concluded from assistant state's attorney's testimony and State's considerable efforts to call witness during trial that exculpatory evidence in question was not in possession of State or any of its police officers until after trial's termination. *People v Palmer* (1982) 111 Ill App 3d 800, 67 Ill Dec 442, 444 NE2d 678.

See *People v Keith* (1978) 66 Ill App 3d 93, 22 Ill Dec 847, 383 NE2d 655, § 11.

State was not required to furnish criminal defendant with everything in its file which might influence jury where allegedly suppressed evidence, evaluated in context of entire record, did not create reasonable doubt of guilt that did not otherwise exist. *People v Morris* (1977) 47 Ill App 3d 732, 8 Ill Dec 186, 365 NE2d 424.

In prosecution for murder, state did not suppress evidence favorable to defendant where, although witness' grand jury testimony would have corroborated defendant's testimony that there was fight, defense had made no motion for grand jury testimony, there were no unusual circumstances that should have alerted trial prosecutors to need to examine witness' grand jury testimony, and where state had complied with defense discovery motion and submitted name and address of witness in answer thereto. *People v Jones*, 33 Ill App 3d 1000, 339 NE2d 519.

See *People v Bracy*, 14 Ill App 3d 495, 302 NE2d 747, § 8.

Rule of Brady Case does not support catch-all motion for discovery, and defendant must still show existence of evidence which he seeks, as well as that such evidence is material. *People v Frazier*, 2 Ill App 3d 639, 276 NE2d 801.

See *State v Aossey* (Iowa) 201 NW2d 731, cert den 412 US 906, 36 L Ed 2d 971, 93 S Ct 2292, § 16[a].

Accused's motion for inspection of all statements and other evidence exculpatory as to accused in files of police, sheriff, and county attorney, was properly denied by trial court as too broad and as imposing unreasonable burden on state. *State v Niccum* (Iowa) 190 NW2d 815.

In prosecution for aggravated robbery, defendant was not entitled to new trial or remand, notwithstanding that county prosecutor was under positive legal duty to disclose exculpatory evidence to him, since evidence alleged by defendant to be exculpatory was in county prosecutor's file which was open to defendant's attorneys at all times prior to and after trial, and materiality and relevance of report was questionable at best in that FBI concluded in report that it could not identify anyone in surveillance film as defendant because mug shots were not taken in view sufficiently comparable to views displayed in films, but eyewitnesses in case who were relying on their own knowledge of appearance of person who committed robbery, and not on mug shots which were sent to FBI, were able to identify defendant when shown surveillance film. *State v Shepherd* (1983) 232 Kan 614, 657 P2d 1112.

It is incumbent upon accused to show that evidence favorable to him, sought by discovery motion, is material to either guilt or punishment; thus, where defendant's motion for discovery of exculpatory evidence did not indicate any theory of defense which would aid court in identifying such evidence, nor did it set forth specific items which might be deemed to be exculpatory, trial court did not err in denying motion for such discovery or later motion for in camera inspection, by court, of prosecution files. *State v Hill*, 211 Kan 287, 507 P2d 342.

In prosecution for aggravated rape and murder, withholding of evidence that defendant had confessed to two additional rapes which he may not have committed did not require reversal of conviction where omitted material, when evaluated in context of record as a whole, did not create reasonable doubt as to defendant's guilt. *State v Manning* (1980, La) 380 So 2d 46.

No prejudicial error occurred where trial court denied defense motion for in camera inspection of items in possession of prosecution where items were not, in fact, beneficial to defendant or exculpatory. *State v Boyd* (1978, La) 359 So 2d 931.

In prosecution for having issued and transferred forged check, failure of state to inform defendant that certain individuals who viewed lineup in which he participated failed to identify him as individual who passed to them other forged instruments did not constitute suppression of exculpatory evidence where inability of these individuals to identify defendant in connection with other forged instruments not subject of present case could not have aided defendant. *State v Gilmore (La)* 323 So 2d 459.

In order to obtain reversal of conviction under rule of Brady Case, defendant must prove that state possessed evidence favorable to him and that state wilfully suppressed such evidence; thus, where trial court held hearing and determined that state did not possess any evidence favorable to defendants, such court did not err in denying motion for production of all evidence in possession of state which would tend either to exculpate defendants, or to mitigate their sentences. *State v Breville (La)* 270 So 2d 852.

Defendants' motion for disclosure of all evidence favorable to them was properly denied since it was obvious attempt to obtain pretrial inspection of prosecution's evidence. *State v Jones*, 263 La 164, 267 So 2d 559, cert den 410 US 946, 35 L Ed 2d 612, 93 S Ct 1406.

See *Alston v State*, 11 Md App 624, 276 A2d 225, § 8.

Suppression or withholding by state of material evidence exculpatory to accused violates due process and is ground for relief under *Uniform Post Conviction Procedure Act*. *Ross v Warden, Maryland Penitentiary*, 1 Md App 46, 227 A2d 42.

See *Commonwealth v Redding (1980)* 382 Mass 154, 414 NE2d 347, § 27[b].

See *Com. v Preston (Mass)* 268 A2d 922, § 7.

In prosecution for felony murder, prosecutor had no duty to disclose to defendant that prosecution's witnesses had future possibilities of receiving monetary awards in connection with case where none of witnesses were aware of rewards until after trial. *People v Dietrich (1978)* 87 Mich App 116, 274 NW2d 472.

See *People v McCarmey (1975)* 60 Mich App 620, 231 NW2d 472, later app 72 Mich App 580, 250 NW2d 135, § 25[c].

Defendant's motion for discovery of all information or materials of whatever kind that are favorable to defendant in terms of guilt or innocence, or that go to mitigation of punishment, was impermissible dragnet and was properly denied. *State v King (Minn)* 208 NW2d 287.

Defendant's motion, in murder prosecution, for production of all information which would tend to exculpate him, either through indication of innocence or potential impeachment of witness, and for all other information which would be of benefit to defendant, was too broad and sweeping to be sustained. *State v Scott (Mo)* 491 SW2d 514.

See *People v Anderwkavich (1982)* 117 Misc 2d 218, 457 NYS2d 718, § 18.

In murder prosecution, report and file of district attorney which disclosed that two men had given information to police that shooting had taken place outside of establishment where victim was found, rather than in another establishment wherein shooting allegedly had taken place, was crucial exculpatory information which should have been made available to defendant. *People v Boone (App Div)* 370 NYS2d 613.

Under rule of Brady Case, refusal to grant pretrial motion for discovery of exculpatory evidence is not reversible error

unless defendant shows that evidence favorable to him was actually suppressed; thus, where defendant in rape prosecution made no such showing and prosecutor stated that he had no evidence favorable to defendant, trial court did not err in denying motion for discovery of any and all evidence known to state which was favorable to or tending to favor defendant. *State v Gaines*, 283 NC 33, 194 SE2d 839.

Where defendant moved for discovery of all exculpatory evidence contained in files of prosecutor or personally known to prosecutor, of which defendant had no way of knowing, trial court erred in denying such motion without inquiry; however, since both prosecutor and defense counsel stated, in argument on appeal, that they knew of no evidence favorable to defendant which had been concealed, conviction of defendant was affirmed. *State v Patterson*, 28 Ohio St 2d 181, 57 Ohio Ops 2d 422, 277 NE2d 201, cert den 409 US 913, 34 L Ed 2d 174, 93 S Ct 242.

Essence of rule of *Brady v Maryland* is that it is violation of due process for prosecution, after request of defendant, to withhold evidence favorable to accused, but request of defendant, in form of motion, should state with as much particularity as possible, evidence which defendant contends is favorable to him, and if difference of opinion exists between defendant and prosecution as to whether evidence is favorable to defendant, difference should be resolved by trial judge, in camera; thus trial judge's order directing district attorney to make his entire files available for in camera inspection by judge, which exceeded request contained in defendant's discovery motion, was not justified by constitutional requirements of due process set forth in *Brady* decision, and district attorney should not have been held in contempt for refusal to obey it. *State ex rel. Dooley v Connall (Or)* 475 P2d 582.

See *State v Hockings (Or App)* 542 P2d 133, § 22[e].

Trial court was not required to conduct in camera inspection of results of prosecution's investigation in order to make its own independent appraisal of evidence where prosecution had agreed to supply defendant any evidence of exculpatory nature but none was forthcoming by reason of prosecution's determination that in fact it had in its possession no evidence that would tend to exculpate defendant. *Commonwealth v Martin (Pa)* 348 A2d 391.

Defendant was not deprived of his constitutional right to fair trial due to state's failure to provide him with results of tests performed by FBI which were allegedly exculpatory in nature where evidence was not suppressed, but was introduced by state at trial, and where evidence was, at best, neutral, and taken in its entirety might well have been cast as inculpatory rather than exculpatory. *Hamilton v State (1977, Tenn Crim)* 555 SW2d 724.

In murder prosecution, trial court properly overruled defendant's motion for new trial based on State's failure to disclose, pursuant to previously granted order, certain allegedly exculpatory evidence which it had possessed at time of trial, where evidence in question was statement of prosecution witness which indicated that others may have been involved in offense but which also indicated that defendant was involved, under state law participant in criminal transaction was fully responsible for his conduct, and evidence in question was not material in sense that would trigger "Brady Rule" in that it did not create reasonable doubt of guilt that did not otherwise exist. *Brooks v State (1982, Tex App 12th Dist)* 643 SW2d 440, review ref.

There was no suppression of exculpatory evidence or evidence which might have exonerated defendant in failure of prosecution to provide offense report of police officer witness before trial where report was delivered to defendant when witness testified and no identification witness testified contrary to description given in report. *Holloway v State (Tex Crim)* 525 SW2d 165.

[\*5] Power and jurisdiction of court to permit inspection

[\*5a] Trial court's discretionary power

In a large number of cases it has been recognized that whether to grant or deny an accused the right to inspect evidence

in the possession of a prosecution lies within the discretion of the trial court.n55

## WEST VIRGINIA

See *State v Price* (1926) 100 W Va 699, 131 SE 710, *infra*  
*State v Dye* (1982, W Va) 298 SE2d 898  
*State v Cowan* (W Va) 197 SE2d 641 (citing annotation)

Thus, in *Brenard v Superior Court of Sacramento County* (1959) 172 Cal App 2d 314, 341 P2d 743, involving a prosecution for manslaughter in the driving of a motor vehicle and other offenses, an order denying the defendant's motion for pretrial inspection of certain documents in the possession of the prosecution (including reports of blood tests taken of the defendant and other individuals involved in the accident; statements made by the defendant and recorded by the state highway patrol; and statements made by other individuals involved in the accident and recorded by the state highway patrol) was upheld where the record disclosed only that the motion for pretrial inspection was made and argued before the trial court, and was denied, and there was nothing in the record to show what had transpired at the hearing or whether or not affidavits in support of the motion were filed in the trial court. Stating that in determining whether or not

an appellate court should order a trial court to permit the inspection of documents in the hands of the prosecution, the question is whether or not the trial court abused its discretion in refusing to permit such inspection, and noting that no case had gone so far as to state that the denial of a motion for pretrial inspection was an abuse of discretion without a showing before the trial court as to why the material was needed, the court said that unless a proper showing was made before the trial court, and unless the record made before that court was presented to an appellate court, there was nothing before the appellate court from which it could be determined whether or not the trial court had abused its discretion in refusing pretrial inspection; and that on the record before the present court it was impossible to ascertain whether or not there was an abuse of discretion in the instant case. The court added that if a proper showing were made, the defendant would be entitled to an order requiring production of the blood test report and his statement allegedly recorded by the state highway patrol.

Holding that it was within the discretion of the trial court to grant or deny the motion in question, and that the prosecution was not required to disclose evidence upon which it relied nor did the defendant have a right to ask such disclosure, the court in *Commonwealth v Bartolini* (1938) 299 Mass 503, 13 NE 2d 382, cert den 304 US 565, 82 L ed 1531, 58 S Ct 950, upheld the denial of the defendant's motion, made before and at the beginning of the trial, for an order requiring the prosecution to produce, for inspection by the defense, various evidence in the possession of the prosecution, including the parts of the body of the victim of the alleged murder and the material in which they were wrapped at the time of their discovery, a medical examiner's report relating to the parts of the body, all property and other materials taken from the victim's cottage and the defendant's house, all fingerprints taken by the prosecution at the victim's cottage, and photographs of the victim's cottage and the parts of her body. To the same effect is *Commonwealth v Noxon* (1946) 319 Mass 495, 66 NE2d 814, upholding the denial of a pretrial motion for production of the stenographic record of a formal statement made by the defendant and his wife at the police station, certain personal property taken from him, certain tissue removed from the body of the victim of the alleged murder, photographs and slides of such tissue, and papers and reports relating to an autopsy.

In *Parker v State* (1957) 164 Neb 614, 83 NW2d 347, cert den 356 US 933, 2 L ed 2d 763, 78 S Ct 775, the court, upholding the denial of the defendant's request to examine contents of the stomach of the victim of the alleged homicide, said that the rule which should be applied in a situation such as was presented in the present case is the one generally applicable in the case of a request for examination of documentary evidence, and this rule is that in a criminal case the trial court is invested with a broad judicial discretion in allowing or denying an application to require the prosecution to produce written confessions, statements, and other documentary evidence for the inspection of the defendant's counsel before the trial, and that error may be predicated only for an abuse of such discretion.

In *Pinana v State* (1960) 76 Nev 274, 352 P2d 824, the court, holding that in the absence of statute the allowance of pretrial inspection of the prosecution's evidence in a criminal case rests within the discretion of the trial court, upheld the denial of the defendant's motion for an order requiring the pretrial disclosure of the report of an autopsy and blood alcohol test on the victim of the alleged homicide, the report of a blood alcohol test on the defendant, and certain statements made by the defendant to police officers. Stating that although there are many good reasons why courts should in the exercise of their discretion be liberal in allowing pretrial inspection of prosecution evidence, proper limitations to such inspections must be respected, and that unless a trial judge is required by statute to permit a particular type of inspection, it is not erroneous for him to deny inspection where the basic rights of a defendant would not thereby be prejudiced, the court concluded that in the present case there was no showing to support the defendant's contention that the denial of her motion for pretrial disclosure prevented her from having a fair trial.

See also *People v Calandrillo* (1961) 29 Misc 2d 495, 215 NYS2d 364, wherein the court recognized that there is an inherent power in a court of criminal jurisdiction to permit discovery of evidentiary documents in advance of trial in furtherance of justice.

In *Application of Killion* (1959, Okla Crim) 338 P2d 168, the court, in denying the defendant's motion for permission to inspect a tape-recorded conversation had by him with the county attorney, noted that in the interest of justice for good

cause shown, the trial court has the inherent right in the exercise of sound judicial discretion to grant the remedy of pretrial inspection to the accused where the denial of pretrial inspection might result in a miscarriage of justice. The same rule was also recognized in *State ex rel. Sadler v Lackey* (1957, *Okla Crim*) 319 P2d 610.

See also *Ivey v State* (1960) 207 Tenn 438, 340 SW2d 907, where the court, in holding that an order denying a pretrial inspection of certain FBI reports containing evidence which the defendant expected the prosecution to use in the trial of the case was not reviewable by certiorari, said that the matter under consideration was a procedural question addressed to the discretion of the trial judge and his action thereon did not cast the defendant in a final judgment.

In *State v Lack* (1950) 118 Utah 128, 221 P2d 852, the court, upholding the denial of the production of certain documents for examination by the defendant prior to trial, noted that it is within the sound discretion of the trial court whether a defendant shall be allowed or denied the privilege of examination of evidence in the possession of the prosecution prior to trial. The defendant's contention that the trial court abused its discretion in denying the production was rejected, the court concluding that no such abuse of discretion appeared from the record.

In *State v Clark* (1930) 156 Wash 543, 287 P 18, the defendant's assignment of error to the trial court's refusal to permit him to inspect "certain articles taken from" him was held not sustainable, the court concluding that the trial court did not abuse its discretion in this matter. The court pointed out that the only articles taken from the defendant that were introduced in evidence were a knife and a cloth; that the defendant's counsel was permitted to inspect the knife prior to the trial, and to examine the cloth before it was introduced in evidence; and that the defendant had not at any time made a request to examine the articles by experts.

Noting that it is a settled law of Washington that questions relating to an accused's right to inspection of evidence in the possession of the prosecution are peculiarly within the discretion of the trial court, and that such discretion will be interfered with only when there has been a manifest abuse of discretion, the court in *State v Morrison* (1933) 175 Wash 656, 27 P2d 1065, rejected the defendant's contention that the trial court committed error in its refusal to permit inspection of "certain writings and documents in possession of the prosecuting attorney which had been considered by the grand jury." The court pointed out that the affidavit in support of the motion for inspection failed to state any specific facts from which it might appear that an inspection was necessary in the preparation of the defense or that the defendant would be prejudiced by the denial of his motion, although a conclusion to that effect was incorporated; and that even in the present proceeding on appeal the defendant failed to point out any prejudice which resulted from the trial court's ruling, nor did the record show any prejudice actually suffered by the defendant for this reason.

In *State v Gilman* (1963) 63 Wash 2d 7, 385 P2d 369, the court, in upholding the denial of the defendant's request for inspection during trial of a prosecution witness' statements on the ground that there was no abuse of discretion in the trial court's ruling, followed the rule that the accused is not entitled to examine documents in the hands of the prosecution as a matter of right, but the granting or denying of such inspection rests in the discretion of the trial court, and said: "Judicial discretion to grant or to deny the examination of the state's files in a criminal case is compounded of many things, among which are: timeliness of the application; time and opportunity of the defendant to prepare for trial; reactions and attitudes of witnesses if interviewed before trial; indications of prior inconsistencies in the testimony; surprise at the trial, which reasonable diligence in preparation would not have avoided; reasonable opportunity for examination and experiment by experts consistent with the preservation of the evidence; a clear showing of real danger to and concern for the personal safety of witnesses; needless damage to reputation; financial inability of the defendant to obtain technical and investigative aid; and any other considerations, the denial of which shows an unfair deprivation or the granting of which supports the ideal of substantive due process."

See also *State v Price* (1926) 100 W Va 699, 131 SE 710, where the court, in holding that a new trial should be granted because of surprise at certain evidence introduced by the prosecution, said, in its syllabus of the case, that "unless required to do so by the court, counsel have the right to refuse to disclose the evidence which they expect to introduce upon the trial of a cause."

◇

Pennsylvania decisions are not altogether in agreement as to whether the trial court has the discretionary power to permit an accused to inspect evidence in the possession of the prosecution. In some cases (including all those decided by the Pennsylvania Supreme Court) the existence of such power was recognized at least to some extent.

Thus, in *Commonwealth v Caplan* (1963) 411 Pa 563, 192 A2d 894, a proceeding for a writ of mandamus resulting from an order granting the defendant's request for permission to inspect all statements of all witnesses listed upon the indictment, the Pennsylvania Supreme Court, while denying the petition on the ground that the proper remedy in the case should be a writ of prohibition, noted that as a general rule the accused has no right to the inspection or disclosure before trial of evidence in the possession of the prosecution; that, at the very least, a defendant should be required to present exceptional circumstances and compelling reasons; that the mere allegation that the indictment did not set forth facts with sufficient particularity is not a sound basis on which to grant unlimited discovery; and that in the present case the lower court before granting any discovery should at the very least have conducted a preliminary hearing in order to determine the necessity for discovery and the extent of the discovery, if any, which should be granted.

Attention is also called to *Commonwealth v Smith* (1965) 417 Pa 321, 208 A2d 219 (a case not within the scope of this annotation because involving an application for production of statements made by certain prosecution witnesses to the FBI which had not been released to the prosecution), wherein the court recognized that under certain circumstances a defendant may be granted an inspection of statements made by prosecution witnesses which are in the possession of the prosecution.

And in *Commonwealth v Stepper* (1952, Pa) 54 Lack Jur 205, the court, in holding that the defendant's petition for permission to inspect a confession made and signed by him the day after the alleged homicide in the presence of police officers and representatives of the district attorney's office should be granted under the circumstances of the case, said that it had discretion to permit a pretrial examination of the confession to be conducted under its supervision and control, and that on the question of the discretionary power of a trial court to permit such an inspection, it could not agree with the opinions rendered in *Commonwealth v McQuiston* (1945) 56 Pa D & C 533, 60 York Leg Rec 140; *Commonwealth v Smith* (1949) 67 Pa D & C 598, 60 Dauph Co 35, and *Commonwealth v Sherman* (1950) 72 Pa D & C 367, 66 Montg Co LR 167, all *infra*.

The view that the trial court has the discretionary power to permit a defendant to inspect evidence in the possession of the prosecution was also taken in *Commonwealth v Brown* (1959) 19 Pa D & C2d 196, 47 Del Co 120, *infra* § 25 [a], and *Commonwealth v Kotch* (1960) 22 Pa D & C2d 105, 51 Luzerne Leg Reg R 59, *infra* § 13[b]. See also the concurring opinion in *Petition of Di Joseph* (1958) 394 Pa 19, 145 A2d 187, *infra* § 25[a].

In *Commonwealth v Hoban* (1952, Pa) 54 Lack Jur 213, the Pennsylvania Supreme Court, denying a writ of prohibition restraining the respondent judge from enforcing an order permitting the defendant's counsel to inspect a signed confession made by the defendant to the police authorities and staff of the district attorney's office, held that while the defendant's counsel in a criminal case has no absolute right to an inspection of the defendant's confession, the trial court has the discretionary power to direct the prosecuting attorney to grant defense counsel permission to inspect such confession if, under the particular circumstances of the case, the interests of justice so require, and that in the present case there was no abuse of discretion in the action of the respondent judge, "in view of the facts stated in the opinion which it filed." The court noted that the present decision was to be understood as being confined to the defendant's confession, as distinguished from any other papers, documents, or articles in the possession of the district attorney.

In other Pennsylvania cases (all of which were decided by courts of lower level), the court refused to recognize the existence of the discretionary power of a trial court to permit an accused to inspect evidence in the possession of the

prosecution.

The decision relied on as leading case by the Sherman, Smith, and Zayac Cases (Pa) all supra, is *Commonwealth v McQuiston* (1945) 56 Pa D & C 533, 60 York Leg Rec 140, wherein the court, concluding that the defendant had no right to compel the district attorney to turn over to him, for his inspection, evidence which the district attorney might intend to present at his trial, denied the defendant's petition for an order directing the district attorney to permit him to inspect a statement made by him to the district attorney.

Similarly, taking the view that a trial court has no authority to direct the district attorney to turn over to the defense any evidence which he may have in his hands, the court in *Commonwealth v Smith* (1949) 67 Pa D & C 598, 60 Dauph Co 35, denied the defendant's petition for an order directing the district attorney to permit the defendant to inspect all written statements made by him and his wife and any declarations made by the victim of the alleged homicide before his death.

Thus, in *Commonwealth v Sherman* (1950) 72 Pa D & C 367, 66 Montg Co LR 167, the court, in denying the defendant's pretrial petition seeking to compel the district attorney to allow his counsel to inspect certain statements previously made by him to the police, held that under the present state of the law it was not within the discretionary power of the court to compel the district attorney to turn over such statements to the defendant's counsel for his inspection. The court noted that since there was no statute governing the question, the common law controlled, and admittedly at common law no right of inspection of documents before trial was conceded to the accused.

And in *Commonwealth v Zayac* (1954) 2 Pa D & C 2d 646, wherein the defendant, who was "the holder of a gun at the time such gun went off and killed" her husband, filed a petition seeking permission to have an expert inspect such gun and any other guns which might have been taken from her home after her husband was shot, the court held that the order sought could not be granted, since it was doubtful "whether or not the court of quarter sessions has any power to make the order sought upon the district attorney" and "whether a simple petition and rule is such original process as would allow an order to be made." The court denied the defendant's contention that it was within the discretion of the court to make such an order.

Finally, following the Sherman, Smith, and Zayac Cases, the court in *Commonwealth v Graham* (1955, Pa) 42 Del Co 313, denied the defendant's petition for an order directing the district attorney to permit him to inspect statements made by codefendants, tape recordings of the voices of all defendants, the alleged murder weapon and bullet, and all other physical and documentary evidence in the possession of the district attorney.

◇

Granting of motion for discovery of names and addresses of prosecution witnesses and certain items of documentary evidence, such as reports by physicians and toxicologists, search warrants, and reports of police officers, was within trial court's discretion. *Daniels v State*, 49 Ala App 654, 275 So 2d 169.

In prosecution for rape and kidnapping in which defense sought disclosure of journal kept by victim before, during and after events in question, trial court properly examined journal in camera and turned over to defendant only that which was written during time she was with him where journal contained no passages which tended to exculpate defendant or to impeach victim. *Morrell v State* (1978, Alaska) 575 P2d 1200.

Trial court did not abuse its discretion in denying defendant's motion to require prosecuting attorney to disclose whatever information he might have pertaining to criminal record of officer defendant was charged with assaulting where officer testified on cross-examination that he had been convicted of burglary and grand larceny in California and on re-direct examination that his conviction had been reviewed some three years later and charges dismissed. *Turner v*

*State (Ark) 527 SW2d 580.*

Defendant's motion to discover evidence of deputy sheriffs' propensities for violence, including records of several investigations conducted by sheriff's internal administrative services bureau, which indicated that such deputies had used excessive force on previous occasions, was addressed solely to sound discretion of trial court; right to discover such evidence was based on fundamental proposition that defendant was entitled to fair trial and an intelligent defense in light of all relevant and reasonably accessible information; requisite showing of sufficient good cause was satisfied so as to warrant trial court in compelling discovery, where defendant did not have access to sheriffs' investigative records, information which defendant sought might have had considerable significance in preparation of his defense, and where documents were requested with adequate specificity to preclude possibility that defendant was engaged in "fishing expedition." *Pitchess v Superior Court of Los Angeles County, 11 Cal 3d 531, 113 Cal Rptr 897, 522 P2d 305.*

See *Lemelle v Superior Court of Orange County (1978) 77 Cal App 3d 148, 143 Cal Rptr 450, § 27[a].*

See *Hutchinson v State (1981, Fla App D1) 397 So 2d 1001, § 13[a].*

See *Easterling v State (1981, Fla App D1) 397 So 2d 999, § 13[a].*

See *State ex rel. Duncan v Crews (Fla App) 241 So 2d 754, § 17.*

Trial court has authority to order discovery and such authority is inherent and based upon affirmative duty to grant accused fair trial; hence, although trial court's order granting motion for discovery of all statements of any witnesses and copy of all memoranda or oral statements of witnesses, together with list of witnesses to any oral statements, as well as for inspection by court of state and police files to determine existence of any statements, or of reports regarding such matters, was very broad and couched in general terms, it was not void for want of authority, and state's attorney improperly refused to comply therewith. However, since issues as to specifics of items discoverable must be resolved in trial court upon case-by-case, and possibly item-by-item, basis, case was remanded to trial court for further proceedings on discovery issue. *People v Crawford, 114 Ill App 2d 230, 252 NE2d 483 (citing annotation).*

See *People v Endress, 106 Ill App 2d 217, 245 NE2d 26, § 25[a].*

In prosecution for voluntary manslaughter, trial court did not err in refusing to grant discovery related to defendant's pretrial request for copies of any written statements or voice recordings of persons interviewed by any law enforcement agency or officer and for names of all persons with knowledge germane to victim's death, where, in denying defendant's request, court ordered that at trial any such statements of state witnesses would be furnished to defendant prior to cross-examination, and where it was not mandatory for court to order state to disclose names of all persons with knowledge of incident. *State v Thompkins (1982, Iowa) 318 NW2d 194.*

Grant or denial of defendant's motion for pretrial discovery of written statements, or written memoranda of statements, of prosecution witnesses, was matter for discretion of trial court. *State v Lamb, 209 Kan 453, 497 P2d 275.*

Where defense counsel in homicide prosecution during interrogation of chief prosecution witness moved for production of prior statements of that witness for purposes of impeachment, and asked for in camera inspection for material inconsistencies and Brady information, trial court erred by not conducting in camera inspection of witness' prior written or recorded statements. *State v Ates (1982, La) 418 So 2d 1326, later app (La App) 429 So 2d 176 and later app (La App) 429 So 2d 177.*

Trial judge had legal authority to order prosecution to furnish defense names and addresses of actual and potential state witnesses, and trial judge did not abuse his discretion by doing so in this case. *State v Walters (1982, La) 408 So 2d 1337.*

See *State v Morton* (1979, Me) 397 A2d 171, § 11.

It was not error to deny defendant access to statements of prosecution witnesses relative to identification of defendant where denial of motion was made at pretrial hearing, defendant did not renew demand at trial, and under rules then prevailing judge had broad discretion whether to permit discovery before trial of statement of prospective prosecution witnesses. *Com. v. Lacy*, 371 Mass. 363, 358 N.E.2d 419 (1976).

Denial of further discovery by way of particulars -- which necessarily limited Commonwealth's case -- was not abuse of discretion where court had granted defendant right to inspect all Commonwealth's documentary evidence except statement of witnesses, particulars furnished included time, place and manner of crime charged, and Commonwealth's case at trial did not present anything substantially more than what was contained in indictment and particulars. *Commonwealth v Gallo* (Mass App) 318 NE2d 187.

See *Commonwealth v Lamattina* (Mass App) 310 NE2d 136, § 16[a].

See *People v Brocato*, 17 Mich App 277, 169 NW2d 483, § 16[a].

See *State v Charity* (1982, Mo App) 637 SW2d 319, § 16[a].

See *State v Coleman*, 186 Neb 571, 184 NW2d 732, § 17.

See *State v Reichel*, 184 Neb 194, 165 NW2d 743 (citing annotation), § 7.

Although in many cases prosecutor is well advised to disclose identity of witnesses to defendant before trial, and court may order such disclosure in order to avoid surprise and expedite a just result, the identity of prosecution witnesses is not available to defense as a matter of course. *People v Vargas* (1983) 118 Misc 2d 477, 461 NYS2d 678.

See *People v Blair*, 64 Misc 2d 519, 315 NYS2d 179, § 13[a].

See *People v Nassar*, 60 Misc 2d 27, 301 NYS2d 678, § 8.

Court has inherent power to direct discovery and inspection in criminal actions. *People v Christiano*, 53 Misc 2d 433, 278 NYS2d 696.

See *State v Kassow*, 28 Ohio St 2d 141, 57 Ohio Ops 2d 390, 277 NE2d 435, vacated as to imposition of death penalty, 408 US 939, 33 L Ed 2d 762, 92 S Ct 2876, § 22[a].

Where after examination of several documents produced in response to order to "produce all records" relating to indictments, trial judge gave defense counsel two statements to examine, court properly refused to allow counsel to inspect other papers in file as "in camera inspection" was for judge's determination and is not carte blanche order for defense counsel to rummage through files. *State v Moore*, 47 Ohio App 2d 181, 1 Ohio Ops 3d 267, 353 NE2d 866.

In prosecution for murder and assault stemming from violent attack by defendants on unarmed penitentiary guards, withholding discovery on statements made by several inmate witnesses was not error where trial court made in camera review of statements and concluded discovery would not be granted, where sealed documents disclosed that inmate after inmate refused to testify strongly believing that coming forward with testimony would produce death, and where court feared dissemination of information in prison riot scenario would imperil lives of witnesses. *State v Layton* (1983, SD) 337 NW2d 809.

See *State v Tyler*, 77 Wash 2d 726, 466 P2d 120, § 16[a].

Factors to be considered by trial court in exercising discretion in ruling upon defendant's request for disclosure of prosecution's evidence include (1) avoidance of surprise which reasonable diligence could have guarded against, (2) reasonable time to discover and obtain evidence, (3) fair chance to prove material and relevant facts, and (4) timely opportunity to examine crucial evidence not otherwise, in exercise of reasonable diligence, available for inspection before trial; all such factors should be considered in consonance with trial court's duty to keep trial moving along in orderly fashion. *State v White*, 74 Wash 2d 386, 444 P2d 661.

Denial of motion to produce "all statements by witnesses, all confessions and all physical evidence" was not abuse of discretion, where prosecution possessed only a statement from victim of forgery who had already testified at preliminary hearing, and of companion of accused, whose statement was shown to accused's counsel, and where examination just before trial of clothing allegedly obtained through forgery would have served no useful purpose. *State v Green*, 70 Wash 2d 955, 425 P2d 913, cert den 389 US 1023, 19 L Ed 2d 670, 88 S Ct 598.

[\*5b] Absence of jurisdiction

In the following cases an accused's application for permission to inspect evidence in the possession of the prosecution was held to be denied for the reason that the application was made to a court which had no jurisdiction to grant it.

An order of a county superior court granting an accused's request for inspection of the premises on which the offense charged against the accused had allegedly been committed and which had been taken into possession of the sheriff for the purpose of preserving material evidence in the case was quashed in *State ex rel. Andrews v Superior Court of Maricopa County (1931)* 39 Ariz 242, 5 P2d 192, where it appeared that at the time of the issuance of the order a criminal complaint against the accused had been filed by the county attorney in a justice court, and the accused had been arraigned in that court upon the charge contained in the complaint, and that no case or proceeding against the accused was pending in the superior court so as to give it jurisdiction to make the order in question.

In *Curran v Craven (1956)* 36 Del Ch 71, 125 A2d 375, wherein the petitioners, who had been convicted of rape and sentenced to life imprisonment by the Delaware Superior Court, and who intended to petition the United States Supreme Court for certiorari to review whether they had had a fair trial, brought an action in the Delaware Court of Chancery, seeking an order requiring the attorney general to turn over to them, for their inspection and use in connection with their petition for certiorari to the United States Supreme Court, a psychiatric report on a police officer who had allegedly testified falsely at their trial, the Court of Chancery dismissed the action on the ground that it had no jurisdiction to grant the prayers of the petition.

[\*6] Necessity of making timely request; waiver of right to inspection

[\*6a] Generally

In order to be entitled to disclosure or inspection of evidence in the possession of the prosecution, the defendant must properly assert and pursue his right to such evidence by making a request for production thereof and by taking other necessary steps as required under the circumstances.n57

In *People v Sauer (1958)* 163 Cal App 2d 740, 329 P2d 962, cert den 359 US 973, 3 L ed 2d 839, 79 S Ct 888, a prosecution for forgery, the defendant's contention that the trial court abused its discretion in not permitting him to inspect before trial a handwriting expert's report was held not sustainable in view of the fact that the trial court denied the motion without prejudice to a renewal of it at the trial if it became necessary, but the defendant did not renew the motion at the trial. Stating that pretrial inspection of reports in the hands of the prosecution is not a matter of right in all cases, the court rejected the defendant's argument that the prosecution's case was based on the testimony of the

handwriting expert and hence without an opportunity to examine the report before trial the defense could not adequately prepare to meet it.

Thus, noting that a defendant can compel the prosecution to permit the inspection of written statements and other papers and instruments, but that where no proper demand is made by the defendant for the desired documents or papers, the prosecution cannot be expected to volunteer the information to the defendant, the court in *People v Nothnagel* (1960) 187 Cal App 2d 219, 9 Cal Rptr 519, held that the defendant's contention that he should have been furnished with a copy of a physician's report respecting the condition of the victim was not sustainable in view of the fact that the defendant's motion for production included statements of certain named persons but not the doctor's report in question.

Similarly, stating that there was no rule requiring the prosecution voluntarily to produce all documents for the defense, although such documents could be obtained upon demand, the court in *People v Hauser* (1962) 206 Cal App 2d 272, 23 Cal Rptr 731, a prosecution for illegal sale and possession of marijuana, held that the defendant's right to compel the production of a statement of a prosecution witness was waived where it appeared that at the beginning of the trial the defendants requested permission to inspect crime reports prepared by an undercover agent for the state narcotics bureau, and in response to this request, the district attorney made his entire file available to the defendants for their inspection, and that subsequently, when the testimony of the agent revealed that there was a report which had been prepared by him and which was in the files of the narcotics department in another city, the defendants moved for production of this report, and the trial court thereupon offered a continuance of the case to permit the defendants to have the report available, but the defendants then withdrew their motion for production, objecting to any continuance for this purpose.

In *People v Newville* (1963) 220 Cal App 2d 267, 33 Cal Rptr 816, wherein the defendant's motion for the production of certain documents in the possession of the prosecution was granted in part and was denied in part, the court held that the defendant had waived his right to complain on appeal about the denial of a portion of his motion by failing to renew it, as directed by the trial court, if he was still dissatisfied after inspecting all of the other requested material.

In *State v Bittner* (1929) 209 Iowa 109, 227 NW 601, the defendant's contention that the trial court committed error in refusing to compel the production of a written confession of an accomplice was rejected, the court pointing out that after it was discovered that the prosecution had possession of such confession, the defendant's counsel asked the prosecuting attorney if he would produce it, to which the reply was made, "No, produce nothing"; and that no subpoena duces tecum was issued and no means was adopted by counsel for the defendant to effectuate the request made by him to the prosecuting attorney.

See also *Dayton v Thomas* (1963) 118 Ohio App 165, 25 Ohio Ops 2d 19, 193 NE2d 521, app dismd 175 Ohio St 179, 23 Ohio Ops 2d 462, 191 NE2d 806, where the defendant's complaint that he was denied access to papers and documents in the possession of the prosecuting attorney, especially a statement allegedly made by himself, was held without merit, since the record did not reflect any demand, motion, notice, or order of the trial court, and no such statement was offered in evidence nor did it appear that it was used in the examination of witnesses, and no other document was specifically referred to or offered in evidence by the prosecuting attorney.

Where the trial judge issued an order requiring the county attorney to allow the accused to examine certain exhibits, but the defense was not satisfied with the order and proceeded to the trial by waiving examination of the exhibits, it was held in *Melchor v State* (1965, Okla Crim) 404 P2d 63, that there was no abuse of discretion on the part of the trial judge in proceeding to the trial without allowing the requested examination of the exhibits.

In *Commonwealth v Neill* (1949) 362 Pa 507, 67 A2d 276, it was held that at least in the absence of a request, the prosecuting attorney was not required to exhibit a private communication or report of his expert witnesses to the defendant's counsel.

In *Commonwealth v Gockley* (1963) 411 Pa 437, 192 A2d 693, it was held that the trial court did not abuse its discretion

to the prejudice of the defendant where it ruled that the defendant's pretrial request for permission to inspect certain matters (it was not shown what these matters were) should be denied "unless he could produce authorities" which would require the trial court to act favorably on the defendant's application, the court further pointing out that during the period of 6 months between the denial of the request and the commencement of the trial the defendant's counsel had never asked for an additional or final order or ruling on the application.

Where, on appeal from a judgement of conviction, the defendant contended that the conviction should be set aside "by reason of the purposeful suppression of evidence by the Commonwealth which, while in the sole custody and control of the prosecution and while not being exhibited at the trial, was alluded to and incriminated the appellant, resulting in the denial of due process of law," the court in *Commonwealth v Whalen (1959) 189 Pa Super 351, 150 A2d 133*, cert den *362 US 944, 4 L ed 2d 772, 80 S Ct 809*, stating that the gist of the defendant's contention was that the prosecution failed to reveal the results of the examination of the clothing and shoes worn by the defendant at the time of his arrest, held that the failure of the prosecution to produce such clothing and shoes did not constitute fundamental error. Noting that at least in the absence of a request, it is not the duty of a district attorney to exhibit the private report of an expert witness, the court pointed out that the defendant had made no demand for the production of evidence relating to the examination of the clothing and shoes; that the prosecution had offered no evidence as to such articles; and that the defendant's counsel did not attempt to cross-examine in this regard a chemist who had testified for the prosecution.

In *State v Mesaros (1963) 62 Wash 2d 579, 384 P2d 372*, it was held that there was no abuse of discretion on the part of the trial court in ruling upon the defendant's pretrial motion for discovery of evidence in the possession of the prosecution where the trial court granted a portion of the motion for inspection and reserved the right to the defendant to renew the motion on a further showing of necessity, and the defendant prepared an additional motion, but failed to present it to the trial court.

Also recognizing that defendant must properly request production of evidence and take other necessary steps:

*State v Ervin (1979) 22 Wash App 898, 594 P2d 934*

<>

As to whether suppression by the state of material evidence exculpatory to the accused is a violation of due process in the absence of a request for disclosure of such evidence, the United States Supreme Court in *Brady v Maryland (1963) 373 US 83, 10 L ed 2d 215, 83 S Ct 1194*, supra § 4[b], specifically held that the suppression by the prosecution of evidence favorable to an accused *upon request* violates due process where the evidence is material either to guilt or to punishment.

However, in *United States ex rel. Meers v Wilkins (1964, CA2 NY) 326 F2d 135*, involving a petition for habeas corpus by a prisoner convicted in a New York state court, the court, in holding that the petitioner's right to a fair trial as guaranteed by the due process clause of the Federal Constitution was violated where the prosecution, knowing the existence of witnesses whose testimony would have aided the defendant in his defense, failed to disclose such information to either the court or to the defendant or his counsel, said that although the present case differed from the *Brady Case (1963) 373 US 83, 10 L ed 2d 215, 83 S Ct 1194*, supra, in that the defense counsel here had never requested the disclosure of evidence from the prosecution, such request was not an indispensable requisite to establish a duty on the prosecution's part.

The view that the state is required to disclose material evidence exculpatory of the accused even in the absence of a request for disclosure, at least for purposes of habeas corpus proceedings, was also taken in *Barbee v Warden, Maryland Penitentiary (1964, CA4 Md) 331 F2d 842*, wherein a writ of habeas corpus was granted to the petitioner, who was convicted in a Maryland state court of assault with intent to murder, under the record showing that during the trial of the petitioner the prosecution produced his revolver in court, offered it for identification, and elicited from prosecution witnesses incriminating statements in respect to it, but without disclosing at any time to the court or to the defense reports of ballistics and fingerprint tests made by the police department, which reports cast grave doubt upon the petitioner's involvement in the shooting in question. Observing that the withheld evidence tending to exculpate the petitioner became highly relevant the instant his revolver was produced in open court and formally marked for identification and witnesses were interrogated about it, and stating that where evidence was withheld by the police which had a direct bearing upon and could reasonably have weakened or overcome testimony adverse to the defendant, it would not indulge in the speculation that the undisclosed evidence might not have influenced the fact finder, the court rejected the prosecution's contention that the petitioner was not entitled to any relief because he had failed to show (1) that his counsel had ever asked that the results of the tests in question should be revealed to him or to the court, and (2) that the prosecuting attorney had any knowledge of the existence of the reports. In concluding that it was no answer that the petitioner's attorney failed to ask for the results of the tests, the court pointed out that while a diligent defense counsel might have learned about the police reports, this was too speculative a consideration to outweigh any unfairness that actually resulted at the trial; that he might not have known that tests had been made; and that this was not a case where defense counsel merely made a wrong tactical calculation, but was a case where the influence strongly projected by the prosecution's evidence might have been destroyed by other evidence in its possession which was concealed from the court and defense counsel. And in concluding that the effect of the nondisclosure of the evidence in question was not neutralized because the prosecuting attorney was not shown to have had any knowledge of it, the court observed that failure of the police to reveal such material evidence in their possession is equally harmful to a defendant whether the information is purposely or negligently withheld; that it makes no difference if the withholding is by officials other than the prosecutor; and that the police are also part of the prosecution and the taint on the trial was no

less if they, rather than the prosecuting attorney, were guilty of the nondisclosure. Although recognizing, in footnote 3 of the opinion, that it would have been a denial of due process if the prosecutor had obtained a conviction by the intentional suppression of evidence, the court added that in the absence of a showing that the prosecuting attorney had been told by the police of the existence of the reports in question, and that the prosecuting attorney was himself guilty of any intentional suppression, it did not pass on the question whether the defendant was deprived of due process at his trial.

<>

And see *People v Tarantino* (1955) 45 Cal 2d 590, 290 P2d 505, a prosecution for extortion and conspiracy to commit extortion, wherein much of the evidence against the defendant consisted of recordings of conversations in his hotel room obtained by the police without his knowledge or permission, and wherein the court, in denying the defendant's contention that he was denied a reasonable opportunity to hear and decipher such recordings before or after excerpts therefrom were received in evidence, pointed out that the record showed that defense counsel were offered but did not avail themselves of opportunities to hear the recordings.

See also *People v Garner* (1961) 57 Cal 2d 135, 18 Cal Rptr 40, 367 P2d 680, cert den 370 US 929, 8 L ed 2d 508, 82 S Ct 1571, where the court, in rejecting the defendant's contention that there was a failure upon the part of the prosecution to comply with certain of the pretrial discovery orders, said that the prosecuting attorney was not required to seek out the defendant's counsel and present the statements to him for inspection, but rather it was the duty of the defendant's counsel to go to the office of the prosecuting attorney and inspect the statements available to him there.

Where the defendant's request for inspection of evidence in the possession of the prosecution was granted, but the defendant has not followed up the order granting his request by taking the necessary steps to procure the evidence from the prosecution, he may be held to have waived his right to inspection. Thus, in *Drozewski v State* (1955, Fla) 84 So 2d 329, it was held that where the defendant's pretrial request for "a list of all witnesses and statements" was granted by the trial court, but the defendant did not thereafter request the information from the prosecuting attorney or follow up the order granting the request, no error had occurred in proceeding to trial. The court said that the prosecuting attorney was not required to deliver the information to defense counsel when he did not follow up the advantage given him of the order granting his request. To the same effect is *Perez v State* (1955, Fla) 81 So 2d 201, infra § 11[c].

<>

Where the defendant's request for inspection of documents and reports in the possession of the prosecution is granted, the prosecution is bound to produce only such documents and reports as it has in its possession at the time of the order.<sup>n58</sup> Thus, where the defendant's pretrial request for inspection of all reports and documents in the possession of the prosecution was granted, the court in *People v Briggs* (1962) 58 Cal 2d 385, 24 Cal Rptr 417, 374 P2d 257, holding that the order granting the inspection was complied with when the prosecution allowed inspection of all documents in its possession at the time of the order, rejected the defendant's contention that the order was a continuing one so as to require the prosecuting attorney to produce written reports subsequently obtained by him from his own witnesses. Noting that the defendant produced no authority supporting the claim that an attorney must subject to inspection each note he gives to or receives from a witness during trial, the court pointed out that to impose such a duty upon the attorney would be tantamount to requiring him to maintain his trial file open for inspection at all times.

To the same effect is *People v Bazaure* (1965) 235 Cal App 2d 21, 44 Cal Rptr 831, wherein the court rejected the defendant's contention that the trial court's order granting discovery of statements of prosecution witnesses was a continuing one so as to cover statements made by a certain prosecution witness subsequently to the entry of the order. Pointing out that the discovery order was not worded so as to be a continuing one, the court said that in the absence of a

request or court order the prosecution was not under an absolute continuing duty to furnish subsequently acquired documents, at least where there was no showing of bad faith.

See also, as holding to the same effect, *Belger v State* (1965, Fla App) 171 So 2d 574, infra § 11[c].

◇

Defendant in murder trial who did not learn of existence of knife possibly belonging to victim, found at scene of crime, until after trial, did not waive right to disclosure by prosecution. *State v Fowler*, 101 Ariz 561, 422 P2d 125.

State's failure to comply with pretrial discovery order did not result in prejudicial error where defendant's attorney did not inform court or seek court's assistance in obtaining compliance with order prior to trial. *Goodwin v State* (1978, Ark) 568 SW2d 3.

District attorney was not required to seek out defendant's trial counsel and present statements to him for inspection but rather, it was duty of defendant's trial counsel to go to office of district attorney and inspect statements available to him there. *People v Crovedi* (Cal App) 49 Cal Rptr 724, superseded 65 Cal 2d 199, 53 Cal Rptr 284, 417 P2d 868.

Trial court did not err in overruling motion to produce exculpatory information of specific statements taken from witnesses by state during investigation of case where defendant did not demand in camera inspection of file and assistant district attorney stated that inspection by him disclosed no exculpatory material. *McGuire v. State*, 238 Ga. 247, 232 S.E.2d 243 (1977).

Defendant was not deprived of opportunity to inspect photographic and videotape evidence regarding condition of child victims, in prosecution for cruelty to children; State notified defendant more than 10 days before trial that such evidence was available for his inspection, but defendant made no attempt to inspect evidence. West's Ga. Code Ann. § 17-16-4(3). *Copeland v. State*, 589 S.E.2d 319 (Ga. Ct. App. 2003).

In response to defendant's motion requesting, inter alia, all oral statements and/or admissions by her, district attorney should have informed defendant of substance of oral statement made by her to law enforcement officer, instead of merely notifying defendant that state intended to offer such statement in evidence, but, by failing to provoke hearing at which trial court could have been called upon to judge sufficiency of state's response, defendant waived right to relief on appeal. *State v Fisher* (1980, La) 380 So 2d 1340.

Voluntary disclosure by police to defense counsel of statement by rape victim, while withholding different handwritten statement without disclosing its existence, constituted discovery violation; offer to recall witness for further cross-examination would have afforded adequate relief, and demand for mistrial was properly denied. *State v Siegfried* (1983, Me) 460 A2d 1382.

In drug prosecution court did not abuse discretion in denying defendants' request to review tapes of wire tap where prior to hearing on defendants' motion prosecution had given defendants opportunity to review tapes which they had not done. *Washburn v State*, 19 Md App 187, 310 A2d 176.

In criminal prosecution, court properly found that prosecutor did not breach duty to disclose grants of immunity or threats or inducements made to secure witness' testimony, and prosecutor did not fail to correct inaccurate testimony concerning bargains and threats used to obtain witness' testimony where defense counsel and court were fully aware of contempt "threat," so that defense demand was necessary to trigger prosecutor or court's duty to disclose information to jury. Neither was defendant entitled to reversal of conviction based on prosecution's failure to produce tape recording of statements made by prosecution witness to police where tape was lost at least three years prior to trial, and tape was

unavailable at time discovery order in question was entered. *People v Till* (1982) 115 Mich App 788, 323 NW2d 14.

Trial court did not err in refusing to permit defendant to examine statements or reports of statements by eyewitnesses in state's file where defendant did not request statements until after state had rested, request was limited to seeing anything which was favorable to defendant's case, and trial court made in camera inspection of statements and determined that they contained nothing favorable to defendant or inconsistent with anything witnesses had said while testifying. *State v Kirkwood (Mimm)* 249 NW2d 890.

Where defendant, after voir dire examination and while jury was being selected, renewed motion for production of statements of witnesses and documents and evidence which motion had been made several months before, trial court did not commit error in overruling motion as being violative of rule requiring movement to pursue motion to decision during term of court motion filed absent indication from record that prosecution had statements beneficial to or exculpatory of defendant or that failure to disclose any material in possession of prosecution prejudiced defendant. *Ponder v State (Miss)* 335 So 2d 885.

In robbery prosecution for stealing purse, trial court did not err in admitting into evidence certain items from purse which had been found during search of defendant, notwithstanding that prosecution failed to disclose existence of such evidence before trial, since defendant did not make written request for such disclosure. *State v Childress* (1978, Mo App) 576 SW2d 557.

Trial court, in prosecution for selling controlled substance, properly exercised its discretion and refused to exclude laboratory report concerning analysis of LSD police officer purchased from defendant, notwithstanding fact that prosecutor failed to comply with discovery request of defendant seeking production of report, where defendant refused offer of time by trial court to examine report and did not assert he needed additional time to review report or that delay in receiving report would adversely affect his rebuttal. *State v Flenoid* (1978, Mo App) 572 SW2d 179.

Error resulting from pretrial refusal of prosecutor to comply with defense counsel's demands to be furnished with statements of state's witnesses in capital-homicide prosecution (set forth in letters to county attorney) was waived by counsel's failure to file discovery motion until after trial began. *State v McKenzie* (1980) 186 Mont 481, 608 P2d 428, cert den 449 US 1050, 66 L Ed 2d 507, 101 S Ct 626, later proceeding 195 Mont 26, 640 P2d 368, habeas corpus proceeding (CA9 Mont) 801 F2d 1519, reh gr, en banc (CA9) 815 F2d 1323 and vacated, in part on other gnnds, on reh, en banc (CA9 Mont) 842 F2d 1525, cert den 488 US 901, 102 L Ed 2d 239, 109 S Ct 250, habeas corpus proceeding (CA9 Mont) 915 F2d 1396.

See *State v Malsbury* (1982) 186 NJ Super 91, 451 A2d 421, § 22[a].

Trial court did not err in failing to rule upon and allow defendant's discovery motion, where record failed to show any request for information made to or denial of information by prosecutor prior to discovery motion, and where record failed to show that defendant's motion was ever brought to trial judge's attention with request that judge rule upon it. *State v Splawn*, 23 NC App 14, 208 SE2d 242, cert den 286 NC 214, 209 SE2d 318.

Statute requiring that breathalyzer test report be made available to subject of test did not require prosecution to furnish defendant with test report in absence of defendant's request. *Abshire v State (Okla Crim)* 551 P2d 273.

Failure of prosecution to have informed defense of neutron activation analysis test for presence of chemical residue on hands which would indicate that individual had fired gun, which had been given to defendant, was not improper where defense counsel had not made any request for discovery of tests and where prosecutor asserted that he did not know test had been given until officer testified on stand that test had been given; trial court properly refused to allow defense counsel to argue concerning test to jury where jury was never informed that test result was negative and where defense, despite guarantee of cooperation from court, made no attempt to introduce evidence of test. *Commonwealth v Jones*

(1981) 285 Pa Super 112, 426 A2d 1167.

See *State v Gaddis (Tenn)* 530 SW2d 64, § 25[d].

Despite supposed "open file" policy in prosecutor's office, defense counsel representing defendant charged with armed robbery was not denied discovery even though information regarding identification by show up, drawing, and picture display, victim's examination of mug books, and oral exculpatory statement were not disclosed by file; boilerplate discovery motion was deemed insufficient to require state to assemble specified information. *State v Mallard (1983, Tenn Crim)* 653 SW2d 763.

See *Boles v State (1980, Tex Crim)* 598 SW2d 274, § 22[b].

It was error for state to fail to disclose statement made by witness to police, even in absence of request, and even though district attorney maintained "open file," but error was harmless where witness made statement to defense counsel upon which he was cross-examined and which he testified was false. *Tucker v State (1978)* 84 Wis 2d 630, 267 NW2d 630.

[\*6b] Timeliness of request

Where the defendant's request for disclosure or inspection of evidence in the possession of the prosecution is not timely, such request may properly be denied.

See also *People v Cooper (1960)* 53 Cal 2d 755, 3 Cal Rptr 148, 349 P2d 964, where the court, in upholding the trial court's denial of the defendant's pretrial motion for inspection of statements of certain witnesses, said that the trial court was entitled to consider, as bearing on the strength or weakness of the defendant's claim that he needed the statements to prepare for trial, the fact that the defendant was indicted on June 11, that on July 29 trial was set for August 10, and that not until July 31 did the defendant present his motion that the prosecution be required to furnish the statements in controversy.

Thus, in *People v Norman (1960)* 177 Cal App 2d 59, 1 Cal Rptr 699, cert den 364 US 820, 5 L ed 2d 51, 81 S Ct 56, infra § 9[d], the court, in upholding the denial of the defendant's motion for production of documents in the possession of the prosecution where the motion was made after a verdict was returned, held that under the circumstances the motion was not timely and the defendant had waived any right to compel production of the documents.

In *State v Colson (1930)* 325 Mo 510, 30 SW2d 59, wherein a township officer was charged with embezzlement, it was held not error to deny the defendant's request during the trial for sufficient time to examine a mass of checks, warrants, and other papers relating to his disbursements of township funds, which were among the books, records, and papers produced by the prosecution at the trial. The court said that, considering the nature of the offense charged, the defendant should have anticipated the necessity of examining those checks, warrants, and other papers in the preparation of his defense, and that the trial court did not abuse its discretion in refusing to allow him time for such an examination during the progress of the trial.

Where, following the overruling of his motion for judgment of acquittal after the prosecution had rested, the defendant orally requested the privilege of inspecting any articles taken from the body of the victim of the homicide involved, the court in *State v Malone (1957, Mo)* 301 SW2d 750, in upholding the denial of the motion, said that the fact that the defendant's request was not timely was a sufficient reason for sustaining the trial court's action in overruling it.

<>

In this connection, see also *People v Wilson (1963)* 222 Cal App 2d 616, 35 Cal Rptr 280, where the court, in holding

that although the defendant complained that his counsel at the trial was denied the right to see a certain police report, there was no showing that any error in this respect was prejudicial to him or caused a miscarriage of justice, said that the defendant in a criminal case is entitled to disclosure by the prosecution of matters which are discoverable under the law, even though he makes his demand for the first time at the trial, at least where the demanded material is readily available.

On the other hand, the defendant's request for permission to examine certain evidence material to the defense was held timely in *People v Hoffman* (1965) 32 Ill 2d 96, 203 NE2d 873, although the defendant's counsel, knowing of the existence of the evidence for about 3 weeks before the trial, had made no request for its production until the trial was in progress. The court pointed out that there was nothing in the record to indicate that production of the evidence would have delayed the trial as was suggested in the prosecution's brief.

<>

See *People v Thatcher* (1981, Colo) 638 P2d 760, § 9[b].

Delivery of State's scientific reports to defense six days prior to trial, in technical violation of ten-day disclosure requirement, did not require reversal of conviction after trial judge allowed State's witnesses to testify as to contents of scientific reports, where request for production of reports was made only ten days prior to trial. *State v Meminger* (1982) 249 Ga 561, 292 SE2d 681, on remand 163 Ga App 338, 295 SE2d 235.

Where trial of case was delayed approximately three years from date defendant was indicted for possession of marijuana, and defendant's request for independent examination of evidence was not made until three months before trial, motion was not timely. *Patterson v. State*, 238 Ga. 204, 232 S.E.2d 233 (1977).

Violation of law's letter by defense filing of discovery request less than 10 days prior to trial would not justify trial without discovery where defendant was not represented by counsel at all until less than 10 days prior to trial. *Pealor v State* (1983) 165 Ga App 387, 299 SE2d 904.

Testimony concerning scientific tests performed on suspected contraband was properly admitted into evidence in prosecution for possession of marijuana with intent to distribute even though reports were not furnished to defense until four days before trial where discovery request was not timely. *Abrams v State* (1982) 164 Ga App 553, 297 SE2d 324.

Where defendants knew that burned automobile might be factor in arson prosecution, they could not wait until eve of trial, almost one year after event, to request production, nor could they wait until second day of trial to complain of failure to receive report of expert who tested items for presence of gasoline vapors. *People v Schabatka*, 18 Ill App 3d 635, 310 NE2d 192, cert den (US) 43 L Ed 2d 400, 95 S Ct 1128.

In prosecution for manslaughter and negligent driving, court's denial of defendant's motion for inspection of Alcoholic Influence Report and continuance for that purpose was proper where defendant did not request report during discovery or during week's previous continuance, where defendant made the request after influence of alcohol charge had been nolle prossed and where the report was not material to charges then pending. *People v Robinson*, 13 Ill App 3d 506, 301 NE2d 55.

See *Johnson v State* (Ind) 319 NE2d 126, § 25[c].

Where Kansas statute required pretrial discovery motion to be filed no later than 20 days after arraignment, and defendant failed to make any such motion until more than 100 days after he had been arraigned, trial court did not abuse discretion in denying motion. *State v Lightle*, 210 Kan 415, 502 P2d 834, cert den 410 US 941, 35 L Ed 2d 607, 93 S Ct

1406.

See *State v Howard (La)* 325 So 2d 812, § 25[a].

Defendant is entitled to inspect tangible evidence which might be used against him, but where request for sample of marijuana was not made until 3 days prior to trial, and defendant had had ample time to familiarize himself with his rights, court did not err in denying motion for continuance in order to have sample analyzed. *Pooley v State (Miss)* 257 So 2d 212, cert den 408 US 928, 33 L Ed 2d 340, 92 S Ct 2492, reh den 409 US 899, 34 L Ed 2d 158, 93 S Ct 104.

Where accused did not make motion for discovery of documents bearing his signature until after court had ruled on 7 other pretrial motions, and where motion for discovery was not made until 10 days before trial, even though accused knew of existence of documents and of intention of prosecution to present testimony of handwriting expert with respect thereto, motion was not timely filed and court did not err in denying it. *State v Scott (Mo)* 491 SW2d 514.

See *State v Charity (1982, Mo App)* 637 SW2d 319, § 16[a].

Notwithstanding fact that defendant's written request for inspection of tangible objects which were subject of indictment was not submitted within ten-day period required by rule, where prosecutor had actual notice of defendant's request for inspection by virtue of letter delivered to him shortly after seizure of tangible objects, defendant would not be held to strict time limitation of rule. *State v Polito, 146 NJ Super* 552, 370 A2d 478.

Discovery motions on misdemeanors may be made only by defendant against whom information (as contrasted with complaint) is pending. *People v Zisis (1982)* 113 Misc 2d 998, 450 NYS2d 655.

See *People v Wyssling (Misc)* 372 NYS2d 142, § 13[a].

Defendant who failed to adequately explain failure to make timely request for minutes of preliminary hearing prior to its conclusion was not entitled to dismissal of indictment on ground that minutes of hearing were unavailable; however, attorneys would be required to attempt reconstruction of such proceedings and, if such reconstruction could not be had, trial court would be required to fashion appropriate order directing prosecutor to turn over to defendant, prior to trial, all grand jury testimony and all non-privileged police records and prosecutor's records relating to statements of witnesses. *People v Pinion, 56 App Div 2d* 664, 392 NYS2d 53.

Motion to require prosecuting attorney to permit defendant to examine certain exhibits which he intended to introduce in trial came too late where it was made after trial was in progress; in such case trial court should act in exercise of its sound discretion. *State v McClellan, 6 Ohio App 2d* 155, 35 Ohio Ops 2d 315, 217 NE2d 230, cert den 386 US 1022, 18 L Ed 2d 462, 87 S Ct 1380.

Where defense counsel requested statements and interviews of witnesses for prosecution after jury was selected and sworn, trial court properly denied request as premature and informed defense counsel that request for information could be renewed as each witness was called, but defense failed to renew request at any time after initial request, defense neglected to make timely request for evidence at trial and could not complain on appeal of failure to produce evidence. *Commonwealth v Krasner (1981)* 285 Pa Super 389, 427 A2d 1169.

Under statute requiring defendant to apply to court for discovery no later than five days prior to commencement of trial defendant was not entitled to later discovery of taped conversations between himself and co-worker; defendant had not requested statement made by him and fact defendant had no knowledge of tape before trial did not impose affirmative duty on prosecution to inform him of tape's existence. *Commonwealth v Brocco (1979, Pa Super)* 396 A2d 1371.

See *State v Gaddis (Tenn)* 530 SW2d 64 (citing annotation), § 25[d].

In drug prosecution, defendant's motion for order directing district attorney general to furnish sample of controlled substance to enable defendant to have substance analyzed and motion to grant continuance in order to allow analysis were properly disallowed where motions were not made in ample time so as to avoid postponement or continuance of final hearing. *State v Christmas (Tenn)* 529 SW2d 717.

[\*7] Burden of showing proper cause for inspection or designating specific evidences<sup>59</sup>

It is generally recognized that in order to be granted an inspection of evidence in the possession of the prosecution, the accused must make a proper showing<sup>60</sup> or must show a proper cause,<sup>61</sup> whether by stating the purpose for which inspection is sought<sup>62</sup> or by showing the relevancy<sup>63</sup> or materiality<sup>64</sup> of the requested evidence, or by otherwise showing facts justifying inspection<sup>65</sup> or sufficient reason why inspection should be allowed.<sup>66</sup> The defendant must show some better cause for inspection than a mere desire for all information which has been obtained by the prosecution in its investigation of the crime.<sup>67</sup> The production of the prosecution's evidence is not allowed to the defendant for exploratory purposes<sup>68</sup> or for the purpose of prying into the prosecution's preparation for trial.<sup>69</sup> The defendant has no right to invoke the means of examining the prosecution's evidence merely in the hope that something may turn up to aid him.<sup>70</sup> A blanket request for production of the prosecution's evidence will not be granted.<sup>71</sup> The defendant's motion for production of the prosecution's evidence must be based on facts, and not on conclusions<sup>72</sup> or mere surmise and conjecture.<sup>73</sup> The mere allegation that the indictment did not set forth facts with sufficient particularity is not a sound basis on which to grant unlimited discovery.<sup>74</sup>

Thus, the denial of the defendant's request for production of evidence allegedly in the possession of the prosecution has been upheld in a number of cases where the defendant failed to designate specific evidence which he desired to inspect or where there was no showing of the existence of such evidence as he requested.

*Jones v State* (1977, Wyo) 568 P2d 837

The defendant's request for subpoenas duces tecum directed to the county attorney and requiring him to bring to the preliminary hearing all written statements of witnesses, other papers or documents, canes, sticks, and any other physical objects relating to any charge in the complaint or that might be offered in evidence, or that might constitute evidence relating to any charge in the complaint, in the county attorney's possession or control, was held properly denied in *State v Colvin* (1957) 81 Ariz 388, 307 P2d 98, the court stating that such vague subpoenas duces tecum were, in the main, an attempt to go on a "fishing expedition," probably in order to obtain the "work product" of the county attorney.

Where the defendant's pretrial motion for inspection of statements made to the police by seven persons who had testified at the preliminary hearing in another case involving the same crime as the one charged against the defendant in the present case was denied by the trial court with a reservation that if any of such persons were put on the stand by the prosecution at the trial of the defendant, then the defendant might have the statements of the persons put on the stand, and of the seven persons whose statements were requested by the defendant, only three persons testified at the trial of the defendant, and although the prosecution furnished the defendant with a summary of the statement made by one of them, the defendant did not renew his request that the statements of the other witnesses should be produced, the court in *People v Cooper* (1960) 53 Cal 2d 755, 3 Cal Rptr 148, 349 P2d 964, in holding that there was no error in the trial court's ruling as to the defendant's request for inspection, observed that the trial court had properly denied the blanket request that the prosecution should turn over to the defendant all the statements in its possession; that the defense must show some better cause for inspection than a mere desire for the benefit of all information which had been obtained by the prosecution in its investigation of the crime; and that further investigation of the persons whose statements were requested for inspection could not have aided the defendant in the preparation of his case.

In *People v Lane* (1961) 56 Cal 2d 773, 16 Cal Rptr 801, 366 P2d 57, the court, noting that the defendant must show some better cause for inspection than a mere desire for the benefit of all information which has been obtained by the prosecution in its investigation of the crime, held that where, upon the defendant's pretrial motion for the production of statements of 13 alleged eyewitnesses to the homicide charged against the defendant, the trial court gave the defendant permission to examine the statement made by one of those witnesses, and denied the request as to the others "without

prejudice of defendant to make any further motion," there was no error in the ruling of the trial court.

Where, after the commencement of the trial, the defendant made a motion for discovery asking for statements of all eyewitnesses to the crime charged against him, the court in *People v Terry* (1962) 57 Cal 2d 538, 21 Cal Rptr 185, 370 P2d 985, cert den 375 US 960, 11 L ed 2d 318, 84 S Ct 446, upholding the ruling of the trial court granting the motion in part and denying it in part, noted that the defendant's motion was simply couched in language indicating that he wanted to learn the facts, and was a blanket request that the prosecution turn over to defense counsel all the statements in its possession, showing no better cause for inspection than a mere desire for the benefit of all information which had been obtained by the prosecution in its investigation of the crime; and that the trial court's order in response to the defendant's motion rested largely in its exercise of sound discretion.

See also *People v Nothnagel* (1960) 187 Cal App 2d 219, 9 Cal Rptr 519, where the court, in refusing to sustain the defendant's contention that he was improperly denied certain discovery proceedings, held that the defendant's request for production of "statements" made by a witness to police officers did not include the witness' conversations which had never been reduced to writing.

Where a police officer testified, on cross-examination, that during the course of the investigation of the crime he had received oral and written reports from other officers, and that there "may be" some reports besides those theretofore produced, and the defendant thereupon requested him to furnish "those additional reports," the court in *People v Carella* (1961) 191 Cal App 2d 115, 12 Cal Rptr 446, held that the defendant's request was so general that it should have been denied. The court pointed out that the "additional reports" referred to in the testimony included oral as well as written reports, and that the proof did not relate the actual existence of any additional written reports.

The defendant's contention that he was denied a fair trial because the trial court failed to grant "all of his blanket motions for notes, written statements and tape-recorded interviews with various persons who were possible witnesses" was held not sustainable in *People v Curry* (1961) 192 Cal App 2d 664, 13 Cal Rptr 596. Pointing out that although the defendant's motion was without any supporting affidavits, the trial court did grant the defendant's motion to some extent, and that the trial court also informed the defendant that he might renew his motion on further affidavits, but the motion was not renewed, the court noted that the defendant must show some better cause for inspection than a mere desire for the benefit of all information which has been obtained by the prosecution in its investigation of the crime, and that a blanket request for production of all statements in the possession of the prosecution may be denied.

A denial of the defendant's pretrial motion for the production of statements or notes made by an assistant district attorney of his interview with a certain friend of the defendant was upheld in *People v Burch* (1961) 196 Cal App 2d 754, 17 Cal Rptr 102, where it appeared that the statement sought by the defendant did not actually exist.

The trial court's ruling that the defendant's motion for the production of "all police reports" made in connection with the present prosecution should be denied for the reason that the request was too indefinite was sustained as proper in *People v Newville* (1963) 220 Cal App 2d 267, 33 Cal Rptr 816, the court stating that the order for such production must be based upon a proper showing, and that whether to grant or deny it rested largely in the discretion of the trial court. Pointing out that in the instant case the declarations of the defendant and his counsel, which were not opposed by counterdeclarations, merely stated on information and belief that police reports were made and that they would be material to the defense, the court said that even though such declarations were not contradicted, this did not mean that the trial court must grant the motion, but it was still discretionary, and that a mere desire to see all matters which might be helpful to the defense was not a sufficient cause to compel production thereof.

In *People v Collins* (1963) 220 Cal App 2d 563, 33 Cal Rptr 638, the court, in upholding the denial of the defendant's pretrial motion for inspection of evidence, pointed out that the demand for inspection was not intelligible; that "the data taken at" a certain police station was too vague to be meaningful; and that there was no reference to any existing statement of the defendant or of witnesses or to any police reports or other documents to clarify the matter under

dispute.

In *Rosier v People* (1952) 126 Colo 82, 247 P2d 448, the court upheld an order denying the defendant's request for pretrial production of all the files and records in the possession of the police department covering a certain period insofar as they in any wise pertained to the present case. Noting that in Colorado there was neither statute nor precedent authorizing defendant's counsel to make an examination or inspection of the prosecution's evidence prior to the time such evidence was offered on the trial, and stating that under some most unusual circumstances a defendant might be entitled to inspect and examine documents in the possession of the law enforcement officers, but then he first must make a prima facie showing of their materiality, the court observed that in the present case it was obvious that defense counsel wished an opportunity of rummaging at will through the police files and records on a "fishing expedition," hoping thereby to discover something which they could use in their client's defense. The court pointed out that the defendant's counsel had never specified to the trial court just what documents they desired to inspect or the purpose for which the inspection would be made, and that the records in question could never have been introduced in evidence.

In *Newton v State* (1884) 21 Fla 53, the denial of the defendant's pretrial motion for an order requiring the prosecution to produce all articles in its possession intended to be used in evidence against the defendant was held not error where, in answer to the defendant's motion, the prosecuting attorney filed a written statement reciting that all articles in the possession of the prosecution which were intended to be offered in evidence had been seen and examined by the defendant's counsel and experts in their behalf at the preliminary examination, and that if there were any articles in his possession intended to be offered in evidence but not yet seen or inspected by the defendant, the defendant should specify what such articles were. The court pointed out that the defendant's counsel had made no reply to such written statement of the prosecuting attorney and in no way denied the truth of any part of the statement.

In *Russom v State* (1958, Fla App) 105 So 2d 380, cert dismd (Fla) 109 So 2d 30, the defendant's contention that the trial judge committed error in refusing to compel the prosecuting attorney to produce all pretrial statements by witnesses or the prosecutrix for examination by defendant's counsel was held not sustainable, since the testimony and evidence adduced at the trial had never disclosed the existence of any statements given to the prosecuting attorney, nor did the motion designate a particular statement or paper, but the motion was made on the belief of the defendant's counsel that such writings did exist.

The defendant's contention that the trial court had committed error in denying his application for the production of books, papers, and copies of statements made by any prospective witnesses was denied in *State v Stump* (1963) 254 Iowa 1181, 119 NW2d 210, cert den 375 US 853, 11 L ed 2d 80, 84 S Ct 113, the court pointing out that some of the information sought was nonexistent, that the things to which the defendant was entitled had been produced, and that parts of the motion constituted an obvious "fishing expedition." The court noted that the demand for production must relate to specific documents and should not propose any broad or blind fishing expedition among documents possessed by the prosecution, and that the demand for production must be for documents shown to be in existence. Holding to the same effect and noting the same rules is *State v Kelly* (1958) 249 Iowa 1219, 91 NW2d 562, wherein the court upheld the denial of the defendant's motion for production of "copies of any statements, reports, investigations, confessions, and other evidence" the prosecution intended to use in the case.

In *State v Gilliam* (1961, Mo) 351 SW2d 723, cert den 376 US 914, 11 L ed 2d 612, 84 S Ct 670, the court, in holding that there was no error in refusing to require the prosecution to make available to the defense for its inspection reports of conversations had between police officers and certain prosecution witnesses, pointed out that the defendant did not show that the requested reports were in existence or that they were material and relevant, and that he assigned no reason for granting his request for inspection, but appeared to have been embarking on a fishing expedition. The court noted that it was not required to order the production of irrelevant and immaterial matter not admissible in evidence, even where such matter might aid in the preparation for trial.

The defendant's contention, on appeal from a judgment of conviction for rape, that the trial court should have required

the state police to produce for his inspection their files, reports, and statements in the case, because "it may well have been" that such files and reports contained statements of state police officials in conflict with their testimony or the prosecutrix's testimony, was rejected in *People v Marshall* (1958) 5 App Div 2d 352, 172 NYS2d 237, affd 6 NY2d 823, 188 NYS2d 213, 159 NE2d 698. Stating that if a party has in court material which would be itself competent for admission as an exhibit in evidence, he may be required to produce it, and that even as to such potential exhibits there is under state practice some measure of discretion vested in the trial court and there must be some demonstration that there is "evidence" in the possession or control of the prosecution "favorable to the defendant," the court concluded that no such demonstration had been made in the vague speculations of possibility as advanced by the defendant on appeal in the present case. The court also noted that a work sheet and files of an adverse party in a criminal or civil case will not ordinarily be made available to the other party.

In *People v Martinez* (1959) 15 Misc 2d 821, 183 NYS2d 588, the defendant's motion for permission to examine "the weapons alleged to have been used in the murder" charged against the defendant was denied. Noting that physical objects may be made available to a defendant in the discretion of the court before trial, and that it need only appear that such "evidence" is relevant, competent, and outside any exclusionary rule, the court pointed out that in the present case the moving papers failed to show the existence of any weapon or the relevance or competence thereof or that such weapon was outside any exclusionary rule. The court added that the New York rule requires demonstration in the record of the materiality as well as the existence of the evidence.

In *Application of Shafer* (1961) 31 Misc 2d 859, 226 NYS2d 727, app dismd 18 App Div 2d 766, 235 NYS2d 95, wherein the defendant moved for permission to inspect any ex parte orders for eavesdropping granted with respect to his telephone conversations, alleging that the inspection sought was necessary to lay the foundation for a timely motion to suppress evidence illegally obtained, the court held that the motion should be denied. Pointing out that the defendant's motion was based upon statements, allegedly made by an assistant district attorney and a state police officer, that telephones used by him had been tapped, and that the defendant asked to inspect orders, believed to exist, copies of which might be in the possession of several county judges and of unnumbered Supreme Court justices, and the originals, if any, of which might be in the possession of the district attorney or other law enforcement officers, the court said that if the relief asked were granted, "the order would lack certainty and read in substance like the words of the childhood game, 'Come out, come out, wherever you are.'"

In *Anderson v State* (1960) 207 Tenn 486, 341 SW2d 385, wherein, upon discovering during the testimony of certain prosecution witnesses that they had given written statements to the police and the Federal Bureau of Investigation, the defendant's attorney requested an order compelling the production of such statements, the court, upholding the denial of the request for production, pointed out that the record did not show whether the statements in question had been preserved, or were in existence, or were in the possession of the police or the prosecution or the Federal Bureau of Investigation, nor was there any showing why such statements were desired by the defendant or how they might aid the defense, and that the identification or conviction of the defendant in no way depended upon the statements. The court said that in the absence of any showing that such statements were still in existence and were in some way relevant or needful to the defense, the trial judge could not be said to have committed error in overruling the request for production.

Also recognizing that accused has burden of showing purpose for which inspection is sought or showing relevancy or materiality of evidence requested:

<>

In this connection, attention is also called to the following cases in which the denial of the defendant's request for production of evidence allegedly in the possession of the prosecution was upheld in view of the fact that the evidence in question was beyond the control of the prosecution at the time of the request.

In *State v Thomas (1928) 167 La 386, 119 So 401*, a prosecution for illegal sale of intoxicating liquor, the defendant's pretrial motion for production of the liquor in question in order that he might have it analyzed to determine the alcoholic content was held properly denied where the prosecution answered the motion by stating that the liquor was not in the possession of the prosecution or any officers under its control. Pointing out that the liquor in question had been turned over to the federal authorities for analysis and use in a prosecution against the defendant in a federal court and had not been returned to the state officials, the court said that the prosecution was not required to demand of the federal officers the return of the confiscated liquor in order that the defendant might have the benefit or use of it in the present prosecution.

In *Parker v State (1962) 244 Miss 332, 141 So 2d 546*, the defendant's contention that the trial court committed error in failing to require the prosecution to produce a tape recording of his confession which was made by a court reporter when he was taking the confession in shorthand was rejected, the court pointing out that neither the prosecuting attorney nor any representative of the prosecution had such recording, but it was in the possession of the court reporter.

In *Columbus v Mercer (1963) 118 Ohio App 394, 25 Ohio Ops 2d 290, 194 NE2d 901*, a prosecution for operating a motor vehicle while under the influence of alcohol, the defendant's assignment of error concerning the overruling of her motion to require the prosecution to furnish evidence of body fluids for examination by her expert witnesses was held not sustainable where there was no evidence in the file indicating that the evidence requested was in the hands of the prosecution at the time the motion was made.

In *Morrison v State (1899) 40 Tex Crim 473, 51 SW 358*, wherein the defendant argued that the trial court committed error in refusing to grant an order compelling the prosecution to produce certain letters written by him so that he might inspect them in the preparation of his defense, the court, pointing out that at the time of the motion for production the letters were in the hands of a witness for the prosecution, held that the trial court did not commit error in refusing to

grant the motion, because at the time of the motion the prosecution could not comply with it.

See *Pitchess v Superior Court of Los Angeles County*, 11 Cal 3d 531, 113 Cal Rptr 897, 522 P2d 305, § 5[a].

See *Lemelle v Superior Court of Orange County (1978)* 77 Cal App 3d 148, 143 Cal Rptr 450, § 27[a].

See *In re Valerie E.*, 50 Cal App 3d 213, 123 Cal Rptr 242, § 17.

See *State v Traenkner (Del)* 314 A2d 202, § 11[b].

There was no duty on part of prosecution to disclose any information regarding performance of members of jury panel in prior criminal jury trials in absence of prior governmental impetus affecting juror's prior service of nature likely to escape attention of reasonably diligent defense counsel; nor did such information constitute evidence favorable to defense since jury panel information was neither evidence nor was it material to guilt or punishment of defendant. *Britton v United States (CA Dist Col)* 350 A2d 735.

United States Constitution does not require pretrial disclosure of prosecution evidence favorable to accused without some predicate for such disclosure being established, and, under Florida law, such disclosure, for in camera inspection prior to trial of statements of witnesses taken by state to determine whether such statements come within scope of Brady rule requiring disclosure of evidence favorable to accused, may be ordered only upon proper request of accused, in which accused must show (1) cause to believe that state possesses evidence materially favorable to issue of guilt or punishment that it has refused to reveal upon request, and (2) that such evidence cannot be obtained through utilization of appropriate portions of Florida Rules of Criminal Procedure or applicable statutes; thus where accused charged with murder and arson moved for disclosure of any written statements, memoranda, or summaries of statements made by any persons to agents of state and no reason for granting such motion was shown other than that offense charged was punishable by death, trial court erred in granting motion, since such reason was clearly insufficient to meet proper requirements. *State v Williams (Fla App)* 227 So 2d 253.

In prosecution for aggravated assault and armed robbery of 76-year-old woman, state was properly permitted to introduce testimony from state crime laboratory forensic serologist and victim's physician regarding substance of crime laboratory report identifying blood found on suspected assault weapon (hammer) and on defendant's socks as consistent with victim's blood type, and emergency room report specifying victim's injuries and treatment, despite prosecution's failure to disclose contents of reports prior to trial where inculpatory substance of reports eliminated any Brady violation, and where pretrial discovery motion filed by defendant failed to specify statutory provision mandating discovery of such reports at least ten days prior to trial. Nebulous request that copies of scientific reports be provided "sufficiently in advance of trial to give defendant a reasonable opportunity to prepare a proper defense" were insufficient to warrant sanctions against prosecution for failing to make discovery available. *State v Madigan (1982)* 249 Ga 571, 292 SE2d 406, on remand 163 Ga App 460, 295 SE2d 236 and (ovrld by *Law v State*, 251 Ga 525, 307 SE2d 904).

Trial court did not err in denying defendant's Brady motion requesting production of all material favorable or arguably favorable to defendant's defense, an in camera inspection of state's file by trial court, and copies of all items reviewed by court being sealed and placed with clerk, where defendant made no showing at trial, and none on appeal, that state had any exculpatory material in its possession. *Simmons v State (1979)* 152 Ga App 643, 263 SE2d 522.

See *Watson v State (1978)* 147 Ga App 847, 250 SE2d 540, § 17.

See *Allanson v State* (1978) 144 Ga App 450, 241 SE2d 314, § 17.

Defendant's motion for production of list of names and addresses of all persons known to prosecution to have information relevant to offense charged, except privileged informers, was properly denied as overbroad; however, defendant was entitled to discovery and inspection of any material or information in possession of prosecution which might be exculpatory in nature within meaning of rule of *Brady v Maryland*. *Chung v. Lanham*, 53 Haw. 617, 500 P.2d 565 (1972).

See *People v Son* (1982) 111 Ill App 3d 273, 66 Ill Dec 952, 443 NE2d 1115, § 23.

If prosecution claims that part of report of prior statements made by prosecution witnesses contains irrelevant matter, trial court should examine documents and, at its discretion, delete unrelated material before delivery to accused. *People v Hoagland*, 83 Ill App 2d 231, 227 NE2d 111.

Where discovery motion was extremely overbroad and asked for information that was either impossible or unreasonably difficult for state to obtain, trial judge's order to both sides to produce all information within their power to produce was proper, and defendant did not show that he was prejudiced by state's failure to file anything in response to this order where he did not indicate any particular information he failed to receive or any evidence that was admitted at trial that should have been disclosed to him under the motion. *Anderson v State* (1983, Ind) 448 NE2d 1180.

Defendant's motion for production of alleged additional statements of witness was correctly denied where defendant failed to establish that evidence would have been exculpatory or that additional statements even existed. *Swan v State* (1978, Ind) 375 NE2d 198.

Where defendant's motion to require state to produce evidence for inspection was overly broad and non-specific and where defendant failed to show or allege that he was, in any way, harmed by non-disclosure, motion was properly overruled. *Brandon v State* (1978, Ind) 374 NE2d 504.

See *Rowe v State* (Ind) 314 NE2d 745, § 23.

Pretrial discovery motions are governed by 3 factors: (1) item must be designated with reasonable particularity; (2) item must be material to defense or beneficial in preparation of defense; and (3) discovery will be ordered unless state makes sufficient showing of paramount interest in nondisclosure of item. *Auer v State* (Ind App) 289 NE2d 321.

In prosecution for murder it was not improper for prosecution to fail to produce statement allegedly made by deceased to sheriff and his deputies where defendant's original motion for discovery was all-inclusive blanket motion for all statements and investigative reports in prosecution's possession and where there was no showing that alleged statement was ever reduced to writing. *State v Hummell* (Iowa) 228 NW2d 77.

Court committed no reversible error in denying motion for list of voting records of prospective jurors compiled by district attorney's office, where defendant made no showing that list was necessary in order to prevent undue prejudice to his case, hardship or injustice. *State v Wright* (La) 344 So 2d 1014.

In murder prosecution, denial of defendant's requests, made after opening statement, for issuance of instanter subpoenas (1) for copy of complaint relative to shooting of murder victim, (2) for all other complaints filed against defendant, and (3) for "rap sheets" on all prosecution witnesses other than police officers, was not reversible error where (a) there was no allegation or showing that defendant had inadequate notice of crime with which he was charged or that he was in any way surprised or prejudiced, (b) any other complaints filed against defendant would have been inadmissible, and (c) record, as designated by defendant, did not give list of prosecution witnesses or any indication whether any witnesses in fact had criminal records and defendant did not allege that he was prejudiced as result of ruling, nor was any prejudice

discoverable by record. *State v Moore (La)* 344 So 2d 973.

Where prosecution witness testified he remembered event in question and was relying on his memory not on written statement which he had read on day "it happened" prosecution was not required to furnish statement to defendant. *State v Monroe (La)* 329 So 2d 193.

Defendants in rape prosecution, having exercised right of discovery and inspection under Maryland rule to obtain names of witnesses to be called on behalf of state, names of all law enforcement officials who had any communications with defendants, all articles removed from persons of defendants, all reports of law enforcement officials (including laboratory tests) received by state's attorney, all written and oral statements given by defendants, and all papers, memoranda, and recordings made in connection with statements given to law enforcement officials by defendants, were not entitled to conduct thorough examination of all information and documents known to state and its investigators to determine if they had knowledge of anything favorable to defendants; to grant such motion would be to authorize general, exploratory examination of state files in midst of trial, which could substantially disrupt, if not abrogate, fundamentals of our existing system of criminal procedure and practice. *Ward v State, 2 Md App* 687, 236 A2d 740.

Trial court did not abuse discretion in denying request for "[a]ny evidence of an exculpatory nature that the State has in its possession," under rule providing that upon defendant's motion and showing that items sought may be material to preparation of defense, and that request is reasonable, court may order production of certain types of evidence. *Leyva v State, 2 Md App* 120, 233 A2d 498.

Rule of Brady Case that suppression by prosecution of evidence favorable to accused, when requested, violates due process, did not support defendant's blanket request for all evidence of exculpatory nature or which might be favorable to him which was in possession, control, or knowledge of prosecution, since motion indicated that defendant was merely speculating as to existence of exculpatory evidence and intended only fishing expedition. *Com. v Preston (Mass)* 268 A2d 922.

In order to ensure fair trial for defendant, obligation of prosecution to disclose evidence must be considered that of entire "prosecution team" which would include police officers and would apply to evidence which officer has even though existence of such evidence had not been divulged to prosecutor. *State v Swanson (Minn)* 240 NW2d 822.

See *State v Charity (1982, Mo App)* 637 SW2d 319, § 16[a].

In trial for driving while intoxicated, court did not err in admitting into evidence documents regarding qualification of officers connected with breathalyzer test equipment, notwithstanding that such documents had not been previously disclosed to defendant in response to his request for discovery, since discovery request was for "reports of scientific tests" and challenged documents were not reports but rather were background evidence concerning administration of test. *State v Vaughn (1979, Mo App)* 577 SW2d 131.

Trial court has broad discretion in ruling on discovery motion in criminal case and such motion should be granted where required by interests of justice, but burden is on defendant to show why motion should be granted. *State v Reichel, 184 Neb* 194, 165 NW2d 743 (citing annotation).

For accused to be granted right to inspect evidence in possession of prosecution, he must show something more than mere desire for all information obtained by prosecution; in particular, production of state's evidence is not allowed for exploratory purposes, or for purpose of prying into state's preparation of case for trial; defendant's motion for production must be based upon facts, not conclusions, and blanket request will not be granted, because defendant has no right to examine state's evidence merely in hope that something will turn up to aid him. *State v Tackett, 78 NM* 450, 432 P2d 415, 20 ALR3d 1 (citing annotation).

See *People v Daniels (Misc)* 371 NYS2d 595, § 13[b].

See *State v Tate (1982)* 58 NC App 494, 294 SE2d 16, app dismd, petition den (NC) 295 SE2d 763 and affd 307 NC 464, 298 SE2d 386, § 17.

Where defendant failed to make some showing that prior incident or incidents of arresting officer using force actually occurred and source and nature of information, trial court was not obligated to make in camera inspection of personnel records of arresting officer. *State ex rel. Johnson v Schwartz (Or App)* 552 P2d 571.

See *Commonwealth v Jenkins (1978)* 476 Pa 467, 383 A2d 195, § 13[d].

Although defendant did not have to show that evidence which he sought to have produced would be admissible at trial, he did have to show some better cause for inspection than mere desire before refusal to permit inspection would constitute constitutional error. *State v Hill (SC)* 234 SE2d 219.

See *Elliott v State (Tenn Crim)* 454 SW2d 187, § 11[h].

In prosecution for aggravated robbery, trial court did not err in failing to permit defense counsel opportunity to inspect certain evidence in possession of State under authority of state rules of criminal procedure, where rules required trial court to permit discovery only if evidence sought was material to defense of accused, and no evidence was presented at trial of materiality of items listed in discovery motion that were not already available to defendant. *Young v State (1982, Tex App 14th Dist)* 644 SW2d 18, review ref.

In prosecution for capital murder, prosecutor was under no constitutional obligation to deliver entire file to defense counsel for examination; defendant's general request for prosecutor to produce "all exculpatory evidence which the prosecution may have" was the equivalent of no request at all. Constitutional error would be presented only if there was a showing that undisclosed evidence existed which created a reasonable doubt that did not otherwise exist. *Villarreal v State (1978, Tex Crim)* 576 SW2d 51.

In robbery prosecution, trial court did not err in denying motion for discovery of all reports and materials relating to alleged rape where motion did not request this information and defendant failed to establish that reports and other matter existed at time motion for discovery was entered. *Smith v State (Tex Crim)* 547 SW2d 6.

See *Jackson v State (Tex Crim)* 501 SW2d 660, § 11[m].

Motion for inspection of all papers and letters written or stenographically recorded and for copies of all written statements and interviews was too broad to be effective and did not reflect "good cause" required for motions for discovery; moreover, defendant was not entitled to written statements of witnesses and the work product of counsel and their investigators. *Smith v State (Tex Crim)* 468 SW2d 828.

See *Solomon v State (Tex Crim)* 467 SW2d 422, § 11[m].

Defendant's motion for discovery of copies of arrest records, offense reports, and any and all other records and photographs prepared by the police in their investigation of case was properly denied as too broad, and also because there was no showing that items sought were material to defense or to assessment of punishment. *Hardin v State (Tex Crim)* 453 SW2d 158.

Defendant in murder prosecution was not entitled to carte blanche in rummaging through state's files in hope of discovering some shred of evidence which might be of assistance to her on issue either of guilt or punishment and trial court properly denied her motion for discovery where she made no showing that matters sought to be discovered were

material to her defense or issue of punishment, or that material matters were in prosecutor's possession and withheld by state, and where many of matters set out in motion were public records available on request, others were matters not within knowledge of prosecutor, and others had been held to be exempt from discovery. *Bell v State (Tex Crim) 442 SW2d 716.*

Trial court did not abuse discretion in denying discovery motion generally requesting production of "all statements, documents and evidence now in possession" of police officers or district attorney, since such motion was too broad to be effective; it did not specifically designate evidence referred to nor reflect "good cause" required by statute, and there was no showing that evidence sought was material to defense, that it was nonprivileged, that request was reasonable, or that items demanded were in possession or control of state or any of its agencies. *Sonderup v State (Tex Crim) 418 SW2d 807.*

Motion to produce for pretrial inspection "any document" in possession of prosecution or police which might be relevant on issue of guilt or innocence or punishment was far too broad, even under new discovery statute, since such statute excepts by its terms written statement of witnesses, work product of counsel and their investigators, and their notes or reports. *Smith v State (Tex Crim) 409 SW2d 408, cert den 389 US 822, 19 L Ed 2d 73, 88 S Ct 45.*

Discovery request asking for information of when, where, and in what manner each person became a member of a conspiracy, where illegal agreement was made, names and addresses of all coconspirators known to state, time of day, date, and place where conduct constituting offense occurred, time of day, date, and place where overt acts in pursuance of agreement occurred, and any overt acts in pursuance of conspiracy not pled in indictment but which state intended to prove at trial, was not a request for documents, objects, and other tangible things discoverable under state statute relating to discovery in criminal cases, but was instead a request for information about state's case which was not within scope of discovery statute. Further, defendant did not demonstrate good cause, materiality, or possession by state of any of the information requested. *Kennard v State (1983, Tex App Fort Worth) 649 SW2d 752, review ref.*

In prosecution for auto theft, trial court properly denied defendant's pretrial motion for discovery and inspection of automobile, where automobile had been released from prosecutor's possession and returned to its owner in another state over three months before defendant's demand and defendant failed to show that automobile had any evidentiary significance to the defense in that defendant's primary purpose for inspecting vehicle was to show that serial number on owner's vehicle registration card did not match number stamped on automobile door, a fact that was uncontroverted by state. *State v Knill (1982, Utah) 656 P2d 1026.*

Court did not err in not requiring disclosure of prosecution's evidence in burglary and larceny case, where disclosure demand was "all-inclusive and unreasonable," and "fraught with dangerous adversary procedural implications" if request had been granted. *State v Martinez, 21 Utah 2d 187, 442 P2d 943.*

In prosecution for first-degree murder and first-degree sexual assault, defendant was not entitled to discovery of an accurate copy of parking ticket which he had received and paid for by check, since state's duty to disclose covers only evidence within state's exclusive possession, and evidence here was not in exclusive possession of state in that defendant knew he had been ticketed, he paid ticket by check, and cancelled check was returned to him. *State v Armstrong (1983) 110 Wis 2d 555, 329 NW2d 386, cert den (US) 77 L Ed 2d 1304, 103 S Ct 2125.*

[\*8] Inspection of evidence relevant, material, or favorable to defense; inspection for fair trial or in interest of justice

In some cases it has been explicitly recognized that an accused person may be permitted to inspect evidence in the possession of the prosecution which is relevant and material to the defense<sup>75</sup> or which is favorable to the accused,<sup>76</sup> or that evidence in the possession of the prosecution may be disclosed to avoid delay in trial<sup>77</sup> or to protect essential,<sup>78</sup> basic,<sup>79</sup> or constitutional<sup>80</sup> rights of the accused or where the disclosure of evidence is otherwise

necessary for a fair trial<sup>81</sup> or in the interest of justice.<sup>82</sup> And in many other cases the court, in denying, or upholding the denial of, the accused's request for inspection of evidence in the possession of the prosecution, took into account the fact that there was no showing of relevancyn<sup>83</sup> or materialityn<sup>84</sup> of the requested evidence. Suppression by the state of material evidence exculpatory to the accused is a violation of due process, irrespective of the good or bad faith of the prosecution.n<sup>85</sup>

Also recognizing that accused may inspect evidence which is relevant or material to defense or which is favorable to accused:

*Granviel v State (1976, Tex Crim) 552 SW2d 107*

Similarly, where the defendant sought an order for the pretrial production of a notebook used by a police officer during the course of his investigation of the case, asserting that the notebook contained certain notes of the defendant's statements made at the time of his arrest, and the trial court thereupon ordered its production, but the prosecution delivered only one page of the notebook, it was held in *People v Burch (1961) 196 Cal App 2d 754, 17 Cal Rptr 102*, that there was no abuse of discretion in refusing to permit the defendant to examine the whole of the notebook in view of the fact that the trial court had examined the entire notebook and found nothing in it except the one page which applied to the case. Noting that to be producible at the request of the defendant, documents in the possession of the prosecution must be relevant and material to the defense, the court said that the trial court was not required to compel the production of written material that was unquestionably irrelevant. The court also noted that application for pretrial inspection of a signed confession or admission or a transcript of statements of an accused is addressed to the sound judicial discretion of the trial court, which has inherent power to order such an inspection in the interest of justice.

In *People v Darnold* (1963) 219 Cal App 2d 561, 33 Cal Rptr 369, cert den 376 US 927, 11 L ed 2d 623, 84 S Ct 694, it was held that where a report of investigating officers containing statements of a prosecution witness did not relate, except for a page and a half, to the charges in the present indictment, it was not error for the trial court to allow an inspection of only the portion of the report which applied to the case.

In *People v Fleisher* (1948) 322 Mich 474, 34 NW2d 15, the denial of the defendant's request for an order requiring the prosecution to produce a written statement made by a prosecution witness in connection with an offense not involved in the present prosecution was upheld, the court pointing out that it was not made to appear before the trial judge that the statement contained anything relative to the issue in the present case, but that the statement pertained solely to a collateral matter.

See also *State v Maples* (1936, Mo) 96 SW2d 26, where the court, in holding that the defendant's assignment of error relating to the trial court's refusal to tell the prosecuting attorney to deliver to defense counsel, for inspection, certain written statements secured by the investigating officials from the defendant, his wife, and the wife of the victim was too general to preserve anything for appellate review, noted that while it appeared that during the cross-examination of the defendant his counsel requested the production of a written statement made by him for the express purpose of asking him "qualifying questions," "we do not understand why it was necessary to have an inspection of the statement for the purpose of asking qualifying questions with reference to the circumstances under which the statement was given by the witness."

In *State v Hinojosa* (1951, Mo) 242 SW2d 1, a prosecution of a motorist for manslaughter in killing a pedestrian, the court, pointing out that there was no showing of relevancy or materiality, held that it was not error for the trial court to deny the defendant's motion for the production of diagrams of the scene of the alleged offense, notes taken and compiled by investigating police officers relating to conditions at the scene, notes and recordings of statements made by the defendant, etc. The court noted that the trial court had no authority to order the production of irrelevant and immaterial matter which is not admissible in evidence, even though such matter might aid in the preparation for trial.

In *State ex rel. Regan v Superior Court* (1959) 102 NH 224, 153 A2d 403, the court, in granting a writ of prohibition restraining the enforcement of an order requiring the prosecution to produce in advance of trial certain photographs, reports, and records in the possession of the prosecution, held that while the trial court might in some instances require the production before trial of objects or writings in the possession of the prosecution, the present case was not shown to be a case for such an order, because there was no showing of the nature or materiality of the writings ordered to be produced. The court said: "We do not hold the Court to be without power, in the exercise of reasonable discretion and to prevent manifest injustice, to require the production of specific objects or writings for inspection under appropriate safeguards and at a time appropriately close to the time of trial, if it should appear that otherwise essential rights of the respondents may be endangered or the trial unnecessarily prolonged. Circumstances under which such a necessity might arise are not readily envisioned in advance. . . . Conceivably writings so material as to be the very 'subject of the charge'. . . may be required to be produced in advance of trial. . . . Justice might be thought to require that a respondent be permitted to inspect the corpse of a victim or an autopsy report. Beyond such essential matters, the rights of the accused to inspection in advance of trial do not go."

See also *State ex rel. McLetchie v Laconia Dist. Court* (1964, NH) 205 A2d 534, a proceeding to prohibit the lower court from requiring certain prosecution witnesses to produce records and writings relative to the case at a preliminary examination upon a complaint charging one with murder, wherein the court, in denying the petition for writ of prohibition, stated that since the record in the present proceeding disclosed no ruling by the lower court as to what if anything it would require the witnesses in question to produce, no speculation could be made as to "the probable admissibility, status as an attorney's work product, or relevance to the issues presented by the preliminary hearing" of any writings which might be sought; and that in passing upon such questions when and if presented, the lower court would be governed by the rules announced in *State ex rel. Regan v Superior Court* (1959) 102 NH 224, 153 A2d 403, *supra*.

Noting that in New Hampshire the trial court has the inherent power in its discretion to compel discovery in a criminal case if the interests of justice so require, and stating that a basis for the granting of discovery is the defendant's need before trial for documents or information in order to insure an adequate preparation of his case for the safeguard of his essential rights, and that in exercising its discretion the trial court is to consider, under the circumstances of the case, the defendant's need of the requested evidence to properly defend himself and the adverse effect which such discovery might have on the proper prosecution of the offense, the court in *State v Healey (1965, NH) 210 A2d 486*, involving a prosecution for arson and for murder, held (1) that medical reports of a hospital relating to the defendant's confinement for observation as to his sanity could be produced for inspection by the defense to the extent that the trial court, after examining the documents, deemed any part thereof necessary for the protection of the defendant's essential rights in the proper preparation for trial; and (2) that a report of the state fire marshal containing his conclusions with respect to the cause and origin of the fire involved in the case could likewise be made available to the defense by the trial court in its discretion with proper safeguards by excising or withholding any part which might unduly hamper the prosecution if given to the defendant in advance of trial. The prosecution's argument that the medical reports relating to observation as to the defendant's sanity were not discoverable because they were its work product was rejected, the court stating that there was no reason why such reports could be classified as the work product of the prosecution when the report of an autopsy was not so classified.

In *People v Miller (1964) 42 Misc 2d 794, 248 NYS2d 1018*, a prosecution for abortion on an indictment charging that the abortion was committed by the use of certain instruments and substances, the court, in permitting the defendant to inspect the instruments and substances which were allegedly used to procure the abortion, observed that where it appears that there is evidence in the possession of the prosecution that may aid in the speedier trial of the case without damage or prejudice to the prosecution, a right sense of justice requires that it should be available for discovery and inspection; and that in deciding where the justice lies in any individual case there should be considered, among other things, "the specific purpose for which the accused seeks discovery and inspection, his likelihood of being able to inform his counsel of its character and capabilities, whether the physical evidence tends to exculpate him, the danger of giving the accused the opportunity to tailor a defense and whether or not the request is for obviously exploratory purposes."

◇

Drug defendant's discovery rights were not violated by fact three government witnesses testified to information that was not contained in any of the reports furnished to defense by government where, inter alia, none of the three witnesses had personally prepared a written report or statement of events in question, government was under no duty to develop written statements, and defendant made no showing of unfair prejudice or surprise. *United States v Rodarte (1979, CA5 Tex) 596 F2d 141*.

Where main defense of defendant, charged with preparing false income tax returns for clients, was that associate prepared all false returns, government, in response to motion to produce all material evidence, was obligated to furnish defendant with associate's confession that he had prepared false returns for clients not named in indictment as confession was in part exculpatory material and elemental sense of fair play demands disclosure of evidence that in any way may be exculpatory. *United States v Miller (CA9 Cal) 529 F2d 1125, cert den 426 US 924, 49 L Ed 2d 379, 96 S Ct 2634*.

Where, in prosecution for making false statements to investigating agencies, prosecution witness testified that defendant had admitted to making false statements during meeting, prosecution's failure to produce memorandum that reflected admissions were made by attorney and not by defendant who continued to maintain his innocence and failure to produce original notes made at meeting which indicated attorney alone made admission at proper time to allow court to make considered decision as to admissibility of witness' testimony amounted to suppression of evidence and to prosecutorial

misconduct requiring dismissal. *United States v De Marco (DC Cal) 407 F Supp 107.*

Failure to inform murder defendant that coroner had found razor in back pocket of deceased's pants was not a withholding of exculpatory evidence when several witnesses testified that deceased did not have anything in his hands when he was shot, none of those witnesses saw deceased reach for his pocket, defendant was the only person who saw deceased reach for his pocket, and even defendant admitted that he did not see razor at the time of shooting or at any time that night. Even if state acted improperly by failing to disclose this information, defendant was not prejudiced since it did not completely alter his theory of the case but only bolstered his contention that he acted in self-defense. *Poole v State (1983, Ala App) 430 So 2d 894.*

Blanket request for disclosure of evidence favorable to accused, material to issue of guilt or punishment, affecting evidence proposed to be introduced against defendant, or relevant to subject matter of indictment was properly denied where state had furnished defendant with copy of his own statement made to investigating officers and where record did not reveal any evidence favorable to defendant withheld by state. *Giddens v State (Ala App) 333 So 2d 615.*

See *Wyrick v State (1979, Alaska) 590 P2d 46, § 25[a].*

Where defendant was charged with driving while intoxicated, ampoules used in administering breathalyzer test were to be made available to defendant for tests when requested and state's duty to preserve ampoules was as operative as the duty of disclosure. *Lauderdale v State (Alaska) 548 P2d 376.*

See *State ex rel. Corbin v Superior Court of Maricopa County, 103 Ariz 465, 445 P2d 441, § 11[a].*

Contents of test ampoule and test ampoule itself used in breathalyzer test of defendant, which would have provided information of value to both prosecution and defense, should not have been destroyed by prosecution; in future, sanctions would be imposed for such nonpreservation in violation of duty to disclose unless prosecution could show that governmental agencies involved had established, enforced and attempted in good faith to adhere to rigorous and systematic procedures designed to preserve test ampoule and its contents and reference ampoule used in such chemical test. *People v Hitch, 12 Cal 3d 641, 117 Cal Rptr 9, 527 P2d 361.*

Defendant was entitled to pretrial lineup in order to disclose weakness, if any, of identification evidence, where net effect of denial was same as if existing identification evidence was intentionally suppressed. *Evans v Superior Court of Contra Costa County, 11 Cal 3d 617, 114 Cal Rptr 121, 522 P2d 681.*

See *Pitchess v Superior Court of Los Angeles County, 11 Cal 3d 531, 113 Cal Rptr 897, 522 P2d 305, § 5[a].*

In prosecution for various criminal violations relating to prostitution, municipal court properly granted discovery order requiring production, inter alia, of statistical information regarding arrests or investigations of sexual acts or solicitations at homosexual bath houses and through male escort services, where such evidence was relevant to defense of alleged discriminatory enforcement of certain criminal statutes against women dealing in heterosexual prostitution but not against adult male homosexuals. *People v Municipal Court for San Francisco Judicial Dist. (1979, 1st Dist) 89 Cal App 3d 739, 153 Cal Rptr 69.*

Where two or more persons are accused, and then charged, of complicity in same offense, and where district attorney plans to call one of them as prosecution witness, he must disclose to all other defendants any offer he has made to prospective witness concerning plea of guilty to lesser offense, or other lenient treatment, regardless of reasons for making offer and must disclose to all defendants any discussions he may have had with potential witness as to possibility of leniency in exchange for favorable testimony, even though no offer actually was made or accepted. *People v Westmoreland, 58 Cal App 3d 32, 129 Cal Rptr 554.*

Destruction by police of wallet belonging to co-defendant found outside scene of crime did not deprive defendant of fair trial, where fact that wallet contained receipts which would have established that co-defendant had not lost wallet as claimed but was in possession of it on date preceding crime would not have established defendant's innocence, but would only have seriously damaged testimony of co-defendant who had been acquitted of crime. *People v James*, 56 Cal App 3d 876, 128 Cal Rptr 733.

In implementation of policy that accused is entitled to fair trial and intelligent defense, that purpose of criminal action is ascertainment of truth, and that state has no interest in denying accused access to all nonconfidential evidence that can throw light on issues in case, prosecution must disclose items of substantial and material evidence known to it to be favorable to defense, even in absence of request for disclosure. *Craig v Superior Court in and for Alameda County*, 54 Cal App 3d 416, 126 Cal Rptr 565.

See *People v Standifer*, 38 Cal App 3d 733, 113 Cal Rptr 653, § 14.

See *People v Johnson*, 38 Cal App 3d 228, 113 Cal Rptr 303, § 22[e].

See *People v Hower* (1981, Colo App) 626 P2d 734, § 27[b].

Defendant's request for all relevant information was properly denied where, under applicable rule of criminal procedure, prosecution was only under duty to disclose exculpatory material. *People v Peterson* (1977, Colo App) 576 P2d 175.

In prosecution for assault, defendant failed to present reliable evidence that prosecution knew victim was unconscious for four days prior to photo identification of defendant, or that prosecution knew victim was suffering from paranoid delusion, and use of term "paranoid" in describing victim, by prosecutor while arguing for imposition of sentence, was at most expression of personal opinion and was not encompassed by rule requiring disclosure of exculpatory information and material. *State v Falcone* (1983) 191 Conn 12, 463 A2d 558.

When conviction depends entirely upon testimony of certain witnesses, information that witness has been arrested, is being prosecuted, or has confessed to crime, tends to show that state has power over such witness that may induce him to give testimony which will win favor with state and, when such witness is essential link in state's case, information must be disclosed. *State v Grasso* (1977) 172 Conn 298, 374 A2d 239.

See *State v Gilbert* (1979) 36 Conn Supp 129, 414 A2d 496, § 16[a].

Motion representing indiscriminate, wholesale, blanket demand, and lacking any demonstration that material sought would have tendency to clear defendant, was denied, particularly where there was no showing that requested information was exculpatory or that material was necessary for fair trial. *State v Bowden*, 29 Conn Supp 86, 272 A2d 141 (citing annotation).

See *State v Traenkner (Del)* 314 A2d 202, § 11[b].

In kidnap prosecution state's failure to disclose to defendant evidence of act of perjury on part of key government witness was not denial of fair trial where perjury and its effects were not "material;" witness' false statement regarding her legal marital status was not sufficiently germane to outcome of trial to render jury verdict based on her testimony inherently unjust. *Brooks v United States* (1978, Dist Col App) 396 A2d 200.

Production of police reports, statements given by witnesses to prosecution and other documents was required only where such information could reasonably be considered admissible and useful to defense in sense that it was probably material and exculpatory. *Pitts v State* (1978, Fla App D3) 362 So 2d 147, cert den (Fla) 368 So 2d 1372.

Under Florida law, if prosecution is or should be aware of evidence favorable to accused, it must disclose it to accused, but disclosure of evidence in possession of prosecution should not be compelled when it is otherwise available under rules of criminal procedure; moreover, although trial judge is not authorized, merely on demand, to rummage through files of prosecution to seek evidence favorable to accused, if it is shown to him that facts or circumstances exist which support inference that Brady rule (requiring disclosure of prosecution evidence favorable to accused) is being violated, or if he is persuaded by facts that it is otherwise in interest of fairness or expediency to compel disclosure, pretrial, of that which could be compelled at trial, he may (if direct disclosure to accused is not otherwise called for) order in camera inspection as prelude to full disclosure to accused of that which he may ultimately determine to be favorable to accused. Thus, where defendant's pretrial discovery motion was mere naked demand for all prosecution evidence favorable to him or which might weaken or affect any evidence against him, trial court was without authority to grant such broad and all-encompassing order. *State v Gillespie (Fla App) 227 So 2d 550*.

See *State v Williams (Fla App) 227 So 2d 253*, § 7.

Failure to disclose statement by prospective witness favorable to defendant prior to trial did not violate Brady rule when the statement was introduced at trial and defendant made no objection, motion for mistrial, or motion to suppress, and did not show how his defense was prejudiced so that he was denied a fair trial. *Chambers v State (1983) 250 Ga 856, 302 SE2d 86*.

See *Spain v State (1979) 243 Ga 15, 252 SE2d 436*, § 16[a].

Defendant in murder prosecution was not entitled to disclosure of crucial evidence by state's fingerprint expert and firearms expert since such evidence was not favorable to defendant and such disclosure could not be compelled. *Pryor v State (1977) 238 Ga 698, 234 SE2d 918*.

In camera inspection by trial court of prosecution's file and order of disclosure of part of file, with which state complied, satisfied right of discovery of defendant who had been denied commitment hearing. *Fleming v State, 236 Ga 434, 224 SE2d 15*.

It was not error to deny accused's pre-trial discovery motion where in camera inspection of prosecution's files showed that there was nothing in file favorable to accused and where accused at no time pointed even vaguely or generally to any item of information in file which might conceivably have been favorable to him. *Payne v State, 233 Ga 294, 210 SE2d 775*.

Trial court did not err in denying defendant's motion for discovery of lab report concerning examination of rape victim's clothing, where trial judge examined lab report and found nothing favorable to defendant in it. *Wanzer v State, 232 Ga 523, 207 SE2d 466*.

See *Strong v State, 232 Ga 294, 206 SE2d 461*, § 18.

Trial court did not err in prosecution for violation of controlled substances act in denying defendant's motion to produce evidence in state's file specifically concerning alleged "quota system" of arrests and grant funding, since defendant failed to indicate materiality and favorable nature of evidence sought. *Ault v State (1979) 148 Ga App 761, 252 SE2d 668*.

Trial court in narcotics prosecution properly denied defendant's motion to produce exculpatory evidence where, at pretrial hearing, district attorney stated that there was nothing exculpatory or materially favorable to defendant in state's file and where defendant made no motion for in camera inspection. *Howard v State (1977) 144 Ga App 208, 240 SE2d 908*.

Defendant was entitled to copy of arrest warrant, list of state's witnesses, copy of search warrant, and statement made by co-indictee, if it were favorable to his defense, and was entitled to any other information within hands of state which might be considered exculpatory in nature; if counsel for state was in doubt as to whether or not certain material or information was exculpatory, he should have asked trial judge for in camera inspection in order to make proper determination as to value of such prospective evidence. *Maddox v State*, 136 Ga App 370, 221 SE2d 231.

See *Quaid v State*, 132 Ga App 478, 208 SE2d 336, § 14.

See *Mobley v State*, 130 Ga App 80, 202 SE2d 465, § 25[d].

Failure of government to preserve as evidence tape recording of telephone calls made by codefendant to police station on night of crime did not deny defendant due process under state constitution, since prosecution is required to preserve only that evidence which is "material," evidence is material if, viewed in relation to all competent evidence admitted at trial, it appears to raise reasonable doubt concerning defendant's guilt, and in instant case, tape recordings were simply secondary source of information about what codefendant and police may have said to each other, and direct evidence as to codefendant's side of conversations was presented through witness and evidence of police side of conversation presumably could have been sought from police themselves. *State v Leatherwood* (1982, App) 104 Idaho 100, 656 P2d 760.

Where body of murder victim was found in barrel of concrete on city dump and witness testified that he had helped defendant load some trash, including heavy barrel, and take it to dump, refusal of trial court to require prosecution to make available to defendant reports of investigating officers' interviews with witness was equivalent to suppression of evidence favorable to defendant and a denial of due process, since such reports contained statements of witness that he and defendant had visited victim (whom witness identified from photograph) immediately after dumping barrel, and that he had seen victim on street twice within 2 months after dumping incident. *People v Sumner*, 43 Ill 2d 228, 252 NE2d 534.

See *People v Ojeda* (1980) 91 Ill App 3d 723, 47 Ill Dec 40, 414 NE2d 1156, § 17.

Where defendant's pretrial discovery motion specifically named certain information and items desired, but also included a catchall request for disclosure of all evidence favorable to him, court did not err in denying that part of motion which did not attempt to identify any specific evidence or attempt to establish the relevancy, competency, or materiality thereof. *People v Brown* (Ill App) 267 NE2d 142.

See *People v Manley*, 19 Ill App 3d 365, 311 NE2d 593, § 11[d].

In robbery prosecution it was not error for court to deny defendant's request that court make in camera inspection of prosecution's file to determine if favorable evidence had been withheld, particularly information relating to witnesses listed but not called where, while there was a duty to disclose evidence favorable to defendant on issues of guilt or punishment, there was no constitutional requirement that prosecution make complete accounting of its investigative work and where there was no showing of benefit or materiality to defendant by failing to provide information. *People v Bracy*, 14 Ill App 3d 495, 302 NE2d 747.

See *State ex rel. Meyers v Tippecanoe Superior Court* (1982, Ind) 438 NE2d 989, § 18.

Defendant in murder prosecution was entitled to disclosure of nonexculpatory statement made to police by his alibi witness where state failed to object to overly broad discovery order requiring disclosure of all information relevant to subject matter or which could in any manner aid accused in ascertainment of truth. *Reid v State* (1978, Ind) 372 NE2d 1149 (citing annotation).

State had duty to disclose to defendant evidence which tended to exculpate him. *Monserrate v State (Ind)* 352 NE2d 721.

Defendant's motion for production of exculpatory evidence was properly denied where defendant did not attempt to prove that exculpatory evidence existed. *White v State (Ind)* 330 NE2d 84.

See *Dillard v State (Ind)* 274 NE2d 387, § 7.

In prosecution for first degree murder, trial court erred in denying defendant's motion to produce evidentiary materials where defendant did not have access to list of names of 18 to 20 witnesses present at the shooting, some of whom were not called to testify and whose statements might have exculpated defendant. *State v Johnson (1978, Iowa)* 272 NW2d 480.

In rape prosecution, in which defendant admitted having sexual contact with prosecutrix, prosecution was not required to disclose medical results indicating prosecutrix had gonorrhoea since sole issue at bar was that of her consent to intercourse. *State v Sanders (1980)* 227 Kan 892, 610 P2d 633.

Although trial judge's refusal to order discovery of reports relied on by police officer in furnishing description of rape suspect to newspaper, which description did not match defendant, violated discovery statute since it related to reliability of victim, a crucial state witness, and was exculpatory in material, but did not prejudice defendant so as to deny him a fair trial when reports were produced during trial and admitted in evidence, officers concerned testified and were subject to cross-examination with respect to the description which had been obtained from victim, and victim testified and could have been cross-examined with use of reports to test certainty of her identification, but defense counsel chose not to do so. Neither did trial judge abuse discretion in denying motion for mistrial on ground that late disclosure was a violation of the due process clauses of the Fifth and Fourteenth Amendments as declared in *Brady v Maryland (1963)* 373 US 83, 10 L Ed 2d 215, 83 S Ct 1194, since the case did not involve information discovered only after conviction, as in *Brady*, but evidence which became available to defense during trial and which, for the same reasons as stated above, did not result in such prejudice to defendant as to deny him a fair trial. *State v Smith (1983, La)* 430 So 2d 31.

In prosecution for rape and armed robbery, wherein defense counsel made specific request for information in victim's statement, trial judge did not err in refusing to order state to provide defendant with copy of statement, where judge examined statement and found that evidence was inculpatory rather than exculpatory. *State v Meriwether (1982, La)* 412 So 2d 558.

See *State v Henderson (1978, La)* 362 So 2d 1358, § 16[a].

Although demonstration that state intended to use information concerning past jury experience and that such information was inaccessible to defendant would constitute showing that information was necessary to prevent undue prejudice to defendant's case, hardship, or injustice, such claim would be premature where voir dire has not yet been conducted. *State v Holmes (1977, La)* 347 So 2d 221.

Criminal defendant has right to discover state's evidence in cases where failure to disclose such evidence might seriously handicap defense. *State v Johnson (La)* 333 So 2d 223.

See *State v Melton (La)* 296 So 2d 280, § 9[d].

Where defendant had been furnished with copies of all written and oral confessions made by him and state agreed to turn over any exculpatory statements or evidence in its files, defendant was not entitled to remainder of state's files, including inculpatory statements of codefendants and other inculpatory evidence. *State v Thomas (La)* 290 So 2d 317.

Motions for production of exculpatory evidence were properly denied where state claimed it had no evidence in its possession favorable to defendants. *State v Baker (La)* 288 So 2d 52.

See *State v Barnard (La)* 287 So 2d 770, § 9[c].

Refusal of presiding judge to impose any sanction upon prosecutor for failing, in violation of new "automatic" discovery rule, to provide defendant with statement describing evidence to be used at trial which had been obtained through search of defendant was not error where circumstances of seizure effectively forewarned defendant that evidence related to marijuana charge would be introduced at trial and where defendant was not prejudiced by failure of prosecutor to comply with discovery rule. *State v Bishop (1978, Me)* 392 A2d 20.

Following extortion convictions, trial court properly refused to inspect all prosecution files and notes related to case where undisclosed evidence did not include perjured testimony which was known to prosecution or specific material evidence that might have affected outcome of case. *Bing Fa Yuen v State (1979)* 43 Md App 109, 403 A2d 819, cert den (US) 62 L Ed 2d 759, 100 S Ct 1024.

It was not improper to fail to furnish to defendant pretrial statements of witness where defendant failed to establish that suppressed material was favorable and where very phrasing of issue evidenced that he desired only to rummage for something helpful on cross-examination. *Green v State, 25 Md App* 679, 337 A2d 729.

Evidence favorable to defendant sought via discovery motion must be material to either guilt or punishment of accused, and burden is on accused to show that information he seeks may be material to preparation of his defense or that state actually suppressed evidence favorable to him. *Alston v State, 11 Md App* 624, 276 A2d 225.

Trial court's denial of defendant's pretrial discovery request did not absolve the Commonwealth of its obligation to disclose specific materials requested; Commonwealth had a continuing duty to review the materials specifically requested by the defendant and to disclose any favorable evidence found in those materials. *Com. v. Daniels, 445 Mass.* 392, 837 N.E.2d 683 (2005).

In prosecution for receiving or concealing stolen property, disclosure of location of secret vehicle identification number was properly suppressed where defendant did not show actual materiality of disclosure to defense and where in camera hearing disclosed that location was not material to defense raised. *People v Brown (1983)* 126 Mich App 282, 336 NW2d 908.

It was error to fail to advise defense counsel of fact that billfold which did not belong to victim or defendant was found in pocket of victim's car where defendant had filed appropriate motions to require district attorney to produce any and all evidence of every kind which might be exculpatory or assist defense in preparation of case. *McNeil v State (Miss)* 308 So 2d 236.

Defendant charged with illegal sale of stimulant drug was not denied fair trial by reason of overruling of his motions to inspect police reports of pre-arrest surveillance and arrest, and to produce any and all evidence favorable to him, where defendant did not specify any particular fact, document, report, or paper the withholding of which violated his rights, and where there was no showing that any report in hands of state was of such nature that without it defendant's trial was fundamentally unfair, no showing that any documents in hands of police would have impeached testimony of any state witness, and no showing of probable materiality of any paper in hands of prosecution. *State v Yates (Mo)* 442 SW2d 21.

See *State v Charity (1982, Mo App)* 637 SW2d 319, § 16[a].

Failure of prosecution to reveal previous statement given to investigator by victim was not prejudicial where defendant had access to court files and affidavit for warrant based on statement and where it was not sufficiently material to have

given him significant chance to create reasonable doubt in jurors' minds. *State v Richards*, 193 Neb 345, 227 NW2d 18.

See *State v Reichel*, 184 Neb 194, 165 NW2d 743 (citing annotation), § 7.

Defendant was not denied fair trial by prosecution's failure to disclose to him that murder victim was codefendant of one of prosecution's witnesses in pending robbery charge, where alleged materiality of this information was very tenuous, as was defendant's proposed use of it. *State v Whitehead* (1979) 80 NJ 343, 403 A2d 884.

Where certain representations had been made to prosecution witnesses as to favorable or sympathetic treatment in their criminal problems and promises clearly possessed capacity to have affected jury's evaluation of credibility of witnesses, state had obligation to disclose such material evidence, even absent inquiry. *State v Carter*, 69 NJ 420, 354 A2d 627.

In prosecution for conspiracy to commit robbery and armed robbery, trial court did not err in refusing to exclude from evidence letter threatening prosecution's primary witness, notwithstanding that prosecutor failed to furnish letter to defendant during pretrial discovery, since letter did not constitute information material and favorable to defendant's cause. *State v Phillips* (1979) 166 NJ Super 153, 399 A2d 315.

Where defense was based on excessive use of force by arresting officer and defendant had shown two prior instances of officers' alleged misconduct, court should have, at defendant's request, conducted in camera inspection of records of internal affairs investigations concerning allegations of excessive use of force to determine whether files, whether or not confidential, contained evidence material to defense. *State v Pohl* (App) 89 NM 523, 554 P2d 984.

There is no right to discovery by a defendant in criminal proceedings under New Mexico statutes or rules, although discovery is accorded where to deny it would deprive defendant of a constitutional right; however, where there was no showing nor claim of deprivation of a constitutional right, or of a particularized need, trial court did not err in refusing to inspect prosecutor's file to determine whether state had complied with defendant's request for any exculpatory material therein. *State v Turner* (App) 81 NM 571, 469 P2d 720.

Alleged Brady violation resulting from prosecutor's failure to turn over exculpatory evidence before defendant's trial for criminal possession of weapon in third degree did not require reversal, where defense counsel knew about allegedly exculpatory evidence during trial and was given meaningful opportunity to use it. McKinney's Penal Law § 265.02(1). *People v. Barney*, 743 N.Y.S.2d 793 (App. Div. 4th Dep't 2002).

See *People v Amidon* (1980) 102 Misc 2d 850, 427 NYS2d 727, § 22[a].

Where one of three misdemeanors with which defendant was charged was dropped after preliminary hearing and where minutes of hearing were irretrievably lost, although defendant, after timely request, was entitled to have minutes of proceeding transcribed for later use, reconstruction of preliminary hearing would suffice since this right was grounded on fairness doctrine rather than constitutional mandate. *People v Hicks*, 85 Misc 2d 649, 381 NYS2d 794.

See *People v Player*, 80 Misc 2d 177, 362 NYS2d 773, § 11[m].

Defendants in murder prosecution were entitled to pre-trial disclosure of all evidence probative of theory that different individual was killer, subject to in camera examination by court to separate exculpatory evidence from that which was exempt from discovery under state rules of criminal procedure. *People v Bottom*, 76 Misc 2d 525, 351 NYS2d 328.

See *People v Johnson*, 68 Misc 2d 708, 327 NYS2d 690, § 22[a].

Court has inherent power to direct discovery and inspection in criminal cases and each case must rest upon its own particulars and discovery should be allowed only where injustice may result should relief be denied. *People v Nassar*,

60 Misc 2d 27, 301 NYS2d 678.

Power to compel discovery of particulars in pretrial stage of criminal cause should not be exercised simply because study of evidence will help defendant prepare his defense, although if defendant could be substantially prejudiced by failure to particularize, disclosure should be made regardless of impact on prosecution. *People v Matera*, 52 Misc 2d 674, 276 NYS2d 776.

Trial court did not err in denial of discovery motion for inter-office memoranda of Department of Social Services in prosecution of defendant for larceny and violation of Social Services Law where documents did not constitute exculpatory material necessary to preparation of defense. *People v Prim*, 40 NY2d 946, 390 NYS2d 407, 358 NE2d 1033.

See *People v Clark* (1982, 4th Dept) 89 App Div 2d 820, 453 NYS2d 525, cert den (US) 74 L Ed 2d 937, 103 S Ct 577, § 9[c].

See *State v Hilling* (ND) 219 NW2d 164, § 17.

See *Stevenson v State* (Okla Crim) 486 P2d 646, cert den 404 US 1040, 30 L Ed 2d 733, 92 S Ct 724, § 17.

See *State v Koennecke* (Or) 545 P2d 127 (citing annotation), § 25[b].

Denial of motion to produce report of polygraph examiner who examined robbery and kidnapping victim, sought by defendant to assist in cross-examination and possible impeachment of victim, did not amount to Brady violation, in absence of showing of at least a belief and contention in good faith that report was favorable to him and material to his guilt or innocence. *State v Bodenschatz* (1983) 62 Or App 606, 662 P2d 1, petition den 295 Or 446, 668 P2d 382.

See *State v Peters* (1979) 39 Or App 109, 591 P2d 761, § 11.

See *State v Goodson* (1981, SC) 277 SE2d 602, § 23.

See *Marshall v State* (1980, SD) 305 NW2d 838, § 21[a].

Defendant's discovery in criminal cases should ordinarily be confined to relevant, tangible or written evidential matters, and should be denied whenever (1) there is danger or likelihood of witnesses being coerced, intimidated, or bribed; (2) state may be unduly hampered in its investigation, preparation, and trial of defendant's case or of other related criminal cases; or (3) other evil or danger to public interest may result from inspection or disclosure. *State v Wade* (SD) 159 NW2d 396.

In prosecution for willful injury of another by explosives, written statement by witness which included information that plaintiffs possessed dynamite and blasting caps was not favorable to defendants, and thus was not required to be produced by prosecution in pretrial discovery. *Lackey v State* (1978, Tenn Crim) 578 SW2d 101.

See *Boles v State* (1980, Tex Crim) 598 SW2d 274, § 22[b].

See *Jackson v State* (Tex Crim) 501 SW2d 660, § 11[m].

See *Bell v State* (Tex Crim) 442 SW2d 716, § 7.

See *Rigsby v State* (1983, Tex App Houston (14th Dist)) 654 SW2d 737, § 3.

See *Epperson v State* (1983, Tex App Tyler) 650 SW2d 110, § 17.

In prosecution for assault with deadly weapon, request for statement of each witness called by state and any other police statements prepared in connection with case was properly denied where defense counsel failed to establish materiality of statements of witnesses. *State v Dowell*, 30 Utah 2d 323, 517 P2d 1016, cert den and app dismd 417 US 962, 41 L Ed 2d 1135, 94 S Ct 3164.

See *State ex rel Lynch v County Court, Branch III* (1978) 82 Wis 2d 454, 262 NW2d 773, § 9[a].

It was not error for prosecutor to conclude that duty to disclose upon demand did not include, on statutory or constitutional grounds, furnishing of exculpatory material not in exclusive possession of state where such material consisted of police summaries containing statements made by two sons and niece of defendant, sons living with defendant and niece being frequent visitor to defendant's home and all being present at preliminary hearing. *State v Calhoun*, 67 Wis 2d 204, 226 NW2d 504.

In rape prosecution, reversal in interest of justice was required where copy of complainant's statement furnished to defendant was neither complete nor accurate, where prosecution failed to produce evidence as to fingerprints taken from complainant's bicycle, and where, although defense counsel had been assured he had been furnished all lab reports, he had not been given results of tests of pubic hairs found on complainant's body and clothing, which tests showed that hairs were not defendant's. *State v Stanislawski*, 62 Wis 2d 730, 216 NW2d 8.

[\*9] Inspection at particular stages of proceedings

[\*9a] At preliminary hearing

In some cases wherein the accused requested the production of certain evidence in the possession of the prosecution for the purpose of inspecting it at or in connection with the preliminary hearing, the court treated the motion without giving any particular consideration to such fact. See *State v Colvin* (1957) 81 Ariz 388, 307 P2d 98, supra § 7; *State ex rel. McLetchie v Laconia Dist. Court* (1964, NH) 205 A2d 534, supra § 8; *Melchor v State* (1965, Okla Crim) 404 P2d 63, supra § 3.

And the defendant's contention that she was denied due process of law at the time of the preliminary hearing because her motion for production of certain incriminating tape recordings in the possession of the prosecution, which motion was made prior to the preliminary hearing, was not granted until such hearing was concluded, was rejected in *People v Aadland* (1961) 193 Cal App 2d 584, 14 Cal Rptr 462, supra § 4[a].

<>

Denial of defendant's pretrial motion for disclosure of grand jury testimony was proper where there was no demonstration of any "particularized need" to examine testimony at that time. *United States v Thompson* (CA9 Cal) 493 F2d 305, cert den 419 US 834, 42 L Ed 2d 60, 95 S Ct 60 and cert den 419 US 834, 42 L Ed 2d 60, 95 S Ct 60.

Defendant in criminal proceeding, in exercise of discretion by magistrate, was entitled to reasonable, limited pretrial discovery prior to preliminary examination. *Holman v Superior Court of Monterey County* (1981) 29 Cal 3d 480, 174 Cal Rptr 506, 629 P2d 14.

See *People v Kingsley* (Colo) 530 P2d 501, infra § 11[m].

See *Watson v State* (1978) 147 Ga App 847, 250 SE2d 540, § 17.

Although defendant in reckless homicide prosecution was entitled to pretrial disclosure of report prepared by mechanic who examined defendant's car, state's failure to make such disclosure was not reversible error where report was furnished to defense counsel during his cross-examination of mechanic, where report was cumulative of other testimony, where witness' name was provided to defendant prior to trial, and where defendant was furnished before trial with officer's report containing summary of mechanic's report. *People v Griffith (1978) 56 Ill App 3d 747, 14 Ill Dec 393, 372 NE2d 404.*

Exclusion of officer's description of burglar seen leaping from roof to roof, rather than dismissal of criminal charges, was proper sanction for any negligence by prosecutor in failing to preserve from routine police destruction broadcast description of suspect at time of observation. *State v Tunstall (1982) 8 Kan App 2d 76, 651 P2d 19.*

Pre-trial discovery is limited; state is not required to produce physical evidence it intends to use at trial, with exception of right of defendant to view and copy his written confession, to obtain production of taped confession, to obtain some of confiscated narcotic evidence in narcotic prosecution and weapon used by alleged victim against defendant supporting claim of self-defense; hence, court's denial of defense request that state produce any weapons and all items of physical evidence or tangible property which it intended to offer into evidence was proper. *State v Collins (La) 308 So 2d 263.*

Accused was not entitled to pretrial discovery of prosecution evidence and could not, upon motion to suppress, circumvent rule by questions seeking to determine results of tests performed upon clothing and other objects taken from accused. *State v Square, 257 La 743, 244 So 2d 200.*

Defendant was not entitled to copies of all witness' statements at preliminary hearing stage. *State v Howell (Mo) 524 SW2d 11.*

When witness called to testify by state in preliminary examination has made prior written statement concerning matter about which he is called to testify, accused is entitled to order directing prosecution to produce for inspection all statements or reports of such witness in its possession touching events about which witness will testify. *State v Mascarenas, 80 NM 537, 458 P2d 789 (citing annotation).*

See *People v Clow (1978) 62 App Div 2d 880, 406 NYS2d 598, § 16[a].*

Defendant was entitled to inspect copy of transcription of her recorded confession at time of pretrial hearing conducted to determine voluntariness of such confession. *People v Bach, 33 App Div 2d 560, 305 NYS2d 677.*

See *State v Lake (1982) 305 NC 143, 286 SE2d 541, § 16[c].*

Defendants' constitutional rights were not violated by refusal of the trial court to comply with pre-trial discovery motions for disclosure of statements made by witnesses or prospective witnesses of state to anyone acting on behalf of state where such material was disclosed to defendants at trial in form of corroborative testimony of state police officer, where counsel for defendants were permitted to see notes transcribed at interrogation from which officer testified, and where there was no showing that there was suppression of any evidence material or favorable to either defendant. *State v Abernathy (1978) 295 NC 147, 244 SE2d 373.*

See *State v Tate (1982) 58 NC App 494, 294 SE2d 16, app dismd, petition den (NC) 295 SE2d 763 and affd 307 NC 464, 298 SE2d 386, § 17.*

Where defendant moved for full discovery prior to preliminary examination, motion was premature and although defendant was properly furnished conviction record of witnesses expected to be called to testify at preliminary hearing,

state was not required to disclose information tending to exculpate defendant or mitigate his punishment in the event of conviction at preliminary examination stage. *Stafford v District Court of Oklahoma County* (1979, *Okla Crim*) 595 P2d 797.

Court did not err in failing to require pretrial inspection of medical report of examination of prosecutrix in rape case, at preliminary hearing stage, where such report was made available to accused before trial, and neither state nor accused sought to offer testimony of physician at trial. *Shapard v State* (*Okla Crim*) 437 P2d 565.

See *Commonwealth v Dalahan* (1979, *Pa Super*) 396 A2d 1340, § 16[a].

Trial judge would be restrained from taking any action to enforce his order directing agent of state criminal investigation division to deliver all records, statements taken, police reports, photographs and any other materials to attorney for defendant charged with assault with dangerous weapon where such order was made prior to preliminary hearing; unwarranted delay in prompt determination of probable cause could result if discovery procedures were routinely carried out at preliminary hearing stage of proceedings. *Janklow v Erickson* (*SD*) 233 NW2d 809.

Defendant was not entitled to names and addresses of all of state's witnesses prior to time defendant was bound over for trial. *Janklow v Talbott* (*SD*) 231 NW2d 837.

