In *Cummings*, the sole issue on appeal was whether in a prosecution for exceeding the maximum speed limit, the Commonwealth may enter into evidence a photocopy of the certificate of accuracy required by 75 Pa.C.S.A. § 3368(d). The court held a photocopy of the certificate was not admissible into evidence because it could not be authenticated. In *Gussey*, the issue on appeal was whether the certificate [\*321] of accuracy was improperly admitted over objection because the date was [\*\*\*6] typed in instead of written by hand, and the Commonwealth did not call the party who executed the certificate to verify the date of execution. The court found no error, holding that "the Commonwealth can utilize any means to fill in the 'certificate of accuracy,' i.e., by typing or hand-writing the required data, except for the signatures of the certifying [\*816] personnel." *Gussey*, 319 Pa. Super. at 409, 466 A.2d at 225.

Like *Gernsheimer*, neither of these cases address the specific issue before us: whether the Commonwealth offered competent evidence that the certificate of accuracy was prepared by a testing station appointed by the Department of Transportation. See 75 Pa.C.S.A. § 3368(d). Thus, the trial court was correct in its finding that the dictum in *Gernsheimer*, as well as its reiteration in *Cummings* and *Gussey*, is not binding precedent.

The confusion in establishing a proper foundation for the admission of a certificate of accuracy pursuant to § 3368 is evident from our review of the record. The Commonwealth relies on the certificate of accuracy itself as proof that Thomas Associates has been designated an official testing station, arguing [\*\*\*7] that "the court properly took judicial notice of the fact that . . . the testing station, Thomas Associates, Inc., is an approved testing station since those facts appear in numerous publications of the Pennsylvania Bulletin."

This argument, however, is misleading. It is true that the trial court is required to take judicial notice of this fact pursuant to the Commonwealth Documents Law, 45 P.S. §§ 1501 and 1506 (1986 special Pamphlet). But the trial court specifically stated:

"We are not considering any entry in the Pennsylvania Bulletin because that was not properly before us . . . having been raised long after the evidence of the Commonwealth had closed in this case. So we are not relying on that. We are relying on a reading of [the statute] and [\*322] a fair appraisal of [the certificate of accuracy]." n1

n1 We note that the Commonwealth also requested the court to take judicial notice of the testing stations listed in the Pennsylvania Bulletin prior to the close of its case, though the court made no specific ruling on this request.

[\*\*\*8]

[HN4] A certificate of accuracy, if properly authenticated, is evidence of the fact that the radar device has been calibrated and tested pursuant to the requirements of § 3368(d). Section 3368(d) provides that the "department shall appoint stations for calibrating and testing." Thus, in order to meet the statutory requirements, the Commonwealth must show that the testing station was appointed by the Department of Transportation. Evidence, independent of the certificate itself, is necessary to prove this. A certificate of accuracy, issued by Thomas Associates, which merely *states* that Thomas Associates has been designated an official testing station, signed by David A. Thomas, is insufficient. We agree with appellant that an employee of the testing center cannot attest to the fact that the testing station has been appointed by the Department of Transportation as an official testing station.

Although the dictum in *Gernsheimer* is not controlling, it is entitled to great consideration. *In re Estate of Pew*, 411 Pa. at 103, 191 A.2d at 404. In light of the confusion in this case, we find the foundational requirements clarified in *Gernsheimer* to be particularly helpful. [\*\*\*9] In *Gernsheimer*, the Commonwealth introduced a separate document from the Secretary of Transportation under seal appointing York Corporation as an official testing station. We recognize the inefficiency of requiring this type of document in the prosecution of such cases, and at the same time recognize the utility of the listings in the Pennsylvania Bulletin.

We therefore hold that in order for results of a radar device to be properly admissible at trial, the Commonwealth must offer evidence, independent of the certificate of accuracy, to show that the testing facility has been appointed by the Department of Transportation as an official testing station pursuant to the requirements of section 3368(d) of [\*323] the Vehicle Code. This independent evidence may consist of either a separate document from the Secretary of Transportation under seal or a citation to the Pennsylvania Bulletin which lists the station as an official testing station.

Judgment of sentence vacated.

**Commonwealth v. Cook et al., Appellants****Nos. 1551 and 1552, Oct. T., 1972****Superior Court of Pennsylvania*****226 Pa. Super. 273; 308 A.2d 151; 1973 Pa. Super. LEXIS 1355*****December 4, 1972, Submitted****June 14, 1973, Decided****PRIOR HISTORY:** [\*\*\*1]

Appeals from orders of Court of Common Pleas of Wyoming County, March T., 1972, Nos. 36 and 37, in case of Commonwealth of Pennsylvania v. Guy Cook and Bruce E. Daugherty.

**DISPOSITION:**

Order reversed and case remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant drivers appealed the decision of the Court of Common Pleas of Wyoming County (Pennsylvania), which dismissed the praecipe for defendants' writ of certiorari, quashed the writ, and affirmed defendants' conviction on the grounds that defendants' claims were not the proper subject for review on certiorari. Defendants were convicted of speeding; they alleged state failed to satisfy its statutory requirements to sustain their convictions.

**OVERVIEW:** Defendant drivers were convicted of speeding in violation of the Vehicle Code, 75 P.S. § 1002. Defendants alleged state failed to satisfy its statutory requirement of establishing the accuracy of radar equipment used in detecting the offense. Defendants petitioned the trial court for a writ of certiorari. The trial court dismissed the praecipe for the writ, quashed the writ, and affirmed defendants' convictions on the grounds that defendants' claims were not the proper subject for review on certiorari. On review, the court reversed and remanded the cases for further consideration of the petitions for certiorari. The court held the trial court erred in concluding that defendants' contentions were not properly raised on certiorari. The court found that in order to sustain defendants' convictions, state had to prove the accuracy of the radar detecting device and the posting of radar warning signs. The court held that where a statute required an offense to be proven by a specific type of evidence and it was alleged that the record was wholly devoid of any such showing, the assertions raised a question of law reviewable on certiorari.

**OUTCOME:** The court reversed the trial court's holding that defendants' case fell beyond the scope of its review and

remanded the cases for further consideration of the petitions for certiorari. The court held the trial court erred in concluding that defendants' contentions were not properly reviewable on certiorari where defendants' questions raised a question of law.

226 Pa. Super. 273, \*275; 308 A.2d 151, \*\*152;  
1973 Pa. Super. LEXIS 1355, \*\*\*1

Wyoming County District Justice of the Peace on charges of speeding in violation of The Vehicle Code. n1 Contending that the Commonwealth has failed to satisfy its statutory requirement of establishing the accuracy of radar equipment used in detecting the offense, appellants petitioned the Court of Common Pleas for a writ of certiorari in order to obtain a view of the transcript of the summary proceedings. The court ordered the praecipe for the writ to be dismissed, the writ quashed and the convictions affirmed on the grounds that appellants' claims were not the proper [\*\*\*2] subject for review on certiorari. Appellants appeal from the order.

n1 Act of April 29, 1959, P. L. 58, § 1002, as amended, 75 P.S. § 1002.

[HN1] Under the Minor Judiciary Court Appeals Act, Act of December 2, 1968, P. L. 1137, § 1, 42 P.S. § 3001 et seq., a defendant, after being convicted in summary proceeding may elect to bring an appeal to the court of common pleas and obtain a trial de novo n2 or, in the alternative, may petition the court of common pleas of the district to issue a writ of certiorari and to bring the transcript of the summary proceedings before it for review of that record. n3 Appellants in this case opted for the latter. n4

n2 Act of December 2, 1968, P. L. 1137, § 3, 42 P.S. § 3003.

n3 Act of December 2, 1968, P. L. 1137, § 6, 42 P.S. § 3006.

n4 Appellants, in seeking review via certiorari, raise the argument that an appeal would not be adequate, arguing that at a trial de novo the Commonwealth will be able to correct errors it is alleged to have made at the hearing before the justice of the peace. While this may render an appeal less advantageous to appellants, we do not find that it detracts from the adequacy of that form of relief.

[\*\*\*3]

The court below, in denying appellants the relief they sought via certiorari, "attempted to settle the [\*276] comparative roles of an appeal from a conviction in a summary proceeding under the Minor Judiciary Court Appeals Act . . . and the device of Certiorari." The court was of the opinion ". . . [a]ny question is raisable [\*\*153] in an appeal under the Minor Judiciary Court Appeals Act, but that Certiorari allows an extremely narrow scope of review. 'Ordinarily Certiorari in a summary criminal matter may deal only with questions of law, not questions of fact, not the admissibility, competency, sufficiency, or relevancy of evidence heard by the Justice of the Peace.' [Citing *Commonwealth v. Rosenberger*, No. 88, January Term (Court of Common Pleas, Wyoming County).]"

While the Court of Common Pleas, in its reviewing capacity on certiorari, is given discretion in granting such relief (by the very terms of the Minor Judiciary Court Appeals Act n5), we find that the court erred in holding that the instant case fell beyond its scope of review. The court below was correct in asserting that where there exists a statutory right of appeal, questions of fact may not be reviewed [\*\*\*4] on certiorari. The latter device, in reviewing the regularity of the record, can only properly entertain questions of law, to the exclusion of issues related to the sufficiency, admissibility, competency or relevancy of evidence presented to the justice of the peace. *Commonwealth v. Quinn*, 215 Pa. Superior Ct. 78, 257 A. 2d 266 (1969); *Wilmington Steamship Co. v. Haas*, 151 Pa. 113, 25 A. 85 (1892). The instant case, however, raises a question of law which is reviewable on certiorari.

n5 [HN2] Section 3006 of the Act reads: "In addition to the right of appeal from minor judiciary courts, the judges of the courts of common pleas, within their respective judicial districts, shall have power to issue writs of certiorari to minor judiciary courts and to cause their proceedings to be brought before them, and right and justice to be done, as heretofore provided by law."

226 Pa. Super. 273, \*276; 308 A.2d 151, \*\*153;  
1973 Pa. Super. LEXIS 1355, \*\*\*4

[\*277] The Act under which appellants were convicted mandates that such convictions cannot be sustained unless the Commonwealth produces proof [\*\*\*5] of, *inter alia*, the accuracy of the radar detecting device used, and the posting of radar warning signs on the highway. n6 Where by statutory requirement the method of proving an offense *must* include the production of evidence of a [\*278] specific *type* and it is alleged that the record is wholly devoid of any such showing, the assertions raise a question [\*\*154] of law reviewable on certiorari. The absence of this required Commonwealth testimony on the face of the transcript returned by the magistrate renders that transcript fatally defective. *Commonwealth v. Simons*, 214 Pa. Superior Ct. 337, 257 A. 2d 694 (1969). See *Commonwealth v. Brose*, 412 Pa. 276, 194 A. 2d 322 (1963). "[HN3] Generally, summary proceedings must be strictly pursued since they are not only penal in nature but also because they deny the right of trial by jury." *Simons*, *supra* at 340-41.

n6 The relevant statutory provisions reads: [HN4] "The rate of speed of any vehicle may be timed on any State highway, including the Pennsylvania Turnpike System, by officers of the Pennsylvania State Police through the use of radio microwaves, commonly referred to as electronic speed meters or radar.

"No conviction shall be had upon evidence obtained through the use of radar apparatus unless --

"(i) it is of a type approved by the secretary, and

"(ii) it has been calibrated and tested for accuracy and found accurate or adjusted for accuracy within a period of thirty days prior to the alleged violation, and

"(iii) official warning signs have been erected on the highway by the proper authority indicating that radar is in operation.

"(iv) the speed recorded is six or more miles per hour in excess of the legal speed limit.

"(2) The secretary shall have the authority to appoint official stations for calibrating and testing radar apparatus, and may prescribe regulations as to the manner in which such calibrations and tests shall be made, and shall issue to such stations official inspection certificate forms.

"An official certificate from an official inspection station, showing that the calibration and tests required by this subsection were made within the required period, and that the radar apparatus was accurate or was adjusted for accuracy, shall be competent and prima facie evidence of the fact that such certificate was issued by an official inspection station appointed by the secretary and of the accuracy of the radar apparatus in every proceeding where an information is brought charging a violation of this section.

"(3) The Secretary of Highways shall have the authority to establish, by rule and regulation, the size, color and type of warning sign to be erected on the highways where radar is in use and to designate the intervals at which such warning signs are erected." Act of April 28, 1961, P. L. 108, § 2, 75 P.S. § 1002 (d.1) (1).

[\*\*\*6]

The court below thus erred in concluding that appellants' contentions were not properly raisable on certiorari. The order of the court below is reversed and the cases remanded for further consideration of the petitions for certiorari.

**May 26, 1993, Filed**

**PRIOR HISTORY:** [\*\*\*1]

APPEALED From No. SA 1722 of 1991. Common Pleas Court of Allegheny County. Judge SCHEIB

**DISPOSITION:**

Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant Pennsylvania Department of Transportation, Bureau of Driver Licensing, sought review of an order of the Common Pleas Court, Allegheny County (Pennsylvania) remanding an operator's license suspension appeal to appellant. Appellant had ordered suspension of appellee driver's operator's license for 15 days, but the trial court, in a de novo review, determined that the suspension order was improper.

**OVERVIEW:** Appellee driver was convicted of driving 90 miles per hour in a 55 mile per hour zone. He was subsequently required to attend a hearing conducted by appellant Department of Transportation, Bureau of Driver Licensing. Although *75 Pa. Cons. Stat. § 1538(d)* granted a hearing examiner the discretion to recommend, and appellant the discretion to impose, one or more of three possible sanctions under such circumstances, appellee received a 15-day suspension, the most severe sanction of the three. The trial court conducted a de novo hearing and held that testimony regarding "additional circumstances" warranted remanding the matter to the department with instructions that the special driver's examination sanction be imposed instead of the suspension. The court affirmed, ruling that under recent precedent, hearing examiners were required to exercise their discretion based on the individual facts of a case and not on the basis of administrative concerns. Because appellee was not a habitual offender and testified that he had been having trouble with his speedometer and needed his vehicle for work, the trial court's order was deemed proper.

**OUTCOME:** The court affirmed the trial court's order remanding the matter to appellant Pennsylvania Department of Transportation, Bureau of Driver Licensing, with directions that it impose the special driver's examination sanction on appellee driver rather than a 15-day operator's license suspension.

**CORE TERMS:** suspension, mile, driver, examiner, penalty imposed, modification, hearing examiner, departmental, speed limit, fifteen-day, novo, recommend, driving record, speedometer, convicted, exceeding, license, abuse of discretion, hearing de novo, abused, modify, administrative discretion, required to attend, license suspension, sanction imposed, de novo hearing, suspended, notified, severity, ninety

Transportation Law > Private Motor Vehicles > Operator Licenses*

[HN2] When examining an appeal from a court of common pleas decision in motor vehicle operators license suspension cases following a hearing de novo, an appellate court will examine the decision to determine whether necessary findings are supported by competent evidence, an error of law has occurred or whether there has been a manifest abuse of discretion.

*Administrative Law > Judicial Review > Standards of Review > Abuse of Discretion  
Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview  
Transportation Law > Private Motor Vehicles > Operator Licenses*

[HN3] A trial court is required to determine if the Department of Transportation (DOT) has treated each case individually when it has discretion as to which penalty to impose. The statutory grant of discretion to the DOT and the hearing examiners carries with it an obligation to exercise that discretion based upon the individual facts of the case. If the trial court, upon consideration of all the facts of the case, determines that the DOT has abused its discretion, it can modify the sanction imposed. A blanket rule improperly restricting the exercise of discretion is such an abuse.

**OPINION BY:**

DOYLE

**OPINION:**

[\*130] [\*\*1334] The Department of Transportation, Bureau of Driver Licensing (DOT), appeals from an order of the Court of Common Pleas of Allegheny County remanding an operator's license suspension appeal to DOT with direction to impose the lesser sanction of requiring a special driver's examination. DOT contends that the trial court erred when it determined that DOT improperly ordered a fifteen-day suspension in this case. Because of the recently expanded role of the trial court in this area, we affirm its order.

The factual and procedural history of this case is summarized as follows. Arbie Bankston, Jr., was cited on November 5, 1990, for going ninety miles per hour in a fifty-five mile per hour zone. Bankston [\*\*1335] appeared before a magistrate and admitted that he might have been exceeding the speed limit but argued that he was not going as fast as ninety miles per hour. At that hearing, Bankston challenged [\*\*\*2] both the calibration and proper functioning of the radar unit used to record his speed. Bankston was convicted, fined, and five points were assigned to his operator's license. Bankston was notified by DOT that, as a result of that conviction, he would be required to attend a departmental hearing.

The departmental hearing was held on May 16, 1991; Bankston testified that he estimated his speed on the date in question at seventy miles per hour and that he believed he was travelling in a sixty-five mile per hour zone. Bankston argued that his driving record was generally good as he had not been cited for a violation since 1985. DOT presented evidence of Bankston's conviction and his overall driving record. The hearing examiner told Bankston that DOT could [\*131] impose either a fifteen-day suspension or require a special driver's examination. By letter dated May 31, 1991, DOT notified Bankston that based upon the hearing examiner's recommendation, n1 a fifteen-day suspension was being imposed. Bankston filed a timely appeal to the trial court.

n1 [HN1] Section 1538(d) of the Vehicle Code, *75 Pa.C.S. § 1538(d)*, specifically grants a hearing examiner the discretion to recommend, and DOT the discretion to impose, one or more of three sanctions when a person is convicted of operating a vehicle thirty-one miles per hour or more in excess of the speed limit:

**Conviction for excessive speeding. --**

(1) When any person is convicted of driving 31 miles per hour or more in excess of the speed limit, the department shall require the person to attend a departmental hearing. The hearing examiner may recommend one or more of the following:

- (i) That the person be required to attend a driver improvement school.
- (ii) That the person undergo an examination as provided for in section 1508.
- (iii) That the person have his driver's license suspended for a period not exceeding 15 days.

(2) The department shall effect at least one of the sanctions but may not increase any suspension beyond 15 days.

*75 Pa.C.S. § 1538(d)(1)-(d)(2).*

[\*\*\*3]

At a de novo hearing before the trial court, Bankston testified that he recently had his vehicle examined and that his speedometer was "erratic," that he lived in a rural area where alternate transportation was not easily obtained and that he needed his vehicle for work. (Notes of testimony [N.T.], 9/11/91, pp. 4-8.) Bankston again argued that his driving record was generally good and that, having paid the fine for the conviction, he believed an additional punishment in the form of a fifteen day suspension was "just not fair." (N.T., p. 8.) The trial court concluded that there was no reason to impose the suspension in this case in light of the evidence of "additional circumstances" presented at the de novo hearing and remanded the case to DOT with direction that DOT impose the special driver's examination as the

156 Pa. Commw. 127, \*131; 625 A.2d 1333, \*\*1335;  
1993 Pa. Commw. LEXIS 329, \*\*\*3

appropriate sanction. n2

n2 We note that the order of the trial court remands this case to DOT with direction to impose a specific penalty from a list of possible penalties. Ordinarily, remand orders are interlocutory and unappealable. *Roth v. Borough of Verona*, 102 Pa.Commonwealth Ct. 550, 519 A.2d 537 (1986). Where, however, a trial court's remand order directs that a particular adjudication be adopted, it is appealable. *Clapsaddle v. Bethel Park School District*, 103 Pa.Commonwealth Ct. 367, 520 A.2d 537 (1987).

[\*\*\*4]

[\*132] Our standard of review in motor vehicle operators license suspension cases is settled. [HN2] When examining an appeal from a court of common pleas decision following a hearing de novo we will examine the decision to determine whether necessary findings are supported by competent evidence, an error of law has occurred or whether there has been a manifest abuse of discretion. *Department of Transportation, Bureau of Driver Licensing v. Daniels*, 117 Pa.Commonwealth Ct. 640, 544 A.2d 109 (1988).

The trial court's role in these cases has recently been expanded. Previously, the trial court's authority to modify the penalty imposed was limited to instances where the hearing de novo resulted in different findings of fact than those found at the departmental hearing. *Department of Transportation, Bureau of Traffic* [\*1336] *Safety v. Kobaly*, 477 Pa. 525, 384 A.2d 1213 (1978). However, in *Department of Transportation, Bureau of Driver Licensing v. Fiore*, 138 Pa.Commonwealth Ct. 596, 588 A.2d 1332 (1991), we redefined the appropriate role of the [\*\*\*5] trial court when reviewing license suspensions in cases involving departmental discretion as to the sanction to be imposed in light of the purpose of de novo reviews. We held in *Fiore* that the trial court's de novo review acts as a check on the arbitrary exercise of administrative power, and fulfills the legislative intent to grant "the trial court broad discretionary powers in the interest of the administration of justice." De novo review is a "full consideration of the case at another time." *Id. at 601*, 588 A.2d at 1334. We explained the trial court's expanded role as follows:

In order for the trial courts to provide forums which are true and effective checks on the department, the broad discretion granted them to ensure the administration of justice by protecting drivers against the arbitrary exercise of power by the department must extend beyond a mere review of the facts to the modification of sanctions imposed [\*133] where, as here, the department has abused its discretion when choosing from the range of penalties provided. Without such authority, a trial court's ability to protect against abuse of discretion by the department [\*\*\*6] would be meaningless.

*Id. at 603*, 588 A.2d at 1335. We also disapproved sanctions based upon administrative concerns rather than the severity of the offense involved. n3 Thus, [HN3] *Fiore* requires the trial court to determine if DOT has treated each case individually when it has discretion as to which penalty to impose. The statutory grant of discretion to DOT and the hearing examiners carries with it an obligation to exercise that discretion based upon the individual facts of the case. If the trial court, upon consideration of all the facts of the case, determines that DOT has abused its discretion, it can modify the sanction imposed. A blanket rule improperly restricting the exercise of discretion is such an abuse. *Fiore*.

n3 *Fiore* involved a DOT policy of never imposing a suspension of less than fifteen days because it would be difficult to process the shorter suspensions. *Fiore*, 138 Pa.Commonwealth Ct. at 599, 588 A.2d at 1333.

[\*\*\*7]

As noted above, following the de novo hearing where Bankston testified as to the problem with his speedometer and the difficulties a suspension would impose given his circumstances, the trial court remanded to DOT with direction to impose the lesser penalty of the special driver's examination. The trial court explicitly stated:

156 Pa. Commw. 127, \*133; 625 A.2d 1333, \*\*1336;  
1993 Pa. Commw. LEXIS 329, \*\*\*7

We see no reason to impose the suspension in this case. Defendant is not an habitual offender, nor was this particular offense as egregious as previously thought, in light of additional circumstances . . . .

(Trial Court Opinion, p. 1.) This complies with the trial court's obligation under *Fiore* to examine the penalty imposed by DOT in light of the severity of the offense after a full reconsideration of the case.

DOT attempts to distinguish *Fiore* by arguing it is limited to instances where the penalty imposed is solely based on administrative concerns. We disagree. *Fiore* criticized [\*134] DOT's asserted justification for imposing a fifteen-day suspension: the mere impossibility of processing a suspension of lesser duration. The import of *Fiore*, however, is not limited to its precise facts. Implicit in its discussion of the nature [\*\*\*8] of *de novo* review and the protection it offers those affected by administrative decisions is a recognition that the trial court can and should act in the interest of the administration of justice.

Moreover, DOT admits to a somewhat similar justification for the suspension imposed on Bankston here:

In the present matter, the Department suspended Bankston's operating privilege for fifteen days pursuant to its policy of suspending the operating privileges of all motorists who are convicted of exceeding a speed limit by 31 or more miles per hour for fifteen days.

[\*\*1337] (DOT brief, p. 21.) This DOT policy binds its hearing examiners to recommending a suspension in these cases. It is hard to reconcile this requirement with the language of Section 1538(d) of the Vehicle Code providing hearing examiners with a list of penalties from which they may choose. If a hearing examiner must always recommend a suspension regardless of the totality of the circumstances in a case, the discretion of the hearing examiner is really no discretion. While certainly administratively convenient, this policy does not comply with the hearing examiner's obligation under the statute as interpreted [\*\*\*9] in *Fiore*.

DOT also cites a plethora of cases holding that the justification for the modification of the penalty imposed here, economic hardship due to the suspension and a malfunctioning speedometer, are insufficient to allow a modification of the penalty imposed by administrative authorities. Further, DOT cites cases holding that excessive speed alone can justify a suspension. These cases are all distinguishable because they predate the expansion of the trial court's role in *Fiore*.

Moreover, this argument does not address the fact that DOT's policy improperly restricts the hearing examiner's exercise of a statutory grant of discretion. Assuming, *arguendo*, [\*135] that *Fiore* did not change the import of the cases DOT cites, this improper restriction alone justifies the trial court's action. n4

n4 It is not clear whether the trial court based the penalty modification upon DOT's policy requiring a suspension in all such cases. We can however, affirm a correct result which is not based upon a correct analysis. *Friedlander v. Zoning Hearing Board of Sayre Borough*, 119 Pa. Commonwealth Ct. 164, 546 A.2d 755 (1988).

[\*\*\*10]

DOT also argues that the trial court improperly substituted its judicial discretion for the administrative discretion of DOT. This argument overlooks the fact that DOT's policy binds its hearing examiners, preventing them from exercising the discretion provided by the Vehicle Code. In such a situation, the trial court's modification of the sanction imposed following a *de novo* hearing is not an impermissible usurpation of administrative discretion.

Affirmed.

**PRIOR HISTORY:** [\*\*\*1]

APPEALED From No. SA 1722 of 1991. Common Pleas Court of Allegheny County. Judge SCHEIB

**DISPOSITION:**

Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant Pennsylvania Department of Transportation, Bureau of Driver Licensing, sought review of an order of the Common Pleas Court, Allegheny County (Pennsylvania) remanding an operator's license suspension appeal to appellant. Appellant had ordered suspension of appellee driver's operator's license for 15 days, but the trial court, in a de novo review, determined that the suspension order was improper.

**OVERVIEW:** Appellee driver was convicted of driving 90 miles per hour in a 55 mile per hour zone. He was subsequently required to attend a hearing conducted by appellant Department of Transportation, Bureau of Driver Licensing. Although *75 Pa. Cons. Stat. § 1538(d)* granted a hearing examiner the discretion to recommend, and appellant the discretion to impose, one or more of three possible sanctions under such circumstances, appellee received a 15-day suspension, the most severe sanction of the three. The trial court conducted a de novo hearing and held that testimony regarding "additional circumstances" warranted remanding the matter to the department with instructions that the special driver's examination sanction be imposed instead of the suspension. The court affirmed, ruling that under recent precedent, hearing examiners were required to exercise their discretion based on the individual facts of a case and not on the basis of administrative concerns. Because appellee was not a habitual offender and testified that he had been having trouble with his speedometer and needed his vehicle for work, the trial court's order was deemed proper.

**OUTCOME:** The court affirmed the trial court's order remanding the matter to appellant Pennsylvania Department of Transportation, Bureau of Driver Licensing, with directions that it impose the special driver's examination sanction on appellee driver rather than a 15-day operator's license suspension.

**CORE TERMS:** suspension, mile, driver, examiner, penalty imposed, modification, hearing examiner, departmental, speed limit, fifteen-day, novo, recommend, driving record, speedometer, convicted, exceeding, license, abuse of discretion, hearing de novo, abused, modify, administrative discretion, required to attend, license suspension, sanction imposed, de novo hearing, suspended, notified, severity, ninety

appropriate sanction. n2

n2 We note that the order of the trial court remands this case to DOT with direction to impose a specific penalty from a list of possible penalties. Ordinarily, remand orders are interlocutory and unappealable. *Roth v. Borough of Verona*, 102 Pa.Commonwealth Ct. 550, 519 A.2d 537 (1986). Where, however, a trial court's remand order directs that a particular adjudication be adopted, it is appealable. *Clapsaddle v. Bethel Park School District*, 103 Pa.Commonwealth Ct. 367, 520 A.2d 537 (1987).

[\*\*\*4]

[\*132] Our standard of review in motor vehicle operators license suspension cases is settled. [HN2] When examining an appeal from a court of common pleas decision following a hearing de novo we will examine the decision to determine whether necessary findings are supported by competent evidence, an error of law has occurred or whether there has been a manifest abuse of discretion. *Department of Transportation, Bureau of Driver Licensing v. Daniels*, 117 Pa.Commonwealth Ct. 640, 544 A.2d 109 (1988).

The trial court's role in these cases has recently been expanded. Previously, the trial court's authority to modify the penalty imposed was limited to instances where the hearing de novo resulted in different findings of fact than those found at the departmental hearing. *Department of Transportation, Bureau of Traffic* [\*1336] *Safety v. Kobaly*, 477 Pa. 525, 384 A.2d 1213 (1978). However, in *Department of Transportation, Bureau of Driver Licensing v. Fiore*, 138 Pa.Commonwealth Ct. 596, 588 A.2d 1332 (1991), we redefined the appropriate role of the [\*\*\*5] trial court when reviewing license suspensions in cases involving departmental discretion as to the sanction to be imposed in light of the purpose of de novo reviews. We held in *Fiore* that the trial court's de novo review acts as a check on the arbitrary exercise of administrative power, and fulfills the legislative intent to grant "the trial court broad discretionary powers in the interest of the administration of justice." De novo review is a "full consideration of the case at another time." *Id. at 601, 588 A.2d at 1334*. We explained the trial court's expanded role as follows:

In order for the trial courts to provide forums which are true and effective checks on the department, the broad discretion granted them to ensure the administration of justice by protecting drivers against the arbitrary exercise of power by the department must extend beyond a mere review of the facts to the modification of sanctions imposed [\*133] where, as here, the department has abused its discretion when choosing from the range of penalties provided. Without such authority, a trial court's ability to protect against abuse of discretion by the department [\*\*\*6] would be meaningless.

*Id. at 603, 588 A.2d at 1335*. We also disapproved sanctions based upon administrative concerns rather than the severity of the offense involved. n3 Thus, [HN3] *Fiore* requires the trial court to determine if DOT has treated each case individually when it has discretion as to which penalty to impose. The statutory grant of discretion to DOT and the hearing examiners carries with it an obligation to exercise that discretion based upon the individual facts of the case. If the trial court, upon consideration of all the facts of the case, determines that DOT has abused its discretion, it can modify the sanction imposed. A blanket rule improperly restricting the exercise of discretion is such an abuse. *Fiore*.

n3 *Fiore* involved a DOT policy of never imposing a suspension of less than fifteen days because it would be difficult to process the shorter suspensions. *Fiore, 138 Pa.Commonwealth Ct. at 599, 588 A.2d at 1333*.

[\*\*\*7]

As noted above, following the de novo hearing where Bankston testified as to the problem with his speedometer and the difficulties a suspension would impose given his circumstances, the trial court remanded to DOT with direction to impose the lesser penalty of the special driver's examination. The trial court explicitly stated:

156 Pa. Commw. 127, \*133; 625 A.2d 1333, \*\*1336;  
1993 Pa. Commw. LEXIS 329, \*\*\*7

We see no reason to impose the suspension in this case. Defendant is not an habitual offender, nor was this particular offense as egregious as previously thought, in light of additional circumstances . . . .

(Trial Court Opinion, p. 1.) This complies with the trial court's obligation under *Fiore* to examine the penalty imposed by DOT in light of the severity of the offense after a full reconsideration of the case.

DOT attempts to distinguish *Fiore* by arguing it is limited to instances where the penalty imposed is solely based on administrative concerns. We disagree. *Fiore* criticized [\*134] DOT's asserted justification for imposing a fifteen-day suspension: the mere impossibility of processing a suspension of lesser duration. The import of *Fiore*, however, is not limited to its precise facts. Implicit in its discussion of the nature [\*\*\*8] of *de novo* review and the protection it offers those affected by administrative decisions is a recognition that the trial court can and should act in the interest of the administration of justice.

Moreover, DOT admits to a somewhat similar justification for the suspension imposed on Bankston here:

In the present matter, the Department suspended Bankston's operating privilege for fifteen days pursuant to its policy of suspending the operating privileges of all motorists who are convicted of exceeding a speed limit by 31 or more miles per hour for fifteen days.

[\*\*1337] (DOT brief, p. 21.) This DOT policy binds its hearing examiners to recommending a suspension in these cases. It is hard to reconcile this requirement with the language of Section 1538(d) of the Vehicle Code providing hearing examiners with a list of penalties from which they may choose. If a hearing examiner must always recommend a suspension regardless of the totality of the circumstances in a case, the discretion of the hearing examiner is really no discretion. While certainly administratively convenient, this policy does not comply with the hearing examiner's obligation under the statute as interpreted [\*\*\*9] in *Fiore*.

DOT also cites a plethora of cases holding that the justification for the modification of the penalty imposed here, economic hardship due to the suspension and a malfunctioning speedometer, are insufficient to allow a modification of the penalty imposed by administrative authorities. Further, DOT cites cases holding that excessive speed alone can justify a suspension. These cases are all distinguishable because they predate the expansion of the trial court's role in *Fiore*.

Moreover, this argument does not address the fact that DOT's policy improperly restricts the hearing examiner's exercise of a statutory grant of discretion. Assuming, *arguendo*, [\*135] that *Fiore* did not change the import of the cases DOT cites, this improper restriction alone justifies the trial court's action. n4

n4 It is not clear whether the trial court based the penalty modification upon DOT's policy requiring a suspension in all such cases. We can however, affirm a correct result which is not based upon a correct analysis. *Friedlander v. Zoning Hearing Board of Sayre Borough*, 119 Pa. Commonwealth Ct. 164, 546 A.2d 755 (1988).

[\*\*\*10]

DOT also argues that the trial court improperly substituted its judicial discretion for the administrative discretion of DOT. This argument overlooks the fact that DOT's policy binds its hearing examiners, preventing them from exercising the discretion provided by the Vehicle Code. In such a situation, the trial court's modification of the sanction imposed following a *de novo* hearing is not an impermissible usurpation of administrative discretion.

**Commonwealth v. Peters**

no. 1989-566

**COMMON PLEAS COURT OF CRAWFORD COUNTY, PENNSYLVANIA***1989 Pa. Dist. & Cnty. Dec. LEXIS 97; 4 Pa. D. & C.4th 33***November 2, 1989, Decided****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a summary conviction at the district justice level (Pennsylvania) for violating *Pa. Stat. Ann. tit. 75, § 3362(a)(2)* by driving in excess of the posted speed limit.

**OVERVIEW:** The police chief used a hand-operated speed chronometer stopwatch to determine defendant's speed across 132 feet that the chief had set out. The chronometer computed defendant's speed to be 77.5 miles per hour (mph) in a 55-mph zone. Defendant argued that in such a short distance, human reaction time in observing the exact time the car crossed both lines and in twice pressing the chronometer's timing button invited inaccuracy and doubt. In a de novo hearing, the court found that it could not find defendant guilty of speeding at 77.5 mph. The current Vehicle Code (Pennsylvania) did not set a minimum distance for the timing of a vehicle. Because a speeding conviction had serious driving-privilege, point-accumulation, and financial implications, the court found that it was essential to have sufficient evidence of a precise speed that left no room for conjecture. The court was presented with no studies of human reaction tests using this type of stopwatch, and the court noted that the calculated speed could vary with slight changes in the time. Thus, the court could not find defendant guilty of speeding at 77.5 mph but accepted defendant's testimony that he was speeding at 63 mph.

**OUTCOME:** The court found defendant guilty of speeding at 63 mph in a 55-mph zone.

**CORE TERMS:** distance, speed, mph, feet, measured, timing, stopwatch, speeding, mile, chronometer, speed limit, regulation, testing, driver, zone, speed-timing, short distance, human error, hand-held, driving, posted, safety factor, automatically, re-enactment, mathematical, pre-measured, calculation, calculated, exceeding, crossed

[HN2] *75 Pa. Cons. Stat. § 3368(d)* requires the approval and testing of mechanical or electrical speed-timing devices by the Department of Transportation for accuracy at designated testing sites.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN3] 67 Pa. Code § 105.71 et seq., permits department-approved and certified stopwatches to time the rate of speed of vehicles and prescribes the procedures for approval and certification. The present code and present transportation regulations do not set a minimum distance for the timing of a vehicle; whereas, the previous statute required a distance of no less than one-eighth or one-quarter of a mile. Former Pa. Stat. Ann. tit. 75, § 1002(d)(1) (1959).

***Governments > Legislation > Effect & Operation > Operability******Governments > Legislation > Interpretation***

[HN4] See the Statutory Construction Act of 1972, 1 Pa. Cons. Stat. § 1961 (1972).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Transportation Law > Commercial Vehicles > Maintenance & Safety***

[HN5] Section 3368(c)(4) of the Vehicle Code (Pennsylvania) has a built-in "safety factor" when arrests for speeding are made by radar or electronic devices using sensor tapes laid across the highway or speed-timing devices. For all speed-timing devices there is a six-mph "safety factor" before a conviction may be had. For highway sensor devices and hand-held devices there is a 10 mph "safety factor," where the speed limit is less than 55 mph, except in a school zone. Thus, the legislature recognizes the possibility of human error when dealing with split-second timing. Unfortunately, the legislature has not prescribed a minimum measured distance requirement before authorized timing devices may be used.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Penalties******Evidence > Privileges > General Overview******Evidence > Procedural Considerations > Weight & Sufficiency***

[HN6] With the amount of the speeding fine based on speed, Pa. Stat. Ann. tit. 75, § 3362, and the catastrophic-loss surcharge, Pa. Stat. Ann. tit. 75, § 6506, and the ever-present emergency medical services added fine of \$ 10, Pa. Stat. Ann. tit. 35, § 6384(a), a conviction of a speeding charge may have serious driving-privilege, point-accumulation and financial implications for the driver. Thus, common sense dictates that it is essential that the factfinder be presented with sufficient evidence of a precise speed that leaves no room for conjecture and doubt.

**COUNSEL:** [\*1] *J. Wesley Rowden, assistant district attorney, for the commonwealth.*

**JUDGES:** THOMAS, P.J.

**OPINION BY:** THOMAS, P.J.

**OPINION:**

[\*\*33] Appeal from summary conviction.

THOMAS, P.J., November 2, 1989 -- This matter before us is an appeal of a summary speeding conviction in violation of 75 P.S. § 3362(a)(2), for driving in excess of the posted speed limit. Defendant was "clocked" at 77.5 mph in a 55-mph zone by using a measured distance and an approved stopwatch.

**FACTUAL BACKGROUND**

The commonwealth established the following facts through the testimony of its witness, Frank Baranyai, chief of police of the Cochranon Police Department.

Sometime in the early part of 1989, the Cochranon Police Department purchased a hand-operated Acutrak Speek Chronometer stopwatch manufactured by Acutrak. The instructions accompanying the stopwatch required lines to be drawn upon the road so the watch operator could determine when to start and stop the watch.

[\*\*34] The instructions used, as an example, a distance of 132 feet or 0.025 miles to demonstrate the mathematical calculations to determine the speed. However, any distance could be entered into the electronic component [\*2] of the watch, which would then automatically convert seconds elapsed, in traversing a specific measured distance, to a speed in miles per hour. For some unexplained reason Chief Baranyai used 132 feet for his pre-measured course.

The Acutrak stopwatch was certified accurate pursuant to Department of Transportation regulations -- *67 Pa. Code § 105.71 et seq.* -- and was timely tested at Rebold's Service in Harrisburg, Pennsylvania, which was an approved testing station.

On June 23, 1989, Chief Baranyai parked his vehicle near the intersection of Route 322 and Hart Road in Cochranon, Pa. The chief had at some previous time set white lines exactly 132 feet apart on Route 322 to provide him sight markers to start and stop the Chronometer as the vehicles crossed each line.

At approximately 1:54 p.m., while monitoring the speeds of various vehicles on Route 322, defendant's white Chevrolet drove toward Chief Baranyai in a northerly direction. An elapsed time of 1.16 seconds was recorded on the hand-held chronometer when the vehicle crossed the two lines. This was automatically computed by the chronometer to be a speed of 77.5 mph, well in excess of the posted [\*3] speed limit of 55 mph. The chief subsequently stopped defendant's vehicle and issued him a citation for violating the posted speed limit. He was convicted at the district justice level, filed an appeal and competently represented himself at a de novo hearing.

Defendant argues that in such a short distance human reaction time in observing the exact time [\*\*35] the car crossed both lines and in twice pressing the chronometer timing button invites inaccuracy and doubt.

#### ISSUE

Is a pre-measured course of 132 feet, for the purpose of timing traffic to determine the speed of a vehicle, a proper distance under the Vehicle Code or Department of Transportation regulations, or do the code and/or regulations require a course in excess of 132 feet due to the potential for human error in operation of the chronometer?

#### DISCUSSION

Title *75 Pa.C.S. § 3368(c)* [HN1] provides that the rate of speed of a vehicle may be timed by a police officer using a mechanical or electrical speed-timing device. Section 3368(d) [HN2] requires the approval and testing of such devices by the Department of Transportation for accuracy at designated testing sites. *67 Pa. Code § 105.71 et seq.* [HN3] permits [\*4] department-approved and certified stopwatches to time the rate of speed of vehicles and prescribes the procedures for approval and certification. The present code and present transportation regulations do not set a minimum distance for the timing of a vehicle; whereas, the previous statute required a distance of no less than one-eighth or one-quarter of a mile. See former at *75 P.S. § 1002 (d)(1)*, P.L. 58, April 29, 1959.

Defendant postulates that the fallibility of humanity as well as the scientific truism that human reflexes are less than instantaneous, makes his speeding conviction measured over a 132-foot stretch of road and involving only 1.16 seconds grossly suspect. He cites *Commonwealth v. Alexion*, 33 Chester L. Rep. 37 (1984), which held that there [\*\*36] was an inherent potential for human error in a VASCAR-Plus speed timing device because of "an inevitable lag between the time the operator [of the device] thinks he sees the driver and actually trips and untrips the device." *Id.* at 38. In light of this potential of human error, the Chester County court found it necessary to establish a minimum distance requirement and turned to *67 Pa. Code § 105.95(a)(4)* [\*5] for guidance. This regulation was for the testing and calibration of the speed-timing device and utilizes a distance of one-tenth of a mile, or 528 feet, and the Chester County court set this as

the minimum distance.

However, in *Commonwealth v. Vishneski*, 380 Pa. Super. 495, 552 A.2d 297 (1980), the Pennsylvania Superior Court specifically overruled *Alexion*, stating that in *Alexion* the Chester County court improperly created a distance requirement where none existed. *Vishneski*, *supra*.

The Superior Court in *Commonwealth v. Ness and Smith*, 341 Pa. Super. 225, 491 A.2d 234 (1985), held in a case very similar to this one that there was no minimum distance requirement for the use of an approved stopwatch, and there was no impropriety when the officer used a pre-measured course of only 200 feet for the Ness timing and 600 feet for Smith.

The Statutory Construction Act of 1972, P.L. 1339, 1 Pa.C.S. § 1501-1991, states with regard to re-enactments:[HN4]

"Whenever a statute re-enacts a former statute the provisions common to both statutes shall date from their first adoption. Such provisions only of the former statute as are omitted [\*6] from the re-enactment shall be deemed abrogated, and only the new or changed provisions shall be deemed by the law in [\*\*37] the effective date of the re-enactment." 1 Pa.C.S. § 1961. (emphasis supplied)

The court in *Vishneski* went on to conclude that the omitted provisions were intended to be abrogated and held that the one-eighth of a mile distance requirement was not intended to be maintained by the legislature.

Thus, we are faced with statutory and decisional law which seemingly attributes infallibility to a police officer using a hand-held chronometer or stopwatch when measuring the speed of a car over a measured distance of his choice. In this regard, we note that section 3368(c)(4) of the Vehicle Code [HN5] has a built-in "safety factor" when arrests for speeding are made by radar or electronic devices using sensor tapes laid across the highway or speed-timing devices as used here. For all speed-timing devices there is a six-mph "safety factor" before a conviction may be had. For highway sensor devices and hand-held devices there is a 10 mph "safety factor," where the speed limit is less than 55 mph -- except in a school zone. Thus, the legislature recognized the [\*7] possibility of human error when dealing with split-second timing. Unfortunately, the legislature has not prescribed a minimum measured distance requirement before authorized timing devices may be used.

We recently addressed this problem in the unreported case of *Commonwealth v. St. John*, Crawford County 1989-37, where the borough police used a hand-held chronometer and a measured distance of only 75 feet and charged the errant driver with a speed of 58.13 mph in a 35-mph zone. After hearing, we simply could not find that over this short distance, and allowing for the human reaction time factor, that the police officer's reported speed was a mathematical certainty. Accordingly, our verdict [\*\*38] was that the driver had exceeded the prescribed 35-mph limit, but we were not satisfied beyond a reasonable doubt that he was proceeding at the speed calculated by the officer's timing device. Accordingly, we found him guilty of a 47-mph speed.

Likewise in this case, we are apprehensive about the infallible reliability of the reported speed over such a short distance. We intend no criticism of the arresting officer as he is highly trained in the use of this device, and in fact instructs [\*8] other police officers in its proper use. However, if measured-distance (stopwatch) calculations are to be used as a basis for speeding convictions, and if the Vehicle Code remains silent in prescribing a mandatory minimum measured distance, what is to prevent over-zealous police officers from arbitrarily using an unreasonable short distance of their choosing? If the courts of this county were to permit police to convict for speeding at a precise mechanically calculated speed over a measured 75 feet, or the 132 feet used in the instant case, would we then invite convictions by stopwatch when the measured distance was 20, 40 or 60 feet?

In the instant case, defendant testified that he was familiar with the road and was in no great hurry. He frankly admitted he was exceeding the speed limit, and that with his driving experience he could not have been exceeding 63 mph. Defendant, without objection, presented a certificate showing he had his own speedometer checked in a timely

manner by an approved testing station and at 50 and 60 mph his speedometer was reporting two mph in excess of his true speed.

We have no evidence in the case before us of the impact of the conviction of this defendant [\*9] regarding points toward a suspension of his driving privileges [\*\*39] under 75 P.S. § 1539. \* Also, we note it is obvious that [HN6] with the amount of the speeding fine based on speed (75 P.S. § 3362), and the catastrophic-loss surcharge (75 P.S. § 6506) and the ever-present emergency medical services added fine of \$ 10 (35 P.S. § 6384(a)), a conviction of a speeding charge may have serious driving-privilege, point-accumulation and financial implications for the driver. Thus, common sense dictates that it is essential that the factfinder be presented with sufficient evidence of a precise speed that leaves no room for conjecture and doubt.

