERS,  
Defendant-appellant**

**NO. 83073**

**COURT OF APPEALS OF OHIO, EIGHTH APPELLATE DISTRICT,  
CUYAHOGA COUNTY**

*2004 Ohio 4473; 2004 Ohio App. LEXIS 4057*

**August 26, 2004, Date of Announcement of Decision**

**PRIOR HISTORY:** [\*\*1] CHARACTER OF PROCEEDING: Criminal appeal from Cleveland Municipal Court, Case No. TRC-103929

**DISPOSITION:** Judgment of the Municipal Court reversed; cause remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from an order of the Cleveland Municipal Court (Ohio), which denied his motion to suppress evidence. Defendant was charged with driving under the influence, driving with a blood alcohol content reading over 0.17 (DBAC), and speeding. He entered a no contest plea to the DBAC charge, the other two counts were nolle prossed, and defendant was found guilty of the DBAC offense.

**OVERVIEW:** Defendant was stopped for exceeding the speed limit, and he was thereafter arrested and charged with multiple offenses arising from being intoxicated while driving. Defendant's suppression motion was denied. Thereafter, defendant pleaded no contest to one charge and the others were nol prossed. On appeal, defendant contended that the denial of suppression was error. The court found that the officer had reasonable suspicion that defendant was operating his vehicle in violation of the law, based on the excessive speed clocked by the officer's radar device, together with the officer's 30 years of experience. Accordingly, the vehicle stop was lawful. However, the court found that defendant's arrest for drunk driving was improper because the trial court's findings on the probable cause issue were against the manifest weight of the evidence. Although the officer testified to defendant's condition, which "appeared to be intoxicated," he also testified that defendant did not weave in his vehicle, his other actions were not indicative of one who was intoxicated, the field sobriety tests were not administered until after defendant was arrested, and the breath analyzer test was inadmissible.

**OUTCOME:** The court reversed the order of the trial court and remanded the matter for further proceedings.

**CORE TERMS:** arrest, driving, probable cause, intoxicated, sobriety, breath, analyzer, alcohol, influence of alcohol, arresting officer, bloodshot, probable cause to arrest, assignment of error, speeding, smell, odor of alcohol, videotape,

totality, indicia, glassy, drink, motor vehicle, intrusion, detainee, erratic, driver, beer, articulable suspicion, reasonable suspicion, drunk driving

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > General Overview***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN1] When addressing a suppression ruling, a reviewing court defers to the finder of fact as long as those facts are supported by competent, credible evidence. If the court's findings of fact are supported by credible competent evidence, the reviewing court then reviews the court's application of the law to those facts under a de novo standard.

#### ***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN2] In order for a vehicle stop to be proper, an officer must have a reasonable and articulable suspicion that a driver is either engaged in criminal activity or operating his motor vehicle in violation of the law. The reasonableness of the stop is viewed in light of the totality of the surrounding circumstances. The officer stopping the defendant must be able to articulate specific facts which, along with the reasonable inferences arising from those facts, reasonably warrant the intrusion which the stop comprises.

#### ***Constitutional Law > Bill of Rights > Fundamental Rights > Search & Seizure > Probable Cause***

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge***

#### ***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Exigent Circumstances > Reasonableness & Prudence Standard***

[HN3] Because an arrest is the ultimate intrusion upon a citizen's liberty, an arresting officer must have more than a reasonable, articulable suspicion of criminal activity. He must have probable cause to believe an individual has committed a crime. Further, an arrest without a warrant is constitutionally invalid unless the arresting officer had probable cause to make it at that time. To have probable cause, the arresting officer must have sufficient information derived from a reasonably trustworthy source to warrant a prudent man in believing that a felony has been committed and that it has been committed by the accused.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements***

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause***

#### ***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN4] For an arrest for driving under the influence of alcohol or with an illegal alcohol level, in determining whether an arresting officer had probable cause to arrest a defendant for driving with an alcohol blood level above the legal limit, a court must address the facts available to the officer at the time of the arrest. If, at the moment of the arrest, the facts and circumstances were trustworthy enough to induce a prudent person to believe that the defendant indeed had a blood alcohol above the legal limit while driving, then the officer had probable cause for the arrest. If, however, the officer lacked probable cause to arrest, then any evidence obtained as a result of that arrest is inadmissible.

#### ***Civil Procedure > Appeals > Standards of Review > De Novo Review***

#### ***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN5] Following an adverse ruling on a suppression motion, there are three methods to challenge a trial court's ruling.

First, the appealing party may challenge the findings of fact. This challenge requires a reviewing court to decide whether the court's findings are against the manifest weight of the evidence. Second, an appellant may argue that the trial court failed to apply the appropriate test or correct law to the findings of fact. In that case, an appellate court may reverse the trial court for committing an error of law. If the trial court has not erred in its findings of fact and "has properly identified the law to be applied," the appealing party can still challenge the court's final determination in its ruling on the law. When reviewing this type of claim, an appellate court must independently determine, without deference to the trial court's conclusion, whether the facts meet the appropriate legal standard in any given case. As the United States Supreme Court has held, as a general matter determinations of reasonable suspicion and probable cause should be reviewed de novo on appeal.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Criminal Law & Procedure > Arrests > Probable Cause  
Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN6] In reviewing adverse rulings on a suppression motion in drunk driving cases, the courts have traditionally evaluated the totality of the facts and circumstances. An arrest for driving under the influence need only be supported by the arresting officer's observations of indicia of alcohol consumption and operation of a motor vehicle while under the influence of alcohol. In determining whether adequate indicia existed at the time of the arrest, the courts examine a number of factors, including: (1) the time and day of the stop (Friday or Saturday night as opposed to, e.g., Tuesday morning); (2) the location of the stop (whether near establishments selling alcohol); (3) any indicia of erratic driving before the stop that may indicate a lack of coordination (speeding, weaving, unusual braking, etc.); (4) whether there is a cognizable report that the driver may be intoxicated; (5) the condition of the suspect's eyes (bloodshot, glassy, glazed, etc.); (6) impairments of the suspect's ability to speak (slurred speech, overly deliberate speech, etc.).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Criminal Law & Procedure > Arrests > Probable Cause  
Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN7] In reviewing adverse rulings on a suppression motion in drunk driving cases, the courts have traditionally evaluated the totality of the facts and circumstances. An arrest for driving under the influence need only be supported by the arresting officer's observations of indicia of alcohol consumption and operation of a motor vehicle while under the influence of alcohol. In determining whether adequate indicia existed at the time of the arrest, the courts examine a number of factors, including: (7) the odor of alcohol coming from the interior of the car, or, more significantly, on the suspect's person or breath; (8) the intensity of that odor, as described by the officer ("very strong," "strong," "moderate," "slight," etc.); (9) the suspect's demeanor (belligerent, uncooperative, etc.); (10) any actions by the suspect after the stop that might indicate a lack of coordination (dropping keys, falling over, fumbling for a wallet, etc.); and (11) the suspect's admission of alcohol consumption, the number of drinks had, and the amount of time in which they were consumed, if given. All of these factors, together with the officer's previous experience in dealing with drunken drivers, may be taken into account by a reviewing court in determining whether the officer acted reasonably. No single factor is determinative.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol  
& Field Sobriety > Admissibility  
Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable  
Cause  
Evidence > Scientific Evidence > Sobriety Tests***

[HN8] Several courts have barred the portable breath analyzer (PBT) tests for probable cause purposes. As the Ohio Court of Appeals, Third Appellate District, explained, the results of the PBT are inadmissible because the Ohio Department of Health no longer recognizes the test. Therefore, the results of the PBT cannot serve as probable cause to arrest an appellant for driving under the influence of alcohol.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Arrests > Probable Cause***

***Evidence > Scientific Evidence > Blood Alcohol***

[HN9] For an arrest for driving while intoxicated or with an excessive blood alcohol to be valid, a suspect need not display every possible indication that he is intoxicated. Nonetheless, the courts require a police officer to administer field sobriety tests or to have sufficient indication of intoxication before an arrest is made. Once the officer has stopped the vehicle for some minor traffic offense and begins the process of obtaining the offender's license and registration, the officer may then proceed to investigate the detainee for driving under the influence if he or she has a reasonable suspicion that the detainee may be intoxicated based on specific and articulable facts, such as where there are clear symptoms that the detainee is intoxicated. Nonetheless, an analysis of an investigatory stop leading to an arrest requires careful attention to each stage of the detention in order to make sure that the extent of the intrusion represented by each stage is warranted by the officer's reasonable and articulable suspicion at that point.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause***

[HN10] Investigating a detainee for possible inebriation includes administering field sobriety tests like the "finger to nose" test, the Horizontal Gaze Nystagmus test, the "walk and turn" test, and the "one leg stand" test. The portable breath analyzer test has, in the past, also been considered a test providing probable cause. The law prohibits driving under the influence of alcohol; it does not prohibit driving after the mere consumption of an alcoholic beverage. Just the smell of alcohol is not enough to establish driving under the influence. Nor is a defendant's admission of having had a drink. Glassy or bloodshot eyes, along with the smell of alcohol and an admission of having had a drink, may not be sufficient to arrest but are sufficient to merit further investigation in the form of field sobriety tests.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Arrests > Probable Cause***

[HN11] An arrest for driving while intoxicated can be made without sobriety tests first being performed, if there are sufficient indicia of intoxication apart from any sobriety tests. Thus the totality of the circumstances may support the finding that probable cause existed for an arrest even without a field sobriety test. These cases are inherently fact-sensitive.

**OPINION:** AND

## JOURNAL ENTRY AND OPINION

KARPINSKI, J.

[\*P1] Defendant, Mark Sanders, appeals the trial court's denial of his motion to suppress following a suppression hearing. Defendant was charged with driving under the influence, driving with a blood alcohol content reading over 0.17, and speeding, in violation of Cleveland City Ordinances. Following the court's denial of his motion to suppress, he pleaded no contest to and was found guilty of operating a vehicle with a high alcohol concentration in violation of Cleveland Ordinance 433.01(a)(6). The other two counts were nolle.

[\*P2] Defendant appealed, stating one assignment [\*P2] of error with seven issues listed under that assignment. The assignment of error states:

[\*P3] THE TRIAL COURT ERRED TO THE PREJUDICE OF APPELLANT BY DENYING APPELLANT'S MOTION TO SUPPRESS EVIDENCE.

[\*P4] The first issue listed under this assignment of error states:

[\*P5] WHETHER THE ARRESTING OFFICER CONDUCTED AN IMPROPER WARRANTLESS STOP OF THE APPELLANT'S VEHICLE; THUS RENDERING ALL SUBSEQUENTLY OBTAINED EVIDENCE THE FRUIT OF AN UNCONSTITUTIONAL SEARCH AND SEIZURE IN VIOLATION OF THE RIGHTS GUARANTEED APPELLANT BY THE *FOURTH* AND *FOURTEENTH AMENDMENTS TO THE UNITED STATES CONSTITUTION* AND *ARTICLE I, SECTION 14 OF THE OHIO CONSTITUTION*.

[\*P6] Defendant claims that his stop was not justified because the officer lacked an articulable suspicion that criminal activity took place at the time of the stop. Because he believes that the officer lacked probable cause to stop him, he argues that any evidence obtained as a result of that stop is not admissible.

[\*P7] [HN1] When addressing a suppression ruling, a reviewing court defers to the finder of fact as long as those facts are supported by competent, credible evidence. *State v. Gibson (Mar. 17, 2000), Ross App. [\*\*3] No 99 CA 2516, 2000 Ohio App. LEXIS 1197*, citing *State v. Medcalf*. If the court's findings of fact are supported by credible competent evidence, the reviewing court then reviews the court's application of the law to those facts under a de novo standard.

[\*P8] [HN2] In order for a stop to be proper, the officer must have a reasonable and articulable suspicion that the driver is either engaged in criminal activity or operating his motor vehicle in violation of the law. *State v. Howell (Nov. 13, 1995), Warren App. No. CA95-06-057, 1995 Ohio App. LEXIS 5014*, citing *Delaware v. Prouse (1979), 440 U.S. 648, 663, 59 L. Ed. 2d 660, 99 S. Ct. 1391*; *State v. Brandenburg (1987), 41 Ohio App.3d 109, 110, 534 N.E.2d 906*. The reasonableness of the stop is viewed in light of the totality of the surrounding circumstances. *Id.*, citing *State v. Bobo (1988), 37 Ohio St.3d 177, 178, 524 N.E.2d 489*. The officer stopping the defendant must be able to articulate specific facts which, along with the reasonable inferences arising from those facts, reasonably warrant the intrusion which the stop comprises. *Terry v. Ohio (1968), 392 U.S. 1, 21-22, 20 L. Ed. 2d 889, 88 S. Ct. 1868*.

[\*P9] Defendant argues that the officer did not have a reasonable [\*P4] suspicion of illegal activity to justify the stop. The officer testified, however, that he had measured defendant's speed at 48 MPH in a 25 MPH zone with a radar device. The officer also testified that he had been a police officer for thirty years. The officer's experience, coupled with the readout from the radar device, provide a reasonable suspicion that defendant was operating his motor vehicle in violation of the law. This portion of the assignment of error is without merit.

[\*P10] Defendant also argues that his arrest for drunk driving was improper. He states the issue as follows:

[\*P11] WHETHER THE ARRESTING OFFICER CONDUCTED AN IMPROPER ARREST OF THE APPELLANT FOR DRIVING UNDER THE INFLUENCE OF ALCOHOL; [SIC] THUS RENDERING ALL

SUBSEQUENTLY OBTAINED EVIDENCE THE FRUIT OF AN UNCONSTITUTIONAL SEARCH AND SEIZURE IN VIOLATION OF THE RIGHTS GUARANTEED APPELLANT BY THE *FOURTH AND FOURTEENTH AMENDMENTS TO THE UNITED STATES CONSTITUTION AND ARTICLE I, SECTION 14 OF THE OHIO CONSTITUTION*.

[\*P12] Defendant argues that the arresting officer lacked probable cause to arrest him for driving under the influence of alcohol. [HN3] "Because an arrest is the ultimate intrusion upon [\*\*5] a citizen's liberty, the arresting officer must have more than a reasonable, articulable suspicion of criminal activity. He must have probable cause to believe the individual has committed a crime." *State v. Evans (1998)*, 127 Ohio App. 3d 56, 64, 711 N.E.2d 761.

[\*P13] Further, "an arrest without a warrant is constitutionally invalid unless the arresting officer had probable cause to make it at that time. To have probable cause, the arresting officer must have sufficient information derived from a reasonably trustworthy source to warrant a prudent man in believing that a felony has been committed and that it has been committed by the accused." *State v. Timson (1974)*, 38 Ohio St.2d 122, 311 N.E.2d 16, paragraph one of the syllabus.

[\*P14] Similarly, [HN4] for an arrest for driving under the influence or with an illegal alcohol level, in determining whether an arresting officer had probable cause to arrest a defendant for driving with an alcohol blood level above the legal limit, the court must address the facts available to the officer at the time of the arrest. If, at the moment of the arrest, the facts and circumstances were trustworthy enough to induce a prudent person to [\*\*6] believe that the defendant indeed had a blood alcohol above the legal limit while driving, then the officer had probable cause for the arrest. *Beck v. Ohio (1964)*, 379 U.S. 89, 91, 13 L. Ed. 2d 142, 85 S. Ct. 223. If, however, the officer lacked probable cause to arrest, then any evidence obtained as a result of that arrest is inadmissible. *State v. Timson (1974)*, 38 Ohio St.2d 122, 311 N.E.2d 16, paragraph two of the syllabus.

[\*P15] [HN5] Following an adverse ruling on a suppression motion, there are three methods to challenge the trial court's ruling. First, the appealing party may challenge the findings of fact. This challenge requires the reviewing court to decide whether the court's findings are against the manifest weight of the evidence. *State v. Barrett (Feb. 26, 2001)*, Licking App. No. 00CA-47, 2001 Ohio App. LEXIS 692, at \*4. "Second, an appellant may argue the trial court failed to apply the appropriate test or correct law to the findings of fact. In that case, an appellate court may reverse the trial court for committing an error of law." *Id.* If the trial court has not erred in its findings of fact and "has properly identified the law to be applied, [\*\*7] " the appealing party can still challenge the court's final determination in its ruling on the law. *Id.*

[\*P16] When reviewing this type of claim, an appellate court must independently determine, without deference to the trial court's conclusion, whether the facts meet the appropriate legal standard in any given case. \*\*\* As the United States Supreme Court held in *Ornelas v. U.S. (1996)*, 517 U.S. 690, 116 S. Ct. 1657, 134 L. Ed. 2d 911, "as a general matter determinations of reasonable suspicion and probable cause should be reviewed de novo on appeal."

[\*P17] *Id.* at \*4-5.

[\*P18] [HN6] In reviewing drunk driving cases, the courts have traditionally evaluated the totality of the facts and circumstances. *State v. Medcalf (1996)*, 111 Ohio App.3d 142, 147, 675 N.E.2d 1268. "An arrest for driving under the influence need only be supported by the arresting officer's observations of indicia of alcohol consumption and operation of a motor vehicle while under the influence of alcohol." *Id.*, citations omitted. In determining whether adequate indicia existed at the time of the arrest, the courts examine a number of factors:

[\*P19] \*\*\* These factors include, but [\*\*8] are not limited to: (1) the time and day of the stop (Friday or Saturday night as opposed to, e.g., Tuesday morning); (2) the location of the stop (whether near establishments selling alcohol); (3) any indicia of erratic driving before the stop that may indicate a lack of coordination (speeding, weaving, unusual braking, etc.); (4) whether there is a cognizable report that the driver may be intoxicated; (5) the condition of

the suspect's eyes (bloodshot, glassy, glazed, etc.); (6) impairments of the suspect's ability to speak (slurred speech, overly deliberate speech, etc.); [HN7] (7) the odor of alcohol coming from the interior of the car, or, more significantly, on the suspect's person or breath; (8) the intensity of that odor, as described by the officer ("very strong, "strong," "moderate," "slight," etc.); (9) the suspect's demeanor (belligerent, uncooperative, etc.); (10) any actions by the suspect after the stop that might indicate a lack of coordination (dropping keys, falling over, fumbling for a wallet, etc.); and (11) the suspect's admission of alcohol consumption, the number of drinks had, and the amount of time in which they were consumed, if given. All of these factors, together [\*\*9] with the officer's previous experience in dealing with drunken drivers, may be taken into account by a reviewing court in determining whether the officer acted reasonably. No single factor is determinative. *State v. Evans (1998), 127 Ohio App.3d 56, 63, fn. 2, 711 N.E.2d 761.*

[\*P20] The first question, then, is whether the court's findings were against the manifest weight of the evidence. The officer testified that defendant "appeared to be intoxicated." The only facts the officer cited to support his statement that defendant appeared intoxicated was, "His eyes were dilated. He had an odor of alcoholic beverage on his breath. \*\*\* I asked him if he had been drinking. He said yes. He had one drink." Id.

[\*P21] The officer, who had been a policeman for thirty years, also testified that he has made thousands of DUI arrests. He stated that he "tested [defendant] on the probable cause device, the portable breath analyzer. And in my estimate and the totality of the circumstances, lead me to arrest him for the DUI." Tr. 9. He agreed with the prosecutor's statement that because of the results of the breath analyzer, which he has used for seven or eight years, along with defendant's [\*\*10] driving, demeanor, smell of alcohol and his dilated eyes, he believed that defendant was "substantially impaired" such that he could not safely operate a motor vehicle.

[\*P22] The officer admitted on cross-examination that defendant did not weave, that he properly executed a lane change including using his signal, that he was cooperative, that he did not fumble when retrieving his driver's license, and that he was steady and did not sway or weave when standing outside the vehicle. The officer admitted, moreover, that he did not administer the field sobriety tests until after he arrested defendant. He decided to arrest "because he was intoxicated." Tr. 20. The officer repeatedly referenced his years of experience in arresting drunk drivers.

[\*P23] The officer also admitted that he was aware that the breath analyzer he used was not approved by the Ohio Department of Health, that he did not have any calibration records for that analyzer with him in court, and that he could not remember the manufacturer of the device. He also testified that the field sobriety tests, administered after the arrest when the defendant was back at the station, are subjective tests which do not [\*\*11] have numbered clues, so that the results are "based on experience and common sense." Tr. at 28. He stated that all the test results are subjective and denied any objective criteria for interpreting the sobriety tests. The officer also admitted that he arrested defendant after observing him for less than two minutes.

[\*P24] The issue, therefore, is whether the officer's observations were adequate to provide probable cause for the arrest. The videotape of the arrest shows that the officer arrested defendant immediately after taking the breath analyzer reading. The trial court ruled that this reading was not admissible. The only reason the court gave for barring this evidence was "on some point that defense counsel raised." Tr. at 70. We note, however, that [HN8] several courts have barred the portable breath analyzer tests for probable cause purposes. As the Third Appellate District explained, "the results of the PBT are inadmissible because the Ohio Department of Health no longer recognizes the test. Therefore, the results of the \*\*\* PBT could not serve as probable cause to arrest the appellant for driving under the influence of alcohol." *State v. Ferguson, Defiance App. No. 4-01-34, 2002 Ohio 1763.* [\*\*12] See also *State v. Anez (2000), 108 Ohio Misc. 2d 18, 738 N.E.2d 491*; *State v. Keith, Guernsey App. No. 02CA01, 2003 Ohio 2354* (where officer did not identify type of portable analyzer he used.)

[\*P25] Without that test, we are left with limited evidence of intoxication. The videotape shows that defendant walked steadily, spoke clearly, and followed the officer's orders promptly. Defendant was not driving erratically when he was stopped. And when he was told to exit his vehicle, he did not stumble or weave. Police had not received a report that defendant was intoxicated, nor was there any testimony that his eyes were bloodshot or glassy, though they were

dilated. The officer did not report any slurred speech. He did state there was the smell of alcohol on defendant's breath. Defendant readily admitted to drinking one cocktail, but the record does not indicate at what time he had it. Few, if any, of the factors listed in *Evans, supra*, therefore, justified the arrest for drunk driving.

[\*P26] [HN9] For an arrest for driving while intoxicated or with an excessive blood alcohol to be valid, a suspect need not display every possible indication that he [\*\*13] is intoxicated. *State v. Barrett (Feb. 26, 2001), Licking App. No. 00CA-47, 2001 Ohio App. LEXIS 692*. Nonetheless, the courts require the officer to administer field sobriety tests or to have sufficient indication of intoxication before an arrest is made.

[\*P27] "Once the officer has stopped the vehicle for some minor traffic offense and begins the process of obtaining the offender's license and registration, the officer may then proceed to investigate the detainee for driving under the influence if he or she has a reasonable suspicion that the detainee may be intoxicated based on specific and articulable facts, such as where there are clear symptoms that the detainee is intoxicated." *1996 Ohio App. LEXIS 3361 at \*8.*" *State v. Evans*, quoting *State v. Yemma, (Aug. 9, 1996), Portage App. No. 95-P-0156, 1996 Ohio App. LEXIS 3361*.

[\*P28] Nonetheless, "an analysis of an investigatory stop leading to an arrest requires careful attention to each stage of the detention in order to make sure that the extent of the intrusion represented by each stage is warranted by the officer's reasonable and articulable suspicion at that point." *State v. Spillers (Mar. 24, 2000), Darke App. No. 1504, 2000 Ohio App. LEXIS 1151, [\*\*14] at \*7*.

[\*P29] [HN10] Investigating a detainee for possible inebriation includes administering field sobriety tests like the "finger to nose" test, the Horizontal Gaze Nystagmus test (HGN), the "walk and turn" test, and the "one leg stand" test. The portable breath analyzer test has, in the past, also been considered a test providing probable cause. Except for the breath analyzer test, which has been barred for consideration for probable cause, the officer used none of these tests prior to arresting defendant.

[\*P30] As Judge Fain has noted, "The law prohibits driving under the influence of alcohol; it does not prohibit driving after the mere consumption of an alcoholic beverage." *U.S. v. Frantz (2001), 177 F. Supp. 2d 760, 762*, quoting *State v. Spillers 2000 Ohio App. LEXIS 1151, at \*3*; see also *State v. Dixon 2000 Ohio App. LEXIS 5661, at \*2*; *State v. Taylor (1981), 3 Ohio App.3d 197, 198, 3 Ohio B. 224, 444 N.E.2d 481*. As the court in *Dixon* noted, just the smell of alcohol is not enough to establish driving under the influence. Nor is the defendant's admission of having had a drink. In *Frantz*, the court noted that glassy or bloodshot [\*\*15] eyes, along with the smell of alcohol and an admission of having had a drink, may not be sufficient to arrest but are sufficient to merit further investigation in the form of field sobriety tests. *Frantz at 763*.

[\*P31] In a case similar to the case at bar, the Second Appellate District found that when a defendant had admitted to having a couple of beers, had glassy, bloodshot eyes, gave off a strong odor of alcohol, and was speeding well in excess of the speed limit, "although these facts, by themselves, may not rise to the level of probable cause for an arrest, they are sufficient to justify the lesser intrusion of requiring [the defendant] to perform field sobriety tests." *State v. Cooper, Clark App. No. 2001-CA-86, P25, 2002 Ohio 2778*; *State v. Cowell, Montgomery App. No. 19119, 2002 Ohio 5126*, holding that the officer's hearing defendant's truck hit the curb, coupled with an odor of alcohol, an admission to having two or three beers, and the presence of a can of beer in the passenger door was sufficient to justify asking defendant to perform field sobriety tests. See also *State v. Downey (1987), 37 Ohio App.3d 45, 523 N.E.2d 521*; *State v. Evans, (1988) 127 Ohio App.3d 56, 711 N.E.2d 761*. [\*\*16] In the case at bar, the officer did not perform the sobriety tests until after the arrest.

[\*P32] [HN11] An arrest for driving while intoxicated can never be made without sobriety tests first being performed, if there are sufficient indicia of intoxication apart from any sobriety tests. *State v. Homan (2000), 89 Ohio St.3d 421, 2000 Ohio 212, 732 N.E.2d 952*. Thus the totality of the circumstances may support the finding that probable cause existed for an arrest even without a field sobriety test. *Id.* "These cases are inherently fact-sensitive." *Cooper*,

*supra*.

[\*P33] On the other hand, the First Appellate District found that speeding and the odor of alcohol, without more, did not provide probable cause to arrest. *State v. Taylor (1981)*, 3 Ohio App.3d 197, 3 Ohio B. 224, 444 N.E.2d 481. The Fourth Appellate District court also found that bloodshot eyes, a little difficulty exiting a vehicle, less than fluid speech, admission to having a couple of drinks, without an observation of erratic driving, was insufficient to provide probable cause for an arrest. *State v. Theiss (Dec. 17, 2001)*, Athens App. No. 01CA37, 2001 Ohio 2630.

[\*P34] In a case in which no traffic violation occurred, [\*\*17] but rather the defendant's car lacked a license plate light, the court found that because the officer "did not observe erratic or impaired driving on the part of" the defendant, who did not "appear to have any problem pulling the vehicle to the side of the road," the mere presence of bloodshot and watery eyes and moderate odor of alcohol did not justify an arrest for driving under the influence of alcohol. Despite the defendant's poor performance on the HGN test, from the totality of the circumstances, the court could not "rationally conclude that there was probable cause to arrest \*\*\*." *State v. Sanders, Marion App. No. 9-2000-56, 2000 Ohio 1813, 2000 Ohio App. LEXIS 6232, \*7-8*. But see *State v. Ousley (Sept. 20, 1999)*, Ross App. No. 99CA-2476, 1999 Ohio App. LEXIS 4459, at \*7-8.

[\*P35] In the case at bar, although defendant was speeding, the videotape shows no erratic driving. Rather, defendant safely maneuvered his car from the left lane to the right, using his turn signal, turned onto a side street, again using his turn signal, and pulled into a parking lot with no difficulty. The officer stated merely that he knew defendant was intoxicated [\*\*18] without any other indicia than the speeding and the dilated pupils. These circumstances do not justify an arrest for driving under the influence of alcohol.

[\*P36] In *State v. Dixon (Dec. 1, 2000)*, Greene App. No. 2000-CA30, 2000 Ohio App. LEXIS 5661, the court held that the smell of alcohol, along with glassy, bloodshot eyes and the admission that the defendant had one or two beers was insufficient to justify even administering the field sobriety tests. Although the defendant in *Dixon* had not committed a traffic violation but rather was stopped for tinted windows, the facts in *Dixon* are otherwise similar to the case at bar.

[\*P37] The determination of whether probable cause existed to arrest for driving while intoxicated, as we previously noted, is very fact specific. In the case at bar, after reviewing the videotape of defendant's arrest, and, even taking into consideration the fact that the videotape could not convey the strong smell of alcohol the officer noted on defendant, we find that at the time of the arrest, the officer lacked sufficient evidence of intoxication to provide probable cause to justify an arrest for drunk driving. This assignment of error has merit.

[\*P38] [\*\*19] Because the arrest was improper, the evidence resulting from the arrest was not admissible. We conclude that the trial court erred in overruling defendant's motion to suppress the evidence. This case is reversed and remanded for further proceedings consistent with this opinion. n1

n1 This court's decision in Assignment of Error I renders the remaining issues moot.

3. WHETHER THE TRIAL COURT ERRED IN FAILING TO SUPPRESS EVIDENCE AT TRIAL THE RESULTS [sic] OF APPELLANT'S PERFORMANCE ON THE ONE LEG STAND TEST, THE WALK AND TURN TEST, THE FINGERS TO NOSE TEST, AND THE ALPHABET TEST BASED UPON THE ARRESTING OFFICER'S FAILURE TO ADMINISTER AND EVALUATE SAID TESTS IN STRICT COMPLIANCE WITH THE NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION OR N.H.T.S.A. STANDARDS GOVERNING STANDARDIZED FIELD SOBRIETY TESTING.

4. WHETHER THE ARRESTING AGENCY ADMINISTERING THE TEST OF APPELLANT'S BREATH ALCOHOL LEVEL SUBSTANTIALLY COMPLIED WITH OHIO ADMINISTRATIVE CODE SECTION

3701-53-04(A)(2).

5. WHETHER THE ARRESTING AGENCY ADMINISTERING THE TEST OF APPELLANT'S BREATH ALCOHOL LEVEL SUBSTANTIALLY COMPLIED WITH *OHIO ADMINISTRATIVE CODE SECTION 3701-53-04*.

5. WHETHER THE ARRESTING AGENCY ADMINISTERING THE TEST OF APPELLANT'S BREATH ALCOHOL LEVEL SUBSTANTIALLY COMPLIED WITH *OHIO ADMINISTRATIVE CODE SECTION 3701-53-04(E)*.

7. THE STATE OF OHIO HAS FAILED TO SUBSTANTIALLY COMPLY WITH THE TIME LIMITS AND REGULATIONS IN *R.C. 4511.19(B)* AND *OAC 3701-53-02*, INCLUDING THE OPERATOR'S CHECKLIST INSTRUCTIONS ISSUED BY THE OHIO DEPARTMENT OF HEALTH INCLUDED IN THE APPENDICES TO *OAC 3701-53-02*.

[\*\*20]

[\*P39] This cause is reversed and remanded.

It is, therefore, ordered that appellant recover of appellee his costs herein taxed.

It is ordered that a special mandate be sent to said court to carry this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

JAMES J. SWEENEY, J., CONCURS; ANN DYKE, P.J., CONCURS IN JUDGMENT ONLY;

DIANE KARPINSKI

JUDGE

N.B. This entry is an announcement of the court's decision. See *App.R. 22(B), 22(D)* and *26(A)*; *Loc.App.R. 22*. This decision will be journalized and will become the judgment and order of the court pursuant to *App.R. 22(E)* unless a motion for reconsideration with supporting brief, per *App.R. 26(A)*, is filed within ten (10) days of the announcement of the court's decision. The time period for review by the Supreme Court of Ohio shall begin to run upon the journalization of this court's announcement of decision by the clerk per *App.R. 22(E)* [\*\*21] . See, also, *S. Ct. Prac.R. II, Section 2(A)(1)*.

CUYAHOGA COUNTY**

*2002 Ohio 7073; 2002 Ohio App. LEXIS 6908*

**December 19, 2002, Date of Announcement of Decision**

**PRIOR HISTORY:** [\*\*1] CHARACTER OF PROCEEDING: Criminal appeal from Rocky River Municipal Court. Case No. 02-TRD-05382.

**DISPOSITION:** AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** This was an appeal from a verdict by Rocky River Municipal Court (Ohio), that found the defendant guilty of speeding.

**OVERVIEW:** The defendant bore the burden of proving the circumstance resulting in an officer's incompetency, i.e., that the officer was wearing a non-distinct uniform. The defendant presented no evidence that, although not wearing a hat, an officer was not in a distinctive uniform. The officer could testify under *Ohio R. Evid. 601(C)* and *Ohio Rev. Code Ann. § 4549.16*. Police officers calibrated the laser device before use each day by adjusting the distance measured by the device until it equaled the known distance between two fixed objects in the police parking lot. The officer's testimony, if believed, established beyond a reasonable doubt that the defendant was in fact speeding. The defendant contended that the judge erred in proceeding with his trial, over his objection, when documents he had sought by subpoena from were not presented. The defendant suffered no prejudice when the judge decided to move on and conclude the proceedings.

**OUTCOME:** The lower court decision was affirmed.

**CORE TERMS:** laser, wearing, hat, distinctive, speeding, manual, calibration, calibrate, certification, traffic, arrest, speed, wear, card, announcement, assignment of error, miles-per-hour, fifty-five, subpoena, issuing, miles, incompetent to testify, incompetency, competent to testify, police officers, traffic ticket, misdemeanor, directing, traveling, mandatory

**LexisNexis(R) Headnotes**

***Evidence > Competency > General Overview***

[HN1] See *Ohio R. Evid. 601*.

***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview******Governments > Local Governments > Police Power******Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN2] The Staff Note to *Ohio R. Evid. 601(C)* indicates that the court views the rule simply as a restatement of *Ohio Rev. Code Ann. § 4549.16*, and that the rule preserves the provisions of the statute. *Ohio Rev. Code Ann. § 4549.15* and *Ohio Rev. Code Ann. § 4549.16* are related. The provisions of *Ohio Rev. Code Ann. § 4549.15* and *4549.16* require that an officer whose primary duty is to arrest or assist with the arrest of individuals who violate traffic laws must wear a distinctive uniform. An officer who fails to comply with *Ohio Rev. Code Ann. § 4549.15* will be deemed incompetent to testify as a witness in any prosecution against an arrested person pursuant to *Ohio Rev. Code Ann. § 4549.16*. Through the enactment of these statutes, the legislature demonstrated an intent to provide uniformity in traffic control and regulation in an effort to make driving safer within Ohio's political subdivisions. It requires little imagination to contemplate the unfortunate consequences should a frightened motorist believe that he or she was being forced off the road by a stranger. The General Assembly sought to avoid such mischief by requiring police officers on traffic duty to be identified clearly.

***Evidence > Competency > General Overview******Governments > Local Governments > Police Power******Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN3] When a municipal police officer testifies that he is not wearing his hat when issuing a traffic ticket, and wearing a hat is not mandatory, the failure of the officer to wear the hat alone does not render the officer incompetent to testify. This is in keeping with the Ohio Supreme Court's pronouncement that the reason for *Ohio R. Evid. 601(C)* and *Ohio Rev. Code Ann. § 4549.16* is to prevent confusion and promote clear identification of officers on traffic duty, and recognizes that a small variance in an officer's otherwise obviously distinctive uniform should not result in the officer's incompetency.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN4] Whether the evidence is legally sufficient to sustain a verdict is a question of law.

***Criminal Law & Procedure > Accusatory Instruments > Indictments******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN5] See *Ohio R. Crim. P. 29*.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN6] Whether phrased in terms of a *Ohio R. Crim. P. 29* motion, or in terms of a sufficiency of the evidence argument, the relevant inquiry is whether, after viewing the evidence in a light most favorable to the prosecution, any rational trier of fact could find the essential elements of the crime proven beyond a reasonable doubt.

**COUNSEL:** For Plaintiff-Appellee: JOHN D. WHEELER, Prosecutor City of Westlake, Westlake, Ohio.

For Defendant-Appellant: JOHN A. KREBS, Fairview Park, Ohio.

**JUDGES:** PATRICIA A. BLACKMON, P.J., AND TERRENCE O'DONNELL, J., CONCUR. ANNE L. KILBANE JUDGE.

**OPINION BY:** ANNE L. KILBANE

**OPINION:** ACCELERATED DOCKET

JOURNAL ENTRY AND OPINION

ANNE L. KILBANE, J.:

[\*P1] This is an appeal from a verdict by Rocky River Municipal Judge Donna C. Fitzsimmons that found appellant John A. Krebs guilty of speeding. n1 Krebs claims that the officer issuing the citation was not properly dressed and, therefore, not competent to testify and that Westlake failed to prove that its laser equipment was operating properly. We affirm.

n1 In violation of Westlake Codified Ordinance ("W.C.O.") 333.03

[\*P2] On March 12, 2002, at approximately 10:00 p.m., Krebs was operating a red Mercury eastbound on Center Ridge Road approaching [\*\*2] Crocker Road in Westlake. Westlake Police Officer Marcel Sorgi, assigned to patrol duty, was parked in a fully marked zone car near Brentwood Estates, just west of Crocker Road, and was using a laser device to monitor the speed of vehicles on Center Ridge Road. As the Krebs car approached, the officer obtained two readings on his device indicating that it was traveling at either fifty or fifty-five miles-per-hour in that thirty-five miles-per-hour zone. n2

n2 While, according to the traffic ticket, Officer Sorgi indicated Krebs' speed as fifty five miles per hour, his testimony at trial indicated, at different times, that he clocked Krebs at either fifty or fifty five miles per hour.

[\*P3] The officer issued Krebs a citation for speeding in violation of W.C.O. 333.03, a fourth degree misdemeanor; as he was explaining the citation and verifying Krebs' driver's license and insurance information, Krebs asked why he was not wearing his uniform hat, to which the officer responded that he was not required to [\*\*3] wear his hat at all times.

[\*P4] Krebs pleaded not guilty to the charge and, prior to trial, issued a subpoena duces tecum to Officer Sorgi directing him to bring to trial the laser device, as well as its instructions and operating manuals, all testing, calibration, repair and maintenance records, and all of Officer Sorgi's training records and certifications for the device.

[\*P5] At trial, Officer Sorgi appeared and brought with him various items, including the laser device, its manufacturer's certification that it had been factory-calibrated, a warranty card and an operating manual, apparently with a few pages missing.

[\*P6] The officer testified that, as a part of his training as a patrolman, he has received instruction on how to calibrate and use the laser device, and that on March 12, 2002, he followed mandatory procedures to calibrate it before he began his shift. He explained how he used the device to gauge the speed of Krebs' car, how it registered a speed of either fifty or fifty-five miles per hour, that he stopped Krebs and issued him a citation for speeding, and that he was not required to wear his uniform hat while issuing speeding citations.

[\*P7] [\*\*4] Krebs moved to suppress Officer Sorgi's testimony on the ground that, because he was not wearing

his hat when he issued Krebs the citation, he was not wearing a legally distinctive uniform as required by *R.C. 4549.16*. The judge denied the motion, noting that the officer testified that on March 12, 2002, at the time he issued Krebs' citation, he was wearing the official police uniform in which he was dressed that day in court, each time without his hat.

[\*P8] Krebs objected to the materials Officer Sorgi had brought to court, noting missing pages in the operating manual, and the lack of certification renewals and repair and maintenance records he had requested by subpoena. Westlake asserted that, apart from a few pages of the operations manual, any information Krebs sought that was not provided did not exist. Krebs protested to the judge, that the laser radar device was "highly sophisticated, technical equipment which requires periodic calibration. They won't show me what the calibration requirements are." He made this argument without providing any basis to establish his personal knowledge of the workings of a laser device. The parties then quibbled over [\*\*5] whether a certain card the officer brought to court was a simple manufacturer's warranty card or a calibration certification requirement card.

[\*P9] The judge ruled that, based on the assistant prosecutor's assurances that all available discovery responses had been provided, Westlake had complied with Krebs' subpoena request. Krebs then finished his cross-examination of Officer Sorgi, Westlake rested, Krebs rested his case, and the parties proceeded to final argument. Neither party offered the disputed documents or the laser device into evidence and they are not part of the record on appeal. The judge found Krebs guilty of speeding, and fined him \$ 25 plus court costs. He posted an appeal bond and the judge granted his motion to stay execution of his sentence.

[\*P10] Krebs asserts in the first of his three assignments of error that Officer Sorgi was not wearing a legally distinctive uniform, in violation of both statutory requirements and prohibition by evidentiary rule, and so was not competent to testify at his trial.

[\*P11] [HN1] *Evid.R. 601* provides that every person is competent to be a witness except, in pertinent part:

[\*P12] "(C) An officer, while on duty [\*\*6] for the exclusive or main purpose of enforcing traffic laws, arresting or assisting in the arrest of a person charged with a traffic violation punishable as a misdemeanor where the officer at the time of the arrest was not using a properly marked motor vehicle as defined by statute or was not wearing a legally distinctive uniform as defined by statute."

[\*P13] The Ohio Supreme Court discussed *Evid.R. 601(C)*, *R.C. 4549.15* and *4549.16*:

[\*P14] [HN2] "The Staff Note to *Evid.R. 601(C)* indicates that this court adopted the rule simply as a restatement of \*\*\* 4549.16, and that the rule preserves the provisions of [the] statute.

[\*P15] "\*\*\*\*

[\*P16] " *R.C. 4549.15* and *4549.16* are \*\*\* related. The provisions of *R.C. 4549.15* and *4549.16* require that an officer whose primary duty is to arrest or assist with the arrest of individuals who violate traffic laws must wear a distinctive uniform \*\*\*. An officer who fails to comply with *R.C. 4549.15* will be deemed incompetent to testify as a witness in any [\*\*7] prosecution against an arrested person pursuant to *R.C. 4549.16*.

[\*P17] "Through the enactment of these statutes, the legislature demonstrated an intent to provide uniformity in traffic control and regulation in an effort to make driving safer within Ohio's political subdivisions. It requires little imagination to contemplate the unfortunate consequences should a frightened motorist believe that he [or she] was being forced off the road by a stranger. The General Assembly sought to avoid such mischief by requiring police officers on traffic duty to be identified clearly." n3

n3 *State v. Heins* (1995), 72 Ohio St.3d 504, 506, 1995 Ohio 208, 651 N.E.2d 933. (Internal citations omitted.)

[\*P18] This court recently ruled that, [HN3] when a municipal police officer testifies that he was not wearing his hat when issuing a traffic ticket, and wearing a hat is not mandatory, the failure of the officer to wear the hat alone does not render the officer incompetent to testify. n4 This [\*\*8] is in keeping with the Ohio Supreme Court's above pronouncement that the reason for *Evid.R. 601(C)* and *R.C. 4549.16* is to prevent confusion and promote clear identification of officers on traffic duty, and recognizes that a small variance in an officer's otherwise obviously distinctive uniform should not result in the officer's incompetency.

n4 *Brooklyn v. Blake* (Feb. 7, 2002), *Cuyahoga App. No. 79032*, 2002 Ohio 499.

[\*P19] The defendant bears the burden of proving the circumstance resulting in the officer's incompetency, i.e., that the officer was wearing a non-distinct uniform. n5 Krebs presented no evidence that, although not wearing a hat, Officer Sorgi was not in a distinctive uniform. This assignment of error is overruled.

n5 *State v. Rau* (1989), 65 Ohio App.3d 478, 480, 584 N.E.2d 788.

[\*\*9]

[\*P20] Krebs next challenges the judge's finding that the laser device was operating properly and we treat this assignment as an attack on the sufficiency of the evidence presented to sustain his conviction. [HN4] Whether the evidence is legally sufficient to sustain a verdict is a question of law. n6

n6 *State v. Robinson* (1955), 162 Ohio St. 486, 55 Ohio Op. 388, 124 N.E.2d 148.

[\*P21] [HN5] Under *Crim.R. 29*,

[\*P22] "The court on motion of the defendant or on its own motion, after the evidence on either side is closed, shall order the entry of a judgment of acquittal of one or more offenses charged in the indictment, information, or complaint, if the evidence is insufficient to sustain a conviction on such offense or offenses. \*\*\*"

[\*P23] [HN6] Whether phrased in terms of a *Crim.R. 29* motion, or in terms of a sufficiency of the evidence argument, the relevant inquiry is whether, after viewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have [\*\*10] found the essential elements of the crime proven beyond a reasonable doubt. n7

n7 See *State v. Thompkins* (1997), 78 Ohio St.3d 380, 1997 Ohio 52, 678 N.E.2d 541, *State v. Jenks* (1991) 61 Ohio St.3d 259, 574 N.E.2d 492.

[\*P24] Officer Sorgi testified that, as a matter of routine procedure, Westlake police officers calibrate the laser device before use each day by adjusting the distance measured by the device until it equals the known distance between two fixed objects in the police parking lot. He stated that he was trained to calibrate the device in this way, that it is an accurate way to calibrate it, and that he performed this calibration on March 12, 2002, at the beginning of his shift. When he saw Krebs' car driving in his direction on Center Ridge Road he aimed the laser beam at the car license plate and, he claimed, the device indicated the car was traveling at either fifty or fifty-five miles-per-hour, obviously faster than the posted speed limit. His testimony, if [\*\*11] believed, established beyond a reasonable doubt that Krebs was in fact speeding. This assignment of error is overruled.

[\*P25] Finally, Krebs contends that the judge erred in proceeding with his trial, over his objection, when documents he had sought by subpoena from Westlake were not presented. Specifically, he argues that no "equipment manuals, maintenance records or certification requirements" were contained in the documents he was shown, and that the operating manual provided was incomplete.

[\*P26] Krebs, however, fails to demonstrate that these documents existed in the face of the assistant prosecutor's explanation that Westlake did not have them. Additionally, he made no assertion at trial, or on appeal, that, if he had been given the requested documents, he could demonstrate the inaccuracy of the laser device, but only that he could, perhaps, operate it to determine if it functioned. Therefore, he suffered no prejudice when the judge decided to move on and conclude the proceedings. This assignment of error has no merit.

Judgment affirmed.

It is ordered that appellee shall recover of appellant costs herein taxed.

The court finds that there were reasonable grounds [\*\*12] for this appeal.

It is ordered that a special mandate issue out of this court directing the Rocky River Municipal Court to carry this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

JOURNAL ENTRY AND OPINION

ANNE L. KILBANE, J.:

[\*P1] This is an appeal from a verdict by Rocky River Municipal Judge Donna C. Fitzsimmons that found appellant John A. Krebs guilty of speeding. n1 Krebs claims that the officer issuing the citation was not properly dressed and, therefore, not competent to testify and that Westlake failed to prove that its laser equipment was operating properly. We affirm.

n1 In violation of Westlake Codified Ordinance ("W.C.O.") 333.03

[\*P2] On March 12, 2002, at approximately 10:00 p.m., Krebs was operating a red Mercury eastbound on Center Ridge Road approaching [\*\*2] Crocker Road in Westlake. Westlake Police Officer Marcel Sorgi, assigned to patrol duty, was parked in a fully marked zone car near Brentwood Estates, just west of Crocker Road, and was using a laser device to monitor the speed of vehicles on Center Ridge Road. As the Krebs car approached, the officer obtained two readings on his device indicating that it was traveling at either fifty or fifty-five miles-per-hour in that thirty-five miles-per-hour zone. n2

n2 While, according to the traffic ticket, Officer Sorgi indicated Krebs' speed as fifty five miles per hour, his testimony at trial indicated, at different times, that he clocked Krebs at either fifty or fifty five miles per hour.

[\*P3] The officer issued Krebs a citation for speeding in violation of W.C.O. 333.03, a fourth degree misdemeanor; as he was explaining the citation and verifying Krebs' driver's license and insurance information, Krebs asked why he was not wearing his uniform hat, to which the officer responded that he was not required to [\*\*3] wear his hat at all times.

[\*P4] Krebs pleaded not guilty to the charge and, prior to trial, issued a subpoena duces tecum to Officer Sorgi directing him to bring to trial the laser device, as well as its instructions and operating manuals, all testing, calibration, repair and maintenance records, and all of Officer Sorgi's training records and certifications for the device.

[\*P5] At trial, Officer Sorgi appeared and brought with him various items, including the laser device, its manufacturer's certification that it had been factory-calibrated, a warranty card and an operating manual, apparently with a few pages missing.

[\*P6] The officer testified that, as a part of his training as a patrolman, he has received instruction on how to calibrate and use the laser device, and that on March 12, 2002, he followed mandatory procedures to calibrate it before he began his shift. He explained how he used the device to gauge the speed of Krebs' car, how it registered a speed of either fifty or fifty-five miles per hour, that he stopped Krebs and issued him a citation for speeding, and that he was not required to wear his uniform hat while issuing speeding citations.

[\*P7] [\*\*4] Krebs moved to suppress Officer Sorgi's testimony on the ground that, because he was not wearing

his hat when he issued Krebs the citation, he was not wearing a legally distinctive uniform as required by *R.C. 4549.16*. The judge denied the motion, noting that the officer testified that on March 12, 2002, at the time he issued Krebs' citation, he was wearing the official police uniform in which he was dressed that day in court, each time without his hat.

[\*P8] Krebs objected to the materials Officer Sorgi had brought to court, noting missing pages in the operating manual, and the lack of certification renewals and repair and maintenance records he had requested by subpoena. Westlake asserted that, apart from a few pages of the operations manual, any information Krebs sought that was not provided did not exist. Krebs protested to the judge, that the laser radar device was "highly sophisticated, technical equipment which requires periodic calibration. They won't show me what the calibration requirements are." He made this argument without providing any basis to establish his personal knowledge of the workings of a laser device. The parties then quibbled over [\*\*5] whether a certain card the officer brought to court was a simple manufacturer's warranty card or a calibration certification requirement card.

[\*P9] The judge ruled that, based on the assistant prosecutor's assurances that all available discovery responses had been provided, Westlake had complied with Krebs' subpoena request. Krebs then finished his cross-examination of Officer Sorgi, Westlake rested, Krebs rested his case, and the parties proceeded to final argument. Neither party offered the disputed documents or the laser device into evidence and they are not part of the record on appeal. The judge found Krebs guilty of speeding, and fined him \$ 25 plus court costs. He posted an appeal bond and the judge granted his motion to stay execution of his sentence.

[\*P10] Krebs asserts in the first of his three assignments of error that Officer Sorgi was not wearing a legally distinctive uniform, in violation of both statutory requirements and prohibition by evidentiary rule, and so was not competent to testify at his trial.

[\*P11] [HN1] *Evid.R. 601* provides that every person is competent to be a witness except, in pertinent part:

[\*P12] "(C) An officer, while on duty [\*\*6] for the exclusive or main purpose of enforcing traffic laws, arresting or assisting in the arrest of a person charged with a traffic violation punishable as a misdemeanor where the officer at the time of the arrest was not using a properly marked motor vehicle as defined by statute or was not wearing a legally distinctive uniform as defined by statute."

[\*P13] The Ohio Supreme Court discussed *Evid.R. 601(C)*, *R.C. 4549.15* and *4549.16*:

[\*P14] [HN2] "The Staff Note to *Evid.R. 601(C)* indicates that this court adopted the rule simply as a restatement of \*\*\* 4549.16, and that the rule preserves the provisions of [the] statute.

[\*P15] "\*\*\*\*

[\*P16] " *R.C. 4549.15* and *4549.16* are \*\*\* related. The provisions of *R.C. 4549.15* and *4549.16* require that an officer whose primary duty is to arrest or assist with the arrest of individuals who violate traffic laws must wear a distinctive uniform \*\*\*. An officer who fails to comply with *R.C. 4549.15* will be deemed incompetent to testify as a witness in any [\*\*7] prosecution against an arrested person pursuant to *R.C. 4549.16*.

[\*P17] "Through the enactment of these statutes, the legislature demonstrated an intent to provide uniformity in traffic control and regulation in an effort to make driving safer within Ohio's political subdivisions. It requires little imagination to contemplate the unfortunate consequences should a frightened motorist believe that he [or she] was being forced off the road by a stranger. The General Assembly sought to avoid such mischief by requiring police officers on traffic duty to be identified clearly." n3

n3 *State v. Heins* (1995), 72 Ohio St.3d 504, 506, 1995 Ohio 208, 651 N.E.2d 933. (Internal citations omitted.)

[\*P18] This court recently ruled that, [HN3] when a municipal police officer testifies that he was not wearing his hat when issuing a traffic ticket, and wearing a hat is not mandatory, the failure of the officer to wear the hat alone does not render the officer incompetent to testify. n4 This [\*\*8] is in keeping with the Ohio Supreme Court's above pronouncement that the reason for *Evid.R. 601(C)* and *R.C. 4549.16* is to prevent confusion and promote clear identification of officers on traffic duty, and recognizes that a small variance in an officer's otherwise obviously distinctive uniform should not result in the officer's incompetency.

n4 *Brooklyn v. Blake* (Feb. 7, 2002), *Cuyahoga App. No. 79032*, 2002 Ohio 499.

[\*P19] The defendant bears the burden of proving the circumstance resulting in the officer's incompetency, i.e., that the officer was wearing a non-distinct uniform. n5 Krebs presented no evidence that, although not wearing a hat, Officer Sorgi was not in a distinctive uniform. This assignment of error is overruled.

n5 *State v. Rau* (1989), 65 Ohio App.3d 478, 480, 584 N.E.2d 788.

[\*\*9]

[\*P20] Krebs next challenges the judge's finding that the laser device was operating properly and we treat this assignment as an attack on the sufficiency of the evidence presented to sustain his conviction. [HN4] Whether the evidence is legally sufficient to sustain a verdict is a question of law. n6

n6 *State v. Robinson* (1955), 162 Ohio St. 486, 55 Ohio Op. 388, 124 N.E.2d 148.

[\*P21] [HN5] Under *Crim.R. 29*,

[\*P22] "The court on motion of the defendant or on its own motion, after the evidence on either side is closed, shall order the entry of a judgment of acquittal of one or more offenses charged in the indictment, information, or complaint, if the evidence is insufficient to sustain a conviction on such offense or offenses. \*\*\*"

[\*P23] [HN6] Whether phrased in terms of a *Crim.R. 29* motion, or in terms of a sufficiency of the evidence argument, the relevant inquiry is whether, after viewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have [\*\*10] found the essential elements of the crime proven beyond a reasonable doubt. n7

n7 See *State v. Thompkins* (1997), 78 Ohio St.3d 380, 1997 Ohio 52, 678 N.E.2d 541, *State v. Jenks* (1991) 61 Ohio St.3d 259, 574 N.E.2d 492.

[\*P24] Officer Sorgi testified that, as a matter of routine procedure, Westlake police officers calibrate the laser device before use each day by adjusting the distance measured by the device until it equals the known distance between two fixed objects in the police parking lot. He stated that he was trained to calibrate the device in this way, that it is an accurate way to calibrate it, and that he performed this calibration on March 12, 2002, at the beginning of his shift. When he saw Krebs' car driving in his direction on Center Ridge Road he aimed the laser beam at the car license plate and, he claimed, the device indicated the car was traveling at either fifty or fifty-five miles-per-hour, obviously faster than the posted speed limit. His testimony, if [\*\*11] believed, established beyond a reasonable doubt that Krebs was in fact speeding. This assignment of error is overruled.

[\*P25] Finally, Krebs contends that the judge erred in proceeding with his trial, over his objection, when documents he had sought by subpoena from Westlake were not presented. Specifically, he argues that no "equipment manuals, maintenance records or certification requirements" were contained in the documents he was shown, and that the operating manual provided was incomplete.

[\*P26] Krebs, however, fails to demonstrate that these documents existed in the face of the assistant prosecutor's explanation that Westlake did not have them. Additionally, he made no assertion at trial, or on appeal, that, if he had been given the requested documents, he could demonstrate the inaccuracy of the laser device, but only that he could, perhaps, operate it to determine if it functioned. Therefore, he suffered no prejudice when the judge decided to move on and conclude the proceedings. This assignment of error has no merit.

Judgment affirmed.

It is ordered that appellee shall recover of appellant costs herein taxed.

The court finds that there were reasonable grounds [\*\*12] for this appeal.

It is ordered that a special mandate issue out of this court directing the Rocky River Municipal Court to carry this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

Defendant-Appellant.**

**CASE NO. 2001-L-146**

**COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT, LAKE  
COUNTY**

*2002 Ohio 6926; 2002 Ohio App. LEXIS 6661*

**December 13, 2002, Decided**

**PRIOR HISTORY:** [\*\*1] Criminal Appeal from the Mentor Municipal Court, Case No. 01 TRC 1677.

**DISPOSITION:** Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was charged with driving under the influence of alcohol (DUI), in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*, and he filed a motion to suppress evidence. The Mentor Municipal Court (Ohio) denied the motion and convicted defendant of the charge after a jury found defendant guilty. Defendant appealed.

**OVERVIEW:** Defendant was a passenger in a vehicle when the driver was arrested for DUI. The police officer who made the arrest was offered to drive defendant home, but drove him to a bar when defendant insisted he be taken there. Less than a hour later, that officer and another officer encountered defendant after the other officer stopped defendant for speeding and because the car he was driving was emitting excessive exhaust. Defendant refused the officers' request that he take field sobriety tests and also refused to take a Breathalyzer test. At his trial on a charge of DUI, defendant moved to suppress the officers' testimony, arguing that the officers did not have a legal basis for stopping him or arresting him. The appellate court held that (1) speeding and driving a car that was emitting excessive smoke from the exhaust were violations of the Mentor, Ohio, City Ordinance, and defendant's violation of either provision gave police a legal basis for stopping him; and (2) considering the totality of the facts known to police, including defendant's behavior, physical appearance, and refusal to take field sobriety tests, the officers who arrested defendant for DUI had probable cause to do so.

**OUTCOME:** The trial court's judgment was affirmed.

**CORE TERMS:** driving, influence of alcohol, exhaust, arrest, probable cause, suppression hearing, speeding, morning, smoke, credibility, sobriety, glassy, coming, radar, assignments of error, motion to suppress, mathematical, totality, probable cause to arrest, articulable suspicion, ordinance, passenger, traffic, license, driver, speed, circumstances

surrounding, reasonable suspicion, evidence presented, refusal to submit

*Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence*

*Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > General Overview*

[HN1] At a hearing on a motion to suppress, a trial court, functioning as the trier of fact, is in the best position to evaluate the evidence, judge the credibility of the witnesses, and resolve the factual issues. When reviewing a trial court's ruling on a motion to suppress, an appellate court is bound to accept the trial court's factual determinations if they are supported by competent and credible evidence. Once an appellate court accepts a trial court's factual determinations as true, the appellate court must conduct a de novo review of the trial court's application of the law to those facts.

*Civil Procedure > Appeals > Reviewability > Preservation for Review*

*Criminal Law & Procedure > Appeals > Reviewability > Waiver > General Overview*

[HN2] Issues not raised in a trial court may not be raised for the first time on appeal because such issues are deemed waived.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

*Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops*

*Criminal Law & Procedure > Trials > Examination of Witnesses > Child Witnesses*

[HN3] The investigative stop exception to the Fourth Amendment warrant requirement allows a police officer to stop an individual, provided the officer has the requisite reasonable suspicion, based upon specific and articulable facts, that a crime has occurred or is imminent. Additionally, any traffic violation, even a minor traffic violation, witnessed by a police officer is, standing alone, sufficient grounds to stop the vehicle observed violating the ordinance. Once an officer has stopped a vehicle for a minor traffic offense and begins the process of obtaining the offender's license and registration, the officer may proceed to investigate the detainee for driving under the influence if there exists reasonable suspicion that the detainee may be intoxicated based on specific and articulable facts.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements*

*Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops*

[HN4] Excessive smoke coming from an exhaust is a violation of Mentor, Ohio, City Ordinance § 72.17. Speeding is a violation of Mentor, Ohio, City Ordinance § 73.01. A defendant's traffic violations surpass the fundamental requirement of a reasonable, articulable suspicion, giving a police officer probable cause with which to stop the defendant's vehicle. Furthermore, even a defendant is able to contradict a police officer's testimony with regards to a speeding violation, the officer would still have probable cause to initiate a stop due to the defendant's smoking exhaust violation.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements*

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause*

*Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge*

[HN5] In determining whether the police had probable cause to arrest a person for driving under the influence, the Court of Appeals of Ohio considers whether, at the moment of arrest, the police had sufficient information, derived from a

reasonably trustworthy source of facts and circumstances, sufficient to cause a prudent person to believe that the suspect was driving under the influence. In making this determination, the court of appeals will examine the totality of facts and circumstances surrounding the arrest. The mere odor of alcohol, glassy eyes, slurred speech, and/or other indicia of the use of alcohol by a driver are, in and of themselves, insufficient to constitute probable cause to arrest; however, based on the totality of the circumstances surrounding an arrest, probable cause may exist beyond the mere appearance of drunkenness.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Implied Consent > Refusals to Submit*

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause*

*Criminal Law & Procedure > Arrests > Probable Cause*

[HN6] A defendant's refusal to submit to field sobriety tests is a factor that may be considered in determining the existence of probable cause in an arrest for driving under the influence of alcohol.

**COUNSEL:** Ron M. Graham, Mentor City Prosecutor, Mentor, OH (For Plaintiff-Appellee).

Brent L. English, Law Offices of Brent L. English, Cleveland, OH (For Defendant-Appellant).

**JUDGES:** DIANE V. GRENDALL, J. DONALD R. FORD, J., JUDITH A. CHRISTLEY, J., concur.

**OPINION BY:** DIANE V. GRENDALL

**OPINION:** DIANE V. GRENDALL, J.

[\*P1] Scott Molk ("appellant") appeals the judgment of conviction by the Mentor Municipal Court. The trial court's judgment was entered upon a jury's verdict finding appellant guilty of driving while under the influence of alcohol, a violation of *R.C. 4511.19(A)(1)*. For the following reasons, we affirm the decision of the trial court.

[\*P2] On March 22, 2001, at approximately 12:45 a.m., appellant was a passenger in a vehicle whose driver was arrested for driving under the influence of alcohol. As the vehicle appellant was riding in was towed, Mentor Police Officer Covell offered to take appellant home, but appellant stated that he wanted to return to a local bar called Safe Crackers. Prior to returning appellant to Safe Crackers, Officer Covell noticed appellant "had a strong [\*\*2] odor of alcoholic beverage coming off his breath, he was slow and mumbled in speech, his eyes were glassy, he was unbalanced and uncoordinated." Subsequently, appellant was returned to Safe Crackers by Officer Covell, who advised appellant several times not to drive that morning because it appeared appellant was under the influence of alcohol. Appellant failed to take the officer's advice. At approximately 1:30 a.m. that same morning, appellant was stopped, arrested, and charged with driving under the influence of alcohol by Mentor Police Officer Sutton.

[\*P3] The record indicates that appellant was initially pulled over for a speeding violation, as well as a smoking exhaust, both violations of Mentor City Ordinances. However, when Officer Sutton approached appellant to ask him for his driver's license, he noticed the strong odor of an alcoholic beverage emanating from appellant. Officer Sutton also observed appellant's glassy eyes and slurred speech as he surrendered his license. Subsequently, in accordance with Mentor Police Department policy, Officer Covell arrived on the scene to provide backup to Officer Sutton during the stop. Upon arriving at the scene, Officer Covell advised Officer [\*\*3] Sutton that he had taken appellant back to Safe Crackers earlier that morning and that he also felt appellant was exhibiting signs of intoxication. Based on his personal observations and those of Officer Covell, Officer Sutton asked appellant if he would submit to some field sobriety tests. At the insistence of appellant's brother, who was a passenger in appellant's vehicle, appellant refused to do so. Appellant was then placed under arrest and charged with driving under the influence of alcohol. The record also indicates that appellant refused to take a Breathalyzer test once he arrived at the police station.

[\*P4] Appellant subsequently filed a Motion to Suppress and a hearing was held on May 21, 2001. At the hearing, appellant argued that he was not speeding and that Officer Sutton had no probable cause to place him under arrest. Based on the evidence presented at the hearing, the trial court denied appellant's motion to suppress. On July 5, 2001, a jury trial was held in which appellant was convicted of driving under the influence, in violation of *R.C. 4511.19(A)(1)*. The trial court's imposition of sentence was stayed pending an appeal. This appeal followed, [\*4] and appellant asserts two assignments of error for our review:

[\*P5] "[1.] The Trial Court committed reversible error by concluding the arresting officer had "probable cause" to stop the Appellant's vehicle on March 22, 2001.

[\*P6] "[2.] The Trial Court committed reversible error by concluding the arresting officer had probable cause to believe Appellant was driving a motor vehicle while under the influence of alcohol."

[\*P7] As appellant's assignments of error are closely related, we proceed to address them collectively.

[\*P8] Appellant first argues that the "trial court erred in not suppressing all evidence obtained as a result of the unlawful traffic stop." Appellant further claims that Officer Sutton did not have a "reasonable, articulable suspicion that appellant had violated any traffic laws."

[\*P9] [HN1] At a hearing on a motion to suppress, a trial court, functioning as the trier of fact, is in the best position to evaluate the evidence, judge the credibility of the witnesses, and resolve the factual issues. *State v. Mills (1992)*, 62 Ohio St.3d 357, 366, 582 N.E.2d 972. When reviewing a trial court's ruling on a motion to suppress, an appellate court is bound to accept the trial court's [\*5] factual determinations if they are supported by competent and credible evidence. *State v. Searls (1997)*, 118 Ohio App.3d 739, 741, 693 N.E.2d 1184. Once an appellate court accepts the trial court's factual determinations as true, the appellate court must conduct a de novo review of the trial court's application of the law to those facts. *Id.*

[\*P10] The record indicates that appellant's brother, Officer Sutton, and Officer Covell testified at the suppression hearing. After considering the evidence presented at the suppression hearing, the trial court made the following findings of fact: "(1) Mentor Police Officer Patrolman Sutton and Patrolman Covell saw defendant driving on Mentor Avenue near Acacia in Mentor about 1:20 A.M. on March 22, 2001. One observed the defendant's speed to be faster than the posted speed limit. (2) The other officer followed the Defendant \*\*\*. He observed smoke from defendant's vehicle's exhaust system. Speeds at various time [sic] faster than speed limit and direction signals were used. (3) After defendant was pulled over, officer observed some signs of alcohol in defendant's behavior as well as condition. At defendant's brothers [sic] insistence, [\*6] defendant refused to take alcohol influence performance tests as well as refusing [sic] to take the breath test at police station later on. (4) The defendant was charged with driving under the influence."

[\*P11] In response to the trial court's findings of fact, appellant questions the credibility of the testimony supplied by Officers Covell and Sutton. In his brief, appellant attempts to prove, through intricate mathematical calculations, that Officer Sutton's testimony does not support the trial court's finding that appellant was speeding. While we admire appellant's efforts in this regard, the record indicates that appellant failed to raise the mathematical issue before the trial court. It is well settled law that [HN2] issues not raised in the trial court may not be raised for the first time on appeal because such issues are deemed waived. *State v. Burge (1993)*, 88 Ohio App. 3d 91, 93, 623 N.E.2d 146, citing *State v. Comen (1990)*, 50 Ohio St.3d 206, 211, 553 N.E.2d 640. As appellant failed to argue the issue of mathematical calculations before the trial court, it is deemed waived for purposes of this appeal.

[\*P12] Our review of the record reveals both Officer [\*7] Covell and Officer Sutton testified at the suppression hearing that appellant exhibited signs of intoxication on March 22, 2001. Officer Covell also testified that prior to the stop, he observed erratic driving on behalf of appellant. Officer Sutton testified that he observed an excessive amount of smoke coming from appellant's exhaust and that he subsequently clocked appellant's speed at 38 miles per hour in a 25 miles per hour zone. In response, appellant recycles the argument that Officer Sutton's testimony lacks credibility. We

disagree with appellant.

[\*P13] The record indicates Officer Sutton testified that at the beginning and end of his shift, Officer Sutton performed both "internal and external calibration tests" on his radar unit. Officer Sutton further testified that the radar unit "tested true" both at the beginning and end of his shift. We also note that appellant offered no objections to Officer Sutton's testimony regarding the calibration of his radar unit at the suppression hearing. Furthermore, once appellant had been stopped, Officer Sutton noted appellant's glassy eyes, slouched posture, and lack of coordination. Additionally, both officers testified that appellant's brother [\*\*8] instructed appellant to refuse to submit to any field sobriety tests. To this point, appellant has failed to provide any evidence that would refute the credibility of Officer Sutton's testimony.

[\*P14] The only witness to testify on appellant's behalf at the suppression hearing was appellant's brother. As a passenger in the vehicle that morning, appellant's brother alleged that appellant did not violate any traffic laws. However, appellant's brother also admitted on the record that he had consumed "five or six beers" that morning and when asked if he was under the influence of alcohol that morning, appellant's brother responded: "Me, yeah." Taking into account the testimony presented at the suppression hearing, along with appellant's failure to refute such evidence, it is clear to this court that the trial court's findings of fact were supported by competent, credible evidence, and thus will be accepted as true by this court for purposes of review.

[\*P15] [HN3] The investigative stop exception to the Fourth Amendment warrant requirement allows a police officer to stop an individual, provided the officer has the requisite reasonable suspicion, based upon specific and articulable facts, that a crime [\*\*9] has occurred or is imminent. *State v. Gedeon* (1992), 81 Ohio App.3d 617, 618, 611 N.E.2d 972, citing *Terry v. Ohio* (1968), 392 U.S. 1, 20 L. Ed. 2d 889, 88 S. Ct. 1868; see, also, *Maumee v. Weisner* (1999), 87 Ohio St.3d 295, 296, 1999 Ohio 68, 720 N.E.2d 507. Additionally, this court has held that any traffic violation, even a minor traffic violation, witnessed by a police officer is, standing alone, sufficient grounds to stop the vehicle observed violating the ordinance. *State v. Cosari* (Mar. 30, 2001), 11th Dist. No. 99- P-0120, 2001 Ohio App. LEXIS 1562, at \*6; *State v. Burdick* (May 26, 2000), 11th Dist. No. 98- G-2209, 2000 Ohio App. LEXIS 2264, at \*13; *State v. Yemma* (Aug. 9, 1996), 11th Dist. No. 95- P-0156, 1996 Ohio App. LEXIS 3361, at \*7. Once an officer has stopped a vehicle for a minor traffic offense and begins the process of obtaining the offender's license and registration, the officer may proceed to investigate the detainee for driving under the influence if there exists reasonable suspicion that the detainee may be intoxicated based on specific and articulable facts. *Burdick, supra*, 2000 Ohio App. LEXIS 2264, at \*13-14, [\*\*10] citing *Yemma, supra*, at \*7.

[\*P16] As mentioned above, Officer Sutton testified that he observed an excessive amount of smoke coming from appellant's exhaust. In fact, Officer Sutton testified that he observed smoke "pouring out" of appellant's exhaust. [HN4] Excessive smoke coming from an exhaust is a violation of Mentor City Ordinance 72.17. Officer Sutton also testified that he clocked appellant's vehicle on his stationary radar speeding at 38 miles per hour in a 25 miles per hour zone. Speeding is a violation of Mentor City Ordinance 73.01. As those are both violations of Mentor City Traffic Ordinances, we hold, that under *Cosari* and *Gedeon*, appellant's traffic violations surpassed the fundamental requirement of a reasonable, articulable suspicion, giving Officer Sutton probable cause with which to stop appellant's vehicle. See *Beck v. Ohio* (1964), 379 U.S. 89, 91, 13 L. Ed. 2d 142, 85 S. Ct. 223. Furthermore, we find it important to note, that, even if appellant had been able to contradict Officer Sutton's testimony with regards to the speeding violation, Officer Sutton would still have had probable cause to initiate a stop due to appellant's smoking [\*\*11] exhaust violation.

[\*P17] Our previous analysis also indicates that Officer Sutton had a reasonable and articulable suspicion to investigate appellant for driving under the influence of alcohol after the initial traffic stop. Thus, the only remaining argument raised by appellant is whether Officer Sutton had probable cause to arrest appellant for driving under the influence. To this we answer in the affirmative.

[\*P18] [HN5] In determining whether the police had probable cause to arrest appellant for DUI, we consider whether, at the moment of arrest, the police had sufficient information, derived from a reasonably trustworthy source of

facts and circumstances, sufficient to cause a prudent person to believe that the suspect was driving under the influence. *Beck v. Ohio* (1964), 379 U.S. 89, 91, 13 L. Ed. 2d 142, 85 S. Ct. 223; *State v. Timson* (1974), 38 Ohio St.2d 122, 127, 311 N.E.2d 16. In making this determination, we will examine the "totality" of facts and circumstances surrounding the arrest. See *State v. Miller* (1997), 117 Ohio App.3d 750, 761, 691 N.E.2d 703; *State v. Brandenburg* (1987), 41 Ohio App.3d 109, 111, 534 N.E.2d 906. [\*\*12] Also, the mere odor of alcohol, glassy eyes, slurred speech, and/or other indicia of the use of alcohol, by a driver are, in and of themselves, insufficient to constitute probable cause to arrest; however, based on the totality of the circumstances surrounding an arrest, probable cause may exist beyond the mere appearance of drunkenness. *City of Eastlake v. Pavlisin*, 11th Dist. No. 2001- L-207, 2002 Ohio 4702, at 2.

[\*P19] The record before us indicates that prior to being stopped by Officer Sutton, Officer Covell observed that appellant "braked rather hard and went over the broken white line halfway into the center lane and then came back up into the curb lane." Also, both officers testified that appellant was slouched over in his seat, used vulgar, abusive language, and that once he exited the vehicle; appellant had trouble maintaining his balance. In fact, Officer Covell testified that: "as appellant exited the vehicle he was still staggered, unbalanced, he fell into the side of the vehicle a couple times, he kind of staggered into the side of the car a couple times as he walked back to the rear." Officer Covell also testified that: "he was very slurred in speech, was [\*\*13] swearing at me. \*\*\*. He called me a fucking mutt." The record indicates that appellant also stated that: "he was not going to take any tests." [HN6] Appellant's refusal to submit to field sobriety tests is another factor that may be considered in determining the existence of probable cause in an arrest for driving under the influence of alcohol. *State v. Arnold* (Sept. 7, 1999), 12th Dist. No. CA99-02-026, 1999 Ohio App. LEXIS 4159; *State v. Buehl* (Jan. 26, 2000), 9th Dist. No. 19469, 2000 Ohio App. LEXIS 155, (Defendant's refusal to submit to field sobriety tests was properly considered as evidence that he had been driving under the influence.)

[\*P20] When the officers' testimony of appellant's erratic driving, physical instability, and abusive behavior is coupled with the observations noted in our previous analysis, it becomes apparent that the totality of the circumstances indicate Officer Sutton had probable cause to arrest appellant for driving under the influence of alcohol. Appellant's second assignment of error is also without merit.

[\*P21] We hold that appellant's first and second assignments of error are not well taken and without merit. For the foregoing reasons, [\*\*14] the decision of the trial court in this matter is affirmed.

**STATE OF OHIO, Plaintiff-Appellee, - vs - SCOTT M. MOLK,  
Defendant-Appellant.**

**CASE NO. 2001-L-146**

**COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT, LAKE  
COUNTY**

*2002 Ohio 6926; 2002 Ohio App. LEXIS 6661*

**December 13, 2002, Decided**

**PRIOR HISTORY:** [\*\*1] Criminal Appeal from the Mentor Municipal Court, Case No. 01 TRC 1677.

**DISPOSITION:** Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was charged with driving under the influence of alcohol (DUI), in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*, and he filed a motion to suppress evidence. The Mentor Municipal Court (Ohio) denied the motion and convicted defendant of the charge after a jury found defendant guilty. Defendant appealed.

**OVERVIEW:** Defendant was a passenger in a vehicle when the driver was arrested for DUI. The police officer who made the arrest was offered to drive defendant home, but drove him to a bar when defendant insisted he be taken there. Less than a hour later, that officer and another officer encountered defendant after the other officer stopped defendant for speeding and because the car he was driving was emitting excessive exhaust. Defendant refused the officers' request that he take field sobriety tests and also refused to take a Breathalyzer test. At his trial on a charge of DUI, defendant moved to suppress the officers' testimony, arguing that the officers did not have a legal basis for stopping him or arresting him. The appellate court held that (1) speeding and driving a car that was emitting excessive smoke from the exhaust were violations of the Mentor, Ohio, City Ordinance, and defendant's violation of either provision gave police a legal basis for stopping him; and (2) considering the totality of the facts known to police, including defendant's behavior, physical appearance, and refusal to take field sobriety tests, the officers who arrested defendant for DUI had probable cause to do so.

**OUTCOME:** The trial court's judgment was affirmed.

**CORE TERMS:** driving, influence of alcohol, exhaust, arrest, probable cause, suppression hearing, speeding, morning, smoke, credibility, sobriety, glassy, coming, radar, assignments of error, motion to suppress, mathematical, totality, probable cause to arrest, articulable suspicion, ordinance, passenger, traffic, license, driver, speed, circumstances

surrounding, reasonable suspicion, evidence presented, refusal to submit

**OPINION BY:** DIANE V. GRENDALL

**OPINION:** DIANE V. GRENDALL, J.

[\*P1] Scott Molk ("appellant") appeals the judgment of conviction by the Mentor Municipal Court. The trial court's judgment was entered upon a jury's verdict finding appellant guilty of driving while under the influence of alcohol, a violation of *R.C. 4511.19(A)(1)*. For the following reasons, we affirm the decision of the trial court.

[\*P2] On March 22, 2001, at approximately 12:45 a.m., appellant was a passenger in a vehicle whose driver was arrested for driving under the influence of alcohol. As the vehicle appellant was riding in was towed, Mentor Police Officer Covell offered to take appellant home, but appellant stated that he wanted to return to a local bar called Safe Crackers. Prior to returning appellant to Safe Crackers, Officer Covell noticed appellant "had a strong [\*\*2] odor of alcoholic beverage coming off his breath, he was slow and mumbled in speech, his eyes were glassy, he was unbalanced and uncoordinated." Subsequently, appellant was returned to Safe Crackers by Officer Covell, who advised appellant several times not to drive that morning because it appeared appellant was under the influence of alcohol. Appellant failed to take the officer's advice. At approximately 1:30 a.m. that same morning, appellant was stopped, arrested, and charged with driving under the influence of alcohol by Mentor Police Officer Sutton.

[\*P3] The record indicates that appellant was initially pulled over for a speeding violation, as well as a smoking exhaust, both violations of Mentor City Ordinances. However, when Officer Sutton approached appellant to ask him for his driver's license, he noticed the strong odor of an alcoholic beverage emanating from appellant. Officer Sutton also observed appellant's glassy eyes and slurred speech as he surrendered his license. Subsequently, in accordance with Mentor Police Department policy, Officer Covell arrived on the scene to provide backup to Officer Sutton during the stop. Upon arriving at the scene, Officer Covell advised Officer [\*\*3] Sutton that he had taken appellant back to Safe Crackers earlier that morning and that he also felt appellant was exhibiting signs of intoxication. Based on his personal observations and those of Officer Covell, Officer Sutton asked appellant if he would submit to some field sobriety tests. At the insistence of appellant's brother, who was a passenger in appellant's vehicle, appellant refused to do so. Appellant was then placed under arrest and charged with driving under the influence of alcohol. The record also indicates that appellant refused to take a Breathalyzer test once he arrived at the police station.

[\*P4] Appellant subsequently filed a Motion to Suppress and a hearing was held on May 21, 2001. At the hearing, appellant argued that he was not speeding and that Officer Sutton had no probable cause to place him under arrest. Based on the evidence presented at the hearing, the trial court denied appellant's motion to suppress. On July 5, 2001, a jury trial was held in which appellant was convicted of driving under the influence, in violation of *R.C. 4511.19(A)(1)*. The trial court's imposition of sentence was stayed pending an appeal. This appeal followed, [\*\*4] and appellant asserts two assignments of error for our review:

[\*P5] "[1.] The Trial Court committed reversible error by concluding the arresting officer had "probable cause" to stop the Appellant's vehicle on March 22, 2001.

[\*P6] "[2.] The Trial Court committed reversible error by concluding the arresting officer had probable cause to believe Appellant was driving a motor vehicle while under the influence of alcohol."

[\*P7] As appellant's assignments of error are closely related, we proceed to address them collectively.

[\*P8] Appellant first argues that the "trial court erred in not suppressing all evidence obtained as a result of the unlawful traffic stop." Appellant further claims that Officer Sutton did not have a "reasonable, articulable suspicion that appellant had violated any traffic laws."

[\*P9] [HN1] At a hearing on a motion to suppress, a trial court, functioning as the trier of fact, is in the best position to evaluate the evidence, judge the credibility of the witnesses, and resolve the factual issues. *State v. Mills (1992)*, 62 Ohio St.3d 357, 366, 582 N.E.2d 972. When reviewing a trial court's ruling on a motion to suppress, an appellate court is bound to accept the trial court's [\*\*5] factual determinations if they are supported by competent and credible evidence. *State v. Searls (1997)*, 118 Ohio App.3d 739, 741, 693 N.E.2d 1184. Once an appellate court accepts the trial court's factual determinations as true, the appellate court must conduct a de novo review of the trial court's application of the law to those facts. *Id.*

[\*P10] The record indicates that appellant's brother, Officer Sutton, and Officer Covell testified at the suppression hearing. After considering the evidence presented at the suppression hearing, the trial court made the following findings of fact: "(1) Mentor Police Officer Patrolman Sutton and Patrolman Covell saw defendant driving on Mentor Avenue near Acacia in Mentor about 1:20 A.M. on March 22, 2001. One observed the defendant's speed to be faster than the posted speed limit. (2) The other officer followed the Defendant \*\*\*. He observed smoke from defendant's vehicle's exhaust system. Speeds at various time [sic] faster than speed limit and direction signals were used. (3) After defendant was pulled over, officer observed some signs of alcohol in defendant's behavior as well as condition. At defendant's brothers [sic] insistence, [\*\*6] defendant refused to take alcohol influence performance tests as well as refusing [sic] to take the breath test at police station later on. (4) The defendant was charged with driving under the influence."

[\*P11] In response to the trial court's findings of fact, appellant questions the credibility of the testimony supplied by Officers Covell and Sutton. In his brief, appellant attempts to prove, through intricate mathematical calculations, that Officer Sutton's testimony does not support the trial court's finding that appellant was speeding. While we admire appellant's efforts in this regard, the record indicates that appellant failed to raise the mathematical issue before the trial court. It is well settled law that [HN2] issues not raised in the trial court may not be raised for the first time on appeal because such issues are deemed waived. *State v. Burge (1993)*, 88 Ohio App. 3d 91, 93, 623 N.E.2d 146, citing *State v. Comen (1990)*, 50 Ohio St.3d 206, 211, 553 N.E.2d 640. As appellant failed to argue the issue of mathematical calculations before the trial court, it is deemed waived for purposes of this appeal.

[\*P12] Our review of the record reveals both Officer [\*\*7] Covell and Officer Sutton testified at the suppression hearing that appellant exhibited signs of intoxication on March 22, 2001. Officer Covell also testified that prior to the stop, he observed erratic driving on behalf of appellant. Officer Sutton testified that he observed an excessive amount of smoke coming from appellant's exhaust and that he subsequently clocked appellant's speed at 38 miles per hour in a 25 miles per hour zone. In response, appellant recycles the argument that Officer Sutton's testimony lacks credibility. We

disagree with appellant.

[\*P13] The record indicates Officer Sutton testified that at the beginning and end of his shift, Officer Sutton performed both "internal and external calibration tests" on his radar unit. Officer Sutton further testified that the radar unit "tested true" both at the beginning and end of his shift. We also note that appellant offered no objections to Officer Sutton's testimony regarding the calibration of his radar unit at the suppression hearing. Furthermore, once appellant had been stopped, Officer Sutton noted appellant's glassy eyes, slouched posture, and lack of coordination. Additionally, both officers testified that appellant's brother [\*\*8] instructed appellant to refuse to submit to any field sobriety tests. To this point, appellant has failed to provide any evidence that would refute the credibility of Officer Sutton's testimony.

[\*P14] The only witness to testify on appellant's behalf at the suppression hearing was appellant's brother. As a passenger in the vehicle that morning, appellant's brother alleged that appellant did not violate any traffic laws. However, appellant's brother also admitted on the record that he had consumed "five or six beers" that morning and when asked if he was under the influence of alcohol that morning, appellant's brother responded: "Me, yeah." Taking into account the testimony presented at the suppression hearing, along with appellant's failure to refute such evidence, it is clear to this court that the trial court's findings of fact were supported by competent, credible evidence, and thus will be accepted as true by this court for purposes of review.

[\*P15] [HN3] The investigative stop exception to the Fourth Amendment warrant requirement allows a police officer to stop an individual, provided the officer has the requisite reasonable suspicion, based upon specific and articulable facts, that a crime [\*\*9] has occurred or is imminent. *State v. Gedeon* (1992), 81 Ohio App.3d 617, 618, 611 N.E.2d 972, citing *Terry v. Ohio* (1968), 392 U.S. 1, 20 L. Ed. 2d 889, 88 S. Ct. 1868; see, also, *Maumee v. Weisner* (1999), 87 Ohio St.3d 295, 296, 1999 Ohio 68, 720 N.E.2d 507. Additionally, this court has held that any traffic violation, even a minor traffic violation, witnessed by a police officer is, standing alone, sufficient grounds to stop the vehicle observed violating the ordinance. *State v. Cosari* (Mar. 30, 2001), 11th Dist. No. 99- P-0120, 2001 Ohio App. LEXIS 1562, at \*6; *State v. Burdick* (May 26, 2000), 11th Dist. No. 98- G-2209, 2000 Ohio App. LEXIS 2264, at \*13; *State v. Yemma* (Aug. 9, 1996), 11th Dist. No. 95- P-0156, 1996 Ohio App. LEXIS 3361, at \*7. Once an officer has stopped a vehicle for a minor traffic offense and begins the process of obtaining the offender's license and registration, the officer may proceed to investigate the detainee for driving under the influence if there exists reasonable suspicion that the detainee may be intoxicated based on specific and articulable facts. *Burdick, supra*, 2000 Ohio App. LEXIS 2264, at \*13-14, [\*\*10] citing *Yemma, supra*, at \*7.

[\*P16] As mentioned above, Officer Sutton testified that he observed an excessive amount of smoke coming from appellant's exhaust. In fact, Officer Sutton testified that he observed smoke "pouring out" of appellant's exhaust. [HN4] Excessive smoke coming from an exhaust is a violation of Mentor City Ordinance 72.17. Officer Sutton also testified that he clocked appellant's vehicle on his stationary radar speeding at 38 miles per hour in a 25 miles per hour zone. Speeding is a violation of Mentor City Ordinance 73.01. As those are both violations of Mentor City Traffic Ordinances, we hold, that under *Cosari* and *Gedeon*, appellant's traffic violations surpassed the fundamental requirement of a reasonable, articulable suspicion, giving Officer Sutton probable cause with which to stop appellant's vehicle. See *Beck v. Ohio* (1964), 379 U.S. 89, 91, 13 L. Ed. 2d 142, 85 S. Ct. 223. Furthermore, we find it important to note, that, even if appellant had been able to contradict Officer Sutton's testimony with regards to the speeding violation, Officer Sutton would still have had probable cause to initiate a stop due to appellant's smoking [\*\*11] exhaust violation.

[\*P17] Our previous analysis also indicates that Officer Sutton had a reasonable and articulable suspicion to investigate appellant for driving under the influence of alcohol after the initial traffic stop. Thus, the only remaining argument raised by appellant is whether Officer Sutton had probable cause to arrest appellant for driving under the influence. To this we answer in the affirmative.

[\*P18] [HN5] In determining whether the police had probable cause to arrest appellant for DUI, we consider whether, at the moment of arrest, the police had sufficient information, derived from a reasonably trustworthy source of

facts and circumstances, sufficient to cause a prudent person to believe that the suspect was driving under the influence. *Beck v. Ohio* (1964), 379 U.S. 89, 91, 13 L. Ed. 2d 142, 85 S. Ct. 223; *State v. Timson* (1974), 38 Ohio St.2d 122, 127, 311 N.E.2d 16. In making this determination, we will examine the "totality" of facts and circumstances surrounding the arrest. See *State v. Miller* (1997), 117 Ohio App.3d 750, 761, 691 N.E.2d 703; *State v. Brandenburg* (1987), 41 Ohio App.3d 109, 111, 534 N.E.2d 906. [\*\*12] Also, the mere odor of alcohol, glassy eyes, slurred speech, and/or other indicia of the use of alcohol, by a driver are, in and of themselves, insufficient to constitute probable cause to arrest; however, based on the totality of the circumstances surrounding an arrest, probable cause may exist beyond the mere appearance of drunkenness. *City of Eastlake v. Pavlisin*, 11th Dist. No. 2001- L-207, 2002 Ohio 4702, at 2.

[\*P19] The record before us indicates that prior to being stopped by Officer Sutton, Officer Covell observed that appellant "braked rather hard and went over the broken white line halfway into the center lane and then came back up into the curb lane." Also, both officers testified that appellant was slouched over in his seat, used vulgar, abusive language, and that once he exited the vehicle; appellant had trouble maintaining his balance. In fact, Officer Covell testified that: "as appellant exited the vehicle he was still staggered, unbalanced, he fell into the side of the vehicle a couple times, he kind of staggered into the side of the car a couple times as he walked back to the rear." Officer Covell also testified that: "he was very slurred in speech, was [\*\*13] swearing at me. \*\*\*. He called me a fucking mutt." The record indicates that appellant also stated that: "he was not going to take any tests." [HN6] Appellant's refusal to submit to field sobriety tests is another factor that may be considered in determining the existence of probable cause in an arrest for driving under the influence of alcohol. *State v. Arnold* (Sept. 7, 1999), 12th Dist. No. CA99-02-026, 1999 Ohio App. LEXIS 4159; *State v. Buehl* (Jan. 26, 2000), 9th Dist. No. 19469, 2000 Ohio App. LEXIS 155, (Defendant's refusal to submit to field sobriety tests was properly considered as evidence that he had been driving under the influence.)

[\*P20] When the officers' testimony of appellant's erratic driving, physical instability, and abusive behavior is coupled with the observations noted in our previous analysis, it becomes apparent that the totality of the circumstances indicate Officer Sutton had probable cause to arrest appellant for driving under the influence of alcohol. Appellant's second assignment of error is also without merit.

[\*P21] We hold that appellant's first and second assignments of error are not well taken and without merit. For the foregoing reasons, [\*\*14] the decision of the trial court in this matter is affirmed.

**STATE OF OHIO, PLAINTIFF-APPELLEE, VS. JEFFREY S. LLOYD,  
DEFENDANT-APPELLANT.**

**CASE NO. 2001-CO-36**

**COURT OF APPEALS OF OHIO, SEVENTH APPELLATE DISTRICT,  
COLUMBIANA COUNTY**

*2002 Ohio 3017; 2002 Ohio App. LEXIS 3027*

**June 13, 2002, Decided**

**PRIOR HISTORY:** [\*\*1] CHARACTER OF PROCEEDINGS: Criminal Appeal from Southwest Area County Court Case No. 2001-TR-D-1712-S.

**DISPOSITION:** Trial court's judgment was reversed and case was remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from his speeding conviction in the Southwest Area County Court, Columbiana County (Ohio), arguing primarily that error had occurred in many discovery and evidentiary rulings.

**OVERVIEW:** Defendant was arrested for speeding after an officer using a laser speed-measuring device clocked him at an excessive speed. The laser evidence was the primary evidence at trial, although the trial court viewed a videotape not offered in evidence and heard the officer's account of the arrest. The appellate court upheld two of defendant's assignments of error. First, the trial court committed prejudicial error when it failed to comply with *Ohio R. Crim. P. 16(B)(1)(e)* and allowed the prosecution not to timely supply defendant with the name and other information on its expert witness regarding the laser device. The trial court also abused its discretion in severely limiting the extent to which it allowed defendant to cross-examine the officer regarding the device. Although the trial court further erred in permitting a prosecution expert to testify regarding a scientific study that was not properly in evidence and might have committed unpreserved error in watching the videotape, neither of these errors affected defendant's outcome. Nonetheless, the first two errors cited were sufficient to invalidate defendant's conviction.

**OUTCOME:** The appellate court reversed the judgment of conviction and remanded the matter for further consistent proceedings.

**CORE TERMS:** laser, speed, assignment of error, discovery, judicial notice, training, accuracy, rested, cross-examination, miles, credibility, taking judicial notice, calibrated, traveling, objected, voltage, radar, expert witness, experiment, pro se, certificate, videotape, sixty-six, speeding, resume, expert testimony, hearsay, continuance, reliability, calibration

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Jencks Act  
Criminal Law & Procedure > Counsel > General Overview***

[HN1] See *Ohio R. Crim. P. 16(B)(1)(e)*.

***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview  
Evidence > Testimony > Examination > Cross-Examination > General Overview***

***Evidence > Testimony > Presentation of Evidence***

[HN2] A trial court shall exercise reasonable control over the mode and order of interrogating witnesses. *Ohio R. Evid. 611(A)*.

***Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination  
Evidence > Testimony > Examination > Cross-Examination > General Overview***

[HN3] A trial court shall allow cross-examination on all relevant matters and matters affecting credibility. *Ohio R. Evid. 611(B)*.

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview  
Evidence > Procedural Considerations > Rulings on Evidence***

***Evidence > Testimony > Examination > Cross-Examination > Scope***

[HN4] The scope of cross-examination lies within an Ohio trial court's discretion. An appellate court will not reverse a trial court's ruling on the scope of cross-examination absent an abuse of that discretion.

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Confrontation  
Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination***

[HN5] One of the oldest and most fundamental rights in the Anglo-American system of evidence is the right of a party to cross-examine an adverse witness. The value of the right of cross-examination is well-settled in Ohio jurisprudence.

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview  
Evidence > Procedural Considerations > Objections & Offers of Proof > Timeliness***

***Evidence > Procedural Considerations > Rulings on Evidence***

[HN6] Although evidentiary rulings are typically reviewed only for abuse of the trial court's discretion, errors relating to the trial court's admission of hearsay must be viewed in the light of *Ohio R. Evid. 103(A)* and the standard established in *Ohio R. Crim. P. 52(A)*, providing that such errors are harmless unless the record demonstrates that the errors affected a party's substantial right. *Ohio R. Evid. 103(A)* provides that a party must object to the contested evidence in a timely manner to preserve the issue for appeal.

***Evidence > Hearsay > Rule Components > Truth of Matter Asserted***

[HN7] Hearsay is an out-of-court statement offered in court to prove the truth of the matter asserted. *Ohio R. Evid. 801(C)*.

***Evidence > Testimony > Experts > Criminal Trials***

[HN8] *Ohio R. Evid. 702(C)* provides that an expert witness may give his opinion if it, among other things, is based on

reliable scientific, technical, or other specialized information. If the expert's testimony reports the result of a procedure, test, or experiment, the testimony is reliable only if it meets three requirements. The requirements are: (1) the theory upon which the procedure, test, or experiment is based is objectively verifiable or is validly derived from widely accepted knowledge, facts, or principles; (2) the design of the procedure, test, or experiment reliably implements the theory; (3) the particular procedure, test, or experiment was conducted in a way that will yield an accurate result.

***Evidence > Judicial Notice***

***Evidence > Scientific Evidence > General Overview***

***Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN9] Under Ohio case law, the scientific accuracy of a laser device is the type of fact that can be judicially noticed.

***Evidence > Judicial Notice > General Overview***

[HN10] It is mandatory for a court to take judicial notice if requested by a party and supplied with the necessary information. *Ohio R. Evid. 201(D)*.

***Evidence > Judicial Notice***

[HN11] Judicial notice may be taken at any time during the proceedings. *Ohio R. Evid. 201(F)*.

***Evidence > Judicial Notice > General Overview***

***Evidence > Procedural Considerations > Objections & Offers of Proof > General Overview***

***Evidence > Procedural Considerations > Rulings on Evidence***

[HN12] A party is entitled upon timely request to an opportunity to be heard as to the propriety of taking judicial notice and the tenor of the matter noticed. In the absence of prior notification, the request may be made after judicial notice has been taken. *Ohio R. Evid. 201(E)*.

***Criminal Law & Procedure > Appeals > Reviewability > Waiver > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Plain Error > Definitions***

[HN13] The failure to object to an alleged error at trial waives all but plain error.

***Criminal Law & Procedure > Appeals > Standards of Review > Plain Error > General Overview***

[HN14] An Ohio appellate court reverses for plain error only if the outcome of the trial clearly would have been different absent the error.

***Criminal Law & Procedure > Counsel > Right to Self-Representation***

[HN15] An Ohio trial court is not obligated to provide a pro se defendant legal advice as to how to present his defense.

***Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > General Overview***

[HN16] Judging the credibility of witnesses is primarily the responsibility of the trier of fact.

For Defendant-Appellant: Attorney Milton A. Hayman, Steubenville, Ohio.

**JUDGES:** Hon. Gene Donofrio, Hon. Joseph J. Vukovich, Hon. Mary DeGenaro. Vukovich, J., concurs. DeGenaro, J.,

concur.

**OPINION BY:** Gene Donofrio

**OPINION:** DONOFRIO, J.

[\*P1] Defendant-appellant, Jeffrey S. Lloyd, appeals from the decision of the Southwest Area County Court of Columbiana County finding him guilty of exceeding the speed limit and fining him \$ 100.

[\*P2] On May 28, 2001, Trooper Craig Monte (Trooper Monte) stopped appellant's vehicle on Ohio State Route 7 for speeding. Trooper Monte issued appellant a traffic ticket that stated he clocked appellant with his laser traveling at sixty-six miles per hour in a fifty-five miles per hour zone. Appellant pled not guilty. The court scheduled a trial for June 27, 2001.

[\*P3] Appellant, acting pro se, filed a request for discovery seeking, among other things, a witness list, a log of the [\*\*2] laser speed detection device used to determine his speed, the arresting officer's training certificates, an overview and description of the State of Ohio's curriculum for the training and certification for officers for the use of laser speed detection devices, and how and where the laser speed detection device was calibrated. Plaintiff-appellee, the State of Ohio, provided some of the requested information to appellant on June 22, 2001. On June 25, 2001, appellant filed a motion to compel discovery of the remaining information. Appellant also filed a motion for a continuance of the trial scheduled for June 27, 2001 because he had not yet received all of his requested discovery. On June 26, 2001, appellant filed a motion to dismiss the case alleging appellee's actions interfered with his right to a speedy trial. The trial court held a hearing on appellant's motions on June 27, 2001. It overruled appellant's motion to dismiss, granted appellant's motion for a continuance, and ordered appellee to complete any discovery within seven days.

[\*P4] A trial was held on July 27, 2001. Appellant appeared pro se. The trial court found appellant guilty of exceeding the speed limit in violation [\*\*3] of *R.C. 4511.21(D)* and fined him \$ 100 plus costs, which it journalized in its July 30, 2001 judgment entry. Appellant filed a timely notice of appeal on August 2, 2001. The trial court stayed appellant's fine pending this appeal.

[\*P5] Appellant is now represented by counsel. He raises eight assignments of error, the first of which states:

[\*P6] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR BY DENYING DEFENDANT-APPELLANT'S *OHIO CRIMINAL RULE 16* MOTION TO COMPEL DISCOVERY ON SEVERAL KEY ISSUES, THEREBY ABUSING ITS DISCRETION MATERIALLY COMPROMISING DEFENDANT'S ABILITY TO PROPERLY DEFEND HIMSELF."

[\*P7] Appellant complained in his motion to compel that appellee failed to supply him with nineteen of his discovery requests. Of the nineteen items requested, the trial court ordered appellee to supply appellant with one of them, that being any damage history to the laser device. It ruled the other items appellant requested were either irrelevant or undiscoverable. Appellant now argues that the trial court erred in disallowing discovery on several of his requests.

[\*P8] The granting or overruling of discovery motions in a criminal case rests [\*\*4] within the sound discretion of the trial court and will only be disturbed on appeal in cases of clear abuse of discretion. *State v. Shoop (1993)*, 87 *Ohio App.3d 462, 469, 622 N.E.2d 665*. Abuse of discretion connotes more than an error of law or judgment; it implies that the trial court's decision was arbitrary, unreasonable or unconscionable. *State v. Adams (1980)*, 62 *Ohio St.2d 151, 157, 16 Ohio Op. 3d 169, 404 N.E.2d 144*.

[\*P9] "The purpose of discovery rules is to prevent surprise and the secreting of evidence favorable to one party." *State v. Smith (Aug. 10, 2001)*, 2001 *Ohio App. LEXIS 3531*, 11th Dist. No. 2000- A-52, 2001 *WL 901016* at \* 4, quoting *Lakewood v. Papadelis (1987)*, 32 *Ohio St.3d 1, 3, 511 N.E.2d 1138*. "The overall purpose of the discovery

rules is to produce a fair trial." *Id.*, citing *State v. Mitchell (1975)*, 47 Ohio App.2d 61, 80, 1 Ohio Op. 3d 181, 352 N.E.2d 636.

[\*P10] First, appellant alleges the court erred in not requiring appellee to submit to him the name and address of its expert witness. In its initial response to discovery appellee stated it intended to call a laser expert witness from LPI Manufacturers, the company that made the laser, but that the exact name and address of the expert [\*\*5] was unknown at that time. The trial court stated appellee would only be required to provide appellant with the expert's name. *Crim.R. 16(B)(1)(e)* provides that "[HN1] upon motion of the defendant, the court shall order the prosecuting attorney to furnish to the defendant a written list of the names and addresses of all witnesses whom the prosecuting attorney intends to call at trial."

[\*P11] At the time appellee filed its discovery response it did not yet know who its expert witness would be. However, on July 20, 2001, appellee filed the resume of its expert witness with the court, which included the expert witness's name and address. Appellant states, and there is nothing on the record to the contrary, that appellee never served him with a copy of the expert's name, address, or resume. No certificate of service accompanies the expert's resume that appellee filed with the court. Therefore, we can presume appellee did not serve a copy of its expert's resume with appellant. Without the name and address of appellee's expert, appellant was denied the opportunity to review the expert's credentials before trial and had no one to whom to address interrogatories. Thus, the trial court erred [\*\*6] in not ordering appellee to provide appellant with its expert's address. Furthermore, appellee failed to provide appellant with even its expert's name.

[\*P12] Second, appellant argues the court erred by denying his request for an overview and description of the State of Ohio's curriculum regarding the education and certification of officers for the use of laser speed devices; hourly, classroom, and field training requirements; and continuing education thereof. Appellee stated at the motion hearing this information was irrelevant because it had already provided appellant with a copy of Trooper Monte's certification in the use of the laser, therefore indicating that he had completed all training necessary to become certified. The court agreed with appellee.

[\*P13] At trial, Trooper Monte testified regarding the training he underwent to become certified in the use of electronic speed measuring devices and in visually estimating the speed of vehicles. Trooper Monte testified that while in the police academy he had one week designated as radar and laser week. He stated that this week consisted of five normal workdays. He testified that this week also included training on the [\*\*7] visual estimation of the speed of oncoming traffic. Appellee also introduced into evidence Trooper Monte's "Officer's Certificate of Training," which stated he satisfactorily completed all course requirements in theory, technical aspects, and practical use of electronic speed measuring devices.

[\*P14] Although appellant did not have the information about Trooper Monte's training in the use of laser devices before trial, this did not prejudice him. Appellee gave Trooper Monte's certificate of training to appellant in discovery; thus, appellant knew Trooper Monte was certified. The other information Trooper Monte testified to regarding the training week was not essential to appellee's case nor did it help or hurt appellant's case.

[\*P15] Third, appellant argues the court erred in denying his discovery request for the time the laser device was calibrated and tested for the day of his citation and for the date it was submitted for factory testing and calibration. At the motion hearing, the court held appellee did not have to provide appellant with this requested information because appellant could question Trooper Monte about these issues at trial. However, appellee did provide [\*\*8] appellant with the certificate of calibration from Laser Technology, Inc. in its response to discovery, which verified that the laser device in question was calibrated on June 30, 1994.

[\*P16] At trial, Trooper Monte testified the laser device in question was last calibrated at the factory on June 30, 1994 and introduced the certificate of calibration confirming the calibration date. (State's Exhibit 2). Trooper Monte also testified he calibrated the laser device at the beginning of his shift the day he issued appellant the speeding citation.

Nothing in the record indicates appellant was prejudiced by lack of discovery concerning when Trooper Monte calibrated the laser.

[\*P17] Finally, appellant argues appellee failed to comply with the court's order that it provide additional discovery to him within seven days of the June 27, 2001 hearing. He claims that he was prejudiced by appellee's delay of fifteen days.

[\*P18] Appellant failed to object to appellee's delay in filing the court ordered discovery until appellee rested its case. At that time, appellant requested a continuance based on appellee's delay in providing him with the requested discovery. The trial court [\*\*9] overruled appellant's request stating he should have raised it at the beginning of trial. Since appellant did not bring to the court's attention appellee's delay in completing discovery until appellee rested its case, the court did not err in denying appellant's request for a continuance.

[\*P19] Since the trial court failed to order appellee to provide appellant with its expert's address or resume and because appellee failed to provide appellant with any information whatsoever about the expert it intended to call, the trial court abused its discretion and impeded the purpose of the discovery rules. Accordingly, appellant's first assignment of error has merit.

[\*P20] Appellant's second assignment of error states:

[\*P21] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR AND ABUSED ITS DISCRETION BY DENYING DEFENDANT THE RIGHT TO CROSS EXAMINE THE STATE'S WITNESSES WITH QUESTIONS DESIGNED TO IMPEACH THEIR TESTIMONY AND TO REBUT EVIDENCE AS TO THE OPERATING INTEGRITY OF THE LASER SPEED DETECTION DEVICE USED BY THE ARRESTING OFFICER TO DETERMINE DEFENDANT'S SPEED."

[\*P22] Appellant alleges that had the trial court permitted him to cross-examine the witnesses as he wished, [\*\*10] he could have established the laser device must be operated in strict accordance with the operating manual, that it contains design flaws that render it incapable of providing accurate readings on all occasions, and that Trooper Monte was not qualified to measure speed. Appellant claims that the trial court improperly sustained appellee's objections to many of his questions on cross-examination of Trooper Monte. Appellant cites to *Xenia v. Boehman* (1996), 114 Ohio App.3d 78, 682 N.E.2d 1029, to support his argument in which the Second District Court of Appeals reversed the defendant's speeding conviction. The court found the trial court erred in not permitting the defendant to question the arresting officer regarding the circumstances of the defendant's traffic stop, the circumstances surrounding other tickets the officer had issued, and about what could cause false readings on a radar speed detection device. The court held the defendant, who was acting pro se, was attempting to impeach the officer's credibility and to determine his competency to use the radar device. Therefore, the court held the trial court abused its discretion in prohibiting these lines of questioning.

[\*P23] [\*\*11] [HN2] A trial court shall exercise reasonable control over the mode and order of interrogating witnesses. *Evid.R. 611(A)*. [HN3] The trial court shall allow cross-examination "on all relevant matters and matters affecting credibility." *Evid.R. 611(B)*. [HN4] The scope of cross-examination lies within the trial court's discretion. *State v. Slagle* (1992), 65 Ohio St.3d 597, 605, 605 N.E.2d 916; *State v. Acre* (1983), 6 Ohio St.3d 140, 145, 6 Ohio B. 197, 451 N.E.2d 802. This court will not reverse a trial court's ruling on the scope of cross-examination absent an abuse of that discretion. *Id.*

[\*P24] Appellant alleges the court erred in disallowing him to ask certain questions of Trooper Monte. Specifically, appellant calls our attention to the following excerpts from the trial transcript. Appellant asked Trooper Monte, "Do you find radar to be superior to laser? Or do you find laser to radar?" (Tr. 32). The trial court sustained appellee's objection on the basis of relevancy. Appellant also asked Trooper Monte, "at what range do you have to qualify for your service weapon?" (Tr. 34). Appellee again objected on the basis of relevancy. Appellant argued the

relevancy was Trooper Monte's aiming. The court sustained [\*\*12] the objection. Next, appellant asked Trooper Monte a line of questions regarding whether the laser device would work if it was damaged and whether excessive voltage could have damaged the laser device. Trooper Monte testified he did not know about the voltage of the laser. The court then sustained an objection to appellant's question regarding whether Trooper Monte had had enough faith in the laser device to subject it to an extreme voltage test. Finally, appellant asked Trooper Monte if he was able to visually measure the speed of an aircraft at approximately thirteen hundred feet. Again, appellee objected and the court sustained the objection.

[\*P25] It is worth noting "[HN5] one of the oldest and most fundamental rights in the Anglo-American system of evidence is the right of a party to cross-examine an adverse witness. The value of the *right* of cross-examination is well-settled in Ohio jurisprudence. ' \* \* \* The importance of the right of full cross-examination, of an adverse witness, can scarcely be overestimated. As a test of the accuracy, truthfulness, and credibility of testimony, it is invaluable.' (Emphasis added.) *Martin v. Elden* (1877), 32 Ohio St. 282, 287. [\*\*13] " *Smith v. Mitchell* (1988), 35 Ohio St.3d 237, 239, 520 N.E.2d 213.

[\*P26] The trial court abused its discretion in not permitting appellant to pursue the above lines of questioning. As in *Boehman*, most of appellant's lines of questioning, although not artfully presented, sought responses that could potentially impeach Trooper Monte's credibility. When appellant asked Trooper Monte whether he thought laser to be superior to radar, he was attempting to determine whether there may have been a more accurate way for Trooper Monte to determine his speed. When appellant asked Trooper Monte about his range for firing weapons, he was trying to establish that it would be difficult to aim and fire a laser at a car license plate that was a far distance away. When he asked Trooper Monte if he could visually measure the speed of an aircraft at thirteen hundred feet, he was attempting to establish that when Trooper Monte visually estimated his speed (while he was approximately thirteen hundred feet from appellant) it would be difficult for him to do so accurately.

[\*P27] The only line of questioning the court properly sustained appellee's objection to was regarding design flaws dealing [\*\*14] with voltage. Trooper Monte testified he did not know about the voltage issues concerning the laser device. Thus, the court did not allow further questions on the issue. Also, appellant was able to question appellee's laser expert about potential design flaws dealing with voltage.

[\*P28] Thus, appellant's second assignment of error has merit.

[\*P29] Appellant's third assignment of error states:

[\*P30] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR AND ABUSED ITS DISCRETION BY RELYING SOLELY ON THE TESTIMONY OF THE STATE'S WITNESSES, ABSENT ADMISSION INTO EVIDENCE OF THE LTI MARKSMAN 20-20 LASER SPEED DETECTION DEVICE."

[\*P31] Appellant contends the trial court should not have relied on the testimony of appellee's witnesses regarding the laser device since appellee did not introduce the laser device into evidence. Appellee called Professor Wyatt Kilgallin (Prof. Kilgallin) as a laser expert. Appellant claims the court drew conclusions from Prof. Kilgallin's testimony that resulted in the court taking judicial notice of the laser device as an acceptable device to be used in this jurisdiction. Additionally, he argues appellee should have asked that the record reflect [\*\*15] the specific reading derived from the laser device on the date in question.

[\*P32] Appellant fails to cite to any authority to support his contention that absent the admission of the laser into evidence, appellee's witnesses cannot be relied upon. Appellant also fails to point to any conclusion the trial court reached regarding the laser device that was improper. Finally, as to the record reflecting the reading from the laser on the day in question, Trooper Monte testified that when he used the laser to determine appellant's speed, the laser indicated sixty-six miles per hour.

[\*P33] Accordingly, appellant's third assignment of error is without merit.

[\*P34] Appellant's fourth assignment of error states:

[\*P35] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR AND ABUSED ITS DISCRETION BY ADMITTING THE STATE'S WRITTEN HEARSAY EVIDENCE, DESPITE RENEWED DEFENSE OBJECTIONS."

[\*P36] The trial court admitted a written study entitled, "Analysis of Laser Speed Measurement Data" (New Jersey study) into evidence. The study was conducted by the New Jersey Department of Transportation and was dated January 28, 1997. The New Jersey study was designed to evaluate the accuracy [\*\*16] and precision of the LTI Marksman 20-20 Laser Speed Detection System. The study compared the laser device in question with other speed measurement devices. Prof. Kilgallin used the New Jersey study to supplement his testimony. Appellant objected to the introduction of the New Jersey study and Prof. Kilgallin's testimony regarding it as hearsay because appellee did not produce the facts/data that the study was based on. The trial court overruled the objection but noted it would "take it for the weight that should be given to it." (Tr. 72).

[\*P37] Appellant argues the court improperly admitted this study into evidence because it draws conclusions from data gathered by someone who did not testify at trial.

[\*P38] "[HN6] Although evidentiary rulings are typically reviewed only for abuse of the trial court's discretion, 'errors relating to the trial court's admission of hearsay must be viewed in the light of *Evid.R. 103(A)* and the standard established in *Crim.R. 52(A)*, providing that such errors are harmless unless the record demonstrates that the errors affected a party's substantial right.'" *Safkow v. Scheiben*, 7th Dist. No. 99- CO-79, 2001 Ohio 3255, 2001 Ohio App. LEXIS 2113, 2001 WL 503200 at \* 3, [\*\*17] quoting *State v. Sorrels* (1991), 71 Ohio App.3d 162, 165, 593 N.E.2d 313. *Evid.R. 103(A)* provides that a party must object to the contested evidence in a timely manner to preserve the issue for appeal.

[\*P39] [HN7] Hearsay is an out of court statement offered in court to prove the truth of the matter asserted. *Evid.R. 801(C)*. The New Jersey study meets this definition. [HN8] *Evid.R. 702(C)* provides that an expert witness may give his opinion if it, among other things, "is based on reliable scientific, technical, or other specialized information." If the expert's testimony reports the result of a procedure, test, or experiment, the testimony is reliable only if it meets three requirements. *Id.* The requirements are:

[\*P40] "(1) The theory upon which the procedure, test, or experiment is based is objectively verifiable or is validly derived from widely accepted knowledge, facts, or principles;

[\*P41] "(2) The design of the procedure, test, or experiment reliably implements the theory;

[\*P42] "(3) The particular procedure, test, or experiment was conducted in a way that will yield an accurate result." *Id.*

[\*P43] Prof. Kilgallin's testimony concerning the New [\*\*18] Jersey study does not meet these requirements. Prof. Kilgallin did not testify as to the reliability of the design of the study nor did he testify that the experiments were performed in such a way as to yield an accurate result. Since the study was hearsay and Prof. Kilgallin failed to testify regarding its reliability, the trial court should not have admitted it into evidence.

[\*P44] However, it does not appear that by admitting the study into evidence the court prejudiced appellant. The court noted it would only consider the study for the weight that should be given to it. Furthermore, appellant cross-examined Prof. Kilgallin about the study. Prof. Kilgallin admitted he was not there when the study was conducted. Additionally, the majority of Prof. Kilgallin's expert testimony did not concern the New Jersey study, but instead concentrated on his own personal knowledge of the laser device. Finally, there is no indication that the court specifically relied on the study in rendering its decision.

[\*P45] Therefore, although the trial court should not have admitted the New Jersey study, its error was harmless.

Thus, appellant's fourth assignment of error is without merit. [\*\*19]

[\*P46] Appellant's fifth assignment of error states:

[\*P47] "THE TRIAL COURT ERRED AND ABUSED ITS DISCRETION BY TAKING JUDICIAL NOTICE OF THE LASER SPEED DETECTION DEVICE BEFORE DEFENDANT COULD FULLY DEVELOP HIS CASE, AND ABSENT THE LASER'S ADMISSION INTO EVIDENCE."

[\*P48] Appellant argues the trial court erred in taking judicial notice of the laser device at the time when appellee objected to appellant's cross-examination of Prof. Kilgallin.

[\*P49] At trial, appellant objected to the court taking judicial notice of the fact that the LTI Marksman 20-20 laser device was reliable and accurate for determining speed; however, he did so after the court had already taken judicial notice of this fact. Even if appellant had objected to the judicial notice sooner, it was still proper for the court to take judicial notice.

[\*P50] "[HN9] The scientific accuracy of a laser device is the type of fact that can be judicially noticed." *City of Columbus v. Dawson* (Mar. 14, 2000), 2000 Ohio App. LEXIS 951, 10th Dist. No. 99 AP-589, 2000 WL 271766 at \* 2. [HN10] It is mandatory for a court to take judicial notice if requested by a party and supplied with the necessary information. *Evid.R. 201(D)*. [HN11] Judicial [\*\*20] notice may be taken at any time during the proceedings. *Evid.R. 201(F)*. "[HN12] A party is entitled upon timely request to an opportunity to be heard as to the propriety of taking judicial notice and the tenor of the matter noticed. In the absence of prior notification, the request may be made after judicial notice has been taken." *Evid.R. 201(E)*.

[\*P51] According to the above rules of evidence, appellant was entitled to an opportunity to be heard as to the propriety of the court taking judicial notice of the accuracy and reliability of the LTI Marksman 20-20 laser device. The trial court did afford appellant this opportunity. After appellee concluded its direct examination of Prof. Kilgallin, it asked the court to take judicial notice of the fact that the LTI Marksman 20-20 laser device is an accurate device to determine the speed of a vehicle. The court stated it would first permit appellant to question Prof. Kilgallin and then appellee could renew its motion. Additionally, appellee supplied the court via Prof. Kilgallin's testimony with the information necessary and requested that the court take judicial notice of the laser device's accuracy. Hence, the court was obligated to take [\*\*21] judicial notice as requested. *Evid.R. 201(D)*.

[\*P52] Thus, appellant's fifth assignment of error is without merit.

[\*P53] Appellant's sixth assignment of error states:

[\*P54] "THE TRIAL COURT ERRED AND ABUSED ITS DISCRETION BY RELYING ON TESTIMONY AND CITING THE VIDEO TAPE THE TROOPER ALLEGEDLY MADE, EVEN THOUGH SAID VIDEO TAPE WAS NEVER ADMITTED INTO EVIDENCE."

[\*P55] A police cruiser videotape was made of Trooper Monte's traffic stop of appellant. Appellee never entered this tape into evidence; however, appellee did play the tape for the court. Appellant argues that the court erred in hearing testimony about what was on the videotape.

[\*P56] Appellant did not object to the playing of the videotape. [HN13] The failure to object to an alleged error at trial waives all but plain error. *State v. Lindsey* (2000), 87 Ohio St.3d 479, 482, 721 N.E.2d 995. Thus, [HN14] we will reverse only if the outcome of the trial clearly would have been different absent the error. *Id.*

[\*P57] There is no indication that the outcome of the trial clearly would have been different had the court not listened to testimony about the videotape. In the tape, appellant makes a comment to Trooper [\*\*22] Monte after Trooper Monte tells appellant that he clocked him traveling at sixty-six miles per hour. Trooper Monte testified that

appellant replied, "I don't doubt that." (Tr. 9). Trooper Monte later testified it was possible appellant made this remark sarcastically. When the court announced its decision, it commented appellant's remark to Trooper Monte did not seem sarcastic. However, the court had before it other evidence of appellant's guilt in addition to this one comment. The court stated the following in its judgment entry. It found the LTI Marksman 20-20 laser device to be an accepted device for the measurement of speed in this jurisdiction. It found Trooper Monte properly operated the laser device and determined appellant was traveling at sixty-six miles per hour. The court also found the laser device was in proper working order. Therefore, the court did not need to rely on appellant's comment as evidence of his guilt.

[\*P58] Accordingly, the trial court did not commit plain error in watching the videotape or in listening to testimony of what occurred at the traffic stop. Thus, appellant's sixth assignment of error is without merit.

[\*P59] Appellant's seventh assignment [\*\*23] of error states:

[\*P60] "THE TRIAL COURT ERRED AND ABUSED ITS DISCRETION BY ISSUING A VERDICT BEFORE EITHER PLAINTIFF OR DEFENDANT RESTED THEIR CASE."

[\*P61] Appellant alleges that since he was a pro se defendant and because neither party formally announced that it had rested its case, the court should have inquired if each party rested before rendering its judgment. Appellant claims, absent that type of supervision by the court, he could have missed opportunities to move for a directed verdict, which compromised his ability to defend himself.

[\*P62] Although neither party explicitly stated, "I rest my case," it is obvious when reading the transcript that each party rested before the court entered its decision. The following excerpts from the transcript are applicable.

[\*P63] "THE COURT: \* \* \*. Does the State have any further evidence to present?"

[\*P64] "MS. PETRELLA: The State does not, Your Honor.

[\*P65] "THEREUPON, THE PLAINTIFF, THE STATE OF OHIO, RESTED ITS CASE IN CHIEF." (Tr. 134-35).

[\*P66] "THE COURT: \* \* \*. You have no other witnesses to present, Mr. Lloyd?"

[\*P67] "MR LLOYD: No, Your Honor.

[\*P68] "THE COURT: All right. [\*\*24]

[\*P69] "THEREUPON, THE DEFENDANT, JEFFREY S. LLOYD, RESTED HIS CASE." (Tr. 152).

[\*P70] Based on the above excerpts, the trial court did not prematurely render its decision. Furthermore, [HN15] the trial court is not obligated to provide a pro se defendant legal advice as to how to present his defense. *Cleveland v. Lane* (Dec. 9, 1999), 1999 Ohio App. LEXIS 5893, 8th Dist. No. 75151, 1999 WL 1129582 at \* 3.

[\*P71] Thus, appellant's seventh assignment of error is without merit.

[\*P72] Appellant's eighth assignment of error states:

[\*P73] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR AND ABUSED ITS DISCRETION BY FINDING DEFENDANT GUILTY ABSENT PROOF BEYOND A REASONABLE DOUBT THAT DEFENDANT WAS OPERATING A VEHICLE IN EXCESS OF THE POSTED SPEED LIMIT."

[\*P74] Appellant argues that he raised reasonable doubt as to whether he was actually speeding when Trooper Monte stopped him. Appellant relies on the case of *State v. Sapphire* (Dec. 8, 2000), 2000 Ohio App. LEXIS 5767, 2nd

Dist. No. 2000 CA 39, 2000 WL 1803852, in which the Second District Court of Appeals reversed the defendant's conviction for speeding. At trial, the court took judicial notice of the accuracy and dependability of [\*\*25] the laser device based solely on the court's training. The appellate court held that since no expert testimony was presented regarding the scientific reliability of the laser device, the trial court could not properly take judicial notice of its accuracy. 2000 Ohio App. LEXIS 5767 at \* 11. Since the trial court should not have admitted the reading from the laser device without expert testimony, the court held there was no admissible evidence that the defendant was traveling at the rate of speed alleged. Therefore, the court reversed the defendant's conviction. In the present case, appellant argues that he impeached Prof. Kilgallin's testimony; therefore, appellee could not use the reading from the laser device as evidence of his speed.

[\*P75] The case sub judice is distinguishable from *Saphire*. The trial court took judicial notice of the accuracy and dependability of the laser device based on Prof. Kilgallin's expert testimony. The court did not rely on its own training on laser devices as the trial court in *Saphire* did. Even with appellant's attempted impeachment of Prof. Kilgallin, the trial court was in the best position to judge the credibility of Prof. Kilgallin's testimony. [HN16] Judging the [\*\*26] credibility of witnesses is primarily the responsibility of the trier of fact. *State v. DeHass (1967)*, 10 Ohio St.2d 230, 231, 39 Ohio Op. 2d 366, 227 N.E.2d 212.

[\*P76] Additionally, Trooper Monte testified that he observed appellant's vehicle traveling on State Route 7 at what he perceived as approximately sixty-five miles per hour. He then used his Marksman 20-20 laser to determine that appellant was actually traveling at sixty-six miles per hour. Trooper Monte testified that the posted speed limit on State Route 7 is fifty-five miles per hour.

[\*P77] As can be seen, the conviction in the trial court is based primarily on the testimony of Trooper Monte and Prof. Kilgallin. Given our findings in the first and second assignments of error that involve both Prof. Kilgallin and Trooper Monte, this eighth assignment of error is rendered moot.

[\*P78] Based on the merit of appellant's first and second assignments of error, the decision of the trial court is hereby reversed and remanded for further proceedings according to law and consistent with this opinion.

**STATE OF OHIO, PLAINTIFF-APPELLEE, VS. JEFFREY S. LLOYD,  
DEFENDANT-APPELLANT.**

**CASE NO. 2001-CO-36**

**COURT OF APPEALS OF OHIO, SEVENTH APPELLATE DISTRICT,  
COLUMBIANA COUNTY**

*2002 Ohio 3017; 2002 Ohio App. LEXIS 3027*

**June 13, 2002, Decided**

**PRIOR HISTORY:** [\*\*1] CHARACTER OF PROCEEDINGS: Criminal Appeal from Southwest Area County Court Case No. 2001-TR-D-1712-S.

**DISPOSITION:** Trial court's judgment was reversed and case was remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from his speeding conviction in the Southwest Area County Court, Columbiana County (Ohio), arguing primarily that error had occurred in many discovery and evidentiary rulings.

**OVERVIEW:** Defendant was arrested for speeding after an officer using a laser speed-measuring device clocked him at an excessive speed. The laser evidence was the primary evidence at trial, although the trial court viewed a videotape not offered in evidence and heard the officer's account of the arrest. The appellate court upheld two of defendant's assignments of error. First, the trial court committed prejudicial error when it failed to comply with *Ohio R. Crim. P. 16(B)(1)(e)* and allowed the prosecution not to timely supply defendant with the name and other information on its expert witness regarding the laser device. The trial court also abused its discretion in severely limiting the extent to which it allowed defendant to cross-examine the officer regarding the device. Although the trial court further erred in permitting a prosecution expert to testify regarding a scientific study that was not properly in evidence and might have committed unpreserved error in watching the videotape, neither of these errors affected defendant's outcome. Nonetheless, the first two errors cited were sufficient to invalidate defendant's conviction.

**OUTCOME:** The appellate court reversed the judgment of conviction and remanded the matter for further consistent proceedings.

**CORE TERMS:** laser, speed, assignment of error, discovery, judicial notice, training, accuracy, rested, cross-examination, miles, credibility, taking judicial notice, calibrated, traveling, objected, voltage, radar, expert witness, experiment, pro se, certificate, videotape, sixty-six, speeding, resume, expert testimony, hearsay, continuance, reliability, calibration

***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview  
Evidence > Testimony > Examination > Cross-Examination > General Overview***

***Evidence > Testimony > Presentation of Evidence***

[HN2] A trial court shall exercise reasonable control over the mode and order of interrogating witnesses. *Ohio R. Evid. 611(A)*.

***Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination  
Evidence > Testimony > Examination > Cross-Examination > General Overview***

[HN3] A trial court shall allow cross-examination on all relevant matters and matters affecting credibility. *Ohio R. Evid. 611(B)*.

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview  
Evidence > Procedural Considerations > Rulings on Evidence***

***Evidence > Testimony > Examination > Cross-Examination > Scope***

[HN4] The scope of cross-examination lies within an Ohio trial court's discretion. An appellate court will not reverse a trial court's ruling on the scope of cross-examination absent an abuse of that discretion.

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Confrontation  
Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination***

[HN5] One of the oldest and most fundamental rights in the Anglo-American system of evidence is the right of a party to cross-examine an adverse witness. The value of the right of cross-examination is well-settled in Ohio jurisprudence.

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview  
Evidence > Procedural Considerations > Objections & Offers of Proof > Timeliness***

***Evidence > Procedural Considerations > Rulings on Evidence***

[HN6] Although evidentiary rulings are typically reviewed only for abuse of the trial court's discretion, errors relating to the trial court's admission of hearsay must be viewed in the light of *Ohio R. Evid. 103(A)* and the standard established in *Ohio R. Crim. P. 52(A)*, providing that such errors are harmless unless the record demonstrates that the errors affected a party's substantial right. *Ohio R. Evid. 103(A)* provides that a party must object to the contested evidence in a timely manner to preserve the issue for appeal.

***Evidence > Hearsay > Rule Components > Truth of Matter Asserted***

[HN7] Hearsay is an out-of-court statement offered in court to prove the truth of the matter asserted. *Ohio R. Evid. 801(C)*.

***Evidence > Testimony > Experts > Criminal Trials***

[HN8] *Ohio R. Evid. 702(C)* provides that an expert witness may give his opinion if it, among other things, is based on

reliable scientific, technical, or other specialized information. If the expert's testimony reports the result of a procedure, test, or experiment, the testimony is reliable only if it meets three requirements. The requirements are: (1) the theory upon which the procedure, test, or experiment is based is objectively verifiable or is validly derived from widely accepted knowledge, facts, or principles; (2) the design of the procedure, test, or experiment reliably implements the theory; (3) the particular procedure, test, or experiment was conducted in a way that will yield an accurate result.

***Evidence > Judicial Notice***

***Evidence > Scientific Evidence > General Overview***

***Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN9] Under Ohio case law, the scientific accuracy of a laser device is the type of fact that can be judicially noticed.

***Evidence > Judicial Notice > General Overview***

[HN10] It is mandatory for a court to take judicial notice if requested by a party and supplied with the necessary information. *Ohio R. Evid. 201(D)*.

***Evidence > Judicial Notice***

[HN11] Judicial notice may be taken at any time during the proceedings. *Ohio R. Evid. 201(F)*.

***Evidence > Judicial Notice > General Overview***

***Evidence > Procedural Considerations > Objections & Offers of Proof > General Overview***

***Evidence > Procedural Considerations > Rulings on Evidence***

[HN12] A party is entitled upon timely request to an opportunity to be heard as to the propriety of taking judicial notice and the tenor of the matter noticed. In the absence of prior notification, the request may be made after judicial notice has been taken. *Ohio R. Evid. 201(E)*.

***Criminal Law & Procedure > Appeals > Reviewability > Waiver > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Plain Error > Definitions***

[HN13] The failure to object to an alleged error at trial waives all but plain error.

***Criminal Law & Procedure > Appeals > Standards of Review > Plain Error > General Overview***

[HN14] An Ohio appellate court reverses for plain error only if the outcome of the trial clearly would have been different absent the error.

***Criminal Law & Procedure > Counsel > Right to Self-Representation***

[HN15] An Ohio trial court is not obligated to provide a pro se defendant legal advice as to how to present his defense.

***Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > General Overview***

[HN16] Judging the credibility of witnesses is primarily the responsibility of the trier of fact.

**COUNSEL:** For Plaintiff-Appellee: Robert L. Herron, Prosecuting Attorney, Shelli Ellen Petrella, Assistant Prosecuting Attorney, Lisbon, Ohio.

For Defendant-Appellant: Attorney Milton A. Hayman, Steubenville, Ohio.

**JUDGES:** Hon. Gene Donofrio, Hon. Joseph J. Vukovich, Hon. Mary DeGenaro. Vukovich, J., concurs. DeGenaro, J.,

concur.

**OPINION BY:** Gene Donofrio

**OPINION:** DONOFRIO, J.

[\*P1] Defendant-appellant, Jeffrey S. Lloyd, appeals from the decision of the Southwest Area County Court of Columbiana County finding him guilty of exceeding the speed limit and fining him \$ 100.

[\*P2] On May 28, 2001, Trooper Craig Monte (Trooper Monte) stopped appellant's vehicle on Ohio State Route 7 for speeding. Trooper Monte issued appellant a traffic ticket that stated he clocked appellant with his laser traveling at sixty-six miles per hour in a fifty-five miles per hour zone. Appellant pled not guilty. The court scheduled a trial for June 27, 2001.

[\*P3] Appellant, acting pro se, filed a request for discovery seeking, among other things, a witness list, a log of the [\*\*2] laser speed detection device used to determine his speed, the arresting officer's training certificates, an overview and description of the State of Ohio's curriculum for the training and certification for officers for the use of laser speed detection devices, and how and where the laser speed detection device was calibrated. Plaintiff-appellee, the State of Ohio, provided some of the requested information to appellant on June 22, 2001. On June 25, 2001, appellant filed a motion to compel discovery of the remaining information. Appellant also filed a motion for a continuance of the trial scheduled for June 27, 2001 because he had not yet received all of his requested discovery. On June 26, 2001, appellant filed a motion to dismiss the case alleging appellee's actions interfered with his right to a speedy trial. The trial court held a hearing on appellant's motions on June 27, 2001. It overruled appellant's motion to dismiss, granted appellant's motion for a continuance, and ordered appellee to complete any discovery within seven days.

[\*P4] A trial was held on July 27, 2001. Appellant appeared pro se. The trial court found appellant guilty of exceeding the speed limit in violation [\*\*3] of *R.C. 4511.21(D)* and fined him \$ 100 plus costs, which it journalized in its July 30, 2001 judgment entry. Appellant filed a timely notice of appeal on August 2, 2001. The trial court stayed appellant's fine pending this appeal.

[\*P5] Appellant is now represented by counsel. He raises eight assignments of error, the first of which states:

[\*P6] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR BY DENYING DEFENDANT-APPELLANT'S *OHIO CRIMINAL RULE 16* MOTION TO COMPEL DISCOVERY ON SEVERAL KEY ISSUES, THEREBY ABUSING ITS DISCRETION MATERIALLY COMPROMISING DEFENDANT'S ABILITY TO PROPERLY DEFEND HIMSELF."

[\*P7] Appellant complained in his motion to compel that appellee failed to supply him with nineteen of his discovery requests. Of the nineteen items requested, the trial court ordered appellee to supply appellant with one of them, that being any damage history to the laser device. It ruled the other items appellant requested were either irrelevant or undiscoverable. Appellant now argues that the trial court erred in disallowing discovery on several of his requests.

[\*P8] The granting or overruling of discovery motions in a criminal case rests [\*\*4] within the sound discretion of the trial court and will only be disturbed on appeal in cases of clear abuse of discretion. *State v. Shoop (1993)*, 87 *Ohio App.3d 462, 469, 622 N.E.2d 665*. Abuse of discretion connotes more than an error of law or judgment; it implies that the trial court's decision was arbitrary, unreasonable or unconscionable. *State v. Adams (1980)*, 62 *Ohio St.2d 151, 157, 16 Ohio Op. 3d 169, 404 N.E.2d 144*.