Although defendants in narcotics prosecution were entitled to disclosure of exculpatory material, trial court erred in permitting generalized inspection of prosecution's files by defense at preliminary examination stage of proceedings. *State ex rel Lynch v County Court, Branch III* (1978) 82 Wis 2d 454, 262 NW2d 773.

[\*9b] During trial, generally

While in many cases wherein the defendant's request for inspection of the prosecution's evidence was made during the trial, the court treated the request the same as ordinary pretrial motions for inspection,<sup>n86</sup> the fact that the defendant's request for inspection was made during the trial while the evidence in question was in court was given particular consideration in some cases in granting an inspection

The view that the defendant in a criminal case can compel production of the prosecution's evidence when it becomes clear during the course of a trial that the prosecution has in its possession relevant and material evidence which is not confidential was also taken in some earlier California cases. See, for example, *People v Riser* (1956) 47 Cal 2d 566, 305 P2d 1, cert den 353 US 930, 1 L ed 2d 724, 77 S Ct 721, app dismd 358 US 646, 3 L ed 2d 568, 79 S Ct 537 (disapproved on another ground *People v Chapman* (1959) 52 Cal 2d 95, 338 P2d 428, and also disapproved on other grounds *People v Morse* (1964) 60 Cal 2d 631, 36 Cal Rptr 201, 388 P2d 33); *People v Carter* (1957) 48 Cal 2d 737, 312 P2d 665. It should be noted, however, that in later California cases the court has taken the view that the accused's right to inspection of the prosecution's evidence before trial is generally the same as his right to inspection during a trial. See, for example, *People v Chapman* (1959) 52 Cal 2d 95, 338 P2d 428; *Funk v Superior Court of Los Angeles County* (1959) 52 Cal 2d 423, 340 P2d 593; *People v Norman* (1960) 177 Cal App 2d 59, 1 Cal Rptr 699, cert den 364 US 820, 5 L ed 2d 51, 81 S Ct 56; *People v Morris* (1964) 226 Cal App 2d 12, 37 Cal Rptr 741.

Thus, stating that, as a general proposition, where the prosecution has a document in court during the course of the trial which the accused thinks is relevant and material to his defense, the accused should not be denied the right at least to examine it in order to see what use he may make of it, the court in *Arthur v Commonwealth* (1957, Ky) 307 SW2d 182, held it error to deny during the trial the defendant's request for the production of a written statement previously made by him which was then in the possession of the prosecuting attorney. The court said that the situation and conditions in the present case were quite different from where a demand was made for the pretrial disclosure of the evidence in the possession of the prosecution.

See also *People v Marshall* (1958) 5 App Div 2d 352, 172 NYS2d 237, affd 6 NY2d 823, 188 NYS2d 213, 159 NE2d 698, wherein the court, in rejecting the defendant's contention that the trial court should have required the state police to produce for his inspection their files, reports, and statements in the case, recognized that "if a party has in court material which would itself be competent for admission as an exhibit in evidence if relevant, he may be required to produce it."

And see *Cloniger v State* (1921) 91 Tex Crim 143, 237 SW 288, infra § 15[a], permitting inspection of the defendant's letters which had been brought to court in response to a subpoena duces tecum.

<>

Court's refusal during trial for rape to allow defense counsel to inspect investigator's notes as to conversations with rebuttal alibi witnesses, did not require reversal, where defense could have but didn't inspect notes prior to trial, defense had spoken with all but one of nine rebuttal witnesses, counsel cross-examined them effectively, and investigator's notes would have added little, if anything, to defense counsel's information or effectiveness. *People v Thatcher* (1981, Colo) 638 P2d 760.

See *People v Angelini* (1982, Colo App) 649 P2d 341, later app (Colo App) 706 P2d 2, § 16[b].

In prosecution for larceny in the first degree, defendant was not prejudiced by tardy disclosure of letters written by one of state's witnesses to town chief of police and to governor, where tardy disclosure was not deliberate, prosecutor made letters known as soon as he discovered them in police file, defendant chose not to avail herself of opportunity to recall witness for further cross-examination regarding contents of letters, and prosecutor who had requested police to furnish any notes or records of interviews appeared to have done all that was reasonably possible to obtain oral statements given to police by another witness. *State v Carrione* (1982) 188 Conn 681, 453 A2d 1137, cert den (US) 76 L Ed 2d 347, 103 S Ct 1775.

See *Carver v State*, 137 Ga App 240, 223 SE2d 275, § 25[a].

See *People v Ferguson* (1981) 102 Ill App 3d 702, 57 Ill Dec 958, 429 NE2d 1321, cert den (US) 74 L Ed 2d 133, 103 S Ct 159, § 13[b].

Modification of rule governing disclosure of statements by prosecution witnesses, first sentence of which was amended to begin with words "Before witness called by the Commonwealth testifies," rather than "After a witness called by the Commonwealth has testified," would be construed to mean that if Commonwealth intends to use witness and defense seeks access to his recorded statements, it is within trial court's sound discretion whether to allow disclosure prior to trial rather than, as technical matter, waiting until witness is "called" by bailiff to testify, thus avoiding necessity for interrupting trial to permit reasonable opportunity for inspection of such statements. *Wright v Commonwealth* (1982, Ky) 637 SW2d 635.

In perjury prosecution against three employees of Department of Elections and Registration based on testimony given before grand jury investigating allegations of prohibited political activities by Civil Service employees, defendants had right to pretrial discovery of their secretly recorded conversations with whistle-blowing coworker, but prosecution was under no pretrial duty to assemble at trial location eight tapes deposited in various law enforcement offices statewide where defendants were provided transcripts. *State v Hennigan* (1981, La) 404 So 2d 222.

See *Commonwealth v Lapka* (1982) 13 Mass App 24, 429 NE2d 1029, app den 385 Mass 1103, 440 NE2d 1174, § 13[d].

Furnishing discovery of photographic line-up in burglary prosecution three days prior to trial did not constitute

"egregious" prosecutorial conduct. *State v Carter* (1982) 185 NJ Super 576, 449 A2d 1362.

Irrespective of exact point at which New Jersey rule authorizes discovery of information held by prosecutor and by coordinator of pretrial intervention program, trial court has inherent power to order disclosure of such material if necessary and appropriate to instant case. *State v Barath* (1979) 169 NJ Super 181, 404 A2d 373, § 21[a].

See *People v Dee*, 44 App Div 2d 721, 355 NYS2d 13, § 25[c].

Since motion to require prosecuting attorney to permit defendant to examine certain exhibits was made after trial was in progress, it was matter for court's sound discretion, and overruling motion was not error where record revealed that defendant was afforded inspection of such exhibits before they were presented at trial. *State v McClellan*, 6 Ohio App 2d 155, 35 Ohio Ops 2d 315, 217 NE2d 230, cert den 386 US 1022, 18 L Ed 2d 462, 87 S Ct 1380.

See *Romero v State* (1982, Tex App 13th Dist) 636 SW2d 782, § 16[a].

Court did not abuse discretion in overruling motion to discover tire tool allegedly involved in difficulties between defendant and murder victim, which was filed on day of trial, and renewed orally at close of evidence, where officer who knew about tire tool was available during trial as witness but not called, and evidence on trial of merits revealed nothing pertaining to use of tire tool at time of shooting. *Moody v State* (Tex Crim) 413 SW2d 109.

See *State v Helmick* (1982, W Va) 286 SE2d 245, § 17.

[\*9c] When requested item is offered in evidence, marked for identification, or used by prosecution during trial

The rule that the defendant is entitled to inspection of a writing or object in the possession of the prosecution when such item is offered in evidence at the trial of the case is well established.<sup>n87</sup> And in at least one case the court evidently took the view that where portions of the contents of a writing are offered in evidence the defendant is entitled to inspect the remaining portions.<sup>n88</sup>

As to whether and under what circumstances the defendant is entitled to inspection of a statement in the possession of the prosecution where the writing itself is not offered in evidence but a witness has testified to its contents or in relation thereto, the decisions are not altogether in agreement. In some cases the fact that a witness had testified to the contents of a statement was evidently taken into consideration by the court in permitting the defendant to inspect the statement.<sup>n89</sup> In other cases, however, the court apparently took the view that the mere fact that a witness has testified to the contents of a statement in the possession of the prosecution or that he has refreshed his recollection from it does not necessarily entitle the defendant to inspection of the statement.<sup>n90</sup> And in one case wherein a prosecution witness testified to the circumstances under which the defendant had made an oral confession, it was held that such fact did not warrant an order requiring the production of a written confession made by the defendant subsequently to the oral confession.<sup>n91</sup>

Where evidence in the possession of the prosecution was marked for identification in court, but not offered in evidence, the court in at least one case held that the defense was not entitled to inspection of the evidence.<sup>n92</sup> In another case, however, a contrary conclusion was reached.<sup>n93</sup>

As to whether and under what circumstances the defense has the right to inspect a document or paper in the possession of the prosecution where such document or paper is used by the prosecuting attorney during the trial in his examination of the accused or a witness, the decisions are not altogether clear.<sup>n94</sup> In a number of cases a document or paper used by the prosecuting attorney during the trial in his examination of the accused or a witness has been held producible for inspection by the defense, at least in view of the particular facts presented in the case, whether the item in question was a confession or statement of the defendant,<sup>n95</sup> or a statement of a defense witness,<sup>n96</sup> or an FBI record of alleged

prior convictions of the defendant,<sup>n97</sup> or a photograph of the victim of the alleged homicide.<sup>n98</sup> And in some cases it is also held that before a document or paper is to be used by the prosecuting attorney in his examination of the defendant or a witness, such document or paper should be produced for inspection by defense counsel.<sup>n99</sup> In other cases, however, the court denied the defense's right to inspection of a writing although it had been used by the prosecuting attorney in his examination of the accused or a witness.<sup>n100</sup> And in one case wherein the prosecuting attorney handed to a witness a state's exhibit which had been marked for identification and asked him to identify it, it was held not error to refuse to permit defense counsel to see the exhibit before it was handed to the witness for identification.<sup>n101</sup> Finally, the view taken in earlier California cases<sup>n102</sup> appears to be that even where a statement allegedly made by the defendant or a defense witness is to be used or has been used by the prosecution in its examination of the defendant or any witness, the defense has no right to inspect the statement where it was not signed or approved by the defendant or witness who allegedly made it.<sup>n103</sup>

<

At time police officer testifies in case defendant has right to examine notes and reports of officer in regard to matters about which he has testified. *State ex rel. Corbin v Superior Court of Maricopa County*, 99 Ariz 382, 409 P2d 547 (dictum).

Pre-trial motion for inspection and examination of pistol and cartridge allegedly used in murder was properly denied where defendant could have had them examined by experts of his own choosing after gun and slug were introduced in evidence and where items sought were not shown to be evidence favorable to accused. *State v Barnard (La)* 287 So 2d 770.

There was no deprivation of fair trial to murder and conspiracy defendants by alleged late disclosure of exculpatory evidence during prosecution's direct case, since due process fair trial standard does not direct disclosure at any particular stage of proceedings, defense had sufficient time to utilize material and there was no indication earlier disclosure would have substantially affected nature of evidence or altered defendants' trial strategy, and defendants failed to request mistrial or adjournment based on late disclosure of evidence. *People v Clark (1982, 4th Dept)* 89 App Div 2d 820, 453 NYS2d 525, cert den (US) 74 L Ed 2d 937, 103 S Ct 577.

Inspection of police officer's report was not required under "use before the jury rule" where existence of report was brought out by examination of officer by defendant's counsel and not by any State action. *Haywood v State (Tex Crim)* 507 SW2d 756.

Police officer's report was not subject to inspection under "use before the jury rule" where officer witness did not have his attention directed to report itself, it was not exhibited or read aloud to him, there was no reference in record to indicate to jury it was being used as basis for interrogation and, although it was taken from file in jury's presence, this was not done in such manner that its contents became an issue. *Howard v State (Tex Crim)* 505 SW2d 306.

[\*9d] After verdict is returned

The defendant's motion after the entry of a judgment of conviction for inspection of certain documents in the possession of the prosecution was granted in *People v McElroy (1955)* 285 App Div 846, 136 NYS2d 693, wherein it appeared that the defendant appealed from a judgment convicting him of murder in the second degree under an indictment charging murder in the first degree; that after conviction the defendant made public admissions in open court of facts which would indicate that he had committed murder in the first degree; that his counsel thereupon, meeting the problem that if he successfully prosecuted the appeal and a new trial was ordered, the statements volunteered by the defendant on a new trial was ordered, the statements admissions by him on a subsequent trial, made the present motion for inspection of the psychiatric studies of the defendant made for the district attorney during the pendency of the first trial and of the

similar studies made by the department of correction after the defendant was in prison. Pointing out that if the defendant was sane when the admissions in question were made in court his interests might be served by discontinuing the appeal, the court said that the power to allow the inspection sought was inherent in the court in aid of a determination of whether it was in the interest of the defendant to continue or withdraw the appeal.

In other cases, however, the court denied or dismissed under the circumstances the defendant's motion or application for inspection of certain evidence in the possession of the prosecution where the motion was made after a verdict was returned.

The denial of the defendant's motion, made after a verdict was returned, for production of documents in the possession of the prosecution was upheld in *People v Norman* (1960) 177 Cal App 2d 59, 1 Cal Rptr 699, cert den 364 US 820, 5 L ed 2d 51, 81 S Ct 56, notwithstanding the defendant's argument that such denial had precluded him from developing legal grounds in support of a motion for a new trial. Pointing out that during the course of the trial the defendant was well aware of the existence of documents in the possession of the prosecution which might be relevant and material to the defense, but took no action to compel inspection or production of them, and that no reason appeared from the record, and none was suggested, for not having made a motion for production during the course of the trial, the court concluded that the defendant had waived any right to compel production of the documents; that his motion, made long after the verdict was returned, was not timely; and that there was no denial of due process. The court said that a defendant may not gamble on a favorable verdict and take advantage of his want of diligence in the event it is unfavorable.

In *Curran v Craven* (1956) 36 Del Ch 71, 125 A2d 375, supra § 5[b], a postconviction application for permission to inspect a certain psychiatric report was denied on the ground that the Delaware Court of Chancery, in which the application was made, had no jurisdiction to grant the prayers of the application.

In *People ex rel. Reed v Hogan* (1945) 269 App Div 802, 55 NYS2d 71, wherein it appeared that after being convicted of a crime, the petitioner applied for an order in the nature of mandamus, under the New York Civil Practice Act, to compel the district attorney to deliver to him a copy of certain exhibits used on his trial, the court, upholding the denial of the application, said that there was no duty on the part of the district attorney to furnish the copies sought.

Where a petition for the production of photostatic copies of entries made in the desk book, day book, and radio log book of a certain police department was filed after the petitioner had been convicted and sentenced, the court in *Commonwealth v Barclay* (1957, Pa) 47 Del Co 203, dismissed the petition on the ground, inter alia, that the evidence upon which the defendant had been convicted was already of record and that the petitioner had access to the complete record.

See also *Commonwealth ex rel. Balles v Weber* (1945, Pa) 66 Montg Co LR 256, where a petition by a prisoner in a state penitentiary for a writ of mandamus to compel the district attorney of a certain county to furnish certain information to the trial judges of a Federal District Court in which he had instituted proceedings seeking his discharge from imprisonment was denied on the ground, among other things, that the prisoner had ample opportunity to subpoena any records of the state court he thought necessary to his case.

<>

Petition for writ of mandamus by prisoner seeking his prosecutorial case file from state's attorney was properly denied, even though his case was not active at time petition was filed, where case became active when writ of habeas corpus was granted, thus giving prisoner avenues of direct appeal. Contents of file were to remain secret until conclusion of appeal. *Tal-Mason v. Satz*, 614 So. 2d 1134 (Fla. Dist. Ct. App. 4th Dist. 1993).

Postconviction defendant was entitled to examine results of polygraph tests administered to accomplice to determine if they indicated that accomplice passed polygraph exam, as represented at trial court and before clemency board; results were not exempt from disclosure under Public Records Act provision exempting criminal intelligence information and criminal investigation information, as results were no long "active" criminal investigation information, and, inasmuch as state had twice publicly disclosed results to its advantage, there was no further purpose to be served by preventing disclosure. *Downs v. Austin*, 522 So. 2d 931 (Fla. Dist. Ct. App. 1st Dist. 1988).

Defendant convicted of rape had no entitlement to discovery regarding identity and testimony of witness at sentencing hearing who testified to other offenses which did not result in conviction. *People v Siefke* (1981) 97 Ill App 3d 14, 52 Ill Dec 208, 421 NE2d 1071.

Where felon was charged with possession of handgun, and his testimony regarding circumstances of arrest differed dramatically from that offered by police, and where defense was wrongfully denied subpoena duces tecum before trial to discover radio communications involving five police vehicles from two jurisdictions, materiality and relevancy of evidence was established by defendant, and case on appeal was remanded to trial court for determination of (1) whether police radio communications contained information inconsistent with testimony of police officers, or other evidence favorable to accused; and, if so, (2) whether such evidence would be material to defendant's guilt or punishment, employing standard applicable on basis of totality of facts and circumstances of case. *State v Cobb* (1982, La) 419 So 2d 1237.

While prosecution could not suppress evidence favorable to accused without violating his Constitutional right to due process of law, refusal of trial court to sustain post-conviction motion to produce palm print, which did not match that of defendant, did not warrant new trial, where such favorable evidence was brought out at trial and was considered by jury, and where defendant thus had advantage of whatever exculpatory effect such information might have had with jury. *State v Melton* (La) 296 So 2d 280.

See *Hoffman v State* (Tex Crim) 514 SW2d 248, § 11[m].

[\*9e] At new trial

The fact that the defendant's request for inspection of certain evidence in the possession of the prosecution was made at the commencement of a new trial of the case was given particular consideration by the court, in holding that under the circumstances the request for inspection should be granted, in *Mohler v Commonwealth* (1922) 132 Va 713, 111 SE 454, a prosecution for murder, wherein it appeared that there was a previous trial of the case, in which the jury failed to agree, and the defendant's attorney had a stenographic record of the evidence taken on that trial; that prior to the first trial there had been an inquest over the body of the alleged victim and a stenographic record of the evidence taken at that inquest had been made by the prosecuting attorney at his expense; and that at the commencement of the second trial the attorney for the defendant desired to have the transcript made at the coroner's inquest which was in the possession of the prosecuting attorney, while the prosecuting attorney desired to have the report of the evidence taken at the first trial which was in possession of the defendant's attorney, but each refused to furnish the other with the requested document. On appeal from a judgment of conviction on the second trial, the court held: "The witnesses had been examined on several occasions with reference to the accusation, and it is a manifest advantage to an attorney to have a stenographic copy of the testimony previously given so as to elicit all the facts by him deemed pertinent. The opposing attorney should not be denied an equal advantage. Such transcripts of the evidence previously given, when brought into court for use, cease to be strictly private property, and opposing attorneys should then have equal access thereto. This access is so essential in the interest of justice that if the courtesy usually accorded is not sufficient to secure it, and the question is raised during the trial for the first time, then the trial court should exercise all of its powers to that end." The defendant's assignment of error in this connection was held not sustainable, however, because the transcript desired by the defendant's attorney was eventually furnished to him at the suggestion of the trial court.

[\*9f] On Appeal

◇

Refusal to allow defense counsel to inspect alleged work product on appeal, did not deprive defendants of argument that trial court erred when it denied discovery of information in prosecutor's felony review folder and used on cross-examination of defendant. *People v Stevens (1981) 102 Ill App 3d 773, 58 Ill Dec 389, 430 NE2d 331.*

[\*10] Miscellaneous factors affecting right to inspection

[\*10a] Admissibility in evidence

In many cases it has been held or recognized that an accused has no right to inspection or disclosure of a document or article in the possession of the prosecution which is not admissible in evidence.n104

## SOUTH DAKOTA

*State ex rel. Wagner v Circuit Court of Minnehaha County* (1932) 60 SD 115, 244 NW 100, infra § 24[a]

Thus, in *People ex rel. Lemon v Supreme Court of State of New York* (1927) 245 NY 24, 156 NE 84, 52 ALR 200, a proceeding to restrain an order granting the defendant's request for the pretrial production of statements made by an accomplice, the statements and memoranda of the post mortem examination of the victim of the alleged homicide, and all the reports and information made or given to the district attorney with reference to any chemical analysis or examination of the organs or parts of the victim, the court, affirming an order of prohibition, held that the documents in

question were not subject to inspection by the defendant in advance of a trial because they would not have been admissible in evidence. The court concluded that assuming, but without deciding, that there was an inherent power in courts of criminal jurisdiction to compel the discovery of documents in furtherance of justice, the documents to be exhibited must be evidence in support of the cause of action or defense of the party seeking the discovery.

◇

In the following California cases, however, the court has, either explicitly or by necessary implication, taken the view that the failure to show admissibility of evidence is no bar to discovery and inspection by the defense.<sup>n105</sup> *Funk v Superior Court of Los Angeles County* (1959) 52 Cal 2d 423, 340 P2d 593; *People v Cooper* (1960) 53 Cal 2d 755, 3 Cal Rptr 148, 349 P2d 964; *People v Lane* (1961) 56 Cal 2d 773, 16 Cal Rptr 801, 366 P2d 57; *People v Garner* (1961) 57 Cal 2d 135, 18 Cal Rptr 40, 367 P2d 680, cert den 370 US 929, 8 L ed 2d 508, 82 S Ct 1571; *Walker v Superior Court of Mendocino County* (1957) 155 Cal App 2d 134, 317 P2d 130; *McAllister v Superior Court of San Diego County* (1958) 165 Cal App 2d 297, 331 P2d 654; *People v Curry* (1961) 192 Cal App 2d 664, 13 Cal Rptr 596; *Ballard v Superior Court of County of San Diego* (1965, Cal App) 44 Cal Rptr 291.

◇

See *State v Fowler*, 101 Ariz 561, 422 P2d 125, § 4[b].

In criminal prosecution the material sought on discovery need not be admissible evidence since accused is entitled to discover all relevant and material information in possession of prosecution that will assist him in preparation and presentation of his defense; thus, in prosecution for rape and kidnapping, trial court erred in denying defense motion for discovery of prosecutor's notes of interview with rape victim on ground that there was nothing in notes which could be used by defendant to impeach victim as witness. *People v Williams* (1979, 2d Dist) 93 Cal App 3d 40, 155 Cal Rptr 414.

See *In re Valerie E.*, 50 Cal App 3d 213, 123 Cal Rptr 242, § 17.

See *United States v Sedgwick* (1975, Dist Col App) 345 A2d 465, § 4[b].

Trial court did not err in denying defendant's motion for disclosure where only page of police report not disclosed to defendant summarized deceased's account of stabbing incident and such statement could not be admitted at trial for purpose of impeachment. *People v Jenkins* (Ill App) 333 NE2d 497.

Examination of police reports for purposes of cross-examination of complaining witness in attempted rape prosecution was properly denied where reports contained no verbatim statements of complaining witness, defense failed to lay adequate foundation and -- in view of defendant's admissions at trial that he was present in complaining witness' room at time in question -- defendant could not have been substantially prejudiced by denial of his motion for production of reports. *People v Hankins*, 90 Ill App 2d 51, 234 NE2d 104.

See *State v Moore (La)* 344 So 2d 973, § 7.

Test for determining whether suppression of evidence amounts to denial of due process is whether evidence withheld was admissible, useful to the defense, and capable of clearing or tending to clear the accused of guilt. *Ross v Warden, Maryland Penitentiary*, 1 Md App 46, 227 A2d 42.

See *State v Caldwell* (1982, Minn) 322 NW2d 574, § 22[e].

See *State v Lewis* (1982, Mo App) 637 SW2d 421, § 23.

Trial court has discretionary power to direct discovery of items in possession of prosecution that would be admissible in evidence. *People v Bradford*, 54 Misc 2d 54, 281 NYS2d 480.

In prosecution for murder of wife and her boyfriend, it was not error to fail to allow defendant and his counsel to inspect letters allegedly written by boyfriend to wife where contents of letters would have been inadmissible under hearsay rule, where defendant had no knowledge of contents of these letters prior to homicides and thus his state of mind at time could have not been affected thereby, and where state did not attempt to impeach defendant's contention tht his wife and her boyfriend were carrying on illicit romance. *Humphreys v State* (Tenn Crim) 531 SW2d 127.

[\*10b] Age and status of accused

The age and status of the defendant was taken into consideration in upholding an order granting in part his motion for production in *State v Thompson* (1959) 54 Wash 2d 100, 338 P2d 319, a prosecution for murder, wherein the defendant moved for an order requiring the prosecuting attorney to produce certain statements and reports and other evidence in the possession of the prosecution, asserting that inspection of the requested documents and evidence was necessary to the proper preparation for trial of the case and was essential to cross-examination, and the trial court granted the motion as to (1) all statements given by the defendant, (2) all reports of an autopsy performed upon the victim, and (3) any written statements or reports made by the Federal Bureau of Investigation as the result of any examination made of the clothing, personal effects, and blood samples of the defendant and the victim. Following the view that the defendant's right to inspection of evidence in the possession of the prosecution is a matter within the discretion of the trial court, which will not be disturbed on appeal unless there is a manifest abuse of discretion, the Supreme Court of Washington held (four justices dissenting) that there was no abuse of discretion on the part of the trial court in granting the defendant's motion to the extent as limited by its order, in view of the fact that the trial court, in ruling on the motion, took into consideration that the defendant was from a foreign country, was scarcely above juvenile court age, was indigent and without funds to assist in the conduct of his own investigation, and was charged with a capital offense.

The fact that the defendant was a 15-year-old boy charged with murder in the first degree was also taken into consideration in *People v Courtney* (1963) 40 Misc 2d 541, 243 NYS2d 457, wherein the court granted the defendant's pretrial request for inspection of a statement made by him.

<>

Counsel representing armed robber suffering from retrograde amnesia (alcoholic blackout) was granted pretrial discovery of any and all prior written, recorded or oral statements of actual witnesses to alleged crimes (not including statements of police who were non-witnesses), including grand jury transcripts, but court ordered that names, addresses and other identifying characteristics of all witnesses must be redacted to foreclose possibility of retaliation, with orders that discovered materials must be maintained in exclusive possession of attorney for defendant only to be used for exclusive purpose of preparing defense at trial. *People v Johnson* (1982) 115 Misc 2d 366, 454 NYS2d 248.

[\*11] Inspection under criminal statute or rules of criminal procedure106

[\*11a] Arizona

Rule 195 of the Arizona Rules of Criminal Procedure, which came into effect June 1, 1956, provides that upon motion of a defendant at any time after the filing of the indictment or information, the court may order the county attorney to permit the defendant to inspect and copy or photograph designated books, papers, documents, or tangible objects

obtained from or belonging to the defendant or obtained from others by seizure or by process, upon a showing that the items sought may be material to the preparation of his defense and that the request is reasonable.n107

In *State ex rel. Polley v Superior Court of Santa Cruz County (1956) 81 Ariz 127, 302 P2d 263*, it was held that statements taken from the defendant by the county attorney were not subject to inspection under this rule.

<>

Trial court did not err in prosecution for possession of stolen motor vehicle by admitting into evidence certified public record indicating true owner of vehicle, notwithstanding violation of state rules of criminal procedure by failure of prosecution to disclose document to defendant prior to trial, where there was no controversy over ownership and vehicle registration was not vital to either state's case or defense. *State v Alvarado (1979) 121 Ariz 485, 591 P2d 973*.

In prosecution for theft, failure of prosecution to turn over to defendant notes of interview with associate of defendant, where defendant did not know if any exculpatory evidence was revealed at interview, merited dismissal of two counts against defendant; Arizona Rules of Criminal Procedure and U.S. Constitution require disclosure of evidence favorable to defense. *State v Jones (1978) 120 Ariz 556, 587 P2d 742*.

Under discovery rule requiring prosecution to make available to defense all material or information which tended to mitigate or negate defendant's guilt as to offense charged, trial court in prosecution for murder did not err in refusing to order disclosure of police reports and other information regarding disturbances during year 1974 at apartment house where murders occurred and rapsheets on any person or persons involved in such disturbances where suggestion that police reports might disclose that person other than defendant committed homicides was purest speculation. *State v Hatton (1977) 116 Ariz 142, 568 P2d 1040*.

Although results of test-firing should have been made known to defense counsel in prosecution for assault with deadly weapon, question of whether weapon was in working order on date of offense was not directly relevant to guilt of defendant on assault charge. *State v Parker (1977) 116 Ariz 3, 567 P2d 319*.

Statute requiring that all statements of defendant and of any person who would be tried with him should be made available to defendant for examination applied only to recorded or written statements and did not prevent testimony as to oral statement without prior disclosure. *State v Escherivel, 113 Ariz 300, 552 P2d 1194*.

Piecemeal revelation of items required to be disclosed under Criminal Procedure Rule was violation of that rule where, although prosecutor was prompt in making information available to defendant once he became aware of evidence, he should have made greater effort in familiarizing himself with facts of case he was to try. *State v Castaneda, 111 Ariz 264, 528 P2d 608*.

Defendant was not denied due process of law, where defense counsel failed to move for discovery of test results; such scientific results were in fact discoverable. *State v Jones, 110 Ariz 546, 521 P2d 978, cert den 419 US 1004, 42 L Ed 2d 280, 95 S Ct 324*.

Although inherent power of court to order production and inspection is broader than Arizona court rule permitting such inspection, order requiring county attorney to produce in camera for court's inspection "all statements, notes, or any other items or material pertaining to this case," as aid to court in determining what, if any, material in hands of prosecution should be made available to defense, was beyond jurisdiction of Superior Court, since unrestricted foray into state's files and preparations for trial is not permitted. As guide for future, (1) trial judge in sound discretion must determine reasonableness of request for exercise of his inherent power to grant discovery, (2) court may not order production before trial of statements made by prosecuting witness or others (not including accused), (3) defense may

not examine "work product" of law enforcement authorities except upon showing that either (a) authorities have sought to subvert otherwise valid discovery by alleging that material is privileged under work product exclusion, or (b) compelling and exceptional circumstances indicate to court that to deny discovery would materially prejudice defendant in preparation of defense, and (4) although defendant does not have unqualified right to inspect his written statement in hands of prosecutor, court may order production and inspection of any statement made by accused to authorities, if state, on its avowal, is to present statement at trial as evidence in its case-in-chief. *State ex rel. Corbin v Superior Court of Maricopa County*, 103 Ariz 465, 445 P2d 441.

Defendant in murder prosecution was not entitled to pretrial examination of reports of police officers, notwithstanding request was restricted to reports of those officers whom state intended to call as witnesses, such reports being part of work product of prosecution. *State ex rel. Corbin v Superior Court of Maricopa County*, 99 Ariz 382, 409 P2d 547.

Fingerprint card of informant used for comparison with latent prints taken from packet of heroin was not paper, document, photograph, or tangible object which prosecutor would use at trial or which was obtained from or purportedly belonged to defendant and producible under rules nor was it discoverable under rule as tending to mitigate or negate defendant's guilt. *State v Moreno*, 26 Ariz App 178, 547 P2d 30.

Trial court may not, under Arizona rules, order production, before trial, of statements made by prosecuting witness or others, since defendant does not have right to examine such statements until witness has testified; consequently defendant was not entitled, at time of preliminary hearing, to examine statements given by accomplice to police where accomplice did not testify at such hearing. *State v Rendel*, 18 Ariz App 201, 501 P2d 42.

Under Colorado Rules of Criminal Procedure, accused in murder prosecution should have been permitted discovery of names of those whose prints had been compared with palm print on broken bottle and with unidentified prints on cash register, and should also have been allowed to examine photographs of crime scene and to inspect statements which he gave prior to time he testified at trial. *Hervey v People (Colo)* 495 P2d 204.

[\*11b] Delawaren108

Rule 16 of the Delaware Rules of Criminal Procedure, prior to its amendment in 1965,<sup>n109</sup> provided that upon motion of a defendant at any time after the filing of the indictment or information, the court could order the attorney general to permit the defendant to inspect and copy or photograph designated books, papers, documents, tangible objects, confessions, or written statements obtained from or belonging to the defendant or a codefendant or obtained from others by seizure or by process, upon a showing that the items sought might be material to the prosecution of his defense and that the request was reasonable.<sup>n110</sup>

And in *State v Thompson (1957) 50 Del 456, 134 A2d 266*, it was held that then-prevailing Delaware Criminal Rule 16 did not authorize pretrial production of (1) statements of prospective witnesses, written or otherwise recorded, in the possession of the attorney general, (2) police reports made in the course of their criminal investigations, and (3) the results of polygraph tests, blood tests, and fingerprint examinations in the possession of the attorney general. As to the defendants' contention that the court had inherent power to order the discovery even though there was no rule of court specifically authorizing it, the court said that even assuming the existence of such inherent power, there was no sufficient reason for the grant of extraordinary pretrial discovery in the present case, and that it was inadvisable to enlarge existing practice and procedure, which was limited by a specific rule, by the exercise of inherent power on a case-to-case basis.

Approving the decision in *State v Thompson (Del) supra*, the court in *Wisniewski v State (1957, Sup) 51 Del 84, 138 A2d 333*, also upheld the denial of the defendant's pretrial motion, made under Delaware Criminal Rule 16, for permission to inspect statements of a certain prosecution witness.

And the defendant's motion, under then-prevailing Criminal Rule 16, for permission to hear tape recordings made by the police of statements of a codefendant was granted in *State v Minor* (1962, Del) 177 A2d 215, the court pointing out that the rule specifically provides for the inspection of "confessions or written statements obtained from or belonging to the defendant or a codefendant." Stating that the rule applies to recorded confessions or statements no matter how they are recorded, and that since statements may be inspected when they are recorded on paper, the same material may be made available when recorded on tape, the court rejected the prosecution's offer to produce only the written record of such of the tapes as it saw fit to have transcribed. As to the prosecution's suggestion that this type of discovery would permit a defendant to fabricate a defense which is consistent with the codefendant's statement, the court noted that all pretrial discovery carries with it the possibility of misuse of the information obtained, and that such discovery is permitted because the advantages of reasonable and limited pretrial discovery in the administration of justice are deemed to outweigh the possibilities of abuse. Pointing out that in the present case there was no contention by the prosecution that the tape recordings contained scandalous or impertinent matter or that the disclosure of the contents thereof would hamper orderly police procedures or investigations of other crimes, the court said that the items listed in Criminal Rule 16 should be produced when the requirements of the rule are met, unless special circumstances exist.

Thus, in *State v Winsett* (1964, Del) 200 A2d 237, wherein the defendants were charged with murdering a police officer, the defendant's motion, under then-prevailing Criminal Rule 16, for production of the automobile in which the defendants were located at the time of the death of the victim and the weapon which was allegedly used in the commission of the offense was granted. Pointing out that both the automobile and the alleged death weapon were tangible objects apparently obtained from or belonging to one or some of the defendants, and were clearly material to the defense, and that the requests were reasonable, the court concluded that such items came within the specific language of the criminal rule relied upon. The court in this case also granted the defendants' motion, under the same rule, for production of (1) the weapon possessed by the victim at the time of his death, (2) the weapon in the possession of a fellow officer who was with the victim at the time of his death, and (3) shells and spent shells for each weapon, on the ground that these items were obtained by "seizure" within the meaning of the rule authorizing the production of tangible objects "obtained from others by seizure." Making a distinction between information arising out of the analytical or investigative phase of police effort, that is, the work product of detection (including such items as the results of polygraph tests, blood tests, and fingerprint examinations) and the mere gathering or collection of tangibles which could be done by anyone physically present at a given time and place, and pointing out that in the present case the defendants sought to discover tangible objects which came into possession of the police during examinations of persons, places, or things, the court concluded that the word "seizure" as used in Criminal Rule 16 should be construed in its dictionary meaning and not in a technical or legal sense, and that tangible objects, therefore, may be regarded as having been obtained by "seizure" within the meaning of the rule if they are in the possession of the prosecution. Noting that by the dictionary definition "seizure" simply means to take possession of, or to take into physical custody or control, the court said that to attach a technical or legal meaning to the word "seizure" as used in the rule is inconsistent with the entire trend of the law in the area of criminal discovery, which is to broaden rather than to narrow the areas of pretrial inquiry.

On the other hand, in *State v Winsett* (1964, Del) 200 A2d 237, it was held that then-prevailing Delaware Criminal Rule 16 did not authorize production of the report of an autopsy performed on the body of a homicide victim.

<>

The defendant's motion, under Rule 17(c) of the Delaware Rules of Criminal Procedure,<sup>n111</sup> for an order requiring the prosecution to produce before trial statements of prospective witnesses for the prosecution and a report on the results of an analysis of the samples of the defendant's blood was denied in *State v Hutchins* (1957) 51 Del 100, 138 A2d 342. Stating that Delaware Criminal Rule 17(c) is not a pretrial discovery rule, and that, therefore, the court must guard against its being used as such, thereby rendering Delaware Criminal Rule 16 meaningless, the court concluded that, generally speaking, Rule 17(c) may be properly invoked only for the procurement of documentary evidence and for the

production of documents which are admissible in evidence at the trial. The court pointed out that obviously neither the written report of the blood analysis nor the written statements of witnesses would be admissible in evidence at the trial except, perhaps, for impeachment purposes.

The defendant's pretrial motion, under Rule 17(c), for permission to inspect statements of a certain prosecution witness was also held properly denied in *Wisniewski v State* (1957, Sup) 51 Del 84, 138 A2d 333, the court stating that Rule 17(c) related to the manner of the issuance of a subpoena.

<>

Notes of officer's recollection of conversation with defendant's father who had related statements made to him by defendant could not, under rule, be discovered. *Smith v State* (Del Sup) 317 A2d 20.

Requests for all books, papers, documents, and tangible objects which state planned to offer into evidence at trial which were obtained voluntarily by seizure and/or by process from defendant or others was denied under state rule of criminal procedure where motion did not designate particular documents or objects sought and there was no showing of their materiality to preparation of defense; request for all information and material which was favorable to defendant was denied since state rule did not provide for and due process did not require such discovery prior to trial. *State v Traenkner* (Del) 314 A2d 202.

[\*11c] Floridan112

Section 925.04 (former § 909.18) of the Florida statutes provides that when a crime has been committed and the evidence of the state relates to ballistics, fingerprints, blood, semen, or other stains, or documents, papers, books, accounts, letters, photographs, objects, or other tangible things, upon motion showing good cause therefor, and upon notice to the prosecuting attorney, the court in which the action is pending, whether a committing magistrate's court or the court having jurisdiction to try the cause, may order the state to produce and permit the inspection and copying or photographing, by or on behalf of the moving party, of any designated papers, books, accounts, letters, photographs, objects, or other tangible things.n113

Noting that the Florida statute referred to above fails or omits to include written confessions made by a defendant, although it does provide for the production of "other tangible things," and stating that the phrase "other tangible things" could not be construed to include written confessions, the court in *Williams v State* (1940) 143 Fla 826, 197 So 562, upheld the denial of the defendant's pretrial motion for an order requiring the prosecution to produce the defendant's confession, notwithstanding the defendant's contention that the trial court's denial of the motion was contrary to the spirit and meaning of the statute, had the effect of taking defense counsel by surprise at the time of the trial, and deprived him of the opportunity or privilege of a thorough investigation so as to determine whether or not the confessions had been unlawfully obtained.n114

Where a defendant's request for inspection of evidence in the possession of the prosecution is granted under the Florida statute referred to above, but the defendant does not follow up the order granting his request by taking the necessary steps to procure the evidence from the prosecution, he may be held to have waived his right to inspection. Thus, where, on the defendant's motion for discovery under § 909.18 of the then Florida statutes, the trial judge entered an order requiring the prosecution to produce and allow the defendant to inspect, copy, or photograph objects which the prosecution intended to use as evidence, but the record was silent as to anything done by the prosecuting attorney or demanded by the defendant with reference to the order between the day it was entered and the time some of the objects seized were offered in evidence at the trial, the court in *Perez v State* (1955, Fla) 81 So 2d 201, held that the defendant's counsel had no right to object to the admission of the objects on the ground that the prosecution had not complied with the order. Noting that the primary purpose of the statute and an order entered pursuant thereto is to furnish a defendant

with information that would enable him to better prepare his defense, the court said that under the circumstances the defendant had waived any advantage he might have gained by the inspection. See also *Drozewski v State* (1955, Fla) 84 So 2d 329, supra § 6[a], holding to the same effect, but not referring to the Florida statute under consideration.

In upholding the trial court's ruling on the defendant's pretrial motion, made in a prosecution for murder, for an order requiring the prosecution to produce, under § 909.18 of the then Florida statutes, "all the evidence in its possession, including ballistic reports, fingerprint reports, and transcript of oral confessions," the court in *Ezzell v State* (1956, Fla) 88 So 2d 280, cited decisions supporting the rule that confessions of a defendant and statements of witnesses are not subject to inspection by the defense, and pointed out that the ballistic reports, which had been made by the FBI, were "nothing more than an outline of testimony the examiner could give at the trial," that the prosecution was ordered to produce all bullets and weapons for inspection by the defendant, that no fingerprints were lifted from the pistol that was introduced in evidence, and that some fingerprints of the defendant lifted from the automobile in which the victim was killed were ordered to be produced for inspection by the defendant.

The denial of the defendant's motion for an order requiring the prosecution to produce the transcribed notes of a court reporter which were made in recording statements of accomplices who were not on trial was held not error in *Raulerson v State* (1958, Fla) 102 So 2d 281, although the motion was said to have been based on § 909.18 of the 1955 Florida statutes, the court noting that the statute was no authority for the request made in the present case. Pointing out that the statements sought by the defendant would not have been admissible against the accomplices even had they been on trial, that the court reporter was not a witness and did not testify at the trial, and that the accomplices were available for interview by the defendant, the court also said that the rule that a defendant is not entitled to a transcript of the testimony of prosecution witnesses was applicable to the present situation with the same, if not greater, force.

Similarly, the denial of the defendant's motion for permission to inspect and copy tape recordings which were secretly made by investigating officers under the direction of the prosecuting attorney and which contained conversations between the defendant, another participant in the crime, and other persons who later testified at the trial, was upheld in *Peel v State* (1963, Fla App) 154 So 2d 910, the court holding that the defendant was not entitled to production of the tape recordings either under § 909.18 of the then Florida statutes or under a subpoena duces tecum. Noting that the tape recordings could not be considered substantive evidence, but were clearly the work product of the prosecuting attorney, the court pointed out that the statute under consideration does not cover the tape recordings; that to support the issuance of a subpoena duces tecum in a criminal prosecution, it must be shown that the evidence sought is material and necessary to the defendant's case; and that a subpoena duces tecum in no sense reaches notes or evidence taken by the prosecuting officer at his expense and by his private stenographer.

A lottery ticket purchased by a confidential informant was held not producible under § 925.04 of the Florida statutes in *Miami v Jones* (1964, Fla App) 165 So 2d 775, a prosecution for violation of gambling laws, the court pointing out that production of the ticket would operate to reveal the identity of the informant, that the purchase of the ticket by informant was incidental, and that neither the fact of its purchase nor the ticket itself was evidence that would have any materiality or bearing on the merits of the issues tried.

Where an order for production of evidence in the possession of the prosecution is granted under the Florida statute referred to above, the prosecution is obligated to disclose all such items that it then has in its possession, and it is not necessarily bound, because of such order for production, to produce items to be acquired subsequently to the order. Thus, where the defendant moved, under the statute, for an order requiring the prosecution to produce, for his inspection, any items which were to be used by it as evidence in the case, and the prosecution consented to the demands of this motion without the entry of a formal order thereon, and thereafter the prosecution procured the services of a ballistics expert to make tests with the defendant's pistol, and exhibits showing the results of such tests were subsequently introduced and admitted in evidence notwithstanding the defendant's objection based on the ground that these exhibits had not been submitted to him for his inspection in accordance with the requirements of his pretrial motion for discovery, the court in *Belger v State* (1965, Fla App) 171 So 2d 574, in holding that the trial court did not

commit error in admitting in evidence the exhibits in question, rejected the defendant's contentions that the spirit of the Florida statute under consideration required the prosecution to notify him immediately of any evidence coming into its possession which it intended to use at the trial if an order had theretofore been entered by the trial court pursuant to the provisions of the statute, and that the prosecution's failure to do so should render any subsequently acquired evidence inadmissible. The court said that if an order for inspection of evidence is entered pursuant to the provisions of the statute, the prosecution is obligated to make a good-faith disclosure of all such items which it then has in its possession and which it intends to introduce at the trial; that if subsequent investigation develops additional evidence prior to the commencement of the trial, the defendant is likewise entitled to have it submitted for inspection if a motion for that purpose is seasonably made; that failure of a defendant to make such a motion and procure an order thereon, or failure of the prosecution to voluntarily submit such evidence to the defendant prior to the trial, will not necessarily render the evidence inadmissible; and that a broad discretion rests in the trial judge to determine whether the prosecution has acted in good faith in making timely disclosure to a defendant of the items of evidence in its possession, if an order requiring such disclosure has been entered in the case.

In *State v Shouse* (1965, Fla App) 177 So 2d 724, a prosecution for embezzlement, it was held (1) that an order requiring the prosecution to produce, for inspection and copying by the defendants, all documents and legal papers which the prosecution intended to use at the trial was substantially in accord with § 925.04 of the Florida statutes; and (2) that an order directing the prosecution to produce all sworn statements given by prospective witnesses for the prosecution was not authorized by the statute.

<>

State's noncompliance with discovery rule requiring disclosure of prospective witnesses did not mandate reversal of first-degree murder conviction where, despite fact that undisclosed witness was permitted to testify in rebuttal to defendant's testimony concerning his intoxication, defense failed to make timely objection and thereby allow trial court to specifically rule on issue. *Lucas v State* (1979, Fla) 376 So 2d 1149.

Reversible error occurred in first-degree murder prosecution which charged codefendants with murder-for-hire killing of wife involved in extramarital affair, where defendant's testimony constituted repudiation of his prior confession and attempt to place blame for killing on codefendant, and where prosecution, after reaching immunity agreement with codefendant and his counsel, called codefendant to testify as rebuttal witness without having listed codefendant as potential witness during pretrial discovery proceedings. *Kilpatrick v State* (1979, Fla) 376 So 2d 386.

In prosecution for burglary and sexual battery, trial court correctly denied motion seeking discovery, under criminal procedure rules, of police reports which were not statements of officers as eyewitnesses but which only contained non-verbatim statements of victim who did not sign or ratify said reports. *Lockhart v State* (1980, Fla App D4) 384 So 2d 289.

In prosecution for possession of marijuana, state violated statute requiring production of substance of all oral confessions and of names of all witnesses to such confessions where state's response to defendant's request merely acknowledged existence of "written, recorded and/or oral statement of accused" and list of witnesses supplied by state did not specify those who were party to confession. *Thompson v State* (1979, Fla App D2) 374 So 2d 91.

Reciprocal discovery rule applied to oral statement by witness, inconsistent with prior written sworn statement, given to prosecutor immediately preceding trial, and prosecutor's failure to disclose such statement breached duty to make continuing discovery and resulted in reversible error where principal jury issue was proper identification and oral statement by defendant's girlfriend was inculpatory. *Waters v State* (1979, Fla App D3) 369 So 2d 979.

Trial court's granting carte blanche production of all police reports filed in defendant's case was overbroad and in error

where, under Fla Rules Crim Proc 3.220[a][1][i], [ii], prosecution was only required to produce police reports written or signed or otherwise adopted or approved by person whose name had been furnished by prosecutor to defendant upon demand, and those reports containing substantially verbatim recital of oral statement made by person whose name had been furnished by prosecutor to defendant upon demand and made to officer or agent of state who recorded statement contemporaneously with its making. *State v Dumas* (1978, Fla App D3) 363 So 2d 568.

See *King v State* (1978, Fla App D3) 355 So 2d 831, § 23.

Court committed reversible error erred in permitting rebuttal witness to testify where prosecution refused to list name of rebuttal witness in response to defendant's demand for discovery. *Hardison v State* (Fla App D2) 341 So 2d 270.

Pursuant to rule of criminal procedure providing that defendant was entitled to discover names and addresses of all persons known to prosecution to have information which might be relevant to offense charged and to any defense with respect thereto, defendants were entitled to address of state's key witness where she had moved from address given by state and such information was necessary so that defendants could take her deposition. *Anderson v State* (Fla App) 314 So 2d 803.

When motion for discovery is presented, trial court should first determine whether any or all of information sought is readily available to defendant through deposition, subpoena, or other means, and if so, motion should be denied; next, court should determine whether information sought is reasonably admissible and useful to defense as probably material and exculpatory, in which case motion should be granted. *State v Coney* (Fla App) 272 So 2d 550.

Florida discovery statute does not contemplate fishing expedition, but is limited to documents or things used as "evidence of the state." *Barton v State* (Fla App) 193 So 2d 618.

Florida statute providing that trial court may order evidence relating to certain enumerated items of tangible property furnished to accused for inspection, copying, or photographing does not apply to oral confessions of accused, or to material that cannot be considered substantive evidence but is clearly work product of prosecuting attorney, or to transcript of testimony of state witnesses. *State v McCall* (Fla App) 186 So 2d 324.

[\*11d] Illinoisn115

Under Chapter 38 paragraph 729, of the 1961 Illinois Revised Statutes,<sup>n116</sup> which provided that whenever a written or oral confession was made before any law enforcement officer or agency by any person charged with any crime, a copy of such confession, if written, together with a list of all witnesses to its making, should be given to the defendant or his counsel prior to arraignment, or at such later time as the court, in its discretion, may direct, upon motion by either the prosecution or defense at the time of arraignment, and that if such confession was not reduced to writing, then a list of the names and addresses of all persons present at the time the confession was made should be furnished, it was held in *People v Shockey* (1964) 30 Ill 2d 147, 195 NE 2d 703, that the admission of the defendant's written confession in evidence without furnishing the defense with a copy thereof until the day before it was introduced in evidence constituted prejudicial error in view of the fact that, excluding the evidence concerning the confession, there was not a sufficient quantum of evidence to prove the defendant guilty beyond a reasonable doubt. The court noted that the statutory requirement was mandatory.

The defendant's contention that the trial court committed error in denying his request to see a written copy of his alleged oral confession was held not sustainable in *People v Carter* (1962) 24 Ill 2d 413, 182 NE2d 197, although it was shown that a police officer had made some writing based on the defendant's oral statement and had included it in his report. Noting that under Chapter 38 paragraph 729, of the 1959 Illinois Revised Statutes, although a defendant was entitled to a copy of a written confession, he was only entitled to a list of witnesses present at the making of an oral confession, the court concluded that since a list of persons present at the making of the defendant's alleged oral confession was

provided, there was no error.

◇

Tape-recorded confession was "written" confession within purview of and for purpose of Illinois statute providing that court in criminal case shall, on motion of defendant, order state to furnish him with copy of any written confession made by him to any law enforcement officer. *People v Purify*, 43 Ill 2d 351, 253 NE2d 437.

See *People v Mims* (1982) 111 Ill App 3d 814, 67 Ill Dec 448, 444 NE2d 684, § 16[a].

See *People v Ferguson* (1981) 102 Ill App 3d 702, 57 Ill Dec 958, 429 NE2d 1321, cert den (US) 74 L Ed 2d 133, 103 S Ct 159, § 13[b].

See *People v Spain* (1980) 91 Ill App 3d 900, 47 Ill Dec 451, 415 NE2d 456, § 17.

See *People v Kradenych* (1980) 83 Ill App 3d 547, 39 Ill Dec 104, 404 NE2d 488, § 14.

Under statute requiring production of oral or written confessions upon defendant's proper pretrial motion, defendant in prosecution for murder was entitled to production of his confession taken on officer's scratch pad during interview despite exculpatory nature of confession and state's argument that officer did not make existence of statement known until immediately prior to trial. *People v Spurlack* (1979) 74 Ill App 3d 43, 29 Ill Dec 657, 392 NE2d 214.

Trial court erred in burglary trial in denying motion to preclude evidence of jewelry store receipt which prosecution had not listed in its answer to discovery request, although error did not require reversal since defendant did not demonstrate that he was thereby prejudiced. *People v Hambrick* (1979) 68 Ill App 3d 447, 25 Ill Dec 184, 386 NE2d 455.

In proceeding to revoke probation based on alleged felony theft committed by defendant, trial court properly denied defendant's motion to produce written statements of witness; supreme court rules require that, for discovery rules to apply, accused must be charged with an offense and petition to revoke probation did not constitute a felony charge. *People v De Witt* (1978) 66 Ill App 3d 146, 22 Ill Dec 886, 383 NE2d 694.

In prosecution for murder, state violated discovery obligation imposed upon it by court rule where state provided defendant with illegible copy of expert's report on results of test to determine if defendant had fired gun and where report tended to negate defendant's guilt, although state had denied possessing any information negating defendant's guilt. *People v Keith* (1978) 66 Ill App 3d 93, 22 Ill Dec 847, 383 NE2d 655.

See *People v Boucher* (1978) 62 Ill App 3d 436, 19 Ill Dec 675, 379 NE2d 339, § 13[d].

Police reports, ballistics tests, and statement by witness regarding finding of gun, which fired bullet which killed victim, under co-defendant's bed were improperly withheld from defendant who had requested such material, where material was not disclosed to defendant until close of trial, during jury deliberations, and where material would have been relevant to defense theory that co-defendant and another person had committed crime. *People v Baxtrom* (1978) 61 Ill App 3d 546, 18 Ill Dec 718, 378 NE2d 182.

See *People v Veal* (1978) 58 Ill App 3d 938, 16 Ill Dec 188, 374 NE2d 963, § 14.

See *People v Loftis* (1977) 55 Ill App 3d 456, 13 Ill Dec 133, 370 NE2d 1160, § 25[c].

See *People v Clark* (1977) 55 Ill App 3d 379, 13 Ill Dec 84, 370 NE2d 1111, § 27[a].

Under rule providing that state should disclose to defense counsel all memoranda containing substantially verbatim reports of witnesses' oral statements, trial court's in camera review of such memoranda in response to prosecution objection, was to determine whether the memoranda were substantially verbatim reports of witnesses' oral statements and not merely to determine whether the memoranda contained privileged work product. *People v Holmes*, 41 Ill App 3d 956, 354 NE2d 611.

Statute requiring state on motion by defendant to furnish list of witnesses to oral confession did not require state to furnish oral confession itself. *People v Crosby*, 39 Ill App 3d 1008, 350 NE2d 805.

Purpose of discovery rules -- to prevent surprise and any unfair advantage -- had been honored where, although list of physical evidence received pursuant to pre-trial discovery motion did not include stolen checks, list included "miscellaneous papers," and where defense had requested and been furnished copy of Crime Detection Laboratory report which listed canceled checks issued to prosecution witness. *People v Britt*, 22 Ill App 3d 695, 318 NE2d 138.

Discovery order properly required that specific and known oral admission by defendant, which prosecution intended to use at trial, be reduced to memorandum, where trial court determined within its discretion that reason for failure to reduce such statement to writing was to avoid discovery; blanket order, however, to reduce to memorandum any reports or summaries of oral statements of persons intended to be called as witnesses was overbroad and invalid; provisions of discovery order which allowed in camera inspection of entire State file were also invalid, where there was no showing that material evidence existed which State had withheld, and where incamera inspection to determine generally whether State's file contained exculpatory material was not authorized except upon proper showing of good cause and materiality to preparation of defense; if State intended to use statement of witness, such statement fell within its continuing obligation of disclosure. *People v Manley*, 19 Ill App 3d 365, 311 NE2d 593.

See *People v Schabatka*, 18 Ill App 3d 635, 310 NE2d 192, cert den (US) 43 L Ed 2d 400, 95 S Ct 1128, § 6[b].

Defendant's motion for criminal records of prosecuting witnesses, statements of other witnesses, and the like was properly denied where state discovery rules were not then in effect, nothing then required was refused defendant, and where there was substantial compliance with then pending decision governing discovery rights. *People v Stadtman*, 15 Ill App 3d 259, 304 NE2d 174, revd on other grounds 59 Ill 2d 229, 319 NE2d 813.

Court properly denied defendant's request for contents of oral statement defendant made to police under statute which provided for discovery of list of witnesses to oral confession, but excluded discovery of statement itself. *People v Green*, 14 Ill App 3d 972, 304 NE2d 32, cert den 417 US 972, 41 L Ed 2d 1143, 94 S Ct 3179.

Under Illinois Rules relating to discovery in criminal cases, defendant, who was charged with driving while intoxicated -- misdemeanor for which she could not be imprisoned -- was not entitled to police DWI report; consequently, when state refused to produce such report, trial court erred in suppressing evidence contained therein. *People v Schmidt*, 8 Ill App 3d 1024, 291 NE2d 225, affd 56 Ill 2d 572, 309 NE2d 557.

[\*11e] Marylandn117

Rule 728 of the Maryland Rules of Procedure provides that upon motion of a defendant and upon a showing that the items sought may be material to the preparation of his defense and that the request is reasonable, the court, at any time after indictment, may order the state's attorney to produce, for inspection by the defense, designated books, papers, documents, or tangible objects obtained from or belonging to the defendant or obtained from others by seizure or by process, and to furnish the defendant the substance of any oral statements made by him which the state proposes to

produce as evidence to prove its case in chief, a copy of any written statement made by him, and the substance of any oral confession made by him. The rule also provides that nothing therein shall limit the inherent common-law power of the court to require or permit the discovery.n118

The view that the discovery and inspection of documents under Maryland Rule 728 are left to the sound discretion of the trial court, and that under the rule inspection is not granted as a matter of right, was also recognized in *Whittle v Munshower* (1959) 221 Md 258, 155 A2d 670, cert den 362 US 981, 4 L ed 2d 1016, 80 S Ct 1069 (a case not within the scope of this annotation).

Holding that the matter under consideration was one for the discretion of the trial court under Maryland Rule 728, the court in *Glaros v State* (1960) 223 Md 272, 164 A2d 461, rejected the defendant's contention that the trial court committed error in refusing to permit him to inspect before trial notes made by police officers after their conversations with him. Pointing out that the trial court had ordered the prosecution to permit the defendant to inspect all memoranda or transcripts of statements of the defendant made at the time of the conversation, although it had denied such inspection of any memoranda or statements made after the conversation, the court said that there was no abuse of discretion under the circumstances.

The defendant's contention that the trial court should have declared a mistrial when a detective was permitted to testify as a prosecution witness as to statements made by the defendant to him that were not given to the defense prior to trial pursuant to a motion for discovery made under Maryland Rule 728 was rejected in *Johnson v State* (1963) 232 Md 199, 192 A2d 506. The court pointed out that pursuant to the motion, the prosecution had furnished to defense counsel the substance of an oral statement made by the defendant to the detective the morning of his arrest, and that under Rule 728 the prosecution need only make a report of the substance of the oral statement, not in verbatim form.

The defendant's contention that the prosecution had failed to comply with an order for discovery and inspection entered under Maryland Rule 728 was held not sustainable in *Mayson v State* (1965) 238 Md 283, 208 A2d 599, where the contention was based on the claim that an order for the production of an "oral" synopsis of any statements made by the defendant required the prosecution to give defendant a "written" synopsis of the statements.

◇

Trial court did not abuse discretion in denying motion for discovery and inspection of all written statements of 3 codefendants charged with same crimes as defendant, since Maryland rule provides that state may be required to supply copy of any written statement made by defendant, and substance of any oral statement made by defendant which state proposes to produce as evidence to prove its case-in-chief, and substance of any oral confession made by defendant, but no Maryland rule provides for disclosure of written statements of codefendant; similarly, there was no abuse of discretion in refusing to require state to say when and where alleged oral statements made by defendant were made, and in refusing to furnish defendant with reports of experts whom state intended to call at trial, since Maryland rules require no such disclosure. *Veney v State*, 251 Md 159, 246 A2d 608.

Defendant in robbery trial was not prejudiced by state's delay in producing tape of police radio and telephonic communications to or from arresting officer before trial where tape was produced at trial, defendant was offered and refused a continuance, and in defense counsel's judgment it contained nothing of help to appellant. *Tisdale v State* (1979, Md App) 396 A2d 289.

See *McDowell v State*, 31 Md App 652, 358 A2d 624, § 13[b].

Maryland Rule providing for pretrial discovery and inspection does not require state to furnish to defendant statements of victims or other witnesses to crime. *Bailey v State*, 16 Md App 83, 294 A2d 123.

See *Austin v State*, 3 Md App 231, 238 A2d 569, § 14.

See *Boone v State*, 3 Md App 11, 237 A2d 787, § 14.

See *Ward v State*, 2 Md App 687, 236 A2d 740, § 7.

See *Leyva v State*, 2 Md App 120, 233 A2d 498, § 7.

Oral statements made by defendant during commission of robbery of taxi driver did not constitute type of statement discoverable under *Maryland rules*. *Barton v State*, 2 Md App 52, 233 A2d 330.

Under Maryland Rule 728, defendant in murder trial was not prejudiced when in response to his motion for discovery and inspection, prosecution furnished him with police captain's recollection of defendant's oral statement with exception of incident in which defendant allegedly tried to revive victim by dousing her in bathtub; omission of bathtub incident did not render state's response to motion insufficient. *Ferrente v State*, 1 Md App 342, 229 A2d 719.

[\*11f] Missouri119

Rule 25.19 of the Missouri Supreme Court Rules provides that upon application of either party in a criminal case, a subpoena duces tecum may be issued commanding the production of books, papers, documents, or other objects designated therein, and that the court may direct that the books, papers, documents, or objects designated in the subpoena be produced before the court at a time prior to the trial or prior to the time when they are to be offered in evidence and that the court may, upon their production, permit the books, papers, documents, or objects or portions thereof to be inspected by the parties and their attorneys.

Stating that Supreme Court Rule 25.19 is not intended as a rule of discovery, but that its purpose is rather to enforce the production of documents and papers that contain evidence relevant and material to the issues, the court in *State v Kelton (1957, Mo)* 299 SW 2d 493, held that it was not error for the trial court to quash the defendant's subpoena to compel the production of a transcript of questions and answers taken at an interrogation of the defendant by the prosecuting attorney.

In *State v Engberg (1964, Mo)* 377 SW2d 282, wherein the defendant made a pretrial motion, under Supreme Court Rule 25.19, for inspection of "the books, papers, and documents" of the city police department, papers retained by the prosecuting attorney's office pertaining to the crime charged against the defendant, "any and all records or statements" pertaining to the crime, and especially the offense report and a statement of the chief prosecution witness, and the motion was based on allegations that the documents requested were necessary and contained conflicting information which was vital to the defense, that the defendant was without funds to take depositions, and that inspection should be allowed as in civil cases to obtain information that "might lead to the discovery of material evidence," the court, upholding the denial of the motion, pointed out that Rule 25.19 is not a rule of discovery, but that its purpose is to enforce the production of documents or objects at the trial which contain evidence material and relevant to the issues, and that the court in such a case may direct the production and inspection of the designated documents or objects before the court prior to trial if by doing so the trial of the case will be expedited; that except for the assertion that the motion in the present case was made pursuant to Rule 25.19, "the motion bears little resemblance to what is contemplated by the rule"; that in the absence of the issuance of a subpoena duces tecum under the rule and a showing that the documents designated in the motion contained material evidence and that the trial of the case would be expedited by the production and inspection of the documents before trial, the trial court did not commit error in denying the defendant's motion for inspection.

&lt;&gt;

Reversible error occurred in drunk driving prosecution where heavy caseload borne by prosecutor's office did not excuse untimely, eve-of-trial compliance with discovery request which disclosed amended information indorsing two additional witnesses, which advised defense counsel that defendant had been subject of "alcoholic influence report compiled from field sobriety test, which provided a "breathalyzer operational checklist purporting to indicate a blood alcohol level, and which disclosed certain admissions to officer by defendant that he had been drinking beer while taking valium and glycerine under doctor's orders. *State v Blake (1981, Mo) 620 SW2d 359.*

Motion for order directing prosecutor to disclose to defendant's counsel all evidence material to guilt or punishment in his files, or otherwise known to him, which is or may be favorable to defendant, was too broad and sweeping to be sustained under present state of Missouri law on discovery in criminal cases. *State v Sweazea (Mo) 460 SW2d 614.*

Missouri Supreme Court Rule 25.19 authorizing court to require production upon request of documents and papers at or before trial was not intended to be a general rule of discovery, and does not authorize a blanket request for all material in possession of prosecution or police. *State v Berry (Mo) 451 SW2d 144.*

Defense of surprise in theft prosecution, occasioned by prosecutor's failure to disclose existence of gold ring taken from defendant at time of his arrest pursuant to pre-trial discovery request, necessitated retrial. *State v Moore (1982, Mo App) 645 SW2d 117.*

See *State v Lewis (1982, Mo App) 637 SW2d 421, § 23.*

See *State v Charity (1982, Mo App) 637 SW2d 319, § 16[a].*

Trial court did not abuse its discretion in refusing to allow defendant to inspect police report where police officer had testified on direct examination concerning his search of area for weapon, evidence indicated that officer neither testified from report nor refreshed his memory at trial therefrom and where there was at time of trial no general right to criminal discovery in *Missouri*. *State v Booth (Mo App) 515 SW2d 586.*

[\*11g] New Jerseyn120

Rule 3:5-11 of the New Jersey Criminal Practice Rules, which has been in effect since September, 1953, provides that upon motion of a defendant made at any time after the filing of the indictment or accusation, the court shall order the prosecutor to permit the defendant to inspect and copy or photograph designated books, tangible objects, papers, or documents obtained from or belonging to the defendant, other than written statements or confessions made by him, and may, if the interests of justice so require, order the prosecutor to permit the defendant to inspect and copy or photograph written statements or confessions made by the defendant and designated books, tangible objects, papers, or documents obtained from others except written statements or confessions.

Discovery and inspection under this rule are not limited to evidence the prosecution intends to use; rather, the rule contemplates pretrial inspection as a matter of right of everything taken from a defendant, other than his statement, without reference to the use the prosecution may intend to make of such material. *State v Murphy (1961) 36 NJ 172, 175 A2d 622.*

&lt;&gt;

Under New Jersey Rule 3:5-11, pretrial inspection by a defendant of his own statement may be ordered if in the sound discretion of the trial judge the interests of justice should so require.

And in *State v Wise* (1955) 19 NJ 59, 115 A2d 62, the court, in holding that the mere fact that the defendant's confession was produced for his inspection under Rule 3:5-11 did not make the confession automatically admissible in evidence, noted that there is no unqualified right to inspect a confession, and that the privilege to do so is granted only in the sound discretion of the trial judge upon application.

Thus, stating that embodied in Rule 3:5-11 was the view that pretrial inspection by a defendant of his own statement may be ordered if in the sound discretion of the trial judge the interests of justice should so require, the court in *State v Johnson* (1958) 28 NJ 133, 145 A2d 313, held that where a defendant's application for pretrial inspection of his own statement showed that he did not recall his statement with sufficient detail to satisfy his counsel that he could fairly go to trial without it, the application should be granted in the absence of a showing by the state that inspection would improperly hamper the prosecution; and that in ruling upon such an application for inspection it was not necessary to have a hearing, with cross-examination as to the factual showing advanced by the defendant in support of his motion, but that, upon the defendant's ex parte proof of facts supporting his motion, the hearing should ordinarily shift to the prosecution's claim of extraordinary circumstances in opposition to the motion.

See also *State v Murphy* (1961) 36 NJ 172, 175 A2d 622, involving an application by an accused for pretrial discovery of statements which he had given to the Waterfront Commission of New York Harbor and which were then in the possession of such commission, wherein the court, noting that New Jersey Rule 3:5-11 provides that the court may order inspection of statements made by a defendant if the interests of justice so require, recognized that pretrial inspection by a defendant of his own statement should be ordered upon his showing that he cannot recall the statement with sufficient detail to satisfy his counsel that he can fairly go to trial without it, unless the state shows that inspection would improperly hamper the prosecution.

Stating that the application for inspection under consideration was addressed to the court's discretion, the court in *State v Echevarria* (1955) 38 NJ Super 415, 119 A2d 183, denied the defendant's motion, under Rule 3:5-11, for pretrial inspection of statements made by him, where all that the defendant stated in support of his motion was that the statements were made while he was without benefit of counsel, that he did not have copies of the statements, that he did not recall their contents, and that, therefore, he could not inform his counsel of them.<sup>n121</sup>

◇

Pretrial inspection of prospective witnesses is barred by New Jersey Rule 3:5-11. *State v Johnson* (1958) 28 NJ 133, 145 A2d 313; *State v Reynolds* (1963) 41 NJ 163, 195 A2d 44

*State v Trantino* (1965) 44 NJ 358, 209 A2d 117; *State v Moffa* (1960) 64 NJ Super 69, 165 A2d 219, affd 36 NJ 219, 176 A2d 1.

Thus, in *State v Johnson* (1958) 28 NJ 133, 145 A2d 313, it was held that the defendant was not entitled to pretrial inspection of statements of prospective witnesses. Noting that pretrial inspection of statements of prospective witnesses was barred by Rule 3:5-11, and pointing out that such a rule should not ordinarily be revised or abandoned except by an exercise of the rulemaking power, the court added that there was no showing in the present case which would invite relaxation of the rule under consideration.

Although statements of prospective witnesses are not subject to inspection under New Jersey Rule 3:5-11, a prospective witness' report containing the defendant's statements may nevertheless be produced under certain circumstances. Thus, in *State v Reynolds* (1963) 41 NJ 163, 195 A2d 449, the court, in holding that no prejudice had resulted to the defendant from the trial court's refusal to permit him to inspect a certain psychiatrist's written reports and memoranda which contained his confession, said that although Rule 3:5-11 forbids pretrial inspection of written statements of prospective

witnesses, yet where the defendant has made a statement to a prospective witness and such statement is included in the witness' written report, the circumstances may justify relaxation of Rule 3:5-11 to permit inspection of that part of the witness' report which contained the defendant's statement. The court added that relaxation should occur only in unusual circumstances, and that the trial court must be given broad discretion in determining when relaxation is warranted.

And in *State v Trantino* (1965) 44 NJ 358, 209 A2d 117, the court, in upholding the denial of the defendant's pretrial motion for inspection of statements made by witnesses, said that the trial court's action comported with Rule 3:5-11, which bars inspection before trial of statements of prospective witnesses, subject, however, to the discretionary power, under Rule 1:27A, of a court to relax rules "where it shall be manifest to the court that a strict adherence to them will work surprise or injustice."

<>

New Jersey Rule 3:5-11 warrants pretrial production, for inspection by the defense, of "the State's objective documents, such as autopsy reports, hospital reports and other scientific and laboratory reports, including chemical analyses, blood tests, etc.," at least where there is no showing by the state that its prosecution would be improperly hampered, said the court in *State v Cook* (1965) 43 NJ 560, 206 A2d 359. The court stated that in view of Rule 3:5-11 and *State v Johnson* (1958) 28 NJ 133, 145 A2d 313, supra, there would now appear to be little question that, absent a showing by the state that its prosecution would be improperly hampered, a defendant is entitled to such pretrial inspection, and held that the defendant, who was examined by psychiatrists designated by the state, while he was in custody on murder charges, was entitled to examine, in preparation for trial, the medical reports of the psychiatrists which were then in the possession of the prosecuting attorney, where the state had made no showing nor had it given any indication that the inspection would improperly hamper the prosecution. The court observed that none of the reasons advanced by those hostile to the expanding doctrine of discovery in criminal proceedings had any real bearing in the present case; that there was no likelihood of intimidation or perjury, and that the state, which had already had broad discovery of the defendant's mental condition, was in no position to talk about imbalance or unfairness; and that defense counsel, whose investigatory resources were far from those of the state, should have the benefit of all that was in the reports of the state's psychiatrists to the just end that he might intelligently advise as to the defense and properly prepare for trial. Also pointing out that even if the defendant was sane within the legal definition, he was nonetheless entitled to introduce evidence relating to his background and to any abnormal or subnormal mental condition, which evidence might bear heavily on the degree of guilt and on the measure of punishment, the court added that the prosecuting attorney must deal fairly and may not constitutionally withhold material evidence which favors the defendant, and that disclosure of such psychiatric reports as those sought by the defendant in the present case would not only aid in ferreting out the truth, but would also avoid any question of unconstitutional withholding. As to the prosecution's argument that the trial court's action in denying the defendant's request for inspection of the reports in question was within the discretionary authority vested in it by Rule 3:5-11, and that if there was to be a departure from the rule it should await formal rule revision, the court commented that although the rule precludes pretrial discovery of "written statements or confessions," it is doubtful that it ever had in mind documents such as medical reports by psychiatrists engaged by the state.

<>

New Jersey rules limit discovery as to prospective state witnesses, on order of court, to names and addresses of persons known to have relevant information or evidence, indications as to which of those persons may be used as witnesses, and copies of records of statements by such persons within possession, custody, or control of prosecutor; specifically not subject to defense discovery, however, are reports, memoranda, or internal documents made in connection with investigation or prosecution of case. *State v Farrow*, 61 NJ 434, 294 A2d 873, cert den 410 US 937, 35 L Ed 2d 602, 93 S Ct 1396.

See *State v Barath* (1979) 169 NJ Super 181, 404 A2d 373, § 21[a].

Rule dealing with discovery in "criminal actions" was not applicable to prosecution for drunken driving. *State v Roth* (1977) 154 NJ Super 363, 381 A2d 406.

Under rule allowing defendant to inspect and copy and photograph specified materials, prosecutor was not required to furnish at state expense transcripts of taped conversations which were irrelevant, immaterial and nonincriminatory, but defendants could, under circumstances, have access to all recordings and make copies at own expense. *State v Russo*, 127 NJ Super 286, 317 A2d 369.

[\*11h] Tennessee122

Section 40-2441 of the Tennessee Code, which came into effect in March 1963, provides that whenever a written or oral confession or admission against interest is made before any law enforcement officer or agency by any person charged with any crime, a copy of such confession or admission, if written, should be given to the defendant or his counsel on demand, and that no confession or admission against interest should be admitted as evidence in any case unless a copy thereof is furnished as required by § 40-2441.

In *Sambolin v State* (1965, Tenn) 387 SW2d 817, it was held that § 40-2441 was applicable to oral statements or confessions which were reduced to writing by police officials and were made a part of their police report. Noting that it was the intention of the legislature to allow any defendant, upon demand, to secure a copy of all confessions or admissions against interest made to law enforcement officers, whether they were written at the time or later reduced to writing, if such are to be used in evidence against the defendant, the court said that the statute includes signed confessions, but is not limited to such.

See *Tate v State* (Tenn) 413 SW2d 366, § 21[b].

Criminal defendant has statutory right to obtain his own written statement or a list of witnesses to any oral statements he may have made which are against his interest. *Bolin v State* (Tenn) 405 SW2d 768.

See *State v Pinkston* (1982, Tenn Crim) 644 SW2d 422, vacated, reinstated (Tenn Crim) 668 SW2d 676, § 16[a].

See *Latham v State* (1978, Tenn Crim) 560 SW2d 410, § 25[d].

See *Honeycutt v State* (Tenn Crim) 544 SW2d 912, § 16[a].

Statute relating to pre-trial discovery of defendant's oral confession or admission against interest did not contemplate defendant's exculpatory statement. *Wilson v State* (Tenn Crim) 537 SW2d 446.

See *Covey v State* (Tenn Crim) 504 SW2d 387, § 21[d].

In murder prosecution, court's refusal to allow defendant to examine written statements of state's witnesses was not error where state statute limited discovery in criminal cases to only those statements made by the defendant. *Pique v State* (Tenn Crim) 499 SW2d 4.

Tennessee Code does not specifically require furnishing of statements of prospective prosecution witnesses for pretrial inspection. *Williams v State (Tenn Crim) 491 SW2d 862*.

See *Aldridge v State (Tenn Crim) 470 SW2d 42*, § 16[a].

Defendant's preliminary motion to be allowed access to such information as state might have affecting character, credibility, conflicting statements and motives of state's witnesses did not fall within provisions of Tennessee discovery statute regarding books, papers, documents, or tangible objects belonging to defendant or others, but was conclusionary type of subjective information obtained from witnesses, not made available by statute; moreover, court was not required to permit blanket inspection of state's files or "fishing expedition." *Elliott v State (Tenn Crim) 454 SW2d 187*.

[\*11i] Vermontn123

Section 6727, Title 13, of the Vermont statute, which became effective June 7, 1961, provides that upon motion of a respondent at any time after the filing of an indictment, information, or complaint, the court may order the prosecuting attorney to permit the respondent to inspect and copy or photograph designated books, papers, documents, statements, or other objects, obtained from or belonging to the respondent upon showing that the items sought may be material to the preparation of his defense and that the request is reasonable.

Holding that the Vermont statute referred to above did not cover statements made by an accomplice, the court in *State v Anair (1962) 123 Vt 80, 181 A2d 61*, reversed an order granting a defendant permission to inspect before trial any statement made by an accomplice. The court also noted that the right to inspect such a statement in advance of trial does not exist at common law.

Although defendants in narcotics sale prosecutions were entitled to have prosecutor disclose information within his possession and control to defense counsel, including names and addresses of persons known by government to have knowledge of relevant facts, under criminal procedure rule, nothing in rule required prosecution to discover information that it did not possess or control such as in-depth investigation of possible aliases which prosecution witness had used in past or to make available to defense information not under prosecution's control that would aid in impeaching prosecution witness. *State v Clark (1977, Alaska)* 568 P2d 406.

Defendants, who were prison inmates under murder charge, were not entitled to disclosure of information, relating to lists of inmates, defendants' connection with certain organizations, and departmental records, that was specifically excluded from discovery by state statutes. *Procurier v Superior Court of Monterey County*, 35 Cal App 3d 207, 110 Cal Rptr 529.

Colorado Rule of Criminal Procedure 16, as amended, contemplates limited discovery prior to preliminary hearing but is not designed to convert preliminary hearing into mini-trial; defendant was entitled to obtain names of those witnesses who would be called at preliminary hearing and relevant statements which those witnesses might have provided to district attorney. *People v. Kingsley*, 187 Colo. 258, 530 P.2d 501 (1975).

See *People v. Maestas*, 183 Colo. 378, 517 P.2d 461 (1973), § 16[a].

Although Colorado Rule of Criminal Procedure dealing with discovery and inspection of prosecution evidence was applicable at pretrial hearing upon motion to suppress, as well as at actual trial, court did not err in refusing motion for production of purported statements of witnesses at such hearing where it was shown that as to one witness no written statement was in existence, and that as to other, his statement was not in possession and control of prosecution. *Dickerson v. People*, 179 Colo. 146, 499 P.2d 1196 (1972).

See *People v Smith*, 185 Colo 369, 524 P2d 607, § 16[a].

Under Colorado Rules of Criminal Procedure, accused in murder prosecution should have been permitted discovery of names of those whose prints had been compared with palm print on broken bottle and with unidentified prints on cash register, and should also have been allowed to examine photographs of crime scene and to inspect statements which he gave prior to time he testified at trial. *Hervey v People* 178 Colo 38, 495 P2d 204.

See *People v Peterson* (1977) 40 Colo App 102, App) 576 P2d 175, § 8.

In robbery prosecution, police-report copy of witness' statement was not discoverable prior to trial, since practice book limited availability of such statement until witness testified on direct examination at trial. *State v Davis* (1978) 175 Conn 250, 397 A2d 1347.

In prosecution for traveling unreasonably fast, defendant was not entitled as of right, under criminal discovery rule, to maintenance and calibration records of radar device where supervisor of state police radio division appeared as defense witness and brought those records to court; defendant was not entitled to radar manufacturer's operational and set-up manuals where he could have obtained requested manuals from manufacturer; defendant was not entitled to radar training record of arresting officer where officer testified at trial that no such records were kept; defendant was not entitled to description of location of officer's vehicle and orientation of radar device nor explanation of how officer identified defendant's vehicle as such matters were properly subject of cross-examination. *State v Stoll* (1983) 39 Conn Supp 313, 464 A2d 64.

In prosecution for murder, kidnapping and possession of a weapon, statute authorizing notices to produce books, writing or other documents in possession, custody, or control of opposite party could be used to compel evidence which would be admissible and of use to defendant, but notice to produce could not be used to require production of district attorney's work product or law enforcement officers' files. Material which prosecution failed to make available under separate Brady motion, concerning prior convictions of witness, was not material either to defendant's guilt or punishment and therefore was not grounds for reversal. *Wilson v State* (1980) 246 Ga 62, 268 SE2d 895, cert den 476 US 1153, 449 US 1103.

Under discovery statute, a prosecutor is required to permit the defendant to inspect and copy or photograph certain items, including photographs, that are within the possession, custody, or control of the state or prosecution. West's *Ga.Code Ann. § 17-16-4(a)(3)*. *Monroe v. State*, 614 S.E.2d 172 (Ga. Ct. App. 2005).

In prosecution for aggravated assault, trial court properly denied defendant's motion to require production of police reports and summaries where such materials were not "books, writings or other documents or tangible things" subject to statutory motion to produce. *Carter v State* (1979) 150 Ga App 119, 257 SE2d 11.

Hawaii Rule of Criminal Procedure providing that no statement made by prospective government witness shall be subject of discovery or inspection until witness has testified at trial of case, barred discovery requested by defendant of all written or recorded statements of codefendant. *Chung v Lanham*, 53 Hawaii 617, 500 P2d 565.

Under Hawaii Rules of Criminal Procedure, no statement of report in possession of state which was made by government witness for prospective government witness (other than defendant) to agent of government is subject to discovery or inspection until such witness has testified on direct examination at trial. *State v Kahinu*, 53 Hawaii 536, 498 P2d 635, cert den 409 US 1126, 35 L Ed 2d 258, 93 S Ct 944.

Idaho rules give trial court broad discretion in granting or denying motion for discovery, and trial court did not abuse discretion in denying motion for prosecutor to produce certain instruments listed in motion and to permit defendant to enter, inspect, and photograph premises allegedly burglarized. *State v Bailey*, 94 Idaho 285, 486 P2d 998.

While interrogatories might properly be used in criminal cases, it was within discretion of trial court to refuse to allow interrogatories where interrogatories sought were overbroad and information sought could have been obtained through other discovery techniques. *State ex rel. Grammer v Tippecanoe Circuit Court* (1978, Ind) 377 NE2d 1359.

Under statute providing that defendant in criminal case could "examine witnesses conditionally or on notice or commission, in the same manner and with like effect as in civil actions," trial court did not err in denying 17-year-old

first degree murder defendant's right to file pretrial interrogatories directed to prosecutor. *State v McGhee* (1979, Iowa) 280 NW2d 436, cert den 444 US 1039, 62 L Ed 2d 674, 100 S Ct 712, reh den 445 US 920, 63 L Ed 2d 606, 100 S Ct 1285.

See *Hadjis v Iowa Dist. Court of Linn County* (1979, Iowa) 275 NW2d 763, § 13[a].

See *State v Shepherd* (1983) 232 Kan 614, 657 P2d 1112, § 4[b].

In prosecution for murder, court's refusal to grant defendant's request for discovery of all tape recordings and written statements of all persons contacted by prosecution during investigation of case, and for inspection of any documents made by any officer regarding case was not error, where defense counsel admitted that discovery statute had been complied with, and defense counsel had opportunity to inspect prosecutor's file prior to trial. *State v Schlicher* (1982) 230 Kan 482, 639 P2d 467.

Discovery under state rules of criminal procedure require only that state disclose, by way of discovery, those things that are known by attorney of state to be in possession, custody, or control of state. *Sweatt v Commonwealth* (1977, Ky) 550 SW2d 520.

See *Deskins v Commonwealth* (Ky) 512 SW2d 520, cert den 419 US 1122, 42 L Ed 2d 822, 95 S Ct 806, § 13[b].

Kentucky Rules of Criminal Procedure do not authorize pretrial inspection of statements made by prospective witnesses; however, accused is entitled to inspect any confession which he himself has made. *Robinson v Commonwealth* (Ky) 490 SW2d 481.

Kentucky Rules of Criminal Procedure authorizing court to permit defendant to inspect and copy documents, photographs, or tangible objects in possession of Commonwealth do not authorize pretrial discovery of reports, memoranda, or other documents made by officers or agents of Commonwealth in connection with investigation or prosecution of case; thus, defendants' requests for photographs upon which lineup witnesses were asked to indicate their identification of any participants in robbery, and for names of all witnesses who failed to so identify any of defendants, were properly denied by trial court. *Pankey v Commonwealth* (Ky) 485 SW2d 513.

Under Kentucky Rule of Criminal Procedure, court may direct Commonwealth to permit defendant to copy or photograph any relevant results or reports of scientific tests or experiments that are known by Commonwealth attorney to be in possession of Commonwealth; hence, it was error for trial court to refuse to order Commonwealth to provide defendant opportunity to inspect reports of chemist who analyzed narcotic which defendant allegedly sold. *James v Commonwealth* (Ky) 482 SW2d 92.

Discovery for purpose of possibly using evidence discovered to make showing of antagonistic defense is not within bounds of Louisiana's criminal discovery procedure. *State v Hunter* (La) 340 So 2d 226.

As a defendant in a criminal prosecution has no right to full pre-trial discovery under Louisiana jurisprudence, an oral statement by a defendant reduced to writing by an undercover agent, but not subscribed to by the defendant, could be introduced in evidence by the State as an oral statement, even though the State, in response to the motion for production of confession, answered that it was not in possession of any "written or stenographically recorded, or otherwise recorded, statement or confession signed or unsigned" by the defendant since the response did not imply that the State had no oral statement, and reference to "otherwise recorded" statements applied only to a videotaped or tape-recorded statement. *State v Perkins* (La) 337 So 2d 1145.

See *State v Engstrom* (1982, Me) 453 A2d 1170, § 16[a].

See *State v Furrow* (1981, Me) 424 A2d 694, § 22[a].

In burglary prosecution in which defendant made request for discovery under rule of criminal procedure providing for automatic discovery of all statements made by defendant, trial court erred in denying motion for mistrial upon testimony of officer concerning statements made by defendant contained in nondisclosed report, notwithstanding prosecutor's professed ignorance of report; rule requires diligent inquiry of police agencies by prosecutor as to what automatically discoverable information exists, and automatic nature of rule does not allow prosecutor to assume without inquiry that defense counsel is aware of report and contents. *State v Thurlow* (1980, Me) 414 A2d 1241.

In trial for felonious homicide court did not abuse discretion in denying defendant's request for discovery of financial reimbursement of prosecution witnesses in other trials where such information was available in public records, and discovery of psychiatric records of prosecution witness where those records were not in possession of prosecuting attorney. *State v Morton* (1979, Me) 397 A2d 171.

Pursuant to discovery rule providing for written recorded statements or confessions of defendant, defendant was entitled to inspection of undercover agent's handwritten notes which contained paraphrased statements allegedly attributed to defendant. *State v Sherburne* (Me) 366 A2d 1127.

Maine Rule of Civil Procedure 16(a), providing for discovery of written or recorded statements of witnesses, did not require the state to disclose the names of potential witnesses. *State v Tullo* (Me) 366 A2d 843.

See *State v Buzynski* (Me) 330 A2d 422, § 21[d].

Under Maine Rule of Criminal Procedure directing court to order prosecuting attorney to permit defendant to inspect and copy or photograph designated books, papers, documents, or tangible objects which are within possession, custody, or control of state, court did not err in denying pretrial request for criminal record of unindicted coconspirator where there was no showing that such record was within possession of state. *State v Toppi* (Me) 275 A2d 805.

See *Commonwealth v Lapka* (1982) 13 Mass App 24, 429 NE2d 1029, app den 385 Mass 1103, 440 NE2d 1174, § 13[d].

See *State v Caldwell* (1982, Minn) 322 NW2d 574, § 22[c].

Trial court in murder prosecution did not err in denying defendant's motions under state discovery statute for production of list of all sawed-off shotguns in possession of police and record of all arrests and convictions of state's witnesses, where there was no indication that state possessed such information regarding shotguns or that such information was material to defense, and where discovery statute did not entitle defendant to information concerning prior arrests of witnesses. *State v Smith* (1979) 92 NM 533, 591 P2d 664.

Question of which police records are "exempt property" not discoverable by defendant under discovery rules must be determined on ad hoc case-by-case basis and in camera inspection by court should be conducted of all disputed documents. No paper should be deemed absolutely exempt from discovery merely because of its label as "work product" or "opinion" or "research product" or "interior investigatory report" if, in fact, such item contains information that defendant would otherwise have right to discover. Likewise, item should not be automatically discoverable simply because it is prepared and completed upon regularly used police business form, filed in ordinary course of business, if it clearly contains information that defendant is not entitled to discover. *People v Simone* (1977) 92 Misc 2d 306, 401 NYS2d 130.

Witnesses' statements, notes of memoranda by police officers of witnesses' statements, photographs of defendant, names and addresses of persons interviewed by District Attorney's office were nondiscoverable work products exempt under

statute unless such material was favorable to defendant, but routine police reports containing information and which were required to be filed in normal course of business by police agency's regulations would not be exempt under statute; hence, defendant would be entitled to handwritten notes made by police of their conversations with him under statute mandating that discovery must be ordered with respect to "written or reported statements made by the defendant to a public servant engaged in law enforcement activity" and manner in which defendant's oral statements had been written or recorded was immaterial, and defendant would also be entitled to discovery of witnesses' names and addresses where defendant, at time he was alleged to have resisted arrest, was intoxicated and his memory of the event could have been affected. *People v Harrison*, 81 Misc 2d 144, 364 NYS2d 760.

Under New York statute discovery of reports concerning physical or mental examinations and scientific tests would be granted to extent such material was in possession or control of district attorney or was subsequently acquired, and defendant's application for copies of lineup or other photographs would be granted; motion for order directing that defendant be provided with copies of alleged written or recorded admissions or statements of all defendants would be granted to extent of defendant's own statements furnished and annexed to district attorney's opposing affidavit, but discovery of co-defendant's statement would be denied, and order directing disclosure of all exculpatory material would be denied because this obligation is imposed on prosecution at all times and is explicitly acknowledged by them. *People v Player*, 80 Misc 2d 177, 362 NYS2d 773.

Discovery of written or recorded statements made by defendant was not mandated pursuant to section of criminal procedural law, and defendant's motion for discovery should have been denied with leave to renew where defendant failed to set forth sworn allegations from which court might have determined that interest of justice would be served by order of discovery. *People v Lapetti*, 79 Misc 2d 323, 361 NYS2d 104.

See *People v Goetz*, 77 Misc 2d 319, 352 NYS2d 829, § 25[d].

See *People v Utley*, 77 Misc 2d 86, 353 NYS2d 301, § 13[d].

In prosecution for assault of off duty police officer who allegedly engaged in unwarranted and unprovoked assault on defendants, under state rules of criminal procedure defendants were entitled to discovery of test and records dealing with discharge or attempted discharge of officer's weapon as well as any report or memorandum made by officer concerning incident. *People v Torres*, 77 Misc 2d 13, 352 NYS2d 101.

Under statute, judge exceeded his authorized powers in directing discovery of police reports containing statements of witnesses and police reports of complaining police officer or other officer present at arrest. *Vergari v Kendall*, 76 Misc 2d 848, 352 NYS2d 383, app dismd (App Div) 360 NYS2d 1003.

Personnel records of police officers who were prospective witnesses in narcotics prosecution were not discoverable under state rules of criminal procedure requiring that material sought be within possession, custody, or control of district attorney. *People v Norman*, 76 Misc 2d 644, 350 NYS2d 52.

Under state rules of criminal procedure, defendant charged with murder was entitled to discovery of all police reports and records, including all photographs pertaining to his case, but excluding statements of all witnesses and work product. *People v Rice*, 76 Misc 2d 632, 351 NYS2d 888.

See *People v Bottom*, 76 Misc 2d 525, 351 NYS2d 328, § 8.

In prosecutions arising out of riots at Attica prison, under circumstances defendants were entitled to discovery of all potentially exculpatory evidence, their own statements, statements of co-defendants (subject to in camera inspection by trial judge), certain photographs prosecutor had in its possession, their own records of arrests and convictions, certain other prison records, results of various tests, experiments, and analysis (excluding reports of ballistics experts), notes

passed between specified defendants and certain prisoners, as well as notes received from hostages, and notes from correction officers and state troopers, all photographs, movies, and video tapes taken at scene of uprising, any and all weapons which state intended to introduce into evidence or which were recovered from prison, written reports of any physical examinations of defendants, and any material seized from defendants which was charged to be contraband: under circumstances defendants were not entitled to discovery of files of special prosecutor, statements of witnesses and prospective witnesses, statements of other persons who were neither witnesses nor prospective witnesses, names and addresses of witnesses, parole files of prisoner-witnesses, employment records of all guards during period in question, communications between correction officers and governor and his staff, draft of book relating to uprising, certain tape recordings, press releases, diary entries, and national guard record, and certain letter of district attorney. *People v Bennett*, 75 Misc 2d 1040, 349 NYS2d 506.

See *People v Robinson*, 75 Misc 2d 807, 349 NYS2d 259, § 16[a].

Television tape recording of Breathalyzer examination given to defendant charged with drunken driving came well within meaning of words "physical examination" as used in New York statute providing for discovery of reports and documents, or portions thereof, concerning physical or mental examinations, or scientific tests and experiments made in connection with case. *People v Royster*, 73 Misc 2d 89, 341 NYS2d 559.

Under New York statute patterned on *Rule 16, Federal Rules of Civil Procedure*, defendant was entitled to discovery of any written or oral statements made by him, and to inspection of allegedly forged lottery tickets and writings relative to scientific tests performed thereon; however, he was not entitled to discovery of statements of other persons, or to list of witnesses who had appeared before grand jury. *People v McMahan*, 72 Misc 2d 1097, 341 NYS2d 318.

Under New York Rule of Criminal Procedure permitting discovery and inspection of any statement or confession of defendant made to a public servant engaged in law enforcement activity, defendant was entitled to discovery of written statement made by him to official of town building department, since such official was engaged in law enforcement activity. *People v Brogan*, 70 Misc 2d 282, 332 NYS2d 499.

Under New York criminal procedure statute, modeled on Federal Rule 16, defendant was entitled to discovery of copies of electronically recorded conversations between him and police officers whom he allegedly attempted to bribe, such recordings being "statements" of defendant within meaning of statute even though they were made before defendant was arrested, and even though defendant was unaware that recordings were being made. *People v Zacchi*, 69 Misc 2d 785, 331 NYS2d 86.

Pretrial discovery of oral and written statements made by victim of burglary, kidnapping, and rape to law enforcement authorities was explicitly prohibited by statute. Further, failure to allow pretrial discovery of such statements, which defendant contended were critical to his cross-examination of victim at voir dire hearing conducted prior to trial to determine admissibility of her photographic identification of defendant, was not prejudicial when statement was made available to defendant for impeachment purposes during trial. *State v Williams (1983)* 308 NC 357, 302 SE2d 438.

See *State v Alston (1983)* 307 NC 321, 298 SE2d 631, § 18.

See *State v Lake (1982)* 305 NC 143, 286 SE2d 541, § 16[c].

See *State v Tatum*, 291 NC 73, 229 SE2d 562, § 17.

North Carolina statute authorizes pretrial order requiring state to produce for inspection and copying specifically identified exhibits to be used in trial, but it does not encompass broad-scale discovery contemplated by defendant's motion to produce names of all state witnesses and copies of any statements given by them and in possession of state. *State v Peele*, 281 NC 253, 188 SE2d 326.

Under North Carolina statute stipulating that for good cause shown, trial judge shall order state to produce for inspection and copying any specifically identified exhibits to be used in trial of case, provided that prior to issuance of such order the accused shall have made request to counsel for state for such inspection, copying, or examination, and that such request shall have been denied, accused is entitled to discovery when either he or his counsel has made written request to state's counsel to produce a specifically identified exhibit to be used in trial, and such request has been denied or gone unanswered for more than 15 days. *State v Macon*, 276 NC 466, 173 SE2d 286.

See *State v Morgan* (1983) 60 NC App 614, 299 SE2d 823, § 27[a].

Defendant in murder prosecution had no right under North Carolina statute to compel production of written statements or reports made by state witnesses where discovery statute specifically indicated that, absent circumstances not presented by this case, state was not required to produce statements made by prospective witnesses or witnesses of state to anyone acting on behalf of state. *State v McDougald* (1978) 38 NC App 244, 248 SE2d 72.

It was error for trial court to deny, without inspection of statements in camera, defendant's motion during trial for inspection of prior statements made by prosecution witnesses to police, but error was harmless where defense actually knew contents of statements. *State v Miller* (1978) 37 NC App 163, 245 SE2d 561, cert den (NC) 248 SE2d 255.

Under rule of criminal procedure governing discovery and inspection, the prosecution must disclose, upon the defendant's request, names and statements of witnesses the prosecution intends to call and also the relevant statements within the prosecution's possession or control of other persons. Rules Crim. Proc., Rule 16. *State v. Thorson*, 2003 ND 76, 660 N.W.2d 581 (N.D. 2003).

Criminal Rule 16 disallowing discovery or inspection of statements made by witnesses or prospective witnesses to defense attorney or his agents applied to tape recordings of statements made by prosecution witness to defense attorney. *State v Lockett*, 49 Ohio St 2d 71, 3 Ohio Ops 3d 41, 358 NE2d 1077.

Signed form waiving Miranda constitutional rights constituted "statement of defendant" within meaning of Criminal Rule 16 permitting discovery of statement of defendant. *State v Hall*, 48 Ohio St 2d 325, 2 Ohio Ops 3d 458, 358 NE2d 590, vacated, in part, on other gnds 438 US 910, 57 L Ed 2d 1154, 98 S Ct 3134.

Where prosecutor, in response to defendant's motion to be permitted to inspect papers which prosecutor intended to use at trial, answered that papers were in custody of police and where police officer made everything available to defense counsel at headquarters, rules permitting defendant to inspect and copy were complied with as police and prosecutor are not required to take counsel by hand and sift through belongings. *State v Mitchell*, 47 Ohio App 2d 61, 1 Ohio Ops 3d 181, 352 NE2d 636, motion over.

Under Oklahoma statute, accused person is entitled to copy of sworn statement which he gives to police or to district attorney. *White v State (Okla Crim)* 498 P2d 421.

Criminal discovery statute providing for inspection of certain items "in criminal actions in accordance with the provisions of subsection (1) of this section and no other" means that Oregon civil discovery statute is not applicable in criminal cases. *State v. Little*, 249 Or. 297, 431 P.2d 810 (1967).

Local court rule concerning discovery was interpreted to except from its 15-day time limitation any motion to produce evidence under criminal discovery statutes. *State v Simpson* (1979) 40 Or App 83, 594 P2d 425.

In prosecution for driving while under influence of intoxicants, trial court did not err in refusing to strike testimony of eyewitnesses, notwithstanding failure of state to disclose existence of audiotape recording of eyewitnesses taken at time

of defendant's arrest, where lack of prejudice supported finding that no sanction for violation of state discovery statute was warranted, and where speculation regarding contents of tape was insufficient to establish denial of due process. *State v Peters* (1979) 39 Or App 109, 591 P2d 761.

Oregon statute imposing obligation to afford adverse party opportunity to inspect or copy material did not require that prosecutor deliver material to defense counsel at his office or to defendant at his home or jail cell and obligation was fulfilled where material was available to defendant or his representative at prosecutor's office, notwithstanding that defendant failed to avail himself of opportunity afforded him by prosecutor. *State v Addicks* (1978) 34 Or App 557, 579 P2d 289.

See *State v McKeen* (1978) 33 Or App 343, 576 P2d 804, § 17.

Where defendant's attorney sent letter to district court entering plea of not guilty to charge of driving while under influence of intoxicants which concluded with sentence: "By copy of this letter I am demanding reciprocal discovery from the District Attorney's office," but where defendant did no more than to send copy of letter to district attorney's office, demand for discovery was insufficient to support dismissal of charges based on prosecution's alleged failure to allow pretrial discovery as provided by statute. *State v Sheppard* (1978) 32 Or App 345, 573 P2d 1276.

In prosecution for violation of motor vehicle traffic laws, although defendant's counsel sent letter to district attorney making demand for pretrial discovery and copies of requested documents were not provided to defendant until two days before date set for trial, there was no violation of discovery statute where statute provided no specific time limit within which requested material must be furnished to defendant, but merely stated that such material should be furnished "as soon as practicable," and where reason documents were not provided sooner was administrative delay on part of motor vehicle department in forwarding them to district attorney's office. *State v Carsner* (1977) 31 Or App 1115, 572 P2d 339.

Under pretrial discovery statute requiring district attorney to disclose to defendant names and addresses of persons whom he intends to call as witnesses, together with their relevant written or recorded statements or memoranda of any oral statements of such persons, fragmentary notes made by arresting officer at time he arrested defendant for driving under influence of intoxicating liquor did not constitute "statement" within meaning of statute and, thus, were not subject to production thereunder. *State v Bray* (1977) 31 Or App 47, 569 P2d 688.

"Lifts" of possible fingerprints taken at scene of crime, some of which were identified as fingerprints of defendant, were not included in subject matter of Oregon discovery statute. *State v. Hockings*, 29 Or. App. 139, 562 P.2d 587 (1977).

Statements which have been or are in possession of police are considered to have been in possession or control of prosecuting attorney and under statute providing for disclosure by district attorney to defendant of identity of witnesses together with their relevant written or recorded statements as soon as practicable following filing of indictment, destruction of original report of undercover officer after typewritten report had been prepared by another officer was violation of state's statutory duty even though destruction took place prior to indictment. *State v Johnson*, 26 Or App 651, 554 P2d 624.

Trial court properly refused defense request for names of prosecution witnesses and inspection of vehicle in which victim's body was found where defendant did not specify exceptional circumstances or compelling reasons in motion. *Commonwealth v Garcia* (1978) 478 Pa 406, 387 A2d 46.

See *Commonwealth v Jenkins* (1978) 476 Pa 467, 383 A2d 195, later app 273 Pa Super 227, 417 A2d 251, § 13[d].

Under Pennsylvania Rule generally proscribing pretrial discovery of prosecution evidence, defendant in murder prosecution was not entitled to pretrial inspection of laboratory reports concerning certain items of appellant's clothing in possession of Commonwealth. *Commonwealth v Stafford*, 450 Pa 252, 299 A2d 590, cert den 412 US 943, 37 L Ed 2d 404, 93 S Ct 2775.

Pennsylvania Rules of Criminal Procedure have given trial courts authority to order pretrial inspection of written confessions and written statements made by defendant, but they specifically proscribe pretrial disclosure and inspection of other evidence in possession of Commonwealth, including oral admissions, unless defendant can show existence of circumstances and compelling reasons why such should be permitted. *Com. v Turra*, 442 Pa 192, 275 A2d 96.

Rule 310 of Pennsylvania Rules of Criminal Procedure was adopted to incorporate general rule in criminal proceedings that in absence of exceptional circumstances and compelling reasons, accused has no right to inspection or disclosure before trial of evidence in possession of prosecution. *Lewis v Court of Common Pleas*, 436 Pa 296, 260 A2d 184.

See *Commonwealth v Brocco* (1979, Pa Super) 396 A2d 1371, § 6[b].

See *Commonwealth v Dalahan* (1979, Pa Super) 396 A2d 1340, § 16[a].

Denial of accused's petition for discovery seeking police investigative records, names of all persons involved in investigation and of persons with whom all investigators communicated, and all statements of witnesses, documents and physical evidence pertaining to accused's arrest and indictment was proper; rule did not expressly provide for discovery of these items. *Commonwealth v Mervin* (Pa Super) 326 A2d 602.

Under Rhode Island statute providing that where prosecution is in possession of tangible evidence which may be used at trial of any defendant, defendant shall have right, upon demand given in writing to prosecuting authorities, to inspect, examine, or copy such evidence at time and place to be fixed by court of proper jurisdiction, term "tangible evidence" includes real evidence such as weapons, clothing, photographs, maps, ammunition, knives, etc., but it does not include testimonial evidence such as statements, or documents which contain recordings or transcriptions of evidence testimonial in its nature, or lists of witnesses; moreover, statute requires that tangible evidence be in possession of prosecution and that right to examine shall accrue upon demand made in writing to prosecuting authority, such demand to be reasonably specific in identifying particular items for which disclosure is sought. *State v Ricci* (RI) 268 A2d 692.

See *Hernandez v State* (1982, Tex App 4th Dist) 636 SW2d 611, § 13[b].

See *Mott v State* (Tex Crim) 543 SW2d 623, § 18.

There was no error in failing to grant defendant's various motions for discovery where his request for grand jury testimony failed to show particularized need for such testimony, his pretrial request for statements of each witness was specifically exempted under statute as "work product," and where under statute it was necessary for defendant to show statutory requisites of good cause, materiality, possession by State, and that items requested existed. *Hoffman v State* (Tex Crim) 514 SW2d 248.

Blanket request for examination of all items of information favorable or useful to defendant was denied where motion did not specifically designate evidence referred to nor reflect "good cause" as required by state rule of criminal procedure, there was no showing that evidence sought was material to defense, that evidence was non-privileged, that request was reasonable, and that items demanded were in possession or control of state. *Jackson v State* (Tex Crim) 501 SW2d 660.

Analysis report in narcotics case is work product of prosecution, and as such is exempt from discovery under Texas statute. *Alba v State* (Tex Crim) 492 SW2d 555.

Written statements of witnesses are specifically excluded from discovery under provisions of Texas statutes. *Graham v State (Tex Crim) 486 SW2d 92.*

Under Texas statute setting out procedure for discovery, it was not error to overrule motion to produce police report where there was no showing that any such report was made by any officer; neither was there error in overruling further motion to produce documents, statements, tests, and examination of evidence, since motion was too broad to be effective and it did not show good cause. *Solomon v State (Tex Crim) 467 SW2d 422.*

[\*12] Applicability of civil statute or rule of civil procedure relating to discovery

In a number of cases the court, in ruling on the defendant's right to inspection of evidence in the possession of the prosecution, held that the civil statute or the code of civil procedure providing for discovery and inspection of evidence in the possession of an adverse party was not applicable to criminal cases.

## VERMONT

*State v Fox* (1961) 122 Vt 251, 169 A2d 356

Thus, the defendant's contention that the trial court committed error in denying his motion under the code of civil procedure for inspection of certain documents in the possession of the district attorney was rejected in *People v Ratten* (1940) 39 Cal App 2d 267, 102 P2d 1097, the court holding that the code of civil procedure invoked by the defendant was applicable to civil actions only.

In *State v Jeffries* (1925) 117 Kan 742, 232 P 873, wherein the defendant was charged with the murder of her husband, the court, reversing an order requiring the prosecuting attorney to turn over to the defendant's counsel for inspection all letters written by the defendant to her husband and also to another person, which were in the possession of the prosecuting attorney and which he intended to use in evidence on the trial of the defendant, rejected the defendant's contention that the provision of the Kansas Civil Code relating to obtaining an inspection of books, papers, and documents which were to be used in evidence was made applicable in criminal cases by the so-called "adoption section" of the Kansas Criminal Code providing that the provisions of law in civil cases "relative to compelling the attendance and testimony of witnesses, their examination, the administration of oaths and affirmations, and proceedings as for contempt, to enforce the remedies and protect the rights of parties," should extend to criminal cases so far as they were in their nature applicable thereto. The court held that since the enumerated instances in the adoption section excluded all unspecified instances, and since there was no right to inspection of the letters in question except by virtue of express authorization by the legislature, there was no power in the trial court to make the order requiring the prosecuting attorney to turn over the letters for inspection by the defense.

In *Hameyer v State* (1947) 148 Neb 798, 29 NW2d 458, the court, in holding that there was no abuse of discretion in denying the defendant's pretrial motion for permission to inspect a certain document, held that while the defendant, in support of the motion, relied on a section in the Nebraska civil statute providing that either party or his attorney may demand of the adverse party an inspection of a book, paper, or document in his possession or under his control, containing evidence relating to the merits of the action or defense therein, this statute should not be applied to criminal cases. The court said that the statute was improperly applied to a criminal case in *Marshall v State* (1927) 116 Neb 45,

215 NW 564, *infra* § 24[b].

In *Pinana v State* (1960) 76 Nev 274, 352 P2d 824, the court, in upholding the denial of the defendant's request for disclosure of certain statements and documents, held that the Nevada Rules of Civil Procedure providing for pretrial disclosure in civil cases did not apply to criminal cases, irrespective of the statutory provision that the rules of evidence in civil actions should be applicable also to criminal actions, except as otherwise provided.

See also *People v Abbatiello* (1965) 46 Misc 2d 148, 259 NYS2d 203, where the court, in ruling on the defendant's motion for inspection of statements allegedly made by him, said that while in some areas there should be a correspondence in the extent of pretrial disclosure between civil and criminal actions, there are substantial points of divergence due to differences in policy considerations and in the mode of proceeding generally, and that, therefore, the various facets of the subject of pretrial disclosure in criminal actions must be separately analyzed with such considerations in mind, even though the analogous procedures in civil actions may also be taken into consideration.

In *State v Yeoman* (1925) 112 Ohio St 214, 147 NE 3, the court, in holding that the defendant was not entitled to pretrial inspection of a written confession signed by her and in the possession of the prosecuting attorney, said that the statute providing that the Ohio Code of Civil Procedure should be extended to criminal cases insofar as it related to the attendance, testimony, examination, and oaths of witnesses did not cover the inspection of documents. The view that the Ohio Code of Civil Procedure providing for inspection of books and documents is not applicable to criminal cases was also supported in the following Ohio decisions: *State v Johnson* (1950, App) 57 Ohio L Abs 524, 94 NE2d 791, reh den 58 Ohio L Abs 334, 96 NE2d 604, app dismd 154 Ohio St 236, 43 Ohio Ops 41, 94 NE2d 797, *infra* § 13[c]; *State v Hahn* (1937, CP) 10 Ohio Ops 29, 25 Ohio L Abs 449, affd 59 Ohio App 178, 11 Ohio Ops 560, 27 Ohio L Abs 27, 17 NE2d 392, app dismd 133 Ohio St 440, 11 Ohio Ops 106, 14 NE2d 354, app dismd 305 US 557, 83 L ed 351, 59 S Ct 75, *supra* § 3.

Concluding that the Ohio Code of Civil Procedure providing for inspection of books and documents was not designed or intended to apply in criminal cases, notwithstanding that such provision was contained in a chapter entitled "Evidence," and that another statute provided that "the rules of evidence in civil causes, where applicable, govern in all criminal causes," the court in *State v Corkran* (1965) 3 Ohio St 2d 125, 32 Ohio Ops 2d 132, 209 NE2d 437, upheld the denial of the defendant's motion for inspection of a statement made by him respecting the crime involved. The defendant relied on *State v Fox* (1938) 133 Ohio St 154, 10 Ohio Ops 218, 12 NE2d 413, where the court, in dealing with the questions whether the appellant, who was indicted and tried jointly with others for a noncapital felony, should have been tried separately, and whether a confession made by one of the appellant's codefendants, containing statements implicating the appellant, should have been excluded from evidence in the trial, said that the rules of evidence in civil cases should govern all criminal cases, insofar as applicable, and that defense counsel in the case could have inspected before trial the confession of the appellant's codefendant in question by invoking the relevant discovery provisions in the Ohio Code of Civil Procedure, and could have predicated an application for a separate trial of the appellant on the basis of the contents of such confession. However, the court in the Corkran Case said that the dictum contained in the Fox Case "was not carried into the syllabus of the case and is not controlling over definite holdings to the contrary."

In *State v Fox* (1961) 122 Vt 251, 169 A2d 356, a prosecution for operating a motor vehicle while under the influence of intoxicating liquor, the court, upholding the denial of the defendant's pretrial request for permission to inspect an accident report on file with the police department (the present criminal proceeding being prompted by the accident which was the subject of the requested report), held that the Vermont statute providing that upon motion of any party and upon notice to all other parties and the person having custody, possession, or control of them, the court in which an action was pending might order any person to produce and permit the inspection of any designated documents, papers, books, accounts, letters, photographs, objects, or tangible things, did not extend to criminal proceedings.

In some Connecticut cases, on the other hand, it was held that the provisions in the Connecticut Practice Book for the production of documents, papers, and physical objects were applicable to criminal cases.

See also *State v Trumbull* (1961) 23 Conn Supp 41, 176 A2d 887, *infra* § 13[c], holding that under Connecticut rules of practice, rules for civil action should apply in criminal cases insofar as they were adapted to such proceedings.

Thus, concluding that the provisions in the Connecticut Practice Book for the production of reports, papers, documents, maps, and physical objects had been made available to the defendant in a criminal case by another provision in the same statute reading that the rules for civil actions were applicable in criminal cases insofar as they were adopted to such proceedings, the court in *State v Fay* (1963) 2 Conn Cir 369, 199 A2d 358, held that the defendant, charged with speeding, had the right to inspect before trial radar equipment which had provided a speed reading to be used as evidence against the defendant. The court rejected the prosecution's contention that the defendant did not have the right to inspect the radar machine before trial in view of the decision in *State v Cocheo* (1963) 24 Conn Supp 377, 190 A2d 916, *infra* § 16[a], wherein the court, in dealing with the producibility of a statement made by a prosecution witness, said that the rules of discovery contained in the Connecticut Practice Book "are not applicable in criminal cases, and we have no statutory provisions which require the listing of witnesses or permit obtaining the tenor of their testimony." Pointing out that the present case involved a machine which had provided a speed reading that was to be used in evidence, the court observed that the inspection of the machine was not the listing of witnesses or the obtaining of the tenor of their testimony, the matters with which the Cocheo decision was concerned; that the ruling in the Cocheo Case had no application in the present prosecution, since an inspection of the machine was not a disclosure of the prosecution's evidence; and that, in fact, the purpose of the inspection of the machine was to prepare the defendant's own evidence rather than to obtain the prosecution's evidence.

The view that the civil statute providing for discovery of documents in the possession of the adverse party is applicable to criminal cases was also apparently taken in some Missouri cases, although the defendant's request for production was denied under the circumstances.<sup>n128</sup>

Thus, in *State ex rel. Page v Terte* (1930) 324 Mo 925, 25 SW2d 459, a prohibition proceeding to enjoin the enforcement of an order requiring the prosecution to produce before trial, for inspection by the defendant, written statements of the witnesses whose names were indorsed on the information and other papers and documents in the prosecuting attorney's possession, the court held that the lower court's authority to make such an order must be found in the statute (relating to civil procedure) which authorized a trial court to order the production of a paper where it contained evidence material to the pending action, and that the application for production in the present case did not measure up to the requirements of the statute. Noting that it was incumbent upon the moving party to bring himself within the terms of the statute by alleging facts sufficient to show that the requested papers contained evidence material to the merits or defense of the case, the court pointed out that while the application in the present case, a prosecution for murder, called for the production of written statements of the witnesses and "all deeds, mortgages, bills of sale, books, documents, papers, or other written copies of evidence in the hands of the prosecuting attorney, which are in any way connected with the case then pending," there was no hint or suggestion as to the contents of these documents, and no facts were alleged tending to show that they contained any evidence material to the defense; that although the application for production stated that the requested documents were or might be material, such allegation was a mere conclusion of the pleader and presented no issue; that the witnesses' statements would be hearsay and therefore would not be admissible in evidence except by way of impeachment in the event they testified to a state of facts different from those contained in the written statements; and that the fact that it could not be determined in advance of the trial whether the statement of a prospective witness would become material or competent for any purpose clearly showed that the statute did not authorize the enforced production of the statements in question.

See also *State v Richetti* (1938) 342 Mo 1015, 119 SW2d 330, where the court, relying on the *Terte Case* (1930) 324 Mo 925, 25 SW2d 459, *supra*, refused to sustain the defendant's assignment of error based on the fact that the prosecuting

attorney refused to let the defendant's counsel examine written statements of certain prosecution witnesses taken before the trial.

<>

In other cases the court, assuming, but not deciding, that the civil statute or the code of civil procedure providing for inspection of books or documents was applicable to criminal cases, held that under the circumstances there was still no error in the trial court's ruling on the defendant's request for inspection of documents in the possession of the prosecution.

Thus, where the defendant petitioned for an order requiring the prosecuting attorney to produce for his inspection in advance of the trial certain documents alleged to be in the possession of the prosecution, and the trial court, in passing upon the petition, ordered such documents to be produced at the trial, but on appeal from a judgment of conviction the defendant argued that the relief granted in this regard was inadequate and deprived him of a timely opportunity to prepare his defense, and the defendant claimed the benefit of the statute which provided that in all cases where no special provision was made in the Criminal Code, the rules of pleading and practice in civil actions should govern, the court in *Weer v State* (1941) 219 Ind 217, 36 NE2d 787, reh den 219 Ind 229, 37 NE2d 537, held that, assuming that the Civil Code authorizing, under certain circumstances, inspection of any book, paper, or document in the possession of an adverse party was applicable in the present case, the right to have papers produced under that statute was not an absolute one, but was addressed to the sound discretion of the trial court, and that in the instant case there had not been shown such a clear abuse of discretion as would warrant a holding that there was reversible error.

Similarly, in *State v Kelton* (1957, Mo) 299 SW2d 493, the court, in holding that it was not error for the trial court to quash the defendant's subpoena to compel the production of a transcript of questions and answers taken at an interrogation of the defendant by the prosecuting attorney, held that assuming (without deciding) that the defendant would have the benefit of the Missouri statute pertaining to the production of documents and papers in civil cases, she did not bring herself within the terms of the statute, since the application for production was oral and there was no showing that the demanded statements contained evidence material to the merits or defense of the case. The court noted that a mere suspicion that a statement contains evidence material to the merits or defense of the case does not warrant an order for its production; and that the production of books and papers under the statute is not authorized for the purpose of prying into an adversary's preparation for trial.

In *State v Hall* (1918) 55 Mont 182, 175 P 267, the denial of the defendant's application for the production or inspection of a statement made by a prosecution witness to the prosecuting attorney was upheld, notwithstanding the defendant invoked a section in the Montana Civil Code providing that the trial court might, upon notice, order either litigant to permit the other to inspect documents or papers in his possession which contained evidence relating to the merits of the action or defense. Noting that the statute referred exclusively to such documents and papers as might be introduced in evidence, the court held that, assuming that the statute was applicable to criminal cases, there was no error in the denial of the production or inspection of the requested statement in the present case, since such statement could not have been introduced as substantive evidence. The court said: "The ex parte statement of the prosecuting witness could not have been introduced as substantive evidence, and, however helpful it might have been to defendant, he was not entitled to it. The statute does not require the state to lay bare its case in advance of the trial." As holding to the same effect, see *State ex rel. Keast v District Court of Fourth Judicial Dist.* (1959) 135 Mont 545, 342 P2d 1071, supra § 3.

And in *State v Cala* (1940, App) 20 Ohio Ops 400, 31 Ohio L Abs 97, 35 NE2d 758, the court, in rejecting the defendant's contention that it was error for the trial court to deny his pretrial request for inspection of confessions made by him, held that assuming, but not deciding, that the provision in the Ohio Code of Civil Procedure authorizing inspection of a book or document in the possession of the adverse party was made applicable to criminal cases by the statute providing that the rules of evidence in civil cases should govern in all criminal cases, insofar as they were

applicable, the defendant in criminal cases was still not entitled to inspection as a matter of absolute right, since under the language of the provision of the code of civil procedure in question, whether to grant or deny an inspection vested in the discretion of the trial judge, to be exercised in the light of all the surrounding circumstances under which the request was made. To the same effect is *State v Regedanz* (1953, CP) 54 Ohio Ops 76, 68 Ohio L Abs 81, 120 NE2d 480, wherein the court, in denying the defendant's request for inspection of the hospital report concerning a blood test taken of him, extensively reviewed the earlier Ohio decisions dealing with the applicability to criminal cases of the Ohio Code of Civil Procedure relating to inspection of books and documents, and then took the same approach as that taken in the *Cala Case* (1940, App) 20 Ohio Ops 400, 31 Ohio L Abs 97, 35 NE2d 758, supra.n129

Statute providing for production at trial of books, writings or other documents or tangible things in possession, custody or control of another party, was applicable to both civil and criminal cases, but statute was two-edged sword in that it obligated party desiring production of such items to also make disclosure. *Phillips v State* (1978) 146 Ga App 423, 246 SE2d 438.

See *People ex rel. Fisher v Carey* (1979) 77 Ill 2d 259, 32 Ill Dec 904, 396 NE2d 17, § 17.

Oregon civil discovery statute is not applicable to criminal cases, which are covered by separate criminal discovery statute. *State v Little* (Or) 431 P2d 810.

[\*III] Inspection or disclosure of particular kinds or types of evidence

[\*13] Accused's confession or statement made after offense<sup>131</sup>

[\*13a] Generally; inspection permitted

As to whether and under what circumstances an accused is entitled to inspect his confession or statement which was made after the alleged offense and which is in the possession of the prosecution, the decisions are divided. Either explicitly or by implication supporting the view that inspection by an accused of his confession or statement may be ordered in a proper case, the court in a number of cases permitted the defendant to inspect his confession or statement made after the alleged offense had been committed.

Holding that where an order requiring the prosecution to produce a statement made by the defendant is essential to the due administration of justice, the trial court has jurisdiction to issue such order under its inherent powers, the court in *State ex rel. Polley v Superior Court of Santa Cruz County* (1956) 81 Ariz 127, 302 P2d 263, upheld an order of the trial court requiring the prosecution to produce a stenographic transcript of statements made by the defendant to the county attorney, where it appeared that the defendant had suffered a bullet wound in the shooting affray in which the alleged killing with which he was charged had occurred, and that the statements in question were made at a hospital about 2 hours after an emergency operation when the county attorney asked questions concerning the circumstances surrounding the shooting. Stating that although the statements in question were not subject to discovery under Rule 195 of the Arizona Rules of Criminal Procedure,<sup>n132</sup> the court was free under its inherent residual power to permit broader discovery, and noting that an application for inspection such as the one involved in the present case is addressed to the sound discretion of the trial court and that such an application should be granted only under exceptional circumstances, the court concluded that in the exercise of sound discretion and as a matter of fairness to the defendant, it was essential to the administration of justice that the defendant was given an opportunity in advance of trial to inspect and copy his statements which he could obtain in no other way. The court rejected the prosecution's contention that the statements in question were a part of the "work product" of the county attorney.

See *Jones v State* (1948) 213 Ark 863, 213 SW2d 974, wherein the trial court denied the defendant's pretrial motion for an order requiring the prosecution to produce a copy of the defendant's confession, which was later offered in evidence at the trial, and the appellate court held that while the motion should have been granted, the denial thereof was not such prejudicial error as would call for the reversal of a judgment of conviction. The court pointed out that copying the confession would have furnished no evidence that it was not freely and voluntarily made.

Holding that application for pretrial inspection of a signed confession or admission or transcript of statements of an accused is addressed to the sound judicial discretion of the trial court, which has inherent power to order such an inspection in the interest of justice, the court in *Powell v Superior Court of Los Angeles County* (1957) 48 Cal 2d 704, 312 P2d 698, held that defendant was entitled to inspect a signed statement made by him in the office of a police chief and also a tape recording made in the same office about 5 days later where it was alleged in support of the motion for inspection that such documents might be necessary for the defendant to refresh his recollection, and that the evidence contained therein was material to the issues to be tried.

Relying on the rule that in a criminal case an accused is entitled to hear recordings of his conversation with police officers and other recordings which were played to him at the time he was examined by them where he has forgotten what he said at the time of his examination and where he alleges that the recordings are necessary to refresh his recollection, the court in *Vance v Superior Court of San Diego County* (1958) 51 Cal 2d 92, 330 P2d 773, held that the defendant was entitled to hear (1) a recording of his conversation with police officers made during the time he was being questioned by them, and (2) a recording of a conversation between the victim and the police officers which had been played to him during his questioning by the officers. The court pointed out that the defendant did not remember what he had said at the time of his questioning by the police officers, and that the recordings of the conversations were necessary to refresh his recollection so that his attorney could adequately prepare his defense.

The denial of the defendant's motion, made during the trial, for an order permitting him to inspect the transcriptions of recordings of his conversations with the police officers subsequent to his arrest, which conversations he claimed he did not remember, was held error in *People v Cartier* (1959) 51 Cal 2d 590, 335 P2d 114, the court following the rule that in a criminal case an accused is entitled to hear recordings of his conversations with police officers where he has forgotten what he said at the time of his examination and where he alleges that the recordings are necessary to refresh his recollection.

See also *People v Garner* (1961) 57 Cal 2d 135, 18 Cal Rptr 40, 367 P2d 680, cert den 370 US 929, 8 L ed 2d 508, 82 S Ct 1571, where the court, in holding that the defendant's argument that there was a failure upon the part of the prosecution to comply with certain of the pretrial discovery orders was without merit under the circumstances, noted that the defendant's trial counsel was entitled to inspect, view, hear, or copy any and all statements of the defendant, and that such was the order of the trial judge in the pretrial discovery proceedings.

The denial of the defendant's pretrial motion for inspection of the statements he made to the police which were reduced to writing and were in the possession of the district attorney was held error in *Cordry v Superior Court of Santa Clara County* (1958) 161 Cal App 2d 267, 326 P2d 222, where the affidavit in support of the motion alleged that the defendant could not recall the contents of the statements, could not relate them to his attorneys, and needed them to refresh his recollection of the contents. The prosecution's contention that inspection in such a situation as involved in the present case could be allowed only where a defendant lacks memory of "the facts about which he made his statement, as distinguished from the contents and language of the statement," was rejected, the court holding that the test to be applied concerned the defendant's recollection of the contents of his statements, rather than his memory of the facts to which the statements were addressed.

In *Schindler v Superior Court of Madera County* (1958) 161 Cal App 2d 513, 327 P2d 68 (disapproved on another point in *People v Garner* (1961) 57 Cal 2d 135, 18 Cal Rptr 40, 367 P2d 680, cert den 370 US 929, 8 L ed 2d 508, 82 S Ct

1571), it was held that the defendant was entitled to an order for pretrial inspection of his statements to the district attorney and his representatives with respect to the death of the homicide victim, where it appeared that the defendant could not remember the contents of the statements, that the statements were taken at the time when the defendant was without the benefit of counsel, and that knowledge of the contents of the statements was necessary in preparing his defenses to the charge of murder.

The denial of the defendant's motion, made at the trial, for production and inspection of a tape recording of the defendant's interrogation by police officers on the ground that the trial court had read a transcript of the recording and found nothing therein which would help the defendant was held error in *McAllister v Superior Court of San Diego County* (1958) 165 Cal App 2d 297, 331 P2d 654, where the defendant, in support of the motion, alleged that he was unable to remember all of the material covered by the interrogation, and that he could not safely proceed to trial without refreshing his recollection by an inspection of the taped record. Pointing out that the defendant had no idea what it was that the trial court had read in passing on the motion, and that there was nothing before the present court from which it could say that the trial court's discretion was properly or improperly exercised, the court said that on matters of this kind, involving a purported statement by the defendant himself which was the chief connecting link of the prosecution's case at the preliminary examination and which might reasonably be expected to be used in the trial of the case, there is no proper way by which the trial court can blindfold a defendant and secretly exercise a discretionary power. The court also observed that the prosecution has no interest in denying an accused access to all evidence that can throw light on issues in a case, and that obviously a defendant cannot show conclusively that a document is admissible without seeing it.

The rule that in a proper case a person charged with a crime may inspect before trial statements of his own in the possession of the prosecution, whether signed, unsigned, or on recording tape, was also recognized in *Vetter v Superior Court of Sacramento County* (1961) 189 Cal App 2d 132, 10 Cal Rptr 890; *Yannacone v Municipal Court of San Francisco* (1963) 222 Cal App 2d 72, 34 Cal Rptr 838; *People v Lindsay* (1964) 227 Cal App 2d 482, 38 Cal Rptr 755.

In at least one case wherein the defendant's request for production of his statement was made during the trial, the court held that the request should be granted for the reason primarily that the request was made during the trial and the requested material was in court. See *Arthur v Commonwealth* (1957, Ky) 307 SW2d 182, supra § 9[b].

Holding that the question whether the prosecution in a criminal case may be required to furnish the defendant's counsel with a copy of a written confession which the prosecution has obtained from the defendant and which the prosecution could presumably use in the trial should be left to the discretion of the trial court, subject to review if abused, the court in *State v Haas* (1947) 188 Md 63, 51 A2d 647, upheld an order of the lower court directing the prosecution in the instant case to furnish to the defense copies of any statements made by the defendants. Noting that the argument made against any such discretion is based upon a fear that the state, which is charged with the prosecution of crime, may be hampered in its duty by the disclosure of its evidence to those charged with offenses, the court observed that whatever merit that argument has as applied to a situation where it is contended that the accused has a right to inspect the evidence, it has no application to a situation where the trial judge in each case and on each application determines what should be done in the interest of justice; that there are cases in which it would be clearly unjust to deny such an application and that, on the other hand, it is conceivable that there are cases in which it might improperly hamper the prosecution to grant such an application; and that the trial court can be made aware of the particular circumstances surrounding a confession in a particular case, and then determine whether it is in the interest of justice that the defendant see a copy of it before trial. The court carefully noted that it was not concerned in the present case with questions involving books, papers, documents, or tangible objects obtained from, or belonging to, the defendant, or obtained from others by seizure or by process, nor was it concerned with memoranda, oral statements made by a defendant, or statements made by other defendants to an indictment or by prosecution witnesses.

See *People v Johnson* (1959) 356 Mich 619, 97 NW2d 739, involving an appeal from an order denying the defendant's motion for inspection of the transcript of his confession taken shortly after the commission of the alleged offense, where

the court, pointing out that the trial judge clearly denied the motion in the belief that it did not lie within his power to grant it, reversed his order and remanded the cause for further proceedings upon the motion consistent with the present opinion. The court held that an order to allow inspection of a written confession taken by a prosecuting attorney from an accused person rests within the sound discretion of the trial judge; that the petitioner for such an order bears the burden of showing the trial court facts indicating that inspection of the confession is not simply a part of a fishing expedition, but is necessary to preparation of his defense and in the interest of a fair trial; and that on such a showing, the petition should be granted absent a more compelling showing by the prosecution of facts tending to prove that such an order would unfairly hamper the prosecution or do a disservice to the public interest. The court apparently disapproved *People v Parisi* (1935) 270 Mich 429, 259 NW 127, n133 by commenting that in the Parisi Case the common-law rule that no defendant has any right to the discovery of any evidence in the possession of the prosecution was held to apply to confessions or statements made by the defendant.

See also *State v Superior Court* (1965, NH) 208 A2d 832, 7 ALR3d 1, infra § 18, where the court held that the trial court had the power in its discretion to order, if required by justice, discovery and inspection of any written confession or statement made by the defendant, or any recording or stenographic notes thereof, whether such confession or statement was signed by the defendant or not. The holding made in this case was also noted with approval in *State v Healey* (1965, NH) 210 A2d 486.

The rule that pretrial inspection by a defendant of his own statement may be permitted under certain circumstances in the exercise of the discretion of the trial court was also recognized in *State v Wise* (1955) 19 NJ 59, 115 A2d 62, and *State v Reynolds* (1963) 41 NJ 163, 195 A2d 449.

Where the defendant's application for pretrial inspection of his own statement showed that he did not recall his statement with sufficient detail to satisfy his counsel that he could fairly go to trial without it, it was held in *State v Johnson* (1958) 28 NJ 133, 145 A2d 313, supra § 11[g], that the application should be granted in the absence of a showing by the state that inspection would improperly hamper the prosecution. The rule announced in this case was also recognized in *State v Murphy* (1961) 36 NJ 172, 175 A2d 622.

In *People v Rogas* (1936) 158 Misc 567, 287 NYS 1005, a prosecution for murder in the first degree, wherein the defendant pleaded not guilty, with a specification of insanity, the court granted the defendant's motion for an order to permit alienists employed on his behalf to inspect certain statements in the possession of the district attorney which were allegedly made by him to members of the police department or the district attorney's staff shortly after the commission of the charged crime, where the motion was based on the ground that the alienists had made an exhaustive investigation, but were unable or unwilling, without an inspection of the defendant's statements, to form an opinion as to whether the defendant was insane at the time the crime was committed. Pointing out that the proposed inspection might be of incalculable benefit to the defendant, and that no disadvantage would result to the prosecution from the proposed disclosure, the court concluded that a right sense of justice seemed to decree that this was a proper occasion for the exercise by the court of its discretionary power. (Compare *People v Skoyec* (1944) 183 Misc 764, 50 NYS2d 438, infra § 13[b], where the court refused to follow this decision.)

See also *People v D'Andrea* (1960) 20 Misc 2d 1070, 195 NYS2d 542, wherein the defendant moved for a pretrial discovery and inspection of his written statement given to the police and the district attorney immediately after his arrest. Noting that it was not advised of the nature of the statement and whether it was incriminatory or exculpatory, and stating that it could not reach a determination without first inspecting the statement, the court directed the district attorney to furnish the court with a copy of the statement in question pending further order by it, holding (1) that the power of the court to grant, in the exercise of its discretion, a motion for the inspection of documents in the possession of the prosecutor which are admissible on the trial as evidence for the prosecution is applicable to a defendant's own written statement made to the district attorney or the police after arrest; and (2) that pretrial inspection of a confession should be granted where the voluntary nature of the confession will become an issue and the defendant asserts that he does not remember the contents of his confession. However, in *People v Smith* (1960) 26 Misc 2d 1072, 206 NYS2d

993, *infra* § 13[b], the court refused to follow this holding.

Stating that if some circumstantial showing is made by a defendant to elicit the court's exercise of discretion in his favor, pretrial discovery of statements made by him and in the possession of the prosecuting attorney should be granted, unless there is a showing of prejudice to the prosecution, the court in *People v Courtney* (1963) 40 Misc 2d 541, 243 NYS2d 457, held that such a showing was made in the present case in view of the fact that the defendant was a 15-year-old boy charged with murder in the first degree.

In *People v Quarles* (1964) 44 Misc 2d 955, 255 NYS2d 599, it was held that the transcribed statement made by the defendant to the police or district attorney at the time of his arrest, without the assistance of counsel and without waiver of his right to counsel, should be disclosed by the district attorney to defense counsel as a matter of right to enable the defendant properly to prepare a defense in accordance with the dictates of a fair trial. Recognizing that the court has the discretionary power to grant a motion for inspection of documents in the possession of the prosecution, and stating that the concept of fundamental justice defines mandatory constitutional minima to guide the exercise of the court's inherent power to compel pretrial disclosure of transcribed statements made by a defendant to the police or district attorney in a criminal case, the court concluded that the pretrial disclosure of a defendant's transcribed or written statements made at the time of his arrest without the assistance of counsel is essential to a fair trial.