\* We do not imply that this type of evidence is admissible or relevant in the adjudication of a speeding charge.

We note also that we were presented with no studies or the results of human reaction tests using this type of timing device that would enlighten us and convince us beyond a reasonable doubt that the chance of the officer being mistaken by a fraction of a second [\*10] in his timing was extremely remote. Simple mathematical calculation shows that had the time been 1.64 seconds instead of 1.16 seconds (a difference of 0.48 of a second) the "clocking" would have established defendant's speed at 55 miles per hour. Likewise, for a 132-foot distance clocked in 1.16 seconds, if the timing were in error in favor of or against the driver by a mere 0.16 of a second, it would represent a speed of either 68 miles per hour or 90 miles per hour. Obviously, the greater the measured distance the less impact minor human reflex error would have on the automatically calculated speed.

We conclude therefore, that we cannot find this defendant guilty of speeding at 77.5 mph in a 55-mph zone under the facts of this case, but we are convinced that he exceeded the speed limit and [\*\*40] accept defendant's testimony that he could not have been exceeding the limit by more than eight mph, and find that in fact he is guilty of a 63-mph speed in a 55-mph zone.

We are reluctant to adopt an appropriate minimum measured distance applicable to all cases of this type coming before the courts of this county absent expert opinions resulting from recognized tests. We suggest that [\*11] this measured-distance problem is one for legislative correction by appropriate amendments to section 3368 or other sections of the Vehicle Code.

**Commonwealth v. Peters**

no. 1989-566

**COMMON PLEAS COURT OF CRAWFORD COUNTY, PENNSYLVANIA***1989 Pa. Dist. & Cnty. Dec. LEXIS 97; 4 Pa. D. & C.4th 33***November 2, 1989, Decided****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a summary conviction at the district justice level (Pennsylvania) for violating *Pa. Stat. Ann. tit. 75, § 3362(a)(2)* by driving in excess of the posted speed limit.

**OVERVIEW:** The police chief used a hand-operated speed chronometer stopwatch to determine defendant's speed across 132 feet that the chief had set out. The chronometer computed defendant's speed to be 77.5 miles per hour (mph) in a 55-mph zone. Defendant argued that in such a short distance, human reaction time in observing the exact time the car crossed both lines and in twice pressing the chronometer's timing button invited inaccuracy and doubt. In a de novo hearing, the court found that it could not find defendant guilty of speeding at 77.5 mph. The current Vehicle Code (Pennsylvania) did not set a minimum distance for the timing of a vehicle. Because a speeding conviction had serious driving-privilege, point-accumulation, and financial implications, the court found that it was essential to have sufficient evidence of a precise speed that left no room for conjecture. The court was presented with no studies of human reaction tests using this type of stopwatch, and the court noted that the calculated speed could vary with slight changes in the time. Thus, the court could not find defendant guilty of speeding at 77.5 mph but accepted defendant's testimony that he was speeding at 63 mph.

**OUTCOME:** The court found defendant guilty of speeding at 63 mph in a 55-mph zone.

**CORE TERMS:** distance, speed, mph, feet, measured, timing, stopwatch, speeding, mile, chronometer, speed limit, regulation, testing, driver, zone, speed-timing, short distance, human error, hand-held, driving, posted, safety factor, automatically, re-enactment, mathematical, pre-measured, calculation, calculated, exceeding, crossed

**OPINION:**

[\*\*33] Appeal from summary conviction.

THOMAS, P.J., November 2, 1989 -- This matter before us is an appeal of a summary speeding conviction in violation of 75 P.S. § 3362(a)(2), for driving in excess of the posted speed limit. Defendant was "clocked" at 77.5 mph in a 55-mph zone by using a measured distance and an approved stopwatch.

**FACTUAL BACKGROUND**

The commonwealth established the following facts through the testimony of its witness, Frank Baranyai, chief of police of the Cochranon Police Department.

Sometime in the early part of 1989, the Cochranon Police Department purchased a hand-operated Acutrak Speek Chronometer stopwatch manufactured by Acutrak. The instructions accompanying the stopwatch required lines to be drawn upon the road so the watch operator could determine when to start and stop the watch.

[\*\*34] The instructions used, as an example, a distance of 132 feet or 0.025 miles to demonstrate the mathematical calculations to determine the speed. However, any distance could be entered into the electronic component [\*2] of the watch, which would then automatically convert seconds elapsed, in traversing a specific measured distance, to a speed in miles per hour. For some unexplained reason Chief Baranyai used 132 feet for his pre-measured course.

The Acutrak stopwatch was certified accurate pursuant to Department of Transportation regulations -- *67 Pa. Code § 105.71 et seq.* -- and was timely tested at Rebold's Service in Harrisburg, Pennsylvania, which was an approved testing station.

On June 23, 1989, Chief Baranyai parked his vehicle near the intersection of Route 322 and Hart Road in Cochranon, Pa. The chief had at some previous time set white lines exactly 132 feet apart on Route 322 to provide him sight markers to start and stop the Chronometer as the vehicles crossed each line.

At approximately 1:54 p.m., while monitoring the speeds of various vehicles on Route 322, defendant's white Chevrolet drove toward Chief Baranyai in a northerly direction. An elapsed time of 1.16 seconds was recorded on the hand-held chronometer when the vehicle crossed the two lines. This was automatically computed by the chronometer to be a speed of 77.5 mph, well in excess of the posted [\*3] speed limit of 55 mph. The chief subsequently stopped defendant's vehicle and issued him a citation for violating the posted speed limit. He was convicted at the district justice level, filed an appeal and competently represented himself at a de novo hearing.

Defendant argues that in such a short distance human reaction time in observing the exact time [\*\*35] the car crossed both lines and in twice pressing the chronometer timing button invites inaccuracy and doubt.

#### ISSUE

Is a pre-measured course of 132 feet, for the purpose of timing traffic to determine the speed of a vehicle, a proper distance under the Vehicle Code or Department of Transportation regulations, or do the code and/or regulations require a course in excess of 132 feet due to the potential for human error in operation of the chronometer?

#### DISCUSSION

Title *75 Pa.C.S. § 3368(c)* [HN1] provides that the rate of speed of a vehicle may be timed by a police officer using a mechanical or electrical speed-timing device. Section 3368(d) [HN2] requires the approval and testing of such devices by the Department of Transportation for accuracy at designated testing sites. *67 Pa. Code § 105.71 et seq.* [HN3] permits [\*4] department-approved and certified stopwatches to time the rate of speed of vehicles and prescribes the procedures for approval and certification. The present code and present transportation regulations do not set a minimum distance for the timing of a vehicle; whereas, the previous statute required a distance of no less than one-eighth or one-quarter of a mile. See former at *75 P.S. § 1002 (d)(1)*, P.L. 58, April 29, 1959.

Defendant postulates that the fallibility of humanity as well as the scientific truism that human reflexes are less than instantaneous, makes his speeding conviction measured over a 132-foot stretch of road and involving only 1.16 seconds grossly suspect. He cites *Commonwealth v. Alexion*, 33 Chester L. Rep. 37 (1984), which held that there [\*\*36] was an inherent potential for human error in a VASCAR-Plus speed timing device because of "an inevitable lag between the time the operator [of the device] thinks he sees the driver and actually trips and untrips the device." *Id.* at 38. In light of this potential of human error, the Chester County court found it necessary to establish a minimum distance requirement and turned to *67 Pa. Code § 105.95(a)(4)* [\*5] for guidance. This regulation was for the testing and calibration of the speed-timing device and utilizes a distance of one-tenth of a mile, or 528 feet, and the Chester County court set this as

the minimum distance.

However, in *Commonwealth v. Vishneski*, 380 Pa. Super. 495, 552 A.2d 297 (1980), the Pennsylvania Superior Court specifically overruled *Alexion*, stating that in *Alexion* the Chester County court improperly created a distance requirement where none existed. *Vishneski*, *supra*.

The Superior Court in *Commonwealth v. Ness and Smith*, 341 Pa. Super. 225, 491 A.2d 234 (1985), held in a case very similar to this one that there was no minimum distance requirement for the use of an approved stopwatch, and there was no impropriety when the officer used a pre-measured course of only 200 feet for the Ness timing and 600 feet for Smith.

The Statutory Construction Act of 1972, P.L. 1339, 1 Pa.C.S. § 1501-1991, states with regard to re-enactments:[HN4]

"Whenever a statute re-enacts a former statute the provisions common to both statutes shall date from their first adoption. Such provisions only of the former statute as are omitted [\*6] from the re-enactment shall be deemed abrogated, and only the new or changed provisions shall be deemed by the law in [\*\*37] the effective date of the re-enactment." 1 Pa.C.S. § 1961. (emphasis supplied)

The court in *Vishneski* went on to conclude that the omitted provisions were intended to be abrogated and held that the one-eighth of a mile distance requirement was not intended to be maintained by the legislature.

Thus, we are faced with statutory and decisional law which seemingly attributes infallibility to a police officer using a hand-held chronometer or stopwatch when measuring the speed of a car over a measured distance of his choice. In this regard, we note that section 3368(c)(4) of the Vehicle Code [HN5] has a built-in "safety factor" when arrests for speeding are made by radar or electronic devices using sensor tapes laid across the highway or speed-timing devices as used here. For all speed-timing devices there is a six-mph "safety factor" before a conviction may be had. For highway sensor devices and hand-held devices there is a 10 mph "safety factor," where the speed limit is less than 55 mph -- except in a school zone. Thus, the legislature recognized the [\*7] possibility of human error when dealing with split-second timing. Unfortunately, the legislature has not prescribed a minimum measured distance requirement before authorized timing devices may be used.

We recently addressed this problem in the unreported case of *Commonwealth v. St. John*, Crawford County 1989-37, where the borough police used a hand-held chronometer and a measured distance of only 75 feet and charged the errant driver with a speed of 58.13 mph in a 35-mph zone. After hearing, we simply could not find that over this short distance, and allowing for the human reaction time factor, that the police officer's reported speed was a mathematical certainty. Accordingly, our verdict [\*\*38] was that the driver had exceeded the prescribed 35-mph limit, but we were not satisfied beyond a reasonable doubt that he was proceeding at the speed calculated by the officer's timing device. Accordingly, we found him guilty of a 47-mph speed.

Likewise in this case, we are apprehensive about the infallible reliability of the reported speed over such a short distance. We intend no criticism of the arresting officer as he is highly trained in the use of this device, and in fact instructs [\*8] other police officers in its proper use. However, if measured-distance (stopwatch) calculations are to be used as a basis for speeding convictions, and if the Vehicle Code remains silent in prescribing a mandatory minimum measured distance, what is to prevent over-zealous police officers from arbitrarily using an unreasonable short distance of their choosing? If the courts of this county were to permit police to convict for speeding at a precise mechanically calculated speed over a measured 75 feet, or the 132 feet used in the instant case, would we then invite convictions by stopwatch when the measured distance was 20, 40 or 60 feet?

In the instant case, defendant testified that he was familiar with the road and was in no great hurry. He frankly admitted he was exceeding the speed limit, and that with his driving experience he could not have been exceeding 63 mph. Defendant, without objection, presented a certificate showing he had his own speedometer checked in a timely

manner by an approved testing station and at 50 and 60 mph his speedometer was reporting two mph in excess of his true speed.

We have no evidence in the case before us of the impact of the conviction of this defendant [\*9] regarding points toward a suspension of his driving privileges [\*\*39] under 75 P.S. § 1539. \* Also, we note it is obvious that [HN6] with the amount of the speeding fine based on speed (75 P.S. § 3362), and the catastrophic-loss surcharge (75 P.S. § 6506) and the ever-present emergency medical services added fine of \$ 10 (35 P.S. § 6384(a)), a conviction of a speeding charge may have serious driving-privilege, point-accumulation and financial implications for the driver. Thus, common sense dictates that it is essential that the factfinder be presented with sufficient evidence of a precise speed that leaves no room for conjecture and doubt.

\* We do not imply that this type of evidence is admissible or relevant in the adjudication of a speeding charge.

We note also that we were presented with no studies or the results of human reaction tests using this type of timing device that would enlighten us and convince us beyond a reasonable doubt that the chance of the officer being mistaken by a fraction of a second [\*10] in his timing was extremely remote. Simple mathematical calculation shows that had the time been 1.64 seconds instead of 1.16 seconds (a difference of 0.48 of a second) the "clocking" would have established defendant's speed at 55 miles per hour. Likewise, for a 132-foot distance clocked in 1.16 seconds, if the timing were in error in favor of or against the driver by a mere 0.16 of a second, it would represent a speed of either 68 miles per hour or 90 miles per hour. Obviously, the greater the measured distance the less impact minor human reflex error would have on the automatically calculated speed.

We conclude therefore, that we cannot find this defendant guilty of speeding at 77.5 mph in a 55-mph zone under the facts of this case, but we are convinced that he exceeded the speed limit and [\*\*40] accept defendant's testimony that he could not have been exceeding the limit by more than eight mph, and find that in fact he is guilty of a 63-mph speed in a 55-mph zone.

We are reluctant to adopt an appropriate minimum measured distance applicable to all cases of this type coming before the courts of this county absent expert opinions resulting from recognized tests. We suggest that [\*11] this measured-distance problem is one for legislative correction by appropriate amendments to section 3368 or other sections of the Vehicle Code.

**DISPOSITION:** Judgment of the Criminal Court Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was convicted in the Criminal Court for Shelby County (Tennessee) of possession of a controlled substance with intent to sell, to wit: cocaine over 300 grams. Defendant appealed.

**OVERVIEW:** Defendant argued that his consent to search and confession were involuntary and there had been no meaningful evaluation of his mental competency and/or mental illness. The State argued that defendant waived the issue because he failed to take any action to prevent the harmful effect of the alleged error by both failing to raise the issue before the trial court by asking for a competency hearing or in his motion for a new trial. The court of appeals agreed with the State. Defendant neither asked for a competency hearing nor raised any complaint about the court ordered mental evaluation in his motion for a new trial. Accordingly, defendant waived the issue.

**OUTCOME:** The judgment was affirmed.

**CORE TERMS:** van, cocaine, suppression hearing, public defender, marijuana, consent to search, new trial, competency, presentation, canine, floor, motion to suppress, competency hearing, refused to answer, appointed, arrest, waived, hidden, smell, burnt, mile, conclusions of law, appointed counsel, self-representation, unequivocal, disruptive, convinced, elbow, Tennessee Rule, controlled substance

[HN1] See Tenn. R. App. P. 3(e).

**COUNSEL:** David Bell and Michael Johnson, Assistant Public Defenders (at trial), and Garland Erguden, Assistant Public Defender (on appeal), for the appellant, Michael Ortiz.

Paul G. Summers, Attorney General and Reporter; Brian C. Johnson, Assistant Attorney General; William L. Gibbons, District Attorney General; and J. Robert Carter and Valerie Smith, Assistant District Attorneys General, for the appellee, State of Tennessee.

**JUDGES:** ALAN E. GLENN, J., delivered the opinion of the court, in which DAVID H. WELLES and JERRY L. SMITH, JJ., joined.

**OPINION BY:** ALAN E. GLENN

**OPINION:** The defendant, Michael Ortiz, was found guilty by a Shelby County Jury of possession of a controlled substance with intent to sell, to wit: cocaine over 300 grams. He was sentenced as a Range I, standard offender to twenty years in the Department of Correction. On appeal, he argues the trial court erred in denying: (1) his motion to suppress evidence obtained from a search of his vehicle; and (2) [\*2] his motion to suppress his statement given to police. Following our review, we affirm the judgment of the trial court.

## **OPINION**

### **FACTS**

The defendant's conviction is a result of a routine traffic stop in Shelby County, Tennessee. The defendant, who gave police consent to search his van, was arrested after 18.5 pounds of cocaine was located in a hidden compartment of his vehicle. After his arrest, the defendant gave a detailed statement to police officers acknowledging that the cocaine was his and that he was transporting it from Las Vegas, Nevada, to Myrtle Beach, South Carolina, to sell. On February 6, 2003, he was indicted by the Shelby County Grand Jury for possession with intent to sell over 300 grams of cocaine (Count 1) and possession with intent to deliver over 300 grams of cocaine (Count 2). On June 23, 2004, the defendant filed motions to suppress both the cocaine found in his vehicle and his statement to the police. Subsequently, the trial court held a suppression hearing and issued findings and conclusions from the bench, denying the defendant's motions. Following a jury trial, where the defendant was convicted of both counts, the trial court merged Counts [\*3] 1 and 2 and sentenced the defendant to twenty years.

On appeal, the defendant argues that he did not have the mental capacity to consent to the search of his vehicle or give a knowing and voluntary confession.

### **Suppression Hearing**

Officer Chris Jones testified that on November 6, 2002, he and Officer Marco Yzaguirre, both assigned to the West Tennessee Drug Task Force's Interstate Interdiction Unit, n1 stopped the defendant's van after he "clocked" the defendant going 66 miles per hour in a 55 mile per hour zone on Interstate 240 with a calibrated stationary radar unit. n2 Officer Jones's in-car video camera recorded the entire stop. As he approached the driver's side window of the van, Jones "smelled the odor of burnt marijuana coming from the interior of the vehicle." The officer asked the defendant to exit the van, whereupon the defendant acknowledged traveling at 65 miles an hour. Accompanying the defendant was a young female passenger, Ms. Ortiz, n3 whom he claimed was his cousin. n4 The defendant told Jones that he was traveling from Las Vegas, Nevada, to South Carolina for his uncle's funeral, but he did not know which city he was going to.

n1 Officer Jones was employed by the Shelby County Sheriff's Department, and Officer Yzaguirre worked for the Memphis Police Department.

[\*4]

n2 Jones testified that he was certified to use the radar unit and explained that he "checked the internal calibration on the unit itself" prior to starting his shift that same morning.

n3 Ms. Ortiz's first name is not clear from the record. She was variously addressed as "Elisha," "Angelica," "Angelina," "Angela," and "Angelique" by different witnesses. For ease of writing this opinion, we will refer to her as Ms. Ortiz.

n4 Ms. Ortiz's exact relationship to the defendant is also unclear from the record. She was ultimately best described as "the unrelated-to-[the defendant]-by-blood-or-birth, ride-along friend." Ms. Ortiz was never charged, nor did she testify at the suppression hearing or trial.

Jones, after placing the defendant in the backseat of his police car, approached the passenger side of the van to talk to Ms. Ortiz, where he again smelled "burnt marijuana." Ms. Ortiz told the officer that the defendant was her brother and that the smell he detected "may have been a cigarette burning." While Jones was talking to Ms. Ortiz, Officer Yzaguirre asked the defendant for consent [\*5] to search the van. The officers had also contacted a canine officer "to bring his trained narcotic canine to the scene." Prior to searching the van, Jones discussed the marijuana smell with the defendant who acknowledged having marijuana in the car. Jones immediately advised the defendant of his Miranda rights and the defendant said there was a "joint" in the van and offered to show the officers its location. After the canine unit arrived, the van was searched and Jones found "hidden in the floor of the vehicle, approximately, 11 bundles of suspected cocaine. It did field test positive for cocaine. And the gross total weight was 18.5 pounds." The cocaine was packaged in "gray duct tape." There was also "approximately [] 4 grams of marijuana in a sock, in [the defendant's] clothing, in his luggage."

Officer Marco Yzaguirre testified that while the defendant was seated in the backseat of the police car, the officer asked for and obtained the defendant's written consent to search the van. Yzaguirre said he explained to the defendant that he did not have to give consent to search and that this was a voluntary search.

Sergeant Michael McCord, a Memphis police officer assigned [\*6] to the West Tennessee Drug Task Force, testified his canine partner, Jax, is certified and trained to detect various drugs, including cocaine. Jax makes an "aggressive indication" when he comes into contact with the smell of illegal drugs. McCord said when Jax encountered the defendant's van, "he had an aggressive bark, almost, . . . all the way around the vehicle. And he actually indicated on the, . . . both driver and passenger side rocker panels. He actually went underneath the vehicle and tried to bite at the floor of the vehicle." After Jax indicated the presence of drugs, McCord assisted Jones and Yzaguirre in searching the van where they found the cocaine hidden "in the floor of the vehicle" in an "after-market compartment" that was built into the van.

David McGriff, a supervisor with the West Tennessee Drug Task Force, interviewed the defendant following his arrest. After being readvised of his Miranda rights, the defendant gave a recorded statement to McGriff wherein he acknowledged placing more than seven kilos of cocaine wrapped in plastic wrap underneath the floor panel of his van to transport it from Las Vegas, Nevada, to Myrtle Beach, South Carolina. The defendant [\*7] said he was to receive "in the thousands of dollars" for transporting the cocaine. The defendant also told McGriff that his passenger, Ms. Ortiz, had no knowledge of the cocaine being in the van.

At the conclusion of the suppression hearing, the trial court issued oral findings from the bench. Based on the officer's smelling "burnt marijuana," the defendant's uncoerced consent, and the drug dog indicating drugs were present, the court found probable cause existed to search the defendant's van and denied the defendant's motion to suppress the cocaine. In addition, finding the defendant was advised of his rights and chose to make a statement to police "freely and voluntarily," the trial court denied the defendant's motion to suppress his statement.

## **Trial**

Officers Jones, Yzaguirre, McCord, and McGriff testified again at the trial. Each basically gave the same testimony they offered at the suppression hearing. In addition, Tara Barker, a special agent forensic scientist with the Tennessee Bureau of Investigation Crime Laboratory, testified that she tested a sample of the substance taken from the defendant's van and said it was "found to be cocaine, Schedule II."

The defendant [\*8] did not testify at either the suppression hearing or at trial.

## ANALYSIS

### I. Defendant's Competency

On appeal, the defendant's sole argument is that "under the totality of circumstances, both [his] consent to search and confession were involuntary" because "circumstances combined to overwhelm [the defendant's] will to resist." Specifically, the defendant maintains that "his consent to search and statement of admission can not be deemed knowing and voluntary without a meaningful evaluation of his mental competency and/or mental illness." The State argues the defendant waived this issue for appeal because he failed, pursuant to Tennessee Rule of Appellate Procedure 36(a), to take any action to prevent the harmful effect of the alleged error by both failing to raise this issue before the trial court by asking for a competency hearing or in his motion for a new trial. We agree with the State.

The record on appeal includes transcripts of all the defendant's pretrial proceedings. These transcripts show an articulate but uncooperative defendant who insisted upon representing himself despite the trial court's numerous advisements against doing so. In response to the trial [\*9] court's questions to determine if the defendant could in fact represent himself, the defendant either did not answer or said that "[he] would be happy to assist this Court in any way possible if he could just see [his] certificate of claim." In addition, the defendant made the following claims and requests: his name was not Michael Ortiz; n5 he was not a "Person" who was subject to the court's jurisdiction; the court should "dismiss this case for lack of evidence and failure to state a claim and want of jurisdiction;" he would accept a lawyer only if the lawyer would show him his license and "sign a contract to represent [him] zealously and rescind all contracts . . . with the State;" that the "flags [in the courtroom] get taken down immediately and have the United States peace flag brought in here with no yellow fringe around it;" and for the "prosecutor to provide serial placement number of their bar card." Early on in the proceedings, as a precaution, the trial court appointed a public defender to "sit as armchair counsel to assist" the defendant.

n5 When asked by the court what his name was, the defendant simply answered "No, it's not."

[\*10]

In November 2003, as a result of his actions and statements to the trial court during the pretrial proceedings, the defendant underwent a court-ordered mental evaluation at Memphis Mental Health Institute ("M.M.H.I.") to determine his competency to stand trial. n6 In a letter to the trial court, n7 M.M.H.I. noted that "it is the opinion of the staff that there are no known impediments that would preclude [the defendant] from adequately defending himself in a court of law" and, furthermore, the staff's "impression is [the defendant] is intentionally attempting to foil his case from progressing through the legal system by being uncooperative. His behaviors seems to be driven by secondary motives rather than mental illness."

n6 The defendant was initially evaluated at Midtown Mental Health Center. The forensic director who evaluated him informed the trial court that the defendant's "ability to confer with counsel and participate in his defense was questionable." He was then transferred to M.M.H.I. for further evaluation.

n7 Although the appellate record contains the letters to the trial court from both Midtown Mental Health Center and M.M.H.I., the letters are not marked as exhibits. However, the trial court discussed these mental

evaluations in its July 8, 2004, findings of facts and conclusions of law. Therefore, this court determines that the letters, both of which are contained in a sealed envelope, are part of the appellate record. See *State v. Bobadilla*, 181 S.W.3d 641, 2005 Tenn. LEXIS 1043, 2005 WL 3193823, at \*3 (Tenn. 2005).

[\*11]

On February 20, 2004, the defendant acknowledged to the trial court that he did "need counsel" and did not want to represent himself. The trial court immediately appointed the public defender to represent the defendant. In addition, on July 8, 2004, the trial court entered written findings of facts and conclusions of law detailing the events that led to the court's appointing the public defender's office to represent the defendant at his suppression hearing and trial:

This cause came on to be heard upon the returning of an indictment charging the defendant with the Unlawful Possession of a Controlled Substance with the intent to Sell or Deliver on February 6, 2003. Upon arraignment, February 13, 2003, the defendant refused to answer the Court's questions about his ability to employ counsel. The defendant indicated he wanted to represent himself, however as the Court attempted to question the defendant about his understanding of the law regarding self representation he refused to answer the questions in a proper manner. Even though the defendant refused to answer questions he indicated that he wanted to represent himself and the Court agreed to allow him to represent himself at [\*12] trial. On February 27, 2003, the Court designated the Public Defender's Office to assist the defendant in trial preparation. The defendant resisted any help. The case was set for trial for June 2003. The case involved a video taped arrest and search. The defendant was brought into court and allowed to watch the video as part of discovery. As a precaution the Court entered an order to have the defendant's competency determined. After examination the Doctors recommended further evaluations based on the defendant's actions. After a 30 day evaluation the Doctors concluded that the defendant was competent and that his actions and lack of cooperation were calculated and they recommended that his proceedings proceed. The case had to be reset for several months during this process and eventually in November, 2003, the matter was set for trial May 3, 2004. The Court had continually brought the defendant into Court to discuss the pitfalls of representing himself and to try to discourage such action. However, on each occasion the defendant continued with a litany of statements which had been prepared by the defendant and were read into the record by the defendant. The statements were non responsive [\*13] and the demands were immaterial and improper as regards this criminal proceeding. The defendant continued on each occasion with the same presentation and continuously filed pro se documents which had no bearing on this proceeding. On February 20, 2004, the defendant in one of his presentations advised the Court that he did not want to represent himself and that he did want an attorney, although as usual he had certain demands on that attorney which the Court would not grant. However, the Court at that point determined that the defendant was in need of legal assistance and that from that date forward the Public Defender would be handling the case and the defendant would no longer be allowed to represent himself. Since that date motions have been filed including a Motion to Suppress evidence which is set for a hearing in September and a new trial date has been set for November 1, 2004. The defendant continues to refuse to cooperate with counsel and refuses to recognize counsel without counsel complying with defendant's demands. The requirements are unrealistic and not required by law and will not be ordered by this Court. Therefore the Public Defender is proceeding without the help or [\*14] cooperation of the defendant.

"The right to assistance of counsel in preparation and presentation of a defense to a criminal charge is grounded in both the Tennessee and the United States Constitutions.' (Neither of which the defendant recognizes as authority over him) *State v. Northington*, [667] S.W.2d 57, 60 (Tenn. 1984). An accused also possesses a right to self-representation, see *State v. Gillespie*, 898 S.W.2d 738, 740 (Tenn. Crim. App. 1994),

but a 'strong presumption against waiver of the constitutional right to counsel' exists, *Northington*, 667 S.W.2d at 60. An accused's request for self-representation in a criminal proceeding must be timely, as well as clear and unequivocal. See *State v. Herrod*, 754 S.W.2d 627, 629-30 (Tenn. Crim. App. 1988). The defendant must know why 'he should have counsel and what he risks by refusing appointed counsel' and thus 'clearly understand the hazards of representing himself.' Further, 'the record must show that the defendant made his decision to waive counsel knowing the disadvantages and dangers of representing himself.' *State v. Goodwin*, 909 S.W.2d 35, 40-41 (Tenn. Crim. App. 1995). [\*15] *State v. Ruff*, 1999 Tenn. Crim. App. LEXIS 452, C.C.A. No. 02C01-9801-CR-00006 [ , 1999 WL 281072 (Tenn. Crim. App.) May 7, 1999).

Included in the Ruff opinion is an Appendix citing *United States v. McDowell*, 814 F.2d 245, 251-52 (6th Cir. 1987) (quoting Guidelines for District Judges from (Bench Book for United States District Judges 1.02-2 to 5 (3d ed. 1986)). This court went over those exact questions and got non responsive answers from the defendant. As a result of questioning and listening to the defendant's presentations[,] this Court is not convinced that the defendant has clearly and unequivocally stated in writing or otherwise that he desires to represent himself or that he has the ability to do so. Further in light of recent cases by the Court of Criminal Appeals regarding pro se litigants who act up in Court and are removed from the proceedings and left unrepresented if elbow counsel has not been appointed, this Court concluded early on that the defendant needed elbow counsel. The defendant has stated that he refuses to recognize the Public Defender as his counsel and has refused to cooperate with his defense, as a result the Court is not convinced that the [\*16] defendant would act properly in the Trial of his cause and as a result could be removed from the proceedings. Although the defendant has not shown disrespect for nor been disruptive in the courtroom his actions although civil could be disruptive to trial proceedings. This Court is satisfied that the Public Defender will be prepared to handle the Motion to Suppress and if necessary the Trial of this cause with or without the assistance of the defendant. This Court fully recognizes the defendant's right to think as he pleases with regard to the United States and Tennessee Constitution and the authority of this Court to have jurisdiction over him, however the Court has taken an oath to uphold those Constitutions and included therein are the rights to representation or self representation.

This Court is not satisfied that the defendant has made a clear and unequivocal waiver of his right to representation and therefore the Court will Order that the defendant will not be allowed to represent himself and the case will proceed with appointed counsel.

On appeal, the defendant argues that "the M.M.H.I. report is frighteningly inept and a real abuse of State funds meant to assist the court [\*17] in making a determination of a defendant's competency." The defendant, however, neither asked for a competency hearing nor raised any complaint about the M.M.H.I. mental evaluation in his motion for a new trial. Accordingly, we agree with the State that the defendant has waived this issue. See *State v. Estes*, 655 S.W.2d 179, 182 (Tenn. Crim. App. 1983) (holding that although a court-ordered mental evaluation of the defendant was conducted, trial counsel's failure to seek a competency hearing "to insure that the matter of competency was settled before trial amounted to a waiver of that issue" under Tennessee Rule of Appellate Procedure 36(a)); Tenn. R. App. P. 3(e) (providing that [HN1] "no issue . . . shall be predicated upon error in the admission or exclusion of evidence, jury instructions granted or refused, misconduct of jurors, parties or counsel, or other action committed or occurring during the trial of the case, or other ground upon which a new trial is sought, unless the same was specifically stated in a motion for a new trial").

In addition, even if we had not found this issue to be waived, there is no proof in the record that the M.M.H.I. report is inaccurate. [\*18] The trial court relied on the M.M.H.I report to conclude that the defendant was competent to stand trial. The defendant is now asking us to find the report insufficient on its face. There is no basis in the record for us to make such findings, and we decline to do so. As we explained in *State v. Green*, 2000 Tenn. Crim. App. LEXIS

954, No. E1999-02204-CCA-R3-CD, 2000 WL 1839130, at \*3 (Tenn. Crim. App. Dec. 14, 2000), perm. to appeal denied (Tenn. May 21, 2001), "witness credibility, the weight and value of the evidence, and factual disputes are entrusted to the finder of fact. *State v. Cabbage*, 571 S.W.2d 832, 835 (Tenn. 1978); *Liakas v. State*, 199 Tenn. 298, 305, 286 S.W.2d 856, 859 (1956); *Farmer v. State*, 574 S.W.2d 49, 51 (Tenn. Crim. App. 1978). Simply stated, the court is not an appellate surrogate for the trier of fact."

## **II. Motions to Suppress**

As discussed above, the defendant's sole argument on appeal is that he lacked the mental capacity to consent to the search of his van and give a knowing and voluntary confession. As we have determined that this issue is without merit, we conclude that the trial court properly [\*19] denied both motions.

## **CONCLUSION**

Based on the forgoing authorities and reasoning, we affirm the judgment of the trial court.

**COUNSEL:** David Bell and Michael Johnson, Assistant Public Defenders (at trial), and Garland Erguden, Assistant Public Defender (on appeal), for the appellant, Michael Ortiz.

Paul G. Summers, Attorney General and Reporter; Brian C. Johnson, Assistant Attorney General; William L. Gibbons, District Attorney General; and J. Robert Carter and Valerie Smith, Assistant District Attorneys General, for the appellee, State of Tennessee.

**JUDGES:** ALAN E. GLENN, J., delivered the opinion of the court, in which DAVID H. WELLES and JERRY L. SMITH, JJ., joined.

**OPINION BY:** ALAN E. GLENN

**OPINION:** The defendant, Michael Ortiz, was found guilty by a Shelby County Jury of possession of a controlled substance with intent to sell, to wit: cocaine over 300 grams. He was sentenced as a Range I, standard offender to twenty years in the Department of Correction. On appeal, he argues the trial court erred in denying: (1) his motion to suppress evidence obtained from a search of his vehicle; and (2) [\*2] his motion to suppress his statement given to police. Following our review, we affirm the judgment of the trial court.

## **OPINION**

### **FACTS**

The defendant's conviction is a result of a routine traffic stop in Shelby County, Tennessee. The defendant, who gave police consent to search his van, was arrested after 18.5 pounds of cocaine was located in a hidden compartment of his vehicle. After his arrest, the defendant gave a detailed statement to police officers acknowledging that the cocaine was his and that he was transporting it from Las Vegas, Nevada, to Myrtle Beach, South Carolina, to sell. On February 6, 2003, he was indicted by the Shelby County Grand Jury for possession with intent to sell over 300 grams of cocaine (Count 1) and possession with intent to deliver over 300 grams of cocaine (Count 2). On June 23, 2004, the defendant filed motions to suppress both the cocaine found in his vehicle and his statement to the police. Subsequently, the trial court held a suppression hearing and issued findings and conclusions from the bench, denying the defendant's motions. Following a jury trial, where the defendant was convicted of both counts, the trial court merged Counts [\*3] 1 and 2 and sentenced the defendant to twenty years.

On appeal, the defendant argues that he did not have the mental capacity to consent to the search of his vehicle or give a knowing and voluntary confession.

### **Suppression Hearing**

Officer Chris Jones testified that on November 6, 2002, he and Officer Marco Yzaguirre, both assigned to the West Tennessee Drug Task Force's Interstate Interdiction Unit, n1 stopped the defendant's van after he "clocked" the defendant going 66 miles per hour in a 55 mile per hour zone on Interstate 240 with a calibrated stationary radar unit. n2 Officer Jones's in-car video camera recorded the entire stop. As he approached the driver's side window of the van, Jones "smelled the odor of burnt marijuana coming from the interior of the vehicle." The officer asked the defendant to exit the van, whereupon the defendant acknowledged traveling at 65 miles an hour. Accompanying the defendant was a young female passenger, Ms. Ortiz, n3 whom he claimed was his cousin. n4 The defendant told Jones that he was traveling from Las Vegas, Nevada, to South Carolina for his uncle's funeral, but he did not know which city he was going to.

n1 Officer Jones was employed by the Shelby County Sheriff's Department, and Officer Yzaguirre worked for the Memphis Police Department.

[\*4]

n2 Jones testified that he was certified to use the radar unit and explained that he "checked the internal calibration on the unit itself" prior to starting his shift that same morning.

n3 Ms. Ortiz's first name is not clear from the record. She was variously addressed as "Elisha," "Angelica," "Angelina," "Angela," and "Angelique" by different witnesses. For ease of writing this opinion, we will refer to her as Ms. Ortiz.

n4 Ms. Ortiz's exact relationship to the defendant is also unclear from the record. She was ultimately best described as "the unrelated-to-[the defendant]-by-blood-or-birth, ride-along friend." Ms. Ortiz was never charged, nor did she testify at the suppression hearing or trial.

Jones, after placing the defendant in the backseat of his police car, approached the passenger side of the van to talk to Ms. Ortiz, where he again smelled "burnt marijuana." Ms. Ortiz told the officer that the defendant was her brother and that the smell he detected "may have been a cigarette burning." While Jones was talking to Ms. Ortiz, Officer Yzaguirre asked the defendant for consent [\*5] to search the van. The officers had also contacted a canine officer "to bring his trained narcotic canine to the scene." Prior to searching the van, Jones discussed the marijuana smell with the defendant who acknowledged having marijuana in the car. Jones immediately advised the defendant of his Miranda rights and the defendant said there was a "joint" in the van and offered to show the officers its location. After the canine unit arrived, the van was searched and Jones found "hidden in the floor of the vehicle, approximately, 11 bundles of suspected cocaine. It did field test positive for cocaine. And the gross total weight was 18.5 pounds." The cocaine was packaged in "gray duct tape." There was also "approximately [] 4 grams of marijuana in a sock, in [the defendant's] clothing, in his luggage."

Officer Marco Yzaguirre testified that while the defendant was seated in the backseat of the police car, the officer asked for and obtained the defendant's written consent to search the van. Yzaguirre said he explained to the defendant that he did not have to give consent to search and that this was a voluntary search.

Sergeant Michael McCord, a Memphis police officer assigned [\*6] to the West Tennessee Drug Task Force, testified his canine partner, Jax, is certified and trained to detect various drugs, including cocaine. Jax makes an "aggressive indication" when he comes into contact with the smell of illegal drugs. McCord said when Jax encountered the defendant's van, "he had an aggressive bark, almost, . . . all the way around the vehicle. And he actually indicated on the, . . . both driver and passenger side rocker panels. He actually went underneath the vehicle and tried to bite at the floor of the vehicle." After Jax indicated the presence of drugs, McCord assisted Jones and Yzaguirre in searching the van where they found the cocaine hidden "in the floor of the vehicle" in an "after-market compartment" that was built into the van.

David McGriff, a supervisor with the West Tennessee Drug Task Force, interviewed the defendant following his arrest. After being readvised of his Miranda rights, the defendant gave a recorded statement to McGriff wherein he acknowledged placing more than seven kilos of cocaine wrapped in plastic wrap underneath the floor panel of his van to transport it from Las Vegas, Nevada, to Myrtle Beach, South Carolina. The defendant [\*7] said he was to receive "in the thousands of dollars" for transporting the cocaine. The defendant also told McGriff that his passenger, Ms. Ortiz, had no knowledge of the cocaine being in the van.

At the conclusion of the suppression hearing, the trial court issued oral findings from the bench. Based on the officer's smelling "burnt marijuana," the defendant's uncoerced consent, and the drug dog indicating drugs were present, the court found probable cause existed to search the defendant's van and denied the defendant's motion to suppress the cocaine. In addition, finding the defendant was advised of his rights and chose to make a statement to police "freely and voluntarily," the trial court denied the defendant's motion to suppress his statement.

## **Trial**

Officers Jones, Yzaguirre, McCord, and McGriff testified again at the trial. Each basically gave the same testimony they offered at the suppression hearing. In addition, Tara Barker, a special agent forensic scientist with the Tennessee Bureau of Investigation Crime Laboratory, testified that she tested a sample of the substance taken from the defendant's van and said it was "found to be cocaine, Schedule II."

The defendant [\*8] did not testify at either the suppression hearing or at trial.

## ANALYSIS

### I. Defendant's Competency

On appeal, the defendant's sole argument is that "under the totality of circumstances, both [his] consent to search and confession were involuntary" because "circumstances combined to overwhelm [the defendant's] will to resist." Specifically, the defendant maintains that "his consent to search and statement of admission can not be deemed knowing and voluntary without a meaningful evaluation of his mental competency and/or mental illness." The State argues the defendant waived this issue for appeal because he failed, pursuant to Tennessee Rule of Appellate Procedure 36(a), to take any action to prevent the harmful effect of the alleged error by both failing to raise this issue before the trial court by asking for a competency hearing or in his motion for a new trial. We agree with the State.

The record on appeal includes transcripts of all the defendant's pretrial proceedings. These transcripts show an articulate but uncooperative defendant who insisted upon representing himself despite the trial court's numerous advisements against doing so. In response to the trial [\*9] court's questions to determine if the defendant could in fact represent himself, the defendant either did not answer or said that "[he] would be happy to assist this Court in any way possible if he could just see [his] certificate of claim." In addition, the defendant made the following claims and requests: his name was not Michael Ortiz; n5 he was not a "Person" who was subject to the court's jurisdiction; the court should "dismiss this case for lack of evidence and failure to state a claim and want of jurisdiction;" he would accept a lawyer only if the lawyer would show him his license and "sign a contract to represent [him] zealously and rescind all contracts . . . with the State;" that the "flags [in the courtroom] get taken down immediately and have the United States peace flag brought in here with no yellow fringe around it;" and for the "prosecutor to provide serial placement number of their bar card." Early on in the proceedings, as a precaution, the trial court appointed a public defender to "sit as armchair counsel to assist" the defendant.

n5 When asked by the court what his name was, the defendant simply answered "No, it's not."

[\*10]

In November 2003, as a result of his actions and statements to the trial court during the pretrial proceedings, the defendant underwent a court-ordered mental evaluation at Memphis Mental Health Institute ("M.M.H.I.") to determine his competency to stand trial. n6 In a letter to the trial court, n7 M.M.H.I. noted that "it is the opinion of the staff that there are no known impediments that would preclude [the defendant] from adequately defending himself in a court of law" and, furthermore, the staff's "impression is [the defendant] is intentionally attempting to foil his case from progressing through the legal system by being uncooperative. His behaviors seems to be driven by secondary motives rather than mental illness."

n6 The defendant was initially evaluated at Midtown Mental Health Center. The forensic director who evaluated him informed the trial court that the defendant's "ability to confer with counsel and participate in his defense was questionable." He was then transferred to M.M.H.I. for further evaluation.

n7 Although the appellate record contains the letters to the trial court from both Midtown Mental Health Center and M.M.H.I., the letters are not marked as exhibits. However, the trial court discussed these mental

evaluations in its July 8, 2004, findings of facts and conclusions of law. Therefore, this court determines that the letters, both of which are contained in a sealed envelope, are part of the appellate record. See *State v. Bobadilla*, 181 S.W.3d 641, 2005 Tenn. LEXIS 1043, 2005 WL 3193823, at \*3 (Tenn. 2005).

[\*11]

On February 20, 2004, the defendant acknowledged to the trial court that he did "need counsel" and did not want to represent himself. The trial court immediately appointed the public defender to represent the defendant. In addition, on July 8, 2004, the trial court entered written findings of facts and conclusions of law detailing the events that led to the court's appointing the public defender's office to represent the defendant at his suppression hearing and trial:

This cause came on to be heard upon the returning of an indictment charging the defendant with the Unlawful Possession of a Controlled Substance with the intent to Sell or Deliver on February 6, 2003. Upon arraignment, February 13, 2003, the defendant refused to answer the Court's questions about his ability to employ counsel. The defendant indicated he wanted to represent himself, however as the Court attempted to question the defendant about his understanding of the law regarding self representation he refused to answer the questions in a proper manner. Even though the defendant refused to answer questions he indicated that he wanted to represent himself and the Court agreed to allow him to represent himself at [\*12] trial. On February 27, 2003, the Court designated the Public Defender's Office to assist the defendant in trial preparation. The defendant resisted any help. The case was set for trial for June 2003. The case involved a video taped arrest and search. The defendant was brought into court and allowed to watch the video as part of discovery. As a precaution the Court entered an order to have the defendant's competency determined. After examination the Doctors recommended further evaluations based on the defendant's actions. After a 30 day evaluation the Doctors concluded that the defendant was competent and that his actions and lack of cooperation were calculated and they recommended that his proceedings proceed. The case had to be reset for several months during this process and eventually in November, 2003, the matter was set for trial May 3, 2004. The Court had continually brought the defendant into Court to discuss the pitfalls of representing himself and to try to discourage such action. However, on each occasion the defendant continued with a litany of statements which had been prepared by the defendant and were read into the record by the defendant. The statements were non responsive [\*13] and the demands were immaterial and improper as regards this criminal proceeding. The defendant continued on each occasion with the same presentation and continuously filed pro se documents which had no bearing on this proceeding. On February 20, 2004, the defendant in one of his presentations advised the Court that he did not want to represent himself and that he did want an attorney, although as usual he had certain demands on that attorney which the Court would not grant. However, the Court at that point determined that the defendant was in need of legal assistance and that from that date forward the Public Defender would be handling the case and the defendant would no longer be allowed to represent himself. Since that date motions have been filed including a Motion to Suppress evidence which is set for a hearing in September and a new trial date has been set for November 1, 2004. The defendant continues to refuse to cooperate with counsel and refuses to recognize counsel without counsel complying with defendant's demands. The requirements are unrealistic and not required by law and will not be ordered by this Court. Therefore the Public Defender is proceeding without the help or [\*14] cooperation of the defendant.

"The right to assistance of counsel in preparation and presentation of a defense to a criminal charge is grounded in both the Tennessee and the United States Constitutions.' (Neither of which the defendant recognizes as authority over him) *State v. Northington*, [667] S.W.2d 57, 60 (Tenn. 1984). An accused also possesses a right to self-representation, see *State v. Gillespie*, 898 S.W.2d 738, 740 (Tenn. Crim. App. 1994),

but a 'strong presumption against waiver of the constitutional right to counsel' exists, *Northington*, 667 S.W.2d at 60. An accused's request for self-representation in a criminal proceeding must be timely, as well as clear and unequivocal. See *State v. Herrod*, 754 S.W.2d 627, 629-30 (Tenn. Crim. App. 1988). The defendant must know why 'he should have counsel and what he risks by refusing appointed counsel' and thus 'clearly understand the hazards of representing himself.' Further, 'the record must show that the defendant made his decision to waive counsel knowing the disadvantages and dangers of representing himself.' *State v. Goodwin*, 909 S.W.2d 35, 40-41 (Tenn. Crim. App. 1995). [\*15] *State v. Ruff*, 1999 Tenn. Crim. App. LEXIS 452, C.C.A. No. 02C01-9801-CR-00006 [ , 1999 WL 281072 (Tenn. Crim. App.) May 7, 1999).