[\*P9] "The purpose of discovery rules is to prevent surprise and the secreting of evidence favorable to one party." *State v. Smith (Aug. 10, 2001)*, 2001 *Ohio App. LEXIS 3531*, 11th Dist. No. 2000- A-52, 2001 *WL 901016* at \* 4, quoting *Lakewood v. Papadelis (1987)*, 32 *Ohio St.3d 1, 3, 511 N.E.2d 1138*. "The overall purpose of the discovery

rules is to produce a fair trial." *Id.*, citing *State v. Mitchell (1975)*, 47 Ohio App.2d 61, 80, 1 Ohio Op. 3d 181, 352 N.E.2d 636.

[\*P10] First, appellant alleges the court erred in not requiring appellee to submit to him the name and address of its expert witness. In its initial response to discovery appellee stated it intended to call a laser expert witness from LPI Manufacturers, the company that made the laser, but that the exact name and address of the expert [\*\*5] was unknown at that time. The trial court stated appellee would only be required to provide appellant with the expert's name. *Crim.R. 16(B)(1)(e)* provides that "[HN1] upon motion of the defendant, the court shall order the prosecuting attorney to furnish to the defendant a written list of the names and addresses of all witnesses whom the prosecuting attorney intends to call at trial."

[\*P11] At the time appellee filed its discovery response it did not yet know who its expert witness would be. However, on July 20, 2001, appellee filed the resume of its expert witness with the court, which included the expert witness's name and address. Appellant states, and there is nothing on the record to the contrary, that appellee never served him with a copy of the expert's name, address, or resume. No certificate of service accompanies the expert's resume that appellee filed with the court. Therefore, we can presume appellee did not serve a copy of its expert's resume with appellant. Without the name and address of appellee's expert, appellant was denied the opportunity to review the expert's credentials before trial and had no one to whom to address interrogatories. Thus, the trial court erred [\*\*6] in not ordering appellee to provide appellant with its expert's address. Furthermore, appellee failed to provide appellant with even its expert's name.

[\*P12] Second, appellant argues the court erred by denying his request for an overview and description of the State of Ohio's curriculum regarding the education and certification of officers for the use of laser speed devices; hourly, classroom, and field training requirements; and continuing education thereof. Appellee stated at the motion hearing this information was irrelevant because it had already provided appellant with a copy of Trooper Monte's certification in the use of the laser, therefore indicating that he had completed all training necessary to become certified. The court agreed with appellee.

[\*P13] At trial, Trooper Monte testified regarding the training he underwent to become certified in the use of electronic speed measuring devices and in visually estimating the speed of vehicles. Trooper Monte testified that while in the police academy he had one week designated as radar and laser week. He stated that this week consisted of five normal workdays. He testified that this week also included training on the [\*\*7] visual estimation of the speed of oncoming traffic. Appellee also introduced into evidence Trooper Monte's "Officer's Certificate of Training," which stated he satisfactorily completed all course requirements in theory, technical aspects, and practical use of electronic speed measuring devices.

[\*P14] Although appellant did not have the information about Trooper Monte's training in the use of laser devices before trial, this did not prejudice him. Appellee gave Trooper Monte's certificate of training to appellant in discovery; thus, appellant knew Trooper Monte was certified. The other information Trooper Monte testified to regarding the training week was not essential to appellee's case nor did it help or hurt appellant's case.

[\*P15] Third, appellant argues the court erred in denying his discovery request for the time the laser device was calibrated and tested for the day of his citation and for the date it was submitted for factory testing and calibration. At the motion hearing, the court held appellee did not have to provide appellant with this requested information because appellant could question Trooper Monte about these issues at trial. However, appellee did provide [\*\*8] appellant with the certificate of calibration from Laser Technology, Inc. in its response to discovery, which verified that the laser device in question was calibrated on June 30, 1994.

[\*P16] At trial, Trooper Monte testified the laser device in question was last calibrated at the factory on June 30, 1994 and introduced the certificate of calibration confirming the calibration date. (State's Exhibit 2). Trooper Monte also testified he calibrated the laser device at the beginning of his shift the day he issued appellant the speeding citation.

Nothing in the record indicates appellant was prejudiced by lack of discovery concerning when Trooper Monte calibrated the laser.

[\*P17] Finally, appellant argues appellee failed to comply with the court's order that it provide additional discovery to him within seven days of the June 27, 2001 hearing. He claims that he was prejudiced by appellee's delay of fifteen days.

[\*P18] Appellant failed to object to appellee's delay in filing the court ordered discovery until appellee rested its case. At that time, appellant requested a continuance based on appellee's delay in providing him with the requested discovery. The trial court [\*\*9] overruled appellant's request stating he should have raised it at the beginning of trial. Since appellant did not bring to the court's attention appellee's delay in completing discovery until appellee rested its case, the court did not err in denying appellant's request for a continuance.

[\*P19] Since the trial court failed to order appellee to provide appellant with its expert's address or resume and because appellee failed to provide appellant with any information whatsoever about the expert it intended to call, the trial court abused its discretion and impeded the purpose of the discovery rules. Accordingly, appellant's first assignment of error has merit.

[\*P20] Appellant's second assignment of error states:

[\*P21] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR AND ABUSED ITS DISCRETION BY DENYING DEFENDANT THE RIGHT TO CROSS EXAMINE THE STATE'S WITNESSES WITH QUESTIONS DESIGNED TO IMPEACH THEIR TESTIMONY AND TO REBUT EVIDENCE AS TO THE OPERATING INTEGRITY OF THE LASER SPEED DETECTION DEVICE USED BY THE ARRESTING OFFICER TO DETERMINE DEFENDANT'S SPEED."

[\*P22] Appellant alleges that had the trial court permitted him to cross-examine the witnesses as he wished, [\*\*10] he could have established the laser device must be operated in strict accordance with the operating manual, that it contains design flaws that render it incapable of providing accurate readings on all occasions, and that Trooper Monte was not qualified to measure speed. Appellant claims that the trial court improperly sustained appellee's objections to many of his questions on cross-examination of Trooper Monte. Appellant cites to *Xenia v. Boehman* (1996), 114 Ohio App.3d 78, 682 N.E.2d 1029, to support his argument in which the Second District Court of Appeals reversed the defendant's speeding conviction. The court found the trial court erred in not permitting the defendant to question the arresting officer regarding the circumstances of the defendant's traffic stop, the circumstances surrounding other tickets the officer had issued, and about what could cause false readings on a radar speed detection device. The court held the defendant, who was acting pro se, was attempting to impeach the officer's credibility and to determine his competency to use the radar device. Therefore, the court held the trial court abused its discretion in prohibiting these lines of questioning.

[\*P23] [\*\*11] [HN2] A trial court shall exercise reasonable control over the mode and order of interrogating witnesses. *Evid.R. 611(A)*. [HN3] The trial court shall allow cross-examination "on all relevant matters and matters affecting credibility." *Evid.R. 611(B)*. [HN4] The scope of cross-examination lies within the trial court's discretion. *State v. Slagle* (1992), 65 Ohio St.3d 597, 605, 605 N.E.2d 916; *State v. Acre* (1983), 6 Ohio St.3d 140, 145, 6 Ohio B. 197, 451 N.E.2d 802. This court will not reverse a trial court's ruling on the scope of cross-examination absent an abuse of that discretion. Id.

[\*P24] Appellant alleges the court erred in disallowing him to ask certain questions of Trooper Monte. Specifically, appellant calls our attention to the following excerpts from the trial transcript. Appellant asked Trooper Monte, "Do you find radar to be superior to laser? Or do you find laser to radar?" (Tr. 32). The trial court sustained appellee's objection on the basis of relevancy. Appellant also asked Trooper Monte, "at what range do you have to qualify for your service weapon?" (Tr. 34). Appellee again objected on the basis of relevancy. Appellant argued the

relevancy was Trooper Monte's aiming. The court sustained [\*\*12] the objection. Next, appellant asked Trooper Monte a line of questions regarding whether the laser device would work if it was damaged and whether excessive voltage could have damaged the laser device. Trooper Monte testified he did not know about the voltage of the laser. The court then sustained an objection to appellant's question regarding whether Trooper Monte had had enough faith in the laser device to subject it to an extreme voltage test. Finally, appellant asked Trooper Monte if he was able to visually measure the speed of an aircraft at approximately thirteen hundred feet. Again, appellee objected and the court sustained the objection.

[\*P25] It is worth noting "[HN5] one of the oldest and most fundamental rights in the Anglo-American system of evidence is the right of a party to cross-examine an adverse witness. The value of the *right* of cross-examination is well-settled in Ohio jurisprudence. ' \* \* \* The importance of the right of full cross-examination, of an adverse witness, can scarcely be overestimated. As a test of the accuracy, truthfulness, and credibility of testimony, it is invaluable.' (Emphasis added.) *Martin v. Elden* (1877), 32 Ohio St. 282, 287. [\*\*13] " *Smith v. Mitchell* (1988), 35 Ohio St.3d 237, 239, 520 N.E.2d 213.

[\*P26] The trial court abused its discretion in not permitting appellant to pursue the above lines of questioning. As in *Boehman*, most of appellant's lines of questioning, although not artfully presented, sought responses that could potentially impeach Trooper Monte's credibility. When appellant asked Trooper Monte whether he thought laser to be superior to radar, he was attempting to determine whether there may have been a more accurate way for Trooper Monte to determine his speed. When appellant asked Trooper Monte about his range for firing weapons, he was trying to establish that it would be difficult to aim and fire a laser at a car license plate that was a far distance away. When he asked Trooper Monte if he could visually measure the speed of an aircraft at thirteen hundred feet, he was attempting to establish that when Trooper Monte visually estimated his speed (while he was approximately thirteen hundred feet from appellant) it would be difficult for him to do so accurately.

[\*P27] The only line of questioning the court properly sustained appellee's objection to was regarding design flaws dealing [\*\*14] with voltage. Trooper Monte testified he did not know about the voltage issues concerning the laser device. Thus, the court did not allow further questions on the issue. Also, appellant was able to question appellee's laser expert about potential design flaws dealing with voltage.

[\*P28] Thus, appellant's second assignment of error has merit.

[\*P29] Appellant's third assignment of error states:

[\*P30] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR AND ABUSED ITS DISCRETION BY RELYING SOLELY ON THE TESTIMONY OF THE STATE'S WITNESSES, ABSENT ADMISSION INTO EVIDENCE OF THE LTI MARKSMAN 20-20 LASER SPEED DETECTION DEVICE."

[\*P31] Appellant contends the trial court should not have relied on the testimony of appellee's witnesses regarding the laser device since appellee did not introduce the laser device into evidence. Appellee called Professor Wyatt Kilgallin (Prof. Kilgallin) as a laser expert. Appellant claims the court drew conclusions from Prof. Kilgallin's testimony that resulted in the court taking judicial notice of the laser device as an acceptable device to be used in this jurisdiction. Additionally, he argues appellee should have asked that the record reflect [\*\*15] the specific reading derived from the laser device on the date in question.

[\*P32] Appellant fails to cite to any authority to support his contention that absent the admission of the laser into evidence, appellee's witnesses cannot be relied upon. Appellant also fails to point to any conclusion the trial court reached regarding the laser device that was improper. Finally, as to the record reflecting the reading from the laser on the day in question, Trooper Monte testified that when he used the laser to determine appellant's speed, the laser indicated sixty-six miles per hour.

[\*P33] Accordingly, appellant's third assignment of error is without merit.

[\*P34] Appellant's fourth assignment of error states:

[\*P35] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR AND ABUSED ITS DISCRETION BY ADMITTING THE STATE'S WRITTEN HEARSAY EVIDENCE, DESPITE RENEWED DEFENSE OBJECTIONS."

[\*P36] The trial court admitted a written study entitled, "Analysis of Laser Speed Measurement Data" (New Jersey study) into evidence. The study was conducted by the New Jersey Department of Transportation and was dated January 28, 1997. The New Jersey study was designed to evaluate the accuracy [\*\*16] and precision of the LTI Marksman 20-20 Laser Speed Detection System. The study compared the laser device in question with other speed measurement devices. Prof. Kilgallin used the New Jersey study to supplement his testimony. Appellant objected to the introduction of the New Jersey study and Prof. Kilgallin's testimony regarding it as hearsay because appellee did not produce the facts/data that the study was based on. The trial court overruled the objection but noted it would "take it for the weight that should be given to it." (Tr. 72).

[\*P37] Appellant argues the court improperly admitted this study into evidence because it draws conclusions from data gathered by someone who did not testify at trial.

[\*P38] "[HN6] Although evidentiary rulings are typically reviewed only for abuse of the trial court's discretion, 'errors relating to the trial court's admission of hearsay must be viewed in the light of *Evid.R. 103(A)* and the standard established in *Crim.R. 52(A)*, providing that such errors are harmless unless the record demonstrates that the errors affected a party's substantial right.'" *Safkow v. Scheiben*, 7th Dist. No. 99- CO-79, 2001 Ohio 3255, 2001 Ohio App. LEXIS 2113, 2001 WL 503200 at \* 3, [\*\*17] quoting *State v. Sorrels* (1991), 71 Ohio App.3d 162, 165, 593 N.E.2d 313. *Evid.R. 103(A)* provides that a party must object to the contested evidence in a timely manner to preserve the issue for appeal.

[\*P39] [HN7] Hearsay is an out of court statement offered in court to prove the truth of the matter asserted. *Evid.R. 801(C)*. The New Jersey study meets this definition. [HN8] *Evid.R. 702(C)* provides that an expert witness may give his opinion if it, among other things, "is based on reliable scientific, technical, or other specialized information." If the expert's testimony reports the result of a procedure, test, or experiment, the testimony is reliable only if it meets three requirements. *Id.* The requirements are:

[\*P40] "(1) The theory upon which the procedure, test, or experiment is based is objectively verifiable or is validly derived from widely accepted knowledge, facts, or principles;

[\*P41] "(2) The design of the procedure, test, or experiment reliably implements the theory;

[\*P42] "(3) The particular procedure, test, or experiment was conducted in a way that will yield an accurate result." *Id.*

[\*P43] Prof. Kilgallin's testimony concerning the New [\*\*18] Jersey study does not meet these requirements. Prof. Kilgallin did not testify as to the reliability of the design of the study nor did he testify that the experiments were performed in such a way as to yield an accurate result. Since the study was hearsay and Prof. Kilgallin failed to testify regarding its reliability, the trial court should not have admitted it into evidence.

[\*P44] However, it does not appear that by admitting the study into evidence the court prejudiced appellant. The court noted it would only consider the study for the weight that should be given to it. Furthermore, appellant cross-examined Prof. Kilgallin about the study. Prof. Kilgallin admitted he was not there when the study was conducted. Additionally, the majority of Prof. Kilgallin's expert testimony did not concern the New Jersey study, but instead concentrated on his own personal knowledge of the laser device. Finally, there is no indication that the court specifically relied on the study in rendering its decision.

[\*P45] Therefore, although the trial court should not have admitted the New Jersey study, its error was harmless.

Thus, appellant's fourth assignment of error is without merit. [\*\*19]

[\*P46] Appellant's fifth assignment of error states:

[\*P47] "THE TRIAL COURT ERRED AND ABUSED ITS DISCRETION BY TAKING JUDICIAL NOTICE OF THE LASER SPEED DETECTION DEVICE BEFORE DEFENDANT COULD FULLY DEVELOP HIS CASE, AND ABSENT THE LASER'S ADMISSION INTO EVIDENCE."

[\*P48] Appellant argues the trial court erred in taking judicial notice of the laser device at the time when appellee objected to appellant's cross-examination of Prof. Kilgallin.

[\*P49] At trial, appellant objected to the court taking judicial notice of the fact that the LTI Marksman 20-20 laser device was reliable and accurate for determining speed; however, he did so after the court had already taken judicial notice of this fact. Even if appellant had objected to the judicial notice sooner, it was still proper for the court to take judicial notice.

[\*P50] "[HN9] The scientific accuracy of a laser device is the type of fact that can be judicially noticed." *City of Columbus v. Dawson* (Mar. 14, 2000), 2000 Ohio App. LEXIS 951, 10th Dist. No. 99 AP-589, 2000 WL 271766 at \* 2. [HN10] It is mandatory for a court to take judicial notice if requested by a party and supplied with the necessary information. *Evid.R. 201(D)*. [HN11] Judicial [\*\*20] notice may be taken at any time during the proceedings. *Evid.R. 201(F)*. "[HN12] A party is entitled upon timely request to an opportunity to be heard as to the propriety of taking judicial notice and the tenor of the matter noticed. In the absence of prior notification, the request may be made after judicial notice has been taken." *Evid.R. 201(E)*.

[\*P51] According to the above rules of evidence, appellant was entitled to an opportunity to be heard as to the propriety of the court taking judicial notice of the accuracy and reliability of the LTI Marksman 20-20 laser device. The trial court did afford appellant this opportunity. After appellee concluded its direct examination of Prof. Kilgallin, it asked the court to take judicial notice of the fact that the LTI Marksman 20-20 laser device is an accurate device to determine the speed of a vehicle. The court stated it would first permit appellant to question Prof. Kilgallin and then appellee could renew its motion. Additionally, appellee supplied the court via Prof. Kilgallin's testimony with the information necessary and requested that the court take judicial notice of the laser device's accuracy. Hence, the court was obligated to take [\*\*21] judicial notice as requested. *Evid.R. 201(D)*.

[\*P52] Thus, appellant's fifth assignment of error is without merit.

[\*P53] Appellant's sixth assignment of error states:

[\*P54] "THE TRIAL COURT ERRED AND ABUSED ITS DISCRETION BY RELYING ON TESTIMONY AND CITING THE VIDEO TAPE THE TROOPER ALLEGEDLY MADE, EVEN THOUGH SAID VIDEO TAPE WAS NEVER ADMITTED INTO EVIDENCE."

[\*P55] A police cruiser videotape was made of Trooper Monte's traffic stop of appellant. Appellee never entered this tape into evidence; however, appellee did play the tape for the court. Appellant argues that the court erred in hearing testimony about what was on the videotape.

[\*P56] Appellant did not object to the playing of the videotape. [HN13] The failure to object to an alleged error at trial waives all but plain error. *State v. Lindsey* (2000), 87 Ohio St.3d 479, 482, 721 N.E.2d 995. Thus, [HN14] we will reverse only if the outcome of the trial clearly would have been different absent the error. *Id.*

[\*P57] There is no indication that the outcome of the trial clearly would have been different had the court not listened to testimony about the videotape. In the tape, appellant makes a comment to Trooper [\*\*22] Monte after Trooper Monte tells appellant that he clocked him traveling at sixty-six miles per hour. Trooper Monte testified that

appellant replied, "I don't doubt that." (Tr. 9). Trooper Monte later testified it was possible appellant made this remark sarcastically. When the court announced its decision, it commented appellant's remark to Trooper Monte did not seem sarcastic. However, the court had before it other evidence of appellant's guilt in addition to this one comment. The court stated the following in its judgment entry. It found the LTI Marksman 20-20 laser device to be an accepted device for the measurement of speed in this jurisdiction. It found Trooper Monte properly operated the laser device and determined appellant was traveling at sixty-six miles per hour. The court also found the laser device was in proper working order. Therefore, the court did not need to rely on appellant's comment as evidence of his guilt.

[\*P58] Accordingly, the trial court did not commit plain error in watching the videotape or in listening to testimony of what occurred at the traffic stop. Thus, appellant's sixth assignment of error is without merit.

[\*P59] Appellant's seventh assignment [\*\*23] of error states:

[\*P60] "THE TRIAL COURT ERRED AND ABUSED ITS DISCRETION BY ISSUING A VERDICT BEFORE EITHER PLAINTIFF OR DEFENDANT RESTED THEIR CASE."

[\*P61] Appellant alleges that since he was a pro se defendant and because neither party formally announced that it had rested its case, the court should have inquired if each party rested before rendering its judgment. Appellant claims, absent that type of supervision by the court, he could have missed opportunities to move for a directed verdict, which compromised his ability to defend himself.

[\*P62] Although neither party explicitly stated, "I rest my case," it is obvious when reading the transcript that each party rested before the court entered its decision. The following excerpts from the transcript are applicable.

[\*P63] "THE COURT: \* \* \*. Does the State have any further evidence to present?"

[\*P64] "MS. PETRELLA: The State does not, Your Honor.

[\*P65] "THEREUPON, THE PLAINTIFF, THE STATE OF OHIO, RESTED ITS CASE IN CHIEF." (Tr. 134-35).

[\*P66] "THE COURT: \* \* \*. You have no other witnesses to present, Mr. Lloyd?"

[\*P67] "MR LLOYD: No, Your Honor.

[\*P68] "THE COURT: All right. [\*\*24]

[\*P69] "THEREUPON, THE DEFENDANT, JEFFREY S. LLOYD, RESTED HIS CASE." (Tr. 152).

[\*P70] Based on the above excerpts, the trial court did not prematurely render its decision. Furthermore, [HN15] the trial court is not obligated to provide a pro se defendant legal advice as to how to present his defense. *Cleveland v. Lane* (Dec. 9, 1999), 1999 Ohio App. LEXIS 5893, 8th Dist. No. 75151, 1999 WL 1129582 at \* 3.

[\*P71] Thus, appellant's seventh assignment of error is without merit.

[\*P72] Appellant's eighth assignment of error states:

[\*P73] "THE TRIAL COURT COMMITTED PREJUDICIAL ERROR AND ABUSED ITS DISCRETION BY FINDING DEFENDANT GUILTY ABSENT PROOF BEYOND A REASONABLE DOUBT THAT DEFENDANT WAS OPERATING A VEHICLE IN EXCESS OF THE POSTED SPEED LIMIT."

[\*P74] Appellant argues that he raised reasonable doubt as to whether he was actually speeding when Trooper Monte stopped him. Appellant relies on the case of *State v. Sapphire* (Dec. 8, 2000), 2000 Ohio App. LEXIS 5767, 2nd

Dist. No. 2000 CA 39, 2000 WL 1803852, in which the Second District Court of Appeals reversed the defendant's conviction for speeding. At trial, the court took judicial notice of the accuracy and dependability of [\*\*25] the laser device based solely on the court's training. The appellate court held that since no expert testimony was presented regarding the scientific reliability of the laser device, the trial court could not properly take judicial notice of its accuracy. 2000 Ohio App. LEXIS 5767 at \* 11. Since the trial court should not have admitted the reading from the laser device without expert testimony, the court held there was no admissible evidence that the defendant was traveling at the rate of speed alleged. Therefore, the court reversed the defendant's conviction. In the present case, appellant argues that he impeached Prof. Kilgallin's testimony; therefore, appellee could not use the reading from the laser device as evidence of his speed.

[\*P75] The case sub judice is distinguishable from *Saphire*. The trial court took judicial notice of the accuracy and dependability of the laser device based on Prof. Kilgallin's expert testimony. The court did not rely on its own training on laser devices as the trial court in *Saphire* did. Even with appellant's attempted impeachment of Prof. Kilgallin, the trial court was in the best position to judge the credibility of Prof. Kilgallin's testimony. [HN16] Judging the [\*\*26] credibility of witnesses is primarily the responsibility of the trier of fact. *State v. DeHass (1967)*, 10 Ohio St.2d 230, 231, 39 Ohio Op. 2d 366, 227 N.E.2d 212.

[\*P76] Additionally, Trooper Monte testified that he observed appellant's vehicle traveling on State Route 7 at what he perceived as approximately sixty-five miles per hour. He then used his Marksman 20-20 laser to determine that appellant was actually traveling at sixty-six miles per hour. Trooper Monte testified that the posted speed limit on State Route 7 is fifty-five miles per hour.

[\*P77] As can be seen, the conviction in the trial court is based primarily on the testimony of Trooper Monte and Prof. Kilgallin. Given our findings in the first and second assignments of error that involve both Prof. Kilgallin and Trooper Monte, this eighth assignment of error is rendered moot.

[\*P78] Based on the merit of appellant's first and second assignments of error, the decision of the trial court is hereby reversed and remanded for further proceedings according to law and consistent with this opinion.

Analysis

As of: Jan 31, 2007

**STATE OF OHIO, Plaintiff-Appellee -vs- SERGEY YEVTUKH,  
Defendant-Appellant**

**Case No. 01COA01426**

**COURT OF APPEALS OF OHIO, FIFTH APPELLATE DISTRICT, ASHLAND  
COUNTY**

*2002 Ohio 762; 2002 Ohio App. LEXIS 850*

**February 19, 2002, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1] CHARACTER OF PROCEEDING: Appeal from the Municipal Court, Case No. 01TRD00873.

**DISPOSITION:** Trial court's judgment was affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a judgment by the Municipal Court of Ashland County (Ohio), claiming that the trial court erred in permitting the State to reopen its case after a motion for acquittal had been made.

**OVERVIEW:** A police officer stopped defendant, a commercial truck driver, for speeding and a seat belt violation. At the conclusion of the State's case, defendant moved for acquittal based upon the State's failure to identify the type of speed measuring device used and offer expert testimony regarding its dependability and construction. The trial court permitted the State to reopen its case and present additional testimony. The appellate court held that defendant had not objected to the speed clocked by the laser device. The admission of the laser device reading did not affect a substantive right. Defendant's motion for acquittal in lieu of timely objecting to the evidence was not sufficient to perfect the error for appeal. If a timely objection had been made, there would have been no need to reopen the case and recall the witness.

**OUTCOME:** The judgment was affirmed.

**CORE TERMS:** laser, reopen, speed, sixty-eight, timely objection, specific ground

**OPINION BY:** Sheila G. Farmer

**OPINION:**

Farmer, J.

On January 24, 2001, Ohio State Highway Patrol Trooper Brian Darby stopped appellant, Sergey Yevtukh, a commercial truck driver, for speeding in violation of *R.C. 4511.21*. Trooper Darby cited appellant for driving sixty-eight m.p.h. in a fifty-five m.p.h. zone. Appellant was also cited for a seat belt violation. A bench trial was held on June 21, 2001. At the conclusion of the state's case, appellant moved for acquittal pursuant to *Crim.R. 29* based upon the state's failure to identify the type of speed measuring device used and offer expert testimony regarding its dependability and construction. The trial court permitted the state to reopen its case and present additional testimony. The trial court found appellant guilty and ordered him to pay a total fine of \$ 130.00 and [\*2] court costs. Appellant filed an appeal and this matter is now before this court for consideration. Assignments of error are as follows:

I THE TRIAL COURT COMMITTED REVERSIBLE ERROR BY PERMITTING THE PROSECUTION TO REOPEN ITS CASE AND RECALL A WITNESS TO ADDUCE CRITICALLY IMPORTANT NEW EVIDENCE.

II THE TRIAL COURT COMMITTED REVERSIBLE ERROR BY TAKING JUDICIAL NOTICE OF THE LTI 20/20 SPEED-MEASURING DEVICE.

III ASSUMING THE EVIDENCE BASED ON THE SPEED-MEASURING DEVICE WAS NOT ADMISSIBLE, THE EVIDENCE WAS OTHERWISE INSUFFICIENT TO PROVE ALL ELEMENTS OF THE STATE'S CASE.

I

Appellant claims the trial court erred in permitting the state to reopen its case after a motion for acquittal had been made. Specifically, appellant claims the trial court abused its discretion in permitting the state to recall Trooper Darby and identify the laser device. We disagree. [HN1] The question of opening up a case for the presentation of further testimony is within the sound discretion of the trial court. *City of Columbus v. Grant (1981), 1 Ohio App.3d 96, 439 N.E.2d 907*. [HN2] In order to find an abuse of discretion, we must determine the trial court's decision was unreasonable, arbitrary or unconscionable [\*3] and not merely an error of law or judgment. *Blakemore v. Blakemore (1983), 5 Ohio St.3d 217, 450 N.E.2d 1140*. A review of the record establishes the state asked Trooper Darby on direct examination how he was trained in the "laser" device, and offered State's Exhibit 1, a photostatic copy of his certification. T. at 3-6. Trooper Darby testified to the calibration of the device and what speed the device read when aimed at appellant's vehicle. T. at 9-11, 14. No objection was made to the speed clocked by the laser device (sixty-eight m.p.h.). T. at 14. [HN3] *Evid.R. 103* governs rulings on evidence. [HN4] Subsection (A)(1) states the following: (A) Effect of erroneous ruling

Error may not be predicated upon a ruling which admits or excludes evidence unless a substantial right of the party is affected, and

(1) Objection. In case the ruling is one admitting evidence, a timely objection or motion to strike appears of record stating the specific ground of objection, if the specific ground was not apparent from the context;\*\*\*

No objection was made on the record and the admission of the laser device reading did not affect a substantive right. [HN5] The making of a *Crim.R. 29* motion for acquittal [\*4] in lieu of timely objecting is not sufficient to perfect the error for appeal. The technique employed sub judice was a bushwhack on the state's case. If a timely objection had been made, there would have been no need to reopen the case and recall the witness. Further, State's Exhibit 1, Trooper Darby's certificate, identified the laser device used. No objection was made to its admission. Appellant in his motion to the trial court conceded the laser is identified in said exhibit. T. at 31. Upon review, we find the trial court did not abuse its discretion in permitting the state to reopen its case. Assignment of Error I is denied.

II, III

Based upon our ruling supra, we do not need to address these assignments of error. *App.R. 12(A)(1)(c)*.

The judgment of the Municipal Court of Ashland County, Ohio is hereby affirmed.

By Farmer, J. Hoffman, P.J. and Boggins, J. concur.

**STATE OF OHIO, Plaintiff-Appellee -vs- SERGEY YEVTUKH,  
Defendant-Appellant**

**Case No. 01COA01426**

**COURT OF APPEALS OF OHIO, FIFTH APPELLATE DISTRICT, ASHLAND  
COUNTY**

*2002 Ohio 762; 2002 Ohio App. LEXIS 850*

**February 19, 2002, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1] CHARACTER OF PROCEEDING: Appeal from the Municipal Court, Case No. 01TRD00873.

**DISPOSITION:** Trial court's judgment was affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a judgment by the Municipal Court of Ashland County (Ohio), claiming that the trial court erred in permitting the State to reopen its case after a motion for acquittal had been made.

**OVERVIEW:** A police officer stopped defendant, a commercial truck driver, for speeding and a seat belt violation. At the conclusion of the State's case, defendant moved for acquittal based upon the State's failure to identify the type of speed measuring device used and offer expert testimony regarding its dependability and construction. The trial court permitted the State to reopen its case and present additional testimony. The appellate court held that defendant had not objected to the speed clocked by the laser device. The admission of the laser device reading did not affect a substantive right. Defendant's motion for acquittal in lieu of timely objecting to the evidence was not sufficient to perfect the error for appeal. If a timely objection had been made, there would have been no need to reopen the case and recall the witness.

**OUTCOME:** The judgment was affirmed.

**CORE TERMS:** laser, reopen, speed, sixty-eight, timely objection, specific ground

**LexisNexis(R) Headnotes**

**OPINION BY:** Sheila G. Farmer

**OPINION:**

Farmer, J.

On January 24, 2001, Ohio State Highway Patrol Trooper Brian Darby stopped appellant, Sergey Yevtukh, a commercial truck driver, for speeding in violation of *R.C. 4511.21*. Trooper Darby cited appellant for driving sixty-eight m.p.h. in a fifty-five m.p.h. zone. Appellant was also cited for a seat belt violation. A bench trial was held on June 21, 2001. At the conclusion of the state's case, appellant moved for acquittal pursuant to *Crim.R. 29* based upon the state's failure to identify the type of speed measuring device used and offer expert testimony regarding its dependability and construction. The trial court permitted the state to reopen its case and present additional testimony. The trial court found appellant guilty and ordered him to pay a total fine of \$ 130.00 and [\*2] court costs. Appellant filed an appeal and this matter is now before this court for consideration. Assignments of error are as follows:

I THE TRIAL COURT COMMITTED REVERSIBLE ERROR BY PERMITTING THE PROSECUTION TO REOPEN ITS CASE AND RECALL A WITNESS TO ADDUCE CRITICALLY IMPORTANT NEW EVIDENCE.

II THE TRIAL COURT COMMITTED REVERSIBLE ERROR BY TAKING JUDICIAL NOTICE OF THE LTI 20/20 SPEED-MEASURING DEVICE.

III ASSUMING THE EVIDENCE BASED ON THE SPEED-MEASURING DEVICE WAS NOT ADMISSIBLE, THE EVIDENCE WAS OTHERWISE INSUFFICIENT TO PROVE ALL ELEMENTS OF THE STATE'S CASE.

I

Appellant claims the trial court erred in permitting the state to reopen its case after a motion for acquittal had been made. Specifically, appellant claims the trial court abused its discretion in permitting the state to recall Trooper Darby and identify the laser device. We disagree. [HN1] The question of opening up a case for the presentation of further testimony is within the sound discretion of the trial court. *City of Columbus v. Grant (1981), 1 Ohio App.3d 96, 439 N.E.2d 907*. [HN2] In order to find an abuse of discretion, we must determine the trial court's decision was unreasonable, arbitrary or unconscionable [\*3] and not merely an error of law or judgment. *Blakemore v. Blakemore (1983), 5 Ohio St.3d 217, 450 N.E.2d 1140*. A review of the record establishes the state asked Trooper Darby on direct examination how he was trained in the "laser" device, and offered State's Exhibit 1, a photostatic copy of his certification. T. at 3-6. Trooper Darby testified to the calibration of the device and what speed the device read when aimed at appellant's vehicle. T. at 9-11, 14. No objection was made to the speed clocked by the laser device (sixty-eight m.p.h.). T. at 14. [HN3] *Evid.R. 103* governs rulings on evidence. [HN4] Subsection (A)(1) states the following: (A) Effect of erroneous ruling

Error may not be predicated upon a ruling which admits or excludes evidence unless a substantial right of the party is affected, and

(1) Objection. In case the ruling is one admitting evidence, a timely objection or motion to strike appears of record stating the specific ground of objection, if the specific ground was not apparent from the context;\*\*\*

No objection was made on the record and the admission of the laser device reading did not affect a substantive right. [HN5] The making of a *Crim.R. 29* motion for acquittal [\*4] in lieu of timely objecting is not sufficient to perfect the error for appeal. The technique employed sub judice was a bushwhack on the state's case. If a timely objection had been made, there would have been no need to reopen the case and recall the witness. Further, State's Exhibit 1, Trooper Darby's certificate, identified the laser device used. No objection was made to its admission. Appellant in his motion to the trial court conceded the laser is identified in said exhibit. T. at 31. Upon review, we find the trial court did not abuse its discretion in permitting the state to reopen its case. Assignment of Error I is denied.

II, III

Based upon our ruling supra, we do not need to address these assignments of error. *App.R. 12(A)(1)(c)*.

The judgment of the Municipal Court of Ashland County, Ohio is hereby affirmed.

By Farmer, J. Hoffman, P.J. and Boggins, J. concur.

**December 6, 2001, Date of Announcement of Decision**

**PRIOR HISTORY:** [\*1] CHARACTER OF PROCEEDING: Criminal appeal from Cleveland Heights Municipal Court, No. TRD 0101569.

**DISPOSITION:** Defendant-appellant's conviction for speeding was affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant driver appealed the judgment of the Cleveland Heights Municipal Court (Ohio), entered after a bench trial, finding him guilty of speeding and fining him.

**OVERVIEW:** The trial court did not err in taking judicial notice of the scientific reliability of a radar unit. There was no evidence in the record to indicate the unit was not reliable. Defendant offered no evidence whatsoever that any of the three tests on the equipment were flawed or produced inaccurate results. Accordingly, there was no reason for the trial court to require evidence of more tests before concluding that the radar unit was accurate. It was not necessary for the city to prove that the test equipment used to calibrate the radar unit was itself properly calibrated. Defendant presented no evidence whatsoever that the testing equipment was not in proper working order. There was, in fact, evidence that the testing equipment was in proper working order. The trial court did not err finding defendant guilty of speeding.

**OUTCOME:** The lower court was affirmed.

**CORE TERMS:** radar, calibrated, calibration, accuracy, speed, fork, tuning, miles, reliability, testing equipment, equipment used, calibrate, working order, certificate, speeding, miles per hour, admissible, judicial notice, assignment of error, manufacturer, functioning, reflecting, testing, scientific, tuning fork, external, training, announcement, trained, tested

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Inferences & Presumptions > Inferences  
Evidence > Judicial Notice > Scientific & Technical Facts***

[HN1] A court may take judicial notice of the technical theory of operation and the scientific reliability of stationary radar devices.

***Civil Procedure > Appeals > Reviewability > Preservation for Review  
Criminal Law & Procedure > Appeals > Reviewability > Waiver > General Overview***

[HN2] Where an appellant does not raise an issue in the trial court, it is waived on appeal.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Judicial Notice > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN3] Once judicial notice of the operation and reliability of a radar device is taken, the court must further determine (1) that the radar device is in good operating condition and properly calibrated at the time of use; (2) that the operator of the radar device is properly qualified to use the device; and (3) that the police officer properly operates and reads the radar device.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN4] As few as two tests, an internal calibration test and an external calibration test, are sufficient to demonstrate that a radar unit is properly calibrated.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > Daubert Standard***

[HN5] Once it is determined that a device is generally reliable when properly operated by a properly trained operator to prove a certain thing, such as speed, dependent upon the individual circumstances of the case, it may not be necessary for the State, in the absence of evidence to the contrary, to offer any evidence of the similar proper working order of another device used to test the first device.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > Daubert Standard***

[HN6] The State must demonstrate that a radar unit is properly set up, tested and functioning properly.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > Daubert Standard***

[HN7] While generally the accuracy of a radar unit and the accuracy of a testing apparatus are essential to a speeding conviction based solely on the radar evidence, the weight of authority holds that when two tuning forks are used to ascertain the accuracy of the radar unit, additional proof of the accuracy of the tuning forks is not necessary. This is because each tuning fork corroborates the accuracy of the other, and it is highly unlikely that the radar unit and each tuning fork would be inaccurate to the same degree.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > Daubert Standard***

[HN8] Testimony regarding a driver's speed as determined by a radar unit is admissible if the city demonstrates that the radar device is in good operating condition and properly calibrated at the time of use, the operator of the device is properly trained and qualified to use it and does, in fact, properly operate the radar device.

For Defendant-Appellant: Nate N. Malek, Esq., Malek, Dean & Associates, LLC, Solon, OH.

**JUDGES:** TIMOTHY E. McMONAGLE, PRESIDING JUDGE. ANN DYKE, J. and TERRENCE O'DONNELL, J., CONCUR.

**OPINION BY:** TIMOTHY E. McMONAGLE

**OPINION:** JOURNAL ENTRY AND OPINION

TIMOTHY E. McMONAGLE, P.J.:

Defendant-appellant, Daniel Katz, appeals the judgment of the Cleveland Heights Municipal Court, entered after a bench trial, finding him guilty of speeding, in violation of Section 333.03 of the Codified Ordinances of Cleveland Heights, and fining him \$ 55.

Cleveland Heights Police Officer Don Roach testified at appellant's trial that at approximately 8:37 p.m. on February 7, 2001, he was parked in a police cruiser in the median at the intersection of Fairmount and Arlington Boulevards in Cleveland Heights. Roach was facing west, monitoring the speed of eastbound vehicles on Fairmount with a radar device.

Roach testified that he observed appellant's SUV pulling away from a huge group [\*2] of cars and approaching him at a pretty good rate.

According to Roach, he locked in the radar device on appellant's SUV and then heard a high-pitched tone, which confirmed his visual sighting of appellant's high speed. The reading on the radar unit indicated that appellant was traveling 47 miles per hour in a zone marked 35 miles per hour. Roach testified that appellant's speed was unreasonable for the conditions.

Roach testified that he had received specialized training, including 8 hours of training at the police academy and 40 hours of on-the-road training, regarding operation of the model 96-11 KR-10 radar unit he was using on September 7, 2001. Roach also testified that his main function as a police officer since his graduation from the police academy twelve years prior had been operating radar equipment.

Roach testified that he performed a light test, an internal calibration test and an external calibration test on the radar unit prior to using it on September 7, 2001. The light test involved pressing a special button on the unit to make sure that all the lights on the unit were working properly. According to Roach, the internal calibration test involved pressing another designated [\*3] button on the unit to elicit a preset reading of 32 miles per hour. Roach then used two tuning forks to test the external calibration of the unit. According to Roach, one fork is set at 35 miles per hour and the other is set at 65 miles per hour. When he tapped the forks against a non-metallic object and then placed them in front of the radar unit, they gave readings of 35 miles per hour and 65 miles per hour respectively. Roach testified that the three tests he performed indicated that the radar unit was working properly on September 7, 2001.

Scott Whitmer, a communications and radar technician for the City of Cleveland Heights Police Department, also testified at appellant's trial.

Whitmer testified that one of his job responsibilities was to test the calibration of the radar units used by City of Cleveland Heights police officers, including the unit used by Roach on February 7, 2001. Whitmer testified further that he had received extensive training regarding testing and calibrating radar devices from Simco Electronics, the manufacturer of the devices, and through his service in the United States Air Force.

Whitmer testified that he tests and calibrates all of the radar devices [\*4] once a year, using three pieces of equipment specifically designed for testing radar equipment.

Whitmer testified that on September 20 and 21, 2000, he calibrated the radar device used by Roach according to the manufacturer's instructions and when the machinery left our precinct, it was working true and accurate. Whitmer testified further that he had no records reflecting that any repairs had been completed on the unit after that time.

The trial court admitted four records created by Whitmer concerning his tests on the unit: 1) an inventory sheet reflecting the model and serial numbers of the unit and its associated tuning forks; 2) a certificate reflecting that Whitmer calibrated the unit on September 21, 2000 at 35 miles per hour, 50 miles per hour and 65 miles per hour; 3) a certificate of accuracy reflecting that one tuning fork associated with the unit was properly calibrated at 35 miles per hour; and 4) a certificate of accuracy reflecting that the other tuning fork associated with the unit was properly calibrated at 65 miles per hour.

Whitmer also testified that the equipment he used to test Roach's radar unit was shipped to Simco Electronics in August 2000 for testing and [\*5] calibrating.

According to Whitmer, Simco subsequently returned the equipment with certificates of calibration indicating that the test equipment was properly calibrated.

Defense counsel objected to the admission of the certificates of calibration, however, arguing that they were not authenticated. Defense counsel argued further that without the certificates or any testimony by a representative of Simco Electronics that the testing equipment had been properly calibrated, there was no way of knowing whether the equipment used by Whitmer to test the radar device used by Roach was properly calibrated and, therefore, no way of knowing whether the radar device used by Roach to determine that appellant was speeding was accurate. Accordingly, defense counsel asserted that Officer Roach's testimony regarding appellant's speed, as determined by the radar device, was not admissible for consideration by the trier of fact.

In a journal entry filed on April 4, 2001, the trial court ruled that Officer Roach's testimony regarding the radar reading was admissible, finding that the level of proof proposed by appellant, i.e., that evidence of a radar reading is not admissible absent evidence that [\*6] the equipment used to calibrate the radar device has itself been properly calibrated, was not necessary to the radar reading.

In light of Officer Roach's testimony, the trial court found that appellant was traveling at 47 miles per hour in a zone marked 35 miles per hour and that the speed was unreasonable for the conditions. On April 9, 2001, the trial court fined appellant \$ 55 plus costs but stayed the sentence pending appeal.

Appellant raises two assignments of error for our review:

I. THE CONVICTION AGAINST DANIEL KATZ SHOULD BE REVERSED SINCE THERE WAS INSUFFICIENT TESTIMONY AS TO THE PROPER CALIBRATION OF OFFICER DONALD ROACH'S RADAR EQUIPMENT.

II. THE CONVICTION AGAINST DANIEL KATZ SHOULD BE REVERSED WHERE THE TRIAL COURT DECISION WAS AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE.

In his first assignment of error, appellant asserts that the trial court erred in admitting Officer Roach's testimony regarding his speed because there was insufficient testimony regarding the calibration of Officer Roach's radar equipment.

[HN1] A court may take judicial notice of the technical theory of operation and the scientific reliability of stationary radar devices. *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 154 N.E.2d 630; [\*7] *Cleveland Heights v.*

*Bartell*, 1987 Ohio App. LEXIS 7152, (Feb. 19, 1987), Cuyahoga App. No. 51719, unreported. Although not raised in his brief on appeal, at oral argument appellant asserted that the trial court improperly took judicial notice of the scientific reliability of the KR-10 stationary radar device used by Officer Roach. [HN2] Appellant did not raise this issue in the trial court, however, and therefore has waived it on appeal.

In *Cleveland Heights v. Bartell* (1987), Cuyahoga App. No. 51719, unreported, the trial court took judicial notice of the scientific reliability of the KR-10 radar unit and this court upheld that finding. Contrary to appellant's argument, our holding did not preclude appellant from further challenging the unit's reliability at trial. If appellant had wanted to challenge the reliability of the KR-10 unit at trial, he could have subpoenaed representatives from the manufacturer of the device and questioned them regarding its reliability. As counsel admitted in oral argument, however, appellant did not do so, and accordingly, there is no evidence in the record to indicate the unit is not reliable. Therefore, the trial court did not err in taking judicial notice of the scientific reliability [\*8] of the KR-10 radar unit, in reliance on *Bartell*.

[HN3] Once judicial notice of the operation and reliability of a radar device is taken, the court must further determine 1) that the radar device was in good operating condition and properly calibrated at the time of use; 2) that the operator of the radar device was properly qualified to use the device; and 3) that the police officer properly operated and read the radar device. *Id.*

Although appellant concedes that a court may take judicial notice of the reliability and operation of a radar device, as the trial court did here, appellant asks this Court to find that the City failed to prove that the radar device at issue was calibrated properly because 1) Officer Roach should have performed more than three tests on his unit to ascertain its accuracy; and 2) the City did not produce evidence that the equipment used by Whitmer to calibrate the unit and its associated tuning forks was itself properly calibrated.

Appellant argues that the trial court should have required evidence that more than three tests had been performed on Officer Roach's radar unit before concluding that it was properly calibrated because there are limitations to the three [\*9] tests performed by Officer Roach. Appellant asserts that the light test performed by Roach was insufficient because it merely determined that the light fixtures inside the radar unit were functioning properly. He also asserts that tuning forks may get dented or bent and, if used on a radar unit that is out of calibration, could possibly indicate accuracy when, in fact, the unit is out of calibration.

We refuse to speculate, however, about possible problems with the tests. This court has previously held that [HN4] as few as two tests (an internal calibration test and an external calibration test) are sufficient to demonstrate that a radar unit is properly calibrated. *Lyndhurst v. Danvers*, 1988 Ohio App. LEXIS 4621, (Nov. 23, 1988), Cuyahoga App. No. 55537, unreported; *Cleveland Heights v. Bartell*, *supra*. Moreover, appellant offered no evidence whatsoever that any of the three tests performed by Officer Roach on February 7, 2001 were flawed or produced inaccurate results. Accordingly, there was no reason for the trial court to require evidence of more tests before concluding that Roach's radar unit was accurate.

Appellant also contends that there was insufficient evidence that Roach's radar unit was properly calibrated [\*10] at the time of use because the City failed to show that Simco Electronics properly calibrated the equipment used by Whitmer to subsequently test and calibrate the unit. Appellant asserts that Whitmer's calibrations of Roach's radar unit were accurate only if the test equipment used to perform the calibrations was itself properly calibrated. Therefore, appellant contends, without testimony from a representative of the manufacturer that the test equipment was properly calibrated, there was no evidence that the radar device used by Roach was functioning properly and, accordingly, Roach's testimony regarding appellant's speed was inadmissible.

Appellant's argument was squarely rejected, however, in *State v. Ellison*, 1987 Ohio App. LEXIS 5688, (Jan. 30, 1987), Auglaize App. No. 2-85-35. In *Ellison*, the defendant was convicted of operating a motor vehicle at a speed of 70 miles per hour in a 55 miles per hour zone. The defendant challenged the trial court's finding that the radar device was in proper working order because the State had not presented evidence of certification from the manufacturer as to the

accuracy of the tuning forks used to test the calibration of the unit.

The Third Appellate District rejected [\*11] the defendant's argument, stating:

Like most matters of proof, however, there may be various ways to prove the same thing, or a point is reached in the matter of proof, beyond which no further proof is needed and presumptions of regularity pertain. Thus, in determining that a mechanism is in proper working order, it might become absurd to require that each component part be also proved to be in working order, or, for example, that a testing mechanism, which is not itself a component part, is itself in working order. The sufficiency of proof will, as to individual things which must be proved in a specific case, vary as to the circumstances involved and the availability of other proof, and generally will be left to the sound discretion of the trial court, particularly where there is no showing, as here, that the testing device is, in some respect, not in proper working order.

\*\*\* Thus, [HN5] once it is determined that a device is generally reliable when properly operated by a properly trained operator to prove a certain thing, such as speed, dependent upon the individual circumstances of the case, it may not be necessary for the State, in the absence of evidence to the contrary, to [\*12] offer any evidence of the similar proper working order of another device used to test the first device.

The circumstances of this case demonstrate that it was not necessary for the City to prove that the test equipment used by Whitmer to calibrate Roach's radar unit was itself properly calibrated. First, appellant presented no evidence whatsoever that the testing equipment was not in proper working order. Accordingly, as in *Ellison, supra*, there was no need for the City to produce evidence that the testing equipment was properly calibrated.

Moreover, although no one from Simco Electronics testified regarding the accuracy of the testing equipment, Scott Whitmer testified that the testing equipment was sent to Simco in August 2000 to be tested and calibrated and was subsequently returned with certificates of calibration indicating that the test equipment was properly calibrated. Therefore, contrary to appellant's assertion, there was, in fact, evidence that the testing equipment was in proper working order.

Appellant contends that his argument that the City must demonstrate that the testing equipment was itself properly calibrated has been suggested and followed by the Ohio Supreme [\*13] Court in *State v. Bonar (1973), 40 Ohio App. 2d 360, 319 N.E.2d 388*. Appellant's reliance on Bonar, however, is misplaced. First, Bonar was decided by the Seventh Appellate District Court of Appeals, not the Supreme Court of Ohio.

Moreover, Bonar clearly does not support appellant's argument. In Bonar, the defendant was convicted of operating a motor vehicle at a speed of 75 miles per hour in a 60 miles per hour zone. The defendant appealed his conviction, arguing that the State had put on no evidence to indicate that the radar unit that had clocked his speed was functioning properly. The Seventh Appellate District Court of Appeals reversed the defendant's conviction, finding that there was \*\*\* no testimony as to whether the radar measuring equipment was properly installed, set up or operating correctly. Accordingly, the Seventh District held that the trial court should have granted the defendant's motion for a directed verdict.

The Seventh Appellate District did not hold, as appellant contends, that in any case involving a radar detector, the State must prove that the equipment used to calibrate the radar detector has itself been properly calibrated. Rather, the Bonar [\*14] court held that [HN6] the State must demonstrate, as it did here, that the unit was properly set up, tested and functioning properly.

In *State v. Bechtel (1985), 24 Ohio App. 3d 72, 493 N.E.2d 318*, the defendant appealed his conviction for speeding, arguing that the trial court erred in admitting testimony regarding the tuning forks used to test the calibration of the

radar unit because there was no testimony regarding the accuracy of the tuning forks. The Ninth Appellate District disagreed, however, stating:

[HN7]

While generally the accuracy of the radar unit and the accuracy of the testing apparatus are essential to a speeding conviction based solely on the radar evidence, the weight of the authority holds that when two tuning forks are used to ascertain the accuracy of the radar unit, additional proof of the accuracy of the tuning forks is not necessary. This is because each tuning fork corroborates the accuracy of the other, and it is highly unlikely that the radar unit and each tuning fork would be inaccurate to the same degree. *Id.* at 73. (Citations omitted).

Here, in addition to the light test and internal calibration tests, Officer Roach used two [\*15] individually-calibrated tuning forks to test the external calibration of his radar unit. If in *Bechtel* the use of two tuning forks was sufficient to demonstrate the accuracy of a radar device, we see no reason in this case to require further proof that the equipment used to calibrate the radar device and tuning forks was itself properly calibrated, especially where there was no evidence that the testing equipment was not functioning properly.

Appellant's first assignment of error is therefore overruled.

In his second assignment of error, appellant contends that because the City failed to prove that the testing equipment used to calibrate Roach's radar unit was itself properly calibrated, it failed to demonstrate the accuracy of Roach's unit and, therefore, Roach's testimony regarding appellant's speed as determined by the radar device was not admissible at trial. Appellant further contends that without Roach's testimony there was no competent evidence produced at trial to establish that he was speeding and, therefore, his conviction was against the manifest weight of the evidence. We disagree.

As set forth in our discussion regarding appellant's first assignment of error, the City [\*16] was not required to prove that the equipment used to calibrate Officer Roach's radar unit was itself properly calibrated. Rather, Officer Roach's [HN8] testimony regarding appellant's speed as determined by the radar unit was admissible if the City demonstrated that the radar device was in good operating condition and properly calibrated at the time of use, the operator of the device was properly trained and qualified to use it and did, in fact, properly operate the radar device. See *State v. Bechtel, supra*.

Scott Whitmer testified for the City that Roach's unit had been tested and calibrated on September 20 and 21, 2000 and no repairs were made to the unit after that time. Officer Roach testified that he performed three tests on the unit on February 7, 2001 prior to apprehending appellant and all three tests indicated that the unit was operating properly. He testified further that he had been specially trained in operating the radar device used to determine appellant's speed on February 7, 2001 and that he was properly operating the device at the time of appellant's speeding violation.

This testimony laid a sufficient foundation to establish the accuracy of Roach's radar unit and, therefore, [\*17] Roach's testimony regarding appellant's speed as established through the radar unit was properly admissible.

In light of this testimony, the trial court did not err in finding appellant guilty of speeding.

Appellant's second assignment of error is therefore overruled.

It is ordered that appellee recover from appellant costs herein taxed.

The court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this court directing the Cleveland Heights Municipal Court to carry this judgment into execution. The defendant's conviction having been affirmed, any bail pending appeal is terminated.

Case remanded to the trial court for execution of sentence.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant driver appealed the judgment of the Cleveland Heights Municipal Court (Ohio), entered after a bench trial, finding him guilty of speeding and fining him.

**OVERVIEW:** The trial court did not err in taking judicial notice of the scientific reliability of a radar unit. There was no evidence in the record to indicate the unit was not reliable. Defendant offered no evidence whatsoever that any of the three tests on the equipment were flawed or produced inaccurate results. Accordingly, there was no reason for the trial court to require evidence of more tests before concluding that the radar unit was accurate. It was not necessary for the city to prove that the test equipment used to calibrate the radar unit was itself properly calibrated. Defendant presented no evidence whatsoever that the testing equipment was not in proper working order. There was, in fact, evidence that the testing equipment was in proper working order. The trial court did not err finding defendant guilty of speeding.

**OUTCOME:** The lower court was affirmed.

**CORE TERMS:** radar, calibrated, calibration, accuracy, speed, fork, tuning, miles, reliability, testing equipment, equipment used, calibrate, working order, certificate, speeding, miles per hour, admissible, judicial notice, assignment of error, manufacturer, functioning, reflecting, testing, scientific, tuning fork, external, training, announcement, trained, tested

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Inferences & Presumptions > Inferences  
Evidence > Judicial Notice > Scientific & Technical Facts***

[HN1] A court may take judicial notice of the technical theory of operation and the scientific reliability of stationary radar devices.

***Civil Procedure > Appeals > Reviewability > Preservation for Review  
Criminal Law & Procedure > Appeals > Reviewability > Waiver > General Overview***

[HN2] Where an appellant does not raise an issue in the trial court, it is waived on appeal.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Judicial Notice > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN3] Once judicial notice of the operation and reliability of a radar device is taken, the court must further determine (1) that the radar device is in good operating condition and properly calibrated at the time of use; (2) that the operator of the radar device is properly qualified to use the device; and (3) that the police officer properly operates and reads the radar device.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN4] As few as two tests, an internal calibration test and an external calibration test, are sufficient to demonstrate that a radar unit is properly calibrated.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > Daubert Standard***

[HN5] Once it is determined that a device is generally reliable when properly operated by a properly trained operator to prove a certain thing, such as speed, dependent upon the individual circumstances of the case, it may not be necessary for the State, in the absence of evidence to the contrary, to offer any evidence of the similar proper working order of another device used to test the first device.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > Daubert Standard***

[HN6] The State must demonstrate that a radar unit is properly set up, tested and functioning properly.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > Daubert Standard***

[HN7] While generally the accuracy of a radar unit and the accuracy of a testing apparatus are essential to a speeding conviction based solely on the radar evidence, the weight of authority holds that when two tuning forks are used to ascertain the accuracy of the radar unit, additional proof of the accuracy of the tuning forks is not necessary. This is because each tuning fork corroborates the accuracy of the other, and it is highly unlikely that the radar unit and each tuning fork would be inaccurate to the same degree.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > Daubert Standard***

[HN8] Testimony regarding a driver's speed as determined by a radar unit is admissible if the city demonstrates that the radar device is in good operating condition and properly calibrated at the time of use, the operator of the device is properly trained and qualified to use it and does, in fact, properly operate the radar device.

**COUNSEL:** For Plaintiff-Appellee: Kim T. Segebarth, Esq., City Prosecutor, City of Cleveland Heights, Cleveland Heights, OH.

For Defendant-Appellant: Nate N. Malek, Esq., Malek, Dean & Associates, LLC, Solon, OH.

**JUDGES:** TIMOTHY E. McMONAGLE, PRESIDING JUDGE. ANN DYKE, J. and TERRENCE O'DONNELL, J., CONCUR.

**OPINION BY:** TIMOTHY E. McMONAGLE

**OPINION:** JOURNAL ENTRY AND OPINION

TIMOTHY E. McMONAGLE, P.J.:

Defendant-appellant, Daniel Katz, appeals the judgment of the Cleveland Heights Municipal Court, entered after a bench trial, finding him guilty of speeding, in violation of Section 333.03 of the Codified Ordinances of Cleveland Heights, and fining him \$ 55.

Cleveland Heights Police Officer Don Roach testified at appellant's trial that at approximately 8:37 p.m. on February 7, 2001, he was parked in a police cruiser in the median at the intersection of Fairmount and Arlington Boulevards in Cleveland Heights. Roach was facing west, monitoring the speed of eastbound vehicles on Fairmount with a radar device.

Roach testified that he observed appellant's SUV pulling away from a huge group [\*2] of cars and approaching him at a pretty good rate.

According to Roach, he locked in the radar device on appellant's SUV and then heard a high-pitched tone, which confirmed his visual sighting of appellant's high speed. The reading on the radar unit indicated that appellant was traveling 47 miles per hour in a zone marked 35 miles per hour. Roach testified that appellant's speed was unreasonable for the conditions.

Roach testified that he had received specialized training, including 8 hours of training at the police academy and 40 hours of on-the-road training, regarding operation of the model 96-11 KR-10 radar unit he was using on September 7, 2001. Roach also testified that his main function as a police officer since his graduation from the police academy twelve years prior had been operating radar equipment.

Roach testified that he performed a light test, an internal calibration test and an external calibration test on the radar unit prior to using it on September 7, 2001. The light test involved pressing a special button on the unit to make sure that all the lights on the unit were working properly. According to Roach, the internal calibration test involved pressing another designated [\*3] button on the unit to elicit a preset reading of 32 miles per hour. Roach then used two tuning forks to test the external calibration of the unit. According to Roach, one fork is set at 35 miles per hour and the other is set at 65 miles per hour. When he tapped the forks against a non-metallic object and then placed them in front of the radar unit, they gave readings of 35 miles per hour and 65 miles per hour respectively. Roach testified that the three tests he performed indicated that the radar unit was working properly on September 7, 2001.

Scott Whitmer, a communications and radar technician for the City of Cleveland Heights Police Department, also testified at appellant's trial.

Whitmer testified that one of his job responsibilities was to test the calibration of the radar units used by City of Cleveland Heights police officers, including the unit used by Roach on February 7, 2001. Whitmer testified further that he had received extensive training regarding testing and calibrating radar devices from Simco Electronics, the manufacturer of the devices, and through his service in the United States Air Force.

Whitmer testified that he tests and calibrates all of the radar devices [\*4] once a year, using three pieces of equipment specifically designed for testing radar equipment.

Whitmer testified that on September 20 and 21, 2000, he calibrated the radar device used by Roach according to the manufacturer's instructions and when the machinery left our precinct, it was working true and accurate. Whitmer testified further that he had no records reflecting that any repairs had been completed on the unit after that time.

The trial court admitted four records created by Whitmer concerning his tests on the unit: 1) an inventory sheet reflecting the model and serial numbers of the unit and its associated tuning forks; 2) a certificate reflecting that Whitmer calibrated the unit on September 21, 2000 at 35 miles per hour, 50 miles per hour and 65 miles per hour; 3) a certificate of accuracy reflecting that one tuning fork associated with the unit was properly calibrated at 35 miles per hour; and 4) a certificate of accuracy reflecting that the other tuning fork associated with the unit was properly calibrated at 65 miles per hour.

Whitmer also testified that the equipment he used to test Roach's radar unit was shipped to Simco Electronics in August 2000 for testing and [\*5] calibrating.

According to Whitmer, Simco subsequently returned the equipment with certificates of calibration indicating that the test equipment was properly calibrated.

Defense counsel objected to the admission of the certificates of calibration, however, arguing that they were not authenticated. Defense counsel argued further that without the certificates or any testimony by a representative of Simco Electronics that the testing equipment had been properly calibrated, there was no way of knowing whether the equipment used by Whitmer to test the radar device used by Roach was properly calibrated and, therefore, no way of knowing whether the radar device used by Roach to determine that appellant was speeding was accurate. Accordingly, defense counsel asserted that Officer Roach's testimony regarding appellant's speed, as determined by the radar device, was not admissible for consideration by the trier of fact.

In a journal entry filed on April 4, 2001, the trial court ruled that Officer Roach's testimony regarding the radar reading was admissible, finding that the level of proof proposed by appellant, i.e., that evidence of a radar reading is not admissible absent evidence that [\*6] the equipment used to calibrate the radar device has itself been properly calibrated, was not necessary to the radar reading.

In light of Officer Roach's testimony, the trial court found that appellant was traveling at 47 miles per hour in a zone marked 35 miles per hour and that the speed was unreasonable for the conditions. On April 9, 2001, the trial court fined appellant \$ 55 plus costs but stayed the sentence pending appeal.

Appellant raises two assignments of error for our review:

I. THE CONVICTION AGAINST DANIEL KATZ SHOULD BE REVERSED SINCE THERE WAS INSUFFICIENT TESTIMONY AS TO THE PROPER CALIBRATION OF OFFICER DONALD ROACH'S RADAR EQUIPMENT.

II. THE CONVICTION AGAINST DANIEL KATZ SHOULD BE REVERSED WHERE THE TRIAL COURT DECISION WAS AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE.

In his first assignment of error, appellant asserts that the trial court erred in admitting Officer Roach's testimony regarding his speed because there was insufficient testimony regarding the calibration of Officer Roach's radar equipment.

[HN1] A court may take judicial notice of the technical theory of operation and the scientific reliability of stationary radar devices. *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 154 N.E.2d 630; [\*7] *Cleveland Heights v.*

*Bartell*, 1987 Ohio App. LEXIS 7152, (Feb. 19, 1987), Cuyahoga App. No. 51719, unreported. Although not raised in his brief on appeal, at oral argument appellant asserted that the trial court improperly took judicial notice of the scientific reliability of the KR-10 stationary radar device used by Officer Roach. [HN2] Appellant did not raise this issue in the trial court, however, and therefore has waived it on appeal.

In *Cleveland Heights v. Bartell* (1987), Cuyahoga App. No. 51719, unreported, the trial court took judicial notice of the scientific reliability of the KR-10 radar unit and this court upheld that finding. Contrary to appellant's argument, our holding did not preclude appellant from further challenging the unit's reliability at trial. If appellant had wanted to challenge the reliability of the KR-10 unit at trial, he could have subpoenaed representatives from the manufacturer of the device and questioned them regarding its reliability. As counsel admitted in oral argument, however, appellant did not do so, and accordingly, there is no evidence in the record to indicate the unit is not reliable. Therefore, the trial court did not err in taking judicial notice of the scientific reliability [\*8] of the KR-10 radar unit, in reliance on *Bartell*.

[HN3] Once judicial notice of the operation and reliability of a radar device is taken, the court must further determine 1) that the radar device was in good operating condition and properly calibrated at the time of use; 2) that the operator of the radar device was properly qualified to use the device; and 3) that the police officer properly operated and read the radar device. *Id.*

Although appellant concedes that a court may take judicial notice of the reliability and operation of a radar device, as the trial court did here, appellant asks this Court to find that the City failed to prove that the radar device at issue was calibrated properly because 1) Officer Roach should have performed more than three tests on his unit to ascertain its accuracy; and 2) the City did not produce evidence that the equipment used by Whitmer to calibrate the unit and its associated tuning forks was itself properly calibrated.

Appellant argues that the trial court should have required evidence that more than three tests had been performed on Officer Roach's radar unit before concluding that it was properly calibrated because there are limitations to the three [\*9] tests performed by Officer Roach. Appellant asserts that the light test performed by Roach was insufficient because it merely determined that the light fixtures inside the radar unit were functioning properly. He also asserts that tuning forks may get dented or bent and, if used on a radar unit that is out of calibration, could possibly indicate accuracy when, in fact, the unit is out of calibration.

We refuse to speculate, however, about possible problems with the tests. This court has previously held that [HN4] as few as two tests (an internal calibration test and an external calibration test) are sufficient to demonstrate that a radar unit is properly calibrated. *Lyndhurst v. Danvers*, 1988 Ohio App. LEXIS 4621, (Nov. 23, 1988), Cuyahoga App. No. 55537, unreported; *Cleveland Heights v. Bartell*, *supra*. Moreover, appellant offered no evidence whatsoever that any of the three tests performed by Officer Roach on February 7, 2001 were flawed or produced inaccurate results. Accordingly, there was no reason for the trial court to require evidence of more tests before concluding that Roach's radar unit was accurate.

Appellant also contends that there was insufficient evidence that Roach's radar unit was properly calibrated [\*10] at the time of use because the City failed to show that Simco Electronics properly calibrated the equipment used by Whitmer to subsequently test and calibrate the unit. Appellant asserts that Whitmer's calibrations of Roach's radar unit were accurate only if the test equipment used to perform the calibrations was itself properly calibrated. Therefore, appellant contends, without testimony from a representative of the manufacturer that the test equipment was properly calibrated, there was no evidence that the radar device used by Roach was functioning properly and, accordingly, Roach's testimony regarding appellant's speed was inadmissible.

Appellant's argument was squarely rejected, however, in *State v. Ellison*, 1987 Ohio App. LEXIS 5688, (Jan. 30, 1987), Auglaize App. No. 2-85-35. In *Ellison*, the defendant was convicted of operating a motor vehicle at a speed of 70 miles per hour in a 55 miles per hour zone. The defendant challenged the trial court's finding that the radar device was in proper working order because the State had not presented evidence of certification from the manufacturer as to the

accuracy of the tuning forks used to test the calibration of the unit.

The Third Appellate District rejected [\*11] the defendant's argument, stating:

Like most matters of proof, however, there may be various ways to prove the same thing, or a point is reached in the matter of proof, beyond which no further proof is needed and presumptions of regularity pertain. Thus, in determining that a mechanism is in proper working order, it might become absurd to require that each component part be also proved to be in working order, or, for example, that a testing mechanism, which is not itself a component part, is itself in working order. The sufficiency of proof will, as to individual things which must be proved in a specific case, vary as to the circumstances involved and the availability of other proof, and generally will be left to the sound discretion of the trial court, particularly where there is no showing, as here, that the testing device is, in some respect, not in proper working order.

\*\*\* Thus, [HN5] once it is determined that a device is generally reliable when properly operated by a properly trained operator to prove a certain thing, such as speed, dependent upon the individual circumstances of the case, it may not be necessary for the State, in the absence of evidence to the contrary, to [\*12] offer any evidence of the similar proper working order of another device used to test the first device.

The circumstances of this case demonstrate that it was not necessary for the City to prove that the test equipment used by Whitmer to calibrate Roach's radar unit was itself properly calibrated. First, appellant presented no evidence whatsoever that the testing equipment was not in proper working order. Accordingly, as in *Ellison, supra*, there was no need for the City to produce evidence that the testing equipment was properly calibrated.

Moreover, although no one from Simco Electronics testified regarding the accuracy of the testing equipment, Scott Whitmer testified that the testing equipment was sent to Simco in August 2000 to be tested and calibrated and was subsequently returned with certificates of calibration indicating that the test equipment was properly calibrated. Therefore, contrary to appellant's assertion, there was, in fact, evidence that the testing equipment was in proper working order.

Appellant contends that his argument that the City must demonstrate that the testing equipment was itself properly calibrated has been suggested and followed by the Ohio Supreme [\*13] Court in *State v. Bonar (1973), 40 Ohio App. 2d 360, 319 N.E.2d 388*. Appellant's reliance on Bonar, however, is misplaced. First, Bonar was decided by the Seventh Appellate District Court of Appeals, not the Supreme Court of Ohio.

Moreover, Bonar clearly does not support appellant's argument. In Bonar, the defendant was convicted of operating a motor vehicle at a speed of 75 miles per hour in a 60 miles per hour zone. The defendant appealed his conviction, arguing that the State had put on no evidence to indicate that the radar unit that had clocked his speed was functioning properly. The Seventh Appellate District Court of Appeals reversed the defendant's conviction, finding that there was \*\*\* no testimony as to whether the radar measuring equipment was properly installed, set up or operating correctly. Accordingly, the Seventh District held that the trial court should have granted the defendant's motion for a directed verdict.

The Seventh Appellate District did not hold, as appellant contends, that in any case involving a radar detector, the State must prove that the equipment used to calibrate the radar detector has itself been properly calibrated. Rather, the Bonar [\*14] court held that [HN6] the State must demonstrate, as it did here, that the unit was properly set up, tested and functioning properly.

In *State v. Bechtel (1985), 24 Ohio App. 3d 72, 493 N.E.2d 318*, the defendant appealed his conviction for speeding, arguing that the trial court erred in admitting testimony regarding the tuning forks used to test the calibration of the

radar unit because there was no testimony regarding the accuracy of the tuning forks. The Ninth Appellate District disagreed, however, stating:

[HN7]

While generally the accuracy of the radar unit and the accuracy of the testing apparatus are essential to a speeding conviction based solely on the radar evidence, the weight of the authority holds that when two tuning forks are used to ascertain the accuracy of the radar unit, additional proof of the accuracy of the tuning forks is not necessary. This is because each tuning fork corroborates the accuracy of the other, and it is highly unlikely that the radar unit and each tuning fork would be inaccurate to the same degree. *Id.* at 73. (Citations omitted).

Here, in addition to the light test and internal calibration tests, Officer Roach used two [\*15] individually-calibrated tuning forks to test the external calibration of his radar unit. If in *Bechtel* the use of two tuning forks was sufficient to demonstrate the accuracy of a radar device, we see no reason in this case to require further proof that the equipment used to calibrate the radar device and tuning forks was itself properly calibrated, especially where there was no evidence that the testing equipment was not functioning properly.

Appellant's first assignment of error is therefore overruled.

In his second assignment of error, appellant contends that because the City failed to prove that the testing equipment used to calibrate Roach's radar unit was itself properly calibrated, it failed to demonstrate the accuracy of Roach's unit and, therefore, Roach's testimony regarding appellant's speed as determined by the radar device was not admissible at trial. Appellant further contends that without Roach's testimony there was no competent evidence produced at trial to establish that he was speeding and, therefore, his conviction was against the manifest weight of the evidence. We disagree.

As set forth in our discussion regarding appellant's first assignment of error, the City [\*16] was not required to prove that the equipment used to calibrate Officer Roach's radar unit was itself properly calibrated. Rather, Officer Roach's [HN8] testimony regarding appellant's speed as determined by the radar unit was admissible if the City demonstrated that the radar device was in good operating condition and properly calibrated at the time of use, the operator of the device was properly trained and qualified to use it and did, in fact, properly operate the radar device. See *State v. Bechtel, supra*.

Scott Whitmer testified for the City that Roach's unit had been tested and calibrated on September 20 and 21, 2000 and no repairs were made to the unit after that time. Officer Roach testified that he performed three tests on the unit on February 7, 2001 prior to apprehending appellant and all three tests indicated that the unit was operating properly. He testified further that he had been specially trained in operating the radar device used to determine appellant's speed on February 7, 2001 and that he was properly operating the device at the time of appellant's speeding violation.

This testimony laid a sufficient foundation to establish the accuracy of Roach's radar unit and, therefore, [\*17] Roach's testimony regarding appellant's speed as established through the radar unit was properly admissible.

In light of this testimony, the trial court did not err in finding appellant guilty of speeding.

Appellant's second assignment of error is therefore overruled.

It is ordered that appellee recover from appellant costs herein taxed.

The court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this court directing the Cleveland Heights Municipal Court to carry this judgment into execution. The defendant's conviction having been affirmed, any bail pending appeal is terminated.

Case remanded to the trial court for execution of sentence.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

COUNTY**

*2001 Ohio App. LEXIS 3507*

**July 30, 2001, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1] CHARACTER OF PROCEEDING: Criminal Appeal from Canton Municipal Court Case 2000 TRD 8789.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed his speeding conviction in the Canton Municipal Court (Ohio), claiming that his conviction was against the sufficiency of the evidence since no scientific foundation for and the reliability of the radar unit used had been admitted and due to discovery misconduct by the State.

**OVERVIEW:** Defendant was cited for speeding based on an officer's observation and use of a radar unit. He requested discovery of the radar unit's calibration record. The State did not comply with the request or a subsequent court order. Defendant moved to dismiss the action. The trial court overruled the motion and proceeded to a magistrate's trial. At trial, defendant objected to testimony about the radar unit; but the magistrate allowed it. The trial court adopted the magistrate's decision, and defendant appealed. The appellate court was troubled by the clear failure to comply with the discovery request and order and the blatant misrepresentation that the information had been provided. However, because a conviction for speeding could be based on an officer's visual observation and training, the evidence was not material. Receipt of the information would not have changed the trial's outcome.

**OUTCOME:** The conviction was affirmed.

**CORE TERMS:** speeding, radar, discovery, training, speed, mile, assignment of error, visual, prosecuting attorney, memorialized, disclosure, zone, withheld, sufficient evidence, Conclusions of Law, reasonable probability, assignments of error, requested discovery, failed to provide, reasonable doubt, personnel file, serial number, discoverable, certificate, reliability, calibration, requesting, photograph, overruling, advisement

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN1] An appellate court's function when reviewing the sufficiency of the evidence to support a criminal conviction is to examine the evidence admitted at trial to determine whether such evidence, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt. The relevant inquiry is whether, after reviewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

***Evidence > Procedural Considerations > Weight & Sufficiency***

[HN2] A conviction for speeding will not be reversed on sufficiency grounds even if a radar reading was improperly admitted into evidence when the officer testified that, based upon his visual observation, the vehicle was speeding.

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Reports of Examinations & Tests***

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Tangible Objects***

***Criminal Law & Procedure > Counsel > General Overview***

[HN3] See *Ohio R. Crim. P. 16(B)(1)*.

***Criminal Law & Procedure > Discovery & Inspection > Discovery Misconduct***

[HN4] See *Ohio R. Crim. P. 16(E)(3)*.

***Criminal Law & Procedure > Discovery & Inspection > Discovery Misconduct***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN5] In determining whether the prosecution improperly suppressed evidence favorable to an accused, such evidence shall be deemed material only if there is a reasonable probability that, had the evidence been disclosed to the defense, the result of the proceeding would have been different. A "reasonable probability" is a probability sufficient to undermine confidence in the outcome.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN6] Ohio law is clear that an officer's testimony that, based upon his visual observation, a vehicle was speeding is in and of itself sufficient to support a conviction for speeding.

**OPINION BY:** Julie Edwards

**OPINION:** Edwards, P. J.

Defendant-appellant Rodney L. Napier appeals his conviction in Canton Municipal Court for speeding in violation of *R.C. 4511.21*. Plaintiff-appellee is the State of Ohio.

## STATEMENT OF THE FACTS AND CASE

On September 2, 2000, appellant Rodney Napier was cited for speeding in violation of *R.C. 4511.21*, a misdemeanor. The speeding citation indicated that appellant was driving 64 miles per hour in a 40 mile per hour zone and that appellant's speed was "unsafe for condition". At his arraignment on September 12, 2000, appellant entered a plea of not guilty. Appellant, on September 14, 2000, filed a "Request for Discovery" requesting disclosure of, among other items, the make, model and serial number of the radar unit referred to on the citation issued to appellant, [\*2] the training record of the Deputy who issued the citation with respect to such radar unit, and the calibration record and repair history of the radar unit. Appellant also requested the Deputy's personnel file. Thereafter, after the above information was not provided to appellant by appellee, appellant, on October 4, 2000, filed a Motion to Compel Discovery or, in the Alternative, Motion to Dismiss. As memorialized in a Judgment Entry filed two days later, the trial court overruled appellant's motion. A Motion for Reconsideration was filed by appellant on October 11, 2000. The trial court, pursuant to a Judgment Entry filed on October 31, 2000, sustained appellant's Motion for Reconsideration in part. The trial court, in its October 31, 2000, entry, ordered appellee to provide all of the discovery requested by appellant, with the exception of the Deputy's personnel file, by November 3, 2000. After appellee failed to provide the requested discovery to appellant by such date, appellant, on November 6, 2000, filed a Motion to Dismiss seeking dismissal of the speeding charge. Appellee, in its response to such motion, indicated that appellee had "answered and complied as completely as possible [\*3] to defense counsel's Request for Discovery." As memorialized in a November 7, 2000, Judgment Entry, the trial court overruled appellant's Motion to Dismiss, stating that "the State [appellee] in its answer to defendant's motion to dismiss indicates that it has provided all available discovery to defendant." A bench trial before a Magistrate was held on November 8, 2000. At the bench trial, Deputy Richard Ballas, who has approximately sixteen years experience as a Deputy Sheriff and who has training in issuing speeding tickets, testified for appellee. Deputy Ballas testified that, on September 2, 2000, at approximately 10:10 P.M., he was sitting in a stationary marked cruiser monitoring traffic while in uniform when he observed appellant coming around a corner at "a high rate of speed." Trial Transcript at 26. The Deputy testified that he visually estimated appellant's speed at 56 or 57 miles per hour in a 40 mile per hour zone. After activating his radar unit, Deputy Ballas initially clocked appellant's vehicle at 57 miles per hour. The Deputy testified that as he monitored appellant's vehicle, the "highest speed that I monitored it [appellant's vehicle] at was 64 and then I locked [\*4] that speed in." Trial Transcript at 26. Deputy Ballas then pulled over appellant's vehicle and cited appellant for speeding. At the conclusion of the evidence, the Magistrate, in his November 8, 2000, Report, found appellant guilty of speeding in violation of *R.C. 4511.21* and ordered appellant to pay a \$ 20.00 fine and court costs. In addition, appellant's driver's license was assessed two points. After the Magistrate filed Findings of Fact and Conclusions of Law, appellant, with leave of court, filed objections to the Magistrate's Decision. As memorialized in a Judgment Entry filed on January 2, 2001, the trial court overruled appellant's objections. It is from the trial court's January 2, 2001, Judgment Entry that appellant now prosecutes his appeal, raising the following assignments of error:

## ASSIGNMENT OF ERROR I

THE FIFTH DISTRICT COURT OF APPEALS SHOULD CONCLUDE THAT THE TRIAL COURT ERRED AND ABUSED ITS DISCRETION BY ADOPTING THE MAGISTRATE'S DECISION SUBSEQUENT TO THE ADMISSION AND CONSIDERATION OF CERTAIN EVIDENCE/INFORMATION IN THIS CASE: (1) THAT THE STATE WILFULLY WITHHELD FROM THE DEFENSE, DESPITE REPEATED DISCOVERY REQUESTS AND A TRIAL COURT [\*5] ORDER COMPELLING DISCLOSURES OF THE INFORMATION; (2) SINCE FOREKNOWLEDGE OF THE REQUESTED INFORMATION WOULD HAVE BENEFITTED THE ACCUSED IN PREPARATION OF HIS DEFENSE; AND (3) BECAUSE THE ACCUSED WAS UNFAIRLY PREJUDICED AS A RESULT OF THE REQUESTED INFORMATION NOT BEING PROVIDED.

## ASSIGNMENT OF ERROR II

DEFENDANT'S CONVICTION FOR VIOLATION OF *R.C. 4511.21(D)* WAS NOT SUPPORTED BY SUFFICIENT EVIDENCE.

For purposes of clarity, we shall address appellant's assignments of error out of sequence.

## II

Appellant, in his second assignment of error, contends that his conviction for speeding in violation of *R.C. 4511.21* is against the sufficiency of the evidence since no expert testimony was offered by the State as to the scientific foundation for and the reliability of the radar unit used by Deputy Ballas on September 2, 2000. Appellant further notes that the trial court did not take judicial notice of the reliability of such unit. In short, appellant maintains that there was insufficient testimony to support his speeding conviction because the radar reading taken by Deputy Ballas should not have been admitted into evidence. In *State v. Jenks (1981)*, 61 Ohio St. 3d 259, 574 N.E.2d 492, [\*6] the Ohio Supreme Court set forth the standard of review when a claim of insufficiency of the evidence is made. The Ohio Supreme Court held: [HN1] An appellate court's function when reviewing the sufficiency of the evidence to support a criminal conviction is to examine the evidence admitted at trial to determine whether such evidence, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt. The relevant inquiry is whether, after reviewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt. *Jenks, supra*, at paragraph two of the syllabus.

[HN2] A "conviction for speeding will not be [reversed on sufficiency grounds even if a radar reading was improperly admitted into evidence when the officer testified that, based upon his visual observation, the vehicle was speeding." *State v. Wilson (1995)*, 102 Ohio App. 3d 1, 4, 656 N.E.2d 954 (Emphasis added.), citing *Kirtland Hills v. Logan (1984)*, 21 Ohio App. 3d 67, 69, 486 N.E.2d 231. During the bench trial in this matter, Deputy Ballas, who has both training [\*7] and extensive experience in issuing speeding tickets, testified that he visually estimated appellant's speed at 56 or 57 miles per hour in a 40 mile per hour zone. Thus, even without the radar reading, there was sufficient evidence supporting appellant's conviction for speeding in violation of 4511.21. Appellant's second assignment of error is, therefore, overruled.

## I

Appellant, in his first assignment of error, argues that the trial court abused its discretion in adopting the Magistrate's Decision finding appellant guilty of speeding in violation of *R.C. 4511.21* since appellee wilfully withheld discoverable evidence from appellant and since appellant was unfairly prejudiced by appellee's failure to provide such evidence. As is stated above, appellant, on September 14, 2000, filed a "Request for Discovery" requesting disclosure of, among other items, the make, model and serial number of the radar unit referred to on the citation issued by Deputy Ballas to appellant, Deputy Ballas' training record with respect to such radar unit, and the calibration record and repair history of such unit. After his numerous attempts to obtain the above discovery were unsuccessful, [\*8] appellant, on November 6, 2000, filed a Motion to Dismiss. While such motion was overruled by the trial court based on appellee's representation that the requested discovery was provided to appellant, there is no doubt that, as of the date of the trial, the discovery sought by appellant was never provided by appellee. During the trial in this matter, appellee attempted to adduce testimony from Deputy Ballas as to his training and qualifications for radar use and regarding the radar unit used by Deputy Ballas. Appellee, for example, specifically asked Deputy Ballas to produce a certificate evidencing his training in radar use. However, appellant objected to appellee's questioning of Deputy Ballas and appellee's request for production of the certificate since appellee had failed to provide the above discovery to appellant although ordered to do so by the trial court. After appellee moved the Magistrate for a judgment of acquittal, the Magistrate denied appellant's motion, stating on the record as follows: BY THE COURT: All right, I'm going to take your objection under advisement and we're going to proceed in this fashion. I'm going to hear that remainder of the evidence and at the conclusion [\*9] of the case I'm going to evaluate the case in its entirety and I'll reconsider your motion at that time and I will also

consider as an alternative, if I feel that there is some violence done to the Rules and that the proper remedy is not to dismiss it, I will consider it in the alternative to simply adjourning the trial to sometime convenient to continue it where now that you're in possession of the information, presumably you will be, we can continue the trial when you won't be impeded by lack of the evidence, so I'm going to take your motion for dismissal and to exclude the evidence under advisement, I'm going to take the evidence into the record and rule later on it.

Trial Transcript at 21 -22. Appellant now maintains that, because appellee blatantly withheld discoverable information, the trial court erred in adopting the Magistrate's report finding appellant guilty of speeding. [HN3] *Crim. R. 16(B)(1)*, which concerns disclosure of evidence by the prosecuting attorney, states, in relevant part, as follows: (c) Documents and tangible objects. Upon motion of the defendant the court shall order the prosecuting attorney to permit the defendant to inspect and copy or photograph books, papers, [\*10] documents, photographs, tangible objects, buildings or places, or copies or portions thereof, available to or within the possession, custody or control of the state, and which are material to the preparation of his defense, or are intended for use by the prosecuting attorney as evidence at the trial, or were obtained from or belong to the defendant.

In turn, [HN4] *Crim. R. 16(E)(3)* provides that, if a party fails to comply with discovery, "... the court may order such party to permit the discovery or inspection, grant a continuance, or prohibit the party from introducing in evidence the material not disclosed, or it may make such other order as it deems just under the circumstances." This Court is deeply troubled by appellee's clear failure to comply with *Crim. R. 16* and, even more so, by appellee's blatant misrepresentation to the trial court in its response to appellant's Motion to Dismiss that the discovery sought by appellant had been provided by appellee. We are further disconcerted by appellee's statement in its appellate brief that the information sought by appellant was not available to appellee until the day of trial. However, while we find that the evidence sought by appellant [\*11] relative to the radar unit was wilfully withheld by appellee, we find that such evidence was not material. In *United States v. Bagley (1985)*, 473 U.S. 667, 87 L. Ed. 2d 481, 105 S. Ct. 3375, the court ruled that [HN5] in determining whether the prosecution improperly suppressed evidence favorable to an accused, such evidence shall be deemed material "only if there is a reasonable probability that, had the evidence been disclosed to the defense, the result of the proceeding would have been different. A 'reasonable probability' is a probability sufficient to undermine confidence in the outcome." *Id.* at 682. See also *State v. Johnston (1988)*, 39 Ohio St. 3d 48, 529 N.E.2d 898. Upon our review of the record, we cannot say that the outcome of appellant's trial would have been different had the evidence sought by appellant regarding the radar unit been disclosed by appellee. The evidence appellant requested through discovery was, therefore, not material to his guilt. As was noted previously, [HN6] Ohio law is clear that an officer's testimony that, based upon his visual observation, a vehicle was speeding is in and of itself sufficient to support a conviction for [\*12] speeding. See *Wilson, supra*. The Magistrate, in his December 5, 2000, Findings of Fact and Conclusions of Law, stated unequivocally that Deputy Ballas "had a clear and unobstructed view of said [appellant's] vehicle; and by virtue of his training and experience was able to estimate by visual observation its speed to a reasonable degree of certainty." As noted by the trial court in its January 2, 2001, Judgment Entry overruling appellant's objections, "the record reveals there was sufficient evidence to support a conviction of a violation of 4511.21 speeding based upon the officer's visual observation and training without even considering the stationary radar reading obtained by the officer." (Emphasis added.) In short, we conclude that the possibility that the undisclosed evidence would have changed the outcome of appellant's trial is not sufficient to undermine our confidence in the outcome of the same. As a final note, while appellant argues in his brief that the trial court erred in overruling appellant's November 6, 2000, Motion to Dismiss, we do not concur. While appellee may have misrepresented the status of discovery to the trial court, the trial court, at such [\*13] time, had no reason to doubt appellee's statement in its response to such motion that appellee had provided all available discovery to appellant. Only during trial did it become apparent that appellee had completely failed to comply with the trial court's discovery order. However, as is stated above, we find no prejudice based on Deputy Ballas' testimony.

Appellant's first assignment of error is, therefore, overruled. Accordingly, the judgment of the Canton Municipal Court is affirmed.

COUNTY**

*2001 Ohio App. LEXIS 3507*

**July 30, 2001, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1] CHARACTER OF PROCEEDING: Criminal Appeal from Canton Municipal Court Case 2000 TRD 8789.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed his speeding conviction in the Canton Municipal Court (Ohio), claiming that his conviction was against the sufficiency of the evidence since no scientific foundation for and the reliability of the radar unit used had been admitted and due to discovery misconduct by the State.

**OVERVIEW:** Defendant was cited for speeding based on an officer's observation and use of a radar unit. He requested discovery of the radar unit's calibration record. The State did not comply with the request or a subsequent court order. Defendant moved to dismiss the action. The trial court overruled the motion and proceeded to a magistrate's trial. At trial, defendant objected to testimony about the radar unit; but the magistrate allowed it. The trial court adopted the magistrate's decision, and defendant appealed. The appellate court was troubled by the clear failure to comply with the discovery request and order and the blatant misrepresentation that the information had been provided. However, because a conviction for speeding could be based on an officer's visual observation and training, the evidence was not material. Receipt of the information would not have changed the trial's outcome.

**OUTCOME:** The conviction was affirmed.

**CORE TERMS:** speeding, radar, discovery, training, speed, mile, assignment of error, visual, prosecuting attorney, memorialized, disclosure, zone, withheld, sufficient evidence, Conclusions of Law, reasonable probability, assignments of error, requested discovery, failed to provide, reasonable doubt, personnel file, serial number, discoverable, certificate, reliability, calibration, requesting, photograph, overruling, advisement

**OPINION:** Edwards, P. J.

Defendant-appellant Rodney L. Napier appeals his conviction in Canton Municipal Court for speeding in violation of *R.C. 4511.21*. Plaintiff-appellee is the State of Ohio.

## STATEMENT OF THE FACTS AND CASE

On September 2, 2000, appellant Rodney Napier was cited for speeding in violation of *R.C. 4511.21*, a misdemeanor. The speeding citation indicated that appellant was driving 64 miles per hour in a 40 mile per hour zone and that appellant's speed was "unsafe for condition". At his arraignment on September 12, 2000, appellant entered a plea of not guilty. Appellant, on September 14, 2000, filed a "Request for Discovery" requesting disclosure of, among other items, the make, model and serial number of the radar unit referred to on the citation issued to appellant, [\*2] the training record of the Deputy who issued the citation with respect to such radar unit, and the calibration record and repair history of the radar unit. Appellant also requested the Deputy's personnel file. Thereafter, after the above information was not provided to appellant by appellee, appellant, on October 4, 2000, filed a Motion to Compel Discovery or, in the Alternative, Motion to Dismiss. As memorialized in a Judgment Entry filed two days later, the trial court overruled appellant's motion. A Motion for Reconsideration was filed by appellant on October 11, 2000. The trial court, pursuant to a Judgment Entry filed on October 31, 2000, sustained appellant's Motion for Reconsideration in part. The trial court, in its October 31, 2000, entry, ordered appellee to provide all of the discovery requested by appellant, with the exception of the Deputy's personnel file, by November 3, 2000. After appellee failed to provide the requested discovery to appellant by such date, appellant, on November 6, 2000, filed a Motion to Dismiss seeking dismissal of the speeding charge. Appellee, in its response to such motion, indicated that appellee had "answered and complied as completely as possible [\*3] to defense counsel's Request for Discovery." As memorialized in a November 7, 2000, Judgment Entry, the trial court overruled appellant's Motion to Dismiss, stating that "the State [appellee] in its answer to defendant's motion to dismiss indicates that it has provided all available discovery to defendant." A bench trial before a Magistrate was held on November 8, 2000. At the bench trial, Deputy Richard Ballas, who has approximately sixteen years experience as a Deputy Sheriff and who has training in issuing speeding tickets, testified for appellee. Deputy Ballas testified that, on September 2, 2000, at approximately 10:10 P.M., he was sitting in a stationary marked cruiser monitoring traffic while in uniform when he observed appellant coming around a corner at "a high rate of speed." Trial Transcript at 26. The Deputy testified that he visually estimated appellant's speed at 56 or 57 miles per hour in a 40 mile per hour zone. After activating his radar unit, Deputy Ballas initially clocked appellant's vehicle at 57 miles per hour. The Deputy testified that as he monitored appellant's vehicle, the "highest speed that I monitored it [appellant's vehicle] at was 64 and then I locked [\*4] that speed in." Trial Transcript at 26. Deputy Ballas then pulled over appellant's vehicle and cited appellant for speeding. At the conclusion of the evidence, the Magistrate, in his November 8, 2000, Report, found appellant guilty of speeding in violation of *R.C. 4511.21* and ordered appellant to pay a \$ 20.00 fine and court costs. In addition, appellant's driver's license was assessed two points. After the Magistrate filed Findings of Fact and Conclusions of Law, appellant, with leave of court, filed objections to the Magistrate's Decision. As memorialized in a Judgment Entry filed on January 2, 2001, the trial court overruled appellant's objections. It is from the trial court's January 2, 2001, Judgment Entry that appellant now prosecutes his appeal, raising the following assignments of error:

## ASSIGNMENT OF ERROR I

THE FIFTH DISTRICT COURT OF APPEALS SHOULD CONCLUDE THAT THE TRIAL COURT ERRED AND ABUSED ITS DISCRETION BY ADOPTING THE MAGISTRATE'S DECISION SUBSEQUENT TO THE ADMISSION AND CONSIDERATION OF CERTAIN EVIDENCE/INFORMATION IN THIS CASE: (1) THAT THE STATE WILFULLY WITHHELD FROM THE DEFENSE, DESPITE REPEATED DISCOVERY REQUESTS AND A TRIAL COURT [\*5] ORDER COMPELLING DISCLOSURES OF THE INFORMATION; (2) SINCE FOREKNOWLEDGE OF THE REQUESTED INFORMATION WOULD HAVE BENEFITTED THE ACCUSED IN PREPARATION OF HIS DEFENSE; AND (3) BECAUSE THE ACCUSED WAS UNFAIRLY PREJUDICED AS A RESULT OF THE REQUESTED INFORMATION NOT BEING PROVIDED.

## ASSIGNMENT OF ERROR II

DEFENDANT'S CONVICTION FOR VIOLATION OF *R.C. 4511.21(D)* WAS NOT SUPPORTED BY SUFFICIENT EVIDENCE.

For purposes of clarity, we shall address appellant's assignments of error out of sequence.

## II

Appellant, in his second assignment of error, contends that his conviction for speeding in violation of *R.C. 4511.21* is against the sufficiency of the evidence since no expert testimony was offered by the State as to the scientific foundation for and the reliability of the radar unit used by Deputy Ballas on September 2, 2000. Appellant further notes that the trial court did not take judicial notice of the reliability of such unit. In short, appellant maintains that there was insufficient testimony to support his speeding conviction because the radar reading taken by Deputy Ballas should not have been admitted into evidence. In *State v. Jenks (1981)*, 61 Ohio St. 3d 259, 574 N.E.2d 492, [\*6] the Ohio Supreme Court set forth the standard of review when a claim of insufficiency of the evidence is made. The Ohio Supreme Court held: [HN1] An appellate court's function when reviewing the sufficiency of the evidence to support a criminal conviction is to examine the evidence admitted at trial to determine whether such evidence, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt. The relevant inquiry is whether, after reviewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt. *Jenks, supra*, at paragraph two of the syllabus.

[HN2] A "conviction for speeding will not be [reversed on sufficiency grounds even if a radar reading was improperly admitted into evidence when the officer testified that, based upon his visual observation, the vehicle was speeding." *State v. Wilson (1995)*, 102 Ohio App. 3d 1, 4, 656 N.E.2d 954 (Emphasis added.), citing *Kirtland Hills v. Logan (1984)*, 21 Ohio App. 3d 67, 69, 486 N.E.2d 231. During the bench trial in this matter, Deputy Ballas, who has both training [\*7] and extensive experience in issuing speeding tickets, testified that he visually estimated appellant's speed at 56 or 57 miles per hour in a 40 mile per hour zone. Thus, even without the radar reading, there was sufficient evidence supporting appellant's conviction for speeding in violation of 4511.21. Appellant's second assignment of error is, therefore, overruled.

## I

Appellant, in his first assignment of error, argues that the trial court abused its discretion in adopting the Magistrate's Decision finding appellant guilty of speeding in violation of *R.C. 4511.21* since appellee wilfully withheld discoverable evidence from appellant and since appellant was unfairly prejudiced by appellee's failure to provide such evidence. As is stated above, appellant, on September 14, 2000, filed a "Request for Discovery" requesting disclosure of, among other items, the make, model and serial number of the radar unit referred to on the citation issued by Deputy Ballas to appellant, Deputy Ballas' training record with respect to such radar unit, and the calibration record and repair history of such unit. After his numerous attempts to obtain the above discovery were unsuccessful, [\*8] appellant, on November 6, 2000, filed a Motion to Dismiss. While such motion was overruled by the trial court based on appellee's representation that the requested discovery was provided to appellant, there is no doubt that, as of the date of the trial, the discovery sought by appellant was never provided by appellee. During the trial in this matter, appellee attempted to adduce testimony from Deputy Ballas as to his training and qualifications for radar use and regarding the radar unit used by Deputy Ballas. Appellee, for example, specifically asked Deputy Ballas to produce a certificate evidencing his training in radar use. However, appellant objected to appellee's questioning of Deputy Ballas and appellee's request for production of the certificate since appellee had failed to provide the above discovery to appellant although ordered to do so by the trial court. After appellee moved the Magistrate for a judgment of acquittal, the Magistrate denied appellant's motion, stating on the record as follows: BY THE COURT: All right, I'm going to take your objection under advisement and we're going to proceed in this fashion. I'm going to hear that remainder of the evidence and at the conclusion [\*9] of the case I'm going to evaluate the case in its entirety and I'll reconsider your motion at that time and I will also

consider as an alternative, if I feel that there is some violence done to the Rules and that the proper remedy is not to dismiss it, I will consider it in the alternative to simply adjourning the trial to sometime convenient to continue it where now that you're in possession of the information, presumably you will be, we can continue the trial when you won't be impeded by lack of the evidence, so I'm going to take your motion for dismissal and to exclude the evidence under advisement, I'm going to take the evidence into the record and rule later on it.

Trial Transcript at 21 -22. Appellant now maintains that, because appellee blatantly withheld discoverable information, the trial court erred in adopting the Magistrate's report finding appellant guilty of speeding. [HN3] *Crim. R. 16(B)(1)*, which concerns disclosure of evidence by the prosecuting attorney, states, in relevant part, as follows: (c) Documents and tangible objects. Upon motion of the defendant the court shall order the prosecuting attorney to permit the defendant to inspect and copy or photograph books, papers, [\*10] documents, photographs, tangible objects, buildings or places, or copies or portions thereof, available to or within the possession, custody or control of the state, and which are material to the preparation of his defense, or are intended for use by the prosecuting attorney as evidence at the trial, or were obtained from or belong to the defendant.

In turn, [HN4] *Crim. R. 16(E)(3)* provides that, if a party fails to comply with discovery, "... the court may order such party to permit the discovery or inspection, grant a continuance, or prohibit the party from introducing in evidence the material not disclosed, or it may make such other order as it deems just under the circumstances." This Court is deeply troubled by appellee's clear failure to comply with *Crim. R. 16* and, even more so, by appellee's blatant misrepresentation to the trial court in its response to appellant's Motion to Dismiss that the discovery sought by appellant had been provided by appellee. We are further disconcerted by appellee's statement in its appellate brief that the information sought by appellant was not available to appellee until the day of trial. However, while we find that the evidence sought by appellant [\*11] relative to the radar unit was wilfully withheld by appellee, we find that such evidence was not material. In *United States v. Bagley (1985)*, 473 U.S. 667, 87 L. Ed. 2d 481, 105 S. Ct. 3375, the court ruled that [HN5] in determining whether the prosecution improperly suppressed evidence favorable to an accused, such evidence shall be deemed material "only if there is a reasonable probability that, had the evidence been disclosed to the defense, the result of the proceeding would have been different. A 'reasonable probability' is a probability sufficient to undermine confidence in the outcome." *Id.* at 682. See also *State v. Johnston (1988)*, 39 Ohio St. 3d 48, 529 N.E.2d 898. Upon our review of the record, we cannot say that the outcome of appellant's trial would have been different had the evidence sought by appellant regarding the radar unit been disclosed by appellee. The evidence appellant requested through discovery was, therefore, not material to his guilt. As was noted previously, [HN6] Ohio law is clear that an officer's testimony that, based upon his visual observation, a vehicle was speeding is in and of itself sufficient to support a conviction for [\*12] speeding. See *Wilson, supra*. The Magistrate, in his December 5, 2000, Findings of Fact and Conclusions of Law, stated unequivocally that Deputy Ballas "had a clear and unobstructed view of said [appellant's] vehicle; and by virtue of his training and experience was able to estimate by visual observation its speed to a reasonable degree of certainty." As noted by the trial court in its January 2, 2001, Judgment Entry overruling appellant's objections, "the record reveals there was sufficient evidence to support a conviction of a violation of 4511.21 speeding based upon the officer's visual observation and training without even considering the stationary radar reading obtained by the officer." (Emphasis added.) In short, we conclude that the possibility that the undisclosed evidence would have changed the outcome of appellant's trial is not sufficient to undermine our confidence in the outcome of the same. As a final note, while appellant argues in his brief that the trial court erred in overruling appellant's November 6, 2000, Motion to Dismiss, we do not concur. While appellee may have misrepresented the status of discovery to the trial court, the trial court, at such [\*13] time, had no reason to doubt appellee's statement in its response to such motion that appellee had provided all available discovery to appellant. Only during trial did it become apparent that appellee had completely failed to comply with the trial court's discovery order. However, as is stated above, we find no prejudice based on Deputy Ballas' testimony.

Appellant's first assignment of error is, therefore, overruled. Accordingly, the judgment of the Canton Municipal Court is affirmed.

By Edwards, P.J. Farmer, J. and Wise, J. concur

**COURT OF APPEALS OF OHIO, EIGHTH APPELLATE DISTRICT,  
CUYAHOGA COUNTY**

*2000 Ohio App. LEXIS 5875*

**December 14, 2000, Date of Announcement of Decision**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal appeals from LYNDHURST MUNICIPAL COURT. Case Nos. 98TRC09857 AB&C.

**DISPOSITION:**

AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant, convicted of speeding and driving while intoxicated, claimed the Lyndhurst Municipal Court (Ohio) denied him due process of law by refusing to enforce his discovery requests and by overruling his motion to suppress evidence.

**OVERVIEW:** Defendant was found guilty of speeding and driving while intoxicated. Error in refusing to grant a hearing on the administrative license suspension was harmless because credit for time served on the administrative license suspension was granted. Discovery of calibration log books was properly limited to time of most recent recalibration. Trial court did not err in refusing to accept defendant's no contest plea or in refusing to suppress the results of the breath test. *Ohio Admin. Code § 3701-53-04(1)* applied only to solutions approved after its effective date, and the solution batch used on defendant was approved prior to the effective date of this section. The arresting officer had probable cause to conduct field sobriety tests and the video of the stop was properly admitted. Defendant did not file a formal, written objection to his waiver of his speedy trial right.

**OUTCOME:** Judgment affirmed. Trial court did not abuse its discretion in rejecting proposed no contest plea or in limiting discovery of calibration logs. Officer had probable cause to conduct sobriety tests. Oral objection to waiver of speedy trial rights was futile, and videotape of arrest was admissible.

**CORE TERMS:** batch, calibration, log, department of health, village, expiration date, arresting officer, breath test, sobriety, regulation, license suspension, speedy trial, driving, assignment of error, traffic stop, breathalyzer, unreliable, invalid, contest plea, mile, complains, probable cause, videotape, discovery, speeding, radar, self-incrimination, announcement, manufacturer, questioning

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

[HN1] Even if a court errs by failing to grant a defendant the administrative license suspension appeal within the statutorily allotted time, there is no substantial prejudice if the court grants the defendant credit for time served on the administrative license suspension.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility*

*Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence Evidence > Scientific Evidence > Blood Alcohol*

[HN2] *Ohio Admin. Code § 3701-53-01(A)* requires that the results of calibration tests be retained for not less than three years. The failure to record calibration logs for the mandatory three year period is grounds for suppressing evidence of a breathalyzer test.

*Civil Procedure > Discovery > Privileged Matters > General Overview*

*Civil Procedure > Discovery > Relevance*

*Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Tangible Objects*

[HN3] *Ohio R. Civ. P. 26(B)(1)* provides that parties may obtain discovery regarding any matter, not privileged, which is relevant to the subject matter involved in the pending action.

*Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Tangible Objects*

[HN4] The courts permit discovery of calibration logs.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

*Criminal Law & Procedure > Preliminary Proceedings > Entry of Pleas > Types > Nolo Contendere*

*Criminal Law & Procedure > Guilty Pleas > No Contest Pleas*

[HN5] The court has no obligation to accept a no contest plea to a serious misdemeanor offense. *Ohio R. Crim. P. 11(D)*.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility*

*Evidence > Scientific Evidence > Blood Alcohol*

[HN6] A defendant may claim that the results of a breath test should be excluded: (1) because the State failed to comply with regulatory protocols issued by the Department of Health that govern breath-test procedures; or (2) because some fact existed that rendered the results of the breath test inaccurate, unreliable, or otherwise invalid under the Ohio Rules of Evidence.

***Evidence > Scientific Evidence > Blood Alcohol***

[HN7] See *Ohio Admin. Code* § 3701-53-04.

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

***Criminal Law & Procedure > Appeals > Reviewability > Waiver > Admission of Evidence***

***Criminal Law & Procedure > Appeals > Reviewability > Waiver > Motions to Suppress***

[HN8] In order to require a hearing on a motion to suppress evidence, the accused must state the motion's legal and factual bases with sufficient particularity to place the prosecutor and the court on notice of the issues to be decided. A defendant's failure to adequately raise the basis of his challenge constitutes a waiver of that issue on appeal.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN9] Where a police officer stops a vehicle based on probable cause that a traffic violation has occurred or was occurring, the stop is not unreasonable under U.S. Const. amend. IV, even if the officer has some ulterior motive for making the stop. Such as a suspicion that the violator was engaging in more nefarious criminal activity.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN10] As to having probable cause to conduct field sobriety tests, all that is required is a reasonable suspicion of criminal activity.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Arrests > Probable Cause***

[HN11] Assuming strict compliance with sobriety tests, a driver's failure of sobriety tests, coupled with other indicia of driving under the influence, establishes sufficient cause for arrest.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Interrogation > Miranda Rights > Custodial Interrogation***

[HN12] The courts have consistently rejected the idea that police must first read a suspect Miranda rights before conducting field sobriety tests since roadside questioning of a motorist pursuant to a routine traffic stop does not ordinarily constitute custodial interrogation requiring Miranda warnings.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Self-Incrimination Privilege***

***Criminal Law & Procedure > Interrogation > Miranda Rights > Self-Incrimination Privilege***

***Evidence > Privileges > Self-Incrimination Privilege > General Overview***

[HN13] Any statements made before a defendant has been arrested are not be subject to a U.S. Const. amend. V right against self-incrimination.

***Criminal Law & Procedure > Pretrial Motions > Speedy Trial > General Overview***

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Speedy Trial***

[HN14] Following an express, written waiver of unlimited duration by an accused of his right to a speedy trial, the accused is not entitled to a discharge for delay in bringing him to trial unless the accused files a formal written objection and demand for trial, following which the state must bring the accused to trial within a reasonable time.

**COUNSEL:** For plaintiff-appellee: VINCENT A. FEUDO, Prosecuting Attorney, Village of Mayfield, MICHAEL E. CICERO, ESQ., Cleveland, OH.

For defendant-appellant: BRIAN D. KERNS, Middleburg Heights, OH.

**JUDGES:** JOHN T. PATTON, JUDGE, PATRICIA A. BLACKMON, J., CONCURS. DIANE KARPINSKI, P.J., WITH SEPARATE CONCURRING OPINION.

**OPINION BY:** JOHN T. PATTON

**OPINION:**

JOURNAL ENTRY AND OPINION

JOHN T. PATTON, J.:

A jury found defendant David Minello guilty of speeding and driving while intoxicated. In this appeal, he claims the court denied him due process of law by refusing to enforce his discovery requests and by overruling his motion to suppress evidence.

A village of Mayfield police officer on traffic duty on I-271 clocked defendant's car traveling ninety miles per hour in a sixty mile per hour zone. The officer pulled defendant's vehicle over and immediately noticed a strong odor of alcohol. The officer described defendant as having a "deranged appearance, red, glassy eyes, just seemed a bit confused in the car."

I

The first assignment of error raises several issues relating to a [\*2] claimed denial of due process.

A

Defendant first claims the court denied him due process of law by (1) refusing to grant him a hearing on his administrative license suspension and (2) refusing to grant him occupational driving privileges pending trial on the drunk driving charge. He maintains the court refused to grant the driving privileges as a means of pressuring him to plead to the charges. The village concedes the court failed to conduct the administrative license suspension hearing, but claims that any error would be harmless because the court credited the time served on the administrative license suspension to the license suspension ordered as part of the sentence for the drunk driving charge.

In *Mayfield Heights v. Buckner*, 1996 Ohio App. LEXIS 4390 (Oct. 3, 1996), Cuyahoga App. No. 69221, unreported, we addressed an identical argument. [HN1] While agreeing that the court erred by failing to grant Buckner the administrative license suspension appeal within the statutorily allotted time, we nonetheless found no substantial prejudice because the court credited the administrative license suspension against a suspension ordered for the drunk driving charge.

As in *Buckner*, the court here granted defendant [\*3] credit for time served on the administrative license suspension. While we cannot condone any practice that deprives drivers of their rights to speedy administrative license appeals, absent substantial prejudice, we see no grounds for reversal.

Defendant also makes the argument that the court refused to grant him occupational driving privileges as a means of coercing a guilty plea. An argument that calls into question the scruples of the trial court requires substantiation - and none is provided. Without more, we can find no error or irregularity.

## B

Defendant next complains the court violated his right to due process by failing to grant his motion to compel the village to produce calibration log books. Defendant requested the calibration logs for the previous three years. The village possessed the logs, but only permitted defense counsel to examine calibration logs for the previous year. Defendant claims he needed to examine all the logs in order to determine whether the breathalyzer had been improperly calibrated with an outdated calibration solution.

[HN2] *Ohio Admin.Code 3701-53-01(A)* requires that the results of calibration tests be retained for not less than three years. The failure [\*4] to record calibration logs for the mandatory three year period is grounds for suppressing evidence of a breathalyzer test. See, e.g., *State v. Hominsky (1995)*, 107 Ohio App. 3d 787, 669 N.E.2d 523; *State v. Griffith*, 1988 Ohio App. LEXIS 3833 (Sept. 21, 1988), Summit App. No. 13551, unreported.

[HN3] *Civ.R. 26(B)(1)* provides that parties may obtain discovery regarding any matter, not privileged, which is relevant to the subject matter involved in the pending action. [HN4] The courts permit discovery of calibration logs. See, e.g., *State v. McCann*, 1993 Ohio App. LEXIS 3762 (July 23, 1993), Licking App. No. CA-92-103, unreported; *State v. Brocco*, 1999 Ohio App. LEXIS 2341 (May 21, 1999), Lake App. No. 98-L-056, unreported. By law, the village is required to maintain those logs, so it should not have been onerous for the village to permit inspection of those logs.

Ultimately, however, we cannot say that the court abused its discretion by failing to permit discovery of the logs because the logs would have been irrelevant under the circumstances. In an amended response to discovery, the village submitted documentation showing that the breathalyzer used to test defendant's breath had been recalibrated by the manufacturer in July 1997 - thirteen months [\*5] before defendant's arrest. Because there is no argument that the July 1997 recalibration had been done inaccurately, the only relevant calibration logs would be those compiled subsequent to July 1997. Cf. *State v. Brandenstein*, 1999 Ohio App. LEXIS 6428 (Dec. 30, 1999), *Cuyahoga App. No. 98 BA 30*, unreported (calibration performed prior to calibrations performed by State Highway Patrol were of "little relevance" when the first calibration did not reveal inaccuracies).

## C

Finally, defendant complains the court violated his right to due process of law by refusing to accept his no contest plea and forcing the matter to go to trial. Defendant maintains he offered to plead no contest to the charges, but the court refused the plea and forced him to go to trial as a means of exerting "economic pressure" on him to plead guilty and avoid a trial. He claims the error is particularly egregious since the court had previously indicated that it would entertain a no contest plea.

[HN5] The court has no obligation to accept a no contest plea to a serious misdemeanor offense. See *Crim.R. 11(D)*. Defendant's proffer of no contest plea stated that he would plead no contest to the charge of driving while intoxicated, [\*6] but that proffer did not include any agreement to plead to the speeding violation or the driving while under the influence charge. Moreover, the proffer came at the eleventh hour, just one day before trial. Given these facts, we cannot say the court abused its discretion by rejecting the proposed no contest plea. The first assignment of error is overruled.

## II

The second assignment of error raises issues relating to the court's refusal to suppress the results of the breath test. Defendant claims the village used an outdated calibration sample and that the arresting officer's reasons for stopping him were pretext.

## A

[HN6] A defendant may claim that the results of a breath test should be excluded: (1) because the State failed to

comply with regulatory protocols issued by the Department of Health that govern breath-test procedures; or (2) because some fact existed that rendered the results of the breath test inaccurate, unreliable, or otherwise invalid under the Ohio Rules of Evidence. *State v. French* (1995), 72 Ohio St. 3d 446, 451-452, 650 N.E.2d 887.

Defendant based part of his motion to suppress the evidence of the breath test on a June 12, 1997 letter written by the [\*7] Ohio Department of Health and sent to law enforcement agencies using Guth Simulator Solution Batches 95400 and 96130. As relevant here, the letter recommended that breath test machines using batch or lot number 96130 instrument solution cease using that batch. The letter noted that questions had arisen concerning the stability of batch 96130, so the Department of Health was recommending that the batch not be used after its expiration date of June 20, 1997. The court found that "for some reason," the village continued to use batch 96130 after receiving this letter, using it to calibrate the Data Master machine used to test defendant nearly fourteen months later on August 6, 1998.

[HN7] *Ohio Adm.Code 3701-53-04* states in relevant part:

(1) \* \* \* An instrument check solution approved by the director *after the effective date of this rule* shall not be used after the manufacturer's expiration date but in no event shall the solution be used more than three years after its date of manufacture, notwithstanding the manufacturer's expiration date. (emphasis added).

Although *Ohio Adm.Code 3701-53-04(1)* would ordinarily invalidate batch 96130, that provision did not take effect until [\*8] July 7, 1997, and specifically stated that it applied only to solutions approved by the director of the department of health *after* its effective date. Because batch 96130 had been approved prior to the effective date of the administrative code section, that section did not apply.

We recently addressed a similar argument concerning the applicability of Department of Health administrative regulations promulgated after-the-fact in *Rocky River v. Papandreas*, 2000 Ohio App. LEXIS 1170 (Mar. 23, 2000), Cuyahoga App. No. 76132, unreported. Papandreas took a breath test that came back with an invalid sample error. After waiting five minutes, the police retested Papandreas. On appeal, Papandreas argued that subsequently implemented administrative regulations called for an additional twenty-minute wait between an invalid sample error and retest. We rejected an argument that the guidelines should be applied retroactively, noting that the Department of Health's regulation did not undermine the validity of prior testing procedures, but merely set forth new rules in an abundance of caution. The same reasoning in *Papandreas* applies here.

Moreover, nothing in the June 12, 1997 letter suggests that the use of batch [\*9] 96130 would yield improper results. Indeed, the letter pointed out that then-current regulations did not require any expiration date on batch 96130, but the limited data available to the Department of Health suggested batch 96130 had a "significantly longer stability" than the proposed expiration date. The Department of Health noted it suggested discarding the solution "in order to be consistent" with the proposed regulation.

The import of this letter was that the Department of Health was only recommending replacing the batch solution after the expiration date in order to be consistent with the newly proposed regulations - not because the data showed that the solution would be compromised by age. This is not a case where the Department of Health had significant concerns about the integrity of batch 96130, and we refuse to read the regulation as suggesting that there had been any question about the integrity of batch 96130. Since *Ohio Adm.Code 3701-53-04* was not in effect at the time, and there has been no showing that age would compromise the integrity of the batch solution, we find the court did not err by refusing to suppress the evidence of the breath test taken on a machine calibrated [\*10] with batch 96130.

Defendant also cites to *State v. Miller*, 1998 Ohio App. LEXIS 6198 (Dec. 15, 1998), Marion App. No. 9-98-42, unreported, for the proposition that breath tests used on machines calibrated with batch 96130 are invalid because the concentration of the batch was not established through the use of proper scientific methods. He maintains *Miller* dictates that any breath test used with batch 96130 is invalid.

Without passing judgment on *Miller*, we find defendant failed to present this argument in a proper fashion. [HN8] "In order to require a hearing on a motion to suppress evidence, the accused must state the motion's legal and factual bases with sufficient particularity to place the prosecutor and the court on notice of the issues to be decided." *State v. Shindler* (1994), 70 Ohio St. 3d 54, 636 N.E.2d 319, syllabus; *Xenia v. Wallace* (1988), 37 Ohio St. 3d 216, 524 N.E.2d 889, paragraph one of the syllabus. A defendant's failure to adequately raise the basis of his challenge constitutes a waiver of that issue on appeal. *Xenia v. Wallace, supra*, at 218; *Bryan v. Fox* (1991), 76 Ohio App. 3d 607, 610, 602 N.E.2d 753.

At no point, [\*11] either by motion or during the suppression hearing itself, did defendant raise the holding in *Miller* as grounds for suppression. The only argument relating to batch 96130 centered on the Department of Health's June 12, 1997 letter concerning the expiration date of batch 96130. Absent notice of an intent to argue the issues raised in *Miller*, defendant is deemed to have waived the right to argue this point on appeal.

## B

Defendant next argues that the arresting officer lacked probable cause to conduct field sobriety tests. He maintains the arresting officer made a "snap decision" to find defendant intoxicated even before field sobriety tests had been performed.

The Supreme Court of Ohio has held that stops based on minor traffic violations do not violate the Fourth Amendment. In *Dayton v. Erickson* (1996), 76 Ohio St. 3d 3, 665 N.E.2d 1091, the syllabus states:

[HN9]

Where a police officer stops a vehicle based on probable cause that a traffic violation has occurred or was occurring, the stop is not unreasonable under the Fourth Amendment to the United States Constitution even if the officer has some ulterior motive for making the stop, such as a suspicion that [\*12] the violator was engaging in more nefarious criminal activity.

The arresting officer clocked defendant traveling ninety miles per hour in a sixty mile per hour speed zone. Under any rational view of the law, the officer validly pulled defendant over.

[HN10] As to having probable cause to conduct field sobriety tests, all that is required is a reasonable suspicion of criminal activity. *Columbus v. Anderson* (1991), 74 Ohio App. 3d 768, 770, 600 N.E.2d 712; *State v. Sanders* (1998), 130 Ohio App. 3d 789, 794, 721 N.E.2d 433. The arresting officer testified that he smelled a strong odor of alcohol, noticed defendant had a "deranged appearance, red, glassy eyes, just seemed a bit confused in the car." These indicia are sufficiently valid criteria for conducting field sobriety tests.

Once the officer had probable cause to conduct field sobriety tests, defendant's poor performance on those tests could constitute cause to arrest. The arresting officer testified that defendant failed the alphabet test and the Horizontal Gaze Nystagmus test, and that he became argumentative during the testing. [HN11] Assuming strict compliance with these sobriety tests (a claim not made [\*13] in this appeal), a driver's failure of sobriety tests, coupled with other indicia of driving under the influence, establishes sufficient cause for arrest. See *State v. Homan* (2000), 89 Ohio St. 3d 421, 732 N.E.2d 952, paragraph one of the syllabus.

## C

Defendant next complains the court erred by refusing to suppress a videotape of the stop and arrest in this case. Defendant argues the playing of the videotape at trial violated his right to remain silent.

[HN12] The courts have consistently rejected the idea that police must first read a suspect Miranda rights before conducting field sobriety tests since roadside questioning of a motorist pursuant to a routine traffic stop does not ordinarily constitute custodial interrogation requiring Miranda warnings. See, e.g., *Berkemer v. McCarty* (1984), 468

*U.S. 420, 82 L. Ed. 2d 317, 104 S. Ct. 3138; State v. Feasel (1988), 41 Ohio App. 3d 155, 157, 534 N.E.2d 940; North Royalton v. Smyth, 1999 Ohio App. LEXIS 2168 (May 13, 1999), Cuyahoga App. No. 74029, unreported; Cleveland v. Criss, 1998 Ohio App. LEXIS 5900 (Dec. 10, 1998), Cuyahoga App. No. 72862, unreported; State v. Pelz, 1998 Ohio App. LEXIS 5313 (Nov. 5, 1998), Cuyahoga App. No. 73654, unreported.*

In *City [\*14] of Fairview Park v. Hejnal, 1995 Ohio App. LEXIS 116 (Jan. 19, 1995), Cuyahoga App. No. 67506, unreported*, we followed *Berkemer*, recognizing that Miranda warnings are not required prior to mere roadside questioning after a routine traffic stop:

In *Berkemer v. McCarty (1984), 468 U.S. 420, 82 L. Ed. 2d 317, 104 S. Ct. 3138*, the United States Supreme Court ruled that the roadside questioning of a motorist detained pursuant to a routine traffic stop does not constitute custodial interrogation for the purposes of the Miranda rule. See *Ohio v. Senedak, 1989 Ohio App. LEXIS 2553 (June 21, 1989), Mahoning App. No. 88 C.A. 160, unreported*. The *Berkemer* court noted that although an ordinary traffic stop curtails the freedom of action of the detained motorist and imposes some pressures on the detainee to answer questions, such pressures do not sufficiently impair the detainee's exercise of his privilege against self-incrimination to require that he be warned of his constitutional rights. *Berkemer* at 421. The Court stated that " \* \* \* In short, the atmosphere surrounding an ordinary traffic stop is substantially less police dominated than surrounding kinds of interrogation at issue in Miranda itself, [\*15] \* \* \*" *468 U.S. at 438-439*. " \* \* \* the only relevant inquiry is how a reasonable man in the suspect's position would have understood his situation." *Id.* Paragraph two of the syllabus.

[HN13] Any statements defendant made before he had been arrested would not be subject to a Fifth Amendment right against self-incrimination. That being the case, a videotape of those statements would be admissible, just as if the officer had testified to those statements.

We reject any idea that the officer had to inform defendant that the stop was being videotaped. Because no Fifth Amendment rights had attached at the time of the stop, the officer would need no more permission to videotape the stop than he would to photograph the scene. Because no right against self-incrimination had attached at that point, the officer had no duty to inform defendant that the stop would be videotaped.

## D

Lastly, defendant claims the court erred by not suppressing evidence relating to the speeding charge because the arresting officer gave no testimony concerning the posted rate of speed and further testified that he shot the radar through the rear window of the cruiser.

The arresting officer testified that [\*16] sixty miles per hour was the speed limit on the stretch of interstate highway where defendant committed his speeding offense. See Suppression Hearing Tr. 49.

In addition, the arresting officer gave a full account of his training in using the radar gun. Defendant points to no authority for the proposition that a valid radar gun reading cannot be obtained by shooting the radar through a window. The second assignment of error is overruled.

## III

In his third assignment of error, defendant complains the court violated his right to a speedy trial. Defendant admits he signed a form waiving his right to a speedy trial, but claims he did not intend to waive the right to a speedy trial on all charges, and subsequently revoked that waiver.

The record shows that defendant executed a waiver of his right to a speedy trial on August 10, 1998. The court

convened the suppression hearing on November 12, 1998. At the close of that day's testimony, defense counsel told the court:

I don't believe my client ever waived his speedy trial rights. If he has, he certainly withdraws any waiver of the speedy trial rights he's been granted because the delay in getting this matter to a resolution is obviously [\*17] impinging upon his constitutional right to due process.

In *State v. O'Brien* (1987), 34 Ohio St. 3d 7, 516 N.E.2d 218, paragraph two of the syllabus states:

[HN14]

Following an express, written waiver of unlimited duration by an accused of his right to a speedy trial, the accused is not entitled to a discharge for delay in bringing him to trial unless the accused files a formal written objection and demand for trial, following which the state must bring the accused to trial within a reasonable time."

Defendant did not file a "formal, written objection" and demand for trial, so his attempt to do so orally during the suppression hearing was futile. See *State v. Cook*, 2000 Ohio App. LEXIS 1944 (May 8, 2000), Warren App. No. CA99-10-126, unreported. The third assignment of error is overruled.

Judgment affirmed.

It is ordered that appellee recover from appellant its costs herein taxed.

The court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this court directing the Lyndhurst Municipal Court to carry this judgment into execution. The defendant's conviction having been affirmed, any bail pending appeal is terminated. Case remanded [\*18] to the trial court for execution of sentence.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

PATRICIA A. BLACKMON, J., CONCURS.

DIANE KARPINSKI, P.J., WITH  
SEPARATE CONCURRING OPINION

JOHN T. PATTON

JUDGE

N.B. This entry is an announcement of the court's decision. See *App.R. 22(B)*, *22(D)* and *26(A)*; *Loc.App.R. 22*. This decision will be journalized and will become the judgment and order of the court pursuant to *App.R. 22(E)* unless a motion for reconsideration with supporting brief, per *App.R. 26(A)*, is filed within ten (10) days of the announcement of the court's decision. The time period for review by the Supreme Court of Ohio shall begin to run upon the journalization of this court's announcement of decision by the clerk per *App.R. 22(E)*. See, also, *S. Ct. Prac. R. II*, Section 2(A)(1).

**CONCUR BY:** DIANE KARPINSKI

**CONCUR:**

CONCURRING OPINION

## KARPINSKI, J., CONCURRING:

I concur with the majority but wish to clarify my position regarding the admissibility of the results of the appellant's Breathalyzer test. The majority relies on *Rocky River v. Papandreas*, 2000 Ohio App. LEXIS 1170 (Mar. 23, 2000), Cuyahoga App. No. 76132, unreported, [\*19] 2000 Ohio App. LEXIS 1170, to support the admissibility of that test. As I stated in my dissent in *Papandreas*, "I have no disagreement with admitting a test result when the procedure by which the result was obtained was in at least substantial compliance with the applicable regulations and any deviation from the regulations did not compromise the integrity of the test results." 2000 Ohio App. LEXIS 1170 at \*16-17

This case differs from *Papandreas* because the test results relied on in that case were obtained by a method which clearly had been shown to be unreliable. I stated in that case that it was unfair to admit "results from a procedure that is now recognized as deficient by scientific standards \* \* \*." 2000 Ohio App. LEXIS 1170 at \*16. In the instant case, there is no evidence to show that the results of the breathalyzer test administered to Minello were not reliable. In fact, as the majority points out, "the limited data available to the Department of Health suggested that batch 96130 had a 'significantly longer stability' than the proposed expiration date. The Department of Health noted it suggested discarding the solution 'in order to be consistent' with the proposed regulation." Majority [\*20] Opinion at 8. The appellant provided no evidence that the test results were unreliable because of the batch of testing solution used. Unlike *Papandreas*, which presented expert testimony regarding why the test results were unreliable, Minello only argued that because the regulation had ordered the solution to be discarded, the test results should be suppressed. Absent evidence of the type presented in *Papandreas*, which showed the test results to be unreliable, it is not necessary to eliminate these test results, because the order issued by the Department of Health was issued for consistency, not accuracy.

**COURT OF APPEALS OF OHIO, EIGHTH APPELLATE DISTRICT,  
CUYAHOGA COUNTY**

*2000 Ohio App. LEXIS 5875*

**December 14, 2000, Date of Announcement of Decision**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal appeals from LYNDHURST MUNICIPAL COURT. Case Nos. 98TRC09857 AB&C.

**DISPOSITION:**

AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant, convicted of speeding and driving while intoxicated, claimed the Lyndhurst Municipal Court (Ohio) denied him due process of law by refusing to enforce his discovery requests and by overruling his motion to suppress evidence.

**OVERVIEW:** Defendant was found guilty of speeding and driving while intoxicated. Error in refusing to grant a hearing on the administrative license suspension was harmless because credit for time served on the administrative license suspension was granted. Discovery of calibration log books was properly limited to time of most recent recalibration. Trial court did not err in refusing to accept defendant's no contest plea or in refusing to suppress the results of the breath test. *Ohio Admin. Code § 3701-53-04(1)* applied only to solutions approved after its effective date, and the solution batch used on defendant was approved prior to the effective date of this section. The arresting officer had probable cause to conduct field sobriety tests and the video of the stop was properly admitted. Defendant did not file a formal, written objection to his waiver of his speedy trial right.

**OUTCOME:** Judgment affirmed. Trial court did not abuse its discretion in rejecting proposed no contest plea or in limiting discovery of calibration logs. Officer had probable cause to conduct sobriety tests. Oral objection to waiver of speedy trial rights was futile, and videotape of arrest was admissible.

**CORE TERMS:** batch, calibration, log, department of health, village, expiration date, arresting officer, breath test, sobriety, regulation, license suspension, speedy trial, driving, assignment of error, traffic stop, breathalyzer, unreliable, invalid, contest plea, mile, complains, probable cause, videotape, discovery, speeding, radar, self-incrimination, announcement, manufacturer, questioning

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

[HN1] Even if a court errs by failing to grant a defendant the administrative license suspension appeal within the statutorily allotted time, there is no substantial prejudice if the court grants the defendant credit for time served on the administrative license suspension.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence Evidence > Scientific Evidence > Blood Alcohol***

[HN2] *Ohio Admin. Code § 3701-53-01(A)* requires that the results of calibration tests be retained for not less than three years. The failure to record calibration logs for the mandatory three year period is grounds for suppressing evidence of a breathalyzer test.

***Civil Procedure > Discovery > Privileged Matters > General Overview***

***Civil Procedure > Discovery > Relevance***

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Tangible Objects***

[HN3] *Ohio R. Civ. P. 26(B)(1)* provides that parties may obtain discovery regarding any matter, not privileged, which is relevant to the subject matter involved in the pending action.

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Tangible Objects***

[HN4] The courts permit discovery of calibration logs.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

***Criminal Law & Procedure > Preliminary Proceedings > Entry of Pleas > Types > Nolo Contendere***

***Criminal Law & Procedure > Guilty Pleas > No Contest Pleas***

[HN5] The court has no obligation to accept a no contest plea to a serious misdemeanor offense. *Ohio R. Crim. P. 11(D)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

***Evidence > Scientific Evidence > Blood Alcohol***

[HN6] A defendant may claim that the results of a breath test should be excluded: (1) because the State failed to comply with regulatory protocols issued by the Department of Health that govern breath-test procedures; or (2) because some fact existed that rendered the results of the breath test inaccurate, unreliable, or otherwise invalid under the Ohio Rules of Evidence.

***Evidence > Scientific Evidence > Blood Alcohol***

[HN7] See *Ohio Admin. Code* § 3701-53-04.

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

***Criminal Law & Procedure > Appeals > Reviewability > Waiver > Admission of Evidence***

***Criminal Law & Procedure > Appeals > Reviewability > Waiver > Motions to Suppress***

[HN8] In order to require a hearing on a motion to suppress evidence, the accused must state the motion's legal and factual bases with sufficient particularity to place the prosecutor and the court on notice of the issues to be decided. A defendant's failure to adequately raise the basis of his challenge constitutes a waiver of that issue on appeal.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN9] Where a police officer stops a vehicle based on probable cause that a traffic violation has occurred or was occurring, the stop is not unreasonable under U.S. Const. amend. IV, even if the officer has some ulterior motive for making the stop. Such as a suspicion that the violator was engaging in more nefarious criminal activity.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN10] As to having probable cause to conduct field sobriety tests, all that is required is a reasonable suspicion of criminal activity.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Arrests > Probable Cause***

[HN11] Assuming strict compliance with sobriety tests, a driver's failure of sobriety tests, coupled with other indicia of driving under the influence, establishes sufficient cause for arrest.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Interrogation > Miranda Rights > Custodial Interrogation***

[HN12] The courts have consistently rejected the idea that police must first read a suspect Miranda rights before conducting field sobriety tests since roadside questioning of a motorist pursuant to a routine traffic stop does not ordinarily constitute custodial interrogation requiring Miranda warnings.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Self-Incrimination Privilege***

***Criminal Law & Procedure > Interrogation > Miranda Rights > Self-Incrimination Privilege***

***Evidence > Privileges > Self-Incrimination Privilege > General Overview***

[HN13] Any statements made before a defendant has been arrested are not be subject to a U.S. Const. amend. V right against self-incrimination.

***Criminal Law & Procedure > Pretrial Motions > Speedy Trial > General Overview***

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Speedy Trial***

[HN14] Following an express, written waiver of unlimited duration by an accused of his right to a speedy trial, the accused is not entitled to a discharge for delay in bringing him to trial unless the accused files a formal written objection and demand for trial, following which the state must bring the accused to trial within a reasonable time.

**COUNSEL:** For plaintiff-appellee: VINCENT A. FEUDO, Prosecuting Attorney, Village of Mayfield, MICHAEL E. CICERO, ESQ., Cleveland, OH.

For defendant-appellant: BRIAN D. KERNS, Middleburg Heights, OH.

**JUDGES:** JOHN T. PATTON, JUDGE, PATRICIA A. BLACKMON, J., CONCURS. DIANE KARPINSKI, P.J., WITH SEPARATE CONCURRING OPINION.

**OPINION BY:** JOHN T. PATTON

**OPINION:**

JOURNAL ENTRY AND OPINION

JOHN T. PATTON, J.:

A jury found defendant David Minello guilty of speeding and driving while intoxicated. In this appeal, he claims the court denied him due process of law by refusing to enforce his discovery requests and by overruling his motion to suppress evidence.

A village of Mayfield police officer on traffic duty on I-271 clocked defendant's car traveling ninety miles per hour in a sixty mile per hour zone. The officer pulled defendant's vehicle over and immediately noticed a strong odor of alcohol. The officer described defendant as having a "deranged appearance, red, glassy eyes, just seemed a bit confused in the car."

I

The first assignment of error raises several issues relating to a [\*2] claimed denial of due process.

A

Defendant first claims the court denied him due process of law by (1) refusing to grant him a hearing on his administrative license suspension and (2) refusing to grant him occupational driving privileges pending trial on the drunk driving charge. He maintains the court refused to grant the driving privileges as a means of pressuring him to plead to the charges. The village concedes the court failed to conduct the administrative license suspension hearing, but claims that any error would be harmless because the court credited the time served on the administrative license suspension to the license suspension ordered as part of the sentence for the drunk driving charge.