The defendant's motion for pretrial inspection of statements allegedly made by him to the arresting officer and the district attorney was granted in *People v Abbatiello* (1965) 46 Misc 2d 148, 259 NYS2d 203. Stating that a reappraisal of the principles and considerations underlying the resolution of the issue in question was required in the light of recent decisions affirming and protecting the rights of accuseds, the expanding concept of liberalizing pretrial procedures to advance the function of a trial to ascertain truth, and the impact of the new procedure in New York for a hearing before trial on the voluntariness of a confession, and noting that under the new procedure for such a hearing, the prosecution must, within a reasonable time before trial, notify the defense as to whether any alleged confession or admission will be offered in evidence at the trial, and if the prosecution gives such notice the defense, if it intends to attack the confession or admission as involuntary, must, in turn, notify the prosecution of the desire by the defense for a preliminary hearing on such issue, the court concluded that when the prosecution notifies the defense that a confession or admission will be offered in evidence at the trial, the defendant should be entitled to request and obtain a copy of such confession or admission in order to have his counsel decide whether he should request the preliminary hearing or endeavor to effect a disposition of the case by recommending a plea, and, if the hearing is requested, in order to aid in the preparation therefor, and that even before such notice is given by the prosecution, which would necessarily include situations where a statement may not be intended to be offered in evidence at the trial, the defendant should still be entitled to obtain a copy of his statement, at least in the absence of a showing by the prosecution of special circumstances justifying withholding disclosure of the statement in whole or in part. The court observed that since a statement would in practically all cases have been taken from an accused by the police or district attorney during a period of detention under the control of the authorities and without the assistance of counsel for the accused, it is a matter of fair play and simple justice that after he is indicted and obtains the assistance of counsel, his counsel should at least be furnished, on request, with a copy of his statement; that the prosecution's case will or should by that time have been substantially prepared; and that the fact that defense counsel is in possession of a copy of his client's own statement, whatever it may be, should not work to the prosecution's prejudice, if the prosecution has a case against the defendant, but should be of aid in assuring the defendant a fair trial as well as in the search for the truth. The rules announced in this case were also recognized in *People v Riley* (1965) 46 Misc 2d 221, 258 NYS2d 932, *infra* § 13[d]. In the Riley Case, however, the court further held that those rules have reference only to confessions or admissions written by the defendant himself or signed by him or in such question-answer form as would be admissible as an exhibit upon the trial after the giving of qualifying testimony.

The defendant's motion for production and inspection of his confession made to the police or district attorney was granted in *People v Harvin* (1965) 46 Misc 2d 417, 259 NYS2d 883. Noting that the district attorney had notified the defendant of his intention to use the confession at the trial, the court said that if the defendant had demanded a hearing

respecting the voluntariness of the confession, his counsel at that hearing would be entitled to see and use the confession, and that to deny the defendant's request to see the confession at this time and permit him to inspect it several months later seemed entirely pointless. Holding to the same effect is *People v Macht* (1965) 47 Misc 2d 404, 262 NYS2d 589.

Holding that to allow an inspection of statements, admissions, and confessions of the defendant where it is required by substantial justice is within the discretion of the trial judge, and stating that although the circumstances of each case will govern a determination whether such an inspection is required by substantial justice, the general guides in this respect are (1) that the defendant who seeks such an inspection should state, by affidavit, that he cannot recall the contents of his statements or confession, and set forth the circumstances giving rise to his claim that he cannot recall the contents thereof, and (2) that where the defendant has retained counsel, the request for inspection must be made seasonably before trial, the court in *State v Hill* (1963, CP) 23 Ohio Ops 2d 255, 91 Ohio L Abs 125, 191 NE2d 235, granted the defendant's pretrial motion for permission to inspect statements taken from him, including all those existing in the form of notes and transcriptions thereof, whether signed or unsigned by him, where the defendant asserted in an affidavit that he could not recall the contents of the statements taken from him, that he was unable to relate to his attorneys the contents of these statements, that the information was material to the question of his innocence, that the information was necessary to adequately prepare his case, that he was without benefit of counsel at the time the statements were taken, that he was mentally and emotionally disturbed at the time the statements were taken, that previous large quantities of intoxicating liquor consumed by him and a pronounced and severe effect at the time of the statements, and that a denial of the information would deprive him of a fair trial and would constitute a violation of his constitutional rights. Noting that the inherent power of the trial court to do substantial justice is vital and fundamental to the due administration of justice, the court said that the decision in *State v Sharp* (1954) 162 Ohio St 173, 55 Ohio Ops 88, 122 NE 2d 684, supra § 9[c], footnote 16, wherein it was held that the defendant was not entitled to a copy of an alleged confession in the hands of the prosecuting attorney before trial, did not divest the trial judges of their discretion in the matters relating to inspection of confessions.

In *Commonwealth v Stepper* (1952, Pa) 54 Lack Jur 205, the defendant's petition for permission to inspect a confession made and signed by him in the presence of police officers and representatives of the district attorney's office on the day after the alleged homicide was granted, where the petition for inspection alleged that at the time of the confession the defendant was confused, mentally ill, and physically exhausted, and that the defendant was unable to inform his counsel as to the contents of the confession and could not clearly recall the events or circumstances surrounding the alleged offense, his arrest, and the making of the confession. At the oral argument, defense counsel also stated that they proposed to submit the confession, together with other information at their command, to medical opinions to determine the mental status of the defendant at the time of the alleged homicide. Noting that the defendant's mental status might be material in determining whether he was guilty of a felonious homicide, and, if so, what the degree of his guilt might be, the court held that under the circumstances of the case it had discretion to permit a pretrial examination of the confession to be conducted under its supervision and control. (The court refused to follow *Commonwealth v McQuiston* (1945) 56 Pa D & C 533, 60 York Leg Rec 140; *Commonwealth v Smith* (1949) 67 Pa D & C 598, 60 Dauph Co 35; *Commonwealth v Sherman* (1950) 72 Pa D & C 367, 66 Montg Co LR 167, all infra § 13[c].)

See also *Commonwealth v Hoban* (1952, Pa) 54 Lack Jur 213, supra § 5[a], wherein the Pennsylvania Supreme Court refused a writ of prohibition restraining the respondent judge from enforcing an order permitting the defendant's counsel to inspect a signed confession made by the defendant to the police authorities and prosecuting officers.

An order of the trial court permitting the defendant to inspect all statements given by the defendant was also upheld in *State v Thompson* (1959) 54 Wash 2d 100, 338 P2d 319, supra § 10[b], the court holding that under the circumstances there was no abuse of discretion on the part of the trial court.

For cases permitting inspection of the defendant's confession or statement during the trial where such material was offered, or its contents introduced, in evidence or where it was used by the prosecuting attorney in his examination of

the defendant or a witness, see § 9[c], supra.

For a case permitting inspection of the defendant's statement under a statute expressly authorizing such inspection, see *Sambolin v State* (1965, Tenn) 387 SW2d 817, supra § 11[h].

Defendant would be entitled to any transcripts of illegally monitored conversations between him and his attorney and

any notes or memoranda regarding the conversations. *Fajeriak v State (Alaska) 520 P2d 795*.

Prior to trial, criminal defendant is entitled to obtain statements made by him to police officers, whether written, oral, or tape-recorded; however, even if magistrate erred in not permitting defendant to indulge in "fishing expedition," it did not prejudice defendant nor deprive him of substantial right where information sought would not "tend to overcome the prosecution's case or to establish a defense" at preliminary hearing, and would have been available to defendant before trial. *People v Superior Court of Shasta County, 264 Cal App 2d 694, 70 Cal Rptr 480*.

See *Wright v State (1983, Fla App D1) 428 So 2d 746*, ctfed ques ans, approved (Fla) *446 So 2d 86 § 17*.

In prosecution for aggravated battery with firearm and possession of firearm by convicted felon, trial court erred in admitting testimony of arresting officer that defendant made statement which essentially showed he had used gun, where statement was discovered simultaneously by prosecutor and defense counsel the day before, statement was in constructive possession of state at time of defendant's discovery request, no attempt was made by state to discover information known to officer, and court failed to make inquiry into question of procedural prejudice to defendant. *Hutchinson v State (1981, Fla App D1) 397 So 2d 1001*.

In prosecution for possession of marijuana, trial court's allowance of evidence of defendant's statement made in presence of investigator admitting he lived in bedroom in which marijuana was found was error, where state in response to demand for discovery indicated that there were no oral statements made by defendant known to prosecutor, and court exercised its discretion without making adequate inquiry covering whether state's violation was inadvertent or wilful, trivial or substantial, and what effect it had on ability of defendant to properly prepare for trial. *Easterling v State (1981, Fla App D1) 397 So 2d 999*.

See *Thompson v State (1979, Fla App D2) 374 So 2d 91, § 11*.

Conviction for homicide would be reversed where jail inmate was allowed to testify regarding confession by defendant even though before trial defense had filed timely and specific request for discovery of all statements made by defendant while in police custody, but defendant's statement to inmate was not disclosed by prosecution, where contention that statement was not required to be produced because it did not result from custodial interrogation was without merit, and where statement was direct evidence of defendant's guilt in primarily circumstantial case, and its admission into evidence thus was not harmless. *Walraven v State (1982) 250 Ga 401, 297 SE2d 278*.

Defense had right to pretrial examination of inculpatory custodial statements made by murder suspect, and sanction for prosecution's failure to make timely disclosure was exclusion and suppression from use in prosecution's case-in-chief or in rebuttal. *Hilburn v State (1983) 166 Ga App 357, 304 SE2d 480*.

Statement made by defendant to police prior to arrest was not a statement made while in police custody, therefore failure of prosecution to produce copy of statement in compliance with defendant's timely request did not require exclusion and suppression under statute requiring production of statements made by a defendant while in police custody; but statement made after arrest was made while in police custody, and failure of prosecution to produce that statement required exclusion and suppression. *Merritt v State (1983) 165 Ga App 597, 302 SE2d 136*.

Conviction for selling ounce of marijuana was reversed where prosecution failed to comply with discovery statute by making available before trial statements made by defendant in presence of police after his arrest, since it is always error to fail to give counsel on proper demand written summary of all relevant and material statements made by defendant while in custody. *Reed v State (1982) 163 Ga App 364, 295 SE2d 108*.

Codefendants' convictions of entering automobile with intent to steal were reversed where defense made timely pretrial request for discovery of any statements made by defendant, where state used testimony by police officer concerning

undisclosed oral statement by one codefendant as evidence rebutting that codefendant's testimony, and where sanction provision in discovery statute expressly mandated exclusion of undisclosed statements for use in prosecution's case-in-chief or in rebuttal. *Garard v State* (1981) 159 Ga App 248, 283 SE2d 27.

In prosecution for murder and armed robbery, prosecution failed to materially comply with court rule which required disclosure of defendant's statements when it turned over police report which summarized defendant's statements but did not give any indication that defendant had provided detailed information of possible alibi to two officers. Reversal, however, was not required where prejudicial impact was minimal and defendant waived objection to police officer's testimony by not objecting at trial. *People v McInnis* (1980) 88 Ill App 3d 555, 44 Ill Dec 120, 411 NE2d 26.

In aggravated-battery prosecution during which state failed to furnish defense with written copies of statements made by defendant at two pretrial court appearances concerning his acquaintance with accomplice, error occurred where state cross-examined defendant concerning his acquaintance with accomplice, but such error was harmless where defendant was allowed to explain on redirect his motivation for making such statements, identification of defendant was positive, and evidence of guilt was overwhelming. *People v Caliendo* (1980) 84 Ill App 3d 987, 40 Ill Dec 41, 405 NE2d 1133.

In murder prosecution against female defendant who killed her consort with knife during domestic altercation, prejudicial error occurred as result of prosecution's failure to disclose to defense counsel defendant's oral confession to police officers which was revealed to jury unexpectedly during defense cross-examination of investigating police officer. *People v Miles* (1980) 82 Ill App 3d 922, 38 Ill Dec 356, 403 NE2d 587.

See *People v Spurlark* (1979) 74 Ill App 3d 43, 29 Ill Dec 657, 392 NE2d 214, § 11.

In battery prosecution, State's failure, in response to defense request, to produce inculpatory statement allegedly made by defendant and subsequently used by prosecution at trial, constituted prejudicial error; trial court's admonition to jury was insufficient to overcome potential prejudice to defendant. *People v Young* (1978) 59 Ill App 3d 254, 16 Ill Dec 569, 375 NE2d 442.

Failure of state to furnish defendant, pursuant to his demand, tape recordings of his confession was reversible error, even though they substantiated police officer's testimony and refuted much of defendant's, where tapes would have had some probative value both at hearing on motion on question of voluntariness of confession and at trial on question of truthfulness of confession. *People v Abendroth* (1977) 52 Ill App 3d 359, 10 Ill Dec 183, 367 NE2d 571.

Where court had issued pre-trial discovery order as prescribed by rule directing state to produce evidence, if any, of oral confession and where prosecutor was unaware of oral confession prior to trial, prosecutor had continuing duty to disclose oral confession to defense even though he became aware of confession just before trial. *People v Shegog*, 37 Ill App 3d 615, 346 NE2d 208.

In prosecution for murder, defendant's threat that she would burn victim's house down overheard by witness was statement subject to discovery under court rule; however, failure to disclose such statement did not offend purpose of discovery rules to prevent surprise or unfair advantage and to aid in search for truth where record indicated defense counsel had knowledge of nature of statement to be testified to by witness and where court allowed counsel to question witness outside presence of jury regarding statement before he testified about it and where defendant's counsel, after interviewing him, made no motion for continuance. *People v Watkins*, 34 Ill App 3d 369, 340 NE2d 92.

Defendant was not placed at unfair disadvantage of surprise by failure of prosecution to reveal statements made by defendant to third parties subsequent to her husband's death where prosecution did not acquire possession of those statements until two weeks prior to trial and where defense counsel had interviewed both witnesses before they testified in rebuttal. *People v Carbona*, 27 Ill App 3d 988, 327 NE2d 546.

In prosecution for misdemeanors of criminal trespass and resisting an officer, trial court erred in denying defendant's motion for access to his own statements which had been recorded by police, since rule of criminal procedure requiring that defendant be permitted to copy his own statements is applicable to simple misdemeanor prosecutions. *Hadjis v Iowa Dist. Court of Linn County (1979, Iowa) 275 NW2d 763.*

Defendant's oral statement was not discoverable. *State v Jones (La) 332 So 2d 267.*

In prosecution for public bribery, inculpatory recorded telephone conversations relating to earlier offer to accept bribe and to mechanics of effecting consummation of transaction were discoverable where they were made after commission of crime. *State v Le Blanc (La) 305 So 2d 416.*

Under discovery statute entitling defense to substance of statements made by defendant to police where "substance" was defined as essence, or essential elements, of statement, disclosure that defendant stated he had fired several shots at named victim, but failure to disclose that defendants and another had been engaged in "game of shootouts" before shooting in question, complied with statutory mandate, and testimony by police officer at trial regarding latter disclosures did not impermissibly go beyond and expand state's response to discovery so as to require suppression. *State v Hill (1983, La App) 434 So 2d 428, cert den (La) 440 So 2d 759.*

See *Commonwealth v Stewart (Mass) 309 NE2d 470* (citing annotation), § 16[a].

In murder prosecution against woman charged with shooting her former boyfriend, lower court erred by admitting testimony concerning incriminating written statement made by defendant when same written statement had not been furnished to defense counsel in accordance with discovery request made prior to trial. *Jackson v State (1983, Miss) 426 So 2d 405.*

Prosecution's failure to furnish defense counsel with a copy of defendant's statement to FBI until shortly before voir dire examination of jury panel commenced despite formal and informal requests and court order was fundamentally unfair as defendant was entitled to pre-trial inspection. *State v Harrington (Mo) 534 SW2d 44.*

Prosecution of defendant for murder was rendered fundamentally unfair by denial of his motion for inspection of notes made by detective with respect to oral statement given by defendant to detective. *State v Scott (Mo) 479 SW2d 438.*

Statements made by defendant during interrogation by police officer which statements were indicative of mental illness and would have indicated good reason to pursue an insanity defense, were material and exculpatory, and their suppression by officers so that they did not appear in reports furnished under omnibus discovery order was prejudicial and a denial of due process, thus requiring a new trial. *State v Patterson (1983, Mont) 662 P2d 291.*

State had continuing duty to defendant to disclose that it had letter written by him which raised serious question as to truth of his alibi defense. *State v Smith (NM App) 543 P2d 834.*

Defendant charged with unclassified misdemeanor of driving while intoxicated under simplified traffic information was entitled by statutes to discover his oral statements made to police. *People v Ross (1981) 110 Misc 2d 818, 442 NYS2d 848.*

Defendant would be granted discovery of note relating to pre-indictment interview he voluntarily attended at office of district attorney; discovery of defendant of his own statements is not limited to custodial statements, and, despite district attorney's contention that since interview was voluntary it was non-custodial, statements subject to discovery are only required to be made by defendant to one engaged in law enforcement activity; neither would defendant's motion for discovery be barred by untimeliness where court would exercise its discretion to extend defendant's time in view of number of counts in indictment, seriousness of charges, and fact that requested discovery was particularly significant to

perjury allegations. *People v Wyssling (Misc) 372 NYS2d 142.*

Defendant's motion for audibility hearing of tape recording made of conversation or conversations of one or more defendants, either made with law enforcement officer, or overheard by said official, would be granted and prosecution would be ordered to furnish defendant's attorney with transcript of contents of such tapes not less than 15 days before trial; extent of defendants' right to disclosure, prior to trial, of contents of any recorded statements to or with law enforcement officers does not depend on whether prosecution intends to use such material on its direct case or for purpose of impeachment. *People v Di Matteo, 80 Misc 2d 1029, 365 NYS2d 126.*

Defendant was entitled to discovery of written or recorded statements, confessions, or admissions made by him; to reports, papers, and forms of police department relating to case, such as arrest disposition sheets and other papers concerning arrest and investigation; and to any and all evidence in possession of prosecution favorable to defendant. *People v Wright, 74 Misc 2d 419, 343 NYS2d 944.*

Defendant is entitled to copy of his statements given to police regardless of any showing of circumstances requiring same for his defense, but with respect to all other items of evidence sought by way of discovery and inspection they are within realm of judicial discretion; thus, motion for discovery was granted as to results of any chemical blood test of defendant and as to any statements or recorded transcripts of statements of defendant, but was denied, without prejudice to further application during trial, as to statements of prosecution witnesses, notes of police officers respecting conversations with defendant or prosecution witnesses, and various matters relating to identification of equipment used in giving chemical test to defendant. *People v Blair, 64 Misc 2d 519, 315 NYS2d 179.*

Copy of any statement or confession made by defendant at time of arrest and in absence of counsel should be furnished to him by prosecution, before trial, whenever he, or his counsel, requests such copy. *People v Chirico, 61 Misc 2d 157, 305 NYS2d 237.*

Even though defendant's confessions to police officers were summarily suppressed as violative of Miranda rules, it was error to deny motion to inspect such confessions, since another confession, made to private citizen, was admitted in evidence, and denial of inspection of police confessions deprived defendant of opportunity to demonstrate that private confession was inextricably woven in with and secured as part of same improper activities and procedures which led to police confessions, and that as consequence private confession should also have been suppressed. *People v Ruppert, 26 NY2d 437, 311 NYS2d 481, 259 NE2d 906.*

Prosecutor had no duty to disclose oral statements allegedly made by homicide defendant to third persons not acting on behalf of State. *State v Walker (1982) 56 NC App 237, 287 SE2d 455.*

In prosecution charging police supervisor with criminal assault on subordinate, reversible error occurred where trial court denied pretrial request for discovery of defendant's tape-recorded statement given to police investigators; prosecutor's contention that tape was not discoverable because he did not intend to make statement part of his case file, was without merit. *State v Tomblin (1981) 3 Ohio App 3d 17, 3 Ohio BR 18, 443 NE2d 529, motion overr.*

Upon proper application, state should be required to produce written statements of defendant and to reveal contents of any oral statements; however, where defendant requested certain papers, including any and all statements made by him, and prosecutor informed court that he had no written statements made by defendant, defendant could not complain of failure to furnish him with details of his oral confessions since he did not request them. *Watts v State (Okla Crim) 487 P2d 981.*

Where accused gives statements to police under "distressing circumstances" without benefit of counsel, and is later unable to remember what he said in statement in order to assist counsel in defense, substantial justice requires prosecution to allow accused or his counsel pretrial inspection of such statement; such disclosure was required in this

case where defendant was uneducated woman unfamiliar with legal proceedings, and was unable to recall content of her signed statement given to police without benefit of counsel while she was under stress and confusion of alleged attack, killing, and subsequent police interrogation. *Doakes v District Court of Oklahoma County (Okla Crim) 447 P2d 461*.

In murder prosecution growing out of shooting of deaf dry cleaner and his 15-year-old female employee, reversible error occurred where state's key witness was inmate at county jail who related jail house confession by defendant, but district attorney knowingly failed to correct certain false testimony concerning that witness' activities as undercover police agent and failed to provide defense counsel with witness' complete criminal background and record. *Commonwealth v Wallace (1983) 500 Pa 270, 455 A2d 1187*.

[\*13b] Inspection denied under circumstancesn134

Although explicitly or by implication recognizing that inspection by an accused of his confession or statement may be ordered in a proper case, the courts in many other cases have refused to permit the defendant to inspect his confession or statement made after the alleged offense on the ground that there was no showing of circumstances warranting the requested inspection.

Although noting that some cases in the District of Columbia had permitted discovery of confessions and statements to the police where the court deemed it necessary to allow such discovery in the interest of justice, the court in *United States v Pete (1953, DC Dist Col) 111 F Supp 292*, denied the defendant's motion for production of statements and confessions made by him to the police on the ground that there was no showing of necessity. (Apparently, the law of the District of Columbia was applied.)

The denial of the defendant's motion to inspect and copy statements made to police officers by defendant and an alleged accomplice was upheld in *State v McGee (1962) 91 Ariz 101, 370 P2d 261*, cert den *371 US 844, 9 L ed 2d 79, 83 S Ct 75*, the court holding that although the defendant's contention that the denial of his motion was an abuse of discretion was based on "the fact of diversity of defenses" and that the alleged accomplice was listed as a witness against him, these facts were not considered by the trial court to be sufficient to compel him to grant the motion, and that in the absence of a clear showing of abuse of discretion the present court would not upset a discretionary order. The court relied on the rule that an order granting or denying defendant's motion for inspection of statements of defendant and other documents is addressed to the sound discretion of the trial court.

In *State v Fitzgerald (1895) 130 Mo 407, 382 SW 1113*, wherein the trial court overruled the defendant's motion, filed before the taking of testimony, to compel the prosecuting attorney to produce a written statement of the defendant relative to his connection with the homicide, the court, upholding the trial court's ruling, said that no reason had been assigned by the defendant as to why it was error to overrule the motion, that at most, the matter was in the discretion of the trial court, and that the trial court did not act unwisely in overruling the motion. The court pointed out that while the defense had said that the statement was necessary and material to the defendant in the preparation and proper presentation of his defense, nevertheless, "as to wherein and how material we are left to conjecture."

In *Cramer v State (1944) 145 Neb 88, 15 NW2d 323*, the court, in upholding the denial of the defendant's application to inspect, among other things, a confession allegedly made by him, pointed out that medical experts were permitted to read the defendant's confession prior to the trial as a part of the evidence to be considered in determining defendant's mental condition at the time the confession was made, and that the defendant's counsel were given a copy of the confession 4 days before it was offered in evidence by the prosecution. Under this state of the record, concluded the court, the trial court had properly safeguarded the rights of the defendant with reference to his application to inspect the confession. The court said that while the authorities do not seem to be in agreement as to such right of inspection, the rule generally was that a confession need not be produced, although it seemed proper for the trial court to order a written confession produced where the interests of justice require, as where there is a question whether the signature is forged, or the written confession is necessary to a proper determination of the mental condition of the defendant at the

time the confession was made, or for other reasons affecting the merits of the litigation. However, the court concluded, where the only reason for the production of a written confession for the inspection of a defendant is that it would aid generally in preparing the defense, no basis exists for requiring the prosecution to produce it.

The denial of the defendant's pretrial motion for an order requiring the prosecuting attorney to produce, for inspection by the defense, written statements made by the defendant was upheld in *Reizenstein v State* (1958) 165 Neb 865, 87 NW2d 560, mod on other grounds and reh den 166 Neb 450, 89 NW2d 265. Noting that in a criminal case the trial court is invested with a broad judicial discretion in allowing or denying an application to require the prosecution to produce written confession, statements, and other documentary evidence for inspection by the defendant's counsel before the trial, and that error may be predicated only for an abuse of such discretion, the court said that there was no abuse of discretion under the circumstances.<sup>n135</sup>

Concluding that a defendant has no unqualified, absolute right to an inspection of his confession, but, on the contrary, his application for an inspection is addressed to the sound judicial discretion of the trial court to be exercised only when the interest of justice may require,<sup>n136</sup> the court in *State v Cicensia* (1951) 6 NJ 296, 78 A2d 568, cert den 350 US 925, 100 L ed 809, 76 S Ct 215, sustained the denial of the defendant's motion for pretrial inspection of confessions allegedly made by him, and rejected the contention that the defendant had an absolute right to an inspection before trial of his alleged confession.

In *State v Tune* (1953) 13 NJ 203, 98 A2d 881, it was held (four justices dissenting) that the trial court abused its discretion in permitting the defendant to inspect his confession where an affidavit filed by the defendant's counsel in support of the motion for inspection set forth (1) that the confession had been exacted through force and threats of violence; (2) that the confession had not been read to or by the defendant prior to signing; (3) that the defendant could not tell counsel anything of the contents of the confession; (4) that the defendant was without benefit of counsel; (5) that the defendant was suffering from a mental disorder when he signed the confession; and (6) that there was a discrepancy between the facts as ascertained by counsel and those alleged by the prosecution. Noting that it is incumbent on the moving party to produce such facts as will support the granting of the application, the court, in concluding that the defendant in the present case had failed to carry the burden of showing that in the interest of justice his application for inspection should be granted, observed that as to (1), (2), and (5) of the alleged grounds for inspection, the affidavit set forth no facts but merely conclusions; that as to grounds (3) and (4), the law does not protect an accused against his own voluntary act and a defendant is not entitled to inspection of his confession merely because he may not recall its contents; and that as far as ground (6) was concerned, the reason stated therein was no valid basis for an inspection.<sup>n137</sup> (The dissenting opinion stated: "I cannot conceive of any case in which an order allowing the inspection of a confession, for example, will be sustained if we can say, as we do, that in the circumstances of this case [the trial judge] committed error in allowing an inspection.") On a later appeal from a judgment of conviction in the same case, reported in *State v Tune* (1954) 17 NJ 100, 110 A2d 99, cert den 349 US 907, 99 L ed 1243, 75 S Ct 584, overrd on other grounds *State v Smith* (1960) 32 NJ 501, 161 A2d 520, cert den 364 US 936, 5 L ed 2d 367, 81 S Ct 383, and disapproved on other grounds *State v Reynolds* (1963) 41 NJ 163, 195 A2d 449, the court, adhering to the opinion expressed in the former case, held that the defendant's assignment of error relating to the trial court's refusal to allow pretrial inspection by the defense of the defendant's confession was not sustainable in the absence of a showing of an abuse of discretion on the part of the trial court.

Following the decision in *State v Tune* (1953) 13 NJ 203, 98 A2d 881, supra, the court in *State v Petroliia* (1955) 37 NJ Super 326, 117 A2d 281, revd on other grounds 21 NJ 453, 122 A2d 639, held that it was not error to deny the defendant's pretrial motion for inspection of his confession where the motion was predicated upon the allegations that the confession was extracted by such force and violence to the defendant's person that he had no recollection of its contents; and that the defendant could not recall the contents of the confession because 4 years had elapsed between the time of the making of the confession and the time of the making of the present motion. Stating that the record in the case did not sustain the allegations, the court concluded that under the circumstances no error had been demonstrated in connection with the denial of inspection. The decision in *State v Tune* (1953) 13 NJ 203, 98 A2d 881, supra, was also

followed in *State v Echevarria* (1955) 38 NJ Super 415, 119 A2d 183, supra § 11[g], wherein the court likewise denied the defendant's motion for pretrial inspection of statements made by him.

In *State v Williams* (1957) 46 NJ Super 98, 134 A2d 39, the defendant's motion prior to trial for permission to copy his sworn statement to the police was denied because of "proof deficiency."

In *State v Bunk* (149, NJ County Ct) 63 A2d 842, the court denied the defendant's motion for production, for his inspection, of confessions made by him and his codefendants, statements obtained from all other witnesses in the case, and reports and memoranda of the investigators. Pointing out that counsel for the defendant could see and interview the codefendants, and that each defendant knew the nature of his participation in the alleged crime and what his defense would be at the trial, and that he also knew "what he said in his statement unless it was obtained by some improper means or undue influences or when he was under some mental disability, in which event it would not be admissible against him," the court said that under the circumstances the motion for inspection of the confessions, the statements, and investigation reports should be denied. The court also said that confessions, investigation reports, and statements of witnesses obtained in a criminal prosecution might well be classed as "the work product of the prosecutor," and might be protected against inspection by the defense in advance of trial.

In *People v Skoyec* (1944) 183 Misc 764, 50 NYS2d 438, the court, stating that until the legislature expanded the power of courts to permit the defendant in a criminal case to inspect a confession prior to the trial, the court should not exercise that power unless unusual circumstances demanded it, denied the defendant's motion for an inspection of statements and confessions allegedly made by him to the police and district attorney shortly after the commission of the crime, where the motion was based on the allegations that alienists engaged on behalf of the defendant were unable and unwilling to form an opinion as to whether the defendant was insane at the time he committed the alleged crime, without an inspection of his statements and confessions in question, and that because of his state of mind at the time he was interrogated by the police, the defendant had only a faint recollection of what had occurred at the time he was questioned and could not repeat what he had said at that time. Noting that on the trial of the defendant it would readily grant the alienists ample time and opportunity to inspect the confessions and statements in question, the court said that to permit the defendant to inspect statements and confessions prior to the trial as a matter of course in such a case, as was done in *People v Rogas* (1936) 158 Misc 567, 287 NYS 1005, supra § 13[a], would be very prejudicial to the prosecution's case. The court observed that one of the tests which seems to be applicable to cases of this kind is whether or not the requested statements or confessions would be admissible in evidence; that where there is evidence in possession or control of the prosecution which is favorable to the defendant it should be made available to the defendant unless there are strong reasons otherwise; and that to obtain an inspection, the defendant must show facts which would warrant the court's exercise of its discretion and would establish that an inspection at the time of trial will not answer his needs.

Noting that confessions made by a defendant are generally admissible in evidence against him as part of the prosecution's case, but are not admissible as evidence in support of his defense, and stating that, accordingly, a defendant is not entitled to the production of his confession unless there are appropriate reasons in the interest of justice why such production should be had prior to trial, the court in *People v Martinez* (1959) 15 Misc 2d 821, 183 NYS2d 588, denied the defendant's motion for the production of a confession allegedly made by him, on the ground that no reason justifying such production was set forth in the motion. The court also pointed out that the right of the defendant could be protected sufficiently on trial because he might then be permitted to inspect his statements or confessions in connection with the cross-examination of witnesses testifying to the contents of such statements or confessions. Holding to the same effect is *People v Jordan* (1953, Gen Sess) 128 NYS2d 457.

Where the defendant moved for permission to inspect certain written statements made by him to law enforcement authorities, alleging that he "cannot be expected to recall or remember all of the details in connection with [these] statements which [were] taken about eight or nine months ago," and that inspection of the statement was necessary to prepare properly for trial, the court in *People v Stokes* (1960) 24 Misc 2d 755, 204 NYS2d 827, stating that a defendant

does not have an absolute right in all cases to inspect his pretrial statement, but that the court can grant or deny discovery of such statement on the basis of the facts in each case after evaluating the possibility and extent of perjury and balancing it against other considerations related to the ultimate purpose of a criminal trial, held that the motion should be denied with leave to renew, if the defendant was so advised, upon proper papers. The court held that a mere assertion by counsel that a defendant cannot recall his statement is not enough, but that there must be an affidavit by the defendant to that effect with adequate factual support, and that to establish such claimed inability of recollection, the defendant, in addition to giving the facts and circumstances surrounding the taking of his statement, should show the time elapsed since the giving of the statement or any other facts which may tend to generally support his contention, such as the length of the statement, his illiteracy or mental incapacity, if any, whether the statement was made through an interpreter, whether he was subjected to coercion, misrepresentation, deceit, or intimidation through fear or otherwise, or whether he was not in adequate control of his faculties because, for example, he was under the influence of alcohol or narcotics. The court also held that a defendant should establish the respect in which pretrial discovery of the statement is necessary for his preparation for trial. The court pointed out that in the present case there was no affidavit by the defendant himself showing, with sufficient factual support, that he could not recall the details of his statement, or why the statements were necessary at this stage of the proceedings in order to prepare properly for trial.

In *People v Leahey* (1960) 26 Misc 2d 438, 207 NYS2d 619, the defendant's motion for pretrial discovery and inspection of copies of written statements made by him was denied, notwithstanding that the affidavit in support of the motion stated that the defendant had been a deaf mute since birth, that prior to his arraignment before a magistrate he had made a written statement to investigators, that he was not represented by counsel at his preliminary arraignment before the magistrate, and that in order to properly represent him it was necessary for his attorney to have his written statements. Noting that the circumstances under which a defendant in a criminal action may be entitled to inspection of a written statement made by him to investigators of crime had not been clearly defined by the courts of New York, and stating that it would be difficult to enunciate a particular and definitive concept or controlling criteria applicable to all cases, and that the primary consideration in each case should be justice which will serve the accused and not prejudice the rights of the prosecution, the court pointed out that although the defendant was a deaf mute since birth, he did not lack means of communication, since he was able to read and write and to converse in sign language; and that it was not claimed that his handicap had prevented him from summarizing what information he had given to the investigating officers or what his written statements to them generally contained, nor was it claimed that the written statements would tend to exculpate the defendant. The court observed that in deciding where justice lies in any individual case there should be considered, inter alia, the specific purpose for which the defendant seeks an inspection of his written statement, his likelihood of being able to inform counsel of its general contents, whether it tends to exculpate him or to express his guilt, the danger of giving him the opportunity to tailor a defense around his particular statement, and whether or not the request is for obviously exploratory purposes.

Where the defendant moved for an order requiring the district attorney to furnish his counsel copies of any written statements made by him to the district attorney or any other members of any law enforcement agency, alleging that an inspection at the time of trial would not give the defendant adequate opportunity to prepare and present evidence showing the inaccuracy of such statements, which might be the only corroboration of testimony to be given by an alleged accomplice, the court in *People v Smith* (1960) 26 Misc 2d 1072, 206 NYS2d 993, denied the motion on the ground that the defendant had not shown any unusual circumstances to move the discretion of the court. The court said that if there actually were inaccuracies in his statements, the defendant must already be aware of them and able to inform his counsel, and consequently no valid reason existed to provide a copy in order to prepare for trial; and that if no inaccuracies existed, the same reason for refusal would prevail with equal force. As to the decision in *People v D'Andrea* (1960) 20 Misc 2d 1070, 195 NYS2d 542, supra § 13[a], wherein it was held that pretrial inspection of a confession should be granted where the voluntary nature of the confession will become an issue and the defendant asserts that he does not remember the contents of the confession, the court in the present case, refusing to follow the D'Andrea Case, said that to adopt the criteria suggested therein would "remove all discretion from the court since experience as a prosecutor and judge suggests that such criteria exist in practically all criminal proceedings where a confession is involved," and that, in addition, it would seem that if such criteria were to be applied to confessions, they

should also be applied whether the label was confession, admission, or exculpatory statements, and that to attempt to make that type of distinction in advance might well complicate the whole procedure much more than it presently appeared to be.

In *People v Baker (1961) 29 Misc 2d 145, 210 NYS2d 458*, the court, following the rule that a defendant is not entitled to inspection of his own statements in the absence of unusual circumstances which might justify such inspection, denied the defendant's motion for inspection of his statement made at the time of his interrogation after the alleged offense, although the defendant stated that he had no recollection of what had occurred. Pointing out that the defendant, by his own affidavit in support of the motion, stated that he was taken to the state police barracks in a certain town by state troopers, and was there interrogated by the district attorney at various times, and at other times he was taken into another room and was questioned by the state troopers, and that he remembered that there was a stenographer present apparently taking down the questions asked of and the answers made by him, the court said that the circumstances were not unusual, and that the court would protect the defendant's rights when the proper time came during the trial.

See also *People v Roldan (1964) 42 Misc 2d 501, 248 NYS2d 408*, where the court, in ruling on the defendant's motion for a bill of particulars as to whether the prosecution intended to present in evidence against the defendant any admissions allegedly made by him, recognized that a mere assertion by the defendant in seeking pretrial examination of his statement that he could not recall the statement is not enough, but that there must be an affidavit by the defendant to that effect with adequate factual support; and that a defendant should establish the respect in which pretrial discovery of the statement is necessary for his preparation for trial.

Where the defendant's affidavit in support of his motion for pretrial inspection of statements taken from him averred that on the night of his arrest he was questioned at the police station for over 5 hours, that because of the length of the interrogation he was unable to recall everything he had said, and that the answers he had made at the time of the interrogation were put down in writing, the court in *People v Torres (1965) 46 Misc 2d 264, 259 NYS2d 656*, denied the motion, holding that the averments in the affidavit fell short of showing such special circumstances and compelling reasons as would require pretrial disclosure of the statements. The court said that it was aware of earlier decisions<sup>138</sup> which took a contrary view and directed the disclosure of a defendant's transcribed statements to the police or district attorney after his arrest "as a matter of right to properly enable the said defendant to prepare a defense in accordance with the dictates of a fair trial," but that until the appellate courts or the legislature sanctioned such a departure from the present well-established general rule, it saw no reason for taking such a "long stride toward a new practice."

A motion for inspection was also denied where --

-- the motion was for permission to examine all statements made by the defendant, the court holding that there was no showing of unusual circumstances which might justify the granting of an inspection. *People v Higgins (1960) 21 Misc 2d 94, 196 NYS2d 222*.

-- the motion was for discovery of certain statements made by the defendant, the court pointing out that the mere assertion that the statements had been involuntarily extracted from him was not sufficient to support the motion; that if the statements were made under the influence of fear produced by threats or upon a stipulation of the district attorney that the defendant should not be prosecuted therefor, it was not admissible in evidence against him; that the defendant would be afforded a preliminary hearing upon the trial as to the voluntary nature of his statements; and that there was no claim that the statements in question were favorable to the defendant. *People v Carothers (1960) 24 Misc 2d 734, 203 NYS2d 512*.

-- the motion was for pretrial inspection of any statements made by the defendant to any police officer or the assistant district attorney at the time of his arrest, and the defendant's counsel alleged in support of the motion that the requested inspection was not for the purpose of prying into the prosecution's case, but was necessary under the unusual circumstances present in the case, and that the defendant had informed him that the defendant could not remember all of

the questions put to and answers made by him, and the court stated that the motion under consideration was addressed to its discretion, and that it relied primarily on *People v Stokes* (1960) 24 Misc 2d 755, 204 NYS2d 827, supra. *People v Buccanfuso* (1960) 25 Misc 2d 219, 206 NYS 2d 394.

-- the motion was for inspection of a statement allegedly made and signed by the defendant, based on the contention that the statement had been obtained by the use of intimidation, trickery, misrepresentation, and deceit, the court noting that the question of the submission of the statement to the defendant was a matter within the court's discretion, and stating that it would seem that the motion and objections were directed more to the admission of the statements in evidence at the time of trial. *People v Bruno* (1962) 36 Misc 2d 330, 232 NYS2d 530.

Holding that at most, the ordering of a pretrial inspection of a defendant's written statement requested by him rests in the sound discretion of the trial court, and that a clear abuse of such discretion would have to be shown before the defendant could predicate error on such refusal, the court in *State v Corkran* (1965) 3 Ohio St 2d 125, 32 Ohio Ops 2d 132, 209 NE2d 437, upheld the trial court's denial of the defendant's motion to require the prosecuting attorney to submit for his inspection a statement made by him respecting the crime involved.

See also *State v Strong* (1963) 119 Ohio App 31, 26 Ohio Ops 2d 134, 196 NE2d 801, where the court, without discussion, held that there was no error in the trial court's refusing to order statements of the defendant to be furnished to defense counsel for examination and inspection before trial.

In *Bell v Webb* (1961, Okla Crim) 365 P2d 399, it was held that the prosecuting attorney would not be required to produce, for inspection by the defendant in pretrial proceedings, a taperecorded conversation between the defendant and an assistant county attorney. Pointing out that the tape recording itself could not be evidence in the case nor did it constitute the very essence of the case, but that, at most, it might possibly become incidentally material on cross-examination, the court said that the tape recording was not the proper subject of an order of mandamus to the county attorney requiring him to produce it, although in a proper case this kind of relief would be made available. The court recognized that in the absence of statutory authority, the defendant has no absolute right of pretrial inspection or to compel the prosecution to produce documents and reports that may be beneficial to him, although in the interest of justice for good cause shown, where the denial of pretrial inspection might result in a miscarriage of justice, the trial court has the inherent right in the exercise of sound judicial discretion to grant the remedy of pretrial inspection to the accused. Holding to the same effect is *Application of Killion* (1959, Okla Crim) 338 P2d 168.

Stating that the rights of the defendant in a criminal case will be fully protected if the power to compel production of evidence in possession of the prosecution is committed to the sound discretion of the trial judge, subject to a review for abuse, and holding that the trial court has discretionary power to grant or deny a defendant's pretrial motion for permission to inspect a confession made by him, the court in *State v Leland* (1951) 190 Or 598, 227 P2d 785, affd 343 US 790, 96 L ed 1302, 72 S Ct 1002, reh den 344 US 848, 97 L ed 659, 73 S Ct 4, held that in the instant case there was no abuse of discretion in the trial court denying the defendant's motion for permission to inspect his confession. Noting that the written motion itself set forth no grounds for its allowance, and that the grounds specified by the defendant's counsel, upon the oral application made just before the commencement of the trial, were that the inspection was necessary (1) to determine whether or not the defendant's confession was a rational or accurate statement of the facts as he had related them to his counsel, and (2) to attack the validity of the confession with respect to the formalities of taking it, the court pointed out that the confession was produced in court 5 days before the defendant rested his case at the trial; that there was ample time for the defendant's counsel and his expert witnesses to study the confession; and that a pretrial inspection of the confession would not have aided the defendant's counsel in his attack on its validity in the slightest degree.

The defendant's petition for permission to inspect a transcript of an interrogation of the defendant which was conducted shortly after he had been taken into custody was denied in *Commonwealth v Kotch* (1960) 22 Pa D & C2d 105, 51 Luzerne Leg Reg R 59, where the petition was based on the allegations that the interrogation of the defendant was

conducted while the defendant was "confused, ill, physically exhausted, and in a state of shock"; that the defendant was unable to inform his counsel what statements he had made at the time of the interrogation; that he could not clearly recall the circumstances surrounding the alleged homicide; and that the requested transcript was necessary in order to prepare a defense. Noting that the matter of permitting a defendant to inspect evidence in the possession of the prosecution depends upon an exercise of judicial discretion, the court concluded that "there has been shown neither significant fact nor logical reason why this transcript of interrogation is needed to prepare the defense."

In *State v Clark* (1944) 21 Wash 2d 774, 153 P2d 297, cert den 325 US 878, 89 L ed 1994, 65 S Ct 1554, it was held not error to refuse to permit the defendant to examine typewritten exhibits which recorded the confessions made by the defendant to police officers and to the prosecuting attorney, the court noting that the prosecution is not required to submit its evidence to defense counsel; that the accused is not, as a matter of right, entitled to have for inspection before trial evidence which is in the possession of the prosecution; and that such matter is peculiarly within the trial court's discretion, which will not be disturbed on review unless there is a manifest abuse of discretion.

For other cases wherein the court, although recognizing that inspection by an accused of his confession or statement may be ordered in a proper case, refused to permit the defendant to inspect his confession or statement made after the alleged offense on the ground that there was no showing of circumstances warranting the requested inspection, see the following:

Where during a voir dire examination of a detective who had testified on matters pertaining to the circumstances surrounding the taking of each defendant's statement after the arrest, the defendants requested that they be allowed to see the statements to determine their voluntariness, the court in *State v Hashimoto* (1962) 46 Hawaii 183, 377 P2d 728, upheld the denial of the request, noting that the contents of such statements were not material to the question of

voluntariness.

See *State ex rel. Corbin v Superior Court of Maricopa County*, 103 Ariz 465, 445 P2d 441, § 11[a].

In prosecution for introducing contraband into detention facility, district attorney should have informed defendant that he would use testimony of sheriff's officer concerning conversations he had with defendant in jail, regarding defendant's familiarity with jail procedures governing permissible items, where prosecution had agreed to comply with very broad terms of defendant's motion for discovery, which sought substance of all oral statements of defendant upon which prosecution sought to rely to support charges however, in absence of showing of prejudice to defendant, his conviction would not be reversed. *People v Wynsma (Colo App)* 541 P2d 328.

Admission by accused to cellmate which cellmate testified to before grand jury was not statement of accused subject to pretrial discovery under Rule 16(a) which is limited to statements made by accused to law enforcement officers or their agents and such statement would only be producible under Jencks Act after cellmate had testified on direct examination. *Robinson v United States (Dist Col App)* 361 A2d 199.

Trial court's error in not furnishing defendant, in response to his demand, with substance of any oral statements made by him, together with names and addresses of witnesses to statements, was harmless where record reflected that testimony given was corroborative of testimony subsequently given by defendant. *Cumbie v State (Fla App)* 327 So 2d 67.

Trial court's overruling of defendants' motion for discovery and disclosure of all statements made by them in connection with charged offenses did not deny them fair trial where they failed to meet their burden of showing how their case had been materially prejudiced and where evidence which they sought to inspect was introduced to jury in its entirety and therefore any favorable evidence was made available to jury. *Tarplin v State (Ga)* 222 SE2d 364.

Defendant charged with carrying concealed deadly weapon could not discover prior to trial statement purportedly made by him during noncustodial questioning in which police officer reported that defendant said he had permit to carry gun. *Jordan v State (1983)* 166 Ga App 417, 304 SE2d 522.

Denial of opportunity of defense counsel to examine alleged confession or admission made by defendant to police officers after his arrest did not constitute violation of constitutional rights where defendant did not show that he was entitled to examine statement during hearing held for purpose of deciding whether admission or confession was freely and voluntarily given and where contents of statement were read to jury when defense counsel requested that witness read it. *Sims v State (1978)* 144 Ga App 825, 242 SE2d 745.

Court's refusal to order notes and reports made during defendant's interrogation to be produced at pre-trial hearing was not prejudicial where they were offered in rebuttal testimony of police officer, were of little importance to case, and had no relation to issues involved. *People v Peter*, 55 Ill 2d 443, 303 NE2d 398, cert den 417 US 920, 41 L Ed 2d 225, 94 S Ct 2627.

In prosecution for armed robbery, court rule required prosecution to disclose existence of statements made by defendant to parole officer and existence of transcript of defendant's parole revocation hearing. However, defendant's right to object to use of transcript was waived when defense counsel withdrew objection made during cross-examination of

defendant by state. *People v Patterson* (1980) 88 Ill App 3d 168, 43 Ill Dec 396, 410 NE2d 396.

See *People v Lighting*, 83 Ill App 2d 430, 228 NE2d 104, § 17.

See *People v Green*, 14 Ill App 3d 972, 304 NE2d 32, cert den 417 US 972, 41 L Ed 2d 1143, 94 S Ct 3179, § 11[d].

Trial judge did not err in denying defendant's pretrial request for a written transcript of that portion of a videotape which contained defendant's confession to robbery in which police officer, prior to giving of Miranda advisements and obtaining a waiver, questioned defendant to obtain background information, where defendant cited nothing in the video tape which would have supported a conclusion different from that reached by the trial judge that the pre-Miranda portion of the tape would be suppressed but that the remainder would be admitted into evidence, and where defendant was given an opportunity to transcribe the tape but never did so. *Roarks v State* (1983, Ind) 448 NE2d 1071.

Prosecutor's failure to produce pre-trial statement by defendant and prosecutor's denial of its existence were inadvertent, non-prejudicial and did not warrant reversal where statement attributed to defendant was highly inculpatory and yet State did not use it at trial, where statement was short and contained no exculpatory information and where defendant had no need of statement for purposes of preparing defense against it. *Lagenour v State* (1978, Ind) 376 NE2d 475.

State complied with pre-trial discovery order under Kentucky statute, where trial court held hearing in chambers out of presence of a jury on introduction in evidence of tape recordings between defendant and state witness and permitted counsel for defendant to examine state police officer about manner of recordation of tapes and had tapes played in presence of defendant and counsel. *Deskins v Commonwealth (Ky)* 512 SW2d 520, cert den 419 US 1122, 42 L Ed 2d 822, 95 S Ct 806.

In criminal prosecution, defendant was not entitled to obtain contents of oral statement made by him to private citizen, where evidence was not of exculpatory nature even though state planned to use statement at trial. *State v Joseph* (1980, La) 379 So 2d 1076.

State was not required to disclose statement defendant had made where, although state is required to produce defendant's written confessions, such statement was exculpatory in nature and state is not required to disclose existence of exculpatory statement in advance of trial if statement is not suppressed and is later disclosed during progress of trial; nor was defendant entitled to information concerning any physical evidence relating to crime, including fingerprints and analysis of fingerprints nor was he entitled to list of witnesses state intended to call during trial. *State v Chase (La)* 327 So 2d 391.

Pursuant to discovery rule, state was not required to furnish defendant with substance of statements given by defendant to one who was not agent of state. *McDowell v State*, 31 Md App 652, 358 A2d 624.

Defendant was not entitled to pretrial discovery or inspection of statement by him to government witness where witness was not government agent. *Funderburk v State*, 12 Md App 481, 280 A2d 4.

There was no error in denying defendant information concerning oral confessions given by him to various police officers where some of his statements were furnished to him and these turned out to be substantially same as testimony of police officers at pretrial hearing on motion to suppress confessions; moreover, granting of such motion was discretionary with trial judge and no abuse of discretion was shown. *Com. v Therrien (Mass)* 269 NE2d 687.

Admission of oral confession was not discovery violation, even though State had failed to submit oral confession upon defendant's discovery request; suppression hearing served the purpose of disclosing the existence of the oral confession and the State's intended use of it against defendant, defendant also made written confession which was essentially the same as oral confession, and defendant had ample opportunity to disclose to his attorney that he had given an oral

confession, thereby giving his attorney plenty of time for preparation of defense in light of confession. Uniform Circuit and County Court Rule 9.04. *Wimberly v. State*, 839 So. 2d 553 (Miss. Ct. App. 2002).

Defendant was not entitled to automatic disclosure of his purported confession prior to trial, where defendant failed to submit written request for disclosure as required by court rule. Uniform Circuit and County Court Rule 9.04, subd. A, par. 2. *Erving v. State*, 815 So. 2d 434 (Miss. Ct. App. 2002).

Trial court did not abuse its discretion, in prosecution for stabbing of boy, in not suppressing evidence of defendant's statement denying attack on boy, regardless of fact that defense counsel had not been timely provided with copy of statement, where defendant's trial strategy included taking stand to support his alibi defense and where introduction of his statement did not therefore per se cause him to take stand. *State v Carter* (1978, Mo) 572 SW2d 430.

Although defendant was entitled to discovery of tapes of three recorded conversations between defendant and police officer made after he was arrested, it would have been fruitless to order state to disclose material since tapes containing conversations had been erased, and trial judge acted properly in denying motion that case be dismissed but in excluding any testimony by police officer as to any information obtained from defendant during taped conversations. *State v Smith* (1983, Mo App) 650 SW2d 5.

See *State v Williams*, 183 Neb 257, 159 NW2d 549, § 17.

Denying inspection of defendant's pretrial statements was not abuse of discretion where none of defendant's statements was offered in evidence at trial. *Mears v State* (Nev) 422 P2d 230, cert den 389 US 888, 19 L Ed 2d 188, 88 S Ct 124, reh den 389 US 945, 19 L Ed 2d 303, 88 S Ct 299.

In prosecution for unlawful possession and sale of dangerous drug, defendant's motion for discovery of any and all statements made by him denied where there was no claim that he made any statement; but district attorney ordered to disclose whether he intended to rely on any confession or admission made by defendant after being taken into custody, and if so, defendant would be entitled, under statute, to pretrial hearing to determine voluntariness. *People v Ricci*, 59 Misc 2d 259, 298 NYS2d 637.

See *People v Johnston*, 55 Misc 2d 185, 285 NYS2d 243, § 21[a].

Pennsylvania Rules of Criminal Procedure provide that in no event shall court order pretrial discovery or inspection of written statements of witnesses in possession of *Commonwealth*. *Com. v Kantos*, 442 Pa 343, 276 A2d 830 (citing annotation).

See *Wilson v State* (Tenn Crim) 537 SW2d 446, § 11[h].

Though it was error for trial court to allow testimony by two witnesses as to incriminating statements made to them by murder defendant while they were incarcerated with defendant, in that statements were encompassed by pretrial discovery order but not disclosed to defendant prior to trial, error was harmless and did not violate defendant's due process rights where statements made to witnesses constituted only one strand in web of incriminating evidence, and defendant failed to affirmatively show how he was injured in that witnesses were extensively cross-examined by defendant in attempt to impeach them, defendant did not show that defense could have been conducted differently had he been given notice of expected testimony or effect of any such change in defense, and defendant failed to request continuance for purposes of investigation into witnesses' history or character. *Hernandez v State* (1982, Tex App 4th Dist) 636 SW2d 611.

[\*13c] Inspection denied as matter of principlen139

Apparently taking the view that an accused's confession or statement is not subject to production and inspection (at least until it is offered in evidence or used in court on trial), and without indicating that inspection by an accused of his confession or statement may be ordered under any circumstances, the courts in the following cases have refused to permit the defendant to inspect his confession or statement made after the alleged offense.

## TEXAS

*Hackathorn v Decker (CA5 Tex) 369 F2d 150, cert den 389 US 940, 19 L Ed 2d 294, 88 S Ct 301* (stating Tex law)

In *Wooley v People (1961) 148 Colo 392, 367 P2d 903*, wherein the defendant pleaded insanity, it was held that the defendant had no right to an order requiring the district attorney to turn over a copy of the defendant's confession to a physician to be used by him in conducting his mental examination of the defendant.

The defendant's motion for an order requiring the prosecution to permit his counsel to inspect an alleged signed statement which he had given to the police was held properly denied in *State v Trumbull (1961) 23 Conn Supp 41, 176 A2d 887*. Noting that in any civil action the court, upon motion of either party, may order production and inspection of papers or documents which are material to the mover's cause of action or defense and which are within the knowledge, possession, or power of the adverse party, the court concluded that although under Connecticut rules of practice, rules for civil action should apply in criminal cases insofar as they were adapted to such proceedings, the defendant in the present case was not entitled to the disclosure of his statement, since it was not shown that the facts lay exclusively within the knowledge of the prosecution. The court pointed out that the defendant must be presumed to have knowledge of the contents of the statement, that no reason had been given why he lacked knowledge upon the subject, and that any knowledge which the prosecution might have would not, under ordinary circumstances, be exclusive. Moreover, added the court, in criminal cases the accused cannot compel the prosecution to produce documents which he has made, and he is therefore not entitled to inspection of incriminating letters written by him, nor is he entitled to have produced a statement made and signed by him, even on the ground that such statement is material to his defense.

Where during the cross-examination of a detective defense counsel sought to obtain a copy of a purported statement given by the defendant to the police, it was held in *State v Marzbanian (1963) 2 Conn Cir 312, 198 A2d 721, certif den (Conn) 197 A2d 944*, that there was no error in the ruling of the trial court denying the defendant access to the statement, since the statement was part of the prosecuting attorney's file.

The defendant's request for permission to inspect, in order to properly prepare his defense, his signed statement made to the police, was denied in *State v Kupis (1935) 37 Del 27, 179 A 640*, the court stating that the granting of the request would be contrary to all practice and would lead to dangerous results.<sup>140</sup>

See *State v Furthmyer (1929) 128 Kan 317, 277 P 1019*, where the court, in holding that there was no reversible error in the denial of the defendant's pretrial request for permission to inspect written statements made by the defendant and an eyewitness to the homicide involved, pointed out (1) that while the defendant's request was made under the provision of the civil code relating to obtaining an inspection of books, papers, and documents which are to be used in evidence, that statute has not been made applicable to criminal cases, and the trial court has no power to enforce a demand for inspection of statements in the custody of the prosecuting attorney which he designs to use in the prosecution of the defendant; (2) that while the penalty provided by that statute is the exclusion of the document from evidence when the party having control of the document fails or refuses to allow an inspection, neither of the documents in question in the present case had been introduced in evidence; (3) that if the prosecution had attempted to introduce these statements in evidence, the trial court might have properly excluded them, and it might have been reversible error to deny the defendant's application for inspection; and (4) that while the defendant relied on *State v Hinkley (1910) 81 Kan 838, 106 P 1088*, *infra* § 20, the document involved in that case was the evidence taken at a coroner's inquest, which under the law was a public document and should have been on file in the office of the county clerk and subject to public

inspection.

Following the rule that a defendant is not entitled to a copy of his confession, the court in *Commonwealth v Chapin* (1956) 333 Mass 610, 132 NE 2d 404, cert den 352 US 857, 1 L ed 2d 63, 77 S Ct 75, upheld the denial of the defendant's motion for an order requiring the prosecution to produce and furnish to the defendant before trial copies of any written statements, admissions, or confessions alleged to have been signed by the defendant which were in the possession of the prosecution. Holding to the same effect are *Commonwealth v Galvin* (1948) 323 Mass 205, 80 NE2d 825, and *Commonwealth v Lundin* (1950) 326 Mass 551, 95 NE2d 661.

In *State ex rel. Robertson v Steele* (1912) 117 Minn 384, 135 NW 1128, the court, following the common-law rule that a defendant in a criminal case is not entitled to be furnished, prior to trial, evidence the prosecution has against him, reversed an order requiring the prosecuting attorney to furnish the defendant with a copy of statement previously made by the defendant. The court added that even if it was conceded that the order in question was a discretionary one, the record did not sustain the trial court in granting it.

See *State v Hancock* (1937) 340 Mo 918, 104 SW2d 241, where it was held not error to deny the defendant's request, made during the cross-examination of a police officer, for permission to see statements of the defendant which had been made orally to the police and reduced to writing by a stenographer where it appeared that the officers present at the time of the making of the statements had testified concerning the oral statements made by the defendant, and that the prosecution had made no use of any written statement demanded by the defendant nor did the officers purport to testify as to the contents of the written statements.

In *People b Donnelly* (1953) 204 Misc 556, 124 NYS2d 72, the defendant's motion for the production of a statement made by him shortly after the alleged offense was denied, the court stating that the defendant's statement should be peculiarly within his knowledge that "no unusual circumstances would warrant production of the statement," that public policy does not indicate the necessity to compel the discovery of such document in the furtherance of justice, that the prosecution in a criminal case already has heavy burdens, such as the presumption of innocence, and that it would not seem that the courts should add to that heavy burden by letting the defendant see the prosecution's case prior to trial in a criminal matter.

In *People v Cox* (1960) 24 Misc 2d 998, 202 NYS2d 607, the defendant's motion for an order directing the district attorney to furnish him with a copy of a statement which he had voluntarily given to the district attorney was denied, the court stating that "a defendant is not entitled to a pretrial inspection of a statement made by him to the police or the prosecuting authorities."

See also *People v Ulisano* (1961) 28 Misc 2d 592, 215 NYS2d 800, where the defendant's pretrial application for a copy of the statement given by him to the police was denied for the reason that such relief is only granted under the statute providing for copies of statements or depositions taken on a preliminary examination in the Special Sessions Court.

Where the defendant, indicted for the crime of perjury in testifying before a grand jury, moved for discovery and inspection of evidence gained by electronic eavesdropping of his conversation with his attorney concerning the matter about which he was alleged to have lied to the grand jury, the court in *People v Golly* (1964) 43 Misc 2d 122, 250 NYS2d 210, denied the motion, stating that there was no general right to discovery in New York, and that the defendant would suffer no undue prejudice in awaiting trial before challenging the constitutionality of the eavesdropping evidence which he supposed would be used against him.

In *State v Yeoman* (1925) 112 Ohio St 214, 147 NE 3, it was held that defendant was not entitled to pretrial inspection of a written confession signed by her and in the possession of the prosecuting attorney. The court, in concluding that a denial of such inspection would not seriously interfere with the rights of the defendant, observed: "If the prosecuting attorney, after proof that the confession in his possession was signed by the defendant, should offer it as evidence

tending to establish proof of guilt, or should examine a witness in relation thereto, defendant's counsel could then make a demand for it, and it would be the duty of the court to submit the written confession for inspection by counsel; but the defendant has no right to demand or compel the inspection or copy of a signed confession unless the state attempts to use it at the trial."

The defendant's contention that the trial court committed error in overruling his pretrial motion to require the prosecution to produce, for his inspection, a statement taken from him by the police was rejected in *State v Johnson* (1950, App) 57 Ohio L Abs 524, 94 (ne2d 791, reh den 58 Ohio L Abs 334 96 NE2d 604, app dismd 154 Ohio St 236, 43 Ohio Ops 41, 94 NE2d 797, the court holding that the defendant had no right to compel the prosecution to produce a written confession made by him, and that the Ohio Code of Civil Procedure providing for the right of a party to books or documents in the possession of the other party has no application to criminal cases.

Relying on *State v Yeoman* (Ohio) supra, the court in *State v Potts* (1953, App) 69 Ohio L Abs 77, 124 NE2d 180, also upheld the denial of the defendant's pretrial motion for permission to inspect confession.

In *State v Thomasson* (1950, App) 46 Ohio Ops 402, 58 Ohio L Abs 402, 97 NE2d 42, the denial of the defendant's motion, made at the beginning of trial, for the production of statements made by him to the police and to the prosecuting attorney was upheld, the court stating that if found no authority requiring the prosecuting attorney to submit to defense counsel statements made by the defendant to the police and to the prosecuting attorney which were in the possession of the prosecuting attorney. Also holding that the defendant was not entitled to inspect or copy any written statements or confessions made by him which were in the hands of a prosecuting attorney is *State v Major* (1950, CP) 60 Ohio L Abs 271, 101 NE2d 397.

The denial of the defendant's request for permission to examine his confessions before they were admitted in evidence was upheld in *Witham v State* (1950) 191 Tenn 115, 232 SW2d 3, the court stating that an accused cannot compel the prosecution to produce documents which he has made, and that he is therefore not entitled to inspection of incriminating letters written by him, nor is he entitled to have produced a statement made and signed by him even on the ground that such statement is material to his defense. The court also noted that the general rule is that an accused has no right to inspection or disclosure of evidence in the possession of the prosecution.<sup>141</sup>

In *Davis v State* (1925) 99 Tex Crim 517, 270 SW 1022, the trial court's refusal at the beginning of the trial to permit the defendant to inspect his confession was upheld, the court noting that it was advised of no law which would require the trial court at that stage of the proceeding to command the prosecution to deliver the confession to the defendant for inspection, and that when the prosecution offered it in evidence, the defendant was then entitled to inspect it in order that he might offer objections, if any, to its introduction.

Noting that the writing called for by the defendant was a private paper, and stating that such paper becomes subject to the defendant's inspection only when used before the jury by the prosecution in some way so as to make its contents an issue, the court in *St. Clair v State* (1926) 104 Tex Crim 423 284 SW 571, upheld the denial of the defendant's motions, made during the trial, for the production of certain written statements made by him. The court pointed out that it was not shown in the record that the prosecution had asked any questions relative to the statements in question, nor that it had exhibited them or referred to them in any harmful way or otherwise before the jury. Holding to the same effect are *Goode v State* (1909) 57 Tex Crim 220, 123 SW 597, and *Avery v State* (1938) 135 Tex Crim 557, 121 SW2d 992.

Where a written confession made by the defendant was not offered in evidence at the trial and no limitation was placed by the trial court on the examination of the defendant or any other witnesses with reference to such statement, it was held in *Pierce v State* (1928) 109 Tex Crim 503, 5 SW2d 516, that there was no error in refusing to grant the defendant's motion for production of the confession during the trial.

In *Freeman v State* (1958) 166 Tex Crim 626, 317 SW2d 726, a prosecution for murder, wherein the defendant's sole

defense was that of insanity, the court held that it was not error to deny the defendant's motion, filed prior to the sanity hearing and main trial, to require the district attorney to produce for the defendant's inspection his confession and reports of certain named doctors, the court following the rule that the prosecution is not required to furnish the accused with statements of witnesses, exhibits, or confessions for the purpose of pretrial inspection.

In *Dowling v State* (1958) 167 Tex Crim 438 317 SW2d 533, cert den 358 US 886, 3 L ed 2d 114, 79 S Ct 127, the court, following the rule that the defendant is not entitled to pretrial inspection of his confession, said that a rule so well-established in Texas should not be abandoned without legislative sanction.

The denial of the defendant's request for the production of his confession was also upheld in *Welch v State* (1963, Tex Crim) 373 SW2d 497, notwithstanding the defendant's contention that such production was necessary because the confession might have proved helpful to a psychiatrist who had examined him. The court pointed out that the psychiatrist appeared to have all of the information which he would have obtained by reading the confession, that he had testified that he had relied upon information received from the defendant, the hypothetical questions were propounded to him covering all phases of the evidence, that there was not showing that he desired to see the confession, and that his testimony clearly showed that he did not need it to form his opinion that the defendant was insane.

In *State v Clark* (1930) 156 Wash 543, 287 P 18, the defendant's complaint on appeal from a judgment of conviction that he was not permitted to inspect a sworn statement obtained from him by the prosecuting attorney was held not sustainable, the court pointing out that the prosecution did not make any use of the statement on the trial of the defendant, and that if the defendant could disclose information to the prosecuting attorney, he certainly could have given the same information to his counsel. The court added that if the prosecution had introduced the statement to impeach the testimony of the defendant, a different question might have been presented.

For other cases wherein an accused's confession or statement, made after the alleged offense, was held not subject to production and there was no expression of any opinion as to whether inspection by an accused of his confession or statement may be ordered under proper circumstances, see the following:

In some Pennsylvania cases it was held that the trial court had no discretionary power to permit a defendant to inspect his confession or statement. See *Commonwealth v McQuiston* (1945) 56 Pa D & C 533, 60 York Leg Rec 140; *Commonwealth v Smith* (1949) 67 Pa D & C 598, 60 Dauph Co 35; *Commonwealth v Sherman* (1950) 72 Pa D & C 367, 66 Montg Co LR 167; *Commonwealth v Graham* (1955, Pa) 42 Del Co 313, all supra § 5[a].

As to a defendant's right to inspection of his confession or statement in Pennsylvania, attention is also called to *Commonwealth v Butler* (1961) 405 Pa 36, 173 A2d 468, cert den 368 US 945, 7 L ed 2d 341, 82 S Ct 384, reh den 368 US 972, 7 L ed 2d 402, 82 S Ct 450, supra § 9[c], footnote 13, wherein the court upheld the denial of the defendant's request to inspect his statement which was identified during the trial, but was not offered in evidence.

It should be noted, however that these holdings are in conflict with the decision of the Pennsylvania Supreme Court in *Commonwealth v Hoban* (1952, Pa) 54 Lack Jur 213, supra § 5[a], and that they were rejected in *Commonwealth v Stepper* (1952, Pa) 54 Lack Jur 205, supra § 13[a].

<>

Defense discovery request for "A copy of any and all exculpatory and/or inculpatory written or recorded or taped statements and summaries of any oral statements made by the Defendant to a Prosecuting Attorney, his assistants or any law enforcement officer" did not give rise to prosecutorial duty to disclose letter written by defendant to friend while both were in custody few days before trial. *People v Lytal* (1982) 119 Mich App 562, 326 NW2d 559.

Defendant's statement to officer when arrested "that he was there, but he didn't rob the old lady" was not disculpable as statement to which People "intend to offer at trial," but statement was properly admissible where defense counsel opened door by cross-examining officer as to whether there ever came time when defendant "denied his involvement in this" and witness responded in affirmative, thereby entitling prosecutor on redirect to question witness as to exact words that defendant used. *People v Goodson* (1982) 57 NY2d 828, 455 NYS2d 757, 442 NE2d 54.

State is not required to furnish accused with statement of witnesses, copies of reports, or his written statements, for purpose of pretrial inspection. *Hackathorn v State* (Tex Crim) 422 SW2d 920.

[\*13d] Cases making distinction between written confession and other types of confessions; notes or memoranda

relating to oral statements.<sup>142</sup>

It is well established in Louisiana that an accused is entitled to inspection of a written confession made by him, but not to any other types of confessions or statements.<sup>143</sup>

This Louisiana rule was said to have been first adopted in *State v Dorsey* (1945) 207 La 928, 22 So 2d 273, wherein an order denying the defendant's pretrial motion to examine and copy a written confession allegedly made by him which was then in the possession of the prosecuting attorney was reversed. Rejecting the prosecution's contention that a written confession in the hands of the district attorney was a public record within the meaning of the Public Records Act providing that public records held by any sheriff, district attorney, or police officer as evidence in the investigation for or prosecution of a criminal charge were not subject to inspection until after such records had been used in open court or the criminal charge had been finally disposed of, the court concluded that to deny an accused a pretrial inspection of his written confession was tantamount to depriving him a fair trial and was in violation of his constitutional rights. The court added, however, that it did not intend to overrule the prior jurisprudence of Louisiana, particularly the earlier cases in which the defendant was denied pretrial inspection of written confessions of codefendants, written statements of witnesses, or police reports in the hands of a district attorney.

The Louisiana rule that an accused is entitled to inspection of a written confession made by him was also recognized in *State v Simpson* (1949) 216 La 212, 43 So 2d 585, cert den 339 US 929, 94 L ed 1350, 70 S Ct 625; *State v Alleman* (1950) 218 La 821, 51 So 2d 83; *State v Shourds* (1954) 224 La 955, 71 So 2d 340.

See also *State v Haddad* (1952) 221 La 337, 59 So 2d 411, where the denial of the defendant's request, during the trial, for an order requiring the prosecuting attorney to produce wire recordings of certain statements made by the defendant was upheld, the court pointing out that the withholding of the defendant's statements could afford him no cause for complaint in view of the fact that the prosecution did not offer the statements in evidence or refer to them in any manner; and that hence the defendant could not possibly have been prejudiced in any way.

In *State v Di Vincenti* (1954) 225 La 689, 73 So 2d 806, it appeared that during the course of an investigation of the crime charged against the defendant a tape recording was made of conversation between the defendant and another person; that for his convenience in the preparation of the state's case, the prosecuting attorney had prepared a written transcript of the recorded conversation; and that the defendant and his attorneys were permitted, on a pretrial prayer foroyer, to listen to the entire recording, but the trial judge refused to order the prosecuting attorney to furnish the defendant a copy of the written transcript of the recording. In holding that there was no error in refusing to order the production of a copy of the written transcript, the court pointed out that the transcript did not constitute a written confession of which the defendant was entitled to a pretrial view; that it amounted to no more than notes or memoranda, made for the use of the prosecuting attorney, which merely recited some of the contents of the confessions; and that since the defendant was granted access to the recording, he could have made his own written transcript had he desired.

In at least one case it was indicated that the Louisiana rule permitting inspection of a written confession is applicable only where such confession is to be used as evidence by the prosecution at the trial. Thus, in *State v Labat* (1954) 226 La 201, 75 So 2d 333, affd 350 US 91, 100 L ed 83, 76 S Ct 158, reh den 350 US 955, 100 L ed 831, 76 S Ct 340, cert den 355 US 879, 2 L ed 2d 109, 78 S Ct 144, it was held that the refusal of the trial judge to grant the defendant a pretrial inspection of his written confession was not error where the ruling was based on the prosecution's answer that it did not intend to offer the confession in evidence. The court said that since the prosecution did not rely on or offer in evidence the written confession, this document was no more than a written statement of a witness or a police report in the hands of the prosecuting attorney to be used by him in the preparation of the case.

Stating that the ruling in *State v Dorsey* (La) supra, does not apply to oral confessions made by a defendant, the court in *State v Bickham* (1960) 239 La 1094, 121 So 2d 207, cert den 364 US 874, 5 L ed 2d 98, 81 S Ct 123, upheld the trial court's refusal to order that any verbal statements made by the defendant should be reduced to writing and submitted to

him. The trial judge's refusal to grant the defendant's prayer for oyer of an oral statement or confession was also upheld as proper in *State v Martinez* (1952) 220 La 899, 57 So 2d 888, cert den 344 US 843, 97 L ed 656, 73 S Ct 58, and *State ve Lea* (1955) 228 La 724, 84 So 2d 169, cert den 350 US 1007, 100 L ed 869, 76 S Ct 655.

The denial of the defendant's pretrial request for permission to examine wiretap recordings of his telephone conversations which were made by the police during their investigation of the crime charged against the defendant was upheld in *State v Pailet* (1964) 246 La 483, 165 So 2d 294, the court noting that except for a written confession of the accused, all evidence relating to a pending criminal case which is in the possession of the prosecution is privileged and not subject to inspection by the accused unless and until it is offered in evidence at the trial.

A judgment of conviction was annulled, and the case remanded for a new trial, in *State v Simien* (1965) 248 La 323, 178 So 2d 266, on the ground, inter alia, of error in the trial court's refusal to order the production of an alleged written statement of the defendant and to examine it to determine whether it was in fact an admission or confession which the defense was entitled to inspect. Pointing out that an oral confession of the defendant had been used to establish his guilt, and that at the time of the motion, the district attorney admitted that he would use the statement if the defendant took the stand and gave contradictory testimony, the court said that under the circumstances of the case the trial court should have examined the statement in question as requested by the defense, and that if it, upon such examination, found that the statement was in fact a confession or admission, it should have permitted the defense to see the statement.

<>

In at least one New York case it has been held that notes or memoranda relating to an oral admission are not subject to inspection. Thus, in *People v Riley* (1965) 46 Misc 2d 221, 258 NYS2d 932, wherein the prosecution notified defense counsel that an admission allegedly made by the defendant would be offered in evidence at the trial, whereupon the defense requested a copy of the alleged admission, but the prosecution refused, stating that the admission was not in writing, and thereupon the defendant applied to the court for an order directing the prosecution to furnish him with a copy of the alleged admission before taking a position as to whether he desired a hearing on the issue of the voluntariness of the admission, the court, denying the defendant's application, held that the rule permitting pretrial or prehearing discovery of a confession or admission has reference only to confessions or admissions written by the defendant himself or signed by him or in such question-answer form as would be admissible as an exhibit upon the trial after the giving of qualifying testimony, and that notes or memoranda relating to an oral admission are not admissible in evidence and are not subject to inspection. The court pointed out that where a defendant has allegedly made an oral admission, whether or not a police officer has made a note thereof or given the substance or content thereof in some paper for the use of the prosecuting attorney, there is no "copy" which can be furnished to the defendant in advance of the testimony to be elicited at the hearing, and that actually, an alleged oral admission has no legal existence except when and as testified to by the witness.

<>

For Illinois cases dealing with a statute providing that an accused is entitled only to a copy of a written confession, see § 11[d], supra.

<>

Felony murder defendant was not denied fair trial by state's failure to disclose, pursuant to pretrial discovery order, unrecorded oral statement made by defendant to detective and original notes used by detective to write up defendant's statement, statement of prosecution witness made to police, and test results from analysis of defendant's jacket which

showed presence of blood and human tissue which defendant had told detective was catsup, since, even if defendant would not have testified had he known of unrecorded oral statement and jacket test results, due process protection applies primarily in field of exculpatory rather than inculpatory evidence and none of evidence was exculpatory, detective was prevented from testifying to "catsup" statement by defendant's motion to exclude, pretrial discovery order did not include production of unrecorded oral statement by defendant or refer to statements made by witnesses other than defendant, there was no evidence that state was ever in possession of detective's notes or knew of defendant's unrecorded oral statement so as to be in position to suppress evidence, and defendant had no right to production of detective's notes in that they were work product. *Rogers v State* (1982, Ala App) 417 So 2d 241.

Trial court did not abuse discretion in denying motion for discovery of defendant's oral statements made before trial, where no written statements of defendant were introduced during trial and only argument made on appeal as to prejudice to defendant by denial of motion was in connection with oral statement of defendant that he was in company of codefendant from approximately 12 midnight on evening in question until both were apprehended by police at 3:50 a.m. *State v Rogers*, 4 Ariz App 198, 419 P2d 102.

Whenever any oral statement has been made by defendant and that fact is known to prosecution, such statement is proper subject of discovery and inspection; thus, trial court erred in ruling that since defendant's oral statement had not been reduced to writing, it need not have been produced upon motion for pretrial discovery. *People v Campbell*, 27 Cal App 3d 849, 104 Cal Rptr 118.

See *Smith v State* (Del Sup) 317 A2d 20, § 11[b].

All statements by defendant directly to government agents were discoverable under discovery rules, however they were recorded, including transcript of policeman's grand jury testimony. *Rosser v United States* (1977, Dist Col App) 381 A2d 598.

Omission from discovery responses by prosecution of oral exculpatory statement made by defendant to police was not prejudicial to defendant's preparation of case. *Bush v State* (Fla App D3) 341 So 2d 534.

Where police officers made informal notes of their own as to oral statements made by defendant soon after his arrest, but there was no attempt or pretense to reduce such notes, either then or thereafter, to verbatim statement of defendant, such nonverbatim notes, in and of themselves, did not constitute substantive evidence subject to discovery, but were, on other hand, work product of officers. *Darrigo v State* (Fla App) 243 So 2d 171.

See *State v McCall* (Fla App) 186 So 2d 324, § 11[c].

State was not required to inform criminal defendant that it expected to use testimony of government agent with respect to agent's interview of defendant and unfavorable admission by defendant where the defendant received the entire written investigative report and where the defendant had ample opportunity to cross-examine the agent. *Hudson v State*, 237 Ga 443, 228 SE2d 834.

In prosecution for murder, prosecution's failure to disclose an oral statement by defendant did not preclude admission of testimony as to the statement, where, although prosecutor's omission was contrary to mandatory state Supreme Court rule, there was no showing of surprise or prejudice and defendant proceeded with trial rather than request continuation for investigation. *People v Ferguson* (1981) 102 Ill App 3d 702, 57 Ill Dec 958, 429 NE2d 1321, cert den (US) 74 L Ed 2d 133, 103 S Ct 159.

Reversible error occurred where, despite fact defense counsel had filed discovery motion requesting prosecution to furnish any statements made by accused, police officer testified at trial to statement by accused as to which defense counsel was not notified; contention by state that under court rules it had no duty to reduce oral statement to writing

merely for purpose of disclosing substance of such statement was without merit. *People v Boucher* (1978) 62 Ill App 3d 436, 19 Ill Dec 675, 379 NE2d 339.

See *People v Manley*, 19 Ill App 3d 365, 311 NE2d 593, § 11[d].

Where defendant made oral statement to detective following his arrest, longhand notes made by detective could not be construed to be written statement within meaning of statute and thus it was not error to permit detective to testify from such notes even though they had not been delivered to defendant's counsel in accordance with pretrial order for discovery. *State v Bircher* (1978, Kan App) 573 P2d 1128.

Trial judge properly refused defendant pretrial discovery of any oral inculpatory statements. *State v Alexander* (1977, La) 351 So 2d 505.

Trial judge did not err in refusing to order production prior to trial of written memorandum made by assistant district attorney concerning oral exculpatory statement previously made by defendant and in refusing to order disclosure on day of trial content of oral exculpatory statement. *State v Sheppard* (1977, La) 350 So 2d 615.

See *State v Hodges* (1977, La) 349 So 2d 250, cert den (US) 55 L Ed 2d 779, 98 S Ct 1262, § 25[b].

State was not required to produce oral inculpatory statements of defendants in response to pre-trial prayer for oyer. *State v Nix* (La) 327 So 2d 301.

In prosecution for murder, trial court's failure to require state to produce pretrial oral inculpatory statements of accused in its possession was not reversible error. *State v Berry* (La) 324 So 2d 822.

Oral confession was not subject to pretrial discovery. *State v Nelson* (La) 306 So 2d 745.

Denial of defendant's request that state produce oral statements made by him to police before trial was proper; discovery by defendants in criminal cases is greatly restricted, and prior decisions allowing pretrial inspection of confessions were specifically limited to written and taped ones. *State v Watson* (La) 301 So 2d 653 (citing annotation).

Accused was entitled to discovery of tape recording of conversation between himself and police informer in which accused admitted his participation in crime charged, recording having been made by police in adjoining room, such recording not being an "oral" statement or confession of accused. *State v Bendo* (La) 281 So 2d 106.

Defendant was not entitled to pretrial discovery of oral confessions or inculpatory statements, nor was he entitled to such discovery of copies of technical or laboratory reports, or examination or description of objects removed from scene of crime, or pictures of scene. *State v Frezal* (La) 278 So 2d 64.

Although accused is entitled to pretrial inspection of his own written or video-taped confession, he may not demand production of his oral statements or confessions. *State v St. Amand* (La) 274 So 2d 179.

Trial court properly denied defendant's motion for pretrial inspection of any oral confessions, statements, or admissions that he may have made. *State v Gibson* (La) 271 So 2d 868.

Defendant is not entitled to pretrial discovery of his oral statements. *State v McLeod* (La) 271 So 2d 45.

State is only expected to furnish accused with his own written or video tape confessions, and pretrial inspection of oral confessions, police reports, and the like, is not required. *State v Cripps*, 259 La 403, 250 So 2d 382, overruled on other grounds, *State v Lovett* (La) 345 So 2d 1139.

Although trial judge may have erred in denying pretrial inspection of tape recordings of defendants' confessions on ground that such confessions were oral statements, since videotape recorded confession constitutes better record than written confession, ruling was of no importance where district attorney, in response to motion for bill of particulars, had offered to make recordings available to defense counsel and to give opportunity to transcribe same. *State v Douglas*, 256 La 572, 237 So 2d 382.

It is well settled in Louisiana jurisprudence that the rule which permits a pretrial inspection by an accused of his written statements does not apply to oral confessions. *State v Pesson*, 256 La 201, 235 So 2d 568.

See *State v Sherburne (Me)* 366 A2d 1127, § 11.

Prosecutor's failure to disclose to defense, defendant's oral statement not reduced to writing did not require mistrial, where no prejudice was shown. Although possibly not required by precise language of discovery rule, prosecutors should make disclosure of substance of defendant's oral statements not reduced to writing when written statements of their witnesses are delivered. *Commonwealth v Lapka (1982)* 13 Mass App 24, 429 NE2d 1029, app den 385 Mass 1103, 440 NE2d 1174.

Any oral statement made by defendant which has been summarized, abridged, referred to or reflected in any book or paper in possession of law enforcement personnel is to be regarded as written or recorded statement subject to discovery; however, unrecorded oral statements were not discoverable where defendant failed to make satisfactory showing of materiality and reasonableness in any of his supporting papers. *People v Daniels (Misc)* 371 NYS2d 595.

See *People v Harrison*, 81 Misc 2d 144, 364 NYS2d 760, supra § 11[m].

Defendant had right, under statute, to disclosure of his written or recorded statements; defendant's request for disclosure of his oral statements was, under circumstances, highly relevant and material to his defense, and district attorney was directed to reduce to writing and to disclose substance of defendant's oral statements not already written or recorded which he intends to use as evidence or for impeachment or which directly or indirectly resulted in obtaining physical evidence, and to give particulars as to time and place and to whom statements were made, but disclosure of res gestae statements was not required. *People v Utley*, 77 Misc 2d 86, 353 NYS2d 301.

Copies of written or recorded statements made by defendant to law enforcement officers were discoverable under statute, but oral statements were not discoverable. *People v Gaissert*, 75 Misc 2d 478, 348 NYS2d 82.

Motion to require district attorney to furnish defense counsel with copy of any and all written statements of defendant, including copy of any transcript of question-and-answer statement given by defendant to law enforcement authorities, was granted; however, oral admission has no legal existence until and as testified to by witness, and therefore, motion was denied with respect to oral statements. *People v Cusano*, 63 Misc 2d 906, 313 NYS2d 833.

Court erred in denying defendant's request that he be furnished with transcript of recording made while being questioned by police immediately following his arrest; defendant had right to use that transcription to see if it could be helpful in attempt to establish that admissions sought to be introduced in evidence by state were not voluntary admissions but were obtained through improper methods. *People v Robles*, 29 App Div 2d 751, 287 NYS2d 100.

See *Curtis v State (Okla Crim)* 518 P2d 1288, § 18.

Discovery of unrecorded comments is not always necessary for due process; hence, trial court's refusal to grant mistrial on prosecution's failure to disclose oral statements made by defendant which were not contained in police reports was not reversible error in absence of showing of prejudice. *State v Curtis (Or App)* 530 P2d 520.

Trial court erred in refusing to grant new trial to defendant convicted of third degree murder where prosecution was permitted to impeach defendant's credibility through use of police report of defendant's oral statement, even though prosecution had denied existence of such report and had failed to make it available to defendant; trial court order requiring disclosure of such statement was properly entered under rule of criminal procedure then in effect where it determined, in absence of challenge by prosecution, that exceptional circumstances and compelling reasons existed so as to justify discovery of oral statements. *Commonwealth v Jenkins* (1978) 476 Pa 467, 383 A2d 195.

Defendants were not entitled to pretrial discovery of certain oral statements made by them to police and recorded by police in notes, in absence of exceptional circumstances and compelling reasons why such be permitted. *Commonwealth v Crawford* (Pa) 336 A2d 275.

It was reversible error for trial court to refuse defense request to see notes of conversation between defendant and police officer made by officer and reviewed by officer before testifying as to confession by defendant during conversation where court reviewed notes and offered to let defense see two relevant parts, but then refused to let defense see them at all after prosecutor objected, and refused defense request to have notes sealed and made part of record for appeal. *State v Hamilton* (1981, SC) 276 SE2d 784.

It was not error to refuse to furnish written copies of defendant's incriminating oral statements to defense counsel where statements had not been reduced to writing. *Bramlett v State* (Tenn Crim) 515 SW2d 895.

[\*14] Accused's statement or conversation made or had before or during offense

The refusal to grant, prior to trial, an order permitting the defendant to inspect any recordings or transcriptions of conversations between him and a police officer posing as a prospective accomplice was held error in *Cash v Superior Court of Santa Clara County* (1959) 53 Cal 2d 72, 346 P2d 407, a prosecution for attempted burglary and solicitation to commit burglary, wherein it was alleged in support of a motion for the order that the defendant did not remember the conversations in question, that he had reason to believe they were recorded, and that inspection and copies of the recordings were necessary to refresh his memory and to enable him to prepare his defense. Observing that the basis for requiring pretrial production of material in the hands of the prosecution is the fundamental principle that an accused is entitled to a fair trial, and that although there is a possibility that a defendant may be acting in bad faith and may be seeking merely to acquire advance knowledge of the details of the prosecution's case with a view to shaping his defense accordingly, such a possibility is subordinate in importance to the danger of convicting the innocent and does not warrant denying a request for production where there is a sufficient showing that the request should be granted in the interest of a fair trial, the court concluded that careful study of the details of the conversations in question, particularly if there were ambiguities, would be necessary for an intelligent preparation of the defense. The court pointed out (1) that the conversations had occurred in the course of the commission of the alleged crime, and it was charged that what the defendant had said in those conversations constituted solicitation to commit burglary; (2) that recordings of the conversations were obviously composed not only of the defendant's own statements but also of those of the police officer posing as a prospective accomplice, who had testified for the prosecution at the preliminary hearing with respect to what had been said in the conversations; (3) that any effort to impeach the police officer and refute the charge of solicitation to commit burglary would depend to a great extent on the defendant's precise knowledge as to the contents of the conversations; (4) that the importance to the defendant of knowing the details of the conversations must be considered in connection with his inability to remember what had been said; (5) that, moreover, there was a possibility that entrapment would be a defense, and hence the sequence, as well as the nature, of the remarks made by the defendant and the police officer in the conversations would be extremely significant.

On the other hand, in *People v Tarantino* (1955) 45 Cal 2d 590, 290 P2d 505, a prosecution for extortion and conspiracy to commit extortion, wherein much of the evidence against the defendant consisted of recordings of conversations in his hotel room which were obtained by the police without his knowledge or permission, and which

related to threats, promises, and demands for money, the court held that the defendant's request for copies of transcriptions of those portions of the recordings which had not been introduced in evidence was properly denied, since the defendant did not suggest that such portions of the transcriptions contained anything relevant to the case.

◇

Where, in a prosecution for perjury, it was shown that the defendant had given a statement to deputy sheriffs of a county at the time of the arrest of another person for the offense of criminal negligence immediately after a fatal accident, the court in *People v Abbatoy* (1960) 21 Misc 2d 576, 198 NYS2d 22, granted the defendant's motion for permission to obtain a copy of such statement. The court said that it had read the requested statement and was of the opinion that the defendant was entitled to a copy thereof. (Apparently the statement in question was made by the defendant before the commission of the crime of perjury charged against him in the instant case.)

◇

See *State v Doty*, 110 Ariz 348, 519 P2d 47, § 17.

Trial court did not err in denying defendant's motion, made pursuant to statute permitting discovery of written or recorded statements or confessions, for discovery of statement made to police officers before alleged offense. *Williams v State* (Ark) 513 SW2d 793.

Even assuming prosecution erroneously suppressed material favorable to defense, such suppression was nonprejudicial, where prosecution indicated at trial that statements made by defendants to prosecution witness were to be introduced, prosecutor had stated prior to trial that there were no statements, but thought defendants were inquiring as to written statements, and where such statements, which were denied by defendants, were not incriminatory. *People v Standifer*, 38 Cal App 3d 733, 113 Cal Rptr 653.

In prosecution for possession of several drugs with intent to distribute, declarations by defendant to police at time of her arrest were properly admissible even though prosecution had not disclosed content of those declarations to defense where pretrial motion to compel disclosure by defense neither invoked discovery statute by specific reference thereto, nor made clear request that written copies of defendant's statements be furnished defense at least ten days prior to trial. *Tabb v State* (1982) 250 Ga 317, 297 SE2d 227.

Although state statute entitled defendant to discovery of any statement given by him while in police custody, statement made by defendant to victim during commission of offense was not statement required to be produced under statute. *Williams v State* (1983) 165 Ga App 69, 299 SE2d 402.

State statute allowing defendant discovery of prosecution's evidence upon proper written demand applied only to statements given by defendant while in police custody, and statement in instant case made by defendant in motel room prior to her arrest could not reasonably be characterized as custodial in nature, and did not come within discovery statute. *Yeargin v State* (1982) 164 Ga App 835, 298 SE2d 606.

In probation-revocation proceedings charging defendant with possessing with intent to distribute and sell a counterfeit substance, pretrial discovery statutes did not entitle defendant to examine and copy statements allegedly made by defendant's accomplice to undercover agents during commission of offense. *Holbrook v State* (1982) 162 Ga App 400, 291 SE2d 729.

In prosecution of husband for criminal attempt to murder his wife through use of supposed professional killer but

actually undercover police officer, defense had no right to pretrial discovery of tape recordings of conversations between defendant and officer even though defense was entrapment, and trial court properly denied Brady motion to compel discovery after in camera inspection resulted in ruling tapes contained no exculpatory material. *Howell v State* (1981) 157 Ga App 451, 278 SE2d 43.

Comparison on two documents by expert witness was properly admitted into evidence even though comparison was not submitted to defendant before trial in accordance with his discovery motion, where comparison was not made until midway through trial, and where testimony of expert witness was submitted as rebuttal to defense evidence; tape recordings of defendant's conversations before arrest and oral statements made by him to FBI agent were properly admitted into evidence even though not submitted to defendant before trial in accordance with his discovery motion, where it was not shown that tape recordings were materially favorable to defendant either or as direct or impeaching evidence, and where memoranda of statement concerning testimony of FBI agent was given to defendant before trial. *Quaid v State*, 132 Ga App 478, 208 SE2d 336.

In prosecution for murder, court did not err in allowing introduction of oral statement by one of three defendants and not disclosed by prosecution, where, even if state failed to exercise due diligence and violated mandatory rule, defendants declined court's offer of time to investigate and therefore no prejudice was shown. *People v. Patterson*, 102 Ill. App. 3d 844, 58 Ill. Dec. 542, 430 N.E.2d 574 (1st Dist. 1981).

Disclosure of oral statement made by defendant to witness prior to commission of murder was not required where prosecution was unaware that witness' testimony would include such statement until eve of trial; upon request, state has mandatory duty under court rule to disclose any oral statements made by defendant and known to state, unless failure to disclose occurs when prosecution is unaware of statement prior to trial and could not have become aware of its existence in exercise of due diligence. *People v Kradenych* (1980) 83 Ill App 3d 547, 39 Ill Dec 104, 404 NE2d 488.

It was error for state to fail to disclose to defendant, upon request, oral statements made by defendant and known to state, whether or not statements had been reduced to writing; error was harmless where defendant did not ask for continuance or opportunity to interview witness who related statements and admitted facts with which statements were, in part, concerned. *People v De Bord* (1978) 61 Ill App 3d 239, 18 Ill Dec 672, 377 NE2d 1308.

Disclosure was not called for under statute requiring state to produce list of witnesses to a defendant's oral confession, where defendant's statement to officer before shooting incident was at most admission rather than oral confession. *People v Veal* (1978) 58 Ill App 3d 938, 16 Ill Dec 188, 374 NE2d 963.

Discovery statute entitled criminal defendant to notice regarding existence of inculpatory oral statement imputed to him, with corresponding information relative to when, where and to whom such statement was made, but defendant was not entitled to discover content of statement. *State v Quimby* (1982, La) 419 So 2d 951 (not followed *State v Banks* (La App) 428 So 2d 544, cert gr (La) 433 So 2d 158).

See *State v Perkins* (La) 337 So 2d 1145, § 11.

Defendant is not entitled to production of his statements which are not inculpatory; thus, tapes of conversations between defendant and prosecution witness which did not involve any confessions or admissions of illegal acts were not producible. *State v Dimopoullas*, 260 La 874, 257 So 2d 644.

Oral statement made by robber to victim during commission of offense was not within purview of Maryland rule requiring state to furnish defendant with substance of any oral statement made by him which state proposes to produce as evidence to prove case in chief. *Austin v State*, 3 Md App 231, 238 A2d 569.

Testimony of witness, who was participant in robbery resulting in murder, that defendant, while preventing one robber

from killing another for the murder during the robbery in the cafe, said, "[I]t wasn't any sense in him. . . shooting him," was not testimony of "oral statements" that were required to be furnished before trial to defendant under *Maryland rule*. *Boone v State*, 3 Md App 11, 237 A2d 787.

See *Barton v State*, 2 Md App 52, 233 A2d 330, § 11[e].

Although earlier Massachusetts authorities were contra, defendant charged with perjury, whether before grand jury or crime commission or other body, is entitled as of right to a complete transcript of his own testimony before the tribunal where perjury allegedly occurred, sufficiently in advance of trial to enable him to prepare defense, without necessity of showing "any particularized need." *Commonwealth v Giles (Mass)* 228 NE2d 70.

In prosecution for theft by swindle and for conspiracy to commit theft, defendant was not entitled to inspect tape recording of conversation between defendant and undercover police officer where such recording did not contain exculpatory information. *State v Poganski (1977, Minn)* 257 NW2d 578.

Defendant's right to fair trial was not violated in prosecution for embezzlement by prosecutor's failure to permit discovery of notes made by state's witness during discussion with defendant where notes were neither inculpatory nor exculpatory standing alone, defendant himself knew of existence of notes, and pretrial discovery order did not mention notes. *Boteler v State (1978, Miss)* 363 So 2d 279.

Denial of motion to inspect and copy transcripts of recordings of conversations between witness for state and defendant in bribery prosecution, and for inspection of all other evidence in possession of prosecution relevant to exonerate defendant or to establish any defense available to defendant, was not abuse of discretion where court later ordered that defendant be furnished with transcript of tape recordings and defendant's counsel was given opportunity to hear recordings in entirety before they were received in evidence. *State v Novak*, 181 Neb 90, 147 NW2d 156.

See *State v Russo*, 127 NJ Super 286, 317 A2d 369, § 11[g].

Where taking facts as defendant argues them to be in his brief, government's agent did not commit any act or take any course which would be considered as an invasion of any constitutional right of defendant, pretrial hearing on matter would serve no useful purpose and defendant's motion for discovery of transcripts of defendant's conversations with third party submitted to court in camera were denied subject to audibility hearing. *People v Hochberg*, 87 Misc 2d 1024, 386 NYS2d 740.

In prosecution for possession of defaced weapon and of marijuana, accused was entitled to orders, affidavits, logs, tapes, reports, transcripts or summaries of reported telephone conversations which could possibly involve him where accused alleged that information derived from wiretap was sole probable cause for issuance of search warrant which permitted search of his home and discovery of weapon and marijuana. *People v Guerra*, 81 Misc 2d 82, 365 NYS2d 342.

See *People v Gaissert*, 75 Misc 2d 478, 348 NYS2d 82, § 13[d].

Defendant in prosecution for bribe-receiving was entitled to discover and inspect original recordings, and any transcriptions thereof, of that particular tapped telephone conversation between him and person from whom bribe was sought which was presented to grand jury that found indictment. Defendant was also entitled to discovery of recordings and transcriptions of other tapped telephone conversations between him and same person which were not presented to grand jury, since (1) they related to subject matter of indictment and under New York rules of evidence they would be available to prosecution either as evidence in chief or upon collateral issues; (2) concept of fairness inherent in due process imposes duty on prosecution to apprise defendant of evidence favorable to him and thus defendant would, at some time in trial, be entitled to inspect recordings unconditionally; and (3) special circumstances of instant case

required that he be granted inspection pretrial. *People v Nassar*, 60 Misc 2d 27, 301 NYS2d 678.

In prosecution for first degree murder and conspiracy to commit armed robbery, under statute governing defendant's right to discovery, defendant was not entitled to disclosure of statements she made to third parties which state intended to use as evidence against her, absent any indication that statements sought were made to third party who was agent of state, and defendant was not entitled to disclosure of statements of "codefendant" where trials had been severed and there was no joint trial. *State v Moore* (1980) 301 NC 262, 271 SE2d 242.

See *State v Detter* (1979) 298 NC 604, 260 SE2d 567, § 16[a].

See *Commonwealth v Brocco* (1979, Pa Super) 396 A2d 1371, § 6[b].

Statements made by defendant to undercover agent during cocaine conspiracy were not discoverable as "all relevant written or recorded statements or confessions, signed or unsigned or written summaries of oral statements or confessions made by Defendant" where the defense demand indicated that defendant was seeking confessions, statements, or summaries that had been reduced to writing or electronically transcribed, and in fact the restaurant conversation was never transcribed by pencil, pen, or electronic means. *State v Rudacevsky* (1982, RI) 446 A2d 738.

Defendant in bribery prosecution was not entitled to pretrial discovery and disclosure of statements made by him to two prosecution witnesses where neither witness was agent of state at time undisclosed statements were made. *Clariday v State* (1976, Tenn Crim) 552 SW2d 759.

In prosecution for criminal solicitation of murder, accused was not prejudiced by prosecutor's failure to reveal results of investigation which showed that accused had previously hired someone to commit murder but that person actually presented no threat of carrying out plot, where such evidence would have made no difference in outcome of trial. *Saunders v State* (1978, Tex Crim) 572 SW2d 944.

Statute providing that upon demand district attorney should furnish defendant with written summary of all oral statements of defendant which he planned to use in course of trial, included statements made to witnesses by defendant in addition to statements which were product of police interrogation and investigation. *Kutchera v State (Wis)* 230 NW2d 750.

[\*15] Accused's letter, diary, or other written material  
145

[\*15a] Letter

In some cases letters which had been written by the accused and which were in the possession of the prosecution have been held producible for inspection by the defense under the circumstances of the case.

See also *Commonwealth v Gliniecki* (1959) 339 Mass 464, 159 NE2d 657, where the court, in holding that there was no error in denying the defendant's motion for a continuance filed immediately before the trial and predicated upon an allegation that the prosecution had illegally acquired possession of certain property of the defendant, particularly some letters received by him from the victim or members of her family, said that if the defendant desired information about the contents of the letters referred to in his motion, he should have sought it by a motion to inspect.

And see *Trimble v State* (1965) 75 NM 183, 402 P2d 162, supra § 4[b], wherein it was held that the defendant's constitutional right to due process of law was violated by the prosecution's taking from him and failure to return or produce a copy of a certain letter written by him.

In *People v Wargo* (1933) 149 Misc 461, 268 NYS 400, it was held that the defendant, charged with murder, was

entitled to an inspection, with the privilege of interpretation, of certain allegedly incriminating letters in the possession of the prosecution which were claimed to have been written in the Hungarian language by the defendant to her codefendant, the court pointing out that the letters would not be competent evidence on the part of the defendant but only on the part of the prosecution; that no harm could be done to the prosecution by permitting the defendant to inspect them; that the letters were written in a foreign language, and the language used might not only be colloquial but might also call for a clear understanding of some unfamiliar dialect; and that the difficulty of such interpretation was apparent to anyone familiar with modern court procedure. Noting that where there is evidence in the possession or control of the prosecution which is favorable to the defendant, a right sense of justice demands its production for inspection by the defense unless there are strong reasons otherwise, the court said that under the circumstances of the case the letters in question were important to the defense at this stage of the proceedings in order that the defendant might properly prepare to present expert evidence as to their authenticity.

In *Cloniger v State* (1921) 91 Tex Crim 143, 237 SW 288, a prosecution for rape, it was held that where the prosecution introduced a letter written by the defendant to the prosecutrix and there were also other letters written by him to her which had been brought to court in response to a subpoena duces tecum, such letters should have been produced at the request of the defendant. The court noted that if upon inspection these letters revealed matters upon the same subject as the one introduced by the prosecution, they would have been admissible in evidence.

<>

On the other hand, the denial of the defendant's request for the production of a letter which had been written by the defendant to his father and which had been found by police officers along the route taken by the defendant when pursued by the officers immediately after the commission of the alleged homicide was held not error in *Langhorn v State* (1926) 105 Tex Crim 470, 289 SW 57. The court said that although the prosecution would be entitled to use the letter against the defendant if it contained incriminating evidence, the defendant did not bring himself within any rule requiring the prosecution to deliver to him such document. The court added that if the defendant wished to have the letter in a regular way, he might have had a subpoena duces tecum for it.

See also *Morrison v State* (1899) 40 Tex Crim 473, 51 SW 358, wherein the defendant argued that the trial court committed error in refusing to grant an order compelling the prosecution to produce certain letters written by him so that he might inspect them in the preparation of his defense. Pointing out that at the time of the motion for production the letters were in the hands of a witness for the prosecution, that the letters were produced upon the trial of the case, and that the defendant had the full right of cross-examination as to the letters during the trial, the court, in concluding that under the circumstances there was no error in refusing to grant the motion for production, said: "We know of no law compelling the prosecution to disclose the character and kind of evidence that it has against the defendant. Furthermore, it is not made to appear in the record before us in what way appellant's rights were injured, or that he was deprived of any substantial privilege. The evidence showed that all the letters were written by him. This being true, and uncontroverted, certainly he knew the contents of the letters, and could not claim any character or kind of surprise."

In the following cases it was also held or recognized that a letter which was written by an accused and which is in the possession of the prosecution is not subject to inspection by the defense.

See *Smith v State*, 282 Ala 268, 210 So 2d 826, § 22[e].

Letter voluntarily written by incarcerated defendant charged with trafficking in marijuana, which came to attention of state through its power to maintain discipline in detention facility, was not subject to disclosure as product of "custodial interrogation," and was admissible by State during rebuttal. *Franklin v State* (1983) 166 Ga App 375, 304 SE2d 501.

Substantial right of defendant to prepare defense was affected by state's failure to furnish defendant with copy of letter written by defendant to victim's family, which letter was received by state on morning of second day of trial, but which was not revealed to defendant until prosecutor had reopened his case, questioned victim's mother, rested, and defendant had taken stand. *State v Mitchell* (1982, La) 412 So 2d 1042.

Trial court should not have permitted introduction of inculpatory letter written by defendant from jail, where defendant had filed motion for pretrial inspection of all confessions, statements and admissions in writing made by defendant either before or after arrest and prosecution failed to produce them, even though at time of motion letter had not been written. *State v Hammler* (La) 312 So 2d 306.

Trial court did not err in refusing to impose sanction for state's failure to furnish defense letter written by accused to his ex-wife shortly after incident which gave rise to charge of assault where letter was produced on morning of trial and defense counsel did not request any protective rulings or sanctions other than exclusion of letter and permitted defendant to take stand with knowledge of state's possession of letter, then sought to preclude its use on cross-examination for impeachment purposes. *State v Landry* (1983, Me) 459 A2d 175.

[\*15b] Other materialn146

In *People v Buchalter* (1941, Co Ct) 29 NYS2d 621, the court, without discussion, permitted the defendant to make photostatic copies of the papers seized in his apartment (consisting of correspondence, hotel bills, souvenirs, and other unidentified documents) which the prosecuting attorney intended to use as evidence in behalf of the prosecution. (It was not shown what offense was charged against the defendant.)

See also *State ex rel. Keast v District Court of Fourth Judicial Dist.* (1959) 135 Mont 545, 342 P2d 1071, supra § 3, holding that the defendant was not entitled to inspection of certain written material taken by or on the order of the prosecuting attorney from the defendant's home in connection with the prosecution of the crime charged against him.

On the other hand, the denial of the defendant's pretrial motion for permission to inspect a diary kept by him and certain notes written by him prior to the commission of the alleged offense was held not error in *Abdell v Commonwealth* (1939) 173 Va 458, 2 SE2d 293, wherein the defendant was charged with murder of his wife, the court following the rule that ordinarily the accused is not, as a matter of right, entitled to have evidence in the possession of the prosecution for inspection before trial.

◇

In prosecution for promoting gambling in which prosecution repeatedly failed to comply with demand for discovery of any physical evidence seized from defendants or from premises allegedly under their control, trial court would preclude use of such evidence since nature of charges, i.e., possessing gambling records, was such that discovery of requested items was vital to preparation of defense. *People v Bryant* (1980) 104 Misc 2d 157, 427 NYS2d 722.

Defendant was entitled to copies at government expense of voluminous records, books, and cancelled checks which had been seized from defendant's place of business where inspection of documents at prosecutor's office might serve to chill or impede defendant's ability to properly exercise right to discovery and inspection. *People v Feldman*, 87 Misc 2d 55, 384 NYS2d 904.

Corporation charged with offering false instrument for filing, and with grand theft, was entitled to discovery and inspection of books, records, and papers taken from it under subpoena duces tecum. *People v Leto Bros., Inc.* 70 Misc 2d 347, 334 NYS2d 298.

In prosecution for first-degree murder and first-degree sexual assault, defendant was not entitled to discovery of an accurate copy of parking ticket which he had received and paid for by check, since state's duty to disclose covers only evidence within state's exclusive possession, and evidence here was not in exclusive possession of state in that defendant knew he had been ticketed, he paid ticket by check, and cancelled check was returned to him. *State v Armstrong* (1983) 110 Wis 2d 555, 329 NW2d 386, cert den (US) 77 L Ed 2d 1304, 103 S Ct 2125.

[\*16] Statement of person other than accused<sup>n148</sup>

[\*16a] Generally

As to whether and under what circumstances an accused is entitled to inspect a statement made by a witness or any other person which is in the possession of the prosecution, the decisions are divided. In some cases it has been held or recognized that in a proper case an accused may be permitted to inspect a statement made by a witness or any other person.<sup>n149</sup> Thus, the denial of the defendant's request for pretrial inspection of statements of witnesses relating to the alleged homicide which were made to the district attorney immediately following the commission of the offense and which were either recorded on tape or taken down in shorthand was held an abuse of discretion in *Vetter v Superior Court of Sacramento County* (1961) 189 Cal App 2d 132, 10 Cal Rptr 890, where it appeared that when these witnesses were interviewed by the defendant's counsel about 44 days after the crime, they informed counsel that they had made statements to the district attorney but could not recall in detail what questions had been asked them; and that they were unable to state whether they had recalled and related to the defense counsel all of the details of the event which they had witnessed and which they had related to the district attorney. The court said that the right of a defendant in a criminal case to pretrial inspection of statements made by witnesses depends largely upon the facts of each case and generally rests within the sound discretion of the court to which the motion is addressed.

For other California cases wherein a statement made by a person other than the accused was held producible under the circumstances, see *Vance v Superior Court of San Diego County* (1958) 51 Cal 2d 92, 330 P2d 773, supra § 13[a], *Cash v Superior Court of Santa Clara County* (1959) 53 Cal 2d 72, 346 P2d 407, supra § 14, and *People v Darnold* (1963) 219 Cal App 2d 561, 33 Cal Rptr 369, cert den 376 US 927, 11 L ed 2d 623, 84 S Ct 694, supra § 8.

The view that in a proper case an accused may be permitted to inspect a statement made by a witness was also recognized in *Funk v Superior Court of Los Angeles County* (1959) 52 Cal 2d 423, 340 P2d 593; *People v Estrada* (1960) 54 Cal 2d 713, 7 Cal Rptr 897, 355 P2d 641; *People v Hollander* (1961) 194 Cal App 2d 386, 14 Cal Rptr 917;

*People v Rennie* (1962) 201 Cal App 2d 1, 19 Cal Rptr 734; *Yannacone v Municipal Court of San Francisco* (1963) 222 Cal App 2d 72, 34 Cal Rptr 838; *People v Lindsay* (1964) 227 Cal App 2d 482, 38 Cal Rptr 755.

In *Commonwealth v Smith* (1965) 417 Pa 321, 208 A2d 219 (a case not within the scope of this annotation because involving an application for production of statements made by certain prosecution witnesses to the FBI which had not been released to the prosecution), the court recognized that under certain circumstances a defendant may be granted an inspection of statements made by prosecution witnesses which are in the possession of the prosecution, and said that where a defendant seeks statements made by prosecution witnesses, the fact that other similar statements made by the same witnesses have been made available to the defense for its inspection should not deprive the defendant of his right to the particular statement sought, at least in the absence of a showing that they are identical.

For cases permitting inspection of a statement made by a person other than the accused where such statement was offered, or its contents introduced, in evidence during the trial or where it was used by the prosecuting attorney in his examination of the accused or a witness, see § 9[c], supra.

Also recognizing that accused is not ordinarily entitled to pretrial inspection of statements of prospective prosecution witnesses:

<>

Although either explicitly or by implication recognizing that in a proper case an accused may be permitted to inspect a statement made by a witness or any other person, the court in many cases refused to permit the defendant to inspect such a statement on the ground that there was no showing of circumstances warranting the requested inspection.

In *People v Ford* (1964) 60 Cal 2d 772, 36 Cal Rptr 620, 388 P2d 892, cert den 377 US 940, 12 L ed 2d 303, 84 S Ct 1342, the denial of the defendant's pretrial motion for access to a statement of an individual whom the prosecution did not intend to call as a witness was upheld, the court noting that the trial court's ruling on the question was within its discretion and that no abuse of such discretion appeared in the case.

Concluding that the defendant had shown no sufficient reason why he should have a pretrial inspection of the statement in question, the court in *Walker v Superior Court of Mendocino County* (1957) 155 Cal App 2d 134, 317 P2d 130, upheld the denial of the defendant's pretrial motion for inspection of any statements made by an eyewitness to the crime charged against the defendant, notwithstanding that the eyewitness had been instructed by the sheriff not to talk to the defendant or his counsel about anything pertaining to the case. Pointing out that the defendant had the right to interview the eyewitness and he could learn through an interview what the eyewitness had observed, and noting that the prosecution or the sheriff may not order a witness not to talk to the defendant or his counsel, the court said that the defendant's allegation that neither he nor his attorney had been able to determine the things observed by the eyewitness at the time of the alleged offense was not alone a sufficient reason to hold that the trial court abused its discretion in not permitting a pretrial inspection of any statements made by the witness to the sheriff. The court relied on the rule that defense counsel in a criminal case have no absolute right to inspect evidence in the possession of the prosecution,

although in the interest of justice the trial court may grant pretrial discovery for good cause shown.

In *State v Cocheo* (1963) 24 Conn Supp 377, 190 A2d 916, the defendant's request, made during cross-examination of a prosecution witness, for permission to inspect a statement previously made by the witness to the police was held properly denied where the defendant, neither stating any reason for the request nor asserting that the witness' declarations in the statement were inconsistent with his testimony, requested to see the statement as a matter of right on the ground that "a communication of the police department, in the possession of the prosecutor, was not privileged and the defendant was entitled to inspect it." Noting that it is within the discretion of the trial court to grant or deny a defendant the right to inspect statements of prosecution witnesses in the possession of the prosecuting attorney, the court observed that "the rule denying examination of such prior statements of a state's witness to the defendant as a matter of right" is based on public policy, rather than any absolute privilege of nondisclosure.

In *McKenzie v State* (1964) 236 Md 597, 204 A2d 678, it was held that the trial court did not abuse its discretion in denying the defendant's motion for production of statements allegedly made by certain prosecution witnesses to the police, the court noting that a request for the production of documents or statements in the possession or control of the prosecution is within the bounds of discretion of the trial court.

The prosecuting attorney's refusal to exhibit to the defendant's attorney certain written statements alleged to have been made by a witness who was used by the defendant to prove an alibi claimed by him was held not error in *People v Parisi* (1935) 270 Mich 429, 259 NW 127, the court pointing out that the requested statements could have been of value to the defendant had the witness testified against him; that although the witness' name was indorsed on the information, she was one of the witnesses used by the defendant to prove the alibi claimed by him; and that the prosecuting attorney offered to furnish the statements to the defendant's counsel on condition that they be introduced in evidence by the defendant, which offer was refused. The court concluded that under the circumstances there was no error in withholding the statements from the defendant's attorney.

In *People v Maranian* (1960) 359 Mich 361, 102 NW2d 568, a prosecution for extortion, it was held not error to deny the defendant's motion, made prior to trial and at the commencement of the trial, for the production of statements made by the victim of the extortion and an alleged accomplice, memoranda and reports made by police officers in connection with the case, and all recordings of telephone conversations between the alleged extortioner and the victim of the extortion. Noting that discovery will be ordered in criminal cases where, in the sound discretion of the trial judge, the thing to be inspected is admissible in evidence and a failure of justice may result from its suppression, and that the moving party bears the burden of showing the trial judge facts indicating that such information is necessary to a preparation of the defense and in the interest of a fair trial, and is not sought simply as a part of a fishing expedition, the court pointed out that the trial judge in the present case had the records played out of the hearing of the jury so as to be able to determine whether the evidence was admissible, and the defendant's counsel, who was present at the time, presumably heard the information disclosed by the records; that some of the information sought could have been obtained on cross-examination of the victim at the preliminary examination; and that no sufficient showing was made to justify the granting of the broad discovery motion made by the defendant.

The denial of the defendant's request for production of a prosecution witness' statement was upheld in *State v Aubuchon* (1964, Mo) 381 SW2d 807, the court holding that a report or statement of a witness in the hands of the prosecution should be produced only if there is a satisfactory showing that the requested document is of such nature that without it the defendant's trial would be fundamentally unfair, and that the determination of whether the defendant's trial would be fundamentally unfair without the production of a report or statement sought by him rests, in the first instance, in the discretion of the trial court. The court also noted that there should be a showing of the probable materiality of the paper requested, and a mere fishing expedition is not to be permitted for prying into the prosecution's case.

In *State v Tune* (1953) 13 NJ 203, 98 A2d 881, an order denying the defendant permission to inspect statements signed by certain persons other than the defendant was upheld, the court stating that the defendant has no right to discovery of

the work product of the prosecuting attorney, such as the statements of prospective witnesses under consideration in the present case, and that only in the most exceptional cases and in the most unusual circumstances could such documents be turned over to the defendant for inspection. The court observed that to permit unqualified disclosure of all statements and information in the hands of the prosecution would defeat the very ends of justice.

Noting that the general rule is that the accused has no right to the inspection or disclosure before trial of evidence in the possession of the prosecution, and stating that to justify an exception to this rule the accused is required to present compelling reasons or exceptional circumstances, the court in *Commonwealth v Schaub (1964, Pa) 55 Luzerne Leg Reg R 49*, denied the defendant's pretrial motion for permission to hear tape recordings of statements made by the complaining witnesses. The court pointed out that the record was barren of exceptional circumstances or compelling reasons to warrant an exception to the general rule denying pretrial discovery.

The denial of the defendant's pretrial motion for production of copies of reports made by certain prosecution witnesses was upheld in *State v St. Peter (1963) 63 Wash 2d 495, 387 P2d 937*, the court concluding that the trial court did not abuse its discretion, since there was no showing that the defendant was handicapped by the refusal of production. The court noted that pretrial discovery in a criminal case rests entirely within the sound discretion of the trial court, and that its rulings will not be disturbed on appeal except for manifest abuse of that discretion.

For other cases wherein the court, although recognizing that in a proper case an accused may be permitted to inspect a statement made by a witness or any other person, refused to permit the defendant to inspect such a statement on the ground that there was no showing of circumstances warranting the requested inspection, see the following:

Either explicitly or by implication supporting the view that an accused is not entitled to inspect a statement made by a witness or any other person (at least until it is offered in evidence or used in court on trial), and without indicating that inspection by an accused of a statement made by any other person may be ordered under unusual circumstances, the court in other cases also refused to permit the defendant to inspect such a statement.

In *Edens v State* (1962) 235 Ark 178, 359 SW2d 432, cert den 371 US 968, 9 L ed 2d 538, 83 S Ct 551, it was held that the defendant was not entitled to receive copies of statements which had been obtained by the prosecuting attorney from various witnesses for the prosecution, since such statements were a part of the prosecuting attorney's work papers. The court also noted that the Arkansas discovery statute did not apply to criminal cases. To the same effect is *Edens v State* (1963) 235 Ark 996, 363 SW2d 923, supra § 3.

In the following Florida cases it is held or recognized that the defendant in a criminal case is not entitled to inspection of statements of a prosecution witness which were taken by a prosecution officer in preparation for trial:<sup>n150</sup> *McAden v State* (1945) 155 Fla 523, 21 So 2d 33, cert den 326 US 723, 90 L ed 429, 66 S Ct 28; *Johns v State* (1946) 157 Fla 18, 24 So 2d 708; *Raulerson v State* (1958, Fla) 102 So 2d 281; *Urga v State* (1958, Fla App) 104 So 2d 43; *Bedami v State* (1959, Fla App) 112 So 2d 284, cert den 361 US 883, 4 L ed 2d 119, 80 S Ct 153; *Jackman v State* (1962, Fla App) 140 So 2d 627; *Peel v State* (1963, Fla App) 154 So 2d 910, supra § 11[c].

An order requiring the prosecution to produce, for inspection and copying by the defendants, all sworn statements given by prospective witnesses for the prosecution was quashed on certiorari in *State v Shouse* (1965, Fla App) 177 So 2d 724, the court stating that statements of prosecution witnesses are not ordinarily the proper subject of discovery, and that assuming, arguendo, that such statements may be required to be produced in advance of the trial under unusual circumstances or in exceptional cases, no such showing was made in the present case, since there was only a naked, general demand for production and inspection as a matter of right and for purposes not disclosed by the record.

Where, during the trial upon an indictment for murder, the defendant filed a petition for permission to examine, copy, and use, in preparation of the case, reports of the detectives who had investigated the case, written statements taken from witnesses interviewed in the case, photographs taken at the scene of the alleged crime by a police officer, and pistols and a revolver removed by a police officer from the scene of the alleged crime, and the trial judge denied the petition insofar as it sought the production of the reports of the detectives and the written statements taken from witnesses, it was held in *Bass v State* (1958) 98 Ga App 570, 106 SE2d 845, cert den 359 US 969, 3 L ed 2d 836, 79 S Ct 882, that there was no error in the trial judge's ruling. The court pointed out that the record disclosed that the

defendant was furnished a copy of a written statement made by him to police officers, and that the defendant's counsel presumably had the same opportunity to get the statements of witnesses as did counsel for the prosecution.

The denial of the defendant's motion for production of extrajudicial statements made by any and all witnesses in the case was upheld in *People v Moretti* (1955) 6 Ill 2d 494, 129 NE2d 709, cert den 356 US 947, 2 L ed 2d 822, 78 S Ct 794, the court stating that there was no duty on the part of the prosecution to furnish the defense with such extrajudicial statements.

The defendant's assignment of error based on a complaint that during the trial the prosecution did not turn over to him copies of certain statements given by prosecution witnesses to the police was held not sustainable in *People v Bailey* (1965) 56 Ill App 2d 261, 205 NE2d 756. Noting that the production of statements is restricted to impeachment purposes only, the court pointed out that defense counsel requested the production of the statements in question for informative reasons and not for impeachment purposes.

In *State v Lee* (1932) 173 La 966, 139 So 302, the denial of the defendant's application for inspection of all police reports and written statements of witnesses in the possession of the prosecution was upheld. Stating that the documents called for were not public documents but were the private property of the prosecution, the court noted that the defendant in a criminal prosecution has no right to inspection of a private document in the possession of the prosecution which is not offered in evidence.

The denial of the defendant's motion, made at the beginning of the trial, to require the prosecuting attorney to produce statements made by some of the prospective witnesses for the prosecution was held not error in *Bellew v State* (1958) 238 Miss 734, 106 So 2d 146, cert den and app dismd 360 US 473, 3 L ed 2d 1531, 79 S Ct 1430, reh den 361 US 858, 4 L ed 2d 96, 80 S Ct 43, the court noting that as a general rule an accused is not entitled to inspection of the prosecution's evidence.

The defendant's pretrial motion for inspection of all statements and reports made by persons who would testify for the prosecution at the trial was denied in *State v Williams* (1957) 46 NJ Super 98, 134 A2d 39, the court stating that if the defendant in the present case had the right to examine the statements which he sought to obtain, such right did not arise until such time as the witnesses who had made the statements or to whom the statements pertained had testified adversely to him at his trial.

Holding that the district attorney is not compelled to furnish copies of statements obtained from any source until a witness has actually been sworn for the prosecution on a trial or hearing and has testified, the court in *People v Graziano* (1965) 24 App Div 2d 682, 261 NYS2d 546, denied the defendant's pretrial motion for production of any statements made by witnesses whom the prosecution intended to call on the trial of the case.

Where a defendant, indicted for murder, moved for permission to inspect any statements made by certain persons with respect to the death of the victim, the court in *People v Higgins* (1960) 21 Misc 2d 94, 196 NYS2d 222, noting that the requested statements were pure hearsay and were not admissible in evidence in the present case under any theory of law, denied the motion.

The defendant's motion for permission to inspect statements, transcripts of interviews, and memoranda of conversations of any witnesses to be used in behalf of the prosecution at the trial was denied in *People v Giles* (1961) 31 Misc 2d 354, 220 NYS2d 905, where the defendant, in support of his motion, contended that under the ruling of *People v Rosario* (1961) 9 NY2d 286, 213 NYS 2d 448, 173 NE2d 881, 7 A.L.R.3d 174, cert den 368 US 866, 7 L ed 2d 64, 82 S Ct 117 (a case not within the scope of this annotation because dealing with inspection of a prosecution witness' statement during the trial for purposes of cross-examination), he would be entitled to examine all pretrial statements of the prosecution witnesses prior to the actual trial of his case. Noting that the Rosario Case held only that statements of a witness should be given to the defendant for cross-examination purposes on the trial, the court said that the Rosario Case did not hold

that the defendant should receive the prosecuting attorney's file prior to the trial for purposes of building a defense based on the prosecution's case. Holding to the same effect is *People v Mami* (1961, Co Ct) 214 NYS2d 788.

The denial of the defendant's motion to compel the prosecuting attorney to furnish to him all written statements made by any witness in the case which might then be in the possession of the attorney was held not error in *Tinker v State* (1923) 95 Tex Crim 143, 253 SW 531, the court noting that the requested statements were not before the jury.

In *Currie v State* (1925) 102 Tex Crim 653, 279 SW 834, it was held that although the prosecution had taken a written statement from one of its witnesses, it could not be compelled merely because of such fact to deliver the statement to the defendant for his inspection, since the prosecution had not used it in any way.

In *Saldana v State* (1964, Tex Crim) 383 SW2d 599, a prosecution for possession of marijuana on the charge that a certain quantity of marijuana was found under the seat of a taxi in which the defendant, with another passenger, was riding, the court upheld the trial court's denial of the defendant's motion, made prior to the trial and again at the close of the prosecution's case, for an order requiring the prosecution to produce, for his inspection, a written statement made by the passenger who was riding with the defendant in the taxi. Pointing out that the passenger had not been called as a witness to testify at the trial, the court noted that the rule permitting inspection of a prosecution witness' statement for purposes of cross-examination or impeachment after the witness has testified on direct examination at trial had no application in the present case.

See also *Crain v State* (1964, Tex Crim) 394 SW2d 165, wherein the court, in rejecting the defendant's contention that the trial court committed error in denying his pretrial motion for production of all written statements made by witnesses in connection with the case, pointed out that a psychiatric report was made available to the defense, and that in all other respects the trial court carefully followed the rules prevailing in Texas, and the defendant had shown no injury.

In *State ex rel. Byrne v Circuit Court for Dane County* (1962) 16 Wis 2d 197, 114 NW2d 114, a writ of prohibition restraining the respondent judge from issuing an order compelling the prosecution to turn over to the defendant before trial certain statements in its possession was granted, the court stating, "An occasion may arise after the commencement of the trial that will call for the production of a statement of a prosecution witness made prior to trial for impeachment purposes."

For other cases wherein the court also held or recognized that an accused is not entitled to inspect, at least before trial, a statement made by a witness or any other person, see the following:

<>

For cases wherein inspection of statements of a prosecution witness was not permitted for the reason that the defendant failed to designate specific statements which he desired to inspect or that there was no showing of the existence of such statements as he requested, see § 7, supra.

<>

State's failure to disclose witness' prior written statements, pursuant to general discovery request by defendant, did not deprive defendant of his due process rights, where information testified to by witness was not favorable to defendant so that disclosure was not constitutionally mandated. *Mitchell v Wyrick* (1982, ED Mo) 536 F Supp 395.

Delayed disclosure of lineup information did not entitle defendant accused of capital offense to new trial where information was put before jury and subjected to thorough and sifting cross-examination, being exploited as fully as it could have been, and where defendant failed to show that information would create reasonable doubt where one did not otherwise exist. In determining the denial vel non of defendant's rights of due process and fair trial, the proper focus is upon materiality in nondisclosure or delayed disclosure of exculpatory information which is not shown by mere argument that information would have enabled more effective preparation for trial. *Ex parte Raines* (1982, Ala) 429 So 2d 1111, cert den 460 US 1103, 76 L Ed 2d 368, 103 S Ct 1804.

See *Smith v State*, 282 Ala 268, 210 So 2d 826, § 22[e].

See *Rogers v State* (1982, Ala App) 417 So 2d 241, § 13[d].

Trial court in murder prosecution did not err in denying defendant's request for statements or notations made by investigative authorities of verbal or written recitations made by any person in connection with investigation of crime as well as statements of witnesses taken by investigative authorities where such items were state's work product and, as such, were privileged from discovery; nor did trial court err in denying defendant's motion for production of photographs taken by investigative authorities. *Thigpen v State* (1977, Ala App) 355 So 2d 392, affd (Ala) 355 So 2d 400.

Prosecution did not act improperly and, more importantly, defense was in no way prejudiced by not receiving tape recording or transcript of interview with prosecution witness prior to trial where transcript of tape was supplied to defense for use on cross-examination, where tape and transcription, not being signed or otherwise authenticated, were no more than work product of prosecution in interview with state witness, and where transcript of tape was consistent with witnesses' testimony. *Harris v State* (1976, Ala App) 352 So 2d 460, affd (Ala) 352 So 2d 479.

Defendant was not entitled to pretrial discovery and inspection of taped interview with prospective prosecution witness. *Veith v State*, 48 Ala App 688, 267 So 2d 480.

Statements of witnesses taken during investigation of murder case, statements of investigating officers, and reports of police and other investigating officers, were not evidence, and thus accused was not entitled to production thereof prior to trial. *Davidson v State*, 48 Ala App 446, 265 So 2d 888, cert den 289 Ala 741, 265 So 2d 897.

See *Stevens v State* (1978, Alaska) 582 P2d 621 (police report concerning alibi witness), § 17.

See *Morrell v State* (1978, Alaska) 575 P2d 1200, § 5.

Statement of prospective prosecution witness, reported by a court reporter, relating to the defendant's prosecution and the witness' immunity from prosecution, was not discoverable by the defendant in absence of showing of exceptional circumstances. *State ex rel. Corbin v Superior Court of County of Maricopa*, 6 Ariz App 414, 433 P2d 65.

In prosecution of prison inmate for conspiracy to commit murder and conspiracy to commit assault upon prison inmate, arising from racial riot in prison during which gang of 20 Black inmates attacked Mexican and white inmates, killing two, trial court's denial of access by defendant to prosecuting attorney's notes of conversations with inmate witnesses did not prejudice defendant's trial preparation was not error; access to all written material collected or prepared by investigator with district attorney's office during course of his investigation adequately protected defendant's rights. *People v Alexander* (1983, 1st Dist) 140 Cal App 3d 647, 189 Cal Rptr 906.

In prosecution for battery against police officers, court properly denied defendants' motion for discovery of statements by persons interviewed during investigation of complaints against officers whom defendants were charged with battering and statements of persons who had filed complaints against such officers, where prosecutor indicated agreement to order for defendants' pretrial discovery of names and addresses of persons whose statements were sought. *Carruther v Municipal Court for Long Beach Judicial Dist.* (1980, 2d Dist) 110 Cal App 3d 439, 168 Cal Rptr 33.

In habeas corpus proceedings, trial court properly discharged defendant from custody imposed pursuant to murder conviction, on ground of people's prejudicial suppression of material evidence during defendant's trial, where trial court found that witness had advised police by phone call day after killing that he was eyewitness, but that information was withheld from defendant. *Re Chol Soo Lee* (1980, 3d Dist) 103 Cal App 3d 615, 163 Cal Rptr 204.

Defendant charged with battery on deputy sheriff while in visiting area of county jail was entitled to discovery of any witness statements obtained by or for county counsel in anticipation of civil litigation arising out of altercation which was basis of criminal charges, subject to determination of any claim of lawyer-client privilege which might be asserted. Fact that neither sheriff nor county counsel was party to underlying criminal proceeding was not sufficient reason to refuse discovery of information possessed by either of those agencies. Moreover, any such statements in possession of county counsel could not be withheld on ground that they were work product, since much of what is discoverable by defendant in criminal case could be classified as "work product" of prosecutor and law enforcement personnel whose duty it is to gather information for prosecution. *Robinson v Superior Court of Los Angeles County* (1978) 76 Cal App 3d 968, 143 Cal Rptr 328.

Statements made by defendant and several witnesses immediately after homicide were discoverable and should have been produced in response to defendant's demand; however, since there was little discrepancy between such statements and testimony of witnesses at trial, conviction of defendant would not be reversed. *People v McManis*, 26 Cal App 3d 608, 102 Cal Rptr 889.

See *People v Thatcher* (1981, Colo) 638 P2d 760, § 9[b].

Denial of motion for discovery of prosecution witnesses' statements was proper under state rules of criminal procedure where there was no indication that witnesses' statements were withheld or that they existed in written form; nor was defendant prejudiced by denial of motion for discovery of felony records of prosecution witnesses where defense counsel never asked witnesses on cross-examination whether they had been convicted of felony and there was total absence of any suggestion of prior felony convictions. *People v Maestas* (Colo) 517 P2d 461.

In prosecution of policeman for vehicular homicide, it was reversible error to deny policeman's motion, made pursuant to statute giving trial court discretion to order pretrial discovery of information relevant and material to defense, for

discovery of partner's statement made after accident and while under sedation, where partner could not recall contents of statement, and where policeman's counsel needed statement to determine whether to call partner as defense witness and to determine scope of interrogation. *People v Smith*, 185 Colo 369, 524 P2d 607.

During kidnapping prosecution in which identity of perpetrator was at issue, failure of prosecution to disclose specifics of witness' testimony concerning clothes worn by accused was harmless error where defense had adequate opportunity to interview witness prior to trial, and where, when defense counsel was given additional information about witness' testimony immediately prior to trial, he did not move to vacate trial date to enable him to investigate matter further. *People v. Goodwin*, 41 Colo. App. 23, 582 P.2d 1065 (1978), judgment rev'd, 197 Colo. 47, 593 P.2d 326 (1979).

In prosecution for aggravated assault state had no duty to disclose to defendant, in response to defendant's request for any exculpatory information state might have, statement of eyewitness shortly after defendant's shooting of assault victim that prior to shooting victim had pulled gun from his belt; in view of fact that defendant did not claim he acted in self-defense, eyewitness' statement was not so obviously exculpatory as to give notice to state that it should turn over statement to defendant. *State v De Santis* (1979) 178 Conn 534, 423 A2d 149.

In disorderly conduct prosecution in which defendant sought all relevant statements by persons not called as prosecution witnesses, trial court would order disclosure of only those statements containing exculpatory material, since request in effect sought wholesale emptying of state's file without compelling showing of materiality. *State v Gilbert* (1979) 36 Conn Supp 129, 414 A2d 496.

Police reports reflecting substance of conversation that detective had with defendant's mother and brother was not discoverable as "statement" where reports had not been signed, adopted, or approved by persons to whom they were attributed, they did not appear to be substantially verbatim, and they were not recorded contemporaneously with their making. *Breedlove v State* (1982, Fla) 413 So 2d 1, cert den (US) 74 L Ed 2d 149, 103 S Ct 184, reh den (US) 74 L Ed 2d 627, 103 S Ct 482.

Where it was probable that prosecution's failure to disclose to defendant convicted of sexual battery, that prosecutrix at her pretrial deposition had admitted that she was under influence of alcohol and drugs on night of her purported sexual battery by defendant, had prejudicial effect of concealing evidence on issue of prosecutrix's consent to defendant's sexual acts, trial court should have conducted hearing before defendant's conviction to determine degree of prejudice from prosecution's concealment of prosecutrix's admissions that had resulted to defendant who had filed proper demand for all evidence known to State that might negate defendant's guilt or credibility of State's witness. *Snow v State* (1980, Fla App D2) 391 So 2d 384.

In prosecution for arson and conspiracy to commit arson, defense counsel was entitled to see statement of alleged coperpetrator of crime, who had been given immunity, to use as counsel might see fit in conducting defense where there were obvious inconsistencies with statement given to state's attorney and testimony at trial. *Hernandez v State* (1977, Fla App D3) 348 So 2d 1224, cert den (Fla) 355 So 2d 517.

It was error to order state to produce testimony of grand jury witness; statement of grand jury witness was not statement within context of rule requiring automatic production upon demand and in absence of showing of predicate for its production. *State v McFarlane* (Fla App) 318 So 2d 449.

It was improper for prosecution to fail to notify defendant of deposition of eye witness to shooting and to fail to provide defendant with copy of deposition. *Kelly v State* (Fla App) 311 So 2d 124.

Defendant was not entitled to discovery of reports on prospective jurors, or to written statements made by prospective government witnesses to police officers. *Robertson v State* (Fla App) 262 So 2d 692.

Defendant was not entitled to pretrial discovery of statements given to investigating officers by prospective state witnesses; neither was he entitled to examine investigative report concerning prospective jurors. *Dixon v State (Fla App) 261 So 2d 205*.

See *State v Williams (Fla App) 227 So 2d 253*, § 7.

See *State v O'Steen (Fla App) 213 So 2d 751*, § 18.

Defendant in criminal case in Florida is not entitled to inspect, either before or during trial, statements of prosecution witness which were taken by prosecuting officer in preparation for trial, whether or not such statements are sought for purpose of cross-examination or impeachment. *Adjmi v State (Fla App) 208 So 2d 859*.

Order permitting defendant to inspect before trial statements of state witnesses was quashed in absence of showing of unusual circumstances warranting such production. *State v McCall (Fla App) 186 So 2d 324*.

Failure of district attorney to reveal assault victim's failure to identify third person present with defendant and victim at time and place of assault was not failure to reveal exculpatory material after general Brady motion since failure of victim to identify third party did not create reasonable doubt as to guilt of defendant whom victim positively identified in photographic lineup and again at trial as person who sat directly behind him in taxicab and who later pointed a gun at him, shouted "I'm going to blow [you] away," and pulled the trigger several times. *Radford v State (1983) 251 Ga 50, 302 SE2d 555*.