Included in the Ruff opinion is an Appendix citing *United States v. McDowell*, 814 F.2d 245, 251-52 (6th Cir. 1987) (quoting Guidelines for District Judges from (Bench Book for United States District Judges 1.02-2 to 5 (3d ed. 1986)). This court went over those exact questions and got non responsive answers from the defendant. As a result of questioning and listening to the defendant's presentations[,] this Court is not convinced that the defendant has clearly and unequivocally stated in writing or otherwise that he desires to represent himself or that he has the ability to do so. Further in light of recent cases by the Court of Criminal Appeals regarding pro se litigants who act up in Court and are removed from the proceedings and left unrepresented if elbow counsel has not been appointed, this Court concluded early on that the defendant needed elbow counsel. The defendant has stated that he refuses to recognize the Public Defender as his counsel and has refused to cooperate with his defense, as a result the Court is not convinced that the [\*16] defendant would act properly in the Trial of his cause and as a result could be removed from the proceedings. Although the defendant has not shown disrespect for nor been disruptive in the courtroom his actions although civil could be disruptive to trial proceedings. This Court is satisfied that the Public Defender will be prepared to handle the Motion to Suppress and if necessary the Trial of this cause with or without the assistance of the defendant. This Court fully recognizes the defendant's right to think as he pleases with regard to the United States and Tennessee Constitution and the authority of this Court to have jurisdiction over him, however the Court has taken an oath to uphold those Constitutions and included therein are the rights to representation or self representation.

This Court is not satisfied that the defendant has made a clear and unequivocal waiver of his right to representation and therefore the Court will Order that the defendant will not be allowed to represent himself and the case will proceed with appointed counsel.

On appeal, the defendant argues that "the M.M.H.I. report is frighteningly inept and a real abuse of State funds meant to assist the court [\*17] in making a determination of a defendant's competency." The defendant, however, neither asked for a competency hearing nor raised any complaint about the M.M.H.I. mental evaluation in his motion for a new trial. Accordingly, we agree with the State that the defendant has waived this issue. See *State v. Estes*, 655 S.W.2d 179, 182 (Tenn. Crim. App. 1983) (holding that although a court-ordered mental evaluation of the defendant was conducted, trial counsel's failure to seek a competency hearing "to insure that the matter of competency was settled before trial amounted to a waiver of that issue" under Tennessee Rule of Appellate Procedure 36(a)); Tenn. R. App. P. 3(e) (providing that [HN1] "no issue . . . shall be predicated upon error in the admission or exclusion of evidence, jury instructions granted or refused, misconduct of jurors, parties or counsel, or other action committed or occurring during the trial of the case, or other ground upon which a new trial is sought, unless the same was specifically stated in a motion for a new trial").

In addition, even if we had not found this issue to be waived, there is no proof in the record that the M.M.H.I. report is inaccurate. [\*18] The trial court relied on the M.M.H.I report to conclude that the defendant was competent to stand trial. The defendant is now asking us to find the report insufficient on its face. There is no basis in the record for us to make such findings, and we decline to do so. As we explained in *State v. Green*, 2000 Tenn. Crim. App. LEXIS

954, No. E1999-02204-CCA-R3-CD, 2000 WL 1839130, at \*3 (Tenn. Crim. App. Dec. 14, 2000), perm. to appeal denied (Tenn. May 21, 2001), "witness credibility, the weight and value of the evidence, and factual disputes are entrusted to the finder of fact. *State v. Cabbage*, 571 S.W.2d 832, 835 (Tenn. 1978); *Liakas v. State*, 199 Tenn. 298, 305, 286 S.W.2d 856, 859 (1956); *Farmer v. State*, 574 S.W.2d 49, 51 (Tenn. Crim. App. 1978). Simply stated, the court is not an appellate surrogate for the trier of fact."

## **II. Motions to Suppress**

As discussed above, the defendant's sole argument on appeal is that he lacked the mental capacity to consent to the search of his van and give a knowing and voluntary confession. As we have determined that this issue is without merit, we conclude that the trial court properly [\*19] denied both motions.

## **CONCLUSION**

Based on the forgoing authorities and reasoning, we affirm the judgment of the trial court.

**STATE OF TENNESSEE v. ZANE ALLEN DAVIS, JR.****No. M2000-00737-CCA-R3-CD****COURT OF CRIMINAL APPEALS OF TENNESSEE, MIDDLE SECTION, AT  
NASHVILLE***2000 Tenn. Crim. App. LEXIS 986***July 19, 2000, Assigned on Briefs  
December 28, 2000, Decided**

**PRIOR HISTORY:** [\*1] Direct Appeal from the Circuit Court for Williamson County No. 11-108-598 Timothy L. Easter, Judge.

**DISPOSITION:** Judgment of the Circuit Court Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed the judgment of the Circuit Court for Williamson County (Tennessee) that convicted him of driving with blood alcohol of .10 percent or more.

**OVERVIEW:** An officer observed defendant drag racing and subjected him to field sobriety tests, which he failed. A blood test indicated his blood alcohol level was .23 percent. Defendant was convicted for driving under the influence and appealed. Defendant argued that the trial court erred in the following ways, it ruled that the State was not required to provide him with documentation pertaining to the reliability of his blood alcohol test, it quashed his subpoena duces tecum requesting the State's expert to bring documentation previously ruled undiscoverable under Tenn. R. Crim. P. 16 to trial, it allowed the State's expert witness to testify without laying the proper foundation, and it limited his proof regarding the arresting officer's motive. The court found that defendant failed to make offers of proof regarding the reliability of the blood test or his quashed subpoena. Testimony regarding the blood test was proper, as the tests were routinely used to determine whether a person was driving while intoxicated and were reliable. The motive of the arresting officer was not relevant where the officer showed that sufficient probable cause existed to believe that a crime had been committed.

**OUTCOME:** Judgment affirmed; defendant failed to make offers of proof regarding the reliability of the blood testing equipment and his quashed subpoena duces tecum, testimony regarding the blood alcohol test was proper, and the motive of the arresting officer was irrelevant where sufficient probable cause existed to believe that a crime had been committed.

**CORE TERMS:** blood alcohol, driving, subpoena, subpoena duces tecum, driver, blood, testing, reliability, motive,

scientific evidence, lab, intoxicated, laboratory, scientific, admissibility, documentation, non-discoverable, discovery, analyzed, trier of fact, motion to quash, accuracy, license, arrest, tested, expert witness, arresting, entitled to relief, blood sample, trustworthiness

##### ***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Jencks Act***

[HN1] See Tenn. R. Crim. P. 16(a)(1)(C).

##### ***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > Reports of Examinations & Tests***

[HN2] See Tenn. R. Crim. P. 16(a)(1)(D).

##### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

###### ***Evidence > Scientific Evidence > Blood Alcohol***

[HN3] Blood alcohol tests are routinely used in Tennessee to determine whether a person was intoxicated at a certain time. And, Tennessee state law provides for admissibility of such tests in cases involving driving under the influence of an intoxicant. *Tenn. Code Ann. § 55-10-407(a)* (1997). However, such tests are admissible only when it can be proven that the sample was taken by a properly trained person and that a proper chain of custody was established for the period of time between when the blood was drawn and the time it was analyzed. *Tenn. Code Ann. § 55-10-410* (1997). Furthermore, it must be shown the testing device is scientifically acceptable and accurate for the purpose that it is being employed.

##### ***Evidence > Procedural Considerations > Objections & Offers of Proof > Objections***

###### ***Evidence > Scientific Evidence > Blood & Bodily Fluids***

###### ***Evidence > Scientific Evidence > Daubert Standard***

[HN4] It is the quality, objectiveness, which makes scientific evidence highly consequential, as science cannot be readily impugned, and it can be similarly fruitless to argue against results acquired from a machine. In the interests of justice, a court must do everything reasonably within its power to ensure that scientific evidence is accurate so as not to mislead the finders of fact. When discovered, inaccuracies in particular test results go only to the weight of the evidence, not its admissibility, with the weight to be given the evidence a question of fact for the trier of fact in each case.

##### ***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview***

###### ***Evidence > Scientific Evidence > General Overview***

[HN5] Accuracy is important when determining admissibility of any scientific test results and, therefore, it is logical to consider information concerning the accuracy of the test instruments as important for defense purposes.

##### ***Criminal Law & Procedure > Discovery & Inspection > Subpoenas***

[HN6] See Tenn. R. Crim. P. 17(c).

##### ***Criminal Law & Procedure > Discovery & Inspection > Subpoenas***

[HN7] The trial court is permitted to quash or modify a subpoena duces tecum if compliance would be unreasonable or oppressive.

***Evidence > Relevance > Relevant Evidence***

[HN8] Generally, the admissibility of evidence is governed by standards of relevancy and reliability. Tenn. R. Evid. 402.

***Evidence > Scientific Evidence > General Overview***

[HN9] The standards governing admissibility of expert scientific proof are as follows: under the recent rules, a trial court must determine whether the evidence will substantially assist the trier of fact to determine a fact in issue and whether the facts and data underlying the evidence indicate a lack of trustworthiness. The rules together necessarily require a determination as to the scientific validity or reliability of the evidence. Simply put, unless the scientific evidence is valid, it will not substantially assist the trier of fact, nor will its underlying facts and data appear to be trustworthy, but there is no requirement in the rule that it be generally accepted.

***Evidence > Scientific Evidence > Daubert Standard******Evidence > Testimony > Experts > Kelly-Frye Process***

[HN10] The non-exclusive list of factors to determine reliability of scientific evidence are useful in applying Tenn. R. Evid. 702, 703. A trial court may consider in determining reliability: (1) whether scientific evidence has been tested and the methodology with which it has been tested; (2) whether the evidence has been subjected to peer review or publication; (3) whether a potential rate of error is known; (4) whether, as formerly required by Frye, the evidence is generally accepted in the scientific community; and (5) whether the expert's research in the field has been conducted independent of litigation. Although the trial court must analyze the science and not merely the qualifications, demeanor or conclusions of experts, the court need not weigh or choose between two legitimate but conflicting scientific views. The court instead must assure itself that the opinions are based on relevant scientific methods, processes, and data, and not upon an expert's mere speculation.

***Evidence > Scientific Evidence > General Overview******Evidence > Testimony > Experts > Admissibility***

[HN11] The admissibility of expert and scientific evidence in particular is also governed by Tenn. R. Evid. 702, 703.

***Evidence > Testimony > Experts > General Overview***

[HN12] See Tenn. R. Evid. 702.

***Evidence > Testimony > Experts > General Overview***

[HN13] See Tenn. R. Evid. 703.

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > Evidence******Evidence > Scientific Evidence > Daubert Standard******Evidence > Testimony > Experts > Admissibility***

[HN14] The decision to admit scientific evidence is within the discretion of the trial court and will not be disturbed absent an abuse of discretion. The trial court rules on questions regarding the admissibility, qualifications, relevancy and competency of expert testimony.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Elements******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence******Evidence > Scientific Evidence > Daubert Standard***

[HN15] A trial court must first determine (1) whether the evidence will substantially assist the trier of fact to determine a fact in issue and (2) whether the facts and data underlying the evidence indicate a lack of trustworthiness.

*Constitutional Law > Bill of Rights > Fundamental Rights > Search & Seizure > Probable Cause  
Criminal Law & Procedure > Arrests > Probable Cause  
Criminal Law & Procedure > Search & Seizure > General Overview*

[HN16] The motive of an arresting officer is not relevant where the officer can show that sufficient probable cause existed to believe that a crime had been committed. Put another way, the underlying intent or motivation of officers involved in an arrest or seizure is immaterial where the activity undertaken is precisely the same as would have occurred had the intent or motivation been entirely absent from the case.

**COUNSEL:** Lee Ofman, Franklin, Tennessee, for the appellant, Zane Allen Davis, Jr.

Paul G. Summers, Attorney General and Reporter; Marvin S. Blair, Jr., Assistant Attorney General; Ronald L. Davis, District Attorney General; Lee E. Dryer, Assistant District Attorney.

**JUDGES:** THOMAS T. WOODALL, J., delivered the opinion of the court, in which DAVID G. HAYES, J., and NORMA MCGEE OGLE, J., joined.

**OPINION BY:** THOMAS T. WOODALL

**OPINION:** Defendant Zane Allen Davis was found guilty by a Williamson County jury of violating *Tenn. Code Ann. § 55-10-401(a)(2)*, driving a vehicle while the alcohol concentration in the driver's blood or breath was ten-hundredths of one percent (0.10%) or more, a Class A misdemeanor. The trial court sentenced Defendant to eleven months and twenty-nine days, with the sentence suspended after Defendant served thirty days in the County Jail, and a \$ 1250 fine. Defendant raises the following issues in his appeal: (1) whether the trial court erred when it ruled that the State was not required [\*2] under Tenn. R. Crim. P. 16 to provide Defendant with documentation pertaining to the reliability of his blood alcohol test results; (2) whether the trial court erred when it quashed Defendant's subpoena duces tecum requesting the State's expert to bring documentation, previously ruled undiscoverable under Tenn. R. Crim. P. 16, to trial; (3) whether the trial court erred by allowing the State's expert witness to testify without first laying the proper foundation; and (4) whether the trial court erred when it limited Defendant's proof at trial regarding the arresting officer's motive. After a review of the record, we affirm the judgment of the trial court.

On May 11, 1998, the Williamson County Grand Jury indicted Defendant Zane Allen Davis for driving under the influence ("DUI") of an intoxicant, driving while the alcohol concentration in Defendant's blood or breath was ten-hundredths of one percent (0.10%) or more, driving on a revoked license, second-offense DUI, and second-offense unlawfully driving on a revoked license as a result of prior offense. On November 18, 1999, a Williamson County jury found Defendant guilty of driving with blood alcohol of ten-hundredths of one percent [\*3] or more, a Class A misdemeanor, and not guilty of driving on a revoked license; the remaining charges were dismissed.

In his motion for a new trial, Defendant claimed that the State suppressed evidence material to the preparation of his defense. Specifically, this evidence consisted of data concerning the reliability of the instrument used to acquire the blood alcohol test results used in evidence against Defendant at trial. This information was requested in a discovery motion and through subpoena duces tecum which were denied and quashed, respectively. After a sentencing hearing, the trial court sentenced Defendant to eleven months and twenty-nine days, with the sentence to be suspended after Defendant serves thirty days in the County Jail. In addition, the trial court revoked Defendant's license for a period of one year (with application for restricted license available) and required that Defendant attend Alcohol Safety School. Defendant raises the following issues in his appeal: (1) whether the trial court erred when it ruled that the State was not required under Tenn. R. Crim. P. 16 to provide Defendant with documentation pertaining to the reliability of his blood alcohol test; [\*4] (2) whether the trial court erred when it quashed Defendant's subpoena duces tecum requesting the State's expert to bring documentation previously ruled undiscoverable under Rule 16 to trial; (3) whether the trial court erred by allowing the State's expert witness to testify without first laying the proper foundation; and (4) whether the trial court erred when it limited Defendant's proof regarding the arresting officer's motive. After a review of the record, we

affirm the judgment of the trial court.

## I. FACTS

Adrian Breedlove, an officer with the Brentwood Police Department, testified at trial that he was on duty the evening of February 17, 1998, when he observed two trucks traveling in excess of the posted speed limit. Using radar, Breedlove clocked the speed of the vehicles at fifty-two miles per hour, twenty-two miles per hour over the posted maximum speed. Breedlove testified that he pursued the vehicles, using his lights and siren, but the drivers of both trucks ignored him. Ultimately, Breedlove caught up with them when they stopped in the parking lot of O'Charley's restaurant.

Officer Breedlove testified that the drivers of the trucks were identified as Zane Allen [\*5] Davis, the Defendant, and a friend of Defendant's named Thorpe Weber. When Breedlove first confronted the two men, both drivers "smelled like alcohol." Consequently, Breedlove questioned them both and administered standard field sobriety tests ("FST") to determine whether they were fit to drive. Weber passed the sobriety tests and was released with a citation for speeding. Defendant, on the other hand, failed both tests given him: the one-leg-stand and the walk-and-turn test. Breedlove further testified that Defendant also had bloodshot, watery eyes and that his speech was slurred. Moreover, Defendant was unsteady on his feet and admitted that he had been drinking earlier. For the foregoing reasons, Breedlove arrested Defendant and explained the Implied Consent Law to him. When Defendant agreed to submit to a blood alcohol test, Breedlove accompanied him to the Williamson Medical Center for testing. Breedlove received the blood sample from the hospital technician, sealed and initialed the tube, then placed it into a tamper-proof Tennessee Bureau of Investigation evidence box for storage at the police department until it could be taken to the crime laboratory for analysis.

In addition [\*6] to his duties as a police officer, Officer Breedlove testified that he is a certified DUI Instructor. As such, Breedlove is qualified to train other officers in methods of detecting and apprehending intoxicated drivers. Breedlove explained that the standardized FSTs given Tennessee drivers are recognized and administered nationally. To fail a test, the driver must exhibit two or more "clues" indicating intoxication while he being tested. For instance, eight "clues" exist for the walk-and-turn test. These include losing one's balance, starting too early, raising one's arms, stopping without reason, and not following the officer's directions. The National Highway Transportation & Safety Administration has determined that a suspect who evinces two or more clues for either FST can be considered too intoxicated to lawfully drive. Breedlove testified that Defendant exhibited more than two "clues" for both tests: during the one-leg stand test Defendant swayed and repeatedly dropped his foot; during the walk-and-turn test, Defendant turned improperly, raised his arms, and then finally gave up, stating that he was unable to complete the exercise. As a result of Defendant's performance on the [\*7] FSTs and Breedlove's experience, he concluded that Defendant was too intoxicated to drive.

John Harrison, a forensic toxicologist working in the Tennessee Bureau of Investigation crime laboratory, testified that he analyzed Defendant's blood. Harrison testified that he has worked as a toxicologist with the TBI for twelve years and that he has analyzed in excess of 40,000 samples in that time period. Harrison earned a B.S. degree in medical technology and also worked in a hospital laboratory for twelve years prior to his job with the TBI. The TBI crime laboratory which tested Defendant's sample received national accreditation from the American Society of Crime Lab Directors in 1994. Harrison testified that the lab must be periodically scrutinized by forensic specialists across the nation concerning numerous aspects of its work including procedures, security, personnel qualifications, and quality control in order for the lab to maintain its accreditation status. In addition, the lab is required to use standards to periodically check proficiency. Instruments are calibrated and equipment is checked on a daily basis.

Harrison testified at length regarding his analysis of Defendant's blood--the [\*8] various steps he took and the theories underlying many of the lab's testing procedures. Harrison described how proficiency standards are run and gave a cursory explanation of gas chromatography, which is the scientific method used by the TBI for separating mixtures during blood testing procedures. Harrison testified that, prior to all tests, he notes the condition of the sample when

received and runs a series of standards through the instrument to insure proper functioning and accuracy of the instrument. Harrison said that standards are typically run after every ten samples and also upon completion of an analysis. Regarding Defendant's blood sample, Harrison testified that it was received in good condition and that the standards which were run before and after Defendant's blood analysis showed that the instrument was operating properly. Harrison further testified as to the crime lab's chain of custody procedures: upon receipt of a sample (usually via U.S. Postal Service), responsibility for its care belongs to the evidence technician who assigns the sample a number and gives it to Harrison. Harrison testified that he then analyzed Defendant's blood sample and prepared a report of the [\*9] test results: Defendant's blood contained 0.23 gram percent ethyl alcohol.

Regarding the numerous requests for documents which Harrison received from Defendant's counsel, Harrison testified that he did not have the time to give Defendant's case the "special attention" that counsel wanted from him. Harrison explained that since he frequently works on thousands of cases at a time, he was waiting for Defendant's counsel to "go through channels" and obtain a court order for the records he wanted. Harrison testified that if and when he received a court order, he would then comply with counsel's requests. Otherwise, he claimed that he could not accommodate him because counsel's requests were too numerous. Harrison testified that the Defendant received copies of the instrument calibration record for the actual day of testing, but he also wanted information for the six-month period of time starting three months prior to the date of Defendant's test and extending three months afterward. Harrison admitted that there was no way for Defendant to "check Harrison's work" without the documents he requested. Harrison also testified that it is TBI laboratory policy to keep samples for sixty days [\*10] after testing so that defendants may request samples for independent analysis. Harrison said that he received no such request from Defendant.

## II. FAILURE TO PROVIDE DISCOVERY MATERIALS

Defendant first contends that the trial court erred when it did not compel the State to comply with Defendant's discovery request and provide him with numerous documents concerning Defendant's blood alcohol test. Defendant argues that Tenn. R. Crim. P. 16 requires disclosure of this type of information and that the State's failure to comply constitutes a discovery violation.

In a letter to the State, Defendant requested the following information which he believed was in the possession of the TBI crime laboratory: chain of custody documents; raw data from blood testing, including handwritten notes; line graphs and tabulated data printed by testing equipment; sample runs and associated calibration runs of testing equipment; TBI standing operating procedure for blood alcohol samples, and methods approved by TBI for such testing; the techniques and methods promulgated by the TBI to ascertain the qualifications and competence of the individuals to conduct analysis, to operate and to maintain blood [\*11] alcohol testing instruments; and any other document generated as a result of the testing of Defendant's blood sample. Defendant already possessed the TBI crime lab test results indicating that Defendant's blood alcohol level was 0.23%.

When the State replied that the defense was not entitled to additional information under Tenn. R. Crim. P. 16, Defendant filed a motion to compel. After hearing argument and reviewing briefs from both sides on the matter, the trial court denied Defendant's motion on the ground that the information requested was not discoverable pursuant to Rule 16 and held that the reports and results which had already been given Defendant were all he was entitled to receive.

With some limitations, Tennessee Rule of Criminal Procedure 16 requires the State to disclose certain evidence to a defendant prior to trial. [HN1] Section 16(a)(1)(C) provides:

Upon request of the defendant, the state shall permit the defendant to inspect and copy or photograph books, papers, documents, photographs, tangible objects, buildings or places, or copies or portions thereof, which are within the [\*12] possession, custody or control of the state, and which are material to the preparation of the Defendant's defense or are intended for use by the state as evidence in chief at the trial, or were obtained from or belong to the defendant.

Tenn. R. Crim. P. 16(a)(1)(C). Furthermore, [HN2] section 16(a)(1)(D) states the following:

Upon request of a defendant the state shall permit the defendant to inspect and copy or photograph any results or reports of physical or mental examinations, and of scientific tests or experiments, or copies thereof, which are within the possession, custody or control of the state ... and which are material to the preparation of the defense or are intended for use by the state as evidence in chief at the trial.

Tenn. R. Crim. P. 16(a)(1)(D).

Before we address Defendant's discovery issue, we note that [HN3] blood alcohol tests such as that performed on Defendant are routinely used in Tennessee to determine whether a person was intoxicated at a certain time. See Neil P. Cohen, [\*13] Tennessee Law of Evidence § 401.25 (1995). And, Tennessee state law provides for admissibility of such tests in cases involving driving under the influence of an intoxicant. *Tenn. Code Ann. § 55-10-407(a)* (1997). However, such tests are admissible only when it can be proven that the sample was taken by a properly trained person and that a proper chain of custody was established for the period of time between when the blood was drawn and the time it was analyzed. See *Tenn. Code Ann. § 55-10-410* (1997). Furthermore, the Tennessee Supreme Court has held that it must be shown the testing device is scientifically acceptable and accurate for the purpose that it is being employed. *State v. Johnson*, 717 S.W.2d 298, 303 (Tenn. Crim. App. 1986) (citing *Crawley v. State*, 219 Tenn. 707, 413 S.W.2d 370, 373 (Tenn. 1967)); *Pruitt v. State*, 216 Tenn. 686, 393 S.W.2d 747, 751 (Tenn. 1965) (overruled on other grounds). Indeed, the purpose of the testing is "to provide *objective* scientific data to eliminate guesswork and speculation and to supplement the fallible observations of [\*14] humans." *State v. Sensing*, 843 S.W.2d 412, 417 (Tenn. 1992) (citing *Peterson v. State*, 261 N.W.2d 405, 409 (S.D. 1977) (emphasis added)). [HN4] It is this quality, objectiveness, which makes scientific evidence highly consequential--science cannot be readily impugned, and it can be similarly fruitless to argue against results acquired from a machine. In the interests of justice, a court must do everything reasonably within its power to ensure that scientific evidence is accurate so as not to mislead the finders of fact. When discovered, inaccuracies in particular test results go only to the weight of the evidence, not its admissibility, with the weight to be given the evidence a question of fact for the trier of fact in each case. *State v. Johnson*, 717 S.W.2d 298, 305 (Tenn. Crim. App. 1986).

The State argues that the trial court did not err in ruling that the State was not obligated under Tenn. R. Crim. P. 16 to provide Defendant with the documents he requested. The State further points out that Defendant did not offer any proof to establish [\*15] that the requested information was material to the preparation of his defense; defendant merely claimed that he was entitled to the requested information and that it was material.

The State's argument further relies, in part, on the Tennessee Supreme Court's ruling in *State v. Irick*, 762 S.W.2d 121 (Tenn. 1988). The defendant in *Irick* wanted copies of the expert's "rough results" pertaining to individual characteristics of hair samples analyzed as part of a scientific test admitted into evidence against him at trial. The trial court denied the defendant's request, holding that the reports and results already submitted to the defendant were all he was entitled to have. *Id. at 126*. Our supreme court affirmed the ruling of the trial court, stating that there was "no violation of [Rule 16] and the defendant received all to which he was entitled in the way of discovery." *Id.*

We agree with Defendant that [HN5] accuracy is important when determining admissibility of any scientific test results and, therefore, it is logical to consider information concerning [\*16] the accuracy of the test instruments as important for defense purposes. See *State v. Sensing*, 843 S.W.2d 412, 416 (Tenn. 1992) (Court declared that the "defense is [] free to rebut the State's evidence by calling witnesses to challenge the accuracy of the particular machine..." and "expert testimony and the records of such procedures [regarding the manner in which the instrument performs its function] are available for examination."); *State v. Davis*, 823 S.W.2d 217, 219 (Tenn. Crim. App. 1991) (evidence of experiments and examinations of the intoxilyzer which revealed substantial malfunctions was material to issue of guilt). Moreover, we observe that the State's expert candidly admitted on cross-examination that there was no way for the accuracy of his work to be checked without access to the documents Defendant requested. Nevertheless, this one concession by the State's expert does not rise to the level of proof necessary to show that the requested

documentation was discoverable.

After careful consideration, this Court is drawn to the logic of the State's argument. This is primarily because Defendant failed to make an offer of proof regarding [\*17] the materiality of the documents requested. After a thorough examination of the video tape record, we conclude that Defendant's counsel has not provided us with any information which gives us a basis to rule in his favor. Not only is the record of the hearing on Defendant's motion to compel and Defendant's brief devoid of any proof establishing that the requested information was material, the trial record is deficient in this regard as well. Namely, we do not have before us any proof concerning what Defendant's expert would specifically require in the way of pertinent facts nor what he would do with them if he had them. We similarly lack proof of what particular documents the TBI has in its possession that would be helpful and how the documents would assist Defendant's case. Neither has Defendant offered any proof such as incompetency concerning the TBI's lab personnel or historical proof of inaccuracies or unreliable results with respect to the lab's instruments or equipment. We further observe that counsel could have asked that the trial court perform an in camera examination of the requested documents. In sum, since the State did not present the information in issue as evidence [\*18] during trial and Defendant did not offer any proof as described above, we find no evidence that the requested documents were material. Defendant is not entitled to relief on this issue.

### III. MOTION TO QUASH

Defendant also contends that the trial court erred when it quashed Defendant's subpoena duces tecum which requested the State's expert to bring the documentation previously ruled non-discoverable under Tenn. R. Crim. P. 16 to trial. We disagree.

After the State denied Defendant's request for additional discovery information pursuant to Tenn. R. Crim. P. 16, Defendant filed a motion to compel on November 6, 1998. When the court denied this motion on December 28, 1998, Defendant thereafter requested five subpoenas duces tecum for service upon the State's expert witness, requiring him to bring the documents previously ruled non-discoverable under Rule 16 with him when he testified at trial. The State filed a motion to quash on November 15, 1999, which was granted in a jury-out hearing held during the trial which began on November 16, 1999.

The State argues that Defendant should not be allowed to use Rule 17 to skirt the court's denial of discovery under Rule 16. In so arguing, [\*19] the State relies on *State v. Cage, 1999 Tenn. Crim. App. LEXIS 62, No. 01 C01-9605-CC-00179, 1999 WL 30595*, Montgomery County (Tenn. Crim. App., Nashville, Jan. 26, 1999), perm. to appeal denied (Tenn. 1999). In *Cage*, the defendant filed a motion for discovery pursuant to Rule 16 requesting that the State provide the materials used by the State's DNA expert to arrive at his test conclusions. This motion and a subsequent motion to compel were both denied on the ground that the materials requested were non-discoverable "work product." Thereafter, the defendant caused to be issued a subpoena duces tecum, directing the State's expert to appear at trial with the exact same materials previously ruled non-discoverable. The trial court granted the State's motion to quash the subpoena duces tecum, declaring that the defendant "could not circumvent the discovery protections of Rule 16 by issuing a subpoena for the same materials under Rule 17." *Id.* at \*8. This Court affirmed the trial court's judgment on appeal, remarking that "the limits of Rule 16(a)(2) would be meaningless if a defendant could simply subpoena the protected materials under Rule 17(c). [\*20] " *Id.* at \*9.

Following a review of the record and the parties' briefs, we agree with the State that the trial court correctly granted the State's motion to quash Defendant's subpoenas duces tecum, but for different reasons. We do not agree with the State's contention that materials previously ruled non-discoverable under Rule 16 are never subject to a subpoena duces tecum for trial. This Court's holding in *Cage*, upon which the State heavily relies for that assertion, is distinguishable from the present case on the facts. Some information non-discoverable under Rule 16 may be legitimately acquired by subpoena duces tecum. For example, material not "within the possession, custody or control of the state" is non-discoverable under Rule 16. This, *in itself*, does not prevent a defendant from acquiring the material by subpoena duces tecum if the circumstances otherwise permit.

[HN6] Rule 17(c) of the Tennessee Rules of Criminal Procedure provides as follows:

(c) For Production of Documentary Evidence and of Objects. A subpoena may also command a person to whom it is directed to produce [\*21] the books, papers, documents, or tangible things designated therein. The court, upon motion made promptly and in any event by the time specified in the subpoena for compliance therewith, may quash or modify the subpoena if compliance would be unreasonable or oppressive. The court may condition denial of the motion upon the advancement by the party in whose behalf the subpoena is issued of the reasonable cost of producing the books, papers, documents or tangible things. The court may direct that books, papers, documents or tangible things designated in the subpoena be produced before the court at a time prior to the trial or prior to the time when they are to be offered in evidence and may upon their production permit them to be inspected by the parties and their attorneys.

As can be seen, [HN7] the trial court is permitted to quash or modify a subpoena duces tecum if compliance would be unreasonable or oppressive. The appellate record indicates that the State argued in the trial court that compliance would be unduly burdensome, i.e., "unreasonable and oppressive," in conjunction with arguing that [\*22] the documents were not discoverable and therefore not subject to being subpoenaed for trial. Defendant did not offer any proof that compliance with the subpoena was not "unreasonable or oppressive." Neither did he offer to advance the costs of producing the documents (he was not indigent). In other words, the record is inadequate to permit this Court to hold that the trial court erred by granting the motion to quash. Even if we held that it was error to quash the subpoena, there is nothing in the record to indicate that the trial court's decision was anything more than harmless error.

As in the situation involving Defendant's motion to compel discovery under Rule 16, Defendant failed to offer any proof, in an "offer of proof" or otherwise, which would allow this court to grant him the relief he seeks on appeal. Therefore, Defendant is not entitled to relief.

#### IV. ADMISSIBILITY OF EXPERT TESTIMONY

Next, Defendant contends that the trial court erred when it permitted the State's expert to testify. Specifically, Defendant argues that the State offered expert opinion evidence without laying a proper foundation as required under Tennessee Rules of Evidence 702 and 703. We disagree. [\*23]

[HN8] Generally, the admissibility of evidence is governed by standards of relevancy and reliability. *State v. Begley*, 956 S.W.2d 471, 475 (Tenn. 1997); Tenn. R. Evid. 402. Our supreme court set [HN9] the standards governing admissibility of expert scientific proof in Tennessee in *McDaniel v. CSX Transp. Inc.*, 955 S.W.2d 257 (Tenn. 1997):

In Tennessee, under the recent rules, a trial court must determine whether the evidence will substantially assist the trier of fact to determine a fact in issue and whether the facts and data underlying the evidence indicate a lack of trustworthiness. The rules together necessarily require a determination as to the scientific validity or reliability of the evidence. Simply put, unless the scientific evidence is valid, it will not substantially assist the trier of fact, nor will its underlying facts and data appear to be trustworthy, but there is no requirement in the rule that it be generally accepted.

. . . [\*24] [HN10] The non-exclusive list of factors to determine reliability are useful in applying our Rules 702 and 703. A Tennessee trial court may consider in determining reliability: (1) whether scientific evidence has been tested and the methodology with which it has been tested; (2) whether the evidence has been subjected to peer review or publication; (3) whether a potential rate of error is known; (4) whether, as formerly required by Frye, the evidence is generally accepted in the scientific community; and (5) whether the expert's research in the field has been conducted independent of litigation.

Although the trial court must analyze the science and not merely the qualifications, demeanor or conclusions of experts, the court need not weigh or choose between two legitimate but conflicting scientific views. The court instead must assure itself that the opinions are based on relevant scientific methods, processes, and data, and not upon an expert's mere speculation.

*McDaniel*, 955 S.W.2d at 265.

[HN11] The admissibility of expert [\*25] and scientific evidence in particular is also governed by Rules 702 and 703 of the Tennessee Rules of Evidence noted above. [HN12] The former provides:

If scientific, technical, or other specialized knowledge will substantially assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise.

Tenn. R. Evid. 702. And, [HN13] Tenn. R. Evid. 703 states:

The facts or data in the particular case upon which an expert bases an opinion or inference may be those perceived by or made known to the expert at or before the hearing. If of a type reasonably relied upon by experts in the particular field in forming opinions or inferences upon the subject, the facts or data need not be admissible in evidence. The court shall disallow testimony in the form of an opinion or inference if the underlying facts or data indicate lack of trustworthiness.

Tenn. R. [\*26] Evid. 703.

[HN14] The decision to admit scientific evidence is within the discretion of the trial court and will not be disturbed absent an abuse of discretion. *State v. Begley*, 956 S.W.2d 471, 475 (Tenn. 1997). The trial court rules on questions regarding the admissibility, qualifications, relevancy and competency of expert testimony. *McDaniel*, 955 S.W.2d at 263.

In Tennessee, therefore, [HN15] a trial court must first determine (1) whether the evidence will substantially assist the trier of fact to determine a fact in issue and (2) whether the facts and data underlying the evidence indicate a lack of trustworthiness. *Id.* at 265. After a review of the record, we conclude that the expert's testimony regarding Defendant's blood alcohol content was relevant and substantially assisted the jury as required under *McDaniel*. The relevance of the driver's blood alcohol in a DUI case is plain-it is an element of the offense. Consequently, reliable information [\*27] regarding Defendant's blood alcohol content is helpful to a jury.

Additionally, we find no facts or data which would indicate a lack of trustworthiness respecting the State's expert witness. The trial court determined that the State's witness was "qualified as an expert by knowledge, skill, experience, training, or education" in accordance with Rule 702 and, after a review of the record, we agree. Harrison appeared to be knowledgeable and experienced in his field of work: he has worked as a TBI toxicologist for twelve years and analyzed in excess of 40,000 blood samples. Furthermore, Harrison testified at length regarding his analysis of Defendant's blood, the steps he took and the theories underlying many of the testing procedures. In order for the TBI crime lab to maintain its accreditation, Harrison's test results are continually monitored and checked by independent agencies. In short, we concur with the trial court's view that Harrison's education and training, which includes a B.S. degree in medical technology and work in a hospital laboratory for twelve years prior to his extensive experience with the TBI, are sufficient to qualify him as an expert.

Again, we note that blood [\*28] alcohol tests are routinely used in Tennessee to determine whether a person was driving while intoxicated. These types of standardized tests have long been recognized by experts in the field as scientifically valid and reliable; thus, they fulfill the requirements outlined in *McDaniel* and meet the trustworthiness standard in Rule 703. The fact that the TBI's crime lab is accredited satisfies two "reliability" factors under *McDaniel*: (1) the scientific evidence and methodology has been tested and (2) the rate of error is acceptable as a matter of record. For the reasons stated above, we find that the trial court did not abuse its discretion. Defendant is not entitled to relief on this issue.

## V. LIMITATION OF PROOF

Defendant contends that the trial court erred when it limited Defendant's proof at trial regarding the arresting officer's motive. Defendant argues that this limitation deprived Defendant of his right to due process and a fair trial. We disagree.

Specifically, Defendant sought to question Officer Breedlove about his motive for Defendant's arrest. It was Defendant's contention that Officer Breedlove did not arrest Defendant because he was driving while intoxicated, [\*29] but because the officer wanted to seize Defendant's expensive new truck. Defendant maintained that the other driver escaped arrest because he was driving an older model. The trial court sustained the State's objection to defense counsel's line of questioning concerning motive, then informed counsel during a sidebar conference that, if he were to persist, it would open the door for the State to introduce evidence of Defendant's prior DUI conviction. Based on this ruling, defense counsel abandoned the discussion of the officer's motive.

[HN16] The motive of an arresting officer is not relevant where the officer can show that sufficient probable cause existed to believe that a crime had been committed. Put another way, the underlying intent or motivation of officers involved in an arrest or seizure is immaterial where the activity undertaken is precisely the same as would have occurred had the intent or motivation been entirely absent from the case. See *Abel v. United States*, 362 U.S. 217, 80 S. Ct. 683, 4 L. Ed. 2d 668 (1960); *State v. Vineyard*, 958 S.W.2d 730, 736 (Tenn. 1997) [\*30] (probable cause justifies a traffic stop under Article I, Section 7 of the Tennessee Constitution without regard to the subjective motivations of police officers).

Officer Breedlove's alleged subjective intent concerning Defendant's vehicle is not relevant if Breedlove had sufficient probable cause to stop Defendant. Clearly, Breedlove had the requisite probable cause when he observed Defendant and his friend driving at twenty miles per hour over the posted speed limit. Moreover, Defendant gave Breedlove probable cause for arresting him when he failed the field sobriety tests and presented the appearance of a man who was intoxicated. Thus, Defendant's argument that the trial court erred when it limited Defendant's proof at trial regarding the Officer Breedlove's motive for Defendant's arrest and subsequent seizure of his vehicle is without merit. Defendant is not entitled to relief on this issue.

## VI. CONCLUSION

For the forgoing reasons, we affirm the judgment of the trial court.  
THOMAS T. WOODALL, JUDGE

Positive

As of: Jan 31, 2007

**STATE OF TENNESSEE v. ZANE ALLEN DAVIS, JR.****No. M2000-00737-CCA-R3-CD****COURT OF CRIMINAL APPEALS OF TENNESSEE, MIDDLE SECTION, AT  
NASHVILLE***2000 Tenn. Crim. App. LEXIS 986***July 19, 2000, Assigned on Briefs  
December 28, 2000, Decided**

**PRIOR HISTORY:** [\*1] Direct Appeal from the Circuit Court for Williamson County No. 11-108-598 Timothy L. Easter, Judge.

**DISPOSITION:** Judgment of the Circuit Court Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed the judgment of the Circuit Court for Williamson County (Tennessee) that convicted him of driving with blood alcohol of .10 percent or more.

**OVERVIEW:** An officer observed defendant drag racing and subjected him to field sobriety tests, which he failed. A blood test indicated his blood alcohol level was .23 percent. Defendant was convicted for driving under the influence and appealed. Defendant argued that the trial court erred in the following ways, it ruled that the State was not required to provide him with documentation pertaining to the reliability of his blood alcohol test, it quashed his subpoena duces tecum requesting the State's expert to bring documentation previously ruled undiscoverable under Tenn. R. Crim. P. 16 to trial, it allowed the State's expert witness to testify without laying the proper foundation, and it limited his proof regarding the arresting officer's motive. The court found that defendant failed to make offers of proof regarding the reliability of the blood test or his quashed subpoena. Testimony regarding the blood test was proper, as the tests were routinely used to determine whether a person was driving while intoxicated and were reliable. The motive of the arresting officer was not relevant where the officer showed that sufficient probable cause existed to believe that a crime had been committed.

**OUTCOME:** Judgment affirmed; defendant failed to make offers of proof regarding the reliability of the blood testing equipment and his quashed subpoena duces tecum, testimony regarding the blood alcohol test was proper, and the motive of the arresting officer was irrelevant where sufficient probable cause existed to believe that a crime had been committed.

**CORE TERMS:** blood alcohol, driving, subpoena, subpoena duces tecum, driver, blood, testing, reliability, motive,

scientific evidence, lab, intoxicated, laboratory, scientific, admissibility, documentation, non-discoverable, discovery, analyzed, trier of fact, motion to quash, accuracy, license, arrest, tested, expert witness, arresting, entitled to relief, blood sample, trustworthiness

[HN16] The motive of an arresting officer is not relevant where the officer can show that sufficient probable cause existed to believe that a crime had been committed. Put another way, the underlying intent or motivation of officers involved in an arrest or seizure is immaterial where the activity undertaken is precisely the same as would have occurred had the intent or motivation been entirely absent from the case.

**COUNSEL:** Lee Ofman, Franklin, Tennessee, for the appellant, Zane Allen Davis, Jr.

Paul G. Summers, Attorney General and Reporter; Marvin S. Blair, Jr., Assistant Attorney General; Ronald L. Davis, District Attorney General; Lee E. Dryer, Assistant District Attorney.

**JUDGES:** THOMAS T. WOODALL, J., delivered the opinion of the court, in which DAVID G. HAYES, J., and NORMA MCGEE OGLE, J., joined.

**OPINION BY:** THOMAS T. WOODALL

**OPINION:** Defendant Zane Allen Davis was found guilty by a Williamson County jury of violating *Tenn. Code Ann. § 55-10-401(a)(2)*, driving a vehicle while the alcohol concentration in the driver's blood or breath was ten-hundredths of one percent (0.10%) or more, a Class A misdemeanor. The trial court sentenced Defendant to eleven months and twenty-nine days, with the sentence suspended after Defendant served thirty days in the County Jail, and a \$ 1250 fine. Defendant raises the following issues in his appeal: (1) whether the trial court erred when it ruled that the State was not required [\*2] under Tenn. R. Crim. P. 16 to provide Defendant with documentation pertaining to the reliability of his blood alcohol test results; (2) whether the trial court erred when it quashed Defendant's subpoena duces tecum requesting the State's expert to bring documentation, previously ruled undiscoverable under Tenn. R. Crim. P. 16, to trial; (3) whether the trial court erred by allowing the State's expert witness to testify without first laying the proper foundation; and (4) whether the trial court erred when it limited Defendant's proof at trial regarding the arresting officer's motive. After a review of the record, we affirm the judgment of the trial court.

On May 11, 1998, the Williamson County Grand Jury indicted Defendant Zane Allen Davis for driving under the influence ("DUI") of an intoxicant, driving while the alcohol concentration in Defendant's blood or breath was ten-hundredths of one percent (0.10%) or more, driving on a revoked license, second-offense DUI, and second-offense unlawfully driving on a revoked license as a result of prior offense. On November 18, 1999, a Williamson County jury found Defendant guilty of driving with blood alcohol of ten-hundredths of one percent [\*3] or more, a Class A misdemeanor, and not guilty of driving on a revoked license; the remaining charges were dismissed.

In his motion for a new trial, Defendant claimed that the State suppressed evidence material to the preparation of his defense. Specifically, this evidence consisted of data concerning the reliability of the instrument used to acquire the blood alcohol test results used in evidence against Defendant at trial. This information was requested in a discovery motion and through subpoena duces tecum which were denied and quashed, respectively. After a sentencing hearing, the trial court sentenced Defendant to eleven months and twenty-nine days, with the sentence to be suspended after Defendant serves thirty days in the County Jail. In addition, the trial court revoked Defendant's license for a period of one year (with application for restricted license available) and required that Defendant attend Alcohol Safety School. Defendant raises the following issues in his appeal: (1) whether the trial court erred when it ruled that the State was not required under Tenn. R. Crim. P. 16 to provide Defendant with documentation pertaining to the reliability of his blood alcohol test; [\*4] (2) whether the trial court erred when it quashed Defendant's subpoena duces tecum requesting the State's expert to bring documentation previously ruled undiscoverable under Rule 16 to trial; (3) whether the trial court erred by allowing the State's expert witness to testify without first laying the proper foundation; and (4) whether the trial court erred when it limited Defendant's proof regarding the arresting officer's motive. After a review of the record, we

affirm the judgment of the trial court.

## I. FACTS

Adrian Breedlove, an officer with the Brentwood Police Department, testified at trial that he was on duty the evening of February 17, 1998, when he observed two trucks traveling in excess of the posted speed limit. Using radar, Breedlove clocked the speed of the vehicles at fifty-two miles per hour, twenty-two miles per hour over the posted maximum speed. Breedlove testified that he pursued the vehicles, using his lights and siren, but the drivers of both trucks ignored him. Ultimately, Breedlove caught up with them when they stopped in the parking lot of O'Charley's restaurant.

Officer Breedlove testified that the drivers of the trucks were identified as Zane Allen [\*5] Davis, the Defendant, and a friend of Defendant's named Thorpe Weber. When Breedlove first confronted the two men, both drivers "smelled like alcohol." Consequently, Breedlove questioned them both and administered standard field sobriety tests ("FST") to determine whether they were fit to drive. Weber passed the sobriety tests and was released with a citation for speeding. Defendant, on the other hand, failed both tests given him: the one-leg-stand and the walk-and-turn test. Breedlove further testified that Defendant also had bloodshot, watery eyes and that his speech was slurred. Moreover, Defendant was unsteady on his feet and admitted that he had been drinking earlier. For the foregoing reasons, Breedlove arrested Defendant and explained the Implied Consent Law to him. When Defendant agreed to submit to a blood alcohol test, Breedlove accompanied him to the Williamson Medical Center for testing. Breedlove received the blood sample from the hospital technician, sealed and initialed the tube, then placed it into a tamper-proof Tennessee Bureau of Investigation evidence box for storage at the police department until it could be taken to the crime laboratory for analysis.