In *Mayfield Heights v. Buckner*, 1996 Ohio App. LEXIS 4390 (Oct. 3, 1996), Cuyahoga App. No. 69221, unreported, we addressed an identical argument. [HN1] While agreeing that the court erred by failing to grant Buckner the administrative license suspension appeal within the statutorily allotted time, we nonetheless found no substantial prejudice because the court credited the administrative license suspension against a suspension ordered for the drunk driving charge.

As in *Buckner*, the court here granted defendant [\*3] credit for time served on the administrative license suspension. While we cannot condone any practice that deprives drivers of their rights to speedy administrative license appeals, absent substantial prejudice, we see no grounds for reversal.

Defendant also makes the argument that the court refused to grant him occupational driving privileges as a means of coercing a guilty plea. An argument that calls into question the scruples of the trial court requires substantiation - and none is provided. Without more, we can find no error or irregularity.

## B

Defendant next complains the court violated his right to due process by failing to grant his motion to compel the village to produce calibration log books. Defendant requested the calibration logs for the previous three years. The village possessed the logs, but only permitted defense counsel to examine calibration logs for the previous year. Defendant claims he needed to examine all the logs in order to determine whether the breathalyzer had been improperly calibrated with an outdated calibration solution.

[HN2] *Ohio Admin.Code 3701-53-01(A)* requires that the results of calibration tests be retained for not less than three years. The failure [\*4] to record calibration logs for the mandatory three year period is grounds for suppressing evidence of a breathalyzer test. See, e.g., *State v. Hominsky (1995)*, 107 Ohio App. 3d 787, 669 N.E.2d 523; *State v. Griffith*, 1988 Ohio App. LEXIS 3833 (Sept. 21, 1988), Summit App. No. 13551, unreported.

[HN3] *Civ.R. 26(B)(1)* provides that parties may obtain discovery regarding any matter, not privileged, which is relevant to the subject matter involved in the pending action. [HN4] The courts permit discovery of calibration logs. See, e.g., *State v. McCann*, 1993 Ohio App. LEXIS 3762 (July 23, 1993), Licking App. No. CA-92-103, unreported; *State v. Brocco*, 1999 Ohio App. LEXIS 2341 (May 21, 1999), Lake App. No. 98-L-056, unreported. By law, the village is required to maintain those logs, so it should not have been onerous for the village to permit inspection of those logs.

Ultimately, however, we cannot say that the court abused its discretion by failing to permit discovery of the logs because the logs would have been irrelevant under the circumstances. In an amended response to discovery, the village submitted documentation showing that the breathalyzer used to test defendant's breath had been recalibrated by the manufacturer in July 1997 - thirteen months [\*5] before defendant's arrest. Because there is no argument that the July 1997 recalibration had been done inaccurately, the only relevant calibration logs would be those compiled subsequent to July 1997. Cf. *State v. Brandenstein*, 1999 Ohio App. LEXIS 6428 (Dec. 30, 1999), *Cuyahoga App. No. 98 BA 30*, unreported (calibration performed prior to calibrations performed by State Highway Patrol were of "little relevance" when the first calibration did not reveal inaccuracies).

## C

Finally, defendant complains the court violated his right to due process of law by refusing to accept his no contest plea and forcing the matter to go to trial. Defendant maintains he offered to plead no contest to the charges, but the court refused the plea and forced him to go to trial as a means of exerting "economic pressure" on him to plead guilty and avoid a trial. He claims the error is particularly egregious since the court had previously indicated that it would entertain a no contest plea.

[HN5] The court has no obligation to accept a no contest plea to a serious misdemeanor offense. See *Crim.R. 11(D)*. Defendant's proffer of no contest plea stated that he would plead no contest to the charge of driving while intoxicated, [\*6] but that proffer did not include any agreement to plead to the speeding violation or the driving while under the influence charge. Moreover, the proffer came at the eleventh hour, just one day before trial. Given these facts, we cannot say the court abused its discretion by rejecting the proposed no contest plea. The first assignment of error is overruled.

## II

The second assignment of error raises issues relating to the court's refusal to suppress the results of the breath test. Defendant claims the village used an outdated calibration sample and that the arresting officer's reasons for stopping him were pretext.

## A

[HN6] A defendant may claim that the results of a breath test should be excluded: (1) because the State failed to

comply with regulatory protocols issued by the Department of Health that govern breath-test procedures; or (2) because some fact existed that rendered the results of the breath test inaccurate, unreliable, or otherwise invalid under the Ohio Rules of Evidence. *State v. French* (1995), 72 Ohio St. 3d 446, 451-452, 650 N.E.2d 887.

Defendant based part of his motion to suppress the evidence of the breath test on a June 12, 1997 letter written by the [\*7] Ohio Department of Health and sent to law enforcement agencies using Guth Simulator Solution Batches 95400 and 96130. As relevant here, the letter recommended that breath test machines using batch or lot number 96130 instrument solution cease using that batch. The letter noted that questions had arisen concerning the stability of batch 96130, so the Department of Health was recommending that the batch not be used after its expiration date of June 20, 1997. The court found that "for some reason," the village continued to use batch 96130 after receiving this letter, using it to calibrate the Data Master machine used to test defendant nearly fourteen months later on August 6, 1998.

[HN7] *Ohio Adm.Code 3701-53-04* states in relevant part:

(1) \* \* \* An instrument check solution approved by the director *after the effective date of this rule* shall not be used after the manufacturer's expiration date but in no event shall the solution be used more than three years after its date of manufacture, notwithstanding the manufacturer's expiration date. (emphasis added).

Although *Ohio Adm.Code 3701-53-04(1)* would ordinarily invalidate batch 96130, that provision did not take effect until [\*8] July 7, 1997, and specifically stated that it applied only to solutions approved by the director of the department of health *after* its effective date. Because batch 96130 had been approved prior to the effective date of the administrative code section, that section did not apply.

We recently addressed a similar argument concerning the applicability of Department of Health administrative regulations promulgated after-the-fact in *Rocky River v. Papandreas*, 2000 Ohio App. LEXIS 1170 (Mar. 23, 2000), Cuyahoga App. No. 76132, unreported. Papandreas took a breath test that came back with an invalid sample error. After waiting five minutes, the police retested Papandreas. On appeal, Papandreas argued that subsequently implemented administrative regulations called for an additional twenty-minute wait between an invalid sample error and retest. We rejected an argument that the guidelines should be applied retroactively, noting that the Department of Health's regulation did not undermine the validity of prior testing procedures, but merely set forth new rules in an abundance of caution. The same reasoning in *Papandreas* applies here.

Moreover, nothing in the June 12, 1997 letter suggests that the use of batch [\*9] 96130 would yield improper results. Indeed, the letter pointed out that then-current regulations did not require any expiration date on batch 96130, but the limited data available to the Department of Health suggested batch 96130 had a "significantly longer stability" than the proposed expiration date. The Department of Health noted it suggested discarding the solution "in order to be consistent" with the proposed regulation.

The import of this letter was that the Department of Health was only recommending replacing the batch solution after the expiration date in order to be consistent with the newly proposed regulations - not because the data showed that the solution would be compromised by age. This is not a case where the Department of Health had significant concerns about the integrity of batch 96130, and we refuse to read the regulation as suggesting that there had been any question about the integrity of batch 96130. Since *Ohio Adm.Code 3701-53-04* was not in effect at the time, and there has been no showing that age would compromise the integrity of the batch solution, we find the court did not err by refusing to suppress the evidence of the breath test taken on a machine calibrated [\*10] with batch 96130.

Defendant also cites to *State v. Miller*, 1998 Ohio App. LEXIS 6198 (Dec. 15, 1998), Marion App. No. 9-98-42, unreported, for the proposition that breath tests used on machines calibrated with batch 96130 are invalid because the concentration of the batch was not established through the use of proper scientific methods. He maintains *Miller* dictates that any breath test used with batch 96130 is invalid.

Without passing judgment on *Miller*, we find defendant failed to present this argument in a proper fashion. [HN8] "In order to require a hearing on a motion to suppress evidence, the accused must state the motion's legal and factual bases with sufficient particularity to place the prosecutor and the court on notice of the issues to be decided." *State v. Shindler* (1994), 70 Ohio St. 3d 54, 636 N.E.2d 319, syllabus; *Xenia v. Wallace* (1988), 37 Ohio St. 3d 216, 524 N.E.2d 889, paragraph one of the syllabus. A defendant's failure to adequately raise the basis of his challenge constitutes a waiver of that issue on appeal. *Xenia v. Wallace, supra*, at 218; *Bryan v. Fox* (1991), 76 Ohio App. 3d 607, 610, 602 N.E.2d 753.

At no point, [\*11] either by motion or during the suppression hearing itself, did defendant raise the holding in *Miller* as grounds for suppression. The only argument relating to batch 96130 centered on the Department of Health's June 12, 1997 letter concerning the expiration date of batch 96130. Absent notice of an intent to argue the issues raised in *Miller*, defendant is deemed to have waived the right to argue this point on appeal.

## B

Defendant next argues that the arresting officer lacked probable cause to conduct field sobriety tests. He maintains the arresting officer made a "snap decision" to find defendant intoxicated even before field sobriety tests had been performed.

The Supreme Court of Ohio has held that stops based on minor traffic violations do not violate the Fourth Amendment. In *Dayton v. Erickson* (1996), 76 Ohio St. 3d 3, 665 N.E.2d 1091, the syllabus states:

[HN9]

Where a police officer stops a vehicle based on probable cause that a traffic violation has occurred or was occurring, the stop is not unreasonable under the Fourth Amendment to the United States Constitution even if the officer has some ulterior motive for making the stop, such as a suspicion that [\*12] the violator was engaging in more nefarious criminal activity.

The arresting officer clocked defendant traveling ninety miles per hour in a sixty mile per hour speed zone. Under any rational view of the law, the officer validly pulled defendant over.

[HN10] As to having probable cause to conduct field sobriety tests, all that is required is a reasonable suspicion of criminal activity. *Columbus v. Anderson* (1991), 74 Ohio App. 3d 768, 770, 600 N.E.2d 712; *State v. Sanders* (1998), 130 Ohio App. 3d 789, 794, 721 N.E.2d 433. The arresting officer testified that he smelled a strong odor of alcohol, noticed defendant had a "deranged appearance, red, glassy eyes, just seemed a bit confused in the car." These indicia are sufficiently valid criteria for conducting field sobriety tests.

Once the officer had probable cause to conduct field sobriety tests, defendant's poor performance on those tests could constitute cause to arrest. The arresting officer testified that defendant failed the alphabet test and the Horizontal Gaze Nystagmus test, and that he became argumentative during the testing. [HN11] Assuming strict compliance with these sobriety tests (a claim not made [\*13] in this appeal), a driver's failure of sobriety tests, coupled with other indicia of driving under the influence, establishes sufficient cause for arrest. See *State v. Homan* (2000), 89 Ohio St. 3d 421, 732 N.E.2d 952, paragraph one of the syllabus.

## C

Defendant next complains the court erred by refusing to suppress a videotape of the stop and arrest in this case. Defendant argues the playing of the videotape at trial violated his right to remain silent.

[HN12] The courts have consistently rejected the idea that police must first read a suspect Miranda rights before conducting field sobriety tests since roadside questioning of a motorist pursuant to a routine traffic stop does not ordinarily constitute custodial interrogation requiring Miranda warnings. See, e.g., *Berkemer v. McCarty* (1984), 468

*U.S. 420, 82 L. Ed. 2d 317, 104 S. Ct. 3138; State v. Feasel (1988), 41 Ohio App. 3d 155, 157, 534 N.E.2d 940; North Royalton v. Smyth, 1999 Ohio App. LEXIS 2168 (May 13, 1999), Cuyahoga App. No. 74029, unreported; Cleveland v. Criss, 1998 Ohio App. LEXIS 5900 (Dec. 10, 1998), Cuyahoga App. No. 72862, unreported; State v. Pelz, 1998 Ohio App. LEXIS 5313 (Nov. 5, 1998), Cuyahoga App. No. 73654, unreported.*

In *City [\*14] of Fairview Park v. Hejnal, 1995 Ohio App. LEXIS 116 (Jan. 19, 1995), Cuyahoga App. No. 67506, unreported*, we followed *Berkemer*, recognizing that Miranda warnings are not required prior to mere roadside questioning after a routine traffic stop:

In *Berkemer v. McCarty (1984), 468 U.S. 420, 82 L. Ed. 2d 317, 104 S. Ct. 3138*, the United States Supreme Court ruled that the roadside questioning of a motorist detained pursuant to a routine traffic stop does not constitute custodial interrogation for the purposes of the Miranda rule. See *Ohio v. Senedak, 1989 Ohio App. LEXIS 2553 (June 21, 1989), Mahoning App. No. 88 C.A. 160, unreported*. The *Berkemer* court noted that although an ordinary traffic stop curtails the freedom of action of the detained motorist and imposes some pressures on the detainee to answer questions, such pressures do not sufficiently impair the detainee's exercise of his privilege against self-incrimination to require that he be warned of his constitutional rights. *Berkemer* at 421. The Court stated that " \* \* \* In short, the atmosphere surrounding an ordinary traffic stop is substantially less police dominated than surrounding kinds of interrogation at issue in Miranda itself, [\*15] \* \* \*" *468 U.S. at 438-439*. " \* \* \* the only relevant inquiry is how a reasonable man in the suspect's position would have understood his situation." *Id.* Paragraph two of the syllabus.

[HN13] Any statements defendant made before he had been arrested would not be subject to a Fifth Amendment right against self-incrimination. That being the case, a videotape of those statements would be admissible, just as if the officer had testified to those statements.

We reject any idea that the officer had to inform defendant that the stop was being videotaped. Because no Fifth Amendment rights had attached at the time of the stop, the officer would need no more permission to videotape the stop than he would to photograph the scene. Because no right against self-incrimination had attached at that point, the officer had no duty to inform defendant that the stop would be videotaped.

## D

Lastly, defendant claims the court erred by not suppressing evidence relating to the speeding charge because the arresting officer gave no testimony concerning the posted rate of speed and further testified that he shot the radar through the rear window of the cruiser.

The arresting officer testified that [\*16] sixty miles per hour was the speed limit on the stretch of interstate highway where defendant committed his speeding offense. See Suppression Hearing Tr. 49.

In addition, the arresting officer gave a full account of his training in using the radar gun. Defendant points to no authority for the proposition that a valid radar gun reading cannot be obtained by shooting the radar through a window. The second assignment of error is overruled.

## III

In his third assignment of error, defendant complains the court violated his right to a speedy trial. Defendant admits he signed a form waiving his right to a speedy trial, but claims he did not intend to waive the right to a speedy trial on all charges, and subsequently revoked that waiver.

The record shows that defendant executed a waiver of his right to a speedy trial on August 10, 1998. The court

convened the suppression hearing on November 12, 1998. At the close of that day's testimony, defense counsel told the court:

I don't believe my client ever waived his speedy trial rights. If he has, he certainly withdraws any waiver of the speedy trial rights he's been granted because the delay in getting this matter to a resolution is obviously [\*17] impinging upon his constitutional right to due process.

In *State v. O'Brien* (1987), 34 Ohio St. 3d 7, 516 N.E.2d 218, paragraph two of the syllabus states:

[HN14]

Following an express, written waiver of unlimited duration by an accused of his right to a speedy trial, the accused is not entitled to a discharge for delay in bringing him to trial unless the accused files a formal written objection and demand for trial, following which the state must bring the accused to trial within a reasonable time."

Defendant did not file a "formal, written objection" and demand for trial, so his attempt to do so orally during the suppression hearing was futile. See *State v. Cook*, 2000 Ohio App. LEXIS 1944 (May 8, 2000), Warren App. No. CA99-10-126, unreported. The third assignment of error is overruled.

Judgment affirmed.

It is ordered that appellee recover from appellant its costs herein taxed.

The court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this court directing the Lyndhurst Municipal Court to carry this judgment into execution. The defendant's conviction having been affirmed, any bail pending appeal is terminated. Case remanded [\*18] to the trial court for execution of sentence.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

JUDGE

N.B. This entry is an announcement of the court's decision. See *App.R. 22(B), 22(D) and 26(A)*; *Loc.App.R. 22*. This decision will be journalized and will become the judgment and order of the court pursuant to *App.R. 22(E)* unless a motion for reconsideration with supporting brief, per *App.R. 26(A)*, is filed within ten (10) days of the announcement of the court's decision. The time period for review by the Supreme Court of Ohio shall begin to run upon the journalization of this court's announcement of decision by the clerk per *App.R. 22(E)*. See, also, *S. Ct. Prac. R. II, Section 2(A)(1)*.

**CONCUR BY:** DIANE KARPINSKI

**CONCUR:**

CONCURRING OPINION

## KARPINSKI, J., CONCURRING:

I concur with the majority but wish to clarify my position regarding the admissibility of the results of the appellant's Breathalyzer test. The majority relies on *Rocky River v. Papandreas*, 2000 Ohio App. LEXIS 1170 (Mar. 23, 2000), Cuyahoga App. No. 76132, unreported, [\*19] 2000 Ohio App. LEXIS 1170, to support the admissibility of that test. As I stated in my dissent in *Papandreas*, "I have no disagreement with admitting a test result when the procedure by which the result was obtained was in at least substantial compliance with the applicable regulations and any deviation from the regulations did not compromise the integrity of the test results." 2000 Ohio App. LEXIS 1170 at \*16-17

This case differs from *Papandreas* because the test results relied on in that case were obtained by a method which clearly had been shown to be unreliable. I stated in that case that it was unfair to admit "results from a procedure that is now recognized as deficient by scientific standards \* \* \*." 2000 Ohio App. LEXIS 1170 at \*16. In the instant case, there is no evidence to show that the results of the breathalyzer test administered to Minello were not reliable. In fact, as the majority points out, "the limited data available to the Department of Health suggested that batch 96130 had a 'significantly longer stability' than the proposed expiration date. The Department of Health noted it suggested discarding the solution 'in order to be consistent' with the proposed regulation." Majority [\*20] Opinion at 8. The appellant provided no evidence that the test results were unreliable because of the batch of testing solution used. Unlike *Papandreas*, which presented expert testimony regarding why the test results were unreliable, Minello only argued that because the regulation had ordered the solution to be discarded, the test results should be suppressed. Absent evidence of the type presented in *Papandreas*, which showed the test results to be unreliable, it is not necessary to eliminate these test results, because the order issued by the Department of Health was issued for consistency, not accuracy.

**ACCELERATED CASE NO. 99-P-0019**

**COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT,  
PORTAGE COUNTY**

*2000 Ohio App. LEXIS 2994*

**June 30, 2000, Decided**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal Appeal from the Portage County Municipal Court/Ravenna Division. Case No. R 98 TRC 19526S.

**DISPOSITION:**

Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant challenged a judgment of the Portage Municipal Court, Ravenna Division (Ohio) which convicted and sentenced him, following a no contest plea, for driving with a prohibited breath alcohol concentration in violation of *Ohio Rev. Code Ann. § 4511.19(A)(3)*.

**OVERVIEW:** A police trooper observed appellant speeding and stopped him. Upon questioning appellant, the trooper noticed the odor of alcohol and asked if appellant had been drinking. He was given a breathalyzer test at the station. The first test gave a response of invalid sample. The second test showed an alcohol level in excess of the amount allowed by law for a person driving. Appellant pleaded no contest. On appeal, appellant argued that the trial court erred in denying his motion to suppress the results of the breath verifier test as the procedure was not conducted in compliance with the Ohio Administrative Code Regulations. The court affirmed, because an officer conducting a breath test was not required to retain a printout of an invalid sample reading. Furthermore, appellant failed to show how he was prejudiced by the printout being thrown away. Additionally, there was no evidence that the second test was administered improperly. Appellant stipulated to the validity of the test which meant he stipulated to the trooper's compliance with regulations. There was no error in denying the motion.

**OUTCOME:** Judgment affirmed because appellant failed to show any non-compliance with the department of health regulations regarding the breath test, or any prejudice as a result of non-compliance. Also, there was no evidence that the test was administered improperly; thus, the trial court properly denied the motion to suppress.

**CORE TERMS:** motion to suppress, breath, gram, invalid, printout, alcohol, regulation, machine, driving, alcohol concentration, particularity, liters, substantially complied, influence of alcohol, suppression hearing, assignment of error, testing procedure, odor of alcohol, breath test, patrol car, milliliters, conducting, testing, sitting

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence*

*Criminal Law & Procedure > Appeals > Standards of Review > General Overview*

[HN1] When considering a motion to suppress, the trial court must weigh the evidence and judge the credibility of witnesses. Upon review, an appellate court must accept the trial court's findings of fact if they are supported by competent, credible evidence. After accepting such factual findings as true, the appellate court must then independently determine whether the applicable legal standard has been met as a matter of law.

*Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence*

[HN2] *Ohio R. Crim. P. 47* requires that a motion to suppress state its underlying legal and factual basis with sufficient particularity to place the prosecution and the trial court on notice of the issues to be decided.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

[HN3] *Ohio Admin. Code § 3701-53-01(A)* requires that all Breathalyzer test results be recorded and retained for a minimum of three years.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

[HN4] The *Ohio Admin. Code § 3701-53-02(B)*, -53-04(E) does require certain documents be kept for Breathalyzer testing for a period of three years. Those documents include checklist forms recording the results of subject tests, instrument checks, maintenance records, and the actual test results themselves.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

*Evidence > Scientific Evidence > Blood Alcohol*

[HN5] With respect to Breathalyzer test results, *Ohio Admin. Code § 3701-53-01(A)* states that "results" shall be expressed as equivalent to: (1) grams by weight of alcohol per 100 milliliters of blood (grams per cent by weight); (2) grams by weight of alcohol per 210 liters of deep lung breath; (3) grams by weight of alcohol per 100 milliliters of urine (grams per cent by weight). As can be clearly seen, a "result," as that term is defined above, does not encompass a result expressed as "invalid sample."

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility*

*Evidence > Scientific Evidence > Sobriety Tests*

[HN6] In order for the results of a breath alcohol test to be admissible evidence, the testing procedures must comply with the department of health regulations. It is incumbent upon the person contesting the reliability of the test to raise the issue before the court. Only then is the prosecution required to prove that the test was conducted in substantial compliance with the applicable regulation.

**COUNSEL:** VICTOR V. VIGLUICCI, PORTAGE COUNTY PROSECUTOR, KELLI K. NORMAN, ASSISTANT PROSECUTOR, Ravenna, OH, (For Plaintiff-Appellee).

ATTY. NORMAN W. SANDVOSS, SANDVOSS & LENTZ, Ravenna, OH, (For Defendant-Appellant).

**OPINION BY:** JUDITH A. CHRISTLEY

**OPINION:** CHRISTLEY, J.

This is an accelerated calendar appeal submitted to the court on the briefs of the parties. Appellant, Tim Robinson, appeals from his conviction and sentence entered on a no contest plea in the Portage County Municipal Court, Ravenna Division. For the reasons that follow, we affirm the judgment of the trial court.

On October 22, 1998, at approximately 1:00 a.m., Trooper Todd Reider ("Trooper Reider") of the Ohio State Highway Patrol was monitoring traffic on a portion of State Route 59 in Portage County, Ohio. While sitting in a restaurant parking lot, Trooper Reider observed an approaching vehicle that appeared to be travelling in excess of the posted speed limit. [\*2] Trooper Reider activated his radar and clocked the vehicle at fifty-two m.p.h. in a thirty-five m.p.h. zone. Based on the vehicle's speed, Trooper Reider pulled onto State Route 59 and effected a traffic stop.

The officer approached the stopped vehicle and saw appellant sitting behind the steering wheel. When Trooper Reider asked appellant for his driver's license, the officer noticed an odor of alcohol emanating from within the vehicle. As a result, he asked appellant to walk back to his patrol car.

Once in the patrol car, Trooper Reider asked appellant if he had been drinking. Appellant told the officer that he had three drinks that night. During the conversation, Trooper Reider detected an odor of alcohol on appellant's breath. Accordingly, Trooper Reider performed several field sobriety tests on appellant. Due to appellant's poor performance on the tests, Trooper Reider determined that appellant was under the influence of alcohol and placed him under arrest.

Appellant was transported to the Ravenna Highway Patrol post. At the post, Trooper Reider asked appellant to submit to a breath test, to which appellant agreed. After observing appellant for the required twenty minutes, [\*3] Trooper Reider instructed appellant on how to properly breath into the machine. On his first attempt, appellant failed to blow into the machine long enough, and as a result, a reading of "invalid sample" was printed out. This printout was discarded by the officer.

On appellant's second attempt, the results of the test indicated that appellant had a concentration of alcohol of .118% of a gram per 210 liters of breath. Appellant was subsequently charged with speeding in violation of *R.C. 4511.21*, driving under the influence of alcohol in violation *R.C. 4511.19(A)(1)*, and driving with a prohibited breath alcohol concentration in violation of *R.C. 4511.19(A)(3)*.

On December 10, 1998, appellant filed a motion to suppress the results of the breath test. A hearing was held on January 27, 1999, at which time appellant stipulated to the results of the second test. At the conclusion of the evidence, the trial court overruled appellant's motion to suppress.

On March 4, 1999, appellant entered a plea of no contest to driving with a prohibited breath alcohol concentration. The remaining two charges were dismissed by [\*4] the trial court at the request of appellee. Appellant was sentenced accordingly. From this decision, appellant filed a timely notice of appeal with this court. He now asserts the following assignment of error for our review:

"The trial court erred to the prejudice of defendant-appellant in overruling his motion to suppress the

results of the B. A. C. verifier test because said testing procedure was not conducted in compliance with the Ohio Administrative Code Regulations."

[HN1] When considering a motion to suppress, the trial court must weigh the evidence and judge the credibility of witnesses. *State v. Koziol*, 1997 Ohio App. LEXIS 3877, \*13 (Aug. 29, 1997), Lake App. No. 96-L-193, unreported, 1997 WL 585913, citing *State v. DePew* (1988), 38 Ohio St. 3d 275, 277, 528 N.E.2d 542. Upon review, an appellate court must accept the trial court's findings of fact if they are supported by competent, credible evidence. *Koziol* at 4, citing *State v. Retherford* (1994), 93 Ohio App. 3d 586, 592, 639 N.E.2d 498. After accepting such factual findings as true, the appellate court must then independently determine whether the applicable legal standard has been met as a [\*5] matter of law. *Koziol* at 4; *Retherford* at 592.

First, we would like to note that appellant's motion to suppress did not raise with particularity the issue of Trooper Reider's disposing of the "invalid sample" printout. [HN2] *Crim.R. 47* requires that a motion to suppress state its underlying legal and factual basis with sufficient particularity to place the prosecution and the trial court on notice of the issues to be decided. *State v. Hominsky* (1995), 107 Ohio App. 3d 787, 791, 669 N.E.2d 523, citing *State v. Shindler* (1994), 70 Ohio St. 3d 54, 636 N.E.2d 319. Despite appellant's failure to strictly comply with *Crim.R. 47*, the prosecution did not object to appellant arguing this issue at the hearing on the motion to suppress. As a result, we will address the merits of appellant's appeal.

[HN3] *O.A.C. 3701-53-01(A)* requires that all Breathalyzer test results be recorded and retained for a minimum of three years. Based on this requirement, appellant argues that law enforcement officers should also keep printouts which reflect an "invalid sample." Appellant maintains that such a rule would prevent "unscrupulous law officers" from throwing away results below [\*6] the legal limit. In addition, appellant believes that the history of a machine cannot be properly tracked if there is no record of "failed tests." We disagree.

First, [HN4] the Ohio Administrative Code does require certain documents be kept for a period of three years. Those documents include checklist forms recording the results of subject tests, instrument checks, maintenance records, and the actual test results themselves. See, generally, *O.A.C. 3701-53-02(B)*; *O.A.C. 3701-53-04(E)*. [HN5] With respect to test results, *O.A.C. 3701-53-01(A)* states that "results" shall be expressed as equivalent to:

"(1) Grams by weight of alcohol per one hundred milliliters of blood (grams per cent by weight);

"(2) Grams by weight of alcohol per two hundred ten liters of deep lung breath;

"(3) Grams by weight of alcohol per one hundred milliliters of urine (grams per cent by weight)."

As can be clearly seen, a "result," as that term is defined above, does not encompass a result expressed as "invalid sample." Accordingly, we conclude that an officer conducting such a test is not required to retain a printout to that effect.

In addition, appellant has also failed to show that he suffered prejudice as [\*7] a result of any alleged noncompliance with Ohio Department of Health ("ODH") regulations. [HN6] In order for the results of a breath alcohol test to be admissible evidence, the testing procedures must comply with ODH regulations. *Hominsky* at 795. It is incumbent upon the person contesting the reliability of the test to raise the issue before the court. Only then is the prosecution required to prove that the test was conducted in substantial compliance with the applicable regulation. *Defiance v. Kretz* (1991), 60 Ohio St. 3d 1, 3, 573 N.E.2d 32; *State v. Monsour*, 1997 Ohio App. LEXIS 5466, \*71 (Dec. 5, 1997), Portage App. No. 96-P-0274, unreported, 1997 WL 772941.

Here, appellant's attorney stipulated to the validity of the results of the second test at the beginning of the suppression hearing. Because appellant did not question those results, the prosecution did not introduce its calibration packet to show that the machine in question was working properly on the day appellant was tested. Accordingly, even assuming that the "invalid sample" printout should have been retained, we fail to see how the failure to do so affects the

validity of the second test, especially in light of [\*8] appellant's stipulation. In effect, by stipulating to the validity of the results of the second test, appellant conceded the fact that Trooper Reider had substantially complied with the relevant regulations when conducting the tests.

Furthermore, there is no evidence in the record, nor has appellant suggested, that the test was administered improperly or that the testing procedure was flawed in any way with respect to *either* test. During the suppression hearing, Trooper Reider testified that he retested appellant immediately after the "invalid sample" result came back. Before doing so, however, the officer once again explained to appellant what he needed to do to complete the test. In addition, Trooper Reider initiated a new testing sequence, which included removing the first mouthpiece and replacing it with a new one. Therefore, we conclude that, based on the evidence in the record, Trooper Reider substantially complied with the ODH regulations. Thus, the trial court properly denied appellant's motion to suppress.

Based on the foregoing analysis, appellant's assignment of error is meritless. The judgment of the trial court is affirmed.

**STATE OF OHIO, Plaintiff-Appellee, - vs - TIM ROBINSON, Defendant-Appellant.****ACCELERATED CASE NO. 99-P-0019****COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT,  
PORTAGE COUNTY***2000 Ohio App. LEXIS 2994***June 30, 2000, Decided****PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal Appeal from the Portage County Municipal Court/Ravenna Division. Case No. R 98 TRC 19526S.

**DISPOSITION:**

Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant challenged a judgment of the Portage Municipal Court, Ravenna Division (Ohio) which convicted and sentenced him, following a no contest plea, for driving with a prohibited breath alcohol concentration in violation of *Ohio Rev. Code Ann. § 4511.19(A)(3)*.

**OVERVIEW:** A police trooper observed appellant speeding and stopped him. Upon questioning appellant, the trooper noticed the odor of alcohol and asked if appellant had been drinking. He was given a breathalyzer test at the station. The first test gave a response of invalid sample. The second test showed an alcohol level in excess of the amount allowed by law for a person driving. Appellant pleaded no contest. On appeal, appellant argued that the trial court erred in denying his motion to suppress the results of the breath verifier test as the procedure was not conducted in compliance with the Ohio Administrative Code Regulations. The court affirmed, because an officer conducting a breath test was not required to retain a printout of an invalid sample reading. Furthermore, appellant failed to show how he was prejudiced by the printout being thrown away. Additionally, there was no evidence that the second test was administered improperly. Appellant stipulated to the validity of the test which meant he stipulated to the trooper's compliance with regulations. There was no error in denying the motion.

**OUTCOME:** Judgment affirmed because appellant failed to show any non-compliance with the department of health regulations regarding the breath test, or any prejudice as a result of non-compliance. Also, there was no evidence that the test was administered improperly; thus, the trial court properly denied the motion to suppress.

**CORE TERMS:** motion to suppress, breath, gram, invalid, printout, alcohol, regulation, machine, driving, alcohol concentration, particularity, liters, substantially complied, influence of alcohol, suppression hearing, assignment of error, testing procedure, odor of alcohol, breath test, patrol car, milliliters, conducting, testing, sitting

**OPINION:** CHRISTLEY, J.

This is an accelerated calendar appeal submitted to the court on the briefs of the parties. Appellant, Tim Robinson, appeals from his conviction and sentence entered on a no contest plea in the Portage County Municipal Court, Ravenna Division. For the reasons that follow, we affirm the judgment of the trial court.

On October 22, 1998, at approximately 1:00 a.m., Trooper Todd Reider ("Trooper Reider") of the Ohio State Highway Patrol was monitoring traffic on a portion of State Route 59 in Portage County, Ohio. While sitting in a restaurant parking lot, Trooper Reider observed an approaching vehicle that appeared to be travelling in excess of the posted speed limit. [\*2] Trooper Reider activated his radar and clocked the vehicle at fifty-two m.p.h. in a thirty-five m.p.h. zone. Based on the vehicle's speed, Trooper Reider pulled onto State Route 59 and effected a traffic stop.

The officer approached the stopped vehicle and saw appellant sitting behind the steering wheel. When Trooper Reider asked appellant for his driver's license, the officer noticed an odor of alcohol emanating from within the vehicle. As a result, he asked appellant to walk back to his patrol car.

Once in the patrol car, Trooper Reider asked appellant if he had been drinking. Appellant told the officer that he had three drinks that night. During the conversation, Trooper Reider detected an odor of alcohol on appellant's breath. Accordingly, Trooper Reider performed several field sobriety tests on appellant. Due to appellant's poor performance on the tests, Trooper Reider determined that appellant was under the influence of alcohol and placed him under arrest.

Appellant was transported to the Ravenna Highway Patrol post. At the post, Trooper Reider asked appellant to submit to a breath test, to which appellant agreed. After observing appellant for the required twenty minutes, [\*3] Trooper Reider instructed appellant on how to properly breath into the machine. On his first attempt, appellant failed to blow into the machine long enough, and as a result, a reading of "invalid sample" was printed out. This printout was discarded by the officer.

On appellant's second attempt, the results of the test indicated that appellant had a concentration of alcohol of .118% of a gram per 210 liters of breath. Appellant was subsequently charged with speeding in violation of *R.C. 4511.21*, driving under the influence of alcohol in violation *R.C. 4511.19(A)(1)*, and driving with a prohibited breath alcohol concentration in violation of *R.C. 4511.19(A)(3)*.

On December 10, 1998, appellant filed a motion to suppress the results of the breath test. A hearing was held on January 27, 1999, at which time appellant stipulated to the results of the second test. At the conclusion of the evidence, the trial court overruled appellant's motion to suppress.

On March 4, 1999, appellant entered a plea of no contest to driving with a prohibited breath alcohol concentration. The remaining two charges were dismissed by [\*4] the trial court at the request of appellee. Appellant was sentenced accordingly. From this decision, appellant filed a timely notice of appeal with this court. He now asserts the following assignment of error for our review:

"The trial court erred to the prejudice of defendant-appellant in overruling his motion to suppress the

results of the B. A. C. verifier test because said testing procedure was not conducted in compliance with the Ohio Administrative Code Regulations."

[HN1] When considering a motion to suppress, the trial court must weigh the evidence and judge the credibility of witnesses. *State v. Koziol*, 1997 Ohio App. LEXIS 3877, \*13 (Aug. 29, 1997), Lake App. No. 96-L-193, unreported, 1997 WL 585913, citing *State v. DePew* (1988), 38 Ohio St. 3d 275, 277, 528 N.E.2d 542. Upon review, an appellate court must accept the trial court's findings of fact if they are supported by competent, credible evidence. *Koziol* at 4, citing *State v. Retherford* (1994), 93 Ohio App. 3d 586, 592, 639 N.E.2d 498. After accepting such factual findings as true, the appellate court must then independently determine whether the applicable legal standard has been met as a [\*5] matter of law. *Koziol* at 4; *Retherford* at 592.

First, we would like to note that appellant's motion to suppress did not raise with particularity the issue of Trooper Reider's disposing of the "invalid sample" printout. [HN2] *Crim.R. 47* requires that a motion to suppress state its underlying legal and factual basis with sufficient particularity to place the prosecution and the trial court on notice of the issues to be decided. *State v. Hominsky* (1995), 107 Ohio App. 3d 787, 791, 669 N.E.2d 523, citing *State v. Shindler* (1994), 70 Ohio St. 3d 54, 636 N.E.2d 319. Despite appellant's failure to strictly comply with *Crim.R. 47*, the prosecution did not object to appellant arguing this issue at the hearing on the motion to suppress. As a result, we will address the merits of appellant's appeal.

[HN3] *O.A.C. 3701-53-01(A)* requires that all Breathalyzer test results be recorded and retained for a minimum of three years. Based on this requirement, appellant argues that law enforcement officers should also keep printouts which reflect an "invalid sample." Appellant maintains that such a rule would prevent "unscrupulous law officers" from throwing away results below [\*6] the legal limit. In addition, appellant believes that the history of a machine cannot be properly tracked if there is no record of "failed tests." We disagree.

First, [HN4] the Ohio Administrative Code does require certain documents be kept for a period of three years. Those documents include checklist forms recording the results of subject tests, instrument checks, maintenance records, and the actual test results themselves. See, generally, *O.A.C. 3701-53-02(B)*; *O.A.C. 3701-53-04(E)*. [HN5] With respect to test results, *O.A.C. 3701-53-01(A)* states that "results" shall be expressed as equivalent to:

"(1) Grams by weight of alcohol per one hundred milliliters of blood (grams per cent by weight);

"(2) Grams by weight of alcohol per two hundred ten liters of deep lung breath;

"(3) Grams by weight of alcohol per one hundred milliliters of urine (grams per cent by weight)."

As can be clearly seen, a "result," as that term is defined above, does not encompass a result expressed as "invalid sample." Accordingly, we conclude that an officer conducting such a test is not required to retain a printout to that effect.

In addition, appellant has also failed to show that he suffered prejudice as [\*7] a result of any alleged noncompliance with Ohio Department of Health ("ODH") regulations. [HN6] In order for the results of a breath alcohol test to be admissible evidence, the testing procedures must comply with ODH regulations. *Hominsky* at 795. It is incumbent upon the person contesting the reliability of the test to raise the issue before the court. Only then is the prosecution required to prove that the test was conducted in substantial compliance with the applicable regulation. *Defiance v. Kretz* (1991), 60 Ohio St. 3d 1, 3, 573 N.E.2d 32; *State v. Monsour*, 1997 Ohio App. LEXIS 5466, \*71 (Dec. 5, 1997), Portage App. No. 96-P-0274, unreported, 1997 WL 772941.

Here, appellant's attorney stipulated to the validity of the results of the second test at the beginning of the suppression hearing. Because appellant did not question those results, the prosecution did not introduce its calibration packet to show that the machine in question was working properly on the day appellant was tested. Accordingly, even assuming that the "invalid sample" printout should have been retained, we fail to see how the failure to do so affects the

validity of the second test, especially in light of [\*8] appellant's stipulation. In effect, by stipulating to the validity of the results of the second test, appellant conceded the fact that Trooper Reider had substantially complied with the relevant regulations when conducting the tests.

Furthermore, there is no evidence in the record, nor has appellant suggested, that the test was administered improperly or that the testing procedure was flawed in any way with respect to *either* test. During the suppression hearing, Trooper Reider testified that he retested appellant immediately after the "invalid sample" result came back. Before doing so, however, the officer once again explained to appellant what he needed to do to complete the test. In addition, Trooper Reider initiated a new testing sequence, which included removing the first mouthpiece and replacing it with a new one. Therefore, we conclude that, based on the evidence in the record, Trooper Reider substantially complied with the ODH regulations. Thus, the trial court properly denied appellant's motion to suppress.

Based on the foregoing analysis, appellant's assignment of error is meritless. The judgment of the trial court is affirmed.

**VILLAGE OF GRANVILLE, Plaintiff-Appellee -vs- EMILY T. NORRIS,  
Defendant-Appellant****Case No. 99CA00042****COURT OF APPEALS OF OHIO, FIFTH APPELLATE DISTRICT, LICKING  
COUNTY***1999 Ohio App. LEXIS 5503***November 17, 1999, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1] CHARACTER OF PROCEEDING: Appeal from the Licking County Municipal Court. Case No. 98TRC13721.

**DISPOSITION:** JUDGMENT: Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant sought review of her conviction in Licking County Municipal Court (Ohio), on one count of operating a motor vehicle after underage consumption, in violation of *Ohio Rev. Code Ann. § 4511.19(B)(2)*, claiming error in trial court's failure to suppress breath blood alcohol test evidence.

**OVERVIEW:** Appellant sought review of her conviction for operating a motor vehicle after underage consumption, in violation of *Ohio Rev. Code Ann. § 4511.19(B)(2)*, claiming error in trial court's failure to suppress breath blood alcohol test evidence. Appellant maintained that appellee city failed to prove compliance with the Ohio Department of Health Regulations relative to the calibration of the blood alcohol content machine used during appellant's test. The court found that testimony established that appellee proved substantial compliance with the regulations. Accordingly, trial court did not err in overruling appellant's motion to suppress on this issue. Appellant also argued that appellee failed to establish the scientific reliability of the breath testing process. The court found that a statement made by appellee was tantamount to appellee asking the trial court to take judicial notice of the court's prior Daubert determination of the scientific reliability of the instrument check and the calibration solution.

**OUTCOME:** Affirmed because testimony established that appellee proved substantial compliance with the regulations relative to the calibration of the blood alcohol content machine and because appellee properly asked trial court to take judicial notice of court's prior Daubert determination of the scientific reliability of the instrument check and the calibration solution.

**CORE TERMS:** calibration, bottle, reliability, scientific, breath, retrieved, machine, judicial notice, refrigerator, testing, motion to suppress, findings of fact, refrigerated, sentence, assignment of error, scientific evidence, testing procedure, motor vehicle, machine used, commencement, consumption, regulations, dispatcher, permission, proceeded, depleted, manifest, underage, kitchen, senior

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence******Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN1] There are three methods of challenging on appeal a trial court's ruling on a motion to suppress. First, an appellant may challenge the trial court's findings of fact. In reviewing a challenge of this nature, an appellate court must determine whether said findings of fact are against the manifest weight of the evidence. Second, an appellant may argue the trial court failed to apply the appropriate test or correct law to the findings of fact. In that case, an appellate court can reverse the trial court for committing an error of law. Finally, an appellant may argue the trial court has incorrectly decided the ultimate or final issue raised in the motion to suppress. When reviewing this type of claim, an appellate court must independently determine, without deference to the trial court's conclusion, whether the facts meet the appropriate legal standard in any given case.

***Civil Procedure > Appeals > Standards of Review > De Novo Review******Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN2] As a general matter determinations of reasonable suspicion and probable cause should be reviewed de novo on appeal.

***Evidence > Judicial Notice > General Overview***

[HN3] A court which has received evidence in a case previously before it may take judicial notice of its previous finding in a later case.

**COUNSEL:** For Plaintiff-Appellee: ELENA V. TUHY, GRANVILLE PROSECUTOR, Newark, Ohio.

For Defendant-Appellant: JONATHAN T. TYACK, Columbus, Ohio.

**JUDGES:** Hon. W. Scott Gwin, P.J., Hon. William B. Hoffman, J., Hon. Sheila G. Farmer, J. Gwin, P.J. and Farmer, J. concur.

**OPINION BY:** William B. Hoffman

**OPINION:**

OPINION

Hoffman, J.

Defendant-appellant Emily T. Norris appeals her conviction and sentence entered by the Licking County Municipal Court on one count of operating a motor vehicle after underage consumption, in violation of *R.C. 4511.19(B)(2)*. Plaintiff-appellee is the Village of Granville.

**STATEMENT OF THE CASE AND FACTS**

At approximately 12:30 a.m. on October 17, 1998, Officer Sean Eitel of the Granville Police Department observed a vehicle traveling at an excessive rate of speed. Officer Eitel activated his radar unit, which clocked the vehicle at forty-seven miles per hour, twelve miles per hour over the posted speed limit. Thereafter, the officer initiated a routine traffic stop of the vehicle. Appellant was identified as the driver. Officer [\*2] Eitel subsequently arrested appellant, who was eighteen years old at the time, for operating a motor vehicle after underage consumption, in violation of *R.C.*

4511.19(B)(2). At her arraignment on November 18, 1998, appellant entered a plea of not guilty to the charge. On November 20, 1998, appellant filed a Motion to Suppress/in Limine, which was predicated on two grounds. First, appellant asserted the Village failed to comply with the procedures and regulations set forth by the Ohio Department of Health in calibrating the BAC Datamaster machine used to test her. Additionally, appellant challenged the scientific reliability of the breath test, in general, arguing the breath testing process does not comply with the criteria set forth by the United States Supreme Court in *Daubert v. Merrell Dow Pharmaceuticals, Inc.* (1993), 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469, and adopted by the Ohio Supreme Court in *Miller v. Bike Athletic Co.* (1998), 80 Ohio St. 3d 607, 687 N.E.2d 735. The trial court conducted a hearing on the motion on February 3, 1999. At the hearing, Granville Police Officer Susanna C. Dawson testified she is a senior [\*3] operator of the BAC Datamaster machine and calibrated the Granville Police Department machine on October 18, 1998, subsequent to appellant's test. Officer Dawson's testimony revealed the calibration check was done in accordance with the Ohio Department of Health Regulations. Granville Police Officer David S. Baer testified he is a senior operator of the BAC Datamaster machine and was on duty on October 11, 1998. As part of his duties that day, he conducted an instrument check on the Granville Police Department's machine. Officer Baer explained he performed the instrument check in accordance with the check list prescribed on the BAC instrument check form. With regard to the calibration solution used during the instrument check, the officer stated he obtained a bottle of solution from the department refrigerator. Officer Baer further testified he had used this particular bottle of calibration solution when he performed the October 4, 1998 instrument check. Prior to his testimony in the instant action, Officer Baer testified in the case of *State v. Henry Baker*, Licking County Municipal Court Case No. 98-TRC-13721. During his testimony in the Baker case, Baer stated he obtained the bottle [\*4] of calibration solution used in conducting the October 11, 1998 instrument check from the Ohio State Highway Patrol on October 11, 1998. During his direct examination in the instant action, the officer stated his testimony in the Baker case was inaccurate and he had actually obtained the bottle of calibration solution used to perform the instrument checks on October 4, 1998, and October 11, 1998, from the Heath Police Department on October 4, 1998. Officer Baer explained, in September, 1998, the Granville Police Department had depleted its supply of calibration solution, and, as of October 4, 1998, the supply had not been replenished. As such, on October 4, 1998, Officer Baer contacted the Ohio State Highway Patrol and asked to borrow a bottle of calibration solution. After receiving permission from OSHP, Officer Baer proceeded to the Heath Police Department, where a BAC Datamaster machine belonging to the OSHP is located. Upon his arrival, the dispatcher buzzed the officer in, he walked into the kitchen area and retrieved a bottle of calibration solution out of the refrigerator. During his cross-examination, Officer Baer acknowledged he had no personal knowledge of how the particular [\*5] bottle of calibration solution he retrieved had been opened or stored at any time prior to October 4, 1998. During his redirect examination, the officer stated with confidence, the bottle of calibration solution had not been opened more than three months prior to October 4, 1998. Officer Baer recalled this information from a notation on the actual bottle. At the commencement of the hearing, Prosecutor Elena Tuhy for the Village stated: In regards to the challenge to the scientific reliability of the calibration or the instrument check solution, I would renew the arguments I've made the last few times in regards to relying on the previous testimony of Dr. Sutteimer from the Ohio Department of Health and I believe the Court still has a copy of that testimony. Thank you.

Transcript of February 3, 1999 Hearing on Motion to Suppress at 5. After hearing all the evidence and taking the matter under consideration, the trial court denied appellant's Motion to Suppress/in Limine via Judgment Entry dated March 12, 1999. Thereafter, on April 22, 1999, appellant entered a plea of no contest to the charge. The trial court sentenced appellant to thirty days in jail. The trial court suspended twenty-seven [\*6] of those days and placed appellant on probation for a period of one year. It is from this conviction and sentence appellant appeals, raising the following assignment of error:

THE TRIAL COURT ERRED IN OVERRULING DEFENDANT'S MOTION TO SUPPRESS EVIDENCE OF DEFENDANT'S BREATH TEST RESULTS. (JUDGMENT ENTRY FILED MARCH 12, 1999, ATTACHED HERETO AS EXHIBIT B).

A. THE VILLAGE OF GRANVILLE FAILED TO PROVE COMPLIANCE WITH THE OHIO DEPARTMENT OF HEALTH REGULATIONS REGARDING THE CALIBRATION OF THE B.A.C. DATAMASTER MACHINE.

B. THE VILLAGE OF GRANVILLE FAILED TO ESTABLISH THE SCIENTIFIC RELIABILITY OF THE BREATH TESTING PROCESS.

STANDARD OF REVIEW

[HN1] There are three methods of challenging on appeal a trial court's ruling on a motion to suppress. First, an appellant may challenge the trial court's findings of fact. In reviewing a challenge of this nature, an appellate court must determine whether said findings of fact are against the manifest weight of the evidence. See: *State v. Fanning* (1982), 1 Ohio St. 3d 19, 437 N.E.2d 583; *State v. Klein* (1991), 73 Ohio App. 3d 486, 597 N.E.2d 1141, *State v. Guysinger* (1993), 86 Ohio App. 3d 592, 621 N.E.2d 726. Second, [\*7] an appellant may argue the trial court failed to apply the appropriate test or correct law to the findings of fact. In that case, an appellate court can reverse the trial court for committing an error of law. See: *State v. Williams* (1993), 86 Ohio App. 3d 37, 619 N.E.2d 1141. Finally, assuming the trial court's findings of fact are not against the manifest weight of the evidence and it has properly identified the law to be applied, an appellant may argue the trial court has incorrectly decided the ultimate or final issue raised in the motion to suppress. When reviewing this type of claim, an appellate court must independently determine, without deference to the trial court's conclusion, whether the facts meet the appropriate legal standard in any given case. *State v. Curry* (1994), 95 Ohio App. 3d 93, 96, 641 N.E.2d 1172, *State v. Claytor* (1993), 85 Ohio App. 3d 623, 627, 620 N.E.2d 906, 908, and *State v. Guysinger* (1993), 86 Ohio App. 3d 592, 621 N.E.2d 726. As the United States Supreme Court held in [HN2] *Ornelas v. U.S.* (1996), 517 U.S. 690, 116 S. Ct. 1657, 134 L. Ed. 2d 911, ". . . as a general matter determinations of reasonable [\*8] suspicion and probable cause should be reviewed de novo on appeal."

I.A.

In the first prong of her argument, appellant maintains the Village failed to prove compliance with the Ohio Department of Health Regulations relative to the calibration of the BAC Datamaster machine used during appellant's test. Specifically, appellant argues the Village failed to establish the calibration solution was refrigerated "when not being used" at all times "after first use" as required by *Ohio Administrative Code section 3701-53-04(C)*. At the hearing, Officers Dawson and Baer testified regarding the instrument checks they conducted on October 4, 1998, October 11, 1998, and October 18, 1998. Relative to the October 11, 1998, and the October 18, 1998 instrument checks, Officers Baer and Dawson testified, respectively, he/she retrieved the calibration solution from the refrigerator at the Granville Police Department. Regarding the October 4, 1998 instrument check, Officer Baer testified the Granville Police Department had depleted its supply of calibration solution in September, 1998, and, on October 4, 1998, he received permission from OSHP to obtain a bottle of calibration solution located at the Heath [\*9] Police Department. Officer Baer further testified when he arrived at the Heath Police Department on October 4, 1998, the dispatcher buzzed him in, and he proceeded to the kitchen area where he retrieved a bottle of calibration solution from the refrigerator. We find Officer Baer's testimony, when he retrieved the solution from the Heath Police Department on October 4, 1998, it was refrigerated provides sufficient circumstantial evidence from which the trial court could conclude the Heath Police Department properly refrigerated the solution in compliance with the Ohio Department Health Regulations. We further find this evidence coupled with the testimony of Officers Dawson and Baer relative to the refrigeration of the solution at the Granville Police Department from October 4, 1998, after Officer Baer obtained it from the Heath Police Department, through October 18, 1998, establishes the Village proved substantial compliance with the regulations. Accordingly, we find the trial court did not err in overruling appellant's motion to suppress on this issue. Appellant's assignment of error is overruled on this ground.

I.B.

In her second prong of her argument, appellant argues the Village [\*10] failed to establish the scientific reliability of the breath testing process. Specifically, appellant argues, "although the scientific reliability of the breath testing procedure was called into question \* \* \* no expert testimony or other scientific evidence was ever presented to support the reliability of the breath testing procedure." Brief of Appellant at 7. Appellant maintains the trial court had an obligation to independently review the reliability of the scientific evidence prior to its admission pursuant to *Daubert v.*

*Merrell Dow, supra*, and *Miller v. Bike Athletic Co., supra*. At the commencement of the hearing, the Village informed the trial court it wished to renew the arguments it had made in prior cases with respect to appellant's challenge of the scientific reliability of the instrument check and the calibration solution. We find this statement is tantamount to the Village asking the trial court to take judicial notice of the court's prior determination of the scientific reliability of the instrument check and the calibration solution. The trial court denied appellant's motion to suppress on this issue, finding "the scientific testing of the breath [\*11] of Defendants (sic) as set out under the Ohio Administrative Code and the Ohio Revised Code and as put in place by the Ohio Department of Health meets the standards promulgated by the Ohio Supreme Court and United States Supreme Court." March 12, 1999 Judgment Entry at 4-5. Implicit in this finding is the trial court's acknowledgment it took judicial notice of its previous determination of the scientific reliability of the breath testing process pursuant to *Daubert v. Merrell Dow, supra*; and [HN3] *Miller v. Bike Athletic, supra*. We hold a court which has received evidence in a case previously before it may take judicial notice of its previous finding in a later case. See, *State v. Gazdak, 1991 Ohio App. LEXIS 4598* (September 30, 1991), Geauga App. No. 90-G-1611, unreported. Because the trial court properly took judicial notice of its previous determination of the scientific reliability of the instrument check and the calibration solution, we find the court did not err in overruling appellant's motion on this issue. Appellant's assignment of error is overruled on this ground.

The conviction and sentence of the Licking County Municipal Court is affirmed.

By: Hoffman, J. Gwin, P.J. and Farmer, [\*12] J. concur

**VILLAGE OF GRANVILLE, Plaintiff-Appellee -vs- EMILY T. NORRIS,  
Defendant-Appellant****Case No. 99CA00042****COURT OF APPEALS OF OHIO, FIFTH APPELLATE DISTRICT, LICKING  
COUNTY***1999 Ohio App. LEXIS 5503***November 17, 1999, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1] CHARACTER OF PROCEEDING: Appeal from the Licking County Municipal Court. Case No. 98TRC13721.

**DISPOSITION:** JUDGMENT: Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant sought review of her conviction in Licking County Municipal Court (Ohio), on one count of operating a motor vehicle after underage consumption, in violation of *Ohio Rev. Code Ann. § 4511.19(B)(2)*, claiming error in trial court's failure to suppress breath blood alcohol test evidence.

**OVERVIEW:** Appellant sought review of her conviction for operating a motor vehicle after underage consumption, in violation of *Ohio Rev. Code Ann. § 4511.19(B)(2)*, claiming error in trial court's failure to suppress breath blood alcohol test evidence. Appellant maintained that appellee city failed to prove compliance with the Ohio Department of Health Regulations relative to the calibration of the blood alcohol content machine used during appellant's test. The court found that testimony established that appellee proved substantial compliance with the regulations. Accordingly, trial court did not err in overruling appellant's motion to suppress on this issue. Appellant also argued that appellee failed to establish the scientific reliability of the breath testing process. The court found that a statement made by appellee was tantamount to appellee asking the trial court to take judicial notice of the court's prior Daubert determination of the scientific reliability of the instrument check and the calibration solution.

**OUTCOME:** Affirmed because testimony established that appellee proved substantial compliance with the regulations relative to the calibration of the blood alcohol content machine and because appellee properly asked trial court to take judicial notice of court's prior Daubert determination of the scientific reliability of the instrument check and the calibration solution.

**CORE TERMS:** calibration, bottle, reliability, scientific, breath, retrieved, machine, judicial notice, refrigerator, testing, motion to suppress, findings of fact, refrigerated, sentence, assignment of error, scientific evidence, testing procedure, motor vehicle, machine used, commencement, consumption, regulations, dispatcher, permission, proceeded, depleted, manifest, underage, kitchen, senior

**COUNSEL:** For Plaintiff-Appellee: ELENA V. TUHY, GRANVILLE PROSECUTOR, Newark, Ohio.

For Defendant-Appellant: JONATHAN T. TYACK, Columbus, Ohio.

**JUDGES:** Hon. W. Scott Gwin, P.J., Hon. William B. Hoffman, J., Hon. Sheila G. Farmer, J. Gwin, P.J. and Farmer, J. concur.

**OPINION BY:** William B. Hoffman

**OPINION:**

OPINION

Hoffman, J.

Defendant-appellant Emily T. Norris appeals her conviction and sentence entered by the Licking County Municipal Court on one count of operating a motor vehicle after underage consumption, in violation of *R.C. 4511.19(B)(2)*. Plaintiff-appellee is the Village of Granville.

**STATEMENT OF THE CASE AND FACTS**

At approximately 12:30 a.m. on October 17, 1998, Officer Sean Eitel of the Granville Police Department observed a vehicle traveling at an excessive rate of speed. Officer Eitel activated his radar unit, which clocked the vehicle at forty-seven miles per hour, twelve miles per hour over the posted speed limit. Thereafter, the officer initiated a routine traffic stop of the vehicle. Appellant was identified as the driver. Officer [\*2] Eitel subsequently arrested appellant, who was eighteen years old at the time, for operating a motor vehicle after underage consumption, in violation of *R.C.*

4511.19(B)(2). At her arraignment on November 18, 1998, appellant entered a plea of not guilty to the charge. On November 20, 1998, appellant filed a Motion to Suppress/in Limine, which was predicated on two grounds. First, appellant asserted the Village failed to comply with the procedures and regulations set forth by the Ohio Department of Health in calibrating the BAC Datamaster machine used to test her. Additionally, appellant challenged the scientific reliability of the breath test, in general, arguing the breath testing process does not comply with the criteria set forth by the United States Supreme Court in *Daubert v. Merrell Dow Pharmaceuticals, Inc.* (1993), 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469, and adopted by the Ohio Supreme Court in *Miller v. Bike Athletic Co.* (1998), 80 Ohio St. 3d 607, 687 N.E.2d 735. The trial court conducted a hearing on the motion on February 3, 1999. At the hearing, Granville Police Officer Susanna C. Dawson testified she is a senior [\*3] operator of the BAC Datamaster machine and calibrated the Granville Police Department machine on October 18, 1998, subsequent to appellant's test. Officer Dawson's testimony revealed the calibration check was done in accordance with the Ohio Department of Health Regulations. Granville Police Officer David S. Baer testified he is a senior operator of the BAC Datamaster machine and was on duty on October 11, 1998. As part of his duties that day, he conducted an instrument check on the Granville Police Department's machine. Officer Baer explained he performed the instrument check in accordance with the check list prescribed on the BAC instrument check form. With regard to the calibration solution used during the instrument check, the officer stated he obtained a bottle of solution from the department refrigerator. Officer Baer further testified he had used this particular bottle of calibration solution when he performed the October 4, 1998 instrument check. Prior to his testimony in the instant action, Officer Baer testified in the case of *State v. Henry Baker*, Licking County Municipal Court Case No. 98-TRC-13721. During his testimony in the Baker case, Baer stated he obtained the bottle [\*4] of calibration solution used in conducting the October 11, 1998 instrument check from the Ohio State Highway Patrol on October 11, 1998. During his direct examination in the instant action, the officer stated his testimony in the Baker case was inaccurate and he had actually obtained the bottle of calibration solution used to perform the instrument checks on October 4, 1998, and October 11, 1998, from the Heath Police Department on October 4, 1998. Officer Baer explained, in September, 1998, the Granville Police Department had depleted its supply of calibration solution, and, as of October 4, 1998, the supply had not been replenished. As such, on October 4, 1998, Officer Baer contacted the Ohio State Highway Patrol and asked to borrow a bottle of calibration solution. After receiving permission from OSHP, Officer Baer proceeded to the Heath Police Department, where a BAC Datamaster machine belonging to the OSHP is located. Upon his arrival, the dispatcher buzzed the officer in, he walked into the kitchen area and retrieved a bottle of calibration solution out of the refrigerator. During his cross-examination, Officer Baer acknowledged he had no personal knowledge of how the particular [\*5] bottle of calibration solution he retrieved had been opened or stored at any time prior to October 4, 1998. During his redirect examination, the officer stated with confidence, the bottle of calibration solution had not been opened more than three months prior to October 4, 1998. Officer Baer recalled this information from a notation on the actual bottle. At the commencement of the hearing, Prosecutor Elena Tuhy for the Village stated: In regards to the challenge to the scientific reliability of the calibration or the instrument check solution, I would renew the arguments I've made the last few times in regards to relying on the previous testimony of Dr. Sutteimer from the Ohio Department of Health and I believe the Court still has a copy of that testimony. Thank you.

Transcript of February 3, 1999 Hearing on Motion to Suppress at 5. After hearing all the evidence and taking the matter under consideration, the trial court denied appellant's Motion to Suppress/in Limine via Judgment Entry dated March 12, 1999. Thereafter, on April 22, 1999, appellant entered a plea of no contest to the charge. The trial court sentenced appellant to thirty days in jail. The trial court suspended twenty-seven [\*6] of those days and placed appellant on probation for a period of one year. It is from this conviction and sentence appellant appeals, raising the following assignment of error:

THE TRIAL COURT ERRED IN OVERRULING DEFENDANT'S MOTION TO SUPPRESS EVIDENCE OF DEFENDANT'S BREATH TEST RESULTS. (JUDGMENT ENTRY FILED MARCH 12, 1999, ATTACHED HERETO AS EXHIBIT B).

A. THE VILLAGE OF GRANVILLE FAILED TO PROVE COMPLIANCE WITH THE OHIO DEPARTMENT OF HEALTH REGULATIONS REGARDING THE CALIBRATION OF THE B.A.C. DATAMASTER MACHINE.

B. THE VILLAGE OF GRANVILLE FAILED TO ESTABLISH THE SCIENTIFIC RELIABILITY OF THE BREATH TESTING PROCESS.

STANDARD OF REVIEW

[HN1] There are three methods of challenging on appeal a trial court's ruling on a motion to suppress. First, an appellant may challenge the trial court's findings of fact. In reviewing a challenge of this nature, an appellate court must determine whether said findings of fact are against the manifest weight of the evidence. See: *State v. Fanning* (1982), 1 Ohio St. 3d 19, 437 N.E.2d 583; *State v. Klein* (1991), 73 Ohio App. 3d 486, 597 N.E.2d 1141, *State v. Guysinger* (1993), 86 Ohio App. 3d 592, 621 N.E.2d 726. Second, [\*7] an appellant may argue the trial court failed to apply the appropriate test or correct law to the findings of fact. In that case, an appellate court can reverse the trial court for committing an error of law. See: *State v. Williams* (1993), 86 Ohio App. 3d 37, 619 N.E.2d 1141. Finally, assuming the trial court's findings of fact are not against the manifest weight of the evidence and it has properly identified the law to be applied, an appellant may argue the trial court has incorrectly decided the ultimate or final issue raised in the motion to suppress. When reviewing this type of claim, an appellate court must independently determine, without deference to the trial court's conclusion, whether the facts meet the appropriate legal standard in any given case. *State v. Curry* (1994), 95 Ohio App. 3d 93, 96, 641 N.E.2d 1172, *State v. Claytor* (1993), 85 Ohio App. 3d 623, 627, 620 N.E.2d 906, 908, and *State v. Guysinger* (1993), 86 Ohio App. 3d 592, 621 N.E.2d 726. As the United States Supreme Court held in [HN2] *Ornelas v. U.S.* (1996), 517 U.S. 690, 116 S. Ct. 1657, 134 L. Ed. 2d 911, ". . . as a general matter determinations of reasonable [\*8] suspicion and probable cause should be reviewed de novo on appeal."

I.A.

In the first prong of her argument, appellant maintains the Village failed to prove compliance with the Ohio Department of Health Regulations relative to the calibration of the BAC Datamaster machine used during appellant's test. Specifically, appellant argues the Village failed to establish the calibration solution was refrigerated "when not being used" at all times "after first use" as required by *Ohio Administrative Code section 3701-53-04(C)*. At the hearing, Officers Dawson and Baer testified regarding the instrument checks they conducted on October 4, 1998, October 11, 1998, and October 18, 1998. Relative to the October 11, 1998, and the October 18, 1998 instrument checks, Officers Baer and Dawson testified, respectively, he/she retrieved the calibration solution from the refrigerator at the Granville Police Department. Regarding the October 4, 1998 instrument check, Officer Baer testified the Granville Police Department had depleted its supply of calibration solution in September, 1998, and, on October 4, 1998, he received permission from OSHP to obtain a bottle of calibration solution located at the Heath [\*9] Police Department. Officer Baer further testified when he arrived at the Heath Police Department on October 4, 1998, the dispatcher buzzed him in, and he proceeded to the kitchen area where he retrieved a bottle of calibration solution from the refrigerator. We find Officer Baer's testimony, when he retrieved the solution from the Heath Police Department on October 4, 1998, it was refrigerated provides sufficient circumstantial evidence from which the trial court could conclude the Heath Police Department properly refrigerated the solution in compliance with the Ohio Department Health Regulations. We further find this evidence coupled with the testimony of Officers Dawson and Baer relative to the refrigeration of the solution at the Granville Police Department from October 4, 1998, after Officer Baer obtained it from the Heath Police Department, through October 18, 1998, establishes the Village proved substantial compliance with the regulations. Accordingly, we find the trial court did not err in overruling appellant's motion to suppress on this issue. Appellant's assignment of error is overruled on this ground.

I.B.

In her second prong of her argument, appellant argues the Village [\*10] failed to establish the scientific reliability of the breath testing process. Specifically, appellant argues, "although the scientific reliability of the breath testing procedure was called into question \* \* \* no expert testimony or other scientific evidence was ever presented to support the reliability of the breath testing procedure." Brief of Appellant at 7. Appellant maintains the trial court had an obligation to independently review the reliability of the scientific evidence prior to its admission pursuant to *Daubert v.*

*Merrell Dow, supra*, and *Miller v. Bike Athletic Co., supra*. At the commencement of the hearing, the Village informed the trial court it wished to renew the arguments it had made in prior cases with respect to appellant's challenge of the scientific reliability of the instrument check and the calibration solution. We find this statement is tantamount to the Village asking the trial court to take judicial notice of the court's prior determination of the scientific reliability of the instrument check and the calibration solution. The trial court denied appellant's motion to suppress on this issue, finding "the scientific testing of the breath [\*11] of Defendants (sic) as set out under the Ohio Administrative Code and the Ohio Revised Code and as put in place by the Ohio Department of Health meets the standards promulgated by the Ohio Supreme Court and United States Supreme Court." March 12, 1999 Judgment Entry at 4-5. Implicit in this finding is the trial court's acknowledgment it took judicial notice of its previous determination of the scientific reliability of the breath testing process pursuant to *Daubert v. Merrell Dow, supra*; and [HN3] *Miller v. Bike Athletic, supra*. We hold a court which has received evidence in a case previously before it may take judicial notice of its previous finding in a later case. See, *State v. Gazdak, 1991 Ohio App. LEXIS 4598* (September 30, 1991), Geauga App. No. 90-G-1611, unreported. Because the trial court properly took judicial notice of its previous determination of the scientific reliability of the instrument check and the calibration solution, we find the court did not err in overruling appellant's motion on this issue. Appellant's assignment of error is overruled on this ground.

The conviction and sentence of the Licking County Municipal Court is affirmed.

**COURT OF APPEALS OF OHIO, FIFTH APPELLATE DISTRICT, FAIRFIELD  
COUNTY**

*1999 Ohio App. LEXIS 3277*

**June 30, 1999, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1] CHARACTER OF PROCEEDING: Criminal Appeal from the Lancaster Municipal Court. Case No. 97-TRC-12410.

**DISPOSITION:** JUDGMENT: Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant challenged a decision and journal entry from the Lancaster Municipal Court (Ohio) overruling her motion to suppress evidence after appellant was convicted of driving while under the influence and speeding.

**OVERVIEW:** Appellant's vehicle was stopped for speeding. Appellant was arrested and charged with speeding and driving under the influence of alcohol. Appellant was found guilty and the appeal followed. Appellant challenged the trial court's finding that appellant was guilty of exceeding the speed limit, contending that such finding was not supported by sufficient evidence. Appellant specifically asserted that there was insufficient evidence to support her conviction since no expert testimony was offered by the State nor did the court take judicial notice of the scientific foundation and reliability of the radar. The court noted that the prosecution, to sustain a conviction based on evidence obtained from radar, must prove that the radar device was properly set up and tested by a technician trained by experience to do so, and that at the time it was functioning properly. Defendant's conviction and sentence was affirmed because the arresting officer testified in detail as to how the radar unit was calibrated prior to and after appellant's arrest and that the machine was working properly.

**OUTCOME:** Appellant's conviction for speeding was affirmed because there was sufficient evidence and testimony to support the reliability of the radar device used to determine that appellant was speeding.

**CORE TERMS:** breath, testing, batch, target, bottle, motor vehicle, machine, assignment of error, alcohol, radar, violating, concentration, scientific, overruling, influence of alcohol, expert testimony, withdrawn, driving, blood, urine, breath sample, alcohol level, blood alcohol, manifest, manufacturer, calibration, blood alcohol level, trier of fact,

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

#### ***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN1] A fundamental rule is that an appellate court will not consider any error which could have been brought to the trial court's attention, and hence avoided or otherwise corrected.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

[HN2] Pursuant to *Ohio Rev. Code Ann. § 3701.143*, the director of health shall determine, or cause to be determined, the techniques or methods for chemically analyzing a person's blood, urine, breath, or other bodily substance in order to ascertain the amount of alcohol in the person's blood, urine, breath, or other bodily substance. *Ohio Rev. Code Ann. § 3701.143* further provides that the director of health shall approve satisfactory techniques or methods. To accomplish this task, the Department of Health has established a protocol under Ohio Administrative Code Chapter 3701.

#### ***Contracts Law > Negotiable Instruments > General Overview***

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN3] Ohio Admin. Code § 3701:53-04(A) states that an instrument check on approved evidential breath testing instruments shall be performed no less than once every seven days using an instrument check solution containing ethyl alcohol approved by the director of health. Such section further provides that an instrument check solution is valid when the result is at or within five one-thousandths (0.005) grams per two hundred ten liters of the target value for that instrument check solution. While the Department of Health has authority to determine the techniques and methods for testing blood, urine, breath or other bodily substances, the Ohio Department of Health may not abuse its discretion in doing so. An abuse of discretion has been defined as an unreasonable, arbitrary or unconscionable act.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements***

#### ***Civil Procedure > Judgments > General Overview***

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements***

#### ***Criminal Law & Procedure > Witnesses > General Overview***

[HN5] On review for manifest weight, a reviewing court is to examine the entire record, weigh the evidence and all reasonable inferences, consider the credibility of the witnesses and determine whether in resolving conflicts in the evidence, the trier of fact clearly lost its way and created such a manifest miscarriage of justice that the judgment must be reversed. The discretionary power to grant a new hearing should be exercised only in the exceptional case in which the evidence weighs heavily against the judgment. Because the trier of fact is in a better position to observe the witnesses' demeanor and weigh their credibility, the weight of the evidence and the credibility of the witnesses are primarily for the trier of fact.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence  
Evidence > Judicial Notice > General Overview  
Evidence > Testimony > Experts > General Overview***

[HN6] Courts have taken judicial notice of the reliability of radar units. The Ohio Supreme Court specifically stated as follows: the court is in accord with the trend of the most recent decisions that readings of a radar speed meter may be accepted in evidence, just as the court accepts photographs, x-rays, electroencephalographs, speedometer readings, and the like, without the necessity of offering expert testimony as to the scientific principles underlying them.

[HN7] The Ohio Supreme Court set forth the standard of review when a claim of insufficiency of the evidence is made. The Ohio Supreme Court held: an appellate court's function when reviewing the sufficiency of the evidence to support a criminal conviction is to examine the evidence admitted at trial to determine whether such evidence, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt. The relevant inquiry is whether, after reviewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN8] The prosecution, to sustain a conviction based on evidence obtained from radar, must prove that the radar device was properly set up and tested by a technician trained by experience to do so, and that at the time it was functioning properly.

**COUNSEL:** For Plaintiff-Appellee: PATRICK N. HARRIS City Prosecutor's Office, Lancaster, OH.

For Defendant-Appellant: SCOTT P. WOOD, Lancaster, OH.

**JUDGES:** Hon. John Wise, P.J. Hon. Sheila Farmer, J. Hon. Julie Edwards, J. By Edwards, J. Wise, P. J. and Farmer, J. concur. WISE, P. J., CONCURRING. FARMER, J. CONCURRING.

**OPINION:**

OPINION

Edwards, J.

Defendant-appellant Patricia Walton appeals from the May 18, 1998, Decision and Journal Entry of the Lancaster Municipal Court overruling her Motion to Suppress and the final Entry entered by such court on June 17, 1998.

STATEMENT OF THE FACTS AND CASE

On November 28, 1997, at approximately 1:21 A.M. Trooper Tito Duran, who is with the State Highway Patrol, made a traffic stop of appellant's vehicle for speeding. Duran, who was in uniform, was driving a cruiser at the time. Using a K-55 radar, Trooper Duran had clocked appellant's vehicle as traveling at the rate of 68 miles per hour in a 55 miles per hour zone. After stopping appellant, Trooper Duran noticed a moderate odor of alcohol emanating from [\*2]

appellant and her vehicle. For such reason, after having appellant exit her vehicle, he performed a horizontal gaze nystagmus check on appellant's eyes and asked appellant to perform field sobriety tests to determine if she was driving while impaired. Based upon the results of the horizontal gaze nystagmus and the field sobriety tests, which he believed were consistent with those of someone under the influence of alcohol, and the fact that appellant, once in the police cruiser, smelled of alcohol, Trooper Duran arrested appellant for driving under the influence of alcohol. Following her arrest, appellant was taken to the State Highway Patrol post where she submitted to a chemical breath test that was performed using a BAC Datamaster. Appellant's test yielded a result of .105 grams of alcohol per 210 liters of breath. Thereafter, appellant was charged with operating a motor vehicle while under the influence of alcohol in violation of *R.C. 4511.19(A)(1)*, operating a motor vehicle while having a prohibited alcohol level in violation of *4511.19(A)(3)* and operating a motor vehicle over the posted speed limit, in violation of *R.C. 4511.21(D)*, [\*3] On December 30, 1997, appellant filed a Motion to Suppress the results of her breath test alleging, in the third branch of her motion, that "the instrument check solution used to check the breath machine is inherently untrustworthy and incapable of being verified by the Ohio Department of Health and, therefore, the Director of the Ohio Department of Health has abused his discretion in approving the instrument check solution..." Appellant, in branches 1, 2 and 4 of her Motion to Suppress, also argued: (1) that Trooper Duran's stop of her was illegal, (2) that certain Ohio Department of Health regulations regarding breath testing were not substantially complied with, and (4) that she was not advised of her Miranda rights before oral and written statements were obtained from her by the police. An oral hearing on branches 1, 2 and 4 of appellant's Motion to Suppress was held on March 23, 1998. At the conclusion of the hearing, the trial court took the matter under consideration. On April 27, 1998, an oral hearing on the third branch of appellant's Motion to Suppress was held. For the purposes of the April 27, 1998, hearing only, appellant's case was consolidated with 98-TRC-186, State [\*4] of Ohio v. Marcus Riders. Pursuant to a Decision and Journal Entry filed on May 18, 1998, the trial court overruled appellant's Motion to Suppress with regard to branch 3 of such motion, holding that "since the breath machines used to test [both appellant and Rider] were checked by an instrument check solution which was reliable and supported by sound scientific principles, the Director of the Ohio Department of Health has not abused his discretion in affirming the previously approved instrument check solution." No decision was filed either granting or denying the other three branches of appellant's motion. A bench trial before Judge Don S. McAuliffe was held on June 17, 1998. Prior to the start of the testimony, appellant's counsel moved, pursuant to *R.C. 2941.32*, for an order requiring the prosecution to elect whether to proceed under *4511.19(A)(1)* or *4511.19(A)(3)*. The trial court denied appellant's oral motion. At the conclusion of the trial, the trial court found appellant not guilty of violating *R.C. 4511.19(A)(1)*, operating a motor vehicle while under the influence of alcohol, but guilty of violating both *4511.21(D)*, exceeding [\*5] the speed limits, and *4511.19(A)(3)*, operating a motor vehicle with a prohibited alcohol level. With respect to the speeding offense, appellant was fined \$ 25.00 while, with respect to the driving under the influence offense, appellant was fined \$ 350.00, ordered to pay court costs and sentenced to ten days in jail. The trial court, however, suspended seven days of appellant's sentence and stated that it would credit her with three days attendance at a residential alcohol program. In addition, appellant's driver's license was suspended for 180 days. A sentencing entry was filed on June 17, 1998. It is from the May 18, 1998, and June 17, 1998, Entries that appellant prosecutes her appeal, raising the following assignments of error:

1. THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN FAILING TO RULE ON BRANCHES 1, 2, AND 4 OF DEFENDANT'S MOTION TO SUPPRESS.

2. THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN OVERRULING BRANCH 3 OF DEFENDANT'S MOTION TO SUPPRESS.

3. THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN OVERRULING DEFENDANT'S MOTION TO ORDER THE STATE TO ELECT BETWEEN THE *R.C. SECTION 4511.19(A)(1)* CHARGE AND *R.C. 4511.19(A)(3)* [\*6] CHARGE.

4. THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN OVERRULING DEFENDANT'S MOTION FOR ACQUITTAL ON THE *R.C. SECTION 4511.19(A)(3)* CHARGE.

5. THE TRIAL COURT FINDING THAT DEFENDANT WAS GUILTY OF VIOLATING *R.C. SECTION 4511.19(A)(3)* WAS AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE.

6. THE TRIAL COURT FINDING THAT DEFENDANT WAS GUILTY OF VIOLATING *R.C. 4511.21(D)* WAS NOT SUPPORTED BY SUFFICIENT EVIDENCE.

## I

Appellant, in her first assignment of error, contends that the trial court's failure to rule on branches 1, 2 and 4 of appellant's Motion to Suppress after the March 23, 1998, oral hearing constituted prejudicial error since "a ruling in [appellant's] favor could have resulted in the dismissal of all charges and/or suppression of material evidence." At the conclusion of the March 23, 1998, hearing, the trial court took the matter under consideration. Appellant is correct in her assertion that the trial court failed to journalize its decision on branches 1, 2, and 4 of her Motion to Suppress. However, "[HN1] the fundamental rule is that an appellate court will not consider any error which could have been [\*7] brought to the trial court's attention, and hence avoided or otherwise corrected." *Schade v. Carnegie Body Co. (1982), 70 Ohio St. 2d 207, 210, 436 N.E.2d 1001*. Had the trial court's failure to rule on branches 1, 2, and 4 of the appellant's Motion to Suppress been brought to the trial court's attention, the trial court could have issued a ruling as to such branches. Moreover, when a trial court fails to rule upon a motion, an appellate court generally will presume the trial court overruled the motion. *Akbar-el v. Muhammed (1995), 105 Ohio App. 3d 81, 663 N.E.2d 703*. In view of this presumption, we find the trial court did not err in failing to rule on branches 1, 2 and 4 of appellant's Motion to Suppress. Furthermore, presuming the trial court overruled branches 1, 2, and 4 of appellant's Motion to Suppress, we find that the trial court's ruling was proper. Appellant, in the first branch of her motion, alleged that Trooper Duran's stop of her was illegal. The trial court correctly overruled branch 1 of appellant's motion since, based on the K-55 reading, Trooper Duran had probable cause to arrest appellant for speeding. The second branch of appellant's motion challenged the compliance [\*8] with Ohio Department of Health regulations regarding breath testing machines. The State, at the March 23, 1998, suppression hearing, demonstrated that there was substantial compliance with Ohio Department of Health regulations regarding testing of BAC machines. Trooper Duran testified at the hearing that, in compliance with such regulations, the patrol post customarily checks the calibration of a breath machine every seven days and that the subject breath machine was checked on November 16, 1997 and then again on November 23, 1997, five days before appellant's arrest. See Transcript of March 23, 1998, hearing at 52 - 53. Duran further testified that the subject breath machine was again checked seven days later on November 30, 1997, which is after appellant's arrest. The State, in support of Trooper Duran's testimony, submitted records documenting the calibration of the machine. Defense counsel objected to the records only on grounds of hearsay since neither were the individuals who had prepared such records present at the hearing nor were the records authenticated by the records custodian or certified. See Transcript of March 23, 1998, hearing at 60. The trial court, however, admitted [\*9] the records over appellant's objection, finding that they were kept in the regular course of business. Thus, the trial court properly overruled branch two of appellant's Motion to Suppress. Appellant, in branch 4 of her Motion to Suppress, argued that she was not advised of her Miranda rights before oral and written statements were obtained from her by the police. However, since no oral or written statements were obtained from appellant nor admitted at trial, the trial court did not err in overruling branch 4 of appellant's motion. Appellant's first assignment of error is denied.

## II

In her second assignment of error, appellant argues that the trial court committed prejudicial error in overruling branch 3 of her Motion to Suppress. Appellant was charged with violating *R.C. 4511.19(A)(1)* and (A)(3) after submitting to a BAC Datamaster and testing .105. Appellant specifically challenges the trial court's finding that the instrument check solution, batch number 97220, used to check the calibration of the breath testing machine in appellant's case, is reliable and has been subjected to scientific verification by the Ohio Department of Health. [HN2] Pursuant to *R.C. 3701.143*, [\*10] the director of health shall determine, or cause to be determined, the techniques or methods for "chemically analyzing a person's blood, urine, breath, or other bodily substance in order to ascertain the amount of alcohol...in the person's blood, urine, breath, or other bodily substance." *R.C. 3701.143* further provides that

the director of health "shall approve satisfactory techniques or methods." To accomplish this task, the Department of Health has established a protocol under Ohio Administrative Code Chapter 3701. [HN3] Ohio Adm. Code 3701:53-04(A) states that an instrument check on approved evidential breath testing instruments shall be performed no less than once every seven days using an instrument check solution containing ethyl alcohol approved by the director of health. Such section further provides that an instrument check solution is valid when the result is at or within five one-thousandths (0.005) grams per two hundred ten liters of the target value for that instrument check solution. While the Department of Health has authority to determine the techniques and methods for testing blood, urine, breath or other bodily substances, the Ohio Department [\*11] of Health may not abuse its discretion in doing so. See *State v. Sebach*, 1998 Ohio App. LEXIS 5122 (1998), Knox App. No. 97 CA 24, unreported. An abuse of discretion has been defined as an unreasonable, arbitrary or unconscionable act. *Blakemore v Blakemore* (1983), 5 Ohio St. 3d 217, 450 N.E.2d 1140. At the April 27, 1998, hearing, Dr. Craig Sutheimer, a Deputy Director at the Ohio Department of Health and Chief of the Alcohol Testing Program, testified that instrument check solution batch number 97220 is manufactured by Steifel Research and sold under a Guth Laboratories label. When the Ohio Department of Health purchases a solution such as batch number 97220 for use in a breathalyzer machine, it receives an affidavit from the manufacturer indicating the amount of alcohol in the solution (the "target value"). Thereafter, the Ohio Department of Health independently tests four sample bottles out of the batch four times each, for a total of sixteen tests, to confirm the accuracy of the target value that the manufacturer assigns to the solution. The testing performed by the Department of Health is not itself used to establish a target value. If the target value is found to be accurate, the Ohio Department [\*12] of Health certifies the solution. Batch number 97220, which contained 1,800 bottles, was certified at Dr. Sutheimer's recommendation by the Ohio Department of Health on September 30, 1997, despite the fact that Dr. Sutheimer's repeated inquiries to Steifel Research for documentation as to the quality control used in establishing the target value and as to the number of tests run went unanswered. At such point in time, Dr. Sutheimer also had been unable to get into visit Steifel Research. After visiting Steifel Research on November 21, 1997, Dr. Sutheimer discovered that Steifel Research had only analyzed three bottles out of batch number 97220 and had sent two additional bottles out to Adirondack Lab for testing prior to providing the Ohio Department of Health with an affidavit assigning the target value. At the April 27, 1998, hearing, Dr. Sutheimer testified to a reasonable degree of scientific certainty that at the time the solution certificate was issued by the Ohio Department of Health on September 30, 1997, "neither the manufacturer nor the Department of Health had analyzed enough bottles to set a true target for batch number 97220." Transcript of Proceedings at 55. For batch [\*13] number 97220, a minimum of six to eight bottles should have been tested by one entity, namely Steifel, to set a true target value. See Transcript of April 27, 1998, hearing at 82-84. For such reason, during the first week of December of 1997, Steifel tested ten additional unopened bottles of batch 97220 which had been sent to it by the Ohio Department of Health for analysis. Dr. Sutheimer, however, admitted that the ten bottles did not represent a perfect random selection since he gave Steifel every bottle that he had on hand. A perfect random selection would have been done prior to the entire batch of 1,800 bottles being released. However, Dr. Sutheimer did state that the ten bottles sent were "random in nature." They were the last ten bottles left in the batch and were bottle numbers 217, 233, 344, 498, 740, 749, 1,034, 1,073, 1,801, and 1,815. (Transcript at Pages 73 and 74). Dr. Sutheimer, who personally went to Steifel Labs to review the raw data of the further testing that was performed in December of 1997, testified that "it is the testing done in December that makes me feel comfortable as to what the true target value is". Transcript at 70. He was, however, not present for [\*14] such testing. Based on the testing performed in December of 1997, we find that the instrument check solution batch number 97220 is reliable. The Ohio Department of Health did abuse its discretion in approving batch number 97220 on September 30, 1997, when it certified the solution and blindly accepted Steifel's target value for the batch. However, the subsequent testing done on batch number 97220 in December, 1997, was based on sound scientific procedure and the target value set through that December, 1997, testing was the same target value originally set through the earlier insufficient testing, and was the same target value certified by the Director of the Ohio Department of Health on September 30, 1997. We agree with our colleagues from the Third District Court of Appeals when they found that the solution of ethyl alcohol from batch number 97220 was reliable since it was confirmed through subsequent scientific testing that that batch contained the amount of ethyl alcohol previously certified by the *Director of Health*. *State v. Miller*, 1998 Ohio App. LEXIS 6198 unreported, Court of Appeals of Ohio, Third District, Marion County, Dec. 15, 1998, No. 9-98-42. Appellant's second assignment of error is overruled. [\*15]

## III

In her third assignment of error, appellant asserts that the trial court committed prejudicial error in overruling her motion to order the State to elect between the *R.C. 4511.19(A)(1)* charge, driving under the influence of alcohol, and the *R.C. 4511.19(A)(3)* charge, driving with a prohibited alcohol level. While the trial court overruled appellant's motion, it held that appellant could only be convicted and sentenced for one offense. Appellant specifically points to *R.C. 2941.32* which provides as follows: "if two or more indictments or informations are pending against the same defendant for the same criminal act, the prosecuting attorney must elect upon which he will proceed, and upon trial being had upon one of them, the remaining indictments or information shall be quashed." However, *R.C. 4511.19(A)(1)* and (3) have been held to create separate offenses. *State v. Mendieta (1984)*, 20 Ohio App. 3d 18, 484 N.E.2d 180. See also *State v. Wilcox (1983)*, 10 Ohio App. 3d 11, 460 N.E.2d 323. A defendant, therefore, may be charged with both and found guilty [\*16] of both, but may only be sentenced as to one. *Id.* Since appellant was not sentenced on both charges, the trial court did not err in overruling appellant's motion and allowing the State to pursue both charges. Appellant's third assignment of error is denied.

## IV, V

In her fourth assignment of error, appellant argues that the trial court committed prejudicial error in overruling her motion for acquittal on the *R.C. 4511.19(A)(3)* charge, operating a motor vehicle with a prohibited alcohol level. Appellant had moved for acquittal at the conclusion of the State's case pursuant to *Criminal Rule 29* since the State did not correlate the results of appellant's blood alcohol test, which was taken within two hours of the alleged offense as mandated by *R.C. 4511.19(D)(1)*, to her blood alcohol level at the time of appellant's operation of the motor vehicle. Appellant's blood alcohol test, which was taken approximately 53 minutes after the operation of a motor vehicle, indicated a blood alcohol level of .105 grams of alcohol per 210 liters of breath. [HN4] *R.C. 4511.19(D)(1)* states as follows: "In any criminal prosecution or [\*17] juvenile court proceeding for a violation of this section, of a municipal ordinance relating to operating a vehicle while under the influence of alcohol, a drug of abuse, or alcohol and a drug of abuse, or of a municipal ordinance relating to operating a vehicle with a prohibited concentration of alcohol in the blood, breath, or urine, the court may admit evidence on the concentration of alcohol, drugs of abuse, or alcohol and drugs of abuse in the defendant's blood, breath, urine, or other bodily substance at the time of the alleged violation as shown by chemical analysis of the defendant's blood, urine, breath, or other bodily substance withdrawn within two hours of the time of the alleged violation." (Emphasis added)

As the Sixth District Court of Appeals stated in *State v. Ulrich (1984)*, 17 Ohio App. 3d 182, 191, 478 N.E.2d 812:

"Clearly, it is the intent of the Ohio Legislature in prosecutions under *R.C. 4511.19(A)(3)* to have admitted, as evidence of the alleged offender's concentration of alcohol in the alleged offender's breath at the time of the alleged offense, a chemical analysis of the alleged offender's breath provided that the breath [\*18] sample was withdrawn according to established guidelines. It is a legislative determination that a breath sample withdrawn within two hours of the alleged offense will accurately reflect the alleged offender's alcohol content, by weight, in the withdrawn breath sample at the time of the alleged offense. Thus, the amount of alcohol concentration in the alleged offender's breath at the time of the alleged offense is shown by a chemical analysis of a sample of the alleged offender's breath which is withdrawn within two hours of the time of the alleged violation."

Since appellant's breath sample was taken within two hours of the alleged violation, the trial court correctly determined that it accurately reflected appellant's blood alcohol content at the time of the offense. The trial court, therefore, did not err in overruling appellant's Motion for Acquittal on the *R.C. 4511.19(A)(3)* charge. Similarly, in her fifth assignment of error, appellant contends that the trial court's finding that appellant was guilty of violating *R.C. 4511.19(A)(3)*, operation of a motor vehicle with a prohibited level of alcohol, was against the manifest weight [\*19] of the evidence. [HN5] On review for manifest weight, a reviewing court is to examine the entire record, weigh the evidence and all reasonable inferences, consider the credibility of the witnesses and determine "whether in resolving conflicts in the evidence, the trier of fact clearly lost its way and created such a manifest miscarriage of justice that the

judgment must be reversed. The discretionary power to grant a new hearing should be exercised only in the exceptional case in which the evidence weighs heavily against the judgment. *State v. Thompkins* (1997), 78 Ohio St. 3d 380, 387, 678 N.E.2d 541, citing *State v. Martin* (1983), 20 Ohio App. 3d 172, 175, 485 N.E.2d 717. Because the trier of fact is in a better position to observe the witnesses' demeanor and weigh their credibility, the weight of the evidence and the credibility of the witnesses are primarily for the trier of fact. *State v. DeHass* (1967), 10 Ohio St. 2d 230, 227 N.E.2d 212, syllabus 1. Appellant specifically asserts that the trial court's finding that appellant was guilty of violating 4511.19(A)(3) was against the manifest weight of the evidence since the State did not correlate appellant's [\*20] "chemical test reflecting blood alcohol level to the time of the alleged operation of the motor vehicle in rebuttal to expert testimony...that, at the time of [the] alleged operation of a motor vehicle, a defendant's blood alcohol level was under the legal limit." At appellant's trial, Dr. Alfred Staubus, appellant's expert witness, testified that at the time appellant last operated the motor vehicle, it is possible to a reasonable degree of medical certainty that her blood alcohol concentration was less than .100. Dr. Staubus further testified that, assuming the State's chemical test was accurate, appellant's alcohol level could have been as low as .087 or as high as .123, and that any stomach acid in her mouth due to regurgitation could have affected the outcome of her blood alcohol concentration test. However, "expert testimony is not necessary to correlate intoxilyzer test results to the time of the alleged offense." *Ulrich, supra at 191*. Rather, a defendant "may challenge the accuracy of his specific test result through the use of expert testimony, to show that he could not have produced the test result claimed by the prosecution under those circumstances." *City of Columbus v. Day* (1985), 24 Ohio App. 3d 173, 493 N.E.2d 1002, [\*21] syllabus. The testimony of Dr. Staubus was presented by appellant for such purpose. The State, however, was not required to rebut Dr. Staubus' testimony by presenting expert testimony correlating appellant's test results to the time of the alleged offense since, as is stated above, a breath sample withdrawn within two hours of the alleged offense has been legislatively determined to accurately reflect the alleged offender's alcohol content at the time of the alleged offense. Upon consideration of the record, this court cannot say that the trial judge, as trier of fact, clearly lost his way and created a manifest miscarriage of justice. Appellant's fourth and fifth assignments of error are overruled.

## VI

In her final assignment of error, appellant challenges the trial court's finding that appellant was guilty of violating *R.C. 4511.21(D)*, exceeding the speed limit, contending that such finding was not supported by sufficient evidence. Appellant specifically asserts that there was insufficient evidence to support her conviction since no expert testimony was offered by the State nor did the court take judicial notice of the scientific foundation and reliability [\*22] of the K55 radar. [HN6] Courts have taken judicial notice of the reliability of radar units. See *City of East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 154 N.E.2d 630 and *City of Xenia v. Boehman* (1996), 114 Ohio App. 3d 78, 682 N.E.2d 1029. The Ohio Supreme Court, in *Ferrell*, specifically stated as follows: "We are in accord with the trend of the most recent decisions that readings of a radar speed meter may be accepted in evidence, just as we accept photographs, x-rays, electroencephalographs, speedometer readings, and the like, without the necessity of offering expert testimony as to the scientific principles underlying them." 168 Ohio St. at 303. In *State v. Jenks* (1981), 61 Ohio St. 3d 259, 574 N.E.2d 492, [HN7] the Ohio Supreme Court set forth the standard of review when a claim of insufficiency of the evidence is made. The Ohio Supreme Court held: An appellate court's function when reviewing the sufficiency of the evidence to support a criminal conviction is to examine the evidence admitted at trial to determine whether such evidence, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt. The relevant inquiry is [\*23] whether, after reviewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt. *Jenks, supra*, at paragraph two of the syllabus.

When applying the aforementioned standard of review to the case sub judice, based upon the facts noted supra, we do not find, as a matter of law, appellant's conviction for violating *R.C. 4511.21(D)* was based upon insufficient evidence. [HN8] The prosecution, to sustain a conviction based on evidence obtained from radar, must prove that the radar device "was properly set up and tested by a technician trained by experience to do so, and that at the time it was functioning properly ...". *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 154 N.E.2d 630, syllabus. At the March 23,

1998, hearing on appellant's Motion to Suppress and at appellant's trial, Trooper Duran, who has a certificate from the Department of Health authorizing him to perform breath tests using a BAC Datamaster, also testified as to his training and certification to operate the K55 radar unit. Trooper Duran laid the foundation [\*24] for the admission of the results of the K55 radar by testifying in detail as to how the radar unit was calibrated both prior to and after appellant's arrest and by testifying as to his certification and experience in the use of the same. Trooper Duran testified that he checked to verify that his machine was working properly both before and after his shift on November 28, 1997, and that based on his training and experience, his machine was working properly when he clocked appellant's vehicle. The record clearly indicates that Duran laid a foundation for the trial court considering him as an expert. See *State v. Woods*, 1993 Ohio App. LEXIS 2218 (April 15, 1993), Stark App. No. CA-9115, unreported. The court finds, therefore, that the trial court's finding that appellant was guilty of violating R.C. 4511.21(D) was supported by sufficient evidence. Appellant's sixth assignment of error is denied.

The judgment of the Lancaster Municipal Court is affirmed.

By Edwards, J. Wise, P. J. and Farmer, J. concur

**CONCUR BY:** John Wise; Sheila Farmer

**CONCUR:**

WISE, P. J., CONCURRING

I concur with the result of the majority's opinion but on different legal rationale.

FARMER, J. CONCURRING

I concur with [\*25] the opinion but for different reasons. In Assignment of Error II, appellant claimed the trial court erred in denying her challenge to the datamaster's check solution, batch number 97220. Specifically, appellant had argued said solution was unreliable and had not been subject to scientific verification. In *State v. Sebach*, 1998 Ohio App. LEXIS 5122 (September 25, 1998), Knox App. No. 97CA24, unreported, and *State v. Miracle*, 1998 Ohio App. LEXIS 5118 (September 25, 1998), Knox App. No. 97CA25, unreported, this court reviewed the Ohio Department of Health's protocol in certifying calibration solutions and found it to be in compliance with Ohio Adm.Code 3701:53-04(A). Specifically, this court held at 6 "the Department of Health qualifies a batch of calibration solutions by using its own procedures and affirms that the testing samples fall within the manufacturer's target concentration value. Once the Department of Health makes that quality assurance determination, it is not necessary to know the manufacturer's procedures." Based upon this holding, there is no need to rely on the subsequent testing of the ten bottles after the fact.

**DISPOSITION:** JUDGMENT: Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant challenged a decision and journal entry from the Lancaster Municipal Court (Ohio) overruling her motion to suppress evidence after appellant was convicted of driving while under the influence and speeding.

**OVERVIEW:** Appellant's vehicle was stopped for speeding. Appellant was arrested and charged with speeding and driving under the influence of alcohol. Appellant was found guilty and the appeal followed. Appellant challenged the trial court's finding that appellant was guilty of exceeding the speed limit, contending that such finding was not supported by sufficient evidence. Appellant specifically asserted that there was insufficient evidence to support her conviction since no expert testimony was offered by the State nor did the court take judicial notice of the scientific foundation and reliability of the radar. The court noted that the prosecution, to sustain a conviction based on evidence obtained from radar, must prove that the radar device was properly set up and tested by a technician trained by experience to do so, and that at the time it was functioning properly. Defendant's conviction and sentence was affirmed because the arresting officer testified in detail as to how the radar unit was calibrated prior to and after appellant's arrest and that the machine was working properly.

**OUTCOME:** Appellant's conviction for speeding was affirmed because there was sufficient evidence and testimony to support the reliability of the radar device used to determine that appellant was speeding.

**CORE TERMS:** breath, testing, batch, target, bottle, motor vehicle, machine, assignment of error, alcohol, radar, violating, concentration, scientific, overruling, influence of alcohol, expert testimony, withdrawn, driving, blood, urine, breath sample, alcohol level, blood alcohol, manifest, manufacturer, calibration, blood alcohol level, trier of fact,

regulations, sentenced

#### ***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

#### ***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN1] A fundamental rule is that an appellate court will not consider any error which could have been brought to the trial court's attention, and hence avoided or otherwise corrected.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

[HN2] Pursuant to *Ohio Rev. Code Ann. § 3701.143*, the director of health shall determine, or cause to be determined, the techniques or methods for chemically analyzing a person's blood, urine, breath, or other bodily substance in order to ascertain the amount of alcohol in the person's blood, urine, breath, or other bodily substance. *Ohio Rev. Code Ann. § 3701.143* further provides that the director of health shall approve satisfactory techniques or methods. To accomplish this task, the Department of Health has established a protocol under Ohio Administrative Code Chapter 3701.

#### ***Contracts Law > Negotiable Instruments > General Overview***

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN3] Ohio Admin. Code § 3701:53-04(A) states that an instrument check on approved evidential breath testing instruments shall be performed no less than once every seven days using an instrument check solution containing ethyl alcohol approved by the director of health. Such section further provides that an instrument check solution is valid when the result is at or within five one-thousandths (0.005) grams per two hundred ten liters of the target value for that instrument check solution. While the Department of Health has authority to determine the techniques and methods for testing blood, urine, breath or other bodily substances, the Ohio Department of Health may not abuse its discretion in doing so. An abuse of discretion has been defined as an unreasonable, arbitrary or unconscionable act.

#### ***Criminal Law & Procedure > Witnesses > General Overview***

[HN5] On review for manifest weight, a reviewing court is to examine the entire record, weigh the evidence and all reasonable inferences, consider the credibility of the witnesses and determine whether in resolving conflicts in the evidence, the trier of fact clearly lost its way and created such a manifest miscarriage of justice that the judgment must be reversed. The discretionary power to grant a new hearing should be exercised only in the exceptional case in which the evidence weighs heavily against the judgment. Because the trier of fact is in a better position to observe the witnesses' demeanor and weigh their credibility, the weight of the evidence and the credibility of the witnesses are primarily for the trier of fact.

*Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence  
Evidence > Judicial Notice > General Overview  
Evidence > Testimony > Experts > General Overview*

[HN6] Courts have taken judicial notice of the reliability of radar units. The Ohio Supreme Court specifically stated as follows: the court is in accord with the trend of the most recent decisions that readings of a radar speed meter may be accepted in evidence, just as the court accepts photographs, x-rays, electroencephalographs, speedometer readings, and the like, without the necessity of offering expert testimony as to the scientific principles underlying them.

*Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor  
Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview*

[HN7] The Ohio Supreme Court set forth the standard of review when a claim of insufficiency of the evidence is made. The Ohio Supreme Court held: an appellate court's function when reviewing the sufficiency of the evidence to support a criminal conviction is to examine the evidence admitted at trial to determine whether such evidence, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt. The relevant inquiry is whether, after reviewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt.

**OPINION BY:** Julie Edwards

**OPINION:**

OPINION

Edwards, J.

Defendant-appellant Patricia Walton appeals from the May 18, 1998, Decision and Journal Entry of the Lancaster Municipal Court overruling her Motion to Suppress and the final Entry entered by such court on June 17, 1998.

STATEMENT OF THE FACTS AND CASE

On November 28, 1997, at approximately 1:21 A.M. Trooper Tito Duran, who is with the State Highway Patrol, made a traffic stop of appellant's vehicle for speeding. Duran, who was in uniform, was driving a cruiser at the time. Using a K-55 radar, Trooper Duran had clocked appellant's vehicle as traveling at the rate of 68 miles per hour in a 55 miles per hour zone. After stopping appellant, Trooper Duran noticed a moderate odor of alcohol emanating from [\*2]

appellant and her vehicle. For such reason, after having appellant exit her vehicle, he performed a horizontal gaze nystagmus check on appellant's eyes and asked appellant to perform field sobriety tests to determine if she was driving while impaired. Based upon the results of the horizontal gaze nystagmus and the field sobriety tests, which he believed were consistent with those of someone under the influence of alcohol, and the fact that appellant, once in the police cruiser, smelled of alcohol, Trooper Duran arrested appellant for driving under the influence of alcohol. Following her arrest, appellant was taken to the State Highway Patrol post where she submitted to a chemical breath test that was performed using a BAC Datamaster. Appellant's test yielded a result of .105 grams of alcohol per 210 liters of breath. Thereafter, appellant was charged with operating a motor vehicle while under the influence of alcohol in violation of *R.C. 4511.19(A)(1)*, operating a motor vehicle while having a prohibited alcohol level in violation of *4511.19(A)(3)* and operating a motor vehicle over the posted speed limit, in violation of *R.C. 4511.21(D)*, [\*3] On December 30, 1997, appellant filed a Motion to Suppress the results of her breath test alleging, in the third branch of her motion, that "the instrument check solution used to check the breath machine is inherently untrustworthy and incapable of being verified by the Ohio Department of Health and, therefore, the Director of the Ohio Department of Health has abused his discretion in approving the instrument check solution..." Appellant, in branches 1, 2 and 4 of her Motion to Suppress, also argued: (1) that Trooper Duran's stop of her was illegal, (2) that certain Ohio Department of Health regulations regarding breath testing were not substantially complied with, and (4) that she was not advised of her Miranda rights before oral and written statements were obtained from her by the police. An oral hearing on branches 1, 2 and 4 of appellant's Motion to Suppress was held on March 23, 1998. At the conclusion of the hearing, the trial court took the matter under consideration. On April 27, 1998, an oral hearing on the third branch of appellant's Motion to Suppress was held. For the purposes of the April 27, 1998, hearing only, appellant's case was consolidated with 98-TRC-186, State [\*4] of Ohio v. Marcus Riders. Pursuant to a Decision and Journal Entry filed on May 18, 1998, the trial court overruled appellant's Motion to Suppress with regard to branch 3 of such motion, holding that "since the breath machines used to test [both appellant and Rider] were checked by an instrument check solution which was reliable and supported by sound scientific principles, the Director of the Ohio Department of Health has not abused his discretion in affirming the previously approved instrument check solution." No decision was filed either granting or denying the other three branches of appellant's motion. A bench trial before Judge Don S. McAuliffe was held on June 17, 1998. Prior to the start of the testimony, appellant's counsel moved, pursuant to *R.C. 2941.32*, for an order requiring the prosecution to elect whether to proceed under *4511.19(A)(1)* or *4511.19(A)(3)*. The trial court denied appellant's oral motion. At the conclusion of the trial, the trial court found appellant not guilty of violating *R.C. 4511.19(A)(1)*, operating a motor vehicle while under the influence of alcohol, but guilty of violating both *4511.21(D)*, exceeding [\*5] the speed limits, and *4511.19(A)(3)*, operating a motor vehicle with a prohibited alcohol level. With respect to the speeding offense, appellant was fined \$ 25.00 while, with respect to the driving under the influence offense, appellant was fined \$ 350.00, ordered to pay court costs and sentenced to ten days in jail. The trial court, however, suspended seven days of appellant's sentence and stated that it would credit her with three days attendance at a residential alcohol program. In addition, appellant's driver's license was suspended for 180 days. A sentencing entry was filed on June 17, 1998. It is from the May 18, 1998, and June 17, 1998, Entries that appellant prosecutes her appeal, raising the following assignments of error:

1. THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN FAILING TO RULE ON BRANCHES 1, 2, AND 4 OF DEFENDANT'S MOTION TO SUPPRESS.

2. THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN OVERRULING BRANCH 3 OF DEFENDANT'S MOTION TO SUPPRESS.

3. THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN OVERRULING DEFENDANT'S MOTION TO ORDER THE STATE TO ELECT BETWEEN THE *R.C. SECTION 4511.19(A)(1)* CHARGE AND *R.C. 4511.19(A)(3)* [\*6] CHARGE.

4. THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN OVERRULING DEFENDANT'S MOTION FOR ACQUITTAL ON THE *R.C. SECTION 4511.19(A)(3)* CHARGE.

5. THE TRIAL COURT FINDING THAT DEFENDANT WAS GUILTY OF VIOLATING *R.C. SECTION 4511.19(A)(3)* WAS AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE.

6. THE TRIAL COURT FINDING THAT DEFENDANT WAS GUILTY OF VIOLATING *R.C. 4511.21(D)* WAS NOT SUPPORTED BY SUFFICIENT EVIDENCE.

## I

Appellant, in her first assignment of error, contends that the trial court's failure to rule on branches 1, 2 and 4 of appellant's Motion to Suppress after the March 23, 1998, oral hearing constituted prejudicial error since "a ruling in [appellant's] favor could have resulted in the dismissal of all charges and/or suppression of material evidence." At the conclusion of the March 23, 1998, hearing, the trial court took the matter under consideration. Appellant is correct in her assertion that the trial court failed to journalize its decision on branches 1, 2, and 4 of her Motion to Suppress. However, "[HN1] the fundamental rule is that an appellate court will not consider any error which could have been [\*7] brought to the trial court's attention, and hence avoided or otherwise corrected." *Schade v. Carnegie Body Co. (1982), 70 Ohio St. 2d 207, 210, 436 N.E.2d 1001*. Had the trial court's failure to rule on branches 1, 2, and 4 of the appellant's Motion to Suppress been brought to the trial court's attention, the trial court could have issued a ruling as to such branches. Moreover, when a trial court fails to rule upon a motion, an appellate court generally will presume the trial court overruled the motion. *Akbar-el v. Muhammed (1995), 105 Ohio App. 3d 81, 663 N.E.2d 703*. In view of this presumption, we find the trial court did not err in failing to rule on branches 1, 2 and 4 of appellant's Motion to Suppress. Furthermore, presuming the trial court overruled branches 1, 2, and 4 of appellant's Motion to Suppress, we find that the trial court's ruling was proper. Appellant, in the first branch of her motion, alleged that Trooper Duran's stop of her was illegal. The trial court correctly overruled branch 1 of appellant's motion since, based on the K-55 reading, Trooper Duran had probable cause to arrest appellant for speeding. The second branch of appellant's motion challenged the compliance [\*8] with Ohio Department of Health regulations regarding breath testing machines. The State, at the March 23, 1998, suppression hearing, demonstrated that there was substantial compliance with Ohio Department of Health regulations regarding testing of BAC machines. Trooper Duran testified at the hearing that, in compliance with such regulations, the patrol post customarily checks the calibration of a breath machine every seven days and that the subject breath machine was checked on November 16, 1997 and then again on November 23, 1997, five days before appellant's arrest. See Transcript of March 23, 1998, hearing at 52 - 53. Duran further testified that the subject breath machine was again checked seven days later on November 30, 1997, which is after appellant's arrest. The State, in support of Trooper Duran's testimony, submitted records documenting the calibration of the machine. Defense counsel objected to the records only on grounds of hearsay since neither were the individuals who had prepared such records present at the hearing nor were the records authenticated by the records custodian or certified. See Transcript of March 23, 1998, hearing at 60. The trial court, however, admitted [\*9] the records over appellant's objection, finding that they were kept in the regular course of business. Thus, the trial court properly overruled branch two of appellant's Motion to Suppress. Appellant, in branch 4 of her Motion to Suppress, argued that she was not advised of her Miranda rights before oral and written statements were obtained from her by the police. However, since no oral or written statements were obtained from appellant nor admitted at trial, the trial court did not err in overruling branch 4 of appellant's motion. Appellant's first assignment of error is denied.

## II

In her second assignment of error, appellant argues that the trial court committed prejudicial error in overruling branch 3 of her Motion to Suppress. Appellant was charged with violating *R.C. 4511.19(A)(1)* and (A)(3) after submitting to a BAC Datamaster and testing .105. Appellant specifically challenges the trial court's finding that the instrument check solution, batch number 97220, used to check the calibration of the breath testing machine in appellant's case, is reliable and has been subjected to scientific verification by the Ohio Department of Health. [HN2] Pursuant to *R.C. 3701.143*, [\*10] the director of health shall determine, or cause to be determined, the techniques or methods for "chemically analyzing a person's blood, urine, breath, or other bodily substance in order to ascertain the amount of alcohol...in the person's blood, urine, breath, or other bodily substance." *R.C. 3701.143* further provides that

the director of health "shall approve satisfactory techniques or methods." To accomplish this task, the Department of Health has established a protocol under Ohio Administrative Code Chapter 3701. [HN3] Ohio Adm. Code 3701:53-04(A) states that an instrument check on approved evidential breath testing instruments shall be performed no less than once every seven days using an instrument check solution containing ethyl alcohol approved by the director of health. Such section further provides that an instrument check solution is valid when the result is at or within five one-thousandths (0.005) grams per two hundred ten liters of the target value for that instrument check solution. While the Department of Health has authority to determine the techniques and methods for testing blood, urine, breath or other bodily substances, the Ohio Department [\*11] of Health may not abuse its discretion in doing so. See *State v. Sebach*, 1998 Ohio App. LEXIS 5122 (1998), Knox App. No. 97 CA 24, unreported. An abuse of discretion has been defined as an unreasonable, arbitrary or unconscionable act. *Blakemore v Blakemore* (1983), 5 Ohio St. 3d 217, 450 N.E.2d 1140. At the April 27, 1998, hearing, Dr. Craig Sutheimer, a Deputy Director at the Ohio Department of Health and Chief of the Alcohol Testing Program, testified that instrument check solution batch number 97220 is manufactured by Steifel Research and sold under a Guth Laboratories label. When the Ohio Department of Health purchases a solution such as batch number 97220 for use in a breathalyzer machine, it receives an affidavit from the manufacturer indicating the amount of alcohol in the solution (the "target value"). Thereafter, the Ohio Department of Health independently tests four sample bottles out of the batch four times each, for a total of sixteen tests, to confirm the accuracy of the target value that the manufacturer assigns to the solution. The testing performed by the Department of Health is not itself used to establish a target value. If the target value is found to be accurate, the Ohio Department [\*12] of Health certifies the solution. Batch number 97220, which contained 1,800 bottles, was certified at Dr. Sutheimer's recommendation by the Ohio Department of Health on September 30, 1997, despite the fact that Dr. Sutheimer's repeated inquiries to Steifel Research for documentation as to the quality control used in establishing the target value and as to the number of tests run went unanswered. At such point in time, Dr. Sutheimer also had been unable to get into visit Steifel Research. After visiting Steifel Research on November 21, 1997, Dr. Sutheimer discovered that Steifel Research had only analyzed three bottles out of batch number 97220 and had sent two additional bottles out to Adirondack Lab for testing prior to providing the Ohio Department of Health with an affidavit assigning the target value. At the April 27, 1998, hearing, Dr. Sutheimer testified to a reasonable degree of scientific certainty that at the time the solution certificate was issued by the Ohio Department of Health on September 30, 1997, "neither the manufacturer nor the Department of Health had analyzed enough bottles to set a true target for batch number 97220." Transcript of Proceedings at 55. For batch [\*13] number 97220, a minimum of six to eight bottles should have been tested by one entity, namely Steifel, to set a true target value. See Transcript of April 27, 1998, hearing at 82-84. For such reason, during the first week of December of 1997, Steifel tested ten additional unopened bottles of batch 97220 which had been sent to it by the Ohio Department of Health for analysis. Dr. Sutheimer, however, admitted that the ten bottles did not represent a perfect random selection since he gave Steifel every bottle that he had on hand. A perfect random selection would have been done prior to the entire batch of 1,800 bottles being released. However, Dr. Sutheimer did state that the ten bottles sent were "random in nature." They were the last ten bottles left in the batch and were bottle numbers 217, 233, 344, 498, 740, 749, 1,034, 1,073, 1,801, and 1,815. (Transcript at Pages 73 and 74). Dr. Sutheimer, who personally went to Steifel Labs to review the raw data of the further testing that was performed in December of 1997, testified that "it is the testing done in December that makes me feel comfortable as to what the true target value is". Transcript at 70. He was, however, not present for [\*14] such testing. Based on the testing performed in December of 1997, we find that the instrument check solution batch number 97220 is reliable. The Ohio Department of Health did abuse its discretion in approving batch number 97220 on September 30, 1997, when it certified the solution and blindly accepted Steifel's target value for the batch. However, the subsequent testing done on batch number 97220 in December, 1997, was based on sound scientific procedure and the target value set through that December, 1997, testing was the same target value originally set through the earlier insufficient testing, and was the same target value certified by the Director of the Ohio Department of Health on September 30, 1997. We agree with our colleagues from the Third District Court of Appeals when they found that the solution of ethyl alcohol from batch number 97220 was reliable since it was confirmed through subsequent scientific testing that that batch contained the amount of ethyl alcohol previously certified by the *Director of Health*. *State v. Miller*, 1998 Ohio App. LEXIS 6198 unreported, Court of Appeals of Ohio, Third District, Marion County, Dec. 15, 1998, No. 9-98-42. Appellant's second assignment of error is overruled. [\*15]

## III

In her third assignment of error, appellant asserts that the trial court committed prejudicial error in overruling her motion to order the State to elect between the *R.C. 4511.19(A)(1)* charge, driving under the influence of alcohol, and the *R.C. 4511.19(A)(3)* charge, driving with a prohibited alcohol level. While the trial court overruled appellant's motion, it held that appellant could only be convicted and sentenced for one offense. Appellant specifically points to *R.C. 2941.32* which provides as follows: "if two or more indictments or informations are pending against the same defendant for the same criminal act, the prosecuting attorney must elect upon which he will proceed, and upon trial being had upon one of them, the remaining indictments or information shall be quashed." However, *R.C. 4511.19(A)(1)* and (3) have been held to create separate offenses. *State v. Mendieta (1984)*, 20 Ohio App. 3d 18, 484 N.E.2d 180. See also *State v. Wilcox (1983)*, 10 Ohio App. 3d 11, 460 N.E.2d 323. A defendant, therefore, may be charged with both and found guilty [\*16] of both, but may only be sentenced as to one. *Id.* Since appellant was not sentenced on both charges, the trial court did not err in overruling appellant's motion and allowing the State to pursue both charges. Appellant's third assignment of error is denied.

## IV, V

In her fourth assignment of error, appellant argues that the trial court committed prejudicial error in overruling her motion for acquittal on the *R.C. 4511.19(A)(3)* charge, operating a motor vehicle with a prohibited alcohol level. Appellant had moved for acquittal at the conclusion of the State's case pursuant to *Criminal Rule 29* since the State did not correlate the results of appellant's blood alcohol test, which was taken within two hours of the alleged offense as mandated by *R.C. 4511.19(D)(1)*, to her blood alcohol level at the time of appellant's operation of the motor vehicle. Appellant's blood alcohol test, which was taken approximately 53 minutes after the operation of a motor vehicle, indicated a blood alcohol level of .105 grams of alcohol per 210 liters of breath. [HN4] *R.C. 4511.19(D)(1)* states as follows: "In any criminal prosecution or [\*17] juvenile court proceeding for a violation of this section, of a municipal ordinance relating to operating a vehicle while under the influence of alcohol, a drug of abuse, or alcohol and a drug of abuse, or of a municipal ordinance relating to operating a vehicle with a prohibited concentration of alcohol in the blood, breath, or urine, the court may admit evidence on the concentration of alcohol, drugs of abuse, or alcohol and drugs of abuse in the defendant's blood, breath, urine, or other bodily substance at the time of the alleged violation as shown by chemical analysis of the defendant's blood, urine, breath, or other bodily substance withdrawn within two hours of the time of the alleged violation." (Emphasis added)

As the Sixth District Court of Appeals stated in *State v. Ulrich (1984)*, 17 Ohio App. 3d 182, 191, 478 N.E.2d 812:

"Clearly, it is the intent of the Ohio Legislature in prosecutions under *R.C. 4511.19(A)(3)* to have admitted, as evidence of the alleged offender's concentration of alcohol in the alleged offender's breath at the time of the alleged offense, a chemical analysis of the alleged offender's breath provided that the breath [\*18] sample was withdrawn according to established guidelines. It is a legislative determination that a breath sample withdrawn within two hours of the alleged offense will accurately reflect the alleged offender's alcohol content, by weight, in the withdrawn breath sample at the time of the alleged offense. Thus, the amount of alcohol concentration in the alleged offender's breath at the time of the alleged offense is shown by a chemical analysis of a sample of the alleged offender's breath which is withdrawn within two hours of the time of the alleged violation."

Since appellant's breath sample was taken within two hours of the alleged violation, the trial court correctly determined that it accurately reflected appellant's blood alcohol content at the time of the offense. The trial court, therefore, did not err in overruling appellant's Motion for Acquittal on the *R.C. 4511.19(A)(3)* charge. Similarly, in her fifth assignment of error, appellant contends that the trial court's finding that appellant was guilty of violating *R.C. 4511.19(A)(3)*, operation of a motor vehicle with a prohibited level of alcohol, was against the manifest weight [\*19] of the evidence. [HN5] On review for manifest weight, a reviewing court is to examine the entire record, weigh the evidence and all reasonable inferences, consider the credibility of the witnesses and determine "whether in resolving conflicts in the evidence, the trier of fact clearly lost its way and created such a manifest miscarriage of justice that the

judgment must be reversed. The discretionary power to grant a new hearing should be exercised only in the exceptional case in which the evidence weighs heavily against the judgment. *State v. Thompkins* (1997), 78 Ohio St. 3d 380, 387, 678 N.E.2d 541, citing *State v. Martin* (1983), 20 Ohio App. 3d 172, 175, 485 N.E.2d 717. Because the trier of fact is in a better position to observe the witnesses' demeanor and weigh their credibility, the weight of the evidence and the credibility of the witnesses are primarily for the trier of fact. *State v. DeHass* (1967), 10 Ohio St. 2d 230, 227 N.E.2d 212, syllabus 1. Appellant specifically asserts that the trial court's finding that appellant was guilty of violating 4511.19(A)(3) was against the manifest weight of the evidence since the State did not correlate appellant's [\*20] "chemical test reflecting blood alcohol level to the time of the alleged operation of the motor vehicle in rebuttal to expert testimony...that, at the time of [the] alleged operation of a motor vehicle, a defendant's blood alcohol level was under the legal limit." At appellant's trial, Dr. Alfred Staubus, appellant's expert witness, testified that at the time appellant last operated the motor vehicle, it is possible to a reasonable degree of medical certainty that her blood alcohol concentration was less than .100. Dr. Staubus further testified that, assuming the State's chemical test was accurate, appellant's alcohol level could have been as low as .087 or as high as .123, and that any stomach acid in her mouth due to regurgitation could have affected the outcome of her blood alcohol concentration test. However, "expert testimony is not necessary to correlate intoxilyzer test results to the time of the alleged offense." *Ulrich, supra at 191*. Rather, a defendant "may challenge the accuracy of his specific test result through the use of expert testimony, to show that he could not have produced the test result claimed by the prosecution under those circumstances." *City of Columbus v. Day* (1985), 24 Ohio App. 3d 173, 493 N.E.2d 1002, [\*21] syllabus. The testimony of Dr. Staubus was presented by appellant for such purpose. The State, however, was not required to rebut Dr. Staubus' testimony by presenting expert testimony correlating appellant's test results to the time of the alleged offense since, as is stated above, a breath sample withdrawn within two hours of the alleged offense has been legislatively determined to accurately reflect the alleged offender's alcohol content at the time of the alleged offense. Upon consideration of the record, this court cannot say that the trial judge, as trier of fact, clearly lost his way and created a manifest miscarriage of justice. Appellant's fourth and fifth assignments of error are overruled.

## VI

In her final assignment of error, appellant challenges the trial court's finding that appellant was guilty of violating *R.C. 4511.21(D)*, exceeding the speed limit, contending that such finding was not supported by sufficient evidence. Appellant specifically asserts that there was insufficient evidence to support her conviction since no expert testimony was offered by the State nor did the court take judicial notice of the scientific foundation and reliability [\*22] of the K55 radar. [HN6] Courts have taken judicial notice of the reliability of radar units. See *City of East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 154 N.E.2d 630 and *City of Xenia v. Boehman* (1996), 114 Ohio App. 3d 78, 682 N.E.2d 1029. The Ohio Supreme Court, in *Ferrell*, specifically stated as follows: "We are in accord with the trend of the most recent decisions that readings of a radar speed meter may be accepted in evidence, just as we accept photographs, x-rays, electroencephalographs, speedometer readings, and the like, without the necessity of offering expert testimony as to the scientific principles underlying them." 168 Ohio St. at 303. In *State v. Jenks* (1981), 61 Ohio St. 3d 259, 574 N.E.2d 492, [HN7] the Ohio Supreme Court set forth the standard of review when a claim of insufficiency of the evidence is made. The Ohio Supreme Court held: An appellate court's function when reviewing the sufficiency of the evidence to support a criminal conviction is to examine the evidence admitted at trial to determine whether such evidence, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt. The relevant inquiry is [\*23] whether, after reviewing the evidence in a light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt. *Jenks, supra*, at paragraph two of the syllabus.

When applying the aforementioned standard of review to the case sub judice, based upon the facts noted supra, we do not find, as a matter of law, appellant's conviction for violating *R.C. 4511.21(D)* was based upon insufficient evidence. [HN8] The prosecution, to sustain a conviction based on evidence obtained from radar, must prove that the radar device "was properly set up and tested by a technician trained by experience to do so, and that at the time it was functioning properly ...". *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 154 N.E.2d 630, syllabus. At the March 23,

1998, hearing on appellant's Motion to Suppress and at appellant's trial, Trooper Duran, who has a certificate from the Department of Health authorizing him to perform breath tests using a BAC Datamaster, also testified as to his training and certification to operate the K55 radar unit. Trooper Duran laid the foundation [\*24] for the admission of the results of the K55 radar by testifying in detail as to how the radar unit was calibrated both prior to and after appellant's arrest and by testifying as to his certification and experience in the use of the same. Trooper Duran testified that he checked to verify that his machine was working properly both before and after his shift on November 28, 1997, and that based on his training and experience, his machine was working properly when he clocked appellant's vehicle. The record clearly indicates that Duran laid a foundation for the trial court considering him as an expert. See *State v. Woods*, 1993 Ohio App. LEXIS 2218 (April 15, 1993), Stark App. No. CA-9115, unreported. The court finds, therefore, that the trial court's finding that appellant was guilty of violating R.C. 4511.21(D) was supported by sufficient evidence. Appellant's sixth assignment of error is denied.

The judgment of the Lancaster Municipal Court is affirmed.

By Edwards, J. Wise, P. J. and Farmer, J. concur

**CONCUR BY:** John Wise; Sheila Farmer

**CONCUR:**

WISE, P. J., CONCURRING

I concur with the result of the majority's opinion but on different legal rationale.

FARMER, J. CONCURRING

I concur with [\*25] the opinion but for different reasons. In Assignment of Error II, appellant claimed the trial court erred in denying her challenge to the datamaster's check solution, batch number 97220. Specifically, appellant had argued said solution was unreliable and had not been subject to scientific verification. In *State v. Sebach*, 1998 Ohio App. LEXIS 5122 (September 25, 1998), Knox App. No. 97CA24, unreported, and *State v. Miracle*, 1998 Ohio App. LEXIS 5118 (September 25, 1998), Knox App. No. 97CA25, unreported, this court reviewed the Ohio Department of Health's protocol in certifying calibration solutions and found it to be in compliance with Ohio Adm.Code 3701:53-04(A). Specifically, this court held at 6 "the Department of Health qualifies a batch of calibration solutions by using its own procedures and affirms that the testing samples fall within the manufacturer's target concentration value. Once the Department of Health makes that quality assurance determination, it is not necessary to know the manufacturer's procedures." Based upon this holding, there is no need to rely on the subsequent testing of the ten bottles after the fact.

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDING: Criminal Appeal from Lyndhurst Municipal Court. Case. No. 97TRD11715.

**DISPOSITION:**

JUDGMENT: AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant driver challenged a judgment of the Lyndhurst (Ohio) Municipal Court convicting him of speeding, contending that the court erred by taking judicial notice of the accuracy and reliability of the radar device used by the arresting officer by accepting the officer's testimony about the speed of appellant's vehicle and by accepting his testimony that the device was in good condition for accurate work.

**OVERVIEW:** Appellant driver challenged a municipal court conviction for speeding, claiming that there were insufficient grounds for taking judicial notice of the accuracy of the particular radar unit used by the arresting officer. The arresting officer testified that he clocked appellant exceeding the speed limit. The officer also testified that he had been trained on a K-55 radar, but was using a Genesis radar unit on the day in question. Appellant's objections were overruled by the court and the testimony was introduced into evidence on grounds that there were sufficient grounds for taking judicial notice of the accuracy of the radar unit. Since it was unclear on the record whether the officer's training applied to the Genesis device, the appellate court affirmed the conviction because while appellant challenged the adequacy of the officer's training, he failed on appeal to include relevant portions of the cross-examination and the court therefore presumed the validity of the trial court's ruling.

**OUTCOME:** The court affirmed the judgment because even if the lower court erred in taking judicial notice of the construction and operation of the radar device, appellant failed to provide a record on appeal that demonstrated that the accuracy of the particular unit or the qualifications of its operator were in question.

**CORE TERMS:** radar, speed, arresting officer, speed limit, accuracy, morning, assignment of error, posted, judicial notice, interstate highway, miles, speeding, training, announcement, stationary, taking judicial notice, assignments of error, calibration, trained, overrule, presume, expert testimony, good condition, police officer, reliability, municipal, mile-per-hour, traveling, accepting, resort

## JOURNAL ENTRY and OPINION

KENNETH A. ROCCO, J.:

This case is before the court on appeal from a decision of the Lyndhurst Municipal Court finding appellant, Thomas J. Kincaid, guilty of speeding and imposing a fine of \$ 32 plus court costs of \$ 45.00. Appellant asserts the following five assignments of error:

I. THE TRIAL COURT ERRED TO THE PREJUDICE OF THE DEFENDANT IN TAKING JUDICIAL NOTICE OF THE ACCURACY AND RELIABILITY OF A [*sic*] "GENESIS" RADAR WHEN NO EXPERT TESTIMONY WAS OFFERED BY THE PROSECUTION CONCERNING THE CONSTRUCTION OF THE "GENESIS" RADAR DEVICE OR ITS METHOD OF OPERATION AND WHERE JUDICIAL NOTICE HAD NEVER PREVIOUSLY BEEN TAKEN OF THE "GENESIS" RADAR DEVICE.

II. THE TRIAL COURT ERRED TO THE PREJUDICE OF THE DEFENDANT IN [\*2] ADMITTING TESTIMONY FROM A POLICE OFFICER REGARDING THE SPEED OF DEFENDANT'S VEHICLE BASED ON THE RADAR OBSERVATIONS MADE BY THE OFFICER WHEN THERE WAS NO TESTIMONY AS TO THE OFFICER'S QUALIFICATION TO OPERATE SUCH DEVICE.

III. THE TRIAL COURT ERRED TO THE PREJUDICE OF THE DEFENDANT IN FINDING THAT THE "GENESIS" RADAR DEVICE USED BY THE ARRESTING OFFICER WAS IN GOOD CONDITION FOR ACCURATE WORK WHEN THE EVIDENCE FAILED TO ESTABLISH THAT THE ARRESTING OFFICER WAS QUALIFIED TO OPERATE SUCH DEVICE.

IV. THE JUDGMENT OF THE TRIAL COURT WAS AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE IN THAT THERE WAS NO TESTIMONY AS TO WHETHER THE SPEED INDICATED ON THE RADAR DEVICE RELATED TO THE DEFENDANT'S VEHICLE.

V. THE TRIAL COURT ERRED TO THE PREJUDICE OF THE DEFENDANT IN DETERMINING THAT THE SPEED LIMIT IN THE AREA IN WHICH THE ALLEGED SPEEDING VIOLATION TOOK PLACE WAS 60 MILES PER HOUR WHEN THAT SPEED LIMIT IS NOT AN AUTHORIZED SPEED LIMIT UNDER SECTION 330.03 OF THE CODIFIED ORDINANCES OF MAYFIELD HEIGHTS.

For the following reasons, the court finds that none of these contentions has merit and affirms the decision of the municipal court.

## STATEMENT OF FACTS AND PROCEEDINGS [\*3] BELOW

On August 25, 1997, appellant was cited for speeding in the southbound express lane of Interstate 271. The ticket indicates appellant was traveling at 79 miles per hour in a 60-mile-per-hour zone, as determined by a "Genesis" radar device, in violation of Section 333.03 of the Codified Ordinances of Mayfield Heights, Ohio.

Appellant pled not guilty, and the case proceeded to trial on February 11, 1998. No request having been made by either party, the proceedings were not recorded. See *Crim.R.* 22. However, the trial court did settle and approve a statement of proceedings pursuant to *App.R.* 9(C), which we quote here in its entirety:

This case was heard by the Lyndhurst Municipal Court on the 11th day of February 1998. The only witness to testify for the prosecution was the arresting officer.

The arresting officer testified that he had been employed as a City of Mayfield Heights patrolman since the summer of 1994. He had received training on K-55 radar at the Cleveland Police Academy. He was using a Genesis radar unit on the day in question. That morning, he tested the patrolcar-mounted radar unit several times during the morning of August 25, 1997, and performed [\*4] calibration tests on it as trained. The tests included using tuning forks and performing an internal calibration check. Based on those tests, he testified that he concluded that the devise [*sic*] was in good condition for accurate work on August 25, 1997.

The arresting officer testified that he was stationed on Interstate Highway 271 in Mayfield Heights, Cuyahoga County, Ohio on the morning of August 25, 1997 running a radar unit. The posted speed limit in the area in question was 60 m.p.h. which is the speed limit established by the Cuyahoga County Commissioners on certain sections of the interstate highway system in Cuyahoga County pursuant to *Ohio Rev. Code Sec. 4511.21*.

The arresting officer testified that he observed defendant's vehicle shortly after 7:00 a.m. that morning and determined that defendant's vehicle appeared to be traveling faster than the rest of the traffic in the immediate vicinity. He aimed the radar unit at the defendant's vehicle. The radar unit emitted a high-pitched sound which was consistent with his visual observation of a speeding vehicle.

He locked the speed in at 79 m.p.h. on the unit which was consistent with the sound, and proceeded [\*5] to pursue the defendant and issued him a speeding citation.

The defendant objected to the introduction of the testimony regarding the radar speed reading on the basis that there were not sufficient grounds for taking judicial notice of the accuracy of the radar device being used by the arresting officer. Defendant's objections were overruled by the court and the testimony was introduced into evidence on the grounds that there were sufficient grounds for taking judicial notice of the accuracy of the radar unit. No other evidence was produced regarding the speed of the vehicle driven by the defendant.

The witness for the prosecution also testified that in the area of the Interstate Highway 271 where he had stopped the defendant on the morning of August 25, 1997 there was a posted sign which indicated that the speed limit was 60 m.p.h. There was no other testimony as to the speed limit at the location at which the defendant was observed on the morning of August 25, 1997.

Following the testimony of the arresting officer, the prosecution rested and defendant moved for an acquittal on the basis that (i) the evidence regarding the radar speed reading should be excluded and, [\*6] without the evidence, there was insufficient evidence to convict the defendant, and (ii) the speed limit on Interstate Highway 271 was not established as 60 m.p.h. Defendant's motion was denied.

Following further oral argument on [these same issues], the defendant was found guilty and fined \$ 32.00 plus court costs.