Trial court did not err in murder trial by failing to require state to produce statements of witnesses, since statements of witnesses in prosecutor's files may not be reached by notice to produce, and since defendant did not show that statements were material and exculpatory to him. *Spain v State (1979) 243 Ga 15, 252 SE2d 436*.

In prosecution for murder, no prejudice arose by state's failing to provide defendant with statement of key witness pursuant to notice to produce where defense counsel subjected witness to thorough cross-examination at trial and failed to assert prejudice due to nondisclosure of witness' statement before trial, and where no access to witness' statement was provided for under statute asserted by defense. *Stevens v State (1978) 242 Ga 34, 247 SE2d 838*.

In prosecution for murder, no prejudice arose by state's failing to provide defendant with statement of key witness pursuant to notice to produce where state did furnish defendant with list of witnesses' names, addresses, and "a brief of what they might testify," trial court made in camera inspection, defense counsel made thorough cross examination of witness at trial, and defendant made no further objection to nondisclosure in open court. *Burger v State (1978) 242 Ga 28, 247 SE2d 834*.

See *McGuire v. State, 238 Ga. 247, 232 S.E.2d 243 (1977)*, § 6[a].

See *Pass v State, 227 Ga 730, 182 SE2d 779*, § 17.

State's discovery violation did not give rise to reversible error in child molestation prosecution; although prosecution was under obligation to provide defense with copy of victim's pretrial statement to investigating officer, which remained in exclusive physical possession of police, defendant did not seek to prevent introduction of victim's pretrial statement to officer, as it was helpful to defense, and counsel was allowed to inspect report in which statement appeared, and thus, defendant had not shown how he was prejudiced by court's failure to order state to make report available to him for copying. West's *Ga.Code Ann. §§ 16-6-4(a), 17-16-1 et seq. Wilkerson v. State, 598 S.E.2d 364 (Ga. Ct. App. 2004)*.

See *Odom v State (1980) 156 Ga App 119, 274 SE2d 117*, § 4[b].

Despite allegation that witness' statement in prosecutor's file was exculpatory, prosecutor in homicide case was under no duty to disclose such statement simply because it might have been of aid to defense, and there was no violation of defendant's due process rights since omitted evidence failed to create reasonable doubt that did not otherwise exist. *Waters v State* (1978) 146 Ga App 813, 247 SE2d 555.

In general defense counsel is entitled to prior statements of key witnesses for state on proper demand. *James v State* (1977) 143 Ga App 696, 240 SE2d 149.

See *Quaid v State*, 132 Ga App 478, 208 SE2d 336, § 14.

Trial court did not abuse discretion in refusing discovery of statements and admissions of certain witnesses, a .22 caliber automatic pistol, a jacket, a watch, and \$125 taken from victim, where defendant convicted of robbery and kidnapping failed to allege any substantial prejudice resulting from failure to grant such discovery. *State v Oldham (Idaho)* 438 P2d 275.

In prosecution of wife for murdering her husband, reversible error occurred when prosecution concealed from defense statements allegedly made by defendant to female prosecution witness regarding defendant's extramarital affairs, where trial court refused to strike statements, and where less severe sanctions could not have enabled counsel to rebut witness' testimony. *People v Weaver* (1982) 92 Ill 2d 545, 65 Ill Dec 944, 442 NE2d 255.

Where relevancy and competency of pretrial statements or reports has been established, and where no privilege exists, trial judge should order reports or pretrial statements of prosecution witnesses in possession or control of state to be made available to defendant for inspection and use in impeachment, and same rule applies to police reports. *People v Flowers*, 51 Ill 2d 25, 281 NE2d 299.

See *People v Sumner*, 43 Ill 2d 228, 252 NE2d 534, § 8.

State's failure to disclose that witness who testified at robbery trial had viewed lineup, but failed to identify defendant, was not prejudicial when witness' testimony was limited to description of car at scene of robbery and its license plate number, she did not testify in order to identify defendant as offender, and defendant was identified as offender by another witness. *People v Malone* (1983) 114 Ill App 3d 55, 69 Ill Dec 844, 448 NE2d 562.

In prosecution charging 13-year-old boy with murdering 5-year-old girl, interview notes taken of 41 potential witnesses by prosecution were privileged work product material, rather than discoverable substantially verbatim reports of oral statements of witnesses, and were not discoverable, as none of reports were favorable to defense in constitutional sense. *People v Buss* (1983) 112 Ill App 3d 311, 68 Ill Dec 250, 445 NE2d 894.

State was not required to preserve some record of statements made by witnesses to state's attorneys who interviewed them shortly after crimes occurred since nothing in state discovery rules required State to reduce witnesses' oral statements to writing. *People v Mims* (1982) 111 Ill App 3d 814, 67 Ill Dec 448, 444 NE2d 684.

Absent intentional tactics to preclude discovery of relevant material, court discovery rules did not require prosecutor to reduce to writing the oral statement made by off-duty policeman witness concerning early morning brawl which resulted in a homicide, made to an off-duty assistant state's attorney who had been assigned to early stage of investigation in case. *People v Giovanetti* (1979) 70 Ill App 3d 275, 26 Ill Dec 241, 387 NE2d 1071.

Rules of disclosure did not impose upon state a duty to reduce rape complainant's oral statement to writing for purposes of discovery. *People v Witherspoon* (1979) 69 Ill App 3d 391, 26 Ill Dec 377, 388 NE2d 1.

Prosecution's failure to comply with pretrial discovery order requiring it to inform defendant of substance of witness

statements was not reversible error where defense objected on ground that written memoranda of statement should have been prepared and furnished to him and where, instead of requesting continuance, defendant moved for mistrial. *People v King* (1978) 58 Ill App 3d 199, 15 Ill Dec 573, 373 NE2d 1045.

See *People v Crawford*, 114 Ill App 2d 230, 252 NE2d 483 (citing annotation), § 5[a].

Trial court did not err in refusing to allow defendant in robbery prosecution to see original description of robber given to police by complainant where nothing in record indicated that such description had been reduced to writing, and in any event defense counsel voluntarily withdrew request for description when state inquired as to purpose of request. *People v Jelks*, 92 Ill App 2d 374, 235 NE2d 339.

See *People v Lighting*, 83 Ill App 2d 430, 228 NE2d 104, § 17.

In robbery prosecution it was reversible error for prosecutor to fail to respond to defendant's discovery motion for production of police officer's report, where report identified eyewitness to crime whose testimony might have assisted alibi defense and eyewitness did not testify at trial, and report also identified another person who was acquainted with defendant and this person believed that defendant did not fit eyewitness' descriptions of robbers. *People v Payne*, 44 Ill App 3d 502, 3 Ill Dec 242, 358 NE2d 409.

State was not required to disclose conversation between prosecutor and prosecution witness where witness' oral remarks had not been reduced to writing; there was no requirement that oral statement in possession of prosecution be reduced to writing absent bad faith. *People v Caldwell*, 39 Ill App 3d 1, 349 NE2d 462.

Criminal defendant was entitled to copy of statement of defense alibi witness made to state agent where state used statement for impeachment purposes. *People v Sanders*, 38 Ill App 3d 473, 348 NE2d 229.

See *People v Manley*, 19 Ill App 3d 365, 311 NE2d 593, § 11[d].

In rape prosecution, pretrial motion for inspection of written statement of prosecutrix was properly denied, particularly where statement was made available to defendant for use in cross examination after prosecutrix had testified at trial. *People v Sockwell*, 7 Ill App 3d 520 (abstract), 288 NE2d 33.

Defendant's motion for production of all affidavits, receipts, and documents signed by police informer and all records of State Narcotics Division pertaining to such informer was properly granted only upon condition that such informer should be called as witness. *People v Dollen*, 2 Ill App 3d 567, 275 NE2d 446.

Where defendant was afforded substantial discovery well in advance of trial and was granted an overnight continuance when faced with an additional witness during trial, trial court committed no error in refusing to assess any other of defendant's requested sanctions against state for failure to disclose the existence or identity or furnish statements of witness within time prescribed by pretrial discovery order. *Lloyd v State* (1983, Ind) 448 NE2d 1062.

See *Reid v State* (1978, Ind) 372 NE2d 1149, § 8.

Denial of defendant's request to discover witnesses' statements before trial was proper where discovery of such statements was only allowed after the witnesses had testified, and where defendant had not asked the witnesses if they had made any statements and thus made no showing that court's denial was harmful. *Gibson v State* (Ind App) 303 NE2d 666.

Trial court did not err in denying defendant's motions to produce prosecutor's notes relating to witness interviews where, in each instance, witness did not sign or otherwise adopt or approve notes made during his or her interview.

*State v Jacoby (1977, Iowa) 260 NW2d 828.*

Criminal defendant was not entitled to inspection of tape recording of police interview of witness from which witness' statement was transcribed where there was no showing that the statement as signed was inaccurate, incomplete, or different than that which was given on tape; destruction of tape did not require new trial. *State v Van Rees (Iowa) 246 NW2d 339.*

Defendant was not entitled to production of copies before trial of complete transcript of testimony of witnesses appearing before grand jury. *State v Hall (Iowa) 235 NW2d 702.*

Although state may not refuse to produce requested statements of persons other than defendant where such statements are exculpatory, it is not required to produce any statements of persons, other than defendant, which are not exculpatory, save and except upon showing that inspection of any such statement is necessary to preparation of defense. *State v Aossey (Iowa) 201 NW2d 731, cert den 412 US 906, 36 L Ed 2d 971, 93 S Ct 2292.*

Until witness has testified, it is generally held that there is no need for defendant to have statement of witness, since it is not itself admissible in evidence and cannot be used for any purpose except impeachment; thus trial court abused discretion in ordering state to deliver copies of statements of all witnesses expected to testify at defendant's trial. *State v Eads (Iowa) 166 NW2d 766 (citing annotation).*

See *State v Schlicher (1982) 230 Kan 482, 639 P2d 467, § 11.*

Trial court in robbery prosecution properly refused to order production of witness statements contained in police reports before state attempted to introduce any testimony regarding them where, in light of fact that witnesses had not adopted, approved or signed police reports, they did not constitute statements within meaning of statute. *State v Watie (1978) 223 Kan 337, 574 P2d 1368.*

Statements of witnesses in possession of prosecution are not official documents nor part of court record and therefore are not subject to discovery by accused prior to trial. *State v Hill, 211 Kan 287, 507 P2d 342.*

In capital homicide prosecution against Vietnam veteran charged with killing police officer, trial court properly denied defense motion for order compelling production and disclosure of statements and addresses of witnesses regarding defendant's state of intoxication where there was no indication that there were any exculpatory statements by such witnesses. *State v Felde (1982, La) 422 So 2d 370, cert den (US) 77 L Ed 2d 290, 103 S Ct 1903.*

Defendant was not entitled to discovery of prior statement made by victim and police reports, based on defendant's allegation that there was conflicting testimony at motion to suppress concerning whether defendant's picture or a photographic line-up was shown to victim before live line-up, where requested documents were found by trial judge to contain no exculpatory evidence, except that, in her statement, victim indicated that she had not seen defendant's face very clearly, and where victim also testified at trial that she had not seen defendant's face clearly and that she viewed photographic line-up prior to identifying defendant in physical line-up, so that production of documents would not have created reasonable doubt that did not otherwise exist. *State v Winn (1982, La) 412 So 2d 1337.*

High school teacher prosecuted for aggravated assault against student with gun had right to pretrial discovery of arguably exculpatory statement made by student to investigating officers which indicated that student pushed defendant before attempting to strike defendant with club. *State v Landry (1980, La) 381 So 2d 462.*

Where hearsay statement of deceased victim was to be admitted in murder prosecution as excited utterance and impeachment of statement by prior conviction was possible, defense request for prior conviction records of deceased victim was specific and relevant request for evidenced favorable to defendant, and trial judge erred in not requiring

prosecutor to respond to such request by stating whether state had knowledge or possession of any records of conviction of victim, and if so, by not requiring prosecutor to furnish them to defendant. Also, where police press release possibly contained evidence of victim's misidentification of prison inmate as one of her assailants was admissible for impeachment, court erred by not permitting defense to review press release. *State v Henderson (1978, La) 362 So 2d 1358*.

Eyewitness' and police officer's description of defendant concerning discrepancy as to whether defendant's complexion was medium black or dark black were not so inaccurate as to be considered exculpatory; state complied with request for exculpatory evidence when it responded that it had none. *State v Schamburge (La) 344 So 2d 997*.

It was not error to deny defendant's motion for state to produce note signed by decedent which incriminated accused where immediately after denial prosecutor furnished defense with xeroxed copy of note and no further complaint was made. *State v Dupuy (La) 319 So 2d 299*.

Motion by defendant for production of all statements made by particular person other than defendant was properly denied, since there was no contention that statements were sought for purposes of impeachment, but only that if statements tended to exculpate defendant he should be permitted to inspect them -- which was, in effect, merely argument for liberalized discovery which should be directed to legislature. *State v Didier, 259 La 967, 254 So 2d 262*.

Defendant in criminal case is not entitled to pretrial inspection of written confessions of codefendant, written statements of witnesses, or police reports in hands of sheriff, police department, or district attorney. *State v Cardinale, 251 La 827, 206 So 2d 510*.

In prosecution for criminal threatening with firearm, no violation of discovery rules arose out of State's failure to provide defendant with written summary of witnesses' statement where defense failed to request written or recorded statements of witnesses or summaries of such statements, defendant's counsel failed to file motion pursuant to state rules of criminal procedure seeking court-ordered disclosure of such statements and access to written statements of witnesses could be obtained only by motion and order of court. *State v Engstrom (1982, Me) 453 A2d 1170*.

See *State v Furrow (1981, Me) 424 A2d 694*, § 22[a].

Statute requiring that Commonwealth, in any criminal trial in which it intended to offer in evidence contents of any interception, serve defendant with complete copies of documents, applications, warrants and renewals, did not apply to evidence obtained by telephone company pursuant to statute which permitted telephone company to intercept communications necessary to prevent unlawful use of its facilities. *District Attorney for Plymouth Dist. v Coffey (1982) 386 Mass 218, 434 NE2d 1276*.

Error occurred in homicide prosecution where pursuant to discovery request defense counsel was, before trial, provided with statement of prospective prosecution witness which had been reduced to writing by police, and where day before testifying the witness informed prosecutor that statement was incorrect in material respects and that his testimony would be more incriminating of defendant than prior statement indicated, but prosecutor did not inform defense counsel of this development; however, prosecutor's error was harmless where defendant was not prejudiced due to weight of evidence against him and where witness' new story was incriminating rather than exculpatory, thus rendering Brady precedent inapplicable. *Commonwealth v Gilbert (1979) 377 Mass 887, 388 NE2d 1190*.

See *Commonwealth v Lacy 371 Mass 363, 358 NE2d 419*, § 5[a].

Although, under circumstances, denying defendant access to grand jury testimony was not prejudicial, prospectively, every defendant would be entitled to his transcript of grand jury testimony and to witness' grand jury testimony related to witness' testimony at trial, except that testimony may be withheld if irrelevant or for security reasons. *Commonwealth*

*v Stewart (Mass) 309 NE2d 470* (citing annotation).

Trial court did not abuse discretion in allowing inspection of grand jury minutes only in respect to testimony of unindicted coconspirator, or, in response to motion for discovery of statements of defendants and others, in allowing discovery only as to written statements signed by defendants. *Commonwealth v Lamattina (Mass App) 310 NE2d 136*.

See *People v Till (1982) 115 Mich App 788, 323 NW2d 14*, § 6[a].

In prosecution for breaking and entering with intent to commit larceny, trial court erred in admitting statements of two witnesses who were physically present at time of alleged breaking and entering which had not been turned over to defense pursuant to pretrial order. *People v Hayward (1980) 98 Mich App 332, 296 NW2d 250*.

Trial court did not abuse its discretion in refusing request for discovery of pretrial statement made by defendant's wife as res gestae witness, despite contention of need for statement to determine whether to invoke privilege and bar wife from testifying, where defendant called wife to testify after being given copy of statement at trial, where defendant had not set forth any specific facts or information he expected to glean from statement, and where defendant had opportunity to study statement and cross-examine police officer who had taken it. *People v Smith (1978) 81 Mich App 190, 265 NW2d 77*.

Trial court did not err in denying defendant's motion to produce copies of all statements, reports, notes or tapes made or given by witnesses where court provided for production of these requested materials if needed to refresh recollection of witness at trial and afforded defendant opportunity for full cross-examination of witnesses at trial. *People v Ranes, 58 Mich App 268, 227 NW2d 312*.

Under Michigan rule that discovery will be ordered in all criminal cases when, in sound discretion of trial judge, thing to be inspected is admissible in evidence and failure of justice may result from its suppression, trial court properly granted pretrial discovery of statement made to police by complaining witness in prosecution for taking indecent liberties, and of stenographic report of statement she made to prosecutor; however, court erred in restricting discovery of stenographic report -- on grounds of relevancy -- to portion thereof relating to defendant and permitting prosecution to excise other portions dealing with complainant's sexual adventures with other individuals, statements with respect to such adventures being relevant. *People v Brocato, 17 Mich App 277, 169 NW2d 483*.

Although prosecutor should have disclosed earlier than day before trial that particular person had claimed he had seen truck driving with its lights off in vicinity of restaurant where shooting occurred shortly after the shooting occurred, error was not prejudicial when witness' testimony apparently was not that he saw truck leaving restaurant but that he saw it driving toward restaurant and this was apparently well after commission of crime, when police already were on the scene. *State v Dye (1983, Minn) 333 NW2d 642*.

See *State v Caldwell (1982, Minn) 322 NW2d 574*, § 22[e].

See *State v Kirkwood (Minn) 249 NW2d 890*, § 6[a].

Where state did not disclose to defense, even though court rule and court order required it to do so, statements made by key prosecution witnesses which contradicted their trial testimony and under which, in light of other evidence produced by prosecution at trial, defendant could not have been present at time they identified defendant as being person they saw near scene of crime, state's action was flagrant violation and reversal was required, even though one of statements was discovered during course of trial and used by defense to cross examine rebuttal witness. *Hooten v State (1983, Miss) 427 So 2d 1388, later app (Miss) 437 So 2d 410*.

In prosecution for promoting prostitution and other crimes, trial court did not abuse discretion in overruling defendant's

motion to compel disclosure of state witnesses' names, addresses, police records and statements to police, since request for disclosure, though essentially proper in form, was filed in incorrect branch of court and so created no duty upon state to make disclosure under state discovery rule, later request for disclosure filed after filing of transcript in trial court did not comply with time requirements of discovery rule, test as to whether failure to disclose resulted in fundamental unfairness or prejudice to defendant, which is concerned with effect of specific evidentiary material, cannot be used to establish that defendant who does not comply with state discovery rule is entitled to disclosure under unfairness rule, and right to relief under Brady doctrine cannot be established by showing untimely discovery request followed by speculation, unsupported by showing of evidence allegedly not disclosed, upon what disclosure might have revealed. *State v Charity* (1982, Mo App) 637 SW2d 319.

In prosecution of prisoner of county jail for felonious assault upon fellow prisoner, trial court erred in failing to grant mistrial or continuance based upon prosecutor's inadvertent failure to disclose statement signed by 12 prisoners, where signatures on statement identified witnesses potentially favorable to defense. *State v Bebee* (1979, Mo App) 577 SW2d 658.

Defendant, in prosecution for assault with intent to kill, was entitled to withdraw his guilty plea and replead where prosecutor failed to disclose exculpatory evidence showing that assault victim had made misidentification at lineup and where victim was shown mug shot of defendant immediately before taking stand at preliminary hearing. *Lee v State* (1978, Mo App) 573 SW2d 131.

Failure of prosecution to inform defendant or his counsel of purported confession to crime for which defendant was convicted was improper where letters were received after trial was over and defendant was obviously well aware of their existence as defendant's own counsel filed motion for new trial based on newly discovered evidence. *State v Fowler*, 193 Neb 420, 227 NW2d 589.

See *State v Williams*, 183 Neb 257, 159 NW2d 549, § 17.

Refusal of trial court to allow defendant in murder trial to inspect statements of proposed prosecution witnesses before trial was not error, in absence of extraordinary circumstances, where defendant quite obviously knew names and addresses of witnesses and gave no indication that they had refused to see him or talk with him about case. *State v Funicello*, 49 NJ 553, 231 A2d 579.

See *State v Harrison*, 118 NJ Super 299, 287 A2d 229, affd 119 NJ Super 1, 289 A2d 548, § 17.

In absence of any showing of unusual circumstances, trial judge erred in requiring district attorney to furnish police reports and statements of witnesses to defendant. *State v Tackett*, 78 NM 450, 432 P2d 415, 20 ALR3d 1 (citing annotation).

See *People v Aviles*, 89 Misc 2d 1, 391 NYS2d 303, § 27[a].

See *People v Harrison*, 81 Misc 2d 144, 364 NYS2d 760, § 11[m].

Defense counsel was entitled to receive copies of any statement obtained by District Attorney from alibi witnesses whose names had been supplied by defendant. *People v Sanders*, 78 Misc 2d 205, 356 NYS2d 421.

See *Vergari v Kendall*, 76 Misc 2d 848, 352 NYS2d 383, app dismd (App Div) 360 NYS2d 1003 § 11[m].

See *People v Rice*, 76 Misc 2d 632, 351 NYS2d 888, § 11[m].

In harassment prosecution, defendant's motion for bill of particulars was granted for names and addresses of prospective

witnesses and their statements or memorandum where notes and memorandum were not statutorily exempt within meaning of state criminal procedure law. *People v Robinson*, 75 Misc 2d 807, 349 NYS2d 259.

See *People v Blair*, 64 Misc 2d 519, 315 NYS2d 179, § 13[a].

Defendant charged with possession of marijuana was not entitled, through discovery, to inspect statements, transcripts of interviews, and memoranda of conversations of witnesses to be used in behalf of prosecution at trial. *People v McDonald*, 59 Misc 2d 311, 298 NYS2d 625.

See *People v Johnston*, 55 Misc 2d 185, 285 NYS2d 243, § 21[a].

Defendant charged with murder was permitted to inspect statements of witnesses as to events leading up to and following alleged crime. *People v Powell*, 49 Misc 2d 624, 268 NYS2d 380.

Housing inspector was not entitled to reversal of conviction for bribery and receiving unlawful gratuities on basis that diary kept by chief prosecution witness, an "expediter" for contractor who was caught in bribe attempt and who agreed to cooperate during investigation of corruption, was not made available to defense, where witness turned diary over to law enforcement officials prior to commission of crime of which defendant was convicted, and where conviction was predicated upon criminal transaction to which diary had no bearing. *People v Kanefsky* (1980) 50 NY2d 162, 428 NYS2d 453, 405 NE2d 1019.

Where prosecution refused to produce or disclose identity of witness who may have been able to offer description of suspect which, in turn, may have exculpated defendant, issue would be remanded to trial court to determine whether materiality of witness was sufficient to warrant disclosure of identity to accused. *People v W.* (1978) 44 NY2d 179, 404 NYS2d 578, 375 NE2d 758.

Worksheets which consisted of printed questions and hand written notes made by interviewing officers capsulizing witnesses' answers thereto were statements made by prosecution witnesses and all such worksheets should have been examined by trial court to determine whether they contained exculpatory material and trial court's acceptance of prosecutor's representation that nothing contained in the questionnaires constituted exculpatory material was error. *People v Consolazio*, 40 NY2d 446, 48 NYS2d 62, 354 NE2d 801, on remand (App Div) 386 NYS2d 644.

Under "prior statement" rule defense counsel has right to examine prior statement of prosecution witnesses. *People v Jaglom*, 17 NY2d 162, 269 NYS2d 405, 216 NE2d 576.

See *People v. Hunt*, 227 A.D.2d 568, 643 N.Y.S.2d 175 (2d Dep't 1996), § 27[a].

Where prosecutor had delivered to counsel for defendant in perjury prosecution prior to trial a tape recording of conversation between defendant and person who identified himself as Stuart Goldberg and who requested defendant's help to prevent his incarceration because defendant's accomplice in scheme to receive kickbacks in exchange for awarding municipal contracts to payers of kickbacks was going to testify against him, which request defendant answered by disclaiming any knowledge with respect to subject of conversation, prosecutor's delay in informing defense counsel that voice on tape was that of undercover officer posing as Stuart Goldberg until after defense counsel had informed jury in his opening statement that tape recording of conversation between defendant and Stuart Goldberg would be played as part of the defense violated Brady rule, since tape on its face could have created in defense counsel's mind during trial preparation a wrong impression of its exculpatory impact. However, any prejudice resulting from delay was cured by trial judge's instruction before tape was played informing jury that defense counsel had first learned on previous day that person on tape was not Stuart Goldberg but an investigator for the district attorneys office. *People v Tempera* (1983, 2d Dept) 94 App Div 2d 748, 462 NYS2d 512.

Sanction imposed by trial judge for prosecution's failure to provide demanded Brady and Rosario material until after witnesses had testified, namely, offering defense opportunity to recall witness for further cross-examination after receipt of material, which defense counsel declined to do, was appropriate where record showed that failure was principally limited to one witness and that defense counsel declined opportunity to recall witness for further cross-examination after receipt of material; alternative sanction of reversal would be inappropriate absent a demonstration of intentional misconduct. *People v Keppler (1983, 3d Dept) 92 App Div 2d 1032, 461 NYS2d 513.*

Trial court correctly denied defense request for disclosure of detective's summaries of prior statements made by prosecution witnesses at pretrial suppression hearing where notes did not relate to subject matter of hearing, but motion would have had to have been granted had it been renewed at trial. *People v Clow (1978) 62 App Div 2d 880, 406 NYS2d 598.*

In prosecution for first-degree murder trial court properly examined statements of witnesses and found statements consistent with trial testimony of those witnesses and lacking in evidence exculpatory of defendant, under rule of Hardy case properly denied disclosure of those statements to defense counsel and properly ordered copies sealed for appellate review. *State v Brown (1982) 306 NC 151, 293 SE2d 569, cert den 459 US 1080, 74 L Ed 2d 642, 103 S Ct 503, post-conviction proceeding (NC) 345 SE2d 393, cert den 479 US 940, 93 L Ed 2d 373, 107 S Ct 423, habeas corpus proceeding (WD NC) 693 F Supp 381, affd in part and revd in part on other gnds (CA4 NC) 891 F2d 490, cert den 495 US 953, 109 L Ed 2d 545, 110 S Ct 2220.*

Defendant charged with murdering her husband by arsenic poisoning was not entitled to pretrial disclosure of statements allegedly made by defendant to prosecution witnesses which were in turn relayed to police officers since statements made by defendant to witnesses were shielded from discovery by statute even when those statements contained remarks made by defendant to those witnesses. *State v Detter (1979) 298 NC 604, 260 SE2d 567.*

In homicide prosecution against prisoner during which, upon retrial following grant of mistrial, two fellow prisoners testified to incriminating statements made to them by defendant, trial court did not err in denying pretrial defense motion for names of other prison inmates who allegedly would testify to incriminating statements defendant made to them where each of the witnesses who did testify against defendant were cross-examined at length during first trial, defendant had their names as well as copies of their prior recorded testimony, and statute afforded accused no right to discover names and addresses of state's witnesses or furnish accused list of witnesses who would be called to testify against him. *State v Sledge (1979) 297 NC 227, 254 SE2d 579.*

In prosecution for kidnaping, armed robbery, murder, and conspiracy to commit armed robbery and murder, although defendants were not entitled to pretrial inspection of tape-recorded statement of witness, they were entitled to such inspection after witness had testified at trial. *State v Hardy (1977) 293 NC 105, 235 SE2d 828.*

See *State v McDougald (1978) 38 NC App 244, 248 SE2d 72, § 11[m].*

Defendant in murder prosecution was not entitled to discovery of internal police reports and memoranda pertaining to case, statements by witnesses other than defendant, and criminal records of witnesses other than defendant where such evidence was not made discoverable by state statute and where defendant failed to follow mandatory procedure in pursuing discovery. *State v Gillespie (1977) 33 NC App 684, 236 SE2d 190.*

Police report which contained substantially verbatim recital of prosecution witness' statement written in narrative form was discoverable under court rule by defense after completion of witness' direct examination at trial. *State v Johnson (1978) 62 Ohio App 2d 31, 16 Ohio Ops 3d 74, 403 NE2d 1003.*

Defendant in murder prosecution was not entitled to inspection of tape-recorded statement of two witnesses who testified for prosecution at preliminary hearing but testified for defense at trial where tape-recorded statement did not

contain exculpatory matter. *Farmer v State* (1977, *Okla Crim*) 565 P2d 1068.

Accused is not entitled to discovery and inspection of unsworn statements of prosecution witnesses in possession of state, nor of "work product" of state consisting of unsworn statements signed by persons other than accused, nor of reports compiled by law enforcement agency in course of its investigation into criminal offense. *Trowbridge v State* (*Okla Crim*) 502 P2d 495.

Defendant is not entitled to inspection of work product of prosecutor consisting of statements signed by other than defendant unless such statements contain matter which is material to defense of case; thus, defendant charged with rape was not prejudiced by trial court's denial of request for statement of prosecutrix where her original statement indicated that she had been raped twice and she so testified at trial. *Smith v State* (*Okla Crim*) 481 P2d 468.

Pretrial inspection of statements given by children of defendant in manslaughter prosecution and of all pictures and reports concerning crime made by investigating officers, was denied, since accused is not entitled to discovery and inspection of statements of prosecution witness in possession of state, of transcript of statement of state witness taken before prosecution officer preparatory to trial, or of "work product" of prosecutor consisting of statements signed by others than defendant. *Doakes v District Court of Oklahoma County* (*Okla Crim*) 447 P2d 461.

Accused in rape prosecution was not entitled to pretrial discovery and inspection of statements of prosecutrix in possession of state, of transcript of statements by state witness taken before prosecuting officer preparatory to trial, or of "work product" of prosecutor, consisting of statements signed by persons other than defendant, where as to all persons giving pretrial statements accused was allowed extensive cross-examination. *Shapard v State* (*Okla Crim*) 437 P2d 565.

In prosecution for fourth degree assault on ten-year-old child, notes made by case worker in Children's Service Division file, respecting conversation with defendant's wife, were written statements of a witness in control of the district attorney and defendant was entitled to discovery of these notes, where Children's Service Division served investigative function, similar to a police agency. *State v. Johns* (1980) 44 Or App 421, 606 P2d 640.

See *State v McKeen* (1978) 33 Or App 343, 576 P2d 804, § 17.

See *State v Bray* (1977) 31 Or App 47, 569 P2d 688, § 11.

Prosecution in first-degree murder trial lawfully withheld identity (not existence) of youthful eyewitness where grounds existed justifying fear by witness and his mother of repercussions through suspected intimidation of witnesses. *Commonwealth v Bonacurso* (1983) 500 Pa 247, 455 A2d 1175, cert den (US) 77 L Ed 2d 1350, 103 S Ct 3090.

Pre-trial statements of state's witnesses, which have been reduced to writing and relate to witnesses' testimony, must be supplied to defendants if they request them. *Commonwealth v Hassine* (1985) 340 Pa Super 318, 490 A2d 438.

Arson defendant had no right to pretrial discovery of recorded statement of key prosecution witness where defendant had tape recording of statement by witness at preliminary hearing. *Commonwealth v Rineer* (1983, Pa Super) 456 A2d 591.

See *Commonwealth v Walters* (1982) 303 Pa Super 203, 449 A2d 649, § 18.

In prosecution for third degree murder, defendant's right to inspect statements of missing eyewitnesses was contingent upon whether statements included exculpatory information. Absent showing of some reason for believing inspection would lead to discovery of exculpatory evidence, court was under no duty to conduct in camera investigation and could rely on commonwealth's representation that statements included no evidence which would help defendant and

defendant's request to inspect statements was properly denied. *Commonwealth v Watson* (1980, Pa Super) 419 A2d 623.

Defendant on trial for attempted robbery was not entitled to discovery of prior written statement of victim where victim did not testify and prosecution represented statement was nonexculpatory; fact defendant made no pre-trial motion would not bar right to such discovery however. *Commonwealth v Dalahan* (1979, Pa Super) 396 A2d 1340.

Under court rule, trial court was permitted discretion in granting defense discovery requests for names of prosecution witnesses and copies of any pretrial statements by such witnesses furnished during investigation of case and refusal by trial court to require state to furnish such information prior to trial was not abuse of discretion absent specific assertion of prejudice. *Commonwealth v Johnston* (1978, Pa Super) 392 A2d 869.

Defendant was entitled, upon timely request, to production of all pretrial statements made by commonwealth witnesses, including police officer witnesses. *Commonwealth v Grimm* (1977, Pa Super) 378 A2d 377.

Where prosecution inadvertently failed to disclose to defense that victim claimed that defendant made her perform fellatio upon him, but jury acquitted defendant of first degree sexual assault charge, it seemed certain that evidence withheld by prosecution did not contribute to conviction of lesser offense. *State v Concannon* (1983, RI) 457 A2d 1350.

Trial court did not err in denying motion for inspection of statements made by prospective witness to investigating officers, where there was nothing in record to indicate that witness had in fact made any such statements. *State v Lerner* (RI) 308 A2d 324.

In marijuana possession case, defendant's claim that prosecution suppressed evidence as to identity of witness, who reported seeing a man not resembling defendant near farmhouse containing the marijuana a few days prior to defendant's arrest, and thereby denied him due process failed, where defense counsel knew identity of witness immediately prior to trial and did not move for continuance, and materiality and exculpatory nature of testimony was limited at best. *State v Vogel* (1982, SD) 315 NW2d 321.

Refusal to require attorney general to produce statement of prosecution witness, which amounted "simply to notations which the officers made in the course of their investigation," was not error since evidence was not material to defense in robbery prosecution. *Bolin v State* (Tenn) 405 SW2d 768.

State was under no obligation to furnish defendant with copy of assault-and-burglary victim's police statement which was contrary to statement victim gave to defendant's counsel, when statement contained no exculpatory information and defendant's trial counsel was aware of substance of statement. *Winrow v State* (1983, Tenn Crim) 649 SW2d 18.

In prosecution for first-degree murder and armed robbery, defendant was not entitled to new trial due to failure of prosecution to supply him with statement of witness based on his requests for previous statements of officer which contained witness' statement, where witness testified as to content of conversation and defense conducted extensive cross-examination of witness, and there were hardly any contradictions between withheld statement and testimony at trial. *State v Keele* (1982, Tenn Crim) 644 SW2d 435.

In prosecution for armed robbery, defendant was not erroneously denied statement of witness for cross-examination purposes as contemplated in state statute, where victim of robbery gave police description of person who had committed robbery, police wrote this description in their report, witness did not know and had never seen what was written, witness neither signed nor otherwise adopted writing as her own, and therefore police report contained no statement by witness within meaning of state statute. *State v Pinkston* (1982, Tenn Crim) 644 SW2d 422, vacated, reinstated (Tenn Crim) 668 SW2d 676.

See *State v Venable* (1980, *Tenn Crim*) 606 SW2d 298, § 17.

Defendant in murder prosecution was not entitled to examine statement of prosecution witness made to police officers during investigation of offense where such statement contained no information exculpatory for defendant. *Ellison v State* (1976, *Tenn Crim*) 549 SW2d 691.

Trial court did not err in denying defendant right to inspect copies of pretrial statements of prosecution witnesses immediately following their direct testimony at trial where at time case was tried state statute similar to the Jencks Act was not in effect. *Honeycutt v State* (*Tenn Crim*) 544 SW2d 912.

See *Pique v State* (*Tenn Crim*) 499 SW2d 4, § 11[h].

While statements of codefendant must be furnished to attorney representing such party, there is no compulsion for court to order codefendant's statements furnished to other defendants. *Graves v State* (*Tenn Crim*) 489 SW2d 74.

Right of defendant or his attorney to inspect and copy designated books and papers in possession of state does not extend to any oral or written statement given to any officer or attorney for state by any witness other than defendant. *Aldridge v State* (*Tenn Crim*) 470 SW2d 42.

See *Brooks v State* (1982, *Tex App 12th Dist*) 643 SW2d 440, review ref., § 4[b].

In prosecution for rape, trial court did not err by failing to compel state to produce handwritten statement of prosecutrix mentioned by her in cross-examination where defendant was provided with typewritten statement which prosecutrix testified was precisely same as handwritten statement, and defendant failed to establish that handwritten statement, which neither state's attorney nor prosecutrix knew whereabouts of, existed at time of prosecutrix's testimony. *Romero v State* (1982, *Tex App 13th Dist*) 636 SW2d 782.

See *Hernandez v State* (1982, *Tex App 4th Dist*) 636 SW2d 611, § 13[a].

Under express provisions of Texas statutes, defendant was not entitled to written statements of witnesses or to work product of counsel and their investigators. *Smith v State* (*Tex Crim*) 455 SW2d 748.

Court did not err in refusing to make available to defendant in murder prosecution all testimony of state's witnesses who appeared before grand jury and all pretrial statements made by all witnesses for state, where all events in case took place within 4 months of grand jury testimony and trial testimony; only 1 of 20 government witnesses' testimony was involved; testimony of defendant's confessed accomplice was corroborated thoroughly by other witnesses and by written and physical evidence; court properly charged jury on law of accomplices and their testimony, and jury resolved credibility of accomplice witness against defendant; evidence adduced corroborated accomplice, who was neither paid informer nor had reason to be hostile witness; and there was no uncertainty as to details in testimony of state's witnesses. *McDuff v State* (*Tex Crim*) 431 SW2d 547.

See *Hackathorn v State* (*Tex Crim*) 422 SW2d 920, § 13[c].

Whether court will direct production of written statements of witnesses in advance of trial, or at all, is matter peculiarly within trial court's discretion, and its ruling will not be disturbed unless there has been manifest abuse of such discretion. *State v Tyler*, 77 Wash 2d 726, 466 P2d 120.

See *State v Beard*, 74 Wash 2d 335, 444 P2d 651, § 17.

See *State v Green*, 70 Wash 2d 955, 425 P2d 913, cert den 389 US 1023, 19 L Ed 2d 670, 88 S Ct 598, § 5[a].

Failure of state to provide copy of statement by witness did not violate state discovery statute where state did not intend to call witness and alleged violation was not prejudicial where defendant was able to carry out complete cross-examination of witness' testimony. *State v Mounsey* (1982) 31 Wash App 511, 643 P2d 892 (disapproved on other grnds *State v Hudlow*, 99 Wash 2d 1, 659 P2d 514).

In murder and burglary prosecution during which evidence established that 81-year-old assault victim died of pneumonia caused in large part by rib fractures, failure of deputy medical examiner who performed autopsy to disclose to defendants until after trial his opinion that prominent bruise on deceased's back occurred during his hospitalization did not violate defendant's rights where, assuming doctor's knowledge was imputable to prosecuting attorney, defense made no pretrial request for disclosure, made no effort to determine date or nature of bruise during trial, and where prosecution was under no duty to disclose on its own initiative all it knew of case and witnesses. *State v Ervin* (1979) 22 Wash App 898, 594 P2d 934.

In rape prosecution court did not abuse discretion in denying discovery of victims' statements where trial of defendant's accomplice stemming from same occurrence took place immediately prior to defendant's trial, defendant's counsel was present at such trial, testimony of victims was presented in full at that time and victims were subject to cross-examination by accomplice's counsel. *State v Krausse*, 10 Wash App 574, 519 P2d 266 (citing annotation).

See *State v Audia* (1983, W Va) 301 SE2d 199, cert den (US) 78 L Ed 2d 307, 104 S Ct 338, § 17.

In prosecution for entering without breaking with intent to commit larceny of antique pump organ, no error was committed by prosecutor in failing to supply defense with copy of letter written by defendant's nephew in which nephew indicated that he had changed his mind about testifying against defendant, where prior to trial, prosecuting attorney found misplaced letter and sent copy of it to defense counsel, nephew corroborated authenticity of letter at trial, nephew's reasons for deciding against testifying were not related to any coercive tactics on part of State, and in any event, defense counsel was supplied with copy of letter prior to trial and agreed after having read it that it was of no value to defense. *State v Jacobs* (1982, W Va) 298 SE2d 836.

See *State v Lenarchick*, 74 Wis 2d 425, 247 NW2d 80, § 11[k].

[\*16b] Statement or confession of codefendantn151

In some cases it has been held or recognized that in a proper case a defendant may be permitted to inspect a statement or confession made by his codefendant which is in the possession of the prosecution.

Thus, in *People v Garner* (1961) 57 Cal 2d 135, 18 Cal Rptr 40, 367 P2d 680, cert den 370 US 929, 8 L ed 2d 508, 82 S Ct 1571, the court, in holding that the defendant's argument that there was a failure upon the part of the prosecution to comply with certain of the pretrial discovery orders was without merit under the circumstances, noted that the defendant's trial counsel was entitled to inspect, view, hear, or copy any joint confession given by the defendant and his codefendant, and that such was the order of the trial judge in pretrial discovery proceedings. The court disapproved any inference to the contrary in *Schindler v Superior Court of Madera County* (1958) 161 Cal App 2d 513, 327 P2d 68, wherein the court, stating that since any statements of the codefendant were presumably made outside the defendant's presence, such statements would not be admissible against the defendant, held that the defendant was not entitled to an order for pretrial inspection of statements made by a codefendant to the district attorney with respect to the death of the victim of the alleged homicide.

See also *State v Minor* (1962, Del) 177 A2d 215, supra § 11[b], wherein an inspection of tape recordings made by the police of statements of a codefendant was permitted under a criminal rule of procedure expressly authorizing such inspection.

And in *State v Fox* (1938) 133 Ohio St 154, 10 Ohio Ops 218, 12 NE2d 413, supra § 12, the court held that the appellant's counsel were entitled to inspect a written confession of the appellant's codefendant before trial.

◇

On the other hand, in the following cases the court, either explicitly or by implication supporting the view that an accused is not entitled to inspect a statement or confession made by his codefendant, refused to permit the defendant to inspect such a statement or confession.

In *State v Bankston* (1928) 165 La 1082, 116 So 565, wherein a codefendant had pleaded guilty and had testified as a witness for the prosecution in the trial of the defendant, the court held that it was not error for the trial judge to refuse to grant the defendant's request for an order requiring the prosecuting attorney to produce, during the cross-examination of the codefendant, a statement previously made by him. Noting that the defendant in a criminal case has no right to inspect a document or article in the possession of the prosecution which is not offered in evidence, and pointing out that in the present case the defendant's counsel did not disclose any purpose for which he desired the production of the document in question, whether to be used as evidence or to be used for the purpose of impeachment, the court said that if the document in question was wanted for the purpose of introducing and using it as evidence, the answer was that it would not have been admissible, and if the document was wanted for impeachment purposes, the answer was that no proper foundation had been laid. The court also rejected the defendant's argument that the document in question was a public instrument which any person was entitled to inspect and examine.

In *State v Livsey* (1938) 190 La 474, 182 So 576, it was held that the prosecution could not be compelled, prior to trial, to file in court, for inspection and examination by the accused or his counsel, statements made by a codefendant which were being held as evidence to be used on a joint trial. The court pointed out that such statements did not constitute public records until after they had been used in court.

Relying on the rule that an accused is not entitled to have the prosecution furnish him, prior to trial, with the evidence upon which it intends to rely for his conviction, the court in *State v Haddad* (1952) 221 La 337, 59 So 2d 411, held that the defendant was not entitled to pretrial inspection of written confessions made by codefendants. Holding to the same effect are *State v Simpson* (1949) 216 La 212, 43 So 2d 585, cert den 339 US 929, 94 L ed 1350, 70 S Ct 625, and *State v Martinez* (1952) 220 La 899, 57 So 2d 888, cert den 344 US 843, 97 L ed 656, 73 S Ct 58.

In *Commonwealth v Giacomazza* (1942) 311 Mass 456, 42 NE2d 506, the denial of the defendant's motion, apparently made before trial, for permission to be furnished with a copy of a confession made by a codefendant was upheld. Noting that there was no statutory provision requiring the prosecuting attorney to furnish the defendant with a copy of the confession, the court said that in Massachusetts the law was settled adversely to the defendant's contention.

For other cases wherein the court also held that the defendant was not entitled to inspect a statement or confession made by his codefendant, see *State v Bunk* (1949, NJ County Ct) 63 A2d 842, supra § 13[b], and *Commonwealth v Graham* (1955, Pa) 42 Del Co 313, supra § 5[a].

In *People v Martinez* (1959) 15 Misc 2d 821, 183 NYS2d 588, the defendant's motion for the production of a confession allegedly made by a codefendant was denied, the court stating that confessions of a codefendant would not be evidence on the trial, and that, consequently, the defendant was not entitled to copies or an inspection thereof. To the same effect is *People v Jordan* (1953, Gen Sess) 128 NYS2d 457.

Holding that the defendant was not entitled to a disclosure of transcribed statements taken from his codefendants since they were not competent "evidence in support of the cause of action or defense of *the party seeking the discovery*," the

court in *People v Torres* (1965) 46 Misc 2d 264, 259 NYS2d 656, denied the defendant's motion for pretrial inspection of such statements. The court also held that the defendant was likewise not entitled to see notes made by a detective at the time of his interrogation of the codefendants.

◇

Defendant in murder prosecution was not entitled to grant of her discovery motion for prosecution's disclosure of statement that had been made to police by her accomplice and codefendant where defendant failed to show any reason or need for statement, codefendant was not called as witness, and statement was not alluded to nor referred to during defendant's trial. *Head v State* (1980, Ala App) 392 So 2d 860, cert den (Ala) 392 So 2d 869.

Defendant charged with robbery was entitled to inspection of police memorandum of extrajudicial statement made by his codefendant. *People v Aranda*, 63 Cal 2d 518, 47 Cal Rptr 353, 407 P2d 265.

In prosecution for felony murder and other crimes, trial court erred in denying defendant's motion for new trial where, following direct examination of former co-defendant who testified for state as sole eyewitness, defendant's attorneys learned that witness had been hypnotized by district attorney night before testimony and had been "interviewed" on morning of testimony, and defendant's attorneys then requested tape recordings made of either of two interviews, but did not learn until several months after trial that witness had also been hypnotized on morning of testimony, since, in light of facts that prosecution failed to disclose second hypnotic session after defense requested tapes of either interview, that defense was as specific in request as it could have been, and that request for tapes gave prosecution notice that defense was concerned about nature of both sessions, request was sufficiently specific to make applicable due process test whether undisclosed evidence might have affected trial's outcome, and since, in light of testimony at motion for new trial that being subjected to hypnotism could affect credibility of witness, witnesses' reliability could have been challenged, and failure by prosecution to disclose hypnotism might well have affected outcome of trial. *People v Angelini* (1982, Colo App) 649 P2d 341, later app (Colo App) 706 P2d 2.

Discovery statute did not entitle armed-robbery defendant to pretrial discovery of statements to police by co-defendant, and consequently no error occurred, where prosecution was allowed to use prior consistent statement to rehabilitate prosecution testimony by co-defendant impeached through demonstration of inconsistency with testimony given at guilty plea hearing. *Hill v State* (1982) 161 Ga App 346, 287 SE2d 779.

Although state failed to disclose to defendant convicted of aggravated battery threatening statement he had made to arresting officer and statement he had made on his arrest to assistant state's attorney until day of defendant's trial, such late disclosure did not deny defendant of fair trial where his threat to arresting officer was not brought to light until that officer testified on re-direct examination, where undisclosed threatening statement did not contradict defendant's trial testimony and was not essential to support his conviction, and where statement of defendant of same nature he had made on arrest to assistant state's attorney was contained in police report defendant had received in discovery. *People v Ingram* (1980) 91 Ill App 3d 1074, 47 Ill Dec 564, 415 NE2d 569.

Trial court did not abuse its discretion in denying discovery motion of defendant in murder prosecution for disclosure by State of confession or statement made by codefendant who did not testify at defendant's trial and was not called as witness either by State or defendant, where there was no showing that confession or statement was favorable to defendant on issue of guilt or punishment, and where under such circumstances State was under no continuing duty to make disclosure of confession or statement. *State v Moore* (1981) 229 Kan 73, 622 P2d 631.

In robbery prosecution, it was not error for trial judge to deny defense motion for continuance, which motion was based on grounds that prosecutor had failed to disclose statements or confessions made by co-defendant at preliminary hearing, where continuance was not mandated under statute and court did order prosecutor to make transcript of co-defendant's

testimony at preliminary hearing available to defendant. *State v Lee (1978, La) 364 So 2d 1024.*

See *State v Thomas (La) 290 So 2d 317, § 8.*

See *State v Cardinale, 251 La 827, 206 So 2d 510, § 16[a].*

See *Veney v State, 251 Md 159, 246 A2d 608, § 11[e].*

In robbery and murder prosecution reversible error occurred where defense made specific and timely request for pretrial statements given to police by codefendants which implicated accused, and where prosecutor's late, piecemeal, and incomplete disclosures forced on defense counsel necessity of making difficult tactical decisions quickly in heat of trial. *Commonwealth v Ellison (1978) 376 Mass 1, 379 NE2d 560.*

In felony prosecution trial court did not err or abuse its discretion in denying escapee's motion for disclosure of prosecution and prison records allegedly sought by escapee to aid in preparation of defense of "selective prosecution," for escapee neither alleged in motion nor in hearing thereon that he was invidiously selected by prosecution on account of his race or for reason that he sought to protect his exercise of his constitutional right, and where thrust of his hearing testimony was that prison conditions and policies were such that they motivated his escape. Since defendant had failed to show "colorable basis" for disclosure, court order can deny disclosure without determining whether disclosure request was reasonable within contemplation of rule requiring disclosure to defendant of requested information found by court to be reasonable, relevant and material to defendant's case. *State v Camillo (1980, Mo App) 610 SW2d 116.*

See *People v Player, 80 Misc 2d 177, 362 NYS2d 773, § 11[m].*

See *State v Moore (1980) 301 NC 262, 271 SE2d 242, § 14.*

Co-defendants in first-degree burglary prosecution were not entitled to pre-trial discovery of accomplice's statements where charges were dismissed against accomplice prior to filing of motion for discovery. *State v Thomas (1981) 52 NC App 186, 278 SE2d 535.*

Failure to furnish defendant in armed robbery trial with list of statements made by other 2 defendants and names of persons present at time statements were made was not error, where it appeared from bill of exceptions that no statements were made by other 2 defendants, no statements were introduced in evidence against defendant, nor was any motion made to court by defendant's counsel with regard to this subject. *Sneed v State (Tenn) 423 SW2d 857.*

In rape prosecution involving 3 defendants, it was not error to deny defendant examination of statements made by his 2 codefendants prior to trial. *Morrison v State (Tenn) 397 SW2d 826, reh den 400 SW2d 237.*

[\*16c] Statement or confession of accomplice<sup>152</sup>

In the following cases the court refused to permit the defendant to inspect a statement or confession made by an accomplice.

In *State v Brown (1950) 360 Mo 104, 227 SW2d 646*, the denial of the defendant's motion to require the prosecuting attorney to produce, for inspection by the defense, two written statements made by an accomplice at two different occasions was upheld, notwithstanding the defendant's contention that the inspection was necessary to prepare his case for trial, that he could not safely proceed to trial without such inspection, and that a comparison of the two statements would show that the accomplice had "made different statements of essential and material matters." The court pointed out that the motion stated conclusions and not facts; that it stated no facts to show any materiality of the statements to the defense; that it was a fishing expedition seeking to discover something of benefit to the defendant; and that the

statements were hearsay and inadmissible except by way of impeachment if the accomplice should testify differently.

In *Leahy v State* (1928) 111 Tex Crim 570, 13 SW2d 874, it was held not error to deny the defendant's pretrial motion for permission to inspect written statements or confessions made by an accomplice to the district attorney. Pointing out that no part of the requested statements appeared to have been made an issue on the trial, and none of their contents had been used against the defendant, and noting that the statements were not public documents but private papers, the court said that under the facts of the case such a motion could not be sustained unless and until the statements were in some way made material by the development of the trial.

In *Santry v State* (1886) 67 Wis 65, 30 NW 226, it was held that the prosecuting attorney was under no obligation to furnish the defendant with a copy of the confession of an accomplice, previously convicted, implicating the defendant in the crime.

For other cases wherein the court also refused to permit the defendant to inspect a statement made by an accomplice, see the following:

#### ARIZONA

*State v McGee* (1962) 91 Ariz 101, 370 P2d 261, cert den 371 US 844, 9 L ed 2d 79, 83 S Ct 75, supra § 13[b]

#### VERMONT

*State v Anair* (1962) 123 Vt 80, 181 A2d 61, supra § 11[i]

◇

On the other hand, attention is called to the following cases wherein the court held that the suppression by the prosecution of an accomplice's statement was a violation of due process under the circumstances: *Brady v Maryland* (1963) 373 US 83, 10 L ed 2d 215, 83 S Ct 1194; *Powell v Wiman* (1961, CA5 Ala) 287 F2d 275; *Wiman v Powell* (1961, CA5 Ala) 293 F2d 605; *Brady v State* (1961) 226 Md 422, 174 A2d 167, affd 373 US 83, 10 L ed 2d 215, 83 S Ct 1194, all supra § 4[b].

&lt;&gt;

Defendant was not entitled to pretrial discovery of alleged confession made by his accomplice where record did not indicate prior inconsistent statement by accomplice existed, where no attempt was made to introduce any statement by accomplice during trial and only account before jury of what accomplice said had occurred came during his testimony at trial, and where defendant's counsel thoroughly cross-examined accomplice and had ample opportunity to question him concerning any alleged prior inconsistent statements. *McLaren v State* (1977, Ala App) 353 So 2d 24, cert den (Ala) 353 So 2d 35.

Prosecution was not required to supply defendant with grand jury testimony of participant in crime which incriminated defendant. *Sinclair v United States* (1978, Dist Col App) 388 A2d 1201.

Defendant was not entitled to discover statements made by codefendant to police; nondisclosure of fact that tip from confidential informant may have led to defendant's arrest was not prejudicial, even if exculpatory, where omitted evidence did not create reasonable doubt; defendant was not entitled to inspection of state's files on co-conspirators who had been acquitted, even assuming that files were public records, where cases were still under investigation for possible federal prosecutions. *Castell v State* (1983) 250 Ga 776, 301 SE2d 234 later app 252 Ga 418, 314 SE2d 210, cert den (US) 83 L Ed 2d 159, 105 S Ct 230.

Where notes of 30 hours of interviews with accomplice and key prosecution witness were destroyed by prosecution after preparation of eight page outline of witness' expected trial testimony, defendant was deprived of in camera inspection of notes to determine whether they contained substantially verbatim reports of witness' statements and trial court, rather than denying defendant's motion for discovery of notes, should have ordered their reconstruction by prosecution, and case would be remanded for preparation of reconstructed notes. *People v Szabo* (1983) 94 Ill 2d 327, 68 Ill Dec 935, 447 NE2d 193.

State did not withhold exculpatory evidence to prejudice of defendant when it notified defense of existence and contents of tape recorded conversation between two co-conspirators in which one co-conspirator implicated himself in a kidnapping and conspiracy to commit theft by threat but stated that he did not know that defendant was involved, when neither state nor its agents were in possession of tape recording. Further it did not appear, in light of other testimony that co-conspirator who made recorded statement did not know other defendants personally, that missing evidence was such as to create new reasonable doubt of guilt that did not otherwise exist. *People v Bolla* (1983) 114 Ill App 3d 442, 70 Ill Dec 118, 448 NE2d 996.

Generally, testimony of an accomplice should be highly scrutinized, and in order for such testimony to be admissible full disclosure of any agreements between accomplice and the state is required. *Aikins v State* (1983, Ind) 443 NE2d 820.

Trial court did not err in refusing to permit defendant to examine pretrial statements of government witnesses who were involved in criminal activity with defendant, where cross-examination of such witnesses fully brought out fact of their prior inconsistent statements, and critical issue upon which defendant sought prior statements was witnesses' credibility; moreover, statements were not favorable to defendant, and even assuming defendant was entitled to examine them, review of record did not disclose that he was prejudiced by denial of his motion for their production. *State v Lemon*, 203 Kan 464, 454 P2d 718.

Louisiana law does not require pretrial discovery of statements taken from potential witnesses; thus, defendant in arson prosecution was not entitled to copy of statement given to police by accomplice. *State v Curry*, 262 La 616, 264 So 2d 583.

Defendant was not entitled to inspection of statements of accomplices in possession of district attorney particularly where record reflected that able counsel for defendant presented their case well and suffered no prejudice or deprivation by being denied evidence which they sought. *State v Mitchell*, 258 La 427, 246 So 2d 814, cert den 404 US 1000, 30 L Ed 2d 553, 92 S Ct 561.

No prejudice to defendant was shown by state's failure to inform defendant of oral pretrial statement made by accomplice which was allegedly inconsistent both with a pretrial written statement given by witness as well as with his trial testimony when district attorney's office was unaware of oral statement and that it had been recorded until its existence was disclosed during trial, where upon prosecutor turned it over to defense and transcription was made, one day prior to witness taking stand in trial, defense did not request a trial recess in order to have additional time to study transcript, and tape was played for jury, which then had opportunity to note any inconsistencies between oral statement and witness' written statement and trial testimony. *State v Davis* (1983, La App) 430 So 2d 680, cert den (La) 433 So 2d 1056.

People could not, with impunity, prevent defendant's access to testimony of police informant who had also been active participant in criminal transaction. *People v Osorio* (1982, 1st Dept) 86 App Div 2d 233, 449 NYS2d 968, app dismd 57 NY2d 671, 454 NYS2d 77, 439 NE2d 886.

In prosecution for murder, defendant was not entitled under state statute to pretrial discovery of statement by defendant's companion who, although he was charged with same murder, was not a "co-defendant being jointly tried" but was testifying for the state under offer of immunity. *State v Lake* (1982) 305 NC 143, 286 SE2d 541.

In kidnapping and homicide prosecution, defendant had no right to compel discovery of prior statements and grand jury testimony by co-conspirator who was not co-defendant, having been granted immunity by state. *State v Nabozny* (1978) 54 Ohio St 2d 195, 8 Ohio Ops 3d 181, 375 NE2d 784, vacated on other grounds, *Nabozny v Ohio* (1978, US) 58 L Ed 2d 103, 99 S Ct 70.

General rule requiring production of pretrial statements consisting of verbatim notes of witness statements would not be extended to prosecutor's "scribbled" notes of conversation with accomplice, which had been discarded before trial and before defense demand for production. *Commonwealth v Wade* (1978) 480 Pa 160, 389 A2d 560.

State's attorney was not obliged to disclose to defense counsel anticipated change in accomplice's testimony where changes in original version did not alter basic story substantially, defense counsel had interviewed witness shortly before trial, and defense counsel had full opportunity to cross-examine witness on stand and to establish credibility of defense's alibi witnesses before jury. *State v Hamm* (SD) 234 NW2d 60.

[\*17] Police or investigation report; police record; investigation file 153

In some cases the defendant was permitted to inspect a report of an investigating officer or a fire marshal relating to the case.

In *People v Darnold* (1963) 219 Cal App 2d 561, 33 Cal Rptr 369, cert den 376 US 927, 11 L ed 2d 623, 84 S Ct 694, involving a request for inspection of a report of investigating officers, the court held that it was not error for the trial court to allow an inspection of only those portions of the report which related to the present indictment.

For cases permitting inspection of a police record where such document was used by the prosecuting attorney in his examination of the accused, see *State v Stephens* (1949) 168 Kan 5, 209 P2d 924, supra § 9[c], footnote 20, and *People v Brown* (1956) 2 App Div 2d 202, 153 NYS2d 744, supra § 9[c], footnote 18.

And in *State v Healey* (1965, NH) 210 A2d 486, involving a prosecution for arson and for murder, the court held that a

report of the state fire marshal containing his conclusions with respect to the cause and origin of the fire involved in the case could be made available to the defense by the trial court in its discretion with proper safeguards by excising or withholding any part which might unduly hamper the prosecution if given to the defendant in advance of trial.

◇

In the following cases, on the other hand, the court refused to permit the defendant to inspect a police or investigation report, a police record, or an investigation file which was made in connection with the case.

The defendant's contention that the trial court committed error in refusing to permit the examination by him of a police report which had been brought into the courtroom by the prosecution during the course of the trial was rejected in *State v Wallace (1965) 97 Ariz 296, 399 P2d 909*, where it appeared that during the cross-examination of a police officer testifying for the prosecution, the trial court, while permitting the defendant to examine those portions of a police report which were made by the officer,<sup>154</sup> denied the defendant's request to inspect the entire report. Stating that there is no reason why the rules governing pretrial discovery in criminal cases should not be applicable to discovery at or during the course of the trial, and noting that it had been specifically held in a number of instances that there was no right to inspect police reports which had not been offered in evidence, at least until there was some showing of relevancy, the court concluded that in the present case the defendant did not show good cause or any sufficient reason to require the prosecution to permit an inspection of the entire police record. The court recognized that even where the Arizona rule of criminal procedure providing for discovery and inspection of certain documents and objects is not applicable, the trial court has the inherent power to order discovery of documents and objects when the due administration of justice so requires.

In *People v Santora (1942) 51 Cal App 2d 707, 125 P2d 606*, it was held not error for the trial court to refuse to permit the defendant to examine a report made by a police officer relating to a conversation he had had with the complaining witness, the court pointing out that the report was confidential, was not admissible in evidence, and had not been used by the officer to refresh his recollection; and that the officer merely stated that such a report had been prepared, and that he had it in his possession.

In a prosecution for pandering, the defendants' motion for production of police records of call girls and their dispatcher, who had been used or employed by the defendants and who had been arrested for activities connected with prostitution, was held properly denied in *People v Wilkins (1955) 135 Cal App 2d 371, 287 P2d 555*, notwithstanding the defendants' allegation that such records were sought to obtain information which, if not admissible in evidence, they could use in the cross-examination of the girls and the dispatcher. The court noted that the files in law enforcement agencies relating to the apprehension, prosecution, and punishment of criminals are not subject to public inspection; that the code of civil procedure concerning inspection and discovery process does not apply to criminal proceedings; and that although the trial court in the present case requested the defendant to state the materiality of the records in question, the defendant did not do so, claiming that he had the right to see the records.

In *People v Chapin (1956) 145 Cal App 2d 740, 303 P2d 365*, a prosecution for grand theft, it was held proper to deny the production during the trial of reports made by police officers concerning the crime and statements made to the police by the victim of the theft and certain other persons connected with the place where the theft had occurred. (The court cited only *People v Wilkins (Cal) infra*.)

The trial court's refusal to allow the defendant to examine police reports was held not error in *People v Pearson (1957) 151 Cal App 2d 583, 311 P2d 927*. Pointing out that the reports had not been used by any witness, the court said that the refusal to permit their examination was proper.

In *State v Molinar (1962) 24 Conn Supp 160, 188 A2d 69*, a prosecution for speeding, the court, rejecting the

defendant's contention that it was error for the trial court to refuse to permit the defendant to examine the arrest sheet which was made by the arresting officer at the time of her arrest, said that the arrest sheet in question was a statement prepared by the arresting officer for the purpose of enabling the prosecuting attorney to perform the duties of his office, and that, therefore, the defense had no right to demand its production.

In *People v Turner* (1963) 29 Ill 2d 379, 194 NE2d 349, wherein it appeared that during direct examination of a police officer testifying for the prosecution, he was asked to produce, for examination by defense counsel, a copy of his report given to his superiors, but the prosecuting attorney objected to the request on the ground that such a report could be used for impeachment only, and defense counsel thereupon replied that he did not intend to impeach the officer, it was held that the trial court did not commit error in sustaining the prosecuting attorney's objection. Noting that the trial court may, in proper cases, order the production of such reports, but that the use of such documents is restricted to impeachments, the court pointed out that defense counsel disclaimed any intent to impeach the officer.

Reports of the offense made by police officers were also held not producible for inspection by the defendant in *Brown v State* (1959, Ind) 158 NE2d 290, the court following the decision in *Anderson v State* (1959) 239 Ind 372, 156 NE2d 384, supra.

The denial of the defendant's motion, made during the course of the trial, for production of "police reports written by such officers following statements made by the prosecuting witnesses" was upheld in *Anderson v State* (1959) 239 Ind 372, 156 NE2d 384. Commenting that if the prosecution was required to turn over to an accused the statements of all witnesses compiled in the preparation of a case, justice would be seriously frustrated, and noting that the protection afforded to persons charged with crime does not include a right to examine statements and reports contained in the working files of the prosecution, the court said that if the reports in question were a matter of public record they could have been examined by the defendant before trial or brought into court by subpoena, and that if they were not matters of public record but only a part of the information which constituted the prosecuting attorney's file in the case, then the defendant was not entitled to inspect such alleged "statements."

In *State v Hill* (1964) 193 Kan 512, 394 P2d 106, it was held (three members of the court dissenting) that a report of the Kansas Bureau of Investigation containing statements of a prosecution witness could not be produced for the defendant's inspection. The court observed that the report in question was made in the course of investigating the crime charged against defendant and thus in the pursuance of official duty; that a report of such nature is not one of a public character even though it was compiled by public officials, but it is made solely for the use of officers in solving the crime under investigation and in bringing to justice the persons responsible for its commission; that, no doubt, the report in the present case contained information of a confidential nature, the disclosure of which might have serious adverse effect on the future course of efficient law enforcement; and that the book and papers acquired by a county attorney in investigating infractions of the law are his quasi-private data, which are of no concern to anyone but himself unless and until, in his discretion, he reveals their contents in court.

In *State v Mattio* (1947) 212 La 284, 31 So 2d 801, cert den 332 US 818, 92 L ed 395, 68 S Ct 145, the denial of the defendant's pretrial motion for an order requiring the production of the police reports disclosing the result of the entire investigation of the case conducted by police officers, which were then in the possession of the district attorney and the superintendent of the police department, was upheld, the court rejecting the defendant's contention that police reports were public records which were subject to inspection by the public, within the contemplation of the Louisiana Public Records Act.

Relying on the rule that an accused is not entitled to have the prosecution furnish him, prior to trial, with the evidence which it intends to rely upon for his conviction, the court in *State v Haddad* (1952) 221 La 337, 59 So 2d 411, held that the defendant was not entitled to pretrial inspection of police reports in the hands of the police department or the district attorney. Holding to the same effect are *State v Simpson* (1949) 216 La 212, 43 So 2d 585, cert den 339 US 929, 94 L ed 1350, 70 S Ct 625, and *State v Martinez* (1952) 220 La 899, 57 So2d 888, cert den 344 US 843, 97 L ed 656, 73 S Ct 58.

The prosecution's objection to the issuance of a writ of subpoena duces tecum which was applied for by the defendant for the production of the records of certain police stations for the stated purpose of proving that the defendant was incarcerated in several district police stations after his arrest and that numerous other men were being held at that time on suspicion for the same crime was held properly sustained in *State v Michel* (1954) 225 La 1040, 74 So 2d 207, affd 350 US 91, 100 L ed 83, 76 S Ct 158, reh den 350 US 955, 100 L ed 831, 76 S Ct 340, cert den 355 US 879, 2 L ed 2d 109, 78 S Ct 144, the court stating that the records sought to be subpoenaed were not material, because they were wholly irrelevant to the question of the defendant's guilt or innocence, and that if they could be considered as public records, they were clearly excepted from the provisions of the Louisiana Public Records Act, and were not subject to inspection until they were used in open court.

In *Commonwealth v McCann* (1950) 325 Mass 510, 91 NE2d 214, the denial of the defendant's request to see the report made by a police officer who, at the request of the district attorney, had conducted an investigation of those who had been summoned as jurors was upheld. The court pointed out that the defendant's counsel had no evidence indicating that the rights of the defendant were in any way prejudiced by the investigation, and he apparently accepted as true the statement of the district attorney that the police officer did not approach or talk with any prospective jurors; that a list of those who had been summoned as jurors was available to counsel; that each juror before his selection had been examined under oath by the judge and had answered that he was not conscious of any bias or prejudice.

The denial of the defendant's request for production of a police report concerning the crime charged against him was held not error in *State v Cochran* (1963, Mo) 366 SW2d 360, cert den 375 US 981, 11 L ed 2d 426, 84 S Ct 492, the court pointing out that the defendant's attorney said that he wanted to use the report for impeachment of witnesses, but also frankly admitted that "the report would not impeach the credibility of the witnesses"; and that while a case relied on by the defendant involved a police report which was used by a police officer to refresh his memory, there was nothing in the present case to show a use of the report to refresh the memory of any witness, and no witness was even asked if he had ever seen the report.

Where, during the examination of a prosecution witness in a prosecution for murder, defense counsel requested permission to examine certain police reports or records relating to surveillance by police officers of one of the defendants, which documents were then in the possession of an assistant district attorney, but the trial court denied the request, it was held in *People v Buchalter* (1942) 289 NY 244, 45 NE2d 425, that the trial court's ruling was correct upon the facts presented. Following the decision in *People ex rel. Lemon v Supreme Court of State of New York* (1927) 245 NY 24, 156 NE 84, 52 ALR 200, supra § 10[a], the court pointed out: "The so-called surveillance amounted to very little. It was of the entrance and lobby of the office building and not of the floor upon which defendant Buchalter had his office. The reports established that the defendant could and did elude the police at will."

See also *Mulry v Beckmann* (1947) 188 Misc 648, 69 NYS2d 43, affd 272 App Div 780, 69 NYS2d 519, where the court denied an application for an order directing the police commissioner of a certain county and his assistant to permit an accused's attorney to inspect and examine the police blotter, teletype messages, radiograms, and reports pertaining to the offense allegedly committed by the accused. Stating that there was no difference between the police records in question and papers and records in the possession of a district attorney, and noting that documents and memoranda in the possession of the district attorney are not subject to inspection by a defendant where they are not themselves admissible in evidence, the court pointed out that the contents of the documents sought in the present case were not admissible in evidence against the accused.

In *State v Goldberg* (1964) 261 NC 181, 134 SE2d 334, cert den 377 US 978, 12 L ed 2d 747, 84 S Ct 1884, the denial of the defendants' petition for production, before trial, of the reports of the investigation conducted by the state bureau of investigation in connection with the present prosecution was upheld on the ground that the defendants had not shown facts which would have warranted the trial court in entering an order allowing them to inspect the files of the state bureau of investigation as prayed in the petition. The court pointed out that the defendants were not seeking an

inspection of any documents or articles which formed the basis of the charges against them and which were admissible in evidence, as, for example, where a defendant charged with forgery requested an inspection of the alleged forged document, but they were seeking an order permitting them before trial to go on a word-by-word and line-by-line and unlimited voyage of discovery through the files of the state bureau of investigation in respect to the present cases, without any allegation on their part that anything therein was the basis of the charges against them and was admissible in evidence against them, and in the fervent hope that something might turn up to benefit them or that thereby they might obtain an inspection of the prosecution's evidence. Stating that, in brief, the defendants contended that they had an unqualified right to an inspection of all papers and documents, if any, in the files of the state bureau of investigation in the present case, the court noted that in the absence of statutes or rules of practice providing otherwise, a defendant was not entitled under such circumstances to an order of inspection, and that the burden of showing facts justifying inspection before trial was on the moving party. The court also rejected the defendants' contentions that in order to prepare a defense against the charges in the present prosecution, they were entitled to examine the reports by the statute providing that all records and evidence collected and compiled by the director of the state bureau of investigation and his assistant might be made available to the public upon an order of a court of competent jurisdiction. Similarly, the court rejected the argument that the trial court's refusal to make such reports available to the defendants amounted to a violation of their rights guaranteed by the state and federal constitutions. The court observed that the statute relied on gave to a defendant no unqualified right to an order permitting him an inspection of all records and evidence collected and compiled by the state bureau of investigation in a criminal case pending against him, nor was there any statute in North Carolina that gave such a right to a defendant in a criminal case.

In *Commonwealth v McCarter* (1956) 385 Pa 236, 122 A2d 714, the defendant's contention that the prosecution should have turned over to him the official reports made by the state police was rejected, the court pointing out that the record showed that the trial court granted defense counsel permission (of which they did not avail themselves) to examine the original notes taken by a state police officer when he had interviewed the defendant.

The trial court's refusal to permit the defendant to examine an offense report was held not error in *Sirvello v State* (1958) 166 Tex Crim 572, 316 SW2d 753, where the report had not been used by a prosecution witness while on the stand to refresh his memory, nor was it exhibited in the presence of the jury, but it was first mentioned by defense counsel when he inquired whether it substantiated the testimony of a police officer.

In *Erwin v State* (1961) 171 Tex Crim 323, 350 SW2d 199, the court, relying on the rule that the defendant's right to see a document or writing does not obtain when such document is not used by the prosecution before the jury in some way so as to make the contents thereof an issue, upheld the trial court's refusal to require a police officer to furnish a copy of a written report concerning the arrest of the defendant and setting out some of the details of the case. The court pointed out that the officer did not have the report in his possession nor was he using any notes or memoranda therefrom, and that his only statement concerning the report was that it was seen by him after its completion and that it was "fixed up" by him and another officer.

For other cases wherein the court also refused to permit the defendant to inspect a document of the kind under consideration, see the following:

<>

In prosecution for murder, prosecution's failure to produce police report and teletype relating to the murder, which "was in all probability unlawfully withheld by the prosecution," was not reversible error where jury was nonetheless able to hear and evaluate exculpatory information contained in the report, and the information was cumulative at best. *Fulford v Maggio* (1982, *CA5 La*) 692 *F2d* 354, revd 422 *US* 111, reh den (US) 77 *L Ed 2d* 1451, 104 *S Ct* 29 and on remand (*CA5 La*) 715 *F2d* 162.

See *Gorham v Wainwright* (1979, *CA5 Fla*) 588 *F2d* 178, § 4[b].

Defendants in murder prosecution were not entitled to discovery of report of police officer as to description of suspects sought, where officer did not testify as witness, and report did not indicate whether descriptions of suspects set forth therein were based on statements made to him by prosecution witness or on statements made by other persons, or upon some composite. *U. S. ex rel. Durso v Pate* (*CA7 Ill*) 426 *F2d* 1083, cert den 400 *US* 995, 27 *L Ed 2d* 445, 91 *S Ct* 469.

See *Smith v State*, 282 *Ala* 268, 210 *So 2d* 826, § 22[e].

First-degree escape defendant who manifested psychotic-like behavior had no right to discover for impeachment purposes criminal records of unannounced prosecution witness. *Bailey v State* (1982, *Ala App*) 421 *So 2d* 1364.

Robbery defendant had no right to pretrial discovery of statements given by victim, an anti-robbery task force undercover officer equipped with body transmitter. And defendant had no right to compel district attorney to identify and produce the whereabouts of any witness or witnesses who allegedly were eye witnesses to incident in question. *Allen v State* (1982, *Ala App*) 414 *So 2d* 163.

Defense counsel's request for access and right to copy "all reports, police notations, photographs, witness statements, and all documents contained in the file," made after testimony by investigator indicated witness was using some notes in file to refresh his recollection, was properly denied in prosecution for receiving stolen property where defense had opportunity for pretrial discovery, and where target of the defense motion was much larger than combination of text and context of any information used by witness to refresh his recollection. *Johnson v State* (1981, *Ala App*) 398 *So 2d* 393.

Criminal defendant was not entitled to discovery of investigator's work product from interview with defendant despite contention that report contained statements of defendant. *McCorvey v State* (*Ala App*) 339 *So 2d* 1053, cert den (*Ala*) 339 *So 2d* 1058.

Trial court properly denied motion for production of all notes, affidavits, statements, and reports made or collected by investigating authorities, as well as FBI report, where none of such reports or notes included any statement by accused, and FBI report was only summary, in narrative form, of interviews with various witnesses. *Mitchell v State*, 50 Ala App 121, 277 So 2d 395, cert den (Ala) 277 So 2d 404.

Notes or memoranda personally compiled by law enforcement authorities in course of their investigation, even if they include notes of conversations with accused, constitute work product of state and are privileged from pretrial discovery. *Cooks v State*, 50 Ala App 49, 276 So 2d 634, cert den 290 Ala 363, 276 So 2d 640.

Prosecution was under duty to disclose to defense police reports containing information used on cross-examination by state to impeach accused's alibi witnesses where defense obtained continuing discovery order for all police reports containing statements of persons with relevant information. *Stevens v State* (1978, Alaska) 582 P2d 621.

Trial court erred in refusing to permit disclosure to defendant of police reports on prosecution witnesses' activities as undercover drug informer where such reports were relevant, although unrelated to crime for which defendant was being tried, in that they showed that witness was deeply involved in working for police, which would create material inference that he might be biased in favor of prosecution. *Braham v State* (1977, Alaska) 571 P2d 631.

In prosecution for sale of various narcotics, trial court abused its discretion in denying defendants' motion for production of "non-drug" expense logs of undercover officers involved where defendants asserted defense of entrapment and where defendants sought to show that quantities of money and gifts and purchases in kind were given to defendants and others during course of officers' investigation for purpose of procuring and inculcating defendant's friendship. *Batson v State* (1977, Alaska) 568 P2d 973.

Court order for inspection of all written statements by defendants or witnesses and all oral statements by informer or defendants did not include investigative officer's report or those portions of report dealing with statements made by defendants in course of offense. *State v Doty*, 110 Ariz 348, 519 P2d 47.

Court may not permit defense to examine work product of law enforcement authorities except upon showing that either (1) authorities have sought to subvert otherwise valid discovery by alleging that material is privileged under work product exclusion, or (2) compelling and exceptional circumstances indicate to court that to deny discovery would materially prejudice defendant in preparation of defense. *State v Fassler*, 108 Ariz 586, 503 P2d 807.

Trial court erred in granting motion to produce all police reports pertaining to investigation of defendant, since reports compiled by law enforcement authorities in course of investigation constitute work product of state and are, as such, privileged from discovery except upon showing, inter alia, of compelling and exceptional circumstances indicating that denial of discovery would materially prejudice defendant in preparation of his case; thus, even though compelling and exceptional circumstances were present in instant case where identification was material factor, nevertheless this was not sufficient to compel discovery of records otherwise privileged, and court should have examined police reports in camera and ordered production of only those parts relevant to identification. *State ex rel. Berger v Superior Court of County of Maricopa*, 105 Ariz 473, 467 P2d 61.

In prosecution for murder, defendant could not obtain inspection of police reports, notwithstanding reports were by police officers whom state intended to call as witnesses, such reports being excluded as work products. *State ex rel. Corbin v Superior Court of Maricopa County*, 99 Ariz 382, 409 P2d 547.

Demand by defendant in rape prosecution in form of blanket request that, in effect, prosecution turn over to defense counsel all statements it had was properly denied. *Ballard v Superior Court of San Diego County*, 64 Cal 2d 159, 49 Cal Rptr 302, 410 P2d 838.

See *Pitchess v Superior Court of Los Angeles County*, 11 Cal 3d 531, 113 Cal Rptr 897, 522 P2d 305 (police investigation file), § 5[a].

In burglary prosecution it was not abuse of discretion to deny discovery of "rap sheet" of eyewitness, which record might contain information regarding arrests or detentions of witness for burglaries having modus operandi common to offense for which defendant was charged, where there were no facts warranting reasonable belief witness committed present offense. *Hill v Superior Court of Los Angeles County*, 10 Cal 3d 812, 112 Cal Rptr 257, 518 P2d 1353.

See *Carruther v Municipal Court for Long Beach Judicial Dist. (1980, 2d Dist)* 110 Cal App 3d 439, 168 Cal Rptr 33, § 16[a].

In prosecution for indecent exposure by maintenance worker to two minor females in juvenile hall in which defendant sought, among other relief, discovery of victims' complete juvenile records for purposes of cross-examination, trial court properly denied what amounted to overbroad discovery request; defendant's interest in obtaining information to aid in effective cross-examination furnishes standard by which to measure limitations on principal of confidentiality of juvenile records. However, without further showing, defendant would appear entitled to victim's juvenile "rap sheets." *Foster v Superior Court of Santa Clara County (1980, 1st Dist)* 107 Cal App 3d 218, 165 Cal Rptr 701.

On motion by defendant charged with attempted murder of policeman and other crimes, for discovery of official records concerning prior conduct of two police officers and federal agent who, defendant alleged, utilized illegal tactics and excessive force and violence in executing search warrant on him, trial court erred in denying motion insofar as records sought were in possession or under control of prosecution, and in requiring defendant to attempt to secure records by subpoena duces tecum, where declaration supporting motion and motion itself described requested information with sufficient specificity and where it was sustained by plausible justification. *Saulter v Municipal Court for Oakland-Piedmont Judicial Dist. (1977)* 75 Cal App 3d 231, 142 Cal Rptr 266.

In prosecution for interfering with officer in performance of his duties, defendant was entitled to have all evidence relating to skirmish between him and arresting officers and of any physical resistance offered by him at time of his detention and arrest suppressed where police department of one arresting officer refused to turn over records deemed by trial court to be pertinent to defendant's attempt to show that two arresting officers had propensity to use excessive force and that any force which defendant may have used was used in self-defense, where people's case was predicated upon scuffle which took place when officers attempted to subdue defendant and where officers acted in concert and their actions were inextricably intertwined. *M. v Superior Court of Los Angeles County (1977)* 70 Cal App 3d 782, 139 Cal Rptr 149.

In order for police officer, who was complaining witness in criminal prosecution, to successfully invoke attorney-client privilege so as to protect from disclosure statements made by him to representatives of police department acting primarily as agents of city attorney, he had to demonstrate that professional attorney-client relationship existed between himself and city attorney's office, that communications were made in course of relationship, and that communications were intended to be confidential; where statements were made by officer to police department investigators who were assisting city attorney in preparing defense to possible civil action against officer, statements were not privileged and were subject to disclosure. *Gonzales v Municipal Court for Judicial Dist.*, 67 Cal App 3d 111, 136 Cal Rptr 465.

In prosecution for assault in which alleged victim was off-duty police officer and in which self-defense was raised, defendant was entitled to discovery of information in officer's personnel file pertaining to citizen complaints against him for alleged acts of unwarranted aggressive behavior, violence, or excessive force. *People v Superior Court of Santa Clara County*, 62 Cal App 3d 853, 133 Cal Rptr 440.

In prosecution for assaulting and obstructing police officer, defense counsel was entitled to names of witnesses who had

made allegations of use of excessive force even though municipal court, after in camera examination of police records sought by defendant in support of claim of self-defense, had declared that there was nothing in either officer's file showing propensity for violence and no material relevant to offense charged or to self-defense, where in camera examination was improper absent prosecutor's claim of privilege and defense request served as withdrawal of acquiescence in such examination. *Long v Municipal Court for Oakland-Piedmont Judicial Dist.*, 58 Cal App 3d 382, 128 Cal Rptr 918.

In prosecution for battery on police officer and obstructing officer in performance of duty, defendants, who claimed self-defense, were entitled to obtain information from police department records concerning propensity of officers involved to use excessive force, aggressive conduct, or violence where, even though defense did not point to any specific prior acts of violence, where records desired to be examined were identified by defense with reasonable particularity and pertinence to defense of requested information was demonstrated. *Caldwell v Municipal Court for Oakland-Piedmont Judicial Dist.*, 58 Cal App 3d 377, 129 Cal Rptr 834.

In prosecution in juvenile court alleging that minor had committed battery against two police officers, trial court erred in denying defendant's motion for pre-trial discovery of records involving all persons who had filed complaints against officers involved for unnecessary acts of aggressive behavior, excessive force, or for acts demonstrating racial prejudice where, although defendant could not identify exact content of material sought, she could identify type of material desired and where officer's disciplinary records would be relevant and admissible under evidence code and it was apparent that defendant could not readily obtain information through her own efforts. *In re Valerie E.*, 50 Cal App 3d 213, 123 Cal Rptr 242.

Prosecution should be required, on request, to obtain, and make available to defendant, felony conviction records of prosecution witnesses; moreover, in assault and murder prosecution in which defendant claimed self-defense, prosecution was required to produce, if available, any information concerning arrests for specific acts of aggression by alleged victims. *Engstrom v Superior Court of Alameda County*, 20 Cal App 3d 240, 97 Cal Rptr 484.

Discovery order relating to production of all statements, written, or otherwise transcribed in writing of endorsed or material witnesses did not include offense report, interdepartmental police report and interdepartmental letter. *People v Morgan (Colo)* 539 P2d 130.

See *People v Maestas (Colo)* 517 P2d 461, § 16[a].

Although police records were not public records, and thus were not open to inspection, information therefrom with respect to traffic or other convictions of prospective jurors, which was regularly supplied to district attorney's office for trial use, should have been made available on request to public defender's office and other defense attorneys. *Losavio v Mayber (Colo)* 496 P2d 1032.

In prosecution for conspiracy to commit murder, trial court did not abuse its discretion in denying defense access to file of sealed police reports concerning statements made by co-conspirator turned informant due to grant of immunity, where trial court correctly concluded that reports had no relevance to issues in case. *People v Goetz (1978, Colo App)* 582 P2d 698.

See *State v Davis (1978)* 175 Conn 250, 397 A2d 1347, § 11.

Refusal of trial court to inspect in camera lengthy investigative report made for chief of police regarding interdepartmental matters to determine (a) whether document contained statement by chief inconsistent with testimony that he had no opinion as to character of arresting officers for excessive violence or (b) presence of exculpatory material as to credibility of arresting officers was proper, where in first instance defendant's counsel never determined from chief of police whether report contained his prior statement and in second instance defendant was not prejudiced by court's

refusal as counsel vigorously pursued officer's capacity for violence by producing array of witnesses and determination as to whether officers employed excessive force in effecting arrest was irrelevant to issue of defendant's guilt. *State v Clemons*, 168 Conn 395, 363 A2d 33.

Trial court properly quashed subpoena seeking all search warrants for premises upon which crime occurred for two and one-half year period prior to crime where, even if records showed that apartment was notorious house of prostitution and drug distribution point, it would be mere speculation to conclude from that history that someone other than defendants had been present at specific time of crimes alleged. *Turner v United States* (1982, Dist Col App) 443 A2d 542.

Due process, as elaborated in Brady and subsequent case law, requires at-trial production of impeachable convictions of government witnesses, at least to extent of government's knowledge about them; government, and thus its prosecutorial agent, is deemed to know about all prior convictions of government witnesses which happen to be listed in government's records accessible to prosecution. *Lewis v United States* (1978, Dist Col App) 393 A2d 109, on reh (Dist Col App) 408 A2d 303.

Subpoena of police personnel files of officers to look for material indicating prior violent acts of officers for use as evidence that they might have been aggressors and for information about promotions or investigations of weapon firings that might show officer had motive for perjury was properly quashed as nothing more than fishing expedition where defendant did not proffer any reason to believe that either of two types of material would be found and refused offer of trial judge to inspect files in camera. *Cooper v United States* (Dist Col App) 353 A2d 696.

Trial court properly denied defense request for discovery of complete police investigative report concerning crime in question where other disclosures, including some not mandated by statute, were made to defense and defendant had benefit of all relevant information. *Perry v State* (1980, Fla) 395 So 2d 170.

Prosecuting attorney may be required to disclose to defense counsel any record of prior convictions of defendant or of persons whom prosecuting attorney intends to call as witnesses, if such material and information is within his possession; however, if this information is not in his possession, prosecutor is not required to secure it for defense counsel. *State v Crawford* (Fla) 257 So 2d 898.

Trial judge did not err in denying defense motion for discovery of police reports or in camera inspection of same when defense was able to depose officers who allegedly recorded statement by victim that was substantially verbatim as to description of robber, defense thoroughly explored discrepancies between victim's deposition and trial testimony as to her description of robber, police officer testified as to description of robber originally given him by victim, and discrepancies among descriptions of robber given by victim were minor and evidence of guilt was great. *Whiddon v State* (1983, Fla App D1) 431 So 2d 290, petition den (Fla) 438 So 2d 834.

Where police officer at deposition inadvertently gave defense erroneous information as to statements that defendant had made after arrest, and police report which contained true statements was not presented to defense despite discovery request until officer was testifying at trial, court correctly allowed officer to testify and offered defense recess to examine report. *Wright v State* (1983, Fla App D1) 428 So 2d 746, ctd ques ans, approved (Fla) 446 So 2d 86.

See *Lockhart v State* (1980, Fla App D4) 384 So 2d 289, § 11[c].

In robbery prosecution, trial court erred in not allowing defendant to discover police reports containing descriptions of perpetrator given by victims and alleged to contain verbatim recitals of discoverable contemporaneous oral statements, but such error was harmless when viewed in context of entire weight of evidence. *Black v State* (1980, Fla App D1) 383 So 2d 295.

In prosecution for resisting arrest defendant was not entitled to pretrial production of statements by officer defendant was accused of striking, made at hearings during intra-departmental investigation of officer's conduct; where trial court conducted in-camera inspection of requested materials after police officer testified at trial, trial court fully protected defendant's right to impeachment and access to "Brady" material. *Jackson v State (1979, Fla App D3) 369 So 2d 1029.*

Police reports, although not normally discoverable, should have been made available to defendant where officers writing reports were eyewitnesses to incident. *Miller v State (1978, Fla App D2) 360 So 2d 46.*

It was reversible error for trial court to refuse defendant's discovery of state's file on third party where warrant had been issued for third party's arrest on charges which were similar to those filed against defendant, and defendant claimed that he was "conned" by said third person in purchasing stolen motor vehicle. *Briskin v State (Fla App D3) 341 So 2d 780.*

Defendant is properly allowed discovery as to criminal records of state's witnesses to extent that information is in actual or constructive possession of the state and is not limited to that in physical possession of state attorney's office and may receive data obtainable from FBI; however, where demand for FBI report sheet on victim was not available when defendant requested it, trial court did not err in denying defendant's motion. *Yanetta v State (Fla App) 320 So 2d 23.*

Defendant's motion for discovery of criminal records of all prosecution witnesses was properly granted, and not only as to records in actual possession of prosecutor, but all records in constructive possession of or available to State of Florida through its ability to obtain such data by virtue of its being a party to compact or agreement with FBI, and through its direct connection with law enforcement agencies throughout the state. *State v Coney (Fla App) 272 So 2d 550.*

See *Darrigo v State (Fla App) 243 So 2d 171*, § 13[d].

Trial court in manslaughter prosecution arising out of automobile accident in which guest passenger in defendant's car was killed did not abuse discretion in ordering pretrial discovery of traffic homicide report prepared by investigator for Florida highway patrol and filed with state's attorney. *State ex rel. Duncan v Crews (Fla App) 241 So 2d 754.*

No Georgia statute or rule of practice requires district attorney to open his files to attorney for accused, nor is accused entitled, as matter of right, to receive copies of police reports and investigation reports made in course of preparing case against accused. *Pass v State, 227 Ga 730, 182 SE2d 779.*

Court in rape prosecution properly denied defendant's request for copies of all reports made by investigating officers and members of district attorney's staff; for list of witnesses who appeared before grand jury or who would appear in trial of case; and for copy or transcript of evidence taken in preliminary hearing. *Cummings v State, 226 Ga 46, 172 SE2d 395.*

Trial court properly refused to afford defendant's counsel opportunity to examine state's files as to reports, photographs, statements, and findings of investigating officers. *Manor v State, 225 Ga 538, 170 SE2d 290.*

Where, when defendant raised the issue immediately prior to trial of whether state had complied with notice to produce and two subpoenas relating to documents and records relevant to theft prosecution, state informed her and court that relevant records were then available, but defendant apparently did not take advantage of the opportunity to review them, there was no denial of defendant's right to discovery. *Johnston v State (1983) 165 Ga App 792, 302 SE2d 708.*

In criminal prosecution defendant was not entitled as matter of right to receive copies of police report and investigative report made in preparing case against him, and even if motion by defendant for disclosure by prosecution of exculpatory evidence had been granted, defendant would not have had right to examine notes used by police officer in refreshing his memory before completion of officer's testimony against defendant. *Jones v State (1980) 155 Ga App 926, 274 SE2d 1.*

See *Tankersley v State* (1980) 155 Ga App 917, 273 SE2d 862, § 22[a].

See *Carter v State* (1979) 150 Ga App 119, 257 SE2d 11, § 11.

In rape prosecution, trial court did not err in failing to compel district attorney to comply with notice to produce and motion for discovery where court held in camera inspection and found no exculpatory material; while state may not suppress evidence favorable to defendant, there is no constitutional or statutory requirement that state must make available to defendant all investigatory work, files, or police reports. *Watson v State* (1978) 147 Ga App 847, 250 SE2d 540.

In prosecution for possession and sale of cocaine, trial court did not err in refusing to order police officer to permit defense counsel to examine all notes in his file where court made in camera inspection of documents in officer's file and ordered officer to furnish to defense anything officer had used on direct examination to refresh his recollection, and defense counsel was then permitted to cross-examine officer regarding these materials. *Sprague v State* (1978) 147 Ga App 347, 248 SE2d 711.

Trial court in prosecution for attempted murder did not err in failing to compel state to produce copies of police reports where they were equally available to defense as to prosecutor through police and where defendant failed to show that evidence had been withheld that was materially favorable to his case. *Allanson v State* (1978) 144 Ga App 450, 241 SE2d 314.

In prosecution for aggravated assault with deadly weapon, trial court properly denied defendant's request for copy of investigative officers' memoranda pertaining to prosecution witnesses where defendant was not entitled as matter of right to receive copies of police reports and where trial court kept investigative file before it during trial for purpose of bringing to defense counsel's attention any departure between summaries of verbal statements given to police and testimony at trial. *Barker v State* (1977) 144 Ga App 339, 241 SE2d 11.

In prosecution for possession and sale of narcotics, trial court did not err in denying defendant's motion for discovery and to compel disclosure of FBI files on state witness, a nonresident police officer assigned to a state police unit, although it was asserted that FBI report would have indicated arrest for "phony drug bust" where evidence which defendant sought concerning this "phony drug bust" was elicited during trial, in part by prosecution, and where evidence was not in prosecutor's file. *Davis v State* (1977) 143 Ga App 329, 238 SE2d 289.

Criminal defendant was not entitled as matter of right to receive copies of police reports and investigation reports made in course of prosecution where there was no showing of suppression of evidence or that the denial of such information impaired defense sufficiently to deny defendant a fair trial. *Lundy v State*, 139 Ga App 536, 228 SE2d 717.

Police records concerning any and all citizen complaints of official misconduct including excessive force or overbearing conduct by arresting officer and records of any and all incidents which may have reflected moral turpitude of such officer were not absolutely privileged and immune from discovery in prosecution for assault, and any claim of privilege should be subject to in camera proceeding in trial court. *Nakagawa v Heen* (1977, Hawaii) 568 P2d 508.

Accused in criminal prosecution is entitled to obtain police reports through subpoenas duces tecum prior to preliminary hearing but subsequent to charging of accused, the court's discovery rules may not, without substantial reason, limit a criminal party's access to court's compulsory process; thus, discovery rules do not deprive public defender from seeking police reports through subpoenas prior to preliminary hearing. *People ex rel. Fisher v Carey* (1979) 77 Ill 2d 259, 32 Ill Dec 904, 396 NE2d 17.

Statute prohibiting publication of arrest records of juveniles should not have been construed to deny defendant access to such records respecting juvenile who testified as witness in criminal prosecution where objective sought was to impeach

such witness by showing possible motive for testifying falsely. *People v Norwood*, 54 Ill 2d 253, 296 NE2d 852.

See *People v Flowers*, 51 Ill 2d 25, 281 NE2d 299, § 16[a].

See *People v Smith* (1982) 111 Ill App 3d 895, 67 Ill Dec 565, 444 NE2d 801, § 4[b].

Since in event of defendant's conviction in misdemeanor prosecution he could be incarcerated only in facility less restrictive than penitentiary, he was not entitled to discovery of missing page from police officer's report under discovery rule applying only in criminal cases permitting incarceration on conviction in penitentiary, and since police witness whom defendant sought to impeach by missing page of report testified he had not prepared or signed report, defendant was not entitled to disclosure of missing page under discovery rule requiring state to furnish defendant in misdemeanor case evidence negating defendant's guilt. *People v Spain* (1980) 91 Ill App 3d 900, 47 Ill Dec 451, 415 NE2d 456.

In prosecution for unlawful delivery of controlled substance, defendant was not prejudiced by state's failure to produce one-page supplemental police report and other report relating to earlier offense prior to trial, where defendant received supplemental report during trial and defendant's strategy to show improbability of making a drug sale to officer three months after same officer arrested him was rendered inapplicable by showing that officer had not made actual prior arrest but had been listed on report in order to receive credit for undercover work. *People v Ojeda* (1980) 91 Ill App 3d 723, 47 Ill Dec 40, 414 NE2d 1156.

In prosecution for burglary of gas station, in which police officer testified that he had observed defendant drive by station on night in question and at time that garage door to gas station was observed to be open, prosecution committed prejudicial error in failing to provide officer's report as part of discovery, where officer was only non-codefendant witness to place defendant at scene of crime, and jury, in disregarding alibi defense, could have placed great weight on such testimony. However, supreme court rules specifying material to be disclosed in prosecutions did not require disclosure of psychiatric report of state witness. *People v Wilken* (1980) 89 Ill App 3d 1124, 45 Ill Dec 489, 412 NE2d 1071.

See *People v McInnis* (1980) 88 Ill App 3d 555, 44 Ill Dec 120, 411 NE2d 26, § 13[a].

In armed robbery and aggravated battery prosecution during which defense, pursuant to discovery statute, requested disclosure of any record of prior criminal convictions suffered by potential prosecution witnesses, trial court erred by requiring defense counsel to elicit from prosecution's own witnesses such necessary information as birthdates and social security numbers before compelling state to conduct records check; however, such error was harmless where record revealed that at various points during trial records check was in fact accomplished and where defense failed to show prejudice by procedure that was followed. *People v Higgins* (1979) 71 Ill App 3d 912, 28 Ill Dec 173, 390 NE2d 340.

See *People v Keith* (1978) 66 Ill App 3d 93, 22 Ill Dec 847, 383 NE2d 655, § 11.

Where defendant was arrested for possessing small amount of narcotics during lawful execution of residential search warrant, and where defendant sought disclosure of certain police reports which he felt might demonstrate that residence searched had reputation as distribution center for narcotics, trial court did not abuse discretion in refusing disclosure of such reports since reputation of residence was not relevant to question of whether defendant was guilty of possessing heroin, nor did reputation have any bearing on legality of searches. *People v Boykin* (1978) 65 Ill App 3d 738, 22 Ill Dec 614, 382 NE2d 1369.

Failure of prosecution to furnish defense with criminal record and pending criminal cases against certain witnesses was not sufficient to create reasonable doubt of defendants' guilt in murder prosecution where no criminal charges were pending against witnesses in question at time of trial and only information regarding juvenile proceedings against

witnesses concerned truancy and neglect. State's failure to produce police report likewise did not deny defendants fair trial where police report did not concern officer's testimony in case and where search of police files failed to locate report. *People v Veal* (1978) 58 Ill App 3d 938, 16 Ill Dec 188, 374 NE2d 963.

Trial court did not err in refusing to permit pretrial discovery of police report. *People v Thomas* (Ill App) 267 NE2d 703.

See *People v Crawford*, 114 Ill App 2d 230, 252 NE2d 483, § 5[a] (citing annotation).

"General and all-encompassing" motion by defendant in murder trial requesting (1) grand jury minutes with regard to statement allegedly made by defendant and accomplice, (2) memoranda of state interviews with several persons concerning the shooting, (3) reports of police and detective investigations and statements received thereby, (4) information pertaining to arrest of accomplice, (5) and "any other items, photographs, laboratory reports, statements and documents," was properly denied. *People v Lighting*, 83 Ill App 2d 430, 228 NE2d 104.

There was no ground for reversal where entire police file was made available to defense counsel and then turned over to court to be kept until needed, but through some inadvertence file was lost and not used at trial. *People v Cook*, 78 Ill App 2d 219, 222 NE2d 13.

Refusal to show defense attorney police reports prior to trial was not error. *People v Whitehead*, 68 Ill App 2d 488, 216 NE2d 237, revd on other grounds, 35 Ill 2d 501, 221 NE2d 256.

Where page of police report contained name and address of unknown witness in addition to investigating police officer's recollection of witness' observations, but there was nothing in record to show whether defendant had knowledge of missing page, defendant would be accorded evidentiary hearing to determine issue of whether he did or did not have knowledge of missing page. *People v Murphy* 46 Ill App 3d 940, 5 Ill Dec 269, 361 NE2d 592.

State was not required to produce police record of prospective witness where such witness was a minor, and his record was prohibited from publication by statute. *People v Norwood*, 5 Ill App 3d 130, 283 NE2d 256.

In prosecution for two of six rapes known locally as the "Southside rapes," denial of pretrial motion for discovery of all reports made by four law enforcement agencies concerning related rapes was not abuse of discretion despite defense contention information could have shown that four other rapes were committed by someone other than defendant, making it less likely that he committed two rapes with which he was originally charged, where such contention was mere conjecture, and state had interest in maintaining confidentiality with respect to on-going police investigation. *Williams v State* (1981, Ind) 417 NE2d 328.

Defendant was entitled to discovery of scale diagram of tavern in which murder occurred, which was prepared by police, where after offense and prior to trial, tavern had changed hands twice and interior had been rearranged and redecorated. *Sexton v State* (Ind) 276 NE2d 836.

"Miscellaneous crime report" made by investigating officer should have been produced in response to defendant's request for production of all memoranda and reports bearing upon his guilt or innocence. *Hancock v State* (Ind App) 345 NE2d 244.

Trial court's order requiring state to produce copies of police reports in murder prosecution was abuse of discretion; approval of such procedure would unreasonably and unnecessarily impede investigatory process, thereby depriving state of fair trial. *State v Eads* (Iowa) 166 NW2d 766 (citing annotation).

While accused is not entitled to unrestricted examination of police records, where there were radio calls for help and

large number of police officers involved in arrest for breaking and entering, captured accomplice refused to testify, and driver of car that brought accused to scene was never found, court should have determined in presence of county attorney and defense counsel whether there was anything germane to issue of entrapment on tape made of police radio calls, and if so, it should have been made available to accused for appropriate use. *State v White (Iowa) 151 NW2d 552*.

See *State v Schlicher (1982) 230 Kan 482, 639 P2d 467*, § 11.

See *State v Watie (1978) 223 Kan 337, 574 P2d 1368*, § 16[a].

Generally, opposing party or counsel has right, on proper demand, to inspect and use for cross-examination any paper or memorandum used by witness to refresh his memory, but accused has no right to inspection or disclosure of information in possession of prosecution which may be designed for use in prosecution of others; thus, where officer, in testifying, referred to small notebook which included notes on several criminal investigations, defendant was not entitled to inspection of entire notebook, and arrangements should have been requested to separate items pertinent to defendant's prosecution from other matters. *State v Guffey, 205 Kan 9, 468 P2d 254*.

Report compiled by law enforcement agency in course of its investigation into criminal offense is quasi-private in character, and it is not error for trial court to refuse defendant's motion to require state to produce such report for defendant's inspection and use in cross-examination of witness whose statement is contained therein. *State v Lemon, 203 Kan 464, 454 P2d 718*.

Failure of commonwealth's attorney to produce initial police report concerning robbery for which defendant was tried did not constitute error where there was nothing in record to show that first report existed and record also showed that commonwealth's attorney did not know of first report. *Kendricks v Commonwealth (1977, Ky) 557 SW2d 417*.

See *Pankey v Commonwealth (Ky) 485 SW2d 513*, § 11[m].

Defense in prosecution for trafficking in controlled substance had no right to discover handwritten notes of police officer made during interrogation of defendant. *White v Commonwealth (1980, Ky App) 611 SW2d 529*.

Trial court in armed robbery prosecution did not commit reversible error in refusing to require production of FBI agent's notes concerning conversation he had had with informant. *Mann v Commonwealth (1978, Ky App) 561 SW2d 335*.

Although prosecution may not suppress evidence, in face of defense production request, where evidence is favorable to accused and is material to either guilt or punishment, there is no constitutional requirement that prosecution make a complete and detailed accounting to defense of any or all police investigatory work on a case, nor is defendant entitled to an in camera inspection by court where state denies possession of specific information requested and defendant makes no showing to contradict state's answer. Although trial judge should have made a reviewable record by sealing all documents examined in camera and making them part of record his failure to do so did not constitute reversible error when he had previously noted after in camera examination that documents in question contained no exculpatory information. *State v Oliver (1983, La) 430 So 2d 650*, cert den (US) 78 L Ed 2d 688, 104 S Ct 495.

In prosecution for second-degree murder, trial court did not err in not compelling state to produce earlier complaint filed with police department, which recounted incident involving threat by victim to defendant, where trial judge ascertained that state did not have requested information; even if state had obtained alleged complaint and failed to notify defendant, nondisclosure would not constitute reversible error, where no overt act occurred, and thus evidence of threat would have been inadmissible. *State v Cavalier (1982, La) 421 So 2d 892*.

Defense had no right to names and addresses of state witnesses in prosecution for attempted first degree murder of off-duty deputy sheriff. *State v Stucke (1982, La) 419 So 2d 939*.

Police report was properly withheld from defense inspection, where testimony clearly indicated that detective was relying on his memory refreshed by his report; he did not have physical possession of his report when he testified nor did defense counsel make any showing that officer's testimony differed from his report. *State v Latin* (1982, La) 412 So 2d 1357.

See *State v Winn* (1982, La) 412 So 2d 1337, § 16[a].

In robbery prosecution in which defendant sought pretrial discovery of names and addresses of eyewitnesses to incident who were unable to identify defendant as perpetrator in photographic lineup, trial court's denial of discovery motion was error since defendant made substantial showing that such evidence might prove exculpatory and material as being contradictory to testimony of prospective witnesses who identified defendant as perpetrator. *State v Landry* (1980, La) 384 So 2d 786.

In prosecution for possession of heroin, trial court did not err in denying defendant's request for production of police report where police officer testifying for prosecution did so from his independent recollection of events and not from report itself. *State v Hawthorne* (1978, La) 364 So 2d 917.

Trial court, in prosecution for possession of heroin with intent to distribute, did not err in refusing to order prosecution to disclose to defense police report concerning analysis of substance found in defendant's presence where prosecution did not introduce report into evidence and criminologist who prepared report testified from his memory and not from report itself. *State v Carter* (1978, La) 363 So 2d 893.

In prosecution for armed robbery trial judge properly refused defense request at trial for production of police report since such reports were considered confidential and generally state could not be compelled to produce them for inspection; additionally, where officer did not refer to report while testifying on the stand, and officer's testimony was product of present memory refreshed rather than past recollection recorded, defense was not entitled to copy of police report based on rule permitting inspection where inconsistency exists between officer's testimony at trial and his report. *State v Taylor* (1978, La) 363 So 2d 699.

Trial court erred in burglary prosecution by failing to order production of police report for defendant's inspection where officer testifying for prosecution acknowledged that he was testifying from his report rather than from his memory. *State v Franks* (1978, La) 363 So 2d 518.

Assuming that state possessed arrest and conviction records of jurors, that state intended to use records in selecting jury, and that defendant could not practically obtain information from other sources, defendant was entitled to be given information before voir dire or else allowed to question prospective jurors on subject; but, failure to provide records did not amount to reversible error, where defendant was not denied right to question prospective jurors on subject; furthermore, trial judge erred in not requiring prosecutor to respond to defense request for prior conviction records of state's witnesses by stating whether state had knowledge or possession of records, and, if so, by not requiring prosecutor to furnish them to defendant or to submit them to court for determination as to whether defendant was entitled to material. *State v Harvey* (1978, La) 358 So 2d 1224.

Trial judge did not err in denying defense request for bureau of investigation and computer run off sheets containing information about state witness' criminal record, where defendants questioned witness in detail on cross-examination concerning his prior convictions, witness clearly admitted prior convictions, arrest and conviction records were public records available to defense, and defendants did not allege existence of any evidence of prior convictions not admitted by witness on cross-examination. *State v Robertson* (1978, La) 358 So 2d 931.

In prosecution for aggravated rape, defendant's motion to compel production of criminal records of state's witnesses was

properly denied, where motion would have required state to disclose names of witnesses and would have imposed obligation on state to furnish defense with copies of rap sheets of all state's witnesses, and where records of arrests and convictions were available to public and could be obtained by defense. *State v Sanders (1978, La) 357 So 2d 1089*.

In armed robbery prosecution, defendant was not entitled to pre-trial discovery of police investigative reports or of list of state's anticipated trial witnesses where state had willingly informed defendant that it had no fingerprints or blood samples connecting him to robbery. *State v Passman (1977, La) 345 So 2d 874*, habeas corpus proceeding (CA5 La) 652 F2d 559, cert den 455 US 1022, 72 L Ed 2d 141, 102 S Ct 1722, habeas corpus proceeding (CA5 La) 797 F2d 1335, cert den 480 US 948, 94 L Ed 2d 794, 107 S Ct 1609.

Where date of theft of property was clearly established by numerous witnesses, without any confusion, defendant suffered no prejudice by refusal of trial court to order subpoena duces tecum for production of sheriff's records showing date of report of theft of property involved. *State v O'Quinn (La) 342 So 2d 202*.

Trial judge did not err in overruling defendant's motion for production of evidence of post-arrest investigation demonstrating that portions of tips supplied by informant were false where state specifically denied that any post-arrest investigation had, to its knowledge, been conducted. *State v Robinson (La) 342 So 2d 183*.

Trial judge correctly refused to order police witnesses to produce their report where there was no genuine conflict in police officer's testimony relative to contents of police report. *State v Banks (La) 341 So 2d 394*.

See *State v Perique (La) 340 So 2d 1369*, § 27[a].

Right to pretrial discovery in criminal cases did not include right to defendant's criminal record in state's possession. *State v Lee (La) 340 So 2d 1339*.

Defendant was not entitled to production of testifying officer's report for purpose of refreshing his memory as to whether name of individual who was also arrested for crime was on report where officer remembered very clearly what defendant had said and done in connection with his oral confession following arrest and did not need to refresh his memory by consulting his report. *State v Jolla (La) 337 So 2d 197*.

State was not required to produce for defendants' pre-trial inspection all technical reports or analyses of any objects found or obtained at scene of alleged offense, copy of any picture taken of defendants at lineup, nor copy of any statement allegedly made by any witnesses or prospective witnesses that state intended to use against defendants at trial. *State v Ball (La) 328 So 2d 81*.

Police officer was not required to produce his police report for defense scrutiny where he was testifying from memory. *State v Dupuy (La) 319 So 2d 294*.

Prosecution was not required to allow its evidence file to be scanned by trial court for evidence favorable to defendant or sealed to be sent to court on review in absence of any showing that prosecution had suppressed any evidence which might have character favorable to accused. *State v Major (La) 318 So 2d 19*.

Defense was not entitled to copy of police report where there was no indication that officer was testifying from report but rather that he was testifying from memory (present memory refreshed). *State v Foret (La) 315 So 2d 278*.

Trial court erred in refusing defense counsel's demand for production of police report where police witness refreshed his memory while testifying from notes taken from report. *State v Perkins (La) 310 So 2d 591*.

State is not required to permit inspection of any of its evidence in pending prosecution, including police reports, with

exception of written confession of accused. *State v Brumfield*, 263 La 147, 267 So 2d 553.

Accused was not entitled to inspection of police report of his arrest. *State v Barnes*, 257 La 1017, 245 So 2d 159, cert den and app dismd 404 US 931, 30 L Ed 2d 244, 92 S Ct 289.

With exception of written confessions of accused, all evidence relating to pending criminal trial in possession of district attorney or police is privileged and not subject to inspection by accused unless and until introduced in evidence at trial; thus motion by defendant charged with murder for production of copies of police report of investigation was properly refused. *State v Hudson*, 253 La 992, 221 So 2d 484.

Notes and reports of law enforcement officers during a criminal investigation are privileged and immune from pretrial inspection by defendant. *State v Manuel*, 253 La 195, 217 So 2d 369. See to same effect *State v Brumfield*, 254 La 999, 229 So 2d 76, petition for writ of habeas corpus den *Brumfield v Henderson (DC La)* 317 F Supp 27, affd (CA5) 436 F 2d 1080.

*State v Cardinale*, 251 La 827, 206 So 2d 510, supra § 16[a].

Defendant in narcotics case was not entitled to inspection of moving pictures or tape recordings made while accused was in act of committing crime. *State v Dickson*, 248 La 500, 180 So 2d 403.

Defendant convicted of murdering his wife was entitled to be furnished with anonymous letter, which stated that victim was involved with another man, since note suggested that someone other than defendant may have been responsible for victim's death, and several passing references to letter, buried in police report and describing it nonspecifically as "anonymous letter" was insufficient disclosure. *State v Ledger (1982, Me)* 444 A2d 404.

In homicide prosecution in which defendant raised defense of accident and self-defense, trial court's refusal to require state to furnish defendant with any and all of decedent's criminal records was not error where, under local rule, evidence of other crimes, wrongs, or acts of deceased were not admissible to prove his character in order to show that he acted in conformity therewith. *State v Dutremble (1978, Me)* 392 A2d 42.

Defendant charged with drug-related killing was entitled to examine investigation report by officer after his testimony so as to allow defense counsel opportunity to discover any inconsistencies between witness' trial testimony and his prior statements, but failure to make that report available in this case was harmless error beyond reasonable doubt. *Kanaras v State (1983)* 54 Md App 568, 460 A2d 61.

See *Tisdale v State (1979, Md App)* 396 A2d 289, § 11.

Investigative reports made by police after interviewing prospective jurors should be as available to defendant as to district attorney, although denial of motion to examine such reports was not error where judge asked each juror questions concerning police interviews. *Commonwealth v Smith*, 350 Mass 600, 215 NE2d 897.

Court did not abuse discretion in denying pre-trial motion for production of police reports, where defendant obtained at trial copies of entry in police journal and police teletype containing descriptions of robbers, and where witness, who was source of descriptions, had been treated for mental illness, failed to identify defendant, and refused to obey prosecution summons. *Commonwealth v Cook (Mass)* 308 NE2d 508.

Although accused is entitled to names of prosecution witnesses, and to access to criminal records of such persons, under direction of court, prosecution is not required to take affirmative steps, on behalf of accused, to collect or secure such records. *Commonwealth v Clark (Mass)* 295 NE2d 163.

Defendant was not entitled to list of all persons interviewed by Commonwealth in connection with murder prosecution. *Com. v Therrin (Mass) 269 NE2d 687.*

Trial court properly refused demand for one police officer's entire files of notations, and for other officer's "worksheet." *Commonwealth v Guerro (Mass) 260 NE2d 190.*

Denial of motion for production and inspection of police records of prosecution witnesses and for inspection of records of their criminal convictions was within trial court's discretion. *Commonwealth v Dominico (Mass App) 306 NE2d 835.*

Prosecutor's policy of refusing to provide copy of police reports to defendants was inexcusable obstruction to pursuit of justice and justified dismissal of complaint against defendant, even though prosecutor read police report to defense counsel and was willing to let him see it in courtroom. *Bay County Prosecutor v Bay County Dist. Judge (1981) 109 Mich App 476, 311 NW2d 399.*

In prosecution for first degree murder, trial court abused its discretion in denying defendant access to police report concerning switchblade knife allegedly in possession of victim at time of homicide, but such error was harmless where defendant had testified that he saw something in victim's hand but did not know what it was and police officers testified that knife was removed from victim's pocket, placing issue before jury. *People v Fournier (1978) 86 Mich App 768, 273 NW2d 555.*

Once prosecutor represented to trial court that he would furnish defendant with all police reports, he became bound, in interest of fundamental fairness and in view of his duty to see justice done, to place broad interpretation on term "police reports," and to err on side of giving away too much rather than too little; prosecutor had duty to disclose certain documents, known as tip sheets, on which police recorded information received from informants which were connected to investigation of case. *People v Florinchi (1978) 84 Mich App 128, 269 NW2d 500.*

Defendant in prosecution for criminal sexual conduct was not entitled to have prosecutor produce police reports to superior officers, police write-ups presented to prosecutor, or police resumes prior to trial, where defense did not set forth any specific facts or information which it expected to glean from those reports. *People v Nkomo (1977) 75 Mich App 71, 254 NW2d 657.*

Defendant in prosecution for assault on police officer was entitled to discovery of information in files of citizens complaint bureau consisting of statements of witnesses to the action giving rise to the prosecution where such statements were relevant and admissible but was not entitled to internal police reports irrelevant to the prosecution. *People v Walton, 71 Mich App 478, 247 NW2d 378.*

Notes or reports prepared by police officer witness and delivered to prosecuting attorney, while available "for possible impeachment or at least elucidation purposes," were not discoverable generally through cross-examination of officer. *People v Johnson, 8 Mich App 462, 154 NW2d 671.*

No rule of discovery permits production of all records of police department. *State v Grunau, 273 Minn 315, 141 NW2d 815.*

Defendant was entitled to inspect and copy police report where there was suggested inconsistency between detective's testimony and psychiatric report, thus indicating that report might contain information beneficial to defendant. *State v Hicks (Mo) 515 SW2d 518.*

Defendant in robbery prosecution was not entitled to discovery of police report which was a composite description of defendant compiled by officers from individual descriptions given by several witnesses, and which did not show description given by each, particularly where report would have been useful only in cross-examining witnesses and

where nothing in record indicated that description in report would have been favorable to defendant. *State v Cannon (Mo)* 465 SW2d 584.

See *State v Yates (Mo)* 442 SW2d 21, § 8.

In prosecution for robbery, trial court did not err in refusing to dismiss case for prosecutor's five-month delay in producing legible copy of police report, where defense counsel made no effort during five-month period to enforce discovery order, and where defense declined court's offer of continuance and made no effort to demonstrate prejudice by delay in discovery. *State v Davis (1978, Mo App)* 577 SW2d 110.

Although it was error for prosecutor to fail to produce police report contradicting other reports as to date and identification, it was not prejudicial where trial court later ordered surrender of police report to defendant and continued the case to allow defendant to consult with counsel and make any investigation necessary to meet newly discovered matters which might affect defense strategy. *State v Wendell (Mo App)* 547 SW2d 807.

It was not error to deny defendant's motion to obtain names and addresses of all persons interrogated by law enforcement agencies where prior to trial defendant had moved for names and addresses of persons present at scene of offense and this motion had been granted. *State v Gamache (Mo App)* 519 SW2d 34.

In rape prosecution, court's denial of defendant's request to inspect copy of sheriff's report was not error, where no general right of discovery existed in state, where court personally examined report and concluded that it contained no facts outside witnesses' testimony, and where there was no demonstration that withholding report was unfair or that it contained evidence favorable to defendant. *State v Mitchell (Mo App)* 500 SW2d 320.

Where police officer in testifying did not use report which he had made and submitted to his superiors, or refer thereto in any way, trial court did not err in refusing to compel production of such report, it being within court's discretion to order or refuse to order such discovery. *State v Coleman, 186 Neb 571, 184 NW2d 732.*

Trial court did not abuse discretion in murder trial in overruling motion for discovery under which defendant sought copies of original notes of arresting officers, all police reports contained statements of witnesses and copies of all statements of defendant and other witnesses, autopsy reports, chemical analyses, blood tests, fingerprints, and all physical evidence in possession of state. *State v Williams, 183 Neb 257, 159 NW2d 549.*

In prosecution for selling less than single ounce of marijuana to a minor in which defendant faced mandatory life imprisonment upon conviction, harmless error occurred where trial court refused defendant's discovery request to examine juvenile record of principal prosecution witness, but permitted defendant to cross-examine witness extensively concerning witness' relationship with prosecution and possibility of immunity grant. *Pickard v State (1978, Nev)* 585 P2d 1342.

See *Walker v Fogliani (Nev)* 425 P2d 794, § 10[f].

See *State v Barath (1979)* 169 NJ Super 181, 404 A2d 373, § 21[a].

Defendants were entitled to inspect, copy, or photograph all statements and reports of police officers who might be called as witnesses at trial; however, court properly refused to permit inspection, copying, or photographing of other police reports relating to investigation of case. *State v Harrison, 118 NJ Super 299, 287 A2d 229, affd 119 NJ Super 1, 289 A2d 548.*

In absence of any showing of unusual circumstances, trial judge erred in requiring district attorney to furnish police reports and statements of witnesses to defendant. *State v Tackett, 78 NM 450, 432 P2d 415, 20 ALR3d 1* (citing

annotation).

Defendant in prosecution for second degree murder was entitled to inspection of supplemental police report referred to by police officer while testifying on stand. *State v Gomez*, 75 NM 545, 408 P2d 48.

Homicide defendant had no statutory right to discovery of "routine police reports" absent showing prosecution intended to introduce such material at trial. *People v Bissonette* (1981) 107 Misc 2d 1049, 436 NYS2d 607.

See *People v Simone* (1977) 92 Misc 2d 306, 401 NYS2d 130, § 11[m].

See *People v Aviles*, 89 Misc 2d 1, 391 NYS2d 303, § 27[a].

See *People v Harrison*, 81 Misc 2d 144, 364 NYS2d 760, § 11[m].

Police report which contained names and oftentimes observations of witnesses would not be discoverable where there was no inherent right under statute of defendant to be given names of witnesses. *People v Privitera*, 80 Misc 2d 344, 363 NYS2d 226.

See *People v Torres*, 77 Misc 2d 13, 352 NYS2d 101, § 11[m].

See *Vergari v Kendall*, 76 Misc 2d 848, 352 NYS2d 383, app dismd (App Div) 360 NYS2d 1003, § 11[m].

In prosecution for drunken driving, accused was entitled to production of police record of all answers given by him to questions and made part of report; however, he was not entitled to report of officer's visual observations of him which was part of officer's "work product." *People v Lawrence*, 74 Misc 2d 1019, 346 NYS2d 330.

See *People v Wright*, 74 Misc 2d 419, 343 NYS2d 944, § 13[a].

Defendant charged with unlawful possession and sale of dangerous drug was not entitled to discovery of original notes of arresting officers. *People v Ricci*, 59 Misc 2d 259, 298 NYS2d 637.

Inspection allowed of records and photographs made by or for police and district attorney in connection with defendant's arrest, interrogation, detention, and custody prior to arraignment, including police forms, records of police telephone switchboard, and police resume of homicide; police's notes of statements of witnesses are not proper subject for discovery and inspection. *People v Powell*, 49 Misc 2d 624, 268 NYS2d 380.

Defense attorney had no right to inspect prosecutor's file to determine what material, if any, contained therein was relevant and, therefore, subject to use by defense during cross-examination of police officer who heard defendant's confession; defense counsel's failure to assent to in-camera inspection of prosecutor's file to determine relevancy of its contents to subject matter of police officer's testimony precluded defendant from claiming on appeal that he was deprived of full and fair hearing. *People v Poole* (1979) 48 NY2d 144, 422 NYS2d 5, 397 NE2d 697.

Police should be required to make contemporaneous or reasonably prompt detailed records of communications from anonymous informers, and these records should be subject to inspection and examination on suppression hearing on issue of credibility. *People v Taggart*, 20 NY2d 335, 283 NYS2d 1, 229 NE2d 581, remittitur and 21 NY2d 729, 287 NYS2d 695, 234 NE2d 714, app dismd 392 US 667, 20 L Ed 2d 1360, 88 S Ct 2317.

Denial of due process requiring a new trial was not shown by state's failure to disclose statement by victim of attempted rape, sodomy and unlawful imprisonment alleged to contain exculpatory material in absence of any showing that material would have, in any reasonable likelihood, affected judgment of jury. A new trial is not automatically required

where evidence in possession of the people might possibly be useful to defense but not likely to change verdict. *People v McMullen* (1983, 3d Dept) 92 App Div 2d 1059, 461 NYS2d 565.

Sealed juvenile records as to only eyewitness able to identify defendant as perpetrator should have been made available to defense to establish motive for testifying falsely where witness had pleaded guilty to attempted burglary before trial and was sentenced as youthful offender one day after testifying at defendant's trial. *People v Davis* (1982, 4th Dept) 86 App Div 2d 956, 448 NYS2d 315.

In prosecution of two sisters for criminal possession of weapon and menacing, following altercation with two police officers, defense was entitled to inspect those portions of police internal investigations file relevant to guilt or innocence of defendants; however, proper remedy for district attorney when faced with police reluctance to turn over such confidential files to defense was to subpoena file for court or grand jury, not ex parte court order. *Rochester Police Dept. v Bergin* (1979, 4th Dept) 68 App Div 2d 340, 416 NYS2d 938.

See *People v Clow* (1978) 62 App Div 2d 880, 406 NYS2d 598, § 16[a].

In narcotics prosecution trial court should have conducted in camera proceeding to determine relevancy and materiality of personnel records of police officers so as to permit defendant to examine relevant portions of records where credibility of police officers who testified against defendant was key issue at trial and where prosecution introduced evidence of medals and departmental commendations they had received. *People v Vasquez* (App Div) 370 NYS2d 144.

Court's error in refusing defendant's request for production of police memoranda covering interviews with prosecution witness was harmless where witness was subjected to extensive cross-examination which was not curtailed by court. *People v Kampshoff*, 53 App Div 2d 325, 385 NYS2d 672.

Defendant was not prejudiced by failure of prosecution to furnish him with identification by witness of another as one who shot victim where that identification was first made known during defendant's case and where it was obvious that the defense knew of witness' statement and his later retreat therefrom; the prosecution has no duty to make complete and detailed disclosure of all results of police investigation of particular crime, particularly when mistaken information is believed to have been obtained. *People v Vinson*, 48 App Div 2d 730, 367 NYS2d 863.

Error of trial court in refusing to grant inspection of police reports to attorney for co-defendant, even if applicable to defendant, was harmless in view of overwhelming evidence of defendant's guilt of burglary and possession of burglar's tools. *People v Gilligan*, 48 App Div 2d 724, 367 NYS2d 610.

Failure of prosecution, which had been ordered to turn over any exculpatory materials to defense, to provide defense counsel with police reports which contained description of perpetrator of robbery-murder, which was inconsistent with description given by witnesses and which indicated that witness, contrary to testimony, had refused to look at mug shot, required reversal, even though inconsistencies might have been explainable. *People v Turner*, 48 App Div 2d 674, 367 NYS2d 562.

There was no prejudicial error resulting from failure of trial judge to allow discovery of exhibits consisting primarily of police records and statements of prospective witnesses where trial judge, upon defendant's request at trial for discovery of information within state's possession which might be relevant, competent, and not privileged, made in camera inspection of information and appropriate findings of facts concerning each excluded exhibit which he sealed in envelope and preserved in record for appellate review, and appellate court concluded that information in excluded exhibits would have added nothing to evidence produced at trial and would have been of no assistance to defendant at trial. *State v Waters* (1983) 308 NC 348, 302 SE2d 188.

See *State v Alston* (1983) 307 NC 321, 298 SE2d 631, § 18.

See *State v Ford* (1979) 297 NC 144, 254 SE2d 14, § 4[a].

Pursuant to discovery statute allowing discovery of specifically identified exhibits to be used in the trial of the case defendant was not entitled to notes taken by investigating police officers relating to scene of crime where notes were not exhibits to be used in trial, where notes were not specifically identified, and where such notes were not material to defendant's case. *State v Tatum*, 291 NC 73, 229 SE2d 562.

Defendant is not entitled to conduct fishing expedition or to receive work product of police or other state investigators; thus, motion which requested practically complete files of sheriff's department and solicitor's office, and all information obtained as a result of sheriff's investigation of case, was properly denied. *State v Davis*, 282 NC 107, 191 SE2d 664.

In prosecution for possession of cocaine, trial court properly denied defendant's motion, made at voir dire hearing on motion to suppress evidence, to inspect notes compiling detective's preliminary report, since notes were work product of police department and were not used by detective to refresh memory at trial and so were not discoverable, and, though two pages of supplemental report were used by detective at trial, and so were discoverable, trial court denial of inspection was not shown by defendant to have been prejudicial, and defendant never indicated reasons for examining notes. *State v Tate* (1982) 58 NC App 494, 294 SE2d 16, app dismd, petition den (NC) 295 SE2d 763 and affd 307 NC 464, 298 SE2d 386.

Trial court did not err in denying defendant's pretrial motion for production of copy of computerized print-out of criminal record of prosecution witness where he was allowed to confront such witness at trial. *State v Chappel* (1978) 36 NC App 608, 244 SE2d 483.

See *State v Gillespie* (1977) 33 NC App 684, 236 SE2d 190, § 16[a].

Failure of state to produce agent's daily reports, which differed considerably from agent's case reports, would have violated defendant's rights, had there been no theft of such reports, where prosecutor had duty to produce favorable or exculpatory materials under Brady rule, Brady rule was not affected by good faith of prosecutor, prosecutor had duty to inquire into and examine contents of police files to discover exculpatory and favorable materials and to make timely disclosure of them to defense, when demand was made, particularly where documents demanded were clearly described, and where inquiry would have uncovered discrepant reports of agent. *State v Hilling* (ND) 219 NW2d 164.

Work by detective investigating alibi defense was not "scientific test" or "experiment" within meaning of discovery statute where it involved utilizing common sense to figure possible routes taken by kidnapping suspect and times of travel involved therein, and failure to disclose basis for detective's testimony would not preclude its use at trial. *State v Goble* (1982) 5 Ohio App 3d 197, 5 Ohio BR 458, 450 NE2d 722.

See *State v Johnson* (1978) 62 Ohio App 2d 31, 16 Ohio Ops 3d 74, 403 NE2d 1003, § 16[a].

Notes made by police officer during interview with witness to crime were not subject to in camera inspection within intent and meaning of criminal rules of procedure. *State v Washington* (1978) 56 Ohio App 2d 129, 10 Ohio Ops 3d 150, 381 NE2d 1142.

In criminal trial, defense counsel is not entitled to inspect written police report, even though officer has read the report to refresh his recollection prior to taking witness stand, where officer does not use report while testifying. *State v Smith* (1976) 50 Ohio App 2d 183, 4 Ohio Ops 3d 160, 362 NE2d 1239.

In prosecution for felonious assault and attempted aggravated murder, prosecuting attorney would be ordered to deliver to defense counsel criminal record or records of witnesses in prosecuting attorney's possession or which he could obtain

by request made to appropriate state criminal record source and such criminal record as might be obtained by request made to *FBI. State v Kinney*, 44 *Ohio Misc* 69, 337 *NE2d* 668.

Failure of prosecution to supply defense with information concerning attempted rape which took place prior to incident for which defendant was being tried was not prejudicial where defense had knowledge of attempted rape as shown by defense counsel having investigative report filed by police concerning attempted rape read into evidence, and where defense counsel cross examined prosecutrix concerning information police had mentioned to her regarding this other incident. *Gregg v State* (1983, *Okla Crim*) 662 *P2d* 1385.

Defendant in prosecution for robbery with firearms was not entitled to examine copy of police investigation report for purpose of ascertaining description of assailants given by victim to police officers where defense counsel elicited such information from police officer on cross-examination at trial. *Hickerson v State* (1977, *Okla Crim*) 565 *P2d* 684.

See *Trowbridge v State* (*Okla Crim*) 502 *P2d* 495, § 16[a].

Although trial court's denial of request for discovery of criminal records of prosecution witnesses, and of materials favorable to defendant in possession of prosecution, was improper, it was not grounds for reversal of murder conviction, since no prejudice flowed from denial of criminal records, and there was no showing that prosecution actually possessed any materials favorable to defendant. *Stevenson v State* (*Okla Crim*) 486 *P2d* 646, cert den 404 *US* 1040, 30 *L Ed* 2d 733, 92 *S Ct* 724.

See *Doakes v District Court of Oklahoma County* (*Okla Crim*) 447 *P2d* 461, § 16[a].

In prosecution for disorderly conduct and resisting arrest, trial court properly denied defendants' motion for production of police officers' notebooks where they did not constitute statements within meaning of applicable rule of criminal procedure; as to statement of witness that was lost in police files, case would be remanded for determination of whether statement was actually unavailable and whether defendants were prejudiced by state's failure to furnish them with copy of it. *State v McKeen* (1978) 33 *Or App* 343, 576 *P2d* 804.

In prosecution for sale of heroin to undercover police officer, trial court did not err in denying defendant's motion to suppress testimony of undercover officer on ground that prosecution failed to disclose stenographer's shorthand notes and rough draft of his report of transaction with defendant, where final report was disclosed to defendant and where there were no significant differences between stenographer's notes, rough draft, and final draft. *State v Jackson* (1977) 31 *Or App* 645, 571 *P2d* 523.

Unless in particular case good reason to contrary exists, state should honor timely request by defendant to obtain and hand over FBI "rap" sheet or similar document with respect to convictions of state's witnesses when defendant establishes that such information will probably be relevant to ultimate issue of guilt or innocence. *State v Ireland* (*Or App*) 500 *P2d* 1231.

In prosecution for assault upon police officer in which state was permitted to introduce evidence of previous incidents of similar conduct by defendant, trial court erred in refusing to permit discovery and inspection of personnel record of one officer who testified to such former incidents, where such file contained material relative to officer's drunkenness on duty and his violent encounters when making arrests in other circumstances. *State v Fleischmann*, 10 *Or App* 22, 495 *P2d* 277.

Defendant charged with murder and criminal conspiracy was entitled to review any notes, reports or written records relating to interviews with witnesses who testify at trial where documents contain substantially verbatim statements relevant to issues at trial. *Commonwealth v Contakos* (1981) 492 *Pa* 465, 424 *A2d* 1284.

In homicide prosecution during which eye witness to killing provided in-court identification of accused, trial court's refusal to compel prosecution to furnish defense counsel with copy of witness' juvenile record was error where ruling made it impossible for defense counsel to know whether or not that record contained anything upon which he could argue that witness was biased against defendant; since it was not clear from record whether defendant was prejudiced by such error, cause was remanded to trial court with instructions that appellate, through his counsel, be given access to witness' juvenile record. *Commonwealth v Slaughter* (1978, Pa) 394 A2d 453.

Trial court properly denied defendants' request that police investigatory file be produced for in camera inspection by court where defendants made no showing that court's inspection would reveal evidence helpful to defense. *Commonwealth v Gartner* (1977) 475 Pa 512, 381 A2d 114.

Defendant in murder prosecution was not entitled to compel production of complete police investigative file. *Commonwealth v Royster* (1977, Pa) 372 A2d 1194.

Under Pennsylvania rules providing for pretrial discovery absent showing by defendant of "exceptional circumstances and compelling reasons," he is only entitled to discovery of his own statements and not discovery or inspection of written statements of witnesses in possession of state nor was defendant entitled to every test, result, or interview sheet taken in connection with polygraph test as exculpatory evidence where such evidence was exculpatory only in the sense it contained exculpatory statements by defendant which merely gave same version as prior informal statement and subsequent formal statement both of which were admitted in evidence. *Commonwealth v Gee* (Pa) 354 A2d 875.

In prosecution for violation of prohibited offensive weapons statute, trial court properly denied defendant's request for certain police report where it had been prepared by officer who did not testify at trial. *Commonwealth v McFarland* (1977, Pa Super) 382 A2d 465.

Rule requiring that relevant pretrial statements of witnesses in possession of state must be made available to accused upon request during trial applies to reports made by police officers who testify as witnesses and failure of trial court to order that defense counsel be provided with these statements was error. *Commonwealth v Cooper* (Pa Super) 362 A2d 1041, vacated (Pa) 363 A2d 783.

Trial court did not err in refusing to allow defendant to inspect notes used by state policeman to refresh his memory day before suppression hearing where witness did not refer to notes while on witness stand. *Commonwealth v Samuels* (Pa Super) 340 A2d 880.

See *State v Hamilton* (1981, SC) 276 SE2d 784, § 13[d].