In addition [\*6] to his duties as a police officer, Officer Breedlove testified that he is a certified DUI Instructor. As such, Breedlove is qualified to train other officers in methods of detecting and apprehending intoxicated drivers. Breedlove explained that the standardized FSTs given Tennessee drivers are recognized and administered nationally. To fail a test, the driver must exhibit two or more "clues" indicating intoxication while he being tested. For instance, eight "clues" exist for the walk-and-turn test. These include losing one's balance, starting too early, raising one's arms, stopping without reason, and not following the officer's directions. The National Highway Transportation & Safety Administration has determined that a suspect who evinces two or more clues for either FST can be considered too intoxicated to lawfully drive. Breedlove testified that Defendant exhibited more than two "clues" for both tests: during the one-leg stand test Defendant swayed and repeatedly dropped his foot; during the walk-and-turn test, Defendant turned improperly, raised his arms, and then finally gave up, stating that he was unable to complete the exercise. As a result of Defendant's performance on the [\*7] FSTs and Breedlove's experience, he concluded that Defendant was too intoxicated to drive.

John Harrison, a forensic toxicologist working in the Tennessee Bureau of Investigation crime laboratory, testified that he analyzed Defendant's blood. Harrison testified that he has worked as a toxicologist with the TBI for twelve years and that he has analyzed in excess of 40,000 samples in that time period. Harrison earned a B.S. degree in medical technology and also worked in a hospital laboratory for twelve years prior to his job with the TBI. The TBI crime laboratory which tested Defendant's sample received national accreditation from the American Society of Crime Lab Directors in 1994. Harrison testified that the lab must be periodically scrutinized by forensic specialists across the nation concerning numerous aspects of its work including procedures, security, personnel qualifications, and quality control in order for the lab to maintain its accreditation status. In addition, the lab is required to use standards to periodically check proficiency. Instruments are calibrated and equipment is checked on a daily basis.

Harrison testified at length regarding his analysis of Defendant's blood--the [\*8] various steps he took and the theories underlying many of the lab's testing procedures. Harrison described how proficiency standards are run and gave a cursory explanation of gas chromatography, which is the scientific method used by the TBI for separating mixtures during blood testing procedures. Harrison testified that, prior to all tests, he notes the condition of the sample when

received and runs a series of standards through the instrument to insure proper functioning and accuracy of the instrument. Harrison said that standards are typically run after every ten samples and also upon completion of an analysis. Regarding Defendant's blood sample, Harrison testified that it was received in good condition and that the standards which were run before and after Defendant's blood analysis showed that the instrument was operating properly. Harrison further testified as to the crime lab's chain of custody procedures: upon receipt of a sample (usually via U.S. Postal Service), responsibility for its care belongs to the evidence technician who assigns the sample a number and gives it to Harrison. Harrison testified that he then analyzed Defendant's blood sample and prepared a report of the [\*9] test results: Defendant's blood contained 0.23 gram percent ethyl alcohol.

Regarding the numerous requests for documents which Harrison received from Defendant's counsel, Harrison testified that he did not have the time to give Defendant's case the "special attention" that counsel wanted from him. Harrison explained that since he frequently works on thousands of cases at a time, he was waiting for Defendant's counsel to "go through channels" and obtain a court order for the records he wanted. Harrison testified that if and when he received a court order, he would then comply with counsel's requests. Otherwise, he claimed that he could not accommodate him because counsel's requests were too numerous. Harrison testified that the Defendant received copies of the instrument calibration record for the actual day of testing, but he also wanted information for the six-month period of time starting three months prior to the date of Defendant's test and extending three months afterward. Harrison admitted that there was no way for Defendant to "check Harrison's work" without the documents he requested. Harrison also testified that it is TBI laboratory policy to keep samples for sixty days [\*10] after testing so that defendants may request samples for independent analysis. Harrison said that he received no such request from Defendant.

## II. FAILURE TO PROVIDE DISCOVERY MATERIALS

Defendant first contends that the trial court erred when it did not compel the State to comply with Defendant's discovery request and provide him with numerous documents concerning Defendant's blood alcohol test. Defendant argues that Tenn. R. Crim. P. 16 requires disclosure of this type of information and that the State's failure to comply constitutes a discovery violation.

In a letter to the State, Defendant requested the following information which he believed was in the possession of the TBI crime laboratory: chain of custody documents; raw data from blood testing, including handwritten notes; line graphs and tabulated data printed by testing equipment; sample runs and associated calibration runs of testing equipment; TBI standing operating procedure for blood alcohol samples, and methods approved by TBI for such testing; the techniques and methods promulgated by the TBI to ascertain the qualifications and competence of the individuals to conduct analysis, to operate and to maintain blood [\*11] alcohol testing instruments; and any other document generated as a result of the testing of Defendant's blood sample. Defendant already possessed the TBI crime lab test results indicating that Defendant's blood alcohol level was 0.23%.

When the State replied that the defense was not entitled to additional information under Tenn. R. Crim. P. 16, Defendant filed a motion to compel. After hearing argument and reviewing briefs from both sides on the matter, the trial court denied Defendant's motion on the ground that the information requested was not discoverable pursuant to Rule 16 and held that the reports and results which had already been given Defendant were all he was entitled to receive.

With some limitations, Tennessee Rule of Criminal Procedure 16 requires the State to disclose certain evidence to a defendant prior to trial. [HN1] Section 16(a)(1)(C) provides:

Upon request of the defendant, the state shall permit the defendant to inspect and copy or photograph books, papers, documents, photographs, tangible objects, buildings or places, or copies or portions thereof, which are within the [\*12] possession, custody or control of the state, and which are material to the preparation of the Defendant's defense or are intended for use by the state as evidence in chief at the trial, or were obtained from or belong to the defendant.

Tenn. R. Crim. P. 16(a)(1)(C). Furthermore, [HN2] section 16(a)(1)(D) states the following:

Upon request of a defendant the state shall permit the defendant to inspect and copy or photograph any results or reports of physical or mental examinations, and of scientific tests or experiments, or copies thereof, which are within the possession, custody or control of the state ... and which are material to the preparation of the defense or are intended for use by the state as evidence in chief at the trial.

Tenn. R. Crim. P. 16(a)(1)(D).

Before we address Defendant's discovery issue, we note that [HN3] blood alcohol tests such as that performed on Defendant are routinely used in Tennessee to determine whether a person was intoxicated at a certain time. See Neil P. Cohen, [\*13] Tennessee Law of Evidence § 401.25 (1995). And, Tennessee state law provides for admissibility of such tests in cases involving driving under the influence of an intoxicant. *Tenn. Code Ann. § 55-10-407(a)* (1997). However, such tests are admissible only when it can be proven that the sample was taken by a properly trained person and that a proper chain of custody was established for the period of time between when the blood was drawn and the time it was analyzed. See *Tenn. Code Ann. § 55-10-410* (1997). Furthermore, the Tennessee Supreme Court has held that it must be shown the testing device is scientifically acceptable and accurate for the purpose that it is being employed. *State v. Johnson*, 717 S.W.2d 298, 303 (Tenn. Crim. App. 1986) (citing *Crawley v. State*, 219 Tenn. 707, 413 S.W.2d 370, 373 (Tenn. 1967)); *Pruitt v. State*, 216 Tenn. 686, 393 S.W.2d 747, 751 (Tenn. 1965) (overruled on other grounds). Indeed, the purpose of the testing is "to provide *objective* scientific data to eliminate guesswork and speculation and to supplement the fallible observations of [\*14] humans." *State v. Sensing*, 843 S.W.2d 412, 417 (Tenn. 1992) (citing *Peterson v. State*, 261 N.W.2d 405, 409 (S.D. 1977) (emphasis added)). [HN4] It is this quality, objectiveness, which makes scientific evidence highly consequential--science cannot be readily impugned, and it can be similarly fruitless to argue against results acquired from a machine. In the interests of justice, a court must do everything reasonably within its power to ensure that scientific evidence is accurate so as not to mislead the finders of fact. When discovered, inaccuracies in particular test results go only to the weight of the evidence, not its admissibility, with the weight to be given the evidence a question of fact for the trier of fact in each case. *State v. Johnson*, 717 S.W.2d 298, 305 (Tenn. Crim. App. 1986).

The State argues that the trial court did not err in ruling that the State was not obligated under Tenn. R. Crim. P. 16 to provide Defendant with the documents he requested. The State further points out that Defendant did not offer any proof to establish [\*15] that the requested information was material to the preparation of his defense; defendant merely claimed that he was entitled to the requested information and that it was material.

The State's argument further relies, in part, on the Tennessee Supreme Court's ruling in *State v. Irick*, 762 S.W.2d 121 (Tenn. 1988). The defendant in *Irick* wanted copies of the expert's "rough results" pertaining to individual characteristics of hair samples analyzed as part of a scientific test admitted into evidence against him at trial. The trial court denied the defendant's request, holding that the reports and results already submitted to the defendant were all he was entitled to have. *Id. at 126*. Our supreme court affirmed the ruling of the trial court, stating that there was "no violation of [Rule 16] and the defendant received all to which he was entitled in the way of discovery." *Id.*

We agree with Defendant that [HN5] accuracy is important when determining admissibility of any scientific test results and, therefore, it is logical to consider information concerning [\*16] the accuracy of the test instruments as important for defense purposes. See *State v. Sensing*, 843 S.W.2d 412, 416 (Tenn. 1992) (Court declared that the "defense is [] free to rebut the State's evidence by calling witnesses to challenge the accuracy of the particular machine..." and "expert testimony and the records of such procedures [regarding the manner in which the instrument performs its function] are available for examination."); *State v. Davis*, 823 S.W.2d 217, 219 (Tenn. Crim. App. 1991) (evidence of experiments and examinations of the intoxilyzer which revealed substantial malfunctions was material to issue of guilt). Moreover, we observe that the State's expert candidly admitted on cross-examination that there was no way for the accuracy of his work to be checked without access to the documents Defendant requested. Nevertheless, this one concession by the State's expert does not rise to the level of proof necessary to show that the requested

documentation was discoverable.

After careful consideration, this Court is drawn to the logic of the State's argument. This is primarily because Defendant failed to make an offer of proof regarding [\*17] the materiality of the documents requested. After a thorough examination of the video tape record, we conclude that Defendant's counsel has not provided us with any information which gives us a basis to rule in his favor. Not only is the record of the hearing on Defendant's motion to compel and Defendant's brief devoid of any proof establishing that the requested information was material, the trial record is deficient in this regard as well. Namely, we do not have before us any proof concerning what Defendant's expert would specifically require in the way of pertinent facts nor what he would do with them if he had them. We similarly lack proof of what particular documents the TBI has in its possession that would be helpful and how the documents would assist Defendant's case. Neither has Defendant offered any proof such as incompetency concerning the TBI's lab personnel or historical proof of inaccuracies or unreliable results with respect to the lab's instruments or equipment. We further observe that counsel could have asked that the trial court perform an in camera examination of the requested documents. In sum, since the State did not present the information in issue as evidence [\*18] during trial and Defendant did not offer any proof as described above, we find no evidence that the requested documents were material. Defendant is not entitled to relief on this issue.

### III. MOTION TO QUASH

Defendant also contends that the trial court erred when it quashed Defendant's subpoena duces tecum which requested the State's expert to bring the documentation previously ruled non-discoverable under Tenn. R. Crim. P. 16 to trial. We disagree.

After the State denied Defendant's request for additional discovery information pursuant to Tenn. R. Crim. P. 16, Defendant filed a motion to compel on November 6, 1998. When the court denied this motion on December 28, 1998, Defendant thereafter requested five subpoenas duces tecum for service upon the State's expert witness, requiring him to bring the documents previously ruled non-discoverable under Rule 16 with him when he testified at trial. The State filed a motion to quash on November 15, 1999, which was granted in a jury-out hearing held during the trial which began on November 16, 1999.

The State argues that Defendant should not be allowed to use Rule 17 to skirt the court's denial of discovery under Rule 16. In so arguing, [\*19] the State relies on *State v. Cage, 1999 Tenn. Crim. App. LEXIS 62, No. 01 C01-9605-CC-00179, 1999 WL 30595*, Montgomery County (Tenn. Crim. App., Nashville, Jan. 26, 1999), perm. to appeal denied (Tenn. 1999). In *Cage*, the defendant filed a motion for discovery pursuant to Rule 16 requesting that the State provide the materials used by the State's DNA expert to arrive at his test conclusions. This motion and a subsequent motion to compel were both denied on the ground that the materials requested were non-discoverable "work product." Thereafter, the defendant caused to be issued a subpoena duces tecum, directing the State's expert to appear at trial with the exact same materials previously ruled non-discoverable. The trial court granted the State's motion to quash the subpoena duces tecum, declaring that the defendant "could not circumvent the discovery protections of Rule 16 by issuing a subpoena for the same materials under Rule 17." *Id.* at \*8. This Court affirmed the trial court's judgment on appeal, remarking that "the limits of Rule 16(a)(2) would be meaningless if a defendant could simply subpoena the protected materials under Rule 17(c). [\*20] " *Id.* at \*9.

Following a review of the record and the parties' briefs, we agree with the State that the trial court correctly granted the State's motion to quash Defendant's subpoenas duces tecum, but for different reasons. We do not agree with the State's contention that materials previously ruled non-discoverable under Rule 16 are never subject to a subpoena duces tecum for trial. This Court's holding in *Cage*, upon which the State heavily relies for that assertion, is distinguishable from the present case on the facts. Some information non-discoverable under Rule 16 may be legitimately acquired by subpoena duces tecum. For example, material not "within the possession, custody or control of the state" is non-discoverable under Rule 16. This, *in itself*, does not prevent a defendant from acquiring the material by subpoena duces tecum if the circumstances otherwise permit.

[HN6] Rule 17(c) of the Tennessee Rules of Criminal Procedure provides as follows:

(c) For Production of Documentary Evidence and of Objects. A subpoena may also command a person to whom it is directed to produce [\*21] the books, papers, documents, or tangible things designated therein. The court, upon motion made promptly and in any event by the time specified in the subpoena for compliance therewith, may quash or modify the subpoena if compliance would be unreasonable or oppressive. The court may condition denial of the motion upon the advancement by the party in whose behalf the subpoena is issued of the reasonable cost of producing the books, papers, documents or tangible things. The court may direct that books, papers, documents or tangible things designated in the subpoena be produced before the court at a time prior to the trial or prior to the time when they are to be offered in evidence and may upon their production permit them to be inspected by the parties and their attorneys.

As can be seen, [HN7] the trial court is permitted to quash or modify a subpoena duces tecum if compliance would be unreasonable or oppressive. The appellate record indicates that the State argued in the trial court that compliance would be unduly burdensome, i.e., "unreasonable and oppressive," in conjunction with arguing that [\*22] the documents were not discoverable and therefore not subject to being subpoenaed for trial. Defendant did not offer any proof that compliance with the subpoena was not "unreasonable or oppressive." Neither did he offer to advance the costs of producing the documents (he was not indigent). In other words, the record is inadequate to permit this Court to hold that the trial court erred by granting the motion to quash. Even if we held that it was error to quash the subpoena, there is nothing in the record to indicate that the trial court's decision was anything more than harmless error.

As in the situation involving Defendant's motion to compel discovery under Rule 16, Defendant failed to offer any proof, in an "offer of proof" or otherwise, which would allow this court to grant him the relief he seeks on appeal. Therefore, Defendant is not entitled to relief.

#### IV. ADMISSIBILITY OF EXPERT TESTIMONY

Next, Defendant contends that the trial court erred when it permitted the State's expert to testify. Specifically, Defendant argues that the State offered expert opinion evidence without laying a proper foundation as required under Tennessee Rules of Evidence 702 and 703. We disagree. [\*23]

[HN8] Generally, the admissibility of evidence is governed by standards of relevancy and reliability. *State v. Begley*, 956 S.W.2d 471, 475 (Tenn. 1997); Tenn. R. Evid. 402. Our supreme court set [HN9] the standards governing admissibility of expert scientific proof in Tennessee in *McDaniel v. CSX Transp. Inc.*, 955 S.W.2d 257 (Tenn. 1997):

In Tennessee, under the recent rules, a trial court must determine whether the evidence will substantially assist the trier of fact to determine a fact in issue and whether the facts and data underlying the evidence indicate a lack of trustworthiness. The rules together necessarily require a determination as to the scientific validity or reliability of the evidence. Simply put, unless the scientific evidence is valid, it will not substantially assist the trier of fact, nor will its underlying facts and data appear to be trustworthy, but there is no requirement in the rule that it be generally accepted.

. . . [\*24] [HN10] The non-exclusive list of factors to determine reliability are useful in applying our Rules 702 and 703. A Tennessee trial court may consider in determining reliability: (1) whether scientific evidence has been tested and the methodology with which it has been tested; (2) whether the evidence has been subjected to peer review or publication; (3) whether a potential rate of error is known; (4) whether, as formerly required by Frye, the evidence is generally accepted in the scientific community; and (5) whether the expert's research in the field has been conducted independent of litigation.

Although the trial court must analyze the science and not merely the qualifications, demeanor or conclusions of experts, the court need not weigh or choose between two legitimate but conflicting scientific views. The court instead must assure itself that the opinions are based on relevant scientific methods, processes, and data, and not upon an expert's mere speculation.

*McDaniel*, 955 S.W.2d at 265.

[HN11] The admissibility of expert [\*25] and scientific evidence in particular is also governed by Rules 702 and 703 of the Tennessee Rules of Evidence noted above. [HN12] The former provides:

If scientific, technical, or other specialized knowledge will substantially assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise.

Tenn. R. Evid. 702. And, [HN13] Tenn. R. Evid. 703 states:

The facts or data in the particular case upon which an expert bases an opinion or inference may be those perceived by or made known to the expert at or before the hearing. If of a type reasonably relied upon by experts in the particular field in forming opinions or inferences upon the subject, the facts or data need not be admissible in evidence. The court shall disallow testimony in the form of an opinion or inference if the underlying facts or data indicate lack of trustworthiness.

Tenn. R. [\*26] Evid. 703.

[HN14] The decision to admit scientific evidence is within the discretion of the trial court and will not be disturbed absent an abuse of discretion. *State v. Begley*, 956 S.W.2d 471, 475 (Tenn. 1997). The trial court rules on questions regarding the admissibility, qualifications, relevancy and competency of expert testimony. *McDaniel*, 955 S.W.2d at 263.

In Tennessee, therefore, [HN15] a trial court must first determine (1) whether the evidence will substantially assist the trier of fact to determine a fact in issue and (2) whether the facts and data underlying the evidence indicate a lack of trustworthiness. *Id.* at 265. After a review of the record, we conclude that the expert's testimony regarding Defendant's blood alcohol content was relevant and substantially assisted the jury as required under *McDaniel*. The relevance of the driver's blood alcohol in a DUI case is plain-it is an element of the offense. Consequently, reliable information [\*27] regarding Defendant's blood alcohol content is helpful to a jury.

Additionally, we find no facts or data which would indicate a lack of trustworthiness respecting the State's expert witness. The trial court determined that the State's witness was "qualified as an expert by knowledge, skill, experience, training, or education" in accordance with Rule 702 and, after a review of the record, we agree. Harrison appeared to be knowledgeable and experienced in his field of work: he has worked as a TBI toxicologist for twelve years and analyzed in excess of 40,000 blood samples. Furthermore, Harrison testified at length regarding his analysis of Defendant's blood, the steps he took and the theories underlying many of the testing procedures. In order for the TBI crime lab to maintain its accreditation, Harrison's test results are continually monitored and checked by independent agencies. In short, we concur with the trial court's view that Harrison's education and training, which includes a B.S. degree in medical technology and work in a hospital laboratory for twelve years prior to his extensive experience with the TBI, are sufficient to qualify him as an expert.

Again, we note that blood [\*28] alcohol tests are routinely used in Tennessee to determine whether a person was driving while intoxicated. These types of standardized tests have long been recognized by experts in the field as scientifically valid and reliable; thus, they fulfill the requirements outlined in *McDaniel* and meet the trustworthiness standard in Rule 703. The fact that the TBI's crime lab is accredited satisfies two "reliability" factors under *McDaniel*: (1) the scientific evidence and methodology has been tested and (2) the rate of error is acceptable as a matter of record. For the reasons stated above, we find that the trial court did not abuse its discretion. Defendant is not entitled to relief on this issue.

## V. LIMITATION OF PROOF

Defendant contends that the trial court erred when it limited Defendant's proof at trial regarding the arresting officer's motive. Defendant argues that this limitation deprived Defendant of his right to due process and a fair trial. We disagree.

Specifically, Defendant sought to question Officer Breedlove about his motive for Defendant's arrest. It was Defendant's contention that Officer Breedlove did not arrest Defendant because he was driving while intoxicated, [\*29] but because the officer wanted to seize Defendant's expensive new truck. Defendant maintained that the other driver escaped arrest because he was driving an older model. The trial court sustained the State's objection to defense counsel's line of questioning concerning motive, then informed counsel during a sidebar conference that, if he were to persist, it would open the door for the State to introduce evidence of Defendant's prior DUI conviction. Based on this ruling, defense counsel abandoned the discussion of the officer's motive.

[HN16] The motive of an arresting officer is not relevant where the officer can show that sufficient probable cause existed to believe that a crime had been committed. Put another way, the underlying intent or motivation of officers involved in an arrest or seizure is immaterial where the activity undertaken is precisely the same as would have occurred had the intent or motivation been entirely absent from the case. See *Abel v. United States*, 362 U.S. 217, 80 S. Ct. 683, 4 L. Ed. 2d 668 (1960); *State v. Vineyard*, 958 S.W.2d 730, 736 (Tenn. 1997) [\*30] (probable cause justifies a traffic stop under Article I, Section 7 of the Tennessee Constitution without regard to the subjective motivations of police officers).

Officer Breedlove's alleged subjective intent concerning Defendant's vehicle is not relevant if Breedlove had sufficient probable cause to stop Defendant. Clearly, Breedlove had the requisite probable cause when he observed Defendant and his friend driving at twenty miles per hour over the posted speed limit. Moreover, Defendant gave Breedlove probable cause for arresting him when he failed the field sobriety tests and presented the appearance of a man who was intoxicated. Thus, Defendant's argument that the trial court erred when it limited Defendant's proof at trial regarding the Officer Breedlove's motive for Defendant's arrest and subsequent seizure of his vehicle is without merit. Defendant is not entitled to relief on this issue.

## VI. CONCLUSION

For the forgoing reasons, we affirm the judgment of the trial court.  
THOMAS T. WOODALL, JUDGE

172 of 195 DOCUMENTS

**STATE OF TENNESSEE v. KIMBERLY M. LARSON****No. M1999-00507-CCA-R3-CD****COURT OF CRIMINAL APPEALS OF TENNESSEE, MIDDLE SECTION, AT  
NASHVILLE***2000 Tenn. Crim. App. LEXIS 603***August 4, 2000, Filed**

**PRIOR HISTORY:** [\*1] Direct Appeal from the Criminal Court for Davidson County. Seth Norman, Judge. No. 97-T-937.

**DISPOSITION:** Judgment of the Criminal Court Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed the judgment of the Criminal Court for Davidson County, Tennessee, convicting her of driving under the influence per se. Defendant argued the lower court erred in denying her motion for acquittal or new trial based upon the improper admittance of scientific evidence. Defendant argued the lower court imposed an excessive sentence.

**OVERVIEW:** Defendant was convicted of driving under the influence per se. The court affirmed the judgment of the lower court and held that defendant's alcohol breath tests were admissible, as the Sensing requirements were met. The court held it could not consider defendant's sentence under Tenn. R. App. P. 24 (b) because there was no transcript of the sentencing hearing within the record. The Sensing standard showed that the breath tests were properly performed, that the officer was certified, the breath testing device was accurate, defendant was observed for 20 minutes prior to the test, the officer followed procedure, and the officer identified the printout record as being defendant's test results. The evidence did not preponderate against the lower court's decision to admit the Intoxilyzer results. The state's proof established all the elements of defendant's offense, thus it was not error to deny defendant's motion for acquittal or new trial based upon improper admittance of scientific evidence. The court was precluded from considering defendant's sentence by Tenn. R. App. P. 24 (b), as no transcript of the sentencing hearing was within the record.

**OUTCOME:** The judgment of the lower court was affirmed. The court held there was not a preponderance of evidence against the lower court's judgment that defendant's alcohol breath tests met all the requirements and were admissible. It was not error to deny defendant's motion for new trial or acquittal, as the state met its burden of proof. The court could not consider defendant's sentence because no transcript of the hearing was contained in the record.

**CORE TERMS:** machine, mouth, alcohol, breath, breath test, calibration, videotape, arrest, certification, blow, arms, blood test, printout, walk, testing, preponderate, driving, minutes, cues, calibrated, forensic, new trial, cross-examination, administered, certificate, sobriety, sentence, one-leg, air, leg

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

[HN1] The controlling rule requires that an officer be able to testify that: (1) the breath tests were performed in accordance with standards and procedures promulgated by Tennessee Bureau of Investigation's (TBI) forensic services division; (2) the testing officer was properly certified; (3) the breath testing instrument used was certified by the TBI, was regularly tested for accuracy, and was working properly when the test was performed; (4) the subject was observed for twenty minutes prior to the test and, during this time, did not have foreign matter in his mouth, did not consume alcohol, smoke, or regurgitate; (5) the officer followed the prescribed operational procedure; and (6) the testing officer identified the printout record offered into evidence as being the test result of the subject involved.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview Evidence > Scientific Evidence > Sobriety Tests***

[HN2] Once the state has shown all six requirements by a preponderance of the evidence, the test results are admitted. A trial court's decision to admit breath alcohol test evidence will not be disturbed on appeal unless the preponderance of the evidence is contrary to that decision.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

***Criminal Law & Procedure > Search & Seizure > General Overview***

***Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination***

[HN3] An officer is not required to search a subject's mouth visually if he: (1) has determined that foreign matter has been removed prior to the twenty-minute observation period and (2) testifies that he continuously observed the test subject for the required period, during which the subject's mouth remained clear. This procedure insures that nothing new or unknown enters the subject's mouth that would skew the test results.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

[HN4] It is the statutory duty of the forensic services division to maintain and certify alcohol breath testing instruments of those police departments participating in the purchasing program with the state. *Tenn. Code Ann. § 38-6-103(d)(2), (g)* (1997).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

***Criminal Law & Procedure > Trials > Motions for Acquittal***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN5] When a motion for acquittal is presented to the trial court, the court is only concerned with the legal sufficiency of the evidence, rather than the weight of the evidence presented. In determining sufficiency, the trial court must consider the parties' evidence, disregard the defendant's evidence which conflicts with that of the state, and afford the state the strongest legitimate view of the evidence, including all reasonable inferences.

**COUNSEL:** V. Michael Fox, Nashville, Tennessee, for the appellant, Kimberly M. Larson.

Paul G. Summers, Attorney General and Reporter; Jennifer L. Bledsoe, Assistant Attorney General; Victor S. Johnson,

III, District Attorney General; and Edward S. Ryan, Assistant District Attorney General, for the appellee, State of Tennessee.

**JUDGES:** ALAN E. GLENN, J., delivered the opinion of the court, in which JOE G. RILEY, J., and WILLIAM B. ACREE, JR., SP.J., joined.

**OPINION BY:** ALAN E. GLENN

**OPINION:** This appeal arises from a guilty verdict returned against the defendant for DUI per se for which she received a sentence of eleven months and twenty-nine days, with all but ten days suspended, a \$ 350 fine, court-ordered rehabilitation, and suspension of driving privileges for one year. On appeal, the defendant challenges the admittance of her breathalyzer test results at trial and alleges that her sentence was excessive. After a review of the record, we affirm the judgment of the trial court.

On June 10, 1998, the defendant, Kimberly Larson, was found [\*2] guilty by a Davidson County jury of driving under the influence per se. She was subsequently sentenced to eleven months and twenty-nine days incarceration, all except ten days suspended, ordered to participate in a rehabilitation program, and prohibited from driving for one year. The defendant then filed a motion for a new trial or acquittal, which was denied by the trial court on April 30, 1999. She has appealed to this court on two issues: (1) whether the trial court erred in denying the motion for acquittal or new trial based upon the improper admittance of scientific evidence; and (2) whether the trial court imposed an excessive sentence. Upon our *de novo* review of the record, we affirm the judgment of the trial court.

## FACTS

The only witness to testify in this case was Officer Harold R. Taylor, a ten-year veteran of the Metropolitan Police Department. At the time of the defendant's arrest, Officer Taylor was assigned to the Breath Alcohol Testing ("BAT") Division of the Traffic Enforcement Unit. He testified that, on the night of April 10, 1997, he was performing a routine patrol of West End Avenue. Just past midnight, Officer Taylor observed the defendant's vehicle [\*3] traveling toward him at what appeared to be a speed greater than the posted speed limit. Using a radar unit, he was able to determine that the defendant's car was going fifty miles per hour in a thirty miles per hour zone. The officer activated his lights and sirens and pulled in behind the defendant's car, but the defendant traveled another six blocks before a second patrolman forced the vehicle to stop by using a public address system to order the defendant to pull over. Officer Taylor approached the defendant's car, got her driver's license, and asked her to exit the vehicle, because she had refused to stop for him. The officer testified that the defendant appeared intoxicated as she got out of her car. He stated that her eyes were red, her face was flushed, and he detected the odor of alcohol. Although her speech was not slurred, Officer Taylor noticed that her mouth was dry, and she kept licking her lips to keep her mouth wet. When asked, the defendant initially denied having consumed any alcohol, but the officer noticed unsteadiness when she walked.

After obtaining the defendant's consent to perform a field sobriety test, the officer instructed and demonstrated for the defendant [\*4] the various maneuvers he asked her to perform. n1 He stated that she did "okay" on the "one-leg stand" n2 until she reached somewhere between eleven and twenty seconds. At that point, the defendant raised her arms to maintain her balance. Somewhere between twenty-one to thirty seconds, the defendant swayed somewhat and kept her arms away from her body to keep her balance. She counted incorrectly in the process of reaching thirty seconds and did not follow the officer's instructions, which indicated to the officer that she was somewhat confused. When Officer Taylor had her perform the "walk and turn" task, n3 the defendant was unable to maintain her balance. Instead of walking the first nine steps and then doing a two-step pivot, the defendant went twelve steps. She raised her arms and missed a couple of heel-to-toe steps. After the "two-step pivot," the defendant then went ten steps instead of nine and raised her arms again to maintain her balance. Based on cues he observed during the defendant's performance on the field sobriety tests, n4 her slow response to his emergency equipment, the odor of alcohol, and her red, glassy eyes, Officer Taylor felt that the defendant was impaired [\*5] and should not be operating a motor vehicle.

n1 According to the Intoxilyzer Alcohol Analyzer results attached to the Form # 132 filled out by Officer Taylor, the breath alcohol test was administered at 1:02 a.m.

n2 Officer Taylor explained that this test requires subjects to stand on whichever leg they choose, hold the other leg approximately six inches off the ground while keeping the hands down to the sides, and count "one thousand one, one thousand two . . . etc." up to "one thousand thirty." This test is administered according to National Highway Traffic Safety Administration (NHTSA). standards. See infra note 7.

n3 This test requires the subject to stand on a line with one foot in front of the other one, heel-to-toe, and walk nine steps with the heel touching the toe of the other foot. At the end of the ninth step, the subject is instructed to do a "two-step pivot," by which the subject brings the back foot around one time and completes the turn on the second step. The subject then begins the "heel-toe" walk again for the nine steps. This test is administered according to NHTSA standards.

[\*6]

n4 Officer Taylor testified that the defendant showed four cues during the "walk and turn" test, which tests the subject's performance of divided attention or multi-tasking, balance, following instructions, and reactions. Checked on the Form # 132 were: "cannot keep balance"; "misses heel-toe" during the first nine steps; "raises arms" during both the first and second nine steps; and "actual steps taken" were twelve during the first set of nine steps and ten during the second set. Our review of the Form # 132 and Officer Taylor's testimony during cross-examination reveals that the defendant also had two cues during the "one-leg stand" test. These were: "sways while on one leg" between twenty-one and thirty seconds and "raises arms while on one leg" between eleven and twenty seconds and also between twenty-one seconds and thirty seconds.

At that point, Officer Taylor read the Tennessee Implied Consent Law to the defendant and asked her if she would submit to a breath test. The defendant agreed to do so. She was placed in the back of Officer Taylor's police car, and he sat in the driver's seat [\*7] so he could turn around. At this point, Officer Taylor asked the defendant the questions on the back of the Form # 132 n5 used by police. She responded that she did not have any illness or injuries, did not take any medications or drugs, had her last meal at 8:00 p.m., and had one mixed drink at approximately 9:00 p.m. The defendant told the officer that she had the mixed drink at Club Platinum on Hayes Street. Because the defendant's eyes were red, Officer Taylor asked how much sleep she had gotten in the past twenty-four hours, to which she replied seven hours. Officer Taylor testified that he did not do any paperwork during his observation of the defendant, which lasted approximately twenty-eight minutes. At the end of the observation period, Officer Taylor administered the breath test to the defendant, and she registered a 0.16%. After advising the defendant of the results, Officer Taylor asked if she wanted to submit to a blood test. He testified that he did not remember if the defendant stated that she wanted a blood test at that time, but she would have been given one if she had indicated that she wanted one. He remembered the defendant asking about the cost, and Taylor told [\*8] her the cost. Taylor stated that if the defendant had said, "That's all right," he would have interpreted her response to mean "no," which he marked on the Form # 132. He took the defendant straight to the jail.

n5 Defense counsel explained to the trial court that this form is the Metropolitan Police Department's DUI report.

Officer Taylor stated that he was trained and certified by the Tennessee Bureau of Investigation to give breath alcohol tests. His certification in the operation of the Intoxilyzer 1400 was entered into evidence. Although the trial judge would not allow the certificate of calibration from CMI, Inc., the maker of the particular Intoxilyzer 1400 used on

the defendant, or the certification of calibration by the TBI for that machine into evidence based on a hearsay objection from defense counsel, the defendant made no objection to the officer's testimony that the machine (number 130) had been certified by the TBI on February 21, 1997. The printout for the defendant's breath test results of 0.167 [\*9] was also entered into evidence through this witness. The videotape of the stop, field sobriety test, and arrest of the defendant was shown to the jury and entered into evidence. n6

n6 Our review of the videotape reveals that the camera in Officer Taylor's car was pointed forward throughout the observation period and administration of the alcohol breath test. This prevents us from observing the defendant during this time. However, the audio portion of the videotape, which contained the conversation between the officer and the defendant, is clearly audible.

The officer explained why the video showed that the defendant had to retake the breath test after a first unsuccessful attempt. He stated that the Intoxilyzer Pack 1400 has a tone meter which indicates when a sufficient sample is being injected into the machine's chamber. To do the test correctly, the subject must blow a constant, steady breath for about eight to ten seconds. Once the chamber has been filled, the machine will cut off the test, and the subject [\*10] stops blowing into it. The Intoxilyzer goes through some internal checks and gives a printout of the alcohol content of the subject's breath. On her first try, the defendant did not give a sufficient breath sample, and the machine self-aborted the first test. The procedure at this point was to recycle the Intoxilyzer and instruct the subject to perform again. The second time the defendant blew, a sufficient sample was obtained for the machine to analyze. Officer Taylor explained that the machine does all of the work internally, so if there is any interference or anything other than alcohol detected, the machine will self-abort the test. The printout will show that there was an insufficient sample and, in the defendant's case, the useless printout from the first test was destroyed. Officer Taylor testified that the defendant did not put anything into her mouth, smoke anything, belch, regurgitate, or do anything else that would upset the test while he was observing her. He also stated that he followed all of the appropriate procedures to get the results of the second test. After taking the defendant into custody, Officer Taylor attempted to secure her vehicle and found an open bottle [\*11] of beer in the passenger side floorboard. After viewing the video, the officer acknowledged that the defendant initially stated that she wanted a blood test, but later said that she did not after talking to another officer on the scene.

On cross-examination, a copy of the Form # 132 was entered into evidence through Officer Taylor. He stated that he could not tell if the defendant's driving was erratic or unlawful in any other way besides speeding, because she was so far ahead of him. The officer was confronted with his statement at the preliminary hearing in which he stated that the defendant did not weave in her lane as far as he could see. He stated that his trial testimony was the same.

After viewing the tape, Officer Taylor still was of the opinion that the defendant was unsteady as she exited her vehicle. He admitted that the defendant did not attempt to flee, did not lean against her car, or fall out of her vehicle. He also admitted that, from the odor of alcohol alone, he cannot tell what a subject has had to drink, how much, or over what period of time. He agreed that his training has taught him that ethyl alcohol has no odor but still stated that he smelled alcohol on [\*12] the defendant. He did not form an opinion that probable cause existed to arrest the defendant at the time he smelled alcohol on her or when he saw her speeding but felt he might arrest her for reckless driving.

Defense counsel reviewed with Officer Taylor the NHTSA n7 standard demonstrations and instructions given to the defendant before each field sobriety task, who said that he did not give her the instruction, "Do not hop or sway." The officer testified that the defendant said that she understood his instructions, and it was his opinion that she did understand. He explained that there are four cues in the "one-leg stand" test that are signs of intoxication, namely, the sway, raised arms, hopping on one leg, and putting the foot down before time is up. After observing the defendant's performance on the "one-leg stand" test, Officer Taylor had not yet formed an opinion as to whether probable cause existed to place the defendant under arrest. He testified that he had one more task to perform before doing so. The defendant was instructed on how to do the "walk and turn" test, and she seemed to understand. After observing four cues during the defendant's performance of this test, Officer [\*13] Taylor then formed his opinion that probable cause

existed for the defendant's arrest. Taylor agreed that the videotape showed that the defendant was not under arrest when he read her the Implied Consent Law but that she was placed under arrest after he read it. She was not handcuffed. He agreed with defense counsel that the defendant cooperated with him and did not have trouble getting into his patrol car. He stated that she had dry mouth and had discarded the gum she was chewing after finishing the field sobriety tests.

n7 This stands for the National Highway Traffic Safety Administration. *State v. Sensing*, 843 S.W.2d 412, 414 (Tenn. 1992).

After seeing the videotape, Taylor admitted on cross-examination that his recollection at the preliminary hearing that he conducted the period of observation on the defendant outside his car was incorrect. He explained that he put the defendant in the back seat on the right-hand side and began his observation after he got into the car and observed the [\*14] defendant until he started the Intoxilyzer. During the observation period, Officer Taylor read the defendant her Miranda rights. He testified that he had a card with those rights printed on it but did not get the card out to look at it. When he asked the defendant the questions listed on the Form # 132 under "Suspect's General Health and Investigative Questions," Officer Taylor did not record her answers at that time. According to the Form # 132, he observed the defendant for a little longer than twenty minutes before the breath test was given. Officer Taylor admitted that he could not verify the documents certifying the machine he used, but he could say those are the documents that are given out for the machines and that the machines are sent to the TBI lab.

Although he admitted that checking a subject's mouth prior to the breath test is part of the routine that an officer is supposed to follow, Officer Taylor stated that he did not check the defendant's mouth before he asked her to blow; however, he stated he had been watching her, and she did not put anything into her mouth. When Officer Taylor handed the defendant a new mouthpiece to use in the test, he did not look down [\*15] into the box, because he could reach down and get it. The defendant had a problem with her first attempt to blow, and the machine was heard on the videotape to be printing something out. Officer Taylor stated that the machine printed out "insufficient sample." He explained that the portion of the printout for "subject test" would be blank and "insufficient sample" would be printed at the bottom with an asterisk right above it. The reading would be zero. He then had to start the sequence over again. Because the machine was between the seats, near the officer's lap, and the mouthpieces are kept on the floorboard, Officer Taylor stated that he never took his eyes off the defendant. He explained that several times on her second attempt to complete the test, the defendant would blow up to a certain point and then stop. The Intoxilyzer would show "please blow," and Officer Taylor would instruct her again to blow out a steady, continuous breath.

In his testimony, Officer Taylor explained that a steady, continuous breath is necessary to get a sufficient sample to get an accurate breath count. He agreed that deep lung air is the type of sample needed by the computer in the machine to convert [\*16] a breath alcohol reading into blood alcohol content. He stated that the machine is so sensitive that it can distinguish between deep lung air and regular air, and the Intoxilyzer will abort the test if deep lung air is not in the sample obtained. The videotape also showed Officer Taylor telling another officer at the scene that he expected the defendant to "blow a ten" (0.10) on the machine. He testified that he did not question the machine when the results showed the defendant had a 0.16% blood alcohol content, but he denied that he was relying on the machine over his ability as a police officer to recognize that someone is under the influence. He stated that he had been a police officer for sixteen years, six of those as a DUI Task Force officer. Officer Taylor testified he had attended classes where people drink, and he was supposed to guess their breath alcohol content. He felt he was good at doing so.

When asked by defense counsel if he allowed the defendant to practice the field sobriety tests, Officer Taylor stated that he did not. He also stated that it is not normal to walk heel-to-toe, and agreed that, if a person were allowed to practice, he or she would be able to do it [\*17] better. He stated that he did not tell the defendant what she had to do to pass the tests. It was his opinion that the defendant was under the influence and that he had probable cause to believe she was under the influence, although he agreed that the jury makes that determination.

Defense counsel further cross-examined the officer about the videotaped conversation with the defendant concerning her desire to take a blood test after the breath test. Officer Taylor agreed that the videotape showed that the defendant responded, "Yes, I do." When the officer told her it would be at her own expense, she replied, "That's okay." It was Officer Taylor's recollection that the defendant decided not to take a blood test after another officer, who was a friend of the defendant, came to the scene and talked with her. He acknowledged that there was a break in the recording where the audio was off during the time that the defendant was talking with her friend but testified that the defendant stated she did not want the blood test before Officer Taylor got back in the car and turned the tape back on. The other officer was driving off at that time.

The State then rested its case. The defense called [\*18] no witnesses, and the case went to the jury for deliberations. The jury ultimately found the defendant guilty of DUI per se.

## ANALYSIS

### Admission of Intoxilyzer Test Results

The general fundamental requirements for the admission of breath alcohol test results were established in *State v. Sensing*, 843 S.W.2d 412 (Tenn. 1992); *State v. Bobo*, 909 S.W.2d 788, 790 (Tenn. 1995); and *State v. Deloit*, 964 S.W.2d 909, 912 (Tenn. Crim. App. 1997). [HN1] The Sensing standard requires that an officer be able to testify that: (1) the tests were performed in accordance with standards and procedures promulgated by TBI's forensic services division; (2) the testing officer was properly certified; (3) the breath testing instrument used was certified by the TBI, was regularly tested for accuracy, and was working properly when the test was performed; (4) the subject was observed for twenty minutes prior to the test and, during this time, did not have foreign matter in his mouth, did not consume alcohol, smoke, or regurgitate; (5) the officer followed [\*19] the prescribed operational procedure; and (6) the testing officer identified the printout record offered into evidence as being the test result of the subject involved. *Sensing*, 843 S.W.2d at 416; *Deloit*, 964 S.W.2d at 912.

[HN2]

Once the State has shown all six Sensing requirements by a preponderance of the evidence, the test results are admitted. A trial court's decision to admit breath alcohol test evidence will not be disturbed on appeal unless the preponderance of the evidence is contrary to that decision. *State v. Edison*, 9 S.W.3d 75, 77-78 (Tenn. 1999).

The defendant contends that the trial court erred in admitting the results of the defendant's Intoxilyzer test, because the State failed to meet four of the Sensing requirements. Specifically, the defendant argues that the reliability of the test was compromised, because: (1) the test was not performed in accordance with the TBI's standards and operating procedure; (2) Officer Taylor did not properly observe the defendant for twenty minutes and failed to visually check the [\*20] defendant's mouth before giving the test; (3) there was no evidence that the Intoxilyzer was properly certified, regularly calibrated, and working properly; and (4) there was no evidence that Officer Taylor followed the prescribed operational procedure. The defendant correctly argues that, if the State failed to satisfy Sensing, it could only get the test results admitted under traditional rules of evidence that would assure the reliability of the test. *Deloit*, 964 S.W.2d at 913. This would require a showing that the device was scientifically acceptable and accurate and that Officer Taylor was qualified to interpret the results for the jury. 964 S.W.2d at 911. According to the defendant, this was not done at trial; and, therefore, the evidence was not admissible.

We do not agree that the breath alcohol test results were inadmissible. After a careful review of the record, we conclude that the evidence does not preponderate against the trial court's decision to admit the Intoxilyzer results.

The defendant's contention that the State failed to establish that the defendant's test was performed according to TBI standards and procedures (Sensing [\*21] requirement # 1), as well as her contention that Officer Taylor did not properly observe her or check her mouth before giving the test (requirement # 4), are without merit. Officer Taylor testified that he was trained and certified by the TBI to operate the Intoxilyzer 1400 and administer breath alcohol tests. His certification was entered into evidence. He then described how he conducted the test on the defendant and what

procedure he used to get an accurate reading. He testified that he observed the defendant uninterrupted for over twenty minutes and that she put nothing in her mouth during that time. n8 When the defendant's first breath test was insufficient, Officer Taylor testified that the procedure was to recycle the Intoxilyzer and try again. In addition, he stated that he followed all of the appropriate procedures in obtaining the test results from the second test. This testimony is stronger than that of the officer in *State v. Edison*, in which the supreme court determined that the Sensing requirement was met that proper procedures be followed during the test. In that case, the officer testified that he could not remember if he followed the proper procedures but knew [\*22] he must have, since there are "just certain procedures that you have to follow to run the test." *Edison*, 9 S.W.3d at 79. In the present case, Officer Taylor testified that he did follow all the proper procedures, which was more definite than the officer's testimony in *Edison*.

n8 The audio portion of the videotape of the defendant's arrest reveals that on three occasions Officer Taylor advised the defendant regarding any foreign objects in her mouth: "Do you have anything in your mouth?"; "Make sure you put nothing in your mouth"; and "Put nothing in your mouth."