The court entered judgment against appellant on March 13, 1998, the day after appellant filed his notice of appeal. Hence, this appeal was timely filed under *App.R. 4(C)*.

#### LAW AND ANALYSIS

Appellant first complains that the trial court erred by taking judicial notice of the accuracy and reliability of the "Genesis" radar device. [HN1] Under *Evid.R. 201(B)*,

[a] judicially noticed fact must be one not subject to reasonable dispute in that it is either (1) generally known within the territorial jurisdiction of the trial court or (2) capable of accurate and ready determination by resort to sources whose accuracy cannot reasonable [*sic*] be questioned.

The record in this case shows that the "Genesis" radar device was mounted to the arresting officer's patrol car but does not show whether it was a stationary device or a moving device. [HN2] The Ohio [\*7] Supreme Court has held that courts may accept the readings of all stationary radar speed meters, and may take judicial notice of the scientific principles underlying them, without resort to expert testimony to establish their construction, operation, reliability and accuracy. *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 303, 154 N.E.2d 630. Judicial notice can be extended to a particular model of moving radar device if the court has received expert testimony as to the construction, operation and accuracy of that model. However, judicial notice cannot automatically be extended to other models of moving radar devices. *Moreland Hills v. Gazdak* (1988), 49 Ohio App. 3d 22, 23, 550 N.E.2d 203; also see *State v. Kirkland* (Mar. 2, 1998), 1998 Ohio App. LEXIS 1100, Logan App. No. 8-97-22, unreported.

Absent evidence about whether the "Genesis" radar was a moving device or a stationary device, this court cannot say whether the trial court properly could have taken judicial notice of the construction and operation of the device. Appellant has failed to provide us with a record that demonstrates the claimed error; therefore, we must presume the validity of the trial court's ruling. *Rose Chevrolet, Inc.* [\*8] v. *Adams* (1988), 36 Ohio St. 3d 17, 19, 520 N.E.2d 564; *Knapp v. Edwards Laboratories* (1980), 61 Ohio St. 2d 197, 199, 400 N.E.2d 384; *Baker v. Cuyahoga County Court of Common Pleas* (1989), 61 Ohio App. 3d 59, 62, 572 N.E.2d 155. Accordingly, we overrule the first assignment of error.

The second and third assignments of error contend there was no evidence that the police officer was qualified to operate the radar device. Therefore, appellant argues, the court erred by accepting the officer's testimony about the speed of appellant's vehicle and by accepting his testimony that the device was in good condition for accurate work.

[HN3] Even if a court takes judicial notice of the construction and operation of a radar device, it may not accept a radar reading unless there is evidence demonstrating the accuracy of the particular unit in question and the qualifications of the operator. *East Cleveland v. Ferrell*, *supra*, at 303. The evidence in the record here indicates this officer was trained, on a K-55 radar device. It is not clear on the record whether this training would apply to the Genesis device; however, the officer's performance of calibration tests on the Genesis device "as [\*9] trained" implies that the same training is applicable. Appellant had the opportunity to cross-examine the officer if he wished to challenge the adequacy of his training. He failed to include the relevant portions of any such cross-examination in the record; therefore, we must again presume the validity of the trial court's ruling and overrule the second and third assignments of error.

The fourth assignment of error contends the trial court erred by admitting the officer's testimony regarding the speed of appellant's vehicle when there was no testimony that the speed indicated on the radar device was the speed of appellant's vehicle. The trial court's statement of the evidence indicates that the police officer testified he aimed the radar unit at appellant's vehicle and locked the speed in at 79 m.p.h. The fourth assignment of error is therefore overruled.

Appellant's fifth assignment of error asserts that the court erred by determining that the speed limit was 60 miles per hour when a 60-mile-per-hour speed limit is not authorized under the Codified Ordinances of Mayfield Heights. The court determined that the posted speed limit of 60 miles per hour was established by the Cuyahoga [\*10] County Commissioners pursuant to *R.C. 4511.21*. [HN4] Section 333.03(k) of the Codified Ordinances of Mayfield Heights provides:

Whenever, in accordance with this section or Ohio *R.C. 4511.21*, the maximum prima-facie speed limitations as established herein have been altered, either higher or lower, and the appropriate signs giving notice have been erected as required, operators of motor vehicles shall be governed by the speed limitations set forth on such signs. It is prima facie unlawful for any person to exceed the speed limits posted upon such signs.

Thus, the municipal ordinances plainly prohibited operation of a motor vehicle at a speed exceeding the posted limits. Appellant's fifth assignment of error is overruled.

Judgment affirmed.

It is ordered that appellee recover of appellant its costs herein taxed.

The court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Lyndhurst Municipal Court to carry this judgment into execution. The defendant's conviction having been affirmed, any bail pending appeal is terminated. Case remanded to the trial court for execution of sentence.

A certified [\*11] copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

## JOURNAL ENTRY and OPINION

KENNETH A. ROCCO, J.:

This case is before the court on appeal from a decision of the Lyndhurst Municipal Court finding appellant, Thomas J. Kincaid, guilty of speeding and imposing a fine of \$ 32 plus court costs of \$ 45.00. Appellant asserts the following five assignments of error:

I. THE TRIAL COURT ERRED TO THE PREJUDICE OF THE DEFENDANT IN TAKING JUDICIAL NOTICE OF THE ACCURACY AND RELIABILITY OF A [*sic*] "GENESIS" RADAR WHEN NO EXPERT TESTIMONY WAS OFFERED BY THE PROSECUTION CONCERNING THE CONSTRUCTION OF THE "GENESIS" RADAR DEVICE OR ITS METHOD OF OPERATION AND WHERE JUDICIAL NOTICE HAD NEVER PREVIOUSLY BEEN TAKEN OF THE "GENESIS" RADAR DEVICE.

II. THE TRIAL COURT ERRED TO THE PREJUDICE OF THE DEFENDANT IN [\*2] ADMITTING TESTIMONY FROM A POLICE OFFICER REGARDING THE SPEED OF DEFENDANT'S VEHICLE BASED ON THE RADAR OBSERVATIONS MADE BY THE OFFICER WHEN THERE WAS NO TESTIMONY AS TO THE OFFICER'S QUALIFICATION TO OPERATE SUCH DEVICE.

III. THE TRIAL COURT ERRED TO THE PREJUDICE OF THE DEFENDANT IN FINDING THAT THE "GENESIS" RADAR DEVICE USED BY THE ARRESTING OFFICER WAS IN GOOD CONDITION FOR ACCURATE WORK WHEN THE EVIDENCE FAILED TO ESTABLISH THAT THE ARRESTING OFFICER WAS QUALIFIED TO OPERATE SUCH DEVICE.

IV. THE JUDGMENT OF THE TRIAL COURT WAS AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE IN THAT THERE WAS NO TESTIMONY AS TO WHETHER THE SPEED INDICATED ON THE RADAR DEVICE RELATED TO THE DEFENDANT'S VEHICLE.

V. THE TRIAL COURT ERRED TO THE PREJUDICE OF THE DEFENDANT IN DETERMINING THAT THE SPEED LIMIT IN THE AREA IN WHICH THE ALLEGED SPEEDING VIOLATION TOOK PLACE WAS 60 MILES PER HOUR WHEN THAT SPEED LIMIT IS NOT AN AUTHORIZED SPEED LIMIT UNDER SECTION 330.03 OF THE CODIFIED ORDINANCES OF MAYFIELD HEIGHTS.

For the following reasons, the court finds that none of these contentions has merit and affirms the decision of the municipal court.

## STATEMENT OF FACTS AND PROCEEDINGS [\*3] BELOW

On August 25, 1997, appellant was cited for speeding in the southbound express lane of Interstate 271. The ticket indicates appellant was traveling at 79 miles per hour in a 60-mile-per-hour zone, as determined by a "Genesis" radar device, in violation of Section 333.03 of the Codified Ordinances of Mayfield Heights, Ohio.

Appellant pled not guilty, and the case proceeded to trial on February 11, 1998. No request having been made by either party, the proceedings were not recorded. See *Crim.R.* 22. However, the trial court did settle and approve a statement of proceedings pursuant to *App.R.* 9(C), which we quote here in its entirety:

This case was heard by the Lyndhurst Municipal Court on the 11th day of February 1998. The only witness to testify for the prosecution was the arresting officer.

The arresting officer testified that he had been employed as a City of Mayfield Heights patrolman since the summer of 1994. He had received training on K-55 radar at the Cleveland Police Academy. He was using a Genesis radar unit on the day in question. That morning, he tested the patrolcar-mounted radar unit several times during the morning of August 25, 1997, and performed [\*4] calibration tests on it as trained. The tests included using tuning forks and performing an internal calibration check. Based on those tests, he testified that he concluded that the devise [*sic*] was in good condition for accurate work on August 25, 1997.

The arresting officer testified that he was stationed on Interstate Highway 271 in Mayfield Heights, Cuyahoga County, Ohio on the morning of August 25, 1997 running a radar unit. The posted speed limit in the area in question was 60 m.p.h. which is the speed limit established by the Cuyahoga County Commissioners on certain sections of the interstate highway system in Cuyahoga County pursuant to *Ohio Rev. Code Sec. 4511.21*.

The arresting officer testified that he observed defendant's vehicle shortly after 7:00 a.m. that morning and determined that defendant's vehicle appeared to be traveling faster than the rest of the traffic in the immediate vicinity. He aimed the radar unit at the defendant's vehicle. The radar unit emitted a high-pitched sound which was consistent with his visual observation of a speeding vehicle.

He locked the speed in at 79 m.p.h. on the unit which was consistent with the sound, and proceeded [\*5] to pursue the defendant and issued him a speeding citation.

The defendant objected to the introduction of the testimony regarding the radar speed reading on the basis that there were not sufficient grounds for taking judicial notice of the accuracy of the radar device being used by the arresting officer. Defendant's objections were overruled by the court and the testimony was introduced into evidence on the grounds that there were sufficient grounds for taking judicial notice of the accuracy of the radar unit. No other evidence was produced regarding the speed of the vehicle driven by the defendant.

The witness for the prosecution also testified that in the area of the Interstate Highway 271 where he had stopped the defendant on the morning of August 25, 1997 there was a posted sign which indicated that the speed limit was 60 m.p.h. There was no other testimony as to the speed limit at the location at which the defendant was observed on the morning of August 25, 1997.

Following the testimony of the arresting officer, the prosecution rested and defendant moved for an acquittal on the basis that (i) the evidence regarding the radar speed reading should be excluded and, [\*6] without the evidence, there was insufficient evidence to convict the defendant, and (ii) the speed limit on Interstate Highway 271 was not established as 60 m.p.h. Defendant's motion was denied.

Following further oral argument on [these same issues], the defendant was found guilty and fined \$ 32.00 plus court costs.

The court entered judgment against appellant on March 13, 1998, the day after appellant filed his notice of appeal. Hence, this appeal was timely filed under *App.R. 4(C)*.

#### LAW AND ANALYSIS

Appellant first complains that the trial court erred by taking judicial notice of the accuracy and reliability of the "Genesis" radar device. [HN1] Under *Evid.R. 201(B)*,

[a] judicially noticed fact must be one not subject to reasonable dispute in that it is either (1) generally known within the territorial jurisdiction of the trial court or (2) capable of accurate and ready determination by resort to sources whose accuracy cannot reasonable [*sic*] be questioned.

The record in this case shows that the "Genesis" radar device was mounted to the arresting officer's patrol car but does not show whether it was a stationary device or a moving device. [HN2] The Ohio [\*7] Supreme Court has held that courts may accept the readings of all stationary radar speed meters, and may take judicial notice of the scientific principles underlying them, without resort to expert testimony to establish their construction, operation, reliability and accuracy. *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 303, 154 N.E.2d 630. Judicial notice can be extended to a particular model of moving radar device if the court has received expert testimony as to the construction, operation and accuracy of that model. However, judicial notice cannot automatically be extended to other models of moving radar devices. *Moreland Hills v. Gazdak* (1988), 49 Ohio App. 3d 22, 23, 550 N.E.2d 203; also see *State v. Kirkland* (Mar. 2, 1998), 1998 Ohio App. LEXIS 1100, Logan App. No. 8-97-22, unreported.

Absent evidence about whether the "Genesis" radar was a moving device or a stationary device, this court cannot say whether the trial court properly could have taken judicial notice of the construction and operation of the device. Appellant has failed to provide us with a record that demonstrates the claimed error; therefore, we must presume the validity of the trial court's ruling. *Rose Chevrolet, Inc.* [\*8] v. *Adams* (1988), 36 Ohio St. 3d 17, 19, 520 N.E.2d 564; *Knapp v. Edwards Laboratories* (1980), 61 Ohio St. 2d 197, 199, 400 N.E.2d 384; *Baker v. Cuyahoga County Court of Common Pleas* (1989), 61 Ohio App. 3d 59, 62, 572 N.E.2d 155. Accordingly, we overrule the first assignment of error.

The second and third assignments of error contend there was no evidence that the police officer was qualified to operate the radar device. Therefore, appellant argues, the court erred by accepting the officer's testimony about the speed of appellant's vehicle and by accepting his testimony that the device was in good condition for accurate work.

[HN3] Even if a court takes judicial notice of the construction and operation of a radar device, it may not accept a radar reading unless there is evidence demonstrating the accuracy of the particular unit in question and the qualifications of the operator. *East Cleveland v. Ferrell*, *supra*, at 303. The evidence in the record here indicates this officer was trained, on a K-55 radar device. It is not clear on the record whether this training would apply to the Genesis device; however, the officer's performance of calibration tests on the Genesis device "as [\*9] trained" implies that the same training is applicable. Appellant had the opportunity to cross-examine the officer if he wished to challenge the adequacy of his training. He failed to include the relevant portions of any such cross-examination in the record; therefore, we must again presume the validity of the trial court's ruling and overrule the second and third assignments of error.

The fourth assignment of error contends the trial court erred by admitting the officer's testimony regarding the speed of appellant's vehicle when there was no testimony that the speed indicated on the radar device was the speed of appellant's vehicle. The trial court's statement of the evidence indicates that the police officer testified he aimed the radar unit at appellant's vehicle and locked the speed in at 79 m.p.h. The fourth assignment of error is therefore overruled.

Appellant's fifth assignment of error asserts that the court erred by determining that the speed limit was 60 miles per hour when a 60-mile-per-hour speed limit is not authorized under the Codified Ordinances of Mayfield Heights. The court determined that the posted speed limit of 60 miles per hour was established by the Cuyahoga [\*10] County Commissioners pursuant to *R.C. 4511.21*. [HN4] Section 333.03(k) of the Codified Ordinances of Mayfield Heights provides:

Whenever, in accordance with this section or Ohio *R.C. 4511.21*, the maximum prima-facie speed limitations as established herein have been altered, either higher or lower, and the appropriate signs giving notice have been erected as required, operators of motor vehicles shall be governed by the speed limitations set forth on such signs. It is prima facie unlawful for any person to exceed the speed limits posted upon such signs.

Thus, the municipal ordinances plainly prohibited operation of a motor vehicle at a speed exceeding the posted limits. Appellant's fifth assignment of error is overruled.

Judgment affirmed.

It is ordered that appellee recover of appellant its costs herein taxed.

The court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Lyndhurst Municipal Court to carry this judgment into execution. The defendant's conviction having been affirmed, any bail pending appeal is terminated. Case remanded to the trial court for execution of sentence.

A certified [\*11] copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

Positive

As of: Jan 31, 2007

**STATE OF OHIO, Plaintiff-Appellee, - vs - CYNTHIA A. SANDERS,  
Defendant-Appellant.**

**CASE NO. 97-A-0049**

**COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT,  
ASHTABULA COUNTY**

*130 Ohio App. 3d 789; 721 N.E.2d 433; 1998 Ohio App. LEXIS 6149*

**December 18, 1998, Decided**

**PRIOR HISTORY:** [\*\*\*1]

CHARACTER OF PROCEEDINGS: Criminal Appeal from Ashtabula County Court, Eastern Area. Case No. 96 TRC 02537.

**DISPOSITION:**

JUDGMENT: Affirmed in part; reversed in part and remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from her conviction and sentence in the Ashtabula County Court, Eastern Area (Ohio), on one count of driving under the influence of alcohol in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*, and one count of failure to signal in violation of *Ohio Rev. Code Ann. § 4511.39*.

**OVERVIEW:** Defendant was convicted and sentenced for driving under the influence of alcohol in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*, and one count of failure to signal in violation of *Ohio Rev. Code Ann. § 4511.39*. On appeal, the court reversed the conviction for driving under the influence because it found that the trial court had erred in denying the admission of defendant's signature, given shortly after her arrest, to refute the officer's testimony that defendant's motor skills were impaired due to her alcohol intake. The court concluded that the signature was relevant, if not dispositive of whether she was under the influence. The court also held that the trial court had abused its discretion in permitting the state to admit the arresting officer's report into evidence in violation of *Ohio R. Evid. 612* and *803(8)*, which prohibited the introduction of a police officer's report unless offered by defendant. The court concluded that defendant's conviction for violating § 4511.39 was supported by sufficient evidence, and affirmed the conviction.

**OUTCOME:** The court reversed defendant's conviction for driving under the influence and remanded for a new trial because the trial court had erred in refusing to admit relevant evidence and erroneously permitted the state to admit evidence of the police report, in violation of the rules of evidence. The court affirmed the conviction for failure to signal

because it was supported by sufficient evidence.

**CORE TERMS:** trooper, signature, signal, assignment of error, influence of alcohol, adverse party, refresh, noticed, driving, memory, cross-examination, sobriety, arrest, testifying, introduce, driver, inadmissible, criminal activities, impaired, motion to strike, defense counsel, breath test, destruction, exculpatory, admissible, arresting, cigarette, traffic, admit, destroyed

#### **LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

[HN1] A police officer does not need probable cause before conducting field sobriety tests. All that is required is reasonable suspicion of criminal activity.

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview  
Evidence > Relevance > Relevant Evidence***

***Evidence > Scientific Evidence > Handwriting***

[HN2] Pursuant to *Ohio R. Evid. 402*, relevant evidence is generally admissible. Relevant evidence is defined as evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence. *Ohio R. Evid. 401*.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > General Overview***

***Criminal Law & Procedure > Discovery & Inspection > Brady Materials***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN3] Unless a criminal defendant can show bad faith on the part of the police, failure to preserve potentially useful evidence does not constitute a denial of due process of law.

***Evidence > Testimony > Refreshing Recollection > Memory Aids > Writings***

***Evidence > Testimony > Refreshing Recollection > Refreshing Before Testimony***

***Evidence > Testimony > Refreshing Recollection > Refreshing During Testimony***

[HN4] Except as otherwise provided in criminal proceedings by *Ohio R. Crim. P. 16(B)(1)(g)* and *16(C)(1)(d)*, if a witness uses a writing to refresh his memory for the purpose of testifying, either while testifying, or before testifying, if the court in its discretion determines it is necessary in the interests of justice, an adverse party is entitled to have the writing produced at the hearing. He is also entitled to inspect it, to cross-examine the witness thereon, and to introduce in evidence those portions which relate to the testimony of the witness. *Ohio R. Evid. 612* only allows an adverse party to introduce the writing into evidence.

***Administrative Law > Agency Adjudication > Hearings > Evidence > Admissibility > Hearsay***

***Evidence > Hearsay > Exceptions > Public Records > General Overview***

[HN5] *Ohio R. Evid. 802* excludes the admission of hearsay unless otherwise provided for in the rules. *Ohio R. Evid. 803* consists of a list of twenty-two exceptions to the general rule that hearsay is inadmissible. *Ohio R. Evid. 803(8)* includes, as one of the exceptions: records, reports, statements, or data compilations, in any form, of public offices or agencies, setting forth (a) the activities of the office or agency, or (b) matters observed pursuant to duty imposed by law as to which matters there was a duty to report, excluding, however, in criminal cases matters observed by police officers and other law enforcement personnel, unless offered by defendant, unless the sources of information or other

circumstances indicate lack of trustworthiness. R. 803(8) prohibits the introduction of reports which recite an officer's observations or criminal activities or observations made as part of an investigation of criminal activities, unless, of course, offered by the defendant.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause***

[HN6] A properly qualified officer may testify at trial regarding a driver's performance on the horizontal gaze nystagmus test as it pertains to the issues of probable cause to arrest, and whether the driver was operating a vehicle while under the influence of alcohol. See *Ohio Rev. Code Ann. § 4511.19(A)(1)*. However, such testimony may not be admitted to show what the exact alcohol concentration level of the driver was for purposes of demonstrating a violation of *Ohio Rev. Code Ann. § 4511.19(A)(2), (3), or (4)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Evidence > Scientific Evidence > Blood Alcohol***

[HN7] Horizontal gaze nystagmus (HGN) testing can be used to establish probable cause as to whether a person is driving under the influence of alcohol because there is a correlation between blood-alcohol concentration and nystagmus. An HGN test is one of several valid tools that can be used to indicate whether a person has been driving while alcohol impaired, in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > General Overview***

[HN8] See *Ohio Rev. Code Ann. § 4511.39*.

**OPINION BY:** WILLIAM M. O'NEILL

**OPINION:** [\*\*434] [\*791]

OPINION

O'NEILL, J.

Appellant, Cynthia A. Sanders, appeals from her conviction and sentence in the Ashtabula County Court, Eastern Area, on one count of driving under the influence of alcohol in violation of *R.C. 4511.19(A)(1)* [\*\*435] and one count of failure to signal in violation of *R.C. 4511.39*.

[\*792] The following facts are relevant to a determination of this appeal. On June 30, 1996, at approximately 12:47 a.m., Ohio State Highway Patrol Trooper Paul March was on routine traffic enforcement just outside the Village

of Jefferson, Ohio. Using laser radar, he clocked a vehicle traveling in the opposite direction on State Route 167 [\*\*\*2] at forty-four m.p.h. in a thirty-five m.p.h. zone. The vehicle was being driven by appellant. Trooper March turned his cruiser around and began following appellant. He noticed that appellant was "drifting" within her own lane and, when she stopped at the intersection with Market Street, her passenger side tires were actually on top of the white line on the edge of the road. Appellant then made a right hand turn onto Market Street without using her turn signal. At that point, Trooper March believed that he had witnessed three traffic violations so he stopped appellant.

Upon approaching appellant's vehicle, Trooper March activated an audio tape recorder he had concealed in his pocket. He noticed that the interior of the vehicle was filled with smoke and that appellant was smoking a cigarette. He also noticed that appellant was chewing gum and that her eyes were bloodshot. Trooper March did not detect the odor of alcohol about appellant at that time. He did observe, however, what he described as an unusually slow and deliberate speech pattern on the part of appellant as though she had to consciously think about the questions asked and how she would respond.

Appellant explained to the [\*\*\*3] trooper that she had attended a graduation party earlier in the evening and that she was attempting to find her boyfriend's house in Dorset, Ohio. She had become lost as she was not familiar with that portion of Ashtabula County. Trooper March informed appellant that she was proceeding in the opposite direction from Dorset.

Based upon his observations up to that point, Trooper March asked appellant to step out of the car, put out her cigarette, and spit out her gum. Appellant complied and, at that time, the trooper noticed an odor of alcohol about appellant. Upon further questioning, appellant informed Trooper March that earlier she had consumed "a couple" of drinks.

Trooper March then administered a series of field sobriety tests, beginning with the Horizontal Gaze Nystagmus test ("HGN"). This was followed by the "one leg stand" test and the "walk and turn" test. In the opinion of Trooper March, appellant was under the influence of alcohol. Appellant was placed under arrest and transported to the Ashtabula County Sheriff's Department. There, at 1:14 a.m., appellant signed her name on a 2255 form which informs a defendant of the consequences of failing to take a breath test. Appellant [\*\*\*4] then volunteered to take a breath test which established that her blood alcohol level was at .083 grams of alcohol per 210 liters of breath, which is below the legal limit in Ohio of .10.

[\*793] Appellant was then issued a citation for driving under the influence of alcohol in violation of *R.C. 4511.19(A)(1)*, and failing to signal before making a turn in violation of *R.C. 4511.39*. Appellant was given written warnings for her alleged marked lane violation and excess speed violation.

Prior to trial, appellant filed a motion to suppress all evidence seized in the course of her detention. This motion was overruled by the trial court on June 4, 1997. Appellant also filed a motion *in limine* to prohibit the state from introducing into evidence the results of appellant's breath test as well as the results of the HGN test. On the morning of the trial, the trial court granted appellant's motion as to the results of appellant's breath test but ruled that evidence of the HGN test would be admissible.

A jury trial commenced on July 29, 1997. On July 31, 1997, the jury found appellant [\*\*436] guilty on both charges. Appellant was sentenced accordingly on August 1, 1997. She timely filed a notice of appeal [\*\*\*5] and has set forth the following assignments of error:

"1. The trial court erred when it denied Defendant's motion to suppress all information obtained by the police after the scope of the traffic stop was expanded without cause.

"2. The trial court violated Defendant's right to due process when it ruled that evidence of Defendant's handwriting from the morning of her arrest was inadmissible.

130 Ohio App. 3d 789, \*793; 721 N.E.2d 433, \*\*436;  
1998 Ohio App. LEXIS 6149, \*\*\*5

"3. The Defendant's right to due process was violated by the State's destruction of exculpatory material evidence.

"4. The trial court abused its discretion when it admitted the arresting officer's report into evidence.

"5. The trial court erred when it denied Defendant's motion to strike the arresting officer's testimony regarding the results of the horizontal gaze nystagmus test on the basis that no foundation had been laid.

"6. The trial court abused its discretion when it denied Defendant's motion to strike the arresting officer's testimony regarding the results of the horizontal gaze nystagmus test on the basis that the results were irrelevant to the issue of whether Defendant was driving while under the influence of alcohol.

"7. There is insufficient evidence to support the conviction [\*\*\*6] of Defendant on the charge of failure to signal before executing a turn."

In the first assignment of error, appellant contends that the trial court erred when it denied her motion to suppress all information obtained by the police after the scope of the traffic stop was expanded without cause.

[\*794] It is undisputed that Trooper March was justified in making the initial stop of appellant based upon the speeding violation alone. n1 However, the question raised by appellant is whether Trooper March had some specific and articulable facts to make further detention of appellant reasonable. See *State v. Hart (1988)*, 61 Ohio App. 3d 37, 41, 572 N.E.2d 141; *State v. Foster (1993)*, 87 Ohio App. 3d 32, 40, 621 N.E.2d 843.

n1 The issue of the turn signal violation is disputed by appellant and will be addressed under appellant's seventh assignment of error.

In the case *sub judice*, after stopping appellant based upon three possible traffic violations, Trooper March approached appellant's vehicle. There, he noticed [\*\*\*7] a cloud of smoke inside the vehicle which was being caused by the smoking of a cigarette by appellant. He also noticed that appellant was chewing gum. Cigarette smoking and gum chewing are two means by which a person can attempt to conceal the odor of alcohol on his or her breath. Trooper March also noticed that appellant's eyes were bloodshot, which is a factor often observed in people who are under the influence of alcohol. *State v. Bycznski (1994)*, 98 Ohio App. 3d 625, 630, 649 N.E.2d 285; *Wickliffe v. Gutauckas (1992)*, 79 Ohio App. 3d 224, 226, 607 N.E.2d 54. Finally, the trooper noticed that appellant's speech pattern was slow and deliberate, as though she had to consciously think about how she would answer the trooper's questions, and that her reaction time was unusually slow.

Based upon the totality of these circumstances including appellant's driving problems in conjunction with the observations of Trooper March after he stopped appellant, we conclude that Trooper March had some specific and articulable facts to further detain appellant and to ask her to step out of her vehicle.

Once that request was made, further facts came to the trooper's attention which warranted [\*\*\*8] even further inquiry in the form of field sobriety tests. Specifically, it [\*\*437] appeared to Trooper March that appellant had to use the car door for balance in getting out of the vehicle. Once appellant was out and she had extinguished her cigarette and spit out her gum, Trooper March noticed an odor of alcohol on appellant's breath. Appellant then admitted to having consumed "a couple of drinks" earlier in the evening.

It is well-established that [HN1] a police officer does not need probable cause before conducting field sobriety tests. All that is required is reasonable suspicion of criminal activity. *Columbus v. Anderson (1991)*, 74 Ohio App. 3d 768, 770, 600 N.E.2d 712. In the present case, it is clear that reasonable suspicion existed for Trooper March to conduct a series of field sobriety tests based upon the totality of the circumstances. Accordingly, the trial court properly denied

appellant's motion to [\*795] suppress all information obtained by the police. Thus, appellant's first assignment of error is without merit.

In the second assignment of error, appellant asserts that the trial court erred in ruling that a sample of her signature obtained shortly after her arrest was inadmissible. [\*\*\*9] It is apparent that after appellant was taken to the sheriff's department, she signed her name on a "refusal form" which is used to inform a defendant of the consequences of failing to take a breath test. This occurred at 1:14 a.m., approximately twenty-seven minutes after having been stopped by the Highway Patrol. At trial, defense counsel attempted to admit into evidence an enlarged copy of that form, but the trial court ruled that it was irrelevant.

Upon review of the trial transcript, it is clear that this case came down to appellant's word versus Trooper March's word. There is no objective evidence in the record to corroborate either parties' version of the facts. Appellant maintained that she was not intoxicated while Trooper March claimed that she was.

Trooper March testified that alcohol impairs a person's fine and gross motor skills. Thus, appellant sought to introduce evidence of her signature shortly after her arrest to refute the trooper's testimony that her motor skills were impaired due to the influence of alcohol. [HN2] Pursuant to *Evid.R. 402*, relevant evidence is generally admissible. "Relevant evidence" is defined as:

"\*\*\* evidence having any tendency to make the [\*\*\*10] existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Evid.R. 401*.

The trial court found the signature to be inadmissible, stating:

"I don't think it's relevant at all, the clarity of her signature. I really don't. I don't see that the signature as interpreted by Officer March is relevant to this inquiry."

The court added:

"\*\*\* I reject the notion that one's signature can be used to support the contingent that one is or is not under the influence of alcohol \*\*\*."

We disagree with the trial court's conclusion. While we cannot conclude that the clarity with which appellant was able to sign her name is dispositive of whether she was under the influence at that time, it clearly was relevant. When a signature appears neat and legible, the inference that can be made is that the signatory's motor skills were not impaired. Thus, since impairment was the critical issue in this trial, it was error to prevent the jury from viewing appellant's signature written shortly after her arrest.

The trial court also expressed concern that the content of the refusal form on which [\*\*\*11] appellant's signature appeared may have been confusing to the jury. Even if this were true, however, the trial court rejected appellant's offer to redact everything on the form except for her signature which would have [\*796] eliminated any potential confusion. Accordingly, this was also not a valid bar to the admission of the signature.

Based upon the foregoing analysis, the trial court erred when it ruled that appellant's [\*\*438] signature from the morning of her arrest was inadmissible. Appellant's second assignment of error is sustained.

In the third assignment of error, appellant submits that her right to due process was violated by the state's destruction of exculpatory material evidence. Specifically, appellant argues that the deliberate destruction or suppression of evidence favorable to the defendant by the state violates the defendant's constitutional rights whether the destruction occurred in good faith or bad faith. For this proposition, appellant relies on *Brady v. Maryland (1963)*, 373 U.S. 83, 10 L. Ed. 2d 215, 83 S. Ct. 1194. In the present case, appellant claims that Trooper March destroyed the audio

tape recording of the traffic stop that resulted in appellant's arrest for [\*\*\*12] driving under the influence of alcohol. The destruction of this tape prevented appellant from access to a key piece of exculpatory evidence that would have shown a calm, lucid, cooperative person throughout the stop and detention.

However, appellant's interpretation of *Brady* is unfounded. The United States Supreme Court later clarified *Brady* in *Arizona v. Youngblood* (1988), 488 U.S. 51, 57-58, 102 L. Ed. 2d 281, 109 S. Ct. 333, wherein the court stated:

"The Due Process Clause of the Fourteenth Amendment, as interpreted in *Brady*, makes the good or bad faith of the State irrelevant when the State fails to *disclose* to the defendant material exculpatory evidence. But we think the Due Process Clause requires a *different* result when we deal with the failure of the State to *preserve* evidentiary material \* \* \*, the results of which might have exonerated the defendant. \* \* \* We therefore hold that [HN3] *unless a criminal defendant can show bad faith on the part of the police, failure to preserve potentially useful evidence does not constitute a denial of due process of law.*" (Emphasis added.)

The *Youngblood* court also stated that "the presence or absence [\*\*\*13] of bad faith \* \* \* must necessarily turn on the police's knowledge of the exculpatory value of the evidence at the time it was lost or destroyed." *Id.* at footnote located at 56.

Thus, in the case at bar, appellant must establish not only that the recording was exculpatory, but that Trooper March had knowledge of the exculpatory value of the tape at the time he destroyed it. Appellant has failed on both counts. The only evidence to support appellant's claim that the tape recording was exculpatory was appellant's own testimony. This was directly contradicted by the testimony of Trooper March. Hence, appellant has failed to show that the recording was exculpatory. Moreover, appellant has failed to establish that Trooper March had knowledge of the [\*797] exculpatory value of the tape when he destroyed it. In fact, the only evidence on this point was that Trooper March routinely taped over his audio tapes from one stop to the next as the sole purpose for the recordings was to help Trooper March prepare any reports that needed to be prepared.

Accordingly, appellant's due process rights were not violated when Trooper March taped over the audio tape recording of her traffic stop. Appellant's [\*\*\*14] third assignment of error is without merit.

In the fourth assignment of error, appellant contends that the trial court abused its discretion when it admitted the arresting officer's report into evidence. In reviewing the trial transcript, it is evident that defense counsel used Trooper March's written report to refresh the memory of the trooper during cross-examination. The trial court permitted the state to admit the report on the basis of *Evid.R. 612* which provides, in relevant part:

"[HN4] Except as otherwise provided in criminal proceedings by *Rule 16(B)(1)(g) and 16(C)(1)(d) of Ohio Rules of Criminal Procedure*, if a witness uses a writing to refresh his memory for the purpose of testifying, either: (1) while testifying; or (2) before testifying, if the court in its discretion determines it is necessary in the interests [\*\*439] of justice, an *adverse* party is entitled to have the writing produced at the hearing. He is also entitled to inspect it, to cross-examine the witness thereon, and to introduce in evidence those portions which relate to the testimony of the witness." (Emphasis added.)

It is clear, however, that *Evid.R. 612* only allows an *adverse* party to introduce the [\*\*\*15] writing into evidence. Here, Trooper March was the state's witness and, therefore, the state was not permitted to have the report admitted on the basis of *Evid.R. 612*.

[HN5] *Evid.R. 802* excludes the admission of hearsay unless otherwise provided for in the rules. *Evid.R. 803* consists of a list of twenty-two exceptions to the general rule that hearsay is inadmissible. *Evid.R. 803(8)* includes, as one of the exceptions:

"Records, reports, statements, or data compilations, in any form, of public offices or agencies,

130 Ohio App. 3d 789, \*797; 721 N.E.2d 433, \*\*439;  
1998 Ohio App. LEXIS 6149, \*\*\*15

setting forth (a) the activities of the office or agency, or (b) matters observed pursuant to duty imposed by law as to which matters there was a duty to report, excluding, however, in criminal cases matters observed by police officers and other law enforcement personnel, *unless offered by defendant*, unless the sources of information or other circumstances indicate lack of trustworthiness." (Emphasis added.)

As interpreted by the Supreme Court of Ohio in *State v. Ward* (1984), 15 Ohio St. 3d 355, at 358, 474 N.E.2d 300, Evid.R. 803(8) "prohibits the introduction of reports which recite an officer's observations or criminal [\*798] activities or observations made as part of [\*\*\*16] an investigation of criminal activities," unless, of course, offered by the defendant.

Based upon this analysis, it was an abuse of discretion for the trial court to admit the arresting officer's report into evidence. Appellant's fourth assignment of error is sustained.

In the fifth assignment of error, appellant asserts that the trial court erred when it denied her motion to strike Trooper March's testimony regarding the results of the HGN test on the basis that no foundation had been laid. Specifically, appellant maintains that Trooper March was not properly qualified to administer the HGN test and that, in fact, he did not follow the proper procedures when he administered the test to appellant.

The Supreme Court of Ohio has held:

"[HN6] A properly qualified officer may testify at trial regarding a driver's performance on the horizontal gaze nystagmus test as it pertains to the issues of probable cause to arrest and whether the driver was operating a vehicle while under the influence of alcohol. See *R.C. 4511.19(A)(1)*. However, such testimony may not be admitted to show what the exact alcohol concentration level of the driver was for purposes of demonstrating a violation of *R.C. [\*\*\*17] 4511.19(A)(2), (3), or (4)*." *State v. Bresson* (1990), 51 Ohio St. 3d 123, 554 N.E.2d 1330, syllabus.

A review of the testimony given by Trooper March demonstrates that it fit within the guidelines of *Bresson*. While the trooper admitted that he had not been trained in administering an HGN test in three and one-half years, and had not read the field sobriety testing policy written by the Ohio State Highway Patrol in over a year, he was able to demonstrate extensive knowledge of the testing procedures and he offered his opinion regarding appellant's level of intoxication. Moreover, the HGN test was just one test administered by Trooper March. Two other field sobriety tests were given to appellant, and, in the opinion of Trooper March, she failed them both. Under the facts of the present case, we see no prejudicial error in the admission of the testimony of the arresting officer regarding the HGN test based on a perceived lack of foundation. The procedural defects brought out on cross-examination affect the credibility of the witness, not the admissibility of the evidence. Appellant's [\*440] fifth assignment of error is without merit.

In the sixth assignment of error, appellant argues [\*\*\*18] that the trial court abused its discretion when it denied her motion to strike Trooper March's testimony regarding the results of the HGN test since the results were irrelevant in a prosecution under *R.C. 4511.19(A)(1)*. It is appellant's contention that while the results of the HGN test would be relevant in a prosecution under *R.C. 4511.19(A)(3)* since a police officer can use an HGN test to predict the blood-alcohol level of a suspect, the results are [\*799] irrelevant in the present case because no relationship was established between the results of an HGN test and impaired driving.

This is a unique argument but one that is clearly without merit. Pursuant to the Supreme Court's decision in *Bresson*, [HN7] HGN testing can be used to establish probable cause as to whether a person is driving under the influence of alcohol because there is a correlation between blood-alcohol concentration and nystagmus. *Bresson*, 51 Ohio St. 3d at 124-125. Additionally, the court stated that according to the United States Department of Transportation, "the HGN test is the single most accurate field test to use in determining whether a person is alcohol impaired." *Id.* at 125. Thus, the logical conclusion is that an HGN test [\*\*\*19] is one of several valid tools that can be used to indicate whether a person has been driving while alcohol impaired, in violation of *R.C. 4511.19(A)(1)*.

130 Ohio App. 3d 789, \*799; 721 N.E.2d 433, \*\*440;  
1998 Ohio App. LEXIS 6149, \*\*\*19

Based upon the foregoing, the trial court did not abuse its discretion when it denied appellant's motion to strike Trooper March's testimony regarding the results of the HGN test. Appellant's sixth assignment of error is without merit.

In the seventh assignment of error, appellant contends that there was insufficient evidence to support her conviction on the charge of failing to signal before executing a turn. "A challenge to the sufficiency of the evidence is quantitatively and qualitatively different from a challenge to the weight of the evidence." *State v. Longmire* (Dec. 19, 1997), 1997 Ohio App. LEXIS 5744, Portage App. No. 97-P-0024, unreported, at 3. This difference was addressed by the Supreme Court of Ohio in *State v. Thompkins* (1997), 78 Ohio St. 3d 380, 678 N.E.2d 541. There, the court explained the concept of sufficiency of the evidence as follows:

"In essence, sufficiency is a test of adequacy. Whether the evidence is legally sufficient to sustain a verdict is a question of law. *State v. Robinson* (1955), 162 Ohio St. 486, 55 Ohio Op. [\*\*\*20] 388, 124 N.E.2d 148." 78 Ohio St. 3d at 386.

In the instant cause, appellant was found guilty of violating [HN8] *R.C. 4511.39* which provides, in pertinent part:

"No person shall turn a vehicle or trackless trolley or move right or left upon a highway unless and until such person has exercised due care to ascertain that the movement can be made with reasonable safety nor without giving an appropriate signal in the manner hereinafter provided.

"When required, a signal of intention to turn or move right or left shall be given continuously during not less than the last one hundred feet traveled by the vehicle or trackless trolley before turning."

[\*800] Appellant asserts that the statute in question only requires the use of a turn signal before turning when another car will be affected by the maneuver. While appellant admits she did not use her turn signal, she concludes that since no other car was affected by her maneuver, she did not violate *R.C. 4511.39*. This argument was previously made and rejected in *State v. Lowman* (1992), 82 Ohio App. 3d 831, 613 N.E.2d 692. The Twelfth District Court of Appeals reasoned as follows:

"The first paragraph of *R.C. 4511.39* sets forth two [\*\*\*21] distinct duties. It embodies a requirement of reasonable care in changing directions in traffic *and* a requirement to use a signal. The statute says that a driver may not change direction until he [\*\*441] has ascertained 'that the movement can be made with reasonable safety *nor* without giving an appropriate signal \*\*\*.' (Emphasis added.) The signal requirement is set forth in absolute terms and is not modified by the language mandating reasonableness in changing directions.

"Further, because it is followed by the phrase 'in the manner hereinafter provided' the term 'appropriate signal' must be seen as describing the mechanics of giving the signal itself, and not as referring to the situation in which the signal is required. The fact that the legislature required the use of an 'appropriate signal' cannot be construed as making the use of such signal contingent upon traffic conditions. Similarly, the phrase 'when required' simply refers to a situation in which the driver intends to change direction on the roadway. The phrase refers to the signal requirement as set forth in the first paragraph of the statute, and again there is no indication that this language was intended to make the [\*\*\*22] requirement conditional. The legislature could have chosen a term such as 'when reasonable,' but it did not do so. We decline to read such language into the section." (Emphasis added.) *Id.* at 835.

We agree with the foregoing opinion. Accordingly, appellant's conviction for violating *R.C. 4511.39* was supported by sufficient evidence. Appellant's seventh assignment of error is without merit.

Based on the foregoing analysis, appellant's conviction on the charge of driving under the influence of alcohol is reversed and the matter remanded for a new trial on that charge. However, appellant's conviction on the charge of failing to signal before making a turn is affirmed.

JUDGE WILLIAM M. O'NEILL

CHRISTLEY, P.J., dissents with Dissenting Opinion,

[\*801] NADER, J., concurs.

**DISSENT BY: JUDITH A. CHRISTLEY**

**DISSENT:**

DISSENTING OPINION

CHRISTLEY, P.J.

I respectfully dissent from the majority's analysis and conclusion in reference to the second and fourth assignments of error.

As to the second assignment of error, the issue of the admission of appellant's signature on her driver's license, I would agree that the trial court's blanket rejection of the offer of the signature is incorrect. [\*\*\*23] Certainly, when a proper foundation had been laid, a signature analysis could indeed have been relevant to show the degree of physical impairment of the signature's author. However, the record in the instant case did not show that any such foundation was laid. There was no proffer of the opinion of an expert; there was no comparative signature offered; in other words, there was no evidence put forth or proffered which would support the claims of appellant as to relevancy.

I disagree strongly with the majority that the jury would be qualified to draw a conclusion that, because a single signature appeared to be neat and legible, *ergo*, the writer was sober. It would require an inference on an inference; *i.e.*, the signature was the writer's normal signature, and a neat and legible signature could only be produced if the writer was sober. Without a foundation or a proffer of such a foundation, I believe the trial court was correct in disallowing the signature from evidence. The end result was therefore the right conclusion, albeit for the wrong reason. I would therefore affirm as to the second assignment.

As to the fourth assignment, I concur with the majority's conclusion that [\*\*\*24] the admission of the report was error. However, I would find it to be harmless error because all of the relevant material in the report was, in fact, testified to by Trooper March. Thus, there were no prejudicial revelations beyond those to which he had already testified.

[\*\*442] The pertinent provisions of Ohio Rules of Evidence discussed herein. *Evid.R. 612* reads in part:

"Writing Used to Refresh Memory. Except as otherwise provided in criminal proceedings by *Rule 16(B)(1)(g) and 16(C)(1)(d) of Ohio Rules of Criminal Procedure*, if a witness uses a writing to refresh his memory for the purpose of testifying, either: (1) while testifying; or (2) before testifying, if the court in its discretion determines it is necessary in the interests of justice, an adverse party is entitled to have the writing produced at the hearing. He is also entitled to inspect it, to cross-examine the witness thereon, and to introduce in evidence those portions which relate to the testimony of the witness. If it is claimed that [\*802] the writing contains matters not related to the subject matter of the testimony the court shall examine the writing in camera, excise any portions not so related, [\*\*\*25] and order delivery of the remainder to the party entitled thereto. \* \* \*"

*Evid.R. 803(8)* reads:

"Hearsay Exceptions; Availability of the Declarant Immaterial. The following are not excluded by the hearsay rule, even though the declarant is available as a witness:

"\*\*\*

"(8) *Public records and reports.* Records, reports, statements, or data compilations, in any form, of public offices or agencies, setting forth (a) the activities of the office or agency, or (b) matters observed pursuant to duty imposed by law as to which matters there was a duty to report, excluding, however, in criminal cases matters observed by police officers and other law enforcement personnel, unless offered by defendant, unless the sources of information or other circumstances indicate lack of trustworthiness."

In the case at bar, during the state's direct examination of Trooper March, the state first utilized the report to refresh his memory. The report was entitled "Ohio State Highway Patrol Impaired Driver Report" and was marked "State's Exhibit C." Pursuant to *Evid.R. 612*, appellant's counsel was then given the opportunity to inspect the report and to utilize it in the defense's cross-examination [\*\*\*26] of Trooper March. No party has disputed the propriety of these actions.

During cross-examination, the defense attempted to attack the accuracy of Trooper March's observations of appellant, thereby calling into question the trooper's credibility. During this process, the defense made several references to Trooper March's report. When defense counsel was referring to the contents of the report, Trooper March again admitted that he could not presently recollect all of his prior observations without the assistance of the report. Defense counsel thereafter showed Trooper March portions of the report and repeated the questions. The state did not object when defense counsel used the report in this fashion.

At the close of the state's case, the state offered State's Exhibit C, the report, into evidence. Defense counsel objected on the grounds that *Evid.R. 803(8)* permitted the introduction of the report only when *the defense* was the party offering it into evidence. The trial court rejected this argument and overruled defense counsel's objections on two grounds. First, the trial court stated that because defense counsel also used the report to refresh Trooper March's memory, the opportunity [\*\*\*27] to introduce the report shifted back to the state. Under this interpretation of the rule, the state then became the adverse party referenced in *Evid.R. 612*. Second, the trial court characterized the report as a test outcome or [\*803] a test score rather than an investigative report, thereby holding that it was admissible pursuant to *Evid.R. 803(8)*.

At the outset, I believe that the trial court misapplied *Evid.R. 612* in this case. Here, the adverse party referenced in the rule is the defense. The state was the original party whose witness needed to have his memory refreshed on direct examination [\*\*\*443] with the report. In accordance with *Evid.R. 612*, the adverse party was then the defense. As indicated above, the defense was then entitled to inspect the report and to utilize the report in cross-examination. n1 The defense did so. If the defense had thereafter desired to move the court to introduce the report into evidence, it could have done so. However, the defense did not.

n1 Here, I note that the state made no objection to the defense inspecting the report.

[\*\*\*28]

Nevertheless, the trial court determined that the provision of *Evid.R. 612* regarding the opportunity to introduce evidence somehow shifted when the defense allowed Trooper March to review the report to refresh his memory during cross-examination.

Irrespective of the fact that I find no authority for such an interpretation, I do not perceive that the defense's use of the report resulted in a shift of who was considered the adverse party. Instead, the defense simply used the report to cross-examine the witness as it was permitted to do under *Evid.R. 612*. n2 Indeed, the defense's primary objective was to call into question the witness' credibility; the fact that Trooper March could not recall presently his prior observations in the report did not change that objective.

n2 It would appear from *State v. Goff* (1998), 82 Ohio St. 3d 123, 136-137, 694 N.E.2d 916, that the defense could be the first party to use a document to refresh a witness' memory on cross-examination.

The purpose of the rule would not be [\*\*\*29] well-served if the state could prevent the original adverse party from thoroughly cross-examining a witness out of concern that such an inquiry might result in the state being able to admit the report.

Thus, as the report was first used to refresh the state's witness on the state's direct examination of that witness, the defense remained the adverse party, the only one who was entitled to move the court to introduce the report into evidence. Because the defense did not do so, the report should not have come in under *Evid.R. 612*.

Moreover, when a document which has been used to refresh a witness' recollection is submitted to the jury pursuant to *Evid.R. 612*, the document is not being offered as substantive evidence. Weissenberger, *Ohio Evidence* (1998) 285-286, Section 612.4. *Dayton v. Combs* (1993), 94 Ohio App. 3d 291, 298, 640 N.E.2d 863. Instead, it is being offered as a basis to evaluate the testimony of the [\*804] witness. Thus, unless the document had some other basis for admissibility as substantive evidence, the trial court should have instructed the jury to consider the document only for the limited purpose of assessing credibility. Weissenberger. No such charge was given to the [\*\*\*30] jury in the case at bar.

I also believe that the trial court erred when it held, in the alternative, that the report was admissible as a test score under *Evid.R. 803(8)*. In this regard, the Supreme Court of Ohio has held that *Evid.R. 803(8)* "prohibits the introduction of reports which recite an officer's observations of criminal activities or observations made as part of an investigation of criminal activities. \*\*\* [It] does not prohibit introduction of records of a routine, intra-police, or machine maintenance nature, such as intoxilyzer calibration logs." *State v. Ward* (1984), 15 Ohio St. 3d 355, 358, 474 N.E.2d 300.

By characterizing the report as a test score, the trial court was attempting to classify the report in the second admissible category of records, such as intoxilyzer calibration logs. However, it is obvious that the report contains Trooper March's observations of criminal activities made during his investigation in the case. For example, Trooper March indicated on the report that appellant had a moderate odor of alcoholic beverage about her person, [\*\*\*444] that her speech was slow, and that she failed various field sobriety tests. This report is not a record of a routine, [\*\*\*31] intra-police, or machine maintenance nature. It is, rather, a document containing the individual observations Trooper March made during his criminal investigation of appellant.

Other Ohio appellate courts have also found the "Ohio State Highway Patrol Impaired Driver Report" to be inadmissible under *Evid.R. 803(8)*. *State v. Joyce* (June 12, 1998), Hamilton App. No. C-970642, unreported, 1998 Ohio App. LEXIS 2566; *State v. McDaniel* (Feb. 21, 1995), Meigs App. No. 94CA08, unreported, 1995 Ohio App. LEXIS 716.

If the trial court erred by admitting State's Exhibit C into evidence, the query turns to whether the error was harmless beyond a reasonable doubt. I believe it was harmless error because it was merely cumulative of the officer's testimony. As previously indicated, there were no additional prejudicial revelations for which there had not already been testimony. Thus, there is no merit to this assignment.

Based upon my analysis concerning the second and fourth assignments of error, I would affirm the trial court's judgment in this matter.

PRESIDING JUDGE JUDITH A. CHRISTLEY

Positive

As of: Jan 31, 2007

**STATE OF OHIO, Plaintiff-Appellee, - vs - CYNTHIA A. SANDERS,  
Defendant-Appellant.**

**CASE NO. 97-A-0049**

**COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT,  
ASHTABULA COUNTY**

*130 Ohio App. 3d 789; 721 N.E.2d 433; 1998 Ohio App. LEXIS 6149*

**December 18, 1998, Decided**

**PRIOR HISTORY:** [\*\*\*1]

CHARACTER OF PROCEEDINGS: Criminal Appeal from Ashtabula County Court, Eastern Area. Case No. 96 TRC 02537.

**DISPOSITION:**

JUDGMENT: Affirmed in part; reversed in part and remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from her conviction and sentence in the Ashtabula County Court, Eastern Area (Ohio), on one count of driving under the influence of alcohol in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*, and one count of failure to signal in violation of *Ohio Rev. Code Ann. § 4511.39*.

**OVERVIEW:** Defendant was convicted and sentenced for driving under the influence of alcohol in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*, and one count of failure to signal in violation of *Ohio Rev. Code Ann. § 4511.39*. On appeal, the court reversed the conviction for driving under the influence because it found that the trial court had erred in denying the admission of defendant's signature, given shortly after her arrest, to refute the officer's testimony that defendant's motor skills were impaired due to her alcohol intake. The court concluded that the signature was relevant, if not dispositive of whether she was under the influence. The court also held that the trial court had abused its discretion in permitting the state to admit the arresting officer's report into evidence in violation of *Ohio R. Evid. 612* and *803(8)*, which prohibited the introduction of a police officer's report unless offered by defendant. The court concluded that defendant's conviction for violating § 4511.39 was supported by sufficient evidence, and affirmed the conviction.

**OUTCOME:** The court reversed defendant's conviction for driving under the influence and remanded for a new trial because the trial court had erred in refusing to admit relevant evidence and erroneously permitted the state to admit evidence of the police report, in violation of the rules of evidence. The court affirmed the conviction for failure to signal

because it was supported by sufficient evidence.

**CORE TERMS:** trooper, signature, signal, assignment of error, influence of alcohol, adverse party, refresh, noticed, driving, memory, cross-examination, sobriety, arrest, testifying, introduce, driver, inadmissible, criminal activities, impaired, motion to strike, defense counsel, breath test, destruction, exculpatory, admissible, arresting, cigarette, traffic, admit, destroyed

#### **LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

[HN1] A police officer does not need probable cause before conducting field sobriety tests. All that is required is reasonable suspicion of criminal activity.

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview  
Evidence > Relevance > Relevant Evidence***

***Evidence > Scientific Evidence > Handwriting***

[HN2] Pursuant to *Ohio R. Evid. 402*, relevant evidence is generally admissible. Relevant evidence is defined as evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence. *Ohio R. Evid. 401*.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > General Overview***

***Criminal Law & Procedure > Discovery & Inspection > Brady Materials***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN3] Unless a criminal defendant can show bad faith on the part of the police, failure to preserve potentially useful evidence does not constitute a denial of due process of law.

***Evidence > Testimony > Refreshing Recollection > Memory Aids > Writings***

***Evidence > Testimony > Refreshing Recollection > Refreshing Before Testimony***

***Evidence > Testimony > Refreshing Recollection > Refreshing During Testimony***

[HN4] Except as otherwise provided in criminal proceedings by *Ohio R. Crim. P. 16(B)(1)(g)* and *16(C)(1)(d)*, if a witness uses a writing to refresh his memory for the purpose of testifying, either while testifying, or before testifying, if the court in its discretion determines it is necessary in the interests of justice, an adverse party is entitled to have the writing produced at the hearing. He is also entitled to inspect it, to cross-examine the witness thereon, and to introduce in evidence those portions which relate to the testimony of the witness. *Ohio R. Evid. 612* only allows an adverse party to introduce the writing into evidence.

***Administrative Law > Agency Adjudication > Hearings > Evidence > Admissibility > Hearsay***

***Evidence > Hearsay > Exceptions > Public Records > General Overview***

[HN5] *Ohio R. Evid. 802* excludes the admission of hearsay unless otherwise provided for in the rules. *Ohio R. Evid. 803* consists of a list of twenty-two exceptions to the general rule that hearsay is inadmissible. *Ohio R. Evid. 803(8)* includes, as one of the exceptions: records, reports, statements, or data compilations, in any form, of public offices or agencies, setting forth (a) the activities of the office or agency, or (b) matters observed pursuant to duty imposed by law as to which matters there was a duty to report, excluding, however, in criminal cases matters observed by police officers and other law enforcement personnel, unless offered by defendant, unless the sources of information or other

circumstances indicate lack of trustworthiness. R. 803(8) prohibits the introduction of reports which recite an officer's observations or criminal activities or observations made as part of an investigation of criminal activities, unless, of course, offered by the defendant.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Probable Cause***

[HN6] A properly qualified officer may testify at trial regarding a driver's performance on the horizontal gaze nystagmus test as it pertains to the issues of probable cause to arrest, and whether the driver was operating a vehicle while under the influence of alcohol. See *Ohio Rev. Code Ann. § 4511.19(A)(1)*. However, such testimony may not be admitted to show what the exact alcohol concentration level of the driver was for purposes of demonstrating a violation of *Ohio Rev. Code Ann. § 4511.19(A)(2), (3), or (4)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements  
Evidence > Scientific Evidence > Blood Alcohol***

[HN7] Horizontal gaze nystagmus (HGN) testing can be used to establish probable cause as to whether a person is driving under the influence of alcohol because there is a correlation between blood-alcohol concentration and nystagmus. An HGN test is one of several valid tools that can be used to indicate whether a person has been driving while alcohol impaired, in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > General Overview***

**OPINION BY:** WILLIAM M. O'NEILL

**OPINION:** [\*\*434] [\*791]

OPINION

O'NEILL, J.

Appellant, Cynthia A. Sanders, appeals from her conviction and sentence in the Ashtabula County Court, Eastern Area, on one count of driving under the influence of alcohol in violation of *R.C. 4511.19(A)(1)* [\*\*435] and one count of failure to signal in violation of *R.C. 4511.39*.

[\*792] The following facts are relevant to a determination of this appeal. On June 30, 1996, at approximately 12:47 a.m., Ohio State Highway Patrol Trooper Paul March was on routine traffic enforcement just outside the Village

of Jefferson, Ohio. Using laser radar, he clocked a vehicle traveling in the opposite direction on State Route 167 [\*\*\*2] at forty-four m.p.h. in a thirty-five m.p.h. zone. The vehicle was being driven by appellant. Trooper March turned his cruiser around and began following appellant. He noticed that appellant was "drifting" within her own lane and, when she stopped at the intersection with Market Street, her passenger side tires were actually on top of the white line on the edge of the road. Appellant then made a right hand turn onto Market Street without using her turn signal. At that point, Trooper March believed that he had witnessed three traffic violations so he stopped appellant.

Upon approaching appellant's vehicle, Trooper March activated an audio tape recorder he had concealed in his pocket. He noticed that the interior of the vehicle was filled with smoke and that appellant was smoking a cigarette. He also noticed that appellant was chewing gum and that her eyes were bloodshot. Trooper March did not detect the odor of alcohol about appellant at that time. He did observe, however, what he described as an unusually slow and deliberate speech pattern on the part of appellant as though she had to consciously think about the questions asked and how she would respond.

Appellant explained to the [\*\*\*3] trooper that she had attended a graduation party earlier in the evening and that she was attempting to find her boyfriend's house in Dorset, Ohio. She had become lost as she was not familiar with that portion of Ashtabula County. Trooper March informed appellant that she was proceeding in the opposite direction from Dorset.

Based upon his observations up to that point, Trooper March asked appellant to step out of the car, put out her cigarette, and spit out her gum. Appellant complied and, at that time, the trooper noticed an odor of alcohol about appellant. Upon further questioning, appellant informed Trooper March that earlier she had consumed "a couple" of drinks.

Trooper March then administered a series of field sobriety tests, beginning with the Horizontal Gaze Nystagmus test ("HGN"). This was followed by the "one leg stand" test and the "walk and turn" test. In the opinion of Trooper March, appellant was under the influence of alcohol. Appellant was placed under arrest and transported to the Ashtabula County Sheriff's Department. There, at 1:14 a.m., appellant signed her name on a 2255 form which informs a defendant of the consequences of failing to take a breath test. Appellant [\*\*\*4] then volunteered to take a breath test which established that her blood alcohol level was at .083 grams of alcohol per 210 liters of breath, which is below the legal limit in Ohio of .10.

[\*793] Appellant was then issued a citation for driving under the influence of alcohol in violation of *R.C. 4511.19(A)(1)*, and failing to signal before making a turn in violation of *R.C. 4511.39*. Appellant was given written warnings for her alleged marked lane violation and excess speed violation.

Prior to trial, appellant filed a motion to suppress all evidence seized in the course of her detention. This motion was overruled by the trial court on June 4, 1997. Appellant also filed a motion *in limine* to prohibit the state from introducing into evidence the results of appellant's breath test as well as the results of the HGN test. On the morning of the trial, the trial court granted appellant's motion as to the results of appellant's breath test but ruled that evidence of the HGN test would be admissible.

A jury trial commenced on July 29, 1997. On July 31, 1997, the jury found appellant [\*\*436] guilty on both charges. Appellant was sentenced accordingly on August 1, 1997. She timely filed a notice of appeal [\*\*\*5] and has set forth the following assignments of error:

"1. The trial court erred when it denied Defendant's motion to suppress all information obtained by the police after the scope of the traffic stop was expanded without cause.

"2. The trial court violated Defendant's right to due process when it ruled that evidence of Defendant's handwriting from the morning of her arrest was inadmissible.

130 Ohio App. 3d 789, \*793; 721 N.E.2d 433, \*\*436;  
1998 Ohio App. LEXIS 6149, \*\*\*5

"3. The Defendant's right to due process was violated by the State's destruction of exculpatory material evidence.

"4. The trial court abused its discretion when it admitted the arresting officer's report into evidence.

"5. The trial court erred when it denied Defendant's motion to strike the arresting officer's testimony regarding the results of the horizontal gaze nystagmus test on the basis that no foundation had been laid.

"6. The trial court abused its discretion when it denied Defendant's motion to strike the arresting officer's testimony regarding the results of the horizontal gaze nystagmus test on the basis that the results were irrelevant to the issue of whether Defendant was driving while under the influence of alcohol.

"7. There is insufficient evidence to support the conviction [\*\*\*6] of Defendant on the charge of failure to signal before executing a turn."

In the first assignment of error, appellant contends that the trial court erred when it denied her motion to suppress all information obtained by the police after the scope of the traffic stop was expanded without cause.

[\*794] It is undisputed that Trooper March was justified in making the initial stop of appellant based upon the speeding violation alone. n1 However, the question raised by appellant is whether Trooper March had some specific and articulable facts to make further detention of appellant reasonable. See *State v. Hart* (1988), 61 Ohio App. 3d 37, 41, 572 N.E.2d 141; *State v. Foster* (1993), 87 Ohio App. 3d 32, 40, 621 N.E.2d 843.

n1 The issue of the turn signal violation is disputed by appellant and will be addressed under appellant's seventh assignment of error.

In the case *sub judice*, after stopping appellant based upon three possible traffic violations, Trooper March approached appellant's vehicle. There, he noticed [\*\*\*7] a cloud of smoke inside the vehicle which was being caused by the smoking of a cigarette by appellant. He also noticed that appellant was chewing gum. Cigarette smoking and gum chewing are two means by which a person can attempt to conceal the odor of alcohol on his or her breath. Trooper March also noticed that appellant's eyes were bloodshot, which is a factor often observed in people who are under the influence of alcohol. *State v. Bycznski* (1994), 98 Ohio App. 3d 625, 630, 649 N.E.2d 285; *Wickliffe v. Gutauckas* (1992), 79 Ohio App. 3d 224, 226, 607 N.E.2d 54. Finally, the trooper noticed that appellant's speech pattern was slow and deliberate, as though she had to consciously think about how she would answer the trooper's questions, and that her reaction time was unusually slow.

Based upon the totality of these circumstances including appellant's driving problems in conjunction with the observations of Trooper March after he stopped appellant, we conclude that Trooper March had some specific and articulable facts to further detain appellant and to ask her to step out of her vehicle.

Once that request was made, further facts came to the trooper's attention which warranted [\*\*\*8] even further inquiry in the form of field sobriety tests. Specifically, it [\*\*437] appeared to Trooper March that appellant had to use the car door for balance in getting out of the vehicle. Once appellant was out and she had extinguished her cigarette and spit out her gum, Trooper March noticed an odor of alcohol on appellant's breath. Appellant then admitted to having consumed "a couple of drinks" earlier in the evening.

It is well-established that [HN1] a police officer does not need probable cause before conducting field sobriety tests. All that is required is reasonable suspicion of criminal activity. *Columbus v. Anderson* (1991), 74 Ohio App. 3d 768, 770, 600 N.E.2d 712. In the present case, it is clear that reasonable suspicion existed for Trooper March to conduct a series of field sobriety tests based upon the totality of the circumstances. Accordingly, the trial court properly denied

appellant's motion to [\*795] suppress all information obtained by the police. Thus, appellant's first assignment of error is without merit.

In the second assignment of error, appellant asserts that the trial court erred in ruling that a sample of her signature obtained shortly after her arrest was inadmissible. [\*\*\*9] It is apparent that after appellant was taken to the sheriff's department, she signed her name on a "refusal form" which is used to inform a defendant of the consequences of failing to take a breath test. This occurred at 1:14 a.m., approximately twenty-seven minutes after having been stopped by the Highway Patrol. At trial, defense counsel attempted to admit into evidence an enlarged copy of that form, but the trial court ruled that it was irrelevant.

Upon review of the trial transcript, it is clear that this case came down to appellant's word versus Trooper March's word. There is no objective evidence in the record to corroborate either parties' version of the facts. Appellant maintained that she was not intoxicated while Trooper March claimed that she was.

Trooper March testified that alcohol impairs a person's fine and gross motor skills. Thus, appellant sought to introduce evidence of her signature shortly after her arrest to refute the trooper's testimony that her motor skills were impaired due to the influence of alcohol. [HN2] Pursuant to *Evid.R. 402*, relevant evidence is generally admissible. "Relevant evidence" is defined as:

"\*\*\* evidence having any tendency to make the [\*\*\*10] existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Evid.R. 401*.

The trial court found the signature to be inadmissible, stating:

"I don't think it's relevant at all, the clarity of her signature. I really don't. I don't see that the signature as interpreted by Officer March is relevant to this inquiry."

The court added:

"\*\*\* I reject the notion that one's signature can be used to support the contingent that one is or is not under the influence of alcohol \*\*\*."

We disagree with the trial court's conclusion. While we cannot conclude that the clarity with which appellant was able to sign her name is dispositive of whether she was under the influence at that time, it clearly was relevant. When a signature appears neat and legible, the inference that can be made is that the signatory's motor skills were not impaired. Thus, since impairment was the critical issue in this trial, it was error to prevent the jury from viewing appellant's signature written shortly after her arrest.

The trial court also expressed concern that the content of the refusal form on which [\*\*\*11] appellant's signature appeared may have been confusing to the jury. Even if this were true, however, the trial court rejected appellant's offer to redact everything on the form except for her signature which would have [\*796] eliminated any potential confusion. Accordingly, this was also not a valid bar to the admission of the signature.

Based upon the foregoing analysis, the trial court erred when it ruled that appellant's [\*\*438] signature from the morning of her arrest was inadmissible. Appellant's second assignment of error is sustained.

In the third assignment of error, appellant submits that her right to due process was violated by the state's destruction of exculpatory material evidence. Specifically, appellant argues that the deliberate destruction or suppression of evidence favorable to the defendant by the state violates the defendant's constitutional rights whether the destruction occurred in good faith or bad faith. For this proposition, appellant relies on *Brady v. Maryland (1963)*, 373 U.S. 83, 10 L. Ed. 2d 215, 83 S. Ct. 1194. In the present case, appellant claims that Trooper March destroyed the audio

tape recording of the traffic stop that resulted in appellant's arrest for [\*\*\*12] driving under the influence of alcohol. The destruction of this tape prevented appellant from access to a key piece of exculpatory evidence that would have shown a calm, lucid, cooperative person throughout the stop and detention.

However, appellant's interpretation of *Brady* is unfounded. The United States Supreme Court later clarified *Brady* in *Arizona v. Youngblood* (1988), 488 U.S. 51, 57-58, 102 L. Ed. 2d 281, 109 S. Ct. 333, wherein the court stated:

"The Due Process Clause of the Fourteenth Amendment, as interpreted in *Brady*, makes the good or bad faith of the State irrelevant when the State fails to *disclose* to the defendant material exculpatory evidence. But we think the Due Process Clause requires a *different* result when we deal with the failure of the State to *preserve* evidentiary material \* \* \*, the results of which might have exonerated the defendant. \* \* \* We therefore hold that [HN3] *unless a criminal defendant can show bad faith on the part of the police, failure to preserve potentially useful evidence does not constitute a denial of due process of law.*" (Emphasis added.)

The *Youngblood* court also stated that "the presence or absence [\*\*\*13] of bad faith \* \* \* must necessarily turn on the police's knowledge of the exculpatory value of the evidence at the time it was lost or destroyed." *Id.* at footnote located at 56.

Thus, in the case at bar, appellant must establish not only that the recording was exculpatory, but that Trooper March had knowledge of the exculpatory value of the tape at the time he destroyed it. Appellant has failed on both counts. The only evidence to support appellant's claim that the tape recording was exculpatory was appellant's own testimony. This was directly contradicted by the testimony of Trooper March. Hence, appellant has failed to show that the recording was exculpatory. Moreover, appellant has failed to establish that Trooper March had knowledge of the [\*797] exculpatory value of the tape when he destroyed it. In fact, the only evidence on this point was that Trooper March routinely taped over his audio tapes from one stop to the next as the sole purpose for the recordings was to help Trooper March prepare any reports that needed to be prepared.

Accordingly, appellant's due process rights were not violated when Trooper March taped over the audio tape recording of her traffic stop. Appellant's [\*\*\*14] third assignment of error is without merit.

In the fourth assignment of error, appellant contends that the trial court abused its discretion when it admitted the arresting officer's report into evidence. In reviewing the trial transcript, it is evident that defense counsel used Trooper March's written report to refresh the memory of the trooper during cross-examination. The trial court permitted the state to admit the report on the basis of *Evid.R. 612* which provides, in relevant part:

"[HN4] Except as otherwise provided in criminal proceedings by *Rule 16(B)(1)(g) and 16(C)(1)(d) of Ohio Rules of Criminal Procedure*, if a witness uses a writing to refresh his memory for the purpose of testifying, either: (1) while testifying; or (2) before testifying, if the court in its discretion determines it is necessary in the interests [\*\*439] of justice, an *adverse* party is entitled to have the writing produced at the hearing. He is also entitled to inspect it, to cross-examine the witness thereon, and to introduce in evidence those portions which relate to the testimony of the witness." (Emphasis added.)

It is clear, however, that *Evid.R. 612* only allows an *adverse* party to introduce the [\*\*\*15] writing into evidence. Here, Trooper March was the state's witness and, therefore, the state was not permitted to have the report admitted on the basis of *Evid.R. 612*.

[HN5] *Evid.R. 802* excludes the admission of hearsay unless otherwise provided for in the rules. *Evid.R. 803* consists of a list of twenty-two exceptions to the general rule that hearsay is inadmissible. *Evid.R. 803(8)* includes, as one of the exceptions:

"Records, reports, statements, or data compilations, in any form, of public offices or agencies,

130 Ohio App. 3d 789, \*797; 721 N.E.2d 433, \*\*439;  
1998 Ohio App. LEXIS 6149, \*\*\*15

setting forth (a) the activities of the office or agency, or (b) matters observed pursuant to duty imposed by law as to which matters there was a duty to report, excluding, however, in criminal cases matters observed by police officers and other law enforcement personnel, *unless offered by defendant*, unless the sources of information or other circumstances indicate lack of trustworthiness." (Emphasis added.)

As interpreted by the Supreme Court of Ohio in *State v. Ward* (1984), 15 Ohio St. 3d 355, at 358, 474 N.E.2d 300, Evid.R. 803(8) "prohibits the introduction of reports which recite an officer's observations or criminal [\*798] activities or observations made as part of [\*\*\*16] an investigation of criminal activities," unless, of course, offered by the defendant.

Based upon this analysis, it was an abuse of discretion for the trial court to admit the arresting officer's report into evidence. Appellant's fourth assignment of error is sustained.

In the fifth assignment of error, appellant asserts that the trial court erred when it denied her motion to strike Trooper March's testimony regarding the results of the HGN test on the basis that no foundation had been laid. Specifically, appellant maintains that Trooper March was not properly qualified to administer the HGN test and that, in fact, he did not follow the proper procedures when he administered the test to appellant.

The Supreme Court of Ohio has held:

"[HN6] A properly qualified officer may testify at trial regarding a driver's performance on the horizontal gaze nystagmus test as it pertains to the issues of probable cause to arrest and whether the driver was operating a vehicle while under the influence of alcohol. See *R.C. 4511.19(A)(1)*. However, such testimony may not be admitted to show what the exact alcohol concentration level of the driver was for purposes of demonstrating a violation of *R.C. [\*\*\*17] 4511.19(A)(2), (3), or (4)*." *State v. Bresson* (1990), 51 Ohio St. 3d 123, 554 N.E.2d 1330, syllabus.

A review of the testimony given by Trooper March demonstrates that it fit within the guidelines of *Bresson*. While the trooper admitted that he had not been trained in administering an HGN test in three and one-half years, and had not read the field sobriety testing policy written by the Ohio State Highway Patrol in over a year, he was able to demonstrate extensive knowledge of the testing procedures and he offered his opinion regarding appellant's level of intoxication. Moreover, the HGN test was just one test administered by Trooper March. Two other field sobriety tests were given to appellant, and, in the opinion of Trooper March, she failed them both. Under the facts of the present case, we see no prejudicial error in the admission of the testimony of the arresting officer regarding the HGN test based on a perceived lack of foundation. The procedural defects brought out on cross-examination affect the credibility of the witness, not the admissibility of the evidence. Appellant's [\*440] fifth assignment of error is without merit.

In the sixth assignment of error, appellant argues [\*\*\*18] that the trial court abused its discretion when it denied her motion to strike Trooper March's testimony regarding the results of the HGN test since the results were irrelevant in a prosecution under *R.C. 4511.19(A)(1)*. It is appellant's contention that while the results of the HGN test would be relevant in a prosecution under *R.C. 4511.19(A)(3)* since a police officer can use an HGN test to predict the blood-alcohol level of a suspect, the results are [\*799] irrelevant in the present case because no relationship was established between the results of an HGN test and impaired driving.

This is a unique argument but one that is clearly without merit. Pursuant to the Supreme Court's decision in *Bresson*, [HN7] HGN testing can be used to establish probable cause as to whether a person is driving under the influence of alcohol because there is a correlation between blood-alcohol concentration and nystagmus. *Bresson*, 51 Ohio St. 3d at 124-125. Additionally, the court stated that according to the United States Department of Transportation, "the HGN test is the single most accurate field test to use in determining whether a person is alcohol impaired." *Id.* at 125. Thus, the logical conclusion is that an HGN test [\*\*\*19] is one of several valid tools that can be used to indicate whether a person has been driving while alcohol impaired, in violation of *R.C. 4511.19(A)(1)*.

130 Ohio App. 3d 789, \*799; 721 N.E.2d 433, \*\*440;  
1998 Ohio App. LEXIS 6149, \*\*\*19

Based upon the foregoing, the trial court did not abuse its discretion when it denied appellant's motion to strike Trooper March's testimony regarding the results of the HGN test. Appellant's sixth assignment of error is without merit.

In the seventh assignment of error, appellant contends that there was insufficient evidence to support her conviction on the charge of failing to signal before executing a turn. "A challenge to the sufficiency of the evidence is quantitatively and qualitatively different from a challenge to the weight of the evidence." *State v. Longmire* (Dec. 19, 1997), 1997 Ohio App. LEXIS 5744, Portage App. No. 97-P-0024, unreported, at 3. This difference was addressed by the Supreme Court of Ohio in *State v. Thompkins* (1997), 78 Ohio St. 3d 380, 678 N.E.2d 541. There, the court explained the concept of sufficiency of the evidence as follows:

"In essence, sufficiency is a test of adequacy. Whether the evidence is legally sufficient to sustain a verdict is a question of law. *State v. Robinson* (1955), 162 Ohio St. 486, 55 Ohio Op. [\*\*\*20] 388, 124 N.E.2d 148." 78 Ohio St. 3d at 386.

In the instant cause, appellant was found guilty of violating [HN8] *R.C. 4511.39* which provides, in pertinent part:

"No person shall turn a vehicle or trackless trolley or move right or left upon a highway unless and until such person has exercised due care to ascertain that the movement can be made with reasonable safety nor without giving an appropriate signal in the manner hereinafter provided.

"When required, a signal of intention to turn or move right or left shall be given continuously during not less than the last one hundred feet traveled by the vehicle or trackless trolley before turning."

[\*800] Appellant asserts that the statute in question only requires the use of a turn signal before turning when another car will be affected by the maneuver. While appellant admits she did not use her turn signal, she concludes that since no other car was affected by her maneuver, she did not violate *R.C. 4511.39*. This argument was previously made and rejected in *State v. Lowman* (1992), 82 Ohio App. 3d 831, 613 N.E.2d 692. The Twelfth District Court of Appeals reasoned as follows:

"The first paragraph of *R.C. 4511.39* sets forth two [\*\*\*21] distinct duties. It embodies a requirement of reasonable care in changing directions in traffic *and* a requirement to use a signal. The statute says that a driver may not change direction until he [\*\*441] has ascertained 'that the movement can be made with reasonable safety *nor* without giving an appropriate signal \*\*\*.' (Emphasis added.) The signal requirement is set forth in absolute terms and is not modified by the language mandating reasonableness in changing directions.

"Further, because it is followed by the phrase 'in the manner hereinafter provided' the term 'appropriate signal' must be seen as describing the mechanics of giving the signal itself, and not as referring to the situation in which the signal is required. The fact that the legislature required the use of an 'appropriate signal' cannot be construed as making the use of such signal contingent upon traffic conditions. Similarly, the phrase 'when required' simply refers to a situation in which the driver intends to change direction on the roadway. The phrase refers to the signal requirement as set forth in the first paragraph of the statute, and again there is no indication that this language was intended to make the [\*\*\*22] requirement conditional. The legislature could have chosen a term such as 'when reasonable,' but it did not do so. We decline to read such language into the section." (Emphasis added.) *Id.* at 835.

We agree with the foregoing opinion. Accordingly, appellant's conviction for violating *R.C. 4511.39* was supported by sufficient evidence. Appellant's seventh assignment of error is without merit.

Based on the foregoing analysis, appellant's conviction on the charge of driving under the influence of alcohol is reversed and the matter remanded for a new trial on that charge. However, appellant's conviction on the charge of failing to signal before making a turn is affirmed.

JUDGE WILLIAM M. O'NEILL

CHRISTLEY, P.J., dissents with Dissenting Opinion,

[\*801] NADER, J., concurs.

**DISSENT BY: JUDITH A. CHRISTLEY**

**DISSENT:**

DISSENTING OPINION

CHRISTLEY, P.J.

I respectfully dissent from the majority's analysis and conclusion in reference to the second and fourth assignments of error.

As to the second assignment of error, the issue of the admission of appellant's signature on her driver's license, I would agree that the trial court's blanket rejection of the offer of the signature is incorrect. [\*\*\*23] Certainly, when a proper foundation had been laid, a signature analysis could indeed have been relevant to show the degree of physical impairment of the signature's author. However, the record in the instant case did not show that any such foundation was laid. There was no proffer of the opinion of an expert; there was no comparative signature offered; in other words, there was no evidence put forth or proffered which would support the claims of appellant as to relevancy.

I disagree strongly with the majority that the jury would be qualified to draw a conclusion that, because a single signature appeared to be neat and legible, *ergo*, the writer was sober. It would require an inference on an inference; *i.e.*, the signature was the writer's normal signature, and a neat and legible signature could only be produced if the writer was sober. Without a foundation or a proffer of such a foundation, I believe the trial court was correct in disallowing the signature from evidence. The end result was therefore the right conclusion, albeit for the wrong reason. I would therefore affirm as to the second assignment.

As to the fourth assignment, I concur with the majority's conclusion that [\*\*\*24] the admission of the report was error. However, I would find it to be harmless error because all of the relevant material in the report was, in fact, testified to by Trooper March. Thus, there were no prejudicial revelations beyond those to which he had already testified.

[\*\*442] The pertinent provisions of Ohio Rules of Evidence discussed herein. *Evid.R. 612* reads in part:

"Writing Used to Refresh Memory. Except as otherwise provided in criminal proceedings by *Rule 16(B)(1)(g) and 16(C)(1)(d) of Ohio Rules of Criminal Procedure*, if a witness uses a writing to refresh his memory for the purpose of testifying, either: (1) while testifying; or (2) before testifying, if the court in its discretion determines it is necessary in the interests of justice, an adverse party is entitled to have the writing produced at the hearing. He is also entitled to inspect it, to cross-examine the witness thereon, and to introduce in evidence those portions which relate to the testimony of the witness. If it is claimed that [\*802] the writing contains matters not related to the subject matter of the testimony the court shall examine the writing in camera, excise any portions not so related, [\*\*\*25] and order delivery of the remainder to the party entitled thereto. \* \* \*"

*Evid.R. 803(8)* reads:

"Hearsay Exceptions; Availability of the Declarant Immaterial. The following are not excluded by the hearsay rule, even though the declarant is available as a witness:

\*\*\*

"(8) *Public records and reports.* Records, reports, statements, or data compilations, in any form, of public offices or agencies, setting forth (a) the activities of the office or agency, or (b) matters observed pursuant to duty imposed by law as to which matters there was a duty to report, excluding, however, in criminal cases matters observed by police officers and other law enforcement personnel, unless offered by defendant, unless the sources of information or other circumstances indicate lack of trustworthiness."

In the case at bar, during the state's direct examination of Trooper March, the state first utilized the report to refresh his memory. The report was entitled "Ohio State Highway Patrol Impaired Driver Report" and was marked "State's Exhibit C." Pursuant to *Evid.R. 612*, appellant's counsel was then given the opportunity to inspect the report and to utilize it in the defense's cross-examination [\*\*\*26] of Trooper March. No party has disputed the propriety of these actions.

During cross-examination, the defense attempted to attack the accuracy of Trooper March's observations of appellant, thereby calling into question the trooper's credibility. During this process, the defense made several references to Trooper March's report. When defense counsel was referring to the contents of the report, Trooper March again admitted that he could not presently recollect all of his prior observations without the assistance of the report. Defense counsel thereafter showed Trooper March portions of the report and repeated the questions. The state did not object when defense counsel used the report in this fashion.

At the close of the state's case, the state offered State's Exhibit C, the report, into evidence. Defense counsel objected on the grounds that *Evid.R. 803(8)* permitted the introduction of the report only when *the defense* was the party offering it into evidence. The trial court rejected this argument and overruled defense counsel's objections on two grounds. First, the trial court stated that because defense counsel also used the report to refresh Trooper March's memory, the opportunity [\*\*\*27] to introduce the report shifted back to the state. Under this interpretation of the rule, the state then became the adverse party referenced in *Evid.R. 612*. Second, the trial court characterized the report as a test outcome or [\*803] a test score rather than an investigative report, thereby holding that it was admissible pursuant to *Evid.R. 803(8)*.

At the outset, I believe that the trial court misapplied *Evid.R. 612* in this case. Here, the adverse party referenced in the rule is the defense. The state was the original party whose witness needed to have his memory refreshed on direct examination [\*\*443] with the report. In accordance with *Evid.R. 612*, the adverse party was then the defense. As indicated above, the defense was then entitled to inspect the report and to utilize the report in cross-examination. n1 The defense did so. If the defense had thereafter desired to move the court to introduce the report into evidence, it could have done so. However, the defense did not.

n1 Here, I note that the state made no objection to the defense inspecting the report.

[\*\*\*28]

Nevertheless, the trial court determined that the provision of *Evid.R. 612* regarding the opportunity to introduce evidence somehow shifted when the defense allowed Trooper March to review the report to refresh his memory during cross-examination.

Irrespective of the fact that I find no authority for such an interpretation, I do not perceive that the defense's use of the report resulted in a shift of who was considered the adverse party. Instead, the defense simply used the report to cross-examine the witness as it was permitted to do under *Evid.R. 612*. n2 Indeed, the defense's primary objective was to call into question the witness' credibility; the fact that Trooper March could not recall presently his prior observations in the report did not change that objective.

130 Ohio App. 3d 789, \*803; 721 N.E.2d 433, \*\*443;  
1998 Ohio App. LEXIS 6149, \*\*\*28

n2 It would appear from *State v. Goff* (1998), 82 Ohio St. 3d 123, 136-137, 694 N.E.2d 916, that the defense could be the first party to use a document to refresh a witness' memory on cross-examination.

The purpose of the rule would not be [\*\*\*29] well-served if the state could prevent the original adverse party from thoroughly cross-examining a witness out of concern that such an inquiry might result in the state being able to admit the report.

Thus, as the report was first used to refresh the state's witness on the state's direct examination of that witness, the defense remained the adverse party, the only one who was entitled to move the court to introduce the report into evidence. Because the defense did not do so, the report should not have come in under *Evid.R. 612*.

Moreover, when a document which has been used to refresh a witness' recollection is submitted to the jury pursuant to *Evid.R. 612*, the document is not being offered as substantive evidence. Weissenberger, *Ohio Evidence* (1998) 285-286, Section 612.4. *Dayton v. Combs* (1993), 94 Ohio App. 3d 291, 298, 640 N.E.2d 863. Instead, it is being offered as a basis to evaluate the testimony of the [\*804] witness. Thus, unless the document had some other basis for admissibility as substantive evidence, the trial court should have instructed the jury to consider the document only for the limited purpose of assessing credibility. Weissenberger. No such charge was given to the [\*\*\*30] jury in the case at bar.

I also believe that the trial court erred when it held, in the alternative, that the report was admissible as a test score under *Evid.R. 803(8)*. In this regard, the Supreme Court of Ohio has held that *Evid.R. 803(8)* "prohibits the introduction of reports which recite an officer's observations of criminal activities or observations made as part of an investigation of criminal activities. \*\*\* [It] does not prohibit introduction of records of a routine, intra-police, or machine maintenance nature, such as intoxilyzer calibration logs." *State v. Ward* (1984), 15 Ohio St. 3d 355, 358, 474 N.E.2d 300.

By characterizing the report as a test score, the trial court was attempting to classify the report in the second admissible category of records, such as intoxilyzer calibration logs. However, it is obvious that the report contains Trooper March's observations of criminal activities made during his investigation in the case. For example, Trooper March indicated on the report that appellant had a moderate odor of alcoholic beverage about her person, [\*\*\*444] that her speech was slow, and that she failed various field sobriety tests. This report is not a record of a routine, [\*\*\*31] intra-police, or machine maintenance nature. It is, rather, a document containing the individual observations Trooper March made during his criminal investigation of appellant.

Other Ohio appellate courts have also found the "Ohio State Highway Patrol Impaired Driver Report" to be inadmissible under *Evid.R. 803(8)*. *State v. Joyce* (June 12, 1998), Hamilton App. No. C-970642, unreported, 1998 Ohio App. LEXIS 2566; *State v. McDaniel* (Feb. 21, 1995), Meigs App. No. 94CA08, unreported, 1995 Ohio App. LEXIS 716.

If the trial court erred by admitting State's Exhibit C into evidence, the query turns to whether the error was harmless beyond a reasonable doubt. I believe it was harmless error because it was merely cumulative of the officer's testimony. As previously indicated, there were no additional prejudicial revelations for which there had not already been testimony. Thus, there is no merit to this assignment.

Based upon my analysis concerning the second and fourth assignments of error, I would affirm the trial court's judgment in this matter.

**COURT OF APPEALS OF OHIO, ELEVENTH APPELLATE DISTRICT,  
GEAUGA COUNTY**

*1997 Ohio App. LEXIS 4418*

**September 30, 1997, Decided**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal Appeal from Chardon Municipal Court. Case No. 96 TRC 4146.

**DISPOSITION:**

JUDGMENT: Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** By an accelerated appeal from the Chardon Municipal Court (Ohio), defendant challenged the judgment convicting him of operating a motor vehicle under the influence of alcohol.

**OVERVIEW:** Defendant's vehicle crossed the white, solid line and travelled off the road numerous times. An officer stopped defendant's car. At the police station a blood alcohol test was administered, which showed that defendant was over the legal limit. At trial, defendant sought to suppress all evidence flowing from the vehicle stop and to suppress the test results. The trial court declined to suppress the evidence. Defendant then pleaded no contest to operating a motor vehicle while under the influence of alcohol. On appeal, defendant asserted error in the failure to suppress all evidence obtained as a result of a warrantless and unreasonable vehicle stop and in the denial of defendant's motion to suppress the test result generated by a machine that had not been calibrated with a properly certified calibration test solution. The court rejected both arguments, and affirmed defendant's conviction. The officer had probable cause to stop defendant's car when defendant had committed a minor traffic violation, failure to drive within marked lanes. Second, by pleading no contest, defendant admitted to the truth of the underlying facts. He suffered no prejudice as a result of any flaw in the test.

**OUTCOME:** The court affirmed defendant's conviction.

**CORE TERMS:** certificate, calibration, motor vehicle, lane, influence of alcohol, regulations, breath, assignment of

error, probable cause, violating, contest, alcohol, drive, ethyl alcohol, traveling, eastbound, noticed, testing, exited, articulable suspicion, substantially comply, traffic violation, suspension, corrected, suppress, pleaded, marked, flaw, edge, tires

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN1] The Supreme Court of Ohio has held that where an officer has an articulable reasonable suspicion or probable cause to stop a motorist for any criminal violation, including a minor traffic violation, the stop is constitutionally valid regardless of the officer's underlying subjective intent or motivation for stopping the vehicle in question.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

#### ***Evidence > Scientific Evidence > Blood Alcohol***

#### ***Evidence > Scientific Evidence > Sobriety Tests***

[HN2] In order for the results of a breath alcohol test to be admissible evidence, the testing procedures and equipment must substantially comply with Ohio Department of Health regulations.

**OPINION BY:** DONALD R. FORD

### **OPINION:**

#### **OPINION**

FORD, P.J.

This is an accelerated appeal from the Chardon Municipal Court. Appellant, Thomas M. Grabner, appeals from a judgment entry convicting him of operating a motor vehicle under the influence of alcohol, *R.C. 4511.19(A)(1)*.

At approximately 12:43 a.m. on May 26, 1996, Patrolman Frank Chickos ("Chickos") of the Bainbridge Police Department was traveling westbound on U.S. Route 422 when he noticed appellant's automobile traveling eastbound at a low rate of speed. Chickos then activated the radar unit in his cruiser, which indicated that appellant's vehicle was traveling forty-five m.p.h. in a zone where the speed limit was sixty-five m.p.h. [\*2] Chickos then turned around in the grass median between the eastbound and westbound lanes. Before Chickos proceeded eastbound, he noticed appellant's vehicle, which was in the right lane, cross the white solid line on the right side of the highway. Chickos then observed appellant's automobile travel off the right side of the road two more times.

At this point, Chickos engaged his overhead emergency lights to stop appellant's vehicle, but appellant failed to

stop. Chickos then activated his emergency siren and appellant did not stop then either. Eventually, appellant exited from the highway and stopped at the end of the exit ramp at State Route 306. After stopping, Chickos exited his vehicle and began to walk toward appellant's automobile. Appellant then drove away and proceeded southbound on State Route 306. Chickos pursued and, by using the public address speaker in his cruiser, ordered appellant to pull over. After turning onto another road, appellant finally stopped.

As Chickos approached, appellant exited his vehicle, with his pants positioned around his knees. Appellant informed Chickos that he had just taken his girlfriend home. Chickos observed that appellant's speech was slurred, [\*3] that his eyes were bloodshot, and that his balance was poor. Upon Chickos' instruction, appellant pulled up his pants and sat in his automobile. Shortly thereafter, Sergeant Alan Lynn and Patrolman Robert Rank of the Bainbridge Police Department arrived at the scene.

Chickos asked appellant for his driver's license, which appellant was unable to locate after a lengthy search of his wallet. Chickos then requested appellant to perform several field sobriety tests. First, appellant could not recite the alphabet. Second, appellant was unable to stand on one foot for thirty seconds. Third, appellant performed poorly on the walk-and-turn test. Finally, appellant failed the horizontal gaze nystagmus test. At that point, appellant was placed under arrest. Appellant resisted being handcuffed and receiving a pat-down search. During his arrest, appellant was hostile toward the officers and repeatedly insulted them.

Upon arrival at the Bainbridge Police Department, Chickos observed appellant for twenty minutes and then administered a BAC DataMaster test. After two failed attempts, appellant submitted a valid sample and the test showed that he had a breath-alcohol concentration of .304 grams [\*4] by weight of alcohol per two hundred ten liters of breath.

At that time, appellant was issued citations for the following violations: failure to drive within marked lanes, *R.C. 4511.33(A)*; operating a motor vehicle under Financial Responsibility Act suspension, *R.C. 4507.02(B)*; operating a motor vehicle while under a twelve-point court suspension, *R.C. 4507.02(D)*; operating a motor vehicle with a prohibited concentration of alcohol in his breath, *R.C. 4511.19(A)(3)*; and operating a motor vehicle while under the influence of alcohol, *R.C. 4511.19(A)(1)*.

In a judgment entry filed on May 29, 1996, the trial court ordered that appellant's driver's license be suspended pending the outcome of this matter. On July 2, 1996, appellant moved to suppress all evidence flowing from the stop of his vehicle and to suppress the results of appellant's BAC DataMaster test, because the test was not administered according to Ohio Department of Health regulations. The trial court overruled appellant's motion on September 10, 1996. Appellant then pleaded no contest to violating *R.C. 4511.19(A)(1)*, and the court found him guilty on that charge. The court dismissed the other charges, and stayed appellant's [\*5] sentence pending this appeal.

On appeal, appellant now raises the following as error:

"[1.] The trial court erred to the prejudice of [appellant] in overruling his motion to suppress all evidence obtained as a result of a warrantless and unreasonable stop of [appellant's] car.

"[2.] The trial court erred to the prejudice of [appellant] when it denied his motion to suppress a chemical test result generated by a machine that had not been calibrated with a properly certified calibration test solution."

In the first assignment, appellant basically asserts that Chickos did not have the requisite articulable suspicion to conduct an investigative stop of appellant's automobile. This contention is without merit because Chickos had probable cause to stop appellant's vehicle. In *Dayton v. Erickson (1996)*, 76 Ohio St. 3d 3, 665 N.E.2d 1091, [HN1] the Supreme Court of Ohio held:

"We conclude that where an officer has an articulable reasonable suspicion or probable cause to stop a motorist for any criminal violation, including a minor traffic violation, the stop is constitutionally valid

regardless of the officer's underlying subjective intent or motivation for stopping the [\*6] vehicle in question." *Id.* at 11-12.

In the case *sub judice*, Chickos testified that appellant's tires crossed the edge line on three separate occasions. Therefore, he had probable cause to believe that appellant had committed a minor traffic violation, *i.e.*, failure to drive within marked lanes, *R.C. 4511.33(A)*, which obviously would rise above the crest of an articulable suspicion to stop. Thus, pursuant to the holding of *Erickson*, Chickos' stop of appellant's vehicle was justified by appellant's lane violation. n1 Appellant's first assignment of error is without merit.

n1 Although appellant asserts that Chickos elected to stop appellant's vehicle when he first observed him drive forty-five m.p.h. in a sixty-five m.p.h. zone at 12:43 a.m., Chickos' testimony reveals that he decided to stop appellant's automobile only after he noticed appellant's tires cross the right edge line three times.

In the second assignment of error, appellant asserts that since the certificate relied on by the officer [\*7] in calibrating the BAC DataMaster was not in compliance with Ohio Department of Health regulations, the results of appellant's breath-alcohol test are unreliable and therefore must be suppressed. The certificate sent from the Ohio Department of Health to the Bainbridge Police Department states: "This calibration solution contains 1.21 +/- 2%mg/mL ethyl alcohol in distilled water." Thus, appellant asserts that the plus or minus two percent language of the certificate rendered it useless as the basis for testing to a target value.

Appellant's contention is not well-founded, because he suffered no prejudice as a result of any alleged noncompliance with Ohio Department of Health Regulations. Although appellant was given a citation for violating both *R.C. 4511.19(A)(1)* and (A)(3), he pleaded no contest to *R.C. 4511.19(A)(1)*, operating a vehicle under the influence of alcohol, and was found guilty of violating that statute. By pleading no contest, appellant admitted to the truth of the underlying facts upon which the citation for the *R.C. 4511.19(A)(1)* violation was predicated. *Crim.R. 11(B)(2)*. Since a prohibited amount of alcohol on an individual's breath is not a necessary element of [\*8] operating a motor vehicle under the influence of alcohol, *R.C. 4511.19(A)(1)*, appellant suffered no prejudice as a result of any flaw in the BAC DataMaster test. Additionally, there is no prejudice to appellant with respect to the *R.C. 4511.19(A)(3)* charge since that citation was dismissed by the trial court.

Although appellant has suffered no harm as a result of any alleged flaw in the calibration certificate from the Department of Health, we will briefly address the merits of the second assignment. [HN2] In order for the results of a breath alcohol test to be admissible evidence, the testing procedures and equipment must substantially comply with Ohio Department of Health regulations. *State v. Hominsky (1995), 107 Ohio App. 3d 787, 795, 669 N.E.2d 523.*

Sergeant Ian Michael Bachovich ("Bachovich") of the Bainbridge Police Department testified at the suppression hearing. He stated that he was responsible for conducting calibration checks on the department's BAC DataMaster. He further testified that he performed the calibration checks on May 22, 1996, and on May 29, 1996. He testified that both tests resulted in a reading within the acceptable range of within plus or minus .005 of .100 [\*9] g/210L stated on the certificate.

Appellant's asserts that the "+/- 2%" listed on the certificate renders his BAC DataMaster test result inadmissible. We disagree. As the trial court noted, appellant has failed to demonstrate any prejudice suffered as a result of the extraneous percentage added to the amount of ethyl alcohol in the solution. Furthermore, the error makes no reference to the target values and there is no evidence indicating that the testing solution was anything other than 1.21 mg/mL ethyl alcohol in distilled water. Therefore, we conclude that the "+/- 2%" on the calibration certificate fails to raise any serious doubt regarding the reliability of the BAC DataMaster test. Accordingly, we hold that the calibration tests of the BAC DataMaster substantially comply with the Department of Health regulations. Appellant's second assignment of error is not well-taken. n2

n2 Parenthetically, we note that the trial court stated in its judgment entry that "the Department of Health sent a corrected certificate issued February 29, 1996[,] deleting the '+/-2%' from the certificate dated February 16, 1996." There is no evidence in the record of the correction. Bachovich, who testified concerning the calibration tests, stated that he never received a corrected certificate. Thus, this finding of the trial court was not supported by competent, credible evidence. See *C. E. Morris Co. v. Foley Constr. Co.* (1978), *54 Ohio St. 2d 279, 376 N.E.2d 578*.

[\*10]

For the foregoing reasons, appellant's assignments of error are without merit. The judgment of the Chardon Municipal Court is affirmed.

**OPINION:**

**OPINION**

FORD, P.J.

This is an accelerated appeal from the Chardon Municipal Court. Appellant, Thomas M. Grabner, appeals from a judgment entry convicting him of operating a motor vehicle under the influence of alcohol, *R.C. 4511.19(A)(1)*.

At approximately 12:43 a.m. on May 26, 1996, Patrolman Frank Chickos ("Chickos") of the Bainbridge Police Department was traveling westbound on U.S. Route 422 when he noticed appellant's automobile traveling eastbound at a low rate of speed. Chickos then activated the radar unit in his cruiser, which indicated that appellant's vehicle was traveling forty-five m.p.h. in a zone where the speed limit was sixty-five m.p.h. [\*2] Chickos then turned around in the grass median between the eastbound and westbound lanes. Before Chickos proceeded eastbound, he noticed appellant's vehicle, which was in the right lane, cross the white solid line on the right side of the highway. Chickos then observed appellant's automobile travel off the right side of the road two more times.

At this point, Chickos engaged his overhead emergency lights to stop appellant's vehicle, but appellant failed to

stop. Chickos then activated his emergency siren and appellant did not stop then either. Eventually, appellant exited from the highway and stopped at the end of the exit ramp at State Route 306. After stopping, Chickos exited his vehicle and began to walk toward appellant's automobile. Appellant then drove away and proceeded southbound on State Route 306. Chickos pursued and, by using the public address speaker in his cruiser, ordered appellant to pull over. After turning onto another road, appellant finally stopped.

As Chickos approached, appellant exited his vehicle, with his pants positioned around his knees. Appellant informed Chickos that he had just taken his girlfriend home. Chickos observed that appellant's speech was slurred, [\*3] that his eyes were bloodshot, and that his balance was poor. Upon Chickos' instruction, appellant pulled up his pants and sat in his automobile. Shortly thereafter, Sergeant Alan Lynn and Patrolman Robert Rank of the Bainbridge Police Department arrived at the scene.

Chickos asked appellant for his driver's license, which appellant was unable to locate after a lengthy search of his wallet. Chickos then requested appellant to perform several field sobriety tests. First, appellant could not recite the alphabet. Second, appellant was unable to stand on one foot for thirty seconds. Third, appellant performed poorly on the walk-and-turn test. Finally, appellant failed the horizontal gaze nystagmus test. At that point, appellant was placed under arrest. Appellant resisted being handcuffed and receiving a pat-down search. During his arrest, appellant was hostile toward the officers and repeatedly insulted them.

Upon arrival at the Bainbridge Police Department, Chickos observed appellant for twenty minutes and then administered a BAC DataMaster test. After two failed attempts, appellant submitted a valid sample and the test showed that he had a breath-alcohol concentration of .304 grams [\*4] by weight of alcohol per two hundred ten liters of breath.

At that time, appellant was issued citations for the following violations: failure to drive within marked lanes, *R.C. 4511.33(A)*; operating a motor vehicle under Financial Responsibility Act suspension, *R.C. 4507.02(B)*; operating a motor vehicle while under a twelve-point court suspension, *R.C. 4507.02(D)*; operating a motor vehicle with a prohibited concentration of alcohol in his breath, *R.C. 4511.19(A)(3)*; and operating a motor vehicle while under the influence of alcohol, *R.C. 4511.19(A)(1)*.

In a judgment entry filed on May 29, 1996, the trial court ordered that appellant's driver's license be suspended pending the outcome of this matter. On July 2, 1996, appellant moved to suppress all evidence flowing from the stop of his vehicle and to suppress the results of appellant's BAC DataMaster test, because the test was not administered according to Ohio Department of Health regulations. The trial court overruled appellant's motion on September 10, 1996. Appellant then pleaded no contest to violating *R.C. 4511.19(A)(1)*, and the court found him guilty on that charge. The court dismissed the other charges, and stayed appellant's [\*5] sentence pending this appeal.

On appeal, appellant now raises the following as error:

"[1.] The trial court erred to the prejudice of [appellant] in overruling his motion to suppress all evidence obtained as a result of a warrantless and unreasonable stop of [appellant's] car.

"[2.] The trial court erred to the prejudice of [appellant] when it denied his motion to suppress a chemical test result generated by a machine that had not been calibrated with a properly certified calibration test solution."

In the first assignment, appellant basically asserts that Chickos did not have the requisite articulable suspicion to conduct an investigative stop of appellant's automobile. This contention is without merit because Chickos had probable cause to stop appellant's vehicle. In *Dayton v. Erickson (1996)*, 76 Ohio St. 3d 3, 665 N.E.2d 1091, [HN1] the Supreme Court of Ohio held:

"We conclude that where an officer has an articulable reasonable suspicion or probable cause to stop a motorist for any criminal violation, including a minor traffic violation, the stop is constitutionally valid

regardless of the officer's underlying subjective intent or motivation for stopping the [\*6] vehicle in question." *Id.* at 11-12.

In the case *sub judice*, Chickos testified that appellant's tires crossed the edge line on three separate occasions. Therefore, he had probable cause to believe that appellant had committed a minor traffic violation, *i.e.*, failure to drive within marked lanes, *R.C. 4511.33(A)*, which obviously would rise above the crest of an articulable suspicion to stop. Thus, pursuant to the holding of *Erickson*, Chickos' stop of appellant's vehicle was justified by appellant's lane violation. n1 Appellant's first assignment of error is without merit.

n1 Although appellant asserts that Chickos elected to stop appellant's vehicle when he first observed him drive forty-five m.p.h. in a sixty-five m.p.h. zone at 12:43 a.m., Chickos' testimony reveals that he decided to stop appellant's automobile only after he noticed appellant's tires cross the right edge line three times.

In the second assignment of error, appellant asserts that since the certificate relied on by the officer [\*7] in calibrating the BAC DataMaster was not in compliance with Ohio Department of Health regulations, the results of appellant's breath-alcohol test are unreliable and therefore must be suppressed. The certificate sent from the Ohio Department of Health to the Bainbridge Police Department states: "This calibration solution contains 1.21 +/- 2%mg/mL ethyl alcohol in distilled water." Thus, appellant asserts that the plus or minus two percent language of the certificate rendered it useless as the basis for testing to a target value.

Appellant's contention is not well-founded, because he suffered no prejudice as a result of any alleged noncompliance with Ohio Department of Health Regulations. Although appellant was given a citation for violating both *R.C. 4511.19(A)(1)* and (A)(3), he pleaded no contest to *R.C. 4511.19(A)(1)*, operating a vehicle under the influence of alcohol, and was found guilty of violating that statute. By pleading no contest, appellant admitted to the truth of the underlying facts upon which the citation for the *R.C. 4511.19(A)(1)* violation was predicated. *Crim.R. 11(B)(2)*. Since a prohibited amount of alcohol on an individual's breath is not a necessary element of [\*8] operating a motor vehicle under the influence of alcohol, *R.C. 4511.19(A)(1)*, appellant suffered no prejudice as a result of any flaw in the BAC DataMaster test. Additionally, there is no prejudice to appellant with respect to the *R.C. 4511.19(A)(3)* charge since that citation was dismissed by the trial court.

Although appellant has suffered no harm as a result of any alleged flaw in the calibration certificate from the Department of Health, we will briefly address the merits of the second assignment. [HN2] In order for the results of a breath alcohol test to be admissible evidence, the testing procedures and equipment must substantially comply with Ohio Department of Health regulations. *State v. Hominsky (1995), 107 Ohio App. 3d 787, 795, 669 N.E.2d 523.*

Sergeant Ian Michael Bachovich ("Bachovich") of the Bainbridge Police Department testified at the suppression hearing. He stated that he was responsible for conducting calibration checks on the department's BAC DataMaster. He further testified that he performed the calibration checks on May 22, 1996, and on May 29, 1996. He testified that both tests resulted in a reading within the acceptable range of within plus or minus .005 of .100 [\*9] g/210L stated on the certificate.

Appellant's asserts that the "+/- 2%" listed on the certificate renders his BAC DataMaster test result inadmissible. We disagree. As the trial court noted, appellant has failed to demonstrate any prejudice suffered as a result of the extraneous percentage added to the amount of ethyl alcohol in the solution. Furthermore, the error makes no reference to the target values and there is no evidence indicating that the testing solution was anything other than 1.21 mg/mL ethyl alcohol in distilled water. Therefore, we conclude that the "+/- 2%" on the calibration certificate fails to raise any serious doubt regarding the reliability of the BAC DataMaster test. Accordingly, we hold that the calibration tests of the BAC DataMaster substantially comply with the Department of Health regulations. Appellant's second assignment of error is not well-taken. n2

n2 Parenthetically, we note that the trial court stated in its judgment entry that "the Department of Health sent a corrected certificate issued February 29, 1996[,] deleting the '+/-2%' from the certificate dated February 16, 1996." There is no evidence in the record of the correction. Bachovich, who testified concerning the calibration tests, stated that he never received a corrected certificate. Thus, this finding of the trial court was not supported by competent, credible evidence. See *C. E. Morris Co. v. Foley Constr. Co. (1978)*, 54 Ohio St. 2d 279, 376 N.E.2d 578.

[\*10]

For the foregoing reasons, appellant's assignments of error are without merit. The judgment of the Chardon Municipal Court is affirmed.

As of: Jan 31, 2007

**STATE OF OHIO, PLAINTIFF-APPELLEE v. DARYL G. DAUGHERTY,  
DEFENDANT-APPELLANT**

**CASE NO. 5-97-20**

**COURT OF APPEALS OF OHIO, THIRD APPELLATE DISTRICT, HANCOCK  
COUNTY**

*1997 Ohio App. LEXIS 4278*

**September 17, 1997, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal appeal from Municipal Court.

**DISPOSITION:**

JUDGMENT: Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a decision of the Findlay Municipal Court (Ohio), that convicted him of speeding. Defendant asserted that the court erred when it admitted evidence of a radar test into trial pursuant to *Ohio Rev. Code Ann. § 4511.091*, that it erred by admitting testimony of the arresting officer regarding the results of those radar observations, and that the court's decision ran against the manifest weight of the evidence.

**OVERVIEW:** Defendant was convicted of speeding. That decision was affirmed by the court, which found that the trial court had not erred when it admitted evidence of a radar test into trial under *Ohio Rev. Code Ann. § 4511.091*. Defendant asserted that the admission of those test results violated his due process and equal protection rights, but the court determined that defendant had not overcome the presumption of constitutionality which all statutes enjoyed. Judicial notice regarding the accuracy of a radar device could be taken by a court that had received prior expert testimony as to that device's accuracy. The court noted that testimony as to the accuracy of the device had been taken and that the state's goal of keeping its road safe was rationally met by § 4511.091. Further, the court determined that the trial court's verdict had not run against the manifest weight of the evidence as that decision had not resulted in a manifest miscarriage of justice. Weight and credibility were matters for the trier of fact to decide.

**OUTCOME:** The court affirmed defendant's conviction.

**CORE TERMS:** radar, assignment of error, judicial notice, speeding, speed, scientific, accuracy, calibration, due

process, traveling, admitting, manifest, expert testimony, arresting officer, equal protection, working order, motor vehicle, credibility, rationally, dependable, training, speeders, speed limit, confirmed, arresting, appealing, overrule, mph

### **LexisNexis(R) Headnotes**

#### ***Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation > General Overview***

[HN1] All legislative enactments enjoy a presumption of validity and constitutionality. Unless it is shown beyond a reasonable doubt that a statute violates a constitutional provision, the statute will be presumed to be constitutional.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN2] *Ohio Rev. Code Ann. § 4511.091* provides, in pertinent part: the driver of any motor vehicle which has been checked by radar to determine the speed of the motor vehicle over a measured distance of the highway and found to be in violation of any of the provisions of *Ohio Rev. Code Ann. § 4511.21* or *4511.211*, may be arrested until a warrant may be obtained, provided such officer has observed the recording of the speed of such motor vehicle by the radio microwaves, electrical or mechanical timing device.

#### ***Evidence > Judicial Notice > General Overview***

#### ***Evidence > Scientific Evidence > General Overview***

#### ***Evidence > Testimony > Experts > Criminal Trials***

[HN3] The accuracy of a radar device is a proper subject for judicial notice. However, judicial notice of the accuracy or dependability of a K-55 radar device may not be taken unless the trial court has received prior expert testimony on the accuracy of that device.

#### ***Evidence > Judicial Notice***

[HN4] A judicially noticed fact must be one not subject to reasonable dispute in that it is either (1) generally known within the trial court or (2) capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned.

#### ***Evidence > Procedural Considerations > Weight & Sufficiency***

[HN5] In determining whether a conviction is against the manifest weight of the evidence, an appellate court must review the entire record, weigh the evidence and all reasonable inferences, consider the credibility of witnesses and decide whether, in resolving conflicts of evidence, the trier of fact clearly lost its way and created such a manifest miscarriage of justice that the conviction must be reversed.

#### ***Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > General Overview***

#### ***Evidence > Procedural Considerations > Weight & Sufficiency***

[HN6] The weight and credibility of witnesses are matters to be determined by the trier of facts.

### **COUNSEL:**

MR. WILLIAM E. CLARK, Attorney at Law, Reg. No. 0006702, Findlay, Ohio, For Appellant.

**JUDGES:** HADLEY, J. BRYANT and SHAW, JJ., concur.

**OPINION BY:** HADLEY

**OPINION:**

OPINION

**HADLEY, J.** Daryl G. Daugherty ("appellant") is appealing his speeding conviction in the Findlay Municipal Court. For the following reasons, we affirm appellant's conviction.

The facts of the case arose when on April 21, 1997, appellant was driving south on County Road 140 while en route to work. Appellant passed an Ohio State Patrolman traveling north on County Road 140. The officer turned around and followed appellant. Using a K-55 radar device, the officer determined that appellant was traveling 66 mph in a 55 mph zone. Consequently, the officer stopped appellant and cited him for speeding.

Appellant entered a not guilty plea and filed a Motion in Limine requesting that the evidence obtained by radar be excluded from his trial. Appellant argued that it was a denial of due process and equal protection of law for the court [\*2] to allow the introduction of radar tests when no independent agency certified either that type of test or the operator of such devices.

On May 7, 1997, the trial court overruled appellant's motion. That same day, appellant's case proceeded to trial on the citation. The State offered evidence of appellant's speed as calculated by radar. At the conclusion of the trial, the court found appellant guilty of speeding. The court fined appellant \$ 30.00 plus court costs.

A judgment entry was filed on May 20, 1997. It is from this sentence and conviction that appellant is appealing the following three assignments of error.

**ASSIGNMENT OF ERROR NO.1**

**The trial court erred in overruling the appellant's motion in limine and allowing the introduction of result of K-55 radar.**

In his first assignment of error, appellant argues that the admission of the K-55 radar results was a violation of his due process and equal protection rights. Therefore, the trial court erred in admitting those results. We conclude that the K-55 radar results were properly admitted and consequently, affirm the trial court for the following reasons.

We begin our analysis by noting that [HN1] all legislative enactments [\*3] enjoy a presumption of validity and constitutionality. *Adamsky v. Buckeye Local School Dist.* (1995), 73 Ohio St. 3d 360, 361, 653 N.E.2d 212; *Sedar v. Knowlton Constr. Co.* (1990), 49 Ohio St. 3d 193, 199, 551 N.E.2d 938, overruled on other grounds, *Brenneman v. R.M.I. Co.* (1994), 70 Ohio St. 3d 460, 639 N.E.2d 425; *Hardy v. VerMeulen* (1987), 32 Ohio St. 3d 45, 48, 512 N.E.2d 626, cert. denied (1988), 484 U.S. 1066, 98 L. Ed. 2d 993, 108 S. Ct. 1029. Unless it is shown beyond a reasonable doubt that a statute violates a constitutional provision, the statute will be presumed to be constitutional. *State ex rel. Herman v. Klopfleisch* (1995), 72 Ohio St. 3d 581, 585, 651 N.E.2d 995 citing *Fabrey v. McDonald Police Dept.* (1994), 70 Ohio St. 3d 351, 352, 639 N.E.2d 31.

*R.C. 4511.091* provides, in pertinent part:

[HN2] **The driver of any motor vehicle which has been checked by radar \* \* \* to determine the speed of the motor vehicle over a measured distance of the highway \* \* \* and found to be in violation of any of the provisions of section 4511.21 or 4511.211 or the Revised Code, may be arrested until a warrant may be obtained, provided such officer has observed the recording [\*4] of the speed of such motor vehicle by the radio microwaves, electrical or mechanical timing device \* \* \* \***

Appellant contends that *R.C. 4511.091* violates his due process rights by not providing for a neutral party overseer to administer the methods and techniques used by law enforcement agencies in their training, calibration, and testing of the K-55 radar unit. Moreover, he claims that "the manufacturers of K-55 radar devices have a pecuniary interest" in the operation of the device. Therefore, appellant concludes that his right to have his case decided by an impartial tribunal is destroyed when a trial court takes judicial notice of a radar device.

The Ohio Supreme Court has previously held that [HN3] the accuracy of a radar device is a proper subject for judicial notice. *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 154 N.E.2d 630. However, judicial notice of the accuracy or dependability of a K-55 radar device may not be taken unless the trial court has received prior expert testimony on the accuracy of that device. *State v. Colby* (1984), 14 Ohio App. 3d 291, 470 N.E.2d 924. See also *State v. Wilson* (May 6, 1982), Auglaize App. No. 2-81-24, unreported; *State v. [\*5] Doles* (1980), 70 Ohio App. 2d 35, 433 N.E.2d 1290. Moreover, the Rules of Evidence dictate that:

[HN4] **A judicially noticed fact must be one not subject to reasonable dispute in that it is either (1) generally known within the trial court or (2) capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned.**

*Evid.R. 201(B)*.

In the present case, we note that the Findlay Municipal Court has previously received expert testimony concerning the scientific principles relating to the use of K-55 radar devices and found them to be dependable. *State v. Calladine* (October 24, 1989), Case No. 89-TRD-9034, unreported. Therefore, we hold that judicial notice as to the scientific principles relating to the use of a K-55 radar device in appellant's case was appropriate. See *State v. Bechtel* (1985), 24 Ohio App. 3d 72, 73, 493 N.E.2d 318; *State v. Ayesch* (1985), 24 Ohio App. 3d 73, 74, 493 N.E.2d 325; *Kettering v. Smith* (Apr. 12, 1984), Montgomery App. No. 8383, unreported; *State v. Kinker* (Mar. 4, 1983), Huron App. No. H-82-24, unreported; and *State v. Shew* (Dec. 30, 1983), Warren App. No. CA83-04-022, unreported. [\*6]

Moreover, appellant has not been deprived of any due process rights. The record reflects that the officer testified as to the working order and operation of the radar device. He said that he had checked the calibration of the device at 8:00 a.m. and then again at 2:00 p.m. on the day that he stopped appellant. n1 He further testified that he had received three months of training in the use of K-55 radar devices. Under these circumstances we find that the trial court did not violate appellant's due process rights when it admitted the K-55 radar results.

n1 We note that appellant was stopped around 1:35 pm that afternoon.

Nor do we find that appellant's equal protection rights were violated. Contrary to appellant's assertions, we believe that the State's goal in keeping its roads safe from speeders is rationally met by *R.C. 4511.091*. That statute allows police officers to use radar devices to check the speed of potential speeders. If the radar device establishes that an individual is speeding, the police officer [\*7] can stop that vehicle and issue him or her a ticket. Every car on the road is subject to having its speed checked. Therefore, we believe that the State's goal is rationally related to the use of radar devices.

Accordingly, the trial court did not err in taking judicial notice of the scientific principles relating to the use of the K-55 radar device. Appellant's first assignment of error is therefore, overruled.

## **ASSIGNMENT OF ERROR NO.2**

**The trial court erred in admitting testimony of the arresting officer regarding the results of radar observations.**

In his second assignment of error, appellant argues that the trial court erred in admitting the arresting officer's testimony when the State offered no expert evidence that the K-55 radar device was dependable and accurate. In support of his argument, appellant cites our prior decision of *Colby, supra, at 291*.

However, in appellant's first assignment of error, we noted that the trial court had previously heard expert testimony as to the scientific principles relating to the use of K-55 radar devices in 1989. See *Calladine, supra*. Therefore, under our reasoning in *Colby, supra*, the trial court could [\*8] properly take judicial notice of the scientific principles relating to the use of a K-55 radar device in appellant's case.

Furthermore, in addition to the judicial notice, the officer testified that he was trained in operating the K-55 radar device, he had checked the device's calibration, appellant's vehicle had been visually confirmed, an audio signal verified the validity of the reading, the officer compared his own speedometer reading with the device, and he had properly operated the device. We have previously held that such "judicial notice, coupled with the evidence of the qualifications of the trooper to operate the unit, the evidence that it was in proper working order, and the evidence that it was properly operated, satisfied the requirements for the admission of the reading to show a violation of the speed statute." *State v. Ellison* (Jan. 30, 1987), Auglaize App. No. 2-85-35, unreported. Therefore, the trial court did not err in admitting the arresting officer's testimony regarding the results of the radar device.

Accordingly, we overrule appellant's second assignment of error.

#### ASSIGNMENT OF ERROR NO.3

**The decision of the trial court is against the manifest [\*9] weight of the evidence and contrary to law.**

Appellant maintains in his final assignment of error that his speeding conviction is against the manifest weight of the evidence. [HN5] In determining whether a conviction is against the manifest weight of the evidence, an appellate court must review the entire record, weigh the evidence and all reasonable inferences, consider the credibility of witnesses and decide whether, in resolving conflicts of evidence, the trier of fact clearly lost its way and created such a manifest miscarriage of justice that the conviction must be reversed. *State v. Otten* (1986), 33 Ohio App. 3d 339, 340, 515 N.E.2d 1009; *State v. Martin* (1983), 20 Ohio App. 3d 172, 175, 485 N.E.2d 717. See also *State v. Jenks* (1991), 61 Ohio St. 3d 259, 273, 574 N.E.2d 492 (holding that the relevant inquiry is whether any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt).

In the present case, the record reflects that the arresting officer testified that he observed appellant traveling at a speed greater than the posted speed limit. He estimated that appellant was traveling approximately ten miles over the [\*10] speed limit. Therefore, he activated his radar device and confirmed that appellant was speeding.

Although appellant testified that he could not have been speeding, [HN6] the weight and credibility of witnesses are matters to be determined by the trier of facts. *Seasons Coal Co., Inc. v. City of Cleveland* (1984), 10 Ohio St. 3d 77, 80, 461 N.E.2d 1273. Therefore, we must defer to the judgment of the trial court.

Furthermore, the trial court found that the arresting officer had followed the appropriate procedures, he had checked the K-55 radar device's calibration prior to, and after, stopping appellant, and the device was in working order on the date appellant was stopped. The trial court additionally took judicial notice of the K-55 radar device's accuracy. Therefore, we hold that there was sufficient evidence to sustain appellant's conviction. Accordingly, we overrule appellant's final assignment of error.

For the aforementioned reasons, we affirm the judgment of the Findlay Municipal Court.

**Judgment affirmed.**

DEFENDANT-APPELLANT**

**CASE NO. 5-97-20**

**COURT OF APPEALS OF OHIO, THIRD APPELLATE DISTRICT, HANCOCK  
COUNTY**

*1997 Ohio App. LEXIS 4278*

**September 17, 1997, Date of Judgment Entry**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal appeal from Municipal Court.

**DISPOSITION:**

JUDGMENT: Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a decision of the Findlay Municipal Court (Ohio), that convicted him of speeding. Defendant asserted that the court erred when it admitted evidence of a radar test into trial pursuant to *Ohio Rev. Code Ann. § 4511.091*, that it erred by admitting testimony of the arresting officer regarding the results of those radar observations, and that the court's decision ran against the manifest weight of the evidence.

**OVERVIEW:** Defendant was convicted of speeding. That decision was affirmed by the court, which found that the trial court had not erred when it admitted evidence of a radar test into trial under *Ohio Rev. Code Ann. § 4511.091*. Defendant asserted that the admission of those test results violated his due process and equal protection rights, but the court determined that defendant had not overcome the presumption of constitutionality which all statutes enjoyed. Judicial notice regarding the accuracy of a radar device could be taken by a court that had received prior expert testimony as to that device's accuracy. The court noted that testimony as to the accuracy of the device had been taken and that the state's goal of keeping its road safe was rationally met by § 4511.091. Further, the court determined that the trial court's verdict had not run against the manifest weight of the evidence as that decision had not resulted in a manifest miscarriage of justice. Weight and credibility were matters for the trier of fact to decide.

**OUTCOME:** The court affirmed defendant's conviction.

**CORE TERMS:** radar, assignment of error, judicial notice, speeding, speed, scientific, accuracy, calibration, due

process, traveling, admitting, manifest, expert testimony, arresting officer, equal protection, working order, motor vehicle, credibility, rationally, dependable, training, speeders, speed limit, confirmed, arresting, appealing, overrule, mph

**OPINION:**

OPINION

**HADLEY, J.** Daryl G. Daugherty ("appellant") is appealing his speeding conviction in the Findlay Municipal Court. For the following reasons, we affirm appellant's conviction.

The facts of the case arose when on April 21, 1997, appellant was driving south on County Road 140 while en route to work. Appellant passed an Ohio State Patrolman traveling north on County Road 140. The officer turned around and followed appellant. Using a K-55 radar device, the officer determined that appellant was traveling 66 mph in a 55 mph zone. Consequently, the officer stopped appellant and cited him for speeding.

Appellant entered a not guilty plea and filed a Motion in Limine requesting that the evidence obtained by radar be excluded from his trial. Appellant argued that it was a denial of due process and equal protection of law for the court [\*2] to allow the introduction of radar tests when no independent agency certified either that type of test or the operator of such devices.

On May 7, 1997, the trial court overruled appellant's motion. That same day, appellant's case proceeded to trial on the citation. The State offered evidence of appellant's speed as calculated by radar. At the conclusion of the trial, the court found appellant guilty of speeding. The court fined appellant \$ 30.00 plus court costs.

A judgment entry was filed on May 20, 1997. It is from this sentence and conviction that appellant is appealing the following three assignments of error.

**ASSIGNMENT OF ERROR NO.1**

**The trial court erred in overruling the appellant's motion in limine and allowing the introduction of result of K-55 radar.**

In his first assignment of error, appellant argues that the admission of the K-55 radar results was a violation of his due process and equal protection rights. Therefore, the trial court erred in admitting those results. We conclude that the K-55 radar results were properly admitted and consequently, affirm the trial court for the following reasons.

We begin our analysis by noting that [HN1] all legislative enactments [\*3] enjoy a presumption of validity and constitutionality. *Adamsky v. Buckeye Local School Dist.* (1995), 73 Ohio St. 3d 360, 361, 653 N.E.2d 212; *Sedar v. Knowlton Constr. Co.* (1990), 49 Ohio St. 3d 193, 199, 551 N.E.2d 938, overruled on other grounds, *Brenneman v. R.M.I. Co.* (1994), 70 Ohio St. 3d 460, 639 N.E.2d 425; *Hardy v. VerMeulen* (1987), 32 Ohio St. 3d 45, 48, 512 N.E.2d 626, cert. denied (1988), 484 U.S. 1066, 98 L. Ed. 2d 993, 108 S. Ct. 1029. Unless it is shown beyond a reasonable doubt that a statute violates a constitutional provision, the statute will be presumed to be constitutional. *State ex rel. Herman v. Klopfleisch* (1995), 72 Ohio St. 3d 581, 585, 651 N.E.2d 995 citing *Fabrey v. McDonald Police Dept.* (1994), 70 Ohio St. 3d 351, 352, 639 N.E.2d 31.

*R.C. 4511.091* provides, in pertinent part:

[HN2] **The driver of any motor vehicle which has been checked by radar \* \* \* to determine the speed of the motor vehicle over a measured distance of the highway \* \* \* and found to be in violation of any of the provisions of section 4511.21 or 4511.211 or the Revised Code, may be arrested until a warrant may be obtained, provided such officer has observed the recording [\*4] of the speed of such motor vehicle by the radio microwaves, electrical or mechanical timing device \* \* \* \***

Appellant contends that *R.C. 4511.091* violates his due process rights by not providing for a neutral party overseer to administer the methods and techniques used by law enforcement agencies in their training, calibration, and testing of the K-55 radar unit. Moreover, he claims that "the manufacturers of K-55 radar devices have a pecuniary interest" in the operation of the device. Therefore, appellant concludes that his right to have his case decided by an impartial tribunal is destroyed when a trial court takes judicial notice of a radar device.

The Ohio Supreme Court has previously held that [HN3] the accuracy of a radar device is a proper subject for judicial notice. *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, 154 N.E.2d 630. However, judicial notice of the accuracy or dependability of a K-55 radar device may not be taken unless the trial court has received prior expert testimony on the accuracy of that device. *State v. Colby* (1984), 14 Ohio App. 3d 291, 470 N.E.2d 924. See also *State v. Wilson* (May 6, 1982), Auglaize App. No. 2-81-24, unreported; *State v. [\*5] Doles* (1980), 70 Ohio App. 2d 35, 433 N.E.2d 1290. Moreover, the Rules of Evidence dictate that:

[HN4] **A judicially noticed fact must be one not subject to reasonable dispute in that it is either (1) generally known within the trial court or (2) capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned.**

*Evid.R. 201(B)*.

In the present case, we note that the Findlay Municipal Court has previously received expert testimony concerning the scientific principles relating to the use of K-55 radar devices and found them to be dependable. *State v. Calladine* (October 24, 1989), Case No. 89-TRD-9034, unreported. Therefore, we hold that judicial notice as to the scientific principles relating to the use of a K-55 radar device in appellant's case was appropriate. See *State v. Bechtel* (1985), 24 Ohio App. 3d 72, 73, 493 N.E.2d 318; *State v. Ayesch* (1985), 24 Ohio App. 3d 73, 74, 493 N.E.2d 325; *Kettering v. Smith* (Apr. 12, 1984), Montgomery App. No. 8383, unreported; *State v. Kinker* (Mar. 4, 1983), Huron App. No. H-82-24, unreported; and *State v. Shew* (Dec. 30, 1983), Warren App. No. CA83-04-022, unreported. [\*6]

Moreover, appellant has not been deprived of any due process rights. The record reflects that the officer testified as to the working order and operation of the radar device. He said that he had checked the calibration of the device at 8:00 a.m. and then again at 2:00 p.m. on the day that he stopped appellant. n1 He further testified that he had received three months of training in the use of K-55 radar devices. Under these circumstances we find that the trial court did not violate appellant's due process rights when it admitted the K-55 radar results.

n1 We note that appellant was stopped around 1:35 pm that afternoon.

Nor do we find that appellant's equal protection rights were violated. Contrary to appellant's assertions, we believe that the State's goal in keeping its roads safe from speeders is rationally met by *R.C. 4511.091*. That statute allows police officers to use radar devices to check the speed of potential speeders. If the radar device establishes that an individual is speeding, the police officer [\*7] can stop that vehicle and issue him or her a ticket. Every car on the road is subject to having its speed checked. Therefore, we believe that the State's goal is rationally related to the use of radar devices.

Accordingly, the trial court did not err in taking judicial notice of the scientific principles relating to the use of the K-55 radar device. Appellant's first assignment of error is therefore, overruled.

## **ASSIGNMENT OF ERROR NO.2**

**The trial court erred in admitting testimony of the arresting officer regarding the results of radar observations.**

In his second assignment of error, appellant argues that the trial court erred in admitting the arresting officer's testimony when the State offered no expert evidence that the K-55 radar device was dependable and accurate. In support of his argument, appellant cites our prior decision of *Colby, supra, at 291*.

However, in appellant's first assignment of error, we noted that the trial court had previously heard expert testimony as to the scientific principles relating to the use of K-55 radar devices in 1989. See *Calladine, supra*. Therefore, under our reasoning in *Colby, supra*, the trial court could [\*8] properly take judicial notice of the scientific principles relating to the use of a K-55 radar device in appellant's case.

Furthermore, in addition to the judicial notice, the officer testified that he was trained in operating the K-55 radar device, he had checked the device's calibration, appellant's vehicle had been visually confirmed, an audio signal verified the validity of the reading, the officer compared his own speedometer reading with the device, and he had properly operated the device. We have previously held that such "judicial notice, coupled with the evidence of the qualifications of the trooper to operate the unit, the evidence that it was in proper working order, and the evidence that it was properly operated, satisfied the requirements for the admission of the reading to show a violation of the speed statute." *State v. Ellison* (Jan. 30, 1987), Auglaize App. No. 2-85-35, unreported. Therefore, the trial court did not err in admitting the arresting officer's testimony regarding the results of the radar device.

Accordingly, we overrule appellant's second assignment of error.

#### ASSIGNMENT OF ERROR NO.3

**The decision of the trial court is against the manifest [\*9] weight of the evidence and contrary to law.**

Appellant maintains in his final assignment of error that his speeding conviction is against the manifest weight of the evidence. [HN5] In determining whether a conviction is against the manifest weight of the evidence, an appellate court must review the entire record, weigh the evidence and all reasonable inferences, consider the credibility of witnesses and decide whether, in resolving conflicts of evidence, the trier of fact clearly lost its way and created such a manifest miscarriage of justice that the conviction must be reversed. *State v. Otten* (1986), 33 Ohio App. 3d 339, 340, 515 N.E.2d 1009; *State v. Martin* (1983), 20 Ohio App. 3d 172, 175, 485 N.E.2d 717. See also *State v. Jenks* (1991), 61 Ohio St. 3d 259, 273, 574 N.E.2d 492 (holding that the relevant inquiry is whether any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt).

In the present case, the record reflects that the arresting officer testified that he observed appellant traveling at a speed greater than the posted speed limit. He estimated that appellant was traveling approximately ten miles over the [\*10] speed limit. Therefore, he activated his radar device and confirmed that appellant was speeding.

Although appellant testified that he could not have been speeding, [HN6] the weight and credibility of witnesses are matters to be determined by the trier of facts. *Seasons Coal Co., Inc. v. City of Cleveland* (1984), 10 Ohio St. 3d 77, 80, 461 N.E.2d 1273. Therefore, we must defer to the judgment of the trial court.

Furthermore, the trial court found that the arresting officer had followed the appropriate procedures, he had checked the K-55 radar device's calibration prior to, and after, stopping appellant, and the device was in working order on the date appellant was stopped. The trial court additionally took judicial notice of the K-55 radar device's accuracy. Therefore, we hold that there was sufficient evidence to sustain appellant's conviction. Accordingly, we overrule appellant's final assignment of error.

For the aforementioned reasons, we affirm the judgment of the Findlay Municipal Court.

**Judgment affirmed.**

**City of Sylvania, Appellee v. Tracy L. Secor, Appellant**

**Court of Appeals No. L-96-080**

**COURT OF APPEALS OF OHIO, SIXTH APPELLATE DISTRICT, LUCAS  
COUNTY**

*1996 Ohio App. LEXIS 5491*

**December 6, 1996, Decided**

**NOTICE:** [\*1] THE LEXIS PAGINATION OF THIS DOCUMENT IS SUBJECT TO CHANGE PENDING RELEASE OF THE FINAL PUBLISHED VERSION.

**PRIOR HISTORY:** Trial Court No. TRC-9509402.

**DISPOSITION:** The judgment of the Sylvania Municipal Court is affirmed. It is ordered that appellant pay the court costs of this appeal.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was convicted of driving under the influence of alcohol in violation of Ohio Rev. Stat. Ann. § 4511.19(A)(1). Defendant's conviction was after a bench trial in the Sylvania Municipal Court (Ohio). Defendant was sentenced to three days in a driver's intervention program, which defendant appealed.