Denial of request for discovery and inspection of reports of police and other investigating officers, and of logs, indexes, and other records kept in ordinary course of police filing and recording, was not abuse of discretion. *State v Pickering* (SD) 207 NW2d 511.

Trial court did not abuse discretion in denying motion for discovery and inspection of police records. *State v Goodale* (SD) 198 NW2d 44.

In prosecution for second degree murder, defendant was not entitled to inspect summaries of witnesses' statements contained in investigative report; under rules of criminal procedure, such summaries were not "statements" in that they had not been signed or otherwise adopted or approved by witnesses involved nor were they verbatim recital of oral statements of witnesses. *State v Venable* (1980, Tenn Crim) 606 SW2d 298.

Where it was alleged that prosecution was tainted by evidence which had been gathered through illegal electronic eavesdropping, trial judge was required to inspect all relevant available records in camera for purpose of making

determination as to whether illegal wiretap was installed on defendant's telephone and, if court found existence of illegal wiretap, any surveillance records made by government or state must be turned over to defendant for use in rebutting prosecution's contention that case was untainted by illegal wiretap. *Armstrong v State* (1977, *Tenn Crim*) 555 SW2d 870, cert den (US) 55 L Ed 2d 495, 98 S Ct 1450.

Although trial judge may, if he deems it in interests of justice to do so, order state to make available to defendant such items as FBI reports, or police records of witnesses, he is clearly justified in refusing to do so if, in his opinion, such disclosure is not needed to insure orderly administration of justice. *Graves v State* (*Tenn Crim*) 489 SW2d 74.

Felon charged with attempted murder by ambush had no right to pretrial discovery of names, addresses and telephone numbers of witnesses who were interviewed by prosecution, and State's failure to disclose did not violate defendant's constitutional right to effective assistance of counsel where record reflected that defense counsel interviewed all available witnesses and thoroughly investigated case to best of his ability. *Prince v State* (1982, *Tex App 5th Dist*) 638 SW2d 550, petition for discretionary review gr (Nov 24, 1982) and revd on other gnds (*Tex Crim*) 754 SW2d 155, motion for rehearing on PDR granted (Jun 26, 1985) and motion for rehearing on PDR dismd (Jun 29, 1988).

Defendant charged with solicitation of murder for hire was not entitled to either transcript of recorded conversation with undercover agent, as such was interpretation of original tape and thereby work product of state, or to examine notes of recording agent relative to his recollection of taped conversation. *Johnson v State* (1983, *Tex Crim*) 650 SW2d 784.

In prosecution for rape, failure to grant defendant's request for police officer's report did not amount to suppression of evidence where statements in officer's report were not exculpatory, material or admissible. *Iness v State* (1980, *Tex Crim*) 606 SW2d 306.

In rape prosecution in which police officer, testifying on direct as to chain of evidence, stated on cross-examination that he had prepared investigation report of incident, trial court's denial of defendant's motion to produce report for use in cross-examination constituted harmless error, where officer had previously testified in pretrial hearing that he had given report to second officer who in turn testified that report contained inventory of evidence seized but that he had been unable to locate it, and where prosecutor testified that he had never seen report. *Patterson v State* (1980, *Tex Crim*) 598 SW2d 265.

At hearing out of presence of jury to determine voluntariness of defendant's confessions, it was error to deny request of defendant for copy of prosecution report prepared by police officer even though officer had not used report to refresh his memory; however, it was not reversible error since report was tendered to defense counsel prior to closing of evidence and he had opportunity to interview officer after reading report. *Myre v State* (*Tex Crim*) 545 SW2d 820.

See *Holloway v State* (*Tex Crim*) 525 SW2d 165, § 4[b].

See *Howard v State* (*Tex Crim*) 505 SW2d 306, § 9[c].

Defendant's right to discovery of police investigation reports was doubtful where officer who made reports had died prior to trial and their contents were not brought out at trial in any way. *Gutierrez v State* (*Tex Crim*) 502 SW2d 746.

Accused in murder prosecution was not entitled to work product of police or sheriff's department. *Powers v State* (*Tex Crim*) 492 SW2d 274.

Accused has no absolute right to pretrial inspection of offense report; thus, accused could not complain that his counsel was not permitted to see copy of such report until 18 days prior to trial. *Baldwin v State* (*Tex Crim*) 490 SW2d 583.

Accused in prosecution for receiving stolen property was not entitled to pretrial discovery of police reports. *Bradshaw v*

*State (Tex Crim) 482 SW2d 233.*

It was not error to deny defendant's request for discovery of criminal records in possession of prosecutor regarding state's witnesses where there was no showing that prosecutor had any "criminal records" regarding such witnesses in his possession. *Thomas v State (Tex Crim) 482 SW2d 218.*

Trial court did not err in overruling motion to direct prosecutor to furnish, for inspection and copying, any and all prior felony criminal records of homicide victim, where there was no showing that prosecutor possessed copy of such records. *Elliott v State (Tex Crim) 475 SW2d 239.*

Defendant was not entitled to pretrial production of criminal records of state witnesses or of jurors, particularly where district attorney stated that he had no knowledge of any such records. *Garcia v State (Tex Crim) 454 SW2d 400.*

Accused was not entitled to inspection of reports made by police officers who did not testify at trial. *Hart v State (Tex Crim) 447 SW2d 944.*

Police officer's reports were not discoverable even when used to refresh witness recollection during pretrial identification hearing absent allegation they contained information tending to exculpate defendant. *Coleman v State (1983, Tex App Tyler) 651 SW2d 846.*

Refusal to require state to produce police offense report to which officer testifying at trial gave "input," but which was made by another officer, was not prejudicial error or denial of due process under "Gaskin Rule" "use before jury rule," or "Brady Rule" where report was not a report or statement made by witness, substantially all evidence in report was developed during trial, state's witness did not testify from report or use it to refresh his memory, and state did not use report before jury for any purpose so as to bring its contents into issue. *Epperson v State (1983, Tex App Tyler) 650 SW2d 110.*

Capital homicide defendant was not entitled to pretrial discovery of summaries of any statements given to agents of Commonwealth by persons Commonwealth intended to call as witnesses. *Bunch v Commonwealth (1983) 225 Va 423, 304 SE2d 271, cert den (US) 78 L Ed 2d 352, 104 S Ct 414, reh den 464 US 1064, 79 L Ed 2d 206, 104 S Ct 750.*

Defendant was not entitled to production of detective's investigative report. *State v Music, 79 Wash 2d 699, 489 P2d 159.*

Neither prejudicial error nor abuse of discretion occurred when trial court refused to grant defendant's motion, prior to trial, for production by state of copies of statements of witnesses, where only statements held by state were police officers' reports and statement of complaining witness, victim of robbery; defendants' counsel were permitted to interview victim, and discrepancies in statements given by witnesses were fully explored in cross-examination. *State v Beard, 74 Wash 2d 335, 444 P2d 651.*

In prosecution for obstructing police officer, trial court did not abuse its discretion in denying discovery of police department's internal investigation files. *Seattle v Apodaca (1977) 18 Wash App 802, 572 P2d 732.*

Criminal defendant was not entitled to disclosure of witness' FBI rap sheet where state had disclosed all of witness' convictions of which it had knowledge and where defense counsel was allowed opportunity to question witness prior to trial. *State v Upton, 16 Wash App 195, 556 P2d 239.*

Refusal to require disclosure of police reports and statements made by witnesses to investigative officers before trial was within discretion of trial court where no exceptional circumstances were shown. *State v Audia (1983, W Va) 301 SE2d 199, cert den (US) 78 L Ed 2d 307, 104 S Ct 338.*

In murder trial, reversible error occurred where court refused to allow defendant to inspect, for purposes of cross-examination, report used by state's chief investigating officer to refresh his recollection the night before his testimony. *State v Helmick* (1982, W Va) 286 SE2d 245.

Defense counsel was entitled to inspect report from which state trooper testified when called as witness for state. *State v Cokeley* (W Va) 226 SE2d 40.

Defendant was entitled to inspection of police report where police witness had testified from notes used to refresh his recollection; defense would be entitled to inspect police report encompassing additional information which was not subject of direct examination, unless judge determined in in camera proceeding that material was in no way relevant to defendant's case and disclosure of material would endanger police activities in future. *State v Dudick* (W Va) 213 SE2d 458.

There was no error in denying right to pretrial discovery of prosecution's evidence or of deputy sheriff's notes, which he made on night of crime of indecent behavior with child when sheriff questioned parties involved. *Ramer v State*, 40 Wis 2d 79, 161 NW2d 209.

Traffic citations fell within statute authorizing inspection of official property and records, and defendant who was issued traffic citation had absolute right to inspect not only his own citation but all other citations issued by same policeman for 1 year period immediately preceding, in absence of any showing by police chief, who was responsible custodian, that such inspection would be harmful to public interest. *Beckon v Emery*, 36 Wis 2d 510, 153 NW2d 501.

[\*18] Prosecuting attorney's notes, memoranda, file, or "work product"

Either explicitly or by implication supporting the view that an accused is not entitled to inspect notes or memoranda made by the prosecuting attorney or his representatives in the preparation of the case, the court in some cases has refused to permit the defendant to inspect such papers.

For other cases wherein notes made by the prosecuting attorney in the preparation of the case were also held not producible for inspection by the defendant, see *Bailey v State* (1931) 24 Ala App 339, 135 So 407, and *People v Salsbury* (1903) 134 Mich 537, 96 NW 936, both supra § 9[c], footnote 1.

Thus, the denial of an order requiring the prosecution to permit the defendant's attorney to examine certain private notes and memoranda of questions asked of and answers made by the defendant a short time after the shooting was held not error in *People v Bermijo* (1935) 2 Cal 2d 270, 40 P2d 823, the court pointing out that the memoranda sought to be examined were not a statement of the defendant nor were they signed by him, but were simply notes made by the district attorney of questions asked of the defendant and answers given thereto.

Holding that personal notes made by the prosecuting attorney containing the questions which he planned to ask a witness were not subject to inspection upon the demand of the defense, the court in *People v Cathey* (1960) 186 Cal App 2d 217, 8 Cal Rptr 694, rejected the defendant's contention that the trial court committed error in permitting a prosecution witness to testify without first supplying the defense with a copy of a writing containing the questions to be asked the witness in accordance with the demand thereof as previously made by the defense at the trial.

In *Hopper v People* (1963) 152 Colo 405, 382 P2d 540, it was held that the defendant's request for production of the prosecuting attorney's worksheets or trial notes made in preparation for the trial was properly denied, although such notes might have been made on the basis of oral statements given by a prosecution witness, the court stating that the worksheets of the district attorney made in preparation for the trial of a criminal case do not come within the coverage of the rule of criminal procedure authorizing the production of statements of a prosecution witness for use by the

defense in the cross-examination of the witness.

Where the defendant, after having been furnished with a carbon copy of a statement of the arresting officer relating to the charge against him, requested during the trial permission to inspect the original of the statement, but the prosecuting attorney objected to the request on the ground that the back of the original sheet contained handwritten notes made by him and that such notes were not a verbatim account of his interview with the arresting officer but were his own work product, it was held in *Campbell v United States (1961, Mun Ct App Dist Col) 174 A2d 87*, a prosecution under the law of the District of Columbia for carrying a pistol without a license, that the trial court properly denied the defendant access to the original document. Noting that the carbon copy was an exact duplicate of the officer's statement in the possession of the prosecuting attorney, and pointing out that the handwritten notes on the original could in no way be called a record of the officer's statement, but were memoranda which would aid the prosecution in preparation of its case, the court said that not even the most liberal discovery theories could justify unwarranted inquiries into the files and mental impressions of an attorney.

See also *State v Kelton (1957, Mo) 299 SW2d 493*, supra § 12, wherein the court upheld the denial of the production of a transcript of questions and answers taken at an interrogation of the defendant by the prosecuting attorney.

Where the trial court denied the defendant's pretrial request for inspection of "tape recordings, written statements, and notes compiled by law enforcement authorities of questions and answers propounded to the defendant," the court in *State v Superior Court (1965, NH) 208 A2d 832, 7 ALR3d 1*, noting that the nature of the notes and recordings did not appear, held that notes personally compiled by law enforcement authorities in the course of their investigation, even if they include notes of conversations with the accused, constitute the work product of the prosecution and are privileged from pretrial discovery. The court added, however, that the trial court had the power in its discretion to order, if required by justice, discovery and inspection of any written confession or statement made by the defendant, or any recording or stenographic notes thereof, whether such confession or statement was signed by the defendant or not; and that if the trial court's denial of the defendant's request for inspection was based solely on an assumed lack of power to order such discovery, it should reconsider its action in the light of the present opinion.

In *Commonwealth v Brown (1894) 90 Va 671, 19 SE 447*, it was held not error to refuse to compel the prosecuting attorney to furnish the defendant with certain stenographic notes of the evidence taken before the examining magistrate. Pointing out that the notes were taken at the instance of the prosecuting attorney for his own use and at his own expense by a private stenographer, the court said that in such case the defendant had no more right to them than to any other private property of the prosecuting attorney.

While not specifically dealing with notes or memoranda of the prosecuting attorney, the court in the following cases also refused to permit the defendant to inspect the particular document or material in question<sup>155</sup> on the ground, inter alia, that such document or material constituted the prosecuting attorney's "work product," or was a part of his file or his work papers.

## NEW YORK

*People v Giles* (1961) 31 Misc 2d 354, 220 NYS2d 905, supra § 16[a] (statements, transcripts of interviews, and memoranda of conversations of witnesses)

The view that a document or material which constitutes the prosecuting attorney's "work product" or which is a part of his file or his work papers is not subject to inspection by the defense was also taken in a number of other cases wherein the court held or said that --

-- the "work product" of the prosecuting attorney was not producible for inspection by the defense. *State v Colvin* (1957) 81 Ariz 388, 307 P2d 98, supra § 7.

-- information disclosed to a state attorney for the purpose of enabling him to perform the duties of the office is privileged upon grounds of public policy. *State v Zimmaruk* (1941) 128 Conn 124, 20 A2d 613; *State v Roy* (1962) 23 Conn Supp 342, 183 A2d 291; *State v Salvatore* (1962) 23 Conn Supp 459, 184 A2d 551.

-- the defendant has no absolute right to examine a prosecution witness' statements made in confidence to a prosecuting officer. *Fuller v United States* (1949, Mun Ct App Dist Col) 65 A2d 589.

-- the defendant in a criminal case is not entitled to inspection of statements of a prosecution witness which were taken by a prosecution officer in preparation for trial. *McAden v State* (1945) 155 Fla 523, 21 So 2d 33, cert den 326 US 723, 90 L ed 429, 66 S Ct 28; *Johns v State* (1946) 157 Fla 18, 24 So 2d 708; *Raulerson v State* (1958, Fla) 102 So 2d 281; *Urga v State* (1958, Fla App) 104 So 2d 43; *Bedami v State* (1959, Fla App) 112 So 2d 284, cert den 361 US 883, 4 L ed 2d 119, 80 S Ct 153; *Jackman v State* (1962, Fla App) 140 So 2d 627.

-- statements of witnesses reduced to writing by the prosecuting attorney for his own use in the preparation of the case were not producible. *State v Laird* (1909) 79 Kan 681, 100 P 637.

-- an accused is not entitled to inspection of evidence that has been reduced to writing by the prosecuting attorney for his convenience. *State v Williams* (1947) 211 La 782, 30 So 2d 834; *State v Haddad* (1952) 221 La 337, 59 So 2d 411.

-- a statement of a prosecution witness which constitutes the prosecuting attorney's work product is not producible for use by the defense. *State v Aubuchon* (1964, Mo) 381 SW2d 807 (by implication).

-- where a prosecution witness was examined by the prosecuting attorney and his statement was reduced to writing for the convenience of the prosecuting attorney and in the preparation of the case, such private memoranda of the prosecuting attorney were not subject to inspection by the defense. *Dinsmore v State* (1901) 61 Neb 418, 85 NW 445.

-- any statements in the prosecuting attorney's file were nothing more than memoranda or the work product of the attorney which the defendant had no right to inspect. *Erving v State* (1962) 174 Neb 90, 116 NW2d 7, cert den 375 US 876, 11 L ed 2d 121, 84 S Ct 151.

-- a worksheet or file of an adverse party in a criminal case will not ordinarily be made available to the other party. *People v Marshall* (1958) 5 App Div 2d 352, 172 NYS2d 237, affd 6 NY 2d 823, 188 NYS2d 213, 159 NE2d 698.

-- a prosecution witness' statements obtained by the prosecuting attorney for his use in the prosecution of the defendant are not producible for use by the defense. *State v Rhoads* (1910) 81 Ohio St 397, 91 NE 186, 27 LRA NS 558; *State v Strain* (1948) 84 Ohio App 229, 39 Ohio Ops 289, 52 Ohio L Abs 533, 82 NE2d 10

*State v Miller* (1961, App) 88 Ohio L Abs 533, 176 NE2d 296, app dismd 172 Ohio St 554, 18 Ohio Ops 2d 93, 179 NE2d 53.

-- a prosecution witness' statement which constitutes a private memorandum of the prosecuting attorney need not be produced for inspection by the defendant. *State v Brake* (1921) 99 Or 310, 195 P 583.

<>

On the other hand, although recognizing that the impressions, observations, and opinions which an attorney has recorded and transferred to his file as a product of his investigation of a case in preparation for trial are a "work product" and therefore are protected from discovery processes, the court in *State ex rel. Polley v Superior Court of Santa Cruz County* (1956) 81 Ariz 127, 302 P2d 263, supra § 13[a], in upholding the trial court's order requiring the prosecution to produce a stenographic transcript of statements made by the defendant to the county attorney, rejected the prosecution's contention that the requested statements were a part of the "work product" of the attorney.

And in *State ex rel. Helm v Superior Court of Cochise County* (1961) 90 Ariz 133, 367 P2d 6, infra § 21[e], the court, in upholding an order requiring the prosecution to produce for pretrial inspection by the defendant a medical report of the results of a blood alcohol test, said that the present case did not involve an attempt to discover the "work product" of

the prosecution.

To the same effect is *State v Healey (1965, NH) 210 A2d 486*, supra § 8, wherein the court held that medical reports of a hospital relating to the defendant's confinement for observation as to his sanity could not be classified as the work product of the prosecution.

See *Thigpen v State (1977, Ala App) 355 So 2d 392*, affd (Ala) *355 So 2d 400*, § 16[a].

In first-degree murder prosecution arising from shooting death of employer, discovery rule was not violated even though defendant was not informed that police report disclosed by state did not exactly reflect eyewitness' understanding of events; however, discovery rule was violated where prosecutor did not disclose cryptic notes he took while interviewing eyewitness prior to trial, but that error was harmless where notes contained nothing not substantially disclosed prior to trial. *State v Jessen (1981) 130 Ariz 1, 633 P2d 410*.

See *State ex rel. Corbin v Superior Court of Maricopa County, 103 Ariz 465, 445 P2d 441*, § 11[a].

Trial court properly refused request of defendant that state turn over to him statement taken from 1 of its witnesses, as such statement was part of prosecuting attorney's "work papers." *Fisher v State, 241 Ark 545, 408 SW2d 894*, cert den *389 US 821, 19 L Ed 2d 73, 88 S Ct 43*.

Accused was not entitled to inspect prosecutor's file or records regarding prospective jurors. *People v Brawley, 1 Cal 3d 277, 82 Cal Rptr 161, 461 P2d 361*.

In prosecution for rape and kidnapping, trial court erred in denying defense motion for discovery of prosecutor's notes of interview with rape victim on ground that notes were attorney's work product where record indicated notes were simply summary of statements of rape victim of a nonderivative or noninterpretive nature. *People v Williams (1979, 2d Dist) 93 Cal App 3d 40, 155 Cal Rptr 414*.

See *Robinson v Superior Court of Los Angeles County (1978) 76 Cal App 3d 968, 143 Cal Rptr 328*, § 16[a].

In criminal proceeding, discovery by defendant of oral and written statements made by any witness to any inspector or attorney of district attorney's office was not prevented by privilege against disclosure of attorney's work product, where, even though statements sought to be discovered were work-product, there was no statutory or case authority shielding them from discovery. *Craig v Superior Court in and for Alameda County, 54 Cal App 3d 416, 126 Cal Rptr 565*.

In prosecution for lewd and lascivious acts on child, prosecution's file containing results of interviews deputy district attorney had had with witnesses concerning credibility of children involved did not constitute work product where record established that deputy talked to witnesses because he was asked to do so by defense, he acted on information supplied by defense and he interviewed witnesses long before cause was set for trial; in addition, denial of discovery would unfairly prejudice trial preparation of defense. *People v Moore, 50 Cal App 3d 989, 123 Cal Rptr 837*.

Notes made by district attorney of an interview with prosecuting witness, which notes were intended by district attorney to guide him in direct examination of witness, were "work sheets" made in preparation for trial, and court did not err in refusing to order district attorney to produce such notes for inspection by defendant. *Rapue v People (Colo) 466 P2d 925*.

Defendant was not entitled to pretrial inspection of state's file in order to determine for himself whether or not any material therein was exculpatory. *State v. Milardo*, 6 Conn. Cir. Ct. 430, 274 A.2d 890 (App. Div. 1970).

See *Robertson v State (Fla App)* 262 So 2d 692, § 16[a].

See *Dixon v State (Fla App)* 261 So 2d 205, § 16[a].

Trial court order requiring state, in prosecution for making and uttering worthless check, to provide defendant not only with copies of all checks passing between defendant and victim, but also those passed between defendant and victim's wife, and also requiring state to make available for copying all notes made of interviews with witnesses, and all written, stenographically recorded, or otherwise recorded notes in possession of state, was not authorized by applicable rules; such order would be appropriate and meet requirements of rules if limited to all checks passing between defendant and victim prior to date of check giving rise to proceedings, and statements or alleged confessions of defendant, whether signed or unsigned and whether written, stenographically recorded, or otherwise recorded. *State v O'Steen (Fla App)* 213 So 2d 751.

See *State v McCall (Fla App)* 186 So 2d 324.

In prosecution charging husband with murdering his wife, trial court erred by refusing to conduct in-camera inspection of prosecutor's file following filing of four-page pretrial discovery motion, which included general request for Brady material, but error was nonprejudicial. State could have avoided necessity for in-camera inspection by opening State's files to defendant without judge's examination, but there was no requirement that prosecutor do so. *Reed v State (1982)* 249 Ga 52, 287 SE2d 205.

See *Wilson v State (1980)* 246 Ga 62, 268 SE2d 895, § 11.

In prosecution for murder and assault, trial court did not err in failing to require state to produce work product of district attorney, address and telephone numbers of state's witnesses, in camera inspection of all reports, memoranda and documents in files of all law enforcement officers, and names and addresses of any other persons with knowledge of facts, as requested in defendant's "notice to produce." *Natson v State (1978)* 242 Ga 618, 250 SE2d 420, cert den (US) 60 L Ed 2d 399, 99 S Ct 2036.

Trial court did not err in denying defendant's motion for in camera inspection of district attorney's files for discovery purposes in armed robbery prosecution where there was no showing that lack of information impaired defense. *Gravitt v State (1977)* 239 Ga 709, 239 SE2d 149.

Defense counsel's motion for an in camera inspection of district attorney's file prior to trial in order to discover evidence favorable to defendant about background of state's witness was not erroneously denied, where, district attorney had provided defense counsel with copy of record of previous trial of state's witness, which incorporated everything state had on such witness, and where defense counsel had adduced lengthy revelation of such witness' background of criminal activity on cross examination; although defendant had no right to inspect prosecuting attorney's file before trial, district attorney was obliged to disclose evidence that could be helpful to defendant. *Strong v State*, 232 Ga 294, 206 SE2d 461.

Motion by accused for documents, statements, memoranda, reports, and all similar matters in possession of prosecution relating to subject matter of case amounted, in effect, to request to inspect file of prosecutor and would therefore be denied. *White v State (Ga)* 196 SE2d 849, app dismd 414 US 886, 38 L Ed 2d 134, 94 S Ct 222, reh den (US) 38 L Ed 2d 491, 94 S Ct 607.

Defendant who, prior to trial, could point to nothing materially exculpatory which had been suppressed had no right to discovery under Brady principle, and trial court did not err in denying defendant's motion for discovery without making an in camera review to determine whether state's files contained any exculpatory or other evidence which should be disclosed. *Baltimore v State* (1983) 165 Ga App 741, 302 SE2d 427.

Defendant charged with murdering his father had no right to pretrial discovery of police reports and investigation reports made in course of preparing case against him, nor could defendant obtain copies of statement of witnesses in prosecutor's files. *Stanley v State* (1980) 153 Ga App 42, 264 SE2d 533.

See *Simmons v State* (1979) 152 Ga App 643, 263 SE2d 522, § 7.

Accused had no right to have state's file. *Hamilton v State* (1978) 146 Ga App 884, 247 SE2d 551.

Prosecution records showing how persons named on jury panel voted in past on civil and criminal cases were not discoverable as "exculpatory evidence" within meaning of *Brady v Maryland*. *Toole v State* (1978) 146 Ga App 305, 246 SE2d 338.

Trial court did not abuse discretion in dismissing motion to compel state to disclose exculpatory matters where prosecution informed court that it had no exculpatory evidence in its possession and did not know of existence of any such evidence and where trial court called recess and conducted in camera inspection of state's entire file to determine whether any exculpatory evidence existed. *Barnes v State* (1978) 145 Ga App 38, 243 SE2d 302.

Prosecution was not required to open its files for general inspection or for pre-trial discovery. *Collins v State* (1977) 143 Ga App 583, 239 SE2d 232, overruled on other grounds by *Plemons v State* (1980) 155 Ga App 447, 270 SE2d 836 (setting forth criteria and procedures for in camera inspection of exculpatory material where defendant's counsel is not granted opportunity to review state's files).

See *People v Szabo* (1983) 94 Ill 2d 327, 68 Ill Dec 935, 447 NE2d 193, § 16[c].

Handwritten notes made by assistant State's Attorney during her initial interview with woman complaining of rape constituted work product exempt from pretrial discovery. *People v Lane* (1982) 106 Ill App 3d 793, 62 Ill Dec 678, 436 NE2d 704.

See *People v Stevens* (1981) 102 Ill App 3d 773, 58 Ill Dec 389, 430 NE2d 331, § 9[f].

See *People v Manley*, 19 Ill App 3d 365, 311 NE2d 593, supra § 11[d].

Trial court abused discretion by ordering prosecutor to make pretrial disclosure, in "Joint Report of Trial Readiness," of, inter alia, each witness' expected testimony with respect to each element of each offense charged, whether state would use prior criminal record of defendant, and whether state would use prior acts or convictions as evidence of intent, knowledge, or notice, since, though scope of discovery permitted in criminal cases is increasing, order significantly encroached on protection extended to work product of attorneys. *State ex rel. Meyers v Tippecanoe Superior Court* (1982, Ind) 438 NE2d 989.

Criminal defendant's right of discovery includes right to names of witnesses who will be used to support prosecution's case. *Ortez v State* (Ind App) 333 NE2d 838.

Trial judge, in prosecution for arson and manslaughter, properly denied defendant's request to examine prosecutor's transcription of tape recordings of notes and memoranda of his investigation where judge examined this transcription and determined that it contained only privileged entries which were not properly discoverable. *Hendley v*

*Commonwealth* (1978, Ky) 573 SW2d 662.

In prosecution for first-degree murder and aggravated rape, trial judge did not err in failing to order state to comply with defendant's request to discover entire prosecution file, including names of all witnesses state intended to use at trial, where state statute did not require State to allow defendant to inspect entire file, defendant has not usually been held to be entitled to names of state's witnesses, and mere chance that full inspection would reveal Brady material did not justify fishing expedition through state's file. *State v Loyd* (1982, La) 425 So 2d 710.

State's failure to furnish pre-trial discovery of prosecutor's file and of written statements of witnesses did not, in absence of showing that exculpatory evidence was withheld, afford ground for reversal. *State v Taylor* (La) 324 So 2d 425.

See *State v Thomas* (La) 290 So 2d 317, § 8.

See *State v Gray* (La) 286 So 2d 644, § 4[a].

In prosecution for drug-related offenses, trial judge did not abuse his discretion when he denied defendant's motion for information compiled by district attorney's staff for their own use about conviction record of juries on which venire members had sat, where motion was not supported by affidavit as required by state rule; additionally prosecutor's staff's "work product" could be protected from discovery. *Commonwealth v Barber* (1982) 14 Mass App 1008, 441 NE2d 763, app den 388 Mass 1101, 445 NE2d 156, habeas corpus proceeding (CA1 Mass) 772 F2d 982, different results reached on reh, en banc (CA1) 772 F2d 982, 19 Fed Rules Evid Serv 215 and cert den 475 US 1050, 89 L Ed 2d 580, 106 S Ct 1272.

Defendant had no constitutional or statutory right to see jury dossiers compiled by prosecutor from public records. *People v McIntosh*, 400 Mich 1, 252 NW2d 779.

Accused has right to discover prosecutor's dossier regarding prospective jurors upon request, but such right is subject to limitations (1) that defendant must also reveal his own investigative report regarding jurors, and (2) that if prosecutor believes that his file contains materials protected under "work product" doctrine, he may request in camera inspection and determination by trial judge. *People v Aldridge*, 47 Mich App 639, 209 NW2d 796 (citing annotation).

Trial court did not err in refusing to force state to disclose any deal or promise it made with codefendant who testified for state where there was no evidence in record to support contention that codefendant's testimony implicating defendant was result of any promise of leniency by any representative of state or by anyone else. *Nealy v State* (1978, Miss) 354 So 2d 788.

Defendant's request seeking names and addresses of three potential witnesses who were unable to identify him at a "lineup" was granted, since failure to identify defendant as person who perpetrated crime is evidence that is exculpatory in nature, and notwithstanding that People maintain that they intend to call witnesses at trial and therefore names and addresses need not be disclosed, possibility does exist that People may choose not to produce any of witnesses who are unable to identify defendant, and this would deprive him of his constitutional right of confrontation. *People v Anderwkavich* (1982) 117 Misc 2d 218, 457 NYS2d 718.

In prosecution for violating town zoning ordinance defendants were entitled to discover names and addresses of witnesses. *People v Wayman* (Misc) 371 NYS2d 791.

See *People v Rice*, 76 Misc 2d 632, 351 NYS2d 888, § 11[m].

Names and addresses of prospective state witnesses were not subject to pretrial discovery, particularly where defendant made no showing of materiality and reasonableness of such request. *People v Hvizd*, 70 Misc 2d 654, 334 NYS2d 534.

Worksheets and files of adverse party in criminal case will not ordinarily be made available to other party. *People v McDonald*, 59 Misc 2d 311, 298 NYS2d 625.

District attorney's notes of statements of witnesses are not proper subject for discovery and inspection. *People v Powell*, 49 Misc 2d 624, 268 NYS2d 380.

In camera hearing was required to determine whether prosecutor's notes of interviews with prosecution witnesses contained statements of those witnesses that related to subject matter of their testimony, and defense was entitled to discover all prior statements of prosecution witnesses relating to subject matter of their testimony even in face of "work product" objection. *People v Jones* (1983, 4th Dept) 91 App Div 2d 1175, 459 NYS2d 144, later op (4th Dept) 96 App Div 2d 1147, 468 NYS2d 93.

In prosecution for sexual abuse in first degree, where defendant's attorney moved for order directing people to inform defendant of any previous criminal, vicious or immoral acts which they intended to use in cross-examination if defendant should take stand, prosecution was under no duty to open its file to defendant in absence of any particularization in defendant's oral motion for information concerning prior "bad acts." *People v Trivison* (1977) 59 App Div 2d 404, 400 NYS2d 188.

In prosecution for misdemeanor possession of weapon, refusal by trial court after in camera inspection to turn over notes prosecuting attorney may have made of statements of police officer witness was error where it was conceded that certain statements should have been turned over prior to cross-examination and proof of guilt in case was not overwhelming. *People v Flores* (1977) 57 App Div 2d 783, 394 NYS2d 670.

See *People v Boone* (App Div) 370 NYS2d 613, § 4[b].

Trial court properly denied application of defendant charged with selling dangerous drug for order directing district attorney to furnish all records, memoranda, or notes relating to services of all informants, since defendant knew name of informant and identity of individual to whom defendant allegedly sold drug; moreover, to be entitled to any additional information from prosecution file there must be demonstration that it exists and is material and necessary for defense, and there was nothing in instant record to demonstrate that file contained any such evidence. *People v Carter*, 33 App Div 2d 659, 305 NYS2d 384.

In murder prosecution, defendant was not entitled to new trial based on trial court's denial of portion of his pretrial discovery motion and State's failure to provide certain requested information, since there is no common-law right to discovery in criminal cases and categories of information discoverable are those contained within state statute, defendant was not entitled to list of State's witnesses nor their statements under statute, and defendant's motion for discovery of total and complete investigative files of all law-enforcement agencies which took part in investigation was properly denied as such files constituted work product of said law-enforcement agencies and were not open to discovery. *State v Alston* (1983) 307 NC 321, 298 SE2d 631.

Where investigating agent interviewed defendant and made notes but no written statement was taken, notes constituted work product and were not discoverable. *Curtis v State* (Okla Crim) 518 P2d 1288.

See *Trowbridge v State* (Okla Crim) 502 P2d 495, supra § 16[a].

Pretrial inspection of FBI "rap sheet" of homicide victim was denied, where district attorney denied having such in his possession, or that such would be used in evidence at defendant's trial, and because such report was more in nature of work product of prosecution rather than technical report containing information otherwise unavailable to defendant. *Doakes v District Court of Oklahoma County* (Okla Crim) 447 P2d 461.

See *State ex rel. Dooley v Connall (Or)* 475 P2d 582, § 4[b].

In prosecution for murder, trial court erred in refusing to allow defendant pretrial discovery of investigatory notes taken by "prosecuting officer" when interviewing state witnesses, since portions of notes containing verbatim or substantially verbatim statements relevant to case should be available so as to enable defendant to present argument concerning which notes could have been used by defendant. *Commonwealth v Walters (1982)* 303 Pa Super 203, 449 A2d 649.

Trial court erred in refusing to order production of notes taken by assistant district attorney of interview with witnesses. *Commonwealth v Billig (1979, Pa Super)* 399 A2d 735.

Defendant was not entitled to examine investigation report used by prosecuting attorney in his selection of jury in absence of showing of exceptional circumstances. *Commonwealth v Galloway (Pa Super)* 352 A2d 518.

See *Com. v Foster, 219 Pa Super* 127, 280 A2d 602, § 27.

It was error for trial court to require state to open its file to defendant for unlimited discovery. *State v Smart (1980)* 274 SC 303, 262 SE2d 911, appeal after remand 278 SC 515, 299 SE2d 686, cert den 460 US 1088, 76 L Ed 2d 353, 103 S Ct 1784, habeas corpus proceeding (DC SC) 677 F Supp 414, affd (CA4 SC) 856 F2d 609, different results reached on reh, en banc (CA4 SC) 873 F2d 1558, cert den 493 US 867, 107 L Ed 2d 144, 110 S Ct 189.

Trial court did not commit fundamental error by failing to require state to disclose evidence concerning "misidentification" contained in prosecutor's file where review of record and police offense report showed no favorable or material evidence was withheld. *Jackson v State (Tex Crim)* 548 SW2d 901.

Discovery statute did not allow broad exploration of prosecution files for exculpatory or mitigating evidence where there was no showing that matters sought to be discovered were material or that items sought were in possession of prosecution and were being withheld. *Mott v State (Tex Crim)* 543 SW2d 623.

See *Smith v State (Tex Crim)* 468 SW2d 828, § 7.

See *Smith v State (Tex Crim)* 455 SW2d 748, § 16[a].

See *Smith v State (Tex Crim)* 409 SW2d 408, cert den 389 US 822, 19 L Ed 2d 73, 88 S Ct 45 § 7.

In prosecution for armed robbery, defendant was not entitled to discovery of names, telephone numbers, and addresses of all persons known to prosecution or its investigators having information about charges against defendant, where single argument advanced by defendant in support of discovery was that requested information would enable defense to search for potential exculpatory evidence possibly overlooked or not fully developed by State, trial court ordered prosecution to disclose all exculpatory evidence, and list of prosecution's witnesses was made available to defendant; trial court did not abuse discretion in refusing discovery request. *State v Dye (1982, W Va)* 298 SE2d 898.

[\*19] Transcript of testimony given at preliminary hearing

In some cases the court refused to permit the defendant to inspect a transcript or record of the testimony taken at the preliminary hearing of the case which was in the possession of the prosecution.

In *People v Murphy (1952)* 412 Ill 458, 107 NE2d 748, cert den 344 US 899, 97 L ed 695, 73 S Ct 281, cert den 350 US

865, 100 L ed 767, 76 S Ct 108, it was held not error for the trial court to deny the defendant's motion to require the prosecuting attorney to produce a record of the preliminary hearing before the police magistrate, which the defendant believed to be in the possession of the prosecuting officer. The court said that a defendant has no inherent right to demand information which he believes may possibly be in the personal files of the prosecuting attorney; and that in any event such motion is addressed to the sound discretion of the court, and only where it is made to appear that the defendant cannot properly prepare his defense "without a bill of particulars will the court require the prosecution to furnish one."

In *State v Gloyd* (1938) 148 Kan 706, 84 P2d 966, it was held not error for the trial court to refuse to order the prosecuting attorney to deliver to the defendant a transcript of the testimony taken at the preliminary hearing. The court rejected the defendant's argument that because the prosecuting attorney had the testimony transcribed by a court reporter, the transcript was an official document.

In *Territory v McFarlane* (1894) 7 NM 421, 37 P 1111, it was held not error to deny the defendant's motion, filed at the commencement of the trial, for an order requiring the prosecution to produce, for the inspection by the defendant at the trial, a transcript of the testimony taken at the preliminary hearing before the justice of the peace, the court stating that "we know of no statute requiring the production of the testimony on preliminary hearing for the inspection of the defendant."

See also *Commonwealth v Brown* (1894) 90 Va 671, 19 SE 447, supra § 18, wherein the court upheld the refusal to compel the prosecuting attorney to furnish the defendant with certain stenographic notes of the evidence taken before the examining magistrate.

Attention is also called to *State v Herman* (1935) 219 Wis 267, 262 NW 718, supra § 3 (upholding the denial of inspection of a transcript of the testimony given at a so-called John Doe hearing on a complaint which was related to the present prosecution).

<>

On the other hand, it has been held in California cases that the defendant is entitled to a transcript of the evidence taken before the committing magistrate under § 870 of the California Penal Code.n156 *People v Pierce* (1939) 14 Cal 2d 639, 96 P2d 784; *People v Roberts* (1953) 40 Cal 2d 483, 254 P2d 501; *People v Gilbert* (1938) 26 Cal App 2d 1, 78 P2d 770; *People v Yant* (1938) 26 Cal App 2d 725, 80 P2d 506; *People v Corica* (1942) 55 Cal App 2d 130, 130 P2d 164; *People v Jones* (1943) 61 Cal App 2d 608, 143 P2d 726, app dismd and cert den 323 US 665, 89 L ed 541, 65 S Ct 39.

And in *Jackman v State* (1962, Fla App) 140 So 2d 627, it was also recognized that a defendant is entitled to inspect a transcript of statements of prosecution witnesses taken by the prosecution before a magistrate.n157

<>

In prosecution for shooting, defendant's contention that state suppressed preliminary hearing testimony regarding victim's chest wound, thus suppressing evidence favorable to defendant, was unsupported where record showed that defendant was represented by same counsel at both preliminary hearing and trial and where preliminary hearing transcript was public record, thus as available to defendant and his counsel as to prosecutors. *De Berry v Wolff* (CA8 Neb) 513 F2d 1336.

In murder prosecution, refusing demand for production of all material and information held by prosecution, but requiring production of all statements, reports, notes, and charts of all witnesses who testified at preliminary hearing, as

well as alleged confession of defendant, was proper. *Sanders v State*, 278 Ala 453, 179 So 2d 35.

Defendant's motion requesting court to require state to produce grand jury minutes and testimony was properly denied where no transcription or other record of grand jury proceedings was kept. *Steward v State (Ala App)* 314 So 2d 313, writ denied 314 So 2d 317.

Under California law, the accused had right to examine transcript of preliminary hearing prior to trial and to object to its introduction in evidence. *U. S. ex rel. Machado v. Wilkins*, 351 F.2d 892 (2d Cir. 1965) (applying California law).

See *Cummings v State*, 226 Ga 46, 172 SE2d 395, § 17.

Georgia law does not provide for furnishing to accused abstract of evidence made at committal hearing. *Brown v State*, 223 Ga 76, 153 SE2d 709.

It was not error for trial judge to require production of preliminary-hearing transcript only if one existed where defendant did not establish that court reporter was present at preliminary hearing to record proceeding and where defendant was supplied with information concerning identification made at hearing and where he failed to demonstrate that there existed any notes or recorded recollections of testimony given at hearing and where there was no indication that state withheld any evidence favorable to him; nor was it error for state to fail to produce photographs viewed by victim and information concerning viewing of suspects on closed-circuit television where defendant made no claim that he was present at television viewing and where defendant failed to establish possibility that his picture was in possession of police at time victim viewed photographs. *People v Camel*, 59 Ill 2d 422, 322 NE2d 36.

Assignment of error charging that defendant, convicted of robbery, was denied copy of transcript of preliminary hearing overruled where no demand was made on court but only on court reporter, where no prejudice was shown, and where state procedure did not require preliminary hearing or that transcript be taken. *State v Maxwell (Mo)* 400 SW2d 156.

Defendant had right to minutes of preliminary hearing regardless of nature or quantum of proof against him, and since availability of transcript of minutes is fundamental constitutional right, where minutes no longer existed, indictment was dismissed. *People ex rel. Hairston v Adult Detention Center*, 76 Misc 2d 1010, 352 NYS2d 326.

Defendant in prosecution for felonious possession of weapon was entitled to preliminary hearing minutes relating to crime allegedly committed. *People v Colon*, 43 App Div 2d 676, 350 NYS2d 141.

[\*20] Transcript or report of coroner's inquestn158

In some cases the defendant was permitted to inspect the coroner's report or a transcript of the testimony taken at the coroner's inquest which was in the possession of the prosecution.

In *State v Hinkley (1910)* 81 Kan 838, 106 P 1088, it was held that the defendant was entitled to inspect before trial a transcript of the testimony taken at the coroner's inquest, which was then in the possession of the prosecution. Noting that the transcript in question was a record which the law required to be filed in the office of the county clerk and which the defendant had as much right to examine as counsel for the prosecution, and pointing out that for some reason it had never been filed with the county clerk but remained in the possession of the prosecuting attorney, the court said that it was doubtful if any excuse could be urged for depriving the defendant of the right to inspect such a record, unless it was founded in the mistaken notion of the rights of a person accused of crime and the relations which the prosecution bore toward such a person.

In *People v Giles (1961)* 31 Misc 2d 354, 220 NYS2d 905, wherein the defendant was charged with murder on a short-form indictment, the court, without elaborating, held that "in fairness to the defendant he should be entitled to a

*reasonable* examination as to coroner's reports and other medical reports" (which were apparently in the possession of the prosecution).

See also *Mohler v Commonwealth* (1922) 132 Va 713, 111 SE 454, supra § 9[e], holding that under the circumstances of the case a transcript of the evidence taken at the coroner's inquest should be produced by the prosecution for inspection by the defendant.

<>

On the other hand, the denial of the defendant's request, made during the trial, for an order requiring the prosecution to deliver to the defendant a copy of a transcript of the testimony taken at the coroner's inquest on the afternoon of the homicide involved was held not error in *State v Hooper* (1934) 140 Kan 481, 37 P2d 52, where it appeared that the coroner's inquest was not completed and no verdict was returned by the coroner's jury, and that the transcript sought by the defendant was not taken by the order or at the request of the coroner, but was taken by an attorney who, acting for the county attorney in his absence, asked a stenographer to take down the testimony at the coroner's inquest, which was later transcribed and delivered to the county attorney. The court pointed out that the document in question was not an official document nor a part of any court record.

[\*21] Medical, psychiatric, or hospital report or record

[\*21a] Generally

In at least one New Jersey case it was held that "the State's objective documents, such as autopsy reports, hospital reports and other scientific and laboratory reports, including chemical analyses, blood tests, etc.," should be produced for inspection by the defense, at least where there is no showing by the state that its prosecution would be improperly hampered. See *State v Cook* (1965) 43 NJ 560, 206 A2d 359, supra § 11[g].

And in the following New York cases the defendant was permitted to inspect medical reports or hospital records concerning the case which were either in the possession or under the control of the prosecution.

Attention is also called to *Powell v Wiman* (1961, CA5 Ala) 287 F2d 275, later app 293 F2d 605, supra § 4[b], wherein it was held that the state's refusal to disclose a psychiatrist's report or other information tending to show the insanity of an accomplice who had testified for the state was a denial of the defendant's right to due process under the circumstances of the case.

In *People v Preston* (1958) 13 Misc 2d 802, 176 NYS2d 542, the court, concluding that "physical objects, documents, hospital reports, chemical analyses, blood tests and related reports" may be made available to a defendant in the discretion of the court before trial, granted the defendant's motion for permission to inspect hospital records concerning treatment of the victim of the alleged offense before his death, and certain portions of a medical examiner's autopsy report with respect to his findings and conclusions as to the cause of death (which documents and papers appeared to be either in the possession or under the control of the prosecution). The court said that to grant a request of inspection, it need only appear that the requested material is relevant, competent, and outside any exclusionary rule.

Similarly, in *People v Wilson* (1959) 17 Misc 2d 349, 183 NYS2d 669, the defendant's motion for discovery of any "charts, bed records, hospital records and all clinical records" of a certain hospital relating to the care and treatment of the victim of the alleged homicide was granted, where the affidavit in support of the motion alleged that such records were either in the possession or under the control of the district attorney. The court pointed out that the granting of the motion did not require the prosecuting attorney to disclose evidential facts prior to trial, and that the requested records, or at least portions of them, were admissible in evidence.

Medical reports which were apparently in the possession of the prosecution were also held producible for inspection by the defense in *People v Giles (1961) 31 Misc 2d 354, 220 NYS 2d 905, supra* § 20.

◇

On the other hand, in *State v Superior Court (1965, NH) 208 A2d 832, 7 ALR3d 1, supra* § 3, it was held that laboratory and chemical reports made as a part of the state's investigation were not subject to pretrial discovery.

And the trial court's refusal to require the prosecuting attorney to produce, for inspection by the defense, reports of certain named doctors was upheld in *Freeman v State (1958) 166 Tex Crim 626, 317 SW2d 726, supra* § 13[c].

◇

Denial of motion for production of hospital records was not error in murder prosecution where request for such records was part of general demand for production of information held by prosecution, where production as to statements made at preliminary hearing was granted. *Sanders v State, 278 Ala 453, 179 So 2d 35.*

See *People v Wilken (1980) 89 Ill App 3d 1124, 45 Ill Dec 489, 412 NE2d 1071, § 17.*

See *State v Morton (1979, Me) 397 A2d 171, § 11.*

In homicide prosecution trial court properly denied defendant's motion for discovery of psychiatric records of hospital relating to key prosecution witness' possible treatment there where material was as accessible to defendant as to attorney for state. *State v Heald (1978, Me) 393 A2d 537.*

Defendant had no constitutional or statutory right to see jury dossiers compiled by prosecutor from public records. *People v McIntosh, 400 Mich 1, 252 NW2d 779.*

Trial court did not err in denying motion for production of psychiatric report on chief prosecution witness where defense knew of such reports but didn't subpoena doctors for purpose of offering reports in evidence, and where witness himself testified as to his homicidal compulsions and that he had been committed to hospital as manic-depressive. *People v McGath, 31 Mich App 351, 187 NW2d 904.*

Defendant charged with conspiracy to commit first-degree robbery was properly denied, based on confidentiality, pretrial discovery of results of polygraph examination and mental examination of coconspirator who testified for prosecution. *State v Moore (1982, Mo App) 642 SW2d 917.*

In prosecution for rape, trial court properly denied defendants' motion to compel state to disclose records that it had obtained with consent of prosecutrix from methadone clinic at which prosecutrix was being treated at time of incident, where defendants failed to follow proper procedure to obtain such records; additionally, defendants received all information that court could have ordered to be disclosed. *State v Walker (1982, Mo App) 639 SW2d 854.*

Criminal defendant was not entitled to reports of psychiatric examinations of his accomplices. *State v Doepke (Mo App) 536 SW2d 950.*

See *State v Williams, 183 Neb 257, 159 NW2d 549, § 17.*

Defendant was entitled to discovery of medical reports and records and police reports by prosecutor's office and pretrial intervention coordinator, where he had been denied admission to pretrial intervention program but was not informed as to what reports were relied upon in rejecting him, and where his motion for discovery was limited to materials contained in his own file and presumably considered by program coordinator. Alleged inconvenience of duplicating materials in defendant's file did not justify refusal to provide access to these materials. *State v Barath (1979) 169 NJ Super 181, 404 A2d 373, § 21[a]*.

Criminal defendant is entitled to discovery and inspection of psychiatric, psychological and medical records of complaining witness which contain information which may have some bearing on witness' credibility and on his ability to perceive events in issue, to remember such happenings and to recount facts concerning the same; people may not in any criminal case withhold evidence which could conceivably disprove or tend to disprove defendant's guilt and, moreover, hospital records containing history of witness' mental illness, confinement and treatment may even be admitted as evidence-in-chief as an aid to jury assessment for credibility of that witness. *People v Acklin (1980) 102 Misc 2d 596, 424 NYS2d 633*.

In burglary and petit larceny prosecution, defendant was entitled to discovery of complainant's medical records where complainant suffered from long-standing, ongoing mental condition, complainant was sole eyewitness to crime, and where such mental condition could effect accuracy, perception and comprehension of complainant's testimony; however, defendant was not entitled to pretrial psychiatric examination of complainant absent substantial showing of need and justification. *People v Lowe (1978) 96 Misc 2d 33, 408 NYS2d 873*.

See *People v Player, 80 Misc 2d 177, 362 NYS2d 773, § 11[m]*.

Defense request for any hospital records or physicians' reports concerning injuries allegedly sustained by complainant and for any statements, notes, or memoranda, sworn or unsworn, made by any defendant or witnesses was too broad; in view of failure of defense to show existence, materiality, and competency of matters sought to be disclosed, relief was denied. *People v Johnston, 55 Misc 2d 185, 285 NYS2d 243*.

Considering "relatively lengthy period of time" between accident and death of decedent (17 days) and medical issue raised as to causal relationship, court found that defendant alleged sufficient facts to warrant examination of hospital record for submission to medical expert in advance of trial. *People v Christiano, 53 Misc 2d 433, 278 NYS2d 696*.

Fact that state conducted additional test on medical samples obtained in rape case without defendant's knowledge was not a disclosure violation when the results of test were made known to defense counsel the day after state learned of results. *Gregg v State (1983, Okla Crim) 662 P2d 1385*.

In murder prosecution, state's failure under court order to produce medical records or witness who testified against defendant and who had history of drug abuse and psychological problems, did not require reversal where there was strong circumstantial evidence of guilt and it could not be said as matter of law that medical records would have been outcome-determinative in case. *Marshall v State (1980, SD) 305 NW2d 838*.

Defendant in prosecution for burglary and assault and battery was entitled to have trial court make in camera inspection of medical and hospital records of prosecutrix where she had been treated repeatedly for emotional disturbances of psychotic proportions and mental condition of prosecuting victim may have had direct bearing on credibility of her testimony. *State v Brown (1977, Tenn) 552 SW2d 383*.

Trial court erred in not allowing defendant use of psychiatric report made by F. B. I. agent during trial, but error was harmless when witness' testimony was entirely consistent with prior statement and almost all information contained in statement was developed during trial. *Ogle v State (Tex Crim) 548 SW2d 360*.

Trial court properly denied defendant's motion for disclosure of psychiatric reports concerning mental health of informant where reports contained no information material to preparation of defense. *State v Kasper* (1979) 137 Vt 184, 404 A2d 85.

While under some circumstances child welfare agency records of complaining witness in criminal case might be obtained by proper application to juvenile court, trial court did not err in refusing request of defendant charged with having sexual intercourse with a child to inspect records of complaining witness' general guardian, a licensed child welfare agency, pertaining to mental condition of complaining witness, nor did court err in denying motion to require state to turn over whatever records it might have concerning mental condition of witness. *State v Miller*, 35 Wis 2d 454, 151 NW2d 157.

State was required to advise defendant of fact that witness had been previously been hypnotized and to make all statements and proceedings relative thereto available to defendant on request. This requirement goes beyond those concerning discoverable materials for purposes of impeachment, and discoverable statement of witnesses under state discovery rules. *Gee v State* (1983, Wyo) 662 P2d 103.

[\*21b] Report of autopsy or post-mortem examination 159

In a number of cases the defendant was permitted to inspect a report of the autopsy performed on the body of the victim of the alleged homicide, which report appeared to be either in the possession or under the control of the prosecution.

The view that ordinarily an accused is entitled to inspection of an autopsy report in the possession of the prosecution was also taken in *State ex rel. Regan v Superior Court* (1959) 102 NH 224, 153 A2d 403, supra § 8, *State v Superior Court* (1965, NH) 208 A2d 832, 7 ALR3d 1, supra § 3, and *State v Cook* (1965) 43 NJ 560, 206 A2d 359, supra § 11[g].

An order granting the defendant's pretrial motion for permission to inspect the record of a medical examiner containing his findings as to the autopsy performed on the body of the victim of the alleged homicide was upheld as proper in *Silver v Sobel* (1958) 7 App Div 2d 728, 180 NYS2d 699. Noting that the trial court had power to grant a motion for inspection of documents in the possession of the prosecution which were admissible in evidence on the trial, the court said that since the findings contained in the autopsy report were admissible in evidence, the granting of the motion in question was within the discretion of the trial court.

Where a defendant was indicted for manslaughter on the charge that she had caused the death of a pregnant female by administering a liquid solution of creosol and soap, it was held in *People v Munoz* (1960) 11 App Div 2d 79, 202 NYS2d 743, affd 9 NY2d 638, 210 NYS2d 533, 172 NE2d 291, that in a case of this kind the trial court in the exercise of a proper discretion should have granted the defendant an inspection of the autopsy findings. (However, the trial court's failure to do so was held not so prejudicial as to require a new trial.)

See also *People v Preston* (1958) 13 Misc 2d 802, 176 NYS2d 542, supra § 21[a], wherein the court permitted the defendant to inspect certain portions of a medical examiner's autopsy report.

In *People v Higgins* (1960) 21 Misc 2d 94, 196 NYS2d 222, the defendant's motion for permission to inspect the medical examiner's autopsy report, which was in the possession of the prosecution, was granted, the court stating that although the moving papers failed to meet the standard requiring that the cause of death be an issue, the motion was nevertheless granted in the exercise of its discretion in view of the fact that the findings contained in the autopsy report were admissible in evidence.

In *People v Stokes* (1960) 24 Misc 2d 755, 204 NYS2d 827, a prosecution for murder, the court, being satisfied from the facts that a medical examiner's autopsy report on the victim of the alleged homicide might be material in determining the issue of self-defense raised by the defendant, directed in the exercise of its discretion that the district attorney should

furnish the defendant's counsel with a transcript of the report.

In *People v Courtney* (1963) 40 Misc 2d 541, 243 NYS2d 457, the court, stating that the autopsy report, while not necessarily open to public inspection, is a record made by a public official for a public purpose and filed in a public office, and therefore is admissible in evidence, held that a copy of the report of an autopsy performed on the body of the victim of the alleged homicide should be produced for inspection by the defendant prior to trial, in the absence of special circumstances warranting a denial as to any portion thereof. (The court's discussion was based on the assumption that the requested report was in the possession or under the control of the prosecution.)

In *State v Thompson* (1959) 54 Wash 2d 100, 338 P2d 319, the court, sustaining an order requiring the prosecuting attorney to produce all reports of an autopsy performed upon the victim of the alleged homicide, on the ground that there was no abuse of discretion in the trial court's ruling, rejected the prosecution's contention that in view of the statute providing that reports and records of autopsies or post-mortem examinations should be "confidential," except to the prosecuting attorney, law enforcement agencies having jurisdiction, and the state department of labor and industries where it has requested the autopsy, the autopsy report was privilege and beyond the process of the court. Noting that the use of the word "confidential" did not necessarily show that it was the legislative intention that this word should have the same import as the word "privileged," and stating that the intention of the legislature to place the autopsy report in a class which was not subject to judicial inquiry or process could not be determined by the word "confidential" as used alone in the statute relied on by the prosecution, and that the legislative intent must be gleaned from an examination of the enactment in its entirety, the court concluded that in view of another section of the statute providing that "any party by showing just cause may petition the court to have autopsy made and results thereof made known to said party at his own expense," the right to an autopsy was lodged within the discretion of the trial court. As to *State v Petersen* (1955) 47 Wash 2d 836, 289 P2d 1013, wherein the court, in passing on the question whether the lower court had the authority to enter an order permanently abating the criminal proceeding for the reason that the prosecution had not complied with an order requiring it to furnish to the defendant a copy of an autopsy report, indicated that the autopsy report was not amenable to court process, the court in the Thompson Case said that in the Petersen Case "our observations relative to autopsies were not necessary to the result and were therefore dictum and may be disregarded."

See also *State v Olsen* (1959) 54 Wash 2d 272, 340 P2d 171, wherein the court, in upholding an order requiring a coroner to deliver to the defendant a copy of the report of an autopsy performed on the victim of the alleged homicide, said that insofar as the state was concerned the question under consideration was answered by the decision in *State v Thompson* (1959) 54 Wash 2d 100, 338 P2d 319, supra, in which case "we held that it was within the discretion of the trial court to determine whether the alleged criminal defendant. . . should be entitled to a copy of an autopsy report."

◇

In the following cases, on the other hand, the court refused to permit the defendant to inspect the report of an autopsy or post-mortem examination which appeared to be either in the possession or under the control of the prosecution.

For other cases wherein the court refused to permit the defendant to inspect an autopsy report which was in the possession of the prosecution, see *Commonwealth v Jordan* (1911) 207 Mass 259, 93 NE 809, affd 225 US 167, 56 L ed 1038, 32 S Ct 651, supra § 3, *Commonwealth v Bartolini* (1938) 299 Mass 503, 13 NE2d 382, cert den 304 US 565, 82 L ed 1531, 58 S Ct 950, supra § 5[a], *Commonwealth v Noxon* (1946) 319 Mass 495, 66 NE2d 814, supra § 5[a], and *Pinana v State* (1960) 76 Nev 274, 352 P2d 824, supra § 5[a].

In *State v Huff* (1954) 14 NJ 240, 102 A2d 8, the refusal to permit the defendant to have a copy of the report of an autopsy performed on the body of the victim of the alleged homicide was upheld, the court stating that the matter was within the sound judicial discretion of the trial court, and that the record showed no abuse warranting a conclusion to the contrary.

An order granting the defendant's request for the pretrial production of statements and memoranda of the post-mortem examination of the victim of the alleged homicide and all reports and information made or given to the district attorney with reference to any chemical analysis or examination of the organs or parts of the victim was set aside by a writ of prohibition in *People ex rel. Lemon v Supreme Court of State of New York* (1927) 245 NY 24, 156 NE 84, 52 ALR 200, supra § 10[a], on the ground that such documents would not have been admissible in evidence.

In *People v English* (1940) 175 Misc 751, 24 NYS2d 207, the court refused to permit the defendant to inspect a medical examiner's report to the district attorney relating to the death of the victim of the alleged homicide. Relying on *People ex rel. Lemon v Supreme Court of State of New York* (1927) 245 NY 24, 156 NE 84, 52 ALR 200, supra, the court said that it had no power to require a prosecuting attorney to reveal to a defendant memoranda prepared by his medical experts following a post-mortem examination of the victim of a homicide. Holding to the same effect are *Application of Hughes* (1943) 181 Misc 668, 41 NYS2d 843, and *People v Jordan* (1953, Gen Sess) 128 NYS2d 457.

In *People v Cox* (1960) 24 Misc 2d 998, 202 NYS2d 607, wherein the defendant was charged with criminal negligence in the operation of a motor vehicle resulting in the death of a person, the court denied the defendant's motion for permission to obtain a copy of the report of a medical examiner with respect to the cause of the death of the victim. Stating that for the court to exercise its discretion and to grant an inspection of the medical examiner's report, it must be shown that there is an issue respecting the cause of death, the court pointed out that nothing in the defendant's papers indicated that any issue would be made at the trial respecting the cause of the death of the victim of the charged offense.

The view that an autopsy report in the possession of the prosecution is not ordinarily subject to inspection by the defense was also apparently taken in *State v Collett* (1944, App) 44 Ohio L Abs 225, 58 NE2d 417, app dismd 144 Ohio St 639, 30 Ohio Ops 236, 60 NE2d 170, wherein the defendant, on appeal from a judgment of conviction for murder, contended that it was error for the trial court to refuse to require the prosecution to permit the defendant to examine a copy of "what is termed the report of the Coroner" of the county, and the court, pointing out that the coroner had held no inquest respecting the deaths of the victims of the alleged murder nor did he have any official connection with the autopsies, which were conducted by a physician employed by the prosecuting attorney, said that "[i]nasmuch as there was no coroner's report, it could not have been erroneous to deny the request of the defendant that the doctor privately employed by the State should turn over his report to the defendant."

The refusal to permit the defendant to examine, prior to trial, an autopsy report which was in the possession of the prosecution was held not error in *State v Payne* (1946) 25 Wash 2d 407, 171 P2d 227, adhered to on reh 25 Wash 2d 418, 175 P2d 494, the court noting that the prosecution is not required to submit its evidence to defense counsel; that the accused is not, as a matter of right, entitled to have, for inspection before trial, evidence which is in the possession of the prosecution; and that such matter is peculiarly within the trial court's discretion, which will not be disturbed on review unless there is a manifest abuse of discretion.

◇

Failure of court to order production of autopsy report conducted on body of murder victim was not prejudicial to accused since report did not give place, manner, or time of death, and only useful item therein was result of blood alcohol test which information defendant used to best advantage in effort to establish alibi defense. *State v Ford*, 108 Ariz 404, 499 P2d 699, cert den 409 US 1128, 35 L Ed 2d 261, 93 S Ct 950.

Denial of autopsy report did not so impair defense that defendant was denied fair trial, despite defendant's contention that report would have shown that wound causing death of decedent might have been self-inflicted and was not result of criminal agency, where medical examiner testified at trial and could have given any evidence that autopsy report would have shown. *Zirkle v State*, 235 Ga 289, 219 SE2d 389.

Court did not err in murder trial in refusing access to defendant of "medical report concerning the results of the physical examination of the deceased." *Jones v State*, 224 Ga 283, 161 SE2d 302, vacated on other grounds 393 US 21, 21 L Ed 2d 23, 89 S Ct 51.

Voluntary manslaughter conviction would be reversed where prosecutor failed to comply with pretrial demand for discovery of pathologist's report, and where trial court erroneously instructed pathologist that he could not read from his report "but any testimony you give will have to be from your recollection and if you can't recollect, then you can't give it"; on remand pathologist's testimony would be excluded and suppressed unless district attorney fully complied with discovery provisions. *Tanner v State* (1981) 160 Ga App 266, 287 SE2d 268.

Fundamental fairness required state to produce autopsy report in murder prosecution, so that defendant could prepare to meet its findings in orderly and effectual fashion. *State v Eads* (Iowa) 166 NW2d 766 (citing annotation).

See *State v Hodges* (1977, La) 349 So 2d 250, cert den (US) 55 L Ed 2d 779, 98 S Ct 1262, § 25[b].

Defendant's conviction of first-degree murder would be reversed and remanded where prosecution failed to disclose results of physician's examination of bodies of victims showing wounds in stomach and chest and not in back, together with knowledge of deputy sheriff as to ballistic report and chemical tests leading to his belief that defendant did not fire weapon used in killings. *State v Hurd* (Mo App) 520 SW2d 158.

It was error to deny defendant's request for discovery of reports of examination and scientific tests relating to blood and hair found in station wagon in which murder victim was found, such scientific evidence being of particular importance in case because it tended to disprove any theory of accidental death. *State v Davis*, 185 Neb 433, 176 NW2d 657.

Claim that state failed to produce for defendant's use before trial copies of autopsy reports, X-rays, and photographs was patently without substance where (1) photographs were delivered to defendant's trial counsel before trial, (2) X-rays taken of victim were lost or misplaced by doctor before trial and could not be produced, and (3) defense counsel did not move for production of items before trial. *Peoples v State* (Nev) 423 P2d 883, cert den 389 US 866, 19 L Ed 2d 138, 88 S Ct 132.

Denial of pretrial motion to examine scientific reports (not offered in evidence by state), including reports of blood alcohol test, barbiturate tests, autopsy, and ballistics test, was not prejudicial error where prosecutor did show defense counsel blood alcohol and barbiturate reports during trial, and defense motion before presenting defense case did not include request for autopsy. *Mears v State* (Nev) 422 P2d 230, cert den 389 US 888, 19 L Ed 2d 188, 88 S Ct 124, reh den 389 US 945, 19 L Ed 2d 303, 88 S Ct 299.

Motion for discovery of autopsy report was denied. *People v Cusano*, 63 Misc 2d 906, 313 NYS2d 833.

District attorney directed to supply each defendant in murder prosecution with copy of report of autopsy performed on body of deceased. *People v Matera*, 52 Misc 2d 674, 276 NYS2d 776.

In prosecution for murder and for conspiracy to murder, state's failure to turn over medical examiner's report upon defendant's request did not require reversal where report was minimally probative and not material and record did not indicate whether prosecutor deliberately suppressed or merely neglected to produce report. *State v Gazerro* (1980, RI) 420 A2d 816.

Although defendant in murder trial had statutory right to copy of autopsy reports, denial of motion for copy was harmless error where order recited that motion was taken under advisement for 5 days, autopsy report was never introduced into evidence, and the doctor who performed autopsy was witness for state and was cross-examined by

defendant. *Tate v State (Tenn)* 413 SW2d 366.

Trial court did not err in refusing to grant request of defendant in murder trial for copy of autopsy report. *Hackathorn v State (Tex Crim)* 422 SW2d 920.

[\*21c] Report of examination of rape victim

In the following cases the court refused to permit the defense to examine the report of an examination of the victim of the alleged rape, which report appeared to be in the possession of the prosecution.

Where the victim of the alleged rape testified on direct examination that the defendant had had an emission during the rape, and on cross-examination that on the night of the rape she was taken to a hospital and was examined by a doctor and that the doctor gave a written report of her condition to the police, and thereupon the defendant's attorney requested the production of the doctor's report, it was held in *People v Harrison (1962)* 25 Ill 2d 407, 185 NE 2d 244, that under the circumstances it was not error for the trial court to refuse to order the production of the report. The court pointed out that there was no testimony as to the contents of the report and therefore its production could not have been used to show prior inconsistent statements of any witness; and that, at most, the report might have cast doubt upon the prosecutrix's testimony that the defendant had had an emission, but such a discrepancy would not have sufficed to give rise to a reasonable doubt as to the defendant's guilt.

The defendant's pretrial motion, in a prosecution for rape, for the production of the medical report made after an examination of the prosecutrix which allegedly established that there was a "penetration" was denied in *Commonwealth v Honeywell (1963)* 32 Pa D & C2d 491, 53 Luzerne Leg Reg R 257. Pointing out that the defendant should know whether or not there was a "penetration," and that, therefore, the denial of the motion for production did not result in a denial to the defendant of anything which he needed in the ascertainment of truth, the court distinguished the present case from those where physical items which had been examined previously by experts for the Commonwealth had been required to be made available to the defense for independent inspection by experts of its choice. The court said that such broad discovery as was sought by the defendant in the present case was neither reasonable nor logical, nor based on any legal precedent.

<>

In prosecution for taking indecent liberties with child, defendant was improperly denied discovery of tests made of child, and of her clothing, for blood or spermatozoa. *People v Flowers, 51 Ill 2d 25, 281 NE2d 299.*

See *State v Sanders (1980)* 227 Kan 892, 610 P2d 633, § 8.

If existence of report of physician who performed pelvic examination on victim of sexual assault was known to district attorney, he had obligation to inform defendant if he intended to use report at trial or if report was exculpatory. *State v Arnaud (1982, La)* 412 So 2d 1013.

Accused is not entitled to pretrial inspection of evidence upon which prosecution relies for conviction; thus, trial court did not err in refusing to permit inspection of clothing of rape victim, nor in denying request for results of tests performed thereon. *State v Edgecombe (La)* 275 So 2d 740, cert den (US) 38 L Ed 2d 482, 94 S Ct 591.

Denial of prayer for proces-verbal of coroner, showing results of examinations and tests upon rape victim and defendant, was not error where trial judge during trial gave defense counsel opportunity to review coroner's report of all tests and examinations made on victim and defendant, and defense counsel at that time made no complaint or showing that his failure to have documents before trial was prejudicial. *State v Brown, 249 La 235, 186 So 2d 576.*

In rape prosecution defendant could not compel production of notes, written by gynecology resident as they interviewed prosecutrix immediately after her alleged rape and which investigating officer later took to the witness stand with him, where officer never read or referred to notes during his testimony. *State v Jackson* (1981) 302 NC 101, 273 SE2d 666.

See *Shapard v State* (Okla Crim) 437 P2d 565, § 9[a].

Defense had no right to inspect medical reports about condition of two rape victims where neither act of sexual intercourse was disputed issue at trial, defense being based solely on consent and insanity issues. *Whitchurch v State* (1983, Tex Crim) 650 SW2d 422.

See *State v Stanislawski*, 62 Wis 2d 730, 216 NW2d 8, § 8.

[\*21d] Report of examination of defendantn160

In some cases the report of an examination or observation of the defendant as to his sanity or mental condition which appeared to be in the possession of the prosecution was held producible for inspection by the defense.

#### NEW HAMPSHIRE

*State v Healey* (1965, NH) 210 A2d 486, supra § 8

#### NEW JERSEY

*State v Cook* (1965) 43 NJ 560, 206 A2d 359, supra § 11[g]

*State v Whitlow* (1965) 45 NJ 3, 210 A2d 763, infra

#### NEW YORK

*People v McElroy* (1955) 285 App Div 846, 136 NYS2d 693, supra § 9[d]

In *State v Whitlow* (1965) 45 NJ 3, 210 A2d 763, wherein the defendant, indicted for murder, entered a plea of not guilty on the grounds that he was insane at the time of the commission of the alleged offense and that he was mentally incompetent to stand trial, the court, in upholding an order directing the defendant to submit to a mental examination by the prosecution's psychiatrists, held that on demand the defendant was entitled to copies of the prosecution's psychiatric examination reports, subject to his delivery to the prosecution of copies of reports made by psychiatrists of his own selection.

◇

In the following cases, on the other hand, the court refused to permit the defendant to inspect the report of a medical or psychiatric examination of the defendant which appeared to be in the possession of the prosecution.

In *Linder v State* (1953) 156 Neb 504, 56 NW2d 734, it was held that the trial court did not abuse its discretion in denying the defendant's motions for the production of the results of a medical examination of the defendant, the court pointing out that the defendant had been advised of the contents of the report of the medical examination, and his

counsel had information as to this matter a considerable time before the motions were made; and that the defendant did not undertake to secure the report by calling witnesses who had or might have had a knowledge of its contents, and "he did nothing save demand its production." The court noted that the defense counsel in a criminal prosecution has no right to inspect or compel the production of evidence in the possession of the prosecution unless a valid reason exists for so doing; that the defendant has no inherent right to invoke such means of examining the prosecution's evidence merely in the hope that something may be uncovered which would aid his defense; and that in the administration of such rules the trial court has a broad judicial discretion and it is only when such discretion is abused that error can be based thereon.

In *State v Bunk* (1949, NJ County Ct) 63 A2d 842, the defendant's motion for permission to inspect the reports of medical examinations of the defendant which were made by physicians engaged by the prosecution was denied, the court holding that the motion was premature, since counsel for the defendant had not yet had their client examined and consequently there was nothing before the court to indicate that the defendant would advance the defense of insanity or make the contention that he was mentally incompetent to stand trial.

The denial of the defendant's request, made during the progress of the trial, for permission to inspect a report of psychiatrists who were employed by the prosecution to examine the defendant to ascertain whether he was sane and capable of standing trial was held not error in *Commonwealth v Wable* (1955) 382 Pa 80, 114 A2d 334, the court noting that the general rule is that the accused has no right to pretrial inspection or disclosure of evidence in the possession of the prosecution.

<>

Allegation that defense counsel was denied use of examination and report of 1 of several doctors who examined mental condition of defendant was without merit where (1) doctor's report of his examination was introduced in record, (2) with consent of defendant a second lunacy commission was appointed to examine defendant and make formal findings, and (3) at time of trial it was agreed that doctor would not be summoned or used as witness in case. *State v Gregoire*, 249 La 890, 192 So 2d 114, app dismd and cert den 389 US 154, 19 L Ed 2d 354, 88 S Ct 339.

It was not error under Maine Rule of Criminal Procedure 16 for state to fail to turn over certain psychological testing data gathered by state in its evaluation of defendant at state hospital where qualified psychiatrist who testified for defendant was informed that test had been performed, he was familiar with test and knew results existed although he was not actually given results, he did not hesitate to make his diagnosis without results and where defendant at no time prior to trial requested further discovery to secure test results. *State v Buzynski (Me)* 330 A2d 422.

Hospital records and reports concerning accused in murder trial who was civilly committed to state mental hospital on initiation of defense counsel should be available in advance of trial to both prosecution and defense, since commitment was to public institution by court order for essentially public purpose, no matter who commenced it. *State v Gosser*, 50 NJ 438, 236 A2d 377.

Refusal of trial court to allow defense counsel to see psychiatric and diagnostic records and reports which were in possession of psychiatrist who was state's rebuttal witness, although error, was not reversible error where purpose for sending defendant to hospital for diagnosis was to determine if he knew difference between right and wrong and could assist in his own defense while defendant's apparent defense was one of temporary insanity at time of commission of crime and record indicated that reports would have shed little light on defendant's sanity at time of commission of crime. *Maloy v State (Okla Crim)* 543 P2d 755.

Denial of request for report from state hospital concerning defendant's mental condition was not error where (1) report was at one time in court file and was "evidently" examined prior to trial by defendant's retained counsel, (2) no question concerning absence of report from file was raised until after trial of case had commenced, and then only request was

that report be restored to file, (3) request was not pressed after attorney general suggested that report would only become material if defendant -- who did not testify -- were to take witness stand and needed it in his defense, and (4) no defense based on defendant's mental condition was made, nor was report mentioned again during trial. *Sneed v State (Tenn) 423 SW2d 857*.

Under state rule of criminal procedure, defendant in murder prosecution was entitled to statements he made to hospital staff members while undergoing mental examination and to background reports indicating his competency to stand trial in order to assist counsel in determining whether to plead present insanity. *Covey v State (Tenn Crim) 504 SW2d 387*.

[\*21e] Blood test report

In some cases the defendant was permitted to inspect the report of a blood test taken of him or the victim of the alleged offense which was in the possession of the prosecution.

An order requiring the prosecution to produce before trial, for inspection by the defendant, a medical report of the results of a blood alcohol test taken of him was upheld in *State ex rel. Helm v Superior Court of Cochise County (1961) 90 Ariz 133, 367 P2d 6*, involving a prosecution for manslaughter and driving a motor vehicle while intoxicated. Stating that Rule 195 of the Arizona Rules of Criminal Procedure, providing for discovery and inspection of certain documents and tangible objects,<sup>n161</sup> does not operate to divest a trial court of the power to order discovery of items which are not within the coverage of the rule but are necessary, in the opinion of such court, to the proper preparation of the defendant's case, and that notwithstanding the limitations of Rule 195, a trial court has a residuum of inherent power to order production and inspection when essential to the due administration of justice, the court concluded that under the circumstances of the case there was no abuse of discretion in ordering the production of the medical report in question. The court pointed out that the report constituted the only source from which information respecting the defendant's intoxication at the time of the alleged crimes might be obtained; that the defendant would be able to inspect the report if produced by the prosecution at the trial, and there had been presented no sound reason for denying him the same opportunity before trial; that the case did not involve an attempt to discover the "work product" of the prosecution, nor could inspection of the report afford the defendant an opportunity for fabrication of evidence contradicting its contents; and that the defendant's knowledge of the report was essential to the adequate preparation of his defense.

The view that in a proper case the report of a blood test taken of a defendant or any other person may be produced for inspection by the defense was also taken in *Brenard v Superior Court of Sacramento County (1959) 172 Cal App 2d 314, 341 P2d 743*, supra § 5[a], *State v Cook (1965) 43 NJ 560, 206 A2d 359*, supra § 11[g], and *People v Preston (1958) 13 Misc 2d 802, 176 NYS2d 542*, supra § 21[a].

In *People v Lowe (1955) 285 App Div 207, 136 NYS2d 454*, a prosecution for criminal negligence for killing a pedestrian in the operation of an automobile, it was held that where it could be inferred from the prosecuting attorney's opening statement that the prosecution intended to produce evidence of intoxication, the defendant's motion, made at the close of the opening statement, for permission to obtain the results of a chemical blood test taken to determine the alcohol content of his blood should have been granted.

An order requiring the prosecution to produce reports of any examination made of blood samples of the defendant and the victim of the alleged murder was also upheld in *State v Thompson (1959) 54 Wash 2d 100, 338 P2d 319*, supra § 10[b].

<>

In the following cases, on the other hand, the court refused to permit the defendant to inspect the report of a blood test taken of him or another person.

## DELAWARE

*State v Thompson* (1957) 50 Del 456, 134 A2d 266

*State v Hutchins* (1957) 51 Del 100, 138 A2d 342, both supra § 11[b]

See also *State v Winsett* (1964, Del) 200 A2d 237, supra § 11[b] (apparently recognizing that blood test report is not subject to inspection).

## NEVADA

*Pinana v State* (1960) 76 Nev 274, 352 P2d 824, supra § 5[a]

## OHIO

*State v Regedanz* (1953, CP) 54 Ohio Ops 76, 68 Ohio L Abs 81, 120 NE2d 480, infra

Stating that the analogy between a report of a chemical blood test voluntarily submitted to by a defendant and a written statement or confession made by him is a peculiarly close one, and noting that the granting or denying of a defendant's request for permission to inspect a confession is within the discretion of the trial court, the court in *State v Regedanz* (1953, CP) 54 Ohio Ops 76, 68 Ohio L Abs 81, 120 NE2d 480, denied the defendant's request for an order requiring the prosecuting attorney to produce, for his inspection, the hospital report concerning a blood test taken of him. Pointing out that the prosecuting attorney had informed defense counsel of the percentage of ethyl alcohol as shown by the chemical test of the defendant's blood, and that at the time the prosecution took a sample of blood from the defendant, the defendant could also have had a sample taken and tested for his own use, inasmuch as the blood was taken and tested at a local hospital, the court said that under the circumstances the denial of the request for inspection of the blood test report did not result in a disadvantage to the defendant in the preparation of the defense or a denial to him of any opportunity which he did not have in the preparation of evidence.

See *State v Madigan* (1982) 249 Ga 571, 292 SE2d 406, on remand 163 Ga App 460, 295 SE2d 236 and (ovrld by *Law v State*, 251 Ga 525, 307 SE2d 904), § 7.

Although prosecution delayed until after commencement of trial disclosing to defendant convicted of aggravated battery and involuntary manslaughter that victim's mother who was witness for state was charged with child neglect and that photo of victim's brother, who testified he and victim had been beaten by defendant prior to victim's death, allegedly showed brother's eye was not swollen, any prejudice to defendant from such delayed disclosure of evidence was not so material as to deny defendant fair trial, where testimony of mother was corroborated by testimony of brother and stood uncontested by defendant, where delayed evidence with respect to mother and brother could have had only a minimal affect on their credibility, and where defendant had opportunity to present delayed evidence to court for its consideration before end of defendant's trial. *People v Parker* (1980) 90 Ill App 3d 1052, 46 Ill Dec 468, 414 NE2d 190.

Defendants in murder prosecution were not entitled to blood test information from analysis of blood stains found on broken bottle and shoes of one defendant where prosecution made analysis available as soon as it was received and defendants did not object to commencement of trial without such information. *People v Curtis* (1977) 48 Ill App 3d 375,

6 Ill Dec 399, 362 NE2d 1319.

See *People v Robinson*, 13 Ill App 3d 506, 301 NE2d 55, § 6[b].

In prosecution for manslaughter, trial court erred in denying motion at trial by defense to introduce unauthenticated report of chemical analysis of alcoholic content of victim's blood or to continue trial until chemist was subpoenaed, where report was material to defense of self defense, and where prosecutor failed to make voluntary disclosure of report prior to trial. *Pennington v Commonwealth* (1978, Ky App) 577 SW2d 19.

Failure of prosecution to produce results of analysis of decedent's blood and urine which was conducted during autopsy would result in remand to trial court for evidentiary hearing to determine harm resulting from nonproduction of test results where presence of morphine in blood of victim, who died from swelling in brain after being in fight with defendant, could be favorable to defendant, and such finding would require new trial. *People v Drake* (Mich App) 236 NW2d 537.

See *State v Williams*, 183 Neb 257, 159 NW2d 549, § 17.

See *Mears v State* (Nev) 422 P2d 230, cert den 389 US 888, 19 L Ed 2d 188, 88 S Ct 124, reh den 389 US 945, 19 L Ed 2d 303, 88 S Ct 299, § 21[b].

No suppression of evidence resulted from prosecution's failure to inform defendant, who was convicted of driving while intoxicated, until day of his trial about laboratory statement relating to improper seal on sample of his blood taken on day of his arrest nearly eight days earlier where defendant already knew of statement, and delay in disclosure did not justify new trial where at hearing on defendant's motion to suppress results of test there was evidence that improper seal did not affect blood sample, so that there was no exculpatory evidence for defendant to discover, had he sought to do so, or for prosecution to disclose. *State v Watson* (1980, NH) 424 A2d 417.

In prosecution for murder, failure of state to provide defendant with written copies of blood test results and failure to make specimens available for independent testing by defense was not prejudicial error where defense was aware of test results, and where defendant had admitted shooting victim; there was no factual basis in record showing state did not comply with trial court's order to produce and permit defendant to inspect ballistics and fingerprint reports on gun and bullet where defendant did not make such request of state. *State v Quintana* (App) 86 NM 666, 526 P2d 808, cert den 86 NM 656, 526 P2d 798.

Defendant had right to discovery of results of blood alcohol test and also had right to have his own physician examine original blood sample and test it at police laboratory under supervision of representative of police department; however, use of results of such separate test at trial would be dependent upon medical and scientific proof by defendant that alcoholic content in blood had not been dissipated by time, storage, temperature, and other circumstances, and that condition remained unchanged during interval between time of withdrawal of blood and reanalysis thereof. *People v Seaman*, 64 Misc 2d 684, 315 NYS2d 743.

See *People v Blair*, 64 Misc 2d 519, 315 NYS2d 179, § 13[a].

In murder prosecution, inspection allowed of results of blood test. *People v Powell*, 49 Misc 2d 624, 268 NYS2d 380.

Pretrial inspection of results of police laboratory tests of defendant's blood, hair, and saliva was not authorized by Oregon discovery statute. *State v Little* (Or) 431 P2d 810.

Trial court did not err in refusing to furnish defendant with copies of medical reports and results of blood and urine tests in view of circumstances, including fact that court's order contained inherent invitation to defendant to renew his motion

and present a more adequate showing of necessity. *State v Boehme*, 71 Wash 2d 621, 430 P2d 527, cert den 390 US 1013, 20 L Ed 2d 164, 88 S Ct 1259.

Although in criminal prosecution in order for destruction of evidence to result in suppression, defense must show disposed-of evidence was clearly material to issue of guilt or innocence, state's failure to present evidence disputing rebuttable presumption of materiality of ampoule used in breathalyzer test of percentage of alcohol in defendant's blood warranted suppression of test results even though defendant failed to make motion within three days of test for scientific testing of ampoule. *State v Raduege* (1980, App) 100 Wis 2d 27, 301 NW2d 259.

[\*22] Report of examination, experiment, test, or analysis of nonmedical nature

[\*22a] Generally

In some cases the report of an examination, analysis, or test of physical evidence or other relevant material was held producible for inspection by the defense.

In *Walker v Superior Court of Mendocino County* (1957) 155 Cal App 2d 134, 317 P2d 130, it was held that the defendant was entitled to production of any report received by the prosecution from the state criminal investigation bureau concerning materials observed on or removed from the defendant's shoes, where the prosecution would contend that the victim of the alleged homicide had met his death as a result of being kicked in the head by the defendant, and, accordingly, one of the material issues at the trial would be whether the defendant had done so. Pointing out that when the defendant was arrested he was wearing the same shoes he was wearing at the time of the altercation with the victim, and that the shoes were taken from the defendant by the sheriff and transferred to the state criminal investigation bureau, where they were submitted to a laboratory analysis by removal of any material deposited on the shoes, and noting the defendant's allegation that it would be impossible for the defense to ascertain the condition of the shoes prior to the analysis except from the report, and that if it was shown that the shoes did not contain any hair or flesh it would tend to prove that the defendant did not kick the victim, the court said that although the report was not evidence and would not ordinarily be admissible at the trial, nevertheless, since it was the only source of information from which the defense could discover what evidence the shoes afforded, it might be most difficult for the defendant to properly prepare for trial unless the defense was allowed to see the report.

The rule that in a proper case a defendant may inspect before trial reports of an examination by state officers of "real evidence" was also recognized in *Yannacone v Municipal Court of San Francisco* (1963) 222 Cal App 2d 72, 34 Cal Rptr 838, and *People v Lindsay* (1964) 227 Cal App 2d 482, 38 Cal Rptr 755.

See also *State v Cook* (1965) 43 NJ 560, 206 A2d 359, supra § 11[g], holding that "the State's objective documents, such as . . . scientific and laboratory reports, including chemical analyses, blood tests, etc.," should be produced for inspection by the defense at least where there is no showing by the state that its prosecution would be improperly hampered.

Where the prosecution was in possession of a report from the FBI showing the results of a laboratory analysis of a coat belonging to the defendant and a button allegedly torn off the coat at the time of the alleged offense, and where the results of the analysis tended to show that the button did not come from the coat, the court in *People v Whitmore* (1965) 45 Misc 2d 506, 257 NYS2d 787, setting aside a verdict of guilty and granting a new trial, held that the prosecution's failure to disclose the laboratory report to the defendant was a violation of its obligation to reveal information that might be usable by an accused, notwithstanding that the prosecution had not produced the report in the honest belief that it was not admissible in evidence and was probative of nothing. Noting that the prosecution has a duty to disclose evidence which may reasonably be considered admissible and usable to the defense, and that the prosecution's failure to reveal information that may be usable by an accused may be a denial of the fairness required under the due process clause of the constitution, the court said that when there is substantial room for doubt the prosecution is not to decide for

the court what is admissible or what is useful to the defense, and that irrespective of the positive probative force of the undisclosed report in the present case and notwithstanding what effect it might have (if admissible) in favoring the defense, the prosecution should make information of this kind available to the defendant for whatever purpose he might use it.

In *State ex rel. Sadler v Lackey* (1957, Okla Crim) 319 P2d 610, wherein the defendant was charged with murder in that he ran over and killed a child while driving an automobile, the court held that the defendant's pretrial motion for permission to inspect the report of an analysis of scrapings taken from his automobile, which report was then in possession of the prosecuting attorney, was properly granted where the only substantive evidence against the defendant was his own admission that he had passed the fatal point about the time of the tragedy, and the requested report was the only source of information from which the defense could discover what evidence the automobile afforded. Noting that the testimony as to the result of the analysis of scrapings taken from the defendant's automobile constituted the very essence of the identification of the defendant with the tragedy, and pointing out that if the defendant knew what the report of the analysis contained, he might completely alter his defense plans, and that until he had been advised that he had been definitely connected with the fatality, his position as to his defense was one of speculation and surmise, the court concluded that to require the defendant to wait until the day of trial and approach the bar of justice in doubt as to his positive connection with the tragedy would be most unfair.

In *Layman v State* (1960, Okla Crim) 355 P2d 444, wherein the defendants were charged with obtaining money from the state by false pretenses in connection with the construction of a state highway, it was held that the defendants were entitled to pretrial inspection and examination of reports of a professional engineer who had been employed by the prosecution to make numerous tests as to the adequacy and sufficiency of the highway construction work. Pointing out that the prosecution's case depended almost entirely upon the report in question, and noting that the defendants did not ask the prosecution to turn over to them all of its evidence, but sought only the production of a highly technical report of an investigation conducted scientifically over a long period of time, the court said that the determinative point in the present case was that the report sought by the defendants was highly voluminous and specialized, and was the essence of the prosecution's case. The court recognized the following rules: (1) A defendant has no absolute right to pretrial inspection of a report in the possession of the prosecution and has no inherent right to examination of the prosecution's evidence; (2) Where an application for pretrial inspection of technical reports is made, the trial court has a broad judicial discretion to grant or deny it; (3) A request for pretrial inspection must be determined by the facts of each case.

An order requiring the prosecution to produce reports of any examination made of the clothing and personal effects of the defendant and the victim of the alleged murder was also upheld in *State v Thompson* (1959) 54 Wash 2d 100, 338 P2d 319, supra § 10[b].

◇

In the following cases, on the other hand, the court refused to permit the defendant to inspect the report of a test or analysis of physical evidence.

In *Kinder v Commonwealth* (1955, Ky) 279 SW2d 782, supra § 3, the court upheld an order denying the defendant's pretrial motion to compel the prosecution to produce a report relating to the results of paraffin tests taken of the defendant and codefendants.

In a prosecution for illegal selling of a narcotic drug, the defendant's pretrial motion for permission to inspect the laboratory analysis and report concerning the alleged narcotic in question was denied in *People v Perrell* (1965) 47 Misc 2d 1024, 263 NYS2d 640, the court stating that the laboratory analysis made by the prosecution and the report of the police chemist were items of evidence to be relied upon by the prosecution, and were not the proper subject of a discovery and inspection.

Where, in a prosecution for safebreaking and other offenses, the FBI conducted a laboratory examination of the dial of the safe involved in the case and a tapering punch allegedly used by the defendants, and the FBI agent who conducted such examination testified for the prosecution at the trial, the court in *State v Hamilton (1965) 264 NC 277, 141 SE2d 506*, held that there was no error in denying the defendants' motion for permission to inspect before trial FBI reports and notes (apparently relating to the examination of the safe dial and punch). The court pointed out that the defendants had not asserted that access to the requested documents was necessary for the preparation of their defense; that defense counsel declined to cross-examine the FBI agent; and that, moreover, the defendants did not cite any authority in support of this assignment of error.

In *May v State (1935) 129 Tex Crim 2, 83 SW2d 338*, a prosecution for homicide, the denial of the defendant's pretrial motion for the production of certain substances taken from the defendant's truck, on which blood was found, and the result of a laboratory test conducted on such substances was held not error, the court pointing out that at the time of the motion the district attorney informed the defendant's counsel that an analysis by a chemist of the substances in question showed that the blood found thereon was human blood, and at the trial the chemist testified to the same effect; that the defendant's truck from which the specimens were taken had been in the possession of the defendant from the time of his arrest until the time of the trial and there were many other bloodstains on the truck, and hence the defendant could have secured specimens from it and had an analysis made by chemists; and that the substances taken from the truck by the prosecution were produced in evidence at the time of the trial, and the defendant and his counsel then had the opportunity to examine them.

<>

Motion by defendant in murder trial that he be allowed to inspect "any written evidence, physical evidence, scientific reports or other tangible evidence and the weapon, if any," if such evidence was to be used at trial, was properly overruled. *McCants v State, 282 Ala 397, 211 So 2d 877*.

See *Rogers v State (1982, Ala App) 417 So 2d 241, § 13[d]*.

There was no prejudice to defendant as result of alleged failure to comply with defendant's motion for discovery regarding any reports or statements of experts, where prosecuting attorney furnished name and address of expert who would be called to testify about laboratory tests, which showed that samples tested were in fact marijuana, where, prior to trial, prosecuting attorney made his entire file available to defense counsel who examined it, and where lab technician who was named in response to discovery motion was called as witness at trial and was made subject to cross-examination. *Fisk v State (1982) 5 Ark App 5, 631 SW2d 626*.

In prosecution for willfully and unlawfully using and being under influence of controlled substance, defendant was entitled to prompt discovery of all information bearing on possible identity of controlled substance involved that prosecution possessed. *Ross v Municipal Court of Los Angeles Judicial District of Los Angeles County, 49 Cal App 3d 575, 122 Cal Rptr 807*.

See *Wanzer v State, 232 Ga 523, 207 SE2d 466, § 8*.

In prosecution for arson, trial court erred in allowing state to present testimony concerning results of scientific tests conducted by private firm showing presence of volatile accelerant in carpet samples taken from house subsequent to fire, inasmuch as state failed to comply with defendant's written request for copies of scientific reports in its possession, and state could not avoid use of documentary recording of test results by calling instead actual experts who performed tests and thereafter contending that defense was not entitled to documentation of test results because state did not use them, since this would have been direct circumvention of provisions of state discovery statute. *Metts v State (1982) 162*

*Ga App 641, 291 SE2d 405.*

Prosecution was not required to supply defense with expert drug analyst's work product which went into final report where report was given to defense. *Hartline v State (1982) 161 Ga App 847, 288 SE2d 902.*

Defense in cocaine-sale prosecution received "complete copy of any written scientific reports in the possession of the prosecution in its case-in-chief or in rebuttal" when it received report which simply concluded that seized substances were cocaine. Defendant's rights in pretrial discovery did not extend to "a complete and detailed accounting to the defense of all police investigatory work on a case," or to a detailed description of all analytical work performed by the crime lab. *Sears v State (1982) 161 Ga App 515, 288 SE2d 757.*

Under Georgia's new discovery statute requiring pretrial production of "complete copy of any written scientific reports," defendant charged with possession of controlled substances was entitled to copy of State Crime Lab report, which, although it contained conclusions, allowed defendant to know what evidence state had to present against him; statute did not mandate that entire written work materials of State Crime Lab be included with that report. *Hartley v State (1981) 159 Ga App 157, 282 SE2d 684.*

Trial court's order requiring disclosure to defendant in criminal prosecution of all prosecutor's reports of tests or examinations and also requiring submission of prosecutor's file for in camera inspection that was to be followed by further disclosure to defendant of any evidence in file that was exculpatory in nature or that would "aid in the orderly administration of justice" was appropriate response to defendant's discovery motion. *Tankersley v State (1980) 155 Ga App 917, 273 SE2d 862.*

In prosecution for burglary, defendant's notice to produce requesting any and all photographs, charts, fingerprint cards, latent fingerprints, molds or casts of fingerprints and tire tracks, as well as results, reports and summaries of any forensic, scientific or other tests, examination or studies of any tangible items made in connection with case against defendant, was properly denied. Although state statute permits defendant to obtain tangible evidence, notice to produce does not include material not in state's possession and defendant failed to show that state was in possession of said items, failed to request in camera inspection of state's file to determine presence of exculpatory material and failed to meet burden of showing how case was materially prejudiced by denial of motion. *Patterson v State (1980) 154 Ga App 877, 270 SE2d 86.*

Failure of prosecution to disclose report from state crime laboratory expert that product introduced into evidence, of which defendant had large quantity, contained component not found at scene of crime did not amount to denial of due process where there was doubt whether such report was exculpatory at all, and if so, it was only minutely exculpatory. *Parker v State (1978) 145 Ga App 205, 243 SE2d 580.*

Fourteen-year-old defendant in murder trial was not deprived of any right because he failed to receive notes apparently consisting of "mere numerical jottings" made by police technicians when they performed scientific tests on evidence procured during police investigation of crime. *People v Hester, 39 Ill 2d 489, 237 NE2d 466.*

In prosecution for cocaine delivery, State's noncompliance with discovery of witness' notes was harmless error where defendant did not immediately object to witness' use of notes nor ask for continuance to permit his review of notes, but rather waited until he filed his post-trial motion to object to testimony, and where defendant was given opportunity to extensively cross-examine witness in regard to notes. *People v Olson (1978) 59 Ill App 3d 643, 16 Ill Dec 660, 375 NE2d 533.*

See *People v Griffith (1978) 56 Ill App 3d 747, 14 Ill Dec 393, 372 NE2d 404, § 9[a].*

Rule providing for discovery of reports or statements of experts making reports did not require drafting of explanatory

statement describing procedures by which tests were made. *People v Hummel*, 38 Ill App 3d 233, 347 NE2d 305.

In prosecution for burning his own house with intent to defraud his insurer, defendant was not prejudiced by failure of state to timely supply lab report made upon alleged contents of jugs found on night of fire in closet in which one of fires had originated, where defendant received this report 77 days before trial. *People v McAleer*, 34 Ill App 3d 821, 341 NE2d 72.

Trial court in murder prosecution properly ordered production of FBI report of analysis of items of physical evidence, including clothing, samples of hair, scrapings from hands and fingernails of both defendant and victim, and fingerprints taken from victim's apartment. *State v Eads (Iowa)* 166 NW2d 766 (citing annotation).

Defendant charged with operation of motor vehicle while intoxicated is entitled, under applicable statute, to result of chemical test taken at direction of officer, but he was not entitled to work sheets or fluid sample used in such test. *State v Johnson (Iowa)* 145 NW2d 8.

Defendant was not entitled to pretrial discovery of tangible objects to be introduced by prosecution, or to results of tests performed upon such items. *State v Drew (1978, La)* 360 So 2d 500.

Where witness misidentified defendant at line up and where such issue was first raised by defense counsel on cross-examination and where witnesses' misidentification was clearly before jury, state was not required to produce identification slip signed by witness when he viewed line up. *State v Flowers (La)* 337 So 2d 469.

Trial court did not err in denying defendant's request for discovery of oral inculpatory statements, written unsigned inculpatory statements, paraphrased inculpatory statements in police or district attorney's files, laboratory reports and list of physical evidence in possession of state. *State v Sears (La)* 298 So 2d 814.

See *State v Frezal (La)* 278 So 2d 64, § 13[d].

Where state furnished defense with copy of "Report of the Crime Laboratory" indicating positive result for cocaine and sample of contraband for independent testing, trial court properly refused to permit further discovery of analytical methods of state's chemists. *State v Martinez (1983, La App)* 432 So 2d 1201, cert den (La) 435 So 2d 439.

State's failure to furnish laboratory drug analysis report to substitute counsel in response to renewed discovery motion was not a failure to respond properly to discovery motion which would bar testimony by state's expert criminalist relating to laboratory analysis when state had furnished report to counsel's predecessor and counsel had been given a 15 day delay to permit familiarization with contents of record. *State v McDonald (1983, La App)* 430 So 2d 151.

Even though prosecution failed to comply with state rule of criminal procedure requiring disclosure to defendant in criminal prosecution of summary of statement by prosecution witness relating to defendant's identity as perpetrator of crime made by witness after preindictment voice identification proceeding, trial court's admission in evidence of witness' identification testimony was not reversible error for such evidence was essentially cumulative. *State v Furrow (1981, Me)* 424 A2d 694.

Rape defendant identified by bloodhound was properly denied access to examination and analysis lying behind FBI report of conclusions of examination of physical evidence where defense counsel was given copy of report he requested under discovery rules, and where further information regarding merits of examination and analysis could be developed by cross-examination or by defendant's own investigative efforts. *Roberts v State (1982)* 53 Md App 257, 452 A2d 1271, affd 298 Md 261, 469 A2d 442.

In prosecution for delivery of cocaine, defendant was not prejudiced by admission of report of police technician

regarding analysis of alleged cocaine, notwithstanding prosecutor's five-day delay in furnishing report to defendant in violation of statute requiring "immediate" production, where defendant received report on April 19 and preliminary examination was not held until May 11. *People v Anderson* (1979) 88 Mich App 513, 276 NW2d 924.

See *Murphree v State* (Miss) 228 So 2d 599, § 4[b].

Defendant charged with illegal sale of stimulant drug was not prejudiced by trial court's refusal to permit inspection and copying of laboratory report, chemical tests, and other processes by which powder seized from him by police was examined, where cross-examination of criminologist who analyzed powder did not indicate that counsel was in any way handicapped in making such cross-examination, or that defendant suffered from lack of preparation by counsel therefor. *State v Yates* (Mo) 442 SW2d 21.

See *State v Flenoid* (1978, Mo App) 572 SW2d 179, § 6[a].

In prosecution for, inter alia, possession of marijuana, trial court properly allowed admission of laboratory report indicating that seized vegetation was marijuana, notwithstanding that defense counsel had not been supplied with copy of report, where counsel submitted discovery request to court clerk rather than prosecutor, and court offered defense counsel additional time to analyze vegetation by continuing trial to later date. *State v Malsbury* (1982) 186 NJ Super 91, 451 A2d 421.

Defendant in prosecution for conspiracy to operate lottery was not entitled to discovery of results of spectrographic study of voice exemplar where state did not offer any findings of study into evidence, no scientific basis for introduction of spectrographic test results had been placed in record, and state's failure to offer results was not proper subject of comment. *State v Perez* (1977) 150 NJ Super 166, 375 A2d 277.

Failure of prosecution to timely disclose to defense attorney that samples of defendant's hair were being tested did not require reversal, where record did not show if there were any test results or, if there were, what the tests showed, and speculation that there may have been test results and that results may have been exculpatory did not establish nondisclosure of exculpatory evidence. *State v Martinez* (1982, App) 98 NM 27, 644 P2d 541, cert den 98 NM 336, 648 P2d 794.

In prosecution for driving while intoxicated, trial court would deny defendant's motion seeking production of original ampule used in breathalyzer test and reference ampule used in administering test, since ampules were not material to defense in light of New York's strict decisional law requirements for introduction of breathalyzer results into evidence. *People v Amidon* (1980) 102 Misc 2d 850, 427 NYS2d 727.

See *People v Goetz*, 77 Misc 2d 319, 352 NYS2d 829, § 25[d].

Accused, charged with driving while intoxicated, was entitled to discovery of portion of police report relating to physical tests performed by him at request of police, such as walking, turning, touching finger to nose, etc. *People v Lawrence*, 74 Misc 2d 1019, 346 NYS2d 330.

Accused in manslaughter and negligent homicide prosecution was entitled to discovery of such properties in possession of prosecution as were illustrative of physical facts concerning automobile accident and which were incapable of damage or alteration, including such items as photographs, blood test, and measurements of skid marks, and also accident investigators' reports other than those in which prosecution's theories and thought processes might be expressed. *People v Inness*, 69 Misc 2d 429, 326 NYS2d 669.

In prosecution for possession and sale of dangerous drug, defendant was entitled to discovery of all reports and documents concerning any and all scientific tests and experiments which were made in connection with case and which

were within possession of district attorney, and it was not necessary that he make showing of materiality or reasonableness with respect to such documents. *People v Johnson*, 68 Misc 2d 708, 327 NYS2d 690.

Laboratory analysis and report of police chemist are items of evidence to be relied upon by prosecution and are not proper subject of discovery and inspection. *People v McDonald*, 59 Misc 2d 311, 298 NYS2d 625.

In prosecution for possession and sale of dangerous drugs, defendant's motion for order to examine, inspect, or copy charts, records, or chemical reports concerning dangerous drug allegedly sold and possessed by defendant, was denied. *People v Ricci*, 59 Misc 2d 259, 298 NYS2d 637.

Opinions of expert witnesses, where they will "in no way prejudice anyone," should be made available to all parties involved in criminal action; court authorized assigned counsel in manslaughter case to hire experts and specifically directed that findings of such experts be made available to codefendant. *People v Carnrite*, 55 Misc 2d 1087, 287 NYS2d 571.

Inspection of certain independent scientific reports and certain physical evidence which cannot be adequately examined at trial because of need for scientific examination and expert testimony prior thereto, recognized in *People v Bradford*, 54 Misc 2d 54, 281 NYS2d 480.

Defendant accused of murder by strangling with piece of bed sheeting not entitled to reports of examination or analyses of such sheeting where medical examiner stated that he ordered no reports, examinations, or analyses. *Widziewicz v Golding*, 52 Misc 2d 837, 277 NYS2d 62.

Inspection allowed of results of investigations of cars evidently involved in homicide and fabric tests. *People v Powell*, 49 Misc 2d 624, 268 NYS2d 380.

In prosecution for criminal sale of controlled substance, where defense counsel during cross-examination of people's witness, a forensic chemist, requested production of witnesses' notes in which he had recorded results of chemical tests about which he had testified, court's refusal to direct production of notes was error. *People v Strong* (1977) 60 App Div 2d 792, 400 NYS2d 661.

Prosecutor's failure to give arson defendant FBI laboratory report which contained exculpatory evidence showing that defendant's clothing seized at time of arrest contained no presence of flammable accelerants required reversal of defendant's conviction where report was in prosecutor's possession before trial, prosecutor had agreed to comply with defendant's voluntary discovery request, and defendant had no notice prosecutor had report or had failed to comply with discovery agreement. *State v Jones* (1978) 296 NC 75, 248 SE2d 858.

Allowance or overruling of various discovery motions in criminal case rests in discretion of trial court and only in clear cases of abuse will exercise of that discretion be disturbed; thus where neutron activation test was administered to defendant to determine whether or not he had fired a gun, there was no absolute right of defendant to discover results of such test, and in light of counsel's comprehensive cross-examination of state's expert witness with regard to test, there was no abuse of discretion in denying discovery. *State v Kassow*, 28 Ohio St 2d 141, 57 Ohio Ops 2d 390, 277 NE2d 435, vacated as to imposition of death penalty, 408 US 939, 33 L Ed 2d 762, 92 S Ct 2876.

Failure of prosecution to have informed defense of neutron activation analysis test for presence of chemical residue on hands which would indicate that individual had fired gun, which had been given to defendant, was not improper where defense counsel had not made any request for discovery of tests and where prosecutor asserted that he did not know test had been given until officer testified on stand that test had been given; trial court properly refused to allow defense counsel to argue concerning test to jury where jury was never informed that test result was negative and where defense, despite guarantee of cooperation from court, made no attempt to introduce evidence of test. *Commonwealth v Jones*

(1981) 285 Pa Super 112, 426 A2d 1167.

In rape prosecution in which state medical examiner ran test to determine if any foreign hair remained on prosecutrix, trial court properly denied motion for new trial based upon state's failure to furnish test results to defense, since test was neither inculpatory nor exculpatory as no hair samples were found, and since state had no obligation to furnish such evidence in that evidence was equally available to defendant. *State v Cox* (1980, SC) 266 SE2d 784.

Defendant charged with robbery was denied inspection of technical reports of tests made by police on pistol and shells removed from his person on date of his arrest. *Bosley v State* (Tenn) 401 SW2d 770.

See *Latham v State* (1978, Tenn Crim) 560 SW2d 410, § 25[d].

It was not error to deny defendant's motion for production of chemical analysis information despite defendant's contention that this denial precluded proper preparation for cross-examination of state's expert witness who identified substance involved as heroin. *Smith v State* (Tenn Crim) 517 SW2d 757.

It was not error to deny defendant's pre-trial motion for inspection of test results in prosecution for selling of heroin where substance allegedly sold by defendant had been destroyed in process of testing; methods of analysis of drugs, particularly heroin, are so standardized that defendant was not seriously inhibited in his defense by such refusal where any qualified expert in that field could have thoroughly cross-examined State's witness on nature of test made and manner in which they were performed. *Carroll v State* (Tenn Crim) 517 SW2d 13.

See *Alba v State* (Tex Crim) 492 SW2d 555, § 11[m].

There was no violation of state disclosure statute sufficient to warrant reversal of convictions for burglary and rape where tests conducted at scene, to determine whether person standing on stairs outside of complainant's apartment could see into living room, were of exceptionally commonplace variety, that was, merely standing in place suggested by witnesses to see if they were able to observe what they claimed to have observed at that location. *State v Mounsey* (1982) 31 Wash App 511, 643 P2d 892.

See *State v Stewart*, 56 Wis 2d 278, 201 NW2d 754, § 11[k].

[\*22b] Ballistic report

In a number of cases the court refused to permit the defendant to inspect a ballistic report prepared for the prosecution.

For other cases wherein the court also refused to permit inspection of a ballistic report, see *Ezzell v State* (1956, Fla) 88 So 2d 280, supra § 11[c], and *Kinder v Commonwealth* (1955, Ky) 279 SW2d 782, supra § 3.

The denial of the defendant's motion to obtain a copy of the report of the ballistics bureau of a police department with respect to a certain bullet or bullets found in the body of the alleged murder victim was also upheld as proper in *Application of Hughes* (1943) 181 Misc 668, 41 NYS2d 843.

In *People v Courtney* (1963) 40 Misc 2d 541, 243 NYS2d 457, it was held that the defendant was not entitled to inspection of a ballistics report prepared by an expert for the prosecution. The court noted that while such a report may be subject to inspection at the trial for the purpose of cross-examination of the expert if he testifies, it is not itself admissible evidence; and that even in a civil case such material prepared by one party for litigation is not obtainable by the other party in advance of trial, unless exceptional circumstances to avoid an injustice are shown.

The defendant's motion for production of a copy of the ballistic report concerning the weapon allegedly used in the

commission of the offense was denied in *People v Jordan* (1953, *Gen Sess*) 128 NYS2d 457, on the ground that such report would not be admissible as evidence on the trial.

In *Commonwealth v Capps* (1955) 382 Pa 72, 114 A2d 338, the court, upholding the denial of the defendant's request for permission to inspect the finding of a police ballistics expert, said that since the defendant admitted that he had shot and killed the victim, the defendant's argument relating to the refusal to produce the report was wholly without merit.

<>

See also *Barbee v Warden, Maryland Penitentiary* (1964, CA4 Md) 331 F2d 842, supra § 6[a], wherein a writ of habeas corpus was granted to the petitioner, who had been convicted in a Maryland state court, for the reason that the prosecution withheld reports of ballistics and fingerprint tests which cast grave doubt upon the petitioner's involvement in the shooting in question.

On the other hand, see *McMullen v Maxwell* (1965) 3 Ohio St 2d 160, 32 Ohio Ops 2d 150, 209 NE2d 449, supra § 4[b], wherein the prosecution's failure to disclose the results of ballistic tests was held violative of the accused's right to due process of law.

<>

See *People v Taylor* (1982) 107 Ill App 3d 1019, 63 Ill Dec 634, 438 NE2d 565, § 25[b].

Failure of government to supply defendant ballistic report and casings which had not been tested did not result in error in admission of other evidence where totality of evidence left no doubt as to identity of weapon used in crime. *Brewster v Commonwealth* (1978, Ky) 568 SW2d 232.

In first-degree murder and attempted-murder prosecution, trial court order compelling state to respond to defendant's motion for bill of particulars would be rescinded and set aside insofar as it ordered state: (1) to "run rap sheets," i.e., to search for and produce arrest and conviction records as far as they existed for all "lay" prosecution witnesses; (2) to produce names and addresses of prosecution witness; (3) to specify precise location of defendant within house at time of alleged crime; (4) to specify number and location of bullet holes found at crime scene; (5) to give number of spent pellets found at crime scene; and (6) to give precise locations and number of spent castings and cartridges found at crime scene. *State v Hines* (1982, La App) 422 So 2d 1297.

See *State v Hurd* (Mo App) 520 SW2d 158, § 21[b].

See *Mears v State* (Nev) 422 P2d 230, cert den 389 US 888, 19 L Ed 2d 188, 88 S Ct 124, reh den 389 US 945, 19 L Ed 2d 303, 88 S Ct 299 § 21[b].

See *State v Quintana* (App) 86 NM 666, 526 P2d 808, cert den 86 NM 656, 526 P2d 798, § 21[e].

See *People v Torres*, 77 Misc 2d 13, 352 NYS2d 101, § 11[m].

In prosecution for murder, trial court did not abuse discretion in failing to exclude evidence of ballistics test which prosecution did not disclose to defendant, notwithstanding that nondisclosure violated discovery statute, since trial court had option of sanctions to impose, and sanction of declaring recess and giving defendant's attorney opportunity to question witness was proper alternative. *State v Mayo* (1979) 40 NC App 626, 253 SE2d 276.

Defendant in murder prosecution was entitled to pretrial inspection of ballistics report in possession of prosecutor. *Hamm v State (Okla Crim) 516 P2d 825.*

Prosecution was not required to furnish defendant in manslaughter prosecution with information of prosecution's firearms expert that was favorable to defendant where defendant knew expert had conducted tests with death weapon but failed to request any information from expert though he had opportunity to do so, and where defendant also failed to conduct his own tests on weapon; under such circumstances prosecution's withholding of information from its expert did not entitle defendant to new trial after his conviction where it appeared from record that withheld information would not have created reasonable doubt about defendant's guilt. *State v Penland (1981, SC) 273 SE2d 765.*

See *Losoya v State (1982, Tex App 4th Dist) 636 SW2d 566, § 25[b].*

In murder prosecution in which ballistics report was tendered to defense counsel only after pistol and slugs from deceased's body had been introduced into evidence, new trial was not required, notwithstanding defense counsel's statement that he would have objected to admission into evidence of pistol and slugs had he known that report was inconclusive, where no discovery request had been made, where defendant had admitted to other witnesses that she had shot deceased, and where contents of report were not material in that report raised no reasonable doubt which did not otherwise exist. *Boles v State (1980, Tex Crim) 598 SW2d 274.*

[\*22c] Handwriting expert's report

In the following cases the court refused to permit the defendant to inspect a handwriting expert's report.

In *People v Sauer (1958) 163 Cal App 2d 740, 329 P2d 962, cert den 359 US 973, 3 L ed 2d 839, 79 S Ct 888, supra § 6[a]*, the defendant's contention that the trial court abused its discretion in not permitting him to inspect before trial a handwriting expert's report was held not sustainable under the circumstances.

The trial court's refusal to permit the defendant to inspect the report of a handwriting expert was also held not error in *People v Dinan (1962) 15 App Div 2d 786, 224 NYS2d 624, affd 11 NY2d 350, 229 NYS2d 406, 183 NE2d 689, and on other grounds 11 NY2d 1057, 230 NYS2d 212, 184 NE2d 184, cert den 371 US 877, 9 L ed 2d 115, 83 S Ct 146*, the court pointing that there was nothing in the report which was inconsistent with the testimony of the witnesses on the trial or which could be helpful to the defense in the cross-examination of the witnesses.

<>

Failure of prosecution in forgery case to comply with mandatory statute regarding submission of handwriting samples to jury for purpose of comparison before defendant announced himself ready for trial was reversible error where defendant made motion for disclosure of handwriting analysis and where failure to comply with statute involved only evidence connecting defendant to offense. *Henderson v State (1978) 145 Ga App 597, 244 SE2d 136.*

Failure of state, in prosecution for attempting to obtain narcotics by uttering forged prescription, to produce forged prescription taken from defendant at time of arrest so that it could be submitted to handwriting expert for analysis, did not constitute error where state did not assert that defendant wrote prescription but only that he uttered it, knowing it to be fraudulent. *Barnes v State (1978) 145 Ga App 38, 243 SE2d 302.*

[\*22d] Results of lie detector test

In at least one case the results of a lie detector test were held producible for inspection by the defendant. Thus, where a physician was charged with rape allegedly committed under circumstances where the victim was prevented from

resisting because of an intoxicating narcotic or anesthetic substance administered to her, and where shortly after the complaining witness made her report to the police, she was given a lie detector test, and subsequent to such test the police recorded the defendant's conversations with the complaining witness, it was held in *Ballard v Superior Court of County of San Diego* (1965, Cal App) 44 Cal Rptr 291, that the defendant was entitled to examine the results of the lie detector test given to the complaining witness. Pointing out that the results of the test might be very important in determining whether the accusatory stage had been reached at the time the police recorded the defendant's conversations with the complaining witness, and that if an examination of the results raised some doubt concerning the veracity of the complaining witness' report to the police, it would tend to show that the conversations between her and the defendant were recorded during the investigatory stage of the case, the court concluded that since the results of the test appeared to be the main objective information available to the defendant on the police officers' state of mind at the time the conversations were recorded, it would be difficult for the defendant to properly prepare for trial without them, and consequently justice required that they should be produced for his inspection. The court said that inadmissibility of the results in evidence was no bar to discovery, and that it was difficult to make a distinction between the defendant's right to discover a prosecution expert's opinion based on an evaluation of physical evidence and the defendant's right to discover such an opinion based on an evaluation of physical responses recorded on a machine.

In the following cases, on the other hand, the court refused to permit the defendant to inspect the results of a lie detector test.

In *State v McGee* (1962) 91 Ariz 101, 370 P2d 261, cert den 371 US 844, 9 L ed 2d 79, 83 S Ct 75, the denial of the defendant's motion to inspect the results of a lie detector test given to an alleged accomplice was held proper, because such results were not and could not be evidence in themselves.

The results of polygraph tests were also held not producible for inspection by the defense in *State v Thompson* (1957) 50 Del 456, 134 A2d 266, supra § 11[b]. See also *State v Winsett* (1964, Del) 200 A2d 237, supra § 11[b], apparently recognizing that the results of polygraph tests are not subject to inspection.

<>

Defendant charged with rape was not entitled to results of polygraph tests given by police to complaining witness. *Ballard v Superior Court of San Diego County*, 64 Cal 2d 159, 49 Cal Rptr 302, 410 P2d 838.

Where circumstances were such that owner of credit card underwent police polygraph examination during investigation into wino's use of card to purchase color television and stereo, wino facing forgery and grand theft charges was entitled to pretrial discovery of record of polygraph examination if judge determined record contained exculpatory matter. *People v Lucero* (1980, Colo App) 623 P2d 424.

See *Downs v. Austin*, 522 So. 2d 931 (Fla. Dist. Ct. App. 1st Dist. 1988), § 9[d].

In prosecution for rape, defendant was not entitled to inspect results of lie detector test given to victim, which test was in possession of prosecution, despite defense contention that such evidence would be favorable to defendant. *Nations v State*, 234 Ga 709, 217 SE2d 287.

In prosecution for kidnapping and rape, defendant was not entitled to pretrial discovery of results of lie-detector test given to prosecutrix. *Zupp v State* (Ind) 283 NE2d 540.

Defendant in murder prosecution was not entitled to inspect results of polygraph test given to uncle of defendant who died before trial where such statements would not have been admissible under any exception to hearsay rule and their admissibility would not have been enhanced because they were made in course of polygraph examination.

*Commonwealth v Chase* (1977) 372 Mass 736, 363 NE2d 1105.

Defendant charged with rape had no right to disclosure of results of polygraph examinations administered to complainant and other prosecution witnesses where state law characterized such tests as unreliable evidence, and results were inadmissible even under stipulation. *State v Greer* (1981, Mo App) 616 SW2d 82.

In murder prosecution, state was duty bound to furnish polygraph evidence that may have been exculpatory to defendant even though such evidence may not have been admissible at trial. *State v Christopher* (1977) 149 NJ Super 269, 373 A2d 705.

See *State v Bodenschatz* (1983) 62 Or App 606, 662 P2d 1, petition den 295 Or 446, 668 P2d 382, § 8.

In prosecution for third degree murder and weapon violation, defendant was not entitled to polygraph testing data relating to prosecution witness who first stated defendant was not involved in crime charged, who agreed to take polygraph test which indicated that he was untruthful, and who then gave second statement implicating defendant, where copies of two statements were supplied to defense counsel. *Commonwealth v Aye* (1980, Pa Super) 418 A2d 767.

[\*22e] Fingerprints; photograph of fingerprints; report of fingerprint examination

In some cases photographs of fingerprints or reports of fingerprint tests were held producible for inspection by the defendant.

In *Barbee v Warden, Maryland Penitentiary* (1964, CA4 Md) 331 F2d 842, supra § 6[a], a writ of habeas corpus was granted to the petitioner, who was convicted in a Maryland state court, for the reason that the prosecution withheld reports of ballistics and fingerprint tests which cast grave doubt upon the petitioner's involvement in the shooting in question.

An order directing the district attorney to furnish to the defendant photographs of all fingerprints found on the pistol allegedly used in the commission of the charged crime was granted in *People v Terzani* (1933) 149 Misc 818, 269 NYS 620, where the defendant's moving affidavit alleged that he, together with many other persons, had attended the meeting at which the homicide in question took place and had actually seen another person fire the shot that killed the victim, and that he had immediately made complaint thereof and pointed out the place of concealment of the pistol. Noting that the motion assumed that fingerprint impressions had been obtained from the pistol, but that the prosecution had neither denied nor admitted such to be the case, and stating that if fingerprint impressions had been obtained from the pistol, they would be a decisive factor in determining who had fired the shot that killed the victim, the court concluded that since the defendant was entitled to the benefit of any reasonable opportunity to prepare his defense and to prove his innocence, justice demanded that the present application for such inspection be granted.

◇

In the following cases, on the other hand, the court refused to permit the defendant to inspect fingerprints, photographs of fingerprints, or reports of fingerprint examinations.

In *State v Thompson* (1957) 50 Del 456, 134 A2d 266, supra § 11[b], it was held that the defendant was not entitled to inspection of the results of fingerprint examinations which were in the possession of the prosecution. See also *State v Winsett* (1964, Del) 200 A2d 237, supra § 11[b], apparently recognizing that the results of fingerprint examinations are not subject to inspection.

The denial of the defendant's motion for an order requiring the prosecution to produce, for inspection by the defense, all

fingerprints taken by the prosecution at the cottage of the alleged murder victim was also upheld in *Commonwealth v Bartolini* (1938) 299 Mass 503, 13 NE2d 382, cert den 304 US 565, 82 L ed 1531, 58 S Ct 950, supra § 5[a].

In *People v Jordan* (1953, Gen Sess) 128 NYS2d 457, the defendant's motion for production of a report of the fingerprint markings found upon the weapon allegedly used in the commission of the offense was denied on the ground that such report would not be admissible as evidence on the trial.

In *Petition of Di Joseph* (1958) 394 Pa 19, 145 A2d 187, it was held (in a per curiam opinion) that the prosecuting attorney should not, before trial, be required to make available for examination and inspection by the defendant photographs of fingerprints, if any, found on the weapon allegedly used in the commission of the crime charged against the defendant. In a concurring opinion, it was stated that an accused is entitled to examine the prosecution's exhibits which are reasonably associated with the theory of guilt and of which he probably may be unaware, but that where an exhibit is one of which the accused is entirely cognizant and he already knows whether it could or could not be an item of incrimination against him, he is not entitled to its inspection if such inspection would hamper the Commonwealth in proceeding with its case. It was pointed out, in the same opinion, that the defendant in the present case was the one person who knew whether she had used the weapon or not, and that she was therefore not being denied anything which she would need in the ascertainment of the truth.

<>

Trial court did not commit reversible error in denying motions of defendant in murder prosecution to require prosecution to produce fingerprints; clothes or materials from which fingerprints were taken; notes, memoranda, and reports of investigator; tape, record, or other recordings of conversations or statements to investigating officers by other persons; written statement, note, or memoranda purporting to be statement by defendant to investigating officers; letters, writings, communications from defendant to his wife, and vice versa; things seized under search warrant pertaining to defendant or to this case; and 2 diamond rings or parts of rings shown to defendant by investigating officer, where request by defendant was simply for defendant's use in preparation of defense, and it did not appear that statements were sought by defendant for purpose of impeachment. *Smith v State*, 282 Ala 268, 210 So 2d 826.

In homicide prosecution, it was reversible error to deny discovery of identity of experts to whom prosecution had shown bloody palm print found on decedent's bed sheet and whose opinion was that maker of print couldn't be identified, where print was most significant evidence in case, experts had testified that print was or was not defendant's but no evidence was presented that print could not be identified, and prosecutor argued to jury that People's experts were better qualified than defendant's. *People v Johnson*, 38 Cal App 3d 228, 113 Cal Rptr 303.

In prosecution for burglary, rape, aggravated sodomy and armed robbery, trial court did not err in refusing to grant new trial based on state's failure to disclose sheriff department's failure to comply with state crime laboratory's request for copies of rape victim's fingerprints for elimination purposes, notwithstanding fact fingerprints lifted from victim's nightstand next to her bed had been determined by state crime laboratory not to have been left by accused. *Lingerfelt v State* (1978) 147 Ga App 371, 249 SE2d 100.

Denial of defense request, 15 minutes prior to trial, that prosecutor produce "any and all items on which state contends defendant's fingerprints were found at scene of alleged burglary," was not denial of Brady rights where defense did not request court to make in camera inspection of state's file to determine if there was anything in it favorable to defense, there being no law requiring discovery per se in criminal cases or giving accused right to inspect state's file, and where defense did not demonstrate that such evidence, some of which was not readily available when requested, was suppressed or that it was material and favorable to accused. *Tippins v State* (1978) 146 Ga App 448, 246 SE2d 458.

Reversible error occurred in homicide prosecution where state's case rested entirely upon circumstantial evidence that

unseen defendant shot.22 caliber bullet through open window striking victim in head, but state failed to comply with pretrial discovery request by concealing until time of trial fingerprint expert's exhibits linking defendant to suspected murder weapon. *State v Davis (1981, La) 399 So 2d 1168*.

Harmless error occurred in prosecution for receiving stolen goods where, despite defense discovery request for results of scientific tests, prosecution concealed from defense discovery of accused's fingerprint on stolen property until such evidence was used on redirect examination. *State v Pool (1978, La) 361 So 2d 1202*.

See *State v Chase (La) 327 So 2d 391*.

Fingerprint evidence was admissible despite failure of prosecution to make written response to defendant's motion for discovery, where defendant made no motion for continuance on grounds of state's failure to comply with discovery order and fingerprint evidence was disclosed and was available for defendant's inspection at preliminary hearing approximately three and one-half months prior to trial. *State v White (1983, La App) 430 So 2d 171*, cert den (La) 433 So 2d 1055 and cert den (La) 433 So 2d 1055.

In prosecution for first-degree murder, prosecution did not violate discovery rule by failing to provide defendant with negative of fingerprint introduced in evidence where defendant was provided with envelope bearing original fingerprint, photographs developed from negative, defendant's known fingerprints, and identification results reached by State's expert, and rule requiring disclosure of exculpatory evidence was not violated since, as both State's and defendant's experts initially incorrectly identified fingerprint as defendant's, negative was inculpatory rather than exculpatory evidence, but discovery rule was violated by prosecutor's failure to disclose statements of private detectives who investigated murder, since, whether or not statements were material, and despite prosecutor's subsequent decision not to use detectives' testimony at trial, rule required disclosure in that detectives had been listed as prospective state witnesses. *State v Caldwell (1982, Minn) 322 NW2d 574*.

In prosecution for third-degree murder, defendant was not prejudiced by state's inadvertent failure to disclose report of fingerprint examination before trial as required by statute, where prosecutor furnished defense counsel with report as soon as error was discovered, defense counsel made complete cross-examination of expert who testified as to report, was allowed to remove report for examination by own expert and declined court's offer of additional time in which to obtain expert to testify on defendant's behalf. *State v Morgan (1980, Minn) 296 NW2d 397*.

See *State v Williams, 183 Neb 257, 159 NW2d 549, § 17*.

See *State v Quintana (App) 86 NM 666, 526 P2d 808*, cert den 86 NM 656, 526 P2d 798, § 21[e].

In murder prosecution, inspection allowed of results of fingerprints. *People v Powell, 49 Misc 2d 624, 268 NYS2d 380*.

Under discovery order state had no duty to submit second fingerprint comparison to defendant where comparison did not exist prior to trial; where state was only required to submit this comparison to defendant promptly following decision to use comparison, its action in that respect amounted to substantial compliance with discovery order. *State v Thomas, 291 N.C. 687, 231 S.E.2d 585 (1977)*.

See *State v Hockings, 29 Or App 139, 562 P2d 587, § 11[m]*.

Defendant was entitled to inspection of fingerprint tab taken from scene of crime, handwriting exemplar involved in crime, and other physical items of evidence. *State v Sahlie (SD) 245 NW2d 476*.

Error occurred in burglary prosecution where defense requested discovery of any real evidence in possession of police or prosecutor's office which was in any way material to guilt or innocence of accused, and where state was allowed to

introduce evidence of accused's palm print which matched undisclosed print lifted from trophy at scene of burglary; although state's contention that it was unaware of existence of print until trial was in progress was untenable, since prosecutor had obligation to investigate case before going to trial, error was harmless where accused was arrested at burglary scene and also testified, admitting his presence, while contending it was under innocent circumstances. *Hollowell v State* (1978, *Tex Crim*) 571 SW2d 179.

[\*23] Photograph or slide of person or place or other objects; motion picture 162

In some cases an accused was permitted to inspect photographs, slides, or motion pictures in the possession of the prosecution which related to a person or a place or other objects.

Where, in a prosecution for robbery and other felonies, the robbery victim was unable to identify the defendant as the robber when certain pictures of the defendant were exhibited to him, but when he subsequently had a personal view of the defendant, he positively identified the defendant as the robber, it was held in *Norton v Superior Court of San Diego County* (1959) 173 Cal App 2d 133, 343 P2d 139, that the defendant was entitled to an order for pretrial production and inspection of his photographs which were shown to the victim. Noting that absent some governmental requirement that information be kept confidential for the purposes of effective law enforcement, the prosecution has no interest in denying the accused access to all evidence that can throw light on issues in a case, and that to deny flatly any right of production on the ground that an imbalance would be created between the advantages of the prosecution and the defense would be to lose sight of the true purpose of a criminal trial, the court said that in the present case it was shown that in defense of the case the defendant might legitimately have reason to use the photographs in question.

In *State v Superior Court* (1965, NH) 208 A2d 832, 7 ALR3d 1, supra § 3, it was held that the defendant was entitled to pretrial inspection of any photographs, movies, and photographic or specimen slides taken or made as a part of the autopsy performed on the body of the victim of the alleged murder.

In *Petition of Di Joseph* (1958) 394 Pa 19, 145 A2d 187, infra § 25[a], the court upheld an order requiring the prosecution to produce, for inspection by the defense, photographs of the place of the alleged murder which had been taken by the prosecuting attorney or his representatives subsequent to the offense.

For a case wherein inspection of a photograph of the victim of the alleged homicide was permitted during the trial where it was used by the prosecuting attorney in his examination of a witness, see *Bailey v State* (1963, *Tex Crim*) 365 SW2d 170, supra § 9[c], footnote 19.

◇

In the following cases, on the other hand, the court refused to permit the defendant to inspect photographs of the kind under consideration which were in the possession of the prosecution.

For other cases wherein the court denied inspection of photographs, see *Commonwealth v Bartolini* (1938) 299 Mass 503, 13 NE2d 382, cert den 304 US 565, 82 L ed 1531, 58 S Ct 950, supra § 5[a]; *Commonwealth v Noxon* (1946) 319 Mass 495, 66 NE2d 814, supra § 5[a]; *State ex rel. Regan v Superior Court* (1959) 102 NH 224, 153 A2d 403, supra § 8.

In *People v Leahey* (1960) 26 Misc 2d 438, 207 NYS2d 619, the defendant's pretrial motion for discovery of photographs taken by investigators during their interrogation of the defendant was denied, the court concluding that justice did not require the photographs to be made available to defense counsel at this stage of the proceedings.

In *Bass v State* (1950) 191 Tenn 259, 231 SW2d 707, wherein the defendant, on appeal from a judgment of conviction,

assigned error on the ground, inter alia, that he and his counsel were not permitted to see certain pictures introduced by the prosecution until they were presented at the trial of the case, the court held that neither the defendant nor his counsel had any right, before the trial, to demand of the prosecution the pictures which were offered in evidence.

The defendant's assignment of error in that certain pictures were introduced in evidence before the defendant had had an opportunity to examine them prior to trial in order to properly prepare his defense was also rejected in *Pettigrew v State* (1956) 163 Tex Crim 194, 289 SW2d 935, the court holding that there was no authority requiring the prosecution to furnish the defendant, before trial, with copies of pictures it intended to introduce against him.

<>

The denial of the defendant's pretrial motion for production of motion pictures taken at the time he was engaged in conversation with the widow of the alleged murder victim was upheld in *State v Spica* (1965, Mo) 389 SW2d 35, supra § 3.

<>

In prosecution for various drug-related offenses, trial court did not abuse discretion in denying defendants' motions for mistrial and new trial based, inter alia, on alleged prosecutorial misconduct in failing to make pretrial disclosure of allegedly exculpatory photograph of one defendant. *United States v Wentz* (1982, CA8 ND) 686 F2d 653.

See *Thigpen v State* (1977, Ala App) 355 So 2d 392, affd (Ala) 355 So 2d 400, § 16[a].

In murder prosecution it was not error for court to deny defendant's request that picture be produced where there was no allegation that prosecution suppressed evidence favorable to defendant. *State v Thomas*, 110 Ariz 120, 515 P2d 865.

Although prosecution's delay in furnishing to defendant, convicted of attempted jail escape, adequate description of photographs of jail cell area taken immediately after escape attempt constituted noncompliance with discovery order issued in response to defendant's discovery motion, such nondisclosure did not warrant reversal of defendant's conviction where inadequacy of photographs' description appeared to have been oversight, evidence in form of those photographs was cumulative of testimony already given, and no prejudice to defendant otherwise appeared in record. *People v Schlegel* (1980, Colo App) 622 P2d 98.

Prosecutor's three-month delay in complying with discovery order to produce photographs of dismemberment-homicide crime scene until three days before trial did not prejudice defendants where defense counsel was afforded sufficient time by way of continuance to utilize photographs in best way he saw fit. *Gray v State* (1981, Del Sup) 441 A2d 209.

Photographs from which witness made out-of-court identification should be preserved and made available to defense counsel at trial so that possibility of prejudice may be revealed and out-of-court identification may be impugned. *Reed v State* (Del) 281 A2d 142.

In prosecution for assault with intent to kill and weapons violation, new trial was not required by government's failure to disclose photographic evidence where defendant failed to request disclosure. *Mangrum v United States* (1980, Dist Col App) 418 A2d 1071, cert den (US) 66 L Ed 2d 2986, 101 S Ct 539.

In prosecution for armed robbery and assault with dangerous weapon, where defendant was identified by victim, in part, from photographs, there was no duty on government to preserve photographic arrays from which no identification was made; there was, however, duty to preserve, and defendant had right to discover, all photographic arrays from which

identification was made. *Washington v United States* (1977, *Dist Col App*) 377 A2d 1348.

Defendant in murder prosecution was not entitled to new trial on ground that state had violated applicable rule of criminal procedure by failing to produce photograph of defendant before introducing it in evidence where state had not obtained photograph until day of trial and where trial court obtained admission from defendant that photograph was picture of him. *King v State* (1978, *Fla App D3*) 355 So 2d 831.

Denial of motion for discovery and inspection by defendant in murder trial of certain photographs of body of deceased was not error, since no Georgia statute or rule of practice allows such inspection. *Bryan v State*, 224 Ga 389, 162 SE2d 349.

State court committed no reversible error in failing to require prosecution to produce photograph used in pretrial identification procedure where district attorney submitted all photographs and composites in his possession, photograph was mug shot in files of police, and district attorney offered to tell defendant's counsel how copy could be acquired but counsel was not interested. *Foote v State*, 141 Ga App 18, 232 SE2d 366.

See *People v Camel*, 59 Ill 2d 422, 322 NE2d 36, § 19.

Trial court did not err in denying pretrial inspection of photograph of murder victim where cause of death was fully established by competent evidence, and photographs were actually introduced at trial. *People v Farnsley*, 53 Ill 2d 537, 293 NE2d 600.

Unless photographs are favorable to accused, they are not automatically discoverable, save and except where prosecution intends to use them at trial, or where they are obtained from accused himself. *People v Newbury*, 53 Ill 2d 228, 290 NE2d 592.