Although Officer Taylor admitted on cross-examination that he did not visually inspect the defendant's mouth before giving the breath test, this is not fatal to the State's Sensing proof. This court has not required that [HN3] an officer search a subject's mouth visually if he: (1) has determined that foreign matter has been removed prior to [\*23] the twenty-minute observation period and (2) testifies that he continuously observed the test subject for the required period, during which the subject's mouth remained clear. See *State v. Deloit*, 964 S.W.2d 909, 916-17 (Tenn. Crim. App. 1997) (discussing *State v. Fields*, 1996 Tenn. Crim. App. LEXIS 219, No. 01 C01-9412-CC-00438, 1996 WL 180706 (Tenn. Crim. App., Nashville, Apr. 12, 1996)); *State v. Jarnagin*, 2000 Tenn. Crim. App. LEXIS 378, No. E1998-00892-CCA-R8-CD, 2000 WL 575232 (Tenn. Crim. App., Knoxville, May 12, 2000). This procedure insures that nothing new or unknown enters the subject's mouth that would skew the test results. *State v. Cook*, 9 S.W.3d 98, 100-01 (Tenn. 1999). In the present case, Officer Taylor testified that the defendant spit out her gum before he continuously observed her for the required twenty-minute period. He did not look away from her to do paperwork or to administer the breath test. Therefore, we cannot conclude that the evidence in the record preponderates against the trial court's determination that the proper procedures and observation of the defendant [\*24] were followed.

Evidence was also presented that the particular Intoxilyzer used in the defendant's test was properly certified, calibrated, and working properly (Sensing requirement # 3). Officer Taylor testified that the machine had been certified by the TBI on February 21, 1997, less than two months before it was used on the defendant. He also stated he knew that the machine was sent to the TBI lab and that the certification of calibration from the TBI was returned with the machine. Again, this testimony is more specific than that presented in *State v. Edison*, in which this Sensing requirement was met by an officer's testimony that the certification of calibration was posted at the jail, and the machine was checked every three months, although he did not know the date of the last calibration. *State v. Edison*, 9 S.W.3d 75, 78 (Tenn. 1999). We conclude that the evidence does not preponderate against the trial court's finding that the Sensing requirement of a properly calibrated and working instrument was met by the State.

Further bolstering the State's argument, we conclude that the trial court should have allowed the certificate of calibration [\*25] to be entered into evidence. In Sensing, the court stated:

The forensic services division inspects, repairs and maintains all units previously certified, including use of a laboratory computer controller to poll each instrument and correlate all test data of each instrument for clarification of instrument performance. Every 90 days forensic services division personnel conduct tests of each instrument under laboratory control conditions and record the results, noting any required adjustments or repairs of each unit. The certification also provides that upon request of the court, district attorney, defendant, or other person or party having an interest in the use of the test performed on an approved breath testing instrument an official copy of those standards and procedures will be certified pursuant to *T.C.A. § 38-6-107* and delivered to the requesting party. We are of the opinion that this procedure to supply records also conforms with the provisions of Tennessee Rule of Evidence, 803(8) as an

exception to the hearsay evidence rule.

843 S.W.2d at 415-16. [HN4] [\*26] It is the statutory duty of the forensic services division to maintain and certify alcohol breath testing instruments of those police departments participating in the purchasing program with the state. *Tenn. Code Ann. § 38-6-103(d)(2), (g)* (1997). The certificate of calibration from the bureau is part of this process and is given to the police departments when the instrument is calibrated. At trial, Officer Taylor testified that this certification was given back to the department after the machine was sent to the TBI for calibration. Barring any other evidentiary defects, this appears to fit within Tennessee Rule of Evidence 803(8), which carves out an exception to hearsay for a report from a public agency issued pursuant to a duty imposed by law. However, in the present case, the testimony of Officer Taylor was sufficient to establish that the machine was working properly, even in the absence of the certificate of calibration.

We conclude that the evidence does not preponderate against the trial court's determination that the State met its burden of proving all of the Sensing requirements to admit the alcohol breath test.

Since we have concluded [\*27] that the Intoxilyzer results were properly admitted into evidence, we now turn to the defendant's contention that the trial court erred in denying her motion for acquittal or a new trial. [HN5] When a motion for acquittal is presented to the trial court, the court is only concerned with the legal sufficiency of the evidence, rather than the weight of the evidence presented. *State v. Blanton, 926 S.W.2d 953, 957 (Tenn. Crim. App. 1996)*. In determining sufficiency, the trial court must consider the parties' evidence, disregard the defendant's evidence which conflicts with that of the State, and afford the State the strongest legitimate view of the evidence, including all reasonable inferences. 926 S.W.2d at 957-58. The State's proof was sufficient to establish all elements of the offense of DUI, and the trial court was correct in denying the defendant's motion for acquittal or for a new trial based upon improper admittance of scientific evidence.

#### **Excessive Sentence**

The defendant further contends that the trial court imposed too harsh a sentence for the [\*28] DUI per se conviction. From the record provided, we cannot determine whether the trial court acted properly or not. It is the appellant's obligation to prepare an adequate record on appeal in order to have an issue considered by this court. No transcript of the sentencing hearing is contained within the record, which precludes us from considering this issue. *Tenn. R. App. P. 24(b); State v. Draper, 800 S.W.2d 489 (Tenn. Crim. App. 1990)*.

#### **CONCLUSION**

Upon our review, we conclude that the evidence does not preponderate against the trial court's determination that the defendant's alcohol breath test results met all the requirements of Sensing and were admissible. Further, we hold that we are precluded from considering the defendant's sentence under Rule 24 of the Tennessee Rules of Appellate Procedure. Therefore, we affirm the judgment of the trial court.

**STATE OF TENNESSEE v. KIMBERLY M. LARSON****No. M1999-00507-CCA-R3-CD****COURT OF CRIMINAL APPEALS OF TENNESSEE, MIDDLE SECTION, AT  
NASHVILLE***2000 Tenn. Crim. App. LEXIS 603***August 4, 2000, Filed**

**PRIOR HISTORY:** [\*1] Direct Appeal from the Criminal Court for Davidson County. Seth Norman, Judge. No. 97-T-937.

**DISPOSITION:** Judgment of the Criminal Court Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed the judgment of the Criminal Court for Davidson County, Tennessee, convicting her of driving under the influence per se. Defendant argued the lower court erred in denying her motion for acquittal or new trial based upon the improper admittance of scientific evidence. Defendant argued the lower court imposed an excessive sentence.

**OVERVIEW:** Defendant was convicted of driving under the influence per se. The court affirmed the judgment of the lower court and held that defendant's alcohol breath tests were admissible, as the Sensing requirements were met. The court held it could not consider defendant's sentence under Tenn. R. App. P. 24 (b) because there was no transcript of the sentencing hearing within the record. The Sensing standard showed that the breath tests were properly performed, that the officer was certified, the breath testing device was accurate, defendant was observed for 20 minutes prior to the test, the officer followed procedure, and the officer identified the printout record as being defendant's test results. The evidence did not preponderate against the lower court's decision to admit the Intoxilyzer results. The state's proof established all the elements of defendant's offense, thus it was not error to deny defendant's motion for acquittal or new trial based upon improper admittance of scientific evidence. The court was precluded from considering defendant's sentence by Tenn. R. App. P. 24 (b), as no transcript of the sentencing hearing was within the record.

**OUTCOME:** The judgment of the lower court was affirmed. The court held there was not a preponderance of evidence against the lower court's judgment that defendant's alcohol breath tests met all the requirements and were admissible. It was not error to deny defendant's motion for new trial or acquittal, as the state met its burden of proof. The court could not consider defendant's sentence because no transcript of the hearing was contained in the record.

**CORE TERMS:** machine, mouth, alcohol, breath, breath test, calibration, videotape, arrest, certification, blow, arms, blood test, printout, walk, testing, preponderate, driving, minutes, cues, calibrated, forensic, new trial, cross-examination, administered, certificate, sobriety, sentence, one-leg, air, leg

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

[HN1] The controlling rule requires that an officer be able to testify that: (1) the breath tests were performed in accordance with standards and procedures promulgated by Tennessee Bureau of Investigation's (TBI) forensic services division; (2) the testing officer was properly certified; (3) the breath testing instrument used was certified by the TBI, was regularly tested for accuracy, and was working properly when the test was performed; (4) the subject was observed for twenty minutes prior to the test and, during this time, did not have foreign matter in his mouth, did not consume alcohol, smoke, or regurgitate; (5) the officer followed the prescribed operational procedure; and (6) the testing officer identified the printout record offered into evidence as being the test result of the subject involved.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview Evidence > Scientific Evidence > Sobriety Tests***

[HN2] Once the state has shown all six requirements by a preponderance of the evidence, the test results are admitted. A trial court's decision to admit breath alcohol test evidence will not be disturbed on appeal unless the preponderance of the evidence is contrary to that decision.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

***Criminal Law & Procedure > Search & Seizure > General Overview***

***Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination***

[HN3] An officer is not required to search a subject's mouth visually if he: (1) has determined that foreign matter has been removed prior to the twenty-minute observation period and (2) testifies that he continuously observed the test subject for the required period, during which the subject's mouth remained clear. This procedure insures that nothing new or unknown enters the subject's mouth that would skew the test results.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

[HN4] It is the statutory duty of the forensic services division to maintain and certify alcohol breath testing instruments of those police departments participating in the purchasing program with the state. *Tenn. Code Ann. § 38-6-103(d)(2), (g)* (1997).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

***Criminal Law & Procedure > Trials > Motions for Acquittal***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN5] When a motion for acquittal is presented to the trial court, the court is only concerned with the legal sufficiency of the evidence, rather than the weight of the evidence presented. In determining sufficiency, the trial court must consider the parties' evidence, disregard the defendant's evidence which conflicts with that of the state, and afford the state the strongest legitimate view of the evidence, including all reasonable inferences.

**COUNSEL:** V. Michael Fox, Nashville, Tennessee, for the appellant, Kimberly M. Larson.

Paul G. Summers, Attorney General and Reporter; Jennifer L. Bledsoe, Assistant Attorney General; Victor S. Johnson,

III, District Attorney General; and Edward S. Ryan, Assistant District Attorney General, for the appellee, State of Tennessee.

**JUDGES:** ALAN E. GLENN, J., delivered the opinion of the court, in which JOE G. RILEY, J., and WILLIAM B. ACREE, JR., SP.J., joined.

**OPINION BY:** ALAN E. GLENN

**OPINION:** This appeal arises from a guilty verdict returned against the defendant for DUI per se for which she received a sentence of eleven months and twenty-nine days, with all but ten days suspended, a \$ 350 fine, court-ordered rehabilitation, and suspension of driving privileges for one year. On appeal, the defendant challenges the admittance of her breathalyzer test results at trial and alleges that her sentence was excessive. After a review of the record, we affirm the judgment of the trial court.

On June 10, 1998, the defendant, Kimberly Larson, was found [\*2] guilty by a Davidson County jury of driving under the influence per se. She was subsequently sentenced to eleven months and twenty-nine days incarceration, all except ten days suspended, ordered to participate in a rehabilitation program, and prohibited from driving for one year. The defendant then filed a motion for a new trial or acquittal, which was denied by the trial court on April 30, 1999. She has appealed to this court on two issues: (1) whether the trial court erred in denying the motion for acquittal or new trial based upon the improper admittance of scientific evidence; and (2) whether the trial court imposed an excessive sentence. Upon our *de novo* review of the record, we affirm the judgment of the trial court.

## FACTS

The only witness to testify in this case was Officer Harold R. Taylor, a ten-year veteran of the Metropolitan Police Department. At the time of the defendant's arrest, Officer Taylor was assigned to the Breath Alcohol Testing ("BAT") Division of the Traffic Enforcement Unit. He testified that, on the night of April 10, 1997, he was performing a routine patrol of West End Avenue. Just past midnight, Officer Taylor observed the defendant's vehicle [\*3] traveling toward him at what appeared to be a speed greater than the posted speed limit. Using a radar unit, he was able to determine that the defendant's car was going fifty miles per hour in a thirty miles per hour zone. The officer activated his lights and sirens and pulled in behind the defendant's car, but the defendant traveled another six blocks before a second patrolman forced the vehicle to stop by using a public address system to order the defendant to pull over. Officer Taylor approached the defendant's car, got her driver's license, and asked her to exit the vehicle, because she had refused to stop for him. The officer testified that the defendant appeared intoxicated as she got out of her car. He stated that her eyes were red, her face was flushed, and he detected the odor of alcohol. Although her speech was not slurred, Officer Taylor noticed that her mouth was dry, and she kept licking her lips to keep her mouth wet. When asked, the defendant initially denied having consumed any alcohol, but the officer noticed unsteadiness when she walked.

After obtaining the defendant's consent to perform a field sobriety test, the officer instructed and demonstrated for the defendant [\*4] the various maneuvers he asked her to perform. n1 He stated that she did "okay" on the "one-leg stand" n2 until she reached somewhere between eleven and twenty seconds. At that point, the defendant raised her arms to maintain her balance. Somewhere between twenty-one to thirty seconds, the defendant swayed somewhat and kept her arms away from her body to keep her balance. She counted incorrectly in the process of reaching thirty seconds and did not follow the officer's instructions, which indicated to the officer that she was somewhat confused. When Officer Taylor had her perform the "walk and turn" task, n3 the defendant was unable to maintain her balance. Instead of walking the first nine steps and then doing a two-step pivot, the defendant went twelve steps. She raised her arms and missed a couple of heel-to-toe steps. After the "two-step pivot," the defendant then went ten steps instead of nine and raised her arms again to maintain her balance. Based on cues he observed during the defendant's performance on the field sobriety tests, n4 her slow response to his emergency equipment, the odor of alcohol, and her red, glassy eyes, Officer Taylor felt that the defendant was impaired [\*5] and should not be operating a motor vehicle.

n1 According to the Intoxilyzer Alcohol Analyzer results attached to the Form # 132 filled out by Officer Taylor, the breath alcohol test was administered at 1:02 a.m.

n2 Officer Taylor explained that this test requires subjects to stand on whichever leg they choose, hold the other leg approximately six inches off the ground while keeping the hands down to the sides, and count "one thousand one, one thousand two . . . etc." up to "one thousand thirty." This test is administered according to National Highway Traffic Safety Administration (NHTSA). standards. See infra note 7.

n3 This test requires the subject to stand on a line with one foot in front of the other one, heel-to-toe, and walk nine steps with the heel touching the toe of the other foot. At the end of the ninth step, the subject is instructed to do a "two-step pivot," by which the subject brings the back foot around one time and completes the turn on the second step. The subject then begins the "heel-toe" walk again for the nine steps. This test is administered according to NHTSA standards.

[\*6]

n4 Officer Taylor testified that the defendant showed four cues during the "walk and turn" test, which tests the subject's performance of divided attention or multi-tasking, balance, following instructions, and reactions. Checked on the Form # 132 were: "cannot keep balance"; "misses heel-toe" during the first nine steps; "raises arms" during both the first and second nine steps; and "actual steps taken" were twelve during the first set of nine steps and ten during the second set. Our review of the Form # 132 and Officer Taylor's testimony during cross-examination reveals that the defendant also had two cues during the "one-leg stand" test. These were: "sways while on one leg" between twenty-one and thirty seconds and "raises arms while on one leg" between eleven and twenty seconds and also between twenty-one seconds and thirty seconds.

At that point, Officer Taylor read the Tennessee Implied Consent Law to the defendant and asked her if she would submit to a breath test. The defendant agreed to do so. She was placed in the back of Officer Taylor's police car, and he sat in the driver's seat [\*7] so he could turn around. At this point, Officer Taylor asked the defendant the questions on the back of the Form # 132 n5 used by police. She responded that she did not have any illness or injuries, did not take any medications or drugs, had her last meal at 8:00 p.m., and had one mixed drink at approximately 9:00 p.m. The defendant told the officer that she had the mixed drink at Club Platinum on Hayes Street. Because the defendant's eyes were red, Officer Taylor asked how much sleep she had gotten in the past twenty-four hours, to which she replied seven hours. Officer Taylor testified that he did not do any paperwork during his observation of the defendant, which lasted approximately twenty-eight minutes. At the end of the observation period, Officer Taylor administered the breath test to the defendant, and she registered a 0.16%. After advising the defendant of the results, Officer Taylor asked if she wanted to submit to a blood test. He testified that he did not remember if the defendant stated that she wanted a blood test at that time, but she would have been given one if she had indicated that she wanted one. He remembered the defendant asking about the cost, and Taylor told [\*8] her the cost. Taylor stated that if the defendant had said, "That's all right," he would have interpreted her response to mean "no," which he marked on the Form # 132. He took the defendant straight to the jail.

n5 Defense counsel explained to the trial court that this form is the Metropolitan Police Department's DUI report.

Officer Taylor stated that he was trained and certified by the Tennessee Bureau of Investigation to give breath alcohol tests. His certification in the operation of the Intoxilyzer 1400 was entered into evidence. Although the trial judge would not allow the certificate of calibration from CMI, Inc., the maker of the particular Intoxilyzer 1400 used on

the defendant, or the certification of calibration by the TBI for that machine into evidence based on a hearsay objection from defense counsel, the defendant made no objection to the officer's testimony that the machine (number 130) had been certified by the TBI on February 21, 1997. The printout for the defendant's breath test results of 0.167 [\*9] was also entered into evidence through this witness. The videotape of the stop, field sobriety test, and arrest of the defendant was shown to the jury and entered into evidence. n6

n6 Our review of the videotape reveals that the camera in Officer Taylor's car was pointed forward throughout the observation period and administration of the alcohol breath test. This prevents us from observing the defendant during this time. However, the audio portion of the videotape, which contained the conversation between the officer and the defendant, is clearly audible.

The officer explained why the video showed that the defendant had to retake the breath test after a first unsuccessful attempt. He stated that the Intoxilyzer Pack 1400 has a tone meter which indicates when a sufficient sample is being injected into the machine's chamber. To do the test correctly, the subject must blow a constant, steady breath for about eight to ten seconds. Once the chamber has been filled, the machine will cut off the test, and the subject [\*10] stops blowing into it. The Intoxilyzer goes through some internal checks and gives a printout of the alcohol content of the subject's breath. On her first try, the defendant did not give a sufficient breath sample, and the machine self-aborted the first test. The procedure at this point was to recycle the Intoxilyzer and instruct the subject to perform again. The second time the defendant blew, a sufficient sample was obtained for the machine to analyze. Officer Taylor explained that the machine does all of the work internally, so if there is any interference or anything other than alcohol detected, the machine will self-abort the test. The printout will show that there was an insufficient sample and, in the defendant's case, the useless printout from the first test was destroyed. Officer Taylor testified that the defendant did not put anything into her mouth, smoke anything, belch, regurgitate, or do anything else that would upset the test while he was observing her. He also stated that he followed all of the appropriate procedures to get the results of the second test. After taking the defendant into custody, Officer Taylor attempted to secure her vehicle and found an open bottle [\*11] of beer in the passenger side floorboard. After viewing the video, the officer acknowledged that the defendant initially stated that she wanted a blood test, but later said that she did not after talking to another officer on the scene.

On cross-examination, a copy of the Form # 132 was entered into evidence through Officer Taylor. He stated that he could not tell if the defendant's driving was erratic or unlawful in any other way besides speeding, because she was so far ahead of him. The officer was confronted with his statement at the preliminary hearing in which he stated that the defendant did not weave in her lane as far as he could see. He stated that his trial testimony was the same.

After viewing the tape, Officer Taylor still was of the opinion that the defendant was unsteady as she exited her vehicle. He admitted that the defendant did not attempt to flee, did not lean against her car, or fall out of her vehicle. He also admitted that, from the odor of alcohol alone, he cannot tell what a subject has had to drink, how much, or over what period of time. He agreed that his training has taught him that ethyl alcohol has no odor but still stated that he smelled alcohol on [\*12] the defendant. He did not form an opinion that probable cause existed to arrest the defendant at the time he smelled alcohol on her or when he saw her speeding but felt he might arrest her for reckless driving.

Defense counsel reviewed with Officer Taylor the NHTSA n7 standard demonstrations and instructions given to the defendant before each field sobriety task, who said that he did not give her the instruction, "Do not hop or sway." The officer testified that the defendant said that she understood his instructions, and it was his opinion that she did understand. He explained that there are four cues in the "one-leg stand" test that are signs of intoxication, namely, the sway, raised arms, hopping on one leg, and putting the foot down before time is up. After observing the defendant's performance on the "one-leg stand" test, Officer Taylor had not yet formed an opinion as to whether probable cause existed to place the defendant under arrest. He testified that he had one more task to perform before doing so. The defendant was instructed on how to do the "walk and turn" test, and she seemed to understand. After observing four cues during the defendant's performance of this test, Officer [\*13] Taylor then formed his opinion that probable cause

existed for the defendant's arrest. Taylor agreed that the videotape showed that the defendant was not under arrest when he read her the Implied Consent Law but that she was placed under arrest after he read it. She was not handcuffed. He agreed with defense counsel that the defendant cooperated with him and did not have trouble getting into his patrol car. He stated that she had dry mouth and had discarded the gum she was chewing after finishing the field sobriety tests.

n7 This stands for the National Highway Traffic Safety Administration. *State v. Sensing*, 843 S.W.2d 412, 414 (Tenn. 1992).

After seeing the videotape, Taylor admitted on cross-examination that his recollection at the preliminary hearing that he conducted the period of observation on the defendant outside his car was incorrect. He explained that he put the defendant in the back seat on the right-hand side and began his observation after he got into the car and observed the [\*14] defendant until he started the Intoxilyzer. During the observation period, Officer Taylor read the defendant her Miranda rights. He testified that he had a card with those rights printed on it but did not get the card out to look at it. When he asked the defendant the questions listed on the Form # 132 under "Suspect's General Health and Investigative Questions," Officer Taylor did not record her answers at that time. According to the Form # 132, he observed the defendant for a little longer than twenty minutes before the breath test was given. Officer Taylor admitted that he could not verify the documents certifying the machine he used, but he could say those are the documents that are given out for the machines and that the machines are sent to the TBI lab.

Although he admitted that checking a subject's mouth prior to the breath test is part of the routine that an officer is supposed to follow, Officer Taylor stated that he did not check the defendant's mouth before he asked her to blow; however, he stated he had been watching her, and she did not put anything into her mouth. When Officer Taylor handed the defendant a new mouthpiece to use in the test, he did not look down [\*15] into the box, because he could reach down and get it. The defendant had a problem with her first attempt to blow, and the machine was heard on the videotape to be printing something out. Officer Taylor stated that the machine printed out "insufficient sample." He explained that the portion of the printout for "subject test" would be blank and "insufficient sample" would be printed at the bottom with an asterisk right above it. The reading would be zero. He then had to start the sequence over again. Because the machine was between the seats, near the officer's lap, and the mouthpieces are kept on the floorboard, Officer Taylor stated that he never took his eyes off the defendant. He explained that several times on her second attempt to complete the test, the defendant would blow up to a certain point and then stop. The Intoxilyzer would show "please blow," and Officer Taylor would instruct her again to blow out a steady, continuous breath.

In his testimony, Officer Taylor explained that a steady, continuous breath is necessary to get a sufficient sample to get an accurate breath count. He agreed that deep lung air is the type of sample needed by the computer in the machine to convert [\*16] a breath alcohol reading into blood alcohol content. He stated that the machine is so sensitive that it can distinguish between deep lung air and regular air, and the Intoxilyzer will abort the test if deep lung air is not in the sample obtained. The videotape also showed Officer Taylor telling another officer at the scene that he expected the defendant to "blow a ten" (0.10) on the machine. He testified that he did not question the machine when the results showed the defendant had a 0.16% blood alcohol content, but he denied that he was relying on the machine over his ability as a police officer to recognize that someone is under the influence. He stated that he had been a police officer for sixteen years, six of those as a DUI Task Force officer. Officer Taylor testified he had attended classes where people drink, and he was supposed to guess their breath alcohol content. He felt he was good at doing so.

When asked by defense counsel if he allowed the defendant to practice the field sobriety tests, Officer Taylor stated that he did not. He also stated that it is not normal to walk heel-to-toe, and agreed that, if a person were allowed to practice, he or she would be able to do it [\*17] better. He stated that he did not tell the defendant what she had to do to pass the tests. It was his opinion that the defendant was under the influence and that he had probable cause to believe she was under the influence, although he agreed that the jury makes that determination.

Defense counsel further cross-examined the officer about the videotaped conversation with the defendant concerning her desire to take a blood test after the breath test. Officer Taylor agreed that the videotape showed that the defendant responded, "Yes, I do." When the officer told her it would be at her own expense, she replied, "That's okay." It was Officer Taylor's recollection that the defendant decided not to take a blood test after another officer, who was a friend of the defendant, came to the scene and talked with her. He acknowledged that there was a break in the recording where the audio was off during the time that the defendant was talking with her friend but testified that the defendant stated she did not want the blood test before Officer Taylor got back in the car and turned the tape back on. The other officer was driving off at that time.

The State then rested its case. The defense called [\*18] no witnesses, and the case went to the jury for deliberations. The jury ultimately found the defendant guilty of DUI per se.

## ANALYSIS

### Admission of Intoxilyzer Test Results

The general fundamental requirements for the admission of breath alcohol test results were established in *State v. Sensing*, 843 S.W.2d 412 (Tenn. 1992); *State v. Bobo*, 909 S.W.2d 788, 790 (Tenn. 1995); and *State v. Deloit*, 964 S.W.2d 909, 912 (Tenn. Crim. App. 1997). [HN1] The Sensing standard requires that an officer be able to testify that: (1) the tests were performed in accordance with standards and procedures promulgated by TBI's forensic services division; (2) the testing officer was properly certified; (3) the breath testing instrument used was certified by the TBI, was regularly tested for accuracy, and was working properly when the test was performed; (4) the subject was observed for twenty minutes prior to the test and, during this time, did not have foreign matter in his mouth, did not consume alcohol, smoke, or regurgitate; (5) the officer followed [\*19] the prescribed operational procedure; and (6) the testing officer identified the printout record offered into evidence as being the test result of the subject involved. *Sensing*, 843 S.W.2d at 416; *Deloit*, 964 S.W.2d at 912.

[HN2]

Once the State has shown all six Sensing requirements by a preponderance of the evidence, the test results are admitted. A trial court's decision to admit breath alcohol test evidence will not be disturbed on appeal unless the preponderance of the evidence is contrary to that decision. *State v. Edison*, 9 S.W.3d 75, 77-78 (Tenn. 1999).

The defendant contends that the trial court erred in admitting the results of the defendant's Intoxilyzer test, because the State failed to meet four of the Sensing requirements. Specifically, the defendant argues that the reliability of the test was compromised, because: (1) the test was not performed in accordance with the TBI's standards and operating procedure; (2) Officer Taylor did not properly observe the defendant for twenty minutes and failed to visually check the [\*20] defendant's mouth before giving the test; (3) there was no evidence that the Intoxilyzer was properly certified, regularly calibrated, and working properly; and (4) there was no evidence that Officer Taylor followed the prescribed operational procedure. The defendant correctly argues that, if the State failed to satisfy Sensing, it could only get the test results admitted under traditional rules of evidence that would assure the reliability of the test. *Deloit*, 964 S.W.2d at 913. This would require a showing that the device was scientifically acceptable and accurate and that Officer Taylor was qualified to interpret the results for the jury. 964 S.W.2d at 911. According to the defendant, this was not done at trial; and, therefore, the evidence was not admissible.

We do not agree that the breath alcohol test results were inadmissible. After a careful review of the record, we conclude that the evidence does not preponderate against the trial court's decision to admit the Intoxilyzer results.

The defendant's contention that the State failed to establish that the defendant's test was performed according to TBI standards and procedures (Sensing [\*21] requirement # 1), as well as her contention that Officer Taylor did not properly observe her or check her mouth before giving the test (requirement # 4), are without merit. Officer Taylor testified that he was trained and certified by the TBI to operate the Intoxilyzer 1400 and administer breath alcohol tests. His certification was entered into evidence. He then described how he conducted the test on the defendant and what

procedure he used to get an accurate reading. He testified that he observed the defendant uninterrupted for over twenty minutes and that she put nothing in her mouth during that time. n8 When the defendant's first breath test was insufficient, Officer Taylor testified that the procedure was to recycle the Intoxilyzer and try again. In addition, he stated that he followed all of the appropriate procedures in obtaining the test results from the second test. This testimony is stronger than that of the officer in *State v. Edison*, in which the supreme court determined that the Sensing requirement was met that proper procedures be followed during the test. In that case, the officer testified that he could not remember if he followed the proper procedures but knew [\*22] he must have, since there are "just certain procedures that you have to follow to run the test." *Edison*, 9 S.W.3d at 79. In the present case, Officer Taylor testified that he did follow all the proper procedures, which was more definite than the officer's testimony in *Edison*.

n8 The audio portion of the videotape of the defendant's arrest reveals that on three occasions Officer Taylor advised the defendant regarding any foreign objects in her mouth: "Do you have anything in your mouth?"; "Make sure you put nothing in your mouth"; and "Put nothing in your mouth."

Although Officer Taylor admitted on cross-examination that he did not visually inspect the defendant's mouth before giving the breath test, this is not fatal to the State's Sensing proof. This court has not required that [HN3] an officer search a subject's mouth visually if he: (1) has determined that foreign matter has been removed prior to [\*23] the twenty-minute observation period and (2) testifies that he continuously observed the test subject for the required period, during which the subject's mouth remained clear. See *State v. Deloit*, 964 S.W.2d 909, 916-17 (Tenn. Crim. App. 1997) (discussing *State v. Fields*, 1996 Tenn. Crim. App. LEXIS 219, No. 01 C01-9412-CC-00438, 1996 WL 180706 (Tenn. Crim. App., Nashville, Apr. 12, 1996)); *State v. Jarnagin*, 2000 Tenn. Crim. App. LEXIS 378, No. E1998-00892-CCA-R8-CD, 2000 WL 575232 (Tenn. Crim. App., Knoxville, May 12, 2000). This procedure insures that nothing new or unknown enters the subject's mouth that would skew the test results. *State v. Cook*, 9 S.W.3d 98, 100-01 (Tenn. 1999). In the present case, Officer Taylor testified that the defendant spit out her gum before he continuously observed her for the required twenty-minute period. He did not look away from her to do paperwork or to administer the breath test. Therefore, we cannot conclude that the evidence in the record preponderates against the trial court's determination that the proper procedures and observation of the defendant [\*24] were followed.

Evidence was also presented that the particular Intoxilyzer used in the defendant's test was properly certified, calibrated, and working properly (Sensing requirement # 3). Officer Taylor testified that the machine had been certified by the TBI on February 21, 1997, less than two months before it was used on the defendant. He also stated he knew that the machine was sent to the TBI lab and that the certification of calibration from the TBI was returned with the machine. Again, this testimony is more specific than that presented in *State v. Edison*, in which this Sensing requirement was met by an officer's testimony that the certification of calibration was posted at the jail, and the machine was checked every three months, although he did not know the date of the last calibration. *State v. Edison*, 9 S.W.3d 75, 78 (Tenn. 1999). We conclude that the evidence does not preponderate against the trial court's finding that the Sensing requirement of a properly calibrated and working instrument was met by the State.

Further bolstering the State's argument, we conclude that the trial court should have allowed the certificate of calibration [\*25] to be entered into evidence. In Sensing, the court stated:

The forensic services division inspects, repairs and maintains all units previously certified, including use of a laboratory computer controller to poll each instrument and correlate all test data of each instrument for clarification of instrument performance. Every 90 days forensic services division personnel conduct tests of each instrument under laboratory control conditions and record the results, noting any required adjustments or repairs of each unit. The certification also provides that upon request of the court, district attorney, defendant, or other person or party having an interest in the use of the test performed on an approved breath testing instrument an official copy of those standards and procedures will be certified pursuant to *T.C.A. § 38-6-107* and delivered to the requesting party. We are of the opinion that this procedure to supply records also conforms with the provisions of Tennessee Rule of Evidence, 803(8) as an

exception to the hearsay evidence rule.

843 S.W.2d at 415-16. [HN4] [\*26] It is the statutory duty of the forensic services division to maintain and certify alcohol breath testing instruments of those police departments participating in the purchasing program with the state. *Tenn. Code Ann. § 38-6-103(d)(2), (g)* (1997). The certificate of calibration from the bureau is part of this process and is given to the police departments when the instrument is calibrated. At trial, Officer Taylor testified that this certification was given back to the department after the machine was sent to the TBI for calibration. Barring any other evidentiary defects, this appears to fit within Tennessee Rule of Evidence 803(8), which carves out an exception to hearsay for a report from a public agency issued pursuant to a duty imposed by law. However, in the present case, the testimony of Officer Taylor was sufficient to establish that the machine was working properly, even in the absence of the certificate of calibration.

We conclude that the evidence does not preponderate against the trial court's determination that the State met its burden of proving all of the Sensing requirements to admit the alcohol breath test.

Since we have concluded [\*27] that the Intoxilyzer results were properly admitted into evidence, we now turn to the defendant's contention that the trial court erred in denying her motion for acquittal or a new trial. [HN5] When a motion for acquittal is presented to the trial court, the court is only concerned with the legal sufficiency of the evidence, rather than the weight of the evidence presented. *State v. Blanton, 926 S.W.2d 953, 957 (Tenn. Crim. App. 1996)*. In determining sufficiency, the trial court must consider the parties' evidence, disregard the defendant's evidence which conflicts with that of the State, and afford the State the strongest legitimate view of the evidence, including all reasonable inferences. 926 S.W.2d at 957-58. The State's proof was sufficient to establish all elements of the offense of DUI, and the trial court was correct in denying the defendant's motion for acquittal or for a new trial based upon improper admittance of scientific evidence.

#### **Excessive Sentence**

The defendant further contends that the trial court imposed too harsh a sentence for the [\*28] DUI per se conviction. From the record provided, we cannot determine whether the trial court acted properly or not. It is the appellant's obligation to prepare an adequate record on appeal in order to have an issue considered by this court. No transcript of the sentencing hearing is contained within the record, which precludes us from considering this issue. *Tenn. R. App. P. 24(b); State v. Draper, 800 S.W.2d 489 (Tenn. Crim. App. 1990)*.

#### **CONCLUSION**

Upon our review, we conclude that the evidence does not preponderate against the trial court's determination that the defendant's alcohol breath test results met all the requirements of Sensing and were admissible. Further, we hold that we are precluded from considering the defendant's sentence under Rule 24 of the Tennessee Rules of Appellate Procedure. Therefore, we affirm the judgment of the trial court.

**NOTICE:** [\*1] PLEASE CONSULT THE TEXAS RULES OF APPELLATE PROCEDURE FOR CITATION OF UNPUBLISHED OPINIONS.

**SUBSEQUENT HISTORY:** Related proceeding at *Lipscomb v. State*, 2005 Tex. App. LEXIS 7114 (Tex. App. Texarkana, Aug. 31, 2005)

Petition for discretionary review refused by *In re Lipscomb*, 2006 Tex. Crim. App. LEXIS 310 (Tex. Crim. App., Feb. 8, 2006)

**PRIOR HISTORY:** On Appeal from the 124th Judicial District Court. Gregg County, Texas. Trial Court No. 30927-B.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** After defendant's motion to suppress the State's evidence as the product of an illegal traffic stop was denied, he pled guilty to unlawful possession of a firearm by a felon, among other various charges, and the 124th Judicial District Court of Gregg County, Texas, sentenced him to 10 years' confinement. Defendant appealed.

**OVERVIEW:** On review, defendant contended the trial court erred in denying his motion to suppress. The appellate court disagreed, finding that because there was sufficient evidence to provide the officer probable cause to believe defendant was speeding, he was authorized to stop defendant. Thus, the initial traffic stop was lawful. Further, the videotape from the officer's vehicle clearly showed defendant gave willing consent to the officer's request to search the vehicle. And, less than 10 seconds passed between the time the officer informed defendant that he would receive a warning citation and the moment when defendant consented to a search of the vehicle. The lapse of 10 seconds did not amount to an unreasonable extension of the duration of the traffic stop. Finally, defendant made no effort to point to any evidence in the record showing a causal connection between the delay in being brought before a magistrate and his confession. Moreover, defendant's written statement showed that he was warned of his rights before the statement was taken. As such, *Tex. Code Crim. Proc. Ann. art. 15.17* (2005) did not bar the statement's admissibility.

**OUTCOME:** The judgment was affirmed.

**CORE TERMS:** radar, traffic stop, confession, speed, calibration, traveling, case number, speeding, possessing, suspicion, license, fork, weapon, tuning fork, interstate, calibrated, frequency, external, tuning, warned, probable cause, dispatcher, videotape, warning, minute, rear, controlled substance, motion to suppress, causal connection, unauthorized use

*Civil Procedure > Appeals > Standards of Review > De Novo Review*

*Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence*

[HN1] An appellate court reviews a trial court's ruling on a motion to suppress for abuse of discretion. A trial court abuses its discretion when it acts unreasonably or arbitrarily, if it acts outside the zone of reasonable disagreement, or if its decision is made without reference to guiding rules and principles. As the finder of historical fact, the trial court is free to believe or disbelieve the testimony or evidence from any witness, even if that witness's testimony or a piece of evidence is otherwise not controverted by the opposing side. An appellate court reviews the trial court's application of law to the lower court's findings of historical fact under a de novo standard. If the trial court does not issue written findings of fact and conclusions of law regarding the ruling on a motion to suppress, the reviewing court should assume the trial court made implicit findings to support its ruling, so long as those implied findings are supported by the record. If the trial court's decision can be upheld under any theory applicable to the case, the reviewing court must affirm that judgment.

**OPINION:**

Opinion by Chief Justice Morriss

MEMORANDUM OPINION

When Deputy Tracy Freeman of the Gregg County Sheriff's Office saw Terrance Lamont Lipscomb's car traveling along Interstate 20, Freeman believed Lipscomb was traveling in excess of the seventy mile-per-hour posted speed limit. Freeman verified his suspicions using radar, which indicated Lipscomb was traveling at seventy-five miles per hour. Freeman then initiated a traffic stop based on Lipscomb's speed. Events following the traffic stop n1 resulted in Lipscomb being arrested for several offenses, including the one at issue in this case: unlawful possession of a firearm by a felon. n2 *See TEX. PEN. CODE ANN. § 46.04* (Vernon Supp. 2004-2005). Lipscomb moved to suppress the State's evidence as the product of an illegal traffic stop. The trial court denied Lipscomb's motion [\*2] after conducting a hearing, and Lipscomb subsequently pled guilty to the various charges without the benefit of a plea agreement. Lipscomb was sentenced in this case to ten years' confinement. n3 He now appeals the trial court's denial of his motion to suppress evidence. For the reasons stated, we affirm the trial court's judgment.

n1 Shortly after Lipscomb exited his vehicle, a struggle ensued pitting Lipscomb against Freeman and several other police officers who had arrived at the scene. During the scuffle, Lipscomb was able to get an officer's service weapon and, using that weapon, threatened to commit suicide. Had it not been for the intervention of one of the officers, who was able to put his hand between the gun's firing pin and the hammer, Lipscomb might have succeeded in that suicide attempt.

n2 Lipscomb has also appealed his conviction and sentence in five companion cases. Our disposition in those cases is presented by way of separate opinions. *See Lipscomb v. State, 2005 Tex. App. LEXIS 7120, No. 06-04-00176-CR* (taking weapon from police officer); *Lipscomb v. State, 2005 Tex. App. LEXIS 7114, No. 06-04-00177-CR* (possessing marihuana); *Lipscomb v. State, 2005 Tex. App. LEXIS 7116, No. 06-04-00178-CR* (unauthorized use of motor vehicle); *Lipscomb v. State, 2005 Tex. App. LEXIS 7117, No. 06-04-00179-CR* (possessing controlled substance with intent to deliver); and *Lipscomb v. State, 2005 Tex. App. LEXIS 7115, No. 06-04-00180-CR* (assault on public servant).

[\*3]

n3 In the five companion cases, Lipscomb was sentenced as follows: case number 06-04-00176-CR (taking weapon from police officer), twenty years' imprisonment; case number 06-04-00177-CR (possessing marihuana), eighteen months in a state jail facility; case number 06-04-00178-CR (unauthorized use of motor vehicle), eighteen months in a state jail facility; case number 06-04-00179-CR (possessing controlled substance with intent to deliver), life imprisonment; and case number 06-04-00180-CR (assault on public servant), twenty years' imprisonment, to run consecutively to the other sentences.

[HN1] An appellate court reviews a trial court's ruling on a motion to suppress for abuse of discretion. *Oles v. State, 993 S.W.2d 103, 106 (Tex. Crim. App. 1999)*; *Maysonet v. State, 91 S.W.3d 365, 369 (Tex. App.--Texarkana 2002, pet. ref'd)*. A trial court abuses its discretion when it acts unreasonably or arbitrarily, if it acts outside the zone of reasonable

disagreement, or if its decision is made without reference to guiding rules and principles. *Montgomery v. State*, 810 S.W.2d 372, 380 (Tex. Crim. App. 1990). [\*4] As the finder of historical fact, the trial court is free to believe or disbelieve the testimony or evidence from any witness, even if that witness' testimony or a piece of evidence is otherwise not controverted by the opposing side. *State v. Ross*, 32 S.W.3d 853, 855 (Tex. Crim. App. 2000). An appellate court reviews the trial court's application of law to the lower court's findings of historical fact under a de novo standard. *Id.* at 856. If the trial court does not issue written findings of fact and conclusions of law regarding the ruling on a motion to suppress, the reviewing court should assume the trial court made implicit findings to support its ruling, so long as those implied findings are supported by the record. *Id.*; *Maysonet*, 91 S.W.3d at 369. If the trial court's decision can be upheld under any theory applicable to the case, the reviewing court must affirm that judgment. *Ross*, 32 S.W.3d at 855-56.

(1) *The Initial Traffic Stop Was Valid*

Lipscomb first contends Freeman was without probable cause to initiate a traffic stop. Lipscomb argues Freeman failed to testify that he properly used his radar [\*5] unit in this case (in accordance with widely accepted police techniques), and that Freeman's failure to so testify violates the requirements set forth in this Court's opinion in *Maysonet* regarding the admissibility of radar evidence. Lipscomb next asserts that because there were other cars nearby, of which Freeman also checked the speed, it is possible Freeman's radar measured only the speed of these other cars and not the speed of Lipscomb's car. Because there was sufficient evidence to provide Freeman probable cause to believe Lipscomb was speeding, we reject these arguments.

Freeman's testimony, if believed by the trial court--and we assume it was because the trial court ruled against Lipscomb--would support a finding that Lipscomb was committing a crime by speeding. [HN2] Seventy miles per hour is the maximum lawful speed during daytime hours on Texas interstate roadways. *TEX. TRANSP. CODE ANN.* § 545.352(b) (Vernon Supp. 2004-2005). Traveling in excess of that speed on a Texas interstate is unlawful. *TEX. TRANSP. CODE ANN.* § 545.352(a) (Vernon Supp. 2004-2005). Freeman, a certified peace officer and a fourteen-year veteran [\*6] of the sheriff's department, testified he first observed Lipscomb traveling at a speed Freeman believed to be in excess of the posted speed limit. Freeman also testified that, based on his experience, he "can get pretty close to telling that a vehicle is traveling faster than the normal flow of traffic." Freeman subsequently verified his suspicions using "calibrated" radar. n4 Based on his visual observations and the confirmation he received from his radar unit, Freeman had specific information that would logically lead him to conclude Lipscomb was unlawfully speeding. We believe Freeman's testimony about using *calibrated* radar, testimony which the trial court could have properly interpreted to mean the radar was operating correctly, when combined with the officer's earlier testimony that he had visually estimated Lipscomb's speed to be excessive, was sufficient to satisfy the requirements we set forth in *Maysonet*. And, to the extent that there may have been conflicting evidence about which car Freeman's radar measured, the trial court resolved such factual conflicts against Lipscomb. Because, here, that conflict resolution is supported by the record, we will not disturb it. [\*7]

n4 Radar "calibration" typically involves a two-step process. The first step, called "external" calibration, involves the use of one or more special tuning forks that are designed to resonate at specific, different frequencies. The tuning forks are struck and then placed in front of the radar unit. The vibrations from the forks resonate at predictable, specific frequencies. If the radar unit is operating properly, the unit will be able to detect the different, specific frequency generated by each tuning fork, which will then alert the officer whether the radar unit is operating properly. The second step, called "internal" calibration, is performed by pushing a button on the radar unit, which causes the unit to cycle through several internal checks and then display specific numbers on a display panel. The officer then verifies that these numbers indicate the radar unit is working properly. If the radar unit is properly calibrated, then the officer may assume the unit is in proper working order. See generally *United States v. Charles*, No. 03-15-SLR, 2003 U.S. Dist. LEXIS 13477, at \* 2-3 (D. Del. July 23, 2003) (not designated for publication) (describing process of using tuning fork to calibrate radar); *Aurora v. McIntyre*, 719 P.2d 727, 728-29 (Colo. 1986) (discussing process of certifying tuning forks); *Connecticut v.*

*Trantolo*, 37 Conn. Supp. 601, 430 A.2d 465, 466 (Conn. Super. Ct. 1981) (using tuning fork to calibrate radar); *State v. Tailo*, 70 Haw. 580, 779 P.2d 11, 12 (Haw. 1989) (describing process of both external and internal calibration); *Louisiana v. Creel*, 490 So. 2d 711, 714 (La. Ct. App. 1986); *Mills v. State*, 99 S.W.3d 200, 203 (Tex. App.--Fort Worth 2002, *pet. ref'd*) (discussing process of internal calibration); *Untiedt v. Virginia*, 18 Va. App. 836, 447 S.E.2d 537, 539, 11 Va. Law Rep. 131 (Va. Ct. App. 1994) (external calibration process).

[\*8]

Accordingly, we cannot say the trial court erred by holding Freeman was authorized to stop Lipscomb for speeding. The initial traffic stop was, therefore, lawful.

(2) *The Traffic Stop Was of Reasonable Length*

In his second and third points of error, Lipscomb contends Freeman unnecessarily prolonged the traffic stop and searched Lipscomb's vehicle without valid consent. [HN3] Officers are permitted to ask for identification, a valid driver's license, and proof of insurance during a traffic stop. *Davis v. State*, 947 S.W.2d 240, 245 n.6 (Tex. Crim. App. 1997). Officers may also check for outstanding warrants. *Id.* The officer must, however, use "the least intrusive means reasonably available to verify or dispel his suspicion in a short period of time." *Id.* Under *Davis*, Freeman's detention of Lipscomb "was required to be temporary and could last no longer than was necessary" to satisfy or dispel the officer's original suspicion of speeding and to conclude the stop. *Id.*

In this case, a videotape of the traffic stop was entered into evidence. A review of that videotape shows Freeman initiated the stop and made first contact with Lipscomb at 7:53 a.m. [\*9] Freeman informed Lipscomb of the purpose of the stop, asked for Lipscomb's license and proof of insurance, and briefly inquired into Lipscomb's driving and criminal histories. This initial conversation lasted barely one minute. Freeman then returned to his patrol car, contacted a dispatcher, and requested a criminal and out-of-state license history on Lipscomb. Eight to nine minutes later, the dispatcher contacted Freeman with those histories, including verification that Lipscomb had spent time in the penitentiary for narcotics trafficking. Freeman then returned to the rear of Lipscomb's car and asked Lipscomb to step to the rear of that vehicle. Freeman then appears to tell Lipscomb he will receive only a warning citation, and Freeman then asks for consent to search, which Lipscomb provides.