**OVERVIEW:** On appeal, the court held that defendant's contention the trial court erred in denying his motion to dismiss on the grounds of double jeopardy was not well taken. The court held that the trial court did not err in barring defendant from challenging the competency, admissibility, relevancy, authenticity, and credibility of his breath-alcohol test at trial. The court held that defendant did not file a pretrial motion to suppress his test results. As a result, under Ohio Rev. Stat. Ann. §§ 4511.19(A)(1)-(4), defendant waived the requirement on the State to lay a foundation for the admissibility of the test results at trial. In the case at bar, defendant first raised the issue of the test's accuracy and sought both a continuance and a motion in limine related to the test in question on the first day of trial. The court held that the trial court did not err in barring defendant from questioning witnesses about the reliability of the solution used in his breath-alcohol results. The court further found that defendant was not prejudiced nor prevented from having a fair trial, and affirmed the judgment of the trial court.

**OUTCOME:** The court affirmed defendant's conviction of driving under the influence of alcohol. The court also assessed defendant the costs of his appeal.

**CORE TERMS:** admissibility, assignment of error, chemical test, calibration, unreliable, breath, well-taken, motion to dismiss, influence of alcohol, newspaper article, motion in limine, pretrial motion, credibility, competency, breath-alcohol, breathalyzer, authenticity, continuance, challenging, relevancy, traveling, suppress, barring, driver, memo

William Garrett, for appellant.

**JUDGES:** Peter M. Handwork, J., George M. Glasser, J., Melvin L. Resnick, P.J. CONCUR.

#### **OPINION: DECISION AND JUDGMENT ENTRY**

This matter is before the court on appeal from the Sylvania Municipal Court wherein appellant, Tracy L. Secor, was convicted of driving while under the influence of alcohol, a violation of R.C. 4511.19(A)(1).

A trial commenced on February 20, 1996. Officer

Kevin Pooley of the Sylvania police department testified he was on duty August 2, 1995. At approximately 10:45 p.m., he was patrolling the streets of Sylvania when he saw a 1988 Eagle Talon twice travel left of the center yellow line. Officer Pooley additionally noticed that the vehicle appeared to be traveling over the speed limit. Officer Pooley's radar equipment indicated the vehicle was traveling forty-three m.p.h. in a twenty-five m.p.h. zone. Officer Pooley signaled [\*2] the vehicle to pull over and approached the drivers's side. He immediately detected an odor of alcohol from the opened window. Appellant, the driver, admitted to Officer Pooley he had consumed six beers. Appellant exited the vehicle. Officer Pooley noted that appellant appeared glassy eyed and was unsteady on his feet.

Following his unsatisfactory performance on a series of field sobriety tests, appellant was arrested for driving under the influence of alcohol. A subsequent breathalyzer test revealed appellant's breath contained .134 grams of alcohol per 210 liters of breath. A judge subsequently found him guilty of violating R.C. 4511.19(A)(1) and sentenced him to three days in a driver's intervention program. Appellant now appeals setting forth the following assignments of error:

**"I. THE TRIAL COURT ERRED IN OVERRULING DEFENDANT-APPELLANTS (SIC) MOTION TO DISMISS BASED ON DOUBLE JEOPARDY.**

**"II. THE TRIAL COURT ERRED ON RULING THAT THE DEFENDANT-APPELLANT COULD NOT QUESTION WITNESSES CONCERNING '...SIMULATOR SOLUTIONS OR ANYTHING ALONG THOSE LINES...' AND BY RULING THAT THE DEFENDANT-APPELLANT COULD ONLY ASK GENERAL QUESTIONS CONCERNING THE CREDIBILITY AND COMPETENCY THE RESULTS [\*3] OF THE BREATH TEST OF THE DEFENDANT-APPELLANT."**

In his first assignment of error, appellant contends the trial court erred in denying his motion to dismiss on the grounds of double jeopardy. Under the authority of the Supreme Court of Ohio in *State v. Gustafson* (1996), 76 Ohio St. 3d 425, 668 N.E.2d 435, this court finds appellant's first assignment of error not well-taken.

In his second assignment of error, appellant contends the court erred in barring appellant from challenging the competency, admissibility, relevancy, authenticity, and credibility of his breath-alcohol test at trial. Appellant did not file a pretrial motion to suppress his test results.

The Ohio Supreme Court held in *State v. French* (1995), 72 Ohio St. 3d 446, 650 N.E.2d 887, paragraph one of the syllabus:

[HN1] "Because *Crim.R. 12(B)(3)* applies to all charges under R.C. 4511.19, a defendant charged under R.C. 4511.19(A)(1) through (4) who does not challenge the admissibility of the chemical test results through a pretrial motion to suppress waives the requirement on the state to lay a foundation for the admissibility of the test results at trial. The chemical test result is admissible at trial without [\*4] the state's demonstrating that the bodily substance was withdrawn within two hours of the time of the alleged violation, that the bodily substance was analyzed in accordance with methods approved by the Director of Health, and that the analysis was conducted by a qualified individual holding a permit issued by the Director of Health pursuant to R.C. 3701.143. (*Defiance v. Kretz* [1991], 60 Ohio St. 3d 1, 573 N.E.2d 32, approved; *Cincinnati v. Sand* [1975], 43 Ohio St. 2d 79, 330 N.E.2d 908, modified.)

The court went on to explain: "This does not mean, however, that the defendant may not challenge the chemical test results at trial under the Rules of Evidence. [HN2] Evidentiary objections challenging the competency, admissibility, relevancy, authenticity, and credibility of the chemical test results may still be raised." 72 Ohio St. 3d at 452.

On the day of trial, appellant filed a motion for continuance and a motion in limine. Before the trial court, appellant's counsel alleged newly discovered evidence revealed that the solutions used to calibrate the breathalyzer in the instant case were unreliable. Said evidence had recently come to the parties attention from [\*5] a newspaper article published less than a week earlier. Appellant's counsel also cited to a memo on the subject issued by the Ohio Department of Health. In response, the state acknowledged familiarity with the memo but specifically noted that the solution used in appellant's test was not part of the batch of solutions deemed unreliable by the Department of Health. The court explained on the record that inasmuch as the newspaper article appeared six days before trial, the issue of the unreliable calibration solution could have been raised earlier. The court denied appellant's motion for continuance and his motion in limine.

Following the testimony of the arresting officer, appellant's counsel made the following proffer:

"COUNSEL: Just as a record, these questions that I would ask of this witness from here on in would deal with the breath testing device, solutions, calibration procedures. Am I being prevented from asking questions in that area?"

**COURT: Yes. That's improper, It's noted for the record.**

**COUNSEL :** All right. Then that's a pro-offer (sic) that I or a reviewing course that I would intend to ask this witness at great length about the intoxilizer, his knowledge [\*6] or lack or knowledge on it, his lack of knowledge on how it's maintained. I would offer, or ask questions about the inaccuracies in the calibration, solutions."

This proposed testimony, dealing with Ohio Department of Health regulations, clearly goes to the admissibility as opposed to the weight of the test results. Based on the circumstances in this case and on the authority of *State v. French, supra*, we conclude that the trial court did not err in barring appellant from questioning witnesses about his breath-alcohol test result. Appellant's second assignment of error is found not well-taken.

On consideration whereof, the court finds that appellant was not prejudiced nor prevented from having a fair trial, and the judgment of the Sylvania Municipal Court is affirmed. It is ordered that appellant pay the court costs of this appeal.

A certified copy of this entry shall constitute the mandate pursuant to *App.R. 27*. See, also, 6th *Dist.Loc.App.R. 4*, amended 7/1/92.

**NOTICE:** [\*1] THE LEXIS PAGINATION OF THIS DOCUMENT IS SUBJECT TO CHANGE PENDING RELEASE OF THE FINAL PUBLISHED VERSION.

**PRIOR HISTORY:** Trial Court No. TRC-9509402.

**DISPOSITION:** The judgment of the Sylvania Municipal Court is affirmed. It is ordered that appellant pay the court costs of this appeal.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was convicted of driving under the influence of alcohol in violation of Ohio Rev. Stat. Ann. § 4511.19(A)(1). Defendant's conviction was after a bench trial in the Sylvania Municipal Court (Ohio). Defendant was sentenced to three days in a driver's intervention program, which defendant appealed.

**OVERVIEW:** On appeal, the court held that defendant's contention the trial court erred in denying his motion to dismiss on the grounds of double jeopardy was not well taken. The court held that the trial court did not err in barring defendant from challenging the competency, admissibility, relevancy, authenticity, and credibility of his breath-alcohol test at trial. The court held that defendant did not file a pretrial motion to suppress his test results. As a result, under Ohio Rev. Stat. Ann. §§ 4511.19(A)(1)-(4), defendant waived the requirement on the State to lay a foundation for the admissibility of the test results at trial. In the case at bar, defendant first raised the issue of the test's accuracy and sought both a continuance and a motion in limine related to the test in question on the first day of trial. The court held that the trial court did not err in barring defendant from questioning witnesses about the reliability of the solution used in his breath-alcohol results. The court further found that defendant was not prejudiced nor prevented from having a fair trial, and affirmed the judgment of the trial court.

**OUTCOME:** The court affirmed defendant's conviction of driving under the influence of alcohol. The court also assessed defendant the costs of his appeal.

**CORE TERMS:** admissibility, assignment of error, chemical test, calibration, unreliable, breath, well-taken, motion to dismiss, influence of alcohol, newspaper article, motion in limine, pretrial motion, credibility, competency, breath-alcohol, breathalyzer, authenticity, continuance, challenging, relevancy, traveling, suppress, barring, driver, memo

**OPINION: DECISION AND JUDGMENT ENTRY**

This matter is before the court on appeal from the Sylvania Municipal Court wherein appellant, Tracy L. Secor, was convicted of driving while under the influence of alcohol, a violation of R.C. 4511.19(A)(1).

A trial commenced on February 20, 1996. Officer

Kevin Pooley of the Sylvania police department testified he was on duty August 2, 1995. At approximately 10:45 p.m., he was patrolling the streets of Sylvania when he saw a 1988 Eagle Talon twice travel left of the center yellow line. Officer Pooley additionally noticed that the vehicle appeared to be traveling over the speed limit. Officer Pooley's radar equipment indicated the vehicle was traveling forty-three m.p.h. in a twenty-five m.p.h. zone. Officer Pooley signaled [\*2] the vehicle to pull over and approached the drivers's side. He immediately detected an odor of alcohol from the opened window. Appellant, the driver, admitted to Officer Pooley he had consumed six beers. Appellant exited the vehicle. Officer Pooley noted that appellant appeared glassy eyed and was unsteady on his feet.

Following his unsatisfactory performance on a series of field sobriety tests, appellant was arrested for driving under the influence of alcohol. A subsequent breathalyzer test revealed appellant's breath contained .134 grams of alcohol per 210 liters of breath. A judge subsequently found him guilty of violating R.C. 4511.19(A)(1) and sentenced him to three days in a driver's intervention program. Appellant now appeals setting forth the following assignments of error:

**"I. THE TRIAL COURT ERRED IN OVERRULING DEFENDANT-APPELLANTS (SIC) MOTION TO DISMISS BASED ON DOUBLE JEOPARDY.**

**"II. THE TRIAL COURT ERRED ON RULING THAT THE DEFENDANT-APPELLANT COULD NOT QUESTION WITNESSES CONCERNING '...SIMULATOR SOLUTIONS OR ANYTHING ALONG THOSE LINES...' AND BY RULING THAT THE DEFENDANT-APPELLANT COULD ONLY ASK GENERAL QUESTIONS CONCERNING THE CREDIBILITY AND COMPETENCY THE RESULTS [\*3] OF THE BREATH TEST OF THE DEFENDANT-APPELLANT."**

In his first assignment of error, appellant contends the trial court erred in denying his motion to dismiss on the grounds of double jeopardy. Under the authority of the Supreme Court of Ohio in *State v. Gustafson* (1996), 76 Ohio St. 3d 425, 668 N.E.2d 435, this court finds appellant's first assignment of error not well-taken.

In his second assignment of error, appellant contends the court erred in barring appellant from challenging the competency, admissibility, relevancy, authenticity, and credibility of his breath-alcohol test at trial. Appellant did not file a pretrial motion to suppress his test results.

The Ohio Supreme Court held in *State v. French* (1995), 72 Ohio St. 3d 446, 650 N.E.2d 887, paragraph one of the syllabus:

[HN1] "Because *Crim.R. 12(B)(3)* applies to all charges under R.C. 4511.19, a defendant charged under R.C. 4511.19(A)(1) through (4) who does not challenge the admissibility of the chemical test results through a pretrial motion to suppress waives the requirement on the state to lay a foundation for the admissibility of the test results at trial. The chemical test result is admissible at trial without [\*4] the state's demonstrating that the bodily substance was withdrawn within two hours of the time of the alleged violation, that the bodily substance was analyzed in accordance with methods approved by the Director of Health, and that the analysis was conducted by a qualified individual holding a permit issued by the Director of Health pursuant to R.C. 3701.143. (*Defiance v. Kretz* [1991], 60 Ohio St. 3d 1, 573 N.E.2d 32, approved; *Cincinnati v. Sand* [1975], 43 Ohio St. 2d 79, 330 N.E.2d 908, modified.)

The court went on to explain: "This does not mean, however, that the defendant may not challenge the chemical test results at trial under the Rules of Evidence. [HN2] Evidentiary objections challenging the competency, admissibility, relevancy, authenticity, and credibility of the chemical test results may still be raised." 72 Ohio St. 3d at 452.

On the day of trial, appellant filed a motion for continuance and a motion in limine. Before the trial court, appellant's counsel alleged newly discovered evidence revealed that the solutions used to calibrate the breathalyzer in the instant case were unreliable. Said evidence had recently come to the parties attention from [\*5] a newspaper article published less than a week earlier. Appellant's counsel also cited to a memo on the subject issued by the Ohio Department of Health. In response, the state acknowledged familiarity with the memo but specifically noted that the solution used in appellant's test was not part of the batch of solutions deemed unreliable by the Department of Health. The court explained on the record that inasmuch as the newspaper article appeared six days before trial, the issue of the unreliable calibration solution could have been raised earlier. The court denied appellant's motion for continuance and his motion in limine.

Following the testimony of the arresting officer, appellant's counsel made the following proffer:

"COUNSEL: Just as a record, these questions that I would ask of this witness from here on in would deal with the breath testing device, solutions, calibration procedures. Am I being prevented from asking questions in that area?"

**COURT: Yes. That's improper, It's noted for the record.**

**COUNSEL : All right. Then that's a pro-offer (sic) that I or a reviewing course that I would intend to ask this witness at great length about the intoxilizer, his knowledge [\*6] or lack or knowledge on it, his lack of knowledge on how it's maintained. I would offer, or ask questions about the inaccuracies in the calibration, solutions."**

**This proposed testimony, dealing with Ohio Department of Health regulations, clearly goes to the admissibility as opposed to the weight of the test results. Based on the circumstances in this case and on the authority of *State v. French, supra*, we conclude that the trial court did not err in barring appellant from questioning witnesses about his breath-alcohol test result. Appellant's second assignment of error is found not well-taken.**

**On consideration whereof, the court finds that appellant was not prejudiced nor prevented from having a fair trial, and the judgment of the Sylvania Municipal Court is affirmed. It is ordered that appellant pay the court costs of this appeal.**

**NOTICE:** [\*1] THE LEXIS PAGINATION OF THIS DOCUMENT IS SUBJECT TO CHANGE PENDING RELEASE OF THE FINAL PUBLISHED VERSION.

**PRIOR HISTORY:** T.C. Case No. 94 TRC-6441.

**DISPOSITION:** The judgment of the trial court is Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a judgment of the trial court (Ohio), which convicted him of operating a motor vehicle while under the influence of alcohol, in violation of *Ohio Rev. Code Ann. § 4511.19(A)*.

**OVERVIEW:** Defendant appealed his conviction for operating a motor vehicle while under the influence of alcohol. On review, the court affirmed. Defendant alleged that the trial court erred in failing to suppress certain evidence. The court found that observation of a traffic violation, such as speeding, was sufficient to establish reasonable suspicion to support a routine traffic stop. The police officer credibly testified that he visually observed defendant speeding, and that the radar device confirmed that defendant was traveling approximately seventeen miles over the speed limit. A seventeen-mile excess was not a "minor" speeding violation, but, rather, was a substantial violation. Further, the officer testified that he observed defendant pass two cars at a high rate of speed. Under these facts, the court found no persuasive reason to deviate or carve an exception to the general rule that observation of a traffic violation by an officer was sufficient to support a finding of reasonable suspicion to stop the vehicle.

**OUTCOME:** The court affirmed defendant's conviction for operating a motor vehicle while under the influence of alcohol.

**CORE TERMS:** speeding, motion to suppress, traffic stop, lane, influence of alcohol, reasonable suspicion, breathalyzer, driving, traffic violation, radar, mile, Fourth Amendment, seizure, marked, suppression hearing, assignment of error, satisfactorily, traveling, speed, credible evidence, persuasive, crossing, routine, criminal activity, insufficient to support, initial stop, speed limit, high rate, administered, arrested

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence*

*Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence*

[HN1] In reviewing a motion to suppress, an appellate court is to determine whether the trial court's findings are supported by competent, credible evidence. If the findings are so supported, the appellate court must independently determine whether they meet the applicable legal standard.

*Constitutional Law > Bill of Rights > Fundamental Rights > Search & Seizure > Scope of Protection*

*Criminal Law & Procedure > Search & Seizure > General Overview*

[HN2] The Fourth Amendment to the United States Constitution guarantees the right of people to be free from unreasonable searches and seizures. The purpose of the Fourth Amendment is to prevent arbitrary and oppressive interference by enforcement officials with the privacy and personal security of individuals. It is important to note that only unreasonable searches and seizures are unconstitutional.

*Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Exigent Circumstances > Reasonableness & Prudence Standard*

*Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops*

*Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Vehicle Searches > General Overview*

[HN3] It is undisputed that the warrantless stop of an automobile is a "seizure" within the meaning of the Fourth Amendment. In the context of a routine traffic stop, the officer must have a reasonable, articulable suspicion of criminal activity to perform the stop. It has generally been held that the observation of a traffic offense provides a sufficient basis for such a stop.

**JUDGES:** BROGAN, P.J., WOLFF, J., and YOUNG, J., concur.

**OPINION BY:** BROGAN

**OPINION:**

OPINION

BROGAN, P.J.

Appellant Daniel L. Prendergast appeals from his conviction and sentence for operating a motor vehicle while under the influence of alcohol, in violation of *R.C. 4511.19(A)*. On appeal, Prendergast alleges that the trial court erred in failing to suppress certain evidence.

On June 18, 1994, Prendergast was arrested and charged with speeding, driving while under the influence of alcohol, and driving with a blood-alcohol content in excess of that prescribed by law. He subsequently entered not guilty pleas to all charges.

On July 12, 1994, Prendergast filed a motion to suppress the breathalyzer results, the officer's observations, and certain [\*2] statements made by Prendergast to the police, based on the following: (1) there was no probable cause to arrest Prendergast; (2) a senior officer was not present when the breathalyzer test was administered; (3) the breathalyzer machine was not operated in accordance with regulations; and (4) Prendergast was not given the proper *Miranda*

warnings. A hearing was held on the motion to suppress on August 3, 1994.

At the outset of the suppression hearing, the trial court overruled the branches of the suppression motion concerning the actual operation of the breathalyzer test on the grounds that the motion was not supported by a proper factual basis. As to the remaining branches of the motion, Sgt. Michael Willcox, a Kettering police officer, testified that he arrested Prendergast for speeding and driving while under the influence of alcohol on June 18, 1994. He testified that on that date, at approximately 1:30 a.m., he observed a vehicle traveling eastbound on Dorothy Lane in Kettering. Sgt. Willcox stated that he noticed that the vehicle was traveling at a high rate of speed, and that he observed it pass two cars that were in the left lane. He further testified that, in response, [\*3] he activated his radar and received a reading on that particular vehicle of fifty-two miles per hour. The posted speed limit in the area is thirty-five miles per hour. Sgt. Willcox stated that he was trained and experienced in using the radar equipment, and that he had checked the calibration for accuracy prior to using the equipment. After checking the vehicle's speed on the radar, Sgt. Willcox then turned on his overhead lights and pulled the vehicle over. Prendergast was the driver of the vehicle and there were no passengers in the car.

Sgt. Willcox testified that he detected a moderate odor of alcohol, and that Prendergast's eyes appeared bloodshot. He asked Prendergast to recite the alphabet. Sgt. Willcox stated that Prendergast did not perform this test satisfactorily. He then administered the horizontal gaze nystagmus test, which Prendergast also did not perform satisfactorily. He then requested Prendergast to exit the vehicle. Various field sobriety tests were performed. Sgt. Willcox stated that none of the tests were performed satisfactorily. Prendergast was then placed under arrest for operating a vehicle while under the influence of alcohol. Prendergast later submitted [\*4] to a breathalyzer test, the results of which were not entered into evidence.

The trial court overruled the remaining branches of Prendergast's motion to suppress. Prendergast subsequently pled no contest to the charges. Prendergast was convicted of operating a vehicle while under the influence of alcohol. The other charges were dropped.

As his sole assignment of error, Prendergast raises the following:

THE TRIAL COURT ERRED IN FAILING TO SUSTAIN APPELLANT'S MOTION TO SUPPRESS,  
BECAUSE THE OFFICER STOPPED THE VEHICLE WITHOUT FIRST HAVING A  
REASONABLE SUSPICION OF CRIMINAL ACTIVITY.

In support of this assignment of error, Prendergast argues that the speeding violation was a "minor traffic violation" and, as such, was insufficient to support a reasonable suspicion to stop the vehicle. We note that Prendergast does not claim that he was not speeding, nor does he argue that the stop for speeding was a mere pretext to investigate a hunch on a D.U.I. Instead, he simply contends that reasonable suspicion to support a traffic stop must be based on "something more" than a minor traffic violation.

At the outset, we note that Prendergast did not specifically raise the constitutionality [\*5] of the initial stop of the automobile in his motion to suppress. However, evidence regarding the issue was presented at the suppression hearing, and the trial judge expressly ruled that the initial stop of the automobile was proper. Accordingly, we will proceed to address the merits of his argument.

[HN1] In reviewing a motion to suppress, an appellate court "is to determine whether the court's findings are supported by competent, credible evidence." *State v. Self* (1990), 56 Ohio St.3d 73, 564 N.E.2d 446. If the findings are so supported, we must independently determine whether they meet the applicable legal standard. *State v. Retherford* (1994), 93 Ohio App.3d 586, 639 N.E.2d 498. Having closely reviewed the transcript of the suppression hearing, we conclude that the trial court's finding that Prendergast was speeding is supported by competent, credible evidence. Indeed, Prendergast does not challenge this finding. Thus, accepting the trial court's findings as true, we proceed to determine whether the court's decision is contrary to law.

[HN2] The Fourth Amendment to the United States Constitution guarantees the right of people to be free from unreasonable searches and seizures. The [\*6] purpose of the Fourth Amendment is "to prevent arbitrary and oppressive interference by enforcement officials with the privacy and personal security of individuals." *United States v. Mendenhall* (1980), 446 U.S. 544, 553-54, 64 L. Ed. 2d 497, 100 S. Ct. 1870, quoting *United States v. Martinez-Fuerte* (1976), 428 U.S. 543, 554, 49 L. Ed. 2d 1116, 96 S. Ct. 3074. It is important to note that only unreasonable searches and seizures are unconstitutional.

[HN3] It is undisputed that the warrantless stop of an automobile is a "seizure" within the meaning of the Fourth Amendment. See *Delaware v. Prouse* (1979), 440 U.S. 648, 59 L. Ed. 2d 660, 99 S. Ct. 1391. In the context of a routine traffic stop, the officer must have a reasonable, articulable suspicion of criminal activity to perform the stop. See *Terry v. Ohio* (1968), 392 U.S. 1, 20 L. Ed. 2d 889, 88 S. Ct. 1868. It has generally been held that the observation of a traffic offense provides a sufficient basis for such a stop. See., e.g., *State v. Richardson* (1994), 94 Ohio App.3d 501, 641 N.E.2d 216.

Prendergast contends that observation of a minor traffic violation, such as speeding, is not sufficient to establish a reasonable [\*7] suspicion to support a routine traffic stop. Prendergast suggests that "evidence beyond that - evidence that would, for example, have shown that [his] slightly excessive speed was dangerous" must be present to support a proper basis for a traffic stop. Prendergast cites several cases in support of his argument.

First, Prendergast cites to *State v. Gullett* (1992), 78 Ohio App.3d 138, 604 N.E.2d 176, and *State v. Williams* (1993), 86 Ohio App.3d 37, 619 N.E.2d 1141. The respective courts in those cases held that minimal crossing of the marked traffic lanes, without further evidence of criminal activity such as repeated weaving or erratic driving, was insufficient to support a finding of reasonable suspicion necessary for a proper traffic stop under the totality of the circumstances. We find those cases to be distinguishable from the present case. *R.C. 4511.33(A)*, which contains rules for driving in marked lanes, provides in part: "A vehicle or trackless trolley shall be driven, *as nearly as practicable*, entirely within a single lane or line of traffic and shall not be moved from such lane or line until the driver has first ascertained that such movement can be made with [\*8] safety." (Emphasis added.) In light of the language contained in the statute, it was reasonable for the courts in those cases to require some evidence beyond a minor crossing of the marked lines to justify a traffic stop. In the present case, Prendergast was not stopped for violation of *R.C. 4511.33(A)*; thus, the analyses in those cases is not persuasive to our resolution of this case.

In addition, we have closely reviewed other authorities cited by Prendergast in support of his position and find that none of them are relevant or persuasive. In this case, Sgt. Willcox credibly testified that he visually observed Prendergast speeding, and that the radar device confirmed that Prendergast was traveling approximately seventeen miles over the speed limit. In our opinion, a seventeen mile excess is not a "minor" speeding violation, but, rather, is a substantial violation. Further, Sgt. Willcox testified that he observed Prendergast pass two cars at a high rate of speed. Under the facts of this case, we find no persuasive reason to deviate or carve an exception to the general rule that observation of a traffic violation by an officer is sufficient to support a finding of reasonable suspicion [\*9] to stop the vehicle.

The assignment of error is overruled.

The judgment of the trial court is Affirmed.

**OPINION BY:** BROGAN

**OPINION:**

OPINION

BROGAN, P.J.

Appellant Daniel L. Prendergast appeals from his conviction and sentence for operating a motor vehicle while under the influence of alcohol, in violation of *R.C. 4511.19(A)*. On appeal, Prendergast alleges that the trial court erred in failing to suppress certain evidence.

On June 18, 1994, Prendergast was arrested and charged with speeding, driving while under the influence of alcohol, and driving with a blood-alcohol content in excess of that prescribed by law. He subsequently entered not guilty pleas to all charges.

On July 12, 1994, Prendergast filed a motion to suppress the breathalyzer results, the officer's observations, and certain [\*2] statements made by Prendergast to the police, based on the following: (1) there was no probable cause to arrest Prendergast; (2) a senior officer was not present when the breathalyzer test was administered; (3) the breathalyzer machine was not operated in accordance with regulations; and (4) Prendergast was not given the proper *Miranda*

warnings. A hearing was held on the motion to suppress on August 3, 1994.

At the outset of the suppression hearing, the trial court overruled the branches of the suppression motion concerning the actual operation of the breathalyzer test on the grounds that the motion was not supported by a proper factual basis. As to the remaining branches of the motion, Sgt. Michael Willcox, a Kettering police officer, testified that he arrested Prendergast for speeding and driving while under the influence of alcohol on June 18, 1994. He testified that on that date, at approximately 1:30 a.m., he observed a vehicle traveling eastbound on Dorothy Lane in Kettering. Sgt. Willcox stated that he noticed that the vehicle was traveling at a high rate of speed, and that he observed it pass two cars that were in the left lane. He further testified that, in response, [\*3] he activated his radar and received a reading on that particular vehicle of fifty-two miles per hour. The posted speed limit in the area is thirty-five miles per hour. Sgt. Willcox stated that he was trained and experienced in using the radar equipment, and that he had checked the calibration for accuracy prior to using the equipment. After checking the vehicle's speed on the radar, Sgt. Willcox then turned on his overhead lights and pulled the vehicle over. Prendergast was the driver of the vehicle and there were no passengers in the car.

Sgt. Willcox testified that he detected a moderate odor of alcohol, and that Prendergast's eyes appeared bloodshot. He asked Prendergast to recite the alphabet. Sgt. Willcox stated that Prendergast did not perform this test satisfactorily. He then administered the horizontal gaze nystagmus test, which Prendergast also did not perform satisfactorily. He then requested Prendergast to exit the vehicle. Various field sobriety tests were performed. Sgt. Willcox stated that none of the tests were performed satisfactorily. Prendergast was then placed under arrest for operating a vehicle while under the influence of alcohol. Prendergast later submitted [\*4] to a breathalyzer test, the results of which were not entered into evidence.

The trial court overruled the remaining branches of Prendergast's motion to suppress. Prendergast subsequently pled no contest to the charges. Prendergast was convicted of operating a vehicle while under the influence of alcohol. The other charges were dropped.

As his sole assignment of error, Prendergast raises the following:

THE TRIAL COURT ERRED IN FAILING TO SUSTAIN APPELLANT'S MOTION TO SUPPRESS,  
BECAUSE THE OFFICER STOPPED THE VEHICLE WITHOUT FIRST HAVING A  
REASONABLE SUSPICION OF CRIMINAL ACTIVITY.

In support of this assignment of error, Prendergast argues that the speeding violation was a "minor traffic violation" and, as such, was insufficient to support a reasonable suspicion to stop the vehicle. We note that Prendergast does not claim that he was not speeding, nor does he argue that the stop for speeding was a mere pretext to investigate a hunch on a D.U.I. Instead, he simply contends that reasonable suspicion to support a traffic stop must be based on "something more" than a minor traffic violation.

At the outset, we note that Prendergast did not specifically raise the constitutionality [\*5] of the initial stop of the automobile in his motion to suppress. However, evidence regarding the issue was presented at the suppression hearing, and the trial judge expressly ruled that the initial stop of the automobile was proper. Accordingly, we will proceed to address the merits of his argument.

[HN1] In reviewing a motion to suppress, an appellate court "is to determine whether the court's findings are supported by competent, credible evidence." *State v. Self* (1990), 56 Ohio St.3d 73, 564 N.E.2d 446. If the findings are so supported, we must independently determine whether they meet the applicable legal standard. *State v. Retherford* (1994), 93 Ohio App.3d 586, 639 N.E.2d 498. Having closely reviewed the transcript of the suppression hearing, we conclude that the trial court's finding that Prendergast was speeding is supported by competent, credible evidence. Indeed, Prendergast does not challenge this finding. Thus, accepting the trial court's findings as true, we proceed to determine whether the court's decision is contrary to law.

[HN2] The Fourth Amendment to the United States Constitution guarantees the right of people to be free from unreasonable searches and seizures. The [\*6] purpose of the Fourth Amendment is "to prevent arbitrary and oppressive interference by enforcement officials with the privacy and personal security of individuals." *United States v. Mendenhall* (1980), 446 U.S. 544, 553-54, 64 L. Ed. 2d 497, 100 S. Ct. 1870, quoting *United States v. Martinez-Fuerte* (1976), 428 U.S. 543, 554, 49 L. Ed. 2d 1116, 96 S. Ct. 3074. It is important to note that only unreasonable searches and seizures are unconstitutional.

[HN3] It is undisputed that the warrantless stop of an automobile is a "seizure" within the meaning of the Fourth Amendment. See *Delaware v. Prouse* (1979), 440 U.S. 648, 59 L. Ed. 2d 660, 99 S. Ct. 1391. In the context of a routine traffic stop, the officer must have a reasonable, articulable suspicion of criminal activity to perform the stop. See *Terry v. Ohio* (1968), 392 U.S. 1, 20 L. Ed. 2d 889, 88 S. Ct. 1868. It has generally been held that the observation of a traffic offense provides a sufficient basis for such a stop. See., e.g., *State v. Richardson* (1994), 94 Ohio App.3d 501, 641 N.E.2d 216.

Prendergast contends that observation of a minor traffic violation, such as speeding, is not sufficient to establish a reasonable [\*7] suspicion to support a routine traffic stop. Prendergast suggests that "evidence beyond that - evidence that would, for example, have shown that [his] slightly excessive speed was dangerous" must be present to support a proper basis for a traffic stop. Prendergast cites several cases in support of his argument.

First, Prendergast cites to *State v. Gullett* (1992), 78 Ohio App.3d 138, 604 N.E.2d 176, and *State v. Williams* (1993), 86 Ohio App.3d 37, 619 N.E.2d 1141. The respective courts in those cases held that minimal crossing of the marked traffic lanes, without further evidence of criminal activity such as repeated weaving or erratic driving, was insufficient to support a finding of reasonable suspicion necessary for a proper traffic stop under the totality of the circumstances. We find those cases to be distinguishable from the present case. *R.C. 4511.33(A)*, which contains rules for driving in marked lanes, provides in part: "A vehicle or trackless trolley shall be driven, *as nearly as practicable*, entirely within a single lane or line of traffic and shall not be moved from such lane or line until the driver has first ascertained that such movement can be made with [\*8] safety." (Emphasis added.) In light of the language contained in the statute, it was reasonable for the courts in those cases to require some evidence beyond a minor crossing of the marked lines to justify a traffic stop. In the present case, Prendergast was not stopped for violation of *R.C. 4511.33(A)*; thus, the analyses in those cases is not persuasive to our resolution of this case.

In addition, we have closely reviewed other authorities cited by Prendergast in support of his position and find that none of them are relevant or persuasive. In this case, Sgt. Willcox credibly testified that he visually observed Prendergast speeding, and that the radar device confirmed that Prendergast was traveling approximately seventeen miles over the speed limit. In our opinion, a seventeen mile excess is not a "minor" speeding violation, but, rather, is a substantial violation. Further, Sgt. Willcox testified that he observed Prendergast pass two cars at a high rate of speed. Under the facts of this case, we find no persuasive reason to deviate or carve an exception to the general rule that observation of a traffic violation by an officer is sufficient to support a finding of reasonable suspicion [\*9] to stop the vehicle.

The assignment of error is overruled.

The judgment of the trial court is Affirmed.

**The STATE of Ohio, Appellee, v. WILSON, Appellant****No. 93-A-1810****Court of Appeals of Ohio, Eleventh Appellate District, Ashtabula County***102 Ohio App. 3d 1; 656 N.E.2d 954; 1995 Ohio App. LEXIS 972***March 20, 1995, Decided****PRIOR HISTORY:** [\*\*\*1]

CHARACTER OF PROCEEDINGS: Criminal Appeal from Eastern Area County Court, Case No. 93 CRB 199; 93 CRB 200; and 93 TRD 1078.

**DISPOSITION:**

*Judgment accordingly.*

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed his convictions in the Ashtabula County Court, Eastern Area (Ohio) for speeding, menacing, and disorderly conduct.

**OVERVIEW:** A police officer pulled over defendant for speeding. Defendant was abusive and threatened the officer. The officer called for backup and arrested defendant. Defendant was convicted in the trial court of speeding, menacing, and disorderly conduct. On appeal, the court affirmed defendant's convictions for speeding and menacing and reversed his conviction for disorderly conduct. The court held that defendant's conviction for speeding was supported by sufficient evidence because the officer testified that he thought defendant was speeding based upon his observation. The court determined that defendant was properly convicted of menacing pursuant to *Ohio Rev. Code Ann. § 2903.22(A)* because he repeatedly threatened the officer with violence. The court ruled that defendant was erroneously convicted of disorderly conduct pursuant to *Ohio Rev. Code Ann. § 2917.11(A)(3)* because his conduct would not have caused a reasonable police officer to want to respond with violence. The court held that the complaints charging defendant with menacing and disorderly conduct were properly sworn to as required by *Ohio R. Crim. P. 3*.

**OUTCOME:** The court affirmed defendant's convictions for speeding and menacing. The court reversed defendant's conviction for disorderly conduct.

**CORE TERMS:** disorderly conduct, radar, charging, menacing, speeding, driving, sworn, void, beyond a reasonable doubt, profanity, violent, license, visual, loud, police officer, convicted, violently, traffic ticket, physical harm, speed

limit, altercation, meritless, asshole, provoke, unsworn, backup, kick, ass

#### ***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

#### ***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN2] A conviction for speeding will not be reversed on sufficiency grounds even if a radar reading is improperly admitted into evidence when the officer has testified that, based upon his visual observation, the vehicle is speeding.

#### ***Criminal Law & Procedure > Criminal Offenses > Crimes Against Persons > Coercion > General Overview***

#### ***Criminal Law & Procedure > Criminal Offenses > Crimes Against Persons > Stalking > General Overview***

[HN3] *Ohio Rev. Code Ann. § 2903.22(A)* states: No person shall knowingly cause another to believe that the offender will cause physical harm to the person or property of such other person or member of his immediate family.

#### ***Criminal Law & Procedure > Criminal Offenses > Miscellaneous Offenses > Disruptive Conduct > General Overview***

[HN4] *Ohio Rev. Code Ann. § 2917.11(A)(3)* states in part: No person shall recklessly cause inconvenience, annoyance, or alarm to another, by doing any of the following: Insulting, taunting, or challenging another, under circumstances in which such conduct is likely to provoke a violent response.

#### ***Criminal Law & Procedure > Criminal Offenses > Miscellaneous Offenses > Disruptive Conduct > Disorderly Conduct & Disturbing the Peace > General Overview***

#### ***Torts > Negligence > Standards of Care > Appropriate Standard > Objectivity***

[HN5] The standard for disorderly conduct pursuant to *Ohio Rev. Code Ann. § 2917.11(A)(3)* is objective rather than subjective, and there is no requirement that an arresting officer, in fact, be provoked to a violent response.

#### ***Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN6] Regarding a traffic citation, a signature at the bottom of the ticket is required. However, it need not be sworn. *Ohio Traffic R. 3(C)*.

#### ***Criminal Law & Procedure > Criminal Offenses > Miscellaneous Offenses > Disruptive Conduct > Disorderly Conduct & Disturbing the Peace > General Overview***

#### ***Criminal Law & Procedure > Accusatory Instruments > Complaints***

[HN7] *Ohio R. Crim. P. 3* states: The complaint is a written statement of the essential facts constituting the offense charged. It shall also state the numerical designation of the applicable statute or ordinance. It shall be made upon oath before any person authorized by law to administer oaths. *Ohio R. Crim. P. 3*.

***Criminal Law & Procedure > Accusatory Instruments > Complaints***

[HN8] It is not necessary that an affidavit supporting a complaint be executed by one who has observed the commission of the offense. It is sufficient if such person has reasonable grounds to believe the accused has committed the crime. The important issue is not whether the affiant has personal knowledge, but rather whether or not a crime actually has been committed.

**COUNSEL:**

*Gregory J. Brown*, Ashtabula County Prosecuting Attorney, for Appellee.

*Gregory M. Gilson*, for Appellant.

**JUDGES:**

Ford, Presiding Judge. Christley and Joseph E. Mahoney, JJ., concur.

**OPINION BY:**

FORD

**OPINION:**

[\*2] [\*\*954] FORD, Presiding Judge.

This accelerated calendar case comes from the Ashtabula County Court, Eastern Area, and has been submitted on the briefs. n1

n1 Appellee, state of Ohio, did not file a brief. In this case, we read the transcript and are familiar with the testimony. However, we refer appellee to *App.R. 18(C)* which [HN1] states: "If an appellee fails to file his brief, \* \* \* the court may accept the appellant's statement of the facts and issues as correct and reverse the judgment if appellant's brief reasonably appears to sustain such action."

Appellant, Matthew K. Wilson, was charged with speeding, in violation of *R.C. 4511.21*; [\*\*\*2] menacing, in violation of *R.C. 2903.22(A)*; and disorderly conduct, in violation of *R.C. 2917.11(A)(3)*. After a bench trial, he was convicted of all three counts and sentenced.

On May 15, 1993, at approximately 1:00 p.m., Officer Robert D. Houser of the North Kingsville Police Department was monitoring traffic from a stationary position on State Route 20. Houser observed appellant driving a vehicle. From this observation, Houser thought appellant was driving in excess of [\*\*955] the thirty-five m.p.h. posted speed limit. Immediately after his visual observation, Houser activated a K-55 radar unit. It revealed that appellant was driving fifty-two m.p.h.

Houser stopped appellant and asked for his driver's license. Appellant produced a license, but portions of it were illegible due to destruction. Houser could not read appellant's social security number.

Although Houser did not recognize appellant immediately, shortly after the stop was initiated, Houser realized that he had encountered appellant when [\*3] Houser was working at the Cleveland Electric Illuminating Company. Apparently, appellant's wife also worked there, and appellant would drive his wife to work and pick [\*\*\*3] her up at the end of the day.

Houser testified that appellant became belligerent almost immediately after being stopped. When appellant

presented his license, he dropped his wallet and said, "This is really bullshit." Furthermore, appellant was loud and frequently used profanity. Specifically, appellant referred to Houser as "asshole," "Mr. asshole," and "motherfucker." Also, appellant informed Houser eight or nine times that he would "kick [Houser's] ass."

Initially, Houser did not feel threatened. However, after appellant persisted and edged toward him, he felt threatened and thought the altercation would escalate into a "scuffle."

Houser called dispatch and requested a Code Ten, meaning he needed backup as soon as possible. Officer Gentry arrived, and he said that appellant was loud, irritated and very upset. When Gentry was handcuffing appellant, appellant jerked and spun around. However, Gentry subdued appellant and handcuffed him.

Both Douglas and Kitty Williams observed the incident from their residence and corroborated the officers' testimony. Mr. Williams said that appellant was loud, used profanity, and flailed his hands. Furthermore, he testified that he "thought [\*\*\*4] maybe a fight would break out." Ms. Williams also said appellant used profanity.

Appellant appeals his convictions, assigning the following as error:

"1. The trial court erred in finding beyond a reasonable doubt that the defendant was guilty of a speeding violation when there was not sufficient testimony as to the calibration of the K-55 radar unit, and there was no expert testimony as to the reliability of the radar.

"2. The trial court erred in finding beyond a reasonable doubt that the defendant was guilty of the offense of menacing in violation of *O.R.C. 2903.22(A)*.

"3. The trial court erred in finding beyond a reasonable doubt that the defendant was guilty of aggravated disorderly conduct in violation of *O.R.C. 2917.11(A)(3)*.

"4. The trial court erred in exercising jurisdiction in the criminal cases against the defendant, as the complaints charging the crimes were not executed by the complaining officer, and the jurat was not properly signed under oath."

Regarding the first assignment, appellant argues that there was insufficient testimony to support his speeding conviction because the radar reading should not have been admitted. Specifically, he claims that appellee [\*\*\*5] failed to establish [\*4] that the radar device was properly calibrated, that appellee failed to show that Houser was properly trained to use the K-55 radar, and that appellee failed to present testimony regarding the construction of and method of using the K-55 radar unit.

This court has held that [HN2] a conviction for speeding will not be reversed on sufficiency grounds even if a radar reading was improperly admitted into evidence when the officer testified that, based upon his visual observation, the vehicle was speeding. *Kirtland Hills v. Logan (1984), 21 Ohio App. 3d 67, 69, 21 Ohio B. Rep. 71, 74, 486 N.E.2d 231, 232-233*. Houser said that, based on his visual observation, he thought appellant was driving in excess of the speed limit. Thus, this assignment is without merit.

In the second assignment, appellant contends that the trial court erred in finding appellant guilty of menacing.

[\*\*956] *R.C. 2903.22(A)* states:

[HN3] "No person shall knowingly cause another to believe that the offender will cause physical harm to the person or property of such other person or member of his immediate family."

Clearly, under the facts of this case, appellee proved the elements of [\*\*\*6] this crime. Appellant said eight or nine times that he would "kick [Houser's] ass." Furthermore, as the altercation progressed, Houser thought appellant would cause him physical harm and called for immediate backup. This assignment is meritless.

102 Ohio App. 3d 1, \*4; 656 N.E.2d 954, \*\*956;  
1995 Ohio App. LEXIS 972, \*\*\*6

In the third assignment, appellant claims his conviction for disorderly conduct should be reversed. We agree.

As previously stated, appellant was charged pursuant to *R.C. 2917.11(A)(3)*, which states:

[HN4] "No person shall recklessly cause inconvenience, annoyance, or alarm to another, by doing any of the following:

"\* \* \*

"Insulting, taunting, or challenging another, *under circumstances in which such conduct is likely to provoke a violent response* \* \* \*." (Emphasis added.)

Accordingly, appellant could only be convicted if his conduct was likely to provoke a violent response from Houser.

The issue is whether, under the circumstances, a reasonable police officer would find appellant's language such that the officer would want to respond violently. *Warren v. Patrone (1991)*, 75 Ohio App. 3d 595, 598, 600 N.E.2d 344, 345; *State v. Johnson (1982)*, 6 Ohio App. 3d 56, 57, 6 Ohio B. Rep. 268, 269, 453 N.E.2d [\*5] 1101, 1102. [\*\*\*7] [HN5] The standard is objective rather than subjective, and there is no requirement that the arresting officer, in fact, be provoked to a violent response. *Patrone at 598, 600 N.E.2d at 345*.

We find that even though appellant's behavior was obnoxious, under the factual table presented here, a reasonable police officer would not want to respond violently. Thus, this assignment is with merit. We note, however, that while we conclude that appellant's conviction cannot be sustained pursuant to the subsection under which he was charged, it appears that appellant could have been found guilty of disorderly conduct had he been charged under one of the other subsections.

In the fourth assignment, appellant argues that the trial court's judgment is void because the complaints charging the crimes were unsworn complaints.

There were three charging instruments in this case: a traffic ticket charging the speeding violation that was signed by Houser, and two sworn complaints, one charging appellant with menacing, the other charging him with disorderly conduct.

[HN6] Regarding the traffic citation, a signature at the bottom of the ticket is required. However, it need not be sworn. See *Traf.R. 3(C)*. [\*\*\*8] Thus, because the traffic ticket was signed, it was not void.

The complaints charging menacing and disorderly conduct were sworn to by Chief Hitzel. *Crim.R. 3* states:

[HN7] "The complaint is a written statement of the essential facts constituting the offense charged. It shall also state the numerical designation of the applicable statute or ordinance. It shall be made upon oath before any person authorized by law to administer oaths."

In this case, because the disorderly conduct and menacing complaints were sworn to, they complied in this respect with *Crim.R. 3*. *State v. Green (1988)*, 48 Ohio App. 3d 121, 548 N.E.2d 334, cited by appellant, is inapplicable since in that case the complaint was unsworn.

Appellant also argues that because the complaint was signed by Chief Hitzel rather than Houser or Gentry, it is void. However, [HN8] "'it is not necessary that the affidavit be executed by one who observed the commission of the offense. It is sufficient if such person has reasonable grounds to believe the accused has committed the crime.'" *State v. Cragon (Apr. 15, 1994)*, 1994 Ohio App. LEXIS 1593, Ashtabula App. No. 93-A-1789, unreported, at 4, 1994 WL 171654, quoting *Sopko v. [\*\*\*9] Maxwell (1965)*, 3 Ohio St. 2d 123, 124, 32 Ohio Op. 2d 99, 99, 209 [\*\*957] N.E.2d 201, 202. "The important issue is not whether the affiant had personal knowledge, but rather whether or [\*\*6]

102 Ohio App. 3d 1, \*6; 656 N.E.2d 954, \*\*957;  
1995 Ohio App. LEXIS 972, \*\*\*9

not a crime was actually committed." *Cragon* at 4-5. Thus, the complaint was not void, and this assignment is meritless.

Based on the foregoing, the judgment of trial court is affirmed in part and reversed in part, and judgment is entered for appellant on the charge of disorderly conduct.

*Judgment accordingly.*

**The STATE of Ohio, Appellee, v. WILSON, Appellant****No. 93-A-1810****Court of Appeals of Ohio, Eleventh Appellate District, Ashtabula County***102 Ohio App. 3d 1; 656 N.E.2d 954; 1995 Ohio App. LEXIS 972***March 20, 1995, Decided****PRIOR HISTORY:** [\*\*\*1]

CHARACTER OF PROCEEDINGS: Criminal Appeal from Eastern Area County Court, Case No. 93 CRB 199; 93 CRB 200; and 93 TRD 1078.

**DISPOSITION:**

*Judgment accordingly.*

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed his convictions in the Ashtabula County Court, Eastern Area (Ohio) for speeding, menacing, and disorderly conduct.

**OVERVIEW:** A police officer pulled over defendant for speeding. Defendant was abusive and threatened the officer. The officer called for backup and arrested defendant. Defendant was convicted in the trial court of speeding, menacing, and disorderly conduct. On appeal, the court affirmed defendant's convictions for speeding and menacing and reversed his conviction for disorderly conduct. The court held that defendant's conviction for speeding was supported by sufficient evidence because the officer testified that he thought defendant was speeding based upon his observation. The court determined that defendant was properly convicted of menacing pursuant to *Ohio Rev. Code Ann. § 2903.22(A)* because he repeatedly threatened the officer with violence. The court ruled that defendant was erroneously convicted of disorderly conduct pursuant to *Ohio Rev. Code Ann. § 2917.11(A)(3)* because his conduct would not have caused a reasonable police officer to want to respond with violence. The court held that the complaints charging defendant with menacing and disorderly conduct were properly sworn to as required by *Ohio R. Crim. P. 3*.

**OUTCOME:** The court affirmed defendant's convictions for speeding and menacing. The court reversed defendant's conviction for disorderly conduct.

**CORE TERMS:** disorderly conduct, radar, charging, menacing, speeding, driving, sworn, void, beyond a reasonable doubt, profanity, violent, license, visual, loud, police officer, convicted, violently, traffic ticket, physical harm, speed

limit, altercation, meritless, asshole, provoke, unsworn, backup, kick, ass

### **LexisNexis(R) Headnotes**

#### ***Civil Procedure > Appeals > Briefs***

#### ***Criminal Law & Procedure > Appeals > Briefs***

[HN1] *Ohio R. App. P. 18(C)* states in part: If an appellee fails to file his brief, the court may accept the appellant's statement of the facts and issues as correct and reverse the judgment if appellant's brief reasonably appears to sustain such action.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

#### ***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN2] A conviction for speeding will not be reversed on sufficiency grounds even if a radar reading is improperly admitted into evidence when the officer has testified that, based upon his visual observation, the vehicle is speeding.

#### ***Criminal Law & Procedure > Criminal Offenses > Crimes Against Persons > Coercion > General Overview***

#### ***Criminal Law & Procedure > Criminal Offenses > Crimes Against Persons > Stalking > General Overview***

[HN3] *Ohio Rev. Code Ann. § 2903.22(A)* states: No person shall knowingly cause another to believe that the offender will cause physical harm to the person or property of such other person or member of his immediate family.

#### ***Criminal Law & Procedure > Criminal Offenses > Miscellaneous Offenses > Disruptive Conduct > General Overview***

[HN4] *Ohio Rev. Code Ann. § 2917.11(A)(3)* states in part: No person shall recklessly cause inconvenience, annoyance, or alarm to another, by doing any of the following: Insulting, taunting, or challenging another, under circumstances in which such conduct is likely to provoke a violent response.

#### ***Criminal Law & Procedure > Criminal Offenses > Miscellaneous Offenses > Disruptive Conduct > Disorderly Conduct & Disturbing the Peace > General Overview***

#### ***Torts > Negligence > Standards of Care > Appropriate Standard > Objectivity***

[HN5] The standard for disorderly conduct pursuant to *Ohio Rev. Code Ann. § 2917.11(A)(3)* is objective rather than subjective, and there is no requirement that an arresting officer, in fact, be provoked to a violent response.

#### ***Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN6] Regarding a traffic citation, a signature at the bottom of the ticket is required. However, it need not be sworn. *Ohio Traffic R. 3(C)*.

#### ***Criminal Law & Procedure > Criminal Offenses > Miscellaneous Offenses > Disruptive Conduct > Disorderly Conduct & Disturbing the Peace > General Overview***

#### ***Criminal Law & Procedure > Accusatory Instruments > Complaints***

[HN7] *Ohio R. Crim. P. 3* states: The complaint is a written statement of the essential facts constituting the offense charged. It shall also state the numerical designation of the applicable statute or ordinance. It shall be made upon oath before any person authorized by law to administer oaths. *Ohio R. Crim. P. 3*.

***Criminal Law & Procedure > Accusatory Instruments > Complaints***

[HN8] It is not necessary that an affidavit supporting a complaint be executed by one who has observed the commission of the offense. It is sufficient if such person has reasonable grounds to believe the accused has committed the crime. The important issue is not whether the affiant has personal knowledge, but rather whether or not a crime actually has been committed.

**COUNSEL:**

*Gregory J. Brown*, Ashtabula County Prosecuting Attorney, for Appellee.

*Gregory M. Gilson*, for Appellant.

**JUDGES:**

Ford, Presiding Judge. Christley and Joseph E. Mahoney, JJ., concur.

**OPINION BY:**

FORD

**OPINION:**

[\*2] [\*\*954] FORD, Presiding Judge.

This accelerated calendar case comes from the Ashtabula County Court, Eastern Area, and has been submitted on the briefs. n1

n1 Appellee, state of Ohio, did not file a brief. In this case, we read the transcript and are familiar with the testimony. However, we refer appellee to *App.R. 18(C)* which [HN1] states: "If an appellee fails to file his brief, \* \* \* the court may accept the appellant's statement of the facts and issues as correct and reverse the judgment if appellant's brief reasonably appears to sustain such action."

Appellant, Matthew K. Wilson, was charged with speeding, in violation of *R.C. 4511.21*; [\*\*\*2] menacing, in violation of *R.C. 2903.22(A)*; and disorderly conduct, in violation of *R.C. 2917.11(A)(3)*. After a bench trial, he was convicted of all three counts and sentenced.

On May 15, 1993, at approximately 1:00 p.m., Officer Robert D. Houser of the North Kingsville Police Department was monitoring traffic from a stationary position on State Route 20. Houser observed appellant driving a vehicle. From this observation, Houser thought appellant was driving in excess of [\*\*955] the thirty-five m.p.h. posted speed limit. Immediately after his visual observation, Houser activated a K-55 radar unit. It revealed that appellant was driving fifty-two m.p.h.

Houser stopped appellant and asked for his driver's license. Appellant produced a license, but portions of it were illegible due to destruction. Houser could not read appellant's social security number.

Although Houser did not recognize appellant immediately, shortly after the stop was initiated, Houser realized that he had encountered appellant when [\*3] Houser was working at the Cleveland Electric Illuminating Company. Apparently, appellant's wife also worked there, and appellant would drive his wife to work and pick [\*\*\*3] her up at the end of the day.

Houser testified that appellant became belligerent almost immediately after being stopped. When appellant

presented his license, he dropped his wallet and said, "This is really bullshit." Furthermore, appellant was loud and frequently used profanity. Specifically, appellant referred to Houser as "asshole," "Mr. asshole," and "motherfucker." Also, appellant informed Houser eight or nine times that he would "kick [Houser's] ass."

Initially, Houser did not feel threatened. However, after appellant persisted and edged toward him, he felt threatened and thought the altercation would escalate into a "scuffle."

Houser called dispatch and requested a Code Ten, meaning he needed backup as soon as possible. Officer Gentry arrived, and he said that appellant was loud, irritated and very upset. When Gentry was handcuffing appellant, appellant jerked and spun around. However, Gentry subdued appellant and handcuffed him.

Both Douglas and Kitty Williams observed the incident from their residence and corroborated the officers' testimony. Mr. Williams said that appellant was loud, used profanity, and flailed his hands. Furthermore, he testified that he "thought [\*\*\*4] maybe a fight would break out." Ms. Williams also said appellant used profanity.

Appellant appeals his convictions, assigning the following as error:

"1. The trial court erred in finding beyond a reasonable doubt that the defendant was guilty of a speeding violation when there was not sufficient testimony as to the calibration of the K-55 radar unit, and there was no expert testimony as to the reliability of the radar.

"2. The trial court erred in finding beyond a reasonable doubt that the defendant was guilty of the offense of menacing in violation of *O.R.C. 2903.22(A)*.

"3. The trial court erred in finding beyond a reasonable doubt that the defendant was guilty of aggravated disorderly conduct in violation of *O.R.C. 2917.11(A)(3)*.

"4. The trial court erred in exercising jurisdiction in the criminal cases against the defendant, as the complaints charging the crimes were not executed by the complaining officer, and the jurat was not properly signed under oath."

Regarding the first assignment, appellant argues that there was insufficient testimony to support his speeding conviction because the radar reading should not have been admitted. Specifically, he claims that appellee [\*\*\*5] failed to establish [\*4] that the radar device was properly calibrated, that appellee failed to show that Houser was properly trained to use the K-55 radar, and that appellee failed to present testimony regarding the construction of and method of using the K-55 radar unit.

This court has held that [HN2] a conviction for speeding will not be reversed on sufficiency grounds even if a radar reading was improperly admitted into evidence when the officer testified that, based upon his visual observation, the vehicle was speeding. *Kirtland Hills v. Logan (1984), 21 Ohio App. 3d 67, 69, 21 Ohio B. Rep. 71, 74, 486 N.E.2d 231, 232-233*. Houser said that, based on his visual observation, he thought appellant was driving in excess of the speed limit. Thus, this assignment is without merit.

In the second assignment, appellant contends that the trial court erred in finding appellant guilty of menacing.

[\*\*956] *R.C. 2903.22(A)* states:

[HN3] "No person shall knowingly cause another to believe that the offender will cause physical harm to the person or property of such other person or member of his immediate family."

Clearly, under the facts of this case, appellee proved the elements of [\*\*\*6] this crime. Appellant said eight or nine times that he would "kick [Houser's] ass." Furthermore, as the altercation progressed, Houser thought appellant would cause him physical harm and called for immediate backup. This assignment is meritless.

102 Ohio App. 3d 1, \*4; 656 N.E.2d 954, \*\*956;  
1995 Ohio App. LEXIS 972, \*\*\*6

In the third assignment, appellant claims his conviction for disorderly conduct should be reversed. We agree.

As previously stated, appellant was charged pursuant to *R.C. 2917.11(A)(3)*, which states:

[HN4] "No person shall recklessly cause inconvenience, annoyance, or alarm to another, by doing any of the following:

"\* \* \*

"Insulting, taunting, or challenging another, *under circumstances in which such conduct is likely to provoke a violent response* \* \* \*." (Emphasis added.)

Accordingly, appellant could only be convicted if his conduct was likely to provoke a violent response from Houser.

The issue is whether, under the circumstances, a reasonable police officer would find appellant's language such that the officer would want to respond violently. *Warren v. Patrone (1991)*, 75 Ohio App. 3d 595, 598, 600 N.E.2d 344, 345; *State v. Johnson (1982)*, 6 Ohio App. 3d 56, 57, 6 Ohio B. Rep. 268, 269, 453 N.E.2d [\*5] 1101, 1102. [\*\*\*7] [HN5] The standard is objective rather than subjective, and there is no requirement that the arresting officer, in fact, be provoked to a violent response. *Patrone at 598, 600 N.E.2d at 345*.

We find that even though appellant's behavior was obnoxious, under the factual table presented here, a reasonable police officer would not want to respond violently. Thus, this assignment is with merit. We note, however, that while we conclude that appellant's conviction cannot be sustained pursuant to the subsection under which he was charged, it appears that appellant could have been found guilty of disorderly conduct had he been charged under one of the other subsections.

In the fourth assignment, appellant argues that the trial court's judgment is void because the complaints charging the crimes were unsworn complaints.

There were three charging instruments in this case: a traffic ticket charging the speeding violation that was signed by Houser, and two sworn complaints, one charging appellant with menacing, the other charging him with disorderly conduct.

[HN6] Regarding the traffic citation, a signature at the bottom of the ticket is required. However, it need not be sworn. See *Traf.R. 3(C)*. [\*\*\*8] Thus, because the traffic ticket was signed, it was not void.

The complaints charging menacing and disorderly conduct were sworn to by Chief Hitzel. *Crim.R. 3* states:

[HN7] "The complaint is a written statement of the essential facts constituting the offense charged. It shall also state the numerical designation of the applicable statute or ordinance. It shall be made upon oath before any person authorized by law to administer oaths."

In this case, because the disorderly conduct and menacing complaints were sworn to, they complied in this respect with *Crim.R. 3*. *State v. Green (1988)*, 48 Ohio App. 3d 121, 548 N.E.2d 334, cited by appellant, is inapplicable since in that case the complaint was unsworn.

Appellant also argues that because the complaint was signed by Chief Hitzel rather than Houser or Gentry, it is void. However, [HN8] "'it is not necessary that the affidavit be executed by one who observed the commission of the offense. It is sufficient if such person has reasonable grounds to believe the accused has committed the crime.'" *State v. Cragon (Apr. 15, 1994)*, 1994 Ohio App. LEXIS 1593, Ashtabula App. No. 93-A-1789, unreported, at 4, 1994 WL 171654, quoting *Sopko v. [\*\*\*9] Maxwell (1965)*, 3 Ohio St. 2d 123, 124, 32 Ohio Op. 2d 99, 99, 209 [\*\*957] N.E.2d 201, 202. "The important issue is not whether the affiant had personal knowledge, but rather whether or [\*\*6]

102 Ohio App. 3d 1, \*6; 656 N.E.2d 954, \*\*957;  
1995 Ohio App. LEXIS 972, \*\*\*9

not a crime was actually committed." *Cragon* at 4-5. Thus, the complaint was not void, and this assignment is meritless.

Based on the foregoing, the judgment of trial court is affirmed in part and reversed in part, and judgment is entered for appellant on the charge of disorderly conduct.

*Judgment accordingly.*

Christley and Joseph E. Mahoney, JJ., concur.

COUNTY**

*1993 Ohio App. LEXIS 5513*

**November 1, 1993, Entered**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDING: Criminal Appeal from the Ashland Municipal Court. Case No. 93-TR-D-25652

**DISPOSITION:**

JUDGMENT: Affirmed

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of a judgment from the Ashland Municipal Court (Ohio), which convicted defendant of speeding, a violation of *Ohio Rev. Code Ann. § 4511.21(D)(1)*.

**OVERVIEW:** Defendant was charged with speeding. The trial court convicted defendant. On appeal, defendant contended that the prosecution failed to establish the corpus delicti of speeding. The court held that: (1) the prosecution established through the testimony of a trooper that he observed defendant's vehicle southbound at a speed in excess of 65 miles per hour; (2) the trooper activated radar and received audio output that confirmed that the vehicle was traveling in excess of 65 miles per hour, the trooper identified the driver of the vehicle as defendant, and from the trooper's testimony, the corpus delicti was established; (3) the verdict was not against the manifest weight of the evidence; (4) defendant did not have the right to a jury trial; and (5) the trial court did not err in entering a plea of not guilty for defendant after defendant refused to enter a plea.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** traffic, arraignment, radar, municipal, issuance, ticket, traffic citation, sub judice, discovery, speed, corpus delicti, enter a plea, summons, reasonable doubt, jury trial, misdemeanor, southbound, activated, speeding, complied, visual, probable cause hearing, entering a plea, law enforcement officer, pre-plea, designation, audio, fine

**OPINION BY:** SHEILA G. FARMER

**OPINION:**

OPINION

FARMER, J.

On March 21, 1993, Ohio State Highway Patrol Trooper Brad Perry observed appellant, Phillip A. Douglas, operating a motor vehicle southbound on U.S. Route 42 at an excessive speed. After making this observation, Trooper Perry activated his radar unit and used it to confirm his visual observation. The radar indicated that appellant's vehicle was travelling at 68 m.p.h. in a 55 m.p.h. zone. For that reason, appellant was stopped and thereafter issued a citation for speeding in violation of *R.C. 4511.21(D)(1)*.

Arraignment on this charge was held on April 2, 1993. A description of the various pleas that appellant had a right to enter were explained to him. When asked how he pled, appellant refused to enter a plea. [\*2] Consequently, the court entered a plea of not guilty on appellant's behalf.

Appellant proceeded to file a number of motions, notices, demands, orders, briefs, and affidavits. A hearing on these matters was set for April 5, 1993, at 9:00 a.m. With appellant's consent, the trial was held later in the day on April 5, 1993. At the conclusion of the trial, the court entered a finding of guilty and fined appellant \$ 25 plus costs.

Appellant timely filed a notice of appeal and this matter is now before this court for consideration.

Assignments of error are as follows:

ASSIGNMENT OF ERROR NO. I

THE COURT JUDGE NELSON ERRED IN ASSUMING JURISDICTION WHEN THE COURT'S JURISDICTION HAD NOT BEEN INVOKED BY A COMPLAINT SIGNED BY A PROSECUTOR AND SUPPORTED BY AN AFFIDAVIT.

ASSIGNMENT OF ERROR NO. II

NO CORPUS DELICTI WAS PRODUCED AT TRIAL.

ASSIGNMENT OF ERROR NO. III

THE INSTRUMENT USED BY TRIAL JUDGE NELSON AS A FEIGNED COMPLAINT WAS NOT EVEN BROUGHT IN A TRIBUNAL ESTABLISHED BY THE STATE OF OHIO.

## ASSIGNMENT OF ERROR NO. IV

ALLEGED VERDICT IS AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE.

## ASSIGNMENT OF ERROR NO. V

TRIAL COURT JUDGE NELSON ERRED IN DENYING THE [\*3] ACCUSED A TRIAL BY JURY.

## ASSIGNMENT OF ERROR NO. VI

TRIAL JUDGE NELSON DENIED DEFENDANT-APPELLANT THE SUBSTANTIVE RIGHT OF PRE-PLEA DISCOVERY BY ENTERING A PLEA FOR HIM OVER HIS OBJECTION.

## ASSIGNMENT OF ERROR NO. VII

TRIAL JUDGE NELSON ERRED BY PERMITTING THE INTRODUCTION OF ILLEGALLY OBTAINED EVIDENCE.

## ASSIGNMENT OF ERROR NO. VIII

DEFENDANT-APPELLANT WAS NOT AFFORDED A PROBABLE CAUSE HEARING.

## ASSIGNMENT OF ERROR NO. IX

NO MIRANDA WARNING WAS GIVEN TO DEFENDANT-APPELLANT AT THE OUTSET OF THE INITIAL INVESTIGATION.

## I

Appellant claims that the Uniform Traffic Citation issued in the case sub judice was not signed by the "prosecutor," nor supported by affidavit. We disagree.

*Traf.R. 3(A)* establishes the form to be used in a traffic case:

**RULE 3. Complaint and summons; form; use**

**(A). Traffic complaint and summons.** [HN1] In traffic cases, the complaint and summons shall be the "Ohio Uniform Traffic Ticket" as set out in the Appendix of Forms.

Furthermore, *Traf.R. 3(E)* establishes the procedure for ticket issuance:

**(E) Duty of law enforcement officer.** A law enforcement officer who issues a ticket shall complete and [\*4] sign the ticket, serve a copy of the completed ticket upon defendant, and, without unnecessary delay, file the court copy with the court.

In our review of the ticket sub judice, we find that it conforms with the requirements of *Traf.R. 3(A)* and (E). *Crim.R. 3* requirements for a complaint issued under oath does not apply to traffic cases. *City of Cleveland v. Austin (1978)*, 55 Ohio App.2d 215, 380 N.E.2d 1357. *Traf.R. 3* is the proper procedure for issuance of traffic citations. Id. at paragraph two of the syllabus.

Assignment of Error I is denied.

## II

Appellant contends that the State failed to establish the "corpus delicti" of speeding, *R.C. 4511.21*. We disagree.

[HN2] Corpus delicti is defined as:

. . . the objective proof or substantial fact that a crime has been committed. The "corpus delicti" of a crime is the body, foundation or substance of the crime which ordinarily includes two elements: the act and the criminal agency of the act.

From our review of the record, the State established through the testimony of Trooper Perry that he observed appellant's vehicle southbound at a speed in excess of 65 m.p.h. T.13. Trooper Perry activated the radar [\*5] and received audio output which confirmed that the vehicle was in excess of 65 m.p.h. T.13. Trooper Perry identified the driver as appellant. T.14-15.

We conclude from that testimony that the "corpus delicti" was established.

Assignment of Error II is denied.

## III

Appellant contends that the traffic citation issued to him cited him to appear at a non-existent court. We disagree.

The traffic citation cited appellant to appear at "Municipal Court Ashland, Ohio, 44805." *R.C. 1901.02(B)* establishes that the "Ashland municipal court has jurisdiction within Ashland county." As we have previously noted, the citation issued complies with the requirements of *Traf.R. 3*.

We understand appellant's contention that Trooper Perry capitalized Municipal and Court and placed the territorial designation after the naming of the court. However, it appears not to have misled appellant as to the correct judicial district for he did appear at his arraignment. April 2, 1993 T.4.

We find that the designation of "Municipal Court Ashland, Ohio 44805" is the same as designating Ashland Municipal Court pursuant to *R.C. 1901.02(B)*. Therefore, the trial court had jurisdiction over the citation.

Assignment [\*6] of Error III is denied.

## IV

Appellant claims that the verdict of guilty is against the manifest weight of the evidence. We disagree.

[HN3] Our examination of the record at trial is limited to a determination of whether there was evidence presented "which, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt." *State v. Eley (1978)*, 56 Ohio St.2d 169, 172, 383 N.E.2d 132, citing *Atkins v. State (1926)*, 115 Ohio St. 542, 546, 155 N.E. 189.

From a review of the record, we find from the visual observations of Trooper Perry (T.13), and the collaborative evidence of the radar detection (T.14), there was sufficient evidence for the trial court to conclude that all the elements of the offense had been proven beyond a reasonable doubt. Eley.

Assignment of Error IV is denied.

## V

Appellant claims that he was denied his right to a jury trial. We disagree.

*R.C. 2945.17* has codified the Sixth Amendment right to jury trial excepting cases in which the fine does not exceed \$ 100:

**§ 2945.17 Right to trial by jury.**

[HN4] At any trial, in any court, for the violation of any statute of this state, or of any ordinance of any municipal corporation, [\*7] except in cases in which the penalty involved does not exceed a fine of one hundred dollars, the accused has the right to be tried by a jury.

Appellant was charged under *R.C. 4511.21(D)(1)* which is classified as a minor misdemeanor. *R.C. 2929.21(D)* establishes the maximum fine for a minor misdemeanor as \$ 100. Therefore, appellant does not have the right to a jury trial.

Assignment of Error V is denied.

VI

Appellant claims the trial court erred in entering a plea of "not guilty" for him, thereby denying him his right to "pre-plea discovery." We disagree.

At appellant's arraignment, he stated the following:

THE COURT: How do you plead to this charge?

THE DEFENDANT: I make no plea on this.

THE COURT: All right. I'll enter a plea of not guilty on your behalf.

*Traf.R. 10 (A)* states:

**RULE 10. Pleas; rights upon plea**

(A) **Pleas.** . . . [HN5] If a defendant refuses to plead, the court shall enter a plea of not guilty on behalf of the defendant.

Traffic court arraignment procedures are governed by *Traf.R. 8(B)*:

**RULE 8. Arraignment**

. . .

(B) **Arraignment procedures.** [HN6] Arraignment shall be conducted in open court and [\*8] shall consist of reading the complaint to the defendant, or stating to him the substance of the charge, and calling on him to plead thereto. The defendant shall be given a copy of the complaint, or shall acknowledge receipt thereof, before being called upon to plead and may in open court waive the reading of the complaint.

An examination of the April 2, 1993 record reveals that the trial court complied with these rules. *Traf.R. 11(B)(2)(b)* provides that requests and motions for discovery shall be made under *Crim.R. 16*, "Discovery and Inspection." Upon review of said rule, we note no reference to "pre-plea discovery." We find no such "substantive right" under Ohio law.

Assignment of Error VI is denied.

## VII

Appellant claims that the trial court erred in permitting evidence as to the K-55 radar device. We disagree.

We note that there was no objection at trial to the evidence of the radar reading. T.13-15. [HN7] In order to preserve an issue for review, one must raise the issue in the trial court. *State v. Maurer (1984)*, 15 Ohio St.3d 239, 473 N.E.2d 768; *State v. Williams (1977)*, 51 Ohio St.2d 112, 364 N.E.2d 1364.

Nevertheless, we find that Trooper Perry was established at [\*9] trial as a trained, certified operator of the vehicle. T.6-8. Further, the evidence established the calibration procedures and that they were performed on the date of arrest. T.8-11. Trooper Perry visually estimated the speed of appellant's vehicle and received an audio confirmation of the speed. T.13-14. Trooper Perry further testified that the vehicle clocked and observed was one and the same. T.14-15.

The requirements of *Akron v. Gray (1979)*, 60 Ohio Misc. 68, 397 N.E.2d 429, and *State v. Wasner (May 6, 1981)*, Tuscarawas App. No. CA-1475, unreported, were met in the case sub judice.

Assignment of Error VII is denied.

## VIII

Appellant contends that he was not afforded a probable cause hearing. We disagree.

As we have stated in Assignments of Error I and VI, the issuance of a traffic citation is governed by Ohio Traffic Rules, and in particular, *Traf.R. 1* and *3*.

[HN8] A probable cause hearing under *Crim.R. 4* does not attach to the issuance of a traffic citation. The record reveals that the issuance of the citation sub judice, on all matters, complied with the Ohio traffic rules.

Assignment of Error VIII is denied.

## IX

Appellant contends that he was not afforded his [\*10] "Miranda rights" at the traffic stop. We disagree.

From our review of the record, we find no statement of appellant in evidence. There is no testimony as to anything appellant said to Trooper Perry. Therefore, there can be no violation of appellant's right against self-incrimination nor his right to counsel.

Assignment of Error IX is denied.

The judgment of the Ashland Municipal Court of Ashland County, Ohio, is hereby affirmed.

by Farmer J.

Hoffman, P.J. and

Reader, J. concur.

## JUDGMENT ENTRY

For the reasons stated in the Memorandum-Opinion on file, the judgment of the Ashland Municipal Court of Ashland County, Ohio, is affirmed.

**STATE OF OHIO, Plaintiff-Appellee v. PHILLIP A. DOUGLAS,  
Defendant-Appellant**

**Case No. CA-1044**

**COURT OF APPEALS OF OHIO, FIFTH APPELLATE DISTRICT, ASHLAND  
COUNTY**

*1993 Ohio App. LEXIS 5513*

**November 1, 1993, Entered**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDING: Criminal Appeal from the Ashland Municipal Court. Case No. 93-TR-D-25652

**DISPOSITION:**

JUDGMENT: Affirmed

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of a judgment from the Ashland Municipal Court (Ohio), which convicted defendant of speeding, a violation of *Ohio Rev. Code Ann. § 4511.21(D)(1)*.

**OVERVIEW:** Defendant was charged with speeding. The trial court convicted defendant. On appeal, defendant contended that the prosecution failed to establish the corpus delicti of speeding. The court held that: (1) the prosecution established through the testimony of a trooper that he observed defendant's vehicle southbound at a speed in excess of 65 miles per hour; (2) the trooper activated radar and received audio output that confirmed that the vehicle was traveling in excess of 65 miles per hour, the trooper identified the driver of the vehicle as defendant, and from the trooper's testimony, the corpus delicti was established; (3) the verdict was not against the manifest weight of the evidence; (4) defendant did not have the right to a jury trial; and (5) the trial court did not err in entering a plea of not guilty for defendant after defendant refused to enter a plea.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** traffic, arraignment, radar, municipal, issuance, ticket, traffic citation, sub judice, discovery, speed, corpus delicti, enter a plea, summons, reasonable doubt, jury trial, misdemeanor, southbound, activated, speeding, complied, visual, probable cause hearing, entering a plea, law enforcement officer, pre-plea, designation, audio, fine

For Plaintiff-Appellee: W. DAVID MONTAGUE, Ass't Law Director, 124 Church Street, Ashland, Ohio 44805.

For Defendant-Appellant: PHILLIP A. DOUGLAS, pro se, c/o Box 18147, Fredericktown, Ohio 43019.

**JUDGES:** Hon. William B. Hoffman, P.J., Hon. Sheila G. Farmer, J., Hon. W. Don Reader, J.

**OPINION BY:** SHEILA G. FARMER

**OPINION:**

OPINION

FARMER, J.

On March 21, 1993, Ohio State Highway Patrol Trooper Brad Perry observed appellant, Phillip A. Douglas, operating a motor vehicle southbound on U.S. Route 42 at an excessive speed. After making this observation, Trooper Perry activated his radar unit and used it to confirm his visual observation. The radar indicated that appellant's vehicle was travelling at 68 m.p.h. in a 55 m.p.h. zone. For that reason, appellant was stopped and thereafter issued a citation for speeding in violation of *R.C. 4511.21(D)(1)*.

Arraignment on this charge was held on April 2, 1993. A description of the various pleas that appellant had a right to enter were explained to him. When asked how he pled, appellant refused to enter a plea. [\*2] Consequently, the court entered a plea of not guilty on appellant's behalf.

Appellant proceeded to file a number of motions, notices, demands, orders, briefs, and affidavits. A hearing on these matters was set for April 5, 1993, at 9:00 a.m. With appellant's consent, the trial was held later in the day on April 5, 1993. At the conclusion of the trial, the court entered a finding of guilty and fined appellant \$ 25 plus costs.

Appellant timely filed a notice of appeal and this matter is now before this court for consideration.

Assignments of error are as follows:

ASSIGNMENT OF ERROR NO. I

THE COURT JUDGE NELSON ERRED IN ASSUMING JURISDICTION WHEN THE COURT'S JURISDICTION HAD NOT BEEN INVOKED BY A COMPLAINT SIGNED BY A PROSECUTOR AND SUPPORTED BY AN AFFIDAVIT.

ASSIGNMENT OF ERROR NO. II

NO CORPUS DELICTI WAS PRODUCED AT TRIAL.

ASSIGNMENT OF ERROR NO. III

THE INSTRUMENT USED BY TRIAL JUDGE NELSON AS A FEIGNED COMPLAINT WAS NOT EVEN BROUGHT IN A TRIBUNAL ESTABLISHED BY THE STATE OF OHIO.

## ASSIGNMENT OF ERROR NO. IV

ALLEGED VERDICT IS AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE.

## ASSIGNMENT OF ERROR NO. V

TRIAL COURT JUDGE NELSON ERRED IN DENYING THE [\*3] ACCUSED A TRIAL BY JURY.

## ASSIGNMENT OF ERROR NO. VI

TRIAL JUDGE NELSON DENIED DEFENDANT-APPELLANT THE SUBSTANTIVE RIGHT OF PRE-PLEA DISCOVERY BY ENTERING A PLEA FOR HIM OVER HIS OBJECTION.

## ASSIGNMENT OF ERROR NO. VII

TRIAL JUDGE NELSON ERRED BY PERMITTING THE INTRODUCTION OF ILLEGALLY OBTAINED EVIDENCE.

## ASSIGNMENT OF ERROR NO. VIII

DEFENDANT-APPELLANT WAS NOT AFFORDED A PROBABLE CAUSE HEARING.

## ASSIGNMENT OF ERROR NO. IX

NO MIRANDA WARNING WAS GIVEN TO DEFENDANT-APPELLANT AT THE OUTSET OF THE INITIAL INVESTIGATION.

## I

Appellant claims that the Uniform Traffic Citation issued in the case sub judice was not signed by the "prosecutor," nor supported by affidavit. We disagree.

*Traf.R. 3(A)* establishes the form to be used in a traffic case:

**RULE 3. Complaint and summons; form; use**

**(A). Traffic complaint and summons.** [HN1] In traffic cases, the complaint and summons shall be the "Ohio Uniform Traffic Ticket" as set out in the Appendix of Forms.

Furthermore, *Traf.R. 3(E)* establishes the procedure for ticket issuance:

**(E) Duty of law enforcement officer.** A law enforcement officer who issues a ticket shall complete and [\*4] sign the ticket, serve a copy of the completed ticket upon defendant, and, without unnecessary delay, file the court copy with the court.

In our review of the ticket sub judice, we find that it conforms with the requirements of *Traf.R. 3(A)* and (E). *Crim.R. 3* requirements for a complaint issued under oath does not apply to traffic cases. *City of Cleveland v. Austin (1978)*, 55 Ohio App.2d 215, 380 N.E.2d 1357. *Traf.R. 3* is the proper procedure for issuance of traffic citations. Id. at paragraph two of the syllabus.

Assignment of Error I is denied.

## II

Appellant contends that the State failed to establish the "corpus delicti" of speeding, *R.C. 4511.21*. We disagree.

[HN2] Corpus delicti is defined as:

. . . the objective proof or substantial fact that a crime has been committed. The "corpus delicti" of a crime is the body, foundation or substance of the crime which ordinarily includes two elements: the act and the criminal agency of the act.

From our review of the record, the State established through the testimony of Trooper Perry that he observed appellant's vehicle southbound at a speed in excess of 65 m.p.h. T.13. Trooper Perry activated the radar [\*5] and received audio output which confirmed that the vehicle was in excess of 65 m.p.h. T.13. Trooper Perry identified the driver as appellant. T.14-15.

We conclude from that testimony that the "corpus delicti" was established.

Assignment of Error II is denied.

## III

Appellant contends that the traffic citation issued to him cited him to appear at a non-existent court. We disagree.

The traffic citation cited appellant to appear at "Municipal Court Ashland, Ohio, 44805." *R.C. 1901.02(B)* establishes that the "Ashland municipal court has jurisdiction within Ashland county." As we have previously noted, the citation issued complies with the requirements of *Traf.R. 3*.

We understand appellant's contention that Trooper Perry capitalized Municipal and Court and placed the territorial designation after the naming of the court. However, it appears not to have misled appellant as to the correct judicial district for he did appear at his arraignment. April 2, 1993 T.4.

We find that the designation of "Municipal Court Ashland, Ohio 44805" is the same as designating Ashland Municipal Court pursuant to *R.C. 1901.02(B)*. Therefore, the trial court had jurisdiction over the citation.

Assignment [\*6] of Error III is denied.

## IV

Appellant claims that the verdict of guilty is against the manifest weight of the evidence. We disagree.

[HN3] Our examination of the record at trial is limited to a determination of whether there was evidence presented "which, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt." *State v. Eley (1978)*, 56 Ohio St.2d 169, 172, 383 N.E.2d 132, citing *Atkins v. State (1926)*, 115 Ohio St. 542, 546, 155 N.E. 189.

From a review of the record, we find from the visual observations of Trooper Perry (T.13), and the collaborative evidence of the radar detection (T.14), there was sufficient evidence for the trial court to conclude that all the elements of the offense had been proven beyond a reasonable doubt. Eley.

Assignment of Error IV is denied.

## V

Appellant claims that he was denied his right to a jury trial. We disagree.

*R.C. 2945.17* has codified the Sixth Amendment right to jury trial excepting cases in which the fine does not exceed \$ 100:

**§ 2945.17 Right to trial by jury.**

[HN4] At any trial, in any court, for the violation of any statute of this state, or of any ordinance of any municipal corporation, [\*7] except in cases in which the penalty involved does not exceed a fine of one hundred dollars, the accused has the right to be tried by a jury.

Appellant was charged under *R.C. 4511.21(D)(1)* which is classified as a minor misdemeanor. *R.C. 2929.21(D)* establishes the maximum fine for a minor misdemeanor as \$ 100. Therefore, appellant does not have the right to a jury trial.

Assignment of Error V is denied.

VI

Appellant claims the trial court erred in entering a plea of "not guilty" for him, thereby denying him his right to "pre-plea discovery." We disagree.

At appellant's arraignment, he stated the following:

THE COURT: How do you plead to this charge?

THE DEFENDANT: I make no plea on this.

THE COURT: All right. I'll enter a plea of not guilty on your behalf.

*Traf.R. 10 (A)* states:

**RULE 10. Pleas; rights upon plea**

(A) **Pleas.** . . . [HN5] If a defendant refuses to plead, the court shall enter a plea of not guilty on behalf of the defendant.

Traffic court arraignment procedures are governed by *Traf.R. 8(B)*:

**RULE 8. Arraignment**

. . .

(B) **Arraignment procedures.** [HN6] Arraignment shall be conducted in open court and [\*8] shall consist of reading the complaint to the defendant, or stating to him the substance of the charge, and calling on him to plead thereto. The defendant shall be given a copy of the complaint, or shall acknowledge receipt thereof, before being called upon to plead and may in open court waive the reading of the complaint.

An examination of the April 2, 1993 record reveals that the trial court complied with these rules. *Traf.R. 11(B)(2)(b)* provides that requests and motions for discovery shall be made under *Crim.R. 16*, "Discovery and Inspection." Upon review of said rule, we note no reference to "pre-plea discovery." We find no such "substantive right" under Ohio law.

Assignment of Error VI is denied.

## VII

Appellant claims that the trial court erred in permitting evidence as to the K-55 radar device. We disagree.

We note that there was no objection at trial to the evidence of the radar reading. T.13-15. [HN7] In order to preserve an issue for review, one must raise the issue in the trial court. *State v. Maurer (1984)*, 15 Ohio St.3d 239, 473 N.E.2d 768; *State v. Williams (1977)*, 51 Ohio St.2d 112, 364 N.E.2d 1364.

Nevertheless, we find that Trooper Perry was established at [\*9] trial as a trained, certified operator of the vehicle. T.6-8. Further, the evidence established the calibration procedures and that they were performed on the date of arrest. T.8-11. Trooper Perry visually estimated the speed of appellant's vehicle and received an audio confirmation of the speed. T.13-14. Trooper Perry further testified that the vehicle clocked and observed was one and the same. T.14-15.

The requirements of *Akron v. Gray (1979)*, 60 Ohio Misc. 68, 397 N.E.2d 429, and *State v. Wasner (May 6, 1981)*, Tuscarawas App. No. CA-1475, unreported, were met in the case sub judice.

Assignment of Error VII is denied.

## VIII

Appellant contends that he was not afforded a probable cause hearing. We disagree.

As we have stated in Assignments of Error I and VI, the issuance of a traffic citation is governed by Ohio Traffic Rules, and in particular, *Traf.R. 1* and *3*.

[HN8] A probable cause hearing under *Crim.R. 4* does not attach to the issuance of a traffic citation. The record reveals that the issuance of the citation sub judice, on all matters, complied with the Ohio traffic rules.

Assignment of Error VIII is denied.

## IX

Appellant contends that he was not afforded his [\*10] "Miranda rights" at the traffic stop. We disagree.

From our review of the record, we find no statement of appellant in evidence. There is no testimony as to anything appellant said to Trooper Perry. Therefore, there can be no violation of appellant's right against self-incrimination nor his right to counsel.

Assignment of Error IX is denied.

The judgment of the Ashland Municipal Court of Ashland County, Ohio, is hereby affirmed.

by Farmer J.

Hoffman, P.J. and

Reader, J. concur.

## JUDGMENT ENTRY

124 of 195 DOCUMENTS

**STATE OF OHIO, Plaintiff-Appellee, v. MARY LOU SHEPHERD,  
Defendant-Appellant.**

CASE NO. CA92-11-022

**COURT OF APPEALS OF OHIO, TWELFTH APPELLATE DISTRICT, PREBLE  
COUNTY**

*1993 Ohio App. LEXIS 3850***August 9, 1993, Decided****DISPOSITION:** [\*1]

Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed her conviction entered in the Eaton Municipal Court (Ohio) on charges of speeding in violation of *Ohio Rev. Code Ann. § 4511.21(D)(2)*.

**OVERVIEW:** Defendant was seen traveling at a high rate of speed by a state trooper who was in his car in the median of the interstate. He activated his radar, verified that it was sighted on defendant's vehicle, and recorded a speed of 90 miles per hour in a 65 miles per hour zone. At her trial, she did not object to introduction of documents pertaining to the accuracy of the radar unit's tuning forks or its service history. She presented no evidence that the radar display was invalid. On appeal, she claimed that the conviction was against the manifest weight of the evidence, and that it was plain error for the trial court to consider the documents and admit them into evidence. The court held that there was sufficient evidence of defendant's speed, including the accuracy of the radar unit, to convince the trier of fact of her guilt beyond a reasonable doubt. To assert plain error, it must appear on the face of the record that an error was committed and that but for the error the result of the trial would have been otherwise. The court reviewed the trial court's handling of the documents and determined that the procedure did not satisfy the rigorous requirements of the plain error doctrine.

**OUTCOME:** The court affirmed the judgment.

**CORE TERMS:** radar, speed, reasonable doubt, plain error, speeding, assignments of error, manifest, visual, rational trier of fact, proven beyond, motor vehicle, guilt beyond, exceeding, favorable, admit, high pitch, light blue, calibrated, displayed, traveling, activated, tracking, display, cruiser, audible, median, marked

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN1] When analyzing a conviction in the context of the manifest weight of the evidence, the court must determine whether, upon examination of the record, the evidence, if believed, would convince the average mind of defendant's

guilt beyond a reasonable doubt. The court must examine the evidence in the light most favorable to the prosecution, and ask whether any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN2] The essential elements of one type of a speeding offense are found in *Ohio Rev. Code Ann. § 4511.21(D)(2)*: No person shall operate a motor vehicle at a speed exceeding 65 miles per hour.

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Plain Error > Evidence***

[HN3] Where there was no objection made to the documents either during trial or thereafter when they were admitted into evidence, the court is not obligated to consider appellant's challenges to the documents on appeal.

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Plain Error > Definitions***

[HN4] Plain errors or defects affecting substantial rights may be noticed although they were not brought to the attention of the court. *Ohio R. Crim. P. 52(B)*. To rise to the level of plain error, it must appear on the face of the record not only that the error was committed, but that except for the error the result of the trial clearly would have been otherwise and that not to consider the error would result in a clear miscarriage of justice.

**COUNSEL:**

John L. Petry, Prosecuting Attorney for Eaton Municipal Court, 132 North Barron Street, Eaton, Ohio 45320, for plaintiff-appellee.

Augustus L. Ross, III, 12 East Dayton Street, West Alexandria, Ohio 45381, for defendant-appellant.

**JUDGES:** YOUNG, JONES, KOEHLER

**OPINION BY:** YOUNG

**OPINION:**

OPINION

YOUNG, J. Defendant-appellant, Mary Lou Shepherd, appeals her conviction in Eaton Municipal Court for speeding in violation of *R.C. 4511.21(D)(2)*.

The evidence adduced at trial is as follows: The arresting officer, Trooper Shawn Smart of the Ohio State Highway Patrol, testified that on August 30, 1992 he was seated in a marked cruiser which was parked in a median crossover on I-70 in Preble County. Trooper Smart observed a light blue vehicle in the right lane approaching at a high rate of speed. He then activated his radar unit, which displayed a speed of 90 m.p.h. The radar unit produced a high pitch audible which was consistent with the visual display. Trooper Smart also performed a visual tracking procedure which verified that the radar unit actually clocked the light blue vehicle. Once the vehicle passed, Trooper Smart pulled out of the median, pursued the vehicle with [\*2] his flashing lights activated, and stopped it. Appellant was the driver of the vehicle. Trooper Smart further testified that the radar unit had been correctly calibrated.

Appellant testified that Trooper Smart could not have observed her vehicle because his cruiser was obscured by bushes. Appellant also denied that she was traveling 90 m.p.h., although she failed to provide an estimate of the speed

which she was allegedly traveling.

On October 23, 1992, appellant was found guilty in Eaton Municipal Court of exceeding the posted 65 m.p.h. speed limit in violation of *R.C. 4511.21(D)(2)*. The court fined appellant \$ 75.00 plus costs and assessed two points against her operator's license.

On appeal, appellant presents four assignments of error for review. Because appellant essentially argues in the first and fourth assignments that her conviction was against the manifest weight of the evidence, we consider those assignments together.

[HN1] When analyzing a conviction in the context of the manifest weight of the evidence, this court must determine whether, upon examination of the record, the evidence, if believed, would convince the average mind of appellant's guilt beyond a reasonable doubt. [\*3] *State v. Jenks (1991), 61 Ohio St.3d 259, 574 N.E.2d 492*. We must examine the evidence in the light most favorable to the prosecution, and ask whether any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt. *Id.*

[HN2] The essential elements of a speeding offense as they apply in the present case are found in *R.C. 4511.21(D)(2)*: "(D) No person shall operate a motor vehicle \* \* \* (2) At a speed exceeding sixty-five miles per hour \* \* \*."

Upon review of the record in the light most favorable to the prosecution, we conclude that a rational trier of fact could have found the above elements proven beyond a reasonable doubt. Clearly, appellant operated a motor vehicle in Ohio on the date in question. In addition, a valid radar reading of 90 m.p.h. including a high pitch audible was before the court. The radar unit was properly calibrated and appellant presented no evidence that the radar display was invalid. Also, Trooper Smart described his observations of appellant's speed and the visual tracking procedure which he utilized to ensure that the radar unit actually displayed the speed of appellant's vehicle. Thus, the average mind [\*4] could be convinced of appellant's guilt beyond a reasonable doubt, and, therefore, the speeding conviction was not against the manifest weight of the evidence. Appellant's first and fourth assignments are overruled.

Appellant's second and third assignments of error also involve similar issues and will be combined. Appellant argues that the trial court erred in reviewing the certificate of accuracy for the radar unit's calibration tuning forks and a document outlining the service history of the unit before the documents were marked as exhibits or entered into evidence. Appellant also asserts that the court erred in admitting copies of the documents into evidence after determining her guilt and the corresponding sentence.

We first note, as appellant admits, that [HN3] there was no objection made to the documents either during trial or thereafter when they were admitted into evidence. Therefore, this court is not obligated to consider appellant's challenges to the documents on appeal. See *State v. Black (1978), 54 Ohio St.2d 304, 376 N.E.2d 948*. Appellant, though, proposes that it was plain error for the trial court to consider the documents and admit them into evidence.

[HN4] "Plain errors [\*5] or defects affecting substantial rights may be noticed although they were not brought to the attention of the court." *Crim.R. 52(B)*. To rise to the level of plain error, it must appear on the face of the record not only that the error was committed, but that except for the error the result of the trial clearly would have been otherwise and that not to consider the error would result in a clear miscarriage of justice. *State v. Bock (1984), 16 Ohio App.3d 146, 474 N.E.2d 1228*.

We have reviewed the trial court's handling of the documents and find that the procedure does not satisfy the rigorous requirements of the plain error doctrine. Appellant's second and third assignments of error are overruled.

Judgment affirmed.

JONES, P.J., and KOEHLER, J., concur.

**STATE OF OHIO, Plaintiff-Appellee, v. MARY LOU SHEPHERD,  
Defendant-Appellant.**

**CASE NO. CA92-11-022**

**COURT OF APPEALS OF OHIO, TWELFTH APPELLATE DISTRICT, PREBLE  
COUNTY**

*1993 Ohio App. LEXIS 3850*

**August 9, 1993, Decided**

**DISPOSITION:** [\*1]

Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed her conviction entered in the Eaton Municipal Court (Ohio) on charges of speeding in violation of *Ohio Rev. Code Ann. § 4511.21(D)(2)*.

**OVERVIEW:** Defendant was seen traveling at a high rate of speed by a state trooper who was in his car in the median of the interstate. He activated his radar, verified that it was sighted on defendant's vehicle, and recorded a speed of 90 miles per hour in a 65 miles per hour zone. At her trial, she did not object to introduction of documents pertaining to the accuracy of the radar unit's tuning forks or its service history. She presented no evidence that the radar display was invalid. On appeal, she claimed that the conviction was against the manifest weight of the evidence, and that it was plain error for the trial court to consider the documents and admit them into evidence. The court held that there was sufficient evidence of defendant's speed, including the accuracy of the radar unit, to convince the trier of fact of her guilt beyond a reasonable doubt. To assert plain error, it must appear on the face of the record that an error was committed and that but for the error the result of the trial would have been otherwise. The court reviewed the trial court's handling of the documents and determined that the procedure did not satisfy the rigorous requirements of the plain error doctrine.

**OUTCOME:** The court affirmed the judgment.

**CORE TERMS:** radar, speed, reasonable doubt, plain error, speeding, assignments of error, manifest, visual, rational trier of fact, proven beyond, motor vehicle, guilt beyond, exceeding, favorable, admit, high pitch, light blue, calibrated, displayed, traveling, activated, tracking, display, cruiser, audible, median, marked

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence*

***Criminal Law & Procedure > Appeals > Standards of Review > Plain Error > Definitions***

[HN4] Plain errors or defects affecting substantial rights may be noticed although they were not brought to the attention of the court. *Ohio R. Crim. P. 52(B)*. To rise to the level of plain error, it must appear on the face of the record not only that the error was committed, but that except for the error the result of the trial clearly would have been otherwise and that not to consider the error would result in a clear miscarriage of justice.

**COUNSEL:**

John L. Petry, Prosecuting Attorney for Eaton Municipal Court, 132 North Barron Street, Eaton, Ohio 45320, for plaintiff-appellee.

Augustus L. Ross, III, 12 East Dayton Street, West Alexandria, Ohio 45381, for defendant-appellant.

**JUDGES:** YOUNG, JONES, KOEHLER

**OPINION BY:** YOUNG

**OPINION:**

OPINION

YOUNG, J. Defendant-appellant, Mary Lou Shepherd, appeals her conviction in Eaton Municipal Court for speeding in violation of *R.C. 4511.21(D)(2)*.

The evidence adduced at trial is as follows: The arresting officer, Trooper Shawn Smart of the Ohio State Highway Patrol, testified that on August 30, 1992 he was seated in a marked cruiser which was parked in a median crossover on I-70 in Preble County. Trooper Smart observed a light blue vehicle in the right lane approaching at a high rate of speed. He then activated his radar unit, which displayed a speed of 90 m.p.h. The radar unit produced a high pitch audible which was consistent with the visual display. Trooper Smart also performed a visual tracking procedure which verified that the radar unit actually clocked the light blue vehicle. Once the vehicle passed, Trooper Smart pulled out of the median, pursued the vehicle with [\*2] his flashing lights activated, and stopped it. Appellant was the driver of the vehicle. Trooper Smart further testified that the radar unit had been correctly calibrated.

Appellant testified that Trooper Smart could not have observed her vehicle because his cruiser was obscured by bushes. Appellant also denied that she was traveling 90 m.p.h., although she failed to provide an estimate of the speed

which she was allegedly traveling.

On October 23, 1992, appellant was found guilty in Eaton Municipal Court of exceeding the posted 65 m.p.h. speed limit in violation of *R.C. 4511.21(D)(2)*. The court fined appellant \$ 75.00 plus costs and assessed two points against her operator's license.

On appeal, appellant presents four assignments of error for review. Because appellant essentially argues in the first and fourth assignments that her conviction was against the manifest weight of the evidence, we consider those assignments together.

[HN1] When analyzing a conviction in the context of the manifest weight of the evidence, this court must determine whether, upon examination of the record, the evidence, if believed, would convince the average mind of appellant's guilt beyond a reasonable doubt. [\*3] *State v. Jenks (1991), 61 Ohio St.3d 259, 574 N.E.2d 492*. We must examine the evidence in the light most favorable to the prosecution, and ask whether any rational trier of fact could have found the essential elements of the crime proven beyond a reasonable doubt. *Id.*

[HN2] The essential elements of a speeding offense as they apply in the present case are found in *R.C. 4511.21(D)(2)*: "(D) No person shall operate a motor vehicle \* \* \* (2) At a speed exceeding sixty-five miles per hour \* \* \*."

Upon review of the record in the light most favorable to the prosecution, we conclude that a rational trier of fact could have found the above elements proven beyond a reasonable doubt. Clearly, appellant operated a motor vehicle in Ohio on the date in question. In addition, a valid radar reading of 90 m.p.h. including a high pitch audible was before the court. The radar unit was properly calibrated and appellant presented no evidence that the radar display was invalid. Also, Trooper Smart described his observations of appellant's speed and the visual tracking procedure which he utilized to ensure that the radar unit actually displayed the speed of appellant's vehicle. Thus, the average mind [\*4] could be convinced of appellant's guilt beyond a reasonable doubt, and, therefore, the speeding conviction was not against the manifest weight of the evidence. Appellant's first and fourth assignments are overruled.

Appellant's second and third assignments of error also involve similar issues and will be combined. Appellant argues that the trial court erred in reviewing the certificate of accuracy for the radar unit's calibration tuning forks and a document outlining the service history of the unit before the documents were marked as exhibits or entered into evidence. Appellant also asserts that the court erred in admitting copies of the documents into evidence after determining her guilt and the corresponding sentence.

We first note, as appellant admits, that [HN3] there was no objection made to the documents either during trial or thereafter when they were admitted into evidence. Therefore, this court is not obligated to consider appellant's challenges to the documents on appeal. See *State v. Black (1978), 54 Ohio St.2d 304, 376 N.E.2d 948*. Appellant, though, proposes that it was plain error for the trial court to consider the documents and admit them into evidence.

[HN4] "Plain errors [\*5] or defects affecting substantial rights may be noticed although they were not brought to the attention of the court." *Crim.R. 52(B)*. To rise to the level of plain error, it must appear on the face of the record not only that the error was committed, but that except for the error the result of the trial clearly would have been otherwise and that not to consider the error would result in a clear miscarriage of justice. *State v. Bock (1984), 16 Ohio App.3d 146, 474 N.E.2d 1228*.

We have reviewed the trial court's handling of the documents and find that the procedure does not satisfy the rigorous requirements of the plain error doctrine. Appellant's second and third assignments of error are overruled.

Judgment affirmed.

CHARACTER OF PROCEEDING: Criminal Appeal from Municipal Court, Case No. 93-TRD-00172

**DISPOSITION:**

JUDGMENT: Affirmed

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of a decision of the municipal court (Ohio), which found him guilty of speeding in violation of *Ohio Rev. Code Ann. § 4511.21(C)*.

**OVERVIEW:** A deputy was checking the speed of motor vehicles on a state road while parked on the property of a church. The deputy was not wearing his hat. On this day, defendant was cited with speeding in violation of § 4511.21(C). Defendant entered a plea of not guilty and unsuccessfully filed a motion to suppress. Defendant was found guilty of speeding. On appeal, the court affirmed the conviction. The court rejected defendant's argument that because the arresting officer was parked in front of a church, there existed an excessive entanglement of church and state. The court stated that the trial court did not err in permitting the officer to testify when the evidence clearly established that he was in a distinct uniform at the time of arrest. The court concluded that the trial court did err as to the admission of the certificate of accuracy for the radar forks, but stated that the admission was harmless error because the use of the exhibit was not necessary in the proof of the case. The court rejected defendant's argument that the trial court erred in admitting evidence as to the radar device and in taking judicial notice of the accuracy of the machine.

**OUTCOME:** The court affirmed the speeding violation.

**CORE TERMS:** radar, training, church, excessive entanglement, ticket, speed, motion to suppress, witness testified, deputy sheriff, calibration, accuracy, certificate, wearing, deputy, hat, motor vehicle, parked, competent to testify, admitting evidence, taking judicial notice, time of arrest, sub judice, trained, distinctive, arrest, forks

**LexisNexis(R) Headnotes**

***Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom of Religion > Establishment of Religion***

[HN1] The presence of a police car on a public street, parked on that street, is not an excessive entanglement of church and state. The passive presence of church-owned property and the use of a paved roadway is not excessive entanglement.

***Evidence > Competency > General Overview***

***Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN2] *Ohio R. Evid. 601(C)*, a general rule of competency, provides that an officer is competent to testify, while on duty for the exclusive or main purpose of enforcing traffic laws, arresting, or assisting in the arrest of a person charged with a traffic violation punishable as a misdemeanor, where the officer at the time of the arrest was not using a properly marked motor vehicle as defined by statute or was not wearing a legally distinctive uniform as defined by statute.

***Civil Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Harmless Error Rule***

***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview***

***Evidence > Authentication > General Overview***

[HN3] *Ohio R. Evid. 901* requires that exhibits such as a certificate of accuracy for radar forks and a certificate of completion and competency for a deputy sheriff for training in the use of radar be authenticated or identified.

***Evidence > Testimony > Refreshing Recollection > Memory Aids > Writings***

[HN4] Pursuant to *Ohio R. Evid. 612*, the recollection of a witness may be refreshed with the use of a document.

**COUNSEL:**

For Plaintiff-Appellee: WILLIAM D. SMITH, City Law Director, Suite 222, 5 N. Gay St., Mount Vernon, Ohio 43050.

For Defendant-Appellant: THOMAS L. MASON, Pro Se, P.O. Box 345, 153 W. Main St., Ashland, Ohio 44805.

**JUDGES:** Hon. Irene B. Smart, P.J., Hon. Sheila G. Farmer, J., Hon. W. Don Reader, J.

**OPINION BY:** SHEILA G. FARMER

**OPINION:**

OPINION

FARMER, J.

On January 14, 1993, a deputy from the Knox County Sheriff's Department was checking the speed of motor vehicles on Ohio State Route 3 in the Village of Amity, Ohio, on the property of a church. The deputy was not wearing his hat.

On said date, appellant, Thomas Locke Mason, was cited with operating a motor vehicle upon a public highway at a speed of 59 m.p.h. in a 40 m.p.h. zone contrary to and in violation of *R.C. 4511.21(C)*. Appellant entered a plea of not guilty and filed a motion to suppress.

On February 9, 1993, the motion to suppress was heard and summarily denied. On the same date, the matter proceeded to trial to the court, whereupon appellant was found guilty of speeding.

Appellant timely filed [\*2] a notice of appeal, and this matter is now before the court for consideration.

Assignments of error are as follows:

ASSIGNMENT OF ERROR NUMBER ONE

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN OVERRULING THE DEFENDANT-APPELLANT'S MOTION TO SUPPRESS BASED ON THE VIOLATION OF THE FIRST AMENDMENT TO THE UNITED STATES CONSTITUTION.

ASSIGNMENT OF ERROR NUMBER TWO

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN FINDING THE DEPUTY SHERIFF COMPETENT TO TESTIFY WHERE HE WAS NOT WEARING A UNIFORM.

ASSIGNMENT OF ERROR NUMBER THREE

THE COURT COMMITTED PREJUDICIAL ERROR IN ADMITTING RECORDS EVIDENCE WHEN SUCH EVIDENCE WAS HEARSAY.

ASSIGNMENT OF ERROR NUMBER FOUR

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN ADMITTING EVIDENCE FROM A RADAR DEVICE WHERE NO FOUNDATION WAS LAID AS TO ITS ACCURACY.

ASSIGNMENT OF ERROR NUMBER FIVE

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN ADMITTING EVIDENCE FROM A RADAR DEVICE WHERE THERE WAS NO INDEPENDENT RECOLLECTION OF CALIBRATION OF THE RADAR DEVICE.

ASSIGNMENT OF ERROR NUMBER SIX

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN ADMITTING EVIDENCE FROM A RADAR DEVICE [\*3] WHERE THE DEPUTY SHERIFF WAS TRAINED BY A JUDICIAL PROGRAM IN VIOLATION OF THE SEPARATION OF POWERS BETWEEN THE EXECUTIVE AND JUDICIAL BRANCHES OF GOVERNMENT.

I

Appellant claims that the trial court erred in failing to grant his motion to suppress based upon the First Amendment to the United States Constitution. We disagree.

The thrust of appellant's argument is that because the arresting officer was parked in front of a church, there existed an excessive entanglement of church and state. *Lemon v. Kurtzman (1971), 403 U.S. 602*. Appellant argues that there was excessive entanglement because appellee, the State of Ohio, did not establish that the officer was in the State's right-of-way of Wooster Road. We disagree.

[HN1] The presence of a police car on a public street, parked on that street, is not an excessive entanglement of church and state. The recent decision of the United States Supreme Court in *Lamb's Chapel v. Center Moriches Union Free School District (1993), Westlaw 18864 (U.S.)*, is illustrative of the type of blend of church and state that will be

tolerated. The passive presence of church-owned property and the use of a paved roadway is not excessive entanglement. [\*4]

Assignment of error one is overruled.

## II

Appellant claims that because the officer was not in uniform, no hat, that he was not competent to testify under *Evid. R. 601(C)*. We disagree.

*Evid. A. 601(C)* states as follows:

### RULE 601. GENERAL RULE OF COMPETENCY

...

(C) [HN2] An officer, while on duty for the exclusive or main purpose of enforcing traffic laws, arresting or assisting in the arrest of a person charged with a traffic violation punishable as a misdemeanor where the officer at the time of the arrest was not using a properly marked motor vehicle as defined by statute or was not wearing a legally distinctive uniform as defined by statute.

The testimony in the case sub judice was that the officer was wearing his uniform and that he did not recall if he had his hat on in his car, but that he had it on when he made contact with appellant at the stop. T. 5-7.

The statute specifically states "at the time of arrest" and "a legally distinctive uniform." The trial court did not err in permitting the officer to testify when the evidence clearly established he was in a distinct uniform at the time of arrest.

Assignment of error two is overruled. [\*5]

## III

Appellant claims that the trial court erred in admitting State's Exhibit 1 and Exhibit 2. State's Exhibit 1 is a certificate of accuracy for the radar forks and Exhibit 2 is a certificate of completion and competency for a deputy sheriff for training in the use of radar.

State's Exhibit 2 was the testifying officer's own training certificate and was properly identified as such by the witness. T. 14. The witness testified concerning the exhibit and identified it from his own knowledge pursuant to *Evid. R. 602*.

[HN3] *Evid. R. 901* requires that exhibits such as State's Exhibit 1 be authenticated or identified. No such authentication or identification was done with State's Exhibit 1. We conclude that the trial court did err as to the admission of State's Exhibit 1, but did not err as to the admission of State's Exhibit 2. However, we find that the admission of State's Exhibit 1 was harmless error. *Chapman v. California (1967)*, 386 U.S. 18. Based upon the witness's testimony that two tuning forks were employed to calibrate the instrument, it was not necessary in the proof of this case for appellee to use State's Exhibit 1. *State v. Bechtel (1985)*, 24 Ohio App. 3d 72, [\*6] 493 N.E.2d 318. In addition, the witness testified as to appellant's speed from personal observation regardless of the radar device. T. 12.

Assignment of error three is overruled.

## IV

Appellant claims that the trial court erred in admitting evidence as to the radar device and in taking judicial notice of the accuracy of the machine. We disagree.

The witness testified as to the calibration method employed twice in that particular day. T. 15-16. We find the Bechtel case to be controlling on this point. We find that the trial court did not err in taking judicial notice of the radar device.

Assignment of error four is overruled.

V

Appellant claims that the trial court erred in admitting evidence from the radar device when the witness had no independent recollection of calibration. We disagree.

The witness stated on direct examination the following:

Q: Did you have the opportunity prior to utilizing this radar unit to check the calibration of the radar unit?

A: Yes sir, I did.

Q: And do you recall when you did that?

A: No sir, I do not. I would have to look at the ticket to establish that.

Q: Would you come and take a look at the [\*7] ticket, please? (Witness refers to ticket.)

A: Sir, I've noted times of 11:26 and 1:51 on the day of the violation.

Q: Okay. And what time did you -- did you utilize the radar unit to check Mr. Mason's speed?

A: At 1:32.

T. 15.

[HN4] Pursuant to *Evid. R. 612*, the recollection of a witness may be refreshed with the use of a document, in the case sub judice, the ticket. We find that the witness did just as *Evid. R. 612* suggests, and we fail to find error in the ruling of the trial court as to the radar device.

Assignment of error five is overruled.

VI

Appellant claims that the trial court erred in permitting testimony about the radar device, where the officer was trained in a program established by a previous judge of the court. Appellant contends that is a violation of the doctrine of separation of powers. We disagree.

The only reference to the training received was as follows:

Q: Deputy, what type of training did you receive with regard to the operation of this radar unit?

A: This particular unit, sir?

Q: Yes.

A: I was initially certified on this unit by a member of our department in a program which was established [\*8] by the previous judge of this court.

T. 13.

Appellant objected to the certificate of training, State's Exhibit 2, but the record fails to provide evidentiary materials to address this assignment of error. We cannot consider matters not part of the record from the trial court. *State v. Ishmail (1978), 54 Ohio St. 2d 402, 377 N.E.2d 500.*

Assignment of error six is overruled.

The judgment of the Mount Vernon Municipal Court of Knox County, Ohio, is hereby affirmed.

by Farmer, J.

Smart, P.J. and

Reader, J. concur.

**OPINION:**

OPINION

FARMER, J.

On January 14, 1993, a deputy from the Knox County Sheriff's Department was checking the speed of motor vehicles on Ohio State Route 3 in the Village of Amity, Ohio, on the property of a church. The deputy was not wearing his hat.

On said date, appellant, Thomas Locke Mason, was cited with operating a motor vehicle upon a public highway at a speed of 59 m.p.h. in a 40 m.p.h. zone contrary to and in violation of *R.C. 4511.21(C)*. Appellant entered a plea of not guilty and filed a motion to suppress.

On February 9, 1993, the motion to suppress was heard and summarily denied. On the same date, the matter proceeded to trial to the court, whereupon appellant was found guilty of speeding.

Appellant timely filed [\*2] a notice of appeal, and this matter is now before the court for consideration.

Assignments of error are as follows:

ASSIGNMENT OF ERROR NUMBER ONE

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN OVERRULING THE DEFENDANT-APPELLANT'S MOTION TO SUPPRESS BASED ON THE VIOLATION OF THE FIRST AMENDMENT TO THE UNITED STATES CONSTITUTION.

ASSIGNMENT OF ERROR NUMBER TWO

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN FINDING THE DEPUTY SHERIFF COMPETENT TO TESTIFY WHERE HE WAS NOT WEARING A UNIFORM.

ASSIGNMENT OF ERROR NUMBER THREE

THE COURT COMMITTED PREJUDICIAL ERROR IN ADMITTING RECORDS EVIDENCE WHEN SUCH EVIDENCE WAS HEARSAY.

ASSIGNMENT OF ERROR NUMBER FOUR

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN ADMITTING EVIDENCE FROM A RADAR DEVICE WHERE NO FOUNDATION WAS LAID AS TO ITS ACCURACY.

ASSIGNMENT OF ERROR NUMBER FIVE

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN ADMITTING EVIDENCE FROM A RADAR DEVICE WHERE THERE WAS NO INDEPENDENT RECOLLECTION OF CALIBRATION OF THE RADAR DEVICE.

ASSIGNMENT OF ERROR NUMBER SIX

THE TRIAL COURT COMMITTED PREJUDICIAL ERROR IN ADMITTING EVIDENCE FROM A RADAR DEVICE [\*3] WHERE THE DEPUTY SHERIFF WAS TRAINED BY A JUDICIAL PROGRAM IN VIOLATION OF THE SEPARATION OF POWERS BETWEEN THE EXECUTIVE AND JUDICIAL BRANCHES OF GOVERNMENT.

I

Appellant claims that the trial court erred in failing to grant his motion to suppress based upon the First Amendment to the United States Constitution. We disagree.

The thrust of appellant's argument is that because the arresting officer was parked in front of a church, there existed an excessive entanglement of church and state. *Lemon v. Kurtzman (1971), 403 U.S. 602*. Appellant argues that there was excessive entanglement because appellee, the State of Ohio, did not establish that the officer was in the State's right-of-way of Wooster Road. We disagree.

[HN1] The presence of a police car on a public street, parked on that street, is not an excessive entanglement of church and state. The recent decision of the United States Supreme Court in *Lamb's Chapel v. Center Moriches Union Free School District (1993), Westlaw 18864 (U.S.)*, is illustrative of the type of blend of church and state that will be

tolerated. The passive presence of church-owned property and the use of a paved roadway is not excessive entanglement. [\*4]

Assignment of error one is overruled.

## II

Appellant claims that because the officer was not in uniform, no hat, that he was not competent to testify under *Evid. R. 601(C)*. We disagree.

*Evid. A. 601(C)* states as follows:

### RULE 601. GENERAL RULE OF COMPETENCY

...

(C) [HN2] An officer, while on duty for the exclusive or main purpose of enforcing traffic laws, arresting or assisting in the arrest of a person charged with a traffic violation punishable as a misdemeanor where the officer at the time of the arrest was not using a properly marked motor vehicle as defined by statute or was not wearing a legally distinctive uniform as defined by statute.

The testimony in the case sub judice was that the officer was wearing his uniform and that he did not recall if he had his hat on in his car, but that he had it on when he made contact with appellant at the stop. T. 5-7.

The statute specifically states "at the time of arrest" and "a legally distinctive uniform." The trial court did not err in permitting the officer to testify when the evidence clearly established he was in a distinct uniform at the time of arrest.

Assignment of error two is overruled. [\*5]

## III

Appellant claims that the trial court erred in admitting State's Exhibit 1 and Exhibit 2. State's Exhibit 1 is a certificate of accuracy for the radar forks and Exhibit 2 is a certificate of completion and competency for a deputy sheriff for training in the use of radar.

State's Exhibit 2 was the testifying officer's own training certificate and was properly identified as such by the witness. T. 14. The witness testified concerning the exhibit and identified it from his own knowledge pursuant to *Evid. R. 602*.

[HN3] *Evid. R. 901* requires that exhibits such as State's Exhibit 1 be authenticated or identified. No such authentication or identification was done with State's Exhibit 1. We conclude that the trial court did err as to the admission of State's Exhibit 1, but did not err as to the admission of State's Exhibit 2. However, we find that the admission of State's Exhibit 1 was harmless error. *Chapman v. California (1967)*, 386 U.S. 18. Based upon the witness's testimony that two tuning forks were employed to calibrate the instrument, it was not necessary in the proof of this case for appellee to use State's Exhibit 1. *State v. Bechtel (1985)*, 24 Ohio App. 3d 72, [\*6] 493 N.E.2d 318. In addition, the witness testified as to appellant's speed from personal observation regardless of the radar device. T. 12.

Assignment of error three is overruled.

## IV

Appellant claims that the trial court erred in admitting evidence as to the radar device and in taking judicial notice of the accuracy of the machine. We disagree.

The witness testified as to the calibration method employed twice in that particular day. T. 15-16. We find the Bechtel case to be controlling on this point. We find that the trial court did not err in taking judicial notice of the radar device.

Assignment of error four is overruled.

V

Appellant claims that the trial court erred in admitting evidence from the radar device when the witness had no independent recollection of calibration. We disagree.

The witness stated on direct examination the following:

Q: Did you have the opportunity prior to utilizing this radar unit to check the calibration of the radar unit?

A: Yes sir, I did.

Q: And do you recall when you did that?

A: No sir, I do not. I would have to look at the ticket to establish that.

Q: Would you come and take a look at the [\*7] ticket, please? (Witness refers to ticket.)

A: Sir, I've noted times of 11:26 and 1:51 on the day of the violation.

Q: Okay. And what time did you -- did you utilize the radar unit to check Mr. Mason's speed?

A: At 1:32.

T. 15.

[HN4] Pursuant to *Evid. R. 612*, the recollection of a witness may be refreshed with the use of a document, in the case sub judice, the ticket. We find that the witness did just as *Evid. R. 612* suggests, and we fail to find error in the ruling of the trial court as to the radar device.

Assignment of error five is overruled.

VI

Appellant claims that the trial court erred in permitting testimony about the radar device, where the officer was trained in a program established by a previous judge of the court. Appellant contends that is a violation of the doctrine of separation of powers. We disagree.

The only reference to the training received was as follows:

Q: Deputy, what type of training did you receive with regard to the operation of this radar unit?

A: This particular unit, sir?

Q: Yes.

A: I was initially certified on this unit by a member of our department in a program which was established [\*8] by the previous judge of this court.

T. 13.

Appellant objected to the certificate of training, State's Exhibit 2, but the record fails to provide evidentiary materials to address this assignment of error. We cannot consider matters not part of the record from the trial court. *State v. Ishmail (1978), 54 Ohio St. 2d 402, 377 N.E.2d 500.*

Assignment of error six is overruled.

The judgment of the Mount Vernon Municipal Court of Knox County, Ohio, is hereby affirmed.

by Farmer, J.

Smart, P.J. and

Reader, J. concur.

JUDGMENT AFFIRMED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Marietta Municipal Court (Ohio), which found defendant guilty of speeding.

**OVERVIEW:** Subsequent to his conviction, defendant argued that the trial court erred in taking judicial notice of the reliability of the radar gun at issue and that he was denied his right to a trial by jury. On review, the court affirmed the trial court's judgment. In reaching its conclusion, the court relied on prior caselaw in holding that the trial court did not err in taking judicial notice of the reliability of the model of radar gun in question. Additionally, the court held that, because the offense for which defendant was charged was speeding, a petty or misdemeanor offense, defendant did not have a right to a jury trial. The court then held that the evidence supported the adjudication. The court also held that the trial court did not abuse its discretion in sentencing defendant.

**OUTCOME:** The court affirmed the judgment finding defendant guilty of speeding.

**CORE TERMS:** radar, assignments of error, municipal, discovery, sub judice, speed, assignment of error, reliability, training, fine, sentence, judicial notice, speed limit, jury trial, continuance, prosecutor, license, posted, excessive speed, misdemeanor, scientific, traveling, speeding, expert testimony, severe sentence, overruling, convicted, license suspension, reasons stated, motor vehicle

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > General Overview***  
***Criminal Law & Procedure > Discovery & Inspection > Discovery by Government***

[HN1] *Ohio R. Crim. P. 16(A)* provides that, upon written request, each party shall forthwith provide the discovery allowed. Motions for discovery shall certify that a demand for discovery has been made and the discovery has not been provided. The word "shall" indicates that the procedure is mandatory.

***Civil Procedure > Judicial Officers > Referees > General Overview***  
***Evidence > Judicial Notice > General Overview***  
***Evidence > Testimony > Experts > General Overview***

[HN2] While it is necessary initially to offer expert testimony on the construction and dependability of scientific devices, the trial court may at some point satisfy itself with the dependability of the instrument and take notice thereof. Courts in Ohio uphold the taking of judicial notice of the reliability of the K-55 radar unit.

***Criminal Law & Procedure > Interrogation > Miranda Rights > Custodial Interrogation***  
***Criminal Law & Procedure > Interrogation > Voluntariness***

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN3] An individual must be advised of his constitutional rights when law enforcement officers initiate questioning after a person has been taken into custody or otherwise deprived of his freedom of action in any significant way. The event triggering the need for the Miranda rights is a custodial interrogation. The Miranda rules are not applicable to statements volunteered to the police. A statement that is voluntary and not in response to police questioning is not barred by the Fifth Amendment. The absence of Miranda warnings will not affect the admissibility of statements made on a suspect's own initiative in absence of questions or other conduct by the police constituting interrogation. Any statement freely and voluntarily given without any compelling influence is admissible into evidence.

***Civil Procedure > Appeals > Reviewability > Preservation for Review***  
***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN4] Generally, a party waives his right to allege error on appeal when that party did not object at the time the alleged error occurred.

***Constitutional Law > Bill of Rights > Fundamental Rights > Criminal Process > Right to Jury Trial***  
***Constitutional Law > Bill of Rights > State Application***  
***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Petty Offenses***

[HN5] The right to a trial by jury is secured by the Sixth Amendment to the United States Constitution, Ohio Const. art. I, § 10, and *Ohio Rev. Code Ann. § 2945.17*. The right to trial by jury in a criminal proceeding is a "fundamental right." However, the right to trial by jury is not applicable to all types of criminal offenses. There is a category of petty crimes or offenses which is not subject to the Sixth Amendment jury trial provision and should not be subject to the 14th Amendment jury trial requirement applied to the states. Crimes carrying possible penalties up to six months do not require a jury trial if they otherwise qualify as petty offenses.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***  
***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Misdemeanors***  
***Criminal Law & Procedure > Sentencing > Fines***

[HN6] Under *Ohio Rev. Code Ann. § 4511.21*, speeding is a minor misdemeanor. *Ohio Rev. Code Ann. § 2929.21(D)* provides that whoever is convicted of or pleads guilty to a minor misdemeanor shall be fined no more than \$ 100.

Section 2945.17 provides that, at any trial, in any court, for the violation of any statute of Ohio, or of any ordinance of any municipal corporation, except in cases in which the penalty involved does not exceed a fine of \$ 100, the accused has the right to be tried by a jury.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence Evidence > Procedural Considerations > Weight & Sufficiency***

[HN7] A reviewing court will not reverse a conviction where there is substantial evidence upon which the court could reasonably conclude that all the elements of an offense have been proven beyond a reasonable doubt. The weight to be given the evidence and the credibility of the witnesses are primarily for the trier of facts.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview Criminal Law & Procedure > Guilty Pleas > General Overview Governments > State & Territorial Governments > Licenses***

[HN8] *Ohio Rev. Code Ann. § 4507.34* provides that, whenever a person is found guilty under Ohio law of operating a motor vehicle in violation of such laws relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the driver's license of any person so convicted or pleading guilty to such offense for such period as it determines, not to exceed one year. This statute is construed to include speeding offenses. Additionally, a license suspension imposed by a trial court prohibits the operation of a motor vehicle anywhere within the state of Ohio.

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Due Process***

[HN9] A trial court may not impose a more severe sentence because a defendant elects to exercise his right to a trial.

***Criminal Law & Procedure > Guilty Pleas > No Contest Pleas***

***Criminal Law & Procedure > Sentencing > Imposition***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

[HN10] Trial courts are vested with broad discretion in the determination of appropriate sentences. Appellate courts should not disturb sentencing decisions of the trial courts unless there is a clear abuse of discretion.

***Civil Procedure > Appeals > Records on Appeal***

***Criminal Law & Procedure > Appeals > General Overview***

[HN11] The duty to provide a transcript for appellate review falls upon appellant. It is the appellant's responsibility to include all the evidence in the appellate record so that the claimed error is demonstrated to the reviewing court. Also, *Ohio R. App. P. 9(C)* and (D) set forth alternative procedures that may be used in providing a substitute statement of the evidence rather than providing an entire transcript of the proceedings.

**COUNSEL:**

**OPINION:**

DECISION AND JUDGMENT ENTRY

This is an appeal from a judgment of conviction and sentence entered by the Marietta Municipal Court finding John G. McGuffey, defendant below and pro se appellant herein, guilty of operating a vehicle at an excessive speed in violation of *R.C. 4511.21*, a minor misdemeanor. We affirm.

Appellant assigns the following errors:

FIRST ASSIGNMENT OF ERROR:

"THE JUDGE SHOULD HAVE GRANTED A CONTINUANCE ON RULE 16 AS LESS THAN 24 HOURS IS NOT SUFFICIENT TIME TO GET DISCOVERIES FROM THE PRODUCTION OF DOCUMENTS AND IT GIVES THE PROSECUTION AN UNFAIR ADVANTAGE TO WAIT UNTIL THE LAST MINUTE TO GIVE THE DEFENDANT THE DOCUMENTS ASKED FOR." (SIC)

SECOND ASSIGNMENT OF ERROR:

"THE DEFENDANT SHOULD HAVE THE RIGHT TO SEE THE TUNING FORKS, WITH THE [\*2] SERIAL NUMBERS, AT THE TIME OF THE ARREST TO SEE IF THE OFFICER HAS THEM WITH HIM, AND IF THEY ARE THE ONES DESIGNATED FOR THIS PARTICULAR RADAR."

THIRD ASSIGNMENT OF ERROR:

"THE RADAR IS A SECRET INSTRUMENT THAT ONLY THE POLICE HAS AND WILL NOT BE GIVEN FOR TEST TO THE DEFENDANT. HOW CAN A PERSON DEFEND AGAINST SOMETHING HE CANNOT TEST?" (SIC)

FOURTH ASSIGNMENT OF ERROR:

"THE FACT SHEET WENT BEYOND PROBABLE CAUSE. ALL IT HAD TO SAY WAS THE POLICEMAN SAW ME SPEEDING. THE OTHER STATEMENTS AMOUNTED TO A CONFESSION OF THE DEFENDANT. THE POLICEMAN WAS PLANNING HIS CASE PRIOR TO COURT. IT WAS A ONE WAY CONVERSATION BETWEEN THE POLICEMAN, PROSECUTOR, AND THE JUDGE IN WHICH THE DEFENDANT COULD NOT DEFEND HIMSELF." (SIC)

FIFTH ASSIGNMENT OF ERROR:

"REFER TO P. 13 LINE 13-19 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE OFFICER CANNOT MAKE THIS STATEMENT ON HIS OWN IN THAT HE DID NOT SAY THAT HE HAD A FLASHING LIGHT AND THE MARKINGS MET THE SUPERINTENDENT OF THE STATE HIGHWAY PATROL. THE FACT THAT THIS CAR IS GRAY AND CANNOT BE SEEN AS FAR AS HE CAN CLOCK YOU ON HIS RADAR MEANS THAT HE IS USING UNREASONABLE METHODS OF ENFORCING TRAFFIC LAWS. SEE EXHIBIT A ATTACHED (OHIO CODE [\*3] 4549.13 AND OHIO CODE 4549.14)." (SIC)

SIXTH ASSIGNMENT OF ERROR:

"REFER TO P. 14 LINES 8-21 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE RADAR WAS IMPROPERLY INSTALLED IN THE POLICE CRUISER IN THAT THE ECM UNIT IS KEPT ON THE SEAT BESIDE THE DRIVER AND HAS NO MEANS OF CONNECTING IT TO THE COUNTING UNIT OR AN ELECTRICAL POWER SOURCE. ANY MENTION FROM HERE ON OF THE ECM UNIT WOULD BE INCORRECT AS IT WOULD HAVE NO POWER." (SIC)

SEVENTH ASSIGNMENT OF ERROR:

"REFER TO P. 16 LINES 1-21 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE JUDGE SHOULD HAVE ALLOWED THE DEFENDANT TO HAVE DISCOVERIES ON THE POLICEMAN'S TRAINING: HIS BOOKS AND TANGIBLE OBJECTS AS IT DID HAVE RELEVANCE TO A DEFENSE AGAINST THE POLICEMAN'S TRAINING." (SIC)

EIGHTH ASSIGNMENT OF ERROR:

"REFER TO P. 20, LINES 16-25 THROUGH P. 21, LINES 1-10 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THERE IS NO SCIENTIFIC EVIDENCE WHICH STATES THE POLICEMAN IS CAPABLE OF CONDUCTING A VISIBLE ESTIMATION OF THE SPEED OF VEHICLES." (SIC)

NINTH ASSIGNMENT OF ERROR:

"REFER TO P. 24, LINES 12-19 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE COURT TOOK IMPROPER JUDICIAL NOTICE AS A POLICE STATION WHERE THE [\*4] RECORDS ARE FILED IS NOT A PUBLIC OFFICE AND YOU CAN NOT HAVE ACCESS TO THESE RECORDS." (SIC)

TENTH ASSIGNMENT OF ERROR:

"REFER TO P. 27, LINES 6-7 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THIS SHOULD NOT HAVE BEEN ADMITTED AS EVIDENCE, AND ANYTHING PERTAINING TO HIS NOTES AS HIS NOTES WERE NOT GIVEN IN DISCOVERIES. ALSO THE DEFENDANT DID NOT RECEIVE DISCOVERIES OF THE LOGS KEPT BY THE HIGHWAY PATROL AS TO WERE THE OFFICER STOPPED THE DEFENDANT'S VEHICLE." (SIC)

ELEVENTH ASSIGNMENT OF ERROR:

"REFER TO P. 27, LINES 12-14 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. HERE THE POLICE OFFICER STATES THAT HIS RADAR HAD NOT BEEN TURNED OFF BETWEEN THE TWO CALIBRATION CHECKS. THEN ON P. 28, LINES 13-15 HE STATES, 'AFTER I OBSERVED THE VEHICLE, I ACTIVATED THE RADAR.'" (SIC)

TWELFTH ASSIGNMENT OF ERROR:

"REFER TO P. 30, LINES 2-3 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE OFFICER WAS ASKED IF HE LOCKED IN THE SPEED OF THE OTHER VEHICLE. LINES 13-14. 'OR THE READING THAT WAS ON THERE IN THE AUDIO ALL CLEARED OFF' ON P. 34, LINES 1-5. 'DID HE ASK TO VIEW THE SPEED THAT YOU HAD LOCKED IN?' 'YES. HE DID WALK BACK TO THE CAR, HE LOOKED IN THE PASSENGER WINDOW AND IT WAS [\*5] LAYING ON THE SEAT, ON THE ECM UNIT'. THIS COULD NOT HAVE HAPPENED AS HE HAD CLEARED THE READING OFF AND THE ECM UNIT WAS NOT CONNECTED TO THE COUNTING UNIT AND HAS NO POWER." (SIC)

## THIRTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 32, LINES 20-25 AND P.33 1-22 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THIS STATEMENT WAS A STATEMENT OF SELF-INCRIMINATION. THE MIRANDA RIGHTS HAD NOT BEEN GIVEN TO THE DEFENDANT, AND IT WOULD BE AGAINST THE 5TH AMENDMENT OF THE CONSTITUTION." (SIC)

## FOURTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 36 AND 37 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE COURT TOOK IMPROPER JUDICIAL NOTICE AND DID NOT AFFORD THE DEFENDANT A HEARING ON THIS NOTICE." (SIC)

## FIFTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 38, LINES 7-13 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. ON THE CROSS-EXAMINE THE FOLLOWING LINES SHOWS THAT THE RADAR HAD BEEN TURNED OFF CONTRARY TO THE OFFICER'S STATEMENT ON P. 27, LINES 12-15. (SIC)

## SIXTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 38, LINES 6-25 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THIS WOULD VERIFY THAT THE OFFICER HAD NO IDEA IF HIS PATROL CAR MET THE STANDARDS OF THE SUPERINTENDENT OF THE OHIO HIGHWAY PATROL [\*6] AS REFERRED TO ON P. 13, LINES 13-18." (SIC)

## SEVENTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 46, LINES 4-7 AND 17-21 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. IN THIS STATEMENT THE OFFICER CONTRADICTS HIMSELF." (SIC)

## EIGHTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 50, LINES 12-17 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. HOW CAN AN OFFICER BE PROPERLY TRAINED IN RADAR IF HE HAS NOT BEEN TAUGHT THE SAFETY ASPECTS OF RADAR?" (SIC)

## NINETEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 54-56 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. IN THESE PAGES THE OFFICER STATES THAT THE SPEED LIMIT IS 65 MPH AND DROPS TO 45 MPH AND THAT THERE IS NO SIGN, REDUCE SPEED AHEAD. THE OHIO CODE, 51-10, STATES THAT, 'A SPEED ZONE CANNOT BE ENFORCED UNTIL STANDARD SIGNS HAVE BEEN PROPERLY INSTALLED ALONG THE ROADWAY.' 'THE REDUCED SPEED AHEAD SIGN SHOULD BE ERECTED IN ADVANCE OF ANY SPEED ZONE THAT IS 15 MILES PER HOUR OR MORE UNDER THE SPEED LIMIT IN A PRECEEDING STATUTORY OR ALTERED SPEED ZONE.'" (EXHIBIT B) (SIC)

## TWENTIETH ASSIGNMENT OF ERROR:

"REFER TO P. 57, LINES 1-12 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THIS

CROSS-EXAMINATION SHOWS THE OFFICER CHANGED HIS ACCOUNT OF THE PLACE [\*7] WHERE HE CLOCKED THE DEFENDANT'S VEHICLE. REFER TO P. 27-28, LINES 21-25 AND P. 28, LINES 1-16. THEREFORE, IF HE CLOCKED THE DEFENDANT AT THE 26 MILE MARKER HE WOULD BE TRAVELING IN THE SAME DIRECTION, AND HIS RADAR IS NOT CAPABLE OF CLOCKING IN THE SAME DIRECTION." (SIC)

TWENTY-FIRST ASSIGNMENT OF ERROR:

"REFER TO P. 58, LINES 1-25 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE CITATION WAS IMPROPERLY WRITTEN AND SHOULD BE DISALLOWED AS THERE IS A DISCREPANCY AS TO WHERE HE CLOCKED THE DEFENDANT." (SIC)

TWENTY-SECOND ASSIGNMENT OF ERROR:

"THE DEFENDANT'S CONSTITUTIONAL RIGHTS TO A TRIAL WAS DENIED HIM BY GETTING A LARGER SENTENCE AND SUSPENSION OF LICENSE THAN HE WOULD HAVE IF HE HAD PLEADED GUILTY AND PAID THE FINE AS STATED ON THE CITATION." (SIC)

TWENTY-THIRD ASSIGNMENT OF ERROR:

"THE DEFENDANT WAS PUNISHED IMPROPERLY AS THE JUDGE FAILED TO DISTINGUISH BETWEEN THE DEFENDANT TALKING AND THE DEFENDANT REPRESENTING HIMSELF. THEREFORE, IN CLOSING ARGUMENTS THE DEFENDANT REPRESENTING HIMSELF WAS PRESENTING A DEFENSE AND THE JUDGE SUSPENDED HIS LICENSE FOR 30 DAYS FOR STATING THAT HIS DEFENSE WAS THAT HE FELT HE COULD DRIVE 65 MPH WHEN NO REDUCE SPEED AHEAD SIGN WAS [\*8] POSTED. THIS WAS A DEFENSE BY THE DEFENDANT'S ATTORNEY AND NOT THE DEFENDANT." (SIC)

TWENTY-FOURTH ASSIGNMENT OF ERROR:

"THE JUDGE CANNOT INFLICT A PUNISHMENT THAT GOES OUTSIDE HIS JURISDICTION. HE COULD ONLY SUSPEND DRIVING PRIVILEGES IN WASHINGTON COUNTY AND NOT THE WHOLE STATE." (SIC)

TWENTY-FIFTH ASSIGNMENT OF ERROR:

"IMPROPER SENTENCE." (SIC)

TWENTY-SIXTH ASSIGNMENT OF ERROR:

"JUDGE EDWARD LANE, JR. HAD LED THE DEFENDANT TO BELIEVE THAT HE COULD ONLY GET AN ADDITIONAL \$ 6.00 COST ADDED TO HIS FINE BE CONTESTING IT IN A COURT OF LAW. THEN HE FINED HIM A GREATER FINE, PLUS A 30 DAY SUSPENSION OF LICENSE. ENCLOSED FIND A TAPE RECORDING OF THIS HEARING." (SIC)

TWENTY-SEVENTH ASSIGNMENT OF ERROR:

"THE DEFENDANT RECEIVED A MORE SEVERE PUNISHMENT FOR GOING TO COURT THAN THOUSNADS OF OTHER PEOPLE IN THE SAME SITUATION. THE DEFENDANT CANNOT PROVE THIS BECAUSE HE WAS DENIED ACCESS TO THE RECORDS BY THE CLERK OF THE COURT, ROSANNE M. BUELL." (SIC)

## TWENTY-EIGHTH ASSIGNMENT OF ERROR:

"THE WEIGHT OF THE EVIDENCE DOES NOT WARRANT A CONVICTION."