Two defendants charged with armed robbery of three girls at gunpoint should have been allowed to examine before trial photograph of one defendant given by girl to police, but fact that photograph was first produced at trial required neither suppression nor reversal where defendants were given opportunity to cross-examine witnesses regarding circumstances surrounding receipt of photo. *People v Moore* (1983) 115 Ill App 3d 266, 71 Ill Dec 167, 450 NE2d 855.

In prosecution for armed robbery and armed violence, defendant's right to discovery was not violated by State's failure to turn over composite drawings and photographs used in several pre-trial photographic showups, where composite drawings and photographs were not used by State at trial, they were neither obtained from nor did they belong to defendant, there was no indication in record that evidence would have been favorable to defendant, and under state discovery rules photos were not automatically discoverable by defendant unless prosecution intended to use them at trial, they were obtained from or belonged to defendant, or were favorable to defense. *People v Son* (1982) 111 Ill App 3d 273, 66 Ill Dec 952, 443 NE2d 1115.

Harmless error occurred in aggravated-battery and armed-robbery prosecution through introduction into evidence of photograph depicting victim's injuries where photograph was not produced pursuant to pretrial discovery order, but neither the surprise nor prejudice was demonstrated on appeal by record which did not include photograph in question. *People v Sakalas* (1980) 85 Ill App 3d 59, 40 Ill Dec 29, 405 NE2d 1121.

Defendant was not entitled to production of photographs in state's possession under defendant's pretrial discovery motion where photographs did not belong to defendant, state did not intend to use photographs at trial but only used them to impeach after witness made statements believed to be untrue, and photographs were not favorable to defense. *People v Molsby* (1978) 66 Ill App 3d 647, 23 Ill Dec 309, 383 NE2d 1336.

See *People v Rosa* (1977) 49 Ill App 3d 608, 7 Ill Dec 228, 364 NE2d 389, § 27[b].

See *People v Lighting*, 83 Ill App 2d 430, 228 NE2d 104, § 17.

Failure of prosecution to turn over to pro se defendant pursuant to discovery requests photographs shown to assault victim by police did not violate due process where no positive identification resulted from display and where, as a result, no record was kept by police concerning which photographs were shown to victim in identification process. *Owen v State* (1978, Ind) 381 NE2d 1235.

Trial court erred in denying defendant's motion for production of picture display used by police in out-of-court identification procedure, where photographs sought were clearly designated by defendant and were material to defense. *Rowe v State* (Ind) 314 NE2d 745.

Defendant in robbery prosecution was not entitled to production of mug shots taken of defendant and his companions after arrest since mug shots would not have in any way proved exculpatory. *State v Williams* (1977, La) 349 So 2d 286.

It was not error to deny defendant's motion to inspect photographs, charts and diagrams of scene of crime in possession of district attorney's office where defendants had been allowed to visit scene of crime and were thus able to have available to them things they requested. *State v Nix* (La) 327 So 2d 301.

Denial of accused's request for pretrial inspection of photographs taken by wall camera triggered by victims during robbery, which photographs were direct evidence of commission of crime, was proper. *State v Martin* (La) 304 So 2d 328.

See *State v Frezal* (La) 278 So 2d 64, § 13[d].

Trial court properly refused to grant request for pretrial discovery of copies of photographs and other photographic evidence. *State v Finley* (La) 275 So 2d 762.

Police were not required to make available to defendant motion pictures taken of accused committing crime. *State v Dickson*, 248 La 500, 180 So 2d 403.

Although photographs depicting bullet hole in wall between defendant's home and adjacent apartment were discoverable pursuant to discovery order, defendant failed to show that state's non-compliance with order caused prejudice to defendant sufficient to deprive him of fair trial where, inter alia, state withdrew its offer to place photographs in evidence, defendant had full access to bullet hole, was aware that police had inspected hole, and had ample time to make his own measurements, and where there was no evidence of bad faith on part of state. *State v LeClair* (1978, Me) 382 A2d 30.

Court properly denied defendant's motion to examine all photographs, other than that of defendant, which were shown to identifying witnesses by police. *Commonwealth v Gibson* (Mass) 255 NE2d 742, cert den 400 US 837, 27 L Ed 2d 70, 91 S Ct 75.

In prosecution for rape, prosecution was not required to produce mug photograph selected by victims, where victims did not claim that photograph was of one of their assailants, but claimed only that it resembled one of them, there was no allegation that person in photograph did not resemble defendant, and there was no allegation that mug books contained defendant's picture which victims failed to identify. *Commonwealth v Walker* (1982) 14 Mass App 544, 441 NE2d 261, app den 388 Mass 1102, 445 NE2d 156.

It was not error to fail to require prosecuting attorney to produce all photographs shown to victim and to witnesses; it was sufficient to provide group of eleven photographs shown to victim and later shown to five other witnesses which

ultimately resulted in identification of defendant. *Commonwealth v Clark (Mass App) 334 NE2d 68.*

Accused was entitled to inspection of original "parts book," or photographs of pages thereof, or copies of films used to identify tractor parts alleged to have been embezzled. *Sisk v State (Miss) 260 So 2d 485.*

Question of whether or not to compel discovery of certain photographs taken by prosecution was within trial court's discretion, and where evidence of defendant's guilt was overwhelming there was no reversible error in failure to require that they be produced. *McCraw v State (Miss) 260 So 2d 457.*

Trial judge in murder prosecution should have granted defendant right to inspect photographs, confessions, and other tangible evidence, although, under circumstances, denial of right of inspection was not prejudicial. *Armstrong v State (Miss) 214 So 2d 589.*

Notwithstanding state's duty in criminal prosecution to disclose to defendant on request any exculpatory evidence, defendant's rights were not prejudiced by state's failure to relinquish to defendant in rape prosecution photograph of lineup in which another person was identified as perpetrator of rape committed on same date as one involved in defendant's prosecution, where prosecutrix identified exhibit as photograph depicting lineup she viewed in which she identified defendant as her assailant and where photograph sought by defendant apparently was photograph of lineup viewed by someone other than victim he attacked. *State v Berry (1980, Mo) 609 SW2d 948.*

Theft defendant was not prejudiced by failure of prosecution to give discovery of photographs, including picture of defendant, which had been shown to theft victim and witness by police prior to lineup in which defendant was also identified, and which were not preserved by police, since (1) police are not required to retain photographs for eventuality of trial, (2) photographs were not introduced at trial and did not relate to offense charged, and so were not encompassed by discovery rule, (3) there was no surprise to defendant, in that both victim and witness referred to photographs at pretrial suppression hearing and policeman gave no testimony at pretrial as to use because not asked, (4) no basis existed for presumption that photographs were impermissibly suggestive and defendant made no attempt to determine whether display or content of photographs or police procedure were in fact suggestive, (5) defendant failed to make objection that discovery was violated until conclusion of full direct testimony, and (6) no due process rights of defendant were violated in that lineup produced reliable identification, presumption of undue suggestiveness of photographs did not exist, and brief spans of observation of thief by victim and witness were matter of witness credibility and did not render basis of identification unreliable as matter of law. *State v Lewis (1982, Mo App) 637 SW2d 421.*

In prosecution for murder in which victim's death was caused by multiple stab wounds, defendant's motion for discovery of photographs of scene and of corpse was properly granted where defendant argued that photographs were necessary to enable experts to make blood spatter analysis which might have bearing on manner and violence with which murder was committed. *People v Coleates (Misc) 376 NYS2d 374.*

Even though photographs requested to be discovered and inspected by defendant depicted acts of devious sexual intercourse which would be considered obscene, defendant's motion would not be vacated where photographs involved formed the basis of indictment of defendant. *People v Hageman, 90 Misc 2d 119, 393 NYS2d 893.*

See *People v Player, 80 Misc 2d 177, 362 NYS2d 773, § 11[m].*

Accused may employ motion for discovery to ascertain whether or not any witness viewed photographs or drawings in making identification prior to trial. *People v Abraham, 74 Misc 2d 544, 344 NYS2d 792.*

Motion to direct district attorney to furnish defense counsel with copies of photographs taken in connection with charges contained in indictment was denied. *People v Cusano, 63 Misc 2d 906, 313 NYS2d 833.*

Defendant was not entitled to pretrial inspection of closed-circuit television film of certain of his activities during time prior to his arrest, where prosecution agreed to full disclosure of film at trial. *People v Serour*, 63 Misc 2d 852, 313 NYS2d 621.

Although better practice dictated that photographs used in pretrial identification procedures should be subject to inspection and disclosure by defendant, refusal to permit such discovery was harmless error where it did not deny defendant right to effective cross examination. *State v. Legette*, 292 N.C. 44, 231 S.E.2d 896 (1977).

In prosecution for first-degree manslaughter, all photographs, not just those described as autopsy photographs, were to be produced by prosecution, even though not ordered by court to do so and even though defendant had not initiated discovery. *State v Stevens (ND)* 238 NW2d 251.

In obscenity prosecution, accused was entitled to discovery of allegedly obscene movie which he was charged with having exhibited, in order to have it seen and examined by experts whom he intended to call as witnesses. *Melton v State (Okla Crim)* 512 P2d 204.

See *Doakes v District Court of Oklahoma County (Okla Crim)* 447 P2d 461, § 17.

Defendant was not entitled to production of police photo or array of photographs and line-up summary sheet where court found that line-up was proper and where defendant had access to line-up sheet and police photograph at suppression hearing. *Commonwealth v Spann (Pa)* 340 A2d 862.

In prosecution for housebreaking, grand larceny and safecracking, state's failure to disclose existence of roll of film which cast serious doubt on credibility of state's only witness who implicated defendant was ground for new trial. *State v Goodson (1981, SC)* 277 SE2d 602.

In prosecution for murder, state's failure to inform defendant, who had filed discovery motion, about photograph of him which state introduced at trial was error, but was harmless error. *State v Turnbill (1982, Tenn Crim)* 640 SW2d 40.

State was not required to furnish photographs taken of truck in which defendant was alleged to have committed assault and battery with intent to commit rape. *Conboy v State (Tenn Crim)* 455 SW2d 605.

Photograph, which was taken at police station on morning that defendant was arrested and which showed injury to defendant's eye, was nondisclosed evidentiary material pertinent to defense of defendant, where picture would have been persuasive evidence to corroborate testimony of defendant, which raised issues of self-defense and sudden passion arising from adequate cause with respect to fight in which victim was stabbed. *Ball v State (1982, Tex App 11th Dist)* 631 SW2d 809, review ref.

Defendant's motion to inspect any photographs, fingerprints, or other physical evidence gathered at scene of crime, denied after court conducted hearing to determine if there was anything in requested materials which was beneficial to defendant. *Hendrix v State (Tex Crim)* 474 SW2d 230.

Where rape prosecutrix testified on cross-examination that she could recognize photograph of defendant which she had selected during photographic identification, and defendant thereupon demanded photograph, trial court did not err in overruling such request, since prosecutor denied having photograph in his possession. *Daniels v State (Tex Crim)* 464 SW2d 368.

Where witness identified defendant in court as being person he saw at crime scene, state's inability to produce set of photographs used when witness identified defendant to police had no adverse effect on admissibility of identification

testimony. *Davis v State* (1983, *Tex App Fort Worth*) 649 SW2d 380, review ref.

[\*24] Written material used or directly involved in commission of offense; writing to be used for comparison of handwriting

[\*24a] Generally

In some cases the defendant was permitted to inspect documents, papers, or other written materials which had been used or directly involved in the commission of the offense charged against him.

Where a city treasurer was accused of withholding funds from his successor in office, and where his books had been seized by the state's attorney, the court in *People v Gerold* (1914) 265 Ill 448, 107 NE 165, held that it was error for the trial court to deny the defendant's motion for permission to examine the seized books before they were actually introduced in evidence. The motion for inspection stated that the accounts upon which the charge against the defendant was made were complicated and would require investigation, and that the defendant would not have an opportunity to properly investigate all these matters if he had to wait until they were introduced in evidence. The court noted that the whole theory of law as to the trial of one accused of crime is to give him an opportunity to know the charges against him, so that he can make proper investigation and preparation for the trial.

See also *Cramer v State* (1944) 145 Neb 88, 15 NW2d 323, where the court, in upholding the denial of the defendant's application to inspect "the purported confession and other statements and documents" in the possession of the prosecution, said that when a prosecution is based upon a written instrument, as in a forgery case, the defendant is entitled to inspect and make copies of such instrument under such conditions as the trial court may prescribe, and that if a prosecution is based upon the correctness or incorrectness of certain records, such as is often the case in a prosecution for embezzlement, the examination of such records by the defendant should be granted; but that as to all statements and documents not admissible in evidence in chief, which were obtained for impeachment or other purposes not going to the merits, the defendant had no basis for demanding an inspection of them.

In *State v Winne* (1953) 27 NJ Super 304, 99 A2d 368, wherein the defendant was charged with wilfully neglecting and omitting to perform his duty as county prosecutor, it was held proper to grant an order permitting the defendant to inspect and copy "all papers, documents, correspondence, books and all other records which were part of the files" of the prosecuting attorney's office at the time the defendant was replaced, the court pointing out that the indictment covered a period of 6 years, during which thousands of matters were handled by the defendant and his staff, and that it seemed unlikely that the defendant recalled exactly what steps had been taken by his office with reference to every matter charged in the indictment. Observing that the present case was similar to a case where a city treasurer, indicted for embezzlement, was given permission to examine before trial the account books of his office which had been seized by the prosecution, the court said that the papers sought by the defendant in the present case were not the work product of the prosecution, comparable to the confession or the signed statements of witnesses, and that the papers had not even been ferreted out or collected by the prosecution. The court noted that the exercise of the power to afford a defendant an opportunity to inspect documents controlled by his opponent rests in the sound discretion of the trial court in which the cause is pending.

In *People v Radeloff* (1931) 140 Misc 690, 252 NYS 290, a prosecution for extortion, the court granted the defendant's motion for an order directing the district attorney to furnish defendant photostatic copies of certain documents upon which the present prosecution was based.

Concluding that the court in a criminal case has the power to compel an inspection of evidence, either by virtue of its inherent power to further justice or by virtue of a process of analogy to the civil procedure, the court in *State ex rel. Wagner v Circuit Court of Minnehaha County* (1932) 60 SD 115, 244 NW 100, a prosecution for obtaining money under false pretenses in connection with certain construction work for a county, held that it was within the power of the lower

court to grant the defendant's motion to compel the prosecuting attorney to permit him to inspect field notes and drawings made by the county engineer in charge of the construction work in question. Noting that it was generally held that before a court can compel an inspection, the documents sought must be evidential in character, the court pointed out that the field notes and drawings in question were something more than mere memoranda or notes collected by the prosecution in the preparation of the case; that they were the original figures and data upon which estimates, in part at least, had been made and furnished; and that, in reliance upon such estimates, one of the defendants, who was county highway superintendent, had allowed partial payments to be made to the construction company.

The view that documents or papers which are the "subject" of the charge or the "very essence" of the case, or which form the "basis" of the charge, may be required to be produced for inspection by the defense was also recognized in other cases.

#### NEW HAMPSHIRE

*State ex rel. Regan v Superior Court* (1959) 102 NH 224, 153 A2d 403, supra § 8

#### NEW YORK

*People v Carothers* (1960) 24 Misc 2d 734, 203 NYS2d 512 (stating that pretrial inspection may be granted where the defendant's statements are involved in the subject matter of the charge against him, as in a forgery indictment or an extortion case)

#### NORTH CAROLINA

*State v Goldberg* (1964) 261 NC 181, 134 SE2d 334, cert den 377 US 978, 12 L ed 2d 747, 84 S Ct 1884, supra § 17

#### OKLAHOMA

*State ex rel. Sadler v Lackey* (1957, Okla Crim) 319 P2d 610  
*Application of Killion* (1959, Okla Crim) 338 P2d 168, both supra § 3

See also *State v Shouse* (1965, Fla App) 177 So 2d 724, supra § 11[c], wherein the court upheld, under the relevant Florida statute, an order for the production of all documents and legal papers which the prosecution intended to use at the trial in a prosecution for embezzlement.

Attention is also called to *State v Huff* (1961) 157 Me 269, 171 A2d 210, an embezzlement prosecution of a town treasurer for drawing checks payable to himself upon a bank account in which town funds were maintained, wherein an auditor testified for the prosecution as to the treasurer's receipts and his bank deposits for certain fiscal years, and the court, in granting an order for new trial on appeal from a judgment of conviction, said that where an expert is permitted to summarize information contained in voluminous records containing intricate details, the records which form the basis of the summary should be in court or at least available to the opposing party for inspection.

<>

In the following cases, on the other hand, the court refused to permit the defendant to inspect documents, papers, or

other written material of the kind under consideration.

See also *Mendelsohn v People* (1960) 143 Colo 397, 353 P2d 587, involving a prosecution for burning to defraud an insurer, where the court, noting that the right of inspection of the prosecution's evidence by a defendant is non-existent in the absence of a statute to the contrary, upheld the denial of the defendant's pretrial motion for an order requiring the prosecution to return to him his company's books showing his financial condition which had previously been surrendered to the district attorney.

In a prosecution for violation of gambling laws, a lottery ticket purchased by a confidential informant was held not producible for inspection by the defendant in *Miami v Jones* (1964, Fla App) 165 So 2d 775, supra § 11[c].

In *People v Kuberacki* (1944) 310 Mich 162, 16 NW2d 703, wherein the defendant was charged with the crime of accepting a bribe to influence his official action as a city councilman in awarding a contract for parking meters on the streets of the city, the court, without discussion, held that the trial court did not commit error in refusing to compel the prosecution to produce the books and records of the successful bidder for the parking-meter contract.

And see *State v Colson* (1930) 325 Mo 510, 30 SW2d 59, supra § 6[b], involving a prosecution for embezzlement, wherein the court upheld the denial of the defendant's request during the trial for sufficient time to examine a mass of papers relating to the charge.

In *Hameyer v State* (1947) 148 Neb 798, 29 NW2d 458, a prosecution for obtaining money by false pretenses respecting resale of an oil and gas lease, it was held that there was no abuse of discretion in denying the defendant's pretrial motion for permission to inspect the lease in question. Stating that the rule that if a prosecution is based upon the correctness or incorrectness of certain records, such as is often the case in a prosecution for embezzlement, the examination of such records by the defendant should be granted "is reasonable but discretionary and should be enforced when the ends of justice require it," the court, in concluding that the trial court in the present case did not abuse its discretion, pointed out that the motion for inspection was not supported by affidavits, and that from the record it could not be said that the motion was supported by any other kind of evidence; and that there was nothing in the transcript or the bill of exceptions to show that the defendant was prejudiced by the failure of the trial court to order an inspection of the lease.

In *Commonwealth v Pearlman* (1937) 126 Pa Super 461, 191 A 365, a prosecution for the making and publishing of a fraudulent written instrument known as a "recognizance bail bond," it was held proper for the trial court to refuse to direct the district attorney to produce certain bonds which might tend to incriminate the defendant's accomplices who were not on trial.

In a prosecution for violation of the "numbers" statutes, the defendant's request for permission to examine papers seized at the time of a raid upon the place allegedly used in the commission of the offense was denied in *State v Tabet* (1951) 136 W Va 239, 67 SE2d 326, supra § 9[c], footnote 1.

<>

Cash receipt and bill of sale were properly excluded from evidence in prosecution for theft of compressor where state's attorney breached continuing duty to disclose to defendant existence of such documents, but receipt and bill of sale were thereafter properly introduced as impeachment evidence where defendant took stand and blatantly contended sale took place at time different from that reflected in documents containing his signature, in effort to exculpate himself. *State v Strickland* (1981, La) 398 So 2d 1062.

Defendant may photocopy alleged gambling records and verify their authenticity by reasonable inspection of original documents under police supervision. *People v Spadaro*, 51 Misc 2d 604, 273 NYS2d 587.

See *State v Sahlie* (SD) 245 NW2d 476, § 22[e].

Record failed to show any manifest abuse of discretion in refusing to order further production of records of employer, victim of embezzlement, where trial court made available to defendant all records of employer in possession of prosecuting attorney when state filed information, and, 2 days after trial began, court granted defendant recess from Thursday afternoon to Monday morning with stipulation that defendant and counsel be allowed to look through company's records at its office. *State v White*, 74 Wash 2d 386, 444 P2d 661.

[\*24b]      Forgery cases

In at least one case involving a prosecution for forgery the defendant was permitted to inspect papers which had allegedly been forged by the defendant. Thus, in *State v Lewis* (1929, CP) 27 Ohio NP NS 460, it was held that the defendant who was accused of the forgery of certain papers was entitled to a pretrial inspection of such papers to enable her to prepare her defense to the charge of the prosecution.

And in another case involving forgery and other offenses the defendant was permitted to inspect not only those documents which were the subject of the forgery charge, but also other documents which might be used by handwriting experts as standards of comparison. Thus, in *People v Calandrillo* (1961) 29 Misc 2d 491, 215 NYS2d 361, a prosecution for forgery and other offenses in connection with irregularities committed in the handling of examination papers of candidates for police positions, the court, stating that the granting or denial of a motion for discovery must be left to the sound judgment of the court in the light of all the circumstances and according to a real sense of the justice of the cause, held that the defendant's motion for discovery of "the papers which were allegedly forged, the standards of comparison, the papers which were allegedly executed by the defendant, the specimens used by the handwriting experts called by the prosecutor and all other written and printed documents concerning which testimony was given before the Grand Jury," should be granted to the extent of discovery of (1) the examination papers of police officers whose answer sheets the defendant was alleged to have forged, (2) the samples of handwriting of such police officers, which might be used as standards of comparison to enable an expert to reach an opinion as to whether or not the answer sheets were forged or genuine, and (3) the samples of the defendant's own handwriting, which might also be used as standards of comparison to enable an expert to reach an opinion as to whether the defendant had forged the answer sheets. As to other papers the production of which was denied, the court observed that the defendant could not have such material which would serve no useful purpose except to enable him to pry into the prosecution's case.

The view that in a case of forgery the defendant may be allowed to inspect and copy the allegedly forged instruments and other documents of handwriting which the prosecution expects to offer in evidence, so that the defendant will be able to prepare his defense, was also recognized in *State v Major* (1950, CP) 60 Ohio L Abs 271, 101 NE2d 397.

It should also be noted that most of the cases referred to in § 24[a], supra, recognize, either explicitly or by implication, the rule that in a case of forgery the defendant may be permitted to inspect the allegedly forged instruments.

◇

In the following cases, on the other hand, the court upheld the refusal to permit the defendant to inspect an instrument allegedly forged by the defendant.

In *Marshall v State* (1927) 116 Neb 45, 215 NW 564, a prosecution for forgery of notes, it was held that there was no abuse of discretion in denying the defendant's application for permission to inspect certain books and papers, including the allegedly forged notes. The court noted that under the provision, in the Nebraska civil statute, for discovery and inspection of documents or books, it was left to the discretion of the trial court whether to enter an order directing a

party to allow the adverse party to inspect documents or books in his possession.n163

Holding that the relator, who pleaded guilty and was convicted of a charge of forgery, was not entitled as a matter of right to inspection (apparently before or during his trial) of the check he had forged, the court in *People ex rel. Kennedy v Hunt* (1939) 257 App Div 1039, 13 NYS2d 816, upheld the dismissal of a writ of habeas corpus issued on behalf of the relator. Holding to the same effect is *People ex rel. Kennedy v Hunt* (1939, Co Ct) 21 NYS2d 304, affd 259 App Div 970, 20 NYS2d 1012, app den 259 App Div 981, 21 NYS2d 393 (a new proceeding for a writ of habeas corpus instituted by the same relator as in the other case).

[\*25] Physical or tangible objects used or directly involved in commission of offense

[\*25a] Generally

In a number of cases the defendant was permitted to inspect a physical or tangible object which was used or directly involved in the commission of the offense charged against him.

#### ARIZONA

*State v Fowler*, 101 Ariz 561, 422 P2d 125 (knife)

The defendant's application for an order permitting him to inspect and photograph a piece of glass in the custody of the prosecution was granted in *United States v Rich* (1922) 6 Alaska 670, where the prosecution intended to use the glass against the defendant at the trial, apparently to establish that the glass had been found near the scene of the crime charged against the defendant and that the fingerprints of the defendant were imprinted thereon. The court observed that the request to photograph the fingerprints on the glass in order that the defendant might have them examined by experts of his own choice seemed entirely reasonable; that the defendant could not have a fair trial without having reasonable opportunity to show by expert testimony that the fingerprints were not made by him; and that if the present application was refused, and if an expert for the prosecution should testify at the trial that the fingerprints were the defendant's, the defendant would then be entitled to a continuance of the hearing until he could have opportunity to refute such evidence, by expert or other testimony.

In *State ex rel. Mahoney v Superior Court of Maricopa County* (1954) 78 Ariz 74, 275 P2d 887, involving a prosecution for murder, an order requiring the prosecution to produce certain tangible physical objects such as pistols, a lead slug taken from the body of the victim, a shirt, car keys, etc., was upheld. In concluding that the order was so necessary to the due administration of justice as to fall within the scope of the inherent powers of the trial court, the court pointed out that the order expressly prescribed safeguards against any possible substitution or trickery; that the defendant was entitled to the benefit of any reasonable opportunity to prepare his defense and to prove his innocence; and that the request for the inspection was not merely "a fishing expedition to see what may turn up." The court followed the rule that the defendant is not as a matter of right entitled to pretrial inspection of evidence in the possession of the prosecution, and such inspection is a matter peculiarly within the discretion of the trial court.

The view that in a proper case a defendant may inspect "real evidence" in advance of trial was also recognized in *Yannacone v Municipal Court of San Francisco* (1963) 222 Cal App 2d 72, 34 Cal Rptr 838, and *People v Lindsay* (1964) 227 Cal App 2d 482, 38 Cal Rptr 755.

In *State v Winsett* (1964, Del) 200 A2d 237, supra § 11[b], the court granted the defendants' motion for production of the automobile in which they were located at the time of the death of the victim of the alleged murder.

An order granting an inspection of various items which were either used or otherwise directly involved in the commission of the alleged murder was also upheld in *State v Superior Court* (1965, NH) 208 A2d 832, 7 ALR3d 1, supra § 3.

In *People v Schemnitzer* (1931) 142 Misc 16, 254 NYS 480, the court, without any discussion, granted the defendant's motion for permission to examine the pistols, revolvers, bullets, automobile, and other materials and things which were alleged to have been used in the commission of the murder charged against the defendant, and also held that the defendant might have the assistance of a ballistic expert in making such examination.

Where, in a prosecution for abortion on an indictment charging that the abortion was committed by the use of certain instruments and substances, the defendant moved for permission to examine, photograph, and test the instruments and substances which were allegedly used to procure the abortion, alleging that a determination of whether the instruments and substances were capable of procuring a miscarriage was of vital importance in the preparation of the defense, and that if an opportunity of inspecting the instruments and substances was denied, the defendant would be denied material evidence for his defense and accordingly a failure of justice might result, the court in *People v Miller* (1964) 42 Misc 2d 794, 248 NYS2d 1018, held that in the interest of justice and in the exercise of its discretion, the motion for discovery and inspection should be granted to the limited extent of permitting the defendant to visually examine the instruments and substances. Noting that the earlier decisions of the courts had exhibited a more liberal tendency to grant discovery and inspection where the requested exhibit was one that might be received in evidence or was the subject of the charge or where a failure of justice might result, and stating that it would be difficult to enunciate a particular and definitive concept or controlling criteria applicable to all cases, and the primary consideration in each case was justice which would serve the accused and not prejudice the rights of the prosecution, the court said that there was no logical reason nor any purpose served in denying to a defendant inspection and discovery of physical items of evidence not subject to damage or alteration; that where there is evidence in the possession of the prosecution which is of such a nature that it may require lengthy inspection and examination by experts to determine whether it is favorable to the accused, the court will afford to the accused an adequate opportunity, in advance of trial, to examine the evidence in the interest of justice and to avoid delay at the trial; and that such a policy is also applicable to cases in which the opportunity for the inspection and examination by the defendant of the prosecution evidence at the trial would be inadequate.

See also *State v Goldberg* (1964) 261 NC 181, 134 SE2d 334, cert den 377 US 978, 12 L ed 2d 747, 84 S Ct 1884, supra § 17, wherein the court apparently recognized that a defendant may be permitted to inspect articles which form the "basis" of the charge against him.

And see *State v Bostic* (1961) 115 Ohio App 214, 20 Ohio Ops 2d 301, 184 NE2d 597, app dismd 173 Ohio St 176, 18 Ohio Ops 2d 441, 180 NE2d 582, where the court, in holding that the denial of the defendant's motions, one of which was made prior to the trial and the other during the trial, to inspect the safe which he was alleged to have burglarized was not error where shortly after the alleged offense and sometime before his pretrial motion for inspection, the safe was returned by the police to its corporate owner and then was repaired and was being used by the home office of the owner in another county, said that if the safe had been in the hands of the prosecution at the time of the pretrial motion or at any time during the trial of the case, it would have been proper to ask the trial court for an order permitting an examination of the safe, and the defendant should then have had an opportunity to inspect such prospective evidence.

In *Petition of Di Joseph* (1958) 394 Pa 19, 145 A2d 187, the court, without discussion, refused to grant a writ of prohibition restraining the enforcement of an order of the lower court permitting an accused to inspect (1) the revolver allegedly used in the commission of the charged murder, (2) the place of the alleged offense, which the prosecution had taken possession of, (3) furniture, rugs, clothing, and broken glass which had been removed or taken by the prosecution

from the place of the alleged offense, and (4) photographs of the place of the alleged offense which had been taken by the prosecuting attorney or his representatives subsequently to the offense. In the concurring opinion of a justice, it was said: "It is the rule in this State that a defendant in a criminal case has no absolute right to examine and inspect, prior to trial, evidence in the possession of the Commonwealth. . . . However, a trial court having jurisdiction of an alleged offender possesses discretionary power to permit a defendant, in appropriate circumstances, to examine and inspect in advance of trial physical or documentary evidence in the hands of the prosecution."

In *Commonwealth v Brown* (1959) 19 Pa D & C2d 196, 47 Del Co 120, wherein the defendant was indicted for assault and battery and for failure to stop his motor vehicle at the scene of the accident, the court granted the defendant's petition for permission to examine and experiment with, in advance of trial, a side-view mirror found at the scene of the alleged offense, dirt samples taken from the defendant's car, and the victim's clothing, where it appeared that these articles had been sent to the Federal Bureau of Investigation for tests and had been returned by it to the district attorney, and that the prosecution intended to offer expert testimony as to the results of the tests conducted on these articles. Noting the rule that the court possesses discretionary power to permit a defendant, in appropriate circumstances, to examine and inspect in advance of trial physical or documentary evidence in the hands of the prosecution, the court, in concluding that the present case presented appropriate circumstances for such examination and inspection in advance of trial, said that where the prosecution intended to offer expert testimony to the effect that the side-view mirror in question came from the defendant's car, the defendant was entitled to meet it, if he could, with expert rebuttal testimony, and that such testimony could only be obtained if the defendant's expert had the opportunity to examine and test the articles.

<>

In the following cases, on the other hand, the court refused to permit the defendant to inspect a physical or tangible object which was used or directly involved in the commission of the offense charged against him.

In *State v Dowdy* (1950) 217 La 773, 47 So 2d 496, cert den 340 US 856, 95 L ed 627, 71 S Ct 75, the denial of the defendant's motion for a subpoena for an inspection of a fuse, dynamite caps, and clothing belonging to the victim, who died as a result of a dynamite explosion, was upheld, the court stating that the defendant was not entitled to an inspection of such articles as a matter of right, but the application for it was a matter addressed to the discretion of the trial judge, whose ruling would be set aside only upon a showing of gross abuse of discretion.

The denial of the defendant's pretrial motion for permission to examine the blunt instrument allegedly used in the commission of the crime charged against the defendant was upheld in *State v Di Noi* (1937) 59 RI 348, 195 A 497, reh den 60 RI 37, 196 A 795, the court concluding that there was no showing of a real necessity for the defendant to inspect the instrument in order to be able to prepare his defense.

In *Hanes v State* (1960) 170 Tex Crim 394, 341 SW2d 428, the denial of the defendant's motion for an order requiring the prosecution to produce at the trial the metal door of the building which the defendant was charged with having attempted to burglarize was upheld on the ground that no abuse of discretion was shown. Noting that there was no rule requiring a trial court to order the prosecution to produce certain evidence at the trial of a criminal case, the court said that the entry of any such order as requested by the defendant would be within the sound discretion of the trial judge.

For other cases wherein the court also refused to permit the defendant to inspect a physical or tangible object of the kind under consideration, see the following:

◇

Where defendant, who was charged with shooting his wife, claimed that fatal shot was fired in struggle with intruder who had gotten into house, but where testimony of police investigator indicated that defendant's own kitchen knife had been used to cut masking tape around broken pane in door glass, trial court did not err in denying motion for discovery and examination of knife, since defendant was familiar therewith, and knife itself was never offered in evidence. *Knight v State*, 50 Ala App 39, 276 So 2d 624, cert den 290 Ala 368, 276 So 2d 628.

In prosecution for burglary of restaurant, state's failure to make available to defendant physical items from which fingerprints were taken did not violate state's duty to disclose evidence favorable to defense, where items were no longer in possession of prosecution, where state did preserve and make available all prints which had been taken, and where placement and direction of prints was not relevant or material to defense. *Wyrick v State* (1979, Alaska) 590 P2d 46.

Arson suspect was denied due process where his defense was prejudiced by negligent destruction of evidence seized by police and inadvertently destroyed and where tests were not made which could have been made to determine whether exculpatory evidence could have been developed from seized property. *State v Hannah* (1978) 120 Ariz 1, 583 P2d 888.

Defendant who failed to pursue discovery rules before trial waived any claim of right to examine stolen violin for purpose of contesting value. *State v Raffaele*, 113 Ariz 259, 550 P2d 1060.

During prosecution for possession of marijuana and heroin, where accused was originally arrested for traffic offense and

car was searched disclosing it to be stolen and drugs were found in handbag on floorboard of car, state's failure to disclose woman's name found inside handbag did not violate disclosure principles announced in *Brady v Maryland*; accused's contention that woman might provide evidence favorable to him was purely conjecture. *Jones v State (1978)* 146 Ga App 522, 246 SE2d 509.

In prosecution for misdemeanor theft by taking, trial court did not err in denying defendant's motion, filed four days before trial, for examination of items allegedly stolen by him and to have such items sent to state crime lab to be tested for latent fingerprints, where there was no provision in state law for discovery in criminal cases, state had no burden of having evidence sent to crime lab, and state had interest in protecting evidence and its chain of custody for use at trial; furthermore evidence was not exculpatory or material, noncumulative and favorable to defense nor was it concealed from defendant. *Thompson v State (1977)* 142 Ga App 888, 237 SE2d 419, revd on other grounds 240 Ga 296, 240 SE2d 87.

Where officer had testified that some items seized were not stolen and were returned to defendant, subsequent motion to produce copy of inventory of items seized from defendant was properly denied as jury had been apprised of that information. *Carver v State*, 137 Ga App 240, 223 SE2d 275.

Trial court has inherent authority, in appropriate cases, to order pretrial discovery of items of physical evidence which prosecution will introduce at trial. *People v Endress*, 106 Ill App 2d 217, 245 NE2d 26.

Defendant charged with murder was properly granted order requiring state to produce certain physical evidence seized by state following alleged crime, including wristwatches of both defendant and deceased, bed linen, and whiskey bottle and cap therefrom. *State v Eads (Iowa)* 166 NW2d 766 (citing annotation).

See *State v Drew (1978, La)* 360 So 2d 500, § 22[a].

In prosecution for murder, denial by trial court of defendant's request, made on day of trial and without specifically stating necessity and purpose of pre-trial inspection, for inspection of alleged murder weapon was not denial of due process where weapon was introduced at trial by state and defendant was able to inspect it and use it in presenting his case. *State v Howard (La)* 325 So 2d 812.

See *State v Sears (La)* 298 So 2d 814, § 22[a].

See *State v Frezal (La)* 278 So 2d 64, § 13[d].

Defendant was not entitled to order requiring state to produce gun and holster which were involved in commission of robbery where such articles were not in possession of state, and where there was testimony that investigating officers were unable to secure fingerprints therefrom. *State v Emery (Me)* 304 A2d 908.

In prosecution for stealing more than \$50, trial court erred in admitting into evidence stolen merchandise where it had not been made available to defense counsel for inspection prior to trial as requested by defendant. *State v Davis (1977, Mo)* 556 SW2d 45.

See *State v Williams*, 183 Neb 257, 159 NW2d 549, § 17.

Defendant charged with breaking and entering public telephone pay station could not as matter of right obtain inspection of items of physical evidence in possession of state, and refusal of inspection was not error without establishment of valid reason for inspection. *State v McCreary*, 179 Neb 589, 139 NW2d 362, cert den 384 US 979, 16 L Ed 2d 689, 86 S Ct 1877.

Failure of state to produce inhaler allegedly used by defendant to administer ether prior to strangling wife did not require dismissal of action where record indicated that inhaler was lost or disposed of after apparent determination that it had no evidentiary value. Even if state did breach duty to defendant by not producing inhaler, the inhaler was not "material" evidence since it would not have created a reasonable doubt of defendant's guilt that did not otherwise exist. *State v Johnson (1983) 99 NM 682, 662 P2d 1349.*

Prosecutor's late disclosure of photograph of knife, during defendant's trial for criminal possession of weapon in third degree, did not require reversal, where defendant had opportunity to recall photographer, but chose not to. McKinney's Penal Law § 265.02(1). *People v. Barney, 743 N.Y.S.2d 793 (App. Div. 4th Dep't 2002).*

In prosecution for larceny of vehicle which accused had fled upon seeing police officer, in which defense made discovery demand for all "property obtained from defendant," defendant was entitled to disclosure and availability for inspection of vehicle in question, since it was obtained from defendant despite his flight from officer; moreover prosecution's disclosure of make, year, and registration number of vehicle was insufficient to comply with discovery requirements. *People v Brown (1980) 104 Misc 2d 157, 427 NYS2d 722.*

In prosecution for obscenity involving movie films, defendants' motion to require the people to furnish all prints of film which had been seized, so that defendants' experts might examine them for purpose of testifying at trial, granted in part and denied in part, court directing district attorney to permit defendants' experts to examine films under supervision of district attorney's office at mutually agreeable time and thus permitting defendants to adequately prepare for trial while at same time insuring that films would remain in custody of district attorney. *People v Steinberg, 60 Misc 2d 1041, 304 NYS2d 858.*

Breath sample trapped inside ampule was not tangible object within meaning of discovery statute; thus, breathalyzer ampule was not subject to discovery under statute. *State v Simpson (1979) 40 Or App 83, 594 P2d 425.*

Trial court properly denied defendant's motion to dismiss rape and kidnapping charges based on fact that police had destroyed pipe found on codefendant, allegedly containing small amount of marijuana, which defendant claimed would reveal victim's fingerprints, thus supporting his claim that victim accompanied him voluntarily for purpose of smoking marijuana, where defendant failed to show that identifiable prints were likely to remain on pipe. *State v Kiser (1977) 31 Or App 29, 569 P2d 681.*

See *State v Sahlie (SD) 245 NW2d 476, § 22[e].*

See *Moody v State (Tex Crim) 413 SW2d 109.*

In theft prosecution, police's disposal of physical evidence prior to trial by returning evidence to owner did not deprive accused of right to due process where evidence was immaterial to conviction. *State v Christopher (1978, Wash App) 583 P2d 638.*

See *State v Stewart, 56 Wis 2d 278, 201 NW2d 754, § 11[k].*

[\*25b] Gun, bullet, or shell

In some cases the defendant was permitted to inspect a gun and bullets which were allegedly used in the commission of the offense charged against him.

In *State v Bunk (1949, NJ County Ct) 63 A2d 842*, it was held that the defendant's request to examine certain revolvers and bullets which were allegedly used in the commission of the murder charged against him should be allowed under proper safeguarding restrictions. The court noted that where objects or writings sought by a defendant were directly

involved in the commission of the alleged crime, the present-day trend appears to be toward liberality in the granting of inspection.

In *Application of Hughes (1943) 181 Misc 668, 41 NYS2d 843*, it was held that it was within the discretion of the court to grant an order requiring the production of the gun used in the commission of the alleged murder and bullets found in the body of the victim. Noting that the items in question were evidence in the case, and pointing out that the defendant's experts would be permitted to examine the gun and bullets and to testify to their opinion in regard thereto if they were offered in evidence, the court said that there was no good reason why in a proper case the courts of criminal jurisdiction, in the exercise of sound discretion, should not be permitted to make available to a defendant before trial by discovery and inspection legal evidence in the possession of the prosecuting attorney.

In *People v Courtney (1963) 40 Misc 2d 541, 243 NYS2d 457*, it was held that a defendant who is charged with having committed a murder with a pistol should, in the discretion of the court, ordinarily be permitted to have the gun and bullets inspected by an expert of his selection under conditions protective of the rights of both parties, the court stating that the gun and bullets are evidence and fall within the rule for inspection of things or documents in the possession of an adverse party.

For other cases wherein the court also permitted the defendant to inspect a gun or bullets or shells which were allegedly used or otherwise involved in the commission of the offense charged against him, see the following:

Almeida v Baldi (1952, CA3 Pa) 195 F2d 815, 33 ALR2d 1407, cert den 345 US 904, 97 L ed 1341, 73 S Ct 639, reh den 345 US 946, 97 L ed 1371, 73 S Ct 828*, a habeas corpus proceeding, wherein it was held that the petitioner, who was convicted of murder in a state court, was deprived of due process of law where the prosecution had deliberately suppressed evidence, including a certain bullet, tending to show that the petitioner did not fire the fatal shot.

◇

In the following cases, on the other hand, the court refused to permit the defendant to inspect a gun allegedly used in the commission of the offense charged against him.

Where the trial court, in the course of a trial for murder, refused the request of the defendant's counsel to require the prosecution to produce the murder weapon (a shotgun), the court in *Garrett v State (1958) 268 Ala 299, 105 So 2d 541*, held that "there was no error in the court's refusal, and before the evidence was concluded, it was introduced."

Where the defendant moved for an order directing the district attorney to allow him to examine and photograph the pistol allegedly used in the commission of the murder charged against the defendant, and the defendant's moving papers were based on several newspaper articles which, in substance, stated that fingerprint impressions of the defendant had been found on the pistol, the court in *People v Gatti (1938) 167 Misc 545, 4 NYS2d 130*, held that since the motion was based on mere surmise and conjecture that the gun was supposed to have fingerprints of the defendant his present motion must be denied with leave to renew, if he was so advised, upon proof of a proper basis for his request, at which time the merits of the motion might be directly passed upon by the court. Pointing out that what was particularly lacking in the present case was a substantial showing that the pistol sought to be inspected contained any material evidence, outside its general character as a weapon, of any fingerprints, the court said that such motions as the present one must always be addressed to the court's sound discretion on a proper showing of facts which would warrant its exercise. Noting that if there were any imprints on the pistol, the defendant should have the right to show that they were not his, the court added that if there were fingerprints on the pistol in the present case and they tended to show that the defendant was not guilty of the offense charged, an examination of them ought to be allowed to the defense for very obvious reasons of justice, unless in doing so a fair prosecution of the case would be impaired or prejudiced. The court relied on the following rules: the accused has no right to inspection or disclosure of evidence in the possession of the prosecution, and courts ought not to lend their aid when satisfied that a demand for inspection is merely for exploratory purposes; the defense has no right to go upon a tour of investigation in the hope that it would find something which would aid the defendant, but when it does appear that there is evidence in the possession or under the control of the prosecution which is favorable to the defendant, a right sense of justice demands that it should be made available to the defense, unless there are strong reasons otherwise; in the absence of specific statutory procedure and practice or legal precedents to the contrary, this class of motions for discovery and inspection must be left to the sound judgment of the court in the light of all the circumstances and according to a real sense of the justice of the cause.

For other cases wherein the court also refused to permit the defendant to inspect a gun or bullets or shells which were allegedly used or otherwise directly involved in the commission of the offense charged against him, see the following:

In murder prosecution, defendant was entitled to have access to bullet taken from murder victim, as well as bullet known to have been fired from defendant's weapon for purposes of comparison by expert, where defendant's gun was not available and state witness had testified that both bullets had been fired from same weapon. *White v Maggio (1977, CA5 La) 556 F2d 1352.*

Motion by defendant in murder trial that he be allowed to inspect "any written evidence, physical evidence, scientific reports or other tangible evidence and the weapon, if any," if such evidence was to be used at trial, was properly overruled. *McCants v State, 282 Ala 397, 211 So 2d 877.*

Denial of motion for discovery and inspection, by defendant in murder trial, of 16-gauge shotgun, revolver removed from body of deceased, and 2 green shotgun shells, was not error, since no Georgia statute or rule of practice allows such inspection. *Bryan v State, 224 Ga 389, 162 SE2d 349.*

Defendant was not entitled to reversal of second degree murder conviction, although package containing murder weapon, .38 caliber slug, two spent cartridges and victim's clothing was lost during shipment to FBI laboratory in Washington, D. C., where evidence was lost through no fault of state and where there was no showing that defendant was prejudiced by loss of evidence. *State v Ward (1977) 98 Idaho 571, 569 P2d 916.*

Murder and attempted murder defendant's due process rights were not violated by state's failure to preserve and produce gun and cartridges used in crimes, which were erroneously destroyed pursuant to routine police procedures, where defendant failed to show how items were material or favorable to defense in that defendant's purported theory that second gun was involved was contradicted by testimony of defendant and one victim, no other evidence supported theory that destroyed gun was not defendant's gun, and defendant made no pretrial request to examine or test gun and showed no interest in gun until discovered it had been destroyed, nor were defendant's due process rights violated by state failure to disclose existence of ballistics report prior to trial, since defendant was given copy of report at trial and allowed to examine firearms examiner in chambers, state did not use report at trial, and defendant made no showing that noncommittal or neutral report was favorable to defendant. *People v Taylor (1982) 107 Ill App 3d 1019, 63 Ill Dec 634, 438 NE2d 565.*

See *People v Baxtrom (1978) 61 Ill App 3d 546, 18 Ill Dec 718, 378 NE2d 182, § 11[d].*

Revolver found on floor of abandoned automobile which was identified as belonging to robbers should have been revealed to defendant before trial for inspection as requested, where prosecution intended to offer it in evidence; tangible objects which prosecution intends to offer should be subject to inspection, if requested, where no "overriding considerations" are present. *People v Tribbett (Ill App) 232 NE2d 523.*

Defendant in murder prosecution was not entitled to pretrial examination of murder weapon to determine whether pistol had hair trigger where, inter alia, no request was made in trial court for testing by expert; furthermore, oral inculpatory statements made by defendant were not subject to pretrial discovery and same was true of coroner's report to district attorney since such report formed part of prosecutor's private file not subject to discovery. *State v Hodges (1977, La)*

349 So 2d 250, cert den (US) 55 L Ed 2d 779, 98 S Ct 1262.

In murder prosecution, defendant was not entitled to pretrial examination of bullets recovered by police in their investigation where bullets were not badly damaged, permitting quick comparison under dual microscope at trial, where defendant made no request for examination at trial, and where guilt of defendant was established by eyewitness testimony. *State v White (La)* 321 So 2d 491.

In armed robbery prosecution against wife who was found shortly after robbery seated as passenger in husband/robber's automobile, with theft money concealed in her bra, trial judge improperly permitted impeachment of defendants with evidence that bullets were found in wife's purse after her arrest where evidence was not revealed pursuant to pretrial discovery order; defendant had right as matter of fundamental fairness to rely on prosecutor's statements of its expected evidence, and appropriate sanction should have been to suppress evidence for both prosecution's case in chief and for impeachment. *People v Turner (1982)* 120 Mich App 23, 328 NW2d 5.

In murder prosecution, court did not abuse discretion in denying defendant's discovery request for revolver and shells used in shooting where both items had been handled extensively, as request was made three months after murder and it was speculative if fingerprint or cosmetic test would have been productive, and where there was no showing that denial of motion rendered defendant's trial unfair. *State v Whiteaker (Mo)* 499 SW2d 412, 63 ALR3d 1281, cert den 415 US 949, 39 L Ed 2d 565, 94 S Ct 1472.

Trial judge did not err in refusing to declare mistrial when, in response to defendant's motion for mistrial or, in the alternative, to strike testimony of ballistics expert concerning his examination of .45 caliber cartridge which had been given to him by police detective on ground that cartridge, which had been returned to police officer was not available for defendant's inspection, trial judge struck the testimony and instructed the jury to disregard it. Defendant did not question the wording of the instruction to disregard the testimony, which was sufficient to prevent any possible prejudice, and jury was presumed to have followed the instruction. *State v Glidden (1983, NH)* 459 A2d 1136.

Pretrial inspection of .32 caliber revolver, the reported death weapon, and a knife found at scene of crime, and all reports and results of fingerprint tests, if any, made on such weapons, was granted. *Doakes v District Court of Oklahoma County (Okla Crim)* 447 P2d 461.

In prosecution for attempted murder of police officer, defendant was not entitled to production of police officer's service revolvers for examination and testing under statute requiring production for examination by defendant in criminal case of "tangible objects" only when "district attorney intends to offer evidence at trial" or when such objects "were obtained from or belong to defendant" where state's attorney had informed trial court that state did not intend to offer these two guns in evidence and they were not obtained from and did not belong to defendant; nor was defendant entitled to production under rule in Brady where guns were not clearly "favorable" to defendant and "material" to his guilt or innocence; however should scientific tests be made by state which disclosed that bullet fragments were fired by one of service revolvers, state would have affirmative duty to disclose results to defendant, both under Brady and also under state statute. *State v Koennecke (Or)* 545 P2d 127 (citing annotation).

Defendant charged with robbery was denied inspection of pistol and shells removed from his person on date of his arrest. *Bosley v State (Tenn)* 401 SW2d 770.

In prosecution for aiding and abetting assault with intent to commit armed robbery, defendant was not entitled to inspect pistol and it was properly admitted into evidence, even though state had neglected or failed to produce weapon for defendant's inspection, in absence of oral or written motion to inspect as required by statute. *Anglin v State (1977, Tenn Crim)* 553 SW2d 616.

Defendant in murder prosecution was not entitled to pretrial examination of bullet which killed victim. *Fox v State*

(*Tenn Crim*) 441 SW2d 491.

In murder prosecution, defendant was not denied due process by suppression of evidence regarding trajectory and deflection of bullet testified to by state witness since, though certain information used as basis for witness' conclusions had been left out of ballistics report, there was no indication witness intended to suppress information or that prosecution was aware of it, prosecution had provided defendant with copy of ballistics report pursuant to discovery request, defendant failed to move to allow own expert to examine bullet despite fact that conclusions of state witness were contained in report, evidence was disclosed at trial and defendant could have secured due process rights by moving for continuance, and defendant did not show that earlier receipt of information would have advanced defense or materially affected determination of guilt. *Losoya v State* (1982, *Tex App 4th Dist*) 636 SW2d 566.

[\*25c] Clothing

In some cases the defendant was permitted to inspect certain clothing which was evidently involved in the commission of the offense charged against him.

In *People v Roldan* (1964) 42 Misc 2d 501, 248 NYS2d 408, it was held that the defendant was entitled to the opportunity, prior to trial, to conduct a chemical analysis or any other scientific test of the clothing which he was wearing at the time of his arrest, if it appeared that the clothing had been confiscated by the prosecuting attorney. The court took the view that where there is evidence in the hands of the prosecution which is of such a nature as to require lengthy examination by experts to determine whether it is favorable to the defendant, the court will afford to the defendant an adequate opportunity, prior to trial, to examine the evidence, in the interest of justice and to avoid delay at the trial.

An order requiring the prosecution to produce, for inspection by the defense, certain clothing which was evidently involved in the commission of the alleged offense was also granted or upheld in the following cases:

#### ARIZONA

*State ex rel. Mahoney v Superior Court of Maricopa County* (1954) 78 Ariz 74, 275 P2d 887, supra § 25[a]

#### NEW HAMPSHIRE

*State v Superior Court* (1965, NH) 208 A2d 832, 7 ALR3d 1, supra § 3

#### PENNSYLVANIA

*Petition of Di Joseph* (1958) 394 Pa 19, 145 A2d 187, supra § 25[a]

*Commonwealth v Brown* (1959) 19 Pa D & C2d 196, 47 Del Co 120, supra § 25[a]

And in *People v Hoffman* (1965) 32 Ill 2d 96, 203 NE2d 873, supra § 4[b], a judgment of conviction for murder was reversed, on the ground of a violation of due process, where the prosecution refused, upon demand, a pair of men's shorts which were evidently involved in the commission of the crime.

<>

In the following cases, on the other hand, the court refused to permit the defendant to inspect certain clothing which was evidently involved in the commission of the offense charged against him.

#### GEORGIA

*Blevins v State* (1965) 220 Ga 720, 141 SE2d 426, supra § 3

#### KENTUCKY

#### LOUISIANA

*State v Dowdy* (1950) 217 La 773, 47 So 2d 496, cert den 340 US 856, 95 L ed 627, 71 S Ct 75, supra § 25[a]

#### MONTANA

*State ex rel. Keast v District Court of Fourth Judicial Dist.* (1959) 135 Mont 545, 342 P2d 1071, supra § 3

And in a prosecution for rape, the denial of the defendant's motion, made first prior to the trial and again during the trial, to have the prosecutrix's undergarments worn at the time of the alleged offense sent to a laboratory for examination as to stains or evidence of ravishment and to have a report of such examination sent to the trial court and the defendant's counsel, was upheld in *State v Allen* (1924) 128 Wash 217, 222 P 502, on the ground that there was no abuse of discretion in the trial court's ruling. The court pointed out that the defendant had not made a request to place the garments at his disposal so that he could have them microscopically examined by his own experts; that the prosecution's own expert did not testify nor did the prosecution claim that the stains upon the garments were seminal, but the prosecution simply introduced them for the purpose of showing what their condition was at the time of their removal from the person of the prosecutrix; and that the most favorable circumstance to the defendant that could arise from an examination of the garments would be to establish that they were without seminal stains, but since the prosecution made no claim that the garments had such stains upon them, it would seem that the defendant had the benefit of the fact as the evidence stood. The court said that under all circumstances the granting or refusing to grant such an order must rest in the discretion of the trial judge, to be reviewed only for manifest abuse.

◇

See *Smith v State*, 282 Ala 268, 210 So 2d 826, supra § 22[e].

See *State v Ward* (1977) 98 Idaho 571, 569 P2d 916, § 25[b].

Wife's voluntary manslaughter conviction, which resulted from shooting death of her husband, was reversed where defense contended that pregnant wife shot in self-defense after repeated beatings, and where state failed to produce pursuant to discovery request a torn lady's sweatshirt which was taken into police inventory and which was material evidence in that it corroborated defendant's testimony of struggle. *People v Bennett* (1980) 82 Ill App 3d 225, 37 Ill Dec 648, 402 NE2d 650.

In prosecution for rape, deviate sexual assault and unlawful restraint, where prosecutor saw complainant's panties before she testified for first time but did not disclose their existence to defense counsel until 2 days later through indirect means of complainant's redirect examination testimony, where complainant testified that defendant had ripped panties when he removed them during course of sexual attack, but where condition of panties tended to negate element of force, and hence guilt of accused as to offense of rape, supreme court rule requiring disclosure to defense counsel of favorable evidence was violated and such error was not harmless. *People v Loftis (1977) 55 Ill App 3d 456, 13 Ill Dec 133, 370 NE2d 1160.*

Defendants were denied due process of law by prosecution's suppression of shoe, despite court order which required production of all physical evidence in state's possession that was favorable to defendants and which pertained to case, where shoe, which was found under window of burglarized apartment and which was not defendant's size, could conceivably produce evidence or clues that would substantiate defendants' claim that they were not at scene of crime. *People v Nichols, 27 Ill App 3d 372, 327 NE2d 186 (citing annotation).*

It was not error to deny defendant's post-trial motion to require prosecution to produce defendant's street clothes where defendant's counsel was aware of existence of clothes at time of trial but had made no motion to produce them and where clothing's cleanliness had little probative value since, it was not inspected until morning after defendant's arrest and since defendant could have stayed clean even if he were not in standing position. *Johnson v State (Ind) 319 NE2d 126.*

In prosecution for aggravated rape, trial court erred in refusing to grant defendant's motion to examine and test clothing taken from victim and defendant soon after crime where victim's clothing was stained with blood and semen and defendant's pants and shirt showed semen residue and where, had defendant's experts been allowed to test semen stains on victim's clothing, it was possible that they might have discovered that they did not match defendant's secretion or blood groupings. *State v Gray (1977, La) 351 So 2d 448.*

Prosecutor suppressed exculpatory evidence where it failed to produce red shirt found by sheriff near area where defendant was arrested where, since identification was critical in case, introduction of shirt defendant claimed he was wearing on day in question could have been favorable to his defense by bolstering credibility of his alibi witnesses and supporting contention that he was elsewhere at time offense took place. *People v McCartney (1975) 60 Mich App 620, 231 NW2d 472, later app 72 Mich App 580, 250 NW2d 135.*

Prosecutor should have made ski hat containing human hairs, 2 buttons and piece of cloth material, allegedly left behind by defendant during burglary, available to defendant, if they existed, upon request, without requiring defendant to obtain subpoena. *People v Dee, 44 App Div 2d 721, 355 NYS2d 13.*

In sexual abuse prosecution in which defense trial strategy was that alluringly attired complainant consented to defendant's advances, prosecutor committed reversible error in failing to disclose possession of dress worn by complainant and photograph depicting dress's length and torn condition. *State v Dickerson (1978) 36 Or App 479, 584 P2d 787.*

In prosecution for rape, defendant failed to show any prejudice to his case by failure of state to produce all garments worn by complaining witness on night of incident where defense counsel had opportunity to examine pair of slacks worn by complaining witness and other clothes worn by her had been laundered before defendant's request and where, having limited wardrobe, she could not give these articles to state except by divesting herself of clothing, including shoes. *State v Long (Vi) 349 A2d 232.*

Defendant in homicide prosecution was entitled to discovery of clothing, blankets and other materials found at scene of crime where there was reasonable possibility that evidence was material to guilt or innocence and favorable to defendant and destruction of such evidence before trial warranted dismissal. *State v Wright, 87 Wash 2d 783, 557 P2d*

1.

[\*25d]     Liquor; narcotic

In some cases involving a prosecution for illegal possession or transportation of liquor, the defendant was permitted to inspect the liquor allegedly involved in the case and seized by the prosecution.

See also *State v Bramhall (1913) 134 La 1, 63 So 603*, where the court, affirming a judgment of conviction for selling intoxicants without a license, held that if the defendant's request that the prosecution should furnish him a sample of the liquor allegedly sold by the defendant, in order that he might have it analyzed, had been made in a sincere effort to establish the truth, a refusal of the request would have been error, since the guilt or innocence of the defendant depended upon whether the liquor was intoxicating or not, but that where it appeared that the defendant had sold a liquor manufactured by a brewery and had quantities of the same kind on hand or could easily have obtained some, his request for a sample from the prosecution was "but a trifling with the [trial] court."

In *State v Lowery (1926) 160 La 811, 107 So 583*, a prosecution for illegal transportation of intoxicating liquor, it was held error for the trial judge to deny the defendant's request for the production of the alleged intoxicating liquor involved so that he might have it analyzed in order to determine its alcoholic content. The court pointed out that the alleged whisky was in the possession of the prosecution, and no valid reason had been given why it could not have been produced in open court when the motion for its production was filed; and that in such a proceeding the prosecution's case could not have been injured, in view of the fact that if the liquid was actually whisky, an analysis by the defendant would have confirmed such fact, and, on the other hand, if an analysis showed that the alleged intoxicant was not whisky, such showing was an essential element of the defendant's defense.

In *State v Naething (1927) 318 Mo 531, 300 SW 829*, wherein the defendant was charged with possession of intoxicating liquors, it was held error to deny the defendant's motion to examine, inspect, and take for analysis samples of the alleged intoxicating liquors which were found in his home and seized under a search warrant. Noting that the defendant's right to such an inspection was supported by cases from other jurisdictions which were cited by the defendant, the court rejected the contention that the defendant's motion did not state for what purpose he desired the items in question. Pointing out that the defendant's motion asked for samples and an opportunity to inspect and examine the liquor because "defendant cannot safely proceed to trial unless and until he has said information," the court said that the clearly implied purpose of the motion was to enable the defendant to examine and test the liquor in order that he might produce, upon the trial, proof that the liquor was not intoxicating; and that the defendant was not foreclosed from offering proof on this issue at variance with evidence offered by the state.

See also *Enochs v State (1945) 81 Okla Crim 111, 161 P2d 87*, a prosecution for unlawful possession of intoxicating liquor, wherein the court, in holding that a judgment of conviction was properly supported by competent evidence, said, "If counsel for defendant had requested the [trial] court to produce the alleged intoxicants for examination, or for inspection of the court, it would have been perfectly proper for the court to have required the liquor to have been brought into the court room for his examination."

<>

In other cases, however, the court, holding that the prosecution was not required to produce the liquor allegedly involved in the case before a conviction might be had for unlawful possession of intoxicating liquor, upheld the trial court's denial of the defendant's request for production of such liquor.

Where, in a prosecution for unlawful possession of intoxicating liquor, the trial court sustained the defendant's demurrer to the evidence of the prosecution for the reason, among other things, that the intoxicating liquor set forth in the

information had not been produced as requested by the defendant, the court in *State v Gragg (1941) 71 Okla Crim 213, 110 P2d 321*, an appeal by the prosecution from an order discharging the defendant, held that it was error to sustain the defendant's demurrer to the prosecution's evidence, since the prosecution was not bound to produce the original liquor in court in order to sustain the allegation that the defendant was in possession of intoxicating liquor. The court said, in its syllabus of the case, "Where one is charged with the unlawful possession of intoxicating liquor, it is not necessary for the State to produce the identical liquor as alleged in the information, before a conviction may be had for the unlawful possession. This is a question of fact to be decided by the court or jury."

In *Byrd v State (1950) 91 Okla Crim 433, 219 P2d 1027*, a prosecution for unlawful possession of intoxicating liquor, the defendant's contention that it was error for the trial court to deny his request for the production of the seized liquor was denied, the court entirely relying on the decision in *State v Gragg (1941) 71 Okla Crim 213, 110 P2d 321*, supra.

◇

The denial of the defendant's motion for production of the liquor allegedly involved in the case was upheld in *State v Thomas (1928) 167 La 386, 119 So 401*, supra § 7, for the reason that at the time of the motion the liquor was not in the possession or under the control of the prosecution, but had been turned over to the federal authorities.

◇

On the other hand, a prosecution for possession of narcotic drugs, the defendant's pretrial motion for the production of one of the capsules seized from the defendant by police officers, in order that the defendant could have a chemical analysis of the capsule, was held properly denied in *Lander v State (1958) 238 Ind 680, 154 NE2d 507*. Noting that production of papers in a criminal case was statutory in Indiana, and not an absolute right, and that what the defendant was attempting in the present case was to assert an equitable right of discovery not based upon any statute, the court said that if the rules of criminal procedure were to be changed to permit a discovery of this nature, it should be done by statute or by rule of the Indiana Supreme Court, so that a trial court might feel safe in ruling upon such a motion on the basis of the law of Indiana as it existed at the time of the ruling. The court added that if the defendant was of the opinion that a doctor who testified for the prosecution as to the contents of the capsules was incompetent or had perjured himself, the defendant could have moved for a chemical analysis of one of the capsules after they were introduced in evidence; and that there was not the slightest shadow cast upon the credibility of this witness as an expert or an impartial witness.

In a prosecution for illegal selling of a narcotic drug, the defendant's pretrial motion for permission to inspect the alleged narcotic in question was granted in *People v Perrell (1965) 47 Misc 2d 1024, 263 NYS2d 640*, on the condition that the inspection and chemical analysis of the alleged narcotic by the defense should be conducted under the supervision and on the premises of the police laboratory. Stating that the granting of such a motion is discretionary when the interests of justice will be served, the court pointed out that the determination of the chemical composition of the substance purported to be a narcotic might determine the outcome of the case.

The defendant's pretrial motion for permission to inspect and analyze the items seized by the police in connection with the case was also held properly denied in *Dagley v State (1965, Tex Crim) 394 SW2d 179*, a prosecution for the unlawful possession of narcotic paraphernalia. Noting that there was no statutory provision for pretrial inspection of evidence in the possession of the prosecution, the court followed the rule that an accused is not entitled to a pretrial inspection of his confession or other exhibits in the possession of the prosecution.

◇

In prosecution for selling marijuana, denial of defendant's motion to be furnished with sample of allegedly prohibited substance that was offered against him at trial so that he could have its qualities researched by scientists of his choosing amounted to denial of due process. *Warren v State*, 292 Ala 71, 288 So 2d 826.

In prosecution for unauthorized possession of drugs in penal institution, based on finding of balloon of heroin between defendant's shorts and pants when he was searched on his return from work furlough leave, no violation of due process occurred when prosecution failed to comply with discovery order granting defendant's request to view pants and shorts. Compliance with order was impossible in part since prior to issuance of discovery order, pants had been washed and comingled with other prison clothing and defendant failed to show that shorts were ever within law enforcement custody and/or lost or destroyed because of law enforcement action or inaction. *People v Carrasco* (1981, 5th Dist) 118 Cal App 3d 936, 173 Cal Rptr 688.

Defendant charged with possession of marijuana has, upon motion timely made, right to have it examined independently in state laboratory under control and supervision of state unless valid reason to the contrary exists. *Patterson v State* (Ga) 232 SE2d 233.

Defendant was entitled to have expert of his own choosing analyze alleged controlled substance where request for analysis was filed three months after indictment, just over month after denial of motion to suppress substance, and more than one month before trial was held. *Gilliland v State* (1977) 142 Ga App 374, 235 SE2d 780.

Defendant was not entitled to access to sample of alleged marijuana for testing and use of state crime lab absent showing that denial of such access so impaired defense that defendant was denied a fair trial. *Herrin v State*, 138 Ga App 729, 227 SE2d 498.

Defendant was not entitled to sample of seized substance alleged to be marijuana in order to conduct independent scientific inspection absent showing that evidence sought was favorable to accused. *Mobley v State*, 130 Ga App 80, 202 SE2d 465.

In prosecution for possession of controlled substance, where State unnecessarily and presumably intentionally destroyed alleged contraband without giving defendant opportunity for his own testing or protection of court-imposed safeguards, trial court committed reversible error in admitting evidence of results of *State's test*. *People v Dodsworth* (1978) 60 Ill App 3d 207, 17 Ill Dec 450, 376 NE2d 449.

Whenever accused seeks by timely motion sample of allegedly controlled substance, so that it can be subjected to independent testing under appropriate safeguards as may be deemed necessary by trial court, heavy burden devolves upon state either to produce testable sample or to prove by clear and convincing evidence that destruction of all of the substance in its possession was necessary. *People v Taylor* (1977) 54 Ill App 3d 454, 12 Ill Dec 76, 369 NE2d 573.

In prosecution charging conspiracy to deal in narcotics, motion to compel discovery of supposed contraband by obtaining samples for purpose of independent testing was properly denied, where defense had been furnished results of laboratory testing with sufficient time for defense witness to examine those results prior to trial, and where defendants made no effort to affirmatively demonstrate that sample was material or that independent analysis of a sample would have exculpated them. *Everroad v State* (1982, Ind) 442 NE2d 994.

In prosecution for selling single "hit" of LSD, due process was not violated merely because of state's destruction of LSD during police testing procedures. *Schwartz v State* (1978, Ind App) 379 NE2d 480.

In prosecution for possession or sale of prohibited substance, defendant is entitled to small amount of drug for independent, pretrial inspection where a sufficient amount of the evidence exists; guidelines should be fixed, if

necessary, to control time, place and manner of inspection. *State v Hopkins (1977, La) 351 So 2d 474.*

Although defendants in prosecution for distribution of heroin should be granted right to independent scientific examination of contraband drug in state's possession, defense counsel was not entitled to examine drug where he sought only right to go and look at evidence, not necessarily to take chemical analysis and there was no showing that such action would affect defendant's guilt or innocence. *State v Jones (1977, La) 345 So 2d 1161.*

Where there was sufficient quantity of narcotic substances so that no practical problems would be presented if defendant were permitted to have a portion for examination by independent expert, pretrial examination would be ordered, with trial judge to set appropriate guidelines. *State v Migliore, 261 La 722, 260 So 2d 682.*

In prosecution for unlawful sale or possession of drugs in which motion is made for pretrial discovery and inspection of allegedly illegal substance and for independent analysis thereof, accused should support motion with affidavit tending to show reasonableness and feasibility of independent analysis and state should then file counteraffidavit identifying disputed issues of fact, if any; thereafter, trial court should approach problem with disposition to permit independent analysis if such is reasonable and practicable, but court may decline or order sample released by state and require that requested analysis be performed at state's expense and under its supervision. Moreover, where quantity of substance is not sufficient to permit testing and still leave enough for evidence at trial, court may decline to order any independent analysis whatsoever. *State v Cloutier (Me) 302 A2d 84.*

In prosecution for unlawful possession of heroin, question of whether defendant had right to conduct independent scientific examination of alleged heroin was matter for trial court's discretion. *People v Bell (1977) 74 Mich App 270, 253 NW2d 726.*

Defendant charged with possession of marijuana was entitled to have portion of substance found in his car and alleged to be marijuana given to him by state in order that he could have such sample analyzed by chemist of his own choosing. *Jackson v State (Miss) 243 So 2d 396, affd 261 So 2d 126.*

In prosecution for possession and sale of dangerous drug, defendant's request for physical inspection and scientific testing of items of evidence by experts was reasonable and necessary for preparation of his defense. *People v Spencer, 79 Misc 2d 72, 361 NYS2d 240.*

Although no drug had been shown to have been seized or tested, defendant charged with selling dangerous drug would, under statute, be entitled to reports and documents concerning tests and experiments made on substance; however, he could not obtain sample for his own tests until after substance was received in evidence, since it should not be tampered with or altered prior to exposure to jury for determination whether it was dangerous drug. *People v Goetz, 77 Misc 2d 319, 352 NYS2d 829.*

In prosecution for possession and sale of marijuana, substance alleged to be marijuana was tangible piece of evidence which ought not to be tampered with or altered in size, shape, or weight until its introduction in evidence, and furthermore, weight of substance could well determine outcome of case insofar as degree of crime was concerned; consequently defendant's motion for order allowing independent chemical analysis of substance was granted to limited extent of permitting defendant, or her expert, to visually examine substance, and, under supervision of prosecution or law enforcement agency, to physically weight substance. *People v McDonald, 59 Misc 2d 311, 298 NYS2d 625.*

In prosecution for possession of dangerous drug, where defendant's guilt or innocence hung exclusively on nature and amount of substance in question, it was error to deny defendant discovery to permit him to conduct his own test with respect to allegedly dangerous drug on which indictment was based. *People v White 40 NY2d 797, 290 NYS2d 405, 358 NE2d 1031.*

Denial of defendant's applications before trial and at trial for opportunity to have independent expert weigh narcotics was error, at least as to pretrial application, especially as claimed weight was so close to statutory minimum. *People v Moore* (1977) 60 App Div 2d 477, 400 NYS2d 526.

In prosecution for possession with intent to deliver or delivery of marijuana, trial court erred by refusing defendant's request to have an independent expert examine the substances in question; case would be remanded to allow defendants' experts to conduct an independent examination of substances, and if substances were marijuana trial verdict would remain, but if not new trial would be granted. *Commonwealth v Arenella* (1982, Pa Super) 452 A2d 243.

Pretrial discovery request by defense in prosecution for delivery of marijuana to undercover police officer, for quantity of alleged contraband for independent testing was properly denied based on overbreadth where no expert witness was identified and no outline of circumstances and conditions under which proposed test would be performed. *State v Faraone* (1981, RI) 425 A2d 523.

Indigent defendant charged with five counts of distributing marijuana to undercover police agent was entitled to sample of alleged marijuana for testing and to independent expert to evaluate substance, although such expert need not be of defendant's choosing. *State v Hanson* (1979, SD) 278 NW2d 198.

State statute permitting defendant to "inspect" objects belonging to him but in possession of prosecution was enacted to meet demands of due process, and required that one defendant in drug prosecution be supplied with sample of drug specimen forming basis of prosecution in order to conduct independent scientific analysis of such specimen; however, another defendant's conviction would not be reversed for failure of prosecution to give defendant sample of controlled substance in order to analyze it where defendant's motion was not made, if made at all, until day of trial. *State v Gaddis* (Tenn) 530 SW2d 64 (citing annotation).

See *State v Christmas* (Tenn) 529 SW2d 717, § 6[b].

In prosecution for possession of controlled substance, defendant's motion made 5 1/2 months after indictment, requiring state to furnish specimen sample of alleged marijuana or drug in order that independent examination could be made, should have been granted where trial was not commenced until 44 days after defendant's motion and thus motion was made in ample time so as not to cause postponement or continuance of final hearing. *State v Stephens* (Tenn) 529 SW2d 712.

In prosecution for possession of controlled substance with intent to sell, reversible error occurred where state refused to provide defendant with sample of contraband and papers seized at time of his arrest pursuant to pretrial discovery request; error was compounded when trial court refused to grant continuance for compliance with defendant's discovery motion. *State v Benson* (1983, Tenn Crim) 645 SW2d 423.

In prosecution for selling a controlled substance, LSD, although state was not required to allow defense counsel to inspect and duplicate tests, graphs, charts, photographs, records and other documents or tangible objects used in analysis of alleged controlled substance by state toxicologist, trial court erred in not requiring state to comply with statute by permitting defendant to inspect alleged controlled substance and to have independent analysis made by expert of his own choosing. *Latham v State* (1978, Tenn Crim) 560 SW2d 410.

Defendant in prosecution for sale of drugs was not entitled to have alleged LSD analyzed by independent testing where laboratory selected by defendant was not permitted under federal law to possess any controlled substances and defendant refused to select any other laboratory that would have been qualified to receive drugs. *Bryant v State* (1977, Tenn Crim) 549 SW2d 956.

Defense discovery request for "any tangible object, written statement, report, or any other type of evidence that would

be favorable to defendant in preparation of his defense" was insufficient to constitute request for independent chemical analysis of suspected drug. *Mendoza v State* (1979, *Tex Crim*) 583 SW2d 396.

Failure to grant defendant's discovery motion for independent chemical analysis of alleged marijuana was reversible error; and defendant's failure to request that representative of state be present at all times during analysis was irrelevant where statute required that trial court set time and place for inspection and determine manner in which it would be conducted. *Terrell v State* (*Tex Crim*) 521 SW2d 618.

Motion to examine and conduct chemical analysis of narcotic paraphernalia for traces of heroin was properly denied where there was no trace of heroin remaining on narcotic paraphernalia after analysis by police chemist. *Montes v State* (*Tex Crim*) 503 SW2d 241.

In prosecution for possession of LSD, defendant was entitled not only to visually inspect drugs which state intended to introduce into evidence, but also to have such drugs examined and tested by expert of defendant's choosing, under appropriate safeguards. *Detmering v State* (*Tex Crim*) 481 SW2d 863.

In prosecution for possession of marijuana, it was error for court to deny defendant's motion for production of portion of substance allegedly purchased from him, where defendant wished to have substance analyzed by his own expert. *State v Harr* (*W Va*) 194 SE2d 652.

In prosecution for possession of marijuana, accused was entitled to examine under proper supervision, portion of substance taken from him in order to determine whether it was actually illegal portion of cannabis plant, and it was error to deny his motion for such permission. *State v Smith* (*W Va*) 193 SE2d 550.

[\*26] Body, part thereof, or specimen therefrom

In some cases the court permitted the defendant to inspect parts or organs of the body of a human being or specimens and samples removed therefrom.

Where an autopsy surgeon testified at the preliminary examination of the case that the death of the victim of the alleged murder was due to shock as the result of a whipping or beating of him, it was held in *Schindler v Superior Court of Madera County* (1958) 161 Cal App 2d 513, 327 P2d 68, disapproved on another point in *People v Garner* (1961) 57 Cal 2d 135, 18 Cal Rptr 40, 367 P2d 680, cert den 370 US 929, 8 L ed 2d 508, 82 S Ct 1571, that the defendant was entitled to an order for pretrial inspection of specimens and samples taken by the autopsy surgeon from the body of the victim. The court noted that an independent examination of such specimens by another qualified pathologist might indicate that the death of the victim was not due to the blows received, or at least might tend to refute the conclusion reached by the autopsy surgeon.

The view that in a proper case an accused has the right to inspect the corpse of the victim of the offense charged against him was also taken in *State ex rel. Regan v Superior Court* (1959) 102 NH 224, 153 A2d 403, supra § 8.

In *State v Superior Court* (1965, NH) 208 A2d 832, 7 ALR3d 1, supra § 3, it was held that the defendant was entitled to inspect before trial specimens of hair taken from his person and "parts" or "contents" of the corpse of the victim of the alleged murder.

<>

In the following cases, on the other hand, the court refused to permit the defendant to inspect parts, organs, or tissue of a human body or certain other specimens removed therefrom.

## COLORADO

*Massie v People* (1927) 82 Colo 205, 258 P 226, infra  
*Walker v People* (1952) 126 Colo 135, 248 P2d 287, supra § 3

## MASSACHUSETTS

*Commonwealth v Bartolini* (1938) 299 Mass 503, 13 NE2d 382, cert den 304 US 565, 82 L ed 1531, 58 S Ct 950  
*Commonwealth v Noxon* (1946) 319 Mass 495, 66 NE2d 814, both supra § 5[a]

## MONTANA

*State ex rel. Keast v District Court of Fourth Judicial Dist.* (1959) 135 Mont 545, 342 P2d 1071, supra § 3

## NEBRASKA

*Parker v State* (1957) 164 Neb 614, 83 NW2d 347, cert den 356 US 933, 2 L ed 2d 763, 78 S Ct 775, supra § 5[a]

Where a defendant, accused of poisoning his wife, moved before trial for inspection and examination of the internal organs of the wife, the court in *Massie v People* (1927) 82 Colo 205, 258 P 226, upholding the denial of the motion, said: "If, under any circumstances, the motion was good its allowance seems clearly discretionary, reviewable only for gross abuse and none such is disclosed. It is clear from the record that at the time of the hearing on the motion the defense was apprised of the position of the prosecution and its claim of evidence of poisoning, yet it was not alleged that a further examination would in fact refute that claim, or that the movers so believed, or that they were doubtful on the subject."

<>

Defendant charged with second degree murder was not denied due process of law by reason of funeral and subsequent cremation of victim's body before independent post mortem could be conducted at defendant's request by his own independent experts, since pretrial discovery is not required by due process, victim's body was never in possession of prosecution, and record was devoid of facts indicating that coroner turned body over to victim's parents to forestall or prevent examination by defendant. *People v Vick*, 11 Cal App 3d 1058, 90 Cal Rptr 236.

Indictment charging defendant with sodomy, robbery, sexual abuse, and criminal possession of weapon would be dismissed, where police unaccountably failed to preserve for testing samples of blood of perpetrator of crimes charged in indictment. *People v McCann* (1982) 115 Misc 2d 1025, 455 NYS2d 212.

In prosecution for driving while intoxicated, defendant had right, pursuant to pretrial discovery motion, to portion of his blood sample in sufficient quantity as to enable defendant's expert to perform independent test, but such portion of sample must not be so large as to chemically alter or modify remainder to be retained by prosecution. *People v North* (1978) 96 Misc 2d 637, 409 NYS2d 482.

Bodily substances (blood, hair, and saliva) obtained from defendant by police before trial were not material to defense

and therefore not discoverable, since same bodily substances could have been obtained from defendant by his counsel at time discovery motion was made. *State v Little (Or) 431 P2d 810*.

Skull which had been disposed of after completion of examination by state medical examiner was not discoverable where state did not intend to offer it in evidence and where defendant failed to establish that examination of skull would be material and favorable to defense. *State v Oliverez (1978) 34 Or App 417, 578 P2d 502*.

[\*27] Other kinds or types of evidence

[\*27a] Documentary

The defendant's right to inspection of documentary evidence not specified heretofore has been considered in the following cases.

On the other hand, the trial judge's refusal to order the prosecution to produce the search warrant under which the defendant's premises had been searched was held not error in *State v Thurston (1946) 210 La 797, 28 So 2d 274*, the court pointing out that no legal reason had been shown for the production of the search warrant nor had any issue been presented because of the failure to produce it on the trial.

The defendant's motion for permission to inspect a search warrant and the papers upon which the warrant was based (it appearing that such warrant and papers were in the possession of the arresting officer) was granted in *People v Kelly (1962) 33 Misc 2d 1083, 227 NYS2d 884*, the court stating that in the absence of legislation to the contrary, it would entertain "a motion upon proper notice by a defendant to inspect search warrants, affidavits, returns, etc. of any warrant" which originated out of it.

<>

In *Spicer v State (1914) 188 Ala 9, 65 So 972*, the court, in reversing a judgment of conviction on other grounds, held that there was no error in the trial court's refusal to require the prosecuting attorney to turn over to the defendant's counsel a certain slip of paper on which the defendant had written his name. Pointing out that the paper was not offered in evidence, the court said that the defendant had no right to see it.

The denial of the production of a copy of a telegram which contained a statement of a certain prosecution witness and which was in the possession of the district attorney was held not error in *Kirpatrick v State (1919) 85 Tex Crim 172, 211 SW 230*, the court pointing out that "it was not claimed that there were any witnesses present who could identify said copy or in any way relieve its contents from being wholly hearsay and secondary," and that the copy in question was not an original paper.

<>

Motion by defendant in murder trial that he be allowed to inspect "any written evidence, physical evidence, scientific reports or other tangible evidence and the weapon, if any," if such evidence was to be used at trial, was properly overruled. *McCants v State, 282 Ala 397, 211 So 2d 877*.

First degree robbery defendant had no right to discover prior trial criminal records of, or immunity promised to, any of state's witnesses, including accomplices, nor did he have right as indigent to free transcript of co-defendant's trial. *Mardis v State (1982, Ala App) 423 So 2d 331*.

Defendant in homicide prosecution in which self-defense was raised was not entitled to inspect decedent's prison record where the prison record was not relevant to the issue of the decedent's reputation or to any issue in the case even though the file might have been useful in supplying leads for gathering further evidence. *Evans v State (Ala App) 338 So 2d 1033*.

Trial court did not err in denying motion to produce writing signed by defendant in which he waived right to have counsel present at lineup, where at trial defendant testified freely that he signed waiver, and where defendant's attorney had ample opportunity to examine waiver before it was introduced in evidence. *Henry v State (Ala App) 239 So 2d 318*.

In prosecution for murder and assault with deadly weapon based on death of 14 year old junior high school student, where defendant asserted defense of self-defense, and where defendant filed motion for disclosure of deceased victim's school records, trial court should have held in camera inspection in presence of counsel to determine whether there was anything in records germane to issues involved and should have limited defendant's access to materials in victim's records which would be relevant to self defense issue, incidents involving victim's aggressiveness or assaultive tendencies. *State v Birdsall (1977, App) 116 Ariz 196, 568 P2d 1094*.

In prosecution of 2 deputy sheriffs, one of them black and the other white, arising out of alleged inhuman detention of juvenile in their patrol car in violation of statute prohibiting "wilful inhumanity or oppression toward a prisoner," in which defendants claimed discriminatory enforcement of statute against them (the black because of his color and the white because he was the black's partner in the incident), defendants were entitled to discovery, from prosecutor, of statistical summary of sheriff's department records for preceding 14 years that might show different policies toward black and white officers with regard to prosecuting, as distinguished from merely disciplining, them for such offenses. Defendants' supporting declarations, specifying instances of similar but more serious offenses by 9 white officers who were not prosecuted, established plausible justification for discovery, and data sought, unobtainable through defendants' own efforts and limited to statistical summaries, avoided possibility of impairing confidentiality of sensitive information irrelevant to their actual defense. *Griffin v Municipal Court 4 Desert Judicial Dist. (1977) 20 Cal 3d 300, 142 Cal Rptr 286, 571 P2d 997*.

Criminal defendant was entitled to discovery of criminal charges currently pending against prosecution witnesses anywhere in state, such evidence being material to a witness' motivation in testifying even where no express promises of leniency or immunity had been made, and a list of charges currently pending against prosecution witnesses being easily compilable from information readily available to the district attorney while there was no similarly expedient method by which defense counsel could obtain information through his own efforts. However, denial of discovery by court or noncompliance by prosecution would not be reversible error per se, and since appellate court could not determine from the record whether compliance with defendant's request would have revealed any pending charges, and thus could not say that prejudice did or did not exist, cause would be remanded with directions to order prosecutor to furnish list of any criminal charges pending against any prosecution witnesses at time of trial, and, if no such charges were then pending, to reinstate original judgment and sentence, but, if such charges were pending, to evaluate the materiality of this new evidence in light of the whole record and determine whether to grant defendant a new trial. *People v Coyer (1983, 1st Dist) 142 Cal App 3d 839, 191 Cal Rptr 376*.

Defendant charged with possession of PCP for sale was not entitled to pretrial discovery of home addresses of two arresting police officers, such request made on the ground that defense should be allowed to investigate the officers' reputations in their home communities for possible impeachment purposes. *People v Lewis (1982, 2d Dist) 133 Cal App 3d 317, 184 Cal Rptr 31*.

In prosecution for bookmaking offenses of persons involved in operating neighborhood restaurants and bars, trial court did not abuse discretion by denying defense motion for discovery of documentary evidence, allegedly possessed by the prosecution, to show discriminatory law enforcement, where defendant did not make prima facie showing of selected prosecution based solely upon geographic or socio-economic factors. Although it was not necessary that the "class"

involved be one against which there has been traditional or historic discrimination, naked allegation that defendants were members of class of local neighborhood bars did not give rise to rational inference of selective law enforcement based on condemned invidious criteria. *Perakis v Superior Court of Santa Clara County (1979, 1st Dist) 99 Cal App 3d 730, 160 Cal Rptr 445.*

It was error for trial court to deny defendant's request for disclosure of juvenile witness' "rap sheet," but error was harmless where there was no showing that witness had "rap sheet" and where witness' testimony was self-incriminatory. *Re B. (1978) 82 Cal App 3d 106, 146 Cal Rptr 828.*

In prosecution for drug offenses, battery on two peace officers, and resisting arrest, trial court committed no abuse of discretion in denying accused's pretrial motion for discovery of "All crime reports or arrest reports filed by either of the officers. . . in which the principal complaint against the suspect was [battery, resisting arrest,] or some other act of aggression against or resistance to said officers, within the last 10 years." Though such reports were sufficiently identified, and accused in his supporting declaration referring to officers' propensity for violence or ethnic or racial prejudice, satisfied requirement of plausible justification for them to support his defense to battery and resisting arrest charge, burden on prosecution in producing such reports would have been excessive; moreover, compared with "All records involving all persons who [had] at any time filed complaints" against officers, as to which trial court had already granted accused's motion for discovery, usefulness to him of crime and arrest reports would have been highly speculative. *Lemelle v Superior Court of Orange County (1978) 77 Cal App 3d 148, 143 Cal Rptr 450.*

In prosecution for escape from lawful custody, trial court did not abuse its discretion in granting prosecution's motion to quash subpoena for personnel and unit files on two sheriff's officers involved in alleged threats to defendants, where record indicated that discovery was initiated after prosecution rested and after more than week of trial; where two officers whose files were sought were not on people's witness list, but were known to defendants and on their witness list from inception of trial; and where defendants failed to show how requested material, at that time, would be relevant either as admissible evidence or as information that would assist defendants in preparing their defense. *People v Condley (1977) 69 Cal App 3d 999, 138 Cal Rptr 515.*

Court did not abuse its discretion in denying request for production of complete personnel files of all prison staff members and inmate files of all prisoners that each side was considering calling to testify where request was not sufficiently specific and there was legitimate public interest in protecting against wholesale disclosure of matters requested. *People v Gauden, 36 Cal App 3d 942, 111 Cal Rptr 803.*

See *State v Carrione (1982) 188 Conn 681, 453 A2d 1137, cert den (US) 76 L Ed 2d 347, 103 S Ct 1775, § 9[b].*

In prosecution for criminal mischief in third degree, state was not compelled to disclose records of all prior misdemeanor convictions of every prosecution witness after each witness had testified on direct examination at trial. *State v Melton (1979) 36 Conn Supp 89, 411 A2d 948.*

Trial court erred in summarily denying motion for discovery of several items connected with radar equipment employed to measure defendant's speed at time of his arrest, since denial of motion seriously impeded defendant in preparation of his case, and granting thereof would not have prejudiced state's case in any way. *State v Anonymous, 6 Conn Cir 560, 279 A2d 738.*

Fifth Amendment due process principles required government to make pretrial disclosure, upon defense request, of all impeachable convictions of which it had knowledge, and United States Attorney's office would be deemed to know all prior convictions of government witnesses which happen to be listed in FBI wrap sheets for purposes of such disclosure rules. *Lewis v United States (1979, Dist Col App) 408 A2d 303* (opinion includes prescription for in camera method of trial court consideration of prior juvenile delinquency adjudications against witness).

Defendants charged with assault on police officers were not entitled to discovery and inspection of all complaints alleging misconduct against police officer victims, or supporting documents, reports, and results of any investigations in connection with any complaints against officers in question. *United States v Akers* (1977, Dist Col App) 374 A2d 874.

Failure to permit discovery of arresting officer's personnel file to determine existence or lack of any complaints for harassment or brutality which might be relevant to proving self-defense in prosecution for existing arrest was not prejudicial when personnel file contained no relevant information which, but for the erroneous ruling of not previously compelling discovery, would likely have produced a different result. *Ivester v State* (1983, Fla) 440 So 2d 352.

Denial of defendant's request to discover entire prison files on prosecution witnesses, including, inter alia, disciplinary reports and parole board investigations, was proper where defense was provided criminal records of witnesses and other materials deemed exculpatory by two judges who independently searched records; prosecution had no obligation to disclose matters to be used to impeach defense witnesses. *Jordan v State* (1981) 247 Ga 328, 276 SE2d 224.

In murder prosecution, defendant was not entitled to have arrest records of all state's witnesses furnished or information from persons interviewed by state but not called as witnesses, where information sought was not exculpatory. *Peppers v State* (1977) 239 Ga 198, 236 SE2d 360.

See *Cummings v State*, 226 Ga 46, 172 SE2d 395, § 17.

The state was not required in robbery prosecution to provide defendant with copies of photographs of injuries to victim, only to permit defendant to inspect and copy photographs. West's *Ga.Code Ann. § 17-16-4(a)(3)*. *Banks v. State*, 605 S.E.2d 47 (Ga. Ct. App. 2004).

State's failure to disclose pretrial agreement with accomplice's attorney was not error where accomplice testified that he was not aware of any agreement, which testimony was corroborated, in part, by assistant district attorney, and where issue became moot when assistant district attorney testified before jury as to existence and terms of pretrial agreement. *Griner v State* (1982) 162 Ga App 207, 291 SE2d 76.

Defendant charged with robbery did not have statutory right to discover addresses in addition to names of witnesses that had been furnished to him by prosecution. *Campbell v State* (1979) 149 Ga App 299, 254 SE2d 389.

In prosecution for fraud in obtaining public assistance and food stamps, additional evidence of amount fraudulently obtained by defendant could not be considered in assessing punishment where such evidence was not made known to defendant prior to trial. *Gill v State* (1977) 141 Ga App 823, 234 SE2d 665.

See *State v Arnold* (1983) 66 Hawaii 175, 657 P2d 1052, § 4[b].

In residential burglary prosecution based on testimony of female accomplice who had been involuntarily committed less than two years before offenses occurred, trial court could not reasonably conclude, from absence of information regarding witness' diagnosis, treatment, or release, that mental history of witness was irrelevant and immaterial for impeachment purposes, and defendant's motion to discover that history should have been granted through in camera hearing in presence of counsel for state and defendant. *People v Dace* (1983) 114 Ill App 3d 908, 70 Ill Dec 684, 449 NE2d 1031, affd 104 Ill 2d 96, 83 Ill Dec 573, 470 NE2d 993.

Although juvenile records of four potential state witnesses were discoverable under court rules pertaining to discovery in criminal cases, defendant did not have unqualified right to examine entire file; thus, trial judge correctly conducted in camera inspection of documents and disclosed all information contained therein pertinent to defense. *People v Clark* (1977) 55 Ill App 3d 379, 13 Ill Dec 84, 370 NE2d 1111.

Refusal of state to produce gas station receipt or identify gas station operator as rebuttal witness in response to defendant's motion for pre-trial discovery, were proper where production of receipt was refused because defendant refused to provide handwriting exemplar to compare with signature on receipt and state was not required to inform defendant that gas station operator might be called as rebuttal witness until intent was formed to call him which was done after alibi defense was presented. *People v Stinson*, 37 Ill App 3d 229, 345 NE2d 751.

In prosecution for murder of fellow prison inmate, defendant's request for personnel files was of dragnet variety and thus properly denied. *State v Wycoff* (1977, Iowa) 255 NW2d 116.

Where, by stipulation of state and defendant, lie detector test data were admissible, trial court did not err in refusing to require state to produce tape of polygraph, since tape was not in possession of state, but of polygraph expert in another city, and it was as available to defendant there as it was to state. *State v Galloway* (Iowa) 187 NW2d 725.

In prosecution for conspiracy to commit arson, failure of state to turn over newly discovered fire department records at earlier date did not require new trial, where records turned up under very unusual circumstances after both state and defense attorneys had diligently searched fire department files, there was no bad faith exhibited by prosecutor and where he did not knowingly withhold records. *State v Wolf* (1982) 7 Kan App 2d 398, 643 P2d 1101.

See *State v Henderson* (1978, La) 362 So 2d 1358, § 16[a].

State did not violate court order requiring furnishing to defendant of transcript of all tape recorded conversations before trial where officer had destroyed recording after being informed that it was inadmissible in evidence at trial. *State v Roche* (La) 341 So 2d 348.

Defendant suffered no prejudice as result of trial judge's rulings denying motion for production of tape recordings of police radio communications and request of issuance of subpoena duces tecum for tapes where defense counsel was given opportunity to hear tapes at in camera inspection and counsel had full opportunity to hear contents of conversation of police officers and to make use of this information at trial. *State v Perique* (La) 340 So 2d 1369.

It was not error to permit state to question defendant concerning prior conviction after state had failed to furnish defendant with copy of any record of his criminal arrests and convictions in their possession or custody or to make any reply to discovery item requesting such record when state did not possess rap sheet on defendant, defense counsel was aware of the prior conviction, and there was no claim by defense counsel that had he received a copy of defendant's record prior to trial, he would have undertaken a different defense strategy. *State v White* (1983, La App) 430 So 2d 174.

See *State v Morton* (1979, Me) 397 A2d 171, § 11.

Though defendant was entitled to discover names of Commonwealth's witnesses and, under direction of court, was entitled to access to their criminal records, prosecution had no affirmative duty to collect and assemble records; defendant's pre-trial motion seeking production of criminal and probation records of prospective witnesses was properly denied where records in county courthouse were at all times available to defendant. *Commonwealth v Adams* (1978) 374 Mass 722, 375 NE2d 681.

See *People v Aldridge*, 47 Mich App 639, 209 NW2d 796 (citing annotation), supra § 18.

Defendant charged with murder under multiple offender statute was not entitled to discover records as to number of multiple offenders actually sentenced as such in county in past 20 years where discovery sought would not have promoted any proper purpose relative to issue of appropriate punishment. *State v Jennings*, 126 NJ Super 70, 312 A2d 864, certif den 60 NJ 512, 291 A2d 374.

Defendant was properly permitted discovery of probation intake records of juvenile, in spite of statutory provisions regarding confidentiality of such records, where public policies of protecting juveniles and encouraging diversion from Family Court proceedings were overcome by criminal defendant's right to obtain those records as exculpatory evidence under his Sixth Amendment rights of compulsory process and confrontation. *People v Price (1979) 100 Misc 2d 372, 419 NYS2d 415.*

Having found that Brady discovery material exists in grand jury minutes with respect to inconsistent testimony of complaining witness and having found that no issue of security was involved, court would direct district attorney to produce that portion of complainant's designated testimony for defendant's immediate inspection. *People v Alamo, 89 Misc 2d 246, 391 NYS2d 314.*

Where bail jumping by defendant might have caused delay contributing to loss of notes of preliminary hearing, but grand jury testimony was available, there was no need for another hearing and another set of minutes for purpose of eliciting potential impeachment testimony, but district attorney would be required to turn over to defendant, prior to trial, all grand jury testimony, all police records and all of prosecutor's own records relating to statements of witnesses in case. *People v Aviles, 89 Misc 2d 1, 391 NYS2d 303.*

In murder prosecution, defendant was permitted to inspect correspondence, letters, notes, particularly those seized allegedly pursuant to search warrant, which were specified in defendant's motion for inspection, but nature of which is not shown in opinion. *People v Powell, 49 Misc 2d 624, 268 NYS2d 380.*

In prosecution for murder, burglary and possession of dangerous instrument, trial court erred in refusing to order disclosure from prosecutor of any correspondence between prosecutor's office and parole board concerning principal prosecution witness who was serving sentence imposed on plea of guilty to manslaughter stemming from participation as defendant's accomplice, since such correspondence might show understanding between witness and prosecution of leniency in return for testimony. *People v Cwikla (1979) 46 NY2d 434, 414 NYS2d 102, 386 NE2d 1070.*

In drug prosecution, trial court did not err in denying defendant's request for full disclosure of partially redacted search warrant and supporting testimony, since disclosure would have jeopardized safety and anonymity of confidential informant. *People v. Hunt, 227 A.D.2d 568, 643 N.Y.S.2d 175 (2d Dep't 1996).*

Copies of several orders authorizing use of electronic eavesdropping devices, with supporting affidavit upon which they were made, should be made available to defendant in abortion trial before rehearing. *People v Miller, 28 App Div 2d 1205, 285 NYS2d 495.*

Trial court erred in refusing to permit defendant in abortion prosecution to inspect wiretap order and supporting affidavit at hearing on motion to controvert search warrant which was based on fruits of wiretap order. *People v Mendez, 28 App Div 2d 727, 281 NYS2d 608.*

Denial of defendants' application to examine order authorizing interception of telephone conversations and supporting papers was error, requiring not reversal of convictions, but remand of action to trial court for hearing. *People v Fino, 27 App Div 2d 689, 277 NYS2d 276.*

Statute limiting discovery to documentary evidence and reports of expert witnesses to be used in trial would not include tape recording of telephone conversations between defendant and his alleged co-conspirators where state did not attempt to offer tape into evidence, there was nothing to indicate that it could have been authenticated sufficiently to permit its introduction and there was nothing to indicate that court could conclude there was anything exculpatory in tape. *State v Branch (1975) 288 NC 514, 220 SE2d 495, cert den 433 US 907, 53 L Ed 2d 1091, 97 S Ct 2971.*

In prosecution for second-degree burglary, defendant was entitled to new trial, where all evidence linking defendant to crime came from testimony of purported accomplice in burglary, accomplice had entered into use immunity agreement with prosecutor, prosecutor failed to disclose to defendant a reasonable time prior to trial terms and conditions of agreement with witness in violation of his statutory pre-trial disclosure duty, and defendant was prejudiced thereby in that failure of prosecution to provide notice coupled with its failure to dispute at trial accomplice's denials that such immunity existed allowed accomplice's credibility to remain unchallenged. *State v Morgan (1983) 60 NC App 614, 299 SE2d 823.*

In prosecution for obtaining property by false pretenses and corporate malfeasance, there was error in state's failure to disclose all documents it intended to use at trial, even though state did not offer documents in evidence but merely used them on cross-examination, where primary effect of state's improper nondisclosure was to deny defendant meaningful opportunity to prepare his defense. *State v Hill (1980) 45 NC App 136, 263 SE2d 14.*

In prosecution for drug violations, it was not reversible error for trial court to deny defendant's request to produce expense accounts of police officers who bought drugs from defendant. *Commonwealth v Banks, 228 Pa Super 308, 323 A2d 780.*

Prosecution was not required to disclose jury investigation report to defendant, which report was secured and paid for by district attorney's office and used by it as aid in jury selection process. *Com. v Foster, 219 Pa Super 127, 280 A2d 602.*

If there has been surreptitious interception of defendant's attorney-client communications, trial court should grant broad discovery of logs, summaries, reports, recordings and transcripts of intercepted communications and refusal by government agency or agent to disclose that information would result in dismissal of charges. *Re Kozak (1977, SD) 256 NW2d 717.*

Trial court did not abuse discretion in denying defendant's further request, in prosecution for second degree manslaughter committed while operating motor vehicle under influence of intoxicating liquor, that state be required to provide defendant with "information and explanation in detail" of any evidence or information, items or exhibits, or tests or examinations relating in any way to offense of exculpatory nature, both as to commission of offense or any part thereof, or bearing upon defendant's innocence, guilt, or character, or of impeaching nature, where court had already granted discovery order described as "liberal in the extreme," giving defendant access to state's work product, names and statements of all persons interviewed, names of all witnesses, photographs, reports and memoranda, and, in effect, opening state's file for inspection without regard to materiality or relevancy. *State v Wade (SD) 159 NW2d 396.*

Robbery defendant had no right to pretrial discovery of list of descriptions of robber given by complainant, absent showing such list was in existence or in possession of State. *Mosely v State (1981, Tex App 1st Dist) 627 SW2d 770.*

Defendant in prosecution for sale of heroin was not entitled to copy of mail receipt records maintained by state laboratory which received heroin samples in mail where state witness did not bring receipts to trial or testify from them and attention of witness was never directed to receipts during examination. *Mendoza v State (1977, Tex Crim) 552 SW2d 444.*

Request for copy of transcript of insanity proceeding which resulted in defendant's commitment to state hospital could not be raised as issue for first time on appeal, where court failed to rule on request and where it did not appear that failure to grant request in any way affected defendant's right to fair trial. *State v Little, 19 Utah 2d 53, 426 P2d 4.*

[\*27b] Nondocumentary

In a prosecution for speeding the radar equipment which had provided a speed reading to be used as evidence against

the defendant was held producible for inspection by the defense in *State v Fay (1963) 2 Conn Cir 369, 199 A2d 358*, supra § 12.

<>

In prosecution for drunken driving, court properly ordered police to turn over perchlorate tube with its contents which police had used in making blood-alcohol test to determine defendant's asserted intoxication so that defense might conduct further tests. *City of Rogers v Municipal Court of Rogers (Ark) 531 SW2d 257*.

Defendant charged in municipal court with various criminal offenses was not entitled to order authorizing him to depose police officers involved in various charges where defendant failed to establish, as required by statute, that police officers were about to leave state or were unlikely to attend trial. *People v Municipal Court for Pasadena Judicial Dist. (1978) 20 Cal 3d 523, 143 Cal Rptr 609, 574 P2d 425*.

In prosecution for arson and insurance fraud arising out of burning of motor home, defendant was not denied due process by failure of prosecution to timely produce tape recording of conversation between defendant and representative of insurance broker who appeared as prosecution witness where tape was discovered by prosecution during presentation of defense, where defense counsel was immediately notified and permitted to hear recording, where prosecutor stated he would not offer tape in evidence as it was prejudicial to defense, where court gave defense opportunity to use tape before it rested, and where defendant made no factual showing of any specific matter that could have been of benefit to him in either cross-examination of insurance representative or in his defense. *People v Foster (1981, 2d Dist) 114 Cal App 3d 421, 170 Cal Rptr 597*.

In prosecutions of parents for refusing to send their children to public schools, trial court abused its discretion in denying defendants continuance and further discovery on their defense of invidious law enforcement, where defendants had offered to prove that they had been prosecuted because of their earlier exercise of legitimate political expression in protesting segregation policies, not for their prominence in parent strike, and where people's initial reply to earlier discovery order limited to particular school attended by defendants' children admitting that parents of only two other children out of 28 whose parents had similarly violated compulsory education law had been prosecuted had later been revised to indicate that parents of 25 of those 28 children were not actually in violation. *People v Serna (1977) 71 Cal App 3d 229, 139 Cal Rptr 426*.

In prosecution for rape, prosecutor was not required to disclose that victim was pregnant, where information would not have led to discovery of material information not already known to defendant, where defendant had no basis for his contention that victim may have been lying about being pregnant, and where victim's statement would not have led to other information useful for impeachment. *People v Gallegos (1982, Colo) 644 P2d 920*.

In murder trial, trial court properly suppressed all testimony relating to defendant's severed fingertip where: (1) fingertip and evidence obtained therefrom were critical to proof of guilt or innocence; (2) fingertip had been knowingly destroyed but without malevolent purpose; (3) fingertip could have been preserved for further testing; and, (4) its destruction barred defendant from fully presenting his theory of defense. *People v Morgan (1980, Colo) 606 P2d 1296*.

In prosecution for tampering with witness prior to liquor license revocation hearing, failure of district attorney to produce travel voucher and beer keg pursuant to court order was not ground for reversal where evidence was cumulative, beer keg was not admitted and defendant suffered no prejudice. *People v Hower (1981, Colo App) 626 P2d 734*.

Although in murder prosecution in which defendant relied on alibi defense state failed to disclose identity of one of its witnesses before that witness testified, there was no violation of defendant's right under rule relating to state's obligation

on notice of defendant's intent to assert alibi defense that it advise defendant within reasonable time of any witness state intended to call to refute alibi defense, where witness' testimony was offered to impeach credibility of defendant and two of his defense witnesses rather than as "rebuttal" to defendant's alibi defense. *People v Muniz* (1980, Colo App) 622 P2d 100.

In prosecution for extortion in which defendant filed demand under applicable state discovery rule for disclosure of names of any policemen who had overheard defendant's allegedly extortionate phone call, state had no duty to disclose to defendant such information where state did not have that information in its possession, and where defendant had same opportunity to obtain such information from policemen involved in case as did state. *State v Counce* (1981, Fla App D4) 392 So 2d 1029.

Defendant was precluded from presenting alleged error on part of trial court in entry of its order denying defense counsel's pretrial motion for discovery seeking criminal records of the victim where record was totally devoid of testimony upon which motion was based and where during trial victim testified on cross-examination that he had two traffic convictions and that he was placed on probation for felony but adjudication of guilt was withheld. *Comer v State* (Fla App) 318 So 2d 419.

Refusal to order production of tape recording of statement by state witness was not error. *Williams v State*, 222 Ga 208, 149 SE2d 449, cert den 385 US 887, 17 L Ed 2d 115, 87 S Ct 184.

In rape prosecution, trial court did not err by refusing to impose sanctions on prosecution for failing to preserve samples of seminal fluid which had been extracted by physician to verify fact of intercourse, where state had no facilities to perform test desired by defendant to determine blood type, where such test must be made quite soon after specimen is obtained if test is to be reliable, and where tests are often inconclusive. *State v Smoot* (1978) 99 Idaho 855, 590 P2d 1001.

Since there is no requirement in criminal prosecution that prior to preliminary hearing state must disclose substance of evidence it intends to present or identity any of its witnesses, state was not obligated to disclose to defendant in murder prosecution before his preliminary hearing identify of witnesses state intended to call at defendant's trial or to produce those witnesses at defendant's preliminary hearing so that their competency or lack thereof could be determined, particularly where there was no showing that either such witnesses were under control of state or that defendant could not have insured their presence at preliminary hearing by having subpoenas served on them. *People v Blackman* (1980) 91 Ill App 3d 130, 46 Ill Dec 524, 414 NE2d 246.

In prosecution for commercial bribery based upon alleged attempts of defendant to induce insurance company property adjuster to inflate amount of fire loss for building, defendant was entitled to discovery of tape recordings of conversations between defendant and adjuster where tapes contained specific statement by defendant that adjuster would not be required to raise estimate, as well as several other exculpatory statements. *People v Cauthen* (1977) 51 Ill App 3d 516, 9 Ill Dec 526, 366 NE2d 1037.

In armed robbery prosecution, it was within discretion of trial court to order production of composite drawing of robbery suspect at trial for purpose of showing that, although drawing resembled defendant, he was not identified by witness who viewed drawing as person committing robbery. *People v Rosa* (1977) 49 Ill App 3d 608, 7 Ill Dec 228, 364 NE2d 389.

See *People v Stinson*, 37 Ill App 3d 229, 345 NE2d 751, § 27[a].

In criminal prosecution, prosecution has duty of disclosing execution of agreement made with prosecution witness. *Rufer v State* (1980, Ind) 413 NE2d 880.

Defendant in murder prosecution was entitled to information with respect to any promises or assurances made to prosecution witness to secure his testimony but he was not entitled to full freedom of choice as to methodology by which to obtain such information. *State v King (1977, Iowa) 256 NW2d 1.*

Trial court did not err in denying motion for production of beer can found at scene of crime, where only reason defendant gave for wanting can was to have it examined to ascertain that his prints were not there and state disclosed to defense counsel that it had discarded idea of using can as evidence since report showed that defendant's fingerprints were not on can. *State v Sheffey (Iowa) 250 NW2d 51.*

Refusal of trial court to permit defense counsel to examine juvenile records of prosecution witness who was informant, although error, was not prejudicial where in course of his testimony witness admitted that he was drug user and drug seller, that he was active participant in robbery, and that he had been granted immunity from prosecution and where evidence of defendant's guilt was overwhelming. *State v Deffenbaugh (Kan) 536 P2d 1030.*

Defendant in robbery prosecution had right to inspect composite drawing of robbery suspect prior to trial. *State v Brown, 220 Kan 684, 556 P2d 443.*

When undercover police officer was only witness to sale of marijuana by defendant, defendant's Sixth Amendment right to confront and cross-examine material witness entitled defendant to pretrial discovery of witness' address, with suppression of testimony as legitimate sanction for nondisclosure, to allow defense opportunity to run background check so it would be prepared to test witness' reputation for truth and veracity in community. *State v Burgoon (1980) 4 Kan App 2d 485, 609 P2d 194* (citing annotation).

Where defendant was charged in four counts with capital murder following shooting death of his wife's lover and three eyewitnesses, due process entitled the defense to pretrial notice of aggravating circumstances the prosecution intended to rely on in seeking death penalty; however, trial court properly denied defense motion to arrest judgment, based on argument the indictment was defective for failing to set forth the aggravating circumstances, where defense counsel did not say he was unaware of aggravating circumstances and did not file bill of particulars seeking discovery. *State v Martin (1979, La) 376 So 2d 300.*

Police were not required to make available to defendant tape recording made while accused was in act of committing crime. *State v Dickson, 248 La 500, 180 So 2d 403.*

In prosecution for armed robbery, prosecution's belated disclosure to defendant of statement of officer who identified defendant as one of four suspects he had seen fleeing from scene of crime did not constitute impermissible suppression of material evidence favorable to defendant that had affect of denying him fair trial where another eyewitness at scene of crime identified defendant as perpetrator thereof and where timely disclosure of statement would not have presented defendants with opportunity to prepare and present his case in such manner as to create reasonable doubt of defendant's guilt that would not otherwise have existed. *Commonwealth v Redding (1980) 382 Mass 154, 414 NE2d 347.*

In murder prosecution, defendant was not entitled to disclosure of evidence that two brown bags, in addition to bag containing murder weapon, had been found in vehicle used by suspected murderer where knowledge of existence of second bag would have been neither exculpatory nor would it have resulted in significantly sufficient possibility of different verdict to justify retrial. *Commonwealth v Pisa (1977) 372 Mass 590, 363 NE2d 245.*

Defendant in prosecution for sale of heroin was not denied fundamental fairness nor impaired in preparing his defense as result of prosecution's failure to disclose before his trial that undercover officer to whom he made heroin sale was equipped with wireless microphone, where evidence defendant might otherwise obtained from prosecution would not have been beneficial to him, and where on discovery that officer had been equipped with wireless microphone, trial court permitted defendant to reopen his proofs to impeach officer. *People v Bailey (1980) 101 Mich App 144, 300*

NW2d 474.

It is duty of prosecutor to disclose any bargain made with any witness in exchange for his or her testimony. *People v Bryant* (1977) 77 Mich App 108, 258 NW2d 162.

Prosecutor did not err in failing to disclose fact that chief prosecution witness had been promised "new identity" in return for testifying, where reason for witness' wanting new identity had nothing to do with defendant or defendant's case. *State v Breest* (1978, NH) 387 A2d 643.

Discovery relating to contents of intercepted communications and derivative evidence in pretrial setting is recognized under New Jersey wiretapping law, and touchstones for according such discovery are "interests of justice" and "good cause"; however, disclosure of contents of intercepted communications should not be uncritical or promiscuous or without court superintendence, and where specific grounds for objection are demonstrated by state, protective order should issue. *State v Braeunig*, 122 NJ Super 319, 300 A2d 346.

Defendant's application for names of potential prosecution witnesses granted subject to right of prosecution to move to reargue application if there should be compelling circumstances indicating that any witnesses might be tampered with or threatened, or that other compelling reasons existed for nondisclosure. *People v Barnes*, 74 Misc 2d 743, 344 NYS2d 475.

Motion to direct the people to furnish defendants with list of witnesses to be called in obscenity prosecution was denied in court's discretion as beyond scope of permissible pretrial discovery. *People v Steinberg*, 60 Misc 2d 1041, 304 NYS2d 858.

Motion to inspect coat and piece of brass rod found on premises of convent, where defendant allegedly assaulted sisters, denied. *People v Bradford*, 54 Misc 2d 54, 281 NYS2d 480.

The name of the recorder of alleged gambling records, discovered through police investigation, is improper subject of discovery and inspection. *People v Spadaro*, 51 Misc 2d 604, 273 NYS2d 587.

State was not guilty of improperly withholding evidence from defendant, convicted of murder and other crimes, on ground that state had allegedly withheld identity of certain witnesses who could offer material and exculpatory evidence, where defendant was certainly aware of identity of one of witnesses who was murder victim's mother and who testified at defendant's trial, where appeal witnesses could only offer vague descriptions of individuals whom they observed fleeing from scene of crime, and where prosecutor was not obliged to disclose identity of other witness whose testimony before grand jury inculpated defendant. *People v King* (1981, 2d Dept) 79 App Div 2d 992, 434 NYS2d 462.

Promise of leniency or other consideration held out to self-confessed criminal for his cooperation bears upon his credibility as witness and must be disclosed by prosecution. *People v Davis* (1977) 57 App Div 2d 1013, 394 NYS2d 486.

Trial court properly determined that defendant was not prejudiced by failure of prosecutor to advise defendant of names, addresses and criminal records of witnesses after proper discovery requests, where in most instances prosecutor did not have such information, but orally communicated information to defendant as it was acquired. *State v Bell*, 48 Ohio St 2d 270, 2 Ohio Ops 3d 427, 358 NE2d 556.

Where evidence demonstrated that meaningful analysis of breathalyzer test apparatus would have been possible and that an error could have occurred in initial administration of breathalyzer examination, state was required to allow discovery of test apparatus and failure to produce apparatus warranted suppression of test results. *State v Michener* (Or App) 550 P2d 449.

Trial court did not err in refusing to compel state to reveal name and whereabouts of 2 anonymous parties who shared reward money paid for information leading to arrest and conviction of defendants on charge of killing police officer. *West v State (Tenn Crim) 466 SW2d 524* (citing annotation).