[HN4] Consent to search is "one of the well-established exceptions to the constitutional requirements of both a warrant and probable cause." *Carmouche v. State*, 10 S.W.3d 323, 331 (Tex. Crim. App. 2000) (citing *Schneckloth v. Bustamonte*, 412 U.S. 218, 219, 36 L. Ed. 2d 854, 93 S. Ct. 2041 (1973); *State v. Ibarra*, 953 S.W.2d 242, 243 (Tex. Crim. App. 1997)). The videotape [\*10] clearly shows Lipscomb gave willing consent to the officer's request to search the vehicle. Lipscomb's contention on appeal to the contrary is disingenuous and not supported by the evidence. Less than ten seconds passed between the time Freeman informed Lipscomb (at the rear of the car) that the latter would receive a warning citation and the moment when Lipscomb consented to a search of the vehicle. Thus, we cannot conclude, given the sequence of discrete facts of this case, that the lapse of ten seconds amounted to an unreasonable extension of the duration of the traffic stop. n5 We therefore overrule Lipscomb's second and third points of error.

n5 The previous period of eight to nine minutes, between the time Lipscomb's driver's license and criminal history information were requested from the police dispatcher and the time the information was provided to the officer on the scene, is a legitimate period of investigation by the officer. *See Davis*, 947 S.W.2d at 245 n.6.

(3) *The Confession* [\*11] *Was Admissible*

In his final point of error, Lipscomb contends his written custodial confession should have been inadmissible because it was taken before he was taken to a magistrate to receive the warnings required by *Article 15.17 of the Texas Code of Criminal Procedure*. See *TEX. CODE CRIM. PROC. ANN. art. 15.17* (Vernon 2005). [HN5] "It is well settled that the failure to take an arrestee before a magistrate in a timely manner will not invalidate a confession unless there is proof of a causal connection between the delay and the confession." *Renfro v. State*, 958 S.W.2d 880, 887 (Tex. App.--Texarkana 1997, pet. ref'd) (citing *Cantu v. State*, 842 S.W.2d 667, 680 (Tex. Crim. App. 1992)). "Additionally, when a person is properly warned of his rights by the person taking his confession, the failure to take the accused before a magistrate before taking the confession does not invalidate the confession." *Id.* (citing *Self v. State*, 709 S.W.2d 662, 667 (Tex. Crim. App. 1986)).

Lipscomb has made no effort to point to any evidence in the record showing a causal connection [\*12] between the delay in being brought before a magistrate and his confession, nor has any been shown by our review of the record. Moreover, the first paragraph of Lipscomb's confession reads,

I, TERRENCE [sic] LAMONTE LIPSCOMB, do freely and voluntarily make the following statement to Investigator MIKE CLAXTON and Ranger RONNY GRIFFITH after having been warned by him on the 18th day of August 2003 at 9:30 AM at the Gregg County Sheriff's Office CID, that I have the right to remain silent and not make any statement at all and that any statement I make may be used against me at my trial; any statement I make may be used as evidence against me in court; I have the right to have a lawyer present to advise me prior to and during any questioning; if I am unable to employ a lawyer, and I have the right to have a lawyer appointed to advise me prior to and during questioning; and I have the right to terminate the interview at any time. Knowing and intelligently understanding my rights, I freely and voluntarily wish to waive the above rights and do hereby make this statement . . . .

The statement itself shows Lipscomb was warned of his rights before the statement was taken; [\*13] *Article 15.17* therefore does not bar the statement's admissibility. We overrule Lipscomb's final point of error.

For the reasons stated, we affirm the trial court's judgment.

Ross*, 32 S.W.3d 853, 855 (Tex. Crim. App. 2000). An appellate court reviews the trial court's application of law to the lower court's findings of historical fact under a de novo standard. *Id.* at 856. If the trial court does not issue written findings of fact and conclusions of law regarding the ruling on a motion to suppress, the reviewing court should assume the trial court made implicit findings to support its ruling, so long as those implied findings are supported by the record. *Id.*; *Maysonet*, 91 S.W.3d at 369. If the trial court's decision can be upheld under any theory applicable to the case, the reviewing court must affirm that judgment. *Ross*, 32 S.W.3d at 855-56.

(1) *The Initial Traffic Stop Was Valid*

Lipscomb first contends Freeman was without probable cause to initiate a traffic stop. Lipscomb argues Freeman failed to testify that he properly used his radar [\*5] unit in this case (in accordance with widely accepted police techniques), and that Freeman's failure to so testify violates the requirements set forth in this Court's opinion in *Maysonet* regarding the admissibility of radar evidence. Lipscomb next asserts that because there were other cars nearby, of which Freeman also checked the speed, it is possible Freeman's radar measured only the speed of these other cars and not the speed of Lipscomb's car. Because there was sufficient evidence to provide Freeman probable cause to believe Lipscomb was speeding, we reject these arguments.

Freeman's testimony, if believed by the trial court--and we assume it was because the trial court ruled against Lipscomb--would support a finding that Lipscomb was committing a crime by speeding. [HN2] Seventy miles per hour is the maximum lawful speed during daytime hours on Texas interstate roadways. *TEX. TRANSP. CODE ANN.* § 545.352(b) (Vernon Supp. 2004-2005). Traveling in excess of that speed on a Texas interstate is unlawful. *TEX. TRANSP. CODE ANN.* § 545.352(a) (Vernon Supp. 2004-2005). Freeman, a certified peace officer and a fourteen-year veteran [\*6] of the sheriff's department, testified he first observed Lipscomb traveling at a speed Freeman believed to be in excess of the posted speed limit. Freeman also testified that, based on his experience, he "can get pretty close to telling that a vehicle is traveling faster than the normal flow of traffic." Freeman subsequently verified his suspicions using "calibrated" radar. n4 Based on his visual observations and the confirmation he received from his radar unit, Freeman had specific information that would logically lead him to conclude Lipscomb was unlawfully speeding. We believe Freeman's testimony about using *calibrated* radar, testimony which the trial court could have properly interpreted to mean the radar was operating correctly, when combined with the officer's earlier testimony that he had visually estimated Lipscomb's speed to be excessive, was sufficient to satisfy the requirements we set forth in *Maysonet*. And, to the extent that there may have been conflicting evidence about which car Freeman's radar measured, the trial court resolved such factual conflicts against Lipscomb. Because, here, that conflict resolution is supported by the record, we will not disturb it. [\*7]

n4 Radar "calibration" typically involves a two-step process. The first step, called "external" calibration, involves the use of one or more special tuning forks that are designed to resonate at specific, different frequencies. The tuning forks are struck and then placed in front of the radar unit. The vibrations from the forks resonate at predictable, specific frequencies. If the radar unit is operating properly, the unit will be able to detect the different, specific frequency generated by each tuning fork, which will then alert the officer whether the radar unit is operating properly. The second step, called "internal" calibration, is performed by pushing a button on the radar unit, which causes the unit to cycle through several internal checks and then display specific numbers on a display panel. The officer then verifies that these numbers indicate the radar unit is working properly. If the radar unit is properly calibrated, then the officer may assume the unit is in proper working order. See generally *United States v. Charles*, No. 03-15-SLR, 2003 U.S. Dist. LEXIS 13477, at \* 2-3 (D. Del. July 23, 2003) (not designated for publication) (describing process of using tuning fork to calibrate radar); *Aurora v. McIntyre*, 719 P.2d 727, 728-29 (Colo. 1986) (discussing process of certifying tuning forks); *Connecticut v.*

*Trantolo*, 37 Conn. Supp. 601, 430 A.2d 465, 466 (Conn. Super. Ct. 1981) (using tuning fork to calibrate radar); *State v. Tailo*, 70 Haw. 580, 779 P.2d 11, 12 (Haw. 1989) (describing process of both external and internal calibration); *Louisiana v. Creel*, 490 So. 2d 711, 714 (La. Ct. App. 1986); *Mills v. State*, 99 S.W.3d 200, 203 (Tex. App.--Fort Worth 2002, pet. ref'd) (discussing process of internal calibration); *Untiedt v. Virginia*, 18 Va. App. 836, 447 S.E.2d 537, 539, 11 Va. Law Rep. 131 (Va. Ct. App. 1994) (external calibration process).

[\*8]

Accordingly, we cannot say the trial court erred by holding Freeman was authorized to stop Lipscomb for speeding. The initial traffic stop was, therefore, lawful.

(2) *The Traffic Stop Was of Reasonable Length*

In his second and third points of error, Lipscomb contends Freeman unnecessarily prolonged the traffic stop and searched Lipscomb's vehicle without valid consent. [HN3] Officers are permitted to ask for identification, a valid driver's license, and proof of insurance during a traffic stop. *Davis v. State*, 947 S.W.2d 240, 245 n.6 (Tex. Crim. App. 1997). Officers may also check for outstanding warrants. *Id.* The officer must, however, use "the least intrusive means reasonably available to verify or dispel his suspicion in a short period of time." *Id.* Under *Davis*, Freeman's detention of Lipscomb "was required to be temporary and could last no longer than was necessary" to satisfy or dispel the officer's original suspicion of speeding and to conclude the stop. *Id.*

In this case, a videotape of the traffic stop was entered into evidence. A review of that videotape shows Freeman initiated the stop and made first contact with Lipscomb at 7:53 a.m. [\*9] Freeman informed Lipscomb of the purpose of the stop, asked for Lipscomb's license and proof of insurance, and briefly inquired into Lipscomb's driving and criminal histories. This initial conversation lasted barely one minute. Freeman then returned to his patrol car, contacted a dispatcher, and requested a criminal and out-of-state license history on Lipscomb. Eight to nine minutes later, the dispatcher contacted Freeman with those histories, including verification that Lipscomb had spent time in the penitentiary for narcotics trafficking. Freeman then returned to the rear of Lipscomb's car and asked Lipscomb to step to the rear of that vehicle. Freeman then appears to tell Lipscomb he will receive only a warning citation, and Freeman then asks for consent to search, which Lipscomb provides.

[HN4] Consent to search is "one of the well-established exceptions to the constitutional requirements of both a warrant and probable cause." *Carmouche v. State*, 10 S.W.3d 323, 331 (Tex. Crim. App. 2000) (citing *Schneckloth v. Bustamonte*, 412 U.S. 218, 219, 36 L. Ed. 2d 854, 93 S. Ct. 2041 (1973); *State v. Ibarra*, 953 S.W.2d 242, 243 (Tex. Crim. App. 1997)). The videotape [\*10] clearly shows Lipscomb gave willing consent to the officer's request to search the vehicle. Lipscomb's contention on appeal to the contrary is disingenuous and not supported by the evidence. Less than ten seconds passed between the time Freeman informed Lipscomb (at the rear of the car) that the latter would receive a warning citation and the moment when Lipscomb consented to a search of the vehicle. Thus, we cannot conclude, given the sequence of discrete facts of this case, that the lapse of ten seconds amounted to an unreasonable extension of the duration of the traffic stop. n5 We therefore overrule Lipscomb's second and third points of error.

n5 The previous period of eight to nine minutes, between the time Lipscomb's driver's license and criminal history information were requested from the police dispatcher and the time the information was provided to the officer on the scene, is a legitimate period of investigation by the officer. *See Davis*, 947 S.W.2d at 245 n.6.

(3) *The Confession* [\*11] *Was Admissible*

In his final point of error, Lipscomb contends his written custodial confession should have been inadmissible because it was taken before he was taken to a magistrate to receive the warnings required by *Article 15.17 of the Texas Code of Criminal Procedure*. See *TEX. CODE CRIM. PROC. ANN. art. 15.17* (Vernon 2005). [HN5] "It is well settled that the failure to take an arrestee before a magistrate in a timely manner will not invalidate a confession unless there is proof of a causal connection between the delay and the confession." *Renfro v. State*, 958 S.W.2d 880, 887 (Tex. App.--Texarkana 1997, pet. ref'd) (citing *Cantu v. State*, 842 S.W.2d 667, 680 (Tex. Crim. App. 1992)). "Additionally, when a person is properly warned of his rights by the person taking his confession, the failure to take the accused before a magistrate before taking the confession does not invalidate the confession." *Id.* (citing *Self v. State*, 709 S.W.2d 662, 667 (Tex. Crim. App. 1986)).

Lipscomb has made no effort to point to any evidence in the record showing a causal connection [\*12] between the delay in being brought before a magistrate and his confession, nor has any been shown by our review of the record. Moreover, the first paragraph of Lipscomb's confession reads,

I, TERRENCE [sic] LAMONTE LIPSCOMB, do freely and voluntarily make the following statement to Investigator MIKE CLAXTON and Ranger RONNY GRIFFITH after having been warned by him on the 18th day of August 2003 at 9:30 AM at the Gregg County Sheriff's Office CID, that I have the right to remain silent and not make any statement at all and that any statement I make may be used against me at my trial; any statement I make may be used as evidence against me in court; I have the right to have a lawyer present to advise me prior to and during any questioning; if I am unable to employ a lawyer, and I have the right to have a lawyer appointed to advise me prior to and during questioning; and I have the right to terminate the interview at any time. Knowing and intelligently understanding my rights, I freely and voluntarily wish to waive the above rights and do hereby make this statement . . . .

The statement itself shows Lipscomb was warned of his rights before the statement was taken; [\*13] *Article 15.17* therefore does not bar the statement's admissibility. We overrule Lipscomb's final point of error.

For the reasons stated, we affirm the trial court's judgment.

**ROBERTO PENA, Appellant, v. THE STATE OF TEXAS, Appellee.****No. 08-02-00361-CR****COURT OF APPEALS OF TEXAS, EIGHTH DISTRICT, EL PASO***155 S.W.3d 238; 2004 Tex. App. LEXIS 911***January 29, 2004, Decided****NOTICE:** [\*\*1] (PUBLISH)**SUBSEQUENT HISTORY:** Released for Publication February 22, 2005.**PRIOR HISTORY:** Appeal from the 41st District Court of El Paso County, Texas. (TC # 20010D03736).**DISPOSITION:** Affirmed.**CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant challenged a decision from the 41st District Court of El Paso County (Texas), which convicted him of two counts of intoxicated manslaughter and two counts of failure to stop and render aid.**OVERVIEW:** Witnesses observed defendant operating a vehicle at a high rate of speed before crashing into three cars at an intersection. Two persons were killed in the crash, and defendant fled the scene. He later pled guilty to several crimes before a jury, which determined that defendant had used the vehicle as a deadly weapon. Thereafter, defendant sought review. Specifically, defendant challenged the admission of a police officer's testimony regarding the speed of his vehicle at the time of the accident. In affirming, the court determined that the evidence was properly admitted as expert testimony under *Tex. R. Evid. 702*. The officer had extensive training in accident reconstruction. The officer determined the speed by using formulas he was taught to use for specific types of collisions. Further, the officer also used an accident investigation measuring system (AIMS) to make certain calculations. The trial court should have required the State to offer evidence concerning the scientific principals behind AIMS. However, the failure to show reliability was harmless because the evidence was sufficient to support the jury's finding that defendant used his vehicle as a deadly weapon.**OUTCOME:** The court affirmed defendant's convictions.**CORE TERMS:** speed, formula, reconstruction, scientific, skid, reliability, front, measurement, collision, training, motor vehicle, expert witness, intoxication, traveling, distance, post-impact, utilized, driving, miles, lane, expert testimony, traveled, manslaughter, calculation, admitting, recalled, struck, judicial notice, pre-impact, reliable

**LexisNexis(R) Headnotes*****Civil Procedure > Appeals > Standards of Review > Abuse of Discretion******Evidence > Testimony > Experts > Admissibility******Evidence > Testimony > Experts > Criminal Trials***

[HN1] A trial court's ruling to admit or exclude evidence is reviewed under an abuse of discretion standard. Absent a clear abuse of discretion, a trial court's decision to admit or exclude expert testimony will not be disturbed. An abuse of discretion exists when the trial court's decision was so clearly wrong as to lie outside the zone of reasonable disagreement, in other words, the trial court's decision or action was arbitrary, unreasonable, and made without reference to any guiding rules or principles.

***Evidence > Testimony > Experts > Admissibility******Evidence > Testimony > Experts > Criminal Trials******Evidence > Testimony > Experts > Qualifications***

[HN2] For a witness's expert testimony to be admissible, the witness must be qualified as an expert by knowledge, skill, experience, training, or education. Tex. R. Evid. 702.

***Evidence > Testimony > Experts > Criminal Trials***

[HN3] See *Tex. R. Evid. 702*.

***Evidence > Procedural Considerations > Burdens of Proof > Clear & Convincing Proof******Evidence > Scientific Evidence > General Overview******Evidence > Testimony > General Overview***

[HN4] The party offering the evidence has the burden of showing the witness is qualified as an expert on the specific matter in question. The proponent of expert testimony or evidence based on a scientific theory must show by clear and convincing evidence that the evidence is: (1) reliable and (2) relevant to assist the trier of fact in its fact-finding duty. To be reliable, the proffered evidence must satisfy three criteria: (1) the underlying scientific theory must be valid; (2) the technique applying the theory must be valid; and (3) the technique must have been properly applied on the occasion in question. The trial court's determination of reliability could be affected by the following non-exclusive factors: (1) the extent to which the underlying scientific theory and technique are accepted as valid by the relevant scientific community, if such a community can be ascertained; (2) the qualifications of the expert(s) testifying; (3) the existence of literature supporting or rejecting the underlying scientific theory and technique; (4) the potential rate of error of the technique; (5) the availability of other experts to test and evaluate the technique; (6) the clarity with which the underlying scientific theory and technique can be explained to the court; and (7) the experience and skill of the person(s) who applied the technique on the occasion in question.

***Evidence > Testimony > Experts > Criminal Trials***

[HN5] Police officers are qualified to testify regarding accident reconstruction if they are trained in the science about which they will testify and possess a high degree of knowledge sufficient to qualify as an expert.

***Criminal Law & Procedure > Appeals > Reversible Errors > General Overview******Criminal Law & Procedure > Appeals > Standards of Review > Harmless & Invited Errors > General Overview***

[HN6] A nonconstitutional error that does not affect the substantial rights of the defendant must be disregarded. *Tex. R. App. P. 44.2(b)*. A substantial right is affected when the error had a substantial and injurious effect or influence in

determining the jury's verdict. A criminal conviction should not be overturned for nonconstitutional error if the appellate court, after examining the record as a whole, has fair assurance that the error did not influence the jury or had but a slight effect.

***Criminal Law & Procedure > Criminal Offenses > Homicide > Involuntary Manslaughter > General Overview***  
***Criminal Law & Procedure > Guilty Pleas > General Overview***  
***Torts > Transportation Torts > General Overview***

[HN7] A person commits the offense of intoxication manslaughter if the person: (1) operates a motor vehicle in a public place; (2) is intoxicated; and (3) by reason of that intoxication causes the death of another by accident or mistake. *Tex. Penal Code Ann. § 49.08(a)*(2003).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Vehicular Homicide > General Overview***  
***Criminal Law & Procedure > Criminal Offenses > Weapons > Definitions***  
***Torts > Transportation Torts > Motor Vehicles > General Overview***

[HN8] A deadly weapon is defined as anything that in the manner of its use or intended use is capable of causing death or serious bodily injury. *Tex. Penal Code Ann. § 1.07(a)(17)(B)*(2003). Anything, including a motor vehicle, which is actually used to cause the death of a human being is a deadly weapon. This is necessarily so because a thing which actually causes death is, by definition, capable of causing death.

**COUNSEL:** For APPELLANT: Hon. Joseph (Sib) Abraham Jr., El Paso, TX.

For STATE: Hon. Jaime E. Esparza, DISTRICT ATTORNEY, El Paso, TX.

**JUDGES:** Before Panel No. 2. Barajas, C.J., McClure, and Chew, JJ. McClure, J., Concurring.

**OPINION BY:** DAVID WELLINGTON CHEW

**OPINION:**

[\*240] Appellant Roberto Pena was indicted with two counts of intoxication manslaughter [\*241] and two counts of failure to stop and render aid. Before a jury, Appellant pled guilty to all four counts, but pled "not true" to the allegation that he used or exhibited a deadly weapon during the commission of the offense as alleged in each count. The jury found Appellant guilty of all four counts and made an affirmative finding on the use of a deadly weapon for each count. The jury assessed punishment at twenty years' imprisonment and a \$ 10,000 fine for each intoxication manslaughter count and five years' imprisonment and a \$ 5,000 fine for each failure to stop and render aid count. Upon the State's motion, the trial court ordered that the intoxication manslaughter counts be served consecutively, with the failure to stop and render aid counts to be served concurrently. The trial court sentenced Appellant in accordance with the jury's assessment, however we observe the court's final judgments [\*\*2] and sentences only contain deadly weapon findings for the intoxication manslaughter offenses. In his sole issue on appeal, Appellant contends the trial court committed reversible error by admitting testimony from a State's witness concerning the speed his vehicle was traveling when it struck the victims' vehicle and that this testimony severely prejudiced him. We affirm.

On June 17, 2001, between 12:30 and 1 a.m., Zachary Valenzuela was driving in the center lane on Gateway West when he noticed headlights in his rear view mirror. The rate of speed at which the car was coming at him from behind was the reason the headlights caught his attention. Mr. Valenzuela was driving between 55 to 60 miles per hour. He considered changing lane, but at the rate of speed the vehicle was approaching, he decided to stay in the center lane. When the approaching vehicle pulled up behind Mr. Valenzuela, it switched lanes, "flew by him," and pulled back into the center lane. Mr. Valenzuela recalled that the vehicle approached him from behind at a constant speed and was easily going over 60 miles per hour because it quickly passed him. As it passed, Mr. Valenzuela observed that the vehicle was

a green [\*\*3] Corvette driven by a male driver, later identified as Appellant.

As the Corvette traveled ahead to the Lee Trevino intersection, Mr. Valenzuela kept the vehicle's taillights in his line of sight and recalled there was nothing between him and the Corvette. Mr. Valenzuela saw cars stopped at the lights ahead. He then saw the Corvette's taillights swerve to one side and for a split second, saw car headlights turn quickly facing his direction before they turned. Mr. Valenzuela hit his brakes when he saw the headlights because he knew he was traveling on a one-way street. He knew there had been an accident, but did not see the actual impact. Mr. Valenzuela recalled that the Corvette's brake lights did not go on before the accident.

Veronica Huerta Garcia was at the Lee Trevino and Gateway West intersection at the time of the accident. Ms. Garcia was in the middle lane behind a green Eclipse and in front of a black Pontiac, waiting for the light to change. All the cars waiting for the light were in the middle lane. When the light turned green, Ms. Garcia drove a little bit forward and then heard a loud impact of vehicles being struck behind her. She looked at her rearview mirror and saw [\*\*4] a car, a Honda CRX pop up, go airborne, and then land with its headlights facing the opposite direction. To her left, Ms. Garcia saw a green Corvette slam against the guardrail, causing sparks to fly. She noticed that the Corvette hit the guardrail at a high rate of speed and then came to a sudden stop. When Ms. Garcia saw everything right behind her, she quickly swerved to the right to avoid being [\*\*242] hit in the chain reaction. She then called 911 on her cell phone.

Within seconds, Ms. Garcia checked on some of the cars involved in the accident. The Corvette was damaged in the front of the hood and on the side that hit the guardrail. Ms. Garcia had contact with the driver, Appellant, and recalled that he was drunk and smelled strongly of alcohol. She helped Appellant exit the Corvette, before going to assist the injured passenger and driver of the Honda CRX.

Robert Herrera, his wife, and their two children, were also at the Lee Trevino-Gateway West intersection at the time of the accident. Mr. Herrera recalled there was one car in front of him and two cars behind him. While he was waiting in the center lane for the light to change, Mr. Herrera heard a loud crash and felt the impact. [\*\*5] Right after the accident, Mr. Herrera went straight to the Corvette and observed Appellant trying to get out of the vehicle. Mr. Herrera was yelling at Appellant and tried to take off the car window before his wife called him away.

Miguel Garcia, Jr. and his spouse were traveling home from Horizon City on Interstate-10 and exited at Lee Trevino. Mr. Garcia recalled that it was a nice evening with no inclement weather. As he exited, he saw that an accident had just occurred right in front of the Shamaley Ford dealership, a very well lit area. Mr. Garcia saw a Honda Civic turned around facing oncoming traffic, a Corvette to his left, and some other cars in front. As he approached the scene, he veered off to the Shamaley Ford entranceway toward Gateway West. Mr. Garcia got out of his car and went over to assist the passengers in the Honda Civic. Mr. Garcia then approached the Corvette and made contact with Appellant. He observed that Appellant was talking on a cell phone in Spanish, smelled of alcohol, and was very disoriented. Mr. Garcia recalled Appellant telling him to go to the other guys because they looked pretty bad. Mr. Garcia then left Appellant and later noticed that he had [\*\*6] fled the scene.

Ronald Drake, a security guard for Shamaley Ford on duty at the time of the accident, observed a man running through the dealership's parking lot. As the man ran, he was bouncing off the cars, stumbling, and fell twice. Mr. Drake saw the man drop his cell phone twice as he ran. As he started to approach the individual who had stumbled and fallen down, Mr. Drake smelled a lot of alcohol and backed off. The man ran across the back lot and then headed east on Rojas. Mr. Drake then observed the fire department, an ambulance, and police coming down Lee Trevino and traveling on Gateway West the wrong way. Mr. Drake went to the accident scene and informed the police about the man running through the parking lot.

El Paso Police Officer Steve Smith was dispatched to the multi-car accident scene at approximately 12:35 a.m. Officer Smith recalled that it was a clear night, the roadway was dry, and the location was well-lit by the Shamaley Ford dealership. From his preliminary investigation, he determined that the green Corvette had traveled westbound on Gateway West in the center lane and had struck the Honda vehicle in front of it, which then struck the vehicle in front of

[\*\*7] it, which in turn struck another vehicle in front of that one. Of the four vehicles involved in the accident, three were facing west and one, the Honda vehicle, was facing eastbound as it had spun around due to the impact. Officer Smith observed extensive damage to the rear of the Honda vehicle.

The most critically injured in the accident were the two occupants of the Honda vehicle first struck by the Corvette. The front passenger, Mario Sandoval, was not [\*243] breathing and was pronounced dead at the scene. Dr. Juan Contin, the county medical examiner, determined that Mario Sandoval bled to death from a torn aorta in the chest, which resulted from the collision. After the accident, the driver, Roberto Sandoval, was not conscious and had a very faint pulse. Mr. Sandoval was taken to the hospital, but died the following day from massive brain injuries sustained in the accident.

Around 2:12 a.m., police officers apprehended Appellant as he stumbled towards his house on Tony Tejada. Appellant was arrested and taken to the accident scene where he was identified by witnesses as the individual driving the Corvette. Appellant was later taken to Del Sol Medical Center where his blood was drawn. [\*\*8] The blood test results showed Appellant had a blood-alcohol level of .23.

Ruben Cisneros, an El Paso police officer assigned to the special traffic investigations section, testified that based on his accident reconstruction analysis, he found no pre-impact brake marks nor any pre-impact skid marks for the Corvette. Officer Cisneros observed extensive front end damage to the Corvette, extensive rear damage to the Honda, and paint transfer from the Honda to the Corvette. Based on his observations and the skid marks, Officer Cisneros determined the front end of the Corvette collided with the back end of the Honda Civic CRX. After the initial impact, the rear end of the Honda "climbed up" on the front end of the Corvette, causing the vehicle to spin clockwise 80 degrees and go airborne before coming to a stop. When the Corvette struck the Honda, its left front tire locked up due to front end damage. The Corvette then veered to the left lane and collided with the guardrail, leaving a post-impact skid mark from the left front tire.

At trial, Appellant objected to Officer Cisneros' testimony as an expert witness concerning the speed of the vehicles involved in the accident. Over Appellant's [\*\*9] objection, Officer Cisneros testified that based on his accident reconstruction formula calculations, he determined the initial impacting vehicle, the Corvette, was traveling 104 miles per hour. He also determined the Honda was impacted from zero speed to a post-impact speed of 28 miles per hour.

### ***Expert Testimony***

In his sole issue for review, Appellant argues the trial court committed reversible error by admitting Officer Cisneros' testimony concerning the speed his vehicle was traveling on June 17, 2001 and that this testimony severely prejudiced him. Specifically, Appellant contends the State did not meet its burden in establishing that Officer Cisneros was qualified as an expert witness nor did it present evidence concerning the reliability of the "AIMS test" used to establish the speed his vehicle was traveling when it struck the Honda CRX.

### ***Standard of Review and Applicable Law***

[HN1] A trial court's ruling to admit or exclude evidence is reviewed under an abuse of discretion standard. *Montgomery v. State*, 810 S.W.2d 372, 391 (Tex.Crim.App. 1991)(Op. on reh'g). Absent a clear abuse of discretion, a trial court's decision to admit or exclude expert [\*\*10] testimony will not be disturbed. *Wyatt v. State*, 23 S.W.3d 18, 27 (Tex.Crim.App. 2000); *Morales v. State*, 32 S.W.3d 862, 865 (Tex.Crim.App. 2000). An abuse of discretion exists when the trial court's decision was so clearly wrong as to lie outside the zone of reasonable disagreement, in other words, the trial court's decision or action was arbitrary, unreasonable, and made without reference to any guiding [\*244] rules or principles. See *Montgomery*, 810 S.W.2d at 391.

[HN2] For a witness's expert testimony to be admissible, the witness must be qualified as an expert by "knowledge, skill, experience, training, or education . . ." *TEX.R.EVID. 702. Rule 702* provides:

[HN3] If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify thereto in the form of an opinion or otherwise.

*TEX.R.EVID. 702.*

[HN4] The party offering the evidence has the burden of showing the witness is qualified as an expert on the specific matter in question. *Penry v. State*, 903 S.W.2d 715, 762 (Tex.Crim.App. 1995), [\*\*11] *cert. denied*, 516 U.S. 977, 116 S. Ct. 480, 133 L. Ed. 2d 408, 133 L. Ed. 2d 408 (1995).

Pursuant to *Kelly v. State*, 824 S.W.2d 568 (Tex.Crim.App. 1992), the proponent of expert testimony or evidence based on a scientific theory must show by clear and convincing evidence that the evidence is: (1) reliable and (2) relevant to assist the trier of fact in its fact-finding duty. *Id.* at 572; *Ochoa v. State*, 994 S.W.2d 283, 284 (Tex.App.--El Paso 1999, *no pet.*). To be reliable, the proffered evidence must satisfy three criteria: (1) the underlying scientific theory must be valid; (2) the technique applying the theory must be valid; and (3) the technique must have been properly applied on the occasion in question. *Kelly*, 824 S.W.2d at 573. The trial court's determination of reliability could be affected by the following non-exclusive factors: (1) the extent to which the underlying scientific theory and technique are accepted as valid by the relevant scientific community, if such a community can be ascertained; (2) the qualifications of the expert(s) testifying; (3) the existence of literature supporting or rejecting the underlying [\*\*12] scientific theory and technique; (4) the potential rate of error of the technique; (5) the availability of other experts to test and evaluate the technique; (6) the clarity with which the underlying scientific theory and technique can be explained to the court; and (7) the experience and skill of the person(s) who applied the technique on the occasion in question. *Id.*

#### *Daubert/Kelly Hearing*

At trial, Appellant objected to Officer Cisneros' testimony as an expert witness concerning the speed of the vehicles involved in the accident. Outside the jury's presence, Officer Cisneros testified that on many occasions, he has done speed reconstruction. He has had a variety of training courses in speed reconstruction, specifically the basic accident investigation course offered by the police department, the intermediate accident investigation course, the advanced accident reconstruction course, and the traffic accident reconstruction course. In 1997, Officer Cisneros received approximately 80 hours in accident reconstruction training in San Antonio at the Bexar County Sheriff's Department. He also has had training in bicycle, pedestrian, and motor vehicle collisions. In August 1999, [\*\*13] Officer Cisneros was certified in the 383rd District Court as an expert and again in October 2001 in the 41st District Court.

In this particular case, Officer Cisneros determined the speed of the Corvette and other vehicles by using formulas he had been taught to use for specific types of collisions. Officer Cisneros inserted certain data that was obtained from the scene into these formulas to derive the speeds. Officer Cisneros explained that he worked [\*\*245] the calculations out by hand using a calculator and used a skid speed formula for the post-impact distances and then used a linear momentum in-line collision formula to determine a speed for the Chevrolet Corvette. Based on these findings and his training, experience, and knowledge, Officer Cisneros determined the Corvette was traveling roughly 104 miles per hour at impact. The trial court overruled Appellant's objection to Officer Cisneros' testimony, but allowed Appellant's counsel to further voir dire Officer Cisneros outside the jury's presence.

In voir dire, Officer Cisneros testified that the measurements used in calculating the skid speed and linear momentum in-line collision formulas were taken with a surveying instrument [\*\*14] called an Accident Investigation Measuring System ("AIMS"). Officer Cisneros explained that operation of the AIMS device consists of setting up the equipment and from that initial point, taking shots by aiming the equipment at the particular target you want. The device has a prism that shoots a laser beam to the prism at the target, which shoots it back and gives you the measurement. Officer Cisneros conceded that he could not explain in any detail the scientific principles involved in this type of measuring system. Officer Cisneros stated that his department has two AIMS equipment, which were recently checked for calibration by the manufacturer, but he did not know the last time the AIMS device he used was calibrated. Officer

Cisneros also conceded that he did not know whether or not the accuracy of AIMS results could be validated over and over again by someone who is an expert in the underlying scientific principles of this measuring machine.

Regarding the formulas used in his calculations, Officer Cisneros testified that he obtained the measurements used in the formulas by using the AIMS machine. The formulas were taught to him during the courses mentioned above. Officer Cisneros [\*\*15] explained that the formulas are used internationally by other law enforcement agencies, including the Department of Public Safety in Texas. Officer Cisneros, however, conceded that he did not know who devised the formulas and did not know the scientific principles underlying the values in the formulas.

At the conclusion of the hearing, Appellant's counsel renewed his objection to Officer Cisneros' testimony. In response, the State argued that the AIMS system and formulas have been judicially accepted and noted that the officer testified that the AIMS system is used by other departments. It further noted that there have been no problems with it when used before. The trial court overruled Appellant's objection and allowed the State to offer the officer's expert witness concerning the speed of the Corvette and that of the other vehicle at the time of the collision.

### *Qualifications*

As the party offering Officer Cisneros' testimony, the State had the burden of showing he qualified as an expert on speed based on his accident reconstruction background. *See Penry, 903 S.W.2d at 762.* [HN5] Police officers are qualified to testify regarding accident reconstruction if they [\*\*16] are trained in the science about which they will testify and possess a high degree of knowledge sufficient to qualify as an expert. *DeLarue v. State, 102 S.W.3d 388, 396 (Tex.App.--Houston [14th Dist.] 2003, no pet.).*

Here, Officer Cisneros testified that he has been a police officer with the El Paso Police Department for twenty years. Since April 1994, he has been assigned to the special traffic investigations section. Officer Cisneros has received basic, intermediate, [\*246] and advanced training in accident reconstruction, including speed reconstruction. In addition, Officer Cisneros has eighty hours of accident reconstruction training held at the Bexar County Sheriff's Department in 1997. On many occasions he has done accident reconstruction for the special traffic investigations section. Officer Cisneros has been certified twice as an expert in accident reconstruction by El Paso district courts. For this case, Officer Cisneros was called out to Gateway West on June 17, 2001 and performed an accident reconstruction of the incident. Officer Cisneros clearly demonstrated he had special knowledge on accident reconstruction, including speed reconstruction, based on his [\*\*17] extensive training and his field experience. Therefore, we conclude the trial court did not abuse its discretion in determining Officer Cisneros was qualified to offer his expert opinion in speed reconstruction.

### *Reliability*

The State in this case does not dispute that accident reconstruction, specifically Officer Cisneros' testimony concerning the speed at which Appellant was driving at the time of impact, is a type of scientific evidence subject to *Kelly* requirements for admissibility. By clear and convincing evidence, the State was required to show that with respect to the scientific evidence in this case: (1) the underlying scientific theory was valid; (2) the technique applying the theory was valid; and (3) the technique was properly applied on the occasion in question. n1 *See Kelly, 824 S.W.2d at 573.*

n1 In his sole issue, Appellant does not challenge Officer Cisneros' testimony concerning the Corvette's speed on relevancy grounds. Therefore, we will address its reliability only.

[\*\*18]

Appellant argues on appeal that the State presented no evidence concerning the reliability of the "AIMS test." By

Appellant's complaint we understand him to be challenging the reliability of AIMS equipment-derived distance measurements and the reliability of the speed calculation formulas used by Officer Cisneros in his speed reconstruction analysis.

Here, Officer Cisneros testified that the formulas he used in deriving Appellant's driving speed are also used by other law enforcement agencies. Officer Cisneros, however, conceded that he did not know the scientific principles underlying the values in the formulas used to derive Appellant's speed at the time of impact. He could not explain the underlying scientific principles of how the AIMS equipment provided distance measurements and he did not know whether or not the accuracy of AIMS results could be validated over and over again. In this case, there is no evidence in the record sufficient to satisfy the reliability requirements pursuant to *Kelly*. Therefore, the trial court erred in admitting the evidence concerning Appellant's driving speed. We find, however, that in this case, admission of Officer Cisneros' testimony concerning [\*\*19] Appellant's driving speed at the time of impact was harmless.

[HN6] A nonconstitutional error that does not affect the substantial rights of the defendant must be disregarded. *See TEX.R.APP.P. 44.2(b)*. A substantial right is affected when the error had a substantial and injurious effect or influence in determining the jury's verdict. *King v. State, 953 S.W.2d 266, 271 (Tex.Crim.App. 1997)*. A criminal conviction should not be overturned for nonconstitutional error if the appellate court, after examining the record as a whole, has fair assurance that the error did not influence the jury or had but a slight effect. *Johnson v. State, 967 S.W.2d 410, 417 (Tex.Crim.App. 1998)*.

[\*247] In this case, Appellant pled guilty and was convicted of intoxication manslaughter. n2 [HN7] A person commits the offense of intoxication manslaughter if the person: (1) operates a motor vehicle in a public place; (2) is intoxicated; and (3) by reason of that intoxication causes the death of another by accident or mistake. *See TEX.PEN.CODE ANN. § 49.08(a)*(Vernon 2003). The contested issue at trial was whether Appellant used or exhibited a deadly weapon: to wit [\*\*20] a motor vehicle in commission of the offense. [HN8] A deadly weapon is defined as "anything that in the manner of its use or intended use is capable of causing death or serious bodily injury." *TEX.PEN.CODE ANN. § 1.07(a)(17)(B)*(Vernon 2003). Anything, including a motor vehicle, which is actually used to cause the death of a human being is a deadly weapon. *Tyra v. State, 897 S.W.2d 796, 798 (Tex.Crim.App. 1995)*. This is necessarily so because a thing which actually causes death is, by definition, "capable of causing death." *Id.*

n2 The first count of intoxication manslaughter in the indictment alleged Appellant:

Did then and there, by accident or mistake, while operating a motor vehicle in a public place while intoxicated, to wit: by having an alcohol concentration of .08 or more, and by reason of that intoxication caused the death of MARIO SANDOVAL by then and there driving said motor vehicle into and causing it to collide with a motor vehicle in which MARIO SANDOVAL was a passenger . . . .

The second count of intoxication manslaughter alleged Appellant:

Did then and there, by accident or mistake, while operating a motor vehicle in a public place while intoxicated, to wit: by having an alcohol concentration of .08 or more, and by reason of that intoxication caused the death of ROBERT SANDOVAL by then and there driving said motor vehicle into and causing it to collide with a motor vehicle driven by ROBERT SANDOVAL . . . .

[\*\*21]

The evidence shows that Appellant was driving in excess of 60 miles per hour as he passed Zachary Valenzuela and approached the Lee Trevino-Gateway West intersection. Mr. Valenzuela did not see Appellant attempt to brake prior to the accident and witnesses testified that the intersection was well-lit and the roadway was dry. Physical evidence and witness testimony indicated that the front of Appellant's vehicle collided with the rear end of the victims' vehicle,

causing their vehicle to go airborne and spin around to face oncoming traffic. Through her rearview mirror, Veronica Huerta Garcia saw Appellant's vehicle slam against the guardrail at a high speed, causing sparks to fly. In unchallenged testimony, Officer Cisneros testified that he found no pre-impact brake marks and no pre-impact skid marks at the accident scene. El Paso County Medical Examiner Dr. Juan Contin testified that the passenger victim bled to death from a torn aorta, resulting from the collision. Dr. Contin also testified that the driver victim died the following day in the hospital from injuries sustained in the collision.

After examining the record as a whole, we find the evidence above was sufficient to support [\*\*22] the jury's affirmative finding that Appellant used his motor vehicle in a manner that was capable of causing death or serious bodily injury, without considering the speed evidence introduced through Officer Cisneros' testimony. The trial court's erroneous admission of the speed evidence did not affect Appellant's substantial rights and in light of other properly admitted evidence we are assured that if its admission influenced the jury at all, it did so only slightly. Therefore, we find the trial court's error to be harmless. Issue One is overruled.

Accordingly, we affirm the trial court's judgment.

DAVID WELLINGTON CHEW, Justice

**CONCUR BY:** ANN CRAWFORD McCLURE

**CONCUR:**

[\*248] **CONCURRING OPINION**

The record shows that Appellant waived his complaint about the AIMS device and the measurements derived from it. Therefore, I disagree with the majority's conclusion that the trial court abused its discretion by admitting this particularly testimony. Alternatively, I would find that the State is not required to prove the scientific principles pertaining to the AIMS device in order for an expert to rely on measurements taken with the device. While I agree with the majority's holding that the State [\*\*23] failed to carry its burden under *Kelly* with respect to Cisneros' expert opinion as to the pre-impact speed of Appellant's vehicle, I write separately to discuss the effect of *Hernandez v. State*, 116 S.W.3d 26 (Tex.Crim.App. 2003) on an appellate court's review of this issue. Because the majority opinion ultimately concludes that the errors in admitting the expert testimony is harmless, I concur.

Cisneros utilized two formulas in estimating the speed at which Appellant's car was traveling at the time of impact: the skid speed formula and the linear momentum in-line collision formula. These formulas are used not only by the Texas Department of Public Safety but also internationally by other law enforcement agencies and they were taught to Cisneros at the accident investigation and accident reconstruction courses he attended as part of his training. Pursuant to his training, Cisneros gathered data relevant to the following formula components:

1. weight of the vehicles;
2. the coefficient of friction or drag factor; and
3. the post-impact distances of the vehicles.

Cisneros obtained the weight of the vehicles involved in the accident from the Department of Motor [\*\*24] Vehicles. The drag factor pertains to the friction of the roadway and Cisneros obtained this figure by utilizing a drag sled to find a coefficient of friction for the particular road involved in the accident. For the third factor, Cisneros utilized the AIMS device to measure the distances traveled by the two vehicles after impact. A diagram prepared by Cisneros (State's Exhibit 10) shows that Appellant's vehicle traveled 413 feet from the point of impact to its resting place. There were no pre-impact skid marks because Appellant's vehicle did not skid prior to striking the complainants' car. Consequently, Cisneros utilized the skid speed formula to determine only a post-impact speed for each vehicle involved

in the accident.

As explained by Cisneros, the skid speed formula involves multiplying distance by a constant of thirty by the square root of the roadway drag factor. Cisneros determined that the complainants' Honda went from 0 miles per hour to a post-impact speed of 28 miles per hour. Cisneros was not asked to state the post-impact speed he determined for the Corvette but he included the figure in a written expert's report filed in the case. n1 With the post-impact speeds determined [\*\*25] by the skid speed formula, Cisneros then applied the weights of the vehicles in the linear momentum in-line collision formula in order to obtain the speed of the initial impacting vehicle. Based on this formula, Cisneros estimated that Appellant's Corvette was traveling 104 miles per hour at the point of impact. Cisneros explained the components of the skid speed formula but was not asked to explain the linear momentum in-line collision formula.

n1 Cisneros' written report was not admitted into evidence.

#### [\*249] *Waiver of Complaint About Measurements*

The majority has failed to consider that Appellant waived any complaint about Cisneros' use of the AIMS device to obtain the measurements used in the speed calculation formulas because Appellant did not object to State's Exhibit 10, which is a diagram of the collision including measurements taken at the scene with the AIMS device. It is well established that a party must make a timely and specific objection in order to preserve his complaints for appellate review. [\*\*26] See *TEX.R.APP.P. 33.1*. Further, a party must object every time inadmissible evidence is offered or the complaint is waived. See *Ethington v. State*, 819 S.W.2d 854, 858 (*Tex.Crim.App. 1991*); *Gillum v. State*, 888 S.W.2d 281, 285 (*Tex.App.--El Paso 1994, pet. ref'd*). In the presence of the jury, the State elicited testimony from Cisneros showing that he had training in accident reconstruction and had previously testified as an expert on that topic. Cisneros then identified State's Exhibit 10 as a diagram of the accident which he prepared on the night of the accident. Cisneros explained that he used the Accident Investigation Measuring System (AIMS), which he described as a surveying device, and a software program to prepare State's Exhibit 10. The State then offered State's Exhibit 10 and Appellant's counsel stated that he had no objection to it. State's Exhibit 10 depicts the point of impact and post-impact locations of the vehicles, their direction of travel, the location of various skid marks, and measurements of those skid marks taken by Cisneros using AIMS. The exhibit reflects that Appellant's Corvette traveled 413 feet from the point of impact [\*\*27] with the complainants' Honda. By failing to object to the initial testimony about the AIMS device and State's Exhibit 10, Appellant waived any subsequent complaint he might have had about the measurements taken by Cisneros with the assistance of the AIMS device.