## TWENTY-NINTH ASSIGNMENT OF ERROR:

"THE DEFENDANT'S CONSTITUTIONAL RIGHTS OF A TRIAL BY JURY WAS DENIED HIM, AND THE JUDGE WENT [\*9] BEYOND HIS RIGHTS BY SUSPENDING THE DEFENDANT'S LICENSE." (SIC)

## THIRTIETH ASSIGNMENT OF ERROR:

"THE RULES OF THE COURT PUTS A UNDUE BURDEN UPON THE PERSON WHO REPRESENTS HIMSELF AS HE CANNOT GET ANY EXPERIENCE IN A COURT ROOM WHEN THE PROSECUTION IS WITH THE JUDGE EVERY DAY AND THE JUDGE, AS IN MY CASE, PROMPTS THE PROSECUTOR IN THE WAY TO GET A CONVICTION IN HIS COURT. WHO WOULD KNOW BETTER THAN THE LAWYERS WHO WORKS THE COURT ALL THE TIME WHEN THEY SAY THE MAN WHO REPRESENTS HIMSELF HAS A FOOL FOR A CLIENT." (SIC)

## THIRTY-FIRST ASSIGNMENT OF ERROR:

"A SPEEDING VIOLATION OF ONLY 15 MPH OVER THE POSTED SPEED DOES NOT CONSTITUTE HAZARDOUS DRIVING IN ACCORDANCE WITH THE NEW U.S. STANDARDS ON THE CDL LICENSE AS IT STATES IN THE DRIVER'S MANUAL THAT IT MUST BE MORE THAN 20 MPH OVER THE SPEED LIMIT BEFORE YOU CAN HAVE YOUR LICENSE SUSPENDED." (SIC)

## THIRTY-SECOND ASSIGNMENT OF ERROR:

"A PERSON'S RIGHT TO AN APPEAL IS DENIED HIM WHEN THE COURT REQUIRES THAT PERSON TO PURCHASE A TRANSCRIPT FROM AN INDEPENDENT CONTRACTOR AND IN CHARGED AN EXHORBANT FEE." (SIC)

## THIRTY-THIRD ASSIGNMENT OF ERROR:

"COURT COSTS CAN ONLY BE ACTUAL COSTS AND NO ADDED TAX ADDED TO HIS CONSTITUTIONAL [\*10] RIGHTS TO A TRIAL." (SIC)

## THIRTY-FOURTH ASSIGNMENT OF ERROR:

"THERE WAS NO EXPERT WITNESSES TO THIS RADAR AS IT IS TURNED ON AND OFF AND WOULD NOT MEET ANY OTHER STANDARDS." (SIC)

## THIRTY-FIFTH ASSIGNMENT OF ERROR:

" *THERE WAS NO EXPERT WITNESSES PERTAINING TO THE RADAR AS CITED IN THE CASE OF STATE OF OHIO V. WILCOX, 319 N.E. 2D 615 (PP. 615-621)*" (SIC)

## THIRTY-SIXTH ASSIGNMENT OF ERROR:

"THE RADAR WAS IMPROPERLY INSTALLED IN THE CRUISER AND THE CALIBRATION WOULD NOT WORK AS THE RADAR WAS TURNED AFTER THE CALIBRATION." (SIC)

## THIRTY-SEVENTH ASSIGNMENT ERROR:

"THE DEFENDANT-APPELLANT'S CONSTITUTIONAL RIGHTS WERE DENIED HIM BY GIVING HIM A LARGER FINE AND PUNISHMENT THAN THE \$ 55 AS STATED ON THE TICKET. HE RECEIVED THE ADDITIONAL PUNISHMENT BECAUSE HE EXERCISED HIS CONSTITUTIONAL RIGHTS." (SIC)

## THIRTY-EIGHTH ASSIGNMENT OF ERROR:

"THE SIGNS WERE NOT PROPERLY INSTALLED ON THE HIGHWAY AND THEREFORE, THE SPEED ZONES COULD NOT BE ENFORCED."

## THIRTY-NINTH ASSIGNMENT OF ERROR:

"THE DEFENDANT-APPELLANT WAS GIVEN A 30 DAY LICENSE SUSPENSION FOR PRESENTING A DEFENSE THAT THE SIGNS WERE NOT PROPERLY INSTALLED."

## FORTIETH ASSIGNMENT OF ERROR:

"THE POLICEMAN'S [\*11] CAR WAS NOT PROPERLY MARKED."

## FORTY-FIRST ASSIGNMENT OF ERROR:

"THE RADAR CAN NOT CLOCK A SPEED OF A VEHICLE WHEN IT IS TRAVELING IN THE SAME DIRECTION." (SIC)

## FORTY-SECOND ASSIGNMENT OF ERROR:

"THERE IS NO EVIDENCE PRODUCED OTHER THAN THE POLICEMAN THAT HE CAN ESTIMATE THE SPEED OF A VEHICLE." (SIC)

The record reveals the following facts pertinent to this appeal. On June 10, 1990, at 3:30 P.M., Ohio State Highway Patrol Trooper Paul Pride was traveling south on State Route 7 in Washington County, Ohio. Trooper Pride was wearing the Ohio State Highway Patrol uniform and he was operating an Ohio State Highway Patrol cruiser.

Trooper Pride observed a pickup truck traveling north on State Route 7 in a posted forty-five m.p.h. speed zone. Trooper Pride testified that his attention was drawn to the pickup truck because his visual estimate of the truck's speed was approximately fifty-five m.p.h.

Trooper Pride activated the K-55 radar unit and obtained a reading indicating the vehicle in question was traveling sixty m.p.h. The officer thereupon turned and pursued the vehicle. After the officer stopped the vehicle, the operator, the appellant herein, denied he was traveling sixty [\*12] m.p.h.; however, appellant did state that he may have been operating his vehicle at fifty m.p.h. in the forty-five m.p.h. zone. Trooper Pride subsequently filed a uniform traffic citation in the Marietta Municipal Court, alleging appellant operated his vehicle at an excessive speed in violation of *R.C. 4511.21*.

On October 17, 1990, the court below conducted a bench trial. After hearing the evidence, the court found appellant guilty, fined appellant \$ 65, suspended appellant's operator's license for thirty days, and ordered appellant to pay court costs. It is from this finding that appellant has filed this appeal.

In this appeal the appellant has raised forty-two assignments of error. Because many of the assignments of error

contain similar, and in some cases identical, issues, we will consolidate the assignments of error for purposes of this appeal.

## I

In his first and seventh assignments of error, appellant asserts the state failed to provide, in a timely fashion, discovery materials pertaining to the officer's training in the use of radar. At trial appellant argued the state did not comply with *Crim. R. 16* in providing discovery and appellant requested a continuance. Appellant asserts [\*13] the court below erred in overruling his request for a continuance. This contention is without merit.

In the case sub judice, the court carefully considered appellant's request for a continuance. In overruling appellant's motion the court stated that if, during the course of the trial, appellant could demonstrate the requested information was necessary for the preparation of his defense, appellant could renew his motion for a continuance and the court would re-evaluate the motion at that time. During the direct examination of Trooper Pride, appellant renewed his motion and the court again overruled the motion. During the cross examination of Trooper Pride, appellant made many inquiries regarding various aspects of the case, including a detailed examination of Trooper Pride's training in the use of radar.

[HN1] *Crim. R. 16(A)* provides:

Upon written request each party shall forthwith provide the discovery herein allowed. Motions for discovery shall certify that a demand for discovery has been made and the discovery has not been provided.

The word "shall" indicates that the procedure is mandatory. See *Lakewood v. Papadelis* (1987), 32 Ohio St. 3d 1.

Additionally, [\*14] we find appellant failed to file a motion for discovery, pursuant to *Crim. R. 16(A)*, certifying that a demand for discovery was made and discovery was not provided. Before the sanctions set forth in *Crim. R. 16(E)* may be imposed, a party must file a motion for discovery pursuant to *Crim. R. 16(A)*. See *State v. Hicks* (1976), 48 Ohio App. 2d 135.

We conclude, based upon a review of the record, that the trial court did not err in overruling appellant's motion for a continuance. Accordingly, appellant's first and seventh assignments of error are overruled.

## II

In his second, third, sixth, ninth, eleventh, twelfth, fourteenth, fifteenth, eighteenth, thirty-fourth, thirty-fifth, thirty-sixth, and forty-first assignments of error, appellant asserts, in part, the court below erred in admitting evidence relating to the radar device.

Trooper Pride testified he had received extensive training in the use and operation of the K-55 radar unit, that he had considerable experience operating the radar device, and that this particular radar unit was properly calibrated and operated.

The trial court took judicial notice of the reliability of the K-55 radar device and did not require [\*15] expert testimony concerning the scientific reliability of the K-55 radar unit. See *Crim. R. 27*, *Civ. R. 44.1*, and *Evid. R. 201(B)*. In *State v. Kline* (Aug. 12, 1981), Lorain App. No. 3182, unreported, the court wrote:

"The referee found 'that Elyria Municipal Court takes judicial notice of the scientific reliability of the K-55 unit.' The trial court accepted the referee's finding. [HN2] While it is necessary initially to offer expert testimony on the construction and dependability of scientific devices, *East Cleveland v. Ferrell* (1958), 168 Ohio St. 298, we feel the trial court may at some point satisfy itself with the dependability of the instrument and take notice thereof. e.g. *Akron v. Gray* (1979), 60 Ohio Misc. 68. The Elyria Municipal Court having recognized the reliability of K-55 radar, there was no need to offer expert testimony, and this assignment of error is overruled."

Other courts in Ohio have also upheld the taking of judicial notice of the reliability of the K-55 radar unit. See *State v. Bechtel* (1985), 24 Ohio App. 3d 72; *State v. Ayesch* (1985), 24 Ohio App. 3d 73; *Kettering v. [\*16] Smith* (Apr. 12, 1984), Montgomery App. No. 8383, unreported.

In the case sub judice the following exchange occurred during the trial:

"THE DEFENDANT: Yes, sir. The K-55 is specifically - - not a radar in general, hut the K-55 is specifically specified in this court case - -

THE COURT: And that this Court requires notification at any time that the radar is changed. Now, unless there's some proof that this highway patrolman is sneaking some unapproved system in, it's given that the scientific basis for this radar and its acceptability and reliability in court was established by Judge Hallock, this Court has a long history of taking judicial notice of - - Judge Hallock conducted the hearings that were required. You're not getting any place with this.

THE DEFENDANT: Okay. Now, wait a minute, Judge Hallock done this.

THE COURT: He was the judge before I was. \* \* \*"

Based upon the foregoing, we find the trial court properly took judicial notice of the reliability of the K-55 radar unit.

Additionally, in his ninth assignment of error appellant asserts the court below improperly took judicial notice of certificates of accuracy of the tuning forks. However, the record reveals the [\*17] court admitted the certificates in evidence pursuant to *Evid. R. 803*. Thus, appellant's contention is without merit.

Based upon a review of the record we find appellant's assignments of error relating to the radar device are without merit and are overruled.

### III

In his fourth and thirteenth assignments of error, appellant asserts the court below improperly admitted into evidence appellant's statements made to the officer at the scene of the traffic stop. Appellant maintains he was not advised of his Miranda rights and the admission of appellant's statements violated his Fifth Amendment privilege against self-incrimination. This contention is without merit.

In *Miranda v. Arizona* (1966), 384 U.S. 436, the United States Supreme Court held that [HN3] an individual must be advised of his constitutional rights when law enforcement officers initiate questioning after a person has been taken into custody or otherwise deprived of his freedom of action in any significant way. The event triggering the need for the Miranda rights is a custodial interrogation. *Id.*, and see, also, *Berkemer v. McCarty* (1984), 468 U.S. 420, and *State v. Buchholz* (1984), 11 Ohio St. 3d 24. [\*18]

The Miranda rules are not applicable to statements volunteered to the police. A statement that is voluntary and not in response to police questioning is not barred by the Fifth Amendment. *Miranda* at 478. In *State v. Coleman* (1989), 45 Ohio St. 3d 298, the court held:

"The law of *Miranda v. Arizona* (1966), 384 U.S. 436, has no application to pure voluntary statements which are not the result of 'express questioning or its functional equivalent.' *Rhode Island v. Innis* (1980), 446 U.S. 291, 300-301."

The absence of Miranda warnings will not affect the admissibility of statements made on a suspect's own initiative in absence of questions or other conduct by the police constituting interrogation. *Akron v. Milewski* (1985), 21 Ohio App. 3d 140. Any statement freely and voluntarily given without any compelling influence is admissible into evidence. *State v. Perry* (1968), 14 Ohio St. 2d 256.

In the case sub judice, appellant was not subjected to a custodial interrogation. It is clear from the record that appellant freely and voluntarily offered statements [\*19] establishing his operation of the vehicle in excess of the posted speed limit. Because appellant's statements were purely voluntary and not the result of express questioning or its functional equivalent, the admissions made by appellant were properly admitted into evidence.

Therefore, based upon the reasons stated above appellant's fourth and thirteenth assignments of error are overruled.

#### IV

In his fifth, sixteenth, and fortieth assignments of error, appellant asserts the officer was not competent to testify at the hearing below because the officer's vehicle was not properly "marked," and because the officer was not wearing a "distinctive uniform." See *R.C. 4549.13*, *R.C. 4549.14*, and *4549.15*.

However, our review of the record reveals appellant did not object or otherwise raise this issue in the trial court. [HN4] Generally, a party waives his right to allege error on appeal when that party did not object at the time the alleged error occurred. See *State v. Williams (1977)*, *51 Ohio St. 2d 112*, paragraph one of the syllabus, vacated as to the penalty (1978), *438 U.S. 911*; *State v. Ferrette (1985)*, *18 Ohio St. 3d 106*.

We find, [\*20] therefore, that these alleged errors were not properly preserved for appellate review. Accordingly, based upon the reasons stated above, appellant's fifth, sixteenth, and fortieth assignments of error are overruled.

#### V

In his eighth and forty-second assignments of error, appellant asserts the trial court improperly permitted the officer to testify concerning his visual estimate of the speed of appellant's vehicle. This contention is without merit.

In the case sub judice, the officer used his observation of appellant's vehicle and his prior training and experience to arrive at his opinion of the speed of appellant's vehicle. The trial court, sitting as the trier of facts, could reasonably infer that the officer possessed the knowledge, skill, experience, training or education to express his opinion of appellant's speed. See *Evid. R. 702*.

Accordingly, the court below did not err in admitting into evidence the officer's opinion of the speed of the vehicle. Thus, appellant's eighth and forty-second assignments of error are overruled.

#### VI

In his nineteenth and thirty-eighth assignments of error, appellant asserts the highway speed limit signs were not properly displayed. A review of [\*21] the record indicates the officer's testimony described the placement of signs indicating the posted speed limit in the area where appellant operated his motor vehicle.

In his thirty-first assignment of error appellant asserts the trial court's failure to consider information contained in the Commercial Driver's License Manual was erroneous. We find no merit in appellant's contention. Matters regarding a commercial driver's license and the Commercial Driver's License Manual are not applicable to the case sub judice.

Therefore, appellant's nineteenth, thirty-first, and thirty-eighth assignments of error are overruled.

#### VII

Appellant's twenty-ninth assignment of error asserts, in part, that he was deprived of his constitutional right to a jury trial. This contention is without merit.

[HN5] The right to a trial by jury is secured by the Sixth Amendment to the United States Constitution, Section 10, Article I, Ohio Constitution, and *R.C. 2945.17*. The right to trial by jury in a criminal proceeding is a "fundamental

right." However, the right to trial by jury is not applicable to all types of criminal offenses. In *Duncan v. Louisiana* (1968), 391 U.S. 145, the United [\*22] States Supreme Court stated:

"It is doubtless true that there is a category of petty crimes or offenses which is not subject to the Sixth Amendment jury trial provision and should not be subject to the Fourteenth Amendment jury trial requirement here applied to the states. Crimes carrying possible penalties up to six months do not require a jury trial if they otherwise qualify as petty offenses. *Cheff v. Schnackenberg* (1966), 384 U.S. 373."

Appellant was convicted of speeding in violation of [HN6] R.C. 4511.21, a minor misdemeanor. See R.C. 4511.99(D).

R.C. 2929.21(D) provides:

Whoever is convicted of or pleads guilty to a minor misdemeanor shall be fined no more than one hundred dollars.

Also, R.C. 2945.17 provides:

At any trial, in any court, for the violation of any statute of this state, or of any ordinance of any municipal corporation, except in cases in which the penalty involved does not exceed a fine of one hundred dollars, the accused has the right to be tried by a jury.  
(emphasis added)

In the case sub judice imprisonment was not a possibility and the maximum fine the court could impose was \$ 100. Appellant did not have the right to a jury [\*23] trial. Therefore, appellant's twenty-ninth assignment of error is overruled.

### VIII

In his twenty-third and thirtieth assignments of error appellant asserts the "rules of the court puts an undue burden upon the person who represents himself" and he asserts he did not receive a fair trial because he proceeded pro se in his defense. Appellant further asserts the "prosecutor is with the judge every day and the judge \* \* \* prompts the prosecutor in a way to get a conviction in his court." These contentions by appellant are without merit.

We presume appellant's reference to "rules of court" is a reference to the Ohio Rules of Evidence, the Ohio Rules of Criminal Procedure, and the Ohio Traffic Rules.

The purpose of the Ohio Rules of Evidence is to provide procedures for the adjudication of causes to the end that the truth may be ascertained and proceedings justly determined. *Evid. R. 102*. The purpose of the Ohio Rules of Criminal Procedure is to provide for the just determination of every criminal proceeding. *Crim. R. 1(B)*. The purpose of the Ohio Traffic Rules is to secure the fair, impartial, speedy and sure administration of justice, simplicity and uniformity in procedure, and the [\*24] elimination of unjustifiable expense and delay. *Traff. R. 1(B)*.

A review of the record in the case sub judice reveals the trial court fully and fairly considered all issues raised by appellant and, further, gave appellant wide latitude during the course of the trial in deviating from strict application of the rules of court. Also, appellant exercised his rights during the course of the trial including his right to confront witnesses, to testify in his own behalf, and to make objections to the admissibility of evidence. Appellant had the opportunity to engage counsel to represent him in this matter. However, it appears appellant voluntarily elected to represent himself.

We find no error in the court's actions. The record in the case sub judice does not support appellant's contention that he was prejudiced by his election to represent himself.

Appellant further asserts the trial court judge "prompted" the prosecutor during appellant's trial. Again, a review of the record does not support appellant's assertion.

Therefore, for the foregoing reasons appellant's twenty-third and thirtieth assignments of error are overruled.

## IX

Appellant's seventeenth, twentieth, twenty-first, and [\*25] twenty-eighth assignments of error assert, in essence, that the trial court's judgment was against the manifest weight of the evidence.

[HN7] A reviewing court will not reverse a conviction where there is substantial evidence upon which the court could reasonably conclude that all the elements of an offense have been proven beyond a reasonable doubt. *State v. Eskridge (1988)*, 38 Ohio St. 3d 56. The weight to be given the evidence and the credibility of the witnesses are primarily for the trier of facts. *State v. Thomas (1982)*, 70 Ohio St. 2d 79, and *State v. DeHass (1967)*, 10 Ohio St. 2d 230.

In the case sub judice, the trial court judge, the trier of fact, was in the best position to weigh the testimony and assess the credibility of the witnesses. A review of the record reveals there was sufficient competent and credible evidence adduced at trial that the trier of fact could conclude that appellant was, beyond a reasonable doubt, driving at an excessive speed. The testimony of the officer coupled with the appellant's admission provide ample evidence whereby the court could conclude appellant was operating his vehicle [\*26] at an excessive speed.

Accordingly, based upon the reasons stated above, appellant's seventeenth, twentieth, twenty-first, and twenty-eighth assignments of error are overruled.

## X

Appellant's twenty-second, twenty-third, twenty-fourth, twenty-fifth, twenty-sixth, twenty-seventh, twenty-ninth, thirty-third, thirty-seventh, and thirty-ninth assignments of error assert, in part, that the trial court erred in sentencing appellant to pay a fine of \$ 65, receive a thirty-day license suspension, and pay court costs.

Appellant was found guilty of speeding in violation of *R.C. 4511.21*. This offense constitutes a minor misdemeanor. See *R.C. 4511.99(D)*. Pursuant to *R.C. 2929.21(D)*, the maximum fine a court could impose for a minor misdemeanor offense is a fine of \$ 100. In addition to the fine, the court assessed court costs. See *R.C. 2335.18* and *2335.27*.

The trial court suspended appellant's operator's license. [HN8] *R.C. 4507.34* provides in pertinent part:

Whenever a person is found guilty under the laws of this state \* \* \* of operating a motor vehicle in violation of such laws \* \* \*, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all [\*27] other penalties provided by law, suspend for any period of time or revoke the driver's license \* \* \* of any person so convicted or pleading guilty to such offense for such period as it determines, not to exceed one year.

This statute has been construed to include speeding offenses. *Akron v. Willingham (1957)*, 166 Ohio St. 337, and *State v. Newkirk (1968)*, 21 Ohio App. 2d 160. Additionally, a license suspension imposed by a trial court prohibits the operation of a motor vehicle anywhere within the state of Ohio.

Appellant contends he received a more severe sentence because he exercised his right to a trial. Clearly, [HN9] a trial court may not impose a more severe sentence because a defendant elects to exercise his right to a trial. *North Carolina v. Pearce (1969)*, 395 U.S. 711. In *U.S. v. Derrick (6 Cir. 1975)*, 519 F. 2d 1, the court wrote at page 3:

"\* \* \* it is improper for a district judge to penalize a defendant for exercising his constitutional right to plead not guilty

and go to trial, no matter how overwhelming the evidence of his guilt."

See also, *State v. Harrison* (1985), [\*28] Highland App. No. 561, unreported.

[HN10] Trial courts are vested with broad discretion in the determination of appropriate sentences. In the case sub judice the sentence issued by the trial court was within the parameters of the applicable statutes. We find nothing in the record to support appellant's assertion that he received a more severe sentence because he exercised his right to a trial. Appellant's argument that his sentence was more severe than the penalty he would have received had he entered either a guilty or no contest plea does not, standing alone, constitute an abuse of discretion. A judge must consider many factors, including the facts and circumstances of an offense, when making a determination of what constitutes an appropriate sentence. Clearly, after hearing the evidence adduced in a contested trial, the court below was fully aware of the facts and circumstances of the offense.

Appellate courts should not disturb sentencing decisions of the trial courts unless there is a clear abuse of discretion. *Miamisburg v. Smith* (1982), 5 Ohio App. 3d 109. We find no abuse of discretion in the case at bar.

Therefore, appellant's assignments of error relating [\*29] to the sentence imposed by the trial court are overruled.

#### XI

In his tenth assignment of error, appellant asserts that testimony regarding the calibration of the radar device was improperly admitted in evidence because " \* \* \* anything pertaining to his notes as his notes were not given in discoveries."

Once again, our review of the record reveals appellant did not object or otherwise raise this issue in the trial court. Consequently, appellant has waived his right to allege error on appeal. See *State v. Williams, supra*; and *State v. Ferrette, supra*. Accordingly, based upon the foregoing appellant's tenth assignment of error is overruled.

#### XII

In his thirty-second assignment of error appellant contends "a persons right to appeal is denied him when the court requires that person to purchase a transcript from and independent contractor and is charged a exhorbant fee (sic)."

[HN11] The duty to provide a transcript for appellate review falls upon appellant. See *App. R. 9(B)*. It is the appellant's responsibility to include all the evidence in the appellate record so that the claimed error is demonstrated to the reviewing court. Also, *App. R. 9(C)* and [\*30] (D) set forth alternative procedures that may be used in providing a substitute statement of the evidence rather than providing an entire transcript of the proceedings.

We find no merit to appellant's contention. Therefore, appellant's thirty-second assignment is overruled.

JUDGMENT AFFIRMED

JUDGMENT ENTRY

It is ordered that the judgment be affirmed and that appellee recover of appellant costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Marietta Municipal Court to carry this judgment into execution.

If a stay of execution of sentence and release upon bail has been previously granted, it is continued for a period of thirty days upon the bail previously posted. The purpose of said stay is to allow appellant to file with the Ohio Supreme

Court a memorandum in support of jurisdiction accompanied by a motion for a further stay from that court during the pendency of proceedings in that court. The stay as herein continued will terminate at the expiration of the thirty day period. The stay will also terminate if the Supreme Court refuses to hear the appeal prior to the expiration [\*31] of the thirty days. This stay is conditioned upon appellant filing a notice of appeal to the Supreme Court within seven days of entry of this judgment.

A certified copy of this entry shall constitute that mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.  
Exceptions.

#### NOTICE TO COUNSEL

Pursuant to Local Rule No. 11, this document constitutes a final judgment entry and the time period for further appeal commences from the date of filing with the clerk.

**DISPOSITION:** [\*1]

JUDGMENT AFFIRMED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Marietta Municipal Court (Ohio), which found defendant guilty of speeding.

**OVERVIEW:** Subsequent to his conviction, defendant argued that the trial court erred in taking judicial notice of the reliability of the radar gun at issue and that he was denied his right to a trial by jury. On review, the court affirmed the trial court's judgment. In reaching its conclusion, the court relied on prior caselaw in holding that the trial court did not err in taking judicial notice of the reliability of the model of radar gun in question. Additionally, the court held that, because the offense for which defendant was charged was speeding, a petty or misdemeanor offense, defendant did not have a right to a jury trial. The court then held that the evidence supported the adjudication. The court also held that the trial court did not abuse its discretion in sentencing defendant.

**OUTCOME:** The court affirmed the judgment finding defendant guilty of speeding.

**CORE TERMS:** radar, assignments of error, municipal, discovery, sub judice, speed, assignment of error, reliability, training, fine, sentence, judicial notice, speed limit, jury trial, continuance, prosecutor, license, posted, excessive speed, misdemeanor, scientific, traveling, speeding, expert testimony, severe sentence, overruling, convicted, license suspension, reasons stated, motor vehicle

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > General Overview***  
***Criminal Law & Procedure > Discovery & Inspection > Discovery by Government***

[HN1] *Ohio R. Crim. P. 16(A)* provides that, upon written request, each party shall forthwith provide the discovery allowed. Motions for discovery shall certify that a demand for discovery has been made and the discovery has not been provided. The word "shall" indicates that the procedure is mandatory.

***Civil Procedure > Judicial Officers > Referees > General Overview***  
***Evidence > Judicial Notice > General Overview***  
***Evidence > Testimony > Experts > General Overview***

[HN2] While it is necessary initially to offer expert testimony on the construction and dependability of scientific devices, the trial court may at some point satisfy itself with the dependability of the instrument and take notice thereof. Courts in Ohio uphold the taking of judicial notice of the reliability of the K-55 radar unit.

***Criminal Law & Procedure > Interrogation > Miranda Rights > Custodial Interrogation***  
***Criminal Law & Procedure > Interrogation > Voluntariness***

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN3] An individual must be advised of his constitutional rights when law enforcement officers initiate questioning after a person has been taken into custody or otherwise deprived of his freedom of action in any significant way. The event triggering the need for the Miranda rights is a custodial interrogation. The Miranda rules are not applicable to statements volunteered to the police. A statement that is voluntary and not in response to police questioning is not barred by the Fifth Amendment. The absence of Miranda warnings will not affect the admissibility of statements made on a suspect's own initiative in absence of questions or other conduct by the police constituting interrogation. Any statement freely and voluntarily given without any compelling influence is admissible into evidence.

***Civil Procedure > Appeals > Reviewability > Preservation for Review***  
***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN4] Generally, a party waives his right to allege error on appeal when that party did not object at the time the alleged error occurred.

***Constitutional Law > Bill of Rights > Fundamental Rights > Criminal Process > Right to Jury Trial***  
***Constitutional Law > Bill of Rights > State Application***  
***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Petty Offenses***

[HN5] The right to a trial by jury is secured by the Sixth Amendment to the United States Constitution, Ohio Const. art. I, § 10, and *Ohio Rev. Code Ann. § 2945.17*. The right to trial by jury in a criminal proceeding is a "fundamental right." However, the right to trial by jury is not applicable to all types of criminal offenses. There is a category of petty crimes or offenses which is not subject to the Sixth Amendment jury trial provision and should not be subject to the 14th Amendment jury trial requirement applied to the states. Crimes carrying possible penalties up to six months do not require a jury trial if they otherwise qualify as petty offenses.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***  
***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Misdemeanors***  
***Criminal Law & Procedure > Sentencing > Fines***

[HN6] Under *Ohio Rev. Code Ann. § 4511.21*, speeding is a minor misdemeanor. *Ohio Rev. Code Ann. § 2929.21(D)* provides that whoever is convicted of or pleads guilty to a minor misdemeanor shall be fined no more than \$ 100.

Section 2945.17 provides that, at any trial, in any court, for the violation of any statute of Ohio, or of any ordinance of any municipal corporation, except in cases in which the penalty involved does not exceed a fine of \$ 100, the accused has the right to be tried by a jury.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence Evidence > Procedural Considerations > Weight & Sufficiency***

[HN7] A reviewing court will not reverse a conviction where there is substantial evidence upon which the court could reasonably conclude that all the elements of an offense have been proven beyond a reasonable doubt. The weight to be given the evidence and the credibility of the witnesses are primarily for the trier of facts.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview Criminal Law & Procedure > Guilty Pleas > General Overview Governments > State & Territorial Governments > Licenses***

[HN8] *Ohio Rev. Code Ann. § 4507.34* provides that, whenever a person is found guilty under Ohio law of operating a motor vehicle in violation of such laws relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the driver's license of any person so convicted or pleading guilty to such offense for such period as it determines, not to exceed one year. This statute is construed to include speeding offenses. Additionally, a license suspension imposed by a trial court prohibits the operation of a motor vehicle anywhere within the state of Ohio.

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Due Process***

[HN9] A trial court may not impose a more severe sentence because a defendant elects to exercise his right to a trial.

***Criminal Law & Procedure > Guilty Pleas > No Contest Pleas***

***Criminal Law & Procedure > Sentencing > Imposition***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

[HN10] Trial courts are vested with broad discretion in the determination of appropriate sentences. Appellate courts should not disturb sentencing decisions of the trial courts unless there is a clear abuse of discretion.

***Civil Procedure > Appeals > Records on Appeal***

***Criminal Law & Procedure > Appeals > General Overview***

[HN11] The duty to provide a transcript for appellate review falls upon appellant. It is the appellant's responsibility to include all the evidence in the appellate record so that the claimed error is demonstrated to the reviewing court. Also, *Ohio R. App. P. 9(C)* and (D) set forth alternative procedures that may be used in providing a substitute statement of the evidence rather than providing an entire transcript of the proceedings.

**OPINION:**

DECISION AND JUDGMENT ENTRY

This is an appeal from a judgment of conviction and sentence entered by the Marietta Municipal Court finding John G. McGuffey, defendant below and pro se appellant herein, guilty of operating a vehicle at an excessive speed in violation of *R.C. 4511.21*, a minor misdemeanor. We affirm.

Appellant assigns the following errors:

FIRST ASSIGNMENT OF ERROR:

"THE JUDGE SHOULD HAVE GRANTED A CONTINUANCE ON RULE 16 AS LESS THAN 24 HOURS IS NOT SUFFICIENT TIME TO GET DISCOVERIES FROM THE PRODUCTION OF DOCUMENTS AND IT GIVES THE PROSECUTION AN UNFAIR ADVANTAGE TO WAIT UNTIL THE LAST MINUTE TO GIVE THE DEFENDANT THE DOCUMENTS ASKED FOR." (SIC)

SECOND ASSIGNMENT OF ERROR:

"THE DEFENDANT SHOULD HAVE THE RIGHT TO SEE THE TUNING FORKS, WITH THE [\*2] SERIAL NUMBERS, AT THE TIME OF THE ARREST TO SEE IF THE OFFICER HAS THEM WITH HIM, AND IF THEY ARE THE ONES DESIGNATED FOR THIS PARTICULAR RADAR."

THIRD ASSIGNMENT OF ERROR:

"THE RADAR IS A SECRET INSTRUMENT THAT ONLY THE POLICE HAS AND WILL NOT BE GIVEN FOR TEST TO THE DEFENDANT. HOW CAN A PERSON DEFEND AGAINST SOMETHING HE CANNOT TEST?" (SIC)

FOURTH ASSIGNMENT OF ERROR:

"THE FACT SHEET WENT BEYOND PROBABLE CAUSE. ALL IT HAD TO SAY WAS THE POLICEMAN SAW ME SPEEDING. THE OTHER STATEMENTS AMOUNTED TO A CONFESSION OF THE DEFENDANT. THE POLICEMAN WAS PLANNING HIS CASE PRIOR TO COURT. IT WAS A ONE WAY CONVERSATION BETWEEN THE POLICEMAN, PROSECUTOR, AND THE JUDGE IN WHICH THE DEFENDANT COULD NOT DEFEND HIMSELF." (SIC)

FIFTH ASSIGNMENT OF ERROR:

"REFER TO P. 13 LINE 13-19 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE OFFICER CANNOT MAKE THIS STATEMENT ON HIS OWN IN THAT HE DID NOT SAY THAT HE HAD A FLASHING LIGHT AND THE MARKINGS MET THE SUPERINTENDENT OF THE STATE HIGHWAY PATROL. THE FACT THAT THIS CAR IS GRAY AND CANNOT BE SEEN AS FAR AS HE CAN CLOCK YOU ON HIS RADAR MEANS THAT HE IS USING UNREASONABLE METHODS OF ENFORCING TRAFFIC LAWS. SEE EXHIBIT A ATTACHED (OHIO CODE [\*3] 4549.13 AND OHIO CODE 4549.14)." (SIC)

SIXTH ASSIGNMENT OF ERROR:

"REFER TO P. 14 LINES 8-21 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE RADAR WAS IMPROPERLY INSTALLED IN THE POLICE CRUISER IN THAT THE ECM UNIT IS KEPT ON THE SEAT BESIDE THE DRIVER AND HAS NO MEANS OF CONNECTING IT TO THE COUNTING UNIT OR AN ELECTRICAL POWER SOURCE. ANY MENTION FROM HERE ON OF THE ECM UNIT WOULD BE INCORRECT AS IT WOULD HAVE NO POWER." (SIC)

SEVENTH ASSIGNMENT OF ERROR:

"REFER TO P. 16 LINES 1-21 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE JUDGE SHOULD HAVE ALLOWED THE DEFENDANT TO HAVE DISCOVERIES ON THE POLICEMAN'S TRAINING: HIS BOOKS AND TANGIBLE OBJECTS AS IT DID HAVE RELEVANCE TO A DEFENSE AGAINST THE POLICEMAN'S TRAINING." (SIC)

EIGHTH ASSIGNMENT OF ERROR:

"REFER TO P. 20, LINES 16-25 THROUGH P. 21, LINES 1-10 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THERE IS NO SCIENTIFIC EVIDENCE WHICH STATES THE POLICEMAN IS CAPABLE OF CONDUCTING A VISIBLE ESTIMATION OF THE SPEED OF VEHICLES." (SIC)

NINTH ASSIGNMENT OF ERROR:

"REFER TO P. 24, LINES 12-19 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE COURT TOOK IMPROPER JUDICIAL NOTICE AS A POLICE STATION WHERE THE [\*4] RECORDS ARE FILED IS NOT A PUBLIC OFFICE AND YOU CAN NOT HAVE ACCESS TO THESE RECORDS." (SIC)

TENTH ASSIGNMENT OF ERROR:

"REFER TO P. 27, LINES 6-7 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THIS SHOULD NOT HAVE BEEN ADMITTED AS EVIDENCE, AND ANYTHING PERTAINING TO HIS NOTES AS HIS NOTES WERE NOT GIVEN IN DISCOVERIES. ALSO THE DEFENDANT DID NOT RECEIVE DISCOVERIES OF THE LOGS KEPT BY THE HIGHWAY PATROL AS TO WERE THE OFFICER STOPPED THE DEFENDANT'S VEHICLE." (SIC)

ELEVENTH ASSIGNMENT OF ERROR:

"REFER TO P. 27, LINES 12-14 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. HERE THE POLICE OFFICER STATES THAT HIS RADAR HAD NOT BEEN TURNED OFF BETWEEN THE TWO CALIBRATION CHECKS. THEN ON P. 28, LINES 13-15 HE STATES, 'AFTER I OBSERVED THE VEHICLE, I ACTIVATED THE RADAR.'" (SIC)

TWELFTH ASSIGNMENT OF ERROR:

"REFER TO P. 30, LINES 2-3 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE OFFICER WAS ASKED IF HE LOCKED IN THE SPEED OF THE OTHER VEHICLE. LINES 13-14. 'OR THE READING THAT WAS ON THERE IN THE AUDIO ALL CLEARED OFF' ON P. 34, LINES 1-5. 'DID HE ASK TO VIEW THE SPEED THAT YOU HAD LOCKED IN?' 'YES. HE DID WALK BACK TO THE CAR, HE LOOKED IN THE PASSENGER WINDOW AND IT WAS [\*5] LAYING ON THE SEAT, ON THE ECM UNIT'. THIS COULD NOT HAVE HAPPENED AS HE HAD CLEARED THE READING OFF AND THE ECM UNIT WAS NOT CONNECTED TO THE COUNTING UNIT AND HAS NO POWER." (SIC)

## THIRTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 32, LINES 20-25 AND P.33 1-22 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THIS STATEMENT WAS A STATEMENT OF SELF-INCRIMINATION. THE MIRANDA RIGHTS HAD NOT BEEN GIVEN TO THE DEFENDANT, AND IT WOULD BE AGAINST THE 5TH AMENDMENT OF THE CONSTITUTION." (SIC)

## FOURTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 36 AND 37 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE COURT TOOK IMPROPER JUDICIAL NOTICE AND DID NOT AFFORD THE DEFENDANT A HEARING ON THIS NOTICE." (SIC)

## FIFTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 38, LINES 7-13 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. ON THE CROSS-EXAMINE THE FOLLOWING LINES SHOWS THAT THE RADAR HAD BEEN TURNED OFF CONTRARY TO THE OFFICER'S STATEMENT ON P. 27, LINES 12-15. (SIC)

## SIXTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 38, LINES 6-25 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THIS WOULD VERIFY THAT THE OFFICER HAD NO IDEA IF HIS PATROL CAR MET THE STANDARDS OF THE SUPERINTENDENT OF THE OHIO HIGHWAY PATROL [\*6] AS REFERRED TO ON P. 13, LINES 13-18." (SIC)

## SEVENTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 46, LINES 4-7 AND 17-21 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. IN THIS STATEMENT THE OFFICER CONTRADICTS HIMSELF." (SIC)

## EIGHTEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 50, LINES 12-17 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. HOW CAN AN OFFICER BE PROPERLY TRAINED IN RADAR IF HE HAS NOT BEEN TAUGHT THE SAFETY ASPECTS OF RADAR?" (SIC)

## NINETEENTH ASSIGNMENT OF ERROR:

"REFER TO P. 54-56 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. IN THESE PAGES THE OFFICER STATES THAT THE SPEED LIMIT IS 65 MPH AND DROPS TO 45 MPH AND THAT THERE IS NO SIGN, REDUCE SPEED AHEAD. THE OHIO CODE, 51-10, STATES THAT, 'A SPEED ZONE CANNOT BE ENFORCED UNTIL STANDARD SIGNS HAVE BEEN PROPERLY INSTALLED ALONG THE ROADWAY.' 'THE REDUCED SPEED AHEAD SIGN SHOULD BE ERECTED IN ADVANCE OF ANY SPEED ZONE THAT IS 15 MILES PER HOUR OR MORE UNDER THE SPEED LIMIT IN A PRECEEDING STATUTORY OR ALTERED SPEED ZONE.'" (EXHIBIT B) (SIC)

## TWENTIETH ASSIGNMENT OF ERROR:

"REFER TO P. 57, LINES 1-12 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THIS

CROSS-EXAMINATION SHOWS THE OFFICER CHANGED HIS ACCOUNT OF THE PLACE [\*7] WHERE HE CLOCKED THE DEFENDANT'S VEHICLE. REFER TO P. 27-28, LINES 21-25 AND P. 28, LINES 1-16. THEREFORE, IF HE CLOCKED THE DEFENDANT AT THE 26 MILE MARKER HE WOULD BE TRAVELING IN THE SAME DIRECTION, AND HIS RADAR IS NOT CAPABLE OF CLOCKING IN THE SAME DIRECTION." (SIC)

TWENTY-FIRST ASSIGNMENT OF ERROR:

"REFER TO P. 58, LINES 1-25 OF THE TRANSCRIPT OF THE MUNICIPAL COURT CASE. THE CITATION WAS IMPROPERLY WRITTEN AND SHOULD BE DISALLOWED AS THERE IS A DISCREPANCY AS TO WHERE HE CLOCKED THE DEFENDANT." (SIC)

TWENTY-SECOND ASSIGNMENT OF ERROR:

"THE DEFENDANT'S CONSTITUTIONAL RIGHTS TO A TRIAL WAS DENIED HIM BY GETTING A LARGER SENTENCE AND SUSPENSION OF LICENSE THAN HE WOULD HAVE IF HE HAD PLEADED GUILTY AND PAID THE FINE AS STATED ON THE CITATION." (SIC)

TWENTY-THIRD ASSIGNMENT OF ERROR:

"THE DEFENDANT WAS PUNISHED IMPROPERLY AS THE JUDGE FAILED TO DISTINGUISH BETWEEN THE DEFENDANT TALKING AND THE DEFENDANT REPRESENTING HIMSELF. THEREFORE, IN CLOSING ARGUMENTS THE DEFENDANT REPRESENTING HIMSELF WAS PRESENTING A DEFENSE AND THE JUDGE SUSPENDED HIS LICENSE FOR 30 DAYS FOR STATING THAT HIS DEFENSE WAS THAT HE FELT HE COULD DRIVE 65 MPH WHEN NO REDUCE SPEED AHEAD SIGN WAS [\*8] POSTED. THIS WAS A DEFENSE BY THE DEFENDANT'S ATTORNEY AND NOT THE DEFENDANT." (SIC)

TWENTY-FOURTH ASSIGNMENT OF ERROR:

"THE JUDGE CANNOT INFLICT A PUNISHMENT THAT GOES OUTSIDE HIS JURISDICTION. HE COULD ONLY SUSPEND DRIVING PRIVILEGES IN WASHINGTON COUNTY AND NOT THE WHOLE STATE." (SIC)

TWENTY-FIFTH ASSIGNMENT OF ERROR:

"IMPROPER SENTENCE." (SIC)

TWENTY-SIXTH ASSIGNMENT OF ERROR:

"JUDGE EDWARD LANE, JR. HAD LED THE DEFENDANT TO BELIEVE THAT HE COULD ONLY GET AN ADDITIONAL \$ 6.00 COST ADDED TO HIS FINE BE CONTESTING IT IN A COURT OF LAW. THEN HE FINED HIM A GREATER FINE, PLUS A 30 DAY SUSPENSION OF LICENSE. ENCLOSED FIND A TAPE RECORDING OF THIS HEARING." (SIC)

TWENTY-SEVENTH ASSIGNMENT OF ERROR:

"THE DEFENDANT RECEIVED A MORE SEVERE PUNISHMENT FOR GOING TO COURT THAN THOUSNADS OF OTHER PEOPLE IN THE SAME SITUATION. THE DEFENDANT CANNOT PROVE THIS BECAUSE HE WAS DENIED ACCESS TO THE RECORDS BY THE CLERK OF THE COURT, ROSANNE M. BUELL." (SIC)

## TWENTY-EIGHTH ASSIGNMENT OF ERROR:

"THE WEIGHT OF THE EVIDENCE DOES NOT WARRANT A CONVICTION."

## TWENTY-NINTH ASSIGNMENT OF ERROR:

"THE DEFENDANT'S CONSTITUTIONAL RIGHTS OF A TRIAL BY JURY WAS DENIED HIM, AND THE JUDGE WENT [\*9] BEYOND HIS RIGHTS BY SUSPENDING THE DEFENDANT'S LICENSE." (SIC)

## THIRTIETH ASSIGNMENT OF ERROR:

"THE RULES OF THE COURT PUTS A UNDUE BURDEN UPON THE PERSON WHO REPRESENTS HIMSELF AS HE CANNOT GET ANY EXPERIENCE IN A COURT ROOM WHEN THE PROSECUTION IS WITH THE JUDGE EVERY DAY AND THE JUDGE, AS IN MY CASE, PROMPTS THE PROSECUTOR IN THE WAY TO GET A CONVICTION IN HIS COURT. WHO WOULD KNOW BETTER THAN THE LAWYERS WHO WORKS THE COURT ALL THE TIME WHEN THEY SAY THE MAN WHO REPRESENTS HIMSELF HAS A FOOL FOR A CLIENT." (SIC)

## THIRTY-FIRST ASSIGNMENT OF ERROR:

"A SPEEDING VIOLATION OF ONLY 15 MPH OVER THE POSTED SPEED DOES NOT CONSTITUTE HAZARDOUS DRIVING IN ACCORDANCE WITH THE NEW U.S. STANDARDS ON THE CDL LICENSE AS IT STATES IN THE DRIVER'S MANUAL THAT IT MUST BE MORE THAN 20 MPH OVER THE SPEED LIMIT BEFORE YOU CAN HAVE YOUR LICENSE SUSPENDED." (SIC)

## THIRTY-SECOND ASSIGNMENT OF ERROR:

"A PERSON'S RIGHT TO AN APPEAL IS DENIED HIM WHEN THE COURT REQUIRES THAT PERSON TO PURCHASE A TRANSCRIPT FROM AN INDEPENDENT CONTRACTOR AND IN CHARGED AN EXHORBANT FEE." (SIC)

## THIRTY-THIRD ASSIGNMENT OF ERROR:

"COURT COSTS CAN ONLY BE ACTUAL COSTS AND NO ADDED TAX ADDED TO HIS CONSTITUTIONAL [\*10] RIGHTS TO A TRIAL." (SIC)

## THIRTY-FOURTH ASSIGNMENT OF ERROR:

"THERE WAS NO EXPERT WITNESSES TO THIS RADAR AS IT IS TURNED ON AND OFF AND WOULD NOT MEET ANY OTHER STANDARDS." (SIC)

## THIRTY-FIFTH ASSIGNMENT OF ERROR:

" *THERE WAS NO EXPERT WITNESSES PERTAINING TO THE RADAR AS CITED IN THE CASE OF STATE OF OHIO V. WILCOX, 319 N.E. 2D 615 (PP. 615-621)*" (SIC)

## THIRTY-SIXTH ASSIGNMENT OF ERROR:

"THE RADAR WAS IMPROPERLY INSTALLED IN THE CRUISER AND THE CALIBRATION WOULD NOT WORK AS THE RADAR WAS TURNED AFTER THE CALIBRATION." (SIC)

## THIRTY-SEVENTH ASSIGNMENT ERROR:

"THE DEFENDANT-APPELLANT'S CONSTITUTIONAL RIGHTS WERE DENIED HIM BY GIVING HIM A LARGER FINE AND PUNISHMENT THAN THE \$ 55 AS STATED ON THE TICKET. HE RECEIVED THE ADDITIONAL PUNISHMENT BECAUSE HE EXERCISED HIS CONSTITUTIONAL RIGHTS." (SIC)

## THIRTY-EIGHTH ASSIGNMENT OF ERROR:

"THE SIGNS WERE NOT PROPERLY INSTALLED ON THE HIGHWAY AND THEREFORE, THE SPEED ZONES COULD NOT BE ENFORCED."

## THIRTY-NINTH ASSIGNMENT OF ERROR:

"THE DEFENDANT-APPELLANT WAS GIVEN A 30 DAY LICENSE SUSPENSION FOR PRESENTING A DEFENSE THAT THE SIGNS WERE NOT PROPERLY INSTALLED."

## FORTIETH ASSIGNMENT OF ERROR:

"THE POLICEMAN'S [\*11] CAR WAS NOT PROPERLY MARKED."

## FORTY-FIRST ASSIGNMENT OF ERROR:

"THE RADAR CAN NOT CLOCK A SPEED OF A VEHICLE WHEN IT IS TRAVELING IN THE SAME DIRECTION." (SIC)

## FORTY-SECOND ASSIGNMENT OF ERROR:

"THERE IS NO EVIDENCE PRODUCED OTHER THAN THE POLICEMAN THAT HE CAN ESTIMATE THE SPEED OF A VEHICLE." (SIC)

The record reveals the following facts pertinent to this appeal. On June 10, 1990, at 3:30 P.M., Ohio State Highway Patrol Trooper Paul Pride was traveling south on State Route 7 in Washington County, Ohio. Trooper Pride was wearing the Ohio State Highway Patrol uniform and he was operating an Ohio State Highway Patrol cruiser.

Trooper Pride observed a pickup truck traveling north on State Route 7 in a posted forty-five m.p.h. speed zone. Trooper Pride testified that his attention was drawn to the pickup truck because his visual estimate of the truck's speed was approximately fifty-five m.p.h.

Trooper Pride activated the K-55 radar unit and obtained a reading indicating the vehicle in question was traveling sixty m.p.h. The officer thereupon turned and pursued the vehicle. After the officer stopped the vehicle, the operator, the appellant herein, denied he was traveling sixty [\*12] m.p.h.; however, appellant did state that he may have been operating his vehicle at fifty m.p.h. in the forty-five m.p.h. zone. Trooper Pride subsequently filed a uniform traffic citation in the Marietta Municipal Court, alleging appellant operated his vehicle at an excessive speed in violation of *R.C. 4511.21*.

On October 17, 1990, the court below conducted a bench trial. After hearing the evidence, the court found appellant guilty, fined appellant \$ 65, suspended appellant's operator's license for thirty days, and ordered appellant to pay court costs. It is from this finding that appellant has filed this appeal.

In this appeal the appellant has raised forty-two assignments of error. Because many of the assignments of error

contain similar, and in some cases identical, issues, we will consolidate the assignments of error for purposes of this appeal.

## I

In his first and seventh assignments of error, appellant asserts the state failed to provide, in a timely fashion, discovery materials pertaining to the officer's training in the use of radar. At trial appellant argued the state did not comply with *Crim. R. 16* in providing discovery and appellant requested a continuance. Appellant asserts [\*13] the court below erred in overruling his request for a continuance. This contention is without merit.

In the case sub judice, the court carefully considered appellant's request for a continuance. In overruling appellant's motion the court stated that if, during the course of the trial, appellant could demonstrate the requested information was necessary for the preparation of his defense, appellant could renew his motion for a continuance and the court would re-evaluate the motion at that time. During the direct examination of Trooper Pride, appellant renewed his motion and the court again overruled the motion. During the cross examination of Trooper Pride, appellant made many inquiries regarding various aspects of the case, including a detailed examination of Trooper Pride's training in the use of radar.

[HN1] *Crim. R. 16(A)* provides:

Upon written request each party shall forthwith provide the discovery herein allowed. Motions for discovery shall certify that a demand for discovery has been made and the discovery has not been provided.

The word "shall" indicates that the procedure is mandatory. See *Lakewood v. Papadelis (1987)*, 32 Ohio St. 3d 1.

Additionally, [\*14] we find appellant failed to file a motion for discovery, pursuant to *Crim. R. 16(A)*, certifying that a demand for discovery was made and discovery was not provided. Before the sanctions set forth in *Crim. R. 16(E)* may be imposed, a party must file a motion for discovery pursuant to *Crim. R. 16(A)*. See *State v. Hicks (1976)*, 48 Ohio App. 2d 135.

We conclude, based upon a review of the record, that the trial court did not err in overruling appellant's motion for a continuance. Accordingly, appellant's first and seventh assignments of error are overruled.

## II

In his second, third, sixth, ninth, eleventh, twelfth, fourteenth, fifteenth, eighteenth, thirty-fourth, thirty-fifth, thirty-sixth, and forty-first assignments of error, appellant asserts, in part, the court below erred in admitting evidence relating to the radar device.

Trooper Pride testified he had received extensive training in the use and operation of the K-55 radar unit, that he had considerable experience operating the radar device, and that this particular radar unit was properly calibrated and operated.

The trial court took judicial notice of the reliability of the K-55 radar device and did not require [\*15] expert testimony concerning the scientific reliability of the K-55 radar unit. See *Crim. R. 27*, *Civ. R. 44.1*, and *Evid. R. 201(B)*. In *State v. Kline* (Aug. 12, 1981), Lorain App. No. 3182, unreported, the court wrote:

"The referee found 'that Elyria Municipal Court takes judicial notice of the scientific reliability of the K-55 unit.' The trial court accepted the referee's finding. [HN2] While it is necessary initially to offer expert testimony on the construction and dependability of scientific devices, *East Cleveland v. Ferrell (1958)*, 168 Ohio St. 298, we feel the trial court may at some point satisfy itself with the dependability of the instrument and take notice thereof. e.g. *Akron v. Gray (1979)*, 60 Ohio Misc. 68. The Elyria Municipal Court having recognized the reliability of K-55 radar, there was no need to offer expert testimony, and this assignment of error is overruled."

Other courts in Ohio have also upheld the taking of judicial notice of the reliability of the K-55 radar unit. See *State v. Bechtel* (1985), 24 Ohio App. 3d 72; *State v. Ayesch* (1985), 24 Ohio App. 3d 73; *Kettering v. [\*16] Smith* (Apr. 12, 1984), Montgomery App. No. 8383, unreported.

In the case sub judice the following exchange occurred during the trial:

"THE DEFENDANT: Yes, sir. The K-55 is specifically - - not a radar in general, hut the K-55 is specifically specified in this court case - -

THE COURT: And that this Court requires notification at any time that the radar is changed. Now, unless there's some proof that this highway patrolman is sneaking some unapproved system in, it's given that the scientific basis for this radar and its acceptability and reliability in court was established by Judge Hallock, this Court has a long history of taking judicial notice of - - Judge Hallock conducted the hearings that were required. You're not getting any place with this.

THE DEFENDANT: Okay. Now, wait a minute, Judge Hallock done this.

THE COURT: He was the judge before I was. \* \* \*"

Based upon the foregoing, we find the trial court properly took judicial notice of the reliability of the K-55 radar unit.

Additionally, in his ninth assignment of error appellant asserts the court below improperly took judicial notice of certificates of accuracy of the tuning forks. However, the record reveals the [\*17] court admitted the certificates in evidence pursuant to *Evid. R. 803*. Thus, appellant's contention is without merit.

Based upon a review of the record we find appellant's assignments of error relating to the radar device are without merit and are overruled.

### III

In his fourth and thirteenth assignments of error, appellant asserts the court below improperly admitted into evidence appellant's statements made to the officer at the scene of the traffic stop. Appellant maintains he was not advised of his Miranda rights and the admission of appellant's statements violated his Fifth Amendment privilege against self-incrimination. This contention is without merit.

In *Miranda v. Arizona* (1966), 384 U.S. 436, the United States Supreme Court held that [HN3] an individual must be advised of his constitutional rights when law enforcement officers initiate questioning after a person has been taken into custody or otherwise deprived of his freedom of action in any significant way. The event triggering the need for the Miranda rights is a custodial interrogation. *Id.*, and see, also, *Berkemer v. McCarty* (1984), 468 U.S. 420, and *State v. Buchholz* (1984), 11 Ohio St. 3d 24. [\*18]

The Miranda rules are not applicable to statements volunteered to the police. A statement that is voluntary and not in response to police questioning is not barred by the Fifth Amendment. *Miranda* at 478. In *State v. Coleman* (1989), 45 Ohio St. 3d 298, the court held:

"The law of *Miranda v. Arizona* (1966), 384 U.S. 436, has no application to pure voluntary statements which are not the result of 'express questioning or its functional equivalent.' *Rhode Island v. Innis* (1980), 446 U.S. 291, 300-301."

The absence of Miranda warnings will not affect the admissibility of statements made on a suspect's own initiative in absence of questions or other conduct by the police constituting interrogation. *Akron v. Milewski* (1985), 21 Ohio App. 3d 140. Any statement freely and voluntarily given without any compelling influence is admissible into evidence. *State v. Perry* (1968), 14 Ohio St. 2d 256.

In the case sub judice, appellant was not subjected to a custodial interrogation. It is clear from the record that appellant freely and voluntarily offered statements [\*19] establishing his operation of the vehicle in excess of the posted speed limit. Because appellant's statements were purely voluntary and not the result of express questioning or its functional equivalent, the admissions made by appellant were properly admitted into evidence.

Therefore, based upon the reasons stated above appellant's fourth and thirteenth assignments of error are overruled.

#### IV

In his fifth, sixteenth, and fortieth assignments of error, appellant asserts the officer was not competent to testify at the hearing below because the officer's vehicle was not properly "marked," and because the officer was not wearing a "distinctive uniform." See *R.C. 4549.13*, *R.C. 4549.14*, and *4549.15*.

However, our review of the record reveals appellant did not object or otherwise raise this issue in the trial court. [HN4] Generally, a party waives his right to allege error on appeal when that party did not object at the time the alleged error occurred. See *State v. Williams (1977)*, *51 Ohio St. 2d 112*, paragraph one of the syllabus, vacated as to the penalty (1978), *438 U.S. 911*; *State v. Ferrette (1985)*, *18 Ohio St. 3d 106*.

We find, [\*20] therefore, that these alleged errors were not properly preserved for appellate review. Accordingly, based upon the reasons stated above, appellant's fifth, sixteenth, and fortieth assignments of error are overruled.

#### V

In his eighth and forty-second assignments of error, appellant asserts the trial court improperly permitted the officer to testify concerning his visual estimate of the speed of appellant's vehicle. This contention is without merit.

In the case sub judice, the officer used his observation of appellant's vehicle and his prior training and experience to arrive at his opinion of the speed of appellant's vehicle. The trial court, sitting as the trier of facts, could reasonably infer that the officer possessed the knowledge, skill, experience, training or education to express his opinion of appellant's speed. See *Evid. R. 702*.

Accordingly, the court below did not err in admitting into evidence the officer's opinion of the speed of the vehicle. Thus, appellant's eighth and forty-second assignments of error are overruled.

#### VI

In his nineteenth and thirty-eighth assignments of error, appellant asserts the highway speed limit signs were not properly displayed. A review of [\*21] the record indicates the officer's testimony described the placement of signs indicating the posted speed limit in the area where appellant operated his motor vehicle.

In his thirty-first assignment of error appellant asserts the trial court's failure to consider information contained in the Commercial Driver's License Manual was erroneous. We find no merit in appellant's contention. Matters regarding a commercial driver's license and the Commercial Driver's License Manual are not applicable to the case sub judice.

Therefore, appellant's nineteenth, thirty-first, and thirty-eighth assignments of error are overruled.

#### VII

Appellant's twenty-ninth assignment of error asserts, in part, that he was deprived of his constitutional right to a jury trial. This contention is without merit.

[HN5] The right to a trial by jury is secured by the Sixth Amendment to the United States Constitution, Section 10, Article I, Ohio Constitution, and *R.C. 2945.17*. The right to trial by jury in a criminal proceeding is a "fundamental

right." However, the right to trial by jury is not applicable to all types of criminal offenses. In *Duncan v. Louisiana* (1968), 391 U.S. 145, the United [\*22] States Supreme Court stated:

"It is doubtless true that there is a category of petty crimes or offenses which is not subject to the Sixth Amendment jury trial provision and should not be subject to the Fourteenth Amendment jury trial requirement here applied to the states. Crimes carrying possible penalties up to six months do not require a jury trial if they otherwise qualify as petty offenses. *Cheff v. Schnackenberg* (1966), 384 U.S. 373."

Appellant was convicted of speeding in violation of [HN6] R.C. 4511.21, a minor misdemeanor. See R.C. 4511.99(D).

R.C. 2929.21(D) provides:

Whoever is convicted of or pleads guilty to a minor misdemeanor shall be fined no more than one hundred dollars.

Also, R.C. 2945.17 provides:

At any trial, in any court, for the violation of any statute of this state, or of any ordinance of any municipal corporation, except in cases in which the penalty involved does not exceed a fine of one hundred dollars, the accused has the right to be tried by a jury.  
(emphasis added)

In the case sub judice imprisonment was not a possibility and the maximum fine the court could impose was \$ 100. Appellant did not have the right to a jury [\*23] trial. Therefore, appellant's twenty-ninth assignment of error is overruled.

### VIII

In his twenty-third and thirtieth assignments of error appellant asserts the "rules of the court puts an undue burden upon the person who represents himself" and he asserts he did not receive a fair trial because he proceeded pro se in his defense. Appellant further asserts the "prosecutor is with the judge every day and the judge \* \* \* prompts the prosecutor in a way to get a conviction in his court." These contentions by appellant are without merit.

We presume appellant's reference to "rules of court" is a reference to the Ohio Rules of Evidence, the Ohio Rules of Criminal Procedure, and the Ohio Traffic Rules.

The purpose of the Ohio Rules of Evidence is to provide procedures for the adjudication of causes to the end that the truth may be ascertained and proceedings justly determined. *Evid. R. 102*. The purpose of the Ohio Rules of Criminal Procedure is to provide for the just determination of every criminal proceeding. *Crim. R. 1(B)*. The purpose of the Ohio Traffic Rules is to secure the fair, impartial, speedy and sure administration of justice, simplicity and uniformity in procedure, and the [\*24] elimination of unjustifiable expense and delay. *Traff. R. 1(B)*.

A review of the record in the case sub judice reveals the trial court fully and fairly considered all issues raised by appellant and, further, gave appellant wide latitude during the course of the trial in deviating from strict application of the rules of court. Also, appellant exercised his rights during the course of the trial including his right to confront witnesses, to testify in his own behalf, and to make objections to the admissibility of evidence. Appellant had the opportunity to engage counsel to represent him in this matter. However, it appears appellant voluntarily elected to represent himself.

We find no error in the court's actions. The record in the case sub judice does not support appellant's contention that he was prejudiced by his election to represent himself.

Appellant further asserts the trial court judge "prompted" the prosecutor during appellant's trial. Again, a review of the record does not support appellant's assertion.

Therefore, for the foregoing reasons appellant's twenty-third and thirtieth assignments of error are overruled.

## IX

Appellant's seventeenth, twentieth, twenty-first, and [\*25] twenty-eighth assignments of error assert, in essence, that the trial court's judgment was against the manifest weight of the evidence.

[HN7] A reviewing court will not reverse a conviction where there is substantial evidence upon which the court could reasonably conclude that all the elements of an offense have been proven beyond a reasonable doubt. *State v. Eskridge (1988)*, 38 Ohio St. 3d 56. The weight to be given the evidence and the credibility of the witnesses are primarily for the trier of facts. *State v. Thomas (1982)*, 70 Ohio St. 2d 79, and *State v. DeHass (1967)*, 10 Ohio St. 2d 230.

In the case sub judice, the trial court judge, the trier of fact, was in the best position to weigh the testimony and assess the credibility of the witnesses. A review of the record reveals there was sufficient competent and credible evidence adduced at trial that the trier of fact could conclude that appellant was, beyond a reasonable doubt, driving at an excessive speed. The testimony of the officer coupled with the appellant's admission provide ample evidence whereby the court could conclude appellant was operating his vehicle [\*26] at an excessive speed.

Accordingly, based upon the reasons stated above, appellant's seventeenth, twentieth, twenty-first, and twenty-eighth assignments of error are overruled.

## X

Appellant's twenty-second, twenty-third, twenty-fourth, twenty-fifth, twenty-sixth, twenty-seventh, twenty-ninth, thirty-third, thirty-seventh, and thirty-ninth assignments of error assert, in part, that the trial court erred in sentencing appellant to pay a fine of \$ 65, receive a thirty-day license suspension, and pay court costs.

Appellant was found guilty of speeding in violation of *R.C. 4511.21*. This offense constitutes a minor misdemeanor. See *R.C. 4511.99(D)*. Pursuant to *R.C. 2929.21(D)*, the maximum fine a court could impose for a minor misdemeanor offense is a fine of \$ 100. In addition to the fine, the court assessed court costs. See *R.C. 2335.18* and *2335.27*.

The trial court suspended appellant's operator's license. [HN8] *R.C. 4507.34* provides in pertinent part:

Whenever a person is found guilty under the laws of this state \* \* \* of operating a motor vehicle in violation of such laws \* \* \*, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all [\*27] other penalties provided by law, suspend for any period of time or revoke the driver's license \* \* \* of any person so convicted or pleading guilty to such offense for such period as it determines, not to exceed one year.

This statute has been construed to include speeding offenses. *Akron v. Willingham (1957)*, 166 Ohio St. 337, and *State v. Newkirk (1968)*, 21 Ohio App. 2d 160. Additionally, a license suspension imposed by a trial court prohibits the operation of a motor vehicle anywhere within the state of Ohio.

Appellant contends he received a more severe sentence because he exercised his right to a trial. Clearly, [HN9] a trial court may not impose a more severe sentence because a defendant elects to exercise his right to a trial. *North Carolina v. Pearce (1969)*, 395 U.S. 711. In *U.S. v. Derrick (6 Cir. 1975)*, 519 F. 2d 1, the court wrote at page 3:

"\* \* \* it is improper for a district judge to penalize a defendant for exercising his constitutional right to plead not guilty

and go to trial, no matter how overwhelming the evidence of his guilt."

See also, *State v. Harrison* (1985), [\*28] Highland App. No. 561, unreported.

[HN10] Trial courts are vested with broad discretion in the determination of appropriate sentences. In the case sub judice the sentence issued by the trial court was within the parameters of the applicable statutes. We find nothing in the record to support appellant's assertion that he received a more severe sentence because he exercised his right to a trial. Appellant's argument that his sentence was more severe than the penalty he would have received had he entered either a guilty or no contest plea does not, standing alone, constitute an abuse of discretion. A judge must consider many factors, including the facts and circumstances of an offense, when making a determination of what constitutes an appropriate sentence. Clearly, after hearing the evidence adduced in a contested trial, the court below was fully aware of the facts and circumstances of the offense.

Appellate courts should not disturb sentencing decisions of the trial courts unless there is a clear abuse of discretion. *Miamisburg v. Smith* (1982), 5 Ohio App. 3d 109. We find no abuse of discretion in the case at bar.

Therefore, appellant's assignments of error relating [\*29] to the sentence imposed by the trial court are overruled.

#### XI

In his tenth assignment of error, appellant asserts that testimony regarding the calibration of the radar device was improperly admitted in evidence because " \* \* \* anything pertaining to his notes as his notes were not given in discoveries."

Once again, our review of the record reveals appellant did not object or otherwise raise this issue in the trial court. Consequently, appellant has waived his right to allege error on appeal. See *State v. Williams, supra*; and *State v. Ferrette, supra*. Accordingly, based upon the foregoing appellant's tenth assignment of error is overruled.

#### XII

In his thirty-second assignment of error appellant contends "a persons right to appeal is denied him when the court requires that person to purchase a transcript from and independent contractor and is charged a exhorbant fee (sic)."

[HN11] The duty to provide a transcript for appellate review falls upon appellant. See *App. R. 9(B)*. It is the appellant's responsibility to include all the evidence in the appellate record so that the claimed error is demonstrated to the reviewing court. Also, *App. R. 9(C)* and [\*30] (D) set forth alternative procedures that may be used in providing a substitute statement of the evidence rather than providing an entire transcript of the proceedings.

We find no merit to appellant's contention. Therefore, appellant's thirty-second assignment is overruled.

JUDGMENT AFFIRMED

JUDGMENT ENTRY

It is ordered that the judgment be affirmed and that appellee recover of appellant costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Marietta Municipal Court to carry this judgment into execution.

If a stay of execution of sentence and release upon bail has been previously granted, it is continued for a period of thirty days upon the bail previously posted. The purpose of said stay is to allow appellant to file with the Ohio Supreme

Court a memorandum in support of jurisdiction accompanied by a motion for a further stay from that court during the pendency of proceedings in that court. The stay as herein continued will terminate at the expiration of the thirty day period. The stay will also terminate if the Supreme Court refuses to hear the appeal prior to the expiration [\*31] of the thirty days. This stay is conditioned upon appellant filing a notice of appeal to the Supreme Court within seven days of entry of this judgment.

A certified copy of this entry shall constitute that mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.  
Exceptions.

#### NOTICE TO COUNSEL

Pursuant to Local Rule No. 11, this document constitutes a final judgment entry and the time period for further appeal commences from the date of filing with the clerk.

**State of Ohio and City of Wauseon, Appellee v. Tim H. Purdy, Appellant****No. 89FU000015****Court of Appeals of Ohio, Sixth Appellate District, Fulton County***1990 Ohio App. LEXIS 3286***August 10, 1990, Decided****PRIOR HISTORY:** [\*1]

Appeal from Trial Court No. 89TRD02214.

**CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant sought review from an order of the Fulton County Court, Western District (Ohio), which found him guilty of speeding in violation of Wauseon, Ohio, Ordinance § 333.03.**OVERVIEW:** Defendant was found guilty of speeding, after being found not guilty of fleeing. On appeal, the court held that the record reflected evidence that the officer had calibrated his unit when he started his shift and again after defendant's arrest. The court determined that this evidence, plus the certificate of training from the state highway patrol, amply supported the conclusion that the radar unit was in good working condition, properly calibrated, and that the officer was well qualified to use it. The court found that the trial court's decision was supported by substantial, competent evidence and affirmed.**OUTCOME:** The court affirmed the order from the trial court.**CORE TERMS:** radar, reliability, speeding, judicial notice, calibrated, truck, assignment of error, stationary, traffic, speed, training, motor vehicle, patrol car, semi-truck, driver, expertise, visual, beyond a reasonable doubt, expert testimony, speed limit, certificate, well-taken, patrolman, traveling, fleeing, mph**LexisNexis(R) Headnotes***Evidence > Judicial Notice > Scientific & Technical Facts**Evidence > Scientific Evidence > General Overview*

[HN1] The reliability of a radar device may be established through the introduction of expert testimony or by the court taking judicial notice of it. However, in order for the court to take judicial notice of any evidence, the fact must be commonly accepted as true in the community for which the court sits. A court's authority to take judicial notice of a radar device's reliability when a patrol car is in a stationary position has long been established in Ohio. Specifically, the

Supreme Court of Ohio has held that a court may take judicial notice of the construction/scientific reliability and the method of operation in all cases involving stationary, Doppler effect radar devices.

***Evidence > Judicial Notice > General Overview***

***Evidence > Scientific Evidence > General Overview***

[HN2] Once judicial notice is taken as to the construction and reliability of a radar device, the court must further determine that (1) the device is in good condition and properly calibrated, and (2) the operator is one qualified for its use by training and experience. The testimony that a machine was properly calibrated does not need to be in the form of expert testimony, but may be from the officer who calibrated the unit prior to use.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN3] Wauseon, Ohio. Ordinance § 333.03(a) states: No person shall operate a motor vehicle at a speed greater or less than is reasonable or proper having due regard to the traffic, surface and width of the street or highway and any other conditions.

**COUNSEL:**

Albert L. Potter, II, for appellant.

**JUDGES:**

George M. Glasser, Judge, Charles D. Abood, Judge, Melvin L. Resnick, Judge, Concur.

**OPINION:**

**DECISION AND JOURNAL ENTRY**

This case is on appeal from a judgment of the Fulton County Court, Western District, in which appellant, Tim Purdy, was found guilty of speeding in violation of Wauseon Codified Ordinance Section 333.03.

The facts of this case are as follows. On May 4, 1989, at approximately 1:13 p.m., Purdy was driving his semi-truck southbound on Shoop Avenue (Route 108) in the city of Wauseon, Ohio. At that same time, Keith O'Brien, a patrolman for the city of Wauseon, was in a stationary position in Detwiler Manor parking lot, running radar of traffic traveling on Shoop Avenue. The speed limit in this area of Shoop Avenue is thirty-five mph. After visually observing Purdy's truck within the city limits, which O'Brien believed was traveling at a rate of speed in excess of forty-five mph., O'Brien activated the KR-10 radar unit in his patrol car. The radar recorded a reading of fifty-two m.p.h. O'Brien [\*2] then placed the radar on hold, entered Shoop Avenue, turned on his emergency lights and pursued the truck. After activating all three stages of the siren and maneuvering his patrol car in and out of the other lane of traffic to get the truck driver's attention, the truck finally stopped. Purdy, the driver of the truck, was charged with violating Wauseon City Ordinances Section 333.03(a), exceeding the speed limit and Section 303.01(b), fleeing.

On June 27, 1988, in a bench trial, the court found the defendant not guilty of fleeing and delayed the decision on the charge of speeding until the status of the law on the KR-10 radar's reliability could be determined. On August 8, 1988, Purdy was found guilty of speeding.

It is from the judgment entry of August 8, 1988, that Purdy raises the following two assignments of error:

"I. THE TRIAL COURT ERRED IN FINDING THE DEFENDANT GUILTY OF SPEEDING WHERE THE STATE FAILED TO PROVE THROUGH INDEPENDENT EXPERT TESTIMONY THE RELIABILITY OF THE MODEL KR-10 RADAR DEVISE [sic] AS TO THE CONSTRUCTION AND METHOD OF OPERATION.

"II. THE TRIAL COURT ERRED IN FINDING THE DEFENDANT GUILTY OF SPEEDING WHERE THE STATE FAILED TO ESTABLISH THE ELEMENTS OF [\*3] THE OFFENSE BEYOND A REASONABLE DOUBT."

In Purdy's first assignment of error, he contends that the state failed to establish the reliability of the KR-10 radar device and therefore it was error for the court to find him guilty of speeding.

[HN1] The reliability of a radar device may be established through the introduction of expert testimony or by the court taking judicial notice of it. *State v. Doles (1980)*, 70 Ohio App. 2d 35, 38. However, in order for the court to take judicial notice of any evidence, the fact must be " \* \* \* commonly accepted as true in the community for which the court sits \* \* \* ." *Strain v. Issacs (1938)*, 59 Ohio App. 495, 514. A court's authority to take judicial notice of a radar device's reliability when a patrol car is in a stationary position has long been established in Ohio. Specifically, the Supreme Court of Ohio has held that a court may take judicial notice of the construction/scientific reliability and the method of operation in all cases involving stationary, Doppler effect radar devices. *East Cleveland v. Ferrell (1958)*, 168 Ohio St. 298, 303.

During the trial to the court below, Patrolman O'Brien testified that he was running radar [\*4] from a stationary position on the date of the 'citation. This testimony was not contradicted. The trial court, therefore, could properly take judicial notice of the reliability of the KR-10 radar device. Purdy's claim that the trial court failed to judicially notice the reliability of the radar device is not supported by the record. *Evid. R. 201(D)* and (F) state that judicial notice, whether requested or not, may be taken at any stage of the proceeding. Thus, the trial court, in ruling that Purdy was guilty of speeding, may be said to have judicially noticed the reliability of the radar unit. See *State v. Zeh (1982)*, 7 Ohio App. 3d 235, 237; see, also, *State v. Kinker (Mar. 4, 1983)*, Huron App. No. H-82-24, unreported.

[HN2] Once judicial notice is taken as to the construction and reliability of a radar device, the court must further determine that (1) the device is in good condition and properly calibrated, and (2) the operator is one qualified for its use by training and experience. *East Cleveland v. Ferrell, supra*, at 303. The testimony that a machine was properly calibrated does not need to be in the form of expert testimony, but may be from the officer who calibrated [\*5] the unit prior to use. *State v. Doles, supra*, at 39. See, also, *State v. Shelt (1976)*, 46 Ohio App. 2d 115, 118.

The record reflects evidence (the testimony of O'Brien) that O'Brien calibrated his unit when he started his shift and again after the arrest of Purdy. This evidence, plus the certificate of training from the Ohio State Highway Patrol, amply support the conclusion that the radar unit was in good working condition, properly calibrated, and that O'Brien was well qualified to use it.

O'Brien has had approximately four years experience tracking the speed of moving vehicles through the use of radar devices. Two of those years were spent in Fayette, Ohio, running radar on semi-trucks. The officer also produced a certificate of training in the theory, technical aspects, and practical use of traffic radar issued from the Ohio State Highway Patrol, which qualifies him to use radar.

Assuming arguendo that judicial notice had been improper, visual observation, based on the knowledge and expertise of the officer has been held to be a valid means of determining the speed of a vehicle. *Kirtland Hills v. Logan (1984)*, 21 Ohio App. 3d 67, 69; *State v. [\*6] Harkins (Aug. 5, 1987)*, Vinton App. No. 431, unreported.

Thus, O'Brien's visual observation of Purdy's speed, based on O'Brien's knowledge and expertise, would have been enough to support a guilty verdict on the issue of whether Purdy was speeding.

Accordingly, Purdy's first assignment of error is found not well-taken.

In his second assignment of error, Purdy argues that the state failed to establish the elements of the offense of speeding beyond a reasonable doubt. The Wauseon Codified Ordinance Section 333.03(a) [HN3] states:

"No person shall operate a motor vehicle at a speed greater or less than is reasonable or proper having due regard to the traffic, surface and width of the street or highway and any other conditions \* \* \*."

Purdy claims that the city failed to establish that he was operating a motor vehicle, that the violation occurred on May 4, 1988, and that the violation occurred on a public street within the jurisdiction of the court. The record reflects that O'Brien identified Purdy as the driver of the semi-truck, a motor vehicle, and identified the location where the offense occurred, on Shoop Avenue in the city of Wauseon, a public highway. Purdy, himself, identified [\*7] the citation as being the one given to him by the officer. The citation is dated May 4, 1988, the day the violation occurred. The evidence clearly indicates that a reasonable trier of fact could have found the essential elements of the crime of speeding beyond a reasonable doubt. See *State v. Myers (1955)*, 164 Ohio St. 273; see, also, *Kirtland Hills, supra*, at 69. Therefore, upon review, the appellate court should affirm the judgment supported by substantial, competent evidence. *State v. Eley (1978)*, 56 Ohio St. 2d 169.

Accordingly, appellant's second assignment of error is found not well-taken.

On consideration whereof, the court finds that the defendant was not prejudiced or prevented from having a fair trial, and the judgment of the Fulton County Court, Western District, is affirmed. It is ordered that appellant pay the court costs of this appeal.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*. See also Supp. R. 4, amended 1/1/80.

**OPINION:**

**DECISION AND JOURNAL ENTRY**

This case is on appeal from a judgment of the Fulton County Court, Western District, in which appellant, Tim Purdy, was found guilty of speeding in violation of Wauseon Codified Ordinance Section 333.03.

The facts of this case are as follows. On May 4, 1989, at approximately 1:13 p.m., Purdy was driving his semi-truck southbound on Shoop Avenue (Route 108) in the city of Wauseon, Ohio. At that same time, Keith O'Brien, a patrolman for the city of Wauseon, was in a stationary position in Detwiler Manor parking lot, running radar of traffic traveling on Shoop Avenue. The speed limit in this area of Shoop Avenue is thirty-five mph. After visually observing Purdy's truck within the city limits, which O'Brien believed was traveling at a rate of speed in excess of forty-five mph., O'Brien activated the KR-10 radar unit in his patrol car. The radar recorded a reading of fifty-two m.p.h. O'Brien [\*2] then placed the radar on hold, entered Shoop Avenue, turned on his emergency lights and pursued the truck. After activating all three stages of the siren and maneuvering his patrol car in and out of the other lane of traffic to get the truck driver's attention, the truck finally stopped. Purdy, the driver of the truck, was charged with violating Wauseon City Ordinances Section 333.03(a), exceeding the speed limit and Section 303.01(b), fleeing.

On June 27, 1988, in a bench trial, the court found the defendant not guilty of fleeing and delayed the decision on the charge of speeding until the status of the law on the KR-10 radar's reliability could be determined. On August 8, 1988, Purdy was found guilty of speeding.

It is from the judgment entry of August 8, 1988, that Purdy raises the following two assignments of error:

"I. THE TRIAL COURT ERRED IN FINDING THE DEFENDANT GUILTY OF SPEEDING WHERE THE STATE FAILED TO PROVE THROUGH INDEPENDENT EXPERT TESTIMONY THE RELIABILITY OF THE MODEL KR-10 RADAR DEVISE [sic] AS TO THE CONSTRUCTION AND METHOD OF OPERATION.

"II. THE TRIAL COURT ERRED IN FINDING THE DEFENDANT GUILTY OF SPEEDING WHERE THE STATE FAILED TO ESTABLISH THE ELEMENTS OF [\*3] THE OFFENSE BEYOND A REASONABLE DOUBT."

In Purdy's first assignment of error, he contends that the state failed to establish the reliability of the KR-10 radar device and therefore it was error for the court to find him guilty of speeding.

[HN1] The reliability of a radar device may be established through the introduction of expert testimony or by the court taking judicial notice of it. *State v. Doles (1980), 70 Ohio App. 2d 35, 38*. However, in order for the court to take judicial notice of any evidence, the fact must be " \* \* \* commonly accepted as true in the community for which the court sits \* \* \* ." *Strain v. Issacs (1938), 59 Ohio App. 495, 514*. A court's authority to take judicial notice of a radar device's reliability when a patrol car is in a stationary position has long been established in Ohio. Specifically, the Supreme Court of Ohio has held that a court may take judicial notice of the construction/scientific reliability and the method of operation in all cases involving stationary, Doppler effect radar devices. *East Cleveland v. Ferrell (1958), 168 Ohio St. 298, 303*.

During the trial to the court below, Patrolman O'Brien testified that he was running radar [\*4] from a stationary position on the date of the 'citation. This testimony was not contradicted. The trial court, therefore, could properly take judicial notice of the reliability of the KR-10 radar device. Purdy's claim that the trial court failed to judicially notice the reliability of the radar device is not supported by the record. *Evid. R. 201(D)* and (F) state that judicial notice, whether requested or not, may be taken at any stage of the proceeding. Thus, the trial court, in ruling that Purdy was guilty of speeding, may be said to have judicially noticed the reliability of the radar unit. See *State v. Zeh (1982), 7 Ohio App. 3d 235, 237*; see, also, *State v. Kinker (Mar. 4, 1983), Huron App. No. H-82-24, unreported*.

[HN2] Once judicial notice is taken as to the construction and reliability of a radar device, the court must further determine that (1) the device is in good condition and properly calibrated, and (2) the operator is one qualified for its use by training and experience. *East Cleveland v. Ferrell, supra, at 303*. The testimony that a machine was properly calibrated does not need to be in the form of expert testimony, but may be from the officer who calibrated [\*5] the unit prior to use. *State v. Doles, supra, at 39*. See, also, *State v. Shelt (1976), 46 Ohio App. 2d 115, 118*.

The record reflects evidence (the testimony of O'Brien) that O'Brien calibrated his unit when he started his shift and again after the arrest of Purdy. This evidence, plus the certificate of training from the Ohio State Highway Patrol, amply support the conclusion that the radar unit was in good working condition, properly calibrated, and that O'Brien was well qualified to use it.

O'Brien has had approximately four years experience tracking the speed of moving vehicles through the use of radar devices. Two of those years were spent in Fayette, Ohio, running radar on semi-trucks. The officer also produced a certificate of training in the theory, technical aspects, and practical use of traffic radar issued from the Ohio State Highway Patrol, which qualifies him to use radar.

Assuming arguendo that judicial notice had been improper, visual observation, based on the knowledge and expertise of the officer has been held to be a valid means of determining the speed of a vehicle. *Kirtland Hills v. Logan (1984), 21 Ohio App. 3d 67, 69*; *State v. [\*6] Harkins (Aug. 5, 1987), Vinton App. No. 431, unreported*.

Thus, O'Brien's visual observation of Purdy's speed, based on O'Brien's knowledge and expertise, would have been enough to support a guilty verdict on the issue of whether Purdy was speeding.

Accordingly, Purdy's first assignment of error is found not well-taken.

In his second assignment of error, Purdy argues that the state failed to establish the elements of the offense of speeding beyond a reasonable doubt. The Wauseon Codified Ordinance Section 333.03(a) [HN3] states:

"No person shall operate a motor vehicle at a speed greater or less than is reasonable or proper having due regard to the traffic, surface and width of the street or highway and any other conditions \* \* \*."

Purdy claims that the city failed to establish that he was operating a motor vehicle, that the violation occurred on May 4, 1988, and that the violation occurred on a public street within the jurisdiction of the court. The record reflects that O'Brien identified Purdy as the driver of the semi-truck, a motor vehicle, and identified the location where the offense occurred, on Shoop Avenue in the city of Wauseon, a public highway. Purdy, himself, identified [\*7] the citation as being the one given to him by the officer. The citation is dated May 4, 1988, the day the violation occurred. The evidence clearly indicates that a reasonable trier of fact could have found the essential elements of the crime of speeding beyond a reasonable doubt. See *State v. Myers (1955)*, 164 Ohio St. 273; see, also, *Kirtland Hills, supra*, at 69. Therefore, upon review, the appellate court should affirm the judgment supported by substantial, competent evidence. *State v. Eley (1978)*, 56 Ohio St. 2d 169.

Accordingly, appellant's second assignment of error is found not well-taken.

On consideration whereof, the court finds that the defendant was not prejudiced or prevented from having a fair trial, and the judgment of the Fulton County Court, Western District, is affirmed. It is ordered that appellant pay the court costs of this appeal.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*. See also Supp. R. 4, amended 1/1/80.

JUDGMENT AFFIRMED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of a judgment in the Ross County Court of Common Pleas Court, finding defendant guilty of operating a motor vehicle while under the influence of alcohol in violation of *Ohio Rev. Code Ann. § 4511.19(A)(3)*.

**OVERVIEW:** Defendant was convicted of operating a motor vehicle while under the influence of alcohol. The breathalyzer test was conducted in January 28, 1988. At trial, he objected to the admission into evidence of the breathalyzer test results, alleging that the computer printout contained the wrong date for the calibration and breath test. A state trooper testified that he amended the report to reflect the correct year, explaining that, at the beginning of each new year, the year on the breath machine had to be manually changed. The trooper testified that the machine was not mistakenly not manually changed to 1988 until mid-February of 1988. The trial court erred admitted the test results. On appeal, the court concluded that the State presented sufficient evidence to support a finding that the instrument was in proper working order on January 28, 1988 and that the trooper had the qualifications to conduct the test. The court noted that the State presented sufficient evidence to support a finding that the requirements of *Ohio Adm. Code 3701-53-04* and *3701-53-07*, *Ohio Rev. Code Ann. § 3701.143*, and controlling precedent.

**OUTCOME:** The court affirmed the judgment convicting defendant of operating a motor vehicle while under the influence of alcohol.

**CORE TERMS:** machine, breath test, working order, calibration, influence of alcohol, motor vehicle, admitting, recorded, verifier, printout, sufficient evidence to support, assignments of error, computer printout, date of filing, patrol, qualifications, administered, calibrated, manually, noticed, arrest, breath, drift, mile

**OPINION:****DECISION & JUDGMENT ENTRY**

This is an appeal from a judgment of the Ross County Common Pleas Court, finding Roger Rinehart guilty of operating a motor vehicle while under the influence of alcohol in violation of *R.C. 4511.19(A)(3)*.

The record reveals the following facts. At approximately 2:30 a.m. on January 28, 1988, Trooper James Fisher of the Chillicothe post of the state Highway Patrol, observed Rinehart's motor vehicle northbound on State Route 159. Trooper Fisher's radar device indicated that Rinehart was travelling fifty-five miles per hour in a forty-five mile per hour zone.

Trooper Fisher followed Rinehart and observed his vehicle drift left of the center line at a traffic light and, after acceleration, drift right to the edge of the roadway. Rinehart pulled into a restaurant parking lot. Trooper Fisher followed and asked Rinehart for his driver's license. Trooper Fisher noticed an odor of alcohol. Rinehart failed to satisfactorily [\*2] perform field coordination tests. He was placed under arrest for driving under the influence of alcohol and taken to the patrol post. Rinehart was given a breath test at 2:55 a.m. According to the computer printout of the breath test on the BAC verifier, Rinehart tested .174 grams by weight of alcohol per 210 liters of breath.

At trial, Rinehart objected to the admission into evidence of the test results. Rinehart alleged that the computer printout contained the wrong date for the calibration and breath test. The computer printouts indicate that the machine was calibrated on January 23, 1988 and the test administered on January 28, 1987. The actual dates were January 23, 1988 and January 28, 1988. The January 23, 1988 date had been hand changed from 1987 to 1988.

Trooper Fisher testified that he "emended" (sic) the report to reflect the correct year. Trooper Fisher explained that at the beginning of each new year, the year on the breath machine must be manually changed. According to Trooper Fisher, 1987 was not manually changed to 1988 until mid-February of 1988 when he noticed the error. Trooper Fisher testified that he then altered every test report form that had the incorrect [\*3] year.

Rinehart was convicted of operating a motor vehicle while under the influence of alcohol. Rinehart has filed a timely notice of appeal to this court.

#### "FIRST ASSIGNMENT OF ERROR

The trial court erred in admitting the results of the defendant's breath test where the state violated *Ohio Adm. Code 3701-53-04*, *3701-53-07*, and *Ohio Revised Code Section 3701.143*."

Rinehart argues that the failure to correct the year on the instrument creates a presumption that the operator has not been careful in maintaining the equipment in violation of *Ohio Adm. Code 3701-53-04* and *3701-53-07*, and *R. C. 3701.143*.

The second paragraph of the syllabus of *City of Cincinnati v. Sands (1975)*, *43 Ohio St. 2d 79* provides, as follows:

[HN1] "The results of a Breathalyzer test, administered pursuant to *R.C. 4511.19*, may only be admitted in evidence upon the affirmative establishment of facts supporting the following conditions:

- a. The bodily substance must be withdrawn within two hours of the time of such alleged violation.
- b. Such bodily substance shall be analyzed in accordance with methods approved by the Director of Health.
- c. The analyses shall be conducted by qualified individuals [\*4] holding permits issued by the Director of Health pursuant to *R.C. 3701.143*."

The test was performed within two hours of the time of Rinehart's arrest. The solution was not used for more than three months after the date of the first use. The results of the calibration check were recorded and retained. Trooper Fisher care for and maintained the instrument and performed the calibration checks. The state presented sufficient evidence to support a finding that the requirements of *Ohio Adm. Code 3701-53-04* and *3701-53-07*, *R.C. 3701.143*, and the first paragraph of the syllabus of *Sands, supra* were met.

Appellant's first assignment of error is overruled. Appellant's second and third assignments of error are related and will be jointly addressed.

#### "SECOND ASSIGNMENT OF ERROR

The trial court committed reversible error in admitting the results of appellant's breath test where complete and substantial compliance is required."

#### "THIRD ASSIGNMENT OF ERROR

The trial court erred in admitting a copy of the BAC verifier printout when data contained therein was erroneous and consequently the state failed to prove the BAC verifier was in proper working order."

Rinehart argues that the [\*5] failure to correct the year on the instrument creates a presumption that the machine was not in proper working order.

The sixth paragraph of the syllabus of *Mentor v. Giordano* (1975), 9 Ohio St. 2d 140 states:

[HN2] "Before the results of a Breathalyzer test given an accused are admissible in evidence against him, it is incumbent upon the state to show that the instrument was in proper working order and that its manipulator had the qualifications to conduct the test."

See also, *City of Cincinnati, supra*.

Trooper Fisher testified that he had been employed by the state highway patrol for ten and one-half years. He testified that he was qualified to operate the machine. Trooper Fisher's senior operator's permit was admitted into evidence. He testified that he properly calibrated the machine on January 23, 1988. The results of the calibration were recorded and retained. Trooper Fisher stated that the machine was in good operating order on January 28, 1988, that he properly administered the test in accordance with the regulations of the Ohio Department of Health, and that the machine was in good operating order after the test. The results of the test were recorded and [\*6] retained. Trooper Fisher gave a detailed, plausible explanation of how the error in the year occurred.

We note that the appellant's argument falls of its own weight. He argues the officer's making the handwritten correction of the wrong date is evidence of sloppy work. It is just the opposite. It is proof that the testing officer carefully checked and caught the machine's error, and did not accept the printout without first checking it for accuracy.

The state presented sufficient evidence to support a finding that the instrument was in proper working order on January 28, 1988 and that Trooper Fisher had the qualifications to conduct the test.

Appellant's second and third assignments of error are overruled and the decision of the common pleas court is affirmed.

It is ordered that appellee recover of appellant costs herein taxed.

The court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Ross County Common Pleas Court to carry this judgment into execution.

Any stay previously granted by this Court is hereby terminated as of the date of filing of this Entry.

A certified copy of this entry shall constitute [\*7] the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*. Exceptions.

#### NOTICE TO COUNSEL

Pursuant to Local Rule No. 9, this document constitutes a final judgment entry and the time period for further appeal commences from the date of filing with the clerk.

**OPINION:****DECISION & JUDGMENT ENTRY**

This is an appeal from a judgment of the Ross County Common Pleas Court, finding Roger Rinehart guilty of operating a motor vehicle while under the influence of alcohol in violation of *R.C. 4511.19(A)(3)*.

The record reveals the following facts. At approximately 2:30 a.m. on January 28, 1988, Trooper James Fisher of the Chillicothe post of the state Highway Patrol, observed Rinehart's motor vehicle northbound on State Route 159. Trooper Fisher's radar device indicated that Rinehart was travelling fifty-five miles per hour in a forty-five mile per hour zone.

Trooper Fisher followed Rinehart and observed his vehicle drift left of the center line at a traffic light and, after acceleration, drift right to the edge of the roadway. Rinehart pulled into a restaurant parking lot. Trooper Fisher followed and asked Rinehart for his driver's license. Trooper Fisher noticed an odor of alcohol. Rinehart failed to satisfactorily [\*2] perform field coordination tests. He was placed under arrest for driving under the influence of alcohol and taken to the patrol post. Rinehart was given a breath test at 2:55 a.m. According to the computer printout of the breath test on the BAC verifier, Rinehart tested .174 grams by weight of alcohol per 210 liters of breath.

At trial, Rinehart objected to the admission into evidence of the test results. Rinehart alleged that the computer printout contained the wrong date for the calibration and breath test. The computer printouts indicate that the machine was calibrated on January 23, 1988 and the test administered on January 28, 1987. The actual dates were January 23, 1988 and January 28, 1988. The January 23, 1988 date had been hand changed from 1987 to 1988.

Trooper Fisher testified that he "emended" (sic) the report to reflect the correct year. Trooper Fisher explained that at the beginning of each new year, the year on the breath machine must be manually changed. According to Trooper Fisher, 1987 was not manually changed to 1988 until mid-February of 1988 when he noticed the error. Trooper Fisher testified that he then altered every test report form that had the incorrect [\*3] year.

Rinehart was convicted of operating a motor vehicle while under the influence of alcohol. Rinehart has filed a timely notice of appeal to this court.

#### "FIRST ASSIGNMENT OF ERROR

The trial court erred in admitting the results of the defendant's breath test where the state violated *Ohio Adm. Code 3701-53-04*, *3701-53-07*, and *Ohio Revised Code Section 3701.143*."

Rinehart argues that the failure to correct the year on the instrument creates a presumption that the operator has not been careful in maintaining the equipment in violation of *Ohio Adm. Code 3701-53-04* and *3701-53-07*, and *R. C. 3701.143*.

The second paragraph of the syllabus of *City of Cincinnati v. Sands (1975)*, *43 Ohio St. 2d 79* provides, as follows:

[HN1] "The results of a Breathalyzer test, administered pursuant to *R.C. 4511.19*, may only be admitted in evidence upon the affirmative establishment of facts supporting the following conditions:

- a. The bodily substance must be withdrawn within two hours of the time of such alleged violation.
- b. Such bodily substance shall be analyzed in accordance with methods approved by the Director of Health.
- c. The analyses shall be conducted by qualified individuals [\*4] holding permits issued by the Director of Health pursuant to *R.C. 3701.143*."

The test was performed within two hours of the time of Rinehart's arrest. The solution was not used for more than three months after the date of the first use. The results of the calibration check were recorded and retained. Trooper Fisher care for and maintained the instrument and performed the calibration checks. The state presented sufficient evidence to support a finding that the requirements of *Ohio Adm. Code 3701-53-04* and *3701-53-07*, *R.C. 3701.143*, and the first paragraph of the syllabus of *Sands, supra* were met.

Appellant's first assignment of error is overruled. Appellant's second and third assignments of error are related and will be jointly addressed.

#### "SECOND ASSIGNMENT OF ERROR

The trial court committed reversible error in admitting the results of appellant's breath test where complete and substantial compliance is required."

#### "THIRD ASSIGNMENT OF ERROR

The trial court erred in admitting a copy of the BAC verifier printout when data contained therein was erroneous and consequently the state failed to prove the BAC verifier was in proper working order."

Rinehart argues that the [\*5] failure to correct the year on the instrument creates a presumption that the machine was not in proper working order.

The sixth paragraph of the syllabus of *Mentor v. Giordano* (1975), 9 Ohio St. 2d 140 states:

[HN2] "Before the results of a Breathalyzer test given an accused are admissible in evidence against him, it is incumbent upon the state to show that the instrument was in proper working order and that its manipulator had the qualifications to conduct the test."

See also, *City of Cincinnati, supra*.

Trooper Fisher testified that he had been employed by the state highway patrol for ten and one-half years. He testified that he was qualified to operate the machine. Trooper Fisher's senior operator's permit was admitted into evidence. He testified that he properly calibrated the machine on January 23, 1988. The results of the calibration were recorded and retained. Trooper Fisher stated that the machine was in good operating order on January 28, 1988, that he properly administered the test in accordance with the regulations of the Ohio Department of Health, and that the machine was in good operating order after the test. The results of the test were recorded and [\*6] retained. Trooper Fisher gave a detailed, plausible explanation of how the error in the year occurred.

We note that the appellant's argument falls of its own weight. He argues the officer's making the handwritten correction of the wrong date is evidence of sloppy work. It is just the opposite. It is proof that the testing officer carefully checked and caught the machine's error, and did not accept the printout without first checking it for accuracy.

The state presented sufficient evidence to support a finding that the instrument was in proper working order on January 28, 1988 and that Trooper Fisher had the qualifications to conduct the test.

Appellant's second and third assignments of error are overruled and the decision of the common pleas court is affirmed.

It is ordered that appellee recover of appellant costs herein taxed.

The court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Ross County Common Pleas Court to carry this judgment into execution.

Any stay previously granted by this Court is hereby terminated as of the date of filing of this Entry.

A certified copy of this entry shall constitute [\*7] the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*. Exceptions.

#### NOTICE TO COUNSEL

Pursuant to Local Rule No. 9, this document constitutes a final judgment entry and the time period for further appeal commences from the date of filing with the clerk.

Analysis

As of: Jan 31, 2007

**STATE OF OHIO, Plaintiff-Appellee v. KERIC J. SHIEPIS,  
Defendant-Appellant**

**Case No. CA-7895**

**Court of Appeals of Ohio, Fifth Appellate District, Stark County**

*1989 Ohio App. LEXIS 4844*

**December 26, 1989, Decided**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDING: Criminal Appeal from the Canton Municipal Court, Case No. 89-TRC-2289.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Canton Municipal Court, Stark County (Ohio), which convicted him of driving under the influence of alcohol in violation of *Ohio Rev. Code Ann. § 4511.19(A)(1)*.

**OVERVIEW:** Defendant's BAC verifier analysis results registered a .13 alcohol concentration level. He filed a motion to suppress the results. The trial court overruled the motion, holding that violations of regulations promulgated by the Ohio Director of Health in DUI cases did not rise to a constitutional level and were thus not bases for pretrial suppression hearings. On appeal, the court reversed. The court agreed with defendant's contention that the State failed to prove that the BAC verifier was properly calibrated and that the calibration solution was maintained in accordance with methods approved by the Director. The court noted that the trial court was not at liberty to disregard the suppression rules that were promulgated by the Ohio Supreme Court. The trial court erred as a matter of law by finding that violations of the regulations promulgated by the Director in DUI cases were not bases for pretrial suppression hearings.

**OUTCOME:** The court reversed the judgment of conviction and remanded the cause.

**CORE TERMS:** verifier, administered, motion to suppress, suppression hearing, admissibility, breath, regulations promulgated, suppression, contest, arresting officer, assignment of error, influence of alcohol, probable cause, speed, assignments of error, overruling, pretrial, alcohol concentration, motor vehicle, initial stop, breath test, cross-examine, particularity, questioned, attacking, arrested, driving, shotgun, twice, mile

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

[HN1] The identity of the accused must be established beyond a reasonable doubt to warrant a conviction. The rule does not require the State to establish the identity of the accused at a suppression hearing, but only requires such at trial in order to convict.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN2] An attack on the admissibility of BAC verifier test results is properly raised in a defendant's pre-trial motion to suppress.

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

***Criminal Law & Procedure > Appeals > Reviewability > Waiver > Admission of Evidence***

[HN3] Pursuant to *Ohio R. Crim. P. 12(B)(3)*, any defense, objection, or request which is capable of determination without the trial of the general issue may be raised before trial by motion. Motions to suppress evidence must be raised before trial. Otherwise, failure to raise such motions will constitute a waiver by the defendant of his right to object to the admission of such evidence. Nothing in the criminal rules limits those motions to constitutional issues.

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

***Criminal Law & Procedure > Guilty Pleas > No Contest Pleas***

***Criminal Law & Procedure > Trials > Entry of Judgments***

[HN4] *Ohio R. Crim. P. 12(H)* provides that the plea of no contest does not preclude a defendant from asserting upon appeal that the trial court prejudicially erred in ruling on a pretrial motion to suppress evidence.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

***Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

[HN5] In order to avoid the suppression of BAC results, the State has the burden of showing that the test was done in accordance with established law to the extent that the defendant takes issue with the legality of the test.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

***Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

[HN6] Where defendant, in his motion to suppress, generally questions the accuracy of a BAC test, pursuant to *Ohio Rev. Code Ann. § 4511.19(B)* the State must clearly establish that said BAC verifier test was administered in accordance with the standards established by the Director of Health under *Ohio Rev. Code Ann. § 3701.143*.

**OPINION BY:**

GWIN

**OPINION:**

OPINION

W. SCOTT GWIN, J.

On March 26, 1989, defendant-appellant, Keric J. Shiepis (appellant), was arrested by Trooper Robin L. Stotzer of the Ohio State Highway Patrol. Appellant's BAC verifier analysis results registered a .13 alcohol concentration level. Subsequently, appellant was charged with driving under the influence of alcohol or drugs in violation of *R.C. 4511.19(A)(1)* and operating a motor vehicle with an alcohol concentration of ten-hundredths of one gram or more per two hundred ten liters of his breath in violation of *R.C. 4511.19(A)(3)*.

Before trial, appellant filed a timely motion to suppress the results of the BAC verifier analysis. On May 12, 1989, a hearing was held on appellant's motion and the trial court, in its judgment entry filed May 16, held:

. . . the basic legal principle that violations of [\*2] regulations promulgated by the Ohio Director of Health in DUI cases do not rise to a constitutional level and are not thus bases for pretrial suppression hearings.

On May 23, 1989, appellant changed his plea to no contest and the trial court found appellant guilty on one count of DUI.

Appellant now seeks our review and raises the following assignments of error:

**ASSIGNMENT OF ERROR NO. I**

THE TRIAL COURT ERRED IN OVERRULING THE APPELLANT'S MOTION TO SUPPRESS THE RESULTS OF HIS BREATH ALCOHOL TEST BECAUSE THE STATE FAILED TO IDENTIFY APPELLANT AS THE INDIVIDUAL TESTED.

**ASSIGNMENT OF ERROR NO. II**

THE TRIAL COURT ERRED IN OVERRULING THE APPELLANT'S MOTION TO SUPPRESS THE RESULTS OF HIS BREATH ALCOHOL TEST BECAUSE THE STATE FAILED TO PROVE THAT THE BAC VERIFIER USED TO ADMINISTER THE TEST WAS CALIBRATED IN ACCORDANCE WITH METHODS APPROVED BY THE OHIO DIRECTOR OF HEALTH.

**ASSIGNMENT OF ERROR NO. III**

THE TRIAL COURT ERRED IN OVERRULING THE APPELLANT'S MOTION TO SUPPRESS THE RESULTS OF HIS BREATH ALCOHOL TEST BECAUSE THE STATE FAILED TO PROVE THE CALIBRATION SOLUTION WAS MAINTAINED IN ACCORDANCE WITH METHODS APPROVED BY THE OHIO DIRECTOR OF HEALTH.

In his first assignment, appellant [\*3] asserts that because the State failed to prove appellant's identity at the suppression hearing, the trial court erred in overruling appellant's motion to suppress the BAC results. In support of this assertion, appellant relies on the case of *State v. Scott (1965)*, 3 Ohio App.2d 239, 32 O.O.2d 360.

Appellant's reliance is misplaced. The rule set out in *Scott* states that [HN1] the identity of the accused must be established beyond a reasonable doubt to warrant a conviction.

Clearly, the above rule does not require the State to establish the identity of the accused at a suppression hearing, but only requires such at trial in order to convict.

Accordingly, appellant's first assignment of error is hereby overruled.

## II & III

In his second and third assignments, appellant claims that the trial court erred in overruling appellant's motion to suppress the BAC results because the State failed to prove that the BAC verifier was properly calibrated and that the calibration solution was maintained in accordance with methods approved by the Ohio Director of Health. We agree.

It has been repeatedly held that [HN2] an attack on the admissibility of BAC verifier test results is properly raised in a defendant's [\*4] pre-trial motion to suppress. *City of Delaware v. Porteus* (April 14, 1989), Delaware App. No. 88-CA-19, unreported; *State v. Rafter (1985)*, 26 Ohio App.3d 39, 40.

[HN3] Pursuant to *Crim. R. 12(B)(3)*, which codifies the rule set out in syllabus one of *State v. Davis (1964)*, 1 Ohio St.2d 28:

Any defense, objection, or request which is capable of determination without the trial of the general issue may be raised before trial by motion. The following must be raised before trial:

...

(3) Motions to suppress evidence . . .

(Emphasis added).

Otherwise, failure to raise such motions will constitute a waiver by the defendant of his right to object to the admission of such evidence. Nothing in the criminal rules limits those motions to constitutional issues.

Furthermore, *Crim. R. (12)(H)* [HN4] provides that "[t]he plea of no contest does not preclude a defendant from asserting upon appeal that the trial court prejudicially erred in ruling on a . . . pretrial motion to suppress evidence."

Here, the trial court stated, in its judgment entry, that ". . . courts of appeals are permitting motions to suppress where issues are statutory or involve administrative procedure." However, [\*5] the trial court continues, such motions are "wasteful of the court's resources. . . ."

We note that the suppression rules discussed above were promulgated by the Ohio Supreme Court. The trial court is not at liberty to disregard them.

In practice, they promote judicial economy. The great bulk of DUI cases ends with the determination of the issue of the admissibility of the chemical test, and this is accomplished by a motion to suppress without a comprehensive trial of all other issues. See *State v. Hennessee (1984)*, 13 Ohio App.3d 436.

Therefore, the trial court erred as a matter of law in its judgment finding that violations of regulations promulgated

by the Ohio Director of Health in DUI cases are not bases for pretrial suppression hearings.

[HN5] In order to avoid the suppression of the BAC results, the State has the burden of showing "that the test was done in accordance with established law to the extent that the defendant takes issue with the legality of the test." *State v. Gasser (1980)*, 5 Ohio App.3d 217, 19. In the case sub judice, the record clearly establishes that appellant, [HN6] in his motion to suppress, generally questioned the accuracy of the test. n1 Therefore, pursuant [\*6] to R.C. 4511.19(B) the State must clearly establish that said BAC verifier test was administered in accordance with the standards established by the Director of Health under R.C. 3701.143. *Cincinnati v. Sand (1975)*, 43 Ohio St.2d 79, 86.

n1 We are well aware of the "shotgun" approach in attacking the admissibility of the BAC verifier test results on the grounds of noncompliance with the regulations promulgated by the Ohio Director of Health. However, the trial court has at its disposal *Crim. R. 47* which requires all motions to "state with particularity the grounds upon which it is made. . . ." Instead of the trial court here requiring appellant to file a motion in compliance with *Crim. R. 47*, it erroneously found that motions to suppress are the improper avenue to attack the admissibility of BAC verifier test results.

There is no such evidence in this record, and therefore the trial court erred in overruling appellant's motion to suppress the results of the BAC verifier test.

Accordingly, appellant's second and third assignments of error are hereby sustained and the judgment of the Canton Municipal Court, Stark County, Ohio, is hereby reversed.

**DISSENT BY:**

HOFFMAN

**DISSENT:** HOFFMAN, J. - Dissenting [\*7]

I dissent. The judgment of the trial court must be affirmed.

An appellate court's examination of the trial court record should be limited to a determination as to whether or not the evidence presented which if believed would convince the average mind of the defendant's guilt beyond a reasonable doubt. *Atkins v. State (1926)*, 115 Ohio St. 542, 546, and *State v. Sorgee (1978)*, 54 Ohio St.2d 464, 465.

In this case, the defendant was charged with operating a motor vehicle while under the influence of alcohol in violation of both§ O R.C. 4511.19(A)(1) and R.C. 4511.19(A)(3). Appellant was found guilty of violation of both§ O R.C. 4511.19(A)(1) and R.C. 4511.19(A)(3) after pleading no contest to the charges.

It is self evident from the sole undisputed testimony of the arresting officer and the finding of the trial court (as a result of the suppression hearing on May 12, 1989) that the arresting officer had probable cause for the initial stop of the appellant after observing appellant driving at a speed of seventy miles per hour and twice off the road onto the berm one or two feet.

Q. Okay, please describe to the Court the circumstances of that traffic stop.

A. I was behind [\*8] a '88 Mazda that was travelling from Everhard Road, southbound on 77 at a high rate of speed. I continued to follow the car; I paced it at 70 mile an hour. Also I checked with the radar, the speed and it also said seventy mile an hour. It was consistently seventy mile an hour. He also drove onto the berm, one to two foot, twice. I then . . .

Suppression Hearing, T.9, 10.

It is further self evident from the testimony of the arresting officer and the findings of fact of the trial court that the arresting officer had probable cause to allow a breath analysis test to be administered to appellant after the initial stop. When questioned as to what happened after he stopped the appellant, the officer testified:

A. I arrived at the driver's window, he rolled the window down. I advised him that, why I had stopped him and I asked him if he had been drinking. He stated, no, he had not been drinking. I could then smell a strong odor of an alcoholic beverage on his breath. I could see bloodshot eyes on his eyes. And he looked intoxicated.

T.10.

The officer further testified that after asking appellant for his driver's license which appellant had difficulty producing, the officer gave him [\*9] the gaze nystagmus while appellant was still sitting in the car and which indicated that he would test over .10%.

The officer then proceeded to have appellant perform some coordination tests:

Q. And did you, did you administer these tests?

A. Yes, I did. I administered the walk-and-turn skills; he had difficulty doing them. He had difficulty with his balance, he was swaying, he had to sidestep to catch his balance, he staggered. I had to tell him out loud to count three times, out loud. I also had to tell him to wait until I had explained all the instructions before he started. I had to tell him that a couple times. He had very much difficulty doing the tests. It was obvious he was under the influence of alcohol. I then gave him the gaze and nystagmus again outside the car. He scored a total of six out of a possible six. I then arrested him for DUI, Mirandized him, took him out to the Stark County Sheriff's Office.

T.11, 12. (Emphasis added).

At this point, it is essential to note that whatever the outcome as to the validity of the subsequent breath test administered to appellant (which applies only to *R.C. 4511.19(A)(3)*) probable cause to charge appellant with violation [\*10] of *R.C. 4511.19(A)(1)* was established at the suppression hearing. Appellant's subsequent "no contest" plea to the court prior to the scheduled trial on May 23, 1989, was made to both *R.C. 4511.19(A)(1)* and *R.C. 4511.19(A)(3)*.

" *R.C. 4511.19(A)(1)*, (2), (3), and (4) create separate offenses, i.e., the statute describes these offenses in the disjunctive." *State v. Wilcox (1983)*, 10 Ohio App.3d 11, syllabus 2.

The effect of a plea of "no contest" under *Crim. R. 12* is to admit all the facts alleged in the charging instrument.

Accordingly, none of the assignments of error as to the violation of *R.C. 4511.19(A)(1)* should be well taken and each is overruled by reason that none is affirmatively demonstrated by the record.

In addition to appellant's failure to affirmatively demonstrate error upon the part of the trial court in finding him guilty of the violation of *R.C. 4511.19(A)(1)*, I must also dissent from the majority's opinion as to the adequacy of the State's proof that the breath analysis test was not conducted in accordance with the Department of Health Regulations listed in the Ohio Administrative Code.

From the record, it is clear that that portion of appellant's motion to suppress [\*11] which challenges the proper administration of the breath alcohol test lacks the specificity required by *Crim. R. 47* to do so. The motion does not state with particularity the grounds upon which it is made nor does it support said challenge by memorandum containing citations of authority or affidavit. The transcript of the record made at the suppression hearing clearly demonstrates that appellant did use a "shotgun" approach in attacking the admissibility of the BAC verifier test and, in fact, failed to challenge the testimony of the officer who administered the test by electing not to cross-examine the officer after he had

testified to his competency to administer the test and that the test on the appellant was administered in accord with the rules and regulations as promulgated by the Ohio Department of Health.

Upon conclusion of the State's examination of the officer, appellant elected not to cross-examine the officer, thus leaving his testimony unchallenged.

I agree most wholeheartedly with the majority's opinion that the trial court erred in its finding "that violations of regulations promulgated by the Ohio Director of Health in DUI cases are no basis for pretrial suppression [\*12] hearings." Majority Opinion, p.4. However, from the state of the record, I cannot agree with the majority opinion that the State did not meet its burden of proof in establishing that the breath test administered to the appellant was not in accord with the regulations promulgated by the Ohio Department of Health.

The judgment of the trial court should be affirmed in its entirety.

#### JUDGMENT ENTRY

For the reasons stated in the Memorandum-Opinion on file, and pursuant to *App. R. 12(C)*, final judgment of acquittal is hereby entered.

**OPINION BY:**

GWIN

**OPINION:**

OPINION

W. SCOTT GWIN, J.

On March 26, 1989, defendant-appellant, Keric J. Shiepis (appellant), was arrested by Trooper Robin L. Stotzer of the Ohio State Highway Patrol. Appellant's BAC verifier analysis results registered a .13 alcohol concentration level. Subsequently, appellant was charged with driving under the influence of alcohol or drugs in violation of *R.C. 4511.19(A)(1)* and operating a motor vehicle with an alcohol concentration of ten-hundredths of one gram or more per two hundred ten liters of his breath in violation of *R.C. 4511.19(A)(3)*.

Before trial, appellant filed a timely motion to suppress the results of the BAC verifier analysis. On May 12, 1989, a hearing was held on appellant's motion and the trial court, in its judgment entry filed May 16, held:

. . . the basic legal principle that violations of [\*2] regulations promulgated by the Ohio Director of Health in DUI cases do not rise to a constitutional level and are not thus bases for pretrial suppression hearings.

On May 23, 1989, appellant changed his plea to no contest and the trial court found appellant guilty on one count of DUI.

Appellant now seeks our review and raises the following assignments of error:

ASSIGNMENT OF ERROR NO. I

THE TRIAL COURT ERRED IN OVERRULING THE APPELLANT'S MOTION TO SUPPRESS THE RESULTS OF HIS BREATH ALCOHOL TEST BECAUSE THE STATE FAILED TO IDENTIFY APPELLANT AS THE INDIVIDUAL TESTED.

ASSIGNMENT OF ERROR NO. II

THE TRIAL COURT ERRED IN OVERRULING THE APPELLANT'S MOTION TO SUPPRESS THE RESULTS OF HIS BREATH ALCOHOL TEST BECAUSE THE STATE FAILED TO PROVE THAT THE BAC VERIFIER USED TO ADMINISTER THE TEST WAS CALIBRATED IN ACCORDANCE WITH METHODS APPROVED BY THE OHIO DIRECTOR OF HEALTH.

ASSIGNMENT OF ERROR NO. III

THE TRIAL COURT ERRED IN OVERRULING THE APPELLANT'S MOTION TO SUPPRESS THE RESULTS OF HIS BREATH ALCOHOL TEST BECAUSE THE STATE FAILED TO PROVE THE CALIBRATION SOLUTION WAS MAINTAINED IN ACCORDANCE WITH METHODS APPROVED BY THE OHIO DIRECTOR OF HEALTH.

In his first assignment, appellant [\*3] asserts that because the State failed to prove appellant's identity at the suppression hearing, the trial court erred in overruling appellant's motion to suppress the BAC results. In support of this assertion, appellant relies on the case of *State v. Scott (1965)*, 3 Ohio App.2d 239, 32 O.O.2d 360.

Appellant's reliance is misplaced. The rule set out in *Scott* states that [HN1] the identity of the accused must be established beyond a reasonable doubt to warrant a conviction.

Clearly, the above rule does not require the State to establish the identity of the accused at a suppression hearing, but only requires such at trial in order to convict.

Accordingly, appellant's first assignment of error is hereby overruled.

## II & III

In his second and third assignments, appellant claims that the trial court erred in overruling appellant's motion to suppress the BAC results because the State failed to prove that the BAC verifier was properly calibrated and that the calibration solution was maintained in accordance with methods approved by the Ohio Director of Health. We agree.

It has been repeatedly held that [HN2] an attack on the admissibility of BAC verifier test results is properly raised in a defendant's [\*4] pre-trial motion to suppress. *City of Delaware v. Porteus* (April 14, 1989), Delaware App. No. 88-CA-19, unreported; *State v. Rafter (1985)*, 26 Ohio App.3d 39, 40.

[HN3] Pursuant to *Crim. R. 12(B)(3)*, which codifies the rule set out in syllabus one of *State v. Davis (1964)*, 1 Ohio St.2d 28:

Any defense, objection, or request which is capable of determination without the trial of the general issue may be raised before trial by motion. The following must be raised before trial:

...

(3) Motions to suppress evidence . . .

(Emphasis added).

Otherwise, failure to raise such motions will constitute a waiver by the defendant of his right to object to the admission of such evidence. Nothing in the criminal rules limits those motions to constitutional issues.

Furthermore, *Crim. R. (12)(H)* [HN4] provides that "[t]he plea of no contest does not preclude a defendant from asserting upon appeal that the trial court prejudicially erred in ruling on a . . . pretrial motion to suppress evidence."

Here, the trial court stated, in its judgment entry, that ". . . courts of appeals are permitting motions to suppress where issues are statutory or involve administrative procedure." However, [\*5] the trial court continues, such motions are "wasteful of the court's resources. . . ."

We note that the suppression rules discussed above were promulgated by the Ohio Supreme Court. The trial court is not at liberty to disregard them.

In practice, they promote judicial economy. The great bulk of DUI cases ends with the determination of the issue of the admissibility of the chemical test, and this is accomplished by a motion to suppress without a comprehensive trial of all other issues. See *State v. Hennessee (1984)*, 13 Ohio App.3d 436.

Therefore, the trial court erred as a matter of law in its judgment finding that violations of regulations promulgated

by the Ohio Director of Health in DUI cases are not bases for pretrial suppression hearings.

[HN5] In order to avoid the suppression of the BAC results, the State has the burden of showing "that the test was done in accordance with established law to the extent that the defendant takes issue with the legality of the test." *State v. Gasser (1980)*, 5 Ohio App.3d 217, 19. In the case sub judice, the record clearly establishes that appellant, [HN6] in his motion to suppress, generally questioned the accuracy of the test. n1 Therefore, pursuant [\*6] to R.C. 4511.19(B) the State must clearly establish that said BAC verifier test was administered in accordance with the standards established by the Director of Health under R.C. 3701.143. *Cincinnati v. Sand (1975)*, 43 Ohio St.2d 79, 86.

n1 We are well aware of the "shotgun" approach in attacking the admissibility of the BAC verifier test results on the grounds of noncompliance with the regulations promulgated by the Ohio Director of Health. However, the trial court has at its disposal *Crim. R. 47* which requires all motions to "state with particularity the grounds upon which it is made. . . ." Instead of the trial court here requiring appellant to file a motion in compliance with *Crim. R. 47*, it erroneously found that motions to suppress are the improper avenue to attack the admissibility of BAC verifier test results.

There is no such evidence in this record, and therefore the trial court erred in overruling appellant's motion to suppress the results of the BAC verifier test.

Accordingly, appellant's second and third assignments of error are hereby sustained and the judgment of the Canton Municipal Court, Stark County, Ohio, is hereby reversed.

**DISSENT BY:**

HOFFMAN

**DISSENT:** HOFFMAN, J. - Dissenting [\*7]

I dissent. The judgment of the trial court must be affirmed.

An appellate court's examination of the trial court record should be limited to a determination as to whether or not the evidence presented which if believed would convince the average mind of the defendant's guilt beyond a reasonable doubt. *Atkins v. State (1926)*, 115 Ohio St. 542, 546, and *State v. Sorgee (1978)*, 54 Ohio St.2d 464, 465.

In this case, the defendant was charged with operating a motor vehicle while under the influence of alcohol in violation of both§ O R.C. 4511.19(A)(1) and R.C. 4511.19(A)(3). Appellant was found guilty of violation of both§ O R.C. 4511.19(A)(1) and R.C. 4511.19(A)(3) after pleading no contest to the charges.

It is self evident from the sole undisputed testimony of the arresting officer and the finding of the trial court (as a result of the suppression hearing on May 12, 1989) that the arresting officer had probable cause for the initial stop of the appellant after observing appellant driving at a speed of seventy miles per hour and twice off the road onto the berm one or two feet.

Q. Okay, please describe to the Court the circumstances of that traffic stop.

A. I was behind [\*8] a '88 Mazda that was travelling from Everhard Road, southbound on 77 at a high rate of speed. I continued to follow the car; I paced it at 70 mile an hour. Also I checked with the radar, the speed and it also said seventy mile an hour. It was consistently seventy mile an hour. He also drove onto the berm, one to two foot, twice. I then . . .

Suppression Hearing, T.9, 10.

It is further self evident from the testimony of the arresting officer and the findings of fact of the trial court that the arresting officer had probable cause to allow a breath analysis test to be administered to appellant after the initial stop. When questioned as to what happened after he stopped the appellant, the officer testified:

A. I arrived at the driver's window, he rolled the window down. I advised him that, why I had stopped him and I asked him if he had been drinking. He stated, no, he had not been drinking. I could then smell a strong odor of an alcoholic beverage on his breath. I could see bloodshot eyes on his eyes. And he looked intoxicated.

T.10.

The officer further testified that after asking appellant for his driver's license which appellant had difficulty producing, the officer gave him [\*9] the gaze nystagmus while appellant was still sitting in the car and which indicated that he would test over .10%.

The officer then proceeded to have appellant perform some coordination tests:

Q. And did you, did you administer these tests?

A. Yes, I did. I administered the walk-and-turn skills; he had difficulty doing them. He had difficulty with his balance, he was swaying, he had to sidestep to catch his balance, he staggered. I had to tell him out loud to count three times, out loud. I also had to tell him to wait until I had explained all the instructions before he started. I had to tell him that a couple times. He had very much difficulty doing the tests. It was obvious he was under the influence of alcohol. I then gave him the gaze and nystagmus again outside the car. He scored a total of six out of a possible six. I then arrested him for DUI, Mirandized him, took him out to the Stark County Sheriff's Office.

T.11, 12. (Emphasis added).

At this point, it is essential to note that whatever the outcome as to the validity of the subsequent breath test administered to appellant (which applies only to *R.C. 4511.19(A)(3)*) probable cause to charge appellant with violation [\*10] of *R.C. 4511.19(A)(1)* was established at the suppression hearing. Appellant's subsequent "no contest" plea to the court prior to the scheduled trial on May 23, 1989, was made to both *R.C. 4511.19(A)(1)* and *R.C. 4511.19(A)(3)*.

" *R.C. 4511.19(A)(1)*, (2), (3), and (4) create separate offenses, i.e., the statute describes these offenses in the disjunctive." *State v. Wilcox (1983)*, 10 Ohio App.3d 11, syllabus 2.

The effect of a plea of "no contest" under *Crim. R. 12* is to admit all the facts alleged in the charging instrument.

Accordingly, none of the assignments of error as to the violation of *R.C. 4511.19(A)(1)* should be well taken and each is overruled by reason that none is affirmatively demonstrated by the record.

In addition to appellant's failure to affirmatively demonstrate error upon the part of the trial court in finding him guilty of the violation of *R.C. 4511.19(A)(1)*, I must also dissent from the majority's opinion as to the adequacy of the State's proof that the breath analysis test was not conducted in accordance with the Department of Health Regulations listed in the Ohio Administrative Code.

From the record, it is clear that that portion of appellant's motion to suppress [\*11] which challenges the proper administration of the breath alcohol test lacks the specificity required by *Crim. R. 47* to do so. The motion does not state with particularity the grounds upon which it is made nor does it support said challenge by memorandum containing citations of authority or affidavit. The transcript of the record made at the suppression hearing clearly demonstrates that appellant did use a "shotgun" approach in attacking the admissibility of the BAC verifier test and, in fact, failed to challenge the testimony of the officer who administered the test by electing not to cross-examine the officer after he had

testified to his competency to administer the test and that the test on the appellant was administered in accord with the rules and regulations as promulgated by the Ohio Department of Health.

Upon conclusion of the State's examination of the officer, appellant elected not to cross-examine the officer, thus leaving his testimony unchallenged.

I agree most wholeheartedly with the majority's opinion that the trial court erred in its finding "that violations of regulations promulgated by the Ohio Director of Health in DUI cases are no basis for pretrial suppression [\*12] hearings." Majority Opinion, p.4. However, from the state of the record, I cannot agree with the majority opinion that the State did not meet its burden of proof in establishing that the breath test administered to the appellant was not in accord with the regulations promulgated by the Ohio Department of Health.

The judgment of the trial court should be affirmed in its entirety.

#### JUDGMENT ENTRY

For the reasons stated in the Memorandum-Opinion on file, and pursuant to *App. R. 12(C)*, final judgment of acquittal is hereby entered.

136 of 195 DOCUMENTS

**THE STATE OF OHIO, Plaintiff-Appellee v. CHERILYN A. KNIFE,  
Defendant-Appellant**

Case No. 88 CA 41

Court of Appeals of Ohio, Second Appellate District, Miami County

*1989 Ohio App. LEXIS 3044*

August 2, 1989, Decided

**PRIOR HISTORY:** [\*1]

88-TRD-8239-S-SHER

**DISPOSITION:**

The judgment will be affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed her conviction in the Miami County Municipal Court (Ohio), for speeding in violation of *Ohio Rev. Code Ann. § 4511.21(D)*.

**OVERVIEW:** Defendant was charged with violating § 4511.21, which prohibited driving at a rate of speed in excess of 55 miles per hour. At the trial, a deputy sheriff testified that he observed a silver-colored car traveling at a rather high speed. He stated that he activated his K-55 radar device and that the K-55 read the silver car's speed as 70 miles per hour. The speed limit was 55 miles per hour. Defendant cross-examined the deputy sheriff and offered no other evidence. She appealed her conviction, challenging the accuracy of the K-55 and the qualifications of the deputy sheriff to properly read the K-55. The court held that there was sufficient evidence that the deputy sheriff was qualified to operate the K-55 and that the K-55 was working properly. The court also concluded that defendant's citation was not misleading simply because it failed to state in particular which subsection of § 4511.21 defendant had violated by traveling at 70 miles per hour in a 55 miles per hour speed zone. The court's amendment of the citation to note that she violated subsection (D) of § 4511.21 was proper under *Ohio R. Crim. P. 7(D)*.

**OUTCOME:** The court affirmed defendant's conviction.

**CORE TERMS:** speed, radar, mile, assignment of error, traveling, prima facie, driving, reasonable doubt, qualifications, speedometer, misleading, accuracy, target, patrol, expert testimony, statutory limit, judicial notice, guilt beyond, zone, convince, trier, good operating condition, assignments of error, charging document, failed to prove, speed meter, speed limit, high speed, silver-colored, calibration

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN1] *Ohio Rev. Code Ann. § 4511.21(D)* states, in part, as follows: No person shall operate a motor vehicle, trackless trolley, or streetcar upon a street or highway as follows: (1) At a speed exceeding 55 miles per hour, except upon a freeway as provided in *Ohio Rev. Code Ann. § 4511.21(B)(10)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Testimony > Experts > Criminal Trials***

[HN2] Expert testimony is no longer necessary in cases involving stationary radar units.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Testimony > Experts > Criminal Trials***

[HN3] Readings of a radar speed meter may be accepted in evidence, just as photographs, x-rays, and the like are accepted, without the necessity of offering expert testimony as to the scientific principles underlying them.

***Criminal Law & Procedure > Witnesses > Credibility******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence******Evidence > Procedural Considerations > Weight & Sufficiency***

[HN4] The appellate court will not reverse the judgment of a lower court as being against the weight of the evidence if there is evidence that, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt. Furthermore, the weight to be given the evidence and the credibility of the witnesses are primarily for the trier of the facts.

***Criminal Law & Procedure > Accusatory Instruments > General Overview******Criminal Law & Procedure > Discovery & Inspection > Bills of Particulars***

[HN5] *Ohio R. Crim. P. 7(D)* states, in part, as follows: The court may at any time before, during, or after a trial amend the indictment, information, complaint or bill of particulars, in respect to any defect, imperfection, or omission in form or substance, or of any variance with the evidence, provided no change is made in the name or identity of the crime charged.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN6] What is "reasonable and proper under the circumstances," within the meaning of *Ohio Rev. Code Ann. § 4511.21*, is a question of fact. Where there is sufficient evidence to support a finding of guilty, a conviction will not be set aside.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN7] The single basic requirement of *Ohio Rev. Code Ann. § 4511.21* is that the speed be reasonable under the circumstances existing. The statutory limits for various types of roads or highways furnishes a two pronged presumption affecting the presentation of evidence. A speed in excess of the statutory limit is a prima facie unreasonable speed; a speed at or below that statutory limit is a prima facie reasonable speed. But the ultimate criterion is that the speed be reasonable considering the conditions then existing.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*  
*Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > General Overview*

[HN8] Whether or not a particular speed was reasonable within the meaning of *Ohio Rev. Code Ann. § 4511.21* is essentially a matter for determination by the trier of facts.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements*  
*Criminal Law & Procedure > Appeals > Standards of Review > General Overview*

[HN9] The appellate court's review as to whether a speed of driving was unreasonable for the conditions is limited to a determination of whether there was evidence presented which, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt.

**COUNSEL:**

TONYA K. THIEMAN, Prosecuting Attorney, Miami County Municipal Court, Troy, Ohio, Attorney for Plaintiff-Appellee.

CHERILYN A. KNIFE, 134 McKinley Avenue, West Milton, Ohio, Defendant-Appellant.