## FOOTNOTES

n1 This annotation supersedes *52 ALR 207*.

n2 The subject under annotation is controlled or affected by statutes or court rules in some jurisdictions but statutory law is not treated herein except as reflected in reported cases within the scope of this annotation.

n3 The term "state court" as used here includes municipal or local courts of the District of Columbia and territories of the United States, as distinguished from District Courts of the United States located therein.

n4 The accused's right to, and the prosecution's privilege against, disclosure of the identity of an informer are discussed in *76 A.L.R.2d 262*.

n5 The right to discovery or inspection may sometimes be confused with the right to a bill of particulars, although the two procedures are theoretically distinct. As to the right to particulars, see *5 A.L.R.2d 444*. As to the right of defense counsel to compel the prosecuting attorney to disclose information as to prospective jurors, see *78 A.L.R.2d 309*.

n6 As an example of a case dealing with this question, see *State v District Court of Delaware County (1962) 253 Iowa 903, 114 NW2d 317*.

n7 As an example of a case dealing with this question, see *McGuff v State (1889) 88 Ala 147, 7 So 35*.

n8 Some cases dealing with an accused's right to inspect the place of the alleged offense are referred to herein by way of illustration, in the situation where such place was under the possession or control of the prosecution and the court treated the issue in terms of the accused's right to inspection of writings or articles.

n9 As illustrative of cases excluded in this respect, see the following:

### CALIFORNIA

*People v Jordan (1955) 45 Cal 2d 697, 290 P2d 484* (involving private notes used by an expert witness for the prosecution in the course of various tests conducted by him as to certain physical evidence)

### LOUISIANA

*State v Wilde (1948) 214 La 453, 38 So 2d 72, cert den 337 US 932, 93 L ed 1739, 69 S Ct 1484, reh den 338 US 842, 94 L ed 515, 70 S Ct 29* (involving papers, books, and records connected with the present prosecution for forgery which were in the possession of a third party)

### MISSOURI

*State ex rel. Phelps v McQueen (1956, Mo) 296 SW2d 85* (involving books, papers, and documents which were

in the possession of private corporations and their officers).

n10 As illustrative of cases excluded in this respect, see the following:

#### ALABAMA

*Parsons v State (1948) 251 Ala 467, 38 So 2d 209* (holding that the defendant's motion to request the Attorney General of the United States to release certain evidence concerning the present prosecution which was in the custody of the Department of Justice should have been granted)

#### COLORADO

*Corbett v People (1963) 153 Colo 457, 387 P2d 409, reh den 377 US 939, 12 L ed 2d 302, 84 S Ct 1346* (holding that the defendant had no right to examine an FBI investigative report in preparation for trial)

#### MISSISSIPPI

*Eaton v State (1932) 163 Miss 130, 140 So 729* (upholding the denial of the defendant's application for a subpoena duces tecum to have a United States attorney produce the transcribed notes of testimony taken by him on an investigation of the crime charged against the defendant).

n11 For illustrative cases excluded in this respect, see the Alabama cases referred to in § 9[c], *infra*, footnote 20.

n12 These questions are covered by a separate annotation. See 7 A.L.R.3d 174.

n13 For an annotation on the question whether mandamus or prohibition is available to compel or to prevent discovery proceedings in civil actions, see 95 A.L.R.2d 1229.

n14 See also the annotations referred to in § 1[a], *supra*.

n15 § 3, *infra*.

n16 § 3, *infra*.

n17 § 5[a], *infra*.

n18 § 8, *infra*.

n19 § 10[a], *infra*.

n20 § 8, *infra*.

n21 § 8, *infra*.

n22 § 4[a], *infra*.

n23 § 4[b], *infra*.

n24 §§ 13-27, *infra*.

n25 § 16, *infra*.

n26 § 17, *infra*.

n27 §§ 24, 25, *infra*.

n28 § 18, *infra*.

n29 § 11, *infra*.

n30 § 11[a], *infra*.

n31 § 11[e], *infra*.

n32 § 11[b], *infra*.

n33 § 12, *infra*.

n34 § 12, *infra*.

n35 An exception is recognized by a case holding that suppression by the state of material evidence exculpatory to the accused is a violation of due process even in the absence of a request for disclosure of such evidence. See *United States ex rel. Meers v Wilkins* (1964, CA2 NY) 326 F2d 135, *infra* § 6[a].

n36 § 6, *infra*.

n37 § 5[b], *infra*.

n38 § 6[a], *infra*.

n39 § 7, *infra*.

n40 § 7, *infra*.

n41 §§ 9[a-e], *infra*.

n42 § 9[b], *infra*.

n43 § 9[c], *infra*.

n44 § 9[c], *infra*.

n45 There may be some danger of a reaction in the other direction, that is, toward a less liberal rule, or the maintenance of the present restrictions, as a result of the feeling in some members of the public (and judiciary) that recent developments in the criminal law have given the accused unfair advantages and have crippled the agents of law enforcement.

n46 For an interesting presentation of the thesis that the trend of the development of criminal law and procedure tends to grossly favor the prosecution rather than, as is frequently alleged, the accused, see Goldstein, *The State and the Accused: Balance of Advantage in Criminal Procedure*. 69 *Yale LJ* 1149.

n47 For an excellent discussion of the considerations for and against liberalization of criminal discovery,

see Louisell, *Criminal Discovery: Dilemma Real or Apparent*. 49 *Cal L Rev* 56, March 1961.

n48 Louisell, 49 *Cal L Rev* 56, 60, contains a useful treatment of the various procedural sources of information, other than pretrial discovery, open to the accused.

n49 In some of these cases the court, in recognizing the rule as stated above, spoke of inspection or disclosure "before trial," without indicating whether the rule was equally applicable to inspection or disclosure during trial. These cases are included in the above list with the parenthetical notation "before trial."

n50 In 1961, subsequent to this decision, a statute was enacted in Vermont authorizing the court to permit the defendant to inspect the books, papers, documents, statements, or other objects, obtained from or belonging to the defendant. See § 11[i], *infra*.

n51 *Am. Jur. 2d, Criminal Law* § 225; 33 *A.L.R.2d* 1421. For a discussion of the effect of this rule on the defendant's right to disclosure and inspection of evidence in the hands of the state, see "Suppression of evidence favorable to an accused," by Justice James M. Carter in 34 *FRD* 87.

n52 The cases dealing with this situation are illustrated in the text *infra*.

n53 See 33 *A.L.R.2d* 1421.

n54 For cases recognizing the rule under consideration, but holding that there was no showing of a suppression of material evidence favorable to the accused, see, for example, the following:

#### CALIFORNIA

*People v Mort* (1963) 214 *Cal App 2d* 596, 29 *Cal Rptr* 650

#### NEW MEXICO

*State v Morris* (1961) 69 *NM* 244, 365 *P2d* 668

#### NEW YORK

*People v Fisher* (1958) 23 *Misc 2d* 391, 192 *NYS2d* 741.

n55 In some cases the court, in recognizing the rule as stated above, indicated that the trial court's discretion exists only where the particular document or object sought to be inspected is admissible as evidence. These

cases are included in the above list with the parenthetical notation "admissible evidence only."

n56 In *Battalino v People* (1948) 118 Colo 587, 199 P2d 897 (a case not within the scope of this annotation because involving the defendant's request for inspection of a prosecution witness' statements during the course of trial for impeachment purposes), the court, in upholding the denial of the defendant's request, noted that "the granting or refusal of the accused's request for inspection of written statements of a witness for the prosecution has been held to lie in the discretion of the trial court." (Emphasis added.) And in *Struna v People* (1950) 121 Colo 348, 215 P2d 905 (a case likewise not within the scope of this annotation because involving the defendant's request for inspection of a prosecution witness' statements during the course of trial for impeachment purposes), the court, also upholding the denial of the defendant's request, said that in the *Battalino Case* (1948) 118 Colo 587, 199 P2d 897, supra, "we pointed out that the question of the right of counsel for the defense to inspect documents in the possession of the district attorney lies within the discretion of the court." (Emphasis added.) However, in the subsequent decision in *Walker v People* (1952) 126 Colo 135, 248 P2d 287, supra § 3, the court, following the view that in the absence of statute, the defendant in a criminal case has no right to inspect evidence in the possession of the prosecution prior to the time such evidence is offered in evidence, said (1) that the discussion in the *Battalino* and *Struna* Cases relative to the law of pretrial discovery was not necessary to a determination of the questions presented by the records therein, and (2) that the statement in the *Battalino* Case reading, "The granting or refusal of the accused's request for inspection of written statements of a witness for the prosecution has been held to lie in the discretion of the trial court," could not be construed "as an expression of opinion by this court, notwithstanding that it was apparently so taken in the *Struna* case, supra, in which the *Battalino* case only, is cited as authority." In this connection, attention is also called to *Massie v People* (1927) 82 Colo 205, 258 P 226, infra § 26, wherein the court used language tending to support the view that whether to grant or deny a defendant the right to inspect evidence in the possession of the prosecution lies within the discretion of the trial court.

n57 The defendant's burden of showing a proper cause for inspection and of designating specific evidence sought is separately discussed in § 7, infra.

n58 Propriety of discovery interrogatories calling for continuing answers. 88 A.L.R.2d 657.

n59 The question whether, in order to be granted an inspection, the defendant is required to show admissibility of the requested evidence is separately treated in § 10[a], infra.

n75 *People v Riser* (1956) 47 Cal 2d 566, 305 P2d 1, cert den 353 US 930, 1 L ed 2d 724, 77 S Ct 721, app dismd 358 US 646, 3 L ed 2d 568, 79 S Ct 537 (disapproved on other grounds *People v Chapman* (1959) 52 Cal 2d 95, 338 P2d 428, and also disapproved on other grounds *People v Morse* (1964) 60 Cal 2d 631, 36 Cal Rptr 201, 388 P2d 33); *People v Chapman* (1959) 52 Cal 2d 95, 338 P2d 428; *Norton v Superior Court of San Diego County* (1959) 173 Cal App 2d 133, 343 P2d 13

*People v Norman* (1960) 177 Cal App 2d 59, 1 Cal Rptr 699, cert den 364 US 820, 5 L ed 2d 51, 81 S Ct 56; *People v Cathey* (1960) 186 Cal App 2d 217, 8 Cal Rptr 694; *People v Preston* (1958) 13 Misc 2d 802, 176 NYS 2d 542; *People v Stokes* (1960) 24 Misc 2d 755, 204 NYS2d 827. In *People v Silberstein* (1958) 159 Cal App 2d Supp 848, 323 P2d 591, it was said that the state has no interest in denying the accused access to all evidence that can throw light on issues in the case, and that to deny flatly any right of production on the ground that an imbalance would be created between the advantages of prosecution and defense would be to lose sight of the true purpose of criminal trial.

n76 *People v Marshall* (1958) 5 App Div 2d 352, 172 NYS2d 237, affd 6 NY2d 823, 188 NYS2d 213, 159 NE2d 698, supra § 7; *People v Wargo* (1933) 149 Misc 461, 268 NYS 400, infra § 15[a]; *People v Gatti* (1938) 167 Misc 545, 4 NYS2d 130, infra § 25[b]; *People v Skoyec* (1944) 183 Misc 764, 50 NYS2d 438, infra § 13[a]; *People v Whitmore* (1965) 45 Misc 2d 506, 257 NYS2d 787, infra § 22[a]. See also *Griffin v United States* (1950) 87 App DC 172, 183 F2d 990, wherein the court, in holding that the defendant, who was convicted of murder in the District Court for the District of Columbia, was entitled to a new trial where certain information tending to exculpate the defendant was not disclosed by the prosecution to the defense, said that the prosecution should disclose evidence that may reasonably be considered admissible and useful to the defense, and that when there is substantial room for doubt, the prosecution is not to decide for the court what is admissible or useful for

the defense. (Apparently the law of the District of Columbia was applied.) Holding to the same effect is *People v Whitmore* (1965) 45 Misc 2d 506, 257 NYS2d 787, infra § 22[a]. And see *Strosnider v Warden of Maryland Penitentiary* (1962) 228 Md 663, 180 A2d 854, wherein it was held that the suppression by the prosecution of evidence tending to exculpate the accused was a ground for relief under the Maryland Post Conviction Procedure Act.

n88 In *People v McHugh* (1964) 20 App Div 2d 770, 247 NYS2d 839, it was held error for the trial court "to refuse to permit the defense to inspect those portions of defendant's statements not offered in evidence by the People unless the defense introduced them in evidence." The court said that the defendant was entitled to inspect the statements unconditionally.

n89 Where a prosecution witness was placed upon the stand for the purpose of proving a confession allegedly made by the defendant, and during the course of his testimony it was revealed that such confession had been taken down by a stenographer, and defense counsel thereupon requested the production of the stenographer's report of the confession for the purpose of examination and use by them if it contained anything in favor of the defense, it was held in *State v Murphy* (1923) 154 La 190, 97 So 397, that the defense's request for production should be granted, regardless of whether the requested report of the confession was correct or incorrect. The court said that the report was certainly very relevant as to the nature and circumstances of the confession; that the prosecution should not be permitted to say whether the report was correct or not, but the correctness thereof should be determined by the trial court and the jury, if it had gone to them; that it would be for the defense to determine whether it would use the report, and for the jury to decide its effect; and that the report should be produced especially because "no one else was present at the time or produced as witnesses save those for the state." Where shortly after the commission of the alleged offense, the district attorney, the county attorney, and the sheriff had an interview with the defendant, and during such interview the defendant had allegedly made a confession and the county attorney had made a tape recording of the interview, and at the trial of the defendant the sheriff had testified to the alleged confession, stating that he remembered the details of the confession although he conceded that he could not remember every item, it was held in *Sanders v State* (1959) 237 Miss 772, 115 So 2d 145, that under the circumstances of the case the defense was entitled to inspect and hear the recording of the interview in order that the defendant might use it in the cross-examination of the sheriff and possibly as direct evidence. Noting that where a prosecution introduces a part only of a statement, the defendant is entitled to prove the remainder or any part thereof which is explanatory of or connected with the part offered by the prosecution, the court said the defendant was entitled to examine and put in evidence all that had been said to and by him at the time of the interview insofar as it had a bearing upon the subject of the controversy. In *Sprinkle v State* (1925) 137 Miss 731, 102 So 844, a prosecution for murder, the denial of the defendant's request for permission to see a dying declaration of the victim of the homicide was held error under the circumstances, it appearing that the dying declaration was made to the district attorney, was taken down in shorthand by a stenographer, and was transcribed; that at the trial the district attorney testified to the dying declaration and also stated that he had the transcription in his pocket; that on cross-examination he was asked by the defendant's attorney if the victim's statement was not elicited by leading questions, and he replied in the negative; that the defendant's attorney thereupon requested the district attorney to let him see the written declaration and also asked the court to compel the district attorney to allow him to see the statement, which motion was overruled; that subsequently the stenographer who took down and transcribed the dying declaration testified that it was correctly taken down and transcribed, and thereupon the defendant again asked the court to require the district attorney to furnish him the written declaration, which motion was again overruled. Stating that the statement in question was not a private paper in the ordinary sense belonging to the district attorney, but was procured in his official capacity for the purpose of aiding him in the prosecution of the defendant, and noting that although the statement in question was not a public document or record in the usual sense, it had a

bearing on the question of the guilt of the defendant, and that with this paper before him the defendant's attorney might have been able to convince the jury that the testimony of the district attorney was inaccurate in some material respects, the court concluded that the trial court should have sustained the motion for inspection of the statement and allowed the defendant's attorney to examine it "for use in cross-examination as well as evidence if competent and relevant." See also *Williams v State* (1954, Fla) 74 So 2d 797, *infra*, where the court said, by way of dictum, that if a statement made by the defendant is introduced into evidence through a prosecution witness it should be made available to the defense for use in cross-examination. And see *Sanchez v State* (1950) 155 Tex Crim 364, 235 SW2d 149, where it was held that the defendant was entitled to inspect his confession when it was placed in the hands of a prosecution witness and the witness testified that it had refreshed his memory.

n90 In *Cochrane v State* (1936) 48 Ariz 124, 59 P2d 658, disapproved on other grounds *Kinsey v State* (1937) 49 Ariz 201, 65 P2d 1141, 125 ALR 3, *infra*, the defendant was denied the right to inspect the transcript of his confession although a prosecution witness had testified to the confession. In *State v Hale* (1963, Mo) 371 SW2d 249, wherein a police officer stated on cross-examination that an official police report had been prepared in connection with the case and that he had read the report on the previous day at the police headquarters, and defense counsel thereupon asked the officer to produce the report in court, the court, upholding the denial of the defendant's request for production of the report, pointed out that there had been no showing as to the contents, materiality, or relevancy of the report, nor was it shown that the report would have impeached the officer. In *Reizenstein v State* (1958) 165 Neb 865, 87 NW2d 560, *mod* on other grounds and *reh den* 166 Neb 450, 89 NW2d 265, wherein it appeared that the prosecution called at the trial certain witnesses who had been present when the defendant made a statement, that the witnesses had refreshed their recollection from the statement as to what the defendant had said, and that the defendant's counsel thereupon requested the production of the statement for the purpose of cross-examination, it was held that there was no error in denying the defendant's request for the production of the statement. Noting that in a criminal case the trial court is invested with a broad judicial discretion in allowing or denying an application to require the state to produce written confessions, statements, and other documentary evidence for the inspection of the defendant's counsel before the trial, and that error may be predicated only for an abuse of such discretion, the court said that no reason was apparent why the same rule should not apply during the trial. In *State v Strain* (1948) 84 Ohio App 229, 39 Ohio Ops 289, 52 Ohio L Abs 533, 82 NE2d 109, wherein it appeared that the defendant had made a confession to a police officer and such confession was taken down in shorthand and was later transcribed, but was not signed by him, that at the trial the police officer testified fully concerning the confession, admitting that he had previously refreshed his recollection from his written memoranda, and that thereupon the defense interposed a motion for an order requiring the prosecuting attorney to deliver to the defendant a copy of the transcript which contained all of the alleged confession, the court held that there was no error in denying the defendant's motion. The court pointed out that the transcript in question was not a written confession signed by the defendant and was therefore not competent as evidence; that the police officer in testifying did not use any transcript or any other paper while on the witness stand to refresh his recollection; and that the papers from which the officer refreshed his recollection were not evidence but were merely memoranda obtained for the use of the prosecuting attorney. See also *State v Cope* (1946) 78 Ohio App 429, 34 Ohio Ops 171, 46 Ohio L Abs 528, 67 NE2d 912, wherein it was held that the trial court's refusal to make available to defense counsel a copy of a typewritten statement signed by the defendant and given to a detective was not error where it appeared that the statement in question was examined by the detective several days prior to the trial, but was not used by him to refresh his memory while on the witness stand, and that the statement was afterward produced in court and introduced into evidence, and ample opportunity was given to defense counsel to recall the detective and examine him in regard to the contents of the statement. The trial court's refusal to permit production, for the purpose of cross-examination of a police officer, of an offense report which the officer had read sometime before the trial to refresh his memory was also held not error in *Artell v State* (1963, Tex Crim) 372 SW2d 944, *cert den* 375 US 951, 11 L ed 2d 312, 84 S Ct 439, the court stating that a report made by a person other than the witness on the stand should not be made available for the purpose of cross-examination of the witness. In *State v Painter* (1950) 135 W Va 106, 63 SE2d 86, where the prosecution in cross-examining a police officer was permitted, over the objection of the defendant, to elicit

information with respect to a prior report made by the officer, and the defendant assigned as error the refusal of the trial court to require the prosecuting attorney to show his counsel the officer's report, the court held, "This assignment of error is so insubstantial as to require no discussion, and we dismiss it by saying that no error appears in the action of the trial court in that particular."

n91 Where police officers were interrogated, upon direct examination, with reference to the circumstances under which the defendant had made an oral confession prior to a written one, and were permitted to testify in detail as to the oral confession, and thereupon the defendant's counsel, before cross-examining the officers with reference to the oral confession, moved for permission to examine the written confession, it was held in *Silliman v People (1945) 114 Colo 130, 162 P2d 793*, that a denial of the motion was not violative of the defendant's rights. Following the rule that in the absence of statute the defendant has no right to inspect evidence in the possession of the prosecution prior to the time it is actually offered in evidence, and pointing out that during the examination of the officers no question was asked as to the contents of the written confession, which was not offered in evidence until just before the prosecution rested its case, and that the written confession could be retained by the prosecution until such time as it desired to make use thereof, the court said that until the prosecution saw fit to offer the written confession, the defendant had no right to examine and inspect it.

n92 In *Commonwealth v Butler (1961) 405 Pa 36, 173 A2d 468*, cert den *368 US 945, 7 L ed 2d 341, 82 S Ct 384*, reh den *368 US 972, 7 L ed 2d 402, 82 S Ct 450*, it was held that where a statement given by the defendant to the authorities immediately following his arrest was identified during the trial, but not offered in evidence, and defense counsel, at this point, requested the opportunity to examine it, it was proper for the trial court to deny the request and rule that when, and if, it was offered in evidence, counsel would then have the right to examine it.

n93 In *People v Miller (1931) 257 NY 54, 177 NE 306*, it was held error to deny the defendant's request, made after the close of the prosecution's case, for permission to inspect letters which were found in the room of the victim of the alleged murder and which were marked for identification in court, but were not offered in evidence. Pointing out that the letters were not the private memoranda of the prosecuting officer, but were the belongings of the murder victim, found in her room and identified in court, the court said that a refusal to direct the inspection of the letters at any stage of the trial was error, whereby the defendant would be aggrieved if there was a reasonable possibility that it had an effect upon the jury.

n94 Since questions as to the defendant's right to inspection of a prosecution witness' statement for purposes of cross-examination or impeachment of such witness are not within the scope of the present annotation (see § 1[a], supra), the treatment here does not purport to include cases dealing with the question whether the defendant is entitled to inspection, for purposes of cross-examination or impeachment, of a statement of a prosecution witness which has been used by the prosecuting attorney during the trial in his examination of the witness.

n95 In *Williams v State (1954, Fla) 74 So 2d 797*, it was held that where the prosecution attempted to impeach the defendant's credibility on his cross-examination by reading, in the presence of the jury, an extrajudicial statement purportedly made by him before certain assistant state's attorneys and police officers, defense counsel was entitled to examine such statement. The court noted that if such a statement had been admitted into evidence, it would have been available to defense counsel in its entirety, so that if the damaging admissions had been qualified in any way by the defendant in the balance of the statement, and brought into harmony with his testimony at the trial, this fact could have been brought out upon redirect examination; that if the statement had been introduced through a witness for the prosecution it should have been made available to defense counsel for use in cross-examination; and that if the statement had been used to refresh the recollection of the defendant while testifying as a witness, it should have been shown to his counsel on demand, even though not introduced in evidence. Where, on cross-examination of the defendants, the prosecuting attorney read from a written statement allegedly made by them, and, for impeachment purposes, inquired of them if they had not been asked a certain question to which they had made specific answers, and at the conclusion of the

cross-examination, counsel for the defendants asked the privilege of examining the document in order that he might further examine the defendants, it was held in *People v Borella* (1935) 362 Ill 218, 199 NE 113, that it was error to deny the defense's request for examination of the document. In *Meadors v Commonwealth* (1940) 281 Ky 622, 136 SW2d 1066, it was held that where the prosecuting attorney used on cross-examination certain statements made by the defendant, the defendant or his counsel should be given the right to inspect and use a transcript of any writing used in the cross-examination. See also *People v Reger* (1961) 13 App Div 2d 63, 213 NYS2d 298, where the court, in holding that it was error under the circumstances to permit the use of a tape recording by the prosecuting attorney during the cross-examination of the defendant, although the prosecuting attorney alleged that his purpose for such use of the recording was to refresh the recollection of the defendant, noted that the writing or document which revives a present recollection is not evidence and may not be shown to the jury by the party using it, but that opposing counsel has a right to inspect it and use it to test the credibility of the witness. Where the prosecuting attorney cross-examined the defendant in relation to a purported written statement, confession, or admission made by him and taken in connection with a coroner's inquest, it was held in *State v Sharp* (1954) 162 Ohio St 173, 55 Ohio Ops 88, 122 NE2d 684, that it was the duty of the trial court to order, on motion by the defense, the submission of such statement, confession, or admission to defense counsel for his inspection, the court relying on the rule that the defendant in a criminal case is not entitled to see and examine, before trial, a written statement, admission, or confession allegedly made by him, but if the prosecuting attorney, after proof that the confession in his possession was signed by the defendant, should offer it as evidence tending to establish proof of guilt or should examine a witness in relation thereto, it was the duty of the trial court to submit, upon demand, such confession to the defense for its inspection. See also *State v Yeoman* (1925) 112 Ohio St 214, 147 NE 3, wherein the court recognized the rule that if the prosecuting attorney, after proof that a confession in his possession was signed by the defendant, should examine a witness in relation to the confession, the defendant's counsel could then make a demand for the confession and would be entitled to inspect it. And in *State v Clark* (1930) 156 Wash 543, 287 P 18, the court, in upholding the denial of the production of the defendant's statement, pointed out that the prosecution did not make any use of the statement on the trial of the defendant.

n96 Where, during the cross-examination of a witness for the defense, the prosecuting attorney used a transcript of a conversation between the witness and the sheriff which was taken down by a stenographer, the court in *People v Carter* (1957) 48 Cal 2d 737, 312 P2d 665, held that it was error to deny the defendant's request to inspect the transcript used by the prosecuting attorney. The court said that the rule that the defendant in a criminal case can compel production when it becomes clear during the course of a trial that the prosecution has in its possession relevant and material evidence that is not confidential is applicable to a statement which the prosecution has used in impeaching the defendant's witness and which the defendant seeks to inspect for the purpose of rehabilitation. Noting that the prosecuting attorney might read to the jury extracts from the transcript selected with an eye to putting the witness in the worst possible light by emphasizing the gap between his prior statement and his present testimony, the court commented that it was clearly unfair to deny the defendant an opportunity to show that the extracts had been taken out of context and that when they were read with other parts of the statement the alleged inconsistency would disappear. The rule that the defendant is entitled to see statements of witnesses where they are used by the prosecution at the trial was also recognized in *Jackman v State* (1962, Fla App) 140 So 2d 627. In *State v Sharp* (1954) 162 Ohio St 173, 55 Ohio Ops 88, 122 NE2d 684, it was held that where a defense witness was cross-examined by the prosecuting attorney and asked questions relating to her purported written statement taken in connection with a coroner's inquest, and some of the questions and answers were exhibited and read verbatim from a transcript of her statement in the presence of the jury, defense counsel, on motion, was entitled to see and examine such statement. The court distinguished *State v Rhoads* (1910) 81 Ohio St 397, 91 NE 186, 27 LRA NS 558, wherein it was held that the defendant was not entitled to inspection of the transcript of a statement of a prosecution witness which had been used by the prosecuting attorney to refresh the memory of the witness. As ground for the distinction the court pointed out that in the Rhoads Case the statement in question was not read to lay the groundwork for possible impeachment of a defense witness on cross-examination, but was referred to by the prosecuting attorney to frame questions to

be propounded to a state witness on re-examination. Where, on cross-examination of a defense witness and in the presence and hearing of the jury, the prosecuting attorney exhibited to the witness a written statement given by him to the assistant state's attorney, and then proceeded to read portions of the statement and asked the witness if he had not made such statement, it was held in *Walton v State* (1965, *Tex Crim*) 386 SW2d 805, that the defendant was entitled, upon proper and timely request, to examine the statement of the witness used by the prosecuting attorney. The court noted that reversal would result, without any showing of injury, for denial of the defendant's timely request that he be permitted to inspect any document, instrument, or statement which was used in some way before the jury so as to make its contents an issue, such as where used by a witness to refresh his memory, or exhibited or read from, or used to question the witness in the jury's presence. In *Board v State* (1933) 122 *Tex Crim* 487, 56 SW2d 464, wherein it appeared that during the cross-examination of a defense witness the prosecuting attorney exhibited to the witness a prior written statement made by him, had it identified by him, and read portions thereof in the presence of the jury and asked questions relevant thereto, it was held error to deny the defendant's request for the production of the statement in its entirety at the time of the redirect examination of the witness. Noting that although the writing called for by the defendant was not a public document and not open to inspection of the defendant as a matter of right, such paper became subject to the defendant's demand for production when used before the jury by the prosecution in some way so as to make its contents an issue, the court, pointing out that the prosecution had asked questions relevant to the statement and had exhibited it by reading therefrom in the presence of the jury, said that such fact was equivalent to an introduction of that portion of the statement which the prosecuting attorney had read before the jury, and that under the circumstances the defendant had a right to examine the statement and introduce any of its contents tending to explain or qualify the portions read to the witness. Holding to the same effect is *Rutledge v State* (1923) 94 *Tex Crim* 231, 250 SW 698. See also *Sewell v State* (1963, *Tex Crim*) 367 SW2d 349, where the court, in rejecting the defendant's contention that his conviction should be reversed because the trial judge denied his request for the production of an offense report which had been used by a police officer in refreshing his memory before testifying for the prosecution, said that the failure to produce a prior statement of a witness which has not been used in some way before the jury will not result in reversal unless injury is shown or the defendant is deprived of the opportunity to show injury, but that where a statement or document which is used in some way before the jury so as to make its contents an issue, such as where used by a witness to refresh his memory, or exhibited or read from, or used to question the witness in the jury's presence, is not produced, on demand, for use by the defense, reversal will result without any showing of injury. The Texas rule that the defendant is entitled to inspection of a statement or document which has been used in some way by the prosecution before the jury so as to make its contents an issue was also recognized in *Tinker v State* (1923) 95 *Tex Crim* 143, 253 SW 531, *St. Clair v State* (1926) 104 *Tex Crim* 423, 284 SW 571, and *Erwin v State* (1961) 171 *Tex Crim* 323, 350 SW 2d 199.

n97 The trial court's refusal to permit defense counsel to examine an FBI record of alleged prior convictions of the defendant, which had been used by the prosecuting attorney upon cross-examination to refresh the recollection of the defendant as to his prior convictions, was held error in *People v Brown* (1956) 2 *App Div* 2d 202, 153 *NYS2d* 744, the court stating that the rule that the opposing counsel has the right to inspect a writing used by a witness to revive his recollection is applicable not only where the recollection of the witness is refreshed upon direct examination but also where a recollection is refreshed upon cross-examination.

n98 In *Bailey v State* (1963, *Tex Crim*) 365 SW2d 170, wherein it appeared that while a police officer was testifying on direct examination, the prosecuting attorney exhibited to him a certain document marked for identification as a state's exhibit, and the officer testified that the exhibit was a photograph of the victim of the alleged homicide lying on the kitchen floor in his house, and that after the prosecuting attorney had concluded his direct examination of the officer, counsel for the defendant requested permission to see the photograph for the purpose of identification and for cross-examination of the officer, it was held that the trial court committed error in refusing the defendant's request. Pointing out that when the exhibit was used by the prosecuting attorney before the jury in questioning the officer, its contents became an issue in the case, the court noted the rule that it

is reversible error to deny the demand of an accused for the production of any statement or document which has been used in some way before the jury whereby its contents have become an issue. The contention that because the officer did not use the exhibit to refresh his memory but only identified it, the defendant was not entitled to see and examine the exhibit, was rejected, the court pointing out that when the photograph was exhibited to the officer before the jury and he was questioned relative thereto its contents became an issue and the defendant then had the right to see and examine it.

n99 Where the prosecuting attorney was allowed to use a transcript of the testimony of a defense witness, which had been taken by and before the prosecuting attorney in his office some time prior to the trial, it was held in *Smith v State* (1957, Fla) 95 So 2d 525, that it was error not to permit the witness and the defendant's counsel to inspect the transcript before it was used by the prosecuting attorney. The testimony of a witness given before a state's attorney was said to fall in the same category as testimony taken before a committing magistrate, so that a transcript of the testimony taken before the state's attorney was not a paper or memorandum of private and unofficial nature. Where, on cross-examination of the defendant, the prosecuting attorney referred to a statement apparently furnished by the Federal Bureau of Investigation of the criminal record of the defendant, and thereupon the defendant's counsel requested permission to see and examine the document, the court in *State v Stephens* (1949) 168 Kan 5, 209 P2d 924, holding that it was error to refuse the request for examination of the document, said that the defendant's counsel should have been permitted to examine the document before it was shown to the defendant and any questions asked. In this connection, it should be noted that the discussion here is limited to the right of the defense, as distinguished from the right of a particular defense witness as such, to inspect a document or paper which is used by the prosecution during the trial. Accordingly, the treatment here does not purport to include cases dealing with the distinct question whether before a writing is to be used by the prosecution in its cross-examination of a defense witness (including the defendant as a witness) such writing must be shown to the witness for his inspection. As illustrative of cases excluded in this respect, see the following: Where the defendant's written statement made to a police officer and signed by him was admitted in evidence for the purpose of impeaching the defendant after it had been used by the prosecuting attorney in the cross-examination of the defendant, the court in *Washington v State* (1959) 269 Ala 146, 112 So 2d 179, concluding that the defendant was entitled to examine the statement before being questioned on the cross-examination concerning its contents, held that since the defendant was not permitted to see the statement in order to refresh his memory or to explain any inconsistency, the admission of the statement in evidence was error under the circumstances. The court noted that a witness is not bound to answer as to matters reduced to writing by himself or another and subscribed by him until after the writing has been produced and read or shown to him, and that if a statement written or signed by a witness or prior sworn testimony of a witness is to be introduced in evidence to impeach the witness, the statement must first be shown to the witness in order to allow him to refresh his memory and to explain any inconsistency. In *Dunn v State* (1964) 277 Ala 39, 166 So 2d 878, the court, noting that the rule had long been established in Alabama that a witness should not be required to answer as to matters reduced to writing by himself or another and subscribed by him until after the writing has been produced and read or shown to him, held that it was error for the trial court to deny the request of defense counsel to produce for examination by the defendant a statement signed by him from which he was being questioned by the prosecuting attorney during the course of his cross-examination. See also, as holding to the same effect, *Manning v State* (1928) 217 Ala 357, 116 So 360, *Kennedy v State* (1940) 240 Ala 89, 196 So 884, and *Moore v State* (1957) 39 Ala App 235, 97 So 2d 166. In *Parker v State* (1957) 266 Ala 63, 94 So 2d 209, it was held that although the document in question was not first shown to the defendant, there was no error in the trial court's permitting the prosecuting attorney to cross-examine from a paper that purported to be a written transcription of a tape-recorded statement made by the defendant to the police soon after the commission of the alleged offense, the court pointing out that the writing used by the prosecuting attorney was not a signed statement or sworn testimony given by the defendant, nor was it later introduced in evidence for the purpose of impeaching the witness.

n100 In *Bailey v State* (1931) 24 Ala App 339, 135 So 407, it was held that although during the

cross-examination of a witness for the defendant, the prosecuting attorney referred to "grand jury notes" in his possession in propounding questions to the witness, he was under no duty to turn such notes over to the defendant's counsel for inspection. The court said that the prosecuting attorney had the right to refer to such private memoranda in formulating questions on cross-examination of a defense witness; that the nature and character of the notes were such that the prosecuting attorney was under no duty to submit them to the defendant's counsel; and that, moreover, the point involved was legally within the discretion of the trial judge. In *Cochrane v State* (1936) 48 Ariz 124, 59 P2d 658, wherein it appeared that the defendant's confession made to the county attorney was taken down stenographically and transcribed, and the transcription was used as a memorandum by the county attorney in questioning a witness who had testified as to what the confession was, the court held that the defendant was not entitled to a copy of the transcript of the confession for use in the cross-examination of the witness. Noting that there was no effort to refresh the memory of the witness on the stand by the transcript, but it was merely used by the prosecuting attorney for the purpose of advising him what questions he should ask the witness, the court said that the law nowhere provides for the taking stenographically of confessions of defendant, and if it is done the notes are not evidence, although they may be used to refresh the memory of the stenographer in testifying to the confession, or by the county attorney as a memorandum in questioning persons who heard the confession, but they have no probative value whatever but are merely the private papers of the person or persons who take the pains and trouble of making them. It should be noted, however, that part of the opinion expressed in the last sentence above was disapproved in *Kinsey v State* (1937) 49 Ariz 201, 65 P2d 1141, 125 ALR 3 (a case not within the scope of the present annotation), wherein the court, in holding that memoranda of the defendant's statements made by a witness who had actually heard the statements were admissible in evidence where the witness testified to the accuracy of the memoranda, said that the holding in the *Cochrane* Case to the effect that memoranda of the defendant's confession were not evidence and did not have any probative value should not be followed insofar as it was in conflict with any conclusion reached in the present case. In *People v Salsbury* (1903) 134 Mich 537, 96 NW 936, wherein it appeared that the prosecuting attorney had in his possession notes of testimony taken before the grand jury, and from such notes he put questions to defense witnesses, but refused to exhibit them to the defendant's counsel, the court, pointing out that the notes in question were not of the character of a deposition or private writing, held that it was not necessary to show those notes either to the witnesses or defense counsel. In *Robinson v State* (1899, Tex Crim) 49 SW 386, it was held that where the prosecution attorney asked a reluctant witness leading questions by reading from a paper in his hand, there was no error in refusing to permit defense counsel to see the paper. The court said that where a witness on either side shows a reluctance to testify, the party who places him on the stand can ask him leading questions, and the fact that counsel asks questions by reading from a statement or memorandum does not change the rule. In *State v Tabet* (1951) 136 W Va 239, 67 SE2d 326, a prosecution for violation of the "numbers" statutes, wherein it appeared that during the course of the trial a police officer testified that when a raid was made at the place allegedly used by the defendant in the commission of the charged offense, he found some papers in that place, which were not identified in the record at that time, and he was then asked to examine an envelope presented to him and to see if its contents were those papers seized in that raid, and thereupon the defendant's counsel asked the court to grant permission to examine the contents of the envelope, but the request was denied on the ground that the prosecuting attorney had informed the trial court that the envelope had not been, and would not be, tendered in evidence, the court, upholding the ruling of the trial court, held that since the envelope with its contents was not introduced into the evidence, the prosecution could not be required to present it to the defendant for inspection.

n101 In *State v Gillman* (1962, Mo) 354 SW2d 843, it appeared that when the prosecuting attorney handed to a witness on the stand a state's exhibit which had been marked for identification and asked him to identify it, the defendant's attorney objected and requested permission to see the exhibit before it was handed to the witness, but the trial court overruled the objection, stating that the exhibit was not then being offered but was being identified. Noting that after the exhibit was identified by the witness, it was then shown to the defendant's attorney, and thereafter was offered in evidence and admitted, the court held that there was no abuse of the trial court's discretion in refusing to allow the defendant's attorney to see the exhibit before it was handed to the

witness for identification.

n102 For a later California case apparently taking a contrary view, see *People v Carter (1957) 48 Cal 2d 737, 312 P2d 665*, supra.

n103 Where, during the cross-examination of a witness for the defense, the prosecuting attorney used an unsigned and unapproved report made by a third person of statements of the witness which were contradictory of the witness' testimony given at the trial, it was held in *People v Singh (1934) 136 Cal App 233, 28 P2d 416*, that there was no error in refusing to compel the prosecution to submit the documents to the defendant's attorney for inspection. The court noted that extrajudicial statements made by a third party without the signature or approval of the witness are not themselves evidence with which to impeach him. Where, in asking the defendant questions for impeachment purposes, the prosecuting attorney used a typed statement which had previously been made by the defendant and taken down by a stenographer, but had not been signed by the defendant, and thereupon defense counsel requested that he or the defendant be allowed to examine the paper before any questions were propounded, it was held in *People v Sherman (1950) 97 Cal App 2d 245, 217 P2d 715*, that the refusal to submit the statement for inspection by the defense was not error. The court relied on *People v Singh (1934) 136 Cal App 233, 28 P2d 416*, supra. The failure of the prosecution to hand the defendant his prior statements for examination before they were read in court to impeach him was held not error in *People v Bjornsen (1947) 79 Cal App 2d 519, 180 P2d 443*, where it appeared that the defendant did not ask for such examination of the statements and that the statements were not signed by him. The court noted that the rule that written statements must be shown to a witness before any question is put to him concerning them applies only to written statements signed by the witness, and not to unsigned memoranda or statements made by other persons. In *People v Meadows (1930) 108 Cal App 67, 291 P 226*, it was held not error for the trial court to refuse to require the prosecution to furnish the defendant with a copy of a typewritten transcription of shorthand notes made by a stenographer at an interview between the defendant and the district attorney, even though the typewritten transcription was used by the district attorney in propounding questions to the stenographer in an effort to impeach the testimony of the defendant as to certain alleged statements made by him at the interview. In *People v Haughey (1926) 79 Cal App 541, 250 P 406*, wherein a police officer testified, to impeach the defendant, from his recollection of the defendant's oral statements made to him, the court, in rejecting the defendant's contention that no proper foundation for the impeachment was laid, held that even though the defendant's oral statements were taken down in writing by the officer, the prosecution was not required to produce such writing as the foundation for the impeachment, since it was neither signed nor approved by the defendant.

n104 It should be noted that admissibility in evidence is not a prerequisite to discovery under the influential Federal Rules of Civil Procedure. See *Am. Jur. 2d, Depositions and Discovery § 158*.

n105 In some earlier California cases a contrary view was taken. See, for example, *People v Santora (1942) 51 Cal App 2d 707, 125 P2d 606*, infra § 17. A contrary view was also apparently taken in *Schindler v Superior Court of Madera County (1958) 161 Cal App 2d 513, 327 P2d 68*, infra § 16[h]. But this case was disapproved in *People v Garner (1961) 57 Cal 2d 135, 18 Cal Rptr 40, 367 P2d 680*, cert den *370 US 929, 8 L ed 2d 508, 82 S Ct 1571*, infra § 16[h].

n106 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with whether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, infra.

n107 The Arizona Rule referred to above is not the exclusive authority for discovery and inspection, since documents or objects which are not subject to inspection under this rule may still be produced for inspection by the defense under the inherent residual power of the court to permit discovery when necessary in the due administration of justice. See *State ex rel. Polley v Superior Court of Santa Cruz County (1956) 81 Ariz 127, 302*

*P2d 263*, infra § 13[a]; *State ex rel. Helm v Superior Court of Cochise County (1961) 90 Ariz 133, 367 P2d 6*, infra § 21[e]; *State v McGee (1962) 91 Ariz 101, 370 P2d 261*, cert den *371 US 844, 9 L ed 2d 79, 83 S Ct 75*, infra § 13[b]; *State v Wallace (1965) 97 Ariz 296, 399 P2d 909*, infra § 17.

n108 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, infra.

n109 The 1965 amendment has boradened the scope of discovery, extending it to such items as written reports of autopsies, ballistics tests, fingerprint analyses, handwriting analyses, blood, urine, and breath tests, and written reports of physical or mental examination of the defendant or the alleged victim by a physician, dentist, or psychologist made in connection with the particular case.

n110 In Delaware pretrial discovery by a defendant in a criminal case is limited to matters which are discoverable under the rule referred to above. *State v Winsett (1964, Del) 200 A2d 237*. Holding to the same effect by implication is *State v Thompson (1957) 50 Del 456, 134 A2d 266*, infra.

n111 Rule 17 relates to the form and issuance of a subpoena, and subsection (c) thereof provides that the court may direct that books, papers, documents or objects designated in the subpoena be produced before the court at the time prior to the trial or prior to the time when they are to be offered in evidence and may upon their production permit the books, papers, documents or objects or portions thereof to be inspected and copied by the parties and their attorneys.

n112 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, infra.

n113 The primary purpose of the Florida statute above is to furnish a defendant with information that will enable him to better prepare his defense. *Perez v State (1955, Fla) 81 So 2d 201; Belger v State (1965, Fla App) 171 So 2d 574*. In 1963 Florida adopted another statute (§ 925.05) providing that where a person is charged with an offense, upon motion of such person, the court shall order the prosecuting attorney to permit him to inspect written or recorded statements or confessions made by him, whether signed or unsigned. This statute, however, is not involved or discussed in any of the following cases.

n114 Subsequent to this decision Florida adopted a statute authorizing discovery of a defendant's confessions or statements. See footnote 12, supra.

n115 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, infra.

n116 This provision was repealed in 1963. However, an analogous, although not identical, provision may be found in Chapter 38 § 114-10, of the 1963 Illinois Revised Statutes.

n117 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, infra.

n118 The main objectives of Rule 728 are to assist the defendant in preparing his defense, and to protect him from surprise. *Mayson v State (1965) 238 Md 283, 208 A2d 599*.

n119 It should be noted that this annotation does not purport to treat statutory law except to the extent that it

is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, *infra*.

n120 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, *infra*.

n121 In concluding that under the circumstances its judicial discretion must be exercised by denying to the defendant the opportunity to inspect the statements, the court in the Echevarria Case above relied on *State v Tune (1953) 13 NJ 203, 98 A2d 881*, *infra* § 13[b] (a case decided prior to the adoption of New Jersey Rule 3:5-11). It should be noted, however, that at least part of the holding in the Tune Case was in conflict with the holding in *State v Johnson (1958) 28 NJ 133, 145 A2d 313*, *supra*.

n122 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, *infra*.

n123 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, *infra*.

n124 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, *infra*.

n125 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, *infra*.

n126 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, *infra*.

n127 It should be noted that this annotation does not purport to treat statutory law except to the extent that it is reflected in reported cases within the scope of the annotation. For cases dealing with wether statutes or rules authorizing discovery in civil proceedings are applicable in criminal cases, see § 12, *infra*.

n128 For cases involving specific provisions for discovery in Missouri criminal proceedings, see § 11[f], *supra*.

n129 It should be noted that subsequently to the Cala and Regedanz Cases above it seems to have been settled in Ohio that the Ohio Code of Civil Procedure providing for inspection of books and documents is not applicable to criminal cases. See *State v Corkran (1965) 3 Ohio St 2d 125, 32 Ohio Ops 2d 132, 209 NE2d 437*, *supra*.

n130 The treatment here includes transcriptions or recordings of conversations had by an accused after the alleged offense.

n131 As to whether the refusal to permit an accused to inspect his confession before trial or the suppression by the prosecution of his statement violates his constitutional rights, see § 4, *supra*.

n132 This rule is treated in § 11[a], *supra*.

n133 In this case the prosecuting attorney's refusal to exhibit to the defendant's attorney written statements alleged to have been made by the defendant was held not error, the court stating that the defendant's own statement was of no conceivable value to him, and that he must have known what was contained therein.

n134 The treatment here includes transcriptions or recordings of conversations had by an accused after the alleged offense.

n135 It should be noted that while the stated reason for the production of the defendant's statements in this case was that an inspection was necessary in order that the mental condition of the defendant at the time the statements were made might be determined, this fact was not taken into consideration by the court in upholding the denial of the motion. In this connection, compare this case with *Cramer v State (Neb) infra*.

n136 As to the New Jersey statutory rule, subsequently adopted, see § 11[g], *supra*.

n137 It should be noted that the holding in the Tune Case above that a defendant is not entitled to inspection of his confession merely because he may not recall its contents is in conflict with, at least to some extent, the later decision in *State v Johnson (1958) 28 NJ 133, 145 A2d 313*, *supra* § 11[g], wherein it was held that the fact that a defendant does not recall his statement with sufficient detail to satisfy his counsel that he cannot fairly go to trial without it entitles him to an inspection of the statement in the absence of a showing by the state that inspection will improperly hamper the prosecution.

n138 The court referred to *People v Quarles (1964) 44 Misc 2d 955, 255 NYS2d 599*, and *People v Abbatiello (1965) 46 Misc 2d 148, 259 NYS2d 203*, both *supra* § 13[a].

n139 The treatment here includes transcriptions or recordings of conversations had by an accused after the alleged offense.

n140 It should be noted that subsequent to the Kupis Case above, Delaware adopted a statute permitting inspection by the defendant of his confession or statement. See § 11[b], *supra*.

n141 It should be noted that subsequent to the Witham Case above, Tennessee adopted a statute permitting inspection by the defense of confessions or admission against interest made by a person charged with a crime. See § 11[h], *supra*.

n142 The treatment here includes transcriptions or recordings of conversations had by an accused after the alleged offense.

n143 In view of the Louisiana decisions discussed in the text above, the following earlier Louisiana decision may be considered as no longer authoritative in this jurisdiction to the extent that it is contrary to the others. In *State v Dallao (1937) 187 La 392, 175 So 4*, app dismd and cert den *302 US 635, 636, 82 L ed 494, 495, 58 S Ct 48, 51*, reh den *302 US 776, 777, 82 L ed 601, 58 S Ct 137, 138, 139*, it was held not error for the trial judge to refuse to permit the defendant to inspect statements, reports, confessions, and documents alleged to be in the possession of the police department. The court said that so far as the documents called for were public in character, the defendant was not entitled to their inspection until they had been used in open court, and in so far as they were of a private nature, he was not entitled to their inspection until they were offered in evidence.

n144 The accused's documents, books, or papers which were used or directly involved in the commission of the alleged offense are separately treated in § 24, *infra*.

n145 Treated here are letters either written to or received by an accused.

n146 The accused's documents, books, or papers which were used or directly involved in the commission of

the alleged offense are separately treated in § 24, *infra*.

n147 Cases dealing with a report made by a police or investigating officer in connection with the case are separately treated in § 17, *infra*.

n148 It should be noted that the discussion here does not purport to cover the question whether a defendant is entitled to inspect a statement of a prosecution witness for purposes of cross-examination or impeachment, since this question is treated in a separate annotation. See 7 A.L.R.3d 181.

n149 The view that ordinarily an accused is entitled to inspect statements of a prosecution witness was taken in *State v Tippett (1927) 317 Mo 319, 296 SW 132*, where the court, in holding that the defendant had a right to inspect a statement previously made by a prosecution witness, observed that the general rule denying the inspection of documents in the hands of an adverse party had been greatly relaxed in modern cases; that the cases seemed to hold that it is a matter of indifference whether the requested document may be of actual benefit to the party filing the motion to inspect; that if from the motion the document may be material, the right of inspection obtains; and that in the present case the motion showed that the statement might be material. However, this case was overruled in *State ex rel. Missouri P.R. Co. v Hall (1930) 325 Mo 102, 27 SW2d 1027* (a case not within the scope of this annotation because involving a plaintiff's motion for discovery in a civil case), wherein the court, in holding that the trial court exceeded its jurisdiction in granting the plaintiff's motion for discovery in the case, adopted the view that ordinarily the defendant in a criminal case is not entitled to inspection of documents in the possession of the prosecution.

n150 Such statements as described above are distinguished from statements of witnesses taken before a magistrate. See *Jackman v State (1962, Fla App) 140 So 2d 627*, *infra* § 19.

n151 Cases dealing with a report made by a police or investigating officer in connection with the case are separately treated in § 17, *infra*.

n152 Cases dealing with a report made by a police or investigating officer in connection with the case are separately treated in § 17, *infra*.

n153 Since the discussion here is based on the assumption that a particular police report, police record, or investigation file sought by the defense is in the possession or under the control of the prosecution at the time of the request for its production, cases wherein such a report or document was not shown to be in the possession or under the control of the prosecution are beyond the scope of this annotation. As illustrative of cases excluded, see *Commonwealth v Friday (1952) 171 Pa Super 397, 90 A2d 856*, wherein the denial of the defendant's request for production of the entire file of records and papers relating to the present case lodged in certain barracks of the state police was upheld on the ground that the prosecuting attorney did not have custody or control of reports of investigations made by the state police and could not, without the consent of the police commissioner, produce them or reveal their contents. Likewise excluded are cases dealing with the accused's right to inspection of an FBI investigation report which was not shown to have been released to the prosecution prior to the request for its production. For examples of such cases, see § 1[a], footnote 10.

n154 In this connection, it should be noted that questions as to the defendant's right to inspect a statement of a prosecution witness for purposes of cross-examination or impeachment are not within the scope of this annotation.

n155 The particular document or material involved in each case is described in parentheses after the citation of the case.

n156 This statute provides: "The magistrate or his clerk must keep the depositions taken on the information or the examination, until they are returned to the proper court; and must not permit them to be examined or

copied by any person except a judge of a court having jurisdiction of the offense, or authorized to issue writs of habeas corpus, the attorney-general, district attorney, or other prosecuting attorney, and the defendant and his counsel; provided however, upon demand by defendant or his attorney the magistrate must order a transcript of the depositions taken on the information, or on the examination, to be immediately furnished said defendant or his attorney. . . ."

n157 In this connection, attention is called to § 902.11 of the Florida statutes (this provision was not referred to in the Jackman Case above), which provides that if the testimony of witnesses at a preliminary examination is reduced to writing at the request of the prosecuting attorney, a copy of such testimony shall be furnished free of cost to the defendant or his counsel.

n158 It should be noted that cases wherein a transcript or report of the coroner's inquest was not shown to be in the possession or under the control of the prosecution are not within the scope of this annotation. As illustrative of cases excluded, see the following: In *Daly v Dimock* (1887) 55 Conn 579, 12 A 405, it was held that the defendant had a right to inspect all the papers composing a coroner's return after it had been filed with the clerk of the Superior Court, including all the testimony of witnesses examined before him. In *Poyner v Commonwealth* (1938) 274 Ky 813, 120 SW2d 649, it was held that the statute providing that the coroner should commit to writing the substance of evidence taken at an inquest and return it to the office of the clerk of the Circuit Court of the county did not require that the testimony so taken at the inquest should be furnished to the accused.

n159 Since the discussion here is based on the assumption that the report of an autopsy or post-mortem examination sought by the defendant is in the possession or under the control of the prosecution, cases wherein such a report was not shown to be in the possession or under the control of the prosecution are beyond the scope of this annotation. As illustrative of cases excluded, see the following: In *Walker v Superior Court of Mendocino County* (1957) 155 Cal App 2d 134, 317 P2d 130, the court, stating that an autopsy report is a record that the coroner is required to keep and is therefore a public record which a citizen may inspect, held that the defendant was entitled to receive, prior to trial, a copy of a report concerning the autopsy performed on the body of the victim of the homicide which was in the possession of the coroner, where the defendant's request for such a copy was previously denied by the coroner. In *Schindler v Superior Court of Madera County* (1958) 161 Cal App 2d 513, 327 P2d 68, disapproved on another point in *People v Garner* (1961) 57 Cal 2d 135, 18 Cal Rptr 40, 367 P2d 680, cert den 370 US 929, 8 L ed 2d 508, 82 S Ct 1571, the defendant's motion for an order allowing him to inspect a report of the autopsy performed on the victim of the homicide was held properly denied, since the defendant did not first make a request of the coroner for such inspection. The court said that, presumably, if such request had been made of the coroner, it would have been granted, and that without first making such a request, the defendant's motion to inspect should be denied.

n160 It should be noted that cases wherein a report of the kind under consideration was not shown to be in the possession or under the control of the prosecution are not within the scope of this annotation. As illustrative of cases excluded, see *People v Saccoia* (1934) 268 Mich 132, 255 NW 738, wherein it was held that reports relating to an examination into the sanity of an accused and made by a psychopathic clinic or a sanity commission which was a public body authorized by statute to be created by a court to aid in the performance of its public functions were subject to inspection by the accused.

n161 Arizona Rule 195 referred to above is treated in § 11[a], supra.

n162 Cases involving a photograph of fingerprints are treated in § 22[e], supra.

n163 The holding in the Marshall Case above that the Nebraska civil statute providing for discovery and inspection of books and papers was applicable to criminal cases was disapproved in *Hameyer v State* (1947) 148 Neb 798, 29 NW2d 458, supra § 12.

Admissibility in evidence of item, necessity for showing of § 10[a]  
Affidavits, inspection of § 27[a]  
After verdict is returned as proper time for inspection § 9[d]  
Age of accused, consideration of § 10[b]  
Alcohol, inspection of § 25[d]  
Alcohol test, inspection of results of §§ 18, 21[e]  
Analysis of nonmedical nature, inspection of § 22  
Approval of statement by defendant or witness who allegedly made it, necessity for showing of § 9[c]  
Arrest sheet of police officer, inspection of § 17  
Arson, inspection in prosecution for § 17  
Assault and battery, inspection in prosecution for § 25[a]  
Automobile, inspection of §§ 3, 11[b], 25[a]  
Autopsy reports, inspection of §§ 3, 4[b], 5[a], 8, 10[b], 11[b, g], 21, 23  
Background § 2  
Bad faith of prosecution as affecting right to inspection §§ 4[b], 6[a], 8  
Ballistics reports, inspection of §§ 3, 4[b], 6[a], 11[b, c], 22[b]  
Bank deposits, inspection of § 24[a]  
Bed records, inspection of § 21[a]  
Bill of particulars, accused's motion for § 3  
Bills of sale, inspection of § 12  
Blanket request for production of prosecution's evidence, denial of § 7  
Bloodstains, inspection of § 3  
Blood tests, inspection of §§ 4[a], 5[a], 10  
Blunt instrument, inspection of § 25[a]  
Body. Human body, infra  
Books, inspection of §§ 6[b], 7, 11[a, c, e, g, i], 12, 13[c], 24  
Breath test, inspection of § 11[b]  
Bribery, accused's right of inspection in prosecution for § 24[a]  
Broken glass, inspection of § 25[a]  
Bullets, inspection of §§ 3, 4[b], 5[a], 25[a, b]  
Burden of showing proper cause for inspection or of designating specific evidence §§ 7, 13, 17  
Burglary prosecution, accused's right of inspection in §§ 14, 25[a]  
Business records of defendant, inspection of § 3  
Call girls, inspection of police records of § 17  
Canes, inspection of § 7  
Capsules of narcotics, inspection of § 25[d]  
Cause for inspection, burden of showing § 7  
Charts, discovery of § 21[a]  
Checks, inspection of § 6[b]  
Chemical analysis reports, inspection of §§ 3, 10[a], 11[g], 18, 21, 22  
Chemical experiments, accused's right to inspection for purpose of § 3  
Civil statutes or rules of procedure relating to discovery, applicability of §§ 12, 17  
Clinical records, inspection of § 21[a]  
Clothing, inspection of §§ 3, 4[b], 6[a], 25[a-c]  
Codefendant, inspection of statement or confession of §§ 11[b], 16[b]  
Collateral matters, inspection of statements relating to § 8  
Comment § 2  
Committing magistrate, defendant's right to transcript of evidence taken before § 19

Comparison of handwriting, inspection of writing to be used for § 24

Confessions --

-accomplice or co-defendant, inspection of confession of §§ 4[b], 6[a], 10[a], 11[b, c, i], 13[b], 16[b, c]

-defendant's confession, inspection of §§ 3, 4[a], 5[a], 7, 8, 9[c], 11[b-e, g, h], 13, 18

Conspiracy prosecution, accused's right of inspection in §§ 6[a], 14

Constitutional rights, denial of inspection as violation of §§ 4, 8, 9[a], 13[d], 15[a], 16[c], 17, 22[b], 25[c]

Conversation of accused made or had before or during offense, inspection of § 14

Coroner's inquest, inspection of transcript or report of § 20

Corpse of victim, inspection of §§ 3, 5[a], 8, 26

Criminal statutes or rules of criminal procedure, inspection under § 11

Cross-examination, inspection of writing used for purpose of § 1[a]

Daybook of police department, inspection of entries made in § 9[d]

Deeds, inspection of § 12

Delay in trial, inspection for purposes of avoidance of §§ 8, 25[c]

Dentist, inspection of results of examination made by § 11[b]

Designation of specific evidence, accused's burden with respect to § 7

Desk book of police department, inspection of photostatic copies of entries made in § 9[d]

Diagrams of scene of alleged offense, inspection of § 8

Diary of defendant, inspection of §§ 3, 15 [b]

Dirt samples, inspection of § 25[a]

Discovery statutes, applicability to criminal trials of § 3

Discretionary power of trial court to permit inspection §§ 4[a], 5[a], 6[a], 7, 8, 9[c], 11[g], 13[a-c], 16[a], 21[b], 22[a], 24, 25[a, b], 26

Documents, inspection of §§ 3- 7, 9[b-d], 11[a-c, e-g], 12, 13[c, d], 16[b], 17, 21[a], 24, 27[a]

Door of building, inspection of § 25[a]

Due process of law, applicability of principle of §§ 4, 6[a], 8, 9[a], 15[a], 16 [c], 22[b], 25[c]

Dying declaration of victim, inspection of § 9[c]

Dynamite caps, inspection of § 25[a]

Electronic eavesdropping device, discovery of evidence obtained by §§ 7, 13[c, d], 16[a]

Embezzlement prosecution, inspection in §§ 6[b], 11[c], 24[a]

Engineer's reports, inspection of § 22[a]

Examination --

-defendant, inspection of report of examination of § 21[d]

-fingerprint examination, inspection of § 22[e]

-nonmedical nature, inspection of examination of § 22

-police officers' examination papers, inspection of § 24[b]

-post mortem examination, inspection of report of § 21[b]

-rape victim, inspection of examination of § 21[c]

Experiments of nonmedical nature, inspection of § 22

Expert witnesses, inspection of reports of § 6[a]

Exploratory purposes, prohibition of inspection for §§ 7, 13[a], 16[a], 25[a]

Extortion prosecution, accused's right of inspection in §§ 6[a], 14, 16[a], 24[a]

Factual basis of motion for production of prosecution's evidence, necessity for § 7

Fair trial, inspection as being in interest of §§ 8, 13[a, d], 14, 16[a]

False pretenses, accused's right of inspection in prosecution for §§ 22[a], 24[a]

Favorable evidence, inspection of § 8

FBI reports, inspection of §§ 7, 9[c], 10[b], 22[a]

Fiber insulation from automobile, inspection of § 3

Files --

-police files, inspection of §§ 9[b], 17

-prosecuting attorney, inspection of file of § 18  
 Fingerprint examination, inspection of §§ 4 [a], 5[a], 6[a], 11[b, c], 22[b, e]  
 Fire marshal, inspection of report of §§ 8, 17  
 Fishing expedition, prohibition of §§ 7, 13 [a], 16[a], 25[a]  
 Forgery prosecution, accused's right of inspection in §§ 6[a], 17, 24  
 Furniture, inspection of § 25[a]  
 Fuse, inspection of § 25[a]  
 Gambling prosecution, accused's right of inspection in §§ 9[c], 11[c], 24[a]  
 General considerations §§ 3- 12  
 Glass, inspection of piece of § 25[a]  
 Good or bad faith of prosecution as affecting right to inspection §§ 4[b], 6[a], 8  
 Grand jury, inspection of documents presented before § 5[a]  
 Grand theft, accused's right of inspection in prosecution for § 17  
 Guns, inspection of §§ 3, 5[a], 16[a], 25[a, b]  
 Hair, inspection of § 3  
 Handwriting --  
 -expert's analysis of handwriting, inspection of §§ 6[a], 11[b], 22[c]  
 -writing used for comparison with handwriting, inspection of § 24  
 Highway patrol, inspection of statements recorded by § 5[a]  
 Homicide prosecution, accused's right of inspection in §§ 3, 4, 5[a], 7- 12, 13[c], 15- 17, 20- 23, 25[a-c], 26  
 Hospital reports, inspection of §§ 4[b], 8, 11[g], 12, 18, 21  
 Hotel bills, inspection of § 15[b]  
 Human body --  
 -article taken from human body, inspection of § 6[b]  
 -fluids from human body, inspection of § 7  
 -parts, organs or tissues removed from human body, inspection of §§ 3, 5[a], 10[a], 21[b], 26  
 -victim, inspection of human body of §§ 3, 5[a], 8, 26  
 Identification, inspection of requested item when marked for § 9[c]  
 Identity of informer, exclusion of cases dealing with question as to accused's right to disclosure of § 1[a]  
 Impeachment, inspection of evidence for purpose of § 1[a]  
 Instruments used in alleged abortion, inspection of §§ 8, 25[a]  
 Interest of justice as warranting right to inspection §§ 8, 13[b], 16[a], 25[a, c]  
 Intoxicating liquor, accused's right of inspection in prosecution for illegal sale of § 7  
 Introduction §§ 1, 2  
 Investigation reports, inspection of §§ 3, 4[a], 6[a], 7, 11[b], 13[b], 17, 18, 22  
 Jurisdiction of court to permit inspection § 5  
 Justification for inspection, accused's burden with respect to § 7  
 Keys to car, inspection of § 25[a]  
 Knife, inspection of §§ 3, 5[a]  
 Laboratory reports, inspection of §§ 3, 4[b], 11[g], 21, 22  
 Lead slug, inspection of § 25[a]  
 Lease, inspection of § 24[a]  
 Letters, inspection of §§ 4[b], 7, 9[b, c], 11[c-i], 12, 13[a-c], 15[a]  
 Liberal discovery in criminal cases, trend in favor of § 3  
 Lie detector test, inspection of results of §§ 4[a], 11[b], 22[d]  
 Liquor, inspection of §§ 7, 25[d]  
 Lottery ticket, inspection of § 11[c]  
 Machine, inspection of § 12  
 Manslaughter prosecution, accused's right of inspection in §§ 5[a], 8, 21[b, e]  
 Maps, inspection of § 12

Marking item for identification, inspection at time of § 9[c]  
 Materiality of requested evidence, accused's burden as to showing of §§ 7, 8, 9[c], 11 [b], 13[c], 16[a], 17  
 Medical reports, inspection of §§ 4[b], 5 [a], 6[a], 8, 11[b], 18, 20, 21  
 Memorandum --  
 -oral statement, inspection of memorandum relating to § 13[d]  
 -person other than accused, inspection of memorandum of § 16[a]  
 -prosecuting attorney, inspection of memorandum of § 18  
 Men's shorts, inspection of §§ 4[b], 25[c]  
 Mental examination --  
 -inspection of report of §§ 11[b], 21[d]  
 -physician's use of confession for purpose of § 13[c]  
 Metal door of building, inspection of § 25[a]  
 Mirror on automobile, inspection of § 25[a]  
 Miscellaneous factors affecting right to inspection § 10  
 Mortgages, inspection of § 12  
 Motion pictures, inspection of §§ 3, 23  
 Murder prosecution, inspection in §§ 3, 4, 5[a], 7- 12, 13[a-c], 15- 17, 20- 23, 25 [a-c], 26  
 Narcotics prosecution, accused's right of inspection in §§ 6[a], 16[a], 22[a], 25 [d]  
 Necessity of inspection, showing of § 13[b]  
 Negligent operation of motor vehicle, accused's right of inspection in prosecution for §§ 12, 21[b, e], 22[a]  
 New trial, inspection at time of § 9[e]  
 Nondocumentary evidence, inspection of § 27[a]  
 Nonmedical reports, inspection of § 22  
 Notebook, production of § 8  
 Notes. Memorandum, supra  
 Numbers statutes, accused's right of inspection of prosecution for violation of § 9[c]  
 Objects used or directly involved in commission of offense, inspection of § 25  
 Offense --  
 -inspection of accused's confession or statement made subsequent to § 13  
 -inspection of accused's statement or conversation made or had before or at time of § 14  
 -police report of offense, inspection of §§ 9[c], 11[f], 17  
 Offering of item into evidence, inspection at time of § 9[b, c]  
 Oral statement, inspection of notes and memoranda relating to § 13[d]  
 Organ of body --  
 -inspection of --  
 -generally §§ 10[a], 26  
 -chemical analysis § 21[b]  
 Other kinds or types of evidence, inspection of § 27  
 Pandering prosecution, accused's right of inspection in § 17  
 Paraffin test, inspection of results of §§ 3, 22[a]  
 Particular kinds or types of evidence, inspection or disclosure of §§ 13- 27  
 Particular stages of proceedings, inspection at § 9  
 Parts of human body, inspection of §§ 3, 5[a], 10[a], 21[b], 26  
 Pellets, inspection of § 3  
 Perjury prosecution, accused's right of inspection in § 13[c]  
 Photographs, inspection of §§ 3, 5[a], 9[c], 11[c], 12, 16[a], 22[e], 23, 25[a]  
 Photostatic copies, inspection of §§ 9[d], 24  
 Physical examination, inspection of results of § 11[b]  
 Physical or tangible objects used or directly involved in commission of offense, inspection of § 25  
 Physician's reports, inspection of §§ 4[b], 5[a], 6[a], 8, 11[b], 18, 20, 21

Pistols, inspection of §§ 16[a], 25[a, b]  
Place of alleged offense, inspection of § 25[a]  
Police reports, inspection of §§ 4[a], 7, 9 [c], 11[b], 13[d], 16[a], 17, 18  
Polygraph tests, inspection of §§ 4[a], 11 [b], 22[d]  
Portions of writing offered into evidence, effect of § 9[c]  
Post mortem examination, inspection of report of §§ 10[a], 21[b]  
Power and jurisdiction of court to permit inspection § 5  
Practice pointers § 2[b]  
Prefatory matters § 1  
Preliminary hearing, inspection at time of §§ 9[a], 19  
Premises, inspection of §§ 5[b], 25[a]  
Prior convictions of defendant, inspection of alleged record of § 9[c]  
Proper cause for inspection, accused's burden of showing § 7  
Prosecuting attorney's notes, memorandum, file, or "work product," inspection of § 18  
Protection of constitutional rights, inspection for purpose of § 8  
Psychiatric report, inspection of §§ 4[b], 5 [b], 9[d], 11[g], 21  
Psychiatrist, use of defendant's confession by § 13[c]  
Psychologist's examination, inspection of § 11[b]  
Public policy as compelling discovery § 13[c]  
Radar equipment, inspection of § 27[a]  
Radio log book of police department, inspection of entries made in § 9[d]  
Rape prosecution, accused's right of inspection in §§ 5[b], 7, 15[a], 21[c], 22[d], 25[c]  
"Real" evidence, inspection of § 25[a]  
Receipts of town treasurer, inspection of § 24[a]  
Recordings, inspection of §§ 3, 5[a], 6[a], 8, 13[a, d], 14, 16[a], 18  
Refreshing recollection, inspection for purpose of §§ 9[c], 13[a]  
Related matters § 1[b]  
Relaxation of rule denying defendant right to inspection § 3  
Relevancy of requested evidence, accused's burden as to showing of §§ 7, 8, 9[c], 17  
Reports, inspection of §§ 3, 7, 9[b], 12, 13 [a, b], 16, 17, 20, 21[c, d], 22  
Revolver, inspection of §§ 16[a], 25[a, b]  
Rifles, inspection of § 3  
Robbery prosecution, accused's right of inspection in § 23  
Rugs, inspection of § 25[a]  
Rules of procedure relating to discovery --  
-civil procedure rule, admissibility under § 12  
-criminal procedure rule, admissibility under §§ 11, 16[b]  
Safe, inspection of § 25[a]  
Safe breaking, accused's right of inspection in prosecution for § 22[a]  
Samples of handwriting, inspection of § 24[b]  
Scientific records, inspection of §§ 11[g], 21, 22  
Scope of annotation § 1[a]  
Search warrant, inspection of § 27[a]  
Semen stains, inspection of § 11[c]  
Shells, inspection of §§ 11[b], 25[b]  
Shirt, inspection of § 25[a]  
Shoes, inspection of § 6[a]  
Shorts, inspection of §§ 4[b], 25[c]  
Side view mirror of automobile, inspection of § 25[a]  
Signature of statement by defendant, necessity for § 9[c]

Slides, inspection of §§ 5[a], 23  
Souvenirs, inspection of § 15[b]  
Specific evidence, necessity for designation of § 7  
Specimens removed from human person, inspection of § 26  
Speeding prosecution, accused's right of inspection in § 17  
State crime investigation agency, inspection of reports of §§ 3, 4[a], 6[a], 17, 22  
Statements --  
-accomplice, inspection of statements of §§ 4[b], 6[a], 10[a], 11[b, c, i], 13[b], 16[b, c]  
-accused, inspection of statements of §§ 3 [a], 4[a], 5[a], 7, 8, 9[b, c], 10[b], 11[a-e, g, h], 13, 14, 18  
-co-defendant, inspection of statement of § 16[b]  
-witnesses, inspection of statements of §§ 3, 4[a], 5[a], 6[a], 7, 8, 9[c], 11 [b, f, g], 16, 18

ARTICLE OUTLINE

**ARTICLE:** [\*I] Introduction

[\*1] Scope; related questions

This annotation supersedes that in *92 A.L.R. 475*.

Annotations on questions of general interest in connection with the subject herein annotated are listed below.n1

Cases involving the admissibility of evidence or testimony as to "gouge" marks, made by metal portions or parts of the automobile, present a factual situation different from that concerning tires or skid marks and are not exhaustively discussed or cited herein. See, in this connection, *Southern Oxygen Co. v. Martin (1942) 291 Ky 238, 163 SW2d 459*, in which it was held that there was no error in permitting certain witnesses to testify as to scars and gashes they observed the following day in the highway at the scene of the accident, the court pointing out that the marks on the road described by these witnesses were not of the fleeting nature of the imprint of a tire in dirt, but were of a rather permanent character made by steel instruments gouging into the blacktop road.

Also of the excluded type is *Whitfield v. Debrincat (1942) 50 Cal App2d 389, 123 P2d 591*, an action to recover for damages resulting from the collision of automobiles driven by plaintiff and defendant, where both parties contended that the other was driving on the left-hand side of the center line of the road, in which it was held that the trial court did not commit error in overruling an objection by defendant to a question asked of plaintiff's witness as to where a certain "gouge" in the road near the white post commenced.

The discussion is limited to the admissibility of evidence as to tire or skid marks as an original matter, to the exclusion of questions as to the admissibility of such evidence in the course of cross-examination of a witness in view of the scope and effect of the direct examination.

Admissibility and Weight of Fingerprint Evidence Obtained or Visualized by Chemical, Laser, and Digitally Enhanced Imaging Processes, *110 A.L.R.5th 213*

Products liability: admissibility of experimental or test evidence to disprove defect in motor vehicle, *64 A.L.R.4th 125*

Automobiles: Sudden emergency as exception to rule requiring motorist to maintain ability to stop within assured clear distance ahead, *75 A.L.R.3d 327*

Liability or recovery in automobile negligence action arising out of collision or upset as affected by operation of vehicle without front lights, or with improper front lights, *62 A.L.R.3d 560*

Automobiles: liability for accident arising from escape of trailer, *43 A.L.R.3d 725*

Liability of highway authorities arising out of motor vehicle accident allegedly caused by failure to erect or properly maintain traffic control device at intersection, *34 A.L.R.3d 1008*

Competency of nonexpert's testimony, based on sound alone, as to speed of motor vehicle involved in accident, *33 A.L.R.3d 1405*

Opinion testimony as to speed of motor vehicle based on skid marks and other facts, *29 A.L.R.3d 248*

Liability of motorist colliding with person engaged about stalled or disabled vehicle on or near highway, *27 A.L.R.3d 12*

Violation of regulation governing size or weight of motor vehicles, or combinations of vehicles and loads, on the highway as basis of liability for personal injury, death, or damage to private property, *21 A.L.R.3d 989*

Liability for injury or damage caused by collision with portion of load projecting beyond rear or side of motor vehicle or trailer, *21 A.L.R.3d 371*

Liability for automobile accident, other than direct collision with pedestrian, as affected by reliance upon or disregard of stop-and-go signal, *2 A.L.R.3d 12*

Expert or opinion evidence as to speed based on appearance or condition of motor vehicle after accident, *93 A.L.R.2d 287*

Judicial notice of drivers' reaction time and of stopping distance of motor vehicles traveling at various speeds, *84 A.L.R.2d 979*

Propriety, in trial of civil action, of use of model of object or instrumentality, or of site or premises, involved in the accident or incident, *69 A.L.R.2d 424*

Admissibility of opinion evidence as to point of impact or collision in motor vehicle accident case, *66 A.L.R.2d 1048*

Admissibility of opinion evidence as to the cause of an accident or occurrence, *38 A.L.R.2d 13*

Footprints as evidence, *35 A.L.R.2d 856*

Admissibility of Expert or Opinion Evidence -- Supreme Court Cases, *177 A.L.R. Fed. 77*

## [\*2] Summary

Both in civil cases ( §§ 3-17) and in criminal prosecutions ( §§ 18-23) the general rule is that testimony or evidence as to tire or skid marks is admissible, that is, to the extent of allowing the witness to describe the marks and the circumstances under which he observed them, leaving it to the jury to draw their own opinion or conclusion as to what, if anything, the evidence indicated or tended to prove.

However, as indicated in numerous cases throughout the annotation, it is necessary that a foundation be laid as a prerequisite to admissibility of such evidence or testimony, such, for example, as showing that the tracks were made by the automobile involved in the accident, or by showing that the witness observed them before any change had taken place which would render it difficult to determine whether they were made by a particular car, a matter which, of course, would be affected by traffic conditions in the vicinity of the accident, weather conditions, etc.

The fact that the vehicle as to whose tracks the witness testified had been removed before the latter made his observation of the tracks is not necessarily a ground for rejecting the witness' testimony, as noted in § 4.

The time elapsing between the occurrence of the accident and the observation of the marks by the witness has an important bearing on the admissibility of evidence as to such marks, although, of course, no arbitrary time limit governing admissibility has been imposed by judicial authority. In relation to this matter, it is to be noted that testimony of one observing the marks three or four days after the accident may be admissible, while, on the other hand, depending upon weather conditions, etc., testimony of one seeing the marks within a few hours or a day after the collision may not be admitted, on the ground that conditions subsequent to the injury have rendered it doubtful whether the vehicle in question made the marks concerning which the testimony was given. This situation is discussed in § 5.

Testimony as to tire marks, when a sufficient foundation for its admissibility is laid, is for the purpose of aiding the jury in arriving at a conclusion as to how or why the collision occurred, or as bearing on the question of negligence in the operation of the vehicle. For example, such evidence has frequently been admitted as having some tendency to show whether the vehicle was being operated at a dangerous rate of speed under the circumstances. See, in this connection, § 7. Or, as shown in § 8, such evidence may be relevant on the question whether the operator of the car involved was driving it on his right side of the highway.

As to opinion evidence relative to what the tire marks observed by the witness signified, it has been held in some cases that such witness may state whether the tracks or marks were made by one of the automobiles involved in the collision, the theory being that such testimony is merely a statement of fact open to the observation of the witness, and that such statement is a part of the description of conditions which might have been difficult for him to reproduce to the jury otherwise. For illustrative cases see § 10. The above observation as to opinion evidence as to the identity of the car making the marks is true with respect to opinions as to the location of the car on the highway at the time of the accident, such testimony not being objectionable as being an opinion based on statements of others, but constituting a recital of a fact within the observation and knowledge of the witness. See, in this connection, § 11.

However, as shown in § 12, a nonexpert witness' opinion as to the speed of a motor vehicle, predicated on observation of tire or skid marks, is not admissible. An expert witness, on the contrary, as noted in § 15, may give his opinion as to the speed of the vehicle in question, based on the length of the marks.

Some cases have held that a nonexpert witness may be allowed to state whether from his observation of the tire marks the vehicle skidded, the distance it traveled after the collision or whether it was braked, etc., as will be seen by an examination of miscellaneous cases in § 13. But as also shown in this section a contrary conclusion has been reached.

Properly authenticated photographs of tire marks have been held admissible. Illustrative cases on this point are treated in § 16. Maps or diagrams have also been admitted under certain circumstances, as indicated in § 17.

In a number of cases involving prosecutions for involuntary homicide in the operation of a motor vehicle testimony as to tire marks has been held admissible for various purposes, such, for example, as showing whether the operator was driving the car on the wrong side of the road ( § 20), or whether the car was being operated at an unlawful rate of speed under the circumstances ( § 21).

In miscellaneous criminal prosecutions testimony as to tire marks corresponding to those on defendant's car which were observed at the scene of a crime has been admitted when introduced for the purpose of connecting defendant with the crime. See § 22.

Just as in civil cases, expert testimony as to tire marks is admissible in a criminal case on questions as to the speed of the vehicle. See for an illustrative case as to this and as to opinion evidence generally in criminal cases, § 23.

[\*II] Admissibility in civil cases

[\*3] Generally

The general rule is that testimony as to tire marks on the highway is admissible in civil actions for injury or damage, where a sufficient foundation therefor is laid as by showing, for example, that the condition of the road was the same as it was at the time of the accident, and had not been changed by the weather or traffic, and there is sufficient identification that the marks were made by the automobile involved in the accident.

#### WISCONSIN

*Anderson v. Sparks* (1910) 142 Wis 398, 125 NW 925

Evidence as to tracks or other marks made by motor vehicles on the pavement or roadway is generally held admissible in actions for damages where the witness testifying had an opportunity to make an observation of them before any change had taken place. *McPherson v. Martin* (1937) 234 Ala 244, 174 So 791.

In general, evidence of tire tracks and skid marks and the condition of the automobile subsequent to an accident may be admitted as a means of ascertaining responsibility for the accident. *Evansville Container Corp. v. McDonald* (1942, CA6th Tenn) 132 F2d 80.

Testimony of a witness that on the morning following the injury he visited the place where the collision occurred and found, in addition to a trail of blood, the track or imprint of a wheel made under restraint of brakes, was properly admitted as a circumstance corroborating the testimony of other witnesses that plaintiff, when struck by the fender of defendant's car, was dragged along the street for some distance, until defendant stopped his car. *Meier v. Wagner* (1915) 27 Cal App 579, 150 P 797.

Testimony of marks upon the road clearly shown to have been made by one of the cars in the accident is admissible. *Gloyd v. Wills* (1942) 180 Md 161, 23 A2d 665.

It is permissible to admit testimony as to tracks of an automobile on the highway as evidence, where there is sufficient identification of the tracks of the automobile as having been made by the automobile which injured the pedestrian. *Goss v. Williams* (1928) 196 NC 213, 145 SE 169.

In *Finney v. Frevel* (1944) 183 Md 355, 37 A2d 923, the court apparently approved the view that testimony as to skid marks upon the road, clearly shown to have been made by one of the cars in the accident, is admissible, but pointed out that reliance upon testimony alone of marks upon the road, even though clearly shown to be made by defendant's car, to establish negligence, has never been favored by the Maryland courts.

In *Young v. Bacon* (1916, Mo App) 183 SW 1079, an action for injury sustained by a pedestrian run over by defendant's automobile, the court held that it was not error to allow a nonexpert witness to testify that he examined the place on the roadway where the injury occurred, just after it occurred, and that he saw a fresh automobile track on the roadway, the court stating that this was a matter of common knowledge and not one requiring expert testimony.

A witness may describe the marks that he has observed near the place of an accident; the inference to be drawn from the testimony regarding such tire marks, skid marks, or scratches is solely the province of the jury. *Danner v. Walters* (1951) 154 Neb 506, 48 NW2d 635.

In *Boyer v. Scripser* (1951) 278 App Div 601, 102 NYS2d 2, an action for damages resulting from a collision of the automobiles of plaintiff and defendant at a street intersection, the exclusion of testimony as to skid marks, purporting to have been made by defendant's car, was, in the opinion of the court, error, but in view of other testimony in the case was not of sufficient gravity to require a reversal.

Testimony as to tire marks made by a car on a roadway should not be admitted unless it can be reasonably inferred from the time of the observation, or from the relative locations of the marks and the car, or from other convincing facts, that the marks were actually made by the car in question. *Williams v. Graff* (1950) -- Md --, 71 A2d 450, 23 ALR2d 106; *Miller v. Graff* (1951) -- Md --, 78 A2d 220.

In view of the fact that a police officer arrived shortly after the accident and saw the skid marks, and also in view of the close proximity of blood spots to the skid marks indicating where the child had been wounded, the court in *Miller v. Graff* (Md) supra, held that there was reasonable ground for the inference that the skid marks had been made by defendant's taxi, and the officer's testimony was admissible.

Testimony of a witness in an automobile collision case that he had found on the roadway certain tracks made after the collision is competent to go to the jury for what it is worth, even though the witness on cross-examination admits that he did not have any means of knowing what car made the tracks. *Troxell v. De Shon* (1925, Mo App) 279 SW 438.

And in *Maynard v. Westfield* (1914) 87 Vt 532, 90 A 504, it was held that testimony concerning automobile tracks in the road was properly received, where, although the witness did not connect these tracks with the automobile which was responsible for the accident, their character and location, and the proximity of the time when the witness examined them, in the absence of evidence to the contrary, warranted an inference that the tracks seen by the witness were made by that particular machine; the uncertainty regarding this, if any, affected only the weight of the evidence.

In *Scott v. O'Leary* (1912) 157 Iowa 222, 138 NW 512, where testimony regarding buggy and automobile tracks near the scene of the accident was objected to as calling for the conclusion of the witness, the court stated that manifestly these objections were untenable.

In *Appalachian Stave Co. v. Pickard* (1936) 266 Ky 565, 99 SW2d 472, testimony of certain witnesses that on the night of the accident or next day, another witness took them to the scene of the accident and pointed out tire tracks leading down to the place where the witness told them the car had stopped, was rejected as hearsay, although they and the other witness were cross-examined on the trial and all described conditions identical with the testimony of such witness. The recalling of the witness and proving by him that the condition was the same as it was at the time of the accident, according to the court, was no more than a statement of his opinion, and brought the questioned testimony within the rule governing hearsay evidence.

Testimony as to tire marks on highway is admissible in civil actions where sufficient foundation therefor laid:

See *Glaze v Tennyson* (1977, Ala) 352 So 2d 1335, § 15.

Whether proper foundation had been laid for admission of police officer's testimony concerning accident based on visual inspection of vehicles and location of debris and skid marks was matter within sound discretion of trial court. *Starkey v Bryan* (1968) 166 Colo 43, 441 P2d 314.

Emergency medical technician who was passenger in ambulance that collided with automobile at intersection was properly allowed to testify as to skid marks made by ambulance, where he observed marks upon exiting ambulance at scene of accident and testified merely as to what he saw at scene, not as qualified accident reconstruction expert. *Nolan v Elliott* (1989, 2d Dist) 179 Ill App 3d 1077, 129 Ill Dec 288, 535 NE2d 1053, app den 126 Ill 2d 560, 133 Ill Dec 670, 541 NE2d 1108.

Witness testified concerning sufficient factual data to constitute adequate foundation for his opinion as to cause of automobile accident where witness detailed his personal observations of automobile and scene of accident, photographs taken by him, use of these in measuring and confirming tire skid marks, procedures and methods used in arriving at his conclusion, and matters upon which he relied for conclusion. *Plank v Holman* (1969, 2d Dist) 108 Ill App 2d 216, 246 NE2d 694, revd 46 Ill 2d 465, 264 NE2d 12 (among conflicting authorities noted in *Augenstein v Pulley* (5th Dist) 191 Ill App 3d 664, 138 Ill Dec 724, 547 NE2d 1345, app den 131 Ill 2d 557, 142 Ill Dec 879, 553 NE2d 393).

Physical evidence as debris, skid marks, and location of physical damage on vehicles involved is always admissible and relevant to a court in determining fault in automobile accident cases. *Moore v Johnson* (1972, La App 2d Cir) 262 So 2d 105.

Positive and certain identification of tire marks on roadway as having been made by particular vehicle is not necessary in order to render evidence thereof admissible; however, such evidence should not be admitted unless there is sufficient showing, either from time of observation, from relative locations of marks and car, or from other convincing facts, to support reasonable inference that marks had, in reality, been made by vehicle involved in accident. *Fowler v Smith* (1965) 240 Md 240, 213 A2d 549 (citing annotation).

In action to recover damages for injuries sustained 6-year-old child when hit by defendant's automobile, testimony of police officer as to skid marks shown on plat of accident scene was held admissible. *Levine v Beebe* (1965) 238 Md 365, 209 A2d 67.

Evidence of tire marks at scene of accident is admissible in civil actions where sufficient foundation is laid by showing that condition of road was same as it was at time of accident and had not been changed by weather or traffic, and where there is sufficient identification of tire marks to show that they were made by vehicles involved in accident. *Sheets v Davenport* (1967) 181 Neb 621, 150 NW2d 224.

Witness may describe marks observed near place of accident, while inference to be drawn therefrom is for jury. *Stillwell v Schmoker* (1963) 175 Neb 595, 122 NW2d 538 (superseded by statute as stated in *State v Rotella*, 196 Neb 741, 246 NW2d 74).

Witness may describe tire marks he observed near place of accident, and inference to be drawn from testimony is for jury. *Davis v Dennert* (1956) 162 Neb 65, 75 NW2d 112.

Although state trooper did not witness collision of two automobiles, diagram that trooper prepared showing position of vehicles, which had not been moved, and showing arrows indicating paths traversed by vehicles, which arrows reflected trooper's observation of pattern of skid marks present at scene, was properly admitted into evidence where testimony clearly indicated that diagram was based not on statements made by parties involved, but primarily upon trooper's own factual observation at accident scene. *Lee v Decarr* (1971, 3d Dept) 36 App Div 2d 554, 317 NYS2d 226.

Investigating officer who arrived at scene shortly after accident may describe to jury skid marks he had observed there. *Howard v Wood* (1964) 263 NC 241, 139 SE2d 252.

Trial court in personal injury action arising from collision of automobile with pedestrian as pedestrian stood alongside his car erred in admitting testimony of highway patrol officer as to speed of automobile based on skid marks. *Fowler v*

*Graves (1986) 83 NC App 403, 350 SE2d 155.*

In action arising out of collision, investigating police officer's reference to skid marks, in course of explanatory preface to his later testimony, was not prejudicial. *Miller v Hickman (1961, Okla) 359 P2d 172.*

Witness may describe skid marks but inference to be drawn from testimony is for jury. *Venable v Stockner (1959) 200 Va 900, 108 SE2d 380.*

Witness may describe marks observed near place of accident, but inference to be drawn therefrom is for jury. *Richardson v Lovvorn (1958) 199 Va 688, 101 SE2d 511.*

Although identification of skid marks can be established with certainty if witness observed marks being created by skidding car or saw marks extending right up to tires of car before it was removed, it does not follow that evidence as to skid marks may not be admitted for consideration by trier of fact if less foundation is offered; if evidence is not remote in time and is located so as to be reasonably attributable to car in question, trial court in its discretion may permit evidence to be admitted. *Zinda v Pavloski (1966) 29 Wis 2d 640, 139 NW2d 563 (citing annotation).*

[\*4] As affected by fact that person testifying did not see accident

Testimony of a witness as to tire marks is not necessarily rendered inadmissible by the fact that the witness did not see the collision or that the vehicle had been removed before he arrived at the scene of the accident.

#### INDIANA

*Grossnickle v. Avery (1926) 96 Ind App 479, 152 NE 288, reh den 154 NE 395*

#### WEST VIRGINIA

*Bragg v. C. I. Whitten Transfer Co. (1943) 125 W Va 722, 26 SE2d 217*

So, in *Grossnickle v. Avery (1926) 96 Ind App 479, 152 NE 288, reh den 154 NE 395*, where the witness did not see the collision, but went outside when he saw people gathering, the court held that he was competent to testify that he saw skid marks which it might be inferred from the evidence were made by defendant's automobile, stating that the fact that the witness did not see the collision did not render him incompetent to describe what he saw in the way of marks on the pavement.

And testimony of a witness relative to the location of skid marks at the scene of the accident is competent, although the

witness did not see the collision and the vehicles had been removed before he arrived at the scene of the accident, notwithstanding the defendant's objection that the witness in his answer had attempted to give the location of the front wheels of the colliding vehicles, inasmuch as it was apparent from the context of the questions and answers that the location of the skid marks rather than the wheels of the vehicles was the subject matter of the inquiry, as well as of the testimony. *Bragg v. C. I. Whitten Transfer Co. (1943) 125 W Va 722, 26 SE2d 217.*

Also, in *Lever Bros. Co. v. Stapleton (1950) 313 Ky 837, 233 SW2d 1002*, an action to recover damages for fatal injuries to a child who stepped from a parked truck into the path of an oncoming automobile, it was held that there was no error in admitting, apparently for the purpose of showing that the car was being operated at an illegal rate of speed, testimony of the child's father, who described the skid or tire marks on the highway, and blood spots, as being fifty-four feet from the truck, although it had been moved at the time, eyewitnesses having pointed out all these things to the father and having testified that conditions were the same, except perhaps for the truck, when the father arrived on the scene.

As to admissibility generally of evidence of tire marks for purposes of showing that automobile was being operated at an unlawful rate of speed, see § 7, *infra*.

Testimony as to tire marks is not necessarily inadmissible because witness did not see accident:

#### OKLAHOMA

*Andrews v Moery (1951) 205 Okla 635, 240 P2d 447*

The following additional authority is relevant to the issues discussed in this section:

◇

Although expert may express opinion as to speed of automobile predicated on length of skid marks made by it before impact, testimony of police officer as to speed of defendant's motor vehicle was inadmissible where such opinion was based on distance that vehicle traveled after impact. *Holuska v Moore (1970) 286 Ala 268, 239 So 2d 192*.

Police officer could testify as to measurement of skid marks although he was not present when they were made where evidence showed that no other marks were present and that marks in question were freshly made. *Mattingly v Eisenberg (1955) 79 Ariz 135, 285 P2d 174*.

Police officer's testimony regarding certain skid marks found at site of crossing collision between plaintiff's automobile and defendant's train was not admissible to contradict plaintiff's testimony that he at no time applied his brakes, where officer also testified that he could not say what car had made the skid marks, and another officer testified that the skid marks were not made by plaintiff's car. *Jewell v Pennsylvania R. Co. (1962) 55 Del 6, 183 A2d 193*.

See *Shewmaker v Richeson (1961, Ky) 344 SW2d 802, infra § 5*.

Testimony of witness relative to tire marks is not rendered inadmissible by removal of vehicle prior to arrival of witness. *Fowler v Smith (1965) 240 Md 240, 213 A2d 549* (citing annotation).

Testimony of witness who did not see accident as to brake marks allegedly made by defendant's car was inadmissible, absent proof that marks were actually so made. *Winslow v Dietlin (1956) 100 NH 147, 121 A2d 573*.

Testimony of traffic consultant, whose information as to accident was derived solely from examination of locus and of photographs, as to cause of marks and scratches on highway was properly excluded. *Smith v Hardy (1955) 228 SC 112, 88 SE2d 865*.

Witness cannot testify that particular vehicle made skid marks if he did not see accident and was not able to trace marks to vehicle in question, but rule is to contrary where witness can trace marks to vehicle. *Butane Wholesale Co. v Buehring (1959, Tex Civ App San Antonio) 325 SW2d 173, writ dismissed (Jul 22, 1959)* (citing annotation).

[\*5] As affected by time elapsing between accident and observation of marks

The fundamental prerequisite for the admissibility of testimony or evidence as to tire marks is the identification of the marks with the automobile causing the injury, a matter which, in numerous cases, as will be shown below, seems to have been tied up with the factor of time intervening between the time of the accident and the observation of the marks on the road by the witness. The admissibility of evidence or testimony of the type referred to above, in so far as it may be said to be controlled by the time element, depends upon numerous factors, such as weather conditions, the amount of travel, and other conditions noted in the cases subsequently detailed in this section.

Testimony as to conditions at the scene of the accident an appreciable time thereafter, such as the existence and location of marks or tracks, is admissible upon a proper showing that there has been no change in conditions in the meantime. *Ficke v. Gibson (1950) 153 Neb 478, 45 NW2d 436.*

A different rule applies in the absence of a showing that conditions have not been changed subsequently to the accident. *Id.*

The length of time intervening between the accident and the examination, and the physical conditions surrounding the scene of the accident which would affect such marks, such as the amount of travel on the highway, and whether or not its surface was dry or wet, are elements which ordinarily affect the weight, rather than the materiality of such testimony. *Clark v. Reising (1937) 341 Mo 282, 107 SW2d 33.*

In the following cases, under the particular circumstances therein detailed, evidence of tire marks was held admissible where the period of time elapsing between the accident and the time the tire marks were observed by the witness ranged from a "reasonable" one to a matter of days and, at least in one instance, weeks.

Testimony of a witness as to wheel tracks, wheel prints, skid marks, or other marks, where the witness visited and examined the scene of an accident within a reasonable time, is ordinarily admissible. *Clark v. Reising (1937) 341 Mo 282, 107 SW2d 33.*

In *Bohn v. Sams (1946) 302 Ky 63, 193 SW2d 459*, it was held that testimony concerning mud and tracks on the highway was competent where the observation of same was made immediately after the accident and before another automobile had passed and while the conditions remained the same. The court pointed out that there was a distinction between that case and those cited by the person objecting to the admission of the testimony, in that in the cases referred to by the objector a considerable period of time had elapsed after the accident before the witness observed the tracks concerning which he testified, and there was no way to determine that the tracks had been made by the vehicle involved in the collision.

In *Williams v. Graff (1950) -- Md --, 71 A2d 450, 23 ALR2d 106*, where testimony as to skid marks on the highway was held admissible, the accident occurred at 10 a.m. and the witness, a police officer, testified that he received the call to come to the scene of the accident at about 10 a.m. and responded "promptly."

Notwithstanding the objection of defendant that the testimony was incompetent because the skidding might have been made by some other motor vehicle than the one defendant was operating, the court in *Whitehead v. Stith (1939) 279 Ky 556, 131 SW2d 455*, held competent testimony of a witness who saw the accident about a hundred feet from where it happened -- and who immediately went to the scene -- and testified that he saw fresh sliding tracks on the pavement extending back for about twenty-one feet from defendant's car after it stopped, following the accident, and in addition to such testimony, several witnesses testified to the effect that defendant at the time applied all four of his brakes, so as to produce a screeching noise which they all heard immediately following the sound of the horn emanating from the same automobile. The court observed that in the cases cited by defendant to support his objection to the testimony a period of time intervened between the accident and the discovery testified to by the witnesses within which other automobiles traveling over the same spot might have produced what the witness testified to; however, no intervening period

prevailed in the case at bar.

And in *Conley v. Jennings* (1944) 296 Ky 652, 178 SW2d 185, 19 NCCA NS 228, it was held that testimony of a witness concerning tracks made by a bus which fell over an embankment, causing the injuries complained of, was competent, where the witness arrived at the scene of the accident shortly after it occurred and traced the tracks to the point where the bus plunged over the embankment. The court said that the witness' testimony sufficiently identified the tracks as being those made by the bus to render the evidence competent.

Testimony of plaintiff's wife, plaintiff having been injured in a collision of automobiles at a street intersection, to the effect that she arrived at the scene within ten or twenty minutes after the accident occurred and as to the position of defendants' bus and plaintiff's car and the skid marks upon the pavement, should not have been excluded, there being testimony that plaintiff's car was in the same position an hour after the accident had occurred and that there was no other accident that morning up to that time, *Lazar v. Westchester Street Transp. Co.* (1944) 268 App Div 387, 51 NYS2d 533.

And in *Opecello v. Meads* (1926) 152 Md 29, 135 A 488, 50 ALR 1385, the court held admissible testimony of a policeman to the effect that he arrived at the scene of the accident about a half hour thereafter and found the wheel marks of an automobile which, according to his description, followed a course similar to that testified to by those in charge of the automobile at the time of the accident, such witness not being allowed to state any conclusions from his observations.

Also, in *Cumberland & W. Transit Co. v. Metz* (1930) 158 Md 424 149 A 4, reh den 158 Md 455, 149 A 565, app dismd *American Oil Co. v. Metz*, 282 US 801, 75 L ed 720, 51 S Ct 40, it was held that testimony of a witness for defendant, the bus company, who was at the scene of the accident within thirty-five minutes after its occurrence, to the effect that the tracks which he identified "showed them right up to the bus," was admissible, where it was shown that the bus had not been moved after the driver had brought it to a stop, and there was no evidence that any other bus could have made the tracks.

In *McCreedy v. Fournier* (1920) 113 Wash 351, 194 P 398, where the contention of the plaintiff was that defendant was traveling on the wrong side of the road at the time of the collision, which occurred shortly after 7 o'clock in the morning, the court, notwithstanding defendant's objection that there was proof of the passing of several other automobiles after the collision occurred and prior to the witness' reaching the scene, held as clearly admissible testimony of a witness for plaintiff to the effect that about 8 o'clock that morning he arrived at the scene of the accident and noticed swerving zig-zag tracks of an automobile driven on the lefthand side of the road; that the tracks led up to the immediate scene of the accident; that he did not see any other tracks on the road that attracted his attention; and that he traced the tracks to plaintiff's car on the right side of the road and around which the ground was torn up, and along the road to a point at which plaintiff's testimony showed defendant's car stopped after the collision.

And in *Clark v. Reising* (1937) 341 Mo 282, 107 SW2d 33, where the testimony was conflicting as to which party to the collision was on the wrong side of the road, the court held proper the submission of testimony of an automobile repairman, who arrived on the scene not more than an hour after the accident, as to tire marks on the pavement at the scene of the accident, notwithstanding the objection that such testimony was too remote, indefinite, and uncertain to constitute admissible evidence, because of the lapse of time between the accident and the witness' arrival at the scene.

In *Sheer v. Rathje* (1938) 174 Md 79, 197 A 613, it was held that there was no error in overruling an exception to testimony of a witness as to the location of skid marks, seen by him about an hour after the accident, even though his identification of the car that made the marks was based on the relative position of such marks and the location of the body of the plaintiff, a pedestrian, when she was picked up after the accident, and even though the witness himself admitted the difficulty of such an identification.

And in *Collins v. Barmon* (1927) 145 Wash 383, 260 P 245, an action for injuries received in a head-on collision of

automobiles going in opposite directions, the court held competent testimony of a witness as to skid marks upon the road, although he did not arrive there until about an hour and a half later, it was rainy and the pavement was wet and slippery, and the road was a main arterial highway admittedly known to be used by vehicles of every description going in both directions.

In *Adrian v. McGillivray* (1951) -- Ky --, 243 SW2d 895, evidence as to heavy black skid marks and a lighter one, which were observed about one and a half hours after the collision, was held admissible, where it appeared that the road was not traveled to the extent that even the lighter tire marks had been destroyed by traffic.

In *Flach v. Fikes* (1928) 204 Cal 329, 267 P 1079, it was held that the trial court did not commit error in admitting in evidence testimony of witnesses that they observed skid marks on the street the morning of the collision, notwithstanding the objection of defendant that, as these witnesses were not at the scene of the collision until four or five hours after it happened, their testimony was not admissible against him, the court being of the opinion that there was but little, if any, merit in this contention, inasmuch as although the street was one of the business streets of the city the evidence showed that there had been no great amount of travel thereon between the time of the collision and the time when these witnesses observed the skid marks on the street.

Also in *Stutzman v. Younkerman* (1927) 204 Iowa 1162, 216 NW 627, it was held that testimony of a witness that five hours after the accident he saw wheel marks in the mud and marks on the curb, which he described, and testimony by another witness that twelve hours after the accident the cement was scraped off the curb and that the tracks approached the curb at an angle of about 40 degrees, was admissible, the court overruling the objection that such evidence was too far removed from the accident in point of time to be of any value, and stating that its value was for the jury.

In *Wallace v. Billups* (1948) 203 Miss 853, 33 So2d 819, the court held that it was reversible error to exclude evidence of scratches and skid marks on the highway observed by witnesses at 7 o'clock in the morning, the accident having occurred the night before at 9 o'clock. It was said that the duration of time and amount of traffic that might have intervened between the time of the collision and the hour at which these witnesses made their observations would go to the weight rather than the competency of their testimony. As the court pointed out, there was no suggestion that any other automobile might have made scratches and skid marks, and the court said that the time could not be held to be too remote as a matter of law, since it was not unreasonable to suppose that the jury knew that skid marks and scratches would remain upon a concrete pavement throughout a clear and cold night.

And in *Raths v. Sherwood* (1935) 195 Minn 225, 262 NW 563, 38 NCCA 579, an action for death of a pedestrian who was walking on his right-hand side of the highway when struck by the defendant's car proceeding in the same direction, it was held that evidence of skid marks of a car on the right-hand side of the road, observed at the place of the fatal collision the morning after the accident, which occurred at 7:30 p.m., was properly admitted, it being for the jury to consider whether these skid marks were made by defendant's car when he tried to stop it after the first impact, or were made later on when the wrecking car was pulling it back to the garage.

In *Fong Lin v. Probert* (1920) 50 Cal App 339, 195 P 437, an action for death of a pedestrian, where defendant complained of the admission of testimony of the existence of scars in the asphalt that appeared on the roadway the morning after the accident, which markings were caused from the friction of rubber, the testimony having been introduced for the purpose of showing at what point defendant had applied his brakes, and defendant contended that this evidence was inadmissible for the reason that it was too remote, there being no preliminary proof that the tracks were caused by the defendant's automobile, and it being claimed that the street was a much-traveled one, and the evidence was received upon the condition that it be connected up, it was held that no connecting evidence was required of plaintiff in view of the fact that defendant himself admitted that he had examined the tracks the same morning and that his car had made the scars testified to.

In *Still v. Swanson* (1933) 175 Wash 553, 27 P2d 704, it was held that witnesses, one of whom had examined the skid

marks the morning after the accident, and the other the second morning thereafter, were competent to testify concerning skid marks on the strip or road where the collision occurred, the court stating that the testimony was sufficiently substantial and dependable to make it admissible and that its weight was for the jury, notwithstanding the objection that the observations were too remote in point of time to be of any probative value. The court remarked that the element of time in such cases is, of course, important, but not necessarily controlling, and that such observations within an hour in one case may possibly not be so convincing or dependable as those made a month after in another case, according to circumstances.

And in *Tomasko v. Raucci* (1931) 113 Conn 274, 155 A 64, it was held that the trial court did not err in admitting the evidence of police officers as to marks on the highway which were observed by one of them within an hour after the accident and by the other on the following morning.

In *American Film Co. v. Moyer* (1920, CA9th Cal) 267 F 419, it was held that there was a sufficient foundation for the admission of testimony of a witness relating to the condition of the road and certain marks thereon two days after the accident, where other witnesses had testified as to the condition of the road and marks thereon immediately following the accident, and they had been cross-examined as to every detail, the court being of the opinion that the jury was authorized to draw the proper inference from this evidence as to whether the condition of the road was the same at the time this witness saw it as it was at the time of the accident, or, if it had been changed by the weather or passing traffic, as to the extent of such change.

In *Langham v. Talbott* (1948, Tex Civ App) 211 SW2d 987, error ref n r e, testimony of a witness for plaintiff descriptive of what he termed the scene of the collision as viewed June 5 or 12 (the accident having occurred May 19), in regard to certain skid marks, as well as other things or objects observed by him on the scene, all of which was in substantial corroboration of testimony of defendant's witnesses relating to conditions on the ground at the time of the wreck, was held to be relevant and admissible as against the contention of no showing that conditions were the same as on the night of the collision and that the record affirmatively indicated changed conditions due to time and traffic.

But where there is no direct proof that the conditions at the scene of the accident, with reference to the footmarks and tire tracks or skid marks, were the same the next morning as they had been the previous afternoon immediately after the accident, it is error to admit the evidence relating thereto as of the next morning. *Ficke v. Gibson* (1950) 153 Neb 478, 45 NW2d 436.

So, in *Powell v. Commercial Standard Ins. Co.* (1943) 294 Ky 7, 170 SW2d 857, where a witness who reached the scene of the collision four hours afterward, undertook to explain what marks he observed, it was held that the trial court properly refused to consider this evidence, because it was not shown that conditions were the same as when the accident occurred.

And in *Girtman's Admr. v. Akins* (1938) 275 Ky 2, 120 SW2d 660, where complaint was made of the refusal of the trial court to permit witnesses to testify concerning marks they saw on the road about noon on the day following an accident which occurred at about 8 p.m., the appellate court held that it was not error to reject the offered testimony, where several witnesses who saw these marks shortly after the accident testified concerning them, and it appeared that the highway was a heavily traveled one, and no proof was offered to show that the condition at the scene of the accident had remained the same.

Similarly, in *Appalachian Stave Co. v. Pickard* (1935) 260 Ky 720, 86 SW2d 685, the court held incompetent testimony of a number of witnesses introduced by plaintiff to the effect that they went to the scene of the accident on the following day and saw the imprint made by an automobile tire in the dirt shoulder on the right-hand side of the road where plaintiff claimed he drove his car when the accident happened, where there was evidence that a number of automobiles had passed back and forth along the road in the meantime, and there was also evidence that at least one or two automobiles had been driven along the extreme right side of the road at this point, and there was no evidence to show

that the conditions had remained the same from the time of the accident until these witnesses made their observations on the following day, or that there were any distinguishing marks or circumstances by which the track seen by them could be identified as one having been made by plaintiff's car.

Also in *Marine v. Stewart* (1933) 165 Md 698, 168 A 891, an action to recover for damages resulting when plaintiff's automobile crashed into an unlighted road machine standing on the highway, it was held that questions about skid marks on the concrete in front of the road machine on the third day after the accident were properly forbidden, in the absence of proof that the conditions three days later were the same as when the automobile collided with the road machine, and that no other automobile had been there.

Testimony of a police officer cannot be admitted to prove that skid marks were attributable to one of the cars involved in the collision, where he arrived at the place of the accident an hour and a half after it occurred and after the automobile had been removed, and other traffic had passed over the highway during that interval. *Kirsch v. Ford* (1936) 170 Md 90, 183 A 240, 1 NCCA NS 633.

And in *Blodgett v. Springfield Street R. Co.* (1927) 261 Mass 333, 158 NE 660, an action to recover damages for injuries resulting when plaintiff's automobile was hit by defendant's streetcar at a point where a highway crossed the streetcar tracks, plaintiff's contention being that the view of the tracks at this point was obstructed by bushes so as to leave the crossing practically blind, the court held that evidence, submitted by defendant, of wheel tracks and the absence of grass in the highway, observed fifty-six days after the time the place described was shown by evidence of the plaintiff to have been covered with brush, had no probative value in disproof of evidence for plaintiff that the course of travel and the presence of bushes obstructed plaintiff's view in the direction of the colliding car.

The following additional authority is relevant to the issues discussed in this section:

◇

See *De Vita v Long* (1957, DC Pa) 147 F Supp 810 (citing annotation) *infra*, § 11.

In action involving automobile accident, evidence as to tracks observed 2 days after accident was properly excluded as too remote. *Alvarez v County of Los Angeles* (1955, 2nd Dist) 132 Cal App 2d 525, 282 P2d 531.

See *Hixson v Barrow* (1975) 135 Ga App 519, 218 SE2d 253, appeal after remand 142 Ga App 65, 234 SE2d 805, *infra* § 15.

Testimony of witnesses who observed tire marks on first, second, and fourth day following accident was not inadmissible as too remote. *McKee v Chase* (1953) 73 Idaho 491, 253 P2d 787 (citing annotation).

Trial court did not err in refusing to permit witness to testify as to marks on highway observed on day following the accident. *Romines v Illinois Motor Freight, Inc.* (1959, 2d Dist) 21 Ill App 2d 380, 158 NE2d 97.

Where witnesses inspected scene of collision some 4 to 6 hours after accident, their testimony relating to skid marks which they were not able to trace to tractor-trailer involved in accident was properly rejected in light of fact that much traffic used roadway at collision site between time of collision and time of inspection by witnesses. *Lowe v McMurray* (1967, Ky) 412 SW2d 571.

Absent showing that conditions remained unchanged after accident, in action for death of pedestrian struck by truck on much-traveled road, evidence as to skid marks observed more than 8 hours later was inadmissible and without probative value. *Mountain Petroleum Co. v Howard* (1961, Ky) 351 SW2d 178.

Testimony as to skid marks by witness who observed them 5 or 6 days after accident was admissible where other witness, who traveled road daily, testified marks remained clear 6 or more days after accident. *Shewmaker v Richeson* (1961, Ky) 344 SW2d 802.

Testimony as to length of skid marks was inadmissible where witness had not seen marks until day following accident. *Beasley v Evans' Adm'x* (1958, Ky) 311 SW2d 195.

Evidence as to tracks of motor vehicles on roadway are admissible where witness had opportunity to become acquainted with tracks before any change took place, but proper foundation must be laid by showing how soon after accident witness observed marking, conditions under which they were made, opportunity for accurate observation, and other explanatory factors. *Arnett v Dalton* (1953, Ky) 257 SW2d 585 (holding testimony inadmissible where time between accident and observation not shown).

Testimony as to skid marks on pavement at place of accident was properly excluded where based on observations made 1 1/2 to 2 1/2 hours after accident on prominent city street and marks were not identified as having been made by defendant's automobile. *Hakkers v Hansen* (1953) 337 Mich 620, 60 NW2d 487.

See *Arnold v Reece* (1957) 229 Miss 862, 92 So 2d 237, infra § 11.

Fact that observation of skid marks was made on morning following accident would not bar admission of evidence thereof, but only affect its weight. *Byram v Snowden* (1955) 224 Miss 74, 79 So 2d 541.

Fact that 2 1/2 hours elapsed between time of accident and time witness observed skid marks affected weight, not admissibility, of witness' testimony. *McCrary v Ogden* (1954, Mo) 267 SW2d 670.

Exclusion of testimony of highway patrolman that he observed tire marks on road 10 or 12 days after accident was proper where patrolman testified he did not see any tire marks on night of collision and he did not know what made marks he saw later. *McAbee v Love* (1953) 238 NC 560, 78 SE2d 405 (ovrld in part by *State v Jackson*, 302 NC 101, 273 SE2d 666).

Evidence of tire track was properly excluded where 6 hours elapsed between time of accident and witness' observation. *Rausch v Buisse* (1966) 33 Wis 2d 154, 146 NW2d 801 (citing annotation).

Exclusion of photographic exhibits introduced by plaintiff in automobile-collision action for purpose of showing marks upon road was proper where pictures were taken 30 days after accident. *Dr. Pepper Co. v Heiman* (1962, Wyo) 374 P2d 206.

[\*6] Purpose for which admissible; generally

Evidence of a skid mark fifty-one feet long observed on the roadway shortly after the accident and leading to the side of the automobile in which plaintiff had been riding is admissible as having some tendency to show what actually happened at the time of the collision. *Mernagh v. Lillie* (1942) 312 Mass 697, 45 NE2d 473.

But in *Johnson v. Philadelphia & R. R. Co.* (1925) 283 Pa 480, 129 A 569, an action for damages suffered when an automobile in which plaintiff was a passenger collided with a train at a railroad crossing, it was held that the trial court properly excluded an offer of testimony by defendant's witness, who came on the scene an hour or more after the accident and who would have testified that he saw marks on the pavement near the crossing where, apparently, the wheels of an automobile had slid as if set by a brake, from which it was sought to draw the conclusion that they were made by the car in which plaintiff was a passenger. The appellate court pointed out that there was no offer of proof that

the marks were not there before the accident, or that they were not made by some other car after the accident, and that as this was a public street and there was nothing to connect the marks with the car in question, the conclusion sought to be drawn was a mere guess and the offer was properly excluded.

The following additional authority is relevant to the issues discussed in this section:

◇

Testimony that skid marks indicated that car was going sidewise before brakes were applied was admissible. *Lynch v Birdwell* (1955) 44 Cal 2d 839, 285 P2d 919.

See *Jewell v Pennsylvania R. Co.* (1962) 55 Del 6, 183 A2d 193, infra § 4.

In action arising out of car-truck collision, trial court did not err in permitting accident investigator to testify about photographs he took of skidmarks left by automobile, length of skidmarks and stopping distance of average automobile where investigator gave no opinion concerning speed of car before collision and testified only as to skidmarks and average stopping distances; thus testimony was not prohibited by court decision holding that witness may not give opinion testimony concerning speed of vehicle before impact based solely on physical evidence observed after accident. *Viehweg v Thompson* (1982, App) 103 Idaho 265, 647 P2d 311.

Where only evidence tending to establish wilful and wanton misconduct of motorist is alleged traveling at high rate of speed along shoulder of pavement just prior to accident, negative evidence that there was no tire mark on such shoulder of pavement is admissible. *Klatt v Commonwealth Edison Co.* (1965) 33 Ill 2d 481, 211 NE2d 720.

Police officer's testimony about skid marks, braking speeds, and reaction time was admissible to show nature and extent of damage to vehicles involved. *Howard v Stoughton* (1967) 199 Kan 787, 433 P2d 567.

Court did not err in sustaining objection to question seeking to elicit from police officer "reaction time" indicated by skid marks on highway. *Johnson v Gaines* (1958, Ky) 313 SW2d 408.

Markings on road following accident are not positive proof of how accident happened, but may be helpful to jury. *Carpenter v Birkholm* (1954) 242 Minn 379, 65 NW2d 250.

There was no error in permitting police officer who arrived at scene of accident about 5 minutes after boy was struck by defendant's automobile while crossing street at school crosswalk, to testify as to skid marks found at scene where testimony was based on personal observation. *Neavill v Klemp* (1968, Mo) 427 SW2d 446.

Testimony as to presence of dual wheel tracks at point where pedestrian was allegedly struck by dual-wheel truck was admissible as relevant, although testimony was insufficient to identify tracks. *Hatcher v Clayton* (1955) 242 NC 450, 88 SE2d 104 (citing annotation).

Evidence of tire or skid marks, made by automobile involved in collision, which can be traced from where car was traveling to where car came to rest, is admissible to establish how collision actually occurred, where such tire or skid marks are observed within reasonable time after accident. *Grenz v Werre* (1964, ND) 129 NW2d 681.

Where defendant admitted negligence, statement of highway patrol officer that plaintiff's automobile had laid down skid marks after impact and that defendant's truck did not skid was admissible, since it tended to prove that defendant's admitted negligence was proximate cause of plaintiff's injuries. *Barnett v Richardson* (1966, Okla) 415 P2d 987.

See *Smith v Hardy* (1955) 228 SC 112, 88 SE2d 865, supra § 4.

[\*7] To determine questions as to speed

Testimony descriptive of skid marks constitutes pertinent and admissible evidence as bearing on the speed at which the motor vehicle was being operated at the time of the accident.

## WASHINGTON

*Stubbs v. Allen* (1932) 168 Wash 156, 10 P2d 983

Skidding of a motor car alone is no evidence of excessive speed, but skidding may be considered, along with other circumstances and conditions, in determining the question of speed. *Bear v. Devore* (1944, Mo App) 176 SW2d 862.

So, in *Briley v. Nussbaum* (1927) 122 Kan 438, 252 P 223, mod on other grounds 123 Kan 58, 254 P 351, an action to recover for the death of one struck by an automobile, the court, considering an instruction that in determining the rate of speed at which the defendant's automobile was traveling at the time of the accident the jury might take into consideration, together with all the other evidence, the length of the skid marks made by the wheels when the driver threw on the brakes after he saw the decedent, stated that the evidence was competent and proper for the jury to consider, and that the instruction was not objectionable on the ground that it gave particular prominence to this evidence.

In *Koutsky v. Grabowski* (1948) 150 Neb 508, 34 NW2d 893, it was stated that various factors -- among others, skid marks -- constitute pertinent evidence in arriving at an estimate of the rate of speed of an automobile, either by those involved in the accident or those in authority investigating the accident immediately thereafter.

And in *Tischler v. Steinholtz* (1923) 99 NJL 149, 122 A 880, an action to recover for the death of a pedestrian who was struck by an automobile, it was held competent for a bystander who saw the car skid after striking decedent to testify that immediately thereafter he noted skid marks made by the car on the surface of the street extending ten or fifteen feet from where the body was lying, and in the path taken by the automobile before it stopped, such testimony being evidential upon the question of negligence in the speed and control of the car.

Also, in an action by a guest to recover for an injury sustained when a tire blew out and the car in which he was riding overturned, and in which it was contended that the car was being operated at an unlawful speed, it was held that the jury, in considering the question of speed, might take into consideration the wheel marks of the car after the application of the brakes, the distance traveled after the tire burst, the car's course down the road, and the position and condition of the car after the accident. *Bailey v. Parker* (1930) 34 Ohio App 207, 170 NE 607.

And in *Akers v. Epperson* (1942, Tex Civ App) 172 SW2d 512, an action for damages for injuries sustained as result of collision of cars at a street intersection, where there was evidence that one of the automobiles in coming to a stop made skid marks on the pavement twenty-six to twenty-eight feet long, and it was a warm day and the pavement was dry, the

court stated that skid marks made by a motor vehicle in coming to a stop are evidence of the speed at which the vehicle was traveling at the time.

Also, in *Northern Texas Traction Co. v. Smith* (1920, *Tex Civ App*) 223 SW 1013, a suit for personal injuries alleged to have been sustained through a collision of a streetcar and plaintiff's automobile, the court held admissible testimony of a witness as to the location of the wrecked automobile the next morning after the accident, and the marks and tracks on the street that he found, tending to show that the automobile had been dragged a considerable distance, this evidence being admissible on the issue of whether the streetcar was running at an unlawful speed.

So too, in *Stubbs v. Allen* (1932) 168 Wash 156, 10 P2d 983, an action to recover damages arising out of an automobile accident, testimony as to skid marks at the scene of the accident observed quite a while after the accident occurred was held admissible as having a reasonable bearing on the question of the speed of defendant's car, the court stating that the exact place, courses, and distances of the marks, considered in connection with the dry weather conditions and others circumstances affecting the subject, relieved the admission of the testimony of any reasonable claim of error.

Testimony as to skid marks is admissible as bearing on speed of vehicle:

See *Spain v McNeal* (1975, Dist Col App) 337 A2d 507, infra § 12.

Where evidence regarding speed of vehicles involved in intersectional collision was conflicting, photographs of accident scene which showed skid marks were admissible notwithstanding failure of proponent to call photographer to identify and verify them, in view of testimony of driver of one vehicle that photographs accurately depicted scene immediately after collision. *D. C. Transit System, Inc. v Acors* (1972, Dist Col App) 293 A2d 871.

Skid marks are pertinent and may be properly considered, even in absence of expert testimony, by jury in connection with other evidence whenever speed is in issue. *State v Arena* (1963) 46 Hawaii 315, 379 P2d 594, 20 ALR3d 450

(citing annotation).

See *Viehweg v Thompson* (1982, App) 103 Idaho 265, 647 P2d 311, § 6.

See *Diederich v Walters* (1975, 2d Dist) 31 Ill App 3d 594, 334 NE2d 283, revd 65 Ill 2d 95, 2 Ill Dec 685, 357 NE2d 1128, infra § 12.

Officer was properly permitted to testify as to measurement of skid marks, and as to tables in "Traffic Accident Investigation Manual" which, taken together, caused him to estimate speed of 28 miles per hour, where he admitted that this was not area of his expertise, in that he was only generally familiar with tables, and where he was not questioned as accident reconstruction expert, but instead, was used as expedient vehicle to get tables before jury. *Terre Haute First Nat'l Bank v Stewart* (1983, Ind App) 455 NE2d 362.

It was error to permit police chief to testify as to what speed, in his opinion, truck was traveling at time it collided with plaintiff's automobile, based upon observations of tire marks found at scene, but error was not prejudicial in view of other evidence from which jury could have determined speed. *Marsh v Johnson* (1968, Miss) 209 So 2d 906 (ovrld in part by *Hollingsworth v Bovaird Supply Co.* (Miss) 465 So 2d 311).

Police officer's estimate of vehicle's speed with certain skid marks was properly excluded where testimony was based solely on chart furnished him at police academy, and he had no personal knowledge of mathematical or physical factors involved and was not qualified as expert. *Gray v Turner* (1962) 245 Miss 65, 145 So 2d 470 (citing annotation).

Where expert opinion on speed depended on resolution of many variables so that it was, in effect, a mere statement of possibility, court erred in permitting witness to state his opinion as to speed of defendant's automobile, and court should have confined witness' testimony to speed computed on basis of skid marks only. *Brugh v Peterson* (1968) 183 Neb 190, 159 NW2d 321, 29 ALR3d 236.

See *Fowler v Graves* (1986) 83 NC App 403, 350 SE2d 155, § 3.

Testimony concerning ruts more than half a mile from accident intersection is not material, especially where there is no testimony concerning any ruts near intersection. *Thompson v Nettum* (1968, ND) 163 NW2d 91 (ovrld in part by *Shark v Thompson* (ND) 373 NW2d 859).

Absent other evidence of excessive speed or reckless driving, tire skid marks made by motor vehicle involved in accident are not probative evidence of speed of vehicle without expert testimony as to how length of skid marks can be used to determine speed. *Suchy v Moore* (1972) 29 Ohio St 2d 99, 58 Ohio Ops 2d 194, 279 NE2d 878 (citing annotation).

Investigating officer was properly permitted to testify as to approximate speed of both vehicles involved in auto accident, based on measurement of skid marks, where factual predicate for officer's opinions concerning evasive actions taken by defendant and speed of defendant's vehicle was adequate, and where he was shown to be qualified to make such estimate, notwithstanding fact that he did not detail what physical evidence other than skid marks he had relied upon in coming to his conclusions. *Rogers v Gonzales* (1983, Tex App Corpus Christi) 654 SW2d 509, writ ref n r e (Sep 14, 1983)

Nonexpert testimony as to speed of vehicle, as indicated by skid marks, is admissible. *Knight v Borgan* (1958) 52 Wash 2d 219, 324 P2d 797 (citing annotation).

[\*8] To show location of vehicle with respect to center line of road or otherwise

It has frequently been held that testimony descriptive of tire or skid marks at the scene of the accident is competent on the question as to the location of the car or cars involved in the accident with respect to the center line of the highway or other part thereof at the time of the accident, where there is sufficient evidence from which it may be reasonably inferred that the tracks or marks were made by the car in question.

*Anderson v. Sparks* (1910) 142 Wis 398, 125 NW 925

Testimony of a highway patrolman showing that certain tire marks led to defendant's car when it came to rest, and showing the course it took to reach that point, is admissible. *Brady v. McQuown* (1949) 241 Iowa 34, 40 NW2d 25

In *Hoffer v. Burd* (1951) -- ND -- , 49 NW2d 282, an action to recover damages for injuries sustained in a head-on collision of two automobiles, in which plaintiff contended that defendant's car was being operated on the wrong side of the road at the time of the accident, and there was testimony of two highway patrolmen who arrived on the scene of the

accident about an hour after it occurred and who testified that wheel tracks, observed by them, on the road led from the defendant's car to the point of the accident, which testimony was objected to on the ground that it was a conclusion of the witnesses and that no foundation had been laid for it, the appellate court held that this objection was not tenable, as the officers were testifying as to what they observed; that it was a statement of fact and if there was any conclusion fixed in that fact it was only such as always is involved in testimony describing observations.

And in *Pearce v. Rodell* (1937) 283 Mich 19, 276 NW 883, the court held that it was proper to admit testimony of one who went on the following morning to the scene of an accident which had occurred at 7:30 p.m. the preceding night, and who testified that he saw automobile tracks where they left the pavement, went toward the ditch on the right-hand side, ran along the ditch parallel thereto and back onto the pavement, and further testified that there were no other automobile tracks, there being a conflict in the evidence as to whether plaintiff was walking on the right-hand shoulder of the road as he asserted or on the vehicular part of the highway as defendant claimed.

In *McWhorter Transfer Co. v. Peek* (1936) 232 Ala 143, 167 So 291, an action under the Homicide Act by the personal representative of one who died as the result of the collision of an automobile in which he was riding with defendant's truck, it was held that evidence of plaintiff's witness to the effect that immediately after the accident he saw the tracks of the vehicles on the highway, and that the truck tracks were about in the center of the road, was properly admitted, because if anything had intervened to obscure or prevent discovery of the location of the tracks of the truck, this was matter for cross-examination, or opposing evidence.

In *Romann v. Bender* (1934) 190 Minn 419, 252 NW 80, 34 NCCA 419, it was held that the physical facts, consisting of markings on the cars left by the collision, the track marks on the highway, and the position of the cars after the accident, were proper for the consideration of the jury in an action involving a dispute as to the position of the cars on the highway when the accident occurred.

And in *Clark v. Fazio* (1951) -- Or --, 230 P2d 553, an action for damages for injuries resulting when plaintiff attempted to pass defendant's motor truck, at which juncture the truck made a left-hand turn and a collision resulted, it was held that the trial court did not commit error in admitting, over defendant's objection, testimony respecting tire marks on the pavement claimed to have been made by defendant's truck.

In *A. Macaluso Fruit Co. v. Commercial Motor Freight* (1944, App) 57 NE2d 692, 41 Ohio L Abs 97, an action to recover damages for a fatal injury resulting from collision of two automobile trucks, where the question was which of the two trucks, plaintiff's, which was proceeding in an easterly direction, or defendant's, which was proceeding in a westerly direction, was over the center of the highway, the court stated that a well-recognized rule was that a witness is permitted to give evidence in the minutest detail covering physical conditions, but should not be permitted to testify as to where, in his judgment, the accident happened, where the sole basis of the deduction is the marks on the highway or other physical conditions; however, it was held that the witness' answer conformed to the proper rule in that he described the marks on the highway and their location, in substance stating that there was a splatter of marks approximately right of the center line of the highway and also about six inches south of the center line of the highway, and that there were marks made by dual wheels from this point.

And in *Thomas v. Meyer* (1939) 150 Kan 587, 95 P2d 267, it was stated in a syllabus by the court that in an action for damages for injuries sustained in a collision between a truck and an automobile, it was proper to permit a witness who arrived at the scene of the collision a few minutes after it occurred, and before either of the vehicles had been moved, to testify that the tracks of the truck started at a certain point on the shoulder of the highway, and to permit the witness to testify as to the path followed by the tracks from the point where he first observed them to the point where the truck was when he arrived, such testimony having been introduced for the purpose of showing that the truck was on the left-hand side of the road at the time of the collision.

Also in *Chesshir v. Nall* (1949, Tex Civ App) 218 SW2d 248, error ref n r e, an action to recover damages for fatal

injuries resulting from a head-on collision of the car driven by plaintiff's wife, which was proceeding in an easterly direction, and one driven by defendant's intestate, which was being driven in a westerly direction, the appellate court was of the opinion that the trial court properly admitted testimony of witnesses who were on the scene of the accident immediately after it occurred and who testified that they traced the tire marks of the car of defendant's intestate from the place where it came to a stop to a point south of the center line of the highway. According to all the witnesses who appeared at the scene of the collision, the physical facts placed the point of collision on defendant's intestate's left-hand side of the center line, and no other witnesses testified to any physical facts or circumstances that would indicate or suggest that the point of contact occurred at any other place on the highway, and the appellate court was of the opinion that identification of the marks and tracks of the automobile on the highway could not be considered opinion or conclusion evidence. At any rate defendant waived any just complaint that he might have had to such testimony by failure to object to the same when offered in substance later, and by offering the same testimony in substance himself later on. The court said: "At any rate, if any error was committed it was a harmless error." (As to opinion evidence in connection with tire marks in civil cases, see §§ 9-13, *infra*.)

And in *Williams v. Graff* (1950) -- Md --, 71 A2d 450, 23 ALR2d 106, an action for injuries to one who testified that while attempting to cross from the south to the north side of the road he was struck, according to his version of the accident, while still on the south side of the road, by defendant's car which was proceeding in a westerly direction, it was held that testimony of a policeman who investigated the accident soon after it occurred, but not before the car had been removed, to the effect that he saw skid marks on the north side of the road, was admissible as against plaintiff's objection that such marks were not sufficiently identified as having been made by defendant's automobile, where there was reasonable ground for the inference that the skid marks had been made by the automobile, in view of the proximity of a pool of blood on the spot where plaintiff had been injured.

Also in *Olson v. Wetzstein* (1929) 58 ND 263, 225 NW 459, an action for damages sustained when a bus collided with a Ford operated by plaintiff, where the question of the position of the cars at the time of the collision had a bearing upon the question of negligence and contributory negligence, it was held that there was no error in permitting testimony of a witness who arrived on the scene about five minutes after the accident occurred, and who had previously investigated several accidents, to testify to the effect that he saw tire marks on the pavement at the place where the car stood, and could distinguish between the narrow skid marks of the Ford and the wider marks of the bus tires, and further testified that the narrow Ford tire marks began on the south side of the highway at the right of the division line of the pavement, from a foot and a quarter to two feet from the center and out on the edge of the pavement. The court observed that it was true that the Ford wreck had been removed, or was removed about the time he came there, but that the witness was testifying as to the skid marks, and the jury had a right to know these facts and could judge whether they were marks made by these vehicles.

In *Bybee Bros. v. Imes* (1941) 288 Ky 1, 155 SW2d 492, an action to recover damages for injuries sustained when defendant's truck crashed into plaintiff's automobile, the court, notwithstanding defendant's objection to testimony concerning skid marks on the ground that the witness was unable to identify the marks as being made by defendant's truck, held admissible testimony of a witness who arrived at the scene of the accident within a few minutes after it occurred and saw the skid marks that ran from the truck's right side of the road to the left side "and ran down to the place -- where the collision took place," the left side "and ran down to the truck admitted that he applied the brakes when he started from his side of the road to the left side, and when asked if he made skid marks said he would not call it skid marks but that he left "a black streak where I cut across the highway."

And in *Dye v. Rathbone* (1926) 102 W Va 386, 135 SE 274, it was held that testimony as to tracks seen on the road fifteen minutes after the accident was competent to prove that such tracks led to a rock into which plaintiff motorist crashed after being, allegedly, crowded off his side of the road.

In *Anderson v. Lynch* (1925) 232 Mich 276, 205 NW 134, an action for damages for the death of one driving a Ford touring car when there was a collision between it and a bus operated by an employee of the defendant, it was held that a

witness who, hearing the crash of the cars, went immediately to the scene of the accident, could testify as to the location of the marks of the bus wheels and those of the touring car, notwithstanding the objection of defendant that it was not for the witness to say that a certain track was a Ford track and that a certain other track was a bus track, the court stating that with the cars there and the marks on the pavement visible and traceable, it was of the opinion that the witness might well say he could see the tracks of the Ford car and the tracks of the bus. This testimony was apparently introduced for the purpose of showing that defendant bus driver was proceeding with the left wheels of the bus over the center line of the pavement and into the path of traffic proceeding in the opposite direction, plaintiff having alleged that the accident was so caused.

Where plaintiff was injured when the automobile in which she was a passenger and which was proceeding in an easterly direction was forced, about nine o'clock at night, off the road and over an embankment by a truck allegedly belonging to and driven by defendant, it was held proper to admit testimony of one who reached the scene of the accident about two and a half hours after it occurred to the effect that he observed certain tire marks, presumably made by plaintiff's machine, as they appeared along the southerly edge of the highway, and that "they got closer and closer until they got here and then they dropped off and went down to the fence," because, notwithstanding there was evidence that many machines passed over this point on the highway during the time intervening between the accident and the arrival of the witness in question, there was no evidence that any machine other than plaintiff's went over the embankment at the point on the highway to which the evidence of this witness related. *Hughes v. Hartman (1929) 206 Cal 199, 273 P 560.*

And in *Bowker v. Illinois Electric Co. (1931) 112 Cal App 740, 297 P 615*, an action to recover for injuries sustained when two cars collided, plaintiff's claim being that defendant's car was proceeding on the left-hand side of the road and crowded the car in which plaintiff was riding off the road, the court held as sufficiently relevant evidence of plaintiff's husband to the effect that he visited the scene of the accident during the early morning following its occurrence and found, among other things, two burned rubber marks starting about thirty feet from where the wreckage was and leading directly to the wreckage, the court being of the opinion that the proximity of the marks, leading as they did directly to the wreckage and apparently corroborating the testimony of some of the eyewitnesses, rendered the testimony sufficiently relevant to go to the jury.

In *Harness v. Tehel (1935) 221 Iowa 403, 263 NW 843*, where the testimony showed that the maintainer had just been over the road, showing that the tracks of the two cars could be plainly followed from where they came to the point of the collision, it was held that either side was entitled to have such testimony admitted to bolster up either theory of the case, which would show where the cars really were.

Where the real controversy was as to the place in the road where the collision occurred, testimony of a witness that on the night of the accident he, together with plaintiff, looked the ground over and examined automobile tracks which he thought were those of the defendant's automobile, is admissible. *Anderson v. Sparks (1910) 142 Wis 398, 125 NW 925.*

And in *Abbott v. Hayes (1942) 92 NH 126, 26 A2d 842*, it was held that there was no error on the part of the trial court in refusing defendant's request to strike out testimony that after a head-on collision there were brake marks near where one of the automobiles came to rest, although it was true that upon all the evidence the significance of these marks was somewhat problematical; their existence, however, at the scene of the accident was a part of the description of the locus, and the marks themselves were indicated in a photograph introduced by defendant. Apparently the testimony objected to was submitted for the purpose of showing that one of the cars was on the wrong side of the highway.

In *Quinn v. Zimmer (1931) 184 Minn 589, 239 NW 902*, where plaintiff's car, traveling in a northerly direction, collided at an intersection with defendant's car proceeding in an easterly direction, the court held not prejudicial the admission of testimony of plaintiff as to conditions at the place of the accident on the following day, wherein he disclosed that he found a depression in the road two and a half inches deep, three inches wide and two feet long, and that he located this depression in the north side of the trunk highway, the court stating that apparently at the last moment both cars were attempting to turn from each other and this would take them to the northeast, and the location of the so-called

depression was not, under the circumstances of this case, of substantial importance.

In one case the testimony was held to be inadmissible because of a failure to sufficiently identify the marks with the particular car in question.

Thus, in *Hoover v. Reichard* (1916) 63 Pa Super 517, an action for injuries resulting from a collision of automobiles proceeding in opposite directions, it was held that testimony offered by defendant to the effect that on the morning following the accident, and about twelve hours after it occurred, the witness went to the scene of the accident for the purpose of removing defendant's car and found tracks corresponding to the size of those made by plaintiff's car, which led across from plaintiff's side of the road to the place where defendant's car was standing, was properly excluded, the court stating that if the tracks had been identified as those made by plaintiff's automobile, the testimony would have been relevant, but the turnpike was a much traveled highway and the mere circumstance of a tire making a certain track that may have been the width of the tires of plaintiff's machine was not sufficient identification to send the evidence to the jury.

See also the following cases: *Clark v. Reising* (1937) 341 Mo 282, 107 SW2d 33, and *McCreedy v. Fournier* (1920) 113 Wash 351, 194 P 398, both supra, § 5.

Rule that testimony as to tire marks at scene of accident is competent to show location of vehicle involved in accident with respect to center line of highway, supported by:

The following additional authority is relevant to the issues discussed in this section:

◇

Expert testimony that scrape mark on north side of highway made by left dolly or parking wheel on plaintiffs' trailer and that plaintiffs' truck had therefore been on wrong side of highway at time of collision was admissible. *Clifton v Mangum* (1966, CA10 NM) 366 F2d 250.

In action for death of passenger in automobile as result of left rear end of car being struck by overtaking hearse, evidence of faint tire marks on highway shoulder considerable distance from point of impact was too speculative to raise jury question as to whether car had been driven onto highway from shoulder in front of hearse. *Becker v Adkins* (1966, Fla App D1) 184 So 2d 682, cert den (Fla) 189 So 2d 633.

Evidence as to absence of skid marks at scene of accident was admissible on question whether defendant applied brakes before colliding with parked cars. *Taylor v Fitzpatrick* (1956) 235 Ind 238, 132 NE2d 919.

Trooper's testimony that he was able to identify tire marks in highway and traced them to each vehicle involved in collision was competent in absence of element of speculation. *McCallum v Harris* (1964, Ky) 379 SW2d 438.

See *Dudek v Popp* (1964) 373 Mich 300, 129 NW2d 393, infra § 14.

Expert testimony was properly admitted in wrongful death action based on collision between automobile and motorcycle to show location of collision, where photograph of skidmark was received into evidence without objection, testimony as to other circumstances provided foundation, and no other evidence contradicted expert's opinion as to in which lane accident occurred. *Soulier v Hughes* (1986, 3d Dept) 119 App Div 2d 951, 501 NYS2d 480.

Testimony by highway patrolman that skid marks of defendant's decedent's vehicle began on wrong side of highway was admissible since jury could properly consider skidding in determining defendant's decedent's negligence in collision in which there were no survivors and to which there were no eyewitnesses. *Anderson v Webb* (1966) 267 NC 745, 148 SE2d 846.

Testimony of patrolman that there were marks on pavement indicating that particular vehicle was making a left turn at time of impact was admissible. *Deskins v Woodward* (1971, Okla) 483 P2d 1134.

[\*9] Opinion evidence by nonexpert witness; generally

With respect to the general rule of exclusion of opinion evidence it is stated in 20 Am Jur, Evidence § 765: "It is a fundamental principle of the law of evidence. . .that the testimony of witnesses upon matters within the scope of the common knowledge and experience of mankind, given upon the trial of a cause, must be confined to statements of concrete facts within their own observation, knowledge, and recollection -- that is, facts perceived by the use of their own senses -- as distinguished from their opinions, inferences, impressions, and conclusions drawn from such facts. Generally speaking, the opinion or conclusion of a witness upon a fact or facts in issue is incompetent and inadmissible, although there are exceptions to this rule as well settled as is the rule itself, where the issues involve facts and matters calling for special skill and study or where the facts in controversy are incapable of being detailed and described so as to give the jury an intelligible understanding concerning them. . . He [witness] cannot, over objection, be asked questions calling for, or permitted to express, his opinion or conclusion upon facts which are in the province of, and are to be determined by, the jury or by the court trying a case without a jury, provided those facts are capable of being so detailed and described that they can be fully placed before the jury or the court by the witness. . .having actual knowledge of them. It is for the jury or the court, as the case may be, whenever the question is one which can be decided by ordinary experience and knowledge, to determine the truth as to the evidential facts from the facts stated by the witnesses, and to draw the conclusions deducible from such evidential facts by the exercise of their own judgment and reasoning powers without hearing the opinions of witnesses. . . It would be invading their peculiar province as triers of the facts, when the

question for determination involves matters of common knowledge and experience, to permit a witness to state to the jury his opinions as to the conclusions to be drawn from the concrete facts which he has observed. However, it is difficult in many cases to say where fact leaves off and opinion begins. Practically every statement of fact is the conclusion of him who makes it, based upon his powers of observation, his eyesight, his hearing, or his sense of smell or touch."

Applications of these broad general principles with respect to the testimony of witnesses based on their observation of tire or skid marks have been made in a number of specific instances, the nature of which will be indicated in succeeding sections.

[\*10] Identity of vehicle making marks

A witness who arrived at the scene of an accident immediately or soon after it occurred may properly be allowed to testify that marks leading up to a particular car, the position of which had not been changed subsequently to the accident, were made by such automobile.

Thus, a witness who testified that, although he did not see the collision, he arrived at the scene thereof before the water had run out of the radiator of the wrecked automobile truck, and observed tracks leading up to it on the right-hand side of the road, may properly be asked whether such tracks were the ones made by the wrecked truck, the court stating that it required but little effort to be able to trace the tracks backward along the road, and that it was not a question as to correspondence or similarity of tracks, but was one of fact, open to the personal observation of the witness; so the question did not fall within or was not governed by the rule excluding opinion evidence as to tracks, but called for the statement of a fact which was open to the observation of the witness. Thus a situation was presented different from that contemplated by cases from Alabama which hold that a witness cannot be allowed to state his opinion that a certain shoe or foot could or would make a particular track, that being the very fact the jury are to determine. *Alaga Coach Line v. McCarroll* (1933) 227 Ala 686, 151 So 834, 92 ALR 470.

And in *Cahill v. Bradford* (1926) 172 Ark 69, 287 SW 595, where plaintiff was injured when a car turning a corner at a street intersection got out of control and jumped the curb, and defendant alleged that the accident was due to the fact that another car sideswiped him, forcing him over the sidewalk, it was held that a witness for defendant was properly permitted to testify that the skid marks were those of the sideswiping car and that it looked as if defendant's car had been pushed or jammed toward the sidewalk and that the marks he saw were skid marks where defendant's car had been jammed or swiped sideways toward the sidewalk, notwithstanding the objection of plaintiff that the witness was permitted to state a conclusion, when he should have described the conditions which he saw and left the inferences therefrom to be drawn by the jury. The court was of the opinion that this objection was not well taken, as the position of the cars, when the witness saw them, had not been changed after the accident, and the witness could, of course, see and know what car had skidded and the place from which it began to skid and the place where it stopped, and he said this was true because he saw the skid marks, the court stating that this was not necessarily a matter of opinion. The court remarked that there was involved in the answer of the witness a mixture of fact and opinion, but that the portion of the answer which was objected to as an opinion was a part of the description of the conditions which the witness saw, and that it may have been difficult for him to have otherwise reproduced the scene to the jury, and the statement, as a whole, was one which men in general could comprehend and understand.

Testimony of the driver of plaintiff's car at the time of the collision to the effect that certain tire marks were tires of the automobile driven by the witness at the time of the collision was held admissible as against defendant's objection that this was a conclusion, the court pointing out that defendant failed to distinguish a conclusion from an observation of a fact, to which this witness was testifying. *Smith v. Keyes* (1937) 103 Ind App 487, 9 NE2d 119.

The court in *Thomas v. Meyer* (1939) 150 Kan 587, 95 P2d 267, approved the rule that where a witness has given special attention to tracking motor vehicles by tire marks, the admission of his opinion as to the identity of an

automobile tracked by him is not error, the subject matter of his testimony being an ordinary one, not calling for the knowledge of an expert.

And in *White v. East Side Mill & Lumber Co.* (1917) 84 Or 233, 164 P 736, 15 NCCA 848, an action to recover for the death of a traffic officer struck by a motor vehicle while he was in the center of a street intersection directing traffic, the testimony of a witness who examined the tracks of the automobile about thirty minutes after the injury that there were blotches in the dust that would be made by tires of the kind on the automobile in question, was held admissible upon the theory that, as the facts could not be reproduced to the jury, it fell within the exception to the general rule that a witness must testify to facts and not to conclusions or opinions. The court stated that there are exceptions to this rule, founded upon necessity, for the reason that the facts cannot be depicted to the jury precisely as they appear to the witness; that from the nature of the subject it is impracticable for him to relate what he might have seen without supplementing his description with his conclusion; and that under such circumstances a common observer, although not an expert, may testify to his opinion or conclusion regarding what he has seen. It would have been practically impossible in the case at bar, the court added, for the witness to describe the automobile truck tire, which appeared to be a kind of double-nonskid type, and the marks in the dust, both of which he had seen, and the jury could determine whether the tracks were made by the truck.

In *Silsby v. Hinchey* (1937, Mo App) 107 SW2d 812, where a witness for plaintiff, who was the first person upon the scene after the collision of the two automobiles, testified to the presence of certain skid marks which he had observed upon the highway, and which were looked upon as indicative of the course the respective automobiles had taken as a result of the collision, and was asked whether certain marks leading over to the side of the highway where defendant's car was standing could, in his opinion, have been made by that car, to which the witness, over defendant's objection, stated that he thought they could, and it was argued that the opinion of the witness was inadmissible for two reasons, the first that the witness lacked the necessary qualifications for giving opinion evidence, and the second that the subject of the inquiry was not a matter calling for opinion evidence, the court said that the actual fact was that regardless of all references to the matter of qualifications, and regardless of the use of the word "opinion" in framing the question objected to, the answer of the witness was not opinion evidence in its true sense at all, but that on the contrary, such testimony was directed to certain facts the witness had observed which were relevant to the question of which driver had been at fault in the collision, and while the question addressed to him might have been objectionable as calling for a conclusion, it was not objected to by counsel upon that ground. The court observed that the incident was at best but a trivial one, and could hardly have affected the outcome of the case one way or the other.

In *Blalack v. Blacksher* (1914) 11 Ala App 545, 66 So 863, it was held that there was no error in permitting a witness, on his examination in chief, to testify, over plaintiffs' objection, as to (1) plaintiffs' automobile making a certain track which he saw in the street, (2) the direction from which the car approached, (3) the tracks showing where plaintiffs' chauffeur applied the brake, and (4) the distance the car had skidded before it reached the place where the collision occurred, where the witness testified as though he had been present and had seen the car when it made the track. But where it was shown on cross-examination that the witness was not present and did not see the car make the track, nor the collision, and that it was his opinion that plaintiffs' car made a certain track, it was held that the trial court committed error in overruling plaintiffs' motion to exclude the testimony of this witness that the plaintiffs' car had made this track, inasmuch as the witness should have been required to state the facts, if there was any peculiarity about the track or any features by which it could be distinguished from any other automobile track, as these facts should have been shown, and then it was the province of the jury to determine whether the track in question was made by the plaintiffs' car or by some other car.

And in *Ficke v. Gibson* (1950) 153 Neb 478, 45 NW2d 436, it was held that where witnesses who examined the car tracks fifteen hours after the accident testified to the effect that the tire marks or skid marks were those of defendant's truck, referred to them in testifying, and, from their location, described how and where the accident occurred, an objection to the testimony as calling for the conclusion of the witnesses should have been sustained, there being no affirmative showing that the conditions at the scene of the accident had not changed by the time it was visited by the

witnesses the next morning.

Also, in *McKee v. Batcheler* (1934) 219 Iowa 93, 257 NW 567, it was held that the trial court committed reversible error in permitting seven witnesses to testify that certain tracks described by two other witnesses were the identical tracks which they, the seven witnesses, saw at the scene of the accident shortly after it happened, the two other witnesses having testified that, seventeen hours after the accident, defendant pointed out to them certain tracks on the highway which he said were made by his car at the time it struck decedent. The court stated that the testimony of such seven witnesses amounted to the expression of their opinion and conclusion, and invaded the peculiar province of the jury, and further stated that it would be sufficient for the seven witnesses in question to have described the tracks they saw, whereupon the jury could draw all necessary inferences therefrom. It is the settled rule of law, said the court, that a witness may describe automobile tire marks, if any, their appearance and length, and other circumstances relating thereto, and thereupon the inference to be drawn therefrom becomes the province of the jury. The court further observed that the question as to whether or not certain automobile tracks seen by a witness are identical with, or the same tracks as, those described by another witness, is not a matter of expert opinion evidence, and that the questions here challenged clearly called for the opinion and conclusion of the witnesses, and clearly invaded the province of the jury.

The following additional authority is relevant to the issues discussed in this section:

<>

Tire marks in photograph of accident scene, not shown caused by defendant's automobile, were not competent or admissible to show automobile's direction or course. *Mutz v Lucero* (1961) 90 Ariz 38, 365 P2d 49.

See *McKee v Chase* (1953) 73 Idaho 491, 253 P2d 787 (citing annotation), *infra* § 13.

Testimony as to tire marks on highway was admissible to identify vehicle making marks. *Soreide v Vilas & Co.* (1956) 247 Iowa 1139, 78 NW2d 41 (citing annotation).

Nonexpert testimony that drag marks on highway were "fresh" is incompetent to show marks were made by car which struck pedestrian. *Glazier v Tetrault* (1952) 148 Me 127, 90 A2d 809.

Nonexpert's testimony that marks on highway appeared to be skid marks of dual-wheel tractor was admissible. *Brawley v Esterly* (1954, Mo) 267 SW2d 655 (overruled as stated in *Bentley v Crews* (Mo App) 630 SW2d 99 (criticized by *Lauderdale v Siem* (Mo App) 725 SW2d 897 (criticized by *Parry v Staddon* (Mo App) 769 SW2d 811))).

Testimony as to tire marks was inadmissible where proof did not show identity of vehicle which made marks. *Egenberger v National Alfalfa Dehydrating & Milling Co.* (1957) 164 Neb 704, 83 NW2d 523 (superseded by statute as stated in *Kennedy v Kennedy*, 221 Neb 724, 380 NW2d 300) (recognizing rule).

In action arising out of collision, trial court erred in excluding testimony as to tire marks leading to vehicle parked in driveway. *Coffin v Cunningham* (1960, 4th Dept) 11 App Div 2d 1082, 206 NYS2d 353.

In action arising out of collision, trial court did not err in permitting police officers to testify that skid marks led to plaintiff's car. *Mantz v Ruffit* (1961) 403 Pa 436, 170 A2d 101.

Trial court properly sustained objection to testimony as to skid marks where no proper connection was shown between marks and defendant's car; but testimony as to mark was admissible, in view of identification and testimony as to its characteristics where defendant admitted that he skidded prior to accident. *Deeney v Krauss* (1959) 394 Pa 380, 147 A2d 369.

See *Butane Wholesale Co. v Buehring* (1959, Tex Civ App San Antonio) 325 SW2d 173, writ dismissed (Jul 22, 1959), supra § 4.

In automobile collision case, nonexpert testimony as to skid marks on road was admissible to establish that marks were made by cars involved in collision. *Atkinson v Huber* (1955) 268 Wis 615, 68 NW2d 447.

[\*11] Position of vehicles on highway at time of accident

It seems that where the witness made his observation of the tire tracks or skid marks within a short time after the accident or before there had been any change in the position of the cars or other conditions on the highway by traffic or otherwise at the scene of the accident subsequently to its happening, he may give his opinion as to the location of the cars on the highway at the time of the accident.

Therefore, a witness who was upon the scene of the accident within a minute or two after it occurred and was the first person to arrive there after the accident and who made an investigation of the facts, and had an opportunity to observe the tracks of the vehicles and the condition of the road, and whose testimony showed that no other vehicle had approached or passed the place of the accident, may give his opinion as to the point in the road at which, with reference to the center thereof, the impact occurred. *McPherson v. Martin* (1937) 234 Ala 244, 174 So 791; it was held that the trial court did not commit error in overruling objections of defendant to questions asked of a witness, who was upon the scene of the accident a minute or two after it occurred and who observed the tracks of both vehicles, no other vehicle having at that time approached or passed the place of the accident, as to just what point in the road with reference to the center of the highway the impact occurred and as to what impression there was to show this fact, notwithstanding the objection of defendant that the question called for the opinion or conclusion of the witness, the court pointing out that the witness had fully observed the conditions as he had found them, and these circumstances and conditions he had detailed to the jury, along with his conclusions. The court in this case applied the rule that where a fact cannot be reproduced and made apparent to the jury, the witness may describe the fact according to the effect produced on his mind; or if from the nature of the particular fact, better evidence cannot be obtained, the opinion of a witness, derived from observation, is admissible. This is one of the recognized exceptions to the general rule that a witness must testify to facts, and is not permitted to express mere matters of opinion.

And in *Lange v. Affleck* (1931) 160 Md 695, 155 A 150, 79 ALR 1274, it was held that testimony of a witness who saw an automobile collision and immediately afterward examined the marks made on the road by one of the cars involved, as to the position of the cars when they collided, was not objectionable as involving an expression of an opinion based on statements of others, or on an assumption of facts, but was a recital of facts all within the witness' observation and knowledge.

Also in *Lambert v. Caronna* (1934) 206 NC 616, 175 SE 303, an action for injuries sustained when the plaintiff's automobile crashed into the rear end of defendant's parked car, it was held that witnesses could give their opinion, based on skid marks they saw at the scene of the accident, as to the position of the parked car with relation to the road and shoulders. The court quoted from *Kepley v. Kirk* (1926) 191 NC 690, 132 SE 788, where it was said: "The witness knew the road and was familiar with the conditions and could state the facts from personal observation. Where an inference is so usual, natural, or instinctive as to accord with general experience, its statement is received as substantially one of a fact -- part of the common stock of knowledge."

Testimony of a witness who viewed the scene twelve hours after the accident, to the effect that from his observation of the tracks of the two cars, which were going in opposite directions, it seemed that defendant's automobile swerved toward the side of the road on which plaintiff was driving, is competent to show how the accident happened. *Jewel Tea Co. v. McCrary* (1938) 197 Ark 294, 122 SW2d 534. The witnesses testified that there were no other tracks at the scene of the collision.

And in *Nicholson v. Feagley* (1940) 339 Pa 313, 14 A2d 122, where the negligence asserted was that defendant's car was being driven on the wrong side of the road at the time of the collision, it was held that admission of testimony of a policeman, who arrived one and a half hours after the accident, as to the position of the cars, and his expression of opinion that their position had not been altered, his conclusion in part being based upon the marks leading to the vehicles, was not ground for reversal, it being pointed out that he was not asked to draw a conclusion of negligence from the position of the cars or the marks on the road, that he testified, not as an expert, but as an observer, and that the jury was free to draw its own inferences from his testimony. The court distinguished this case from that of *Johnson v. Philadelphia & Reading R. Co.* (1925) 283 Pa 480, 129 A 569, supra, § 6, in which it was held that a witness who inspected the scene of a grade crossing accident more than an hour after its occurrence could not be permitted to testify as to the existence of tire marks, indicating that an automobile had skidded at the place where the plaintiff's car was struck, the court therein observing that there was no offer of proof that the marks were not there before the accident, or that they were not made by some other car after the accident, whereas it was pointed out in the case at bar that the witness traced the tire marks to the automobiles involved in the collision.