#### *Scientific Validity of AIMS*

Even if Appellant did not waive his complaint about the measurements and the AIMS device, the majority opinion errs by holding that the State was obligated to establish that Cisneros understands the inner-workings of this surveying device. Cisneros was offered as an expert in accident reconstruction, not as an expert in AIMS equipment. Consequently, there was no necessity for the State to prove that he understood exactly how laser measuring devices and surveying equipment work. As aptly noted by appellate counsel for the State, the AIMS device is essentially a high-tech tape measure and Cisneros used the device to measure the distance between two points. I find no requirement in *Rule 703* or elsewhere that an expert witness be able to explain the scientific principles involved in every piece of equipment used by the expert to gather data. To illustrate this point, an expert who relies on photographs [\*\*28] as part of the foundation for his opinion regarding the cause of an accident need not explain precisely how a camera works in order to rely on the data supplied by the photographs. Likewise, an expert witness who utilizes a calculator in performing calculations is not required to relate to the jury the scientific principles involved in an electronic calculator before his expert testimony is permitted. Cisneros sufficiently explained that the AIMS device, using a laser, measured the distance Appellant's car traveled from the point of impact to its resting place and he utilized that measurement in the skid speed formula. For these reasons, I would find that the trial court did not abuse its discretion in admitting Cisneros'

testimony about the measurements taken at the scene of the accident.

[\*250] *Reliability of the Speed Calculation Formulas*

While I would find much of Cisneros' testimony admissible, the State failed to offer sufficient evidence proving the reliability of the two formulas utilized by Cisneros to estimate speed. A party seeking to introduce evidence of a scientific principle need not always present expert testimony, treatises, or other scientific material to satisfy the [\*\*29] *Kelly* test. *Hernandez*, 116 S.W.3d at 28-9. It is only at the dawn of judicial consideration of a particular type of forensic scientific evidence that trial courts must conduct full-blown "gatekeeping" hearings under *Kelly*. *Id.* at 29. Once a scientific principle is generally accepted in the pertinent professional community and has been accepted in a sufficient number of trial courts through adversarial *Daubert/Kelly* n2 hearings, courts subsequently considering the issue may take judicial notice of the scientific validity (or invalidity) of that scientific theory based upon the process, materials, and evidence produced in the prior hearings. *Id.* at 29; see *Weatherred v. State*, 15 S.W.3d 540, 542 n.4 (Tex.Crim.App. 2000)("once a particular type of scientific evidence is well established as reliable, a court may take judicial notice of that fact, thereby relieving the proponent of the burden of producing evidence on that question"). In other words, trial courts are not required to reinvent the scientific wheel in every trial. *Hernandez*, 116 S.W.3d at 29. The Court of Criminal Appeals has recently [\*\*30] emphasized, however, that some trial courts must conduct an adversarial gatekeeping hearing to determine the reliability of the given scientific theory and its methodology before other trial courts may take judicial notice of that determination. *Id.* Although appellate courts may likewise take judicial notice of other appellate opinions concerning a specific scientific theory or methodology in evaluating a trial court's *Daubert/Kelly* gatekeeping decision, judicial notice on appeal cannot serve as the sole source of support for a bare trial court record concerning scientific reliability. *Hernandez*, 116 S.W.3d at 31-2.

n2 *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993).

Although the trial court held a *Daubert/Kelly* hearing in the instant case, the State did not offer any evidence of the theories underlying the formulas utilized by Cisneros. Further, the State did not show that the issue of the formulas' reliability [\*\*31] has been litigated previously nor did it ask the trial court to take judicial notice of the reliability of the scientific theory and methodology based upon prior hearings or prior appellate decisions. See *Hernandez*, 116 S.W.3d at 30 and n.7. There is evidence that Cisneros has previously qualified as an expert and testified regarding accident reconstruction and perhaps even speed estimation, but the fact that a trial court has allowed some type of scientific testimony by a particular witness previously does not mean that the witness's testimony is, *ipso facto*, scientifically reliable. *Hernandez*, 116 S.W.3d at 30.

The trial court's decision to admit this evidence is understandable as expert testimony regarding accident reconstruction and speed estimation has been previously admitted in Texas civil and criminal cases. See e.g., *Chavers v. State*, 991 S.W.2d 457, 460-61 (Tex.App.--Houston [1st Dist.] 1999, *pet. ref'd*); *Trailways, Inc. v. Clark*, 794 S.W.2d 479, 483 (Tex.App.--Corpus Christi 1990, *writ denied*); *Rogers v. Gonzales*, 654 S.W.2d 509, 512 (Tex.App.--Corpus Christi 1983, *writ ref'd n.r.* [\*\*32] e.); *Bates v. [\*\*251] Barclay*, 484 S.W.2d 955, 957-59 (Tex.Civ.App.--Beaumont 1972, *writ ref'd n.r.e.*); *Adams v. Smith*, 479 S.W.2d 390, 395 (Tex.Civ.App.--Amarillo 1972, *no writ*); *Beynon v. Cutberth*, 390 S.W.2d 352, 355-56 (Tex.Civ.App.--Eastland 1965, *no writ*). With the exception of *Chavers*, these decisions pre-date *Daubert* and *Kelly*, and there is no determination in any of the cases that the formulas used to calculate speed are scientifically reliable. Although *Chavers* employs the proper criteria under *Kelly*, the decision is distinguishable because the expert witness based his calculations on yaw marks rather than the two formulas used by Cisneros. Therefore, taking judicial notice of *Chavers* is of no benefit in the instant case.

In *Thomson v. Rook*, a United States District Court conducted a *Daubert* hearing to determine the admissibility of an accident reconstruction expert's opinion regarding speed, distance traveled by vehicles, and the point of impact of the collision. *Thomson v. Rook*, 255 F. Supp. 2d 584, 584-87 (E.D.Tex. 2001). That court determined that the articles,

books, and other [\*\*33] experts in the accident reconstruction field validated the methodology used by the expert witness for calculating speed, distance traveled by the vehicles, and the point of impact. *Id.* at 586. In a footnote, the court noted that the expert witness calculated speed using a "standard physics equation employed by automobile accident reconstruction experts and a coefficient of friction derived from J. Stannard Baker's book, *Traffic Investigation Manual*." *Id.* at 586 n.5. The witness calculated speed and distance traveled by one of the vehicles using a standard rate of acceleration from a standard start as reported by the Baker book. *Id.* The district court admitted the witness's expert opinion on these topics but excluded the witness's opinion about the driver's braking time because the plaintiffs had not produced evidence or articles or books, or other experts that validate the methodology used by the expert witness. *Id.* at 587. It is impossible to determine whether Cisneros used some of the same formulas as the witness in *Thomson*, and therefore, taking judicial notice of this decision would not benefit the State.

I have been [\*\*34] unable to find any Texas appellate decisions at the state or federal level holding that the skid speed formula and linear momentum formulas utilized by Cisneros are reliable.

A cursory review of appellate decisions from other jurisdictions indicates that this type of expert testimony has been often admitted into evidence in other states. *See e.g., State v. Russo*, 38 Conn. Supp. 426, 450 A.2d 857, 866-67 (Conn.Super.Ct. 1982)(holding that an expert in Connecticut may testify as to the speed of a motor vehicle based on skid marks and other factors because the formulas used to calculate speed are based on well-recognized principles of physics that have gained general acceptance in the field of accident reconstruction); *Bryant v. Buerman*, 739 So. 2d 710, 712-13 (Fla.Dist.Ct.App. 1999)(holding that opinion of an accident reconstruction expert witness regarding the speed of a vehicle at the time of an accident is admissible in personal injury action arising out of collision, so long as the expert's testimony is helpful to the jury). *See also* Jerre E. Box, Annotation, *Opinion Testimony as to Speed of Motor Vehicle Based on Skid Marks and Other Facts* [\*\*35] , 29 A.L.R. 3d §§ 248-77 (1970 & Supp. 1996)(discussing numerous decisions admitting and excluding this type of evidence). As is the case with the Texas decisions discussed above, many of the out-of-state decisions pre-date *Daubert* and *Kelly*, and of those cases decided since *Daubert* and *Kelly*, the opinions do not discuss reliability of the same formulas used by Cisneros. Further, none [\*\*252] of these decisions indicates that the formulas utilized by Cisneros have become so widely accepted or persuasively proven that future courts may take judicial notice of their reliability. *See Hernandez*, 116 S.W.3d at 29 n.6. The Connecticut Supreme Court stated in *Russo* that using the coefficient of friction to estimate speed is a well recognized principle that has gained general acceptance in the field of accident reconstruction. *Russo*, 450 A.2d at 866. While Cisneros utilized the coefficient of friction in the skid speed formula to determine post-impact speed, he used a different formula to obtain pre-impact speed and that is the object of Appellant's complaint on appeal. Moreover, the Court of Criminal Appeals cautioned in *Hernandez* about reliance [\*\*36] on judicial opinions from non-Texas jurisdictions because many other jurisdictions utilize the "preponderance of the evidence" standard rather than the "clear and convincing" evidence standard required in Texas. *Hernandez*, 116 S.W.3d at 31 n.13.

In the absence of any evidence showing the reliability of the speed calculation formulas utilized by Cisneros, the trial court erred in admitting Cisneros' conclusion that Appellant's vehicle was traveling 104 miles per hour at the point of impact. However, I would also find the error harmless as stated in the majority opinion. With these additional comments and observations, I concur in the judgment affirming the trial court's judgment.

**ROBERTO PENA, Appellant, v. THE STATE OF TEXAS, Appellee.****No. 08-02-00361-CR****COURT OF APPEALS OF TEXAS, EIGHTH DISTRICT, EL PASO***155 S.W.3d 238; 2004 Tex. App. LEXIS 911***January 29, 2004, Decided****NOTICE:** [\*\*1] (PUBLISH)**SUBSEQUENT HISTORY:** Released for Publication February 22, 2005.**PRIOR HISTORY:** Appeal from the 41st District Court of El Paso County, Texas. (TC # 20010D03736).**DISPOSITION:** Affirmed.**CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant challenged a decision from the 41st District Court of El Paso County (Texas), which convicted him of two counts of intoxicated manslaughter and two counts of failure to stop and render aid.**OVERVIEW:** Witnesses observed defendant operating a vehicle at a high rate of speed before crashing into three cars at an intersection. Two persons were killed in the crash, and defendant fled the scene. He later pled guilty to several crimes before a jury, which determined that defendant had used the vehicle as a deadly weapon. Thereafter, defendant sought review. Specifically, defendant challenged the admission of a police officer's testimony regarding the speed of his vehicle at the time of the accident. In affirming, the court determined that the evidence was properly admitted as expert testimony under *Tex. R. Evid. 702*. The officer had extensive training in accident reconstruction. The officer determined the speed by using formulas he was taught to use for specific types of collisions. Further, the officer also used an accident investigation measuring system (AIMS) to make certain calculations. The trial court should have required the State to offer evidence concerning the scientific principals behind AIMS. However, the failure to show reliability was harmless because the evidence was sufficient to support the jury's finding that defendant used his vehicle as a deadly weapon.**OUTCOME:** The court affirmed defendant's convictions.**CORE TERMS:** speed, formula, reconstruction, scientific, skid, reliability, front, measurement, collision, training, motor vehicle, expert witness, intoxication, traveling, distance, post-impact, utilized, driving, miles, lane, expert testimony, traveled, manslaughter, calculation, admitting, recalled, struck, judicial notice, pre-impact, reliable

**LexisNexis(R) Headnotes*****Civil Procedure > Appeals > Standards of Review > Abuse of Discretion******Evidence > Testimony > Experts > Admissibility******Evidence > Testimony > Experts > Criminal Trials***

[HN1] A trial court's ruling to admit or exclude evidence is reviewed under an abuse of discretion standard. Absent a clear abuse of discretion, a trial court's decision to admit or exclude expert testimony will not be disturbed. An abuse of discretion exists when the trial court's decision was so clearly wrong as to lie outside the zone of reasonable disagreement, in other words, the trial court's decision or action was arbitrary, unreasonable, and made without reference to any guiding rules or principles.

***Evidence > Testimony > Experts > Admissibility******Evidence > Testimony > Experts > Criminal Trials******Evidence > Testimony > Experts > Qualifications***

[HN2] For a witness's expert testimony to be admissible, the witness must be qualified as an expert by knowledge, skill, experience, training, or education. Tex. R. Evid. 702.

***Evidence > Testimony > Experts > Criminal Trials***

[HN3] See *Tex. R. Evid. 702*.

***Evidence > Procedural Considerations > Burdens of Proof > Clear & Convincing Proof******Evidence > Scientific Evidence > General Overview******Evidence > Testimony > General Overview***

[HN4] The party offering the evidence has the burden of showing the witness is qualified as an expert on the specific matter in question. The proponent of expert testimony or evidence based on a scientific theory must show by clear and convincing evidence that the evidence is: (1) reliable and (2) relevant to assist the trier of fact in its fact-finding duty. To be reliable, the proffered evidence must satisfy three criteria: (1) the underlying scientific theory must be valid; (2) the technique applying the theory must be valid; and (3) the technique must have been properly applied on the occasion in question. The trial court's determination of reliability could be affected by the following non-exclusive factors: (1) the extent to which the underlying scientific theory and technique are accepted as valid by the relevant scientific community, if such a community can be ascertained; (2) the qualifications of the expert(s) testifying; (3) the existence of literature supporting or rejecting the underlying scientific theory and technique; (4) the potential rate of error of the technique; (5) the availability of other experts to test and evaluate the technique; (6) the clarity with which the underlying scientific theory and technique can be explained to the court; and (7) the experience and skill of the person(s) who applied the technique on the occasion in question.

***Evidence > Testimony > Experts > Criminal Trials***

[HN5] Police officers are qualified to testify regarding accident reconstruction if they are trained in the science about which they will testify and possess a high degree of knowledge sufficient to qualify as an expert.

***Criminal Law & Procedure > Criminal Offenses > Weapons > Definitions***  
***Torts > Transportation Torts > Motor Vehicles > General Overview***

[HN8] A deadly weapon is defined as anything that in the manner of its use or intended use is capable of causing death or serious bodily injury. *Tex. Penal Code Ann. § 1.07(a)(17)(B)*(2003). Anything, including a motor vehicle, which is actually used to cause the death of a human being is a deadly weapon. This is necessarily so because a thing which actually causes death is, by definition, capable of causing death.

**COUNSEL:** For APPELLANT: Hon. Joseph (Sib) Abraham Jr., El Paso, TX.

For STATE: Hon. Jaime E. Esparza, DISTRICT ATTORNEY, El Paso, TX.

**JUDGES:** Before Panel No. 2. Barajas, C.J., McClure, and Chew, JJ. McClure, J., Concurring.

**OPINION BY:** DAVID WELLINGTON CHEW

**OPINION:**

[\*240] Appellant Roberto Pena was indicted with two counts of intoxication manslaughter [\*241] and two counts of failure to stop and render aid. Before a jury, Appellant pled guilty to all four counts, but pled "not true" to the allegation that he used or exhibited a deadly weapon during the commission of the offense as alleged in each count. The jury found Appellant guilty of all four counts and made an affirmative finding on the use of a deadly weapon for each count. The jury assessed punishment at twenty years' imprisonment and a \$ 10,000 fine for each intoxication manslaughter count and five years' imprisonment and a \$ 5,000 fine for each failure to stop and render aid count. Upon the State's motion, the trial court ordered that the intoxication manslaughter counts be served consecutively, with the failure to stop and render aid counts to be served concurrently. The trial court sentenced Appellant in accordance with the jury's assessment, however we observe the court's final judgments [\*\*2] and sentences only contain deadly weapon findings for the intoxication manslaughter offenses. In his sole issue on appeal, Appellant contends the trial court committed reversible error by admitting testimony from a State's witness concerning the speed his vehicle was traveling when it struck the victims' vehicle and that this testimony severely prejudiced him. We affirm.

On June 17, 2001, between 12:30 and 1 a.m., Zachary Valenzuela was driving in the center lane on Gateway West when he noticed headlights in his rear view mirror. The rate of speed at which the car was coming at him from behind was the reason the headlights caught his attention. Mr. Valenzuela was driving between 55 to 60 miles per hour. He considered changing lane, but at the rate of speed the vehicle was approaching, he decided to stay in the center lane. When the approaching vehicle pulled up behind Mr. Valenzuela, it switched lanes, "flew by him," and pulled back into the center lane. Mr. Valenzuela recalled that the vehicle approached him from behind at a constant speed and was easily going over 60 miles per hour because it quickly passed him. As it passed, Mr. Valenzuela observed that the vehicle was

a green [\*\*3] Corvette driven by a male driver, later identified as Appellant.

As the Corvette traveled ahead to the Lee Trevino intersection, Mr. Valenzuela kept the vehicle's taillights in his line of sight and recalled there was nothing between him and the Corvette. Mr. Valenzuela saw cars stopped at the lights ahead. He then saw the Corvette's taillights swerve to one side and for a split second, saw car headlights turn quickly facing his direction before they turned. Mr. Valenzuela hit his brakes when he saw the headlights because he knew he was traveling on a one-way street. He knew there had been an accident, but did not see the actual impact. Mr. Valenzuela recalled that the Corvette's brake lights did not go on before the accident.

Veronica Huerta Garcia was at the Lee Trevino and Gateway West intersection at the time of the accident. Ms. Garcia was in the middle lane behind a green Eclipse and in front of a black Pontiac, waiting for the light to change. All the cars waiting for the light were in the middle lane. When the light turned green, Ms. Garcia drove a little bit forward and then heard a loud impact of vehicles being struck behind her. She looked at her rearview mirror and saw [\*\*4] a car, a Honda CRX pop up, go airborne, and then land with its headlights facing the opposite direction. To her left, Ms. Garcia saw a green Corvette slam against the guardrail, causing sparks to fly. She noticed that the Corvette hit the guardrail at a high rate of speed and then came to a sudden stop. When Ms. Garcia saw everything right behind her, she quickly swerved to the right to avoid being [\*242] hit in the chain reaction. She then called 911 on her cell phone.

Within seconds, Ms. Garcia checked on some of the cars involved in the accident. The Corvette was damaged in the front of the hood and on the side that hit the guardrail. Ms. Garcia had contact with the driver, Appellant, and recalled that he was drunk and smelled strongly of alcohol. She helped Appellant exit the Corvette, before going to assist the injured passenger and driver of the Honda CRX.

Robert Herrera, his wife, and their two children, were also at the Lee Trevino-Gateway West intersection at the time of the accident. Mr. Herrera recalled there was one car in front of him and two cars behind him. While he was waiting in the center lane for the light to change, Mr. Herrera heard a loud crash and felt the impact. [\*\*5] Right after the accident, Mr. Herrera went straight to the Corvette and observed Appellant trying to get out of the vehicle. Mr. Herrera was yelling at Appellant and tried to take off the car window before his wife called him away.

Miguel Garcia, Jr. and his spouse were traveling home from Horizon City on Interstate-10 and exited at Lee Trevino. Mr. Garcia recalled that it was a nice evening with no inclement weather. As he exited, he saw that an accident had just occurred right in front of the Shamaley Ford dealership, a very well lit area. Mr. Garcia saw a Honda Civic turned around facing oncoming traffic, a Corvette to his left, and some other cars in front. As he approached the scene, he veered off to the Shamaley Ford entranceway toward Gateway West. Mr. Garcia got out of his car and went over to assist the passengers in the Honda Civic. Mr. Garcia then approached the Corvette and made contact with Appellant. He observed that Appellant was talking on a cell phone in Spanish, smelled of alcohol, and was very disoriented. Mr. Garcia recalled Appellant telling him to go to the other guys because they looked pretty bad. Mr. Garcia then left Appellant and later noticed that he had [\*\*6] fled the scene.

Ronald Drake, a security guard for Shamaley Ford on duty at the time of the accident, observed a man running through the dealership's parking lot. As the man ran, he was bouncing off the cars, stumbling, and fell twice. Mr. Drake saw the man drop his cell phone twice as he ran. As he started to approach the individual who had stumbled and fallen down, Mr. Drake smelled a lot of alcohol and backed off. The man ran across the back lot and then headed east on Rojas. Mr. Drake then observed the fire department, an ambulance, and police coming down Lee Trevino and traveling on Gateway West the wrong way. Mr. Drake went to the accident scene and informed the police about the man running through the parking lot.

El Paso Police Officer Steve Smith was dispatched to the multi-car accident scene at approximately 12:35 a.m. Officer Smith recalled that it was a clear night, the roadway was dry, and the location was well-lit by the Shamaley Ford dealership. From his preliminary investigation, he determined that the green Corvette had traveled westbound on Gateway West in the center lane and had struck the Honda vehicle in front of it, which then struck the vehicle in front of

[\*\*7] it, which in turn struck another vehicle in front of that one. Of the four vehicles involved in the accident, three were facing west and one, the Honda vehicle, was facing eastbound as it had spun around due to the impact. Officer Smith observed extensive damage to the rear of the Honda vehicle.

The most critically injured in the accident were the two occupants of the Honda vehicle first struck by the Corvette. The front passenger, Mario Sandoval, was not [\*243] breathing and was pronounced dead at the scene. Dr. Juan Contin, the county medical examiner, determined that Mario Sandoval bled to death from a torn aorta in the chest, which resulted from the collision. After the accident, the driver, Roberto Sandoval, was not conscious and had a very faint pulse. Mr. Sandoval was taken to the hospital, but died the following day from massive brain injuries sustained in the accident.

Around 2:12 a.m., police officers apprehended Appellant as he stumbled towards his house on Tony Tejada. Appellant was arrested and taken to the accident scene where he was identified by witnesses as the individual driving the Corvette. Appellant was later taken to Del Sol Medical Center where his blood was drawn. [\*\*8] The blood test results showed Appellant had a blood-alcohol level of .23.

Ruben Cisneros, an El Paso police officer assigned to the special traffic investigations section, testified that based on his accident reconstruction analysis, he found no pre-impact brake marks nor any pre-impact skid marks for the Corvette. Officer Cisneros observed extensive front end damage to the Corvette, extensive rear damage to the Honda, and paint transfer from the Honda to the Corvette. Based on his observations and the skid marks, Officer Cisneros determined the front end of the Corvette collided with the back end of the Honda Civic CRX. After the initial impact, the rear end of the Honda "climbed up" on the front end of the Corvette, causing the vehicle to spin clockwise 80 degrees and go airborne before coming to a stop. When the Corvette struck the Honda, its left front tire locked up due to front end damage. The Corvette then veered to the left lane and collided with the guardrail, leaving a post-impact skid mark from the left front tire.

At trial, Appellant objected to Officer Cisneros' testimony as an expert witness concerning the speed of the vehicles involved in the accident. Over Appellant's [\*\*9] objection, Officer Cisneros testified that based on his accident reconstruction formula calculations, he determined the initial impacting vehicle, the Corvette, was traveling 104 miles per hour. He also determined the Honda was impacted from zero speed to a post-impact speed of 28 miles per hour.

### ***Expert Testimony***

In his sole issue for review, Appellant argues the trial court committed reversible error by admitting Officer Cisneros' testimony concerning the speed his vehicle was traveling on June 17, 2001 and that this testimony severely prejudiced him. Specifically, Appellant contends the State did not meet its burden in establishing that Officer Cisneros was qualified as an expert witness nor did it present evidence concerning the reliability of the "AIMS test" used to establish the speed his vehicle was traveling when it struck the Honda CRX.

### ***Standard of Review and Applicable Law***

[HN1] A trial court's ruling to admit or exclude evidence is reviewed under an abuse of discretion standard. *Montgomery v. State*, 810 S.W.2d 372, 391 (Tex.Crim.App. 1991)(Op. on reh'g). Absent a clear abuse of discretion, a trial court's decision to admit or exclude expert [\*\*10] testimony will not be disturbed. *Wyatt v. State*, 23 S.W.3d 18, 27 (Tex.Crim.App. 2000); *Morales v. State*, 32 S.W.3d 862, 865 (Tex.Crim.App. 2000). An abuse of discretion exists when the trial court's decision was so clearly wrong as to lie outside the zone of reasonable disagreement, in other words, the trial court's decision or action was arbitrary, unreasonable, and made without reference to any guiding [\*244] rules or principles. See *Montgomery*, 810 S.W.2d at 391.

[HN2] For a witness's expert testimony to be admissible, the witness must be qualified as an expert by "knowledge, skill, experience, training, or education . . ." TEX.R.EVID. 702. Rule 702 provides:

[HN3] If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify thereto in the form of an opinion or otherwise.

*TEX.R.EVID. 702.*

[HN4] The party offering the evidence has the burden of showing the witness is qualified as an expert on the specific matter in question. *Penry v. State*, 903 S.W.2d 715, 762 (Tex.Crim.App. 1995), [\*\*11] *cert. denied*, 516 U.S. 977, 116 S. Ct. 480, 133 L. Ed. 2d 408, 133 L. Ed. 2d 408 (1995).

Pursuant to *Kelly v. State*, 824 S.W.2d 568 (Tex.Crim.App. 1992), the proponent of expert testimony or evidence based on a scientific theory must show by clear and convincing evidence that the evidence is: (1) reliable and (2) relevant to assist the trier of fact in its fact-finding duty. *Id.* at 572; *Ochoa v. State*, 994 S.W.2d 283, 284 (Tex.App.--El Paso 1999, *no pet.*). To be reliable, the proffered evidence must satisfy three criteria: (1) the underlying scientific theory must be valid; (2) the technique applying the theory must be valid; and (3) the technique must have been properly applied on the occasion in question. *Kelly*, 824 S.W.2d at 573. The trial court's determination of reliability could be affected by the following non-exclusive factors: (1) the extent to which the underlying scientific theory and technique are accepted as valid by the relevant scientific community, if such a community can be ascertained; (2) the qualifications of the expert(s) testifying; (3) the existence of literature supporting or rejecting the underlying [\*\*12] scientific theory and technique; (4) the potential rate of error of the technique; (5) the availability of other experts to test and evaluate the technique; (6) the clarity with which the underlying scientific theory and technique can be explained to the court; and (7) the experience and skill of the person(s) who applied the technique on the occasion in question. *Id.*

#### *Daubert/Kelly Hearing*

At trial, Appellant objected to Officer Cisneros' testimony as an expert witness concerning the speed of the vehicles involved in the accident. Outside the jury's presence, Officer Cisneros testified that on many occasions, he has done speed reconstruction. He has had a variety of training courses in speed reconstruction, specifically the basic accident investigation course offered by the police department, the intermediate accident investigation course, the advanced accident reconstruction course, and the traffic accident reconstruction course. In 1997, Officer Cisneros received approximately 80 hours in accident reconstruction training in San Antonio at the Bexar County Sheriff's Department. He also has had training in bicycle, pedestrian, and motor vehicle collisions. In August 1999, [\*\*13] Officer Cisneros was certified in the 383rd District Court as an expert and again in October 2001 in the 41st District Court.

In this particular case, Officer Cisneros determined the speed of the Corvette and other vehicles by using formulas he had been taught to use for specific types of collisions. Officer Cisneros inserted certain data that was obtained from the scene into these formulas to derive the speeds. Officer Cisneros explained that he worked [\*\*245] the calculations out by hand using a calculator and used a skid speed formula for the post-impact distances and then used a linear momentum in-line collision formula to determine a speed for the Chevrolet Corvette. Based on these findings and his training, experience, and knowledge, Officer Cisneros determined the Corvette was traveling roughly 104 miles per hour at impact. The trial court overruled Appellant's objection to Officer Cisneros' testimony, but allowed Appellant's counsel to further voir dire Officer Cisneros outside the jury's presence.

In voir dire, Officer Cisneros testified that the measurements used in calculating the skid speed and linear momentum in-line collision formulas were taken with a surveying instrument [\*\*14] called an Accident Investigation Measuring System ("AIMS"). Officer Cisneros explained that operation of the AIMS device consists of setting up the equipment and from that initial point, taking shots by aiming the equipment at the particular target you want. The device has a prism that shoots a laser beam to the prism at the target, which shoots it back and gives you the measurement. Officer Cisneros conceded that he could not explain in any detail the scientific principles involved in this type of measuring system. Officer Cisneros stated that his department has two AIMS equipment, which were recently checked for calibration by the manufacturer, but he did not know the last time the AIMS device he used was calibrated. Officer

Cisneros also conceded that he did not know whether or not the accuracy of AIMS results could be validated over and over again by someone who is an expert in the underlying scientific principles of this measuring machine.

Regarding the formulas used in his calculations, Officer Cisneros testified that he obtained the measurements used in the formulas by using the AIMS machine. The formulas were taught to him during the courses mentioned above. Officer Cisneros [\*\*15] explained that the formulas are used internationally by other law enforcement agencies, including the Department of Public Safety in Texas. Officer Cisneros, however, conceded that he did not know who devised the formulas and did not know the scientific principles underlying the values in the formulas.

At the conclusion of the hearing, Appellant's counsel renewed his objection to Officer Cisneros' testimony. In response, the State argued that the AIMS system and formulas have been judicially accepted and noted that the officer testified that the AIMS system is used by other departments. It further noted that there have been no problems with it when used before. The trial court overruled Appellant's objection and allowed the State to offer the officer's expert witness concerning the speed of the Corvette and that of the other vehicle at the time of the collision.

### *Qualifications*

As the party offering Officer Cisneros' testimony, the State had the burden of showing he qualified as an expert on speed based on his accident reconstruction background. *See Penry, 903 S.W.2d at 762.* [HN5] Police officers are qualified to testify regarding accident reconstruction if they [\*\*16] are trained in the science about which they will testify and possess a high degree of knowledge sufficient to qualify as an expert. *DeLarue v. State, 102 S.W.3d 388, 396 (Tex.App.--Houston [14th Dist.] 2003, no pet.).*

Here, Officer Cisneros testified that he has been a police officer with the El Paso Police Department for twenty years. Since April 1994, he has been assigned to the special traffic investigations section. Officer Cisneros has received basic, intermediate, [\*246] and advanced training in accident reconstruction, including speed reconstruction. In addition, Officer Cisneros has eighty hours of accident reconstruction training held at the Bexar County Sheriff's Department in 1997. On many occasions he has done accident reconstruction for the special traffic investigations section. Officer Cisneros has been certified twice as an expert in accident reconstruction by El Paso district courts. For this case, Officer Cisneros was called out to Gateway West on June 17, 2001 and performed an accident reconstruction of the incident. Officer Cisneros clearly demonstrated he had special knowledge on accident reconstruction, including speed reconstruction, based on his [\*\*17] extensive training and his field experience. Therefore, we conclude the trial court did not abuse its discretion in determining Officer Cisneros was qualified to offer his expert opinion in speed reconstruction.

### *Reliability*

The State in this case does not dispute that accident reconstruction, specifically Officer Cisneros' testimony concerning the speed at which Appellant was driving at the time of impact, is a type of scientific evidence subject to *Kelly* requirements for admissibility. By clear and convincing evidence, the State was required to show that with respect to the scientific evidence in this case: (1) the underlying scientific theory was valid; (2) the technique applying the theory was valid; and (3) the technique was properly applied on the occasion in question. n1 *See Kelly, 824 S.W.2d at 573.*

n1 In his sole issue, Appellant does not challenge Officer Cisneros' testimony concerning the Corvette's speed on relevancy grounds. Therefore, we will address its reliability only.

[\*\*18]

Appellant argues on appeal that the State presented no evidence concerning the reliability of the "AIMS test." By

Appellant's complaint we understand him to be challenging the reliability of AIMS equipment-derived distance measurements and the reliability of the speed calculation formulas used by Officer Cisneros in his speed reconstruction analysis.

Here, Officer Cisneros testified that the formulas he used in deriving Appellant's driving speed are also used by other law enforcement agencies. Officer Cisneros, however, conceded that he did not know the scientific principles underlying the values in the formulas used to derive Appellant's speed at the time of impact. He could not explain the underlying scientific principles of how the AIMS equipment provided distance measurements and he did not know whether or not the accuracy of AIMS results could be validated over and over again. In this case, there is no evidence in the record sufficient to satisfy the reliability requirements pursuant to *Kelly*. Therefore, the trial court erred in admitting the evidence concerning Appellant's driving speed. We find, however, that in this case, admission of Officer Cisneros' testimony concerning [\*\*19] Appellant's driving speed at the time of impact was harmless.

[HN6] A nonconstitutional error that does not affect the substantial rights of the defendant must be disregarded. *See TEX.R.APP.P. 44.2(b)*. A substantial right is affected when the error had a substantial and injurious effect or influence in determining the jury's verdict. *King v. State, 953 S.W.2d 266, 271 (Tex.Crim.App. 1997)*. A criminal conviction should not be overturned for nonconstitutional error if the appellate court, after examining the record as a whole, has fair assurance that the error did not influence the jury or had but a slight effect. *Johnson v. State, 967 S.W.2d 410, 417 (Tex.Crim.App. 1998)*.

[\*247] In this case, Appellant pled guilty and was convicted of intoxication manslaughter. n2 [HN7] A person commits the offense of intoxication manslaughter if the person: (1) operates a motor vehicle in a public place; (2) is intoxicated; and (3) by reason of that intoxication causes the death of another by accident or mistake. *See TEX.PEN.CODE ANN. § 49.08(a)*(Vernon 2003). The contested issue at trial was whether Appellant used or exhibited a deadly weapon: to wit [\*\*20] a motor vehicle in commission of the offense. [HN8] A deadly weapon is defined as "anything that in the manner of its use or intended use is capable of causing death or serious bodily injury." *TEX.PEN.CODE ANN. § 1.07(a)(17)(B)*(Vernon 2003). Anything, including a motor vehicle, which is actually used to cause the death of a human being is a deadly weapon. *Tyra v. State, 897 S.W.2d 796, 798 (Tex.Crim.App. 1995)*. This is necessarily so because a thing which actually causes death is, by definition, "capable of causing death." *Id.*

n2 The first count of intoxication manslaughter in the indictment alleged Appellant:

Did then and there, by accident or mistake, while operating a motor vehicle in a public place while intoxicated, to wit: by having an alcohol concentration of .08 or more, and by reason of that intoxication caused the death of MARIO SANDOVAL by then and there driving said motor vehicle into and causing it to collide with a motor vehicle in which MARIO SANDOVAL was a passenger . . . .

The second count of intoxication manslaughter alleged Appellant:

Did then and there, by accident or mistake, while operating a motor vehicle in a public place while intoxicated, to wit: by having an alcohol concentration of .08 or more, and by reason of that intoxication caused the death of ROBERT SANDOVAL by then and there driving said motor vehicle into and causing it to collide with a motor vehicle driven by ROBERT SANDOVAL . . . .

[\*\*21]

The evidence shows that Appellant was driving in excess of 60 miles per hour as he passed Zachary Valenzuela and approached the Lee Trevino-Gateway West intersection. Mr. Valenzuela did not see Appellant attempt to brake prior to the accident and witnesses testified that the intersection was well-lit and the roadway was dry. Physical evidence and witness testimony indicated that the front of Appellant's vehicle collided with the rear end of the victims' vehicle,

causing their vehicle to go airborne and spin around to face oncoming traffic. Through her rearview mirror, Veronica Huerta Garcia saw Appellant's vehicle slam against the guardrail at a high speed, causing sparks to fly. In unchallenged testimony, Officer Cisneros testified that he found no pre-impact brake marks and no pre-impact skid marks at the accident scene. El Paso County Medical Examiner Dr. Juan Contin testified that the passenger victim bled to death from a torn aorta, resulting from the collision. Dr. Contin also testified that the driver victim died the following day in the hospital from injuries sustained in the collision.

After examining the record as a whole, we find the evidence above was sufficient to support [\*\*22] the jury's affirmative finding that Appellant used his motor vehicle in a manner that was capable of causing death or serious bodily injury, without considering the speed evidence introduced through Officer Cisneros' testimony. The trial court's erroneous admission of the speed evidence did not affect Appellant's substantial rights and in light of other properly admitted evidence we are assured that if its admission influenced the jury at all, it did so only slightly. Therefore, we find the trial court's error to be harmless. Issue One is overruled.

Accordingly, we affirm the trial court's judgment.

DAVID WELLINGTON CHEW, Justice

**CONCUR BY:** ANN CRAWFORD McCLURE

**CONCUR:**

[\*248] **CONCURRING OPINION**

The record shows that Appellant waived his complaint about the AIMS device and the measurements derived from it. Therefore, I disagree with the majority's conclusion that the trial court abused its discretion by admitting this particularly testimony. Alternatively, I would find that the State is not required to prove the scientific principles pertaining to the AIMS device in order for an expert to rely on measurements taken with the device. While I agree with the majority's holding that the State [\*\*23] failed to carry its burden under *Kelly* with respect to Cisneros' expert opinion as to the pre-impact speed of Appellant's vehicle, I write separately to discuss the effect of *Hernandez v. State*, 116 S.W.3d 26 (Tex.Crim.App. 2003) on an appellate court's review of this issue. Because the majority opinion ultimately concludes that the errors in admitting the expert testimony is harmless, I concur.

Cisneros utilized two formulas in estimating the speed at which Appellant's car was traveling at the time of impact: the skid speed formula and the linear momentum in-line collision formula. These formulas are used not only by the Texas Department of Public Safety but also internationally by other law enforcement agencies and they were taught to Cisneros at the accident investigation and accident reconstruction courses he attended as part of his training. Pursuant to his training, Cisneros gathered data relevant to the following formula components:

1. weight of the vehicles;
2. the coefficient of friction or drag factor; and
3. the post-impact distances of the vehicles.

Cisneros obtained the weight of the vehicles involved in the accident from the Department of Motor [\*\*24] Vehicles. The drag factor pertains to the friction of the roadway and Cisneros obtained this figure by utilizing a drag sled to find a coefficient of friction for the particular road involved in the accident. For the third factor, Cisneros utilized the AIMS device to measure the distances traveled by the two vehicles after impact. A diagram prepared by Cisneros (State's Exhibit 10) shows that Appellant's vehicle traveled 413 feet from the point of impact to its resting place. There were no pre-impact skid marks because Appellant's vehicle did not skid prior to striking the complainants' car. Consequently, Cisneros utilized the skid speed formula to determine only a post-impact speed for each vehicle involved

in the accident.

As explained by Cisneros, the skid speed formula involves multiplying distance by a constant of thirty by the square root of the roadway drag factor. Cisneros determined that the complainants' Honda went from 0 miles per hour to a post-impact speed of 28 miles per hour. Cisneros was not asked to state the post-impact speed he determined for the Corvette but he included the figure in a written expert's report filed in the case. n1 With the post-impact speeds determined [\*\*25] by the skid speed formula, Cisneros then applied the weights of the vehicles in the linear momentum in-line collision formula in order to obtain the speed of the initial impacting vehicle. Based on this formula, Cisneros estimated that Appellant's Corvette was traveling 104 miles per hour at the point of impact. Cisneros explained the components of the skid speed formula but was not asked to explain the linear momentum in-line collision formula.

n1 Cisneros' written report was not admitted into evidence.

#### [\*249] *Waiver of Complaint About Measurements*

The majority has failed to consider that Appellant waived any complaint about Cisneros' use of the AIMS device to obtain the measurements used in the speed calculation formulas because Appellant did not object to State's Exhibit 10, which is a diagram of the collision including measurements taken at the scene with the AIMS device. It is well established that a party must make a timely and specific objection in order to preserve his complaints for appellate review. [\*\*26] See *TEX.R.APP.P. 33.1*. Further, a party must object every time inadmissible evidence is offered or the complaint is waived. See *Ethington v. State*, 819 S.W.2d 854, 858 (*Tex.Crim.App.* 1991); *Gillum v. State*, 888 S.W.2d 281, 285 (*Tex.App.--El Paso* 1994, *pet. ref'd*). In the presence of the jury, the State elicited testimony from Cisneros showing that he had training in accident reconstruction and had previously testified as an expert on that topic. Cisneros then identified State's Exhibit 10 as a diagram of the accident which he prepared on the night of the accident. Cisneros explained that he used the Accident Investigation Measuring System (AIMS), which he described as a surveying device, and a software program to prepare State's Exhibit 10. The State then offered State's Exhibit 10 and Appellant's counsel stated that he had no objection to it. State's Exhibit 10 depicts the point of impact and post-impact locations of the vehicles, their direction of travel, the location of various skid marks, and measurements of those skid marks taken by Cisneros using AIMS. The exhibit reflects that Appellant's Corvette traveled 413 feet from the point of impact [\*\*27] with the complainants' Honda. By failing to object to the initial testimony about the AIMS device and State's Exhibit 10, Appellant waived any subsequent complaint he might have had about the measurements taken by Cisneros with the assistance of the AIMS device.

#### *Scientific Validity of AIMS*

Even if Appellant did not waive his complaint about the measurements and the AIMS device, the majority opinion errs by holding that the State was obligated to establish that Cisneros understands the inner-workings of this surveying device. Cisneros was offered as an expert in accident reconstruction, not as an expert in AIMS equipment. Consequently, there was no necessity for the State to prove that he understood exactly how laser measuring devices and surveying equipment work. As aptly noted by appellate counsel for the State, the AIMS device is essentially a high-tech tape measure and Cisneros used the device to measure the distance between two points. I find no requirement in *Rule 703* or elsewhere that an expert witness be able to explain the scientific principles involved in every piece of equipment used by the expert to gather data. To illustrate this point, an expert who relies on photographs [\*\*28] as part of the foundation for his opinion regarding the cause of an accident need not explain precisely how a camera works in order to rely on the data supplied by the photographs. Likewise, an expert witness who utilizes a calculator in performing calculations is not required to relate to the jury the scientific principles involved in an electronic calculator before his expert testimony is permitted. Cisneros sufficiently explained that the AIMS device, using a laser, measured the distance Appellant's car traveled from the point of impact to its resting place and he utilized that measurement in the skid speed formula. For these reasons, I would find that the trial court did not abuse its discretion in admitting Cisneros'

testimony about the measurements taken at the scene of the accident.

[\*250] *Reliability of the Speed Calculation Formulas*

While I would find much of Cisneros' testimony admissible, the State failed to offer sufficient evidence proving the reliability of the two formulas utilized by Cisneros to estimate speed. A party seeking to introduce evidence of a scientific principle need not always present expert testimony, treatises, or other scientific material to satisfy the [\*\*29] *Kelly* test. *Hernandez*, 116 S.W.3d at 28-9. It is only at the dawn of judicial consideration of a particular type of forensic scientific evidence that trial courts must conduct full-blown "gatekeeping" hearings under *Kelly*. *Id.* at 29. Once a scientific principle is generally accepted in the pertinent professional community and has been accepted in a sufficient number of trial courts through adversarial *Daubert/Kelly* n2 hearings, courts subsequently considering the issue may take judicial notice of the scientific validity (or invalidity) of that scientific theory based upon the process, materials, and evidence produced in the prior hearings. *Id.* at 29; see *Weatherred v. State*, 15 S.W.3d 540, 542 n.4 (Tex.Crim.App. 2000)("once a particular type of scientific evidence is well established as reliable, a court may take judicial notice of that fact, thereby relieving the proponent of the burden of producing evidence on that question"). In other words, trial courts are not required to reinvent the scientific wheel in every trial. *Hernandez*, 116 S.W.3d at 29. The Court of Criminal Appeals has recently [\*\*30] emphasized, however, that some trial courts must conduct an adversarial gatekeeping hearing to determine the reliability of the given scientific theory and its methodology before other trial courts may take judicial notice of that determination. *Id.* Although appellate courts may likewise take judicial notice of other appellate opinions concerning a specific scientific theory or methodology in evaluating a trial court's *Daubert/Kelly* gatekeeping decision, judicial notice on appeal cannot serve as the sole source of support for a bare trial court record concerning scientific reliability. *Hernandez*, 116 S.W.3d at 31-2.

n2 *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993).

Although the trial court held a *Daubert/Kelly* hearing in the instant case, the State did not offer any evidence of the theories underlying the formulas utilized by Cisneros. Further, the State did not show that the issue of the formulas' reliability [\*\*31] has been litigated previously nor did it ask the trial court to take judicial notice of the reliability of the scientific theory and methodology based upon prior hearings or prior appellate decisions. See *Hernandez*, 116 S.W.3d at 30 and n.7. There is evidence that Cisneros has previously qualified as an expert and testified regarding accident reconstruction and perhaps even speed estimation, but the fact that a trial court has allowed some type of scientific testimony by a particular witness previously does not mean that the witness's testimony is, *ipso facto*, scientifically reliable. *Hernandez*, 116 S.W.3d at 30.

The trial court's decision to admit this evidence is understandable as expert testimony regarding accident reconstruction and speed estimation has been previously admitted in Texas civil and criminal cases. See e.g., *Chavers v. State*, 991 S.W.2d 457, 460-61 (Tex.App.--Houston [1st Dist.] 1999, *pet. ref'd*); *Trailways, Inc. v. Clark*, 794 S.W.2d 479, 483 (Tex.App.--Corpus Christi 1990, *writ denied*); *Rogers v. Gonzales*, 654 S.W.2d 509, 512 (Tex.App.--Corpus Christi 1983, *writ ref'd n.r.* [\*\*32] e.); *Bates v. [\*\*251] Barclay*, 484 S.W.2d 955, 957-59 (Tex.Civ.App.--Beaumont 1972, *writ ref'd n.r.e.*); *Adams v. Smith*, 479 S.W.2d 390, 395 (Tex.Civ.App.--Amarillo 1972, *no writ*); *Beynon v. Cutberth*, 390 S.W.2d 352, 355-56 (Tex.Civ.App.--Eastland 1965, *no writ*). With the exception of *Chavers*, these decisions pre-date *Daubert* and *Kelly*, and there is no determination in any of the cases that the formulas used to calculate speed are scientifically reliable. Although *Chavers* employs the proper criteria under *Kelly*, the decision is distinguishable because the expert witness based his calculations on yaw marks rather than the two formulas used by Cisneros. Therefore, taking judicial notice of *Chavers* is of no benefit in the instant case.