**JUDGES:**

WOLFF, P.J., WILSON, J., and GRADY, J., concur.

**OPINION BY:**

WOLFF

**OPINION:**

WOLFF, P.J.

Cherilyn Knife appeals from the Miami County Municipal Court October 18, 1988, journal entry which stated that a trial was held and that Knife was found guilty of violating *R.C. 4511.21(D)*, and which, accordingly, assessed a fine and costs. Section 4511.21(D) [HN1] states, in pertinent part, as follows:

No person shall operate a motor vehicle, trackless trolley, or streetcar upon a street or highway as follows:

(1) At a speed exceeding fifty-five miles per hour, except upon a freeway as provided in division (B)(10) of this section.

At the trial, the state presented testimony by Deputy Sheriff Douglas K. Kirk. Kirk testified that at 7:40 p.m. on September 26, 1988, he observed a silver-colored car traveling westbound on State Route 571 at a "rather high speed." He stated that he activated his K-55 radar device and that the K-55 read the silver car's speed as 70 miles per hour. Kirk [\*2] stated that the speed limit on State Route 571 was 55 miles per hour.

Knife, representing herself, cross-examined Kirk and offered no other evidence.

At the close of the testimony, the court stated:

[This court finds] that the state has shown all those elements they are required to show. Namely, the car was observed before the radar unit was turned on, the Doppler sound was consistent with the speed observed the target window was consistent with the speed observed in the Doppler. The speedometer and the vehicle window were the same and that the officer did not view an incorrect reading, that he has viewed them before and that in his opinion it was a proper reading.

And so the State has shown all the elements as required and therefore would find the Defendant is guilty and will impose a fine of fifteen dollars and costs.

Knife raises four assignments of error in this appeal:

As required by case law in Ohio, the State failed to prove:

(i) that the particular radar unit was properly set up and in good operating condition; (ii) the operator was qualified, both through training and experience, to enable him to properly operate the radar; (iii) and the operator properly read the radar [\*3] unit and identified the target.

The trial court improperly amended the officer's traffic citation, which was vague, misleading, and inaccurate, at the close of evidence, without motion by the prosecution, to comply with the officer's testimony given at trial.

The finding of guilty was in error because the condition of the road at the time and place of the alleged offense was not established at trial as being "unreasonable for conditions" as the charging document indicates the violation to be.

The State failed to prove the defendant guilty beyond a reasonable doubt as there was insufficient evidence concerning the accuracy of the particular radar unit involved in the instant case, and the qualifications of the person checking, calibrating and using the radar unit to support a conviction for speeding based solely upon a reading obtained from such device.

Assignments of error one and four will be discussed together since they both relate to the accuracy of the K-55 and the qualifications of Deputy Kirk to properly read the K-55. Knife does not challenge the use of K-55 radar devices. Knife argues that the state failed to meet its burden of proof by establishing that the K-55 was [\*4] in good operating condition and that Deputy Kirk was qualified to accurately operate the K-55.

It is well settled in Ohio that [HN2] expert testimony is no longer necessary in cases involving stationary radar units. *City of East Cleveland v. Ferrell (1958)*, 168 Ohio St. 298. This court took judicial notice of the K-55 radar device in *City of Kettering v. Smith* (April 12, 1984), Montgomery App. No. 8383, unreported, and in *City of New Carlisle v. Planchak* (May 17, 1988), Clark App. No. 2339, unreported. This court in *Planchak* cited *City of East Cleveland* for the prerequisite to giving judicial notice to a radar device:

We are in accord with the trend in the most recent decisions that [HN3] readings of a radar speed meter may be accepted in evidence, just as we accept photographs, x-rays, . . . and the like, without the necessity of offering expert testimony as to the scientific principles underlying them.

There remains, then, only a determination as to the sufficiency of the evidence concerning the accuracy of the particular speed meter involved in the instant case and the qualifications of the person using it.

Kirk testified that he had had a two-hour training session on [\*5] how to use the K-55. He also said that he had had on the job training with the K-55 for a year. Kirk stated that he checks the calibration of the K-55 when he first starts his shift and after each citation he writes. He stated that on the day that he stopped Knife, September 26, 1988, he checked the calibration of the K-55 at 6:49 p.m. and at 7:54 p.m. Kirk stated on cross-examination that he calibrated the K-55 on September 26, 1988, before and after he stopped Knife and that he used turning forks to calibrate the K-55.

Kirk stated that on September 26, 1988, he noticed a silver-colored car on State Route 571 traveling at a "rather high speed" and so he activated the K-55. He stated that the K-55 read 70 miles per hour and that he heard a high Doppler sound from the K-55. He stated that the K-55 that he used on September 26, 1988, had a target speed reading and a patrol speed reading. He stated that when he clocked Knife's speed, the patrol speed reading on the K-55 matched the speedometer reading on his cruiser which was 45 miles per hour. Kirk testified that he could tell that the K-55 was operating properly because the patrol speed reading on the K-55 and the speedometer reading [\*6] on his patrol car were the same. Kirk said that he stopped the silver car and talked to the driver, Knife, who said that she saw that she

was traveling at 65 miles per hour.

There was sufficient evidence that Kirk was qualified to operate the K-55 and that the K-55 was working properly. [HN4] We will not reverse the judgment of a lower court as being against the weight of the evidence if there is evidence that, if believed, "would convince the average mind of the defendant's guilt beyond a reasonable doubt." *State v. Eley* (1978), 56 Ohio St. 2d 169, 172. Furthermore, "the weight to be given the evidence and the credibility of the witnesses are primarily for the trier of the facts." *State v. DeHass* (1967), 10 Ohio St. 2d 230, paragraph one of the syllabus. The first and fourth assignments of error are not well taken.

Knife argues in her third assignment of error that the trial court improperly amended the citation to comply with Deputy Sheriff Kirk's testimony. Knife maintains that the citation was vague and misleading because it did not state which subsection of *R.C. 4511.21* was violated. Knife's citation alleged ". . . SPEED VIOLATION 70/55 SPEED ZONE IN VIOLATION OF SECTION [\*7] 4511.21 OF OHIO R.C. . . ."

*Criminal Rule 7(D)* [HN5] states, in pertinent part, as follows:

The court may at any time before, during, or after a trial amend the indictment, information, complaint or bill of particulars, in respect to any defect, imperfection, or omission in form or substance, or of any variance with the evidence, provided no change is made in the name or identity of the crime charged.

At the close of all of the evidence, the court stated that it would "amend the citation to confirm the evidence [sic] which is a violation of 4511.21(D) \* \* \*." The citation was not misleading simply because it failed to state in particular which subsection of *R.C. 4511.21* Knife violated by traveling at 70 miles per hour in a 55 miles per hour speed zone. The court's amendment of the citation to note that Knife violated subsection D of *R.C. 4511.21* was proper under *Crim. R. 7(D)*. The second assignment of error is not well taken.

Knife's third assignment of error states:

The finding of guilty was in error because the condition of the road at the time and place of the alleged offense was not established at trial as being "unreasonable for conditions" as the charging document indicates the [\*8] violation to be.

Knife argues in the third assignment of error that the prosecution failed to present evidence of road conditions, weather, or traffic to support the charge that driving 70 miles per hour in a 55 mile per hour speed zone was "unreasonable for conditions." The Ohio Supreme Court in *State v. Neff* (1975), 41 Ohio St. 2d 17, in discussing *R.C. 4511.21* violations stated:

[HN6] What is 'reasonable and proper under the circumstances,' within the meaning of *R.C. 4511.21*, is a question of fact. Where there is sufficient evidence to support a finding of guilty, a conviction will not be set aside.

41 Ohio St. 2d 17 at syllabus.

The court in *State v. Dehnke* (1974), 40 Ohio App. 2d 194, discussed *R.C. 4511.21* and stated:

In considering the wording of the statute, we find that [HN7] the single basic requirement is that the speed be reasonable under the circumstances existing. The statutory limits for various types of roads or highways furnishes a two pronged presumption affecting the presentation of evidence. A speed in excess of the statutory limit is a prima facie unreasonable speed; a speed at or below that statutory limit is a prima facie reasonable speed. But the ultimate criterion [\*9] is that the speed be reasonable considering the conditions then existing.

40 Ohio App. 2d at 195-96. The court stated that [HN8] whether or not a particular speed was reasonable is "essentially a matter for determination by the trier of facts." *Id.* at 196.

The trial court in this case heard evidence that Knife was clocked by a K-55 radar device as driving 70 miles per

hour in a 55 mile per hour speed limit area. Kirk testified that there was other traffic moving in both directions and that he could see before he turned on the K-55 that Knife was driving fast. Kirk stated that the incident occurred on September 26, 1988, at 7:40 p.m.

[HN9] Our review as to whether Knife's speed of 70 miles per hour was unreasonable for the conditions is "limited to a determination of whether there was evidence presented which, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt." *State v. Eley (1978)*, 56 Ohio St. 2d 169, 172. Given the prima facie unreasonableness of speed exceeding the posted limit, the trial court could have properly determined that Knife's speed was unreasonable for the conditions at the time that she was stopped for speeding. This assignment [\*10] of error is not well taken.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*  
*Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > General Overview*

[HN8] Whether or not a particular speed was reasonable within the meaning of *Ohio Rev. Code Ann. § 4511.21* is essentially a matter for determination by the trier of facts.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements*  
*Criminal Law & Procedure > Appeals > Standards of Review > General Overview*

[HN9] The appellate court's review as to whether a speed of driving was unreasonable for the conditions is limited to a determination of whether there was evidence presented which, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt.

**COUNSEL:**

TONYA K. THIEMAN, Prosecuting Attorney, Miami County Municipal Court, Troy, Ohio, Attorney for Plaintiff-Appellee.

CHERILYN A. KNIFE, 134 McKinley Avenue, West Milton, Ohio, Defendant-Appellant.

**JUDGES:**

WOLFF, P.J., WILSON, J., and GRADY, J., concur.

**OPINION BY:**

WOLFF

**OPINION:**

WOLFF, P.J.

Cherilyn Knife appeals from the Miami County Municipal Court October 18, 1988, journal entry which stated that a trial was held and that Knife was found guilty of violating *R.C. 4511.21(D)*, and which, accordingly, assessed a fine and costs. Section 4511.21(D) [HN1] states, in pertinent part, as follows:

No person shall operate a motor vehicle, trackless trolley, or streetcar upon a street or highway as follows:

(1) At a speed exceeding fifty-five miles per hour, except upon a freeway as provided in division (B)(10) of this section.

At the trial, the state presented testimony by Deputy Sheriff Douglas K. Kirk. Kirk testified that at 7:40 p.m. on September 26, 1988, he observed a silver-colored car traveling westbound on State Route 571 at a "rather high speed." He stated that he activated his K-55 radar device and that the K-55 read the silver car's speed as 70 miles per hour. Kirk [\*2] stated that the speed limit on State Route 571 was 55 miles per hour.

Knife, representing herself, cross-examined Kirk and offered no other evidence.

At the close of the testimony, the court stated:

[This court finds] that the state has shown all those elements they are required to show. Namely, the car was observed before the radar unit was turned on, the Doppler sound was consistent with the speed observed the target window was consistent with the speed observed in the Doppler. The speedometer and the vehicle window were the same and that the officer did not view an incorrect reading, that he has viewed them before and that in his opinion it was a proper reading.

And so the State has shown all the elements as required and therefore would find the Defendant is guilty and will impose a fine of fifteen dollars and costs.

Knife raises four assignments of error in this appeal:

As required by case law in Ohio, the State failed to prove:

(i) that the particular radar unit was properly set up and in good operating condition; (ii) the operator was qualified, both through training and experience, to enable him to properly operate the radar; (iii) and the operator properly read the radar [\*3] unit and identified the target.

The trial court improperly amended the officer's traffic citation, which was vague, misleading, and inaccurate, at the close of evidence, without motion by the prosecution, to comply with the officer's testimony given at trial.

The finding of guilty was in error because the condition of the road at the time and place of the alleged offense was not established at trial as being "unreasonable for conditions" as the charging document indicates the violation to be.

The State failed to prove the defendant guilty beyond a reasonable doubt as there was insufficient evidence concerning the accuracy of the particular radar unit involved in the instant case, and the qualifications of the person checking, calibrating and using the radar unit to support a conviction for speeding based solely upon a reading obtained from such device.

Assignments of error one and four will be discussed together since they both relate to the accuracy of the K-55 and the qualifications of Deputy Kirk to properly read the K-55. Knife does not challenge the use of K-55 radar devices. Knife argues that the state failed to meet its burden of proof by establishing that the K-55 was [\*4] in good operating condition and that Deputy Kirk was qualified to accurately operate the K-55.

It is well settled in Ohio that [HN2] expert testimony is no longer necessary in cases involving stationary radar units. *City of East Cleveland v. Ferrell (1958)*, 168 Ohio St. 298. This court took judicial notice of the K-55 radar device in *City of Kettering v. Smith (April 12, 1984)*, Montgomery App. No. 8383, unreported, and in *City of New Carlisle v. Planchak (May 17, 1988)*, Clark App. No. 2339, unreported. This court in *Planchak* cited *City of East Cleveland* for the prerequisite to giving judicial notice to a radar device:

We are in accord with the trend in the most recent decisions that [HN3] readings of a radar speed meter may be accepted in evidence, just as we accept photographs, x-rays, . . . and the like, without the necessity of offering expert testimony as to the scientific principles underlying them.

There remains, then, only a determination as to the sufficiency of the evidence concerning the accuracy of the particular speed meter involved in the instant case and the qualifications of the person using it.

Kirk testified that he had had a two-hour training session on [\*5] how to use the K-55. He also said that he had had on the job training with the K-55 for a year. Kirk stated that he checks the calibration of the K-55 when he first starts his shift and after each citation he writes. He stated that on the day that he stopped Knife, September 26, 1988, he checked the calibration of the K-55 at 6:49 p.m. and at 7:54 p.m. Kirk stated on cross-examination that he calibrated the K-55 on September 26, 1988, before and after he stopped Knife and that he used turning forks to calibrate the K-55.

Kirk stated that on September 26, 1988, he noticed a silver-colored car on State Route 571 traveling at a "rather high speed" and so he activated the K-55. He stated that the K-55 read 70 miles per hour and that he heard a high Doppler sound from the K-55. He stated that the K-55 that he used on September 26, 1988, had a target speed reading and a patrol speed reading. He stated that when he clocked Knife's speed, the patrol speed reading on the K-55 matched the speedometer reading on his cruiser which was 45 miles per hour. Kirk testified that he could tell that the K-55 was operating properly because the patrol speed reading on the K-55 and the speedometer reading [\*6] on his patrol car were the same. Kirk said that he stopped the silver car and talked to the driver, Knife, who said that she saw that she

was traveling at 65 miles per hour.

There was sufficient evidence that Kirk was qualified to operate the K-55 and that the K-55 was working properly. [HN4] We will not reverse the judgment of a lower court as being against the weight of the evidence if there is evidence that, if believed, "would convince the average mind of the defendant's guilt beyond a reasonable doubt." *State v. Eley* (1978), 56 Ohio St. 2d 169, 172. Furthermore, "the weight to be given the evidence and the credibility of the witnesses are primarily for the trier of the facts." *State v. DeHass* (1967), 10 Ohio St. 2d 230, paragraph one of the syllabus. The first and fourth assignments of error are not well taken.

Knife argues in her third assignment of error that the trial court improperly amended the citation to comply with Deputy Sheriff Kirk's testimony. Knife maintains that the citation was vague and misleading because it did not state which subsection of *R.C. 4511.21* was violated. Knife's citation alleged ". . . SPEED VIOLATION 70/55 SPEED ZONE IN VIOLATION OF SECTION [\*7] 4511.21 OF OHIO R.C. . . ."

*Criminal Rule 7(D)* [HN5] states, in pertinent part, as follows:

The court may at any time before, during, or after a trial amend the indictment, information, complaint or bill of particulars, in respect to any defect, imperfection, or omission in form or substance, or of any variance with the evidence, provided no change is made in the name or identity of the crime charged.

At the close of all of the evidence, the court stated that it would "amend the citation to confirm the evidence [sic] which is a violation of 4511.21(D) \* \* \*." The citation was not misleading simply because it failed to state in particular which subsection of *R.C. 4511.21* Knife violated by traveling at 70 miles per hour in a 55 miles per hour speed zone. The court's amendment of the citation to note that Knife violated subsection D of *R.C. 4511.21* was proper under *Crim. R. 7(D)*. The second assignment of error is not well taken.

Knife's third assignment of error states:

The finding of guilty was in error because the condition of the road at the time and place of the alleged offense was not established at trial as being "unreasonable for conditions" as the charging document indicates the [\*8] violation to be.

Knife argues in the third assignment of error that the prosecution failed to present evidence of road conditions, weather, or traffic to support the charge that driving 70 miles per hour in a 55 mile per hour speed zone was "unreasonable for conditions." The Ohio Supreme Court in *State v. Neff* (1975), 41 Ohio St. 2d 17, in discussing *R.C. 4511.21* violations stated:

[HN6] What is 'reasonable and proper under the circumstances,' within the meaning of *R.C. 4511.21*, is a question of fact. Where there is sufficient evidence to support a finding of guilty, a conviction will not be set aside.

41 Ohio St. 2d 17 at syllabus.

The court in *State v. Dehnke* (1974), 40 Ohio App. 2d 194, discussed *R.C. 4511.21* and stated:

In considering the wording of the statute, we find that [HN7] the single basic requirement is that the speed be reasonable under the circumstances existing. The statutory limits for various types of roads or highways furnishes a two pronged presumption affecting the presentation of evidence. A speed in excess of the statutory limit is a prima facie unreasonable speed; a speed at or below that statutory limit is a prima facie reasonable speed. But the ultimate criterion [\*9] is that the speed be reasonable considering the conditions then existing.

40 Ohio App. 2d at 195-96. The court stated that [HN8] whether or not a particular speed was reasonable is "essentially a matter for determination by the trier of facts." *Id.* at 196.

The trial court in this case heard evidence that Knife was clocked by a K-55 radar device as driving 70 miles per

hour in a 55 mile per hour speed limit area. Kirk testified that there was other traffic moving in both directions and that he could see before he turned on the K-55 that Knife was driving fast. Kirk stated that the incident occurred on September 26, 1988, at 7:40 p.m.

[HN9] Our review as to whether Knife's speed of 70 miles per hour was unreasonable for the conditions is "limited to a determination of whether there was evidence presented which, if believed, would convince the average mind of the defendant's guilt beyond a reasonable doubt." *State v. Eley (1978)*, 56 Ohio St. 2d 169, 172. Given the prima facie unreasonableness of speed exceeding the posted limit, the trial court could have properly determined that Knife's speed was unreasonable for the conditions at the time that she was stopped for speeding. This assignment [\*10] of error is not well taken.

**City of Mayfield Heights, Plaintiff-Appellee v. Jim L. Spreng,  
Defendant-Appellant**

**No. 52426**

**Court of Appeals of Ohio, Eighth District, Cuyahoga County**

***1987 Ohio App. LEXIS 8382***

**August 13, 1987, Decided**

**PRIOR HISTORY:** [\*1]

Criminal appeal from Lyndhurst Municipal Court; Case No. 86-TRD-2101.

**DISPOSITION:**

AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged a judgment of the Lyndhurst Municipal Court (Ohio) in favor of the City, which convicted him of speeding, in violation of the City of Mayfield Heights, Ohio, Ordinance 333.03 (Ordinance), imposed a fine, and suspended his driver's license for 60 days.

**OVERVIEW:** At defendant's trial for speeding, in violation of the Ordinance, a patrolman testified as to his experience in operating radar equipment. He also testified that his properly operating radar gun clocked defendant speeding at 118 miles per hour in a 55 mile per hour zone. The trial court took judicial notice of the accuracy of the radar gun. Defendant did not testify. Defendant was convicted as charged. The trial court imposed a fine and suspended his driver's license for 60 days. On appeal, the court held that the trial court properly took judicial notice of the accuracy of the radar equipment even though no expert witness testified with regard to its construction, operation, and reliability. The court also held that, pursuant to *Ohio Rev. Code Ann. § 4507.34*, the trial court was authorized to suspend or revoke defendant's driver's license for up to one year. Further, the court rejected defendant's argument that his conviction was against the manifest weight of the evidence and was contrary to law. The court found that the patrolman's probative testimony amply supported the verdict of guilty.

**OUTCOME:** The court affirmed the trial court's judgment in favor of the City, which convicted defendant of speeding, imposed a fine, and suspended his driver's license. The court ordered that the City recover from defendant its costs taxed herein.

**CORE TERMS:** radar, ordinance, assignment of error, speeding, assigned, revoke, suspend, license, driver's, speed

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Judicial Notice > General Overview  
Evidence > Testimony > Experts > General Overview*

[HN1] In the context of a trial for speeding, a trial court may take judicial notice of the accuracy of a radar device in the absence of expert testimony with respect to the construction of the device, its method of operation, and its reliability.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Reckless Driving > Penalties  
Criminal Law & Procedure > Guilty Pleas > General Overview  
Governments > Local Governments > Licenses*

[HN2] In addition to or independent of the penalties provided in a municipal code, *Ohio Rev. Code Ann. § 4507.34* authorizes a trial court to suspend or revoke a driver's license for up to one year. Section 4507.34 provides in part that whenever a person is found guilty under the laws of this state or any ordinance of any political subdivision thereof, of operating a motor vehicle in violation of such laws or ordinances, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the license to drive of any person so convicted or pleading guilty to such offenses for such period as it determines, not to exceed one year. This statute is applicable to violations of speeding ordinances.

*Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence  
Evidence > Procedural Considerations > Weight & Sufficiency*

[HN3] An appellate court cannot reverse a judgment in a criminal case on the sufficiency or weight of the evidence where substantial evidence is offered by a state in support of all of the elements of the offenses charged and where such evidence is of sufficient probative value to sustain a conviction.

**OPINION BY:**

NAHRA

**OPINION:**

JOURNAL ENTRY AND OPINION

NAHRA, C.J.:

Jim L. Spreng, appellant, is appealing his conviction of speeding in violation of ordinance 333.03 of the city of Mayfield Heights.

Patrolman Larry Brazie testified that on March 21, 1986, at approximately 1:45 a.m. he was parked at the 34-mile marker turnaround on I-271 on a radar assignment. He tested his Decatur H.R. 8 hand-held radar equipment both before and at the conclusion of his radar detail and determined that his unit was operating properly. Patrolman Brazie had nine years of on-the-job training in the use of radar equipment and as of January 5, 1984, had successfully completed a police speed radar training course in which he demonstrated an understanding of the installation, calibration [\*2] and operational features of the Decatur Speed Radar system.

At about 1:45 a.m., a white Chevrolet Corvette driven by appellant passed Patrolman Brazie. He independently estimated the car to be travelling in excess of 100 m.p.h. and clocked the speed of the car at 118 m.p.h. with his radar gun. The posted speed limit on I-271 was 55 m.p.h. Patrolman Brazie pursued appellant and issued him a speeding ticket.

Appellant pled not guilty, but following the testimony of Patrolman Brazie, who was the only witness to testify at trial, the court found appellant guilty, fined him \$ 150 and suspended his driver's license for 60 days. Appellant timely appealed.

#### I.

For his first assigned error, appellant contends that:

THE TRIAL COURT COMMITTED ERROR BY TAKING JUDICIAL NOTICE OF THE ACCURACY OF AN ALLEGED SPEED MEASURING DEVICE IN THE ABSENCE OF EXPERT TESTIMONY WITH RESPECT TO THE CONSTRUCTION OF THE DEVICE, ITS METHOD OF OPERATION AND ITS RELIABILITY.

This contention regarding the same [HN1] radar device has been previously overruled, *Village of Woodmere v. Dawson* (Apr. 23, 1981), Cuyahoga App. No. 42701, unreported, and we see no reason to disturb this ruling. Accordingly, this [\*3] assignment of error is overruled.

#### II.

Appellant's second assigned error is that:

THE TRIAL COURT COMMITTED ERROR AND HAS NO AUTHORITY TO SUSPEND THE DEFENDANT'S DRIVER'S LICENSE FOR 60 DAYS.

[HN2] In addition to or independent of the penalties provided in a municipal code, *R.C. 4507.34* authorizes a trial court to suspend or revoke a driver's license for up to one year. *R.C. 4507.34* provides that:

Whenever a person is found guilty under the laws of this state or any ordinance of any political subdivision thereof, of operating a motor vehicle in violation of such laws or ordinances, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the license to drive of any person so convicted or pleading guilty to such offenses for such period as it determines, not to exceed one year.

This statute is applicable to violations of speeding ordinances. *City of Akron v. Willingham (1957), 166 Ohio St. 337, 142 N.E.2d 653*. Accordingly, this assignment of error is overruled.

#### III.

Appellant's last assigned error is that:

THE VERDICT AND JUDGMENT [\*4] [SIC] ARE AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE PRESENTED AND ARE CONTRARY TO LAW.

This [HN3] court cannot reverse on the sufficiency or weight of the evidence "where substantial evidence is offered by the state in support of all of the elements of the offenses charged and [where] such evidence [is] of sufficient probative value to sustain a conviction." *State v. Barnes (1986)*, 25 Ohio St. 3d 203, 209, 495 N.E.2d 922. Patrolman Brazie's testimony amply supports the verdict in this case. This assignment of error is therefore overruled.

The judgment of the trial court is affirmed.

It is ordered that appellee recover of appellant their costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Lyndhurst Municipal Court to carry this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

WERREN, J., and RIGGS, J., CONCUR.

Judge Robert B. Werren of the Harrison County Common Pleas, Court, Sitting by Assignment.

Judge Roland W. Riggs, II, Retired, of the Washington County Common [\*5] Pleas Court, Sitting by Assignment.

**OPINION:**

JOURNAL ENTRY AND OPINION

NAHRA, C.J.:

Jim L. Spreng, appellant, is appealing his conviction of speeding in violation of ordinance 333.03 of the city of Mayfield Heights.

Patrolman Larry Brazie testified that on March 21, 1986, at approximately 1:45 a.m. he was parked at the 34-mile marker turnaround on I-271 on a radar assignment. He tested his Decatur H.R. 8 hand-held radar equipment both before and at the conclusion of his radar detail and determined that his unit was operating properly. Patrolman Brazie had nine years of on-the-job training in the use of radar equipment and as of January 5, 1984, had successfully completed a police speed radar training course in which he demonstrated an understanding of the installation, calibration [\*2] and operational features of the Decatur Speed Radar system.

At about 1:45 a.m., a white Chevrolet Corvette driven by appellant passed Patrolman Brazie. He independently estimated the car to be travelling in excess of 100 m.p.h. and clocked the speed of the car at 118 m.p.h. with his radar gun. The posted speed limit on I-271 was 55 m.p.h. Patrolman Brazie pursued appellant and issued him a speeding ticket.

Appellant pled not guilty, but following the testimony of Patrolman Brazie, who was the only witness to testify at trial, the court found appellant guilty, fined him \$ 150 and suspended his driver's license for 60 days. Appellant timely appealed.

#### I.

For his first assigned error, appellant contends that:

THE TRIAL COURT COMMITTED ERROR BY TAKING JUDICIAL NOTICE OF THE ACCURACY OF AN ALLEGED SPEED MEASURING DEVICE IN THE ABSENCE OF EXPERT TESTIMONY WITH RESPECT TO THE CONSTRUCTION OF THE DEVICE, ITS METHOD OF OPERATION AND ITS RELIABILITY.

This contention regarding the same [HN1] radar device has been previously overruled, *Village of Woodmere v. Dawson* (Apr. 23, 1981), Cuyahoga App. No. 42701, unreported, and we see no reason to disturb this ruling. Accordingly, this [\*3] assignment of error is overruled.

#### II.

Appellant's second assigned error is that:

THE TRIAL COURT COMMITTED ERROR AND HAS NO AUTHORITY TO SUSPEND THE DEFENDANT'S DRIVER'S LICENSE FOR 60 DAYS.

[HN2] In addition to or independent of the penalties provided in a municipal code, *R.C. 4507.34* authorizes a trial court to suspend or revoke a driver's license for up to one year. *R.C. 4507.34* provides that:

Whenever a person is found guilty under the laws of this state or any ordinance of any political subdivision thereof, of operating a motor vehicle in violation of such laws or ordinances, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the license to drive of any person so convicted or pleading guilty to such offenses for such period as it determines, not to exceed one year.

This statute is applicable to violations of speeding ordinances. *City of Akron v. Willingham (1957), 166 Ohio St. 337, 142 N.E.2d 653*. Accordingly, this assignment of error is overruled.

#### III.

Appellant's last assigned error is that:

THE VERDICT AND JUDGMENT [\*4] [SIC] ARE AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE PRESENTED AND ARE CONTRARY TO LAW.

This [HN3] court cannot reverse on the sufficiency or weight of the evidence "where substantial evidence is offered by the state in support of all of the elements of the offenses charged and [where] such evidence [is] of sufficient probative value to sustain a conviction." *State v. Barnes (1986)*, 25 Ohio St. 3d 203, 209, 495 N.E.2d 922. Patrolman Brazie's testimony amply supports the verdict in this case. This assignment of error is therefore overruled.

The judgment of the trial court is affirmed.

It is ordered that appellee recover of appellant their costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Lyndhurst Municipal Court to carry this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

WERREN, J., and RIGGS, J., CONCUR.

Judge Robert B. Werren of the Harrison County Common Pleas, Court, Sitting by Assignment.

Judge Roland W. Riggs, II, Retired, of the Washington County Common [\*5] Pleas Court, Sitting by Assignment.

**PRIOR HISTORY:** [\*1]

Civil Appeal from Euclid Municipal Court - No. 85-TRD-4831.

**DISPOSITION:**

Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Euclid Municipal Court (Ohio), which found her guilty of speeding.

**OVERVIEW:** On appeal, defendant claimed that the officer who testified against her at trial was not competent to testify under *Ohio Rev. Code Ann. §§ 4549.14, 4549.16*, or *Ohio R. Evid. 601(C)* because he was not driving a marked vehicle and was not wearing a legally distinctive uniform. In affirming the judgment below, the court held that a police officer who, while engaged in an assignment unrelated to the enforcement of traffic laws, observed a violation of such laws and made an arrest therefore, was not precluded by *Ohio Rev. Code Ann. §§ 4549.14, 4549.16* from testifying with regard to such violation on the basis that he was wearing plain clothes and driving an unmarked vehicle at the time of the arrest. Since the testifying officer was not on duty for the exclusive or main duty of enforcing motor vehicle and traffic laws, he was competent to testify as a witness at defendant's trial for the speeding violation.

**OUTCOME:** The court affirmed the trial court's judgment.

**CORE TERMS:** arrest, driving, traffic, detective, competent to testify, arrested, motor vehicle, assignments of error, unmarked, speeding, distinctive, enforcing, police officer, narcotics, speed, person charged, main purpose, wearing,

misdemeanor, punishable, arresting, violator, motion to suppress, police vehicle, competency, violating, observe, dressed, driver, clothes

[HN1] *Ohio R. Evid. 601(C)*, which deals with the competency of witnesses, reads as follows: While on duty for the exclusive or main purpose of enforcing traffic laws, arresting or assisting in the arrest of a person charged with a traffic violation punishable as a misdemeanor where the officer at the time of the arrest was not using a properly marked motor vehicle as defined by statute or was not wearing a legally distinctive uniform as defined by statute.

#### ***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview***

##### ***Evidence > Competency > General Overview***

##### ***Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN2] *Ohio Rev. Code Ann. § 4549.14*, which deals with the competency of a police officer testifying as a witness, states as follows: Any officer arresting, or participating or assisting in the arrest of, a person charged with violating the motor vehicle or traffic laws of this state, provided the offense is punishable as a misdemeanor, such officer being on duty exclusively or for the main purpose of enforcing such laws, is incompetent to testify as a witness in any prosecution against such arrested person if such officer at the time of the arrest was using a motor vehicle not marked in accordance with *Ohio Rev. Code Ann. § 4549.13*. Similarly, *Ohio Rev. Code Ann. § 4549.16* provides as follows: Any officer arresting, or participating or assisting in the arrest of, a person charged with violating the motor vehicle or traffic laws of this state, provided the offense is punishable as a misdemeanor, such officer being on duty exclusively or for the main purpose of enforcing such laws is incompetent to testify as a witness in any prosecution against such arrested person if such officer at the time of the arrest was not wearing a distinctive uniform in accordance with *Ohio Rev. Code Ann. § 4549.15*.

#### ***Evidence > Competency > General Overview***

[HN3] A police officer who, while engaged in an assignment unrelated to the enforcement of traffic laws, observes a violation of such laws and makes an arrest therefore will not be precluded by *Ohio Rev. Code Ann. §§ 4549.14, 4549.16* from testifying with regard to such violation on the basis that he was wearing plain clothes and driving an unmarked vehicle at the time of arrest.

#### ***Evidence > Relevance > Relevant Evidence***

[HN4] *Ohio R. Evid. 401*, which defines relevancy, provides as follows: "Relevant evidence" means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence.

#### ***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

##### ***Evidence > Relevance > Relevant Evidence***

[HN5] *Ohio R. Evid. 482*, which deals with the admissibility of relevant evidence, states in part as follows: Evidence which is not relevant is not admissible.

KRUPANSKY

**OPINION:**

KRUPANSKY, J.:

On June 6, 1985 a complaint was issued in the Euclid Municipal Court against defendant Sondra Bagley for violating Euclid City Ordinance 333.03, viz., speeding on the freeway. Defendant plead not guilty to the charge. On June. 14, 1985 defendant filed a motion to suppress testimony evidence. On June 20, 1985 following a hearing on defendant's motion to suppress the trial court overruled defendant's motion and proceeded to hear the case on its merits. At the conclusion of the trial, the trial court found defendant guilty, imposed a fine of \$ 100 plus costs and suspended defendant's driver's license for thirty (30) days. Defendant filed a timely appeal on June 21, 1985.

Officer David H. Schervish, [\*2] the only witness who testified at trial, provided the following information: On June 6, 1985 at approximately 2:40 p.m. Officer David H. Schervish, a narcotics and vice detective for the City of Euclid, and his partner, Detective Payne, were traveling on Interstate 90 (1890) when they observed a red vehicle (driven by appellant) traveling westbound on I-90 at a high rate of speed, weaving in and out of the lanes. Officers Schervish and Payne were driving a 1982 red four-door Ford, an unmarked detective vehicle. The officers were on duty in the narcotics and vice division; they were dressed in plain clothes, not police uniforms. Officers Schervish and Payne followed appellant for approximately one half mile. They determined appellant was driving at a speed of approximately 30 m.p.h. in an area with a 55 m.p.h. speed limit.

The officers arrested appellant for speeding.

The police vehicle had been subjected to a radar unit earlier that week and a certified calibration for the City of Euclid was imprinted on the dash of the police vehicle. At trial Officer Schervish stated if he observes individuals speeding he will arrest them.

I.

Appellant raises two assignments of error on appeal. [\*3] Since both assignments of error raise essentially the same issue, viz., whether Officer Schervish was competent to testify at trial under *R.C. 4549.14*, *R.C. 4549.16* and *Evid. R. 601(C)*, they will be addressed together. Appellant's assignments of error state as follows:

I. THE TESTIMONY OF A LAW ENFORCEMENT OFFICER, BOTH AS TO EVIDENCE PRIOR TO AND AFTER ARREST, OF A PERSON CHARGED WITH A TRAFFIC VIOLATION, IS INCOMPETENT UNDER *R.C. 4549.14*, *4549.16* AND *EVID. R. 601 (C)* WHERE AT THE TIME OF THE ARREST SUCH OFFICER WAS NOT USING A PROPERLY MARKED MOTOR VEHICLE OR WEARING A LEGALLY DISTINCTIVE UNIFORM AS DEFINED BY STATUTE.

II. THE TRIAL COURT ERRED IN DETERMINING (sic) THAT AN EXCEPTION TO *R.C. 4549.14, 4549.16* AND *EVID. R. 601(C)* EXISTS WHEN THE OFFICER ON DUTY DOES NOT HAVE AS HIS MAIN DUTY THE ENFORCING OF TRAFFIC LAWS AND IS COMPETENT TO TESTIFY AND THE COURT DOES NOT PERMIT THE DEFENDANT TO INQUIRE INTO THE SCOPE OF THE OFFICER'S DUTIES TO DETERMINE THE EXTENT OF HIS DUTY TO ENFORCE THE TRAFFIC LAWS.

Appellant's two assignments of error are not well taken.

*Evid. R. 601(C)*, [HN1] which deals with the competency of witnesses, reads as follows:

while on [\*4] duty for the exclusive or main purpose of enforcing traffic laws, arresting or assisting in the arrest of a person charged with a traffic violation punishable as a misdemeanor where the officer at the time of the arrest was not using a properly marked motor vehicle as defined by statute or was not wearing a legally distinctive uniform as defined by statute." (Emphasis added)

*R.C. 4549.14*, [HN2] which deals with the competency of a police officer testifying as a witness, states as follows:

"Any officer arresting, or participating or assisting in the arrest of, a person charged with violating the motor vehicle or traffic laws of this state, provided the offense is punishable as a misdemeanor, such officer being on duty exclusively or for the main purpose of enforcing such laws, is incompetent to testify as a witness in any prosecution against such arrested person if such officer at the time of the arrest was using a motor vehicle not marked in accordance with *section 4549.13 of the Revised Code*." (Emphasis added)

Similarly, *R.C. 4549.16* provides as follows:

"Any officer arresting, or participating or assisting in the arrest of, a person [\*5] charged with violating the motor vehicle or traffic laws of this state, provided the offense is punishable as a misdemeanor, such officer being on duty exclusively or for the main purpose of enforcing such laws is incompetent to testify as a witness in any prosecution against such arrested person if such officer at the time of the arrest was not wearing a distinctive uniform in accordance with *section 4549.15 of the Revised Code*." (Emphasis added)

The precise issue presented in the case sub judice was decided in *Columbus v. Stump* (1974), 41 Ohio App. 2d 81. In *Columbus v. Stump*, supra, an on duty police officer was positioned outside a bar for the purpose of observing illicit activities and observed Stump driving in a reckless fashion. The officer pursued Stump who was subsequently arrested by another police officer when the pursuit ended in an accident. The officer was not dressed in a distinctive police uniform and was driving an unmarked police vehicle. The Court of Appeals determined the officer was competent to testify concerning the traffic violation at Stump's trial and held as follows:

[HN3] "A police officer who, while engaged in an [\*6] assignment unrelated to the enforcement of traffic laws, observes a violation of such laws and makes an arrest therefore will not be precluded by *R.C. 4549.14* and *4549.16* from testifying with regard to such violation on the basis that he was wearing plain clothes and driving an unmarked vehicle at the time of arrest."

See also: *State v. Thobe* (1961), 191 N.E. 2d 182.

Similarly, in the case sub judice it is undisputed on June 6, 1985 Officer Schervish was driving an unmarked detective vehicle and was dressed in plain clothes, not a distinctive police uniform, when he arrested appellant.

However, the evidence also establishes Officer Schervish was on duty as a narcotics and vice detective on June 6, 1985. Since Officer Schervish was not on duty for the exclusive or main duty of enforcing motor vehicle and traffic laws, he was competent to testify as a witness at appellant's trial for the speed violation.

Furthermore, the legislative intent in enacting *R.C. 4549.14* and *R.C. 4549.16* was twofold: (1) to promote uniformity in traffic control and regulations to make driving safer in all of the political divisions in Ohio and (2) to curb speed traps operated by municipal [\*7] and township police. *City of Dayton v. Adams* (1967), Ohio St. 2d 89. These statutory provisions were not enacted to create the absurd result, whereby an on-duty plain-clothes narcotics detective driving an unmarked vehicle could observe a drunk driver driving in a reckless and dangerous manner, then forego the arrest of the driver since the officer would not be competent to testify against the driver at trial. It is important to note that *R.C. 4549.14* and *R.C. 4549.16* do not prevent the officer from making the arrest of the violator, but rather, render him impotent to testify at trial to sustain the arrest. In effect it emasculates the purpose of the arrest.

Appellant further contends if Officer Schervish is competent to testify then the trial court erred when it refused to permit her counsel to inquire of Officer Schervish on cross-examination as to how many other traffic violators he had arrested on the day he arrested appellant and how many traffic violators he had arrested with that particular detective car. Appellant's contention lacks merit.

Appellant's counsel's inquiries were irrelevant to the central issue at trial, viz., whether appellant was guilty of speeding [\*8] on the freeway. *Evid. R. 401*, [HN4] which defines relevancy, provides as follows:

"'Relevant evidence' means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence."

*Evid. R. 482*, [HN5] which deals with the admissibility of relevant evidence, states in pertinent party as follows:

"Evidence which is not relevant is not admissible."

Prior to the commencement of appellant's trial the trial court held a hearing on appellant's motion to suppress Officer Schervish's testimony and determined Schervish was competent to testify at appellant's trial. Since the issue of Officer Schervish's competency to testify was resolved before appellant's trial began, the only issue at trial was the determination of appellant's guilt. Counsel's inquiries were not relevant to the crucial question of whether appellant was speeding. Therefore, the trial court did not err when the court refused to allow counsel to pursue that line of questioning on cross-examination.

For these reasons, appellant's assignments of error are overruled.

#### JOURNAL ENTRY

It is ordered that [\*9] appellee recover of appellant its costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Euclid Municipal Court to carry this judgment into execution.

**PRIOR HISTORY:** [\*1]

Civil Appeal from Euclid Municipal Court - No. 85-TRD-4831.

**DISPOSITION:**

Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Euclid Municipal Court (Ohio), which found her guilty of speeding.

**OVERVIEW:** On appeal, defendant claimed that the officer who testified against her at trial was not competent to testify under *Ohio Rev. Code Ann. §§ 4549.14, 4549.16*, or *Ohio R. Evid. 601(C)* because he was not driving a marked vehicle and was not wearing a legally distinctive uniform. In affirming the judgment below, the court held that a police officer who, while engaged in an assignment unrelated to the enforcement of traffic laws, observed a violation of such laws and made an arrest therefore, was not precluded by *Ohio Rev. Code Ann. §§ 4549.14, 4549.16* from testifying with regard to such violation on the basis that he was wearing plain clothes and driving an unmarked vehicle at the time of the arrest. Since the testifying officer was not on duty for the exclusive or main duty of enforcing motor vehicle and traffic laws, he was competent to testify as a witness at defendant's trial for the speeding violation.

**OUTCOME:** The court affirmed the trial court's judgment.

**CORE TERMS:** arrest, driving, traffic, detective, competent to testify, arrested, motor vehicle, assignments of error, unmarked, speeding, distinctive, enforcing, police officer, narcotics, speed, person charged, main purpose, wearing,

misdemeanor, punishable, arresting, violator, motion to suppress, police vehicle, competency, violating, observe, dressed, driver, clothes

**OPINION:**

KRUPANSKY, J.:

On June 6, 1985 a complaint was issued in the Euclid Municipal Court against defendant Sondra Bagley for violating Euclid City Ordinance 333.03, viz., speeding on the freeway. Defendant plead not guilty to the charge. On June 14, 1985 defendant filed a motion to suppress testimony evidence. On June 20, 1985 following a hearing on defendant's motion to suppress the trial court overruled defendant's motion and proceeded to hear the case on its merits. At the conclusion of the trial, the trial court found defendant guilty, imposed a fine of \$ 100 plus costs and suspended defendant's driver's license for thirty (30) days. Defendant filed a timely appeal on June 21, 1985.

Officer David H. Schervish, [\*2] the only witness who testified at trial, provided the following information: On June 6, 1985 at approximately 2:40 p.m. Officer David H. Schervish, a narcotics and vice detective for the City of Euclid, and his partner, Detective Payne, were traveling on Interstate 90 (1890) when they observed a red vehicle (driven by appellant) traveling westbound on I-90 at a high rate of speed, weaving in and out of the lanes. Officers Schervish and Payne were driving a 1982 red four-door Ford, an unmarked detective vehicle. The officers were on duty in the narcotics and vice division; they were dressed in plain clothes, not police uniforms. Officers Schervish and Payne followed appellant for approximately one half mile. They determined appellant was driving at a speed of approximately 30 m.p.h. in an area with a 55 m.p.h. speed limit.

The officers arrested appellant for speeding.

The police vehicle had been subjected to a radar unit earlier that week and a certified calibration for the City of Euclid was imprinted on the dash of the police vehicle. At trial Officer Schervish stated if he observes individuals speeding he will arrest them.

I.

Appellant raises two assignments of error on appeal. [\*3] Since both assignments of error raise essentially the same issue, viz., whether Officer Schervish was competent to testify at trial under *R.C. 4549.14*, *R.C. 4549.16* and *Evid. R. 601(C)*, they will be addressed together. Appellant's assignments of error state as follows:

I. THE TESTIMONY OF A LAW ENFORCEMENT OFFICER, BOTH AS TO EVIDENCE PRIOR TO AND AFTER ARREST, OF A PERSON CHARGED WITH A TRAFFIC VIOLATION, IS INCOMPETENT UNDER *R.C. 4549.14*, *4549.16* AND *EVID. R. 601 (C)* WHERE AT THE TIME OF THE ARREST SUCH OFFICER WAS NOT USING A PROPERLY MARKED MOTOR VEHICLE OR WEARING A LEGALLY DISTINCTIVE UNIFORM AS DEFINED BY STATUTE.

II. THE TRIAL COURT ERRED IN DETERMINING (sic) THAT AN EXCEPTION TO *R.C. 4549.14, 4549.16* AND *EVID. R. 601(C)* EXISTS WHEN THE OFFICER ON DUTY DOES NOT HAVE AS HIS MAIN DUTY THE ENFORCING OF TRAFFIC LAWS AND IS COMPETENT TO TESTIFY AND THE COURT DOES NOT PERMIT THE DEFENDANT TO INQUIRE INTO THE SCOPE OF THE OFFICER'S DUTIES TO DETERMINE THE EXTENT OF HIS DUTY TO ENFORCE THE TRAFFIC LAWS.

Appellant's two assignments of error are not well taken.

*Evid. R. 601(C)*, [HN1] which deals with the competency of witnesses, reads as follows:

while on [\*4] duty for the exclusive or main purpose of enforcing traffic laws, arresting or assisting in the arrest of a person charged with a traffic violation punishable as a misdemeanor where the officer at the time of the arrest was not using a properly marked motor vehicle as defined by statute or was not wearing a legally distinctive uniform as defined by statute." (Emphasis added)

*R.C. 4549.14*, [HN2] which deals with the competency of a police officer testifying as a witness, states as follows:

"Any officer arresting, or participating or assisting in the arrest of, a person charged with violating the motor vehicle or traffic laws of this state, provided the offense is punishable as a misdemeanor, such officer being on duty exclusively or for the main purpose of enforcing such laws, is incompetent to testify as a witness in any prosecution against such arrested person if such officer at the time of the arrest was using a motor vehicle not marked in accordance with *section 4549.13 of the Revised Code*." (Emphasis added)

Similarly, *R.C. 4549.16* provides as follows:

"Any officer arresting, or participating or assisting in the arrest of, a person [\*5] charged with violating the motor vehicle or traffic laws of this state, provided the offense is punishable as a misdemeanor, such officer being on duty exclusively or for the main purpose of enforcing such laws is incompetent to testify as a witness in any prosecution against such arrested person if such officer at the time of the arrest was not wearing a distinctive uniform in accordance with *section 4549.15 of the Revised Code*." (Emphasis added)

The precise issue presented in the case sub judice was decided in *Columbus v. Stump* (1974), 41 Ohio App. 2d 81. In *Columbus v. Stump*, supra, an on duty police officer was positioned outside a bar for the purpose of observing illicit activities and observed Stump driving in a reckless fashion. The officer pursued Stump who was subsequently arrested by another police officer when the pursuit ended in an accident. The officer was not dressed in a distinctive police uniform and was driving an unmarked police vehicle. The Court of Appeals determined the officer was competent to testify concerning the traffic violation at Stump's trial and held as follows:

[HN3] "A police officer who, while engaged in an [\*6] assignment unrelated to the enforcement of traffic laws, observes a violation of such laws and makes an arrest therefore will not be precluded by *R.C. 4549.14* and *4549.16* from testifying with regard to such violation on the basis that he was wearing plain clothes and driving an unmarked vehicle at the time of arrest."

See also: *State v. Thobe* (1961), 191 N.E. 2d 182.

Similarly, in the case sub judice it is undisputed on June 6, 1985 Officer Schervish was driving an unmarked detective vehicle and was dressed in plain clothes, not a distinctive police uniform, when he arrested appellant.

However, the evidence also establishes Officer Schervish was on duty as a narcotics and vice detective on June 6, 1985. Since Officer Schervish was not on duty for the exclusive or main duty of enforcing motor vehicle and traffic laws, he was competent to testify as a witness at appellant's trial for the speed violation.

Furthermore, the legislative intent in enacting *R.C. 4549.14* and *R.C. 4549.16* was twofold: (1) to promote uniformity in traffic control and regulations to make driving safer in all of the political divisions in Ohio and (2) to curb speed traps operated by municipal [\*7] and township police. *City of Dayton v. Adams* (1967), Ohio St. 2d 89. These statutory provisions were not enacted to create the absurd result, whereby an on-duty plain-clothes narcotics detective driving an unmarked vehicle could observe a drunk driver driving in a reckless and dangerous manner, then forego the arrest of the driver since the officer would not be competent to testify against the driver at trial. It is important to note that *R.C. 4549.14* and *R.C. 4549.16* do not prevent the officer from making the arrest of the violator, but rather, render him impotent to testify at trial to sustain the arrest. In effect it emasculates the purpose of the arrest.

Appellant further contends if Officer Schervish is competent to testify then the trial court erred when it refused to permit her counsel to inquire of Officer Schervish on cross-examination as to how many other traffic violators he had arrested on the day he arrested appellant and how many traffic violators he had arrested with that particular detective car. Appellant's contention lacks merit.

Appellant's counsel's inquiries were irrelevant to the central issue at trial, viz., whether appellant was guilty of speeding [\*8] on the freeway. *Evid. R. 401*, [HN4] which defines relevancy, provides as follows:

"'Relevant evidence' means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence."

*Evid. R. 482*, [HN5] which deals with the admissibility of relevant evidence, states in pertinent party as follows:

"Evidence which is not relevant is not admissible."

Prior to the commencement of appellant's trial the trial court held a hearing on appellant's motion to suppress Officer Schervish's testimony and determined Schervish was competent to testify at appellant's trial. Since the issue of Officer Schervish's competency to testify was resolved before appellant's trial began, the only issue at trial was the determination of appellant's guilt. Counsel's inquiries were not relevant to the crucial question of whether appellant was speeding. Therefore, the trial court did not err when the court refused to allow counsel to pursue that line of questioning on cross-examination.

For these reasons, appellant's assignments of error are overruled.

**COURT OF APPEALS OF OHIO, ELEVENTH DISTRICT, ASHTABULA  
COUNTY**

*1984 Ohio App. LEXIS 10494*

**July 27, 1984**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal appeal from the Municipal Court, Case No. T-13779

**DISPOSITION:**

JUDGMENT: AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed the judgment of the Municipal Court of Conneaut (Ohio), which found him guilty of speeding in violation of Conneaut, Ohio Mun. Ordinance 333.03.

**OVERVIEW:** Defendant was charged with operating his vehicle at 55 miles per hour in a 35 mile per hour zone. The issue before the court was whether the prosecution established, by use of the officer's testimony, that the K-55 radar unit used to measure defendant's speed was operating properly at the time of defendant's arrest for speeding. The court affirmed. The court, upon reviewing the transcript of the officer's testimony at trial, found that the officer established that the radar unit was accurate and functioning properly at the time that defendant's speed was checked. The court concluded that the trial court had before it substantial and reliable evidence of defendant's violation of the municipal speeding ordinance.

**OUTCOME:** The court affirmed the trial court's judgment.

**CORE TERMS:** speed, radar, mile, thirty-five, switch, manufacturer, functioning, fifty-five, machine, tuning, target, truck, fork, speeding, struck, eighty, windows, front, assignments of error, motor vehicles, defendant-appellant, calibration, testifying, thirty-two, stationary, speedometer, eastbound, observe, screen, patrol

DAHLING, J.

**OPINION:**

OPINION

This is an appeal from a judgment of the Municipal Court of Conneaut, wherein, after a bench trial, the defendant-appellant was found guilty of speeding. He was fined \$50 and costs.

On March 26, 1983, defendant-appellant was charged with operating a motor vehicle in the City of Conneaut in excess of the posted speed limit. The officer, using a K-55 radar unit, clocked the appellant travelling fifty-five miles per hour in a thirty-five mile per hour zone.

The appellant was charged with violation of Conneaut Municipal Ordinance 333.03. After trial to the court, the appellant was found guilty. This appeal followed.

The assignments of error are as follows:

I. THE TRIAL COURT ERRED IN ACCEPTING EXPERT AND TECHNICAL EVIDENTIARY [\*2] TESTIMONY ON THE USE OF RADAR IN A SPEEDING PROSECUTION OVER THE TIMELY OBJECTION OF DEFENSE COUNSEL WHERE THE COURT DID NOT TAKE JUDICIAL NOTICE ON THE RECORD OF THE ACCURACY AND ACCEPTANCE OF THE USE OF RADAR IN OHIO.

II. THE TRIAL COURT ERRED IN ACCEPTING THE ARRESTING OFFICER'S TESTIMONY AS TO HIS KNOWLEDGE AND USE OF THE K-55 M.P.H. RADAR UNIT WHEN IN FACT HE HAD NO KNOWLEDGE OR COMPREHENSION OF WHAT HE WAS ATTEMPTING TO DO.

The assignments of error presented by the appellant will be considered together. They are without merit.

State v. Bonar (1973), 40 Ohio App. 2d 360, states in syllabus one:

[HN1] "In a prosecution involving speed, where the sole evidence is a reading secured by the use of a radar type speedmeter, it is the obligation of the prosecution to establish prima facie that the radar type speedmeter was accurate and functioning properly at the time the accused's speed was checked and a failure of such proof shall cause an insufficiency of evidence to support conviction."

Thus, the primary issue is whether the prosecution established, by use of the officer's testimony, that the K-55 radar unit was operating properly at the time and on the date of the arrest [\*3] of the appellant. The transcript reveals that the officer met the Bonar test. He stated:

"\* \* \*

"A. To make sure that the unit is inserted into the lighter of the car. To make sure there is contact and there is juice getting to the unit. After that, we go through a test of the unit which consist of turning the unit on, making sure it is functioning. There is a switch to the right of the switch that turns the unit on.

MR. PAINTER:

Objection again, your Honor.

JUDGE TITTLE:

Overruled.

A. Which, when you push it in the down position the lights, all of the lights, on the radar unit to insure that all lights are functioning, and the manufacturer has a set calibration.

MR. PAINTER:

Objection again, your Honor.

JUDGE TITTLE:

You don't have to object, you have a continuing objection going. It is this court's ruling that this man can testify as to what he did. You may proceed.

A. And at which time I raised the switch and it should show a designated number in each of the windows. There are two windows in the unit which show a target speed and a patrol speed and the manufacturer sets those at thirty-two.

MR. PAINTER:

Objection, your Honor. This is not, [\*4] he is not testifying what he did, he is testifying what the manufacturer did, and this is hearsay.

JUDGE TITTLE:

Overruled.

A. And at which time I have checked the calibrations by flipping the switch up according to manufacturers specifications. Both windows lit [sic] up with the thirty-two. After that, there is another switch in this in case your moving and also stationary. If flipped the switch into the moving mode, and I used two tuning forks to check the operation of the machine. The one is a thirty-five mile an hour tuning fork. When it is struck and put in front of the machine, it shows the speed of thirty-five. Also, I have one that's set at eighty miles an hour, and when it's struck, put up in front of the screen, I will get a eighty mile an hour reading. In the moving made, I struck both of the tuning forks and

put them into the screen to show the operation, it was functioning properly.

MR. PAINTER:

Objection.

JUDGE TITTLE:

Sustained as to that conclusion.

A. With the two tuning forks in front of it, it gives a reading of thirty-five--

MR. PAINTER:

Objection, a continuing objection.

JUDGE TITTLE:

Noted. Overruled.

A. The thirty-five shows [\*5] in the patrol speed and forty-five will show in the target speed. I then put the machine into the stationary mode and again used the tuning forks, showing a thirty-five in a target speed and the eighty in the target speed. Going by the procedure, the machine was working properly. Over at the right hand there is a violumn control for the audio portion of the radar. I turned it up, making sure it was working properly. I could hear it working.

MR. PAINTER:

Objection. It's a conclusion that it is working properly.

JUDGE TITLE:

Overruled.

A. And at that point, I was, I set my radar unit into action.

MR. NAYLOR:

Q. After you completed all of these procedures, what, if anything, did you determine?

A. I determined that the radar unit was working.

MR. PAINTER:

Objection.

JUDGE TITLE:

Overruled.

MR. NAYLOR:

Q. What, if anything, did you observe with respect to the motor vehicles about 9:30 P.M. in the date of question?

A. I observed two motor vehicles eastbound on East Main Road. One was a car and the other was an old rumble

type vehicle, sitting a little higher than the car. Both vehicles were eastbound, coming from the Furnace Road area. The truck [\*6] vehicle was behind a car vehicle, at that point I read the speed of the car vehicle to be around thirty-eight miles an hour, at which time the truck vehicle pulled into the outer lane and began passing the care just before Peach Street there, and at Bell Street. The truck type vehicle was in the outside lane passing the car and I read the speed to be fifty-five miles an hour, which I locked on the radar.

\* \* \*"

The officer further testified as to his observation:

"Q. So what period, over what distance did you observe the truck vehicle, total?

A. I would say about three quarters of a mile.

Q. Based on your observation, were you able to form an opinion on the speed?

A. Yes.

Q. What was that opinion?

A. My opinion is that the vehicle was going fifty-five miles an hour."

Also, the appellant admitted to the officer that he was going over the limit:

"A. Yes. I asked him for his driver's license and for his registration. I advised Mr. Case what he was being stopped for. I advised him he was being stopped for speeding. He asked me how fast was he going and I said fifty-five in a thirty-five at which time Mr. Case said I was going over the limit, but I wasn't [\*7] going that fast. I said--\* \* \*"

It is clear that the court had before it substantial and reliable evidence of the appellant's violation of the speeding ordinance and his conviction was without error. Counsel for the appellant is to be commended for his zeal, but judgment must be affirmed.

Judgment affirmed.

**July 27, 1984**

**PRIOR HISTORY:** [\*1]

CHARACTER OF PROCEEDINGS: Criminal appeal from the Municipal Court, Case No. T-13779

**DISPOSITION:**

JUDGMENT: AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed the judgment of the Municipal Court of Conneaut (Ohio), which found him guilty of speeding in violation of Conneaut, Ohio Mun. Ordinance 333.03.

**OVERVIEW:** Defendant was charged with operating his vehicle at 55 miles per hour in a 35 mile per hour zone. The issue before the court was whether the prosecution established, by use of the officer's testimony, that the K-55 radar unit used to measure defendant's speed was operating properly at the time of defendant's arrest for speeding. The court affirmed. The court, upon reviewing the transcript of the officer's testimony at trial, found that the officer established that the radar unit was accurate and functioning properly at the time that defendant's speed was checked. The court concluded that the trial court had before it substantial and reliable evidence of defendant's violation of the municipal speeding ordinance.

**OUTCOME:** The court affirmed the trial court's judgment.

**CORE TERMS:** speed, radar, mile, thirty-five, switch, manufacturer, functioning, fifty-five, machine, tuning, target, truck, fork, speeding, struck, eighty, windows, front, assignments of error, motor vehicles, defendant-appellant, calibration, testifying, thirty-two, stationary, speedometer, eastbound, observe, screen, patrol

**OPINION BY:**

DAHLING, J.

**OPINION:**

OPINION

This is an appeal from a judgment of the Municipal Court of Conneaut, wherein, after a bench trial, the defendant-appellant was found guilty of speeding. He was fined \$50 and costs.

On March 26, 1983, defendant-appellant was charged with operating a motor vehicle in the City of Conneaut in excess of the posted speed limit. The officer, using a K-55 radar unit, clocked the appellant travelling fifty-five miles per hour in a thirty-five mile per hour zone.

The appellant was charged with violation of Conneaut Municipal Ordinance 333.03. After trial to the court, the appellant was found guilty. This appeal followed.

The assignments of error are as follows:

I. THE TRIAL COURT ERRED IN ACCEPTING EXPERT AND TECHNICAL EVIDENTIARY [\*2] TESTIMONY ON THE USE OF RADAR IN A SPEEDING PROSECUTION OVER THE TIMELY OBJECTION OF DEFENSE COUNSEL WHERE THE COURT DID NOT TAKE JUDICIAL NOTICE ON THE RECORD OF THE ACCURACY AND ACCEPTANCE OF THE USE OF RADAR IN OHIO.

II. THE TRIAL COURT ERRED IN ACCEPTING THE ARRESTING OFFICER'S TESTIMONY AS TO HIS KNOWLEDGE AND USE OF THE K-55 M.P.H. RADAR UNIT WHEN IN FACT HE HAD NO KNOWLEDGE OR COMPREHENSION OF WHAT HE WAS ATTEMPTING TO DO.

The assignments of error presented by the appellant will be considered together. They are without merit.

State v. Bonar (1973), 40 Ohio App. 2d 360, states in syllabus one:

[HN1] "In a prosecution involving speed, where the sole evidence is a reading secured by the use of a radar type speedmeter, it is the obligation of the prosecution to establish prima facie that the radar type speedmeter was accurate and functioning properly at the time the accused's speed was checked and a failure of such proof shall cause an insufficiency of evidence to support conviction."

Thus, the primary issue is whether the prosecution established, by use of the officer's testimony, that the K-55 radar unit was operating properly at the time and on the date of the arrest [\*3] of the appellant. The transcript reveals that the officer met the Bonar test. He stated:

"\* \* \*

"A. To make sure that the unit is inserted into the lighter of the car. To make sure there is contact and there is juice getting to the unit. After that, we go through a test of the unit which consist of turning the unit on, making sure it is functioning. There is a switch to the right of the switch that turns the unit on.

MR. PAINTER:

Objection again, your Honor.

JUDGE TITTLE:

Overruled.

A. Which, when you push it in the down position the lights, all of the lights, on the radar unit to insure that all lights are functioning, and the manufacturer has a set calibration.

MR. PAINTER:

**September 21, 1981**

**DISPOSITION:** [\*1]

Judgment Affirmed in part and reversed in part

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged a judgment from the Conneaut Municipal Court (Ohio) wherein defendant was found guilty of two charges of speeding and one charge of an expired license plate. A police officer testified as to his observation of defendant's speeding and the clocking defendant's vehicle on a radar gun. The officer observed that defendant had purchased new license plates, which were lying on his dashboard, but had failed to replace the old ones.

**OVERVIEW:** The first speeding charge involved the officer having clocked defendant with a radar gun. At trial, the officer testified extensively as to the procedures used to calibrate the radar gun and also qualified as to being competent to operate the radar. The second speeding charge involving an incident where the officer testified that he had followed defendant and again clocked him with the radar gun as exceeding the lawful speed limit. Defendant testified that he had informed the officer that the reason defendant had not replaced the expired license plates was because he could not get them off. Specifically, defendant was bound for his father's garage to burn off the screws with a torch when the officer stopped defendant's vehicle. On appeal, defendant's main arguments were manifest weight and that the arresting officer was not qualified to use the radar gun. The court held that: (1) the two speeding convictions were clearly proven beyond a reasonable doubt and were not against the manifest weight of the evidence; and (2) because the material facts as to the expired license plates charges were not in dispute, the trial court should have granted a judgment of acquittal on that charge.

**OUTCOME:** The court affirmed the two speeding convictions. Finding that the trial court should have granted a judgment of acquittal on the expired license plates charge as the material facts were not in dispute, the court reversed and acquitted defendant as to that charge.

**CORE TERMS:** license, plate, speeding, speed, window, radar, traveling, target, mph, stop sign, calibration, distance, driver, conversation, viaduct, clock, plug, gun, pickup truck, high rate, expired, registration, windshield, stationary, suspended, dashboard, manifest, clocking, gaining, pulling

**OPINION:**

## OPINION

This is an appeal from a judgment of the Conneaut Municipal Court wherein the defendant was found guilty of two charges of Speeding and one charge of Expired License Plate.

The defendant has presented Assignments of Error as to all charges.

The Assignments of Error as to the speeding charges are without merit and the Assignments of Error as to the expired license is with merit.

The first speeding charge was for an incident on March 1, 1980. The police officer charged defendant with going 50 m.p.h. in a 35 m.p.h. zone. The officer testified as to both his observation and the clocking on the K-55 radar gun. He also qualified as to being competent to operate the radar.

Defendant's main arguments are manifest weight and that the arresting officer, Thomas Robinson, was not [\*2] qualified to use the radar gun.

Officer Robinson testified as follows as to the K-55 radar gun:

"Q. Could you describe the procedure that you use to calibrate it?"

A. Okay. When we put the radar in the patrol vehicle, we plug in the unit, plug in the scope, which is the antenna, into the unit where it has the target and everything on it. We turn the unit on and we use the built-in varification calibration. We turn to the moving mode, turn the switch up, which gives you a 32 in both windows, which is the patrol window and also the target window. We turn the switch down, which tests all the lights in the unit, get an 88 and 188, from the respective windows. And that's after that, and then take it and put it on the stationary road, strike the tunin fork, being a 50 mph tuning fork, plier plug the antenna 'til you reach 50 mph cable controls through the target window, which would verify give calibration.

Q. And what does all this establish, if anything?

A. This establishes that we have verified the calibration to be correct and it is operating properly.

Q. And was this procedure utilized prior to the hour of 11 a.m., on March 1?

A. Yes, sir, it was.

Q. [\*3] And when is that.

A. 7 a.m., beginning of the shift.

Q. Who did that?

A. I did.

Q. Do you recall where you were when you did that?

A. In the police lot.

Q. And what did you determine, if anything?

A. I determined that it was operating properly.

Q. And what, if anything, did you observe at approximately 11:08 a.m., on that particular date, March 1?

A. Well, I was stationary at Peterson's Gas Station, and I observed a red 1978 pickup truck, Ford, traveling eastbound, passing a vehicle on Route 20, East Main Road, and I had the audio turned up on the radar unit and I could hear the unit with a high-pitched sound as it was locking in on the target, which was the Ford pickup truck. As it picked up near Furnace Road, the vehicle, the target locked in at 50 mph. And as the vehicle went by me, it continued to travel at the speed. I observed it, also, traveling at a high rate of speed. I pulled out of the lot, pursued the vehicle, and stopped the vehicle at East Main and Thompson Road. At that time,--

Q. That's in the City of Conneaut?

A. Yes, sir, that is in the City of Conneaut."

We conclude from the above and other testimony relating [\*4] to this arrest that the Assignments of Error are without merit.

The second charge was on April 3, 1980. Officer Robinson testified that he followed behind defendant at about a thirty (30) foot distance and clocked him at 60 m.p.h. in a 25 m.p.h. zone.

His testimony, in part, is as follows:

"THE COURT: Would you describe to the Court, how you secured this clock on the vehicle?

A. Yes, sir. The moving clock I was right behind Mr. Case's vehicle, I had myself--I had approximately a 25-30 foot distance from Mr. Case's vehicle. I was traveling the same speed he was. He was not gaining. I was not gaining on his vehicle. He was not pulling away from me. And that's when I got the 60 mph clocking.

Q. Over what distance was this clock secured?

A. This is approximately midpoint across the viaduct to the end of the viaduct, to the end of the viaduct at which time he was still increasing his speed. And I turned on my lights to stop the vehicle.

Q. Where was the vehicle stopped?

A. I stopped the vehicle across from Bartone's Gas Station which would be East Main, Old Main.

Q. Over what distance would that have been?

A. A tenth of a mile.

Q. And did you--Based [\*5] on your observation and your experience--Strike that.

Were you able to--The unit were operating, in calibration? Checked for the accuracy of speed?

A. The speedometer?

Q. Yes.

A. I do not know.

Q. Based on your observations and experience, are you able to form an opinion as to the speed of the vehicle operated by the defendant?

A. Yes.

Q. And what was that?

A. I believe, the vehicle was traveling around 60 mph.

Q. And once you stopped the vehicle, did you have any conversation with the defendant.

A. Yes, sir, I did.

Q. Where was the conversation?

A. That was on East Main Road by Old Main Road.

Q. Who was present, at that time?

A. Just myself and Mr. Case.

Q. Who commenced that conversation?

A. I did.

Q. And what did you say?

A. I asked Mr. Case for his driver's license and registration again. And again, he stated that I knew who he was and I asked him, I said, 'I still need your registration and I still need your driver's license.' I advised him of the violation. Mr. Case said, 'Okay' I advised him. When Mr. Case said, 'Okay'. He says he wanted a break, that he did not need the ticket, because his driver's [\*6] license was going to be suspended. I advised him that he failed to stop for the stop sign, pulling right out in front of Main could have caused an accident, also that his high rate of speed, I did not feel was called for in that area. And Mr. Case stated that he was late to pick up a load, that he was a truck driver. And I advised Mr. Case that--to stay in his vehicle and I would beright with him. I was going to issue a citation for the stop sign and issue a citation for the speeding. At that time, I returned to my patrol unit. I had started the citation, at which time, Mr. Case came back to my unit, got in on the passenger side, and Mr. Case, more or less, pleaded with me to give him a break on the speeding violation because he was going to end up with his license being suspended. I told him that I could not give a break on the speeding. He had four speeding violations by different police. I told him I would give him a break on the stop sign. So I gave him a verbal warning for the stop sign and issued a citation for the speeding. He thanked me for that, I gave him the citation, and he went on his way."

The Assignments of Error are that the State failed to prove [\*7] the essential elements beyond a reasonable doubt, and manifest weight. The Assignments of Error are obviously without merit.

The other charge was that defendant had purchased new license plates but simply had failed to take the old plates off and put the new plates on. He had the new laying on the dashboard.

The defendant testified as follows:

"A. The day before March 1, I come--I got home from Baltimore, I think, Maryland. I come home it was about, 10 o'clock in the morning, when I got home. I stopped by the AAA, bought my license plates, went home. It was a Friday.

Q. Okay. And where did you put your license plates?

A. On the dashboard, of my pickup.

Q. Were they on the dashboard or were they standing up in the window? The windshield?

A. They were kind of--I had them propped up. I have an air freshener, it's about this long, it's in a plastic container. They were kind of standing up on it, not actually standing up in the windshield, but leaning against this car.

Q. All right. Let the record show, that Mr. Case motioned that there's a box-like cube, of approximately 8 inches, on his dash, which was supporting the license plates; is that true?

A. [\*8] Yes, it is.

Q. Then why did you not install the license plates on your truck?

A. The license plates that were on my truck, I had put on when it was brand-new. The screws--The screw-type head on with 7/16 nuts behind them, and I tried to change them at home and I couldn't get the screws out. So I had to burn the plates in my dad's garage, in Albion, and I burned them off with a torch.

Q. And where were you bound for at the time you were stopped on March 1?

A. To Albion, Pennsylvania, to the garage.

Q. Did you ever tell the officer,--you've heard him testify to today, that you didn't put the license plates on, because you didn't have time?

A. No, I didn't tell him I didn't have time. I told him I couldn't get them off.

Q. You did tell him that?

A. Yes, I did."

In our opinion, the court should have granted a judgment of acquittal on this charge as the material facts are not in dispute.

In conclusion, the two speeding convictions are affirmed and the expired license conviction is reversed and as to this charge, defendant is acquitted.

## OPINION

This is an appeal from a judgment of the Conneaut Municipal Court wherein the defendant was found guilty of two charges of Speeding and one charge of Expired License Plate.

The defendant has presented Assignments of Error as to all charges.

The Assignments of Error as to the speeding charges are without merit and the Assignments of Error as to the expired license is with merit.

The first speeding charge was for an incident on March 1, 1980. The police officer charged defendant with going 50 m.p.h. in a 35 m.p.h. zone. The officer testified as to both his observation and the clocking on the K-55 radar gun. He also qualified as to being competent to operate the radar.

Defendant's main arguments are manifest weight and that the arresting officer, Thomas Robinson, was not [\*2] qualified to use the radar gun.

Officer Robinson testified as follows as to the K-55 radar gun:

"Q. Could you describe the procedure that you use to calibrate it?"

A. Okay. When we put the radar in the patrol vehicle, we plug in the unit, plug in the scope, which is the antenna, into the unit where it has the target and everything on it. We turn the unit on and we use the built-in varification calibration. We turn to the moving mode, turn the switch up, which gives you a 32 in both windows, which is the patrol window and also the target window. We turn the switch down, which tests all the lights in the unit, get an 88 and 188, from the respective windows. And that's after that, and then take it and put it on the stationary road, strike the tunin fork, being a 50 mph tuning fork, plier plug the antenna 'til you reach 50 mph cable controls through the target window, which would verify give calibration.

Q. And what does all this establish, if anything?

A. This establishes that we have verified the calibration to be correct and it is operating properly.

Q. And was this procedure utilized prior to the hour of 11 a.m., on March 1?

A. Yes, sir, it was.

Q. [\*3] And when is that.

A. 7 a.m., beginning of the shift.

Q. Who did that?

A. I did.

Q. Do you recall where you were when you did that?

A. In the police lot.

Q. And what did you determine, if anything?

A. I determined that it was operating properly.

Q. And what, if anything, did you observe at approximately 11:08 a.m., on that particular date, March 1?

A. Well, I was stationary at Peterson's Gas Station, and I observed a red 1978 pickup truck, Ford, traveling eastbound, passing a vehicle on Route 20, East Main Road, and I had the audio turned up on the radar unit and I could hear the unit with a high-pitched sound as it was locking in on the target, which was the Ford pickup truck. As it picked up near Furnace Road, the vehicle, the target locked in at 50 mph. And as the vehicle went by me, it continued to travel at the speed. I observed it, also, traveling at a high rate of speed. I pulled out of the lot, pursued the vehicle, and stopped the vehicle at East Main and Thompson Road. At that time,--

Q. That's in the City of Conneaut?

A. Yes, sir, that is in the City of Conneaut."

We conclude from the above and other testimony relating [\*4] to this arrest that the Assignments of Error are without merit.

The second charge was on April 3, 1980. Officer Robinson testified that he followed behind defendant at about a thirty (30) foot distance and clocked him at 60 m.p.h. in a 25 m.p.h. zone.

His testimony, in part, is as follows:

"THE COURT: Would you describe to the Court, how you secured this clock on the vehicle?

A. Yes, sir. The moving clock I was right behind Mr. Case's vehicle, I had myself--I had approximately a 25-30 foot distance from Mr. Case's vehicle. I was traveling the same speed he was. He was not gaining. I was not gaining on his vehicle. He was not pulling away from me. And that's when I got the 60 mph clocking.

Q. Over what distance was this clock secured?

A. This is approximately midpoint across the viaduct to the end of the viaduct, to the end of the viaduct at which time he was still increasing his speed. And I turned on my lights to stop the vehicle.

Q. Where was the vehicle stopped?

A. I stopped the vehicle across from Bartone's Gas Station which would be East Main, Old Main.

Q. Over what distance would that have been?

A. A tenth of a mile.

Q. And did you--Based [\*5] on your observation and your experience--Strike that.

Were you able to--The unit were operating, in calibration? Checked for the accuracy of speed?

A. The speedometer?

Q. Yes.

A. I do not know.

Q. Based on your observations and experience, are you able to form an opinion as to the speed of the vehicle operated by the defendant?

A. Yes.

Q. And what was that?

A. I believe, the vehicle was traveling around 60 mph.

Q. And once you stopped the vehicle, did you have any conversation with the defendant.

A. Yes, sir, I did.

Q. Where was the conversation?

A. That was on East Main Road by Old Main Road.

Q. Who was present, at that time?

A. Just myself and Mr. Case.

Q. Who commenced that conversation?

A. I did.

Q. And what did you say?

A. I asked Mr. Case for his driver's license and registration again. And again, he stated that I knew who he was and I asked him, I said, 'I still need your registration and I still need your driver's license.' I advised him of the violation. Mr. Case said, 'Okay' I advised him. When Mr. Case said, 'Okay'. He says he wanted a break, that he did not need the ticket, because his driver's [\*6] license was going to be suspended. I advised him that he failed to stop for the stop sign, pulling right out in front of Main could have caused an accident, also that his high rate of speed, I did not feel was called for in that area. And Mr. Case stated that he was late to pick up a load, that he was a truck driver. And I advised Mr. Case that--to stay in his vehicle and I would beright with him. I was going to issue a citation for the stop sign and issue a citation for the speeding. At that time, I returned to my patrol unit. I had started the citation, at which time, Mr. Case came back to my unit, got in on the passenger side, and Mr. Case, more or less, pleaded with me to give him a break on the speeding violation because he was going to end up with his license being suspended. I told him that I could not give a break on the speeding. He had four speeding violations by different police. I told him I would give him a break on the stop sign. So I gave him a verbal warning for the stop sign and issued a citation for the speeding. He thanked me for that, I gave him the citation, and he went on his way."

The Assignments of Error are that the State failed to prove [\*7] the essential elements beyond a reasonable doubt, and manifest weight. The Assignments of Error are obviously without merit.

The other charge was that defendant had purchased new license plates but simply had failed to take the old plates off and put the new plates on. He had the new laying on the dashboard.

The defendant testified as follows:

"A. The day before March 1, I come--I got home from Baltimore, I think, Maryland. I come home it was about, 10 o'clock in the morning, when I got home. I stopped by the AAA, bought my license plates, went home. It was a Friday.

Q. Okay. And where did you put your license plates?

A. On the dashboard, of my pickup.

Q. Were they on the dashboard or were they standing up in the window? The windshield?

A. They were kind of--I had them propped up. I have an air freshener, it's about this long, it's in a plastic container. They were kind of standing up on it, not actually standing up in the windshield, but leaning against this car.

Q. All right. Let the record show, that Mr. Case motioned that there's a box-like cube, of approximately 8 inches, on his dash, which was supporting the license plates; is that true?

A. [\*8] Yes, it is.

Q. Then why did you not install the license plates on your truck?

A. The license plates that were on my truck, I had put on when it was brand-new. The screws--The screw-type head on with 7/16 nuts behind them, and I tried to change them at home and I couldn't get the screws out. So I had to burn the plates in my dad's garage, in Albion, and I burned them off with a torch.

Q. And where were you bound for at the time you were stopped on March 1?

A. To Albion, Pennsylvania, to the garage.

Q. Did you ever tell the officer,--you've heard him testify to today, that you didn't put the license plates on, because you didn't have time?

A. No, I didn't tell him I didn't have time. I told him I couldn't get them off.

Q. You did tell him that?

A. Yes, I did."

In our opinion, the court should have granted a judgment of acquittal on this charge as the material facts are not in dispute.

In conclusion, the two speeding convictions are affirmed and the expired license conviction is reversed and as to this charge, defendant is acquitted.

**NO. 372**

**COURT OF APPEALS OF OHIO, FOURTH APPELLATE DISTRICT,  
ADAMS COUNTY**

*1981 Ohio App. LEXIS 11934*

**June 12, 1981**

**DISPOSITION:** [\*1]

JUDGMENT AFFIRMED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of a judgment from the County Court of Adams County (Ohio), which found him guilty by the trial court of driving in excess of the 55 mph speed limit.

**OVERVIEW:** All four of defendant's assignments of error revolved around the real issue of whether or not there was sufficient evidence to convict him of speeding based upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle. The court held that it the MR-7 radar device worked on the scientific principle known as the "Doppler effect," and the validity and accuracy of this scientific principle was a proper subject for judicial notice. The court held that once judicial notice was taken, as long as the court satisfied that the officer had visually identified a speed violation, the monitor indicated a violation, and the audio indicated that the target vehicle was the violator, a conviction based on the reading of the MR-7 was proper.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** radar, speed, assignments of error, judicial notice, reliability, accuracy, speeding, target, evidence obtained, expert testimony, patrolman, scientific principle, patrol vehicle, mounted, assignment of error, properly qualified, prejudicial error, good condition, set forth, calibration, dependable, convicted, violator, monitor, audio

**LexisNexis(R) Headnotes**

*Evidence > Scientific Evidence > General Overview*

[HN1] The MR-7 moving radar device, using the Doppler effect, is acceptable as dependable for its proposed purpose.

*Evidence > Judicial Notice > General Overview*

***Evidence > Scientific Evidence > General Overview******Evidence > Testimony > Experts > Criminal Trials***

[HN2] An MR-7 radar device works on the scientific principle known as the "Doppler effect." The validity and accuracy of this scientific principle is a proper subject for judicial notice. Due to the fact that a trial court may take judicial notice of the reliability and accuracy of the MR-7 radar unit, expert testimony on this issue would be merely cumulative and needless. Expert testimony upon the reliability and accuracy of the MR-7 radar unit is not a necessary element to a speeding conviction.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Scientific Evidence > General Overview***

[HN3] The essential elements of a reliable radar reading are: In order to sustain a citation for a radar speed violation the following elements must concur in point of time: (1) The officer must visually identify a speed violation; (2) the monitor must indicate a violation, and, (3) the audio must indicate that the target vehicle is the violator. If the visual identification, monitor reading, and audio all correspond to confirm that the violator was the target vehicle and it is established that the target vehicle was driven by the defendant, the officer has validly cited the driver of the target vehicle for a speed violation. The absence of any of the above elements defeats the validity of the citation. If all of those elements are met, any possibility of misreading is eliminated.

**JUDGES:**

Grey, P. J., Concur In Judgment:

Stephenson, J., Concur:

**OPINION BY:**

ABELE, J.

**OPINION:****OPINION**

This is an appeal from the County Court of Adams County. Appellant, John Cole, was found guilty by the trial court of driving in excess of the 55 mph speed limit, in violation of *R.C. 4511.21*. Appellant has timely filed his appeal and alleges four assignments of error.

"I. The trial court committed prejudicial error by not requiring an expert witness to testify the radar unit in question was in good condition for accurate work.

II. The trial court erred to the prejudice of defendant-appellant in that the decision and judgment dated October 5, 1979, was contrary to law as set forth in the decision.

III. The Defendant is prejudiced and denied due process of law when a trial court does not have a record upon which an appellate court can read and know what was said and by whom.

IV. The Trial Court committed prejudicial error when it found defendant guilty because the evidence as to the [\*2]

radar unit and qualifications of the officer were uncontroverted."

All four of Appellant's assignments of error revolve around the real issue of this appeal; that being whether or not there was sufficient evidence to convict appellant of speeding based upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle. In *State vs. Shelt* (1976), 46 *Ohio App. 2d* 115, 346 *N.E. 2d* 345, the Lucas County Court of Appeals held:

"Upon publication of this opinion, it may be judicially noticed that [HN1] the MR-7 moving radar device, using the Doppler effect, is acceptable as dependable for its proposed purpose." (pg 346)

Appellant argues that one may not be convicted upon evidence obtained from an MR-7 moving radar device unless all of the requirements set forth in the first paragraph of the *Shelt* syllabus are met:

"A person may be convicted of speeding solely upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle where the record contains (1) expert testimony of construction of the device and its method of operation in determining the speed of the approaching vehicle from the opposite direction, and (2) evidence that the [\*3] device is in good condition for accurate work, and (3) evidence that the officer using the device is one qualified for its use by training and experience."

We disagree with appellant's theory. [HN2] An MR-7 radar device works on the scientific principle known as the "Doppler effect". The validity and accuracy of this scientific principle is a proper subject for judicial notice. See *East Cleveland v. Ferrell* (1958), 168 *Ohio St.* 298, 154 *N.E. 2d* 630. In *Shelt*, judicial notice of the MR-7 as dependable for its proposed purpose as set out in *Ferrell* was pronounced. This ruling has been upheld and followed in *City of Akron v. Gray* (1979), 60 *Ohio Misc.* 68, 397 *N.E. 2d* 429 in determining the reliability of another radar unit, known as the K-55. Due to the fact that a trial court may take judicial notice of the reliability and accuracy of the MR-7 radar unit, we find that expert testimony on this issue would be merely cumulative and needless. Until a higher court decides otherwise, we hold that expert testimony upon the reliability and accuracy of the MR-7 radar unit is not a necessary element to a speeding conviction.

*Gray*, does however, set forth three additional [\*4] factors a court must consider in a speeding violation involving radar.

"Having accorded judicial notice to the accuracy and reliability of the K-55 unit in measuring what it purports to measure, this court must still consider: (1) Whether the unit was in good operating condition at the time of the instant use; (2) whether the operator of the unit was properly qualified, and; (3) whether the operator properly read the unit." (pg. 431)

From the evidence presented in the case sub judice, there is no question but that the MR-7 used to clock Appellant's speed had been properly calibrated by the use of the tuning fork certified for its calibration, and by the use of its internal calibration. Other tests were made by the patrolman to verify that the unit was working properly on the date of appellant's arrest. Evidence of any malfunction of this unit was neither presented nor noted.

The patrolman issuing the citation in the instant case had been thoroughly trained to use the MR-7 radar unit and had operated this particular MR-7 for over a month without any false readings. This court finds that the officer was properly qualified to operate the MR-7.

Finally, this court must consider [\*5] whether the use of the MR-7 on this occasion was proper. For the first time, [HN3] the essential elements of a reliable radar reading were specifically set forth in *Gray* as follows:

"In order to sustain a citation for a radar speed violation the following elements must concur in point of time: (1) The officer must visually identify a speed violation; (2) the monitor must indicate a violation, and, (3) the audio must indicate that the target vehicle is the violator.

If the visual identification, monitor reading, and audio all correspond to confirm that the violator was the target vehicle and it is established that the target vehicle was driven by the defendant, the officer has validly cited the driver of the target vehicle for a speed violation. The absence of any of the above elements defeats the validity of the citation. If all of those elements are met, any possibility of misreading is eliminated."

We find all of these elements present and therefore find that the patrolman in the instant case properly read the radar unit. Accordingly, all of appellant's assignments of error are not well taken and all are hereby overruled.

The judgment of the trial court is hereby affirmed.

**CONCUR BY:** [\*6]

STEPHENSON, J.

**CONCUR:**

Stephenson, J., - Concurring

I concur in the judgment and opinion insofar as it addresses the first, second and fourth assignments of error. The opinion does not, however, either address or discuss the third assignment of error wherein complaint is made of the adequacy of the transcript of proceedings prepared by the court reporter.

It appears that not all the testimony at trial was recorded. Whatever the reason, in such a situation it is incumbent upon the appellant to at least attempt to present such omitted testimony pursuant to *App. R. 9(C)* or, alternatively, to present the issues and facts in the appeal by an agreed statement pursuant to *App. R. 9(D)*. This not being done herein, appellant's third assignment of error must be overruled.

Stephenson, J., Concur:

**OPINION BY:**

ABELE, J.

**OPINION:****OPINION**

This is an appeal from the County Court of Adams County. Appellant, John Cole, was found guilty by the trial court of driving in excess of the 55 mph speed limit, in violation of *R.C. 4511.21*. Appellant has timely filed his appeal and alleges four assignments of error.

"I. The trial court committed prejudicial error by not requiring an expert witness to testify the radar unit in question was in good condition for accurate work.

II. The trial court erred to the prejudice of defendant-appellant in that the decision and judgment dated October 5, 1979, was contrary to law as set forth in the decision.

III. The Defendant is prejudiced and denied due process of law when a trial court does not have a record upon which an appellate court can read and know what was said and by whom.

IV. The Trial Court committed prejudicial error when it found defendant guilty because the evidence as to the [\*2]

radar unit and qualifications of the officer were uncontroverted."

All four of Appellant's assignments of error revolve around the real issue of this appeal; that being whether or not there was sufficient evidence to convict appellant of speeding based upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle. In *State vs. Shelt* (1976), 46 *Ohio App. 2d* 115, 346 *N.E. 2d* 345, the Lucas County Court of Appeals held:

"Upon publication of this opinion, it may be judicially noticed that [HN1] the MR-7 moving radar device, using the Doppler effect, is acceptable as dependable for its proposed purpose." (pg 346)

Appellant argues that one may not be convicted upon evidence obtained from an MR-7 moving radar device unless all of the requirements set forth in the first paragraph of the *Shelt* syllabus are met:

"A person may be convicted of speeding solely upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle where the record contains (1) expert testimony of construction of the device and its method of operation in determining the speed of the approaching vehicle from the opposite direction, and (2) evidence that the [\*3] device is in good condition for accurate work, and (3) evidence that the officer using the device is one qualified for its use by training and experience."

We disagree with appellant's theory. [HN2] An MR-7 radar device works on the scientific principle known as the "Doppler effect". The validity and accuracy of this scientific principle is a proper subject for judicial notice. See *East Cleveland v. Ferrell* (1958), 168 *Ohio St.* 298, 154 *N.E. 2d* 630. In *Shelt*, judicial notice of the MR-7 as dependable for its proposed purpose as set out in *Ferrell* was pronounced. This ruling has been upheld and followed in *City of Akron v. Gray* (1979), 60 *Ohio Misc.* 68, 397 *N.E. 2d* 429 in determining the reliability of another radar unit, known as the K-55. Due to the fact that a trial court may take judicial notice of the reliability and accuracy of the MR-7 radar unit, we find that expert testimony on this issue would be merely cumulative and needless. Until a higher court decides otherwise, we hold that expert testimony upon the reliability and accuracy of the MR-7 radar unit is not a necessary element to a speeding conviction.

*Gray*, does however, set forth three additional [\*4] factors a court must consider in a speeding violation involving radar.

"Having accorded judicial notice to the accuracy and reliability of the K-55 unit in measuring what it purports to measure, this court must still consider: (1) Whether the unit was in good operating condition at the time of the instant use; (2) whether the operator of the unit was properly qualified, and; (3) whether the operator properly read the unit." (pg. 431)

From the evidence presented in the case sub judice, there is no question but that the MR-7 used to clock Appellant's speed had been properly calibrated by the use of the tuning fork certified for its calibration, and by the use of its internal calibration. Other tests were made by the patrolman to verify that the unit was working properly on the date of appellant's arrest. Evidence of any malfunction of this unit was neither presented nor noted.

The patrolman issuing the citation in the instant case had been thoroughly trained to use the MR-7 radar unit and had operated this particular MR-7 for over a month without any false readings. This court finds that the officer was properly qualified to operate the MR-7.

Finally, this court must consider [\*5] whether the use of the MR-7 on this occasion was proper. For the first time, [HN3] the essential elements of a reliable radar reading were specifically set forth in *Gray* as follows:

"In order to sustain a citation for a radar speed violation the following elements must concur in point of time: (1) The officer must visually identify a speed violation; (2) the monitor must indicate a violation, and, (3) the audio must indicate that the target vehicle is the violator.

If the visual identification, monitor reading, and audio all correspond to confirm that the violator was the target vehicle and it is established that the target vehicle was driven by the defendant, the officer has validly cited the driver of the target vehicle for a speed violation. The absence of any of the above elements defeats the validity of the citation. If all of those elements are met, any possibility of misreading is eliminated."

We find all of these elements present and therefore find that the patrolman in the instant case properly read the radar unit. Accordingly, all of appellant's assignments of error are not well taken and all are hereby overruled.

The judgment of the trial court is hereby affirmed.

**CONCUR BY:** [\*6]

STEPHENSON, J.

**CONCUR:**

Stephenson, J., - Concurring

I concur in the judgment and opinion insofar as it addresses the first, second and fourth assignments of error. The opinion does not, however, either address or discuss the third assignment of error wherein complaint is made of the adequacy of the transcript of proceedings prepared by the court reporter.

It appears that not all the testimony at trial was recorded. Whatever the reason, in such a situation it is incumbent upon the appellant to at least attempt to present such omitted testimony pursuant to *App. R. 9(C)* or, alternatively, to present the issues and facts in the appeal by an agreed statement pursuant to *App. R. 9(D)*. This not being done herein, appellant's third assignment of error must be overruled.

**CITY OF NAPOLEON, PLAINTIFF-APPELLEE, v. PALE D. MILLER,  
DEFENDANT-APPELLANT****Case No. 7-79-17****Court of Appeals of Ohio, Third Appellate District, Henry County*****1980 Ohio App. LEXIS 9927*****April 1, 1980**

**NOTICE:** PURSUANT TO RULE 2(G) OF THE OHIO SUPREME COURT RULES FOR THE REPORTING OF OPINIONS, UNPUBLISHED OPINIONS MAY BE CITED SUBJECT TO CERTAIN RESTRAINTS, LIMITATIONS AND EXCEPTIONS.

**PRIOR HISTORY:** [\*1]

APPEAL: Court of Appeals for Henry County

**DISPOSITION:***Judgment Affirmed***CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged a judgment from the Napoleon Municipal Court (Ohio). Defendant was charged, convicted, and sentenced for a violation of Napoleon, Ohio, Ordinance § 73.10(C), specifically in operating his passenger car upon a public highway at a speed in excess of the lawful limit. The trial court allowed radar results to be entered into evidence.

**OVERVIEW:** At trial, defendant admitted that he accelerated his speed to go around a truck. A policeman testified that he observed defendant's vehicle traveling at a high rate of speed and verified his observation with a radar gun. The policeman further testified as to his training and experience and as to his testing and calibration of the radar unit. On appeal, defendant argued that the trial court erred in admitting the radar results into evidence, and that the verdict was against the manifest weight of the evidence. The court held that: (1) defendant's admissions against interest sufficiently proved conduct that was prima facie unlawful under § 73.10(C); (2) the establishment of a prima facie violation of the reasonable and proper speed limit placed on defendant the burden of going forward with evidence to overcome such prima facie case; (3) it was for the fact finder, the trial court, to determine what was reasonable and proper, having due regard to all the conditions and, in doing so, to determine the weight and credibility of the evidence; and (4) because the evidence was not conclusive in defendant's favor, the court was not permitted to find differently than did the trial court.

**OUTCOME:** The court affirmed the judgment from the trial court.

**CORE TERMS:** speed, miles, pick-up, truck, radar, intersection, clocked, street, front, assignment of error, prima facie, fast, lane, prima facie violation, motor vehicle, speed limit, twenty-five, conclusive, traveling, ordinance, policeman, vicinity, stepped, traffic, surface, highway, posted, night, width, brakes

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements*

[HN1] Napoleon, Ohio, Ordinance § 73.10 provides: (A) No person shall operate a motor vehicle at a speed greater or less than is reasonable or proper, having due regard to the traffic, surface, and width of the street or highway and any other conditions. (B) It is prima facie lawful, for the operator of a motor vehicle to operate the same at a speed not exceeding the following: (2) 25 miles per hour in all other portions of the municipal corporation; (C) It is prima facie unlawful for any person to exceed any of the speed limitations in § 73.10(B), (1), (2), (3), (4), (5), and (6).

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*

*Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > General Overview*

*Criminal Law & Procedure > Trials > Burdens of Proof > Defense*

[HN2] The establishment of a prima facie violation of a reasonable and proper speed limit places on a defendant the burden of going forward with evidence to overcome such prima facie case. It is for the fact finder, the trial court, to determine what is reasonable and proper, having due regard to all the conditions and, in doing so, to determine the weight and credibility of the evidence.

**JUDGES:**

GUERNSEY, P.J., COLE and MILLER, JJ, concur.

**OPINION BY:**

GUERNSEY

**OPINION:**

MEMORANDUM OPINION

GUERNSEY, P.J. Defendant, Dale D. Miller, was charged, convicted and sentenced in the Napoleon Municipal Court for a violation of Sec. 73.10(C) of the codified ordinances of Napoleon, specifically in operating his passenger car on April 9, 1979 upon a public highway, namely Woodlawn at Kolbe, at 9:45 P.M. at a speed of 49 miles per hour in a 25 miles per hour zone. He appeals, assigning error of the trial court (1) in allowing radar results to be entered into evidence, and (2) in that the verdict was against the manifest weight of the evidence revealing that he operated his vehicle in a manner reasonable for the conditions.

The ordinance which he is alleged to have violated [HN1] provides in parts pertinent to this appeal:

"(A) No person shall operate a motor vehicle at a speed greater or less than is reasonable or proper, having due

regard to the traffic, surface, and width of the street or highway [\*2] and any other conditions, \* \* \*.

"(B) It is prima facie lawful, \* \* \* for the operator of a motor vehicle to operate the same at a speed not exceeding the following:

"\* \* \*

"(2) Twenty-five miles per hour in all other portions of the municipal corporation, \* \* \*;

"\* \* \*

"(C) It is prima facie unlawful for any person to exceed any of the speed limitations in divisions (B), (1), (2), (3), (4), (5), and (6) \* \* \*.

"\* \* \*."

According to defendant's testimony on the night in question he was driving his car west on Clinton Street in the City of Napoleon; that at its intersection with Route 108, a north and south street, another street, Woodlawn Avenue, also leaves the intersection in a northwesterly direction at about a forty-five degree angle; that the intersection is controlled by a traffic light and defendant stopped in the left of two right lanes of Clinton Street expecting to proceed on Woodlawn Avenue when the light turned green; that to his right was a pickup truck driven by an elderly person stopped in the right lane of Clinton Street; that when the light turned green the driver of the pickup, instead of proceeding right on Route 108, as the defendant expected, proceeded on [\*3] Woodlawn; that Woodlawn narrowing to one lane the defendant "did step on it to get in front of him, to avoid from hitting anyone or saving my own neck at that point;" that the next thing the defendant looked in the mirror and saw red lights blinking; that "I'm sure that I didn't throw the brakes on as I was - stepped on it to go around this truck, this pick-up truck. I didn't slam the brakes on, which this car has a lot of power and you can get up to a high speed in a short period. And I let it sorta coast along and I have no idea, I'm sure I wasn't going no 49 mph across the railroad tracks;" that "I'm not qualified to say [how fast he reached when he passed the pick-up truck], because this type of car does have enough power to get around."

A Napoleon policeman testified to the effect that immediately prior to his stopping defendant he had been parked in a marked patrol car on Kolbe Street, just off Woodlawn, when he observed a vehicle traveling northwest on Woodlawn at what appeared to be a high rate of speed; that from the intersection to the point where the defendant was clocked Woodlawn Avenue is posted at 25 miles per hour, with no parking or passing permitted; that he clocked [\*4] the defendant's speed on a Custom HR8 hand held stationary radar device at 49 miles per hour; that he advised the defendant that he had clocked him on radar at 49 miles per hour and the defendant "stated that he had to go that fast to pass a pick-up truck that had turned in front of him;" and that he saw no other vehicles in the vicinity and specifically none in front of or following defendant. The policeman further testified as to his previous and current employment and as to his training, experience, knowledge of the theory and application, and as to his testing and calibration, of the radar unit which he used in apprehending the defendant.

There was also evidence that on the night in question the weather was clear and the pavement dry. There is some indication, though not conclusive, that the area in question was residential in character. The evidence was too indefinite for this Court to extract from the record unequivocal evidence as to intersecting streets and distances involved.

On this state of the evidence there is no affirmative showing of error affecting the judgment with relation to the allegations of the first assignment of error. The defendant testified on at least [\*5] two occasions that he "did step on it" and "stepped on it" to get around the pick-up truck and the police officer testified that when advised that he had been clocked at forty-nine miles per hour the defendant "stated that he had to *go that fast* to pass a pick-up truck that had turned in front of him." (Emphasis added.) This evidence constituted admissions against interest, and in and of itself was sufficient to prove conduct of the defendant that was prima facie unlawful, i.e., that he was traveling at 49 miles per hour, a speed of more than twenty-five miles per hour in an area governed by that speed limit and so posted, which is a

prima facie violation of the basic speed limitation that he not operate his vehicle at a speed greater than is reasonable or proper, having due regard to the traffic, surface, and width of the street or highway and any other conditions.

Under these circumstances there was no necessity of the prosecution establishing the validity of the radar reading and it is not therefore affirmatively shown that there was error having prejudicial effect on the judgment as assigned in the first assignment of error.

[HN2] The establishment, however, of a prima facie violation [\*6] of the reasonable and proper speed limit placed on the defendant the burden of going forward with evidence to overcome such prima facie case. It was for the fact finder, the trial court, to determine what was reasonable and proper, having due regard to all the conditions and, in doing so, to determine the weight and credibility of the evidence. There was evidence which would support a conclusion that the defendant's speed was not reasonable and proper even if he was passing the pick-up and, in view of the officer's testimony that there were no other vehicles in the vicinity the trial court could readily have even disbelieved the defendant's testimony as to his motivation to speed. In these circumstances, the evidence not being conclusive in defendant's favor, this court is not permitted to find differently than did the trial court and the second assignment of error is likewise without merit.

**April 1, 1980**

**NOTICE:** PURSUANT TO RULE 2(G) OF THE OHIO SUPREME COURT RULES FOR THE REPORTING OF OPINIONS, UNPUBLISHED OPINIONS MAY BE CITED SUBJECT TO CERTAIN RESTRAINTS, LIMITATIONS AND EXCEPTIONS.

**PRIOR HISTORY:** [\*1]

APPEAL: Court of Appeals for Henry County

**DISPOSITION:**

*Judgment Affirmed*

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged a judgment from the Napoleon Municipal Court (Ohio). Defendant was charged, convicted, and sentenced for a violation of Napoleon, Ohio, Ordinance § 73.10(C), specifically in operating his passenger car upon a public highway at a speed in excess of the lawful limit. The trial court allowed radar results to be entered into evidence.

**OVERVIEW:** At trial, defendant admitted that he accelerated his speed to go around a truck. A policeman testified that he observed defendant's vehicle traveling at a high rate of speed and verified his observation with a radar gun. The policeman further testified as to his training and experience and as to his testing and calibration of the radar unit. On appeal, defendant argued that the trial court erred in admitting the radar results into evidence, and that the verdict was against the manifest weight of the evidence. The court held that: (1) defendant's admissions against interest sufficiently proved conduct that was prima facie unlawful under § 73.10(C); (2) the establishment of a prima facie violation of the reasonable and proper speed limit placed on defendant the burden of going forward with evidence to overcome such prima facie case; (3) it was for the fact finder, the trial court, to determine what was reasonable and proper, having due regard to all the conditions and, in doing so, to determine the weight and credibility of the evidence; and (4) because the evidence was not conclusive in defendant's favor, the court was not permitted to find differently than did the trial court.

**OUTCOME:** The court affirmed the judgment from the trial court.

**CORE TERMS:** speed, miles, pick-up, truck, radar, intersection, clocked, street, front, assignment of error, prima facie, fast, lane, prima facie violation, motor vehicle, speed limit, twenty-five, conclusive, traveling, ordinance, policeman, vicinity, stepped, traffic, surface, highway, posted, night, width, brakes

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements*

[HN1] Napoleon, Ohio, Ordinance § 73.10 provides: (A) No person shall operate a motor vehicle at a speed greater or less than is reasonable or proper, having due regard to the traffic, surface, and width of the street or highway and any other conditions. (B) It is prima facie lawful, for the operator of a motor vehicle to operate the same at a speed not exceeding the following: (2) 25 miles per hour in all other portions of the municipal corporation; (C) It is prima facie unlawful for any person to exceed any of the speed limitations in § 73.10(B), (1), (2), (3), (4), (5), and (6).

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*

*Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > General Overview*

*Criminal Law & Procedure > Trials > Burdens of Proof > Defense*

[HN2] The establishment of a prima facie violation of a reasonable and proper speed limit places on a defendant the burden of going forward with evidence to overcome such prima facie case. It is for the fact finder, the trial court, to determine what is reasonable and proper, having due regard to all the conditions and, in doing so, to determine the weight and credibility of the evidence.

**COUNSEL:**

Mr. James Hensal, Counsel for Defendant-Appellant

Mr. Keith Muehlfeld, Law Director, counsel for Plaintiff-Appellee

**JUDGES:**

GUERNSEY, P.J., COLE and MILLER, JJ, concur.

**OPINION BY:**

GUERNSEY

**OPINION:**

MEMORANDUM OPINION

GUERNSEY, P.J. Defendant, Dale D. Miller, was charged, convicted and sentenced in the Napoleon Municipal Court for a violation of Sec. 73.10(C) of the codified ordinances of Napoleon, specifically in operating his passenger car on April 9, 1979 upon a public highway, namely Woodlawn at Kolbe, at 9:45 P.M. at a speed of 49 miles per hour in a 25 miles per hour zone. He appeals, assigning error of the trial court (1) in allowing radar results to be entered into evidence, and (2) in that the verdict was against the manifest weight of the evidence revealing that he operated his vehicle in a manner reasonable for the conditions.

The ordinance which he is alleged to have violated [HN1] provides in parts pertinent to this appeal:

"(A) No person shall operate a motor vehicle at a speed greater or less than is reasonable or proper, having due

regard to the traffic, surface, and width of the street or highway [\*2] and any other conditions, \* \* \*.

"(B) It is prima facie lawful, \* \* \* for the operator of a motor vehicle to operate the same at a speed not exceeding the following:

"\* \* \*

"(2) Twenty-five miles per hour in all other portions of the municipal corporation, \* \* \*;

"\* \* \*

"(C) It is prima facie unlawful for any person to exceed any of the speed limitations in divisions (B), (1), (2), (3), (4), (5), and (6) \* \* \*.

"\* \* \*."

According to defendant's testimony on the night in question he was driving his car west on Clinton Street in the City of Napoleon; that at its intersection with Route 108, a north and south street, another street, Woodlawn Avenue, also leaves the intersection in a northwesterly direction at about a forty-five degree angle; that the intersection is controlled by a traffic light and defendant stopped in the left of two right lanes of Clinton Street expecting to proceed on Woodlawn Avenue when the light turned green; that to his right was a pickup truck driven by an elderly person stopped in the right lane of Clinton Street; that when the light turned green the driver of the pickup, instead of proceeding right on Route 108, as the defendant expected, proceeded on [\*3] Woodlawn; that Woodlawn narrowing to one lane the defendant "did step on it to get in front of him, to avoid from hitting anyone or saving my own neck at that point;" that the next thing the defendant looked in the mirror and saw red lights blinking; that "I'm sure that I didn't throw the brakes on as I was - stepped on it to go around this truck, this pick-up truck. I didn't slam the brakes on, which this car has a lot of power and you can get up to a high speed in a short period. And I let it sorta coast along and I have no idea, I'm sure I wasn't going no 49 mph across the railroad tracks;" that "I'm not qualified to say [how fast he reached when he passed the pick-up truck], because this type of car does have enough power to get around."

A Napoleon policeman testified to the effect that immediately prior to his stopping defendant he had been parked in a marked patrol car on Kolbe Street, just off Woodlawn, when he observed a vehicle traveling northwest on Woodlawn at what appeared to be a high rate of speed; that from the intersection to the point where the defendant was clocked Woodlawn Avenue is posted at 25 miles per hour, with no parking or passing permitted; that he clocked [\*4] the defendant's speed on a Custom HR8 hand held stationary radar device at 49 miles per hour; that he advised the defendant that he had clocked him on radar at 49 miles per hour and the defendant "stated that he had to go that fast to pass a pick-up truck that had turned in front of him;" and that he saw no other vehicles in the vicinity and specifically none in front of or following defendant. The policeman further testified as to his previous and current employment and as to his training, experience, knowledge of the theory and application, and as to his testing and calibration, of the radar unit which he used in apprehending the defendant.

There was also evidence that on the night in question the weather was clear and the pavement dry. There is some indication, though not conclusive, that the area in question was residential in character. The evidence was too indefinite for this Court to extract from the record unequivocal evidence as to intersecting streets and distances involved.

On this state of the evidence there is no affirmative showing of error affecting the judgment with relation to the allegations of the first assignment of error. The defendant testified on at least [\*5] two occasions that he "did step on it" and "stepped on it" to get around the pick-up truck and the police officer testified that when advised that he had been clocked at forty-nine miles per hour the defendant "stated that he had to *go that fast* to pass a pick-up truck that had turned in front of him." (Emphasis added.) This evidence constituted admissions against interest, and in and of itself was sufficient to prove conduct of the defendant that was prima facie unlawful, i.e., that he was traveling at 49 miles per hour, a speed of more than twenty-five miles per hour in an area governed by that speed limit and so posted, which is a

prima facie violation of the basic speed limitation that he not operate his vehicle at a speed greater than is reasonable or proper, having due regard to the traffic, surface, and width of the street or highway and any other conditions.

Under these circumstances there was no necessity of the prosecution establishing the validity of the radar reading and it is not therefore affirmatively shown that there was error having prejudicial effect on the judgment as assigned in the first assignment of error.

[HN2] The establishment, however, of a prima facie violation [\*6] of the reasonable and proper speed limit placed on the defendant the burden of going forward with evidence to overcome such prima facie case. It was for the fact finder, the trial court, to determine what was reasonable and proper, having due regard to all the conditions and, in doing so, to determine the weight and credibility of the evidence. There was evidence which would support a conclusion that the defendant's speed was not reasonable and proper even if he was passing the pick-up and, in view of the officer's testimony that there were no other vehicles in the vicinity the trial court could readily have even disbelieved the defendant's testimony as to his motivation to speed. In these circumstances, the evidence not being conclusive in defendant's favor, this court is not permitted to find differently than did the trial court and the second assignment of error is likewise without merit.

**PRIOR HISTORY:** [\*1]

APPEAL FROM BEDFORD MUNICIPAL COURT, No. 76 TRD 7110

**DISPOSITION:**

Judgment Affirmed

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Bedford Municipal Court (Ohio), which convicted him of speeding in violation of Moreland Hills, Ohio, Ordinances § 333.03.

**OVERVIEW:** A police officer testified that, according to the MR-7 moving radar device in his patrol car, defendant was going 51 miles per hour in a 35-miles-per-hour zone. The officer further stated that such speed was unreasonable for conditions at that time and place. Defendant alleged that he had not been speeding and that the officer could not have kept the car that he clocked in sight while he turned the police car around to pursue it because of a hill in the road. Affirming, the court held that the officer's identification of defendant as the individual clocked was sufficient to establish that defendant's car was the one clocked. The court found that the radar was properly calibrated and in working order at the time because the officer testified so and he was trained and certified in the use of the radar. The court found that there was insufficient evidence that 51 miles per hour was reasonable. The court held that there was no need to present expert testimony as to the construction and reliability of the MR-7 radar because the trial court was free to take judicial notice thereof.

**OUTCOME:** The court affirmed the trial court's judgment.

**CORE TERMS:** speed, mile, radar, assignment of error, traveling, clocked, calibrate, patrolman, driving, traffic, highway, street, verdict of guilty, working order, motor vehicle, speed limit, prima facie, police car, automatically,

calibration, stationary, calibrated, training, tuning, forks, expert testimony, insufficient evidence, assignments of error, working condition, police officer

### **LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN1] Moreland Hills, Ohio, Ordinances § 333.03 provides in part as follows: No person shall operate a motor vehicle in and upon the streets and highways at a speed greater or less than is reasonable and proper, having due regard to the traffic, surface and width of the street or highway and any other conditions, and no person shall drive any motor vehicle in and upon any street or highway at a greater speed than will permit him to bring it to a stop within the assured clear distance ahead. It is prima facie lawful for the operator of a motor vehicle to operate the same at speed not exceeding the following: (d) Thirty-five miles per hour on all State routes or through streets and through highways within the Municipality outside business districts, except as provided in subsections (e) and (f) of this section. It is prima facie unlawful for any person to exceed any of the speed limitations in any section of this Traffic Code.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN2] Under the provisions of Moreland Hills, Ohio, Ordinance § 333.03, it is prima facie unlawful for any person to exceed any of the speed limitation in any section of the traffic code. The burden is upon the accused to produce evidence that under the circumstances a speed of exceeding the speed limit was reasonable.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN3] A person may be convicted of speeding solely upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle where the record contains: (1) expert testimony of the construction of the device and its method of operation in determining the speed of the approaching vehicle from the opposite direction; (2) evidence that the device is in good condition for accurate work; and (3) evidence that the officer using the device is one qualified for its use by training and experience.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Judicial Notice***

[HN4] It may be judicially noticed that the MR-7 moving radar device is acceptable and dependable for its proposed purpose.

KRENZLER, P.J., PATTON, J., and SILBERT, J. \*, concur.

\* Retired, Eighth Appellate District sitting by assignment

### **OPINION BY:**

KRENZLER

**OPINION:**

JOURNAL ENTRY AND OPINION

KRENZLER, P.J.:

This cause came on to be heard upon the pleadings and the transcript of the evidence and the record in the Bedford Municipal Court, and was argued by counsel for the parties; and upon consideration, the court finds no error prejudicial to the appellant and therefore the judgment of the Bedford Municipal Court is affirmed. Each assignment of error was reviewed and upon review the following disposition made:

The defendant-appellant, Nelson P. Bard, hereinafter referred to as the appellant, was charged by affidavit for a violation of Section 333.03 of the Ordinances of The Village of Moreland Hills. The affidavit charged that on September 20, 1976, the appellant was traveling west on Miles Road in his automobile at a rate of speed of 51 miles per hour in a 35-miles-per-hour zone and that such speed of 51 miles per hour was unreasonable [\*2] for conditions at that time and place.

The appellant appeared in Bedford Municipal Court on October 6, 1976, and entered a plea of not guilty to the charge. Trial was subsequently held before that court on November 8, 1976, and the following testimony was presented.

Charles Kapral, a police patrolman for the Village of Moreland Hills, testified for the prosecution that on September 20, 1976, at approximately 2:30 P.M. he was on regular traffic patrol duty in a police car and was traveling east on Miles Road in the Village of Moreland Hills; that he was alerted by the MR-7 moving radar device in his automobile that an approaching vehicle traveling west was exceeding the speed limit and was traveling 51 miles per hour in a 35-mile-per-hour zone; that he turned his police car around and pursued the speeding car for at least one mile; and that upon stopping the vehicle he wrote a citation for the driver. Officer Kapral identified the appellant as the individual that he clocked on Miles Road driving at 51 miles per hour and identified the appellant's car as a 1975 beige colored Pontiac, two-door.

Officer Kapral further testified that the MR-7 monitors on-coming traffic, automatically [\*3] calibrates the speed of any on-coming vehicle, and automatically subtracts the speed of the patrol car. He stated that he received training on how to operate the MR-7 and other radar devices and received certification in the operation of moving and stationary radar devices. With regard to testing the MR-7 to determine whether it was in working order, Officer Kapral testified as follows:

Q Now, prior to using this radar device, is there anything you have to do?

A Well, before we put the radar in use we calibrate the unit. We have two tuning forks for the MR-7. I turn it on and calibrate it. There is an internal calibration that registers at 64 miles in stationary mode, and 100 in the moving mode. We have two tuning forks, one at 35, and one at 65 which we use for stationary mode, and then when we moved to the moving mode.

Q Excuse me, slow down just a little bit.

A Then we get the tuning forks and we place them in front of the antenna at 35 miles an hour which is different between 65 to calibrate the moving portion. Then besides that, we get out on the road, we have to verify it, but on that would verify the speed of the cruiser by this radar ourselves. So, [\*4] we have separate functions to make sure it is working properly.

Q Did you go through this calibration prior to clocking?

A Yes, I did.

Q Now, did that calibration indicate to you that the machine is in proper working order?

A Yes, it did.

Officer Kapral also stated that in his opinion the MR-7 was properly calibrated. He testified further that at the time of the incident the pavement was dry and in good to fair condition and that it was daylight.

The appellant testified in his own behalf that on September 20, 1976, at approximately 2:00 P.M. he was driving west on Miles Road when police officer Kapral stopped the appellant's car and that at the time he was stopped he was driving at a rate of 30 miles per hour. The appellant also testified that Officer Kapral's hands were trembling and he looked ill. The appellant stated that he asked the officer if he had been drinking and that the officer replied, "I'd better not have been." According to the appellant, the officer stated that the reason he was unsteady was because in chasing the appellant's car he barely missed two collisions with other automobiles.

The appellant testified further that he was not driving [\*5] in excess of the speed limit and that it was not his car that Officer Kapral clocked at 51 miles per hour. The appellant also stated that because of a hill in the road Officer Kapral could not have kept the car that he clocked in sight while he turned the police car around to pursue it.

At the close of the evidence the trial judge found the appellant guilty as charged and imposed a fine of \$ 25.00 plus costs. Execution of the sentence was stayed pending appeal. The appellant was subsequently granted leave to file a delayed appeal and assigns the following errors:

A. THE VERDICT OF THE TRIAL COURT WAS CONTRA TO THE MANIFEST WEIGHT OF THE EVIDENCE.

B. THE EVIDENCE ADDUCED AT TRIAL WAS INSUFFICIENT TO SUPPORT A FINDING OF GUILTY, SPECIFICALLY WITH RESPECT TO TESTIMONY GIVEN BY THE PATROLMAN CONCERNING THE CALIBRATION AND OPERABILITY OF THE MR-7 SPEED MONITORING DEVICE.

C. THE PROSECUTION DID NOT SUSTAIN ITS DUTY TO PROVE BEYOND A REASONABLE DOUBT THAT THERE WAS A PROPER IDENTIFICATION OF DEFENDANT OR HIS AUTOMOBILE BY THE PATROLMAN.

D. THE EVIDENCE DID NOT SHOW THAT THE SPEED ALLEGED ON THE PART OF THE DEFENDANT WAS UNREASONABLE FOR CONDITIONS AT THE TIME AND PLACE [\*6] AS REQUIRED BY ORDINANCES 333.03, SUBSECTION D, OF THE CODIFIED ORDINANCES OF THE VILLAGE OF MORELAND HILLS.

E. THE PROSECUTION UTTERLY FAILED TO QUALIFY THE PATROLMAN KAPRAL AS AN EXPERT WITNESS FOR TESTIMONY DIRECTED TOWARD THE CONSTRUCTION OF THE MR-7 AND ITS ABILITY TO DIFFERENTIATE APPROACHING VEHICLE SPEEDS.

Assignments of error A and C are essentially the same and will be treated together. The appellant argues in these two assignments of error that there is insufficient evidence to support the verdict of guilty because the record does not establish that Officer Kapral identified the appellant's automobile as the one that he clocked traveling in excess of the speed limit. These assignments of error are not well taken.

We have carefully reviewed the record and find that Officer Kapral identified the appellant as the individual

clocked on Miles Road traveling 51 miles per hour. This identification is sufficient to establish that the appellant's car was the one clocked by the police officer. Assignments of error A and C are overruled.

In assignment of error B the appellant argues that the verdict of guilty is unsupported by the evidence because the prosecution presented [\*7] insufficient evidence to show that the MR-7 radar device was properly calibrated and that it was in accurate working condition when the appellant's speed was checked. This assignment of error is not well taken.

The record contains the testimony of Officer Kapral that the MR-7 was properly calibrated and was in working order prior to clocking the appellant. The officer also testified that the device automatically subtracts the speed of the patrol car. He further testified that he had been trained and certified in the operation of the MR-7. Assignment of error C is overruled.

In assignment of error D the appellant argues that the evidence was insufficient to support a verdict of guilty because there was no evidence to show that the speed of 51 miles per hour was unreasonable for conditions at the time and place of the alleged violation. This assignment of error is not well taken.

Section 333.03 [HN1] of the Ordinances of Moreland Hills provides in part as follows:

No person shall operate a motor vehicle in and upon the streets and highways at a speed greater or less than is reasonable and proper, having due regard to the traffic, surface and width of the street or highway and any [\*8] other conditions, and no person shall drive any motor vehicle in and upon any street or highway at a greater speed than will permit him to bring it to a stop within the assured clear distance ahead.

It is prima facie lawful for the operator of a motor vehicle to operate the same at speed not exceeding the following:

\* \* \*

(d) Thirty-five miles per hour on all State routes or through streets and through highways within the Municipality outside business districts, except as provided in subsections (e) and (f) of this section.

\* \* \*

It is prima facie unlawful for any person to exceed any of the speed limitations in any section of this Traffic Code.  
\* \* \*

[HN2] Under the provisions of this ordinance, it is prima facie unlawful for any person to exceed any of the speed limitation in any section of the traffic code. The burden was upon the appellant to produce evidence that under the circumstances a speed of 51 miles an hour was reasonable. The record contains insufficient evidence to establish that such a speed was reasonable. Assignment of error D is overruled.

In assignment of error E the appellant argues that his conviction is reversible error because Officer Kapral was not [\*9] qualified as an expert witness to testify on the construction of the MR-7. This assignment of error is not well taken.

In *State v. Shelt* (1976), 46 *Ohio App. 2d* 115, 119, the Court of Appeals held as follows:

[HN3] A person may be convicted of speeding solely upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle where the record contains: (1) expert testimony of the construction of the device and its method of operation in determining the speed of the approaching vehicle from the opposite direction; (2) evidence that the device is in good condition for accurate work; and (3) evidence that the officer using the device is one qualified for its use by training and experience. Cf. *East Cleveland v. Ferrell*, 168 *Ohio St.* 298.

The court also held that [HN4] it may be judicially noticed that the MR-7 moving radar device is acceptable and

dependable for its proposed purpose. *State v. Shelt*, supra, paragraph two of the syllabus. Therefore, since the trial court was free to take judicial notice of the construction and reliability of the MR-7, there was no need to present expert testimony as to the construction and scientific method of this device. [\*10] See *East Cleveland v. Ferrell* (1958), 168 *Ohio St.* 298.

Further, the record contains testimony from Officer Kapral that the MR-7 was in good working condition and that he was qualified for its use by training and experience.

Assignment of error D is overruled.

It is ordered that appellees recover of appellants its costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Bedford Municipal Court to carry this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.  
Exceptions.

N.B. This entry is made pursuant to the third sentence of *Rule 22(D), Ohio Rules of Appellate Procedure*. This is an announcement of decision (see Rule 26). Ten (10) days from the date hereof this document will be stamped to indicate journalization, at which time it will become the judgment and order of the court and time period for review will begin to run.

APPEAL FROM BEDFORD MUNICIPAL COURT, No. 76 TRD 7110

**DISPOSITION:**

Judgment Affirmed

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Bedford Municipal Court (Ohio), which convicted him of speeding in violation of Moreland Hills, Ohio, Ordinances § 333.03.

**OVERVIEW:** A police officer testified that, according to the MR-7 moving radar device in his patrol car, defendant was going 51 miles per hour in a 35-miles-per-hour zone. The officer further stated that such speed was unreasonable for conditions at that time and place. Defendant alleged that he had not been speeding and that the officer could not have kept the car that he clocked in sight while he turned the police car around to pursue it because of a hill in the road. Affirming, the court held that the officer's identification of defendant as the individual clocked was sufficient to establish that defendant's car was the one clocked. The court found that the radar was properly calibrated and in working order at the time because the officer testified so and he was trained and certified in the use of the radar. The court found that there was insufficient evidence that 51 miles per hour was reasonable. The court held that there was no need to present expert testimony as to the construction and reliability of the MR-7 radar because the trial court was free to take judicial notice thereof.

**OUTCOME:** The court affirmed the trial court's judgment.

**CORE TERMS:** speed, mile, radar, assignment of error, traveling, clocked, calibrate, patrolman, driving, traffic, highway, street, verdict of guilty, working order, motor vehicle, speed limit, prima facie, police car, automatically,

calibration, stationary, calibrated, training, tuning, forks, expert testimony, insufficient evidence, assignments of error, working condition, police officer

### **LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN1] Moreland Hills, Ohio, Ordinances § 333.03 provides in part as follows: No person shall operate a motor vehicle in and upon the streets and highways at a speed greater or less than is reasonable and proper, having due regard to the traffic, surface and width of the street or highway and any other conditions, and no person shall drive any motor vehicle in and upon any street or highway at a greater speed than will permit him to bring it to a stop within the assured clear distance ahead. It is prima facie lawful for the operator of a motor vehicle to operate the same at speed not exceeding the following: (d) Thirty-five miles per hour on all State routes or through streets and through highways within the Municipality outside business districts, except as provided in subsections (e) and (f) of this section. It is prima facie unlawful for any person to exceed any of the speed limitations in any section of this Traffic Code.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN2] Under the provisions of Moreland Hills, Ohio, Ordinance § 333.03, it is prima facie unlawful for any person to exceed any of the speed limitation in any section of the traffic code. The burden is upon the accused to produce evidence that under the circumstances a speed of exceeding the speed limit was reasonable.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN3] A person may be convicted of speeding solely upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle where the record contains: (1) expert testimony of the construction of the device and its method of operation in determining the speed of the approaching vehicle from the opposite direction; (2) evidence that the device is in good condition for accurate work; and (3) evidence that the officer using the device is one qualified for its use by training and experience.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Judicial Notice***

[HN4] It may be judicially noticed that the MR-7 moving radar device is acceptable and dependable for its proposed purpose.

### **COUNSEL:**

For Plaintiff-Appellee: Charles T. Riehl

For Defendant-Appellant: Douglas R. Fouts

\* Retired, Eighth Appellate District sitting by assignment

### **OPINION BY:**

KRENZLER

**OPINION:**

JOURNAL ENTRY AND OPINION

KRENZLER, P.J.:

This cause came on to be heard upon the pleadings and the transcript of the evidence and the record in the Bedford Municipal Court, and was argued by counsel for the parties; and upon consideration, the court finds no error prejudicial to the appellant and therefore the judgment of the Bedford Municipal Court is affirmed. Each assignment of error was reviewed and upon review the following disposition made:

The defendant-appellant, Nelson P. Bard, hereinafter referred to as the appellant, was charged by affidavit for a violation of Section 333.03 of the Ordinances of The Village of Moreland Hills. The affidavit charged that on September 20, 1976, the appellant was traveling west on Miles Road in his automobile at a rate of speed of 51 miles per hour in a 35-miles-per-hour zone and that such speed of 51 miles per hour was unreasonable [\*2] for conditions at that time and place.

The appellant appeared in Bedford Municipal Court on October 6, 1976, and entered a plea of not guilty to the charge. Trial was subsequently held before that court on November 8, 1976, and the following testimony was presented.

Charles Kapral, a police patrolman for the Village of Moreland Hills, testified for the prosecution that on September 20, 1976, at approximately 2:30 P.M. he was on regular traffic patrol duty in a police car and was traveling east on Miles Road in the Village of Moreland Hills; that he was alerted by the MR-7 moving radar device in his automobile that an approaching vehicle traveling west was exceeding the speed limit and was traveling 51 miles per hour in a 35-mile-per-hour zone; that he turned his police car around and pursued the speeding car for at least one mile; and that upon stopping the vehicle he wrote a citation for the driver. Officer Kapral identified the appellant as the individual that he clocked on Miles Road driving at 51 miles per hour and identified the appellant's car as a 1975 beige colored Pontiac, two-door.

Officer Kapral further testified that the MR-7 monitors on-coming traffic, automatically [\*3] calibrates the speed of any on-coming vehicle, and automatically subtracts the speed of the patrol car. He stated that he received training on how to operate the MR-7 and other radar devices and received certification in the operation of moving and stationary radar devices. With regard to testing the MR-7 to determine whether it was in working order, Officer Kapral testified as follows:

Q Now, prior to using this radar device, is there anything you have to do?

A Well, before we put the radar in use we calibrate the unit. We have two tuning forks for the MR-7. I turn it on and calibrate it. There is an internal calibration that registers at 64 miles in stationary mode, and 100 in the moving mode. We have two tuning forks, one at 35, and one at 65 which we use for stationary mode, and then when we moved to the moving mode.

Q Excuse me, slow down just a little bit.

A Then we get the tuning forks and we place them in front of the antenna at 35 miles an hour which is different between 65 to calibrate the moving portion. Then besides that, we get out on the road, we have to verify it, but on that would verify the speed of the cruiser by this radar ourselves. So, [\*4] we have separate functions to make sure it is working properly.

Q Did you go through this calibration prior to clocking?

A Yes, I did.

Q Now, did that calibration indicate to you that the machine is in proper working order?

A Yes, it did.

Officer Kapral also stated that in his opinion the MR-7 was properly calibrated. He testified further that at the time of the incident the pavement was dry and in good to fair condition and that it was daylight.

The appellant testified in his own behalf that on September 20, 1976, at approximately 2:00 P.M. he was driving west on Miles Road when police officer Kapral stopped the appellant's car and that at the time he was stopped he was driving at a rate of 30 miles per hour. The appellant also testified that Officer Kapral's hands were trembling and he looked ill. The appellant stated that he asked the officer if he had been drinking and that the officer replied, "I'd better not have been." According to the appellant, the officer stated that the reason he was unsteady was because in chasing the appellant's car he barely missed two collisions with other automobiles.

The appellant testified further that he was not driving [\*5] in excess of the speed limit and that it was not his car that Officer Kapral clocked at 51 miles per hour. The appellant also stated that because of a hill in the road Officer Kapral could not have kept the car that he clocked in sight while he turned the police car around to pursue it.

At the close of the evidence the trial judge found the appellant guilty as charged and imposed a fine of \$ 25.00 plus costs. Execution of the sentence was stayed pending appeal. The appellant was subsequently granted leave to file a delayed appeal and assigns the following errors:

A. THE VERDICT OF THE TRIAL COURT WAS CONTRA TO THE MANIFEST WEIGHT OF THE EVIDENCE.

B. THE EVIDENCE ADDUCED AT TRIAL WAS INSUFFICIENT TO SUPPORT A FINDING OF GUILTY, SPECIFICALLY WITH RESPECT TO TESTIMONY GIVEN BY THE PATROLMAN CONCERNING THE CALIBRATION AND OPERABILITY OF THE MR-7 SPEED MONITORING DEVICE.

C. THE PROSECUTION DID NOT SUSTAIN ITS DUTY TO PROVE BEYOND A REASONABLE DOUBT THAT THERE WAS A PROPER IDENTIFICATION OF DEFENDANT OR HIS AUTOMOBILE BY THE PATROLMAN.

D. THE EVIDENCE DID NOT SHOW THAT THE SPEED ALLEGED ON THE PART OF THE DEFENDANT WAS UNREASONABLE FOR CONDITIONS AT THE TIME AND PLACE [\*6] AS REQUIRED BY ORDINANCES 333.03, SUBSECTION D, OF THE CODIFIED ORDINANCES OF THE VILLAGE OF MORELAND HILLS.

E. THE PROSECUTION UTTERLY FAILED TO QUALIFY THE PATROLMAN KAPRAL AS AN EXPERT WITNESS FOR TESTIMONY DIRECTED TOWARD THE CONSTRUCTION OF THE MR-7 AND ITS ABILITY TO DIFFERENTIATE APPROACHING VEHICLE SPEEDS.

Assignments of error A and C are essentially the same and will be treated together. The appellant argues in these two assignments of error that there is insufficient evidence to support the verdict of guilty because the record does not establish that Officer Kapral identified the appellant's automobile as the one that he clocked traveling in excess of the speed limit. These assignments of error are not well taken.

We have carefully reviewed the record and find that Officer Kapral identified the appellant as the individual

clocked on Miles Road traveling 51 miles per hour. This identification is sufficient to establish that the appellant's car was the one clocked by the police officer. Assignments of error A and C are overruled.

In assignment of error B the appellant argues that the verdict of guilty is unsupported by the evidence because the prosecution presented [\*7] insufficient evidence to show that the MR-7 radar device was properly calibrated and that it was in accurate working condition when the appellant's speed was checked. This assignment of error is not well taken.

The record contains the testimony of Officer Kapral that the MR-7 was properly calibrated and was in working order prior to clocking the appellant. The officer also testified that the device automatically subtracts the speed of the patrol car. He further testified that he had been trained and certified in the operation of the MR-7. Assignment of error C is overruled.

In assignment of error D the appellant argues that the evidence was insufficient to support a verdict of guilty because there was no evidence to show that the speed of 51 miles per hour was unreasonable for conditions at the time and place of the alleged violation. This assignment of error is not well taken.

Section 333.03 [HN1] of the Ordinances of Moreland Hills provides in part as follows:

No person shall operate a motor vehicle in and upon the streets and highways at a speed greater or less than is reasonable and proper, having due regard to the traffic, surface and width of the street or highway and any [\*8] other conditions, and no person shall drive any motor vehicle in and upon any street or highway at a greater speed than will permit him to bring it to a stop within the assured clear distance ahead.

It is prima facie lawful for the operator of a motor vehicle to operate the same at speed not exceeding the following:

\* \* \*

(d) Thirty-five miles per hour on all State routes or through streets and through highways within the Municipality outside business districts, except as provided in subsections (e) and (f) of this section.

\* \* \*

It is prima facie unlawful for any person to exceed any of the speed limitations in any section of this Traffic Code.  
\* \* \*

[HN2] Under the provisions of this ordinance, it is prima facie unlawful for any person to exceed any of the speed limitation in any section of the traffic code. The burden was upon the appellant to produce evidence that under the circumstances a speed of 51 miles an hour was reasonable. The record contains insufficient evidence to establish that such a speed was reasonable. Assignment of error D is overruled.

In assignment of error E the appellant argues that his conviction is reversible error because Officer Kapral was not [\*9] qualified as an expert witness to testify on the construction of the MR-7. This assignment of error is not well taken.

In *State v. Shelt* (1976), 46 *Ohio App. 2d* 115, 119, the Court of Appeals held as follows:

[HN3] A person may be convicted of speeding solely upon evidence obtained from an MR-7 moving radar device mounted on a moving patrol vehicle where the record contains: (1) expert testimony of the construction of the device and its method of operation in determining the speed of the approaching vehicle from the opposite direction; (2) evidence that the device is in good condition for accurate work; and (3) evidence that the officer using the device is one qualified for its use by training and experience. Cf. *East Cleveland v. Ferrell*, 168 *Ohio St.* 298.

The court also held that [HN4] it may be judicially noticed that the MR-7 moving radar device is acceptable and

dependable for its proposed purpose. *State v. Shelt*, supra, paragraph two of the syllabus. Therefore, since the trial court was free to take judicial notice of the construction and reliability of the MR-7, there was no need to present expert testimony as to the construction and scientific method of this device. [\*10] See *East Cleveland v. Ferrell* (1958), 168 *Ohio St.* 298.

Further, the record contains testimony from Officer Kapral that the MR-7 was in good working condition and that he was qualified for its use by training and experience.

Assignment of error D is overruled.

It is ordered that appellees recover of appellants its costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Bedford Municipal Court to carry this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.  
Exceptions.

N.B. This entry is made pursuant to the third sentence of *Rule 22(D), Ohio Rules of Appellate Procedure*. This is an announcement of decision (see Rule 26). Ten (10) days from the date hereof this document will be stamped to indicate journalization, at which time it will become the judgment and order of the court and time period for review will begin to run.