See also, as involving opinion evidence, *A. Macaluso Fruit Co. v. Commercial Motor Freight* (1944, App) 57 NE2d 692, 41 Ohio L Abs 97, supra, § 8.

However, in *Arrick v. Fanning* (1950) 35 Ala App 409, 47 So2d 708, where a highway patrolman reached the scene about thirty minutes after the collision, but did not find any discernible vehicle track except at the point of impact, and did not see any skid marks, it was held that the conditions and markings that he observed did not authorize him to accurately answer the question: "Then the Fanning (plaintiff's) truck started the turn prior to reaching the center line of the crossroad?"

The following additional authority is relevant to the issues discussed in this section:

◇

Police officer's testimony as to marks on highway was admissible to show point of impact in auto accident case. *De Vita v Long* (1957, DC Pa) 147 F Supp 810 (citing annotation -- holding testimony admissible notwithstanding lapse of 40 minutes between time of accident and time of observation).

Police officer's testimony was admissible to show location of plaintiff's car at time of collision. *Powley v Appleby* (1957, Cal App) 314 P2d 761, subsequent op on reh (2nd Dist) 155 Cal App 2d 727, 318 P2d 712 (by implication).

Police officer's testimony as to scratch marks on highway, and as to approximate point of impact as determined from marks, was admissible. *Engelke v Wheatley* (1961) 148 Conn 398, 171 A2d 402.

Diagram indicating "deep scrape marks believed to be north point of impact" was admissible along with sheriff's opinion as to point of impact and that trailer involved in accident had jackknifed, where sheriff had opportunity to investigate scene of accident reasonably soon after accident and had sufficient evidence to form reasonable opinion based on his observation as to point of impact. *Schmitt v Jenkins Truck Lines, Inc.* (1969, Iowa) 170 NW2d 632, 46 ALR3d 636 (ovrld in part by *Weil v Moes* (Iowa) 311 NW2d 259 (ovrld in part by *Audubon-Exira Ready Mix, Inc. v Illinois C. G. R. Co.* (Iowa) 335 NW2d 148)).

Police officer is properly permitted to express his opinion as to point of impact after stating his observation of skidmarks. *Lucas v Duccini* (1965) 258 Iowa 77, 137 NW2d 634.

Testimony as to tire marks at place of collision was admissible on question of location of vehicles with respect to center

of highway where it could reasonably be inferred that marks were made by one of colliding vehicles. *Soreide v Vilas & Co.* (1956) 247 Iowa 1139, 78 NW2d 41 (citing annotation).

Nonexpert witnesses could only testify as to facts concerning skid marks made by vehicle involved in collision, such as direction, length, and starting and stopping points, and could not state opinions as to location of vehicle and how accident occurred, based thereon. *Mountain Petroleum Co. v Howard* (1961, Ky) 351 SW2d 178.

Police officer's testimony as to tire marks was admissible on question of position of vehicle at time of accident. *Nutting v Wing* (1956) 151 Me 435, 120 A2d 563.

Exclusion of police officer's testimony as to location of point of impact based on skid marks was reversible error. *LaFave v Kroger Co.* (1966) 5 Mich App 446, 146 NW2d 850.

Highway patrol officer's testimony as to marks on highway, indicating position of defendant's truck at time of accident, was admissible; witness' testimony as to observation of scene 2 days after accident was also admissible where it appeared that tracks existed on both occasions. *Arnold v Reece* (1957) 229 Miss 862, 92 So 2d 237.

Police officer's testimony as to tire marks was admissible to show position of vehicles at time of accident. *Kirkman v Baucom* (1957) 246 NC 510, 98 SE2d 922.

Permitting eyewitness to accident to testify as to location of point of impact of automobiles with reference to center of road was proper where eyewitness observed wheel tracks immediately following accident, and testimony was based on what he saw as well as on tracks. *Attleson v Boomgarden* (1955, ND) 73 NW2d 448.

In action where key issue was position of vehicle at time of impact, witness should have been permitted to testify that he saw skid marks. *Brice v Danisch* (1966) 244 Or 505, 419 P2d 18.

Testimony of farmer living near scene of accident as to location on highway of tire marks which he had observed and as to tire marks which led from point on defendant's side of road a distance of 150 yards to location of defendant's truck after collision on wrong side of road was admissible. *Briggs v Lloyd* (1966, Tex Civ App Waco) 405 SW2d 865, writ dismissed (Oct 26, 1966)

Police officer's testimony as to skid marks was admissible to show position of cars at time they collided. *Jensen v Criter* (1960) 9 Wis 2d 177, 100 NW2d 380.

[\*12] Speed

A nonexpert witness should not be allowed to give his opinion, based solely on tire or skid marks made by the tires of the car in question, as to the speed at which it was being operated at the time of the accident.

## IOWA

*Nelson v. Hedin* (1918) 184 Iowa 657, 169 NW 37  
*Ward v. Zerzanek* (1940) 227 Iowa 918, 289 NW 443

## NORTH CAROLINA

*Tyndall v. Harvey C. Hines Co.* (1946) 226 NC 620, 39 SE2d 828

## OREGON

*Everart v. Fischer* (1915) 75 Or 321, 147 P 189, mod on reh 75 Or 316, 145 P 33

## WASHINGTON

*Cleasby v. Taylor* (1934) 176 Wash 251, 28 P2d 795

Thus in *Nelson v. Hedin* (1918) 184 Iowa 657, 169 NW 37, it was held that a witness who did not see the defendant's car in motion, but observed the marks made in the street by the skidding of the wheels, was not competent to testify as to the rate of speed at which the car must have been moving, since an answer to such question, if it should be thought to amount to anything more than mere guesswork, could at best be the merest conclusion. The court stated that it would doubtless be proper to prove the marks, if any, their appearance, length, and other circumstances relating thereto, and that the jury could draw all legitimate inferences therefrom as well and as correctly as the witness.

And in *Tyndall v. Harvey C. Hines Co.* (1946) 226 NC 620, 39 SE2d 828, it was held that a highway patrolman who, although he did not see the truck involved while in motion, went to the scene of the accident to make an investigation and gave testimony as to the marks on the shoulders of the road and upon the grass made by the truck, should not have been allowed to give his opinion, based upon these marks, as to the rate of speed at which the truck was being driven at the time of the impact, inasmuch as when he gave his estimate of speed he was not speaking of what he saw, but was giving a conclusion reached upon a consideration of the facts he observed, and the jury were just as well qualified as he to determine what inferences the facts about which he testified permitted or required. The court said: "He gave a plain, clear, and distinct description of the signs, marks, and conditions he found at the scene of the collision so that ordinary jurymen could readily understand and appreciate just what he saw. Hence the jury was just as well qualified as he to determine what inferences the facts about which he testified permitted or required."

Also in *Everart v. Fischer* (1915) 75 Or 321, 147 P 189, modg on reh 75 Or 316, 145 P 33, an action to recover for injuries resulting from a collision with an automobile, it was held that a nonexpert who did not see the automobile in motion or appear on the scene until some time after the accident had happened, but who testified that behind the car, and in the direction from which it came, she had observed two black streaks upon the pavement, was incompetent to give her opinion as to the speed of the automobile, the court stating that, conceding that it was a matter calling for opinion evidence, there were no adequate grounds upon which any expert could form an estimate; that the mere marks upon the pavement did not constitute a sufficient basis for that kind of testimony; that the ultimate object of the inquiry on that point was the speed of the vehicle; that it was reasonable that if a very heavily loaded car with wheels thus locked were propelled along a pavement at a very slow rate of speed, marks would be left behind; that, again, the condition of the tires and the street as to being rough or even would affect such marks; that naturally a very smooth tire upon a very smooth surface, which, in turn, might be affected by a condition of dampness or frost, would produce but a faint marking; that a variance in smoothness of either the tire or the pavement would produce different results; that there was no testimony about any such conditions, or at least none of them was suggested or mentioned by the witness; and that consequently the foundation for expert testimony did not exist. The court further said: "In this case the witness. . . did not see the car in motion nor witness the accident. The only circumstance upon which she bases her opinion is the existence of two black streaks on the pavement. . . . In our judgment it was not a matter for opinion or expert evidence because it did not involve anything of science or technical learning. The jury was quite as competent to judge of the speed of the car from that circumstance as a young girl who has not shown herself to be particularly skilled in the use or observation of motor vehicles. In brief, if she had seen the car in motion at the time of the accident, she could have given her opinion as a lay witness about its rate of speed. As her testimony on that point, however, involved a deduction from the circumstantial evidence of tracks, it was not for her, but for the jury alone, to make that or any deduction.

Moreover, if it could be considered a matter authorizing opinion evidence, there was not sufficient data disclosed by the testimony to authorize an opinion from even the most learned on such subjects."

In *Heidner v. Germschied* (1919) 41 SD 430, 171 NW 208, an action to recover for the death of a child struck by an automobile, in which it was claimed that the car was running at an unwarranted rate of speed, witnesses who had shown themselves familiar with the handling of cars, had examined the roadbed at the place of the accident, and had seen the marks made by the sliding car, were held competent to give their opinions as to the rate of speed at which the car must have been running, where there was evidence as to the kind of car, the condition of the roadbed, the place where the brakes were applied, the place where the child was struck, and the distance which the car slid along the ground before stopping. It is to be observed that in this case there was something more in the case than the mere observation of tire marks upon which to predicate an opinion; therefore, the case cannot be said to be contra the preceding cases.

And in *Bains Motor Co. v. Le Croy* (1923) 209 Ala 345, 96 So 483, it was held that there was no error in admitting testimony of witnesses giving their opinion as to the rate of speed at which the automobile was moving when it was several hundred feet from the curve in the road, before striking plaintiff, and its rate of speed when nearer to plaintiff, as well as the distance in which it was stopped, and the circumstances of its stopping, including wheel prints in the roadway or on the bank beside the roadway.

The following additional authority is relevant to the issues discussed in this section:

<>

Evidence as to car's skid marks was admissible, but not so conclusive as to overcome contrary testimony, in action arising out of collision between car and motorcycle. *Stafford v Alexander* (1960, 2nd Dist) 182 Cal App 2d 301, 6 Cal Rptr 219.

Opinion evidence of speed by mechanical engineer was admissible where expert based opinion on length of plaintiff's skid marks before and after collision, friction coefficient of pavement, weight of vehicles involved, and distance between center of gravity of defendant's vehicle and point at which it was struck by plaintiff's vehicle. *Spain v McNeal* (1975, Dist Col App) 337 A2d 507.

See *Hixson v Barrow* (1975) 135 Ga App 519, 218 SE2d 253, appeal after remand 142 Ga App 65, 234 SE2d 805, infra § 15.

In wrongful death action, court improperly allowed investigating officer to state opinion as to speed of defendant's auto based upon his analysis of length of skid marks through use of "Nomograph," where officer was not qualified as expert in estimating speed of motor vehicle from skid marks; even if officer was expert, reconstruction testimony would be unnecessary and inadmissible due to fact there were two eye witnesses to accident. *Diederich v Walters* (1975, 2d Dist) 31 Ill App 3d 594, 334 NE2d 283, revd on other grounds 65 Ill 2d 95, 2 Ill Dec 685, 357 NE2d 1128.

Expert may give opinion, based on length of skid marks as shown by picture, as to speed of car involved in accident. *Cherry v State Auto. Ins. Asso.* (1957) 181 Kan 205, 310 P2d 907.

Admission of state policeman's opinion as to speed of plaintiff's car, based on marks showing distance it shoved defendant's car, was error where witness was not qualified as expert and based opinion on force of impact, omitting consideration of other material factors. *Jackson v Trogan* (1961) 364 Mich 148, 110 NW2d 612.

See *Gray v Turner* (1962) 245 Miss 65, 145 So 2d 470 (citing annotation), supra § 7.

Admission of trooper's opinion that wheel marks indicated that defendant's car had been accelerating for some distance before it went off road was held not error where witness' duty was to investigate accidents, and he was on scene shortly after occurrence and saw tire tracks while they were still fresh and plain. *Zellers v Chase* (1964) 105 NH 266, 197 A2d 206.

Exclusion of testimony of investigating officer who was not engineer and had no special training in assessing speed of vehicles from skid marks was not abuse of discretion, since it is matter of common knowledge that skid marks may be affected not only by speed at which vehicle is being driven, but also by condition of surface of highway, type of tread and degree of wear of tires, weight of vehicle, condition of brakes, and manner in which they are applied. *Nesta v Meyer* (1968) 100 NJ Super 434, 242 A2d 386.

See *Fowler v Graves* (1986) 83 NC App 403, 350 SE2d 155, § 3.

Nonexpert witness should not be permitted to give opinion as to speed of vehicle at time of accident, based solely upon skid marks made by tires of vehicle. *Suchy v Moore* (1972) 29 Ohio St 2d 99, 58 Ohio Ops 2d 194, 279 NE2d 878 (citing annotation).

Trial court did not abuse its discretion in permitting testimony by mechanical engineer as to calibration of speedometer of truck and skid tests and as to speed of truck at times brakes were applied based on comparison with known length of skid marks created when driver applied brakes on same truck immediately prior to striking nine-year-old plaintiff where jury was properly instructed on how to evaluate assumed facts which formed basis of expert's opinion. *King v Branch Motor Express Co.* (1980, Montgomery Co) 70 Ohio App 2d 190, 24 Ohio Ops 3d 250, 435 NE2d 1124, motion overr

Expert witness may give his opinion as to speed of automobile from length of its skid marks. *Thomas v Harper* (1964) 53 Tenn App 549, 385 SW2d 130.

Trial court did not abuse discretion in permitting deputy sheriff to testify as to speed of car just before collision, judging from skidmarks on pavement, and not permitting witness to estimate speed at definite number of miles per hour. *St. Louis, S. R. Co. v Duffy* (1957, Tex Civ App Dallas) 308 SW2d 202, writ ref n r e (Feb 19, 1958) and reh of writ of error overr (Mar 26, 1958) n r e.

In action for damages for collision between defendant's truck and plaintiff's automobile, admission of plaintiff's nonexpert testimony as to speed of defendant's truck indicated by skid marks on highway was proper. *Ball v Martin* (1955, Tex Civ App Austin) 277 SW2d 182.

[\*13] Miscellaneous

In some cases statements of witnesses based on their observation of tire marks at the scene of the accident, as, for example, as to whether the motor vehicle went in a certain direction, whether it skidded, how far it went after the collision, or as to whether the wheels of the vehicle were braked at the time of the accident, have been held admissible as statements of fact within the personal observation of the witness and not objectionable as calling for the opinion of the witness.

For instance, in *Lestico v. Kuehner* (1938) 204 Minn 125, 283 NW 122, where defendant, driver of the car in which plaintiff was riding when it got out of control and ran off the highway, was asked, "Did you observe whether -- where you made the sudden turn, where the car had changed its direction from the tire marks?", and the trial court excluded this "as calling for the conclusion of the witness," the appellate court held that this ruling was wrong, because the question plainly asked for a fact within the personal observation of the witness.

In *Rice v. Shenk* (1928) 293 Pa 524, 143 A 231, in an action to recover for injury to the rider of a motorcycle which

collided with a truck, it was held competent for the witness to testify that from the condition of the road he concluded that the motorcycle had skidded. The court said that the witness' conclusion was stated as would have been that of any other observer who from experience would know the difference between markings on a road made by a locked wheel, and those made by one which was revolving; that there was nothing smacking of the expert in this, but that he was speaking as a result of ordinary experience and observation, just as one would say that marks on the ground indicated that a person had slipped.

And in *Johnson v. Martin (1951) 255 Ala 600, 52 So2d 688*, where a witness for plaintiff, who reached the scene of the accident some time after it occurred, testified to seeing marks on the pavement and sought to describe them, and in answering the question as to whether there were any skid marks showing where the car wheels themselves had skidded, stated that "there were some there where they had been pulled this way," to which answer objection was made, and overruled, it was held that there was no error, where, after so ruling, the trial court interrogated the witness as to whether he referred to the skid marks, the witness replying "Yes, sir." The appellate court was of the opinion that the statement objected to was merely a shorthand rendering of the facts and merely his description of the appearance of the skid marks.

In *Thornbury v. Maley (1951) -- Iowa --, 45 NW2d 576*, an action to recover damages for the death of passengers in a car which failed to make a turn in the road and struck a tree some distance from the paved highway, wherein a witness who had stated that in his opinion certain marks observed by him were from the rubber of an automobile was then questioned whether, if these marks were extended out, they would point to anything in particular, which question was objected to as calling for the opinion and conclusion of the witness, it was held that the trial court did not commit error in permitting the witness to give as his answer to the question that the marks pointed to a tree on the side of the road.

In *Mitrich v. Tuttle (1940) 90 NH 512, 11 A2d 818*, it was held that there was no error in permitting a witness to state how far defendant's car went after the point of collision, and other similar inferences from the character of the marks observed by the witness at the scene of the accident, notwithstanding the objection that the question and answer invaded the province of the jury, the court approving the view that this ground of objection was so unsound that it should be entirely repudiated.

In *Mace v. Watanabe (1939) 31 Cal App2d 321, 87 P2d 893*, the court held that it was proper to allow a witness to testify, over objection, that one of the marks of decedent's car appeared to have been made by a "free running wheel," the objection to such question being that the witness had not been qualified as an expert. The court, however, pointed out that the witness did not give expert testimony but merely testified to physical facts -- to what he observed on the roadway, further stating that the difference between the mark of a free running wheel and of a locked wheel was a matter of common knowledge and observation and, though the answer seemed to have been put in the way of an opinion, it was nothing more than a statement of what the witness had seen.

And in *Hodges v. Wells (1932) 226 Ala 558, 147 So 672*, it was held that there was no error in allowing a witness to describe skid marks made by one of the automobiles involved in the accident, where such witness had qualified to express his opinion of how such marks were made by the loaded truck which he knew was loaded with cottonseed, and testified that "similar marks could be caused by excessive load or swaying of the load."

However, a contrary view was taken in *Vredenburgh Saw Mill Co. v. Black (1948) 251 Ala 295, 37 So2d 212*, where a witness for defendant testified that he examined the tracks of the truck at the place of the accident, that the tracks indicated that the wheels were not turning free and that there was evidence of a cutting condition and that the tracks were deeper than normal, and the witness was asked if the tracks indicated that the wheels making them were being braked at the time, it was held that plaintiff's objection to the question was properly sustained, the court in this connection citing the case of *White v. State (1915) 12 Ala App 160, 68 So 521*, in which it was said that a witness who was not present when a track is made should not be allowed to state how it was made, this being manifestly a conclusion for the jury to draw.

And in *North American Acci. Ins. Co. v. McAlister* (1942) 290 Ky 88, 160 SW2d 385, a suit on an accident insurance policy, where one of the most material and vital features of the case was whether the wrecking or disablement of the automobile in which deceased was riding or driving at the time it went over a bank into a pond, was accidental, and where a witness stated that "the back right wheel showed on the ground the brake was applied," the appellate court stated that on the new trial the witness should be permitted to testify only as to the tracks or marks, leaving the jury to draw such inferences therefrom as they might see proper.

And in *Murphy v. Lake County* (1951) 106 Cal App 61, 234 P2d 712, an action to recover for damages sustained by plaintiff as a result of the wrecking of his truck when it plunged over the bank of a county road due to the alleged negligence of defendant in the maintenance of the same in a dangerous and defective condition, it was held that a question asked of a witness as to what the tracks on the shoulder of the road showed, called for the opinion of the witness, and hence was inadmissible and properly excluded.

In *Germ v. City & County of San Francisco* (1950) 99 Cal App2d 404, 222 P2d 122, where the injury was caused when a streetcar bumped into a taxi, pushing the latter onto and injuring plaintiff, and the taxi driver was asked by his counsel if there were any marks made on the street by his cab when it was being pushed by the streetcar and while he was holding onto the brakes on the taxi, and the city, which was a defendant, objected that this called for the witness' opinion, and the driver of the taxi was again asked if he could identify on a photograph in evidence the marks he saw on the street made by his cab after it was hit by the streetcar, to which objection was also made by the city, the court held that while the objections were good and should have been sustained, no prejudice resulted from their being overruled, inasmuch as a reading of the transcript showed that it must have been clear to the jury that the witness was giving merely his opinion and that it was for the jury to determine when the skid marks were made. Furthermore, his explanation of how he knew the origin of the marks was such that if the jury did not believe his testimony as to how fast he was going (and there was evidence by the city's witnesses to refute it) his whole conclusion would fall; his statement that the marks were made after his cab was struck was based upon and was no stronger than his testimony as to his actions after he saw the plaintiff.

The following additional authority is relevant to the issues discussed in this section:

<>

Where defendant driver testified that he locked his brakes when he first saw plaintiff pedestrian, and plaintiff produced expert witness who testified that if brakes were locked, defendant would have skidded in straight line and could not have turned, but evidence showed that there were 113 feet of continuous skid marks which were not in a straight line and expert answered in negative to court's question as to whether he was assuming that there were continuous skid marks, court properly concluded that expert's opinion was not based upon uncontroverted facts, and did not err in striking testimony and admonishing jury not to consider it. *Jackson v Nelson* (1967, CA10 NM) 382 F2d 1016.

Testimony of person who measured skid marks purportedly made by truck when it first applied its brakes that, counting "solid" skid marks and "bouncing" skid marks, the total was 419 feet, was admissible. *Hickory Springs Mfg. Co. v Emerson* (1970) 247 Ark 987, 448 SW2d 955.

In action for damages from collision, question as to whether nonexpert witness observed scars on railroad in vicinity of debris was proper as laying foundation for details, location and description of scars, after which location it is for jury to say whether they were made by vehicles involved, were connected with accident, and what conclusions are to be drawn from them. *McKee v Chase* (1953) 73 Idaho 491, 253 P2d 787 (citing annotation).

Nonexpert witness could testify that tire marks on highway were not brake marks. *Hamdorf v Corrie* (1960) 251 Iowa

896, 101 NW2d 836.

In civil action involving collision of cars, nonexpert testimony that skid marks on road appeared to lead to point of impact was admissible. *Weilbrenner v Owens* (1955) 246 Iowa 580, 68 NW2d 293.

Testimony of nonexpert who was first to arrive on scene after automobile collision, as to skid marks on road, was admissible. *Hackman v Beckwith* (1954) 245 Iowa 791, 64 NW2d 275.

Computation in wrongful death action involving skid marks and reaction time of defendant driver was faulty where skid marks were treated as made solely by front wheels of defendant driver's automobile and did not furnish basis for finding that deceased was in crosswalk when struck by automobile. *Brown v Rice* (1970, Ky) 453 SW2d 11.

[\*14] Expert opinions; generally

Under the particular circumstances of individual cases the admission of expert testimony relating to tire or skid marks has been both approved and disapproved.

In *Monaghan v. Keith Oil Corp.* (1932) 281 Mass 129, 183 NE 252, the court held as admissible testimony of one who examined the tire marks of the truck after the accident, and who was an expert in the control and repair of automobiles, as to how certain tire marks of a motor truck were made, where such evidence tended to show the position of the truck and the effect upon it of the collision.

And in *Carson v. Turrish* (1918) 140 Minn 445, 168 NW 349, LRA 1918F 154, it was held that the trial court did not err in permitting a witness, who was at the scene of the collision the morning following, and for whose testimony a foundation was laid, to testify as an expert on rebuttal as to wheel tracks on the pavement at the place of the collision, the morning after, and his opinion as to the movements of the car which they indicated, the conditions being so nearly the same as at the time of the accident.

See also, in this connection, *Alabama Power Co. v. Jackson* (1936) 232 Ala 42, 166 So 692, in which it was held that the trial court committed error in not permitting witnesses to testify that certain marks on the pavement at the place of the accident were those made by a skidding car, located as the car in which plaintiff's intestate was riding and in which she sustained injury, these witnesses having qualified to testify to such collective fact.

However, in *Danner v. Walters* (1951) 154 Neb 506, 48 NW2d 635, an action for damages sustained in the collision of two motor vehicles, in which a patrolman who arrived at the scene of the accident approximately one-half hour after it occurred gave evidence as to the tracks or other marks made by the truck and the defendant's car and as to what he observed with reference to the same and other circumstances surrounding the accident which he was in a position to know and testify about, and also testified that he investigated from fifty to one hundred accidents a year, and who was asked to say, from his experience as a traffic investigator, where the point of impact between the two vehicles was, to which an objection was sustained, and it was stated that if the witness were permitted to testify he would say that the approximate point of impact was one foot eleven inches south and east of the center line of the pavement, it was held that the trial court did not commit error in sustaining an objection to this offer of proof, it being pointed out that the physical facts from which this question was to be answered were all presented to the jury, that the issue did not call for the opinion of an expert, and that the jury was as competent to decide from the facts the point at which the impact took place as was the officer.

In *Farmer v. Fairbanks* (1945) 71 Cal App2d 70, 162 P2d 26, where a witness who had been engaged in police work for twenty-two years, for over seventeen years of that time as an officer of the state highway patrol delegated to investigate traffic accidents, and who testified that he went to the scene of the accident shortly after it occurred, and described the conditions which he noted in the highway, remarking upon certain tire marks which led up to or near the

point of impact, and was asked by the court whether, as a traffic expert, he could identify these marks as being made by any particular automobile, to which he answered that "they were made by the Oldsmobile," and objection was made "on the ground that question calls for an opinion on the very subject which is going to be left to the jury and no foundation has been laid," the court was of the opinion that the objection was well taken but that no prejudicial error arose since other officers previously testifying had given substantially the same testimony without objection thereto.

As to the admissibility of opinion of photographer or other expert based on a photograph of tire marks, see § 16, *infra*.

The following additional authority is relevant to the issues discussed in this section:

◇

Expert testimony of highway patrolman as to skid marks is admissible to show position and identity of vehicles at point of collision. *Padgett v Buxton-Smith Mercantile Co.* (1958, CA10 NM) 262 F2d 39 (citing annotation).

See *Glaze v Tennyson* (1977, Ala) 352 So 2d 1335, § 15.

Trained police officer may give opinion as to point of impact based on, inter alia, marks on highway. *Gray v Woods* (1958) 84 Ariz 87, 324 P2d 220.

Opinion of police officer as to his conclusion concerning a "rapid start" by vehicle was admissible since police officers are familiar with skids and can tell most of the time whether one was made on starting or on stopping, court saying that whether it is dragging of tire that made mark, or spinning of tire, was question which experienced officer could answer. *Nelson v Busby* (1969) 246 Ark 247, 437 SW2d 799.

Opinion testimony of police officer that some skid marks of automobiles observed by him at place of accident had been made by flat tire was admissible where officer had been investigating traffic collisions for 5 years and had attended various schools of instruction on such matters. *McCormick v Sexton* (1965) 239 Ark 29, 386 SW2d 930.

Officer who had 25 years experience as state trooper, and who had investigated 800 -- 1000 accidents in course of his duties, was properly permitted to testify as to his reconstruction of accident based on his investigation of scene and on his prior experience, where plaintiff was only witness with firsthand knowledge of accident, in that driver of other vehicle had not worked for defendant employer for four years preceding trial and his location at time of trial was unknown. *Miller v Bonar* (1983, Iowa) 337 NW2d 523.

Police officer could testify as to point of impact as indicated by skid marks. *Hamdorf v Corrie* (1960) 251 Iowa 896, 101 NW2d 836.

Expert testimony that skid marks on road were made by vehicles involved in collision was inadmissible where jury had full description of marks and could draw own conclusion as to which cars made marks. *Turcotte v De Witt* (1954) 332 Mass 160, 124 NE2d 241.

One property qualified in accident investigative background may testify, either from personal observation or from properly authenticated and admitted exhibits, that, in his opinion, certain marks are skid marks and that they were made by given motor vehicle, and he may, on same basis, state his opinion as to point of impact. *Dudek v Popp* (1964) 373 Mich 300, 129 NW2d 393.

There was no foundation upon which police officers could give expert opinion that automobile struck deceased, where only evidence pointing to such involvement was rubber mark found on curb and it was admitted that time when said

mark became affixed to curb had not been ascertained. *Estate of Blackwell v Hare* (1973) 50 Mich App 204, 213 NW2d 201, (citing annotation), rev'd on other grounds (Mich) 216 NW2d 419.

Trial court in negligence action arising from automobile collision properly excluded testimony of plaintiff's expert witness as to skid marks at scene of collision, where expert was not qualified in accident reconstruction and no showing was made that skid marks were made by either vehicle involved in collision. *Coffey v Callichio* (1988, 2d Dept) 136 App Div 2d 673, 523 NYS2d 1011.

See *Smith v Hardy* (1955) 228 SC 112, 88 SE2d 865, supra § 4.

Expert testimony of highway patrolman as to position of defendant's car at moment of impact was inadmissible where based only on skid marks made by defendant's tires; given direction of marks, jury was as well qualified as witness to judge position of vehicle. *Jenkins v Hennigan* (1957, Tex Civ App Beaumont) 298 SW2d 905, writ ref n r e.

It was error, although not reversible error, for police officer to testify that based on his observations of shoulder of road and conditions of weather and conditions of soil it could be assumed that if car had gone off hard surface road between point where plaintiff's body lay and where bridge was, car would have made tracks on that soil, court pointing out that such testimony was merely an expression of opinion on a matter of common knowledge as to which jury itself was competent to form an intelligent and accurate opinion. *Hill v Lee* (1969) 209 Va 569, 166 SE2d 274.

Expert testimony was admissible to show position of vehicles at time of accident based on marks on pavement and road shoulders. *Henthorn v M. G. C. Corp.* (1957) 1 Wis 2d 180, 83 NW2d 759, 79 ALR2d 142.

[\*15] As to speed

A witness qualified as an expert may give his opinion, based upon the length of skid marks, as to the speed of a motor vehicle involved in an accident.

#### ALABAMA

*Jackson v. Vaughn* (1920) 204 Ala 543, 86 So 469

#### CALIFORNIA

*Linde v. Emmick* (1936) 16 Cal App2d 676, 61 P2d 338

#### ILLINOIS

*Fannon v. Morton* (1923) 228 Ill App 415

#### NEBRASKA

*McKinney v. Wintersteen* (1932) 122 Neb 679, 241 NW 112

#### NEW YORK

*Saladow v. Keystone Transp. Co. (1934) 241 App Div 161, 271 NYS 293*

#### TEXAS

*Stamper v. Scholtz (1930, Tex Civ App) 29 SW2d 883, error ref*

#### WISCONSIN

*Luethe v. Schmidt-Gaertner Co. (1920) 170 Wis 590, 176 NW 63*

So, in *Fannon v. Morton (1923) 228 Ill App 415*, where there was testimony that after the accident distinct marks or tracks were found on the pavement, showing the distance the tires had slid or been dragged over the pavement, and it was admitted that the wheels on the car were locked, evidence by an expert was held admissible as to the estimated speed of the automobile, predicated on the distance the tires were dragged along the pavement.

It is error to exclude testimony of an automobile expert in the police department who had examined defendant's taxicab on the day of the accident, by which plaintiff sought to establish that such a taxicab, with four-wheel brakes applied, could not have produced skid marks sixty feet in length unless exceeding the maximum rate of speed allowed by law. *Saladow v. Keystone Transp. Co. (1934) 241 App Div 161, 271 NYS 293*.

In *Luethe v. Schmidt-Gaertner Co. (1920) 170 Wis 590, 176 NW 63*, an action to recover for an injury to one struck by an automobile, where there was evidence that there were skid marks of automobile wheels on the street for a distance equal to the length of a street crossing, and other evidence showing long skid marks, such evidence was held sufficient to furnish a proper ground for an expert to give his opinion as to the speed at which the car was traveling when the brakes were applied.

A witness qualified as an expert may give his opinion as to the speed of an automobile based on evidence to the effect that the automobile, in turning from one street into another, on a dry day, skidded forward twenty-two feet with the wheels locked. *Jackson v. Vaughn (1920) 204 Ala 543, 86 So 469*.

In *Stamper v. Scholtz (1930, Tex Civ App) 29 SW2d 883, error ref*, in holding that the evidence of experts was admissible to show, from the circumstances detailed to them, what the probable speed of an automobile was at the time a boy on a bicycle was struck, the court stated that almost any person acquainted with the movements of cars when brakes are applied suddenly would be competent to give an opinion from the marks of the skidding and other circumstances as to the speed of the automobile.

In the two Texas cases immediately following, although the opinions do not expressly so state, it is possible that the witnesses qualified as experts.

In one of these cases, *Rankin v. Joe D. Hughes, Inc. (1942, Tex Civ App) 161 SW2d 883, error ref w m*, an action to recover for damages resulting when plaintiff's car crashed into the rear end of defendant's parked truck, it was held that testimony of highway officers who had investigated a number of automobile collisions on the highway, as to their estimate of the speed of plaintiff's car, based on the skid marks on the pavement, was competent and sufficient to raise the issue of excessive speed.

And in *Southern Transp. Co. v. Adams (1940, Tex Civ App) 141 SW2d 739, error dismd*, an action for death of a pedestrian struck by an automobile, it was held that an officer was qualified to testify as to the speed of the truck from

his examination of the skid marks.

However, in *Linde v. Emmick* (1936) 16 Cal App2d 676, 61 P2d 338, it was held that the opinion of an expert as to the speed of an automobile based on the length of skid marks was inadmissible where the hypothetical question asked him erroneously assumed that the length of skid marks was 150 feet instead of 140 feet, as shown by the evidence, and also omitted the important factor of the condition of the brakes.

A showing that the witness had been a truck driver for a period of fifteen years did not, standing alone, qualify him to express an expert opinion concerning the speed of a car which he had not seen in motion, based on the skid marks which he related to the car. *Wisniewski v. Weinstock* (1943) 130 NJL 58, 31 A2d 401, affd 135 NJL 202, 50 A2d 894.

In *Frey v. Buchseib* (1936, App) 33 NE2d 862, 10 Ohio Ops 430, 22 Ohio L Abs 624, where in connection with the exhibition in evidence of parts of plaintiff's automobile, such as a tire, rim, and the remains of the hub and spokes of one of the wheels, a witness for plaintiff, apparently for the purpose of showing excessive speed of defendant's motor vehicle, gave his opinion concerning the relation between the marks on the highway and the damaged wheel of plaintiff's automobile, it was held that this evidence did not come strictly within the category of expert testimony, where, in connection with such testimony, the witness in question gave the facts upon which he predicated his opinion.

Also recognizing that expert witness may testify as to length of skid marks to show speed of vehicle:

The following additional authority is relevant to the issues discussed in this section:

◇

See *Logsdon v Baker* (1973, DC Dist Col) 366 F Supp 332, vacated on other grounds 170 US App DC 360, 517 F2d 174, 170 App DC 360, 517 F2d 174, infra § 16.

Expert who was not eyewitness to collision could properly testify as to estimated speed of automobile, predicated on distance tires skidded or were dragged along before impact, but not distance tires skidded after impact. *Glaze v Tennyson* (1977, Ala) 352 So 2d 1335.

Trial court erred in permitting state trooper to give opinion, based on skid marks, as to speed of defendant's car, where skid marks were not measured and trooper's estimate on direct examination was that length of marks was from 50 to 75 feet and on cross-examination was that it could have been as much as 100 feet. *Giles v Gardner* (1971) 287 Ala 166, 249 So 2d 824.

Expert may testify as to his judgment as to speed of automobile predicated on skid marks before impact, but not on basis of skid marks after impact. *Rosen v Lawson* (1967) 281 Ala 351, 202 So 2d 716.

In personal injury action arising out of two-car collision, trial court did not abuse its discretion in granting new trial on grounds of error in admitting opinion of defendant's accident-reconstruction expert as to speed of plaintiff's automobile, where many factual assumptions made by expert in arriving at opinion, including "average acceleration," "average turning radius," expert's own estimation of lengths of deviated skid marks, and, without explanation, certain coefficient of friction of tires on pavement, lacked sufficient evidentiary support. *Richard v Scott* (1978, 4th Dist) 79 Cal App 3d 57, 144 Cal Rptr 672 (ovrld in part by *Weddle v State of California* (4th Dist) 141 Cal App 3d 737, 190 Cal Rptr 522, reprinted as mod (4th Dist) 142 Cal App 3d 657, 191 Cal Rptr 819, op withdrawn by order of ct (Jun 23, 1983)) and (criticized by *Mosesian v Pennwalt Corp.* (5th Dist) 191 Cal App 3d 851, 236 Cal Rptr 778).

Although officer's opinion as to speed of vehicle from length of skid marks merely by reference to chart has been held

to be inadmissible, where officer was permitted to testify, without objection, by reference to chart and there was no objection on ground of lack of proper foundation or on ground that officer had not been qualified as expert, admission of officer's testimony was not prejudicial error. *Ungefug v D'Ambrosia* (1967, 4th Dist) 250 Cal App 2d 61, 58 Cal Rptr 223.

In automobile accident case, expert testimony that there was only one tire mark at curve, indicating great speed at which car was rounding curve, was admissible. *Ferguson v Hurford* (1955) 132 Colo 507, 290 P2d 229 (superseded by statute as stated in *Public Service Co. v Board of Water Works (Colo)* 831 P2d 470) (citing annotation).

Expert testimony is admissible to show relationship between skid marks and speed of car or speed at which car must be driven to make certain skid marks. *Bell v Myrtle* (1959, Mun Ct App Dist Col) 153 A2d 313 (citing annotation).

Admission of testimony as to estimate of speed of vehicle based upon witness' inference from examination of skid marks at scene was proper notwithstanding fact that such inference was subject of expert testimony, where witness had been insurance adjuster for two years and had investigated hundreds of collisions; admission of testimony as to estimate of length of skid marks was proper whether or not witness was expert, and effect upon witness' credibility of gap of less than four hours between accident and witness' observation of scene was jury question. *Hixson v Barrow* (1975) 135 Ga App 519, 218 SE2d 253, appeal after remand 142 Ga App 65, 234 SE2d 805.

After police officer who had 3 years' experience in investigation of automobile accidents and had been trained in connection with this work testified to physical facts and indications of skid marks and tire marks at scene of accident, his testimony to effect that there was no speed indication according to said skid marks was admissible over objection to such testimony on grounds that officer was not qualified as expert and that his opinion failed to prove that automobile was not exceeding speed limit. *Reeves v Morgan* (1970) 121 Ga App 481, 174 SE2d 460, revd on other grounds 226 Ga 697, 177 SE2d 68, on remand 123 Ga App 64, 179 SE2d 648 and (superseded by statute as stated in *Atlanta Newspapers, Inc. v Shaw*, 123 Ga App 848, 182 SE2d 683).

See *Diederich v Walters* (1975, 2d Dist) 31 Ill App 3d 594, 334 NE2d 283, revd 65 Ill 2d 95, 2 Ill Dec 685, 357 NE2d 1128, supra § 12.

In wrongful death action arising out of collision between car and defendant's disabled truck stopped on highway, question asked of expert witness as to whether skid marks indicated violation of speed laws by decedent's car called for legal conclusion and trial court erred in overruling defendant's objection. *Schlichte v Franklin Troy Trucks* (1978, Iowa) 265 NW2d 725.

Although recognizing that investigating officers may be qualified to express opinion as to speed from skid marks left by car braking to stop without meeting substantial resistance, it was held that officer failed to show he possessed sufficient expertise in specific area in which he was asked to express opinion and therefore was not qualified to express opinion. *Bernal v Bernhardt* (1970, Iowa) 180 NW2d 437 (citing annotation).

Trial court erred in excluding opinion testimony by police officer who investigated single-vehicle accident in which plaintiff's decedent died, where, in action against driver of truck that crashed, officer's training and experience qualified him as expert and testimony was as to estimate of truck's speed at time of accident based on skid marks. *Osner v Boughner* (1989) 180 Mich App 248, 446 NW2d 873, app gr, in part 435 Mich 861, 457 NW2d 344, vacated, app den 437 Mich 955, 467 NW2d 592.

Expert witness is qualified to give opinion as to speed of automobile where he is informed of factors testified to by witness at scene, including length of skid marks, composition and condition of pavement, and make and weight of automobile. *Snyder v New York Cent. Transport Co.* (1966) 4 Mich App 38, 143 NW2d 791 (citing annotation).

Estimates of speed are admissible in civil case where they are result of measuring length of skid marks, but where police officer stated his opinion was based on condition of vehicles after impact and did not include skid mark measurements, officer's opinion as to speed was erroneously admitted. *Missey v Kwan* (1980, Mo App) 595 SW2d 460.

Where expert testimony as to speed of vehicle is based on skid marks, it is immaterial whether vehicle was skidding sideways or traveling in normal direction. *Hanberry v Fitzgerald* (1963) 72 NM 383, 384 P2d 256.

See *Fowler v Graves* (1986) 83 NC App 403, 350 SE2d 155, § 3.

Admission of expert's testimony as to speed of vehicle involved in accident determined from length of skid marks was not prejudicial notwithstanding that witness stated that he employed chart commonly used in determining automobile speed from skid marks. *Barge v House* (1952) 94 Ohio App 515, 52 Ohio Ops 300, 63 Ohio L Abs 555, 110 NE2d 425.

Opinion evidence of duly qualified expert as to speed of motor vehicle, based on skid marks and other physical facts, is admissible. *Continental Oil Co. v Elias* (1956, Okla) 307 P2d 849.

Admission of opinion as to speed of vehicle of expert witness, who was licensed civil engineer, head of engineering from specializing in highway design, highway safety and accident reconstruction, and assistant dean of engineering and professor at university, was proper where opinion was based on length of skid marks, weight of car, grade of street, characteristics of road surface and other considerations which witness identified. *Haerberle v Peterson* (1978) 262 Pa Super 247, 396 A2d 738.

In wrongful death action to recover for decedent's death resulting from collision between his pickup truck and another truck, where speed and turning path of decedent's truck had been established by direct testimony, court did not abuse discretion in excluding testimony by expert witness as to traces left by abrupt high speed turns. *Sanchez v Billings* (1972, Tex Civ App Houston (14th Dist)) 481 SW2d 911, writ ref n r e (Oct 4, 1972) n r e.

Estimated speed of motor vehicle, as based on skid marks and other physical facts, is a proper subject for expert opinion, determination of rate of speed based upon such facts not being within common knowledge of jurors. *Talley v Fournier* (1970) 3 Wash App 808, 479 P2d 96.

[\*16] Photographs

Subject to the rule that the trial court in the exercise of its sound discretion must be satisfied that the object photographed is a faithful representation of what it purports to reproduce, photographs of skid marks made by tires of motor vehicles may properly be admitted in evidence.

#### WISCONSIN

*East Wisconsin Trustee Co. v. O'Neil* (1949) 255 Wis 528, 39 NW2d 369

In *Square Deal Cartage Co. v. Smith's Admr.* (1948) 307 Ky 135, 210 SW2d 340, where objection was made to the admission of a number of photographs of the highway, taken the morning after the accident, which had occurred in the late afternoon, the objection being particularly to what appeared to be marks in the road, and while the photographer was not introduced, the fairness and accuracy of the views were established by other witnesses whose testimony was to the effect that the conditions revealed in the pictures were the same as they were immediately after the accident, it was held that the photographs were properly admitted.

And in *Senn v. Lackner* (1951) -- Ohio App -- , 100 NE2d 419, motion for order releasing supersedeas bond overruled -- Ohio App -- , 100 NE2d 432, the court held admissible photographs of the highway at the place of collision, taken the day after the accident, as the evidence showed that the marks on the highway shown on the photographs existed immediately after the collision, and there was evidence to support the conclusion that the photographs clearly

represented the condition immediately after the collision.

So, too, in *Miller v. Silvester* (1934) 140 Cal App 345, 35 P2d 387, the court held clearly admissible photographs of skid marks on the pavement, taken on the third day following the accident, five or six witnesses who either were at the scene of the accident at the time it occurred or arrived there shortly afterward having testified as to the existence of the skid marks, their length and location on the pavement, and that the conditions as they observed them were correctly reproduced by the photographs. It was pointed out that the purpose of using the photographs as evidence in the present case was not to prove the existence of the skid marks, such fact having been fully established by the testimony of the six witnesses who saw them immediately after the accident occurred, but merely as an approximate aid in applying such testimony.

And in *Hayes v. Emerson* (1930) 110 Cal App 470, 294 P 765, it was held that the trial court did not abuse its discretion in admitting in evidence a photograph of skid marks, four or five inches in width and forty to forty-five feet in length, which had been painted white by the witness before he photographed them, his testimony showing that the skid marks showed black burned rubber, that he had them painted with lime, and that they were photographed the next day, and several witnesses testifying that the painting followed the line of the skid marks. The appellate court pointed out that no object in the photograph was placed before the jury which was not there at the time of the accident, and that it saw no reason why the mere painting of an object, in order that it might be more vividly reproduced by means of photography, rendered the photograph inadmissible; this is always, according to the court, subject to the rule that the trial court must be satisfied that the object photographed is a faithful representation of what it purports to reproduce; necessarily, a large measure of discretion is vested in the trial court in ruling upon a question of this character.

Photographs of skid marks on the concrete pavement alleged to have been made by the steel rim of plaintiff's car immediately after the accident, which corroborated defendant's testimony to the effect that the collision resulted because of the fact that plaintiff's car was too far over to the left of the center line of the road, may properly be admitted in evidence. *Stanley v. Powers* (1936) 125 Fla 322, 169 So 861.

And in *Haven v. Snyder* (1931) 93 Ind App 54, 176 NE 149, it was held that there was no error in admitting in evidence photographs of scratches and marks on the pavement purporting to have been made by the collision of two cars, taken two days after the accident, and introduced for the purpose of showing the path defendant's car traveled after the collision. In this connection the court observed that the objecting party admitted that testimony of the photographer as to what he saw in the way of marks on the pavement would be competent for the consideration of the jury, in consideration with all the other evidence in the case, in determining what connection, if any, they had with the matter in controversy, and the court said that it could see no reason why the photographs of what he saw should be excluded.

In *East Wisconsin Trustee Co. v. O'Neil* (1949) 255 Wis 528, 39 NW2d 369, it was held that photographs taken by a police officer on the afternoon of the accident, which occurred in the forenoon of that day, were properly admitted for the purpose of showing the location of the skid mark.

And in *Wallace v. Kramer* (1941) 296 Mich 680, 296 NW 838, an action for damages by a pedestrian, it was held that there was no abuse of discretion in permitting the introduction of photographs of skid marks left by defendant's car at the scene of the accident, although the road was heavily traveled and the photographs were taken twelve days after the accident, where they were taken under the direction of eye witnesses who testified that they were authentic, and this was corroborated by testimony of police officers who measured the original skid marks. The court stated that skid marks impressed upon a concrete pavement may remain for a considerable length of time and are not quickly obliterated, and remarked that there was no necessity to discuss whether it would have been an abuse of discretion on the part of the judge in this case to refuse to admit the photographs, but that it did hold that there was no abuse in permitting the introduction.

In *Schalow v. Oakley* (1943) 18 Wash2d 347, 139 P2d 296, where apparently the collision occurred because one of the

drivers left his side of the road and entered the rightful path of the other, it was held that the positions of skid marks testified to and shown by photographs had probative value, but that their force as evidence was a matter for the jury, and that it could not be said that these or other physical manifestations should have controlled its verdict, inasmuch as the marks were only a few feet in length, and might have been there before the collision occurred, and it was not impossible, although there was emphatic evidence to the contrary, that the marks were made when one of the cars was dragged from the road by a wrecker.

In some instances photographs purporting to be those of tire or skid marks have been held by the appellate court to have been properly rejected where there was no evidence to connect the marks up in some way with those made by the car involved in the accident or at the scene of the accident.

Thus, in *Brewer v. Berner* (1942) 15 Wash2d 644, 131 P2d 940, an intersection collision case, it was held that the question of admission of photographs was largely within the discretion of the trial court, and that there was no error in the latter court's ruling in refusing the offer in evidence of two photographs of the scene of the accident, which were taken several days thereafter and showed what appeared to be skid marks on the pavement, but there was no evidence or offer of proof which would connect the marks with those made by defendant's car, nor did they in any way conform to the evidence relating to the skid marks.

So, too, in *Heffelfinger v. Schell* (1940, Pa) 50 Dauph Co 1, it was held that an offer to submit in evidence a photograph of the scene of the accident showing certain skid marks was properly rejected where the objections to the admission of the photograph were that it was taken at an indefinite time after the accident, that it would be impossible to procure the exact conditions of the day of the accident and that it was not definitely established that the marks were made at the exact point of the accident.

See also *Weller v. Fish Transport Co.* (1937) 123 Conn 49, 192 A 317, in which it was held that the trial court did not err in excluding four small snapshots of the roadway showing pieces of paper placed thereon to designate the claimed location of certain gouge and tire marks, the appellate court stating that the trial court well might have concluded that the officer who made the photographs had placed the paper shown on the snapshots as a result of what was told him by the driver and others after the accident.

The right of a witness to express an opinion as to the operation of the car, based on his observation of photographs of brake or skid marks, may depend upon whether or not the witness qualified as an expert with respect to his knowledge of cars and how they operate under certain conditions.

To illustrate, in *Reardon v. Marston* (1941) 310 Mass 461, 38 NE2d 644, it was held that testimony of an inspector with thirteen and a half years' experience of the registry of motor vehicles, and who was familiar with the surface of the road where the accident occurred, and who qualified as an expert, that from photographs showing brake marks made by the automobile at the time of the accident he would say that the brakes were not in good working order, was competent.

On the other hand, in *Huggins v. Broom* (1938) 189 SC 15, 199 SE 903, where an expert photographer of ten years' experience in photographing wreck scenes was permitted to point out on his photographs the markings, such as skid marks, etc., shown on the highway at the place of the collision, and described these markings, it was held that the trial court properly excluded the opinion and conclusion of the witness as to how the markings were made and/or what made them -- the manner in which such markings were made -- the court stating that expert or opinion evidence is permissible, and often necessary, but where all the materials for judgment are already before the jury and no special skill or experience is requisite in order to reach a conclusion and more than one reasonable inference may be indulged in, especially where the offered witness is not shown to have had any training or experience different from the average citizen, opinion evidence is properly excluded as superfluity, if for no other reason.

The following additional authority is relevant to the issues discussed in this section:

◇

Fact that expert testified, on basis on scientific analysis of scrape marks on highway, that plaintiff's trailer had been on wrong side of highway at time of collision was not inadmissible on ground that witness had seen copies of photographs not admitted into evidence. *Clifton v Mangum (1966, CA10 NM) 366 F2d 250*.

Where no evidence was introduced to link "brake marks" expert witness detected in photographs to truck involved in accident, expert's opinion testimony on vehicular speed was inadmissible based on such photographs. *Logsdon v Baker (1973, DC Dist Col) 366 F Supp 332*, vacated on other grounds *170 US App DC 360, 517 F2d 174*.

Photographs of scene of automobile collision offered to show presence and location of skid marks on highway after accident were improperly admitted where photographs were of busy thoroughfare and were taken more than five hours after accident; error was harmless, however, where skidmarks were same as those that appeared in photograph taken by police immediately after accident. *Tarquinio v Diglio (1978) 175 Conn 97, 394 A2d 198*.

Trial court did not abuse its discretion by admitting into evidence a photograph of a skid mark purportedly made by tractor-trailer which had been involved in accident in action arising from accident. *Cleveland v. Bryant, 236 Ga. App. 459, 512 S.E.2d 360 (1999)*, cert. denied, (May 28, 1999).

Photographs showing tire marks at scene of accident were properly admitted in evidence where party stipulated that photograph was taken day after the accident and that it fairly depicted scene of accident, and certain witnesses testified that they saw marks on pavement shown in the photograph. *Day v Ukena (1953) 351 Ill App 26, 113 NE2d 574*.

See *Thornton v Pender (1978) 268 Ind 540, 377 NE2d 613, § 5*.

Admission of photographs showing skid marks was proper, although not introduced through photographer, where witness through whom they were introduced identified various markings on road and testified that pictures were actual representations. *Miller v Quaipe* (1965, Ky) 391 SW2d 682.

Where crux of pedestrian's action for injuries caused when she was struck by plaintiff's automobile was whether accident occurred in pedestrian crosswalk, photograph indicating that accident did not occur there was not proof of incontrovertible physical fact where (1) identification of picture as skid marks depended entirely upon opinion testimony of photographer who was not eyewitness to accident; (2) only oral testimony established distance which vehicle traveled after it struck plaintiff before brakes took hold to cause skidding; and (3) no attempt was made to show whether front or rear wheels of vehicle made marks. *Kane v Scranton Transit Co.* (1953) 372 Pa 496, 94 A2d 560.

Photograph of skid marks taken 3 months after accident was admissible, probative value being for jury. *Venable v Stockner* (1959) 200 Va 900, 108 SE2d 380.

Even though skid marks shown in photographs of scene of accident were not specifically identified as coming from particular car in question, admission of such photographs is not improper in absence of definitive proof that skid marks did not come from such car. *Zinda v Pavloski* (1966) 29 Wis 2d 640, 139 NW2d 563 (citing annotation).

[\*17] Maps or diagrams

Maps or diagrams indicating tire or skid marks or their location at the scene of the accident have been held admissible under certain circumstances noted in the cases cited below.

#### INDIANA

*Buddenberg v. Morgan* (1941) 110 Ind App 609, 38 NE2d 287

#### IOWA

*Baker v. Zimmerman* (1917) 179 Iowa 272, 161 NW 479

#### OHIO

*Kalovsky v. Meyer Dairy Products Co.* (1928) 30 Ohio App 118, 164 NE 370

#### OREGON

*Walling v. Van Pelt* (1930) 132 Or 243, 285 P 262

Thus, in *Baker v. Zimmerman* (1917) 179 Iowa 272, 161 NW 479, it was held that there was no error on the part of the trial court in receiving in evidence a map prepared by a witness who testified that he had made certain measurements shortly after the collision and observed marks of automobile wheels on the ground, and that these were indicated correctly on the map prepared by him, the court stating that maps and diagrams shown to be correct representations of physical objects about which testimony is given may be exhibited before the jury to better enable them to understand the testimony, and witnesses may properly be allowed to refer thereto in giving testimony.

And in *Walling v. Van Pelt* (1930) 132 Or 243, 285 P 262, an action for damages for injuries sustained in a collision of motor vehicles at a street intersection, the court held admissible a map drawn by a police officer on the scene of the accident at which he arrived a short time after it occurred, which showed by the skid marks indicated thereon that defendant's car had not gone beyond the center of the intersection as it should have, in making a left turn, the court being of the opinion that the map was not a memorandum within the meaning of a statute allowing memoranda to be used to refresh the memory of a witness but prohibiting the introduction of the memorandum itself into evidence.

Also in *Kalovsky v. Meyer Dairy Products Co.* (1928) 30 Ohio App 118, 164 NE 370, where the evidence conflicted as to whether the accident or collision occurred some thirty or forty feet north of the turn at a street intersection, or happened at the immediate intersection, the location of the collision thus becoming an important issue in respect to negligence and contributory negligence, inasmuch as if it occurred at the intersection it would involve the claim that the plaintiff, a bicyclist, proceeded negligently into defendant's tractor, it was held that the trial court did not err in admitting in evidence a map, neither the competency of the maker nor the accuracy of the map being questioned, which indicated a skid mark at the immediate intersection rather than some thirty or forty feet north thereof, there being evidence in the record, beyond peradventure, that the skid mark existed, and that it was nine and a half feet long and eleven inches wide, the exact width of the tractor tires, and there being also positive, undisputed evidence of at least one witness that the right wheel of the tractor made the skid marks. The court said: "Now here was an object that had no power of locomotion and therefore could not shift itself. It was stationary. It was a fact created by reason of the collision, and therefore its accurate representation upon a map was as illuminating to the jury as if they had seen the production of the skid mark." The court stated that, in deciding as it did, it had in mind the law of Ohio, to the effect that the admissibility of evidence of this character depends upon the sound discretion of the court, considered in the light of all the circumstances appearing in the record of the case, and that the court is only responsible for an abuse of sound discretion.

See also *Tyrrell v. Goslant* (1919) 93 Vt 63, 106 A 585, an action to recover for injuries to plaintiff's person and automobile, caused by the alleged negligence of defendant, in which the court sustained the admissibility of testimony of a civil engineer called by defendant who had made a survey and plan of a portion of the highway some three days after the accident, and who described certain tracks pointed out at the time to him by defendant, the court observing that the witness was not present at the accident and had no personal knowledge concerning it, and that it became necessary for someone having knowledge thereof to point out to him on the ground the different places important to be located on the plan, from or to which measurements were to be made by him in connection with the objects so located.

In *Buddenberg v. Morgan* (1941) 110 Ind App 609, 38 NE2d 287, where it appeared that during the examination of a witness as to tire burns a short distance east of the point of collision a drawing made by an attorney of his interpretation of the witness' story, which was merely illustrative, was submitted to the witness, and upon this the witness indicated by marks the location of the tire burns, the court held that while it would not have been error to admit the exhibit, the trial court's refusal to admit it, under the circumstances, was within its discretion.

In *Roushar v. Dixon* (1942) 231 Iowa 993, 2 NW2d 660, it was held that there was no error in the ruling of the trial court refusing to admit in evidence an illustrative plat showing tire marks and distances inasmuch as several of the legends and marks on the plat were not made from the personal knowledge of the witness and no other witness for defendant stated that the marks and legends made by the witness on the plat were correct.

Map or diagram indicating tire or skidmarks at scene of accident held admissible:

IDAHO

*Hayward v Yost* (1952) 72 Idaho 415, 242 P2d 971

*McKee v Chase* (1953) 73 Idaho 491, 253 P2d 787 (citing annotation)

The following additional authority is relevant to the issues discussed in this section:

<>

Civil engineer's drawing showing, inter alia, tire tracks purported to have been made by vehicles involved in accident, was admissible in action to recover for injuries caused by accident. *McKee v Chase* (1953) 73 Idaho 491, 253 P2d 787 (citing annotation).

Map showing skid marks at scene of accident admissible where map was made by engineer (who was not present at time of accident) under instructions from chief of police to whom skid marks had been identified by owner of car making marks. *Hayward v Yost* (1952) 72 Idaho 415, 242 P2d 971.

[\*III] Admissibility in criminal cases

[\*18] Generally

In numerous prosecutions for violation of the criminal laws testimony of witnesses as to tire tracks or skid marks has been held admissible, as for example, to prove that defendant's car was at the scene of the crime, or, in prosecutions for involuntary homicide in the operation of a car, to show its speed, location with respect to the center line of the highway, etc. (These situations will be more specifically detailed in succeeding sections of the annotation.)

*State v Culbertson* (1969) 6 NC App 327, 170 SE2d 125 (involving footprints and tire tracks found near store where robbery occurred)

The following additional authority is relevant to the issues discussed in this section:

<>

In criminal prosecution, photographs which showed skid marks and other designs on pavement in area about store which defendant robbed were admissible even though lighting conditions in photographs were different than those which existed when skid marks were made. *Porter v State* (1979) 271 Ind 180, 391 NE2d 801 (overruled as stated in *Hampton v State* (Ind App) 468 NE2d 1077).

Testimony as to skid marks was admissible in careless driving prosecution to show course and speed of defendant's car where witness observed marks within reasonable time after accident. *State v Poucher* (1957, Mo App) 303 SW2d 197.

There was no error in murder prosecution in admitting testimony of detective who investigated crime scene that approximately six feet behind victim's truck there was skid mark or gouge-like place in shoulder of road that appeared to have been made by car tire, since investigator was merely using shorthand statement describing what he observed; although remark may have had slight probative value in absence of showing that mark corresponded with tires on defendant's car, or any car, it was not so prejudicial as to warrant exclusion. *State v Hinson* (1984) 310 NC 245, 311 SE2d 256, cert den 469 US 839, 83 L Ed 2d 78, 105 S Ct 138.

Trial court did not abuse its discretion, in murder prosecution, in concluding that witness was sufficiently qualified to testify as expert on shoe and tire print comparisons, where field of shoe and tire print comparisons was not particularly complex, witness' opinions were not conclusive and thus not pivotal to resolution of case, jury heard descriptions of physical comparisons upon which witness based his conclusions and saw exhibits relied upon by witness, and other evidence of defendant's guilt, including DNA analysis, was strong. Rules of Evid., Rule 702. *Rodgers v. State*, 2006 WL 1162091 (Tex. Crim. App. 2006) [citing annotation].

[\*19] Prosecutions for offenses involving operation of vehicles; generally

The courts have held admissible testimony as to tire or skid marks in some cases involving prosecutions for homicide in the operation of an automobile in which the opinions did not indicate for what particular purpose such testimony was sought to be introduced.

Thus, in *Gills v. State* (1950) 35 Ala App 119, 45 So2d 44, cert den 253 Ala 283, 45 So2d 51, a prosecution for manslaughter in connection with the operation of an automobile, the court held that the reception of evidence of officers who came to the scene soon after the collision and before the automobile was moved or the body of deceased was released from beneath it, and who were allowed to describe the signs and marks which they observed on the pavement, with particular reference to the skids and scratches, 204 feet in length, on the surface of the highway, did not constitute error.

And in *State v. Weiner* (1925) 101 NJL 46, 127 A 582, a prosecution for involuntary manslaughter in the operation of a bus, the court held admissible testimony of two witnesses, one of whom was at the scene of the accident immediately after it occurred, and the other of whom arrived about an hour thereafter, to the effect that skid marks were observed at the place where the accident occurred, notwithstanding the objection of defendant that there was nothing to show that these skid marks were made by the bus which struck deceased, the court pointing out, in addition to the evidence above referred to, that two passengers in the bus testified to the sudden application of the brakes to the bus. The court remarked that the evidence was admissible as descriptive of the scene of the accident, shortly after its occurrence, and that its admissibility rested upon the same principle as makes the testimony of articles found or footprints observed at the place of the commission of a crime admissible as part of the *res gestae*.

In *Summers v. Commonwealth* (1930) 236 Ky 499, 33 SW2d 594, it was held that where defendant in a prosecution for homicide in the operation of an automobile testified that his car ran into a ditch and then, when he pulled it therefrom, swerved across the road, and he introduced proof to the effect that the track of his car in the ditch at the side of the road was there the next day after the accident, the trial court properly permitted certain witnesses to testify in rebuttal that the track in the ditch on the side of the road was made by the wrecking car which pulled defendant's car out.

The following additional authority is relevant to the issues discussed in this section:

◇

In manslaughter prosecution evidence of tire marks and tracks of defendant's automobile at the place of collision shortly preceding the collision causing death was admissible as circumstance bearing on guilt or innocence of defendant. *Gossett v State* (1961) 105 Ga App 17, 123 SE2d 322.

In negligent homicide prosecution, police officer's testimony that he observed skid marks on highway made by defendant's car was not objectionable as hearsay because officer did not see accident, where officer testified that defendant admitted that marks were made by his car. *State v Coleman* (1959) 236 La 629, 108 So 2d 534.

In manslaughter prosecution growing out of automobile accident, testimony concerning marks on highway immediately after collision was proper as evidence of course of travel of automobiles involved; state was not required to present affirmative evidence that marks were not there before accident. *State v Feger* (1960, Mo) 340 SW2d 716.

In prosecution for drunken driving, police officer's testimony as to skid marks was admissible as relevant to whether defendant was operating car carefully at time of accident. *State v Ryan* (1955, Mo) 275 SW2d 350.

In prosecution for reckless driving, court correctly admitted testimony of highway patrolman who investigated accident as to patrolman's opinion regarding point of collision, such opinion being based upon, inter alia, skid marks on road. *Long v State* (1954, Okla Crim) 274 P2d 553.

In action for negligent homicide in operation of automobile, testimony that 1/2 hour before accident defendant made such accelerated start that he left 10 feet of tire marks is admissible upon issue of his state of mind at time of accident. *State v Betts* (1963) 235 Or 127, 384 P2d 198, 7 ALR3d 1445.

See *State v Golub* (1976) 24 Or App 19, 544 P2d 609, infra § 23.

In manslaughter prosecution, testimony of police officer as to length and nature of skid marks was admissible where marks were sufficiently identified as made by defendant's car. *Commonwealth v Smith* (1955) 178 Pa Super 251, 115 A2d 782.

Trial court in prosecution for felony driving under influence properly admitted investigating officer's testimony based on gouge marks left by vehicle when it left roadway to strike and kill two pedestrians, where testimony was admitted to show that point of impact was off roadway. *State v Nathari* (1990, App) 303 SC 188, 399 SE2d 597.

In prosecution for negligent homicide by operation of car while under influence of alcohol, evidence as to skid marks indicating point and manner of collision in which defendant's car was involved was admissible. *State v McMurray* (1955) 47 Wash 2d 128, 286 P2d 684.

[\*20] To show location of vehicle in relation to center line of highway

Testimony as to the location of tire or skid marks is relevant with respect to the question whether a machine involved in a collision was on the proper side of the highway or the vehicular portion thereof at the time of the accident.

Thus, in *People v. Ryczek* (1923) 224 Mich 106, 194 NW 609, a prosecution for involuntary manslaughter, the court was of the opinion that there had been no such change in the locus in quo as to make inadmissible testimony of a sheriff as to tracks made by an automobile in the road near the place where the accident occurred, even though his observations were made twenty-four hours after the accident, where it appeared that the road was a dirt one, that the tracks made by the automobile were still plain, and that no other automobile had been over that part of the road, although there were some wagon tracks, the testimony indicating that the left wheel of the automobile was on the footpath, on which the injured person was walking, along the side of the vehicular portion of the road.

Also in *Lawrence v. Commonwealth* (1943) 181 Va 582, 26 SE2d 54, a prosecution for homicide arising out of a head-on collision of defendant's automobile, proceeding in an easterly direction, with that of one in which deceased was a passenger, and which was proceeding in a westerly direction, it was held that there was no error in admitting testimony of an engineer, who could not of his own knowledge have known that the skid mark in question was made by defendant's automobile, but who made an examination at the place of the accident two days after it occurred, and whose evidence was to the effect that he saw a skid mark, apparently made by defendant's automobile, which skid mark measured on a straight line parallel to the highway was eighty feet from the point of beginning to the place of accident, and began in the passing lane for eastbound traffic, crossed over the center line of the highway at an angle of about thirty degrees, and ran diagonally for fifty-four feet across the gravel to the point of impact with the car in which deceased was a passenger.

And in *People v. Richardson* (1938) 25 Cal App2d 408, 77 P2d 483, a prosecution for negligent homicide committed in connection with the operation of an automobile, photographs of tracks made by defendant's car when it went from its right to its left side of the highway were held material and competent, as tending to prove that the automobile of the defendant was driven from its right to its left side of the highway.

However, in *Commonwealth v. Reed* (1943) 152 Pa Super 249, 31 A2d 595, a prosecution for violation of a provision of the motor vehicle code requiring automobiles to be driven on the right-hand side of the road, in which defendant offered to prove by his wife, who came to the scene of the accident after it occurred, that certain marks on the highway led directly to the car with which her husband's car collided, but the witness herself testified that when she arrived at the scene of the accident, the other car was no longer there, it was held that she was incompetent to testify to where the marks led.

The following additional authority is relevant to the issues discussed in this section:

See *Eidson v State* (1983) 167 Ga App 184, 305 SE2d 787, § 23.

See *State v Feger* (1960, Mo) 340 SW2d 716, supra § 19.

See *State v Poucher* (1957, Mo App) 303 SW2d 197, supra § 18.

See *State v McMurray* (1955) 47 Wash 2d 128, 286 P2d 684, supra § 19.

[\*21] To show speed of vehicle

Where there is a question, in a prosecution for involuntary homicide in the operation of a motor vehicle, whether the vehicle was, at the time of the accident, being operated at an unlawful rate of speed under the circumstances, it has been held that testimony as to tire or skid marks is admissible as being relevant on such point.

So, in *Commonwealth v. Klosek* (1928) 262 Mass 416, 160 NE 252, a prosecution for operating an automobile in a public street so as to endanger the lives and safety of the public, the court held competent testimony of a witness that he measured the brake marks of defendant's car on the road for 120 feet, that they extended about thirty feet from the blood spot in the road to the place where the car stopped, this evidence being competent in view of defendant's testimony that he stopped his car within two or three feet after he struck the child.

And in *Ronning v. State* (1924) 184 Wis 651, 200 NW 394, a prosecution of the driver of an automobile for feloniously killing another while driving at an unlawful speed, it was held proper to show the tracks the machine made when it swerved or slid, and the distance of such swerving and sliding.

In *State v. Ormond* (1937) 211 NC 437, 191 SE 22, a prosecution for homicide while unlawfully operating an automobile on the highway, the court held that it was proper, on the question of speed at the time of the collision, to consider skid marks.

And in *State v. Miller* (1926) 119 Or 409, 243 P 72, affd 273 US 657, 71 L ed 825, 47 S Ct 344, a prosecution for involuntary manslaughter in the operation of an automobile at a high and dangerous rate of speed causing the death of one walking on the highway, where objection was made to the testimony of a certain witness, who went to the scene of the accident the following morning, that he traced skid marks for a distance of approximately 230 feet on the pavement, and it appeared also that another witness was about 150 or 200 feet away at the time decedent was struck, and testified that he traced skid marks in question to the automobile in the ditch, and stated that there were no marks of this kind prior to the accident and that the marks leading to the automobile were discernible on the pavement for a period of ten days or two weeks, and it appeared that there was no substantial change in conditions, the court was of the opinion that this and other evidence of similiar import, to which objection was made, was admissible.

It was also held proper to admit in evidence for reference purposes a map upon which appeared skid marks, measuring approximately 230 feet in length and leading to where the automobiles stopped. Id.

The following additional authority is relevant to the issues discussed in this section:

&lt;&gt;

In collision case where object struck offers little or no resistance, nonobserver may testify as to speed of car on basis of skid marks, but police officer could not testify, in manslaughter prosecution, as to defendant's speed as indicated by skid marks and damage to vehicles which collided, where there was no predicate for officer's opinion. *Huguley v State* (1957) 39 Ala App 104, 96 So 2d 315, cert den 266 Ala 697, 96 So 2d 319 (citing annotation).

In prosecution for speeding, skid marks may be taken into consideration to determine speed of automobile. *State v Daley* (1963) 2 Conn Cir 439, 200 A2d 849.

Police officer's testimony, based on his examination of skid marks, that defendant was traveling 45 miles an hour in 15-mile-an-hour school zone was admissible where officer's qualifications, including his training with accident investigation units and his study of books covering subject of estimating speed from skid marks, were fully explored during cross-examination. *Bell v District of Columbia* (1966, Dist Col App) 218 A2d 520.

See *People v Ebejer* (1976) 66 Mich App 333, 239 NW2d 604, infra § 23.

See *State v Poucher* (1957, Mo App) 303 SW2d 197, supra § 18.

Expert testimony as to speed of vehicle as indicated by skid marks was admissible *State v Bosch* (1952) 125 Mont 566, 242 P2d 477.

Extent of damage to automobile, skid marks, and distance automobile traveled after it left highway are relevant on question of speed in action for negligent homicide in operation of automobile. *State v Betts* (1963) 235 Or 127, 384 P2d 198, 7 ALR3d 1445.

Police officer's testimony as to speed as indicated by skid marks is admissible although officer did not see accident, where circumstantial evidence indicated marks made by defendant's car. *State v Read* (1952) 121 Utah 453, 243 P2d 439.

See *State v McMurray* (1955) 47 Wash 2d 128, 286 P2d 684, supra § 19.

See *Lee v State* (1976, Wyo) 556 P2d 217, infra § 23.

[\*22] To prove that defendant's vehicle was at scene of crime

In prosecutions for various crimes intentionally committed testimony or evidence that tire marks similar to those on defendant's car were observed at the scene of the crime has been held admissible for the purpose of connecting defendant with the crime.

## WASHINGTON

*State v. Simons* (1933) 172 Wash 438, 20 P2d 844

Thus, in *Blackmon v. State* (1945) 246 Ala 675, 22 So2d 29, a prosecution for the murder of a police officer, the court

held admissible testimony of a sheriff to having seen, on the night of the homicide, tire tracks, two of which tracks indicated that two tires were irregular, one on the left back wheel and one on the right front wheel, having "the same print," the other two tires being regular, which tracks were found near the scene of the crime and also at defendant's house, and which "appeared to be the same car tracks," and corresponded with those of defendant's car, this evidence tending to corroborate the testimony of one jointly charged with the crime but who had turned state's evidence.

And in *Haley v. State* (1919) 84 Tex Crim 629, 209 SW 675, 3 ALR 779, a prosecution for murder, where there was testimony that defendant owned an automobile, one tire of which was smooth and another, on the other side, had a diamond tread, and that there were found on the ground a short distance from the scene of the homicide tracks made by an automobile with a smooth tire on one side and a diamond-tread tire on the other; there was evidence that on the night the homicide took place defendant was recognized while driving his car; the imprint made by the diamond-tread tire on the mud near the scene of the homicide was preserved and introduced in evidence; and a plaster cast of the tire on defendant's car was also made, and proof was introduced that the tread on his car and the impression on the mud were identical in size and shape, the court held that the fact that it was possible that the track might have been made prior to the homicide or by an automobile other than that of defendant would, under the circumstances, relate to the weight of the testimony, but would not be legal ground for its rejection.

Also, in *Adams v. State* (1947) 32 Ala App 626, 29 So2d 148, a prosecution for murder, it was held that there was no error in permitting a witness to testify that he observed only one set of car tracks in the road at the scene of the killing and that these tracks were in about the center of the road, it appearing that the witness arrived at the scene of the shooting shortly after it occurred. In the opinion of the court such testimony had relevant value when considered in relation to the location of the deceased's body, and, in a circumstantial way, contributed to the jury's determination of the position of the defendant and deceased at the time of the shooting, and tended to shed light thereon, although it appeared that a number of witnesses had visited the scene before the witness in question arrived there.

In *Williams v. State* (1949) 34 Ala App 253, 39 So2d 29, cert den 251 Ala 696, 39 So2d 39, a prosecution for voluntary homicide, it was held that permitting some of the state's witnesses to testify that they observed car tracks which led from one point to another did not constitute an infraction of the rule which provides that a witness may not testify to a conclusion.

And in *Cooper v. State* (1944) 197 Ga 611, 30 SE2d 177, a prosecution for murder, the court stated that it was proper to allow a witness to describe a tire print or track.

In *Collier v. Commonwealth* (1947) 303 Ky 670, 198 SW2d 974, a prosecution for armed robbery, testimony of a highway patrolman that the day following the robbery he saw automobile tracks near the point where the prosecuting witness testified the car in which defendants took him to the place of the robbery was stopped, which tracks were made by a car with "mud grip tires," such as those on the car of one of the defendants, was admissible as establishing a link in the circumstantial chain by proving that a car with tires similar to those on defendant's car had been at the scene of the robbery.

So too, in *State v. Prunty* (1918) 276 Mo 359, 208 SW 91, followed in *State v. Funk* (1918, Mo) 208 SW 97, a prosecution for breaking and entering a bank and taking money therefrom, evidence showing fresh car tracks in a field three-quarters of a mile distant from the bank, the morning after the burglary, which tracks resembled those of a car in which defendants were apprehended, some 150 miles from the place of the burglary, with the loot, was held admissible to show the criminals were trailed.

And in *Foreman v. State* (1938) 214 Ind 79, 14 NE2d 546, prosecution for automobile banditry (apparently use of an automobile in connection with a robbery), the court held that any fact that legitimately tended to connect defendant with the commission of the crime was admissible; thus, the finding of tracks leading from the scene of the attempted robbery, where defendant was shown to have been, to a place where there was evidence that a parked automobile had been

standing, was competent. The court in this connection stated that evidence that a strange automobile was in the vicinity at the time, and the unusual manner in which it was operated, corroborated the other circumstances, and failure to directly connect the defendant with the tracks or the automobile would affect merely the weight of the evidence and not its admissibility.

Also, in *Moses v. State* (1933) 124 Tex Crim 200, 61 SW2d 112, the court held admissible, in a prosecution for burglary, testimony describing automobile tracks, made after a light rain, and in close proximity to the burglarized premises, as well as testimony that automobile tracks having the same peculiarity were observed on the next day in a town other than that where the burglary was perpetrated, and that these tracks were followed to a car on the street which belonged to defendant and was found at his home a short time thereafter.

Similarly, in *Schleeter v. Commonwealth* (1927) 218 Ky 72, 290 SW 1075, in view of evidence that defendant used a Cadillac touring car in transporting whisky stolen from the burglarized house, the court held that it was competent to admit evidence that a large Cadillac, with tires having treads similar to the tracks of the car that carried the whisky from the burglarized home, was found at the home of defendant, it being a circumstance, though slight, tending to connect defendant with the commission of the offense charged.

And in *Courtright v. State* (1944) 79 Okla Crim 270, 154 P2d 588, a prosecution for larceny of cattle, the court held admissible evidence of motor truck tracks observed by witnesses at the place where a truck had apparently been backed up to the prosecuting witness' fence for loading the cattle, it appearing that the truck used in transporting the cattle was a six-wheeled truck, four wheels on the back and two on the front, and that the defendant owned just such a truck, and that the imprints of the tracks observed were similar to the peculiar markings on the tires of defendant's truck.

And in *Lamar v. State* (1941) 141 Tex Crim 361, 149 SW2d 89, a prosecution for rape, the court held that it was proper to permit a member of the state highway patrol to testify that he examined the tires on defendant's car and found that they made "the same kind of a track as the tracks" he found in the pasture where it was alleged the assault had been committed, and to testify further "that was the only car track out there in the pasture that I found."

So too, in *State v. Robinson* (1937, Mo) 106 SW2d 425, a prosecution for rape, where it appeared that defendant took the prosecutrix in an automobile from her home to a spot about two miles distant, where she claimed he raped her, the court held admissible testimony of police officers that the tire tracks observed at the place where prosecutrix claimed she entered defendant's car were of the same in size and character as those on defendant's car.

In *Flippin v. State* (1940) 140 Tex Crim 615, 145 SW2d 1098, a prosecution for theft, the court overruled an exception to testimony of a sheriff that he made a diagram of the tracks of a truck at the time they were found at the scene of the alleged theft and that such tracks were similar to the tires on defendant's truck, the court stating that the objection thereto went to the weight rather than to the admissibility of the testimony.

As to the admissibility of maps or diagrams in civil cases, see § 17, supra.

Also in *Watson v. State* (1942) 141 Neb 23, 2 NW2d 589, prosecution for breaking and entering a corncrib with intent to steal, the court held that there was no error in admitting in evidence both a plaster cast of tire tracks found in a field between the corncrib and the road, the rear tires of defendant's truck having peculiar wear marks and treads similar to those found in the track at the scene of the crime, the court thus rejecting defendant's contention that such evidence was admissible only upon a showing that the truck was in the vicinity of the crib on the night in question and upon a showing as to how much the tires had been worn between August 22, the date of the crime, and August 27, apparently the date on which the casts were taken, it appearing that the witnesses identified the exhibits but expressed no opinion as to the conclusions to be drawn therefrom, and the comparison of the tires and the cast was left for the jury and they reached their own conclusion thereon, having had the benefit of defendant's testimony as to the amount of wear the tires had had in the five-day period between August 22 and August 27.

Likewise, in *Jackson v. State* (1936) 54 Ga App 413, 187 SE 893, a prosecution for burglary, where the evidence disclosed that a storehouse had been broken into and a quantity of sugar feloniously taken, the court held that evidence of tire tracks, identifiable because of certain peculiarities, as having been made by the automobile of one of the defendants, which tracks led away from the scene of the crime to the spot where the stolen property had been concealed, was competent to show defendant's guilt of the crime charged.

And in *State v. Mehlhaff* (1947) 72 SD 17, 29 NW2d 78, a prosecution for larceny of barley, the court, after stating that evidence relating to the identity of defendant as the person who committed the crime charged is permitted to take a broad range, held admissible testimony of the person from whom the grain was stolen, that tracks made by a car and trailer were found the next morning by the witness upon the ground where the larceny was committed and were traced by him into defendant's farmyard, the court holding such evidence admissible as a circumstance tending in some degree to connect defendant with the offense regardless of any ascertained or determined similarity between the tracks traced by the witness and tracks made by defendant's car and trailer.

In *Hamilton v. State* (1936) 131 Tex Crim 88, 96 SW2d 983, a prosecution for the theft of grain from a granary, the court stated that the fact that the tracks of the truck at the granary and the casings on defendant's truck corresponded in a general way was a circumstance to be considered by the jury, but that in its judgment such evidence was without much probative force.

Also recognizing that testimony or evidence that tire marks similar to those on defendant's car were observed at scene of crime is admissible for purpose of connecting defendant with crime:

#### ALABAMA

*Spellman v State* (1986, Ala Crim App) 500 So 2d 110

#### VIRGINIA

*Claud v Commonwealth* (1977) 217 Va 794, 232 SE2d 790

The following additional authority is relevant to the issues discussed in this section:

<>

In burglary case, trial court did not err in admitting black and white photographs of tire marks found at scene of burglary, where similar color picture had been received without objection, and where only argument was that black and white photograph was without probative value. *Wyss v State* (1977) 262 Ark 502, 558 SW2d 141.

Trial court did not err in permitting police officers to describe similarity between front tires on defendant's vehicle and tracks made near scene of burglary where vehicle had different and distinctive types of tread on two front tires. *Holmes v State* (1975) 257 Ark 871, 520 SW2d 715.

In grand larceny prosecution, nonexpert testimony of police officers that tire tracks at scene of crime were similar to those made by defendant's car was admissible. *Richardson v State* (1953) 221 Ark 567, 254 SW2d 448.

See *Sanders v State* (1975) 235 Ga 425, 219 SE2d 768, cert den 425 US 976, 48 L Ed 2d 800, 96 S Ct 2177 and

(superseded by statute as stated in *Godfrey v Francis*, 251 Ga 652, 308 SE2d 806, cert den 466 US 945, 80 L Ed 2d 475, 104 S Ct 1930, reh den 467 US 1231, 81 L Ed 2d 885, 104 S Ct 2691, habeas corpus proceeding (ND Ga) 613 F Supp 747, affd (CA11 Ga) 836 F2d 1557, reh den, en banc (CA11 Ga) 842 F2d 339 and cert dismd 487 US 1264, 101 L Ed 2d 977, 109 S Ct 27), infra § 23.

In kidnapping and rape case, opinion of investigating officer that tire tracks at scene of rape appeared to have been made by defendant's vehicle was admissible, where officer gave facts on which his opinion was based. *Calloway v State* (1978) 144 Ga App 457, 241 SE2d 575.

Pictures of automobile tracks found at point of alleged rape were held admissible where sufficient similarity between such tracks and tires of automobile allegedly used by defendant was shown. *State v Puckett* (1965) 88 Idaho 546, 401 P2d 784.

Testimony that tire marks similar to those made by accused's car were seen at scene of crime does not conclusively show accused's connection with crime, but is link in circumstantial chain. *Hocker v O'Klock* (1959) 16 Ill 2d 414, 158 NE2d 7 (citing annotation).

In prosecution for rape, criminal deviate conduct and criminal confinement, trial court did not abuse its discretion in determining that police officer was expert witness as to his testimony comparing plaster casts of tire print taken from scene with tire removed from defendant's automobile where officer testified that he worked in trace evidence section of police department and had taken special courses and training in microscopy; exhibits consisting of photograph of tire print or track found at scene, plaster cast of tire track and tire removed from defendant's automobile were relevant to corroborate testimony of prosecutrix and accomplice about what had occurred at abduction. *Forrester v State* (1982, Ind) 440 NE2d 475.

Plaster-of-Paris cast of tire tracks and shoe prints, made at scene of crime by deputy sheriff, and expert testimony of person from state crime laboratory that tire tracks at scene represented by plaster cast matched automobile tires of deceased and those of truck owned by defendant in criminal prosecution, were admissible over objection that deputy sheriff was unqualified by training or experience to make cast, where deputy had received training in making casts at law enforcement school at *Louisiana State University*. *State v Washington* (1970) 256 La 233, 236 So 2d 23.

Nonexpert may testify that tire marks on road were those of defendant's automobile, his statement being one of fact and not expression of opinion. *State v Scott* (1952) 221 La 643, 60 So 2d 71.

In murder prosecution, objection, on ground of its indefiniteness, to testimony of police officer as to marks corresponding to those made by accused's tires went to weight, not admissibility, of evidence. *Breeding v State* (1959) 220 Md 193, 151 A2d 743 (citing annotation).

In action for theft of livestock, trial court erred in permitting sheriff to testify that tires on defendant's truck would have made the tracks found at scene of crime; sheriff should have described in detail the tracks and left it for jury to decide whether or not car in question made them. *Joyce v State* (1956) 227 Miss 854, 87 So 2d 92.

See *State v Morse* (1976, Mo App) 542 SW2d 365, infra § 23.

Testimony of deputy sheriff, in grand larceny prosecution, relating to tire imprints was admissible where deputy sheriff gave opinion that imprints found were similar to those made by pickup truck operated by defendant. *State v Schumacher* (1969) 184 Neb 653, 171 NW2d 181.

See *State v Monk* (1976) 291 NC 37, 229 SE2d 163, infra § 23.

Use of cast made of automobile tracks at place in highway where dead body was found was competent to identify such tracks as having been made by defendant's automobile, discrepancies existing as to dates on which comparisons were made went to weight of evidence and not competency thereof. *State v Willis* (1972) 281 NC 558, 189 SE2d 190.

Where plaster cast was made of tire marks at scene of homicide and compared with tires on car which defendant admitted he was using, testimony of deputy sheriff concerning comparison of tire tracks was admissible. *State v Williams* (1970) 276 NC 703, 174 SE2d 503, rev'd on other grounds 403 US 948, 29 L Ed 2d 860, 91 S Ct 2290, on remand 279 NC 388, 183 SE2d 106 and (ovrld in part by *State v Taylor*, 337 NC 597, 447 SE2d 360), 403 US 948, 29 L Ed 2d 860, 91 S Ct 2290, on remand 279 NC 388, 183 SE2d 106.

In prosecution for murder, evidence of tire tracks which were found at scene of alleged crime and which corresponded to tires on defendant's automobile was properly admitted in evidence. *State v Brown* (1965) 263 NC 327, 139 SE2d 609, appeal after remand 271 NC 250, 156 SE2d 272.

In robbery, kidnapping, and assault prosecution, where tires removed from defendant's vehicle were in evidence, admission of plaster casts of tire prints found in clay soil at scene of crime did not constitute error. *State v Thompson* (1972) 15 NC App 416, 190 SE2d 355, cert den 282 NC 307, 192 SE2d 197.

There was no error in admitting evidence of plaster cast and photographs of tire tracks made by identification specialist few hours after crime had been committed, where obtained from fresh tire tracks found in alleyway behind building which had been broken into and from which safe had been stolen, and there was evidence that tire tracks from which cast was made corresponded in number of respects with tread on tires found on defendant's car when it was impounded on same night crime was committed. *State v Walker* (1969) 6 NC App 447, 170 SE2d 627 (ovrld in part by *State v Jackson*, 302 NC 101, 273 SE2d 666).

Where foundation presented reasonable inference that tire track was made by car used in committing larceny, photograph of track and photographs of tread pattern of tires on defendants' automobile at time of their arrest were admissible in larceny prosecution. *State v Jager* (1957, ND) 85 NW2d 240, later proceeding (ND) 87 NW2d 58, later proceeding (ND) 91 NW2d 337.

Court in prosecution for arson did not abuse its discretion in permitting sheriff to testify that tire tracks found 200 or 300 feet from destroyed property were similar to tires found on accused's truck, even though sheriff also testified that tires on accused's truck were standard make, that any other tire from same mold would have made same impression, and that he was not stating that track was in fact made by tire on accused's truck. *Case v State* (1976, Okla Crim) 555 P2d 619, cert den 431 US 965, 53 L Ed 2d 1061, 97 S Ct 2922.

In prosecution for larceny of livestock, testimony of sheriff relating to comparison of tire marks of truck found at scene of crime with tires on truck owned by defendant's father, which was introduced to prove identity of truck used in commission of crime, held admissible as descriptive statement of fact made from personal observation. *Allcorn v State* (1964, Okla Crim) 392 P2d 66.

In manslaughter prosecution, police officer's testimony as to defendant's speed as shown by skid marks was admissible, notwithstanding testimony by defendant's expert that, under conditions presented, no one could estimate speed at time of accident. *Wallen v State* (1959, Okla Crim) 338 P2d 170.

In murder prosecution, admission of photographs of tire marks at place where deceased was found was not error. *State v Goyet* (1957) 120 Vt 12, 132 A2d 623.

The solution of the question as to what testimony relating to tire marks is inadmissible as the expression of an opinion by a nonexpert witness is difficult, if not impossible, of generalization, and recourse must be had to the individual cases.

Although a witness may properly be allowed to describe a tire print he should not be allowed to give his opinion as to how long it had been there. *Cooper v. State* (1944) 197 Ga 611, 30 SE2d 177.

And in *State v. Hinesh* (1930) 59 ND 29, 228 NW 453, a prosecution for the larceny of grain, where there was evidence that automobile tire tracks conforming to the peculiar description of those on defendant's car were found on the morning after the theft leading to and from the prosecuting witness' granary, it was held that an objection was properly sustained to the question, "What kind of tread did the Goodyear tire have with reference to the kind of treads testified to as being found on the highway?", on the ground that it called for the conclusion of the witness, the court pointing out that in any event the witness was permitted to and did fully describe the tire referred to.

Also, in *Wallace v. State* (1942) 143 Tex Crim 596, 160 SW2d 256, a prosecution for homicide resulting from operation of an automobile which collided with a car in which decedent was riding, where the experience detailed to qualify a witness to give his conclusion, in answer to a hypothetical question, that defendant's car, which he observed at the scene of the wreck, together with the charred remains of the other car, was being driven at a speed between seventy-five and eighty miles per hour, was, chiefly, that he had been a highway patrolman for three and a half years, and had observed wrecks and the speed of automobiles and he testified that he observed marks on the highway, indicating that a tire had skidded there, but nothing was related to show, and it was not revealed, just how these marks aided his conclusion, and he further testified that skid marks went to both cars, and that he had driven an automobile for fifteen years, during which time he had observed quite a few wrecks, the speed of automobiles, and had made special study to determine the speed and the causes of wrecks and accidents, and to some extent, which he did not specify, had studied the impact of automobiles, the court held that under the facts testified to by the witness, under all the circumstances of this case, he had not shown himself to be in position to reach a conclusion as to the speed of defendant's car so definitely as to aid the jury beyond what the physical facts of the case, most of which appeared to be without dispute, would do; and the conviction was reversed.

The use of tire marks of a skidding automobile as the basis for expert testimony is well recognized. *State v. Lingman* (1939) 97 Utah 180, 91 P2d 457 (prosecution for involuntary manslaughter based on an automobile collision). The purpose of the testimony in this case was to determine the speed of the automobile, and was based on information given with respect to such marks.

The following additional authority is relevant to the issues discussed in this section:

◇

See *State v Farris* (1982, Mo) App) 639 SW2d 279, § 22.

Court properly permitted sheriff to give expert opinion as to comparison of tire tracks found in driveway of murder victim's home with tire tracks made by car driven by accused, where sheriff had 18 years of experience in tire recapping business. *Sanders v State* (1975) 235 Ga 425, 219 SE2d 768, cert den 425 US 976, 48 L Ed 2d 800, 96 S Ct 2177 and (superseded by statute as stated in *Godfrey v Francis*, 251 Ga 652, 308 SE2d 806, cert den 466 US 945, 80 L Ed 2d 475, 104 S Ct 1930, reh den 467 US 1231, 81 L Ed 2d 885, 104 S Ct 2691, habeas corpus proceeding (ND Ga) 613 F Supp 747, affd (CA11 Ga) 836 F2d 1557, reh den, en banc (CA11 Ga) 842 F2d 339 and cert dismd 487 US 1264, 101 L Ed 2d 977, 109 S Ct 27).

In prosecution for vehicular homicide, trial court properly admitted testimony of retired police officer and investigating patrolman, who examined tire tracks found on shoulder of wrong side of road and on pavement, that tire marks were

made by defendant's automobile, since both witnesses had seen automobile and tracks, and proper foundation thus had been laid from which witnesses could conclude that defendant's automobile had made tire tracks. *Eidson v State* (1983) 167 Ga App 184, 305 SE2d 787.

See *Calloway v State* (1978) 144 Ga App 457, 241 SE2d 575, § 22.

In manslaughter case, highway patrolman who has observed speeds of automobiles may base opinion as to speed of defendant's automobile at time of collision which caused death upon distance as indicated by marks on road and extent of damage. *Collins v State* (1952) 86 Ga App 157, 71 SE2d 99.

See *Forrester v State* (1982, Ind) 440 NE2d 475, § 22.

See *State v Scott* (1952) 221 La 643, 60 So 2d 71, supra § 22.

In prosecution for manslaughter wherein defendant alleged he had been driving motorcycle at low rate of speed immediately prior to colliding with two other vehicles, court properly permitted police officer to give opinion as to speed of motorcycle, where opinion was based in large part upon skid marks made by motorcycle and parked vehicle that had been moved by impact. *People v Ebejer* (1976) 66 Mich App 333, 239 NW2d 604.

In rape prosecution even if proper foundation was not laid for deputy's testimony that tire tracks made at crime scene were those of pickup truck, no manifest error occurred where on cross-examination defense counsel elicited deputy's testimony which demonstrated his qualifications to express his opinion as to origin of tire tracks and basis on which he formed that opinion. *State v Farris* (1982, Mo App) 639 SW2d 279.

Court in prosecution for burglary and stealing properly permitted highway patrol officer to give his opinion that tire tracks in photograph taken by him at scene of burglary were made by tires on accused's truck, where officer had 13 years of experience in taking pictures of tire tracks and comparing them to various tires. *State v Morse* (1976, Mo App) 542 SW2d 365.

Court in prosecution for armed robbery and murder properly permitted latent identification expert to testify that he had compared plaster cast of tire print made adjacent to scene of crime with tire taken from accused's automobile and that in his opinion, tire was same one that made imprint from which plaster cast was taken, where expert had over ten years of experience in tire print identification and analysis. *State v Monk* (1976) 291 NC 37, 229 SE2d 163.

See *Case v State* (1976, Okla Crim) 555 P2d 619, cert den 431 US 965, 53 L Ed 2d 1061, 97 S Ct 2922, supra § 22.

In prosecution for criminally negligent homicide arising out of intersection accident, investigating officer could express his opinion, based on his observation of skid marks, as to acceleration and deceleration of accused's vehicle. *State v Golub* (1976) 24 Or App 19, 544 P2d 609.

Court in prosecution for negligence homicide did not abuse its discretion in admitting police officer's testimony that tire marks left by accused's vehicle in his lane of travel were acceleration marks and not brake marks, where officer had observed accident scene shortly after occurrence of accident and had assisted in making measurements upon which diagram of accident was based and where officer's training in accident investigation at police academy had included instruction concerning rubber marks left on street as result of accident between motor vehicles. *Lee v State* (1976, Wyo) 556 P2d 217.

Presumption and burden of proof of accuracy of scientific and mechanical instruments for  
measuring speed, temperature, time, and the like

C. S. Patrinelis

*21 A.L.R.2d 1200*

#### TABLE OF REFERENCES

#### ARTICLE OUTLINE

**ARTICLE:** [\*1] Generally

As far as decisions directly touching the question to be annotated are concerned, an almost tomb-like silence is to be found on whether there is any presumption, or where the burden of proof lies, as to the accuracy of scientific and mechanical instruments used to measure speed, temperature, time, and the like. Whether such silence arises from a failure of the party interested to raise the question, either by objecting to the competency or admissibility of evidence of such measurements without proof of the accuracy of the measuring instrument, or whether the litigation involved is not of the type which lends itself to appellate review, it is difficult to say, but an investigation of the cases which in any way deal with the question of scientific or mechanical measurements and their introduction as evidence would seem to indicate that both factors have been responsible.

The admissibility and weight of evidence of scientific tests for lie detection,<sup>n1</sup> intoxication,<sup>n2</sup> and blood type,<sup>n3</sup> have been discussed in other annotations, and cases of this type will not be found in the present discussion. Other examples of cases involving the weight and admissibility of evidence as to the accuracy of measuring instruments, such as speedometers,<sup>n4</sup> chronometers,<sup>n5</sup> stop watches,<sup>n6</sup> tachometers,<sup>n7</sup> weighing scales,<sup>n8</sup> oil thermometers,<sup>n9</sup> voltmeters,<sup>n10</sup> hygrothermographs,<sup>n11</sup> and automatic fire-alarm indicators,<sup>n12</sup> as well as of various other instruments, may be found, but since such cases do not discuss the question whether the data evidenced by such instruments is presumed to be accurate without special proof of accuracy, they do not fall within the scope of the present annotation. It is suggested, however, that such cases be at least referred to as of possible collateral interest to the question involved herein, for such cases are, in some instances, examples of the pitfalls which await the lawyer who has failed to make timely objection to evidence whose accuracy has not been proven and may not be possible to prove.

Attention is also called to the fact that while the scope of the present annotation is not confined to scientific or mechanical measurements made at or during the time when the particular situation forming the basis of the litigation has occurred, yet the various objections which appear to be made to tests conducted after such time seem to have thus far effectively barred a consideration of this question from the viewpoint of the presumption and burden of proof of the accuracy of the measuring instrument.<sup>n13</sup>

The following additional authority is relevant to the issues discussed in this section:

◇

In prosecution for speeding, state was required to prove accuracy of particular speed measuring device used to establish defendant's speed whether it was "speed gun" or conventional radar speed meter. *People v Donohoo* (1977, 5th Dist) 54 Ill App 3d 375, 12 Ill Dec 49, 369 NE2d 546.

Courts may take judicial notice of underlying principles and reliability of properly tested and operated radar devices for determining speed of motor vehicles without requiring expert testimony concerning theory and mechanics of a particular unit, but where only means of testing accuracy of radar device is internal mechanism which is integral part of unit, and where there is no other evidence other than radar reading that motorist was speeding, speeding conviction could not be sustained. *State v Gerdes* (1971) 291 Minn 353, 191 NW2d 428.

In prosecution for obtaining money by false pretenses through fraudulent use of grain elevator scale, trial court did not err in admitting testimony as to tests of scale and finding that it was accurate, or in excluding defendant's evidence with respect to claimed errors in weighing loads on scale before and after alleged crimes. *Beyl v State* (1957) 165 Neb 260, 85 NW2d 653.

Arresting officer's testimony, that he made visual estimate of defendant's speed as 50 miles an hour and then used calibrated radar device that confirmed that speed, established defendant's guilt for speeding in 30 mile per hour zone. *People v. Hodos*, 720 N.Y.S.2d 710 (J. Ct. 2000).

Accuracy of radar instrument used to determine speed of cars was not established beyond reasonable doubt by testimony of officer that he tested instrument on day of claimed violation by use of tuning fork where there was no proof that tuning fork was accurate. *People ex rel. McCann v Martirano* (1966) 52 Misc 2d 64, 275 NYS2d 215.

Speeding conviction reversed where only evidence as to speed was arresting officer's testimony as to speed at which he clocked defendant, and there was no evidence as to testing of speedometer. *People v Barone* (1960) 24 Misc 2d 1020, 205 NYS2d 914.

Police officer's estimate of speed, taken together with reading of untested speedometer, was sufficient to sustain speeding conviction. *People v Belle-Isle* (1957) 9 Misc 2d 487, 168 NYS2d 920.

Conviction for violating statute limiting truck weight reversed on ground of insufficiency of legal proof of accuracy of scales employed. *People v Marotta* (1957) 5 Misc 2d 947, 165 NYS2d 639.

There are no presumptions that properly calibrated police speedometer becomes inaccurate after any specific time or miles of use. *County of Waukesha v Mueller* (1967) 34 Wis 2d 628, 150 NW2d 364.

[\*2] Presumptions, burden of proof, and prima facie evidence

Apparently there are no American decisions directly holding that evidence of measurements by mechanical or scientific instruments will be presumed to be correct in the absence of any evidence that the instrument has been tested for accuracy within a reasonable period.<sup>n14</sup>

Thus, in *Spokane v. Knight* (1917) 96 Wash 403, 165 P 105, for example, it was held that testimony of a police officer that he followed the defendant's car for a certain distance and that the speed registered on a tested speedometer attached to his motorcycle was between 27 and 30 miles per hour was sufficient to sustain a conviction for operating a motor

vehicle in excess of the 20-mile per hour speed limit, despite the defendant's testimony that his own speedometer, which he alleged was correct, registered less than 20 miles per hour, the court pointing out that while there was evidence that speedometers sometimes get out of order it was for the jury to determine whether the police officer's speedometer was out of order and did not register the speed correctly, and stating: "Speedometers, like other machines, may get out of order; but, where they are tested regularly, they may be relied upon with reasonable certainty to determine accurately the rate of speed at which a machine is driven. It cannot be said therefore that, because speedometers may be out of order, rates of speed may not be measured by instruments manufactured for that purpose, and which usually give approximately correct rates of speed. The question was one for the jury."

Whether the dearth of American authority on the point is any indication that the American courts are committed to a negative view as to the presumption of accuracy, it is impossible to say. It should be observed, however, that in many of the American cases there has been a failure to object to the introduction of such evidence on the ground that the measuring instrument has not been tested for accuracy. In other cases proof of accuracy has been accepted, and so no presumption was needed.

In England, on the other hand, there are at least two cases which seem to indicate that there is a presumption that either a watch or a speedometer is reasonably accurate, and that, unless the degree of accuracy contended for is hair-splitting or otherwise unreasonable, such evidence will carry the case in the absence of evidence of inaccuracy.

Thus, in *Nicholas v. Penny* [1950] 2 KB 466, [1950] All Eng 89, 21 ALR2d 1159, a police constable having testified that he drove a police car at an even distance behind the defendant's automobile for four-tenths of a mile along a road on which the speed limit was thirty miles per hour, and that the speedometer of the police car registered an even speed of forty miles per hour, the court held that such testimony was prima facie evidence of the fact that the defendant's car was traveling in excess of the speed limit of thirty miles per hour, even though no admissible evidence was introduced of the accuracy of the speedometer. The court pointed out that its holding was not to the effect that evidence of a speedometer reading was evidence of the exact accuracy of the device, since the question in the present case did not go that far, but that evidence of a speedometer reading of forty miles per hour was sufficient evidence upon which the court could act to obtain a conviction that the defendant was exceeding the speed limit of thirty miles per hour, although it was not strictly proved that the speedometer had been tested.

The court in the Nicholas Case also discussed the earlier English case of *Melhuish v. Morris* [1938] 4 All Eng 98, 82 Sol Jo 854, where two police officers who had followed appellant in a police vehicle testified that an observation of the speedometer in their car indicated that he had been driving at speeds of thirty-eight to forty-four miles per hour whereas the speed limit was thirty miles per hour. The giving of such testimony, it was there pointed out, did not constitute opinion evidence as to speed, but was evidence adduced entirely from an observation of a mechanical device, the accuracy of which had not been tested. Declaring that a holding that the speedometer must be tested for accuracy before evidence based upon it could be admitted into evidence went too far, the court in the Nicholas Case stated that it would not follow the Melhuish decision, pointing out that it was not bound to do so, especially since it was shown therein that the prosecution was not represented on appeal, and that certain material cases, which showed that the case was decided incorrectly, were not brought to the court's attention.

And attention is called to *Gorham v. Brice* (1902, Eng) 18 Times L 424 -- Div Ct, in which a motorist was charged with exceeding the speed limit of twelve miles per hour by driving at twenty-four miles per hour, after it was shown that a police constable stationed at the end of a measured distance of 176 yards had timed the rate of speed with an ordinary watch which had a second hand. The motorist denied that he was exceeding the speed limit, claiming that he had not traveled at more than eight miles per hour. In holding the evidence of the rate of speed admissible, despite the contention of appellant's counsel to the contrary, which was based on the theory that the watch used to time the rate of speed had not been tested and there was thus nothing to show that it was accurate, the court stated that it could not understand the motives of motorists in bringing such appeals, or what they thought to gain by suggesting there was no evidence as to speed simply because they did not like the findings of magistrates. The court declared that while the

magistrates may have come to a wrong decision, it had no power to interfere with their findings of fact, since they had the evidence before them and there was no suggestion made that the testimony of the constable ought not to be believed, nor was it possible for them to hold that observations as to time ought not to be admitted into evidence unless it was proved that the time in question was Greenwich time.

[\*3] Generally

[\*3a] Statutory provisions --

In *Joseph v. East Ham Corp. (Eng) [1936] 1 KB 367* -- CA, a homeowner protested a bill for electricity, contending that since the bill was for far more electricity than had ever been previously used in a similar period in his home, the meter was incorrect. A statute provided that an electric inspector should be appointed to duly certify the company's meters, but it was shown that no inspector had ever been appointed for the area. In upholding an injunction issued at the instance of the homeowner against cutting off his electricity, since a bona fide dispute had arisen between the consumer and supplier of electricity, the court pointed out that while the proper certification of the meter would have constituted conclusive evidence of the value of the supply, and therefore in such case the injunction could not have issued, since the consumer would have had to accept the meter reading as correct, the failure of certification was not a compliance with the statutory provisions and since the correctness of the meter reading could be questioned a bona fide dispute upon which an injunction could be founded had arisen.

The following additional authority is relevant to the issues discussed in this section:

◇

Court may take judicial notice that radar device can accurately record speed of automobile, and speed recorded on radar unit may be admissible in evidence provided accuracy of unit at time in question is established by tests made within reasonable time before and after speed was recorded and provided speed recorded was for defendant's automobile. *State v Carta, 2 Conn Cir 68, 194 A2d 544* (holding that whether test of radar unit by means of 40 and 60 mile-an-hour tuning forks, was sufficient for range of 20 to 70 miles per hour was for jury).

Trial court's determination that radar equipment was properly set up and tested for accuracy, was functioning properly, and was correct recorder of automobile speed, held supported by evidence. *State v Dantonio, 18 NJ 570, 115 A2d 35, 49 ALR2d 460* (affg (County Court) *31 NJ Super 105, 105 A2d 918*), also holding that lack of evidence that speedometers in state police cars had been recently tested at time defendant was alleged to have violated speed limit was immaterial where defendant did not raise point before close of trial.

Defendant automobile driver's conviction for speeding could not stand upon mere evidence of speedometer reading without more, since it was not shown that speedometer from which police officer testified was accurate. *Government of Virgin Islands v Rodriguez (1969, DC VI) 300 F Supp 909*.

In prosecution for violation of truck weight limitation, question of accuracy of scales on which truck was weighed was for jury, where evidence was conflicting; testimony that scales had been tested for accuracy by proper authority gave rise to presumption that one charged with legal duty would perform that duty. *Leonard v State (1955) 38 Ala App 138, 79 So 2d 803, cert den 262 Ala 702, 79 So 2d 808* (citing annotation), cert den 262 Ala 702, 79 So 2d 808.

Usefulness of radar for testing speed is so well established that expert testimony to prove its reliability is not necessary, courts taking judicial notice of such fact; but it is necessary to prove accuracy of particular equipment involved in case being tried. *Everight v Little Rock (1959) 230 Ark 695, 326 SW2d 796*.

Prosecution must prove radar instrument used to measure defendant's speed was accurate and was accurately operated. *State v Tomanelli* (1964) 152 Conn 727, 203 A2d 675.

Speeding conviction would be upheld where radar device was checked for accuracy by tuning fork test conducted three weeks after defendant's arrest. *State v Stoll* (1983, Super Ct) 39 Conn Supp 313, 464 A2d 64.

There being no presumption that speedometer is accurate, prosecution must submit evidence from which jury could find that device was operating properly and had been tested within reasonable time before date of its use in question, and evidence that speedometer was tested 7 months before date in question was not evidence that state trooper's speedometer had been tested within reasonable time before defendant's car was clocked at excessive speed. *State v Ellis* (1968) 5 Conn Cir 190, 248 A2d 71.

Evidence of speed of defendant's car as indicated by trooper's speedometer made out prima facie case of statutory violation of speeding. *State v Lane* (1967) 4 Conn Cir 368, 232 A2d 518.

In prosecution for speeding, testimony of officer "making a clock" of reading of his speedometer is prima facie evidence of violation of speed laws, though no evidence of accuracy of speedometer is introduced. *State v Tarquinio* (1966) 3 Conn Cir 566, 221 A2d 595.

In speeding prosecution, state had burden of proof of accuracy of radar device used to check speed of cars. *State v Moffitt* (1953, Super Ct) 48 Del 210, 100 A2d 778.

In prosecution for speeding, testimony of state trooper that radar showed defendant going 67 miles per hour in 55 mile per hour zone was sufficient to support defendant's conviction where defendant presented no evidence or expert testimony which demonstrated inaccuracy of radar unit or any circumstances which would cause inaccuracy. *People v Boalbey* (1980, 3d Dist) 90 Ill App 3d 738, 46 Ill Dec 113, 413 NE2d 553.

State sufficiently proved accuracy and proper operation of radar equipment in prosecution for speeding and reckless driving where arresting officer testified that he tested radar unit by accepted procedures before and after apprehending defendant. *People v Burch* (1974, 4th Dist) 19 Ill App 3d 360, 311 NE2d 410.

Court takes judicial notice of accuracy of radar devices in determining speed of moving object, subject to necessary proof as to accuracy and proper operation of particular device under consideration, and, where substantial testimony was that radar device used by police and tachograph used by defendant were accurate, it was function of trial court hearing case without jury to determine credibility of witnesses and weight afforded their testimony. *People v Barbic* (1969, 2d Dist) 105 Ill App 2d 360, 244 NE2d 626.

Expert testimony was not necessary to prove accuracy of radar device which determined speed of moving vehicle, and testimony of state trooper that radar was checked 15 minutes prior to occurrence in question by driving car past it at set speed and by use of tuning fork was sufficient to show accuracy of device. *People v Cash* (1968, 5th Dist) 103 Ill App 2d 20, 242 NE2d 765.

Although state had burden to prove that radar device used to measure defendant's speed at 74 miles per hour was reliable and accurate, defendant could not complain on appeal that his stop was without probable cause and his resulting conviction for drunk driving should be overturned, where defendant failed to make probable cause argument in trial court. *Smith v State* (1986, Ind App) 502 NE2d 122.

Evidence that radar speed meter showed defendant going 94 miles per hour was sufficient to present prima facie case of speeding, although there was no evidence as to when tuning fork device used to test meter had itself been tested, where evidence showed that meter had been tested with tuning fork with identical results both before and after defendant's

arrest and it had also been tested by comparison with speedometer of police car driven through radar zone. *State v Shimon (1976, Iowa) 243 NW2d 571.*

Burden of proof of accuracy of device used by police to measure speed of automobiles held sustained by prosecution. *Carrier v Commonwealth (1951, Ky) 242 SW2d 633.*

In action for speeding, evidence was sufficient to prove beyond reasonable doubt that defendant was speeding, where deputy testified at trial that he was certified to use radar gun and that he had checked gun to assure its accurate calibration and proper functioning. *State v Edwards (1989, La App 5th Cir) 537 So 2d 855.*

In prosecution for speeding, trial court did not abuse its discretion in finding violation on basis of evidence presented, where prosecution presented prima facie case of traffic violation by introducing radar measurement and driver's contention that he had overcome presumption of radar's validity was question for trial court. *State v Arnheiter (1991, Me) 598 A2d 1183.*

Results of radar speed measurement were properly accepted as prima facie evidence of speed of defendant's car, pursuant to statute not requiring proof of prior calibration. *State v Caron (1987, Me) 525 A2d 1049.*

In prosecution for speeding, evidence of defendant's speed as determined by "speed watch" was admissible where testimony showed that instrument was properly set up, was checked before use by officers operating it, was periodically checked by experts, and officer operating instrument observed defendant's car and testified as to his estimation of its speed. *People v Kenney (1958) 354 Mich 191, 92 NW2d 335.*

In prosecution for speeding, evidence met statutory requirements regarding evidentiary standard for speed calibrated by radar where officer's testimony indicated radar unit was thoroughly tested day defendant was ticketed, where records were introduced verifying accuracy of both radar and tuning fork used in testing, where officer testified that he was certified to operate radar unit and where officer testified there was no outside interference with unit as defendant's speed was calibrated. *State v Bogren (1987, Minn App) 410 NW2d 383.*

In vehicular speeding prosecution, prima facie case for admission of radar reading of defendant's speed taken from moving patrol car was established by testimony of officer who had made reading as to his training and experience and expert testimony as to how radar unit worked. *State v Calvert (1984, Mo) 682 SW2d 474.*

In prosecution for exceeding speed limit, driving while intoxicated, assaulting police officer, possessing controlled substance, and resisting arrest, trial court properly found driver guilty of speeding based on sufficient evidence tending to prove that radar gun had been tested and accurately displayed driver's automobile exceeding speed limit, where officer testified that he personally tested radar gun shortly before he began monitoring traffic by tuning gun with two different tuning forks and checking internal calibration to insure that all diodes were properly working which resulted in accurate display from gun, where officer testified that he was certified radar instructor and that his particular gun had last been certified one month previously, and where he testified that he pointed gun out through rear window of his vehicle, that no other car interfered with radar reading of speed of driver's car, and that radar displayed speed of seventy-seven miles per hour. *Berkeley v Stringfellow (1990, Mo App) 783 SW2d 501.*

In prosecution of motorist for exceeding speed limit, prosecution was required to prove that radar unit was operating accurately at time it was used to determine defendant's speed; prosecution met that burden by presenting testimony of trooper that he had used tuning forks to check accuracy of unit before starting his shift and immediately after defendant's arrest; however, state was not required to prove accuracy of unit's frequency finder, where trooper had tested accuracy of tuning forks by holding them in front of frequency finder about eight months prior to defendant's arrest, and certificate of accuracy to that effect had been admitted into evidence. *State v Moore (1985, Mo App) 700 SW2d 880.*

In prosecution for speeding, where evidence showed police officer had tested VASCAR equipment used to apprehend defendant with stop watch and test indicated equipment was accurate, but officer could not testify as to accuracy of stop watch, city failed to meet its burden of proving accuracy of VASCAR equipment; value of VASCAR evidence depends upon accuracy of measuring device against which it is checked and particular measuring device must be shown to be accurate. *St. Louis v Martin* (1977, Mo App) 548 SW2d 622.

In prosecution for speeding, admitting evidence of accuracy of stopwatch was not error notwithstanding that at time when watch was tested it was not connected with cable and hose as it was at time of defendant's arrest. *Webster Groves v Quick* (1959, Mo App) 323 SW2d 386.

Radar evidence was admissible where device had been tested for accuracy shortly before it indicated that defendant's speed was 15 miles per hour over limit. *State v Graham* (1959, Mo App) 322 SW2d 188 (citing annotation).

Use of stationary radar gun to make arrest for speeding was proper, where officer testified that his radar unit was used correctly and was operating properly, where defendant failed to present any evidence that challenged validity of use of radar, and where statute authorized use of radar to detect speeding violations. *Billings v Skurdal* (1986) 224 Mont 84, 730 P2d 371, cert den 481 US 1020, 95 L Ed 2d 508, 107 S Ct 1902, reh den 482 US 910, 96 L Ed 2d 384, 107 S Ct 2492.

Foundation may be laid for admission of radar evidence as to speed of car by evidence of experience of persons in handling of such equipment indicating that equipment correctly indicates speed of moving vehicles. *Dietze v State* (1956) 162 Neb 80, 75 NW2d 95.

In drunk-driving prosecution, it is for trial court to determine whether policeman who operated alcometer had sufficient knowledge and experience and whether device was operating properly. *State v Roberts* (1960) 102 NH 414, 158 A2d 458.

Absent competent proofs as to scientific reliability of radar device, speed measurement from that device should not have been admitted into evidence and defendant's conviction for speeding was reversed. *State v Musgrave* (1979) 171 NJ Super 477, 410 A2d 64.

In prosecution for speeding, testimony by arresting officer that he had checked calibration of radar device with serialized tuning fork cut at 50 mph, the accuracy of which was not in itself established, was not sufficient to establish accuracy of radar device and radar reading was, therefore, not admissible; without it in evidence state had failed to prove beyond reasonable doubt that defendant was speeding. *State v Readding* (1978) 160 NJ Super 238, 389 A2d 512.

Drunkometer is sufficiently established as scientifically reliable and accurate for determining alcoholic content of blood to admit testimony of reading obtained upon properly conducted test without antecedent expert testimony that reading is trustworthy index of blood alcohol, or why. *State v Miller* (1960) 64 NJ Super 262, 165 A2d 829.

In drunk-driving prosecution, where drunkometer evidence is used, prosecution must prove that operator of drunkometer has been certified, that machine was in proper working order, and that chemicals were in proper condition. *State v Greul* (1959) 59 NJ Super 34, 157 A2d 44 (citing annotation).

In drunk-driving prosecution, drunkometer evidence is to be weighed along with other relevant evidence; possibility of error in operation of drunkometer would not bar admission of finding, but would affect weight. *State v Damoorgian* (1958) 53 NJ Super 108, 146 A2d 550.

Radar and speedometer readings are generally admissible in speeding prosecutions and may be sufficient in themselves

if there is reasonable proof of their accuracy. *People v Dusing* (1959) 5 NY2d 126, 181 NYS2d 493, 155 NE2d 393.

Evidence of reading of untested speedometer in police car was insufficient, of itself, to sustain speeding conviction. *People v Heyser* (1957) 2 NY2d 390, 161 NYS2d 36, 141 NE2d 553.

In prosecution for exceeding speed limit, arresting officer sufficiently established accuracy of radar device, where he had used two tuning forks and internal calibration test before and after stopping speeding driver and where officer testified that his visual estimates of speed had been proven to be within three to five miles per hour of actual vehicle speeds. *Henig v State Dep't of Motor Vehicles* (1986, 2d Dept) 122 App Div 2d 250, 505 NYS2d 174.

Arresting officer sufficiently established accuracy of radar device by using tuning fork and internal calibration tests at beginning and end of tour of duty. *Graf v Foschio* (1984, 2d Dept) 102 App Div 2d 891, 477 NYS2d 190.

State has burden of proving accuracy of "Vascar" device used for measuring speed of vehicle. *People v Leatherbarrow* (1972) 69 Misc 2d 563, 330 NYS2d 676.

Reasonable proof of accuracy of radar was given where arresting officer testified to calibration of radar speed detection device by tuning fork and test car 2 hours before, 20 minutes before, and 10 minutes after defendant's arrest. *People v Stuck* (1967) 54 Misc 2d 811, 283 NYS2d 564.

Testimony of arresting officer that his car was tested by radar just prior to use was not sufficient to establish accuracy of speedometer, and evidence of reading of untested speedometer, although admissible, is not, without more, sufficient for speeding conviction. *People v Skupien* (1962) 33 Misc 2d 908, 227 NYS2d 165.

Where police speedometer had been tested but test results were not shown, evidence of speedometer reading alone was insufficient to sustain speeding conviction, speedometer being classed as untested instrument. *People v Page* (1961) 32 Misc 2d 179, 222 NYS2d 450.

Testimony that "speedwatch" was checked against calibrated speedometer warrants admission of watch reading in speeding prosecution. *People v Tiedeman* (1960) 25 Misc 2d 413, 207 NYS2d 95.

Presumption of accuracy of speedometer continues from first date of examination before infraction until next examination after infraction, but where examiner seeks to elicit whether speedometer has been repaired or adjusted in interim, such information should be forthcoming by proper entries or otherwise, and if repair or adjustment has been made after infraction and before examination, presumption of accuracy on date of infraction would be destroyed. *People v Kossifos* (1959) 36 Misc 2d 8, 234 NYS2d 179.

Speeding conviction reversed on ground of lack of proof of legal testing of police speedometer for accuracy where there was no additional evidence of speed except opinion of arresting officer. *People v Harndon* (1959) 15 Misc 2d 100, 180 NYS2d 799.

Prosecution has burden of showing accuracy of scientific device used to prove element of crime; evidence sufficiently showed accuracy of scales used to prove truck weight violation. *People ex rel. Harding v Matessino* (1958) 15 Misc 2d 7, 179 NYS2d 911.

Violation of speeding ordinance was established by evidence including evidence of speed as measured by "Foto-Patrol," where there was expert testimony as to scientific principles underlying device, and speed as recorded by device was substantiated by tests made by police cars, and by opinion of police officer. *People v Pett* (1958) 13 Misc 2d 975, 178 NYS2d 550.

In speeding prosecution, evidence of reading of untested police speedometer is admissible, but is not itself sufficient to sustain conviction. *People v Tanner (1957) 6 Misc 2d 1007, 165 NYS2d 308.*

In prosecution for violating statute limiting truck weight, trial court erred in admitting proof of weight of truck over defendant's objections that it was obligatory first to prove accuracy of scales used. *People v Brandon (1957) 5 Misc 2d 946, 165 NYS2d 640.*

Conviction of vehicle weight violation reversed for failure to show accuracy of weighing devices. *Davis v Silverberg (1956) 14 Misc 2d 744, 155 NYS2d 321.*

To prove accuracy of police speedometer, officer operating vehicle having speedometer whose accuracy is at issue must prove the speedometer was tested for accuracy every 15 days; if he witnessed the test he must say so, and if not, person who witnessed them must testify; testimony must show result of test to be accurate; and manner in which test was made must be shown. *People v Sachs (1955) 1 Misc 2d 148, 147 NYS2d 801*, holding that to establish accuracy of radar used to check car speed, state must prove (1) that radar car was properly set up in detecting location; (2) that radar instruments were working; (3) that apprehending car was set in its own location; (4) that both cars were visible to each other at a reasonable distance; (5) that motorcycle or other vehicle equipped with calibrated speedometer had been used to test accuracy of radar set; (6) that graph sheet shows result of radar test; (7) that speedometer on motorcycle or other vehicle had been properly tested and found accurate; (8) that radar car officer observed speeding vehicle as well as any other vehicle and could describe speeding vehicle; and (9) that operator of speeding vehicle was apprehended and served with summons.

Burden of proof of accuracy of radar speed meter was on state. *People of Buffalo v Beck (1954) 205 Misc 757, 130 NYS2d 354* (rule supported by implication; trial court held to have erred in taking judicial notice of accuracy of radar device).

Accuracy of radar speed meter was established by expert testimony. *People v Sarver (1954) 205 Misc 523, 129 NYS2d 9.*

Expert testimony established accuracy of radar speed meter. *People of Rochester v Torpey (1953) 204 Misc 1023, 128 NYS2d 864.*

Accuracy of radar instrument used to determine speed of cars is not proper subject for judicial notice. *People v Offermann (1953) 204 Misc 769, 125 NYS2d 179.*

Proof of accuracy of state scales used to weigh trucks was required before testimony as to weight obtained from scales could be admitted, there being no presumption that state scales were more accurate than any others. *People v Du Shane (1953, Co Ct) 125 NYS2d 9.* To the same effect, see *People v Vadakin (1953) 204 Misc 904, 125 NYS2d 25* (disapproved on other grounds by *People v Rodenbach, 204 Misc 905, 126 NYS2d 295*, aff'd 307 NY 614, 120 NE2d 826).

In absence of legislation to contrary, accuracy of speed detection device must be proved to satisfaction of trier of facts, but where evidence of speed as recorded by speed detection device was admitted without objection as to accuracy and testing of device such evidence stood unimpeached and could be used to convict for speeding. *State v Albers (1973, ND) 211 NW2d 524.*

In prosecution for speeding, trial court improperly admitted evidence of speeding based on reading of radar unit using "doppler effect" where unit was mounted on police car approaching defendant's vehicle and no testimony was offered showing that unit could differentiate between relative speeds of 2 vehicles or, if it could, was set to do so. *State v Wilcox (1974, Franklin Co) 40 Ohio App 2d 380, 69 Ohio Ops 2d 333, 319 NE2d 615.*

In prosecution for speeding, trial court improperly admitted radar evidence without first requiring prosecution to show unit was properly set up and functioning in accurate manner. *State v Bonar (1973, Monroe Co) 40 Ohio App 2d 360, 69 Ohio Ops 2d 320, 319 NE2d 388.*

City had burden of proving that "Vascar" device, designed to measure average speed of vehicle over distance measured, was properly tested and used. *Tiffin v Whitmer (1970) 32 Ohio Misc 169, 60 Ohio Ops 2d 367, 290 NE2d 198.*

In speeding prosecution, state was required, as part of prima facie case, to show that speedometer used to clock defendant was tested against another speed-testing standard and that speedometer was operating properly at time of alleged violation. *State v Mancino (1975) 115 RI 54, 340 A2d 128.*

In speeding prosecution, testimony as to police speedometer reading is admissible on showing that operating efficiency of device has been tested within reasonable time. *State v Barrows (1959) 90 RI 150, 156 A2d 81.*

In drunk-driving prosecution, evidence established competency of police officer who conducted drunkometer test. *Ward v State (1960) 169 Tex Crim 589, 335 SW2d 839.*

"Certificate of radar accuracy test" which certified that two officers conducted accuracy tests by "calibrated speedometer of a radio microwave device" was inadmissible and failed to meet test of statute which provided that certificate of officers testing radar device must reflect not only its accuracy but also the accuracy of the speedometer of any motor vehicle used in such test. *Sweeny v Commonwealth (1971) 211 Va 668, 179 SE2d 509, 47 ALR3d 817.*

In prosecution for excessive speed of motor vehicle in which radar evidence is used, Commonwealth must prove that radar machine used to measure speed had been properly set up and recently tested for accuracy, but proof of accuracy of speedometer is sufficiently established by showing that it was checked against calibrated master speedometer. *Farmer v Commonwealth (1964) 205 Va 609, 139 SE2d 40.*

Statute providing that result of radio microwave check of motor vehicle speed should be accepted as prima facie evidence of speed of motor vehicle establishes prima facie presumption of accuracy of radar device used to measure speed; presumption is rebuttable, but was not rebutted by mere argument that radar might have been "thrown off" and might have improperly recorded speed. *Dooley v Commonwealth (1956) 198 Va 32, 92 SE2d 348, app dismd 354 US 915, 1 L Ed 2d 1432, 77 S Ct 1377.*

Use of radar unit to issue traffic citation to defendant for speeding was proper, where officer had proper training and experience with radar device, where device had been tested both before and after actual use by tuning forks, and where officer had verified radar readout with visual comparison of speedometer of officer's vehicle even though officer did not check accuracy of vehicle's speedometer after issuance of citation. *Washington County v Luedtke (1987) 135 Wis 2d 131, 399 NW2d 906.*

In prosecution for speeding, speed reading taken by VASCAR (Visual Average Speed Computer And Recorder) was admissible in evidence without any qualified expert testimony establishing scientific reliability and accuracy of device since prima facie presumption of accuracy applies to stationary radar devices such as *State v Frankenthal (1983, App) 113 Wis 2d 269, 335 NW2d 890.*

In prosecution for speeding in which issue of accuracy of moving radar device was raised, test performed by police officer on device one hour before defendant's arrest and 12 minutes after arrest to ascertain whether device was functioning properly was sufficient to raise rebuttable presumption that radar device was functioning accurately, and therefore defendant's conviction would be affirmed. *State v Kramer (1981) 99 Wis 2d 700, 299 NW2d 882.*

In speeding prosecution trial court properly held that prima facie presumption of accuracy applied to stationary radar and city was not required to meet judicially set forth criteria regarding proof of radar accuracy which were applicable to moving radar in light of fact that moving radar has unique characteristics that warrant proof of accuracy. *Wauwatosa v Collett (1980, App) 99 Wis 2d 522, 299 NW2d 620.*

In prosecution for speeding, although there was prima facie presumption of accuracy of moving speed radar device and also expert testimony that device was accurate all but one per cent of time, existence of credible, conflicting expert testimony that device was inaccurate between 15 and 20 per cent of time raised issue of fact. *State v Hanson (1978) 85 Wis 2d 233, 270 NW2d 212.*

[\*3b] Pennsylvania speed laws

Under a Pennsylvania statute providing that a police officer suspecting a violation of the speed laws must follow an automobile on the highway to time its speed for a distance of not less than one-quarter of a mile, using a motor vehicle equipped with a speedometer which had been tested for accuracy within a period of thirty days prior to the alleged violation, it was held in *Commonwealth v. Parish (1940) 138 Pa Super 593, 10 A2d 896*, that a prima facie case of violation of the fifty-mile speed limit was made out against a defendant when a police officer testified that he had followed the vehicle driven by defendant for 1.9 miles timing its rate of speed at sixty miles per hour with a speedometer which had been tested for accuracy in his presence at an official speedometer testing station twelve days before. The court declared: "The Commonwealth made out a prima facie case through the arresting officer who testified that he was present and observed the test as it was made, and by his further testimony that he followed the defendant on the highway for more than one-quarter of a mile and, from a reading of his speedometer, determined that the defendant was driving his car at a speed in excess of the legal limit. There was no burden on the Commonwealth of proving the accuracy of the officer's speedometer except by competent proof that it had been 'tested for accuracy within a period of thirty days prior to the alleged violation.' This device has been in common use on automobiles for more than 25 years and is recognized as an instrument reasonably reliable in measuring rates of speed. If absolute proof of its accurate operation were required, it would be necessary for the Commonwealth to prove, also, the accuracy of the mechanical devices used in applying the test, making it difficult if not impossible of obtaining a conviction in any case. Proof of the accuracy of a stop-watch used in determining speed over a measured stretch of highway is not part of the Commonwealth's case under another section of the act and by analogy, proof of the accurate operation of a speedometer should not be required in the first instance, in cases of this nature, though a number of factors may make the latter the less reliable of the two."

In the absence of a showing that the speedometer used to time the motorist's rate of speed has been tested for accuracy as required by statute, however, it would appear that no such prima facie case will be held to have made out against a motorist, there being no presumption of accuracy of the police speedometer under such circumstances.

Thus, in *Commonwealth v. Penman (1939) 36 Pa D & C 634*, it was held that a summary conviction of a motorist for exceeding the speed limit of fifty miles per hour, upon evidence of a motor policeman who clocked the defendant's car for a distance of half a mile at a speed of sixty-five miles per hour, where the defendant denied having exceeded the speed limit, contending that his car was equipped with a signal device which flashed red whenever his car was driven at fifty miles per hour or more, and that no red signal had appeared, could not be sustained in view of the failure of the Commonwealth to produce any evidence showing what person had tested the speedometer of the police car for accuracy, or to show by the party making the test what the results were of the test and the method adopted for making the test. The court pointed out that there were no presumptions as to accuracy of the police speedometer, and since its accuracy had been challenged by contrary evidence of the defendant, the burden was on the Commonwealth to show by competent evidence that the speedometer on the car operated by the policeman had been tested for accuracy within the thirty-day period set out by the vehicle code.

So, where it was admitted by witnesses testifying in a prosecution of the defendant for driving a motor vehicle at a

speed of fifty miles per hour, which, it was alleged, was not careful and prudent having due regard to the traffic surface and width of the highway, that the speedometer on the police vehicle used to time the rate of speed of defendant had not been tested for accuracy within thirty days prior to the alleged violation, the defendant denying that he was operating his motor vehicle at any such speed, it was held in *Commonwealth v. Feyka (1947) 62 Pa D & C 353*, that the conviction for speeding could not be sustained.

And because of the Pennsylvania statute requiring the testimony of police officers as to speed violations to be based upon readings of speedometers tested for accuracy within thirty days prior to the alleged violation, it was held in *Commonwealth v. Harvey (1940, Pa) 49 Dauph Co 43*, that the failure to include such evidence on the trial, although it may have been contained in the information, was insufficient to sustain a conviction for violation of the speed law.

Hearsay or other secondary evidence as to the testing of the speedometer within the thirty-day period will not suffice, it being necessary under the Pennsylvania statute that direct evidence be introduced.

Consequently, evidence that a police officer followed defendant's vehicle and timed a rate of speed on the speedometer in the police vehicle in excess of the speed limit of fifty miles per hour was held insufficient in *Commonwealth v. Hilands (1939) 36 Pa D & C 472*, to sustain a conviction for violating the speed laws, where, although the testimony of the motor policeman was that his speedometer had been tested, such testimony was based upon a card stating that such a test had been made rather than upon the personal knowledge of the police officer, and where the person who had made the test could not testify with certainty that the particular speedometer had been tested, but only that the speedometer of a car bearing the license number of the police vehicle had been tested.

A later amendment to the Pennsylvania statute which attempted to make the production of a certificate as to the due making of the speedometer accuracy test proof of such fact, has been declared to be unconstitutional.

Thus, where objection had been made to the introduction into evidence of a certificate that the speedometer on a police vehicle used to time defendant's rate of speed for a distance of a quarter of a mile, in accordance with the amendment to the vehicle code providing that such evidence was prima facie evidence of the accuracy of the speedometer, it was held in *Commonwealth v. Obenreder (1940) 40 Pa D & C 155*, that such provision violated the state constitution, which gave a defendant in a criminal prosecution the right to meet the witnesses against him face to face. The court stated: "Certainly the presentation of a certificate with no evidence as to the person issuing the same, nor of the fact that a test was made, and no opportunity granted the accused to face the witnesses making the test and the certificate and to examine them is a violation of the constitutional guaranty."

To similar effect see *Commonwealth v. Baddorf (1941) 42 Pa D & C 276*, where it was alleged that defendant had exceeded the speed limit of fifty miles per hour by going sixty miles per hour, the police officer having timed the defendant's car for a distance of not less than a quarter of a mile and presented in evidence of the accuracy of his speedometer at the trial a certificate from the official speedometer testing station indicating a test for accuracy within thirty days prior to the alleged violation. The court cited the Obenreder Case with approval, declaring that an official certificate from an official speedometer testing station as to the accuracy of the speedometer on the vehicle driven by the policeman who timed defendant's speed would not meet the constitutional requirement that "the accused hath a right. . . to meet the witness face to face."

In *Commonwealth v. Leitzel (1941) 40 Pa D & C 410*, defendant was arrested and convicted of operating his motor vehicle at a rate of speed of over fifty miles per hour, the maximum speed permitted by law, upon the testimony of a police officer that he had timed defendant and found him to be traveling at sixty miles per hour. Upon being asked upon cross-examination whether he had his certificate showing that his speedometer had been tested for accuracy within thirty days, in accordance with the amendment to the vehicle code requiring either that such certificate or the testimony of the person who had tested the speedometer be produced, and that the production of such certificate would constitute prima facie evidence of the accuracy of the speedometer, the officer replied in the negative, testifying that it had been

tested within thirty days, but not that it was correct. It was held that since neither of the above provisions of the amendment had been complied with the conviction would be reversed, the court pointing out that the present case was a criminal case which required a strict construction of the law, putting the burden on the commonwealth to show by competent evidence that the speedometer on the car operated by the police officer had been tested for accuracy within the thirty-day period set out in the vehicle code.

The following additional authority is relevant to the issues discussed in this section:

<>

Pennsylvania statute permitting prima facie proof of accuracy of speedometer by official certificate from official speedometer-testing station did not violate constitutional provisions giving accused in criminal prosecution right to meet witnesses face to face. *Commonwealth v Schumann (1953) 87 Pa D & C 477.*

Statute providing that official certificate from official speedometer-testing station should be prima facie evidence of the accuracy of the speedometer held constitutional as against contention that statute prevented speed violator from cross-examining mechanic who tested speedometer of arresting officer. *Commonwealth v Coldsmith (1954) 176 Pa Super 283, 106 A2d 649.*