**City of Toledo, APPELLEE v. Richard A. Krueck, APPELLANT****C.A. No. L-76-183****Court of Appeals of Ohio, Sixth Appellate District, Lucas County*****1977 Ohio App. LEXIS 9494*****January 28, 1977**

**NOTICE:** PURSUANT TO RULE 2(G) OF THE OHIO SUPREME COURT RULES FOR THE REPORTING OF OPINIONS, UNPUBLISHED OPINIONS MAY BE CITED SUBJECT TO CERTAIN RESTRAINTS, LIMITATIONS, AND EXCEPTIONS.

**PRIOR HISTORY:** [\*1]

APPEAL FROM Toledo Municipal COURT, NO. TRD 76-10259 & TRD 76-15794

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Toledo Municipal Court (Ohio) which denied defendant's demand for a jury trial and convicted defendant of violating Toledo, Ohio, Municipal Code 21-9-5(b), failure to yield the right-of-way, and Toledo, Ohio, Municipal Code 21-6-1, speeding.

**OVERVIEW:** Defendant was cited for failing to yield the right-of-way. Defendant did not appear in court pursuant to that charge, which resulted in a bench warrant being issued for his arrest. About a month after defendant was first cited, defendant was cited for speeding and arrested on the bench warrant. Reversing defendant's conviction for speeding, the court held that because Toledo, Ohio, Municipal Code 21-24-1 subjected defendant to a fine and days in jail, defendant was entitled pursuant to *Ohio Rev. Code Ann. § 2945.17* as a matter of right to a trial by jury. Affirming defendant's conviction for failure to yield the right-of-way, the court found that the affidavit did not charge a prior offense, thus defendant was not entitled to a jury trial under § 2945.17. The court held that the jury demand regarding the failure to yield right-of-way charge was improper and, as such, was a delay chargeable to defendant. Therefore, the court held that defendant was not denied a speedy trial on the failure to yield right-of-way charge. The court held that the prosecutor made a prima facie case on the failure to yield right-of-way charge.

**OUTCOME:** The court reversed the judgment as to the speeding charge and affirmed the judgment as to the failure to yield the right-of-way charge. The court remanded the cause to the trial court for further proceedings and for execution for costs.

**CORE TERMS:** defendant-appellant, speeding, right-of-way, wit, assignment of error, bench warrant, fine, jury trial, assignments of error, business district, one year, ordinance, dollars, miles, traffic ticket, prior offense, jail time, reckless, traffic, motor vehicle, found guilty, city jail, speed, radar, reconsideration, chargeable, prosecutor, violating, suspended, convicted

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN1] Toledo, Ohio, Municipal Code 21-24-1 provides, in part, that when any person is found guilty of a first offense for a violation of Toledo, Ohio, Municipal Code 21-6-1 or Toledo, Ohio, Municipal Code 21-6-2 upon a finding that he operated a motor vehicle faster than 35 miles an hour in a business district, the court may, in addition to the penalty herein provided, sentence such offender to the city jail or workhouse for not more than five days.

***Criminal Law & Procedure > Accusatory Instruments > Complaints  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN2] The traffic ticket is the traffic complaint and summons. *Ohio Traffic R. 2-3*.

***Civil Procedure > Trials > Jury Trials > Right to Jury Trial******Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Misdemeanors***

[HN3] The right to a trial by jury under *Ohio Rev. Code Ann. § 2945.17* can not be vacated by a trial court's assertion that jail time will not be imposed.

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Felonies******Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Misdemeanors******Criminal Law & Procedure > Sentencing > Fines***

[HN4] *Ohio Rev. Code Ann. § 2945.17*, entitled "Right of trial by jury," provides that at any trial, in any court, for the violation of any statute of this state, or of any ordinance of any municipal corporation, except in cases in which the penalty involved does not exceed a fine of \$ 100, the accused has the right to be tried by a jury.

***Criminal Law & Procedure > Preliminary Proceedings > Preliminary Hearings > Time Limitations******Criminal Law & Procedure > Preliminary Proceedings > Preliminary Hearings > Waiver******Criminal Law & Procedure > Pretrial Motions > Speedy Trial > Excludable Time Periods***

[HN5] A demand for a jury, to which a defendant-appellant was entitled, does not constitute a delay which could be charged to the defendant-appellant under *Ohio Rev. Code Ann. § 2945.72* to extend the 30 day time period for trial as required by *Ohio Rev. Code Ann. § 2945.71(A)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN6] Toledo, Ohio, Municipal Code 21-24-1, which addresses traffic offenses, reads, in part: and for the second offense within one year thereafter not less than \$ 10 nor more than \$ 100, or imprisoned in the city jail or workhouse not more than 10 days, or both.

***Criminal Law & Procedure > Accusatory Instruments > Complaints***

[HN7] In order to sanction a "second offense" penalty, the affidavit must allege a prior offense.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > General Overview******Criminal Law & Procedure > Accusatory Instruments > Complaints******Criminal Law & Procedure > Guilty Pleas > General Overview***

[HN8] *Ohio Rev. Code Ann. § 4507.34* provides that whenever a person is found guilty under the laws of Ohio or any

ordinance of any political subdivision thereof, of operating a motor vehicle in violation of such laws or ordinances, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the license to drive of any person so convicted or pleading guilty to such offenses for such period as it determines, not to exceed one year. Section 4507.34 provides for discretionary driver's license suspension by the trial judge upon conviction. Reckless operation does not have to be alleged in the affidavit.

**JUDGES:**

Clifford F. Brown, P.J., John W. Potter and John J. Connors, Jr., JJ., concur.

**OPINION:****DECISION & JOURNAL ENTRY**

This cause came on to be heard upon the record in the trial court. Each assignment of error was reviewed by the court and upon review the following disposition made:

The defendant, Richard Krueck, was convicted by the Toledo Municipal Court of violating Sec. 21-9-5(b), Toledo Municipal Code, failure to yield the right-of-way, and Sec. 21-6-1, speeding. The court fined the defendant \$ 50 and costs per charge and suspended his driver's license for one year. From that judgment the defendant appeals.

On March 12, 1976, the defendant-appellant was cited for failing to yield the right-of-way. The defendant-appellant did not appear in court on March 16, 1976 pursuant to that charge, which resulted in a bench warrant being issued for his arrest. On April 13, 1976, the defendant-appellant was cited for speeding and arrested on the bench warrant.

Assignments of error Nos. 1 and 2 are, to wit:

"1. THE TRIAL COURT ERRED IN DENYING THE DEFENDANT'S MOTION FOR AN ORDER OF DISCHARGE.

"2. THE TRIAL [\*2] COURT ERRED IN DENYING THE DEFENDANT'S DEMAND FOR A JURY TRIAL."

In addressing assignments of error numbers 1 and 2 in relation to the speeding charge, the court finds that the defendant-appellant was charged with violating Sec. 21-6-1 of the Toledo Municipal Code, in that he was traveling 15 miles per hour in excess of the 35 miles per hour limit through a business district. Sec. 21-24-1 of the Toledo Municipal Code provides in pertinent part:

"\* \* \* [HN1] that when any person is found guilty of a first offense for a violation of Sections 21-6-1 or 21-6-2 of this chapter upon a finding that he operated a motor vehicle faster than thirty-five miles an hour in a business district or \* \* \* the court may, in addition to the penalty herein provided, sentence such offender to the city jail or workhouse for not more than five days."

The above section subjected the defendant-appellant to a fine and days in jail. On the defendant's duplicate copy of the defendant-appellant's traffic ticket it was alleged that the violation occurred in a business district. [HN2] The traffic ticket is the traffic complaint and summons. *Ohio Traffic Rules, Rules 2 and 3.* (effective January 1, 1975) Pursuant to [\*3] *R.C. 2945.17*, n1 the defendant-appellant was entitled as a matter of right to a trial by jury. [HN3] This right could not be vacated by a trial court's assertion that jail time would not be imposed. See *The City of Fremont v. Keating* (1917), *96 Ohio St. 468*.

n1 "Sec. 2945.17 Right of trial by jury.

[HN4] "At any trial, in any court, for the violation of any statute of this state, or of any ordinance of any municipal corporation, except in cases in which the penalty involved does not exceed a fine of one hundred dollars, the accused has the right to be tried by a jury."

[HN5] A demand for a jury, to which the defendant-appellant was entitled, did not constitute a delay which could be charged to the defendant-appellant under *R.C. 2945.72* to extend the 30 day time period for trial as required by *R.C. 2945.71(A)*. n2 See this court's holding in *State v. Melvin Stancthion*, Lucas County, C.A. L-76-014 (July 16, 1976), where we held a defendant could not be charged with delay due to his failure to waive a preliminary hearing. The record indicates that on the speeding charge numbered TRD76-15794, the defendant-appellant was not brought to trial within 30 days as required by *R.C. 2945.71*. Therefore, [\*4] assignments of error Nos. 1 and 2 as they pertain to the speeding charge are well taken.

n2 The dates relevant to this appeal are:

March 12, 1976: defendant is cited on a charge of failure to yield the right of way.

March 16, 1976: defendant appears in court and case is continued to March 30, 1976.

March 30, 1976: defendant failed to appear, bench warrant is issued

April 13, 1976: defendant is cited for speeding and arrested on bench warrant.

April 14, 1976: cases continued to april 21, 1976.

April 21, 1976: defendant pled not guilty to both charges. Jury demand filed.

May 13, 1976: jury demand denied; case continued to May 27, 1976.

May 27, 1976: affidavit on 21-9-3 T.M.C. amended to violation of 21-9-5(b) T.M.C.

May 27, 1976: case continued for good cause at request of prosecutor Complaining officer on the failure to yield charge had been sick. Case continued to June 16, 1976. The defendant's request for a continuance of the speeding charge was also granted. However, the defendant thought that only the failure to yield case was set for trial on May 27, 1976. The record on the speeding charge shows subpoena issued for the defendant and his attorney on May 18, 1976 and service made.

May 28, 1976: Motion for reconsideration of jury trial; hearing set for June 14, 1976.

June 7, 1976: with consent of counsel Pheils, case continued to June 28, 1976.

June 8, 1976: subpoenas issued for June 28, 1976.

June 25, 1976: Motion filed to discharge offenses.

June 28, 1976: Hearing on motion for reconsideration of jury trial and motion for discharges denied. Trial held. Defendant found guilty of both charges. \$ 50.00 fine and costs, license suspended for one year.

June 29, 1976: Notice of appeal filed.

[\*5]

Assignments of error No. 5 is, to wit:

"5. THE TRIAL COURT ERRED IN FINDING THE DEFENDANT GUILTY OF SPEEDING WHEN THE ONLY

EVIDENCE SUBMITTED AS TO HIS SPEED WAS A SPEED INDICATION ON A RADAR UNIT WHICH HAD NOT BEEN INDEPENDENTLY CALIBRATED."

The defendant-appellant did not timely object to the speed reading from the MR-7 radar device or to the calibration of the radar equipment. For this reason, assignment of error No. 5 is not well taken. *State v. Morris* (1975), 42 *Ohio St. 2d.* 307.

Assignment of error No. 6 is, to wit:

"6. THE JUDGMENTS OF THE TRIAL COURT ARE AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE.",

is not well taken. Reviewing the record, we find substantial, probative evidence to support the trial court's judgment. *State v. Wallen* (1969), 21 *Ohio App. 2d.* 27; 3 O. Jur. 2d. App. Rev., Sec. 821.

As to the speeding charge, TRD76-15794, the judgment of the Toledo Municipal Court is reversed. The defendant-appellant is ordered discharged. Costs assessed against the plaintiff-appellee.

Upon consideration of the failure to yield the right-of-way charge, TRD76-10259, we find assignments of error Nos. 1 and 2, to wit:

"1. THE TRIAL COURT ERRED IN DENYING [\*6] THE DEFENDANT'S MOTION FOR AN ORDER OF DISCHARGE.

"2. THE TRIAL COURT ERRED IN DENYING THE DEFENDANT'S DEMAND FOR A JURY TRIAL.",

are not well taken.

The defendant argues that pursuant to Sec. 21-24-1 of the Toledo Municipal Code, he will be given jail time due to his two traffic charges in less than a year. Sections 21-24-1 of the Toledo Municipal Code reads, in pertinent part:

"\* \* \* and [HN6] for the second offense within one year thereafter not less than ten dollars nor more than one hundred dollars, or imprisoned in the city jail or workhouse not more than ten days, or both; \* \* \*"

[HN7] In order to sanction a "second offense" penalty, the affidavit must allege a prior offense. See *State v. Gordon* (1971), 28 *Ohio St. 2d.* 45; *State v. Winters* (1965), 2 *Ohio St. 2d.* 325; *State v. Parker* (1973), 46 *Ohio App. 2d.* 189. Since the affidavit in the case sub judice did not charge a prior offense, the defendant-appellant was not entitled to a jury trial under *R.C. 2945.17*.

The jury demand regarding TR76-10259, failure to yield right-of-way, was improper and, as such, was a delay chargeable to the defendant-appellant. In light of this time chargeable to the defendant-appellant, [\*7] he was not denied a speedy trial.

Assignment of error No. 3, is to wit:

"3. THE TRIAL COURT ERRED IN DENYING THE DEFENDANT'S MOTION FOR ACQUITTAL AT THE CLOSE OF THE PROSECUTION'S CASE ON THE CHARGE OF FAILURE TO YIELD THE RIGHT-OF-WAY."

From the record we find that the prosecutor made a prima facie case. Therefore, assignment of error No. 3 is not well taken.

Assignment of error No. 4 is, to wit:

"4. THE TRIAL COURT ERRED IN FINDING THE DEFENDANT GUILTY OF RECKLESS OPERATION WHEN THERE HAD BEEN NO CHARGE OF RECKLESS OPERATION MADE AGAINST THE DEFENDANT."

*R.C. 4507.34* states:

[HN8] "Whenever a person is found guilty under the laws of this state or any ordinance of any political subdivision thereof, of operating a motor vehicle in violation of such laws or ordinances, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the license to drive of any person so convicted or pleading guilty to such offenses for such period as it determines, not to exceed one year."

*R.C. 4507.34* provides for discretionary driver's license suspension by the [\*8] trial judge upon conviction. *State v. Parker* (1973), *46 Ohio App. 2d. 189, 191*. Reckless operation does not have to be alleged in the affidavit. *State v. Newkirk* (1968), *21 Ohio App. 2d. 160*.

Therefore, assignment of error No. 4 is not well taken.

Assignment of error No. 5 is not relevant to the failure to yield the right-of-way charge.

Assignment of error No. 6 is, to wit:

"6. THE JUDGMENTS OF THE TRIAL COURT ARE AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE."

Assignment of error No. 6 is not well taken for the reasons asserted under Assignment of error No. 6 as discussed under the speeding charge.

Therefore, the lower court's judgment regarding the failure to yield the right-of-way charge, numbered TRD76-10259, is affirmed.

On consideration whereof, the judgment of the Toledo Municipal court is affirmed, in part, and reversed, in part. This cause is remanded to said court for further proceedings in accordance with law and for execution for costs. Costs assessed against the defendant-appellant.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

Ten (10) days from the date hereof this document shall [\*9] constitute the journal entry of judgment and shall be file-stamped by the Clerk of the Court of Appeals, at which time the period for review will begin to run. *App. R. 22(E)*.

**City of Toledo, APPELLEE v. Richard A. Krueck, APPELLANT****C.A. No. L-76-183****Court of Appeals of Ohio, Sixth Appellate District, Lucas County*****1977 Ohio App. LEXIS 9494*****January 28, 1977**

**NOTICE:** PURSUANT TO RULE 2(G) OF THE OHIO SUPREME COURT RULES FOR THE REPORTING OF OPINIONS, UNPUBLISHED OPINIONS MAY BE CITED SUBJECT TO CERTAIN RESTRAINTS, LIMITATIONS, AND EXCEPTIONS.

**PRIOR HISTORY:** [\*1]

APPEAL FROM Toledo Municipal COURT, NO. TRD 76-10259 & TRD 76-15794

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Toledo Municipal Court (Ohio) which denied defendant's demand for a jury trial and convicted defendant of violating Toledo, Ohio, Municipal Code 21-9-5(b), failure to yield the right-of-way, and Toledo, Ohio, Municipal Code 21-6-1, speeding.

**OVERVIEW:** Defendant was cited for failing to yield the right-of-way. Defendant did not appear in court pursuant to that charge, which resulted in a bench warrant being issued for his arrest. About a month after defendant was first cited, defendant was cited for speeding and arrested on the bench warrant. Reversing defendant's conviction for speeding, the court held that because Toledo, Ohio, Municipal Code 21-24-1 subjected defendant to a fine and days in jail, defendant was entitled pursuant to *Ohio Rev. Code Ann. § 2945.17* as a matter of right to a trial by jury. Affirming defendant's conviction for failure to yield the right-of-way, the court found that the affidavit did not charge a prior offense, thus defendant was not entitled to a jury trial under § 2945.17. The court held that the jury demand regarding the failure to yield right-of-way charge was improper and, as such, was a delay chargeable to defendant. Therefore, the court held that defendant was not denied a speedy trial on the failure to yield right-of-way charge. The court held that the prosecutor made a prima facie case on the failure to yield right-of-way charge.

**OUTCOME:** The court reversed the judgment as to the speeding charge and affirmed the judgment as to the failure to yield the right-of-way charge. The court remanded the cause to the trial court for further proceedings and for execution for costs.

**CORE TERMS:** defendant-appellant, speeding, right-of-way, wit, assignment of error, bench warrant, fine, jury trial, assignments of error, business district, one year, ordinance, dollars, miles, traffic ticket, prior offense, jail time, reckless, traffic, motor vehicle, found guilty, city jail, speed, radar, reconsideration, chargeable, prosecutor, violating, suspended, convicted

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN1] Toledo, Ohio, Municipal Code 21-24-1 provides, in part, that when any person is found guilty of a first offense for a violation of Toledo, Ohio, Municipal Code 21-6-1 or Toledo, Ohio, Municipal Code 21-6-2 upon a finding that he operated a motor vehicle faster than 35 miles an hour in a business district, the court may, in addition to the penalty herein provided, sentence such offender to the city jail or workhouse for not more than five days.

***Criminal Law & Procedure > Accusatory Instruments > Complaints  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN2] The traffic ticket is the traffic complaint and summons. *Ohio Traffic R. 2-3.*

***Civil Procedure > Trials > Jury Trials > Right to Jury Trial******Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Misdemeanors***

[HN3] The right to a trial by jury under *Ohio Rev. Code Ann. § 2945.17* can not be vacated by a trial court's assertion that jail time will not be imposed.

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Felonies******Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Misdemeanors******Criminal Law & Procedure > Sentencing > Fines***

[HN4] *Ohio Rev. Code Ann. § 2945.17*, entitled "Right of trial by jury," provides that at any trial, in any court, for the violation of any statute of this state, or of any ordinance of any municipal corporation, except in cases in which the penalty involved does not exceed a fine of \$ 100, the accused has the right to be tried by a jury.

***Criminal Law & Procedure > Preliminary Proceedings > Preliminary Hearings > Time Limitations******Criminal Law & Procedure > Preliminary Proceedings > Preliminary Hearings > Waiver******Criminal Law & Procedure > Pretrial Motions > Speedy Trial > Excludable Time Periods***

[HN5] A demand for a jury, to which a defendant-appellant was entitled, does not constitute a delay which could be charged to the defendant-appellant under *Ohio Rev. Code Ann. § 2945.72* to extend the 30 day time period for trial as required by *Ohio Rev. Code Ann. § 2945.71(A)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN6] Toledo, Ohio, Municipal Code 21-24-1, which addresses traffic offenses, reads, in part: and for the second offense within one year thereafter not less than \$ 10 nor more than \$ 100, or imprisoned in the city jail or workhouse not more than 10 days, or both.

***Criminal Law & Procedure > Accusatory Instruments > Complaints***

[HN7] In order to sanction a "second offense" penalty, the affidavit must allege a prior offense.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > General Overview******Criminal Law & Procedure > Accusatory Instruments > Complaints******Criminal Law & Procedure > Guilty Pleas > General Overview***

[HN8] *Ohio Rev. Code Ann. § 4507.34* provides that whenever a person is found guilty under the laws of Ohio or any

ordinance of any political subdivision thereof, of operating a motor vehicle in violation of such laws or ordinances, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the license to drive of any person so convicted or pleading guilty to such offenses for such period as it determines, not to exceed one year. Section 4507.34 provides for discretionary driver's license suspension by the trial judge upon conviction. Reckless operation does not have to be alleged in the affidavit.

**JUDGES:**

Clifford F. Brown, P.J., John W. Potter and John J. Connors, Jr., JJ., concur.

**OPINION:****DECISION & JOURNAL ENTRY**

This cause came on to be heard upon the record in the trial court. Each assignment of error was reviewed by the court and upon review the following disposition made:

The defendant, Richard Krueck, was convicted by the Toledo Municipal Court of violating Sec. 21-9-5(b), Toledo Municipal Code, failure to yield the right-of-way, and Sec. 21-6-1, speeding. The court fined the defendant \$ 50 and costs per charge and suspended his driver's license for one year. From that judgment the defendant appeals.

On March 12, 1976, the defendant-appellant was cited for failing to yield the right-of-way. The defendant-appellant did not appear in court on March 16, 1976 pursuant to that charge, which resulted in a bench warrant being issued for his arrest. On April 13, 1976, the defendant-appellant was cited for speeding and arrested on the bench warrant.

Assignments of error Nos. 1 and 2 are, to wit:

"1. THE TRIAL COURT ERRED IN DENYING THE DEFENDANT'S MOTION FOR AN ORDER OF DISCHARGE.

"2. THE TRIAL [\*2] COURT ERRED IN DENYING THE DEFENDANT'S DEMAND FOR A JURY TRIAL."

In addressing assignments of error numbers 1 and 2 in relation to the speeding charge, the court finds that the defendant-appellant was charged with violating Sec. 21-6-1 of the Toledo Municipal Code, in that he was traveling 15 miles per hour in excess of the 35 miles per hour limit through a business district. Sec. 21-24-1 of the Toledo Municipal Code provides in pertinent part:

"\* \* \* [HN1] that when any person is found guilty of a first offense for a violation of Sections 21-6-1 or 21-6-2 of this chapter upon a finding that he operated a motor vehicle faster than thirty-five miles an hour in a business district or \* \* \* the court may, in addition to the penalty herein provided, sentence such offender to the city jail or workhouse for not more than five days."

The above section subjected the defendant-appellant to a fine and days in jail. On the defendant's duplicate copy of the defendant-appellant's traffic ticket it was alleged that the violation occurred in a business district. [HN2] The traffic ticket is the traffic complaint and summons. *Ohio Traffic Rules, Rules 2 and 3.* (effective January 1, 1975) Pursuant to [\*3] *R.C. 2945.17*, n1 the defendant-appellant was entitled as a matter of right to a trial by jury. [HN3] This right could not be vacated by a trial court's assertion that jail time would not be imposed. See *The City of Fremont v. Keating* (1917), *96 Ohio St. 468*.

n1 "Sec. 2945.17 Right of trial by jury.

[HN4] "At any trial, in any court, for the violation of any statute of this state, or of any ordinance of any municipal corporation, except in cases in which the penalty involved does not exceed a fine of one hundred dollars, the accused has the right to be tried by a jury."

[HN5] A demand for a jury, to which the defendant-appellant was entitled, did not constitute a delay which could be charged to the defendant-appellant under *R.C. 2945.72* to extend the 30 day time period for trial as required by *R.C. 2945.71(A)*. n2 See this court's holding in *State v. Melvin Stancthion*, Lucas County, C.A. L-76-014 (July 16, 1976), where we held a defendant could not be charged with delay due to his failure to waive a preliminary hearing. The record indicates that on the speeding charge numbered TRD76-15794, the defendant-appellant was not brought to trial within 30 days as required by *R.C. 2945.71*. Therefore, [\*4] assignments of error Nos. 1 and 2 as they pertain to the speeding charge are well taken.

n2 The dates relevant to this appeal are:

March 12, 1976: defendant is cited on a charge of failure to yield the right of way.

March 16, 1976: defendant appears in court and case is continued to March 30, 1976.

March 30, 1976: defendant failed to appear, bench warrant is issued

April 13, 1976: defendant is cited for speeding and arrested on bench warrant.

April 14, 1976: cases continued to april 21, 1976.

April 21, 1976: defendant pled not guilty to both charges. Jury demand filed.

May 13, 1976: jury demand denied; case continued to May 27, 1976.

May 27, 1976: affidavit on 21-9-3 T.M.C. amended to violation of 21-9-5(b) T.M.C.

May 27, 1976: case continued for good cause at request of prosecutor Complaining officer on the failure to yield charge had been sick. Case continued to June 16, 1976. The defendant's request for a continuance of the speeding charge was also granted. However, the defendant thought that only the failure to yield case was set for trial on May 27, 1976. The record on the speeding charge shows subpoena issued for the defendant and his attorney on May 18, 1976 and service made.

May 28, 1976: Motion for reconsideration of jury trial; hearing set for June 14, 1976.

June 7, 1976: with consent of counsel Pheils, case continued to June 28, 1976.

June 8, 1976: subpoenas issued for June 28, 1976.

June 25, 1976: Motion filed to discharge offenses.

June 28, 1976: Hearing on motion for reconsideration of jury trial and motion for discharges denied. Trial held. Defendant found guilty of both charges. \$ 50.00 fine and costs, license suspended for one year.

June 29, 1976: Notice of appeal filed.

[\*5]

Assignments of error No. 5 is, to wit:

"5. THE TRIAL COURT ERRED IN FINDING THE DEFENDANT GUILTY OF SPEEDING WHEN THE ONLY

EVIDENCE SUBMITTED AS TO HIS SPEED WAS A SPEED INDICATION ON A RADAR UNIT WHICH HAD NOT BEEN INDEPENDENTLY CALIBRATED."

The defendant-appellant did not timely object to the speed reading from the MR-7 radar device or to the calibration of the radar equipment. For this reason, assignment of error No. 5 is not well taken. *State v. Morris* (1975), 42 *Ohio St. 2d.* 307.

Assignment of error No. 6 is, to wit:

"6. THE JUDGMENTS OF THE TRIAL COURT ARE AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE.",

is not well taken. Reviewing the record, we find substantial, probative evidence to support the trial court's judgment. *State v. Wallen* (1969), 21 *Ohio App. 2d.* 27; 3 O. Jur. 2d. App. Rev., Sec. 821.

As to the speeding charge, TRD76-15794, the judgment of the Toledo Municipal Court is reversed. The defendant-appellant is ordered discharged. Costs assessed against the plaintiff-appellee.

Upon consideration of the failure to yield the right-of-way charge, TRD76-10259, we find assignments of error Nos. 1 and 2, to wit:

"1. THE TRIAL COURT ERRED IN DENYING [\*6] THE DEFENDANT'S MOTION FOR AN ORDER OF DISCHARGE.

"2. THE TRIAL COURT ERRED IN DENYING THE DEFENDANT'S DEMAND FOR A JURY TRIAL.",

are not well taken.

The defendant argues that pursuant to Sec. 21-24-1 of the Toledo Municipal Code, he will be given jail time due to his two traffic charges in less than a year. Sections 21-24-1 of the Toledo Municipal Code reads, in pertinent part:

"\* \* \* and [HN6] for the second offense within one year thereafter not less than ten dollars nor more than one hundred dollars, or imprisoned in the city jail or workhouse not more than ten days, or both; \* \* \*"

[HN7] In order to sanction a "second offense" penalty, the affidavit must allege a prior offense. See *State v. Gordon* (1971), 28 *Ohio St. 2d.* 45; *State v. Winters* (1965), 2 *Ohio St. 2d.* 325; *State v. Parker* (1973), 46 *Ohio App. 2d.* 189. Since the affidavit in the case sub judice did not charge a prior offense, the defendant-appellant was not entitled to a jury trial under *R.C. 2945.17*.

The jury demand regarding TR76-10259, failure to yield right-of-way, was improper and, as such, was a delay chargeable to the defendant-appellant. In light of this time chargeable to the defendant-appellant, [\*7] he was not denied a speedy trial.

Assignment of error No. 3, is to wit:

"3. THE TRIAL COURT ERRED IN DENYING THE DEFENDANT'S MOTION FOR ACQUITTAL AT THE CLOSE OF THE PROSECUTION'S CASE ON THE CHARGE OF FAILURE TO YIELD THE RIGHT-OF-WAY."

From the record we find that the prosecutor made a prima facie case. Therefore, assignment of error No. 3 is not well taken.

Assignment of error No. 4 is, to wit:

"4. THE TRIAL COURT ERRED IN FINDING THE DEFENDANT GUILTY OF RECKLESS OPERATION WHEN THERE HAD BEEN NO CHARGE OF RECKLESS OPERATION MADE AGAINST THE DEFENDANT."

*R.C. 4507.34* states:

[HN8] "Whenever a person is found guilty under the laws of this state or any ordinance of any political subdivision thereof, of operating a motor vehicle in violation of such laws or ordinances, relating to reckless operation, the trial court of any court of record may, in addition to or independent of all other penalties provided by law, suspend for any period of time or revoke the license to drive of any person so convicted or pleading guilty to such offenses for such period as it determines, not to exceed one year."

*R.C. 4507.34* provides for discretionary driver's license suspension by the [\*8] trial judge upon conviction. *State v. Parker* (1973), *46 Ohio App. 2d. 189, 191*. Reckless operation does not have to be alleged in the affidavit. *State v. Newkirk* (1968), *21 Ohio App. 2d. 160*.

Therefore, assignment of error No. 4 is not well taken.

Assignment of error No. 5 is not relevant to the failure to yield the right-of-way charge.

Assignment of error No. 6 is, to wit:

"6. THE JUDGMENTS OF THE TRIAL COURT ARE AGAINST THE MANIFEST WEIGHT OF THE EVIDENCE."

Assignment of error No. 6 is not well taken for the reasons asserted under Assignment of error No. 6 as discussed under the speeding charge.

Therefore, the lower court's judgment regarding the failure to yield the right-of-way charge, numbered TRD76-10259, is affirmed.

On consideration whereof, the judgment of the Toledo Municipal court is affirmed, in part, and reversed, in part. This cause is remanded to said court for further proceedings in accordance with law and for execution for costs. Costs assessed against the defendant-appellant.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.

Ten (10) days from the date hereof this document shall [\*9] constitute the journal entry of judgment and shall be file-stamped by the Clerk of the Court of Appeals, at which time the period for review will begin to run. *App. R. 22(E)*.

**PRIOR HISTORY:** [\*1]

APPEAL FROM Garfield Heights Municipal COURT, No. Cr-102,961 Cr-102,960

**DISPOSITION:**

Judgment Affirmed

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of a judgment from the Garfield Heights Municipal Court (Ohio), which found him guilty of two traffic offenses, running a red light and speeding. Defendant claimed that the convictions were against the manifest weight of evidence.

**OVERVIEW:** Defendant was pulled over by a city police officer and issued two traffic tickets. The first ticket was for disobeying a traffic signal by running a red light, and the second ticket was for speeding by driving 70 miles per hour in a 35 mile per hour speed zone. Defendant was convicted and appealed. In upholding the judgment, the court ruled that the city adduced sufficient evidence as to each element of the offense of speeding to enable the trial court to conclude beyond a reasonable doubt that defendant was guilty of that offense. The court stated that the fact that the city did not introduce any evidence as to the posted speed limit was not fatal to the prosecution because the city introduced evidence that defendant was driving at a rate of speed in excess of 55 miles per hour. Regardless of the prima facie speed limit on the road on which defendant was driving on the date of the offense, a speed limit in excess of 55 miles per hour was proscribed by *Ohio Rev. Code Ann. § 4511.21*. Further, the court held that the weight to be given to the police officer's testimony, as well as the issue of his credibility, were matters to be determined by the trial court as the trier of fact.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** speed, mile, motorist, traffic signal, speeding, fifty-five, highway, posted, traffic, prima-facie, street,

motor vehicle, speed limit, red light, intersection, disobeying, driver, drive, radar, beyond a reasonable doubt, state statute, handed down, case number, ordinance, ticket, comprising, inclusive, supplied, manifest, cruiser

### **LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN1] Independence, Ohio, Codified Ordinance § 333.03 provides, in part, that: No person shall operate a motor vehicle in and upon the streets and highways at a speed greater or less than is reasonable or proper, having due regard to the traffic, surface and width of the street or highway and any other conditions. It is prima-facie lawful for the operator of a motor vehicle to operate the same at a speed not exceeding the following: 35 miles per hour on all state routes or through streets and through highways within the municipality outside business districts, except as provided in § 333.03(e); 50 miles per hour on controlled-access highways and expressways within the municipality and on state routes outside urban districts unless a lower prima-facie speed is established by *Ohio Rev. Code Ann. § 4511.21*; 60 miles per hour at all times on freeways with paved shoulders inside the municipality, except 50 miles per hour at all times for operators of trucks and commercial tractors weighing in excess of 4,000 pounds empty weight and school buses. It is prima-facie unlawful for any person to exceed any of the speed limitations in any section of the Ohio Traffic Code.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN2] Independence, Ohio, Codified Ordinance § 333.03 proscribes essentially the same conduct as *Ohio Rev. Code Ann. § 4511.21* does and is based on that state statute. However, Independence, Ohio, Codified Ordinance § 333.03 states that it is prima-facie unlawful for a motorist to exceed the speed limits posted in Independence while *Ohio Rev. Code Ann. § 4511.21*, and its predecessor statute *Ohio Rev. Code Ann. § 4511.211*, provides that no person shall drive a vehicle on the streets and highways of the state at a speed in excess of 55 miles per hour. *Ohio Rev. Code Ann. § 4511.21(K)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Evidence > Inferences & Presumptions > Rebuttal of Presumptions  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN3] Independence, Ohio, Codified Ordinance § 333.03 provides that a motorist shall operate his vehicle at a speed reasonable under the circumstances and that operation of his vehicle at a speed in excess of the posted limit creates a rebuttable presumption that the motorist has violated the ordinance. Under § 333.03, however, the motorist can challenge the presumption of a violation by showing that although he was traveling at a speed in excess of the posted limit, that nevertheless his speed was reasonable in light of road and other conditions at the time. *Ohio Rev. Code Ann. § 4511.21(K)*, however, provides that in no event shall a motorist operate his vehicle at a speed in excess of 55 miles per hour. Under this portion of the state statute, operation of a vehicle in excess of 55 miles per hour constitutes a speeding violation as a matter of law. The motorist is not permitted to rebut a presumption of unlawfulness by showing his speed was reasonable under the circumstances. If the motorist has travelled at a speed greater than 55 miles per hour, he has violated the statute.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence  
Governments > Local Governments > Ordinances & Regulations***

[HN4] Independence, Ohio, Codified Ordinance § 333.03 conflicts with *Ohio Rev. Code Ann. § 4511.21* as regards the

effect of a speed in excess of 55 miles per hour. Regarding the situation where a city traffic ordinance conflicts with a state traffic statute, *Ohio Rev. Code Ann. §4511.06* provides as follows: *Ohio Rev. Code Ann. §§ 4511.01 to 4511.78, inclusive, § 4511.99, and §§ 4513.01 to 4513.37, inclusive, shall be applicable and uniform throughout the state and in all political subdivisions and municipal corporations therein, and no local authority shall enact or enforce any rule or regulation in conflict with such sections. Thus, under the authority of Ohio Rev. Code Ann. § 4511.06, the conflict must be resolved in favor of Ohio Rev. Code Ann. § 4511.21.*

*Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > General Overview*

*Criminal Law & Procedure > Witnesses > Credibility*

[HN5] The weight to be given to a police officer's testimony and his credibility are matters to be determined by the trial court as trier of the facts. It is within a lower court's prerogative to believe all, some, or none of his testimony.

DAY, P.J., KRENZLER, J., WASSERMAN, J. CONCUR. (Wasserman, J., Retired, sitting by assignment.)

#### **OPINION:**

##### JOURNAL ENTRY

This cause came on to be heard upon the pleadings and the transcript of the evidence and the record in the Garfield Heights Municipal Court, and was argued by counsel for the parties; and upon consideration, the court finds no error prejudicial to the appellant and therefore the judgment of the Garfield Heights Municipal Court is affirmed. Each assignment of error was reviewed and upon review the following disposition made:

On February 26, 1975 Officer Michael Furlan of the Independence Police Department issued two Ohio Uniform Traffic Tickets to the appellant, John W. English. The first ticket, comprising lower court case number 102,960, charged the appellant with, on February 26, 1975 at 12:50 A.M., disobeying a traffic signal or device, namely a red light, at Rockside Road and Interstate-77 in the City of Independence, in violation of Section 313.01 of the Codified Ordinances [\*2] of Independence, Ohio. The second ticket, comprising lower court case number 102,961, charged the appellant with, on the same date and at the same time, operating a motor vehicle westbound on Rockside Road from Interstate - 77 in the City of Independence at a speed unreasonable for the conditions, namely at 70 miles per hour in a 35 mile per hour zone, in violation of Section 333.03 of the Codified Ordinances of Independence.

At his arraignment in the Garfield Heights Municipal Court on April 7, 1975, the appellant entered a plea of not guilty to the charges.

On April 21, 1975 a trial to the court alone on both charges was conducted. The City of Independence presented one witness in its favor, Officer Furlan, while the defense presented no witnesses. A brief summary of Officer Furlan's testimony is as follows.

Officer Furlan testified that on February 26, 1975 at approximately 1:00 A.M. he was on general patrol; that at that time he was coming out of the Holiday Inn parking lot in Independence in his cruiser when he saw a car go through a red light at a nearby intersection; that he proceeded to follow the car, which was heading west on Rockside Road; that after stopping at the [\*3] intersection, he noted that the other car was starting to move pretty fast so he began to clock

the car; and that while giving chase he determined the speed of the car by use of a moving radar unit he had in the cruiser to be approximately 70 miles per hour. Furlan stated that the intersection with the traffic signal was lighted and repeated that the traffic light he saw the car go through was red. He also testified that it was a clear night on February 26, 1975; that the road conditions were dry; that there was light traffic at the time; that the moving radar unit was properly operating that night; that this particular radar unit is checked by means of a tuning fork and calibration; and that eventually he caught up to the car in Seven Hills, pulled it over, and cited the driver. Officer Furlan identified the appellant as the driver of the car and the person he had cited. He did not testify as to the posted speed limit on Rockside Road in the area where he clocked the appellant's speed.

At the close of the city's case, the trial court overruled the appellant's motion for acquittal. The appellant then rested and the court found him guilty of both traffic offenses as charged in [\*4] the two cases. The trial court fined the appellant the sum of \$ 25.00 and court costs on the traffic signal violation and \$ 75.00 and court costs on the speeding violation. The court also ordered the appellant's driver's license suspended for one year, with the proviso that the appellant could drive for work purposes only.

On May 16, 1975, the appellant filed a timely notice of appeal of the two convictions and assigns two errors for this court's consideration:

- I. The conviction of speeding as handed down by the Garfield Heights Municipal Court is against the manifest weight of the evidence.
- II. The conviction of Disobeying a Traffic Signal as handed down by the Garfield Heights Municipal Court is against the manifest weight of the evidence.

Because they are related, the appellant's two assignments of error will be treated together. In them the appellant contends that the convictions of speeding and of disobeying a traffic signal are against the weight of the evidence. These assigned errors are not well taken.

Regarding the speeding conviction, the appellant was charged with violating Section 333.03 of the Codified Ordinances of Independence. That section provides [\*5] in pertinent part:

[HN1] "No person shall operate a motor vehicle in and upon the streets and highways at a speed greater or less than is reasonable or proper, having due regard to the traffic, surface and width of the street or highway and any other conditions . . .

It is prima-facie lawful for the operator of a motor vehicle to operate the same at a speed not exceeding the following:

\* \* \*

(d) Thirty-five miles per hour on all State routes or through streets and through highways within the Municipality outside business districts, except as provided in subsection (e) of this section;

(e) Fifty miles per hour on controlled-access highways and expressways within the Municipality, and on State routes outside urban districts unless a lower prima-facie speed is established by Ohio *R.C. 4511.21*;

(f) Sixty miles per hour at all times on freeways with paved shoulders inside the Municipality, except fifty miles per hour at all times for operators of trucks and commercial tractors weighing in excess of 4,000 pounds empty weight and school buses.

It is prima-facie unlawful for any person to exceed any of the speed limitations in any section of this Traffic Code. [\*6] . . ." (Emphasis supplied.)

Section 333.03 [HN2] proscribes essentially the same conduct as *R.C. 4511.21* does and is based on that state statute. However, Section 333.03 states that it is prima-facie unlawful for a motorist to exceed the speed limits posted in Independence while *R.C. 4511.21* (and its predecessor statute which was in effect at the time of this offense, *R.C. 4511.211*) provides that no person shall drive a vehicle on the streets and highways of the state at a speed in excess of fifty-five miles per hour. *R.C. 4511.21(K)*.

[HN3] The Independence ordinance provides that a motorist shall operate his vehicle at a speed reasonable under the circumstances, and that operation of his vehicle at a speed in excess of the posted limit creates a rebuttable presumption that the motorist has violated the ordinance. Under Section 333.03, however, the motorist can challenge the presumption of a violation by showing that although he was traveling at a speed in excess of the posted limit, that nevertheless his speed was reasonable in light of road and other conditions at the time. *R.C. 4511.21(K)*, however, provides that in no event shall a motorist operate his vehicle at a speed in excess of [\*7] fifty-five miles per hour. Under this portion of the state statute, operation of a vehicle in excess of fifty-five miles per hour constitutes a speeding violation as a matter of law. The motorist is not permitted to rebut a presumption of unlawfulness by showing his speed was reasonable under the circumstances. If the motorist has travelled at a speed greater than fifty-five miles per hour, he has violated the statute.

Section 333.03 of the Codified Ordinances of Independence [HN4] conflicts with *R.C. 4511.21* as regards the effect of a speed in excess of fifty-five miles per hour. Regarding the situation where a city traffic ordinance conflicts with a state traffic statute, *R.C. 4511.06* provides as follows:

"Sections 4511.01 to 4511.78, inclusive, 4511.99 and 4513.01 to 4513.37, inclusive, of the Revised Code shall be applicable and uniform throughout the state and in all political subdivisions and municipal corporations therein, and no local authority shall enact or enforce any rule or regulation in conflict with such sections." (Emphasis supplied.)

Under the authority of *R.C. 4511.06* then, the conflict must be resolved in favor of *R.C. 4511.21*. Its provisions apply [\*8] in this case.

In the instant case, a careful review of Officer Furlan's testimony, summarized above, shows that the City of Independence adduced sufficient evidence as to each element of the offense of speeding to enable the trial court to conclude beyond a reasonable doubt that the appellant was guilty of that offense. The fact that the city did not introduce any evidence as to the posted speed limit on Rockside Road on February 26, 1975 was not fatal to the prosecution because the city did introduce evidence that the appellant was driving at a rate of speed in excess of 55 miles per hour. Regardless of the prima facie speed limit on Rockside Road on the date of the offense, a speed in excess of 55 miles per hour was proscribed by *R.C. 4511.21*.

Further, [HN5] the weight to be given to Officer Furlan's testimony, and his credibility were matters to be determined by the trial court as trier of the facts. See *State v. DeHass (1967), 10 Ohio St. 2d 230*. Clearly, it was the lower court's prerogative to believe all, some, or none of his testimony. The lower court obviously chose to believe part of Officer Furlan's testimony, and to disbelieve other parts which did not comport with mathematics [\*9] and logic.

Regarding the traffic signal violation, Officer Furlan's testimony was sufficient to enable the trial court to conclude beyond a reasonable doubt that the appellant was guilty of that offense also. Officer Furlan expressly stated that he saw the appellant drive through a red light on Rockside Road.

For the above stated reasons, the judgment of the Garfield Heights Municipal Court in both cases is affirmed.

It is ordered that appellees recover of appellants its costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Garfield Heights Municipal Court to carry

this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.  
Exceptions.

N.B. This entry is made pursuant to the third sentence of *Rule 22(D), Ohio Rules of Appellate Procedure*. This is an announcement of decision (see Rule 26). Ten (10) days from the date hereof this document will be stamped to indicate journalization, at which time it will become the judgment and order of the court and time period for review will begin to [\*10] run.

DEFENDANT APPELLANT**

No. 34949

Court of Appeals of Ohio, Eighth Appellate District, Cuyahoga County

*1976 Ohio App. LEXIS 8449*

June 17, 1976

**NOTICE:** PURSUANT TO RULE 2(G) OF THE OHIO SUPREME COURT RULES FOR THE REPORTING OF OPINIONS, UNPUBLISHED OPINIONS MAY BE CITED SUBJECT TO CERTAIN RESTRAINTS, LIMITATIONS, AND EXCEPTIONS.

**PRIOR HISTORY:** [\*1]

APPEAL FROM Garfield Heights Municipal COURT, No. Cr-102,961 Cr-102,960

**DISPOSITION:**

Judgment Affirmed

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of a judgment from the Garfield Heights Municipal Court (Ohio), which found him guilty of two traffic offenses, running a red light and speeding. Defendant claimed that the convictions were against the manifest weight of evidence.

**OVERVIEW:** Defendant was pulled over by a city police officer and issued two traffic tickets. The first ticket was for disobeying a traffic signal by running a red light, and the second ticket was for speeding by driving 70 miles per hour in a 35 mile per hour speed zone. Defendant was convicted and appealed. In upholding the judgment, the court ruled that the city adduced sufficient evidence as to each element of the offense of speeding to enable the trial court to conclude beyond a reasonable doubt that defendant was guilty of that offense. The court stated that the fact that the city did not introduce any evidence as to the posted speed limit was not fatal to the prosecution because the city introduced evidence that defendant was driving at a rate of speed in excess of 55 miles per hour. Regardless of the prima facie speed limit on the road on which defendant was driving on the date of the offense, a speed limit in excess of 55 miles per hour was proscribed by *Ohio Rev. Code Ann. § 4511.21*. Further, the court held that the weight to be given to the police officer's testimony, as well as the issue of his credibility, were matters to be determined by the trial court as the trier of fact.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** speed, mile, motorist, traffic signal, speeding, fifty-five, highway, posted, traffic, prima-facie, street,

motor vehicle, speed limit, red light, intersection, disobeying, driver, drive, radar, beyond a reasonable doubt, state statute, handed down, case number, ordinance, ticket, comprising, inclusive, supplied, manifest, cruiser

### **LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN1] Independence, Ohio, Codified Ordinance § 333.03 provides, in part, that: No person shall operate a motor vehicle in and upon the streets and highways at a speed greater or less than is reasonable or proper, having due regard to the traffic, surface and width of the street or highway and any other conditions. It is prima-facie lawful for the operator of a motor vehicle to operate the same at a speed not exceeding the following: 35 miles per hour on all state routes or through streets and through highways within the municipality outside business districts, except as provided in § 333.03(e); 50 miles per hour on controlled-access highways and expressways within the municipality and on state routes outside urban districts unless a lower prima-facie speed is established by *Ohio Rev. Code Ann. § 4511.21*; 60 miles per hour at all times on freeways with paved shoulders inside the municipality, except 50 miles per hour at all times for operators of trucks and commercial tractors weighing in excess of 4,000 pounds empty weight and school buses. It is prima-facie unlawful for any person to exceed any of the speed limitations in any section of the Ohio Traffic Code.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN2] Independence, Ohio, Codified Ordinance § 333.03 proscribes essentially the same conduct as *Ohio Rev. Code Ann. § 4511.21* does and is based on that state statute. However, Independence, Ohio, Codified Ordinance § 333.03 states that it is prima-facie unlawful for a motorist to exceed the speed limits posted in Independence while *Ohio Rev. Code Ann. § 4511.21*, and its predecessor statute *Ohio Rev. Code Ann. § 4511.211*, provides that no person shall drive a vehicle on the streets and highways of the state at a speed in excess of 55 miles per hour. *Ohio Rev. Code Ann. § 4511.21(K)*.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Evidence > Inferences & Presumptions > Rebuttal of Presumptions  
Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN3] Independence, Ohio, Codified Ordinance § 333.03 provides that a motorist shall operate his vehicle at a speed reasonable under the circumstances and that operation of his vehicle at a speed in excess of the posted limit creates a rebuttable presumption that the motorist has violated the ordinance. Under § 333.03, however, the motorist can challenge the presumption of a violation by showing that although he was traveling at a speed in excess of the posted limit, that nevertheless his speed was reasonable in light of road and other conditions at the time. *Ohio Rev. Code Ann. § 4511.21(K)*, however, provides that in no event shall a motorist operate his vehicle at a speed in excess of 55 miles per hour. Under this portion of the state statute, operation of a vehicle in excess of 55 miles per hour constitutes a speeding violation as a matter of law. The motorist is not permitted to rebut a presumption of unlawfulness by showing his speed was reasonable under the circumstances. If the motorist has travelled at a speed greater than 55 miles per hour, he has violated the statute.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence  
Governments > Local Governments > Ordinances & Regulations***

[HN4] Independence, Ohio, Codified Ordinance § 333.03 conflicts with *Ohio Rev. Code Ann. § 4511.21* as regards the

effect of a speed in excess of 55 miles per hour. Regarding the situation where a city traffic ordinance conflicts with a state traffic statute, *Ohio Rev. Code Ann. §4511.06* provides as follows: *Ohio Rev. Code Ann. §§ 4511.01 to 4511.78, inclusive, § 4511.99, and §§ 4513.01 to 4513.37, inclusive, shall be applicable and uniform throughout the state and in all political subdivisions and municipal corporations therein, and no local authority shall enact or enforce any rule or regulation in conflict with such sections. Thus, under the authority of Ohio Rev. Code Ann. § 4511.06, the conflict must be resolved in favor of Ohio Rev. Code Ann. § 4511.21.*

***Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > General Overview***

***Criminal Law & Procedure > Witnesses > Credibility***

[HN5] The weight to be given to a police officer's testimony and his credibility are matters to be determined by the trial court as trier of the facts. It is within a lower court's prerogative to believe all, some, or none of his testimony.

**COUNSEL:**

For Plaintiff Appellee: Timothy Koral

For Defendant Appellant: Brian T. Melling

**JUDGES:**

DAY, P.J., KRENZLER, J., WASSERMAN, J. CONCUR. (Wasserman, J., Retired, sitting by assignment.)

**OPINION:**

JOURNAL ENTRY

This cause came on to be heard upon the pleadings and the transcript of the evidence and the record in the Garfield Heights Municipal Court, and was argued by counsel for the parties; and upon consideration, the court finds no error prejudicial to the appellant and therefore the judgment of the Garfield Heights Municipal Court is affirmed. Each assignment of error was reviewed and upon review the following disposition made:

On February 26, 1975 Officer Michael Furlan of the Independence Police Department issued two Ohio Uniform Traffic Tickets to the appellant, John W. English. The first ticket, comprising lower court case number 102,960, charged the appellant with, on February 26, 1975 at 12:50 A.M., disobeying a traffic signal or device, namely a red light, at Rockside Road and Interstate-77 in the City of Independence, in violation of Section 313.01 of the Codified Ordinances [\*2] of Independence, Ohio. The second ticket, comprising lower court case number 102, 961, charged the appellant with, on the same date and at the same time, operating a motor vehicle westbound on Rockside Road from Interstate - 77 in the City of Independence at a speed unreasonable for the conditions, namely at 70 miles per hour in a 35 mile per hour zone, in violation of Section 333.03 of the Codified Ordinances of Independence.

At his arraignment in the Garfield Heights Municipal Court on April 7, 1975, the appellant entered a plea of not guilty to the charges.

On April 21, 1975 a trial to the court alone on both charges was conducted. The City of Independence presented one witness in its favor, Officer Furlan, while the defense presented no witnesses. A brief summary of Officer Furlan's testimony is as follows.

Officer Furlan testified that on February 26, 1975 at approximately 1:00 A.M. he was on general patrol; that at that time he was coming out of the Holiday Inn parking lot in Independence in his cruiser when he saw a car go through a red light at a nearby intersection; that he proceeded to follow the car, which was heading west on Rockside Road; that after stopping at the [\*3] intersection, he noted that the other car was starting to move pretty fast so he began to clock

the car; and that while giving chase he determined the speed of the car by use of a moving radar unit he had in the cruiser to be approximately 70 miles per hour. Furlan stated that the intersection with the traffic signal was lighted and repeated that the traffic light he saw the car go through was red. He also testified that it was a clear night on February 26, 1975; that the road conditions were dry; that there was light traffic at the time; that the moving radar unit was properly operating that night; that this particular radar unit is checked by means of a tuning fork and calibration; and that eventually he caught up to the car in Seven Hills, pulled it over, and cited the driver. Officer Furlan identified the appellant as the driver of the car and the person he had cited. He did not testify as to the posted speed limit on Rockside Road in the area where he clocked the appellant's speed.

At the close of the city's case, the trial court overruled the appellant's motion for acquittal. The appellant then rested and the court found him guilty of both traffic offenses as charged in [\*4] the two cases. The trial court fined the appellant the sum of \$ 25.00 and court costs on the traffic signal violation and \$ 75.00 and court costs on the speeding violation. The court also ordered the appellant's driver's license suspended for one year, with the proviso that the appellant could drive for work purposes only.

On May 16, 1975, the appellant filed a timely notice of appeal of the two convictions and assigns two errors for this court's consideration:

- I. The conviction of speeding as handed down by the Garfield Heights Municipal Court is against the manifest weight of the evidence.
- II. The conviction of Disobeying a Traffic Signal as handed down by the Garfield Heights Municipal Court is against the manifest weight of the evidence.

Because they are related, the appellant's two assignments of error will be treated together. In them the appellant contends that the convictions of speeding and of disobeying a traffic signal are against the weight of the evidence. These assigned errors are not well taken.

Regarding the speeding conviction, the appellant was charged with violating Section 333.03 of the Codified Ordinances of Independence. That section provides [\*5] in pertinent part:

[HN1] "No person shall operate a motor vehicle in and upon the streets and highways at a speed greater or less than is reasonable or proper, having due regard to the traffic, surface and width of the street or highway and any other conditions . . .

It is prima-facie lawful for the operator of a motor vehicle to operate the same at a speed not exceeding the following:

\* \* \*

(d) Thirty-five miles per hour on all State routes or through streets and through highways within the Municipality outside business districts, except as provided in subsection (e) of this section;

(e) Fifty miles per hour on controlled-access highways and expressways within the Municipality, and on State routes outside urban districts unless a lower prima-facie speed is established by Ohio *R.C. 4511.21*;

(f) Sixty miles per hour at all times on freeways with paved shoulders inside the Municipality, except fifty miles per hour at all times for operators of trucks and commercial tractors weighing in excess of 4,000 pounds empty weight and school buses.

It is prima-facie unlawful for any person to exceed any of the speed limitations in any section of this Traffic Code. [\*6] . . ." (Emphasis supplied.)

Section 333.03 [HN2] proscribes essentially the same conduct as *R.C. 4511.21* does and is based on that state statute. However, Section 333.03 states that it is prima-facie unlawful for a motorist to exceed the speed limits posted in Independence while *R.C. 4511.21* (and its predecessor statute which was in effect at the time of this offense, *R.C. 4511.211*) provides that no person shall drive a vehicle on the streets and highways of the state at a speed in excess of fifty-five miles per hour. *R.C. 4511.21(K)*.

[HN3] The Independence ordinance provides that a motorist shall operate his vehicle at a speed reasonable under the circumstances, and that operation of his vehicle at a speed in excess of the posted limit creates a rebuttable presumption that the motorist has violated the ordinance. Under Section 333.03, however, the motorist can challenge the presumption of a violation by showing that although he was traveling at a speed in excess of the posted limit, that nevertheless his speed was reasonable in light of road and other conditions at the time. *R.C. 4511.21(K)*, however, provides that in no event shall a motorist operate his vehicle at a speed in excess of [\*7] fifty-five miles per hour. Under this portion of the state statute, operation of a vehicle in excess of fifty-five miles per hour constitutes a speeding violation as a matter of law. The motorist is not permitted to rebut a presumption of unlawfulness by showing his speed was reasonable under the circumstances. If the motorist has travelled at a speed greater than fifty-five miles per hour, he has violated the statute.

Section 333.03 of the Codified Ordinances of Independence [HN4] conflicts with *R.C. 4511.21* as regards the effect of a speed in excess of fifty-five miles per hour. Regarding the situation where a city traffic ordinance conflicts with a state traffic statute, *R.C. 4511.06* provides as follows:

"Sections 4511.01 to 4511.78, inclusive, 4511.99 and 4513.01 to 4513.37, inclusive, of the Revised Code shall be applicable and uniform throughout the state and in all political subdivisions and municipal corporations therein, and no local authority shall enact or enforce any rule or regulation in conflict with such sections." (Emphasis supplied.)

Under the authority of *R.C. 4511.06* then, the conflict must be resolved in favor of *R.C. 4511.21*. Its provisions apply [\*8] in this case.

In the instant case, a careful review of Officer Furlan's testimony, summarized above, shows that the City of Independence adduced sufficient evidence as to each element of the offense of speeding to enable the trial court to conclude beyond a reasonable doubt that the appellant was guilty of that offense. The fact that the city did not introduce any evidence as to the posted speed limit on Rockside Road on February 26, 1975 was not fatal to the prosecution because the city did introduce evidence that the appellant was driving at a rate of speed in excess of 55 miles per hour. Regardless of the prima facie speed limit on Rockside Road on the date of the offense, a speed in excess of 55 miles per hour was proscribed by *R.C. 4511.21*.

Further, [HN5] the weight to be given to Officer Furlan's testimony, and his credibility were matters to be determined by the trial court as trier of the facts. See *State v. DeHass (1967), 10 Ohio St. 2d 230*. Clearly, it was the lower court's prerogative to believe all, some, or none of his testimony. The lower court obviously chose to believe part of Officer Furlan's testimony, and to disbelieve other parts which did not comport with mathematics [\*9] and logic.

Regarding the traffic signal violation, Officer Furlan's testimony was sufficient to enable the trial court to conclude beyond a reasonable doubt that the appellant was guilty of that offense also. Officer Furlan expressly stated that he saw the appellant drive through a red light on Rockside Road.

For the above stated reasons, the judgment of the Garfield Heights Municipal Court in both cases is affirmed.

It is ordered that appellees recover of appellants its costs herein taxed.

The Court finds there were reasonable grounds for this appeal.

It is ordered that a special mandate issue out of this Court directing the Garfield Heights Municipal Court to carry

this judgment into execution.

A certified copy of this entry shall constitute the mandate pursuant to *Rule 27 of the Rules of Appellate Procedure*.  
Exceptions.

N.B. This entry is made pursuant to the third sentence of *Rule 22(D), Ohio Rules of Appellate Procedure*. This is an announcement of decision (see Rule 26). Ten (10) days from the date hereof this document will be stamped to indicate journalization, at which time it will become the judgment and order of the court and time period for review will begin to [\*10] run.

**COMMONWEALTH of Pennsylvania v. David ELLIOTT, Appellant****No. 00736 Philadelphia, 1991****Superior Court of Pennsylvania*****410 Pa. Super. 354; 599 A.2d 1335; 1991 Pa. Super. LEXIS 3463*****July 31, 1991, Argued****November 7, 1991, Filed****PRIOR HISTORY:** [\*\*\*1]

Appeal from the Judgment of Sentence in the Court of *Common Pleas of Bucks County, Criminal Division, No. 401 Misc. 1990. Commonwealth v. Elliott, 10 Pa. D. & C.4th 190, 1991 Pa. Dist. & Cnty. Dec. LEXIS 310 (1991)*

**DISPOSITION:**

Judgment of sentence affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant minor sought review of a judgment of the Court of Common Pleas of Bucks County, Pennsylvania that convicted appellant of underage drinking. Appellant asserted that the evidence was insufficient to support the conviction, and that the admission of breathalyzer test results was erroneous.

**OVERVIEW:** Appellant minor was convicted of underage drinking, following a trial de novo. The appeals court affirmed, holding that the evidence was sufficient to find appellant guilty of underage drinking. The court held that the arresting officer had the authority to cite appellant for a summary offense not committed in the officer's presence, and the mere fact that the commonwealth failed to present a certified copy of appellant's birth certificate or driver's license did not mean that it had failed to meet its burden of proof. The trial court did not err when it allowed the admission into evidence of breathalyzer results, as the results were authorized in any proceeding which related to the use of alcohol. The commonwealth presented sufficient evidence to sustain appellant's conviction for the summary offense of underage drinking, and the court affirmed the judgment of sentence.

**OUTCOME:** The court affirmed a judgment of the trial court that convicted appellant of underage drinking, holding that the evidence was sufficient to support the conviction. The court held that the admission of the breathalyzer results was not erroneous because the results were authorized in any proceedings that related to the use of alcohol.

**OPINION BY:**

TAMILIA

**OPINION:**

[\*356] [\*\*1336]

Appellant, David Elliott, takes this appeal from his summary conviction for underage drinking, n1 following a trial *de novo* before the Honorable John J. Rufe of the Court of Common Pleas of Bucks County. In this appeal, appellant raises several issues concerning the sufficiency of the evidence to find appellant guilty of underage drinking. [HN1] In order to review a claim the evidence introduced by the Commonwealth was insufficient to prove appellant's guilt beyond a reasonable doubt, we must accept all evidence and all reasonable inferences therefrom, upon which the fact finder could have based the verdict, in order to determine whether the Commonwealth's evidence was legally sufficient to support the verdict. Only where the evidence, [\*357] when so viewed, is insufficient [\*\*\*2] to establish guilt

beyond a reasonable doubt as to the crimes charged is relief granted. *Commonwealth* [\*\*1337] v. *Cody*, 401 Pa. Super. 85, 584 A.2d 992 (1991).

n1 18 Pa.C.S. § 6308.

Viewed in this light, the evidence establishes that shortly after midnight on February 10, 1990, Officer Donald Schwab of the Bensalem Township Police Department arrived at the scene of a two-car automobile accident. At that time, appellant identified himself to Officer Schwab as the driver of one of the vehicles, producing a vehicle registration and a driver's license indicating his date of birth as March 10, 1973. Officer Schwab detected the odor of an alcoholic beverage on appellant's breath and gave him a roadside prearrest breath test, which resulted in a reading of .04 per cent blood alcohol content (BAC). Appellant was taken into custody and transported to police headquarters, where, with appellant's consent, an Intoximeter 3000 breath test was administered twice to appellant, [\*\*\*3] with both tests resulting in a BAC reading of .04 per cent. Following this finding, a citation was issued to appellant charging him with underage drinking. Appellant stipulated at trial to the calibration of the Intoximeter 3000 and the accuracy of the results derived therefrom.

Appellant now argues the evidence was insufficient to sustain a conviction for underage drinking because a summary offense such as underage drinking must be committed in the presence of a police officer, circumstances not present in this case. We do not agree.

The section of the Crimes Code under which appellant was charged states, in pertinent part: "A person commits a summary offense if he, being less than 21 years of age, attempts to purchase, purchases, consumes, possesses or knowingly and intentionally transports any liquor or malt or brewed beverages . . ." 18 Pa.C.S. § 6308.

An Act of Assembly which imposes penal sanctions for violations of its provisions must be strictly construed. 1 Pa.C.S. § 1928; *Commonwealth v. Hill*, 481 Pa. 37, [\*358] 391 A.2d 1303 (1978). "However, strict construction does not require that the words of a criminal statute [\*\*\*4] be given their narrowest meaning or that the legislature's evident intent be disregarded." *Commonwealth v. Gordon*, 511 Pa. 481, 487, 515 A.2d 558, 561 (1986). In attempting to ascertain the meaning of a statute we are required to consider the intent of the legislature and are permitted to examine the practical consequences of a particular interpretation. *Commonwealth v. Stewart*, 375 Pa. Super. 585, 544 A.2d 1384 (1988). We are to presume the legislature did not intend a result that is absurd or unreasonable. *Commonwealth v. Martorano*, 387 Pa. Super. 151, 563 A.2d 1229 (1989).

For his part, appellant relies upon *Commonwealth v. Pincavitch*, 206 Pa. Super. 539, 214 A.2d 280 (1965), a case which applied the precursor of section 6308, 18 P.S. § 4675.1 (repealed). In *Pincavitch*, this Court found "no authority that justifies an arrest without a warrant for a . . . summary offense committed beyond the presence of the arresting officer *in the absence of a statute giving that right.*" *Id.*, 206 Pa. Superior Ct. at 544, 214 A.2d at 282 [\*\*\*5] (emphasis added). n2 Subsequent to *Pincavitch*, however, the legislature enacted the following statute:

#### **§ 8952. Primary municipal police jurisdiction**

[HN2] Any duly employed municipal police officer shall have the power and authority to enforce the laws of this Commonwealth or otherwise perform the functions of that office anywhere within his primary jurisdiction as to:

(1) Any offense which the officer views or otherwise has probable cause to believe was committed within his jurisdiction.

[\*359] (2) Any other event that occurs within his primary jurisdiction and which reasonably requires action on [\*\*1338] the part of the police in order to preserve, protect or defend persons or property or to otherwise maintain the peace and dignity of this Commonwealth.

42 Pa.C.S. § 8952 (emphasis added), 1982, June 15, P.L. 512, No. 141, § 4, effective in 60 days. Appellant does not dispute Bensalem Township is a municipality or that Officer Schwab was a duly employed municipal police officer. Clearly, then, *Pincavitch* offers no guidance on this issue, and instead section 8952 controls. n3 Further, it does not require any elaborate judicial interpretation of section [\*\*\*6] 8952 to determine the inclusive language of the statute allows a municipal police officer to perform his duties with regard to *any* offense committed within his jurisdiction, be it a felony, misdemeanor or summary offense. This authority is not limited to offenses viewed by the officer but includes those offenses which the officer has probable cause to believe were committed within his jurisdiction. 42 Pa.C.S. § 8952(1). Were such not the case, the practical consequences would be that police officers often would be unable to issue citations for summary offenses otherwise established by the evidence at hand merely because they were called to the scene after the violations occurred. It is unquestionably the legislature's intent to establish a probable cause standard as a means of defining the bounds of police authority in arresting or citing an actor for a summary offense. The Comment to Pa.R.Crim.P. 55, **Issuance of Citation**, states:

[\*360]

A law enforcement officer may issue a citation based upon information that the defendant has committed a summary violation, which information may be received from a personal observation of the commission of the offense; a witness; [\*\*\*7] another police officer; *investigation*; or speed-timing equipment, including radar.

(Emphasis added.) Comments to Rule 70, **Arrest Without Warrant**, provide as follows:

It is intended that these proceedings will be instituted by arrest only in exceptional circumstances such as those involving violence, or the imminent threat of violence, or those involving danger that the defendant will flee.

The Vehicle Code provides the procedures for arresting a defendant without a warrant for a summary offense under that Code.

Therefore, having made the determination Officer Schwab had the authority to cite appellant for a summary offense not committed in the officer's presence, we only need determine whether the evidence was sufficient to sustain a finding of guilt.

n2 Appellant's citations to *Commonwealth v. Pincavitch*, 206 Pa.Super. 539, 214 A.2d 280 (1965), and *Commonwealth v. Shillingford*, 231 Pa.Super. 407, 332 A.2d 824 (1975), are misplaced to the extent that in those cases action was instituted by arrest whereas here, after permissible investigation of DUI charges which includes conducting a breathalyzer test, a citation was issued. There was initial probable cause to take appellant into custody for DUI which is permissible without a warrant under 75 Pa.C.S. § 3731, **Driving under the influence of alcohol or controlled substance**.

[\*\*\*8]

n3 Pennsylvania Rule of Criminal Procedure 70, Part IV. Procedures in Summary Cases When Defendant is Arrested Without Warrant, provides:

**Rule 70. Arrest Without Warrant**

When an arrest without a warrant in a summary case is authorized by law, a police officer who exhibits some sign of authority may institute proceedings by such an arrest.

Thus, whether this case originated pursuant to arrest without a warrant or citation, the sections of the Motor

Vehicle Code and Criminal Code cited above permit such a proceeding. This is also supported by the Rules of Criminal Procedure cited infra.

The Commonwealth may sustain its burden of proof by means of wholly circumstantial evidence, so long as the inferred facts flow, beyond a reasonable doubt, from the proven facts to establish the accused's guilt or elements of the crime. *Commonwealth v. Ramos*, 392 Pa. Super. 583, 573 A.2d 1027 (1990).

Although appellant argues the Commonwealth was required to offer formal proof appellant was under the age of 21 at the time of the offense, we find no support for [\*\*\*9] this position. Officer Schwab presented uncontradicted testimony that the driver's license produced by appellant at the scene of the accident indicated his date of birth as March 10, 1973, making him sixteen years of age. We agree with the trial court's finding that the "mere fact that the Commonwealth failed to present a certified copy of the defendant's birth certificate or driver's license does not mean that it has failed to meet its burden." (Slip Op., Rufe, J., [\*361] 3/26/91, p. 3.) Nothing in the record refutes the authenticity of the driver's license or the accuracy of the birthdate. [\*\*1339] When the Commonwealth presents evidence with adequate probative value to establish the truth of the matter, in the face of the denial of the adequacy of that proof, it becomes a matter for determination by the trial judge, which determination will not be overturned on appeal.

Finally, appellant argues the trial court erred in allowing the admission into evidence of breathalyzer results, which are of no relevance to sustain a charge of underage drinking and are only admissible to prove a charge under the Vehicle Code. The Vehicle Code allows for the admission of blood alcohol tests [\*\*\*10] in "any summary proceeding or criminal proceeding in which the defendant is charged with a violation of section 3731 or any other violation of this title arising out of the same action . . ." 75 Pa.C.S. § 1547(c). While appellant would have the language of section 1547 bar the admission of appellant's two .04 per cent blood alcohol tests in this case, we find section 1547 far more inclusive. We find the first conjunction "or" used in section 1547(c) to have been used as a function word to indicate an alternative. Summary proceedings, then, are differentiated from criminal proceedings in which the defendant is charged under section 3731, dealing with driving under the influence, and the words of section 1547 are not given their narrowest meaning. We believe such a construction of the language of the statute best comports with the reasonable intent of the legislature and the promotion of justice. 1 Pa.C.S. § 1928, *supra*. Thus, section 1547 authorizes the admission into evidence the results of a breathalyzer in any proceeding, summary or criminal, which in any way related to the use of alcohol. In addition, a unique aspect of this case is the fact that the appellant is a [\*\*\*11] minor. 18 Pa.C.S. § 6310.4, **Restriction of operating privileges**, provides:[HN3]

**(a) General rule.** -- Whenever a person is convicted or is adjudicated delinquent or is admitted to any preadjudication program for a violation of section 6307 (relating to misrepresentation of age to secure liquor or malt or [\*362] brewed beverages), 6308 (relating to purchase, consumption, possession or transportation of liquor or malt or brewed beverages) or 6310.3 (relating to carrying a false identification card), the court, including a court not of record if it is exercising jurisdiction pursuant to 42 Pa.C.S. § 1515(a) (relating to jurisdiction and venue), shall order the operating privilege of the person suspended. A copy of the order shall be transmitted to the Department of Transportation.

**(b) Duration of suspension.** -- When the department suspends the operating privilege of a person under subsection (a), the duration of the suspension shall be as follows:

- (1) For a first offense, a period of 90 days from the date of suspension.
- (2) For a second offense, a period of one year from the date of suspension.
- (3) For a third offense, and any offenses thereafter, a period of two years [\*\*\*12] from the date of suspension. Any multiple sentences imposed shall be served consecutively.

Reinstatement of operating privilege shall be governed by 75 Pa.C.S. § 1545 (relating to restoration of operating privilege).

It necessarily follows that an underage drinking violation and conviction implicates the Motor Vehicle Code requiring suspension of the license, if the defendant has one, and restoration pursuant to the Code. Section 1547, therefore, clearly applies to proceedings and convictions under section 6308.

For the foregoing reasons, we find appellant's claim without merit. The Commonwealth presented sufficient evidence to sustain appellant's conviction for the summary offense of underage drinking, and we affirm the judgment of sentence.

Judgment of sentence affirmed.

**DISSENT BY:**

MONTEMURO (In Part)

**DISSENT:**

[\*363]

MONTEMURO, Judge, concurring and dissenting:

While I have no quarrel with the majority's conclusion as to the first two issues in this case, I cannot agree that breathalyzer results are admissible into evidence. The [\*\*1340] Vehicle Code, section § 1547(c), cited in support of admissibility, may well be as inclusive as the Majority would have it, but [\*\*\*13] where no violation under the Code has been charged, its provisions, however broad, are inapplicable. The majority seems to be suggesting that guilty may be proven by implication, as "it necessarily follows that an underage drinking violation and conviction implicates the Motor Vehicle Code." (Majority Opinion at 1339) If this were so, a juvenile too young to have a driver's license, or one stopped for pedestrian trespassing, and found to be in the same condition as appellant, could be tested by Intoximeter and expect to have the results used against him at trial under the aegis of the Vehicle Code. I do not believe the statute was intended to have such a lengthy reach, and therefore dissent.

Having said so much, I would also find that in the case at hand introduction of the Intoximeter evidence was harmless error, as the testimony of the arresting officer, that he smelled alcohol on appellant's breath, would, if believed, be enough to support a finding of underage drinking.

Appeal from the Judgment of Sentence in the Court of *Common Pleas of Bucks County, Criminal Division, No. 401 Misc. 1990. Commonwealth v. Elliott, 10 Pa. D. & C.4th 190, 1991 Pa. Dist. & Cnty. Dec. LEXIS 310 (1991)*

**DISPOSITION:**

Judgment of sentence affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant minor sought review of a judgment of the Court of Common Pleas of Bucks County, Pennsylvania that convicted appellant of underage drinking. Appellant asserted that the evidence was insufficient to support the conviction, and that the admission of breathalyzer test results was erroneous.

**OVERVIEW:** Appellant minor was convicted of underage drinking, following a trial de novo. The appeals court affirmed, holding that the evidence was sufficient to find appellant guilty of underage drinking. The court held that the arresting officer had the authority to cite appellant for a summary offense not committed in the officer's presence, and the mere fact that the commonwealth failed to present a certified copy of appellant's birth certificate or driver's license did not mean that it had failed to meet its burden of proof. The trial court did not err when it allowed the admission into evidence of breathalyzer results, as the results were authorized in any proceeding which related to the use of alcohol. The commonwealth presented sufficient evidence to sustain appellant's conviction for the summary offense of underage drinking, and the court affirmed the judgment of sentence.

**OUTCOME:** The court affirmed a judgment of the trial court that convicted appellant of underage drinking, holding that the evidence was sufficient to support the conviction. The court held that the admission of the breathalyzer results was not erroneous because the results were authorized in any proceedings that related to the use of alcohol.

**OPINION:**

[\*356] [\*\*1336]

Appellant, David Elliott, takes this appeal from his summary conviction for underage drinking, n1 following a trial *de novo* before the Honorable John J. Rufe of the Court of Common Pleas of Bucks County. In this appeal, appellant raises several issues concerning the sufficiency of the evidence to find appellant guilty of underage drinking. [HN1] In order to review a claim the evidence introduced by the Commonwealth was insufficient to prove appellant's guilt beyond a reasonable doubt, we must accept all evidence and all reasonable inferences therefrom, upon which the fact finder could have based the verdict, in order to determine whether the Commonwealth's evidence was legally sufficient to support the verdict. Only where the evidence, [\*357] when so viewed, is insufficient [\*\*\*2] to establish guilt

beyond a reasonable doubt as to the crimes charged is relief granted. *Commonwealth* [\*\*1337] v. *Cody*, 401 Pa. Super. 85, 584 A.2d 992 (1991).

n1 18 Pa.C.S. § 6308.

Viewed in this light, the evidence establishes that shortly after midnight on February 10, 1990, Officer Donald Schwab of the Bensalem Township Police Department arrived at the scene of a two-car automobile accident. At that time, appellant identified himself to Officer Schwab as the driver of one of the vehicles, producing a vehicle registration and a driver's license indicating his date of birth as March 10, 1973. Officer Schwab detected the odor of an alcoholic beverage on appellant's breath and gave him a roadside prearrest breath test, which resulted in a reading of .04 per cent blood alcohol content (BAC). Appellant was taken into custody and transported to police headquarters, where, with appellant's consent, an Intoximeter 3000 breath test was administered twice to appellant, [\*\*\*3] with both tests resulting in a BAC reading of .04 per cent. Following this finding, a citation was issued to appellant charging him with underage drinking. Appellant stipulated at trial to the calibration of the Intoximeter 3000 and the accuracy of the results derived therefrom.

Appellant now argues the evidence was insufficient to sustain a conviction for underage drinking because a summary offense such as underage drinking must be committed in the presence of a police officer, circumstances not present in this case. We do not agree.

The section of the Crimes Code under which appellant was charged states, in pertinent part: "A person commits a summary offense if he, being less than 21 years of age, attempts to purchase, purchases, consumes, possesses or knowingly and intentionally transports any liquor or malt or brewed beverages . . ." 18 Pa.C.S. § 6308.

An Act of Assembly which imposes penal sanctions for violations of its provisions must be strictly construed. 1 Pa.C.S. § 1928; *Commonwealth v. Hill*, 481 Pa. 37, [\*358] 391 A.2d 1303 (1978). "However, strict construction does not require that the words of a criminal statute [\*\*\*4] be given their narrowest meaning or that the legislature's evident intent be disregarded." *Commonwealth v. Gordon*, 511 Pa. 481, 487, 515 A.2d 558, 561 (1986). In attempting to ascertain the meaning of a statute we are required to consider the intent of the legislature and are permitted to examine the practical consequences of a particular interpretation. *Commonwealth v. Stewart*, 375 Pa. Super. 585, 544 A.2d 1384 (1988). We are to presume the legislature did not intend a result that is absurd or unreasonable. *Commonwealth v. Martorano*, 387 Pa. Super. 151, 563 A.2d 1229 (1989).

For his part, appellant relies upon *Commonwealth v. Pincavitch*, 206 Pa. Super. 539, 214 A.2d 280 (1965), a case which applied the precursor of section 6308, 18 P.S. § 4675.1 (repealed). In *Pincavitch*, this Court found "no authority that justifies an arrest without a warrant for a . . . summary offense committed beyond the presence of the arresting officer *in the absence of a statute giving that right.*" *Id.*, 206 Pa. Superior Ct. at 544, 214 A.2d at 282 [\*\*\*5] (emphasis added). n2 Subsequent to *Pincavitch*, however, the legislature enacted the following statute:

#### **§ 8952. Primary municipal police jurisdiction**

[HN2] Any duly employed municipal police officer shall have the power and authority to enforce the laws of this Commonwealth or otherwise perform the functions of that office anywhere within his primary jurisdiction as to:

(1) Any offense which the officer views *or otherwise has probable cause to believe* was committed within his jurisdiction.

[\*359] (2) *Any other event that occurs within his primary jurisdiction and which reasonably requires action on* [\*\*1338] *the part of the police in order to preserve, protect or defend persons or property or to otherwise maintain the peace and dignity of this Commonwealth.*

42 Pa.C.S. § 8952 (emphasis added), 1982, June 15, P.L. 512, No. 141, § 4, effective in 60 days. Appellant does not dispute Bensalem Township is a municipality or that Officer Schwab was a duly employed municipal police officer. Clearly, then, *Pincavitch* offers no guidance on this issue, and instead section 8952 controls. n3 Further, it does not require any elaborate judicial interpretation of section [\*\*\*6] 8952 to determine the inclusive language of the statute allows a municipal police officer to perform his duties with regard to *any* offense committed within his jurisdiction, be it a felony, misdemeanor or summary offense. This authority is not limited to offenses viewed by the officer but includes those offenses which the officer has probable cause to believe were committed within his jurisdiction. 42 Pa.C.S. § 8952(1). Were such not the case, the practical consequences would be that police officers often would be unable to issue citations for summary offenses otherwise established by the evidence at hand merely because they were called to the scene after the violations occurred. It is unquestionably the legislature's intent to establish a probable cause standard as a means of defining the bounds of police authority in arresting or citing an actor for a summary offense. The Comment to Pa.R.Crim.P. 55, **Issuance of Citation**, states:

[\*360]

A law enforcement officer may issue a citation based upon information that the defendant has committed a summary violation, which information may be received from a personal observation of the commission of the offense; a witness; [\*\*\*7] another police officer; *investigation*; or speed-timing equipment, including radar.

(Emphasis added.) Comments to Rule 70, **Arrest Without Warrant**, provide as follows:

It is intended that these proceedings will be instituted by arrest only in exceptional circumstances such as those involving violence, or the imminent threat of violence, or those involving danger that the defendant will flee.

The Vehicle Code provides the procedures for arresting a defendant without a warrant for a summary offense under that Code.

Therefore, having made the determination Officer Schwab had the authority to cite appellant for a summary offense not committed in the officer's presence, we only need determine whether the evidence was sufficient to sustain a finding of guilt.

n2 Appellant's citations to *Commonwealth v. Pincavitch*, 206 Pa.Super. 539, 214 A.2d 280 (1965), and *Commonwealth v. Shillingford*, 231 Pa.Super. 407, 332 A.2d 824 (1975), are misplaced to the extent that in those cases action was instituted by arrest whereas here, after permissible investigation of DUI charges which includes conducting a breathalyzer test, a citation was issued. There was initial probable cause to take appellant into custody for DUI which is permissible without a warrant under 75 Pa.C.S. § 3731, **Driving under the influence of alcohol or controlled substance**.

[\*\*\*8]

n3 Pennsylvania Rule of Criminal Procedure 70, Part IV. Procedures in Summary Cases When Defendant is Arrested Without Warrant, provides:

**Rule 70. Arrest Without Warrant**

When an arrest without a warrant in a summary case is authorized by law, a police officer who exhibits some sign of authority may institute proceedings by such an arrest.

Thus, whether this case originated pursuant to arrest without a warrant or citation, the sections of the Motor

Vehicle Code and Criminal Code cited above permit such a proceeding. This is also supported by the Rules of Criminal Procedure cited infra.

The Commonwealth may sustain its burden of proof by means of wholly circumstantial evidence, so long as the inferred facts flow, beyond a reasonable doubt, from the proven facts to establish the accused's guilt or elements of the crime. *Commonwealth v. Ramos*, 392 Pa. Super. 583, 573 A.2d 1027 (1990).

Although appellant argues the Commonwealth was required to offer formal proof appellant was under the age of 21 at the time of the offense, we find no support for [\*\*\*9] this position. Officer Schwab presented uncontradicted testimony that the driver's license produced by appellant at the scene of the accident indicated his date of birth as March 10, 1973, making him sixteen years of age. We agree with the trial court's finding that the "mere fact that the Commonwealth failed to present a certified copy of the defendant's birth certificate or driver's license does not mean that it has failed to meet its burden." (Slip Op., Rufe, J., [\*361] 3/26/91, p. 3.) Nothing in the record refutes the authenticity of the driver's license or the accuracy of the birthdate. [\*\*1339] When the Commonwealth presents evidence with adequate probative value to establish the truth of the matter, in the face of the denial of the adequacy of that proof, it becomes a matter for determination by the trial judge, which determination will not be overturned on appeal.

Finally, appellant argues the trial court erred in allowing the admission into evidence of breathalyzer results, which are of no relevance to sustain a charge of underage drinking and are only admissible to prove a charge under the Vehicle Code. The Vehicle Code allows for the admission of blood alcohol tests [\*\*\*10] in "any summary proceeding or criminal proceeding in which the defendant is charged with a violation of section 3731 or any other violation of this title arising out of the same action . . ." 75 Pa.C.S. § 1547(c). While appellant would have the language of section 1547 bar the admission of appellant's two .04 per cent blood alcohol tests in this case, we find section 1547 far more inclusive. We find the first conjunction "or" used in section 1547(c) to have been used as a function word to indicate an alternative. Summary proceedings, then, are differentiated from criminal proceedings in which the defendant is charged under section 3731, dealing with driving under the influence, and the words of section 1547 are not given their narrowest meaning. We believe such a construction of the language of the statute best comports with the reasonable intent of the legislature and the promotion of justice. 1 Pa.C.S. § 1928, *supra*. Thus, section 1547 authorizes the admission into evidence the results of a breathalyzer in any proceeding, summary or criminal, which in any way related to the use of alcohol. In addition, a unique aspect of this case is the fact that the appellant is a [\*\*\*11] minor. 18 Pa.C.S. § 6310.4, **Restriction of operating privileges**, provides:[HN3]

**(a) General rule.** -- Whenever a person is convicted or is adjudicated delinquent or is admitted to any preadjudication program for a violation of section 6307 (relating to misrepresentation of age to secure liquor or malt or [\*362] brewed beverages), 6308 (relating to purchase, consumption, possession or transportation of liquor or malt or brewed beverages) or 6310.3 (relating to carrying a false identification card), the court, including a court not of record if it is exercising jurisdiction pursuant to 42 Pa.C.S. § 1515(a) (relating to jurisdiction and venue), shall order the operating privilege of the person suspended. A copy of the order shall be transmitted to the Department of Transportation.

**(b) Duration of suspension.** -- When the department suspends the operating privilege of a person under subsection (a), the duration of the suspension shall be as follows:

- (1) For a first offense, a period of 90 days from the date of suspension.
- (2) For a second offense, a period of one year from the date of suspension.
- (3) For a third offense, and any offenses thereafter, a period of two years [\*\*\*12] from the date of suspension. Any multiple sentences imposed shall be served consecutively.

Reinstatement of operating privilege shall be governed by 75 Pa.C.S. § 1545 (relating to restoration of operating privilege).

It necessarily follows that an underage drinking violation and conviction implicates the Motor Vehicle Code requiring suspension of the license, if the defendant has one, and restoration pursuant to the Code. Section 1547, therefore, clearly applies to proceedings and convictions under section 6308.

For the foregoing reasons, we find appellant's claim without merit. The Commonwealth presented sufficient evidence to sustain appellant's conviction for the summary offense of underage drinking, and we affirm the judgment of sentence.

Judgment of sentence affirmed.

**COMMONWEALTH of Pennsylvania v. Jerome R. VISHNESKI, Appellant****No. 1023 Philadelphia 1988****Superior Court of Pennsylvania***380 Pa. Super. 495; 552 A.2d 297; 1989 Pa. Super. LEXIS 10***September 15, 1988, Submitted****January 6, 1989, Filed****PRIOR HISTORY:** [\*\*\*1]

Appeal from Judgment of Sentence March 8, 1988, in the Court of Common Pleas of Chester County, Criminal No. 2030-87.

**DISPOSITION:**

Judgment of sentence affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed his conviction from the Court of Common Pleas of Chester County (Pennsylvania) for driving a vehicle at an unsafe speed in violation of *75 Pa. Cons. Stat. Ann. § 3361* alleging the trial court erred in admitting into evidence the arresting officer's testimony regarding a speed-timing unit.

**OVERVIEW:** Defendant was convicted for a violation of *75 Pa. Cons. Stat. Ann. § 3361*, driving a vehicle at an unsafe speed, and sentenced to pay the statutory fine, plus court costs and the statutory emergency fund fine. Defendant's car was timed at 84.5 miles per hour in a 55 mile per hour zone by using a speed-timing device after his car was followed for a distance of about 0.09 miles. The court affirmed the trial court's judgment of sentence and concluded that the trial court did not err in admitting the unit's speed reading taken over a distance of less than one-tenth of a mile. The court found that the legislature did not indicate a minimum distance requirement for the use of the speed-timing devices nor did it provide the Department of Transportation with the authority to regulate the use of the unit by imposing a distance requirement. As such, the trial court did not err in admitting into evidence a unit's speed-reading taken over a distance less than the distance specified for calibration in *67 Pa. Code § 105.95*. The court concluded that there was sufficient evidence to support a finding that defendant was traveling at an unreasonable speed under the conditions.

**OUTCOME:** The court affirmed the trial court's judgment of sentence and conviction for the offense of driving a vehicle at an unsafe speed. The court concluded that the trial court did not err in admitting into evidence radar unit

speed-reading taken over a distance less than the distance specified for calibration and concluded that the evidence was sufficient to support defendant's conviction under the statute.

**CORE TERMS:** distance, speed, mile, lane, calibration, traveling, one-tenth, route, speed-timing, traffic, highway, electronic devices, speed limit, mechanical, electronic, electrical, hazards, regulation, testing, zone, northbound, exit, beyond a reasonable doubt, admission of evidence, human error, approaching, admitting, roadway, assured, drive

### **LexisNexis(R) Headnotes**

#### ***Governments > Legislation > Interpretation***

[HN1] The court is mindful that when the words of a statute are clear and free from all ambiguity, the letter of it is not to be disregarded under the pretext of pursuing its spirit, *1 Pa. Cons. Stat. Ann. § 1921(b)*, and every statute will be construed, if possible, to give effect to all its provisions, *1 Pa. Cons. Stat. Ann. § 1921(a)*.

#### ***Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN2] See *75 Pa. Cons. Stat. Ann. §§ 3368(c)-(e)*.

#### ***Transportation Law > Private Motor Vehicles > Traffic Regulation***

[HN3] See *67 Pa. Code § 105.95(a)(4)*.

#### ***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN4] A judgment may be affirmed by the appellate court on any legal theory, regardless of rationale or theory employed by the lower court.

#### ***Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

#### ***Evidence > Procedural Considerations > Burdens of Proof > Proof Beyond Reasonable Doubt***

#### ***Evidence > Procedural Considerations > Weight & Sufficiency***

[HN5] In evaluating a claim that the verdict is against the law for lack of sufficient evidence, the court must determine whether, viewing the evidence in the light most favorable to the commonwealth, and drawing all reasonable inferences favorable to the commonwealth, there is sufficient evidence to find every element of the crime beyond a reasonable doubt. The commonwealth may sustain its burden of proving every element of the crime beyond a reasonable doubt by means of wholly circumstantial evidence. Moreover, in applying the above test, the entire trial record must be evaluated and all evidence actually received must be considered. Finally, the trier of fact, while passing upon the credibility of witnesses and the weight to be afforded the evidence produced, is free to believe all, part or none of the evidence.

### **COUNSEL:**

Frank W. Hayes, West Chester, for appellant.

Thomas J. Wagner, Assistant District Attorney, Phoenixville, for Com., appellee.

### **JUDGES:**

Olszewski, Del Sole and Johnson, JJ.

**OPINION BY:**

OLSZEWSKI

**OPINION:**

[\*496] [\*\*298] This is an appeal from judgment of sentence in the Court of Common Pleas of Chester County entered against appellant for violation of 75 Pa.C.S.A. § 3361. Appellant contends that the trial court erred in: (1) admitting into evidence the arresting officer's testimony regarding a VASCAR-Plus unit speed-timing taken over a distance of less than one-tenth mile, and (2) finding appellant guilty of 75 [\*497] Pa.C.S.A. § 3361. For the reasons below, we affirm the trial court.

On March 22, 1987, appellant was driving north on Route 202 between Paoli Pike and Route 322 in Chester County. Officer Miller observed appellant's car in front of him traveling at a high rate of speed. Consequently, Officer Miller followed appellant's car for a distance of 0.0938 mile and timed the vehicle using a VASCAR-Plus speed-timing device. Appellant's car was timed [\*\*\*2] at 84.5 miles per hour in a 55 mile per hour zone. Thereafter, Officer Miller arrested appellant and charged him with violation of 75 Pa.C.S.A. § 3361, driving vehicle at unsafe speed.

Appellant was found guilty by the District Justice and appealed to the Court of Common Pleas. After a *de novo* trial, appellant was found guilty. Following denial of post-trial motions, appellant was sentenced to pay the statutory fine of \$ 25, plus court costs and the statutory emergency fund fine of \$ 10. This timely appeal follows.

Appellant first maintains that the trial judge erred in admitting into evidence the arresting officer's testimony regarding a VASCAR-Plus unit speed reading taken over a distance of less than one-tenth mile. Specifically, appellant contends that the testimony is inadmissible because the procedure used by the arresting officer is contrary to the one-tenth mile calibration requirement found in 67 Pa.Code § 105.95 and contrary to the holding of *Commonwealth v. Alexion*, 33 Ches.Co.Rep. 37 (1984). In *Alexion*, *supra*, the trial court "[found] the 1/10 of a mile calibration to be reasonable and conclude[d] that it should also apply, [\*\*\*3] as a minimum standard, to the use of VASCAR-PLUS." *Id.* at 38.

In reviewing appellant's contention, we turn to the applicable statutory provisions to determine the legislative intent regarding the use of a VASCAR-Plus unit. In ascertaining the legislature's intent, [HN1] we are mindful that "[w]hen the words of a statute are clear and free from all ambiguity, the letter of it is not to be disregarded under the pretext of pursuing its spirit," 1 Pa.C.S.A. § 1921(b), and "[e]very [\*498] statute shall be construed, if possible, to give effect to all its provisions." 1 Pa.C.S.A. § 1921(a). [HN2] Section 3368 of the 1976 Vehicle Code, as amended, governs the use of speedtiming devices and reads in pertinent part:

**(c) Mechanical, electrical and electronic devices authorized. --**

\* \* \*

(3) Electronic devices which calculate speed by measuring elapsed time between measured rod surface points by using two sensors and devices which measure and calculate the average speed of a vehicle between any two [\*\*299] points may be used by any police officer.

(4) No person may be convicted upon evidence obtained through the use of devices authorized by [section 3368(c)(3)] [\*\*\*4] unless the speed recorded is six or more miles per hour in excess of the legal speed limit. Furthermore, no person may be convicted upon evidence obtained through the use of devices authorized by [section 3368(c)(3)] in an area

where the legal speed limit is less than 55 miles per hour if the speed recorded is less than ten miles per hour in excess of the legal speed limit. This paragraph shall not apply to evidence obtained through the use of devices authorized by [section 3368(c)(3)] within a school zone.

**(d) Classification, approval and testing of mechanical, electrical and electronic devices.** -- The department may, by regulation, classify specific devices as being mechanical, electrical or electronic. All mechanical, electrical or electronic devices shall be of a type approved by the department, which shall appoint stations for calibrating and testing the devices and may prescribe regulations as to the manner in which calibrations and tests shall be made. The certification and calibration of electronic devices under [section 3368(c)(3)] shall also include the certification and calibration of all equipment, timing strips and other devices which are actually used with [\*\*\*5] the particular electronic device being certified and calibrated. The devices shall have been tested for accuracy within a [\*499] period of 60 days prior to the alleged violation. A certificate from the station showing that the calibration and test were made within the required period, and that the device was accurate, shall be competent and prima facie evidence of those facts in every proceeding in which a violation of this title is charged.

**(e) Distance requirements for use of mechanical, electrical and electronic devices.** -- Mechanical, electrical or electronic devices may not be used to time the rate of speed of vehicles within 500 feet after a speed limit sign indicating a decrease of speed. This limitation on the use of speed timing devices shall not apply to speed limit signs indicating school zones, bridge and elevated structure speed limits, hazardous grade speed limits and work zone speed limits.

75 Pa.C.S.A. § 3368(c)-(e).

In accordance with Section 3368(d), the Department of Transportation has issued regulations classifying speed-timing devices and providing for the certification and calibration of these devices. The VASCAR-Plus unit has been classified [\*\*\*6] as a electronic speed-timing device (nonradar) which calculates average speed between any two points. See 17 Pa.Bulletin 453 (January 24, 1987); *Commonwealth v. Smolow*, 364 Pa.Super. 20, 25 n. 3, 527 A.2d 131, 134 n. 3 (1987) (Department of Transportation has reclassified VASCAR as an electronic speed-timing device and approved its use by any police officer.). Moreover, the Department of Transportation has issued regulations in accordance with 75 Pa.C.S.A. § 3368(d) regarding the calibration and testing of electronic speed-timing devices such as the VASCAR-Plus unit. Appellant specifically refers us to [HN3] 67 Pa.Code § 105.95(a)(4) which reads:

(a) Method. An electronic device governed by this subchapter shall be calibrated and tested as follows:

\* \* \*

(4) A course other than a 1/4 mile can be used, but not less than 1/10 mile.

[\*500] In reviewing the statutory scheme, we find that the legislature did not indicate a minimum distance requirement for the use of a VASCAR-Plus unit nor did it provide the Department of Transportation with the authority to regulate the use of the unit by imposing a distance requirement. Contrary to appellant's [\*\*\*7] contention, 67 Pa.Code § 105.95(a)(4) does not specify a minimum distance requirement for use of the VASCAR-Plus unit. Instead, it sets forth the method to calibrate and test an electronic unit.

In *Alexion*, *supra*, the defendant, appealing from a summary speeding conviction, contended that the timing of his car [\*\*300] by a VASCAR-Plus unit over a distance of less than one-tenth mile was "so fraught with unreliability as to be incapable of sustaining a conviction beyond a reasonable doubt." *Id.* at 37. The trial court agreed. It reasoned that the VASCAR-Plus unit, a device which measures both the distance and the time necessary for a vehicle to pass over a particular distance, is subject to human error because "there is an inevitable lag between the time the operator thinks he

380 Pa. Super. 495, \*500; 552 A.2d 297, \*\*300;  
1989 Pa. Super. LEXIS 10, \*\*\*7

sees the driver begin and end the measured distance and when he actually trips and untrips the device." *Id.* In light of this potential for human error, the court found that it was necessary to establish a minimum distance requirement for use of the unit, and turned to 67 Pa. Code § 105.95(a)(4) for guidance. Finding that the Department of Transportation requires [\*\*\*8] the calibration of "'electricalmechanical' speed devices" over a distance of no less of one-tenth of a mile, the trial court concluded that it is important that such devices be operated, as well as calibrated, over the minimum distance set forth in the regulation. In reaching this conclusion, the trial court in *Alexion, supra*, improperly imposed a requirement that was not intended by the legislature. It is evident from the statutory provisions that the legislature considered the possibility of human error and sought to minimize it, not by imposing a minimum distance requirement for operation of an electronic device, but by requiring: (1) approval of the devices by the Department of Transportation; (2) calibrating and testing of the devices for accuracy, and (3) appointment of [\*501] stations for calibrating and testing. Thus, the trial court in *Alexion, supra*, created a requirement where none existed in the statute. We, therefore, have no choice but to overrule *Alexion, supra*. See *Halko v. Board of Directors of School District of Foster*, 374 Pa. 269, 97 A.2d 793 (1953) (court in construing [\*\*\*9] statute cannot rewrite such statute); *Commonwealth v. Aljia Dumas Private Detective Agency, Inc.*, 246 Pa. Super. 140, 369 A.2d 850 (1977), *allocatur denied*, (additional remedy will not be fabricated from the statute when the legislature has clearly expressed its intent). In overruling *Alexion, supra*, we find the trial court in the instant case did not err in admitting into evidence a VASCAR-Plus unit speed-reading taken over a distance less than the distance specified for calibration in 67 Pa. Code § 105.95. n1

n1 The court below attempted to distinguish *Alexion, supra*, from the instant case. Although the trial court relied on an alternate legal ground to support the admissibility of the speed-reading, we can affirm if for any reason the admission of evidence was proper. See *Commonwealth v. Pettiford*, 265 Pa. Super. 466, 468, 402 A.2d 532, 533 (1979) (appellate court can affirm admission of evidence based upon erroneous grounds, if for any reason admission of evidence was proper); *Commonwealth v. Hinton*, 269 Pa. Super. 43, 48, 409 A.2d 54, 57 (1979) ("... [HN4] judgment may be affirmed by the appellate court on any legal theory, regardless of rationale or theory employed by the lower court.").

[\*\*\*10]

Second, appellant argues that there is insufficient evidence to support appellant's conviction under 75 Pa. C.S.A. § 3361. Specifically, appellant contends that the evidence is insufficient because the Commonwealth presented no evidence of weather and roadway conditions rendering appellant's speed unreasonable nor was there any testimony that appellant was traveling at a speed greater than would permit him to bring his vehicle "to a stop within the assured distance ahead." 75 Pa. C.S.A. § 3361.

[HN5] In evaluating a claim that the verdict is against the law for lack of sufficient evidence, we must determine:

[W]hether, viewing the evidence in the light most favorable to the Commonwealth, and drawing all reasonable inferences favorable to the Commonwealth, there is sufficient [\*502] evidence to find every element of the crime beyond a reasonable doubt . . . . The Commonwealth may sustain its burden of proving every element of the crime beyond a reasonable doubt by means of wholly circumstantial evidence . . . . Moreover, in applying the above test, the entire trial record must be evaluated and all evidence actually received must be considered . . . . Finally, the trier of fact, while [\*\*\*11] passing upon the credibility of witnesses and the weight to [\*\*301] be afforded the evidence produced, is free to believe all, part or none of the evidence. (Citations omitted.)

*Commonwealth v. Griscavage*, 512 Pa. 540, 517 A.2d 1256 (1986), quoting *Commonwealth v. Harper*, 485 Pa. 572, 576-577, 403 A.2d 536, 538-539 (1979).

[HN6]

Section 3361 reads:

No person shall drive a vehicle at a speed greater than is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing, nor at a speed greater than will permit the driver to bring his vehicle to a stop within the assured clear distance ahead. Consistent with the foregoing, every person shall drive at a safe and appropriate speed when approaching and crossing an intersection or railroad grade crossing, when approaching and going around a curve, when approaching a hill crest, when traveling upon any narrow or winding roadway and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions.

75 Pa.C.S.A. § 3361. Instantly, the record indicates that appellant [\*\*\*12] failed to drive at a speed that was reasonable or prudent under the conditions, and failed to have regard for the potential hazards then existing. The arresting officer described Route 202 North as a limited access highway having a posted speed limit of fifty-five miles per hour. He further explained that the section of Route 202 North between the Paoli Pike on-ramp and Route 322 exit comprises of three lanes and is approximately one-tenth of a mile in distance. Officer Miller testified:

[\*503] Q. Now, . . . can you describe the conditions of the roadway, and the actual and potential hazards which existed at the time you timed the vehicle?

A. Route 202 is a limited access highway, paved concrete. The section we are discussing is a three lane section. We have traffic entering 202 northbound from the Paoli Pike and traffic exiting 202 northbound of 322. *So right at this section here you have traffic coming onto and off of 202 in this stretch.*

Q. Which lane was the vehicle which you time in?

A. Of the three lanes, it was in the middle lane, center lane.

Q. And if you enter Paoli Pike at that location and desire to travel north on 202, . . . what do you have [\*\*\*13] to do in order to travel onto 202 north?

A. You either get in the center lane or passing lane, the far left lane, one of the two. They're the only two that continue past 322.

Q. And if you stay in the far right lane, what -- where do you go in that lane?

A. Down the 322 exit.

N.T. 11/10/87 at 10 (emphasis added). The trial record further indicates that there was a truck traveling on Route 202 North at the same time appellant was traveling on the route. Appellant entered the highway from the Paoli Pike on-ramp and exited at the Route 322 exit. It is apparent from the record that appellant's speed was unreasonable given the conditions of the highway. Appellant was traveling at 84.5 miles per hour in a 55 miles per hour zoned area where traffic must merge and exit while competing with the northbound flow of traffic. In addition, we note that appellant was entering and exiting the northbound highway at a high rate of speed within a distance of approximately one-tenth mile. The potential for hazards and conditions rendering traveling at a speed of 84.5 miles per hour unreasonable is clearly supported by the evidence. Accordingly, we [\*504] find sufficient evidence [\*\*\*14] to support a conviction 4 under Section 3361. n2

n2 Because we find that there is sufficient evidence to support a finding that appellant was traveling at an unreasonable speed "under the conditions," we do not reach appellant's other contention that there was no

380 Pa. Super. 495, \*504; 552 A.2d 297, \*\*301;  
1989 Pa. Super. LEXIS 10, \*\*\*14

testimony regarding whether he could bring his car "to a stop within the assured clear distance ahead."

Judgment of sentence affirmed.

**COMMONWEALTH of Pennsylvania v. Jerome R. VISHNESKI, Appellant****No. 1023 Philadelphia 1988****Superior Court of Pennsylvania***380 Pa. Super. 495; 552 A.2d 297; 1989 Pa. Super. LEXIS 10***September 15, 1988, Submitted****January 6, 1989, Filed****PRIOR HISTORY:** [\*\*\*1]

Appeal from Judgment of Sentence March 8, 1988, in the Court of Common Pleas of Chester County, Criminal No. 2030-87.

**DISPOSITION:**

Judgment of sentence affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed his conviction from the Court of Common Pleas of Chester County (Pennsylvania) for driving a vehicle at an unsafe speed in violation of *75 Pa. Cons. Stat. Ann. § 3361* alleging the trial court erred in admitting into evidence the arresting officer's testimony regarding a speed-timing unit.

**OVERVIEW:** Defendant was convicted for a violation of *75 Pa. Cons. Stat. Ann. § 3361*, driving a vehicle at an unsafe speed, and sentenced to pay the statutory fine, plus court costs and the statutory emergency fund fine. Defendant's car was timed at 84.5 miles per hour in a 55 mile per hour zone by using a speed-timing device after his car was followed for a distance of about 0.09 miles. The court affirmed the trial court's judgment of sentence and concluded that the trial court did not err in admitting the unit's speed reading taken over a distance of less than one-tenth of a mile. The court found that the legislature did not indicate a minimum distance requirement for the use of the speed-timing devices nor did it provide the Department of Transportation with the authority to regulate the use of the unit by imposing a distance requirement. As such, the trial court did not err in admitting into evidence a unit's speed-reading taken over a distance less than the distance specified for calibration in *67 Pa. Code § 105.95*. The court concluded that there was sufficient evidence to support a finding that defendant was traveling at an unreasonable speed under the conditions.

**OUTCOME:** The court affirmed the trial court's judgment of sentence and conviction for the offense of driving a vehicle at an unsafe speed. The court concluded that the trial court did not err in admitting into evidence radar unit

speed-reading taken over a distance less than the distance specified for calibration and concluded that the evidence was sufficient to support defendant's conviction under the statute.

**CORE TERMS:** distance, speed, mile, lane, calibration, traveling, one-tenth, route, speed-timing, traffic, highway, electronic devices, speed limit, mechanical, electronic, electrical, hazards, regulation, testing, zone, northbound, exit, beyond a reasonable doubt, admission of evidence, human error, approaching, admitting, roadway, assured, drive

**OPINION BY:**

OLSZEWSKI

**OPINION:**

[\*496] [\*\*298] This is an appeal from judgment of sentence in the Court of Common Pleas of Chester County entered against appellant for violation of 75 Pa.C.S.A. § 3361. Appellant contends that the trial court erred in: (1) admitting into evidence the arresting officer's testimony regarding a VASCAR-Plus unit speed-timing taken over a distance of less than one-tenth mile, and (2) finding appellant guilty of 75 [\*497] Pa.C.S.A. § 3361. For the reasons below, we affirm the trial court.

On March 22, 1987, appellant was driving north on Route 202 between Paoli Pike and Route 322 in Chester County. Officer Miller observed appellant's car in front of him traveling at a high rate of speed. Consequently, Officer Miller followed appellant's car for a distance of 0.0938 mile and timed the vehicle using a VASCAR-Plus speed-timing device. Appellant's car was timed [\*\*\*2] at 84.5 miles per hour in a 55 mile per hour zone. Thereafter, Officer Miller arrested appellant and charged him with violation of 75 Pa.C.S.A. § 3361, driving vehicle at unsafe speed.

Appellant was found guilty by the District Justice and appealed to the Court of Common Pleas. After a *de novo* trial, appellant was found guilty. Following denial of post-trial motions, appellant was sentenced to pay the statutory fine of \$ 25, plus court costs and the statutory emergency fund fine of \$ 10. This timely appeal follows.

Appellant first maintains that the trial judge erred in admitting into evidence the arresting officer's testimony regarding a VASCAR-Plus unit speed reading taken over a distance of less than one-tenth mile. Specifically, appellant contends that the testimony is inadmissible because the procedure used by the arresting officer is contrary to the one-tenth mile calibration requirement found in 67 Pa.Code § 105.95 and contrary to the holding of *Commonwealth v. Alexion*, 33 Ches.Co.Rep. 37 (1984). In *Alexion*, *supra*, the trial court "[found] the 1/10 of a mile calibration to be reasonable and conclude[d] that it should also apply, [\*\*\*3] as a minimum standard, to the use of VASCAR-PLUS." *Id.* at 38.

In reviewing appellant's contention, we turn to the applicable statutory provisions to determine the legislative intent regarding the use of a VASCAR-Plus unit. In ascertaining the legislature's intent, [HN1] we are mindful that "[w]hen the words of a statute are clear and free from all ambiguity, the letter of it is not to be disregarded under the pretext of pursuing its spirit," 1 Pa.C.S.A. § 1921(b), and "[e]very [\*498] statute shall be construed, if possible, to give effect to all its provisions." 1 Pa.C.S.A. § 1921(a). [HN2] Section 3368 of the 1976 Vehicle Code, as amended, governs the use of speedtiming devices and reads in pertinent part:

**(c) Mechanical, electrical and electronic devices authorized. --**

\* \* \*

(3) Electronic devices which calculate speed by measuring elapsed time between measured rod surface points by using two sensors and devices which measure and calculate the average speed of a vehicle between any two [\*\*299] points may be used by any police officer.

(4) No person may be convicted upon evidence obtained through the use of devices authorized by [section 3368(c)(3)] [\*\*\*4] unless the speed recorded is six or more miles per hour in excess of the legal speed limit. Furthermore, no person may be convicted upon evidence obtained through the use of devices authorized by [section 3368(c)(3)] in an area

where the legal speed limit is less than 55 miles per hour if the speed recorded is less than ten miles per hour in excess of the legal speed limit. This paragraph shall not apply to evidence obtained through the use of devices authorized by [section 3368(c)(3)] within a school zone.

**(d) Classification, approval and testing of mechanical, electrical and electronic devices.** -- The department may, by regulation, classify specific devices as being mechanical, electrical or electronic. All mechanical, electrical or electronic devices shall be of a type approved by the department, which shall appoint stations for calibrating and testing the devices and may prescribe regulations as to the manner in which calibrations and tests shall be made. The certification and calibration of electronic devices under [section 3368(c)(3)] shall also include the certification and calibration of all equipment, timing strips and other devices which are actually used with [\*\*\*5] the particular electronic device being certified and calibrated. The devices shall have been tested for accuracy within a [\*499] period of 60 days prior to the alleged violation. A certificate from the station showing that the calibration and test were made within the required period, and that the device was accurate, shall be competent and prima facie evidence of those facts in every proceeding in which a violation of this title is charged.

**(e) Distance requirements for use of mechanical, electrical and electronic devices.** -- Mechanical, electrical or electronic devices may not be used to time the rate of speed of vehicles within 500 feet after a speed limit sign indicating a decrease of speed. This limitation on the use of speed timing devices shall not apply to speed limit signs indicating school zones, bridge and elevated structure speed limits, hazardous grade speed limits and work zone speed limits.

75 Pa.C.S.A. § 3368(c)-(e).

In accordance with Section 3368(d), the Department of Transportation has issued regulations classifying speed-timing devices and providing for the certification and calibration of these devices. The VASCAR-Plus unit has been classified [\*\*\*6] as a electronic speed-timing device (nonradar) which calculates average speed between any two points. See 17 Pa.Bulletin 453 (January 24, 1987); *Commonwealth v. Smolow*, 364 Pa.Super. 20, 25 n. 3, 527 A.2d 131, 134 n. 3 (1987) (Department of Transportation has reclassified VASCAR as an electronic speed-timing device and approved its use by any police officer.). Moreover, the Department of Transportation has issued regulations in accordance with 75 Pa.C.S.A. § 3368(d) regarding the calibration and testing of electronic speed-timing devices such as the VASCAR-Plus unit. Appellant specifically refers us to [HN3] 67 Pa.Code § 105.95(a)(4) which reads:

(a) Method. An electronic device governed by this subchapter shall be calibrated and tested as follows:

\* \* \*

(4) A course other than a 1/4 mile can be used, but not less than 1/10 mile.

[\*500] In reviewing the statutory scheme, we find that the legislature did not indicate a minimum distance requirement for the use of a VASCAR-Plus unit nor did it provide the Department of Transportation with the authority to regulate the use of the unit by imposing a distance requirement. Contrary to appellant's [\*\*\*7] contention, 67 Pa.Code § 105.95(a)(4) does not specify a minimum distance requirement for use of the VASCAR-Plus unit. Instead, it sets forth the method to calibrate and test an electronic unit.

In *Alexion, supra*, the defendant, appealing from a summary speeding conviction, contended that the timing of his car [\*\*300] by a VASCAR-Plus unit over a distance of less than one-tenth mile was "so fraught with unreliability as to be incapable of sustaining a conviction beyond a reasonable doubt." *Id. at 37*. The trial court agreed. It reasoned that the VASCAR-Plus unit, a device which measures both the distance and the time necessary for a vehicle to pass over a particular distance, is subject to human error because "there is an inevitable lag between the time the operator thinks he

380 Pa. Super. 495, \*500; 552 A.2d 297, \*\*300;  
1989 Pa. Super. LEXIS 10, \*\*\*7

sees the driver begin and end the measured distance and when he actually trips and untrips the device." *Id.* In light of this potential for human error, the court found that it was necessary to establish a minimum distance requirement for use of the unit, and turned to 67 Pa. Code § 105.95(a)(4) for guidance. Finding that the Department of Transportation requires [\*\*\*8] the calibration of "'electricalmechanical' speed devices" over a distance of no less of one-tenth of a mile, the trial court concluded that it is important that such devices be operated, as well as calibrated, over the minimum distance set forth in the regulation. In reaching this conclusion, the trial court in *Alexion, supra*, improperly imposed a requirement that was not intended by the legislature. It is evident from the statutory provisions that the legislature considered the possibility of human error and sought to minimize it, not by imposing a minimum distance requirement for operation of an electronic device, but by requiring: (1) approval of the devices by the Department of Transportation; (2) calibrating and testing of the devices for accuracy, and (3) appointment of [\*501] stations for calibrating and testing. Thus, the trial court in *Alexion, supra*, created a requirement where none existed in the statute. We, therefore, have no choice but to overrule *Alexion, supra*. See *Halko v. Board of Directors of School District of Foster*, 374 Pa. 269, 97 A.2d 793 (1953) (court in construing [\*\*\*9] statute cannot rewrite such statute); *Commonwealth v. Aljia Dumas Private Detective Agency, Inc.*, 246 Pa. Super. 140, 369 A.2d 850 (1977), *allocatur denied*, (additional remedy will not be fabricated from the statute when the legislature has clearly expressed its intent). In overruling *Alexion, supra*, we find the trial court in the instant case did not err in admitting into evidence a VASCAR-Plus unit speed-reading taken over a distance less than the distance specified for calibration in 67 Pa. Code § 105.95. n1

n1 The court below attempted to distinguish *Alexion, supra*, from the instant case. Although the trial court relied on an alternate legal ground to support the admissibility of the speed-reading, we can affirm if for any reason the admission of evidence was proper. See *Commonwealth v. Pettiford*, 265 Pa. Super. 466, 468, 402 A.2d 532, 533 (1979) (appellate court can affirm admission of evidence based upon erroneous grounds, if for any reason admission of evidence was proper); *Commonwealth v. Hinton*, 269 Pa. Super. 43, 48, 409 A.2d 54, 57 (1979) ("... [HN4] judgment may be affirmed by the appellate court on any legal theory, regardless of rationale or theory employed by the lower court.").

[\*\*\*10]

Second, appellant argues that there is insufficient evidence to support appellant's conviction under 75 Pa. C.S.A. § 3361. Specifically, appellant contends that the evidence is insufficient because the Commonwealth presented no evidence of weather and roadway conditions rendering appellant's speed unreasonable nor was there any testimony that appellant was traveling at a speed greater than would permit him to bring his vehicle "to a stop within the assured distance ahead." 75 Pa. C.S.A. § 3361.

[HN5] In evaluating a claim that the verdict is against the law for lack of sufficient evidence, we must determine:

[W]hether, viewing the evidence in the light most favorable to the Commonwealth, and drawing all reasonable inferences favorable to the Commonwealth, there is sufficient [\*502] evidence to find every element of the crime beyond a reasonable doubt . . . . The Commonwealth may sustain its burden of proving every element of the crime beyond a reasonable doubt by means of wholly circumstantial evidence . . . . Moreover, in applying the above test, the entire trial record must be evaluated and all evidence actually received must be considered . . . . Finally, the trier of fact, while [\*\*\*11] passing upon the credibility of witnesses and the weight to [\*\*301] be afforded the evidence produced, is free to believe all, part or none of the evidence. (Citations omitted.)

*Commonwealth v. Griscavage*, 512 Pa. 540, 517 A.2d 1256 (1986), quoting *Commonwealth v. Harper*, 485 Pa. 572, 576-577, 403 A.2d 536, 538-539 (1979).

[HN6]

Section 3361 reads:

No person shall drive a vehicle at a speed greater than is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing, nor at a speed greater than will permit the driver to bring his vehicle to a stop within the assured clear distance ahead. Consistent with the foregoing, every person shall drive at a safe and appropriate speed when approaching and crossing an intersection or railroad grade crossing, when approaching and going around a curve, when approaching a hill crest, when traveling upon any narrow or winding roadway and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions.

75 Pa.C.S.A. § 3361. Instantly, the record indicates that appellant [\*\*\*12] failed to drive at a speed that was reasonable or prudent under the conditions, and failed to have regard for the potential hazards then existing. The arresting officer described Route 202 North as a limited access highway having a posted speed limit of fifty-five miles per hour. He further explained that the section of Route 202 North between the Paoli Pike on-ramp and Route 322 exit comprises of three lanes and is approximately one-tenth of a mile in distance. Officer Miller testified:

[\*503] Q. Now, . . . can you describe the conditions of the roadway, and the actual and potential hazards which existed at the time you timed the vehicle?

A. Route 202 is a limited access highway, paved concrete. The section we are discussing is a three lane section. We have traffic entering 202 northbound from the Paoli Pike and traffic exiting 202 northbound of 322. *So right at this section here you have traffic coming onto and off of 202 in this stretch.*

Q. Which lane was the vehicle which you time in?

A. Of the three lanes, it was in the middle lane, center lane.

Q. And if you enter Paoli Pike at that location and desire to travel north on 202, . . . what do you have [\*\*\*13] to do in order to travel onto 202 north?

A. You either get in the center lane or passing lane, the far left lane, one of the two. They're the only two that continue past 322.

Q. And if you stay in the far right lane, what -- where do you go in that lane?

A. Down the 322 exit.

N.T. 11/10/87 at 10 (emphasis added). The trial record further indicates that there was a truck traveling on Route 202 North at the same time appellant was traveling on the route. Appellant entered the highway from the Paoli Pike on-ramp and exited at the Route 322 exit. It is apparent from the record that appellant's speed was unreasonable given the conditions of the highway. Appellant was traveling at 84.5 miles per hour in a 55 miles per hour zoned area where traffic must merge and exit while competing with the northbound flow of traffic. In addition, we note that appellant was entering and exiting the northbound highway at a high rate of speed within a distance of approximately one-tenth mile. The potential for hazards and conditions rendering traveling at a speed of 84.5 miles per hour unreasonable is clearly supported by the evidence. Accordingly, we [\*504] find sufficient evidence [\*\*\*14] to support a conviction 4 under Section 3361. n2

n2 Because we find that there is sufficient evidence to support a finding that appellant was traveling at an unreasonable speed "under the conditions," we do not reach appellant's other contention that there was no

Reargument Denied November 19, 1987.

**PRIOR HISTORY:**

Appeal from the Judgment of Sentence in the Court of Common Pleas, Criminal Division, of Chester County at No. 1075 of 1985.

**DISPOSITION:**

Judgment of sentence vacated.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant driver sought review of a judgment of the Court of Common Pleas of Chester County (Pennsylvania), which convicted her of exceeding the maximum speed by travelling 69 miles per hour in a 55 mile per hour speed zone. Appellant claimed error in the admission into evidence of a Certificate of Accuracy of a radar speed timing device because no competent evidence proved it was from an approved testing station.

**OVERVIEW:** Appellant driver contended that her conviction of exceeding the maximum speed by travelling 69 miles per hour in a 55 mile per hour zone should be reversed because the commonwealth failed to prove that a Certificate of Accuracy of a radar speed timing device was from an approved testing station in violation of *75 Pa. Cons. Stat. Ann. § 3368(d)*. The court agreed and reversed the trial court order convicting defendant. The court held that for the results of a radar device to be properly admissible at trial, the commonwealth was required to offer evidence, independent of the Certificate of Accuracy, to show that the testing facility had been approved by the Department of Transportation as an official testing station as required by § 3368(d).

**OUTCOME:** The court reversed the trial court order because the commonwealth failed to prove by competent evidence

that a Certificate of Accuracy for a speed testing device came from an approved testing station. Therefore, the court vacated the judgment against appellant driver for driving 69 miles per hour in a 55 mile per hour zone.

**CORE TERMS:** testing, certificate, station, accuracy, radar, seal, appointed, dictum, speed, judicial notice, sentence, tested, maximum speed, calibrating, calibration, admissible, appointing, calibrated, certifying, photocopy, convicted, exceeding, speeding, appoint, mile, improperly admitted, competent evidence, designated, introduce

**OPINION:**

[\*318] [\*\*814] This is an appeal from a judgment of sentence entered in the Court of Common Pleas, Chester County.

Appellant Gail Denny was convicted of exceeding the maximum speed as proscribed by 75 Pa.C.S.A. § 3362. Her citation indicated that she had been clocked by a KR-10 radar device as travelling at 69 miles per hour in a 55 mile per hour speed zone. Appellant appealed pursuant to Pa.R.Crim.P. 63(b)(3), and a de novo hearing was held before President Judge Stively on March 19, 1986.

On July 22, 1986, appellant's post-trial motions were denied. On September 29, 1986, appellant was sentenced in absentia. Appellant was notified of the sentence and her right to appeal within thirty days when she received a letter from the District Attorney's Office dated November [\*\*\*2] 12, 1986. Denny received this letter on or about November 15. Notice of appeal was filed in this court on December 15, 1986.

We consider the following question on appeal: whether the trial court erred in admitting into evidence a Certificate of Accuracy of a radar speed timing device, where the Commonwealth failed to introduce competent evidence that the issuer of the Certificate was a testing station *approved* [\*319] *by the Department of Transportation at the time it allegedly tested the radar device in question?*

[HN1] Section 3368(d) of the Vehicle Code provides:

All mechanical, electrical or electronic devices shall be of a type *approved by the department, which shall appoint stations for calibrating and testing* the devices and may prescribe regulations as to the manner in which calibrations and [\*\*815] tests shall be made. The devices shall have been tested for accuracy within a period of 60 days prior to the alleged violation. A certificate from the station showing that the calibration and test were made within the required period, and that the device was accurate, shall be competent and prima facie evidence of those facts in every proceeding in which a violation [\*\*\*3] of this title is charged.

75 Pa.C.S.A. § 3368(d) (emphasis added).

Appellant argues that the case of *Commonwealth v. Gernsheimer*, 276 Pa.Super. 418, 419 A.2d 528 (1980) is controlling. In *Gernsheimer*, this court stated:

We hold that [HN2] in prosecuting speeding cases where a radar or other electronic device is used to calibrate a defendant's speed that *in order to introduce the results of such into evidence the Commonwealth must offer a Certificate*, certified by the Secretary of Transportation or his designee *certifying the agency which performs the tests on the devices as an official testing station*, and must introduce a Certificate of Electronic Device (radar) Accuracy into evidence.

*Id.*, 276 Pa.Superior Ct. at 423, 419 A.2d at 530.

In the instant case, the trial court did not find *Gernsheimer* to be controlling, stating, "the *Gernsheimer* court did not squarely address the issue with which we are presented and we are therefore under no obligation to follow its recommendations." In *Gernsheimer*, appellant was convicted of speeding. On appeal, the issue raised was whether the trial court improperly admitted the Certificate of Accuracy [\*\*\*4] because the certificate did not contain an official seal on its face.

[\*320] In *Gernsheimer*, the Commonwealth introduced two exhibits: (1) a certificate from the Secretary of Transportation under seal appointing York Corporation as an official testing station, and (2) a certificate of accuracy, signed by both the person who calibrated the device and the person in charge of the testing station. The latter certificate

372 Pa. Super. 317, \*320; 539 A.2d 814, \*\*815;  
1987 Pa. Super. LEXIS 9249, \*\*\*4

was at issue, and the appellant contended it should not have been admitted into evidence because it did not contain an official seal and the officer who testified at appellant's hearing had not performed the tests nor was he present during its testing. *Gernsheimer*, 276 Pa. Super. at 422-23, 419 A.2d at 530. The *Gernsheimer* court held that an official seal was not needed for admissibility, stating that "[t]here is nothing in [75 Pa.C.S.A. § 3368(d)] which requires that a seal appear on the Certificate of Electronic Device Accuracy." *Id.*, 276 Pa. Superior Ct. at 423, 419 A.2d at 530.

The trial court in the instant case thus concluded that since the language in *Gernsheimer* went beyond the particular issue raised and was not applicable to the [\*\*\*5] particular facts in *Gernsheimer*'s case, it is obiter dictum. *See In re Estate of Pew*, 411 Pa. 96, 103, 191 A.2d 399, 404 (1963) [HN3] (what is actually decided and controlling is the law applicable to the particular facts of that particular case and while all other statements and conclusions therein are entitled to great consideration, they are not controlling).

The language in *Gernsheimer* clearly went beyond the specific issue raised. However, this court has twice restated this "dictum" as setting forth the requirements of 75 Pa.C.S.A. § 3368(d). *See Commonwealth v. Cummings*, 338 Pa. Super. 149, 487 A.2d 897 (1985); *Commonwealth v. Gussey*, 319 Pa. Super. 398, 466 A.2d 219 (1983).

In *Cummings*, the sole issue on appeal was whether in a prosecution for exceeding the maximum speed limit, the Commonwealth may enter into evidence a photocopy of the certificate of accuracy required by 75 Pa.C.S.A. § 3368(d). The court held a photocopy of the certificate was not admissible into evidence because it could not be authenticated. In *Gussey*, the issue on appeal was whether the certificate [\*321] of accuracy was improperly admitted over objection because the date was [\*\*\*6] typed in instead of written by hand, and the Commonwealth did not call the party who executed the certificate to verify the date of execution. The court found no error, holding that "the Commonwealth can utilize any means to fill in the 'certificate of accuracy,' i.e., by typing or hand-writing the required data, except for the signatures of the certifying [\*816] personnel." *Gussey*, 319 Pa. Super. at 409, 466 A.2d at 225.

Like *Gernsheimer*, neither of these cases address the specific issue before us: whether the Commonwealth offered competent evidence that the certificate of accuracy was prepared by a testing station appointed by the Department of Transportation. *See* 75 Pa.C.S.A. § 3368(d). Thus, the trial court was correct in its finding that the dictum in *Gernsheimer*, as well as its reiteration in *Cummings* and *Gussey*, is not binding precedent.

The confusion in establishing a proper foundation for the admission of a certificate of accuracy pursuant to § 3368 is evident from our review of the record. The Commonwealth relies on the certificate of accuracy itself as proof that Thomas Associates has been designated an official testing station, arguing [\*\*\*7] that "the court properly took judicial notice of the fact that . . . the testing station, Thomas Associates, Inc., is an approved testing station since those facts appear in numerous publications of the Pennsylvania Bulletin."

This argument, however, is misleading. It is true that the trial court is required to take judicial notice of this fact pursuant to the Commonwealth Documents Law, 45 P.S. §§ 1501 and 1506 (1986 special Pamphlet). But the trial court specifically stated:

"We are not considering any entry in the Pennsylvania Bulletin because that was not properly before us . . . having been raised long after the evidence of the Commonwealth had closed in this case. So we are not relying on that. We are relying on a reading of [the statute] and [\*322] a fair appraisal of [the certificate of accuracy]." n1

n1 We note that the Commonwealth also requested the court to take judicial notice of the testing stations listed in the Pennsylvania Bulletin prior to the close of its case, though the court made no specific ruling on this request.

[\*\*\*8]

372 Pa. Super. 317, \*322; 539 A.2d 814, \*\*816;  
1987 Pa. Super. LEXIS 9249, \*\*\*8

[HN4] A certificate of accuracy, if properly authenticated, is evidence of the fact that the radar device has been calibrated and tested pursuant to the requirements of § 3368(d). Section 3368(d) provides that the "department shall appoint stations for calibrating and testing." Thus, in order to meet the statutory requirements, the Commonwealth must show that the testing station was appointed by the Department of Transportation. Evidence, independent of the certificate itself, is necessary to prove this. A certificate of accuracy, issued by Thomas Associates, which merely *states* that Thomas Associates has been designated an official testing station, signed by David A. Thomas, is insufficient. We agree with appellant that an employee of the testing center cannot attest to the fact that the testing station has been appointed by the Department of Transportation as an official testing station.

Although the dictum in *Gernsheimer* is not controlling, it is entitled to great consideration. *In re Estate of Pew*, 411 Pa. at 103, 191 A.2d at 404. In light of the confusion in this case, we find the foundational requirements clarified in *Gernsheimer* to be particularly helpful. [\*\*\*9] In *Gernsheimer*, the Commonwealth introduced a separate document from the Secretary of Transportation under seal appointing York Corporation as an official testing station. We recognize the inefficiency of requiring this type of document in the prosecution of such cases, and at the same time recognize the utility of the listings in the Pennsylvania Bulletin.

We therefore hold that in order for results of a radar device to be properly admissible at trial, the Commonwealth must offer evidence, independent of the certificate of accuracy, to show that the testing facility has been appointed by the Department of Transportation as an official testing station pursuant to the requirements of section 3368(d) of [\*323] the Vehicle Code. This independent evidence may consist of either a separate document from the Secretary of Transportation under seal or a citation to the Pennsylvania Bulletin which lists the station as an official testing station.

Judgment of sentence vacated.

#### **OPINION BY:**

CIRILLO

**OPINION:**

[\*318] [\*\*814] This is an appeal from a judgment of sentence entered in the Court of Common Pleas, Chester County.

Appellant Gail Denny was convicted of exceeding the maximum speed as proscribed by 75 Pa.C.S.A. § 3362. Her citation indicated that she had been clocked by a KR-10 radar device as travelling at 69 miles per hour in a 55 mile per hour speed zone. Appellant appealed pursuant to Pa.R.Crim.P. 63(b)(3), and a de novo hearing was held before President Judge Stively on March 19, 1986.

On July 22, 1986, appellant's post-trial motions were denied. On September 29, 1986, appellant was sentenced in absentia. Appellant was notified of the sentence and her right to appeal within thirty days when she received a letter from the District Attorney's Office dated November [\*\*\*2] 12, 1986. Denny received this letter on or about November 15. Notice of appeal was filed in this court on December 15, 1986.

We consider the following question on appeal: whether the trial court erred in admitting into evidence a Certificate of Accuracy of a radar speed timing device, where the Commonwealth failed to introduce competent evidence that the issuer of the Certificate was a testing station *approved* [\*319] *by the Department of Transportation at the time it allegedly tested the radar device in question?*

[HN1] Section 3368(d) of the Vehicle Code provides:

All mechanical, electrical or electronic devices shall be of a type *approved by the department, which shall appoint stations for calibrating and testing* the devices and may prescribe regulations as to the manner in which calibrations and [\*\*815] tests shall be made. The devices shall have been tested for accuracy within a period of 60 days prior to the alleged violation. A certificate from the station showing that the calibration and test were made within the required period, and that the device was accurate, shall be competent and prima facie evidence of those facts in every proceeding in which a violation [\*\*\*3] of this title is charged.

75 Pa.C.S.A. § 3368(d) (emphasis added).

Appellant argues that the case of *Commonwealth v. Gernsheimer*, 276 Pa.Super. 418, 419 A.2d 528 (1980) is controlling. In *Gernsheimer*, this court stated:

We hold that [HN2] in prosecuting speeding cases where a radar or other electronic device is used to calibrate a defendant's speed that *in order to introduce the results of such into evidence the Commonwealth must offer a Certificate*, certified by the Secretary of Transportation or his designee *certifying the agency which performs the tests on the devices as an official testing station*, and must introduce a Certificate of Electronic Device (radar) Accuracy into evidence.

*Id.*, 276 Pa.Superior Ct. at 423, 419 A.2d at 530.

In the instant case, the trial court did not find *Gernsheimer* to be controlling, stating, "the *Gernsheimer* court did not squarely address the issue with which we are presented and we are therefore under no obligation to follow its recommendations." In *Gernsheimer*, appellant was convicted of speeding. On appeal, the issue raised was whether the trial court improperly admitted the Certificate of Accuracy [\*\*\*4] because the certificate did not contain an official seal on its face.

[\*320] In *Gernsheimer*, the Commonwealth introduced two exhibits: (1) a certificate from the Secretary of Transportation under seal appointing York Corporation as an official testing station, and (2) a certificate of accuracy, signed by both the person who calibrated the device and the person in charge of the testing station. The latter certificate

372 Pa. Super. 317, \*320; 539 A.2d 814, \*\*815;  
1987 Pa. Super. LEXIS 9249, \*\*\*4

was at issue, and the appellant contended it should not have been admitted into evidence because it did not contain an official seal and the officer who testified at appellant's hearing had not performed the tests nor was he present during its testing. *Gernsheimer*, 276 Pa. Super. at 422-23, 419 A.2d at 530. The *Gernsheimer* court held that an official seal was not needed for admissibility, stating that "[t]here is nothing in [75 Pa.C.S.A. § 3368(d)] which requires that a seal appear on the Certificate of Electronic Device Accuracy." *Id.*, 276 Pa. Superior Ct. at 423, 419 A.2d at 530.

The trial court in the instant case thus concluded that since the language in *Gernsheimer* went beyond the particular issue raised and was not applicable to the [\*\*\*5] particular facts in *Gernsheimer's* case, it is obiter dictum. See *In re Estate of Pew*, 411 Pa. 96, 103, 191 A.2d 399, 404 (1963) [HN3] (what is actually decided and controlling is the law applicable to the particular facts of that particular case and while all other statements and conclusions therein are entitled to great consideration, they are not controlling).

The language in *Gernsheimer* clearly went beyond the specific issue raised. However, this court has twice restated this "dictum" as setting forth the requirements of 75 Pa.C.S.A. § 3368(d). See *Commonwealth v. Cummings*, 338 Pa. Super. 149, 487 A.2d 897 (1985); *Commonwealth v. Gussey*, 319 Pa. Super. 398, 466 A.2d 219 (1983).