In *Thomson v. Rook*, a United States District Court conducted a *Daubert* hearing to determine the admissibility of an accident reconstruction expert's opinion regarding speed, distance traveled by vehicles, and the point of impact of the collision. *Thomson v. Rook*, 255 F. Supp. 2d 584, 584-87 (E.D.Tex. 2001). That court determined that the articles,

books, and other [\*\*33] experts in the accident reconstruction field validated the methodology used by the expert witness for calculating speed, distance traveled by the vehicles, and the point of impact. *Id.* at 586. In a footnote, the court noted that the expert witness calculated speed using a "standard physics equation employed by automobile accident reconstruction experts and a coefficient of friction derived from J. Stannard Baker's book, *Traffic Investigation Manual*." *Id.* at 586 n.5. The witness calculated speed and distance traveled by one of the vehicles using a standard rate of acceleration from a standard start as reported by the Baker book. *Id.* The district court admitted the witness's expert opinion on these topics but excluded the witness's opinion about the driver's braking time because the plaintiffs had not produced evidence or articles or books, or other experts that validate the methodology used by the expert witness. *Id.* at 587. It is impossible to determine whether Cisneros used some of the same formulas as the witness in *Thomson*, and therefore, taking judicial notice of this decision would not benefit the State.

I have been [\*\*34] unable to find any Texas appellate decisions at the state or federal level holding that the skid speed formula and linear momentum formulas utilized by Cisneros are reliable.

A cursory review of appellate decisions from other jurisdictions indicates that this type of expert testimony has been often admitted into evidence in other states. *See e.g., State v. Russo*, 38 Conn. Supp. 426, 450 A.2d 857, 866-67 (Conn.Super.Ct. 1982)(holding that an expert in Connecticut may testify as to the speed of a motor vehicle based on skid marks and other factors because the formulas used to calculate speed are based on well-recognized principles of physics that have gained general acceptance in the field of accident reconstruction); *Bryant v. Buerman*, 739 So. 2d 710, 712-13 (Fla.Dist.Ct.App. 1999)(holding that opinion of an accident reconstruction expert witness regarding the speed of a vehicle at the time of an accident is admissible in personal injury action arising out of collision, so long as the expert's testimony is helpful to the jury). *See also* Jerre E. Box, Annotation, *Opinion Testimony as to Speed of Motor Vehicle Based on Skid Marks and Other Facts* [\*\*35] , 29 A.L.R. 3d §§ 248-77 (1970 & Supp. 1996)(discussing numerous decisions admitting and excluding this type of evidence). As is the case with the Texas decisions discussed above, many of the out-of-state decisions pre-date *Daubert* and *Kelly*, and of those cases decided since *Daubert* and *Kelly*, the opinions do not discuss reliability of the same formulas used by Cisneros. Further, none [\*\*252] of these decisions indicates that the formulas utilized by Cisneros have become so widely accepted or persuasively proven that future courts may take judicial notice of their reliability. *See Hernandez*, 116 S.W.3d at 29 n.6. The Connecticut Supreme Court stated in *Russo* that using the coefficient of friction to estimate speed is a well recognized principle that has gained general acceptance in the field of accident reconstruction. *Russo*, 450 A.2d at 866. While Cisneros utilized the coefficient of friction in the skid speed formula to determine post-impact speed, he used a different formula to obtain pre-impact speed and that is the object of Appellant's complaint on appeal. Moreover, the Court of Criminal Appeals cautioned in *Hernandez* about reliance [\*\*36] on judicial opinions from non-Texas jurisdictions because many other jurisdictions utilize the "preponderance of the evidence" standard rather than the "clear and convincing" evidence standard required in Texas. *Hernandez*, 116 S.W.3d at 31 n.13.

In the absence of any evidence showing the reliability of the speed calculation formulas utilized by Cisneros, the trial court erred in admitting Cisneros' conclusion that Appellant's vehicle was traveling 104 miles per hour at the point of impact. However, I would also find the error harmless as stated in the majority opinion. With these additional comments and observations, I concur in the judgment affirming the trial court's judgment.

**HENRY ARTHUR SWEENEY v. COMMONWEALTH OF VIRGINIA****Record No. 7435****Supreme Court of Virginia***211 Va. 668; 179 S.E.2d 509; 1971 Va. LEXIS 239; 47 A.L.R.3d 817***March 8, 1971****PRIOR HISTORY:** [\*\*\*1]

Error to a judgment of the Circuit Court of Greene County. Hon. Lyttelton Waddell, judge presiding.

**DISPOSITION:**

*Reversed and dismissed.*

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Plaintiff in error driver appealed a judgment from the Circuit Court of Greene County (Virginia), which found the driver guilty of operating a motor vehicle over the public highways of the state at a speed of 75 miles per hour in a 60 mile speed zone, as determined by radar, in favor of defendant in error the commonwealth.

**OVERVIEW:** The driver was tried in the trial court on the charge of operating a motor vehicle over the public highways of the state at a speed of 75 miles per hour in a 60 mile speed zone, as determined by radar. The trial court found the driver guilty as charged and fixed his fine. Judgment was entered, and the court granted a writ of error. The court reversed the trial court's judgment and dismissed the warrant. The court found that the trooper did not estimate the speed of the driver's automobile, and the only evidence as to its speed when it passed through the radar zone or beam was that shown by the radar device. The conviction of the driver rested entirely upon the accuracy of the radar. It was not enough that the certificate stated that the speedometer had been calibrated. The certificate which was admitted in evidence did not reflect the accuracy of the radio microwave or other electrical device when tested by officers who used an accurate speedometer to make the test; therefore, the certificate was not in conformity with Va. Code Ann. § 46.1-198. There was no other evidence in the record which showed the accuracy of the speedometer that was used.

**OUTCOME:** The court reversed the judgment of the trial court that had found the driver guilty of speeding as determined by radar and dismissed the warrant against the driver.

**CORE TERMS:** radar, accuracy, speedometer, speed, certificate, motor vehicle, trooper, microwave, radio, mile,

#### **OPINION:**

211 Va. 668, \*668; 179 S.E.2d 509, \*\*510;  
1971 Va. LEXIS 239, \*\*\*1; 47 A.L.R.3d 817

[\*668] [\*\*510] HARRISON, J., delivered the opinion of the court.

Henry Arthur Sweeny was tried in the court below on the charge of operating a motor vehicle over the public highways of this state at a speed of 75 miles per hour in a 60 mile speed zone, as determined by radar. The court found defendant guilty as charged and fixed his fine at \$25. Judgment was entered, and we granted a writ of error.

We need concern ourselves [\*\*\*2] here only with the action of the trial court in admitting into evidence, over the objection of defendant, the "Department of State Police Certificate of Radar Accuracy Test".

On the night of December 17, 1968, at about 7:40 P.M., Virginia State Troopers R. C. Byram and Larry R. Mayhew placed in operation "a radar apparatus" to check the speed of vehicles traveling north on Highway 29 in Greene County, Virginia. Defendant is [\*669] alleged to have passed through the radar beam about 8:15 P.M. at a speed which registered 75 miles per hour thereon and he was arrested. Sweeny estimated his speed at 55 miles per hour, and a passenger in the back seat of his car estimated the speed at 60 miles per hour.

At defendant's trial the Commonwealth introduced in evidence, pursuant to the provisions of Code § 46.1-198(a1), a Department of State Police "Certificate of Radar Accuracy Test". The certificate, dated December 17, 1968, shows the county, highway and distance at which the apparatus was set up, as well as its height and distance from the pavement. On that part of the certificate, under the heading "Certification of Radar Accuracy Test by Calibrated Speedometer", it shows that [\*\*\*3] the radar was tested on six occasions between 7:40 P.M. and 9:45 P.M. It further shows the reading taken by Officer Byram on the radar meter situated on the ground reflected speeds of 75, 65 and 55 miles per hour [\*\*511] when Officer Mayhew was in his car driving past the meter at speeds of 75, 65 and 55 miles per hour as reflected by the car's speedometer.

The certificate then contains the following certification by Troopers Larry R. Mayhew and R. C. Byram:

"We, the undersigned, certify that we conducted the accuracy test by calibrated speedometer of the radio microwave (radar) device shown above and the information herein is a complete and accurate record of the results of said test."

On April 16, 1969 Trooper Mayhew attested before a notary public "that the above is an accurate record of the tests conducted".

The narrow question for our decision is whether or not this certificate meets the requirements of Code § 46.1-198(a1) and was therefore admissible as "evidence of the facts therein stated and the results of such testing".

We have previously reviewed convictions for speeding based upon radar checks. See *Biesser v. Town of Holland*, 208 Va. 167, 156 [\*\*\*4] S.E.2d 792 (1967); *Thomas v. City of Norfolk*, 207 Va. 12, 147 S.E.2d 727 (1966); *Farmer v. Commonwealth*, 205 Va. 609, 139 S.E.2d 40 (1964); *Crosby v. Commonwealth*, 204 Va. 266, 130 S.E.2d 467 (1963); *Royals v. Commonwealth*, 198 Va. 883, 96 S.E.2d 816 (1957); and *Royals v. Commonwealth*, 198 Va. 876, 96 S.E.2d 812 (1957).

[HN1] Code § 46.1-198 reads, in part, as follows:

"Checking on speed with electrical devices; certificate as to accuracy of device; arrest without warrant. -- (a) The speed of any [\*670] motor vehicle may be checked by the use of radio microwaves or other electrical device. The results of such checks shall be accepted as prima facie evidence of the speed of such motor vehicle in any court or legal proceedings where the speed of the motor vehicle is at issue.

"(a1) In any court or legal proceedings in which any question arises as to the calibration or accuracy of any such radio microwave or other electrical device, a certificate, executed and signed by the officers calibrating or testing such device as to its accuracy as well as to the accuracy of the speedometer of any motor vehicle used in such test, and

211 Va. 668, \*670; 179 S.E.2d 509, \*\*511;  
1971 Va. LEXIS 239, \*\*\*4; 47 A.L.R.3d 817

stating the [\*\*\*5] time of such test, type of test and results of testing, shall be admissible when attested by one such officer who executed and signed it as evidence of the facts therein stated and the results of such testing."

In the instant case. Trooper Byram did not estimate the speed of defendant's automobile and the only evidence as to its speed when it passed through the radar zone or beam was that shown by the radar device. The narrative statement of the evidence reflects that: "On cross examination Trooper Byram testified that he made no test of the accuracy of the speedometer used to test the radar speedometer and had no personal knowledge of the speedometer. . . ."

The conviction of Sweeny therefore rests entirely upon the accuracy of the radar. It depends upon the certificate of radar accuracy tests and in particular upon the admissibility of the certificate of the officers as to the accuracy of both the radar apparatus and the accuracy of the speedometer of the trooper's car by which the radar device was tested.

Manifestly Code § 46.1-198 was amended in 1968, following the decision of this court in *Biesser v. Town of Holland, supra*, to obviate the necessity of having [\*\*\*6] two troopers testify in every contested speeding case which involves the use of radar. It was the intention of the General Assembly to provide, in cases where any question arises as to the calibration or accuracy of any radio microwave or any other electrical device, that such accuracy could be shown by a certificate of the officers who conducted the tests of the device, and who had knowledge of its accuracy.

[\*\*512] The statute contemplates that the speed of motor vehicles may be checked by radar; that the results of such checks be accepted as prima facie evidence where speed is an issue; and that persons may be convicted on the certificates filed in accordance with the statute. [\*671] However, [HN2] the statute must be strictly construed and there should be a full compliance therewith if a certificate is to be used as evidence. In prosecutions for speeding arising through the use of radar, the accuracy of the radio microwave, or other electrical device which measures the speed of a vehicle, is critical, for it is the reading reflected by this device which brings about the arrest and the conviction of a defendant.

Therefore the General Assembly provided that [HN3] the certificate [\*\*\*7] of the officers testing the radar device must reflect not only its accuracy *but also the accuracy of the speedometer of any motor vehicle used in such tests.*

In the case under consideration the accuracy of the radar apparatus was tested by, and depended on, the accuracy of the speedometer of the automobile of Trooper Mayhew which was driven through the radar beam on six separate occasions. True, the certificate filed shows that the speeds reflected on the radar meter were identical with those reflected on the vehicle driven by Trooper Mayhew. This would indicate that the radar meter was reflecting the correct speed *provided* the reading of the automobile speedometer was accurate. If the speedometer were defective or inaccurate to the same degree as the radar meter then both would be reflecting an improper speed. While this is unlikely and remote, it demonstrates the necessity that the speedometer of the motor vehicle used to test the radar meter be accurate.

The certificate in the instant case certifies that Byram and Mayhew conducted the accuracy test by "calibrated speedometer of the radio microwave (radar) device". Among the definitions of the word "calibrate" found [\*\*\*8] in Webster's Third New International Dictionary, page 316, is "to standardize (as a measuring instrument) by determining the deviation from standard esp. so as to ascertain the proper correction factors". "Calibrator" is defined as "an instrument for measuring the calibre of any passage". Therefore to say that a speedometer has been "calibrated" is to say that a speedometer has been tested for accuracy. This does not necessarily mean that it was found accurate.

It is not enough that the certificate should say that the speedometer has been calibrated. The certificate should conform to the statute, and such is possible only if it reflects the accuracy of the radio microwave or other electrical device when tested by officers who used an accurate speedometer to make the test.

The certificate which was admitted in evidence in the instant case [\*672] fails to meet this test and is therefore not in conformity with the statute. There is no other evidence in the record which shows the accuracy of the speedometer that was used.

### **OPINION:**

211 Va. 668, \*668; 179 S.E.2d 509, \*\*510;  
1971 Va. LEXIS 239, \*\*\*1; 47 A.L.R.3d 817

[\*668] [\*510] HARRISON, J., delivered the opinion of the court.

Henry Arthur Sweeny was tried in the court below on the charge of operating a motor vehicle over the public highways of this state at a speed of 75 miles per hour in a 60 mile speed zone, as determined by radar. The court found defendant guilty as charged and fixed his fine at \$25. Judgment was entered, and we granted a writ of error.

We need concern ourselves [\*\*\*2] here only with the action of the trial court in admitting into evidence, over the objection of defendant, the "Department of State Police Certificate of Radar Accuracy Test".

On the night of December 17, 1968, at about 7:40 P.M., Virginia State Troopers R. C. Byram and Larry R. Mayhew placed in operation "a radar apparatus" to check the speed of vehicles traveling north on Highway 29 in Greene County, Virginia. Defendant is [\*669] alleged to have passed through the radar beam about 8:15 P.M. at a speed which registered 75 miles per hour thereon and he was arrested. Sweeny estimated his speed at 55 miles per hour, and a passenger in the back seat of his car estimated the speed at 60 miles per hour.

At defendant's trial the Commonwealth introduced in evidence, pursuant to the provisions of Code § 46.1-198(a1), a Department of State Police "Certificate of Radar Accuracy Test". The certificate, dated December 17, 1968, shows the county, highway and distance at which the apparatus was set up, as well as its height and distance from the pavement. On that part of the certificate, under the heading "Certification of Radar Accuracy Test by Calibrated Speedometer", it shows that [\*\*\*3] the radar was tested on six occasions between 7:40 P.M. and 9:45 P.M. It further shows the reading taken by Officer Byram on the radar meter situated on the ground reflected speeds of 75, 65 and 55 miles per hour [\*511] when Officer Mayhew was in his car driving past the meter at speeds of 75, 65 and 55 miles per hour as reflected by the car's speedometer.

The certificate then contains the following certification by Troopers Larry R. Mayhew and R. C. Byram:

"We, the undersigned, certify that we conducted the accuracy test by calibrated speedometer of the radio microwave (radar) device shown above and the information herein is a complete and accurate record of the results of said test."

On April 16, 1969 Trooper Mayhew attested before a notary public "that the above is an accurate record of the tests conducted".

The narrow question for our decision is whether or not this certificate meets the requirements of Code § 46.1-198(a1) and was therefore admissible as "evidence of the facts therein stated and the results of such testing".

We have previously reviewed convictions for speeding based upon radar checks. See *Biesser v. Town of Holland*, 208 Va. 167, 156 [\*\*\*4] S.E.2d 792 (1967); *Thomas v. City of Norfolk*, 207 Va. 12, 147 S.E.2d 727 (1966); *Farmer v. Commonwealth*, 205 Va. 609, 139 S.E.2d 40 (1964); *Crosby v. Commonwealth*, 204 Va. 266, 130 S.E.2d 467 (1963); *Royals v. Commonwealth*, 198 Va. 883, 96 S.E.2d 816 (1957); and *Royals v. Commonwealth*, 198 Va. 876, 96 S.E.2d 812 (1957).

[HN1] Code § 46.1-198 reads, in part, as follows:

"Checking on speed with electrical devices; certificate as to accuracy of device; arrest without warrant. -- (a) The speed of any [\*670] motor vehicle may be checked by the use of radio microwaves or other electrical device. The results of such checks shall be accepted as prima facie evidence of the speed of such motor vehicle in any court or legal proceedings where the speed of the motor vehicle is at issue.

"(a1) In any court or legal proceedings in which any question arises as to the calibration or accuracy of any such radio microwave or other electrical device, a certificate, executed and signed by the officers calibrating or testing such device as to its accuracy as well as to the accuracy of the speedometer of any motor vehicle used in such test, and

stating the [\*\*\*5] time of such test, type of test and results of testing, shall be admissible when attested by one such officer who executed and signed it as evidence of the facts therein stated and the results of such testing."

In the instant case. Trooper Byram did not estimate the speed of defendant's automobile and the only evidence as to its speed when it passed through the radar zone or beam was that shown by the radar device. The narrative statement of the evidence reflects that: "On cross examination Trooper Byram testified that he made no test of the accuracy of the speedometer used to test the radar speedometer and had no personal knowledge of the speedometer. . . ."

The conviction of Sweeny therefore rests entirely upon the accuracy of the radar. It depends upon the certificate of radar accuracy tests and in particular upon the admissibility of the certificate of the officers as to the accuracy of both the radar apparatus and the accuracy of the speedometer of the trooper's car by which the radar device was tested.

Manifestly Code § 46.1-198 was amended in 1968, following the decision of this court in *Biesser v. Town of Holland, supra*, to obviate the necessity of having [\*\*\*6] two troopers testify in every contested speeding case which involves the use of radar. It was the intention of the General Assembly to provide, in cases where any question arises as to the calibration or accuracy of any radio microwave or any other electrical device, that such accuracy could be shown by a certificate of the officers who conducted the tests of the device, and who had knowledge of its accuracy.

[\*\*512] The statute contemplates that the speed of motor vehicles may be checked by radar; that the results of such checks be accepted as prima facie evidence where speed is an issue; and that persons may be convicted on the certificates filed in accordance with the statute. [\*671] However, [HN2] the statute must be strictly construed and there should be a full compliance therewith if a certificate is to be used as evidence. In prosecutions for speeding arising through the use of radar, the accuracy of the radio microwave, or other electrical device which measures the speed of a vehicle, is critical, for it is the reading reflected by this device which brings about the arrest and the conviction of a defendant.

Therefore the General Assembly provided that [HN3] the certificate [\*\*\*7] of the officers testing the radar device must reflect not only its accuracy *but also the accuracy of the speedometer of any motor vehicle used in such tests.*

In the case under consideration the accuracy of the radar apparatus was tested by, and depended on, the accuracy of the speedometer of the automobile of Trooper Mayhew which was driven through the radar beam on six separate occasions. True, the certificate filed shows that the speeds reflected on the radar meter were identical with those reflected on the vehicle driven by Trooper Mayhew. This would indicate that the radar meter was reflecting the correct speed *provided* the reading of the automobile speedometer was accurate. If the speedometer were defective or inaccurate to the same degree as the radar meter then both would be reflecting an improper speed. While this is unlikely and remote, it demonstrates the necessity that the speedometer of the motor vehicle used to test the radar meter be accurate.

The certificate in the instant case certifies that Byram and Mayhew conducted the accuracy test by "calibrated speedometer of the radio microwave (radar) device". Among the definitions of the word "calibrate" found [\*\*\*8] in Webster's Third New International Dictionary, page 316, is "to standardize (as a measuring instrument) by determining the deviation from standard esp. so as to ascertain the proper correction factors". "Calibrator" is defined as "an instrument for measuring the calibre of any passage". Therefore to say that a speedometer has been "calibrated" is to say that a speedometer has been tested for accuracy. This does not necessarily mean that it was found accurate.

It is not enough that the certificate should say that the speedometer has been calibrated. The certificate should conform to the statute, and such is possible only if it reflects the accuracy of the radio microwave or other electrical device when tested by officers who used an accurate speedometer to make the test.

The certificate which was admitted in evidence in the instant case [\*672] fails to meet this test and is therefore not in conformity with the statute. There is no other evidence in the record which shows the accuracy of the speedometer that was used.

211 Va. 668, \*672; 179 S.E.2d 509, \*\*512;  
1971 Va. LEXIS 239, \*\*\*8; 47 A.L.R.3d 817

Accordingly, the judgment of lower court is reversed and the warrant is dismissed.

**JOHN H. THOMAS v. CITY OF NORFOLK****Record No. 6162****Supreme Court of Virginia***207 Va. 12; 147 S.E.2d 727; 1966 Va. LEXIS 180***April 25, 1966****PRIOR HISTORY:** [\*\*\*1]

Error to a judgment of the Corporation Court of the city of Norfolk. Hon. H. Lawrence Bullock, judge presiding.

**DISPOSITION:**

*Affirmed.*

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** The Corporation Court for the City of Norfolk (Virginia), sitting without a jury, convicted defendant of driving an automobile in excess of the speed limit, in violation of an ordinance of the City of Norfolk. The evidence was undisputed and came from witnesses for the city. Defendant did not testify nor did he offer any evidence in his behalf. Defendant appealed.

**OVERVIEW:** The police testified that they were operating a mobile radar unit in an unmarked police car and that defendant drove his car past the radar causing the instrument to register his speed at 46 miles per hour, which was in excess of the posted speed limit of 30 miles per hour. The court on appeal held that evidence of a test of radar equipment by tuning forks was admissible as tending to prove the accuracy of the equipment. In the absence of evidence to the contrary, the trial court properly accepted the evidence of the testings as adequate proof of the accuracy of the radar set. Having accepted the proof of the accuracy of the radar set, the trial court declined to allow defendant to question its accuracy as a reliable method of determining the speed of his car. That ruling, which recognized the reliability of the radar set, was in accord with the terms of Va. Code Ann. § 46.1-198(a) (1958). Proof that the instrument had been checked and found to be operating accurately at 2:30 p.m. and later at 9:30 p.m. warranted the inference that it was operating accurately during the interim, or at 4:00 p.m., the time of defendant's apprehension.

**OUTCOME:** The court affirmed the judgment.

**CORE TERMS:** radar, accuracy, speed, tested, mile, testing, apprehension, site, motor vehicle, reliability, speeding,

[HN2] See Va. Code Ann. § 46.1-198(a) (1958).

### **HEADNOTES:**

- (1) Speeding -- Accuracy of Radar -- Testing Held Sufficient.
- (2) Speeding -- Reliability of Radar Evidence -- Not Open to Question Where Accuracy of Set Proved.
- (3) Speeding -- Accuracy of Radar -- Need Not be Tested at Site of Operation of Set.

1. After trial at which he presented no evidence Thomas was convicted of speeding on the testimony of the arresting officers that the mobile radar set operated by them had indicated his speed to be 46 miles per hour in a 30 mile zone. On appeal Thomas challenged the sufficiency of the prosecution's evidence, alleging that it failed to show that the radar was properly checked. This contention was not accepted, however, in light of the officers' testimony that they had tested the set before and after use against a calibrated speedometer and by use of factory pre-tested tuning forks. These testings the trial court correctly accepted, in the absence of contrary evidence, as adequate proof of the accuracy of the set.

2. The accuracy of the set having been established, the court properly refused [\*\*\*2] to allow defendant to question its reliability as a method of determining his speed. Code 46.1-198(a) provides that the results of radar checks shall be accepted as prima facie evidence of speed.

3. There was no merit to defendant's argument that his conviction was improper because the set was not tested for accuracy at the site at which it was operating when his speed was checked. The set's accuracy at that time could be inferred from the tests made prior to and after that time; nor did defendant introduce any evidence at variance with such inference or tending to show that relocation of the set affected its accuracy.

*Gordon B. Tayloe, Jr., Assistant City Attorney (Leonard H. Davis, City Attorney, on brief), for the defendant in error.*

**JUDGES:**

Present, All the Justices.

**OPINION BY:**

EGGLESTON

**OPINION:**

[\*13] [\*\*728] EGGLESTON, C.J., delivered the opinion of the court.

[1] John H. Thomas has appealed from a judgment of the lower court, sitting by consent without a jury, finding him guilty of driving an automobile in excess of the speed limit, in violation of an ordinance of the City [\*\*\*3] of Norfolk. The substance of his assignments of error is that the judgment is without valid evidence to support it.

The evidence is undisputed and comes from witnesses for the city. The defendant did not testify nor did he offer any evidence in his behalf. Officers E. A. Bennett and E. L. Jackson of the Norfolk police division testified that on September 14, 1964, at approximately 4:00 P.M., they were operating a mobile radar unit in an unmarked police car located in the 3500 block of Chesapeake boulevard in the city of Norfolk; that the defendant drove his car past the radar causing the latter instrument to register his speed at 46 miles per hour, and that this was in excess of the posted speed limit there of 30 miles per hour.

The officers testified that the radar set had been tested by them at another location when they came on duty at 2:30 P.M. the same day, and that they had again tested it at the same location at 9:30 P.M. on the same day when they went off duty. In each instance a police car driven by Officer Jackson passed through the radar beam at speeds of 30, 40 and 50 miles per hour, as indicated on the speedometer of his car and noted by Jackson, and these speeds [\*\*\*4] accorded with those which were indicated on the radar set and noted by Officer Bennett.

Both officers testified that the speedometer on the test car had been calibrated three or four days before the date of the defendant's apprehension and that the records of such calibration were kept at the city garage. Although these officers testified that they took no part in the calibration test, it does not appear from the defendant's brief that he questions the adequacy of the proof of such calibration.

In any event, the officers further testified that the accuracy of the speedometer test in each instance was corroborated by tests which they made at these times with factory pretested tuning forks. One of these forks, when struck and held in front of the radar set, indicated or registered on the latter instrument a speed of 35 miles per hour. In a similar manner, the other tuning fork when struck indicated [\*14] or registered on the radar set a speed of 50 miles per hour. Officer Bennett testified that the tuning-fork tests showed that the radar set accurately recorded these respective speeds.

While the matter has not heretofore been presented to us it is well recognized in [\*\*\*5] other jurisdictions that [HN1] evidence of a test of radar equipment by tuning forks in this manner is admissible as tending to prove the accuracy of the equipment. *State v. Lenzen*, 24 Conn. Supp. 208, 1 Conn. Cir. Ct. 499, 189 A.2d 405; *State v. Graham* (Mo. App.), 322 S.W.2d 188; *People v. Johnson*, 23 Misc. 2d 11, 196 N.Y.S.2d 227; *Cromer v. State* (Tex. Crim.), 374 S.W.2d 884.

In the absence of evidence to the contrary in the present case, the trial court accepted, as it had the right to do, the evidence of these testings as adequate proof of the accuracy of the radar set.

207 Va. 12, \*14; 147 S.E.2d 727, \*\*728;  
1966 Va. LEXIS 180, \*\*\*5

[2] In his brief the defendant argues that the trial court erred in accepting "the evidence of the accuracy tests as valid and that they created a conclusive presumption that the radar set was accurate at the time of the alleged offense." We do not so interpret the court's ruling. Having accepted the proof of the accuracy of the radar set, as testified to by the officers, the trial court declined to allow the defendant to question its accuracy as a reliable [\*\*729] method of determining the speed of his car. Such ruling was in accord with its prior ruling on the defendant's [\*\*\*6] motion for a bill of particulars, in which it said:

"It having been indicated by the defendant in argument that \* \* \* he intends to introduce at the trial of this case the testimony of said expert witness to contest the basic reliability of the radar set in question as opposed to the proper testing thereof, the court doth rule at this time that *no such expert testimony will be admitted into evidence upon trial of this case to contest the reliability of said radar set*, but nothing contained herein shall limit defendant's right to elicit or present testimony as to the proper or improper testing of said radar set." (Emphasis added.)

This ruling, recognizing the reliability of the radar set, was in accord with the terms of the statute, Code, § 46.1-198(a) (Repl. Vol. 1958), [HN2] which provides: "The speed of any motor vehicle may be checked by the use of radio microwaves or other electrical device. *The results of such checks shall be accepted as prima facie evidence of the speed of such motor vehicle* in any court or legal proceedings where the speed of the motor vehicle is at issue." (Emphasis added.) See *Dooley v. Commonwealth*, 198 Va. 32, 35, 92 S.E.2d 348, 350.

[3] [\*\*\*7] The defendant's principal contention is that the judgment of conviction must fall because there is no evidence that the radar set [\*15] had been tested for accuracy at the site at which it was operating at the time of his apprehension. He argues that proof that the radar set was shown to be accurate by testings at 2:30 P.M. and 9:30 P.M., respectively, at another site is no proof that it was operating accurately at the site of his apprehension at 4:00 P.M.

It is true that the officers testified that prior to and after the defendant's apprehension a number of automobiles had passed through the radar beam and each driver thereof had been apprehended. In each instance, after the violator had passed the radar beam the machine was cut off and the violator chased and apprehended in the radar vehicle, after which the latter was returned to the check point, parked, and set for the next violator. The defendant argues that this change of location of the radar set, from time to time, necessarily interfered with its accuracy. We do not agree with this contention.

In the first place, proof that the instrument was checked and found to be operating accurately at 2:30 P.M. and later [\*\*\*8] at 9:30 P.M., in the absence of evidence to the contrary, warranted the inference that it was operating accurately during the interim, or at 4:00 P.M., the time of the defendant's apprehension.

In the next place, there is no evidence that it was necessary that the radar set be tested for accuracy at the identical site at which it was located at the time of the defendant's apprehension. Nor is there any evidence that the use of the radar car in apprehending other violators interfered with the accuracy of the radar set installed in that car.

We do not agree with the defendant's contention that in *Royals v. Commonwealth*, 198 Va. 876, 96 S.E.2d 812, we held that in order to insure the accuracy of the recording of a radar set it must be tested at the exact location at which it was being used at the time of the recording in question. In that case we quoted from an article by Dr. John M. Kopper, appearing in 33 *N.C.L.Rev.* 343, 353, in which he "*recommends* certain operational procedures as far as the speedometer and its use are concerned. Such procedures include the checking of the speedometer before and after use in each location, the keeping of records, and other details." [\*\*\*9] (Emphasis added.) 198 Va. at 881, 96 S.E.2d at 815. The opinion does not hold, as the defendant contends, that these *recommendations* of that author must be followed in order to insure the accuracy of a radar set in determining the speed of a motor vehicle.

[\*\*730] The judgment of conviction in that case was reversed because, as the opinion points out, "the Commonwealth failed to introduce any [\*16] legal evidence tending to show that the radar machine used to measure the speed of defendant motorist had been properly set up and recently tested for accuracy." 198 Va. at 882, 96 S.E.2d at

207 Va. 12, \*16; 147 S.E.2d 727, \*\*730;  
1966 Va. LEXIS 180, \*\*\*9

816. In the present case, the un rebutted evidence on behalf of the city was sufficient to warrant the finding that the radar had been properly set up and recently tested for accuracy.

On the whole we find that the evidence fully supports the judgment of conviction and accordingly it is affirmed.

### **HEADNOTES:**

- (1) Speeding -- Accuracy of Radar -- Testing Held Sufficient.
- (2) Speeding -- Reliability of Radar Evidence -- Not Open to Question Where Accuracy of Set Proved.
- (3) Speeding -- Accuracy of Radar -- Need Not be Tested at Site of Operation of Set.

1. After trial at which he presented no evidence Thomas was convicted of speeding on the testimony of the arresting officers that the mobile radar set operated by them had indicated his speed to be 46 miles per hour in a 30 mile zone. On appeal Thomas challenged the sufficiency of the prosecution's evidence, alleging that it failed to show that the radar was properly checked. This contention was not accepted, however, in light of the officers' testimony that they had tested the set before and after use against a calibrated speedometer and by use of factory pre-tested tuning forks. These testings the trial court correctly accepted, in the absence of contrary evidence, as adequate proof of the accuracy of the set.

2. The accuracy of the set having been established, the court properly refused [\*\*\*2] to allow defendant to question its reliability as a method of determining his speed. Code 46.1-198(a) provides that the results of radar checks shall be accepted as prima facie evidence of speed.

3. There was no merit to defendant's argument that his conviction was improper because the set was not tested for accuracy at the site at which it was operating when his speed was checked. The set's accuracy at that time could be inferred from the tests made prior to and after that time; nor did defendant introduce any evidence at variance with such inference or tending to show that relocation of the set affected its accuracy.

**OPINION BY:**

EGGLESTON

**OPINION:**

[\*13] [\*\*728] EGGLESTON, C.J., delivered the opinion of the court.

[1] John H. Thomas has appealed from a judgment of the lower court, sitting by consent without a jury, finding him guilty of driving an automobile in excess of the speed limit, in violation of an ordinance of the City [\*\*\*3] of Norfolk. The substance of his assignments of error is that the judgment is without valid evidence to support it.

The evidence is undisputed and comes from witnesses for the city. The defendant did not testify nor did he offer any evidence in his behalf. Officers E. A. Bennett and E. L. Jackson of the Norfolk police division testified that on September 14, 1964, at approximately 4:00 P.M., they were operating a mobile radar unit in an unmarked police car located in the 3500 block of Chesapeake boulevard in the city of Norfolk; that the defendant drove his car past the radar causing the latter instrument to register his speed at 46 miles per hour, and that this was in excess of the posted speed limit there of 30 miles per hour.

The officers testified that the radar set had been tested by them at another location when they came on duty at 2:30 P.M. the same day, and that they had again tested it at the same location at 9:30 P.M. on the same day when they went off duty. In each instance a police car driven by Officer Jackson passed through the radar beam at speeds of 30, 40 and 50 miles per hour, as indicated on the speedometer of his car and noted by Jackson, and these speeds [\*\*\*4] accorded with those which were indicated on the radar set and noted by Officer Bennett.

Both officers testified that the speedometer on the test car had been calibrated three or four days before the date of the defendant's apprehension and that the records of such calibration were kept at the city garage. Although these officers testified that they took no part in the calibration test, it does not appear from the defendant's brief that he questions the adequacy of the proof of such calibration.

In any event, the officers further testified that the accuracy of the speedometer test in each instance was corroborated by tests which they made at these times with factory pretested tuning forks. One of these forks, when struck and held in front of the radar set, indicated or registered on the latter instrument a speed of 35 miles per hour. In a similar manner, the other tuning fork when struck indicated [\*14] or registered on the radar set a speed of 50 miles per hour. Officer Bennett testified that the tuning-fork tests showed that the radar set accurately recorded these respective speeds.

While the matter has not heretofore been presented to us it is well recognized in [\*\*\*5] other jurisdictions that [HN1] evidence of a test of radar equipment by tuning forks in this manner is admissible as tending to prove the accuracy of the equipment. *State v. Lenzen*, 24 Conn. Supp. 208, 1 Conn. Cir. Ct. 499, 189 A.2d 405; *State v. Graham* (Mo. App.), 322 S.W.2d 188; *People v. Johnson*, 23 Misc. 2d 11, 196 N.Y.S.2d 227; *Cromer v. State* (Tex. Crim.), 374 S.W.2d 884.

In the absence of evidence to the contrary in the present case, the trial court accepted, as it had the right to do, the evidence of these testings as adequate proof of the accuracy of the radar set.

207 Va. 12, \*14; 147 S.E.2d 727, \*\*728;  
1966 Va. LEXIS 180, \*\*\*5

[2] In his brief the defendant argues that the trial court erred in accepting "the evidence of the accuracy tests as valid and that they created a conclusive presumption that the radar set was accurate at the time of the alleged offense." We do not so interpret the court's ruling. Having accepted the proof of the accuracy of the radar set, as testified to by the officers, the trial court declined to allow the defendant to question its accuracy as a reliable [\*\*729] method of determining the speed of his car. Such ruling was in accord with its prior ruling on the defendant's [\*\*\*6] motion for a bill of particulars, in which it said:

"It having been indicated by the defendant in argument that \* \* \* he intends to introduce at the trial of this case the testimony of said expert witness to contest the basic reliability of the radar set in question as opposed to the proper testing thereof, the court doth rule at this time that *no such expert testimony will be admitted into evidence upon trial of this case to contest the reliability of said radar set*, but nothing contained herein shall limit defendant's right to elicit or present testimony as to the proper or improper testing of said radar set." (Emphasis added.)

This ruling, recognizing the reliability of the radar set, was in accord with the terms of the statute, Code, § 46.1-198(a) (Repl. Vol. 1958), [HN2] which provides: "The speed of any motor vehicle may be checked by the use of radio microwaves or other electrical device. *The results of such checks shall be accepted as prima facie evidence of the speed of such motor vehicle* in any court or legal proceedings where the speed of the motor vehicle is at issue." (Emphasis added.) See *Dooley v. Commonwealth*, 198 Va. 32, 35, 92 S.E.2d 348, 350.

[3] [\*\*\*7] The defendant's principal contention is that the judgment of conviction must fall because there is no evidence that the radar set [\*15] had been tested for accuracy at the site at which it was operating at the time of his apprehension. He argues that proof that the radar set was shown to be accurate by testings at 2:30 P.M. and 9:30 P.M., respectively, at another site is no proof that it was operating accurately at the site of his apprehension at 4:00 P.M.

It is true that the officers testified that prior to and after the defendant's apprehension a number of automobiles had passed through the radar beam and each driver thereof had been apprehended. In each instance, after the violator had passed the radar beam the machine was cut off and the violator chased and apprehended in the radar vehicle, after which the latter was returned to the check point, parked, and set for the next violator. The defendant argues that this change of location of the radar set, from time to time, necessarily interfered with its accuracy. We do not agree with this contention.

In the first place, proof that the instrument was checked and found to be operating accurately at 2:30 P.M. and later [\*\*\*8] at 9:30 P.M., in the absence of evidence to the contrary, warranted the inference that it was operating accurately during the interim, or at 4:00 P.M., the time of the defendant's apprehension.

In the next place, there is no evidence that it was necessary that the radar set be tested for accuracy at the identical site at which it was located at the time of the defendant's apprehension. Nor is there any evidence that the use of the radar car in apprehending other violators interfered with the accuracy of the radar set installed in that car.

We do not agree with the defendant's contention that in *Royals v. Commonwealth*, 198 Va. 876, 96 S.E.2d 812, we held that in order to insure the accuracy of the recording of a radar set it must be tested at the exact location at which it was being used at the time of the recording in question. In that case we quoted from an article by Dr. John M. Kopper, appearing in 33 *N.C.L.Rev.* 343, 353, in which he "*recommends* certain operational procedures as far as the speedometer and its use are concerned. Such procedures include the checking of the speedometer before and after use in each location, the keeping of records, and other details." [\*\*\*9] (Emphasis added.) 198 Va. at 881, 96 S.E.2d at 815. The opinion does not hold, as the defendant contends, that these *recommendations* of that author must be followed in order to insure the accuracy of a radar set in determining the speed of a motor vehicle.

[\*\*730] The judgment of conviction in that case was reversed because, as the opinion points out, "the Commonwealth failed to introduce any [\*16] legal evidence tending to show that the radar machine used to measure the speed of defendant motorist had been properly set up and recently tested for accuracy." 198 Va. at 882, 96 S.E.2d at

207 Va. 12, \*16; 147 S.E.2d 727, \*\*730;  
1966 Va. LEXIS 180, \*\*\*9

816. In the present case, the un rebutted evidence on behalf of the city was sufficient to warrant the finding that the radar had been properly set up and recently tested for accuracy.

On the whole we find that the evidence fully supports the judgment of conviction and accordingly it is affirmed.

**BILLY DEAN WILLIAMS v. COMMONWEALTH OF VIRGINIA****No. 0974-86****Court of Appeals of Virginia***5 Va. App. 514; 365 S.E.2d 340; 1988 Va. App. LEXIS 36; 4 Va. Law Rep. 1872***February 16, 1988, Decided****PRIOR HISTORY:** [\*\*\*1]

Circuit Court of Botetourt County, Duncan M. Byrd, Jr., Judge.

**DISPOSITION:***Affirmed.***CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant appealed a judgment of the Circuit Court of Botetourt County (Virginia), which convicted him of speeding in violation of Va. Code Ann. § 46.1-193.**OVERVIEW:** Defendant was convicted of speeding, despite evidence that his speedometer was incorrectly calibrated. On appeal, the court affirmed. The court held that although the summons incorrectly identified the subsection of the statute under which defendant was charged, defendant was not prejudiced because the summons gave him notice of the speeding offense. The court further held that Va. Code Ann. § 46.1-193.1 did not require the trial court to instruct the jury that if defendant's speedometer was improperly calibrated, then the jury must find defendant not guilty, nor did it make knowledge or intent an element of the speeding charge. The trial court correctly instructed the jury that a police officer's radar check established a prima facie case of speeding, and that the jury should consider whether defendant's calibration evidence established his innocence. Finally, the court held that the trial court correctly advised the jury to disregard defendant's reference to court costs in its closing arguments, because court costs were irrelevant to the offense.**OUTCOME:** The court affirmed the trial court's conviction of defendant for speeding.**CORE TERMS:** speeding, speedometer, speed, calibration, guilt, fact finder, radar, innocence, mile, incorrect, summons, final argument, maximum speed, notice, traveling, truck, motor vehicle, speed limit, forty-five, exceeding, instruct, lawful, fixing, offense charged, nonexistent, inaccurate, accuracy, tendered, drivers, breath test**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Implied Consent > Warning Requirements***

***Criminal Law & Procedure > Accusatory Instruments > Indictments***

[HN1] A summons must describe the offense charged. Va. Sup. Ct. R. 3A:4(b). This description must comply with Va. Sup. Ct. R. 3A:6(a), which provides that an indictment must give an accused notice of the nature and character of the offense charged against him.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN2] Va. Code Ann. § 46.1-193.1 provides that in the trial of any person charged with exceeding any maximum speed limit in Virginia, the court shall receive as evidence a sworn report of the results of a calibration test of the accuracy of the speedometer in the motor vehicle operated by the defendant or the arresting officer at the time of the alleged offense. Such report shall be considered by the court or jury in both determining guilt or innocence and in fixing punishment.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview Governments > Legislation > Interpretation***

[HN3] In enacting Va. Code Ann. § 46.1-193, the legislature did not intend to bar a conviction for speeding for persons with inaccurate speedometers.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Traffic Regulation Violations > Elements***

[HN4] Va. Code Ann. § 46.1-308(ii) makes it illegal to operate a motor vehicle with a defective speedometer.

***Criminal Law & Procedure > Trials > Closing Arguments > General Overview***

[HN5] A defendant's liability for court costs is irrelevant in the jury's determination of the defendant's guilt and punishment, and, therefore, should not be addressed or alluded to in the final argument. Payment of costs is no part of the sentence of the court, and constitutes no part of the penalty or punishment prescribed for the offense.

**HEADNOTES: (1) Criminal Procedure -- Notice of the Offense -- Standard.** --A summons must describe the offense charged and must give the accused notice of the nature and character of the offense.

**(2) Motor Vehicles -- Speeding -- Calibration Evidence.** --Code § 46.1-193 was not intended to bar a conviction for speeding for persons with inaccurate speedometers.

**(3) Motor Vehicles -- Speeding -- Calibration Evidence.** --Calibration report evidence is admissible and the fact finder may give it such weight as it deems proper.

**(4) Motor Vehicles -- Speeding -- Calibration Evidence.** --The weight attached to calibration report evidence is solely for the determination of the fact finder.

**(5) Motor Vehicles -- Speeding -- Elements.** --Nothing in the Code suggests that the legislature intended knowledge or intent as an element of the offense of speeding.

**(6) Courts -- Final Argument -- Standard.** --The defendant's liability for court costs is irrelevant in the jury's determination of guilt and punishment and therefore, may not be addressed or alluded to in final argument.

**SYLLABUS:**

Defendant was convicted [\*\*\*2] of speeding. He argued that he was tried under an nonexistent code section, that the jury was improperly instructed upon the effect of calibration evidence, and that the court erred in not allowing

defense counsel to discuss defendant's potential liability for court costs.

The Court of Appeals affirmed, holding that despite the misrecital of the applicable Code section, the description of the offense in the summons gave the defendant notice of the offense of which he was charged. The Court also held that a malfunctioning speedometer does not provide an absolute defense, and that the jury was properly instructed. Finally, the Court held that the trial court properly refused to allow defense counsel to argue the defendant's potential liability for court costs.

#### **COUNSEL:**

Martin F. Clark, Jr. (Clark & Clark, P.C., on brief), for appellant.

Leah A. Darron, Assistant Attorney General (Mary Sue Terry, Attorney General, on brief), for appellee.

#### **JUDGES:**

Cole, J. Koontz, C.J., and Barrow, J., concurred.

#### **OPINION BY:**

COLE

#### **OPINION:**

[\*515] [\*\*\*340] Appellant, Billy Dean Williams, was convicted in a jury trial of speeding in violation of Code § 46.1-193 and fined twenty-five [\*\*341] dollars. He raises three issues on appeal: (1) whether his [\*\*\*3] conviction was invalid because he was tried under a nonexistent code subsection; (2) whether the jury was improperly instructed upon the effect of calibration evidence in determining guilt or innocence and punishment for speeding in accordance with Code § 46.1-193.1; and (3) whether the trial court erred in not allowing defense counsel, during final argument, to discuss Williams' potential liability for court costs. We answer each of these inquiries in the negative, and accordingly, we affirm.

##### *I. FACTS*

On March 27, 1986, Trooper G. E. Miller, Jr. clocked a 1985 Peterbuilt tractor trailer truck being operated by appellant, Billy Dean Williams, at a speed of fifty-nine miles per hour in a forty-five [\*516] mile per hour zone. The trooper was using a moving radar system. He issued Williams a traffic summons charging him with a violation of Code § "46.1-193" which sets the minimum/maximum speed limits. The summons described the charge as "speed 59/45."

At trial, the Commonwealth's evidence consisted of Trooper Miller's testimony and the result of the radar check. In his case-in-chief, Williams testified that he was aware of the forty-five mile per hour speed limit and [\*\*\*4] that, according to his speedometer, he was traveling within that speed limit. He then introduced a calibration certificate showing the result of a test conducted about five weeks after the offense. The test disclosed that a speedometer reading of forty-five miles per hour on his truck was obtained when the truck actually was going fifty-eight miles per hour.

The jury returned a verdict finding Williams guilty of speeding "58 miles per hour in a 45 miles per hour zone," and fined him twenty-five dollars. This appeal followed.

##### *II. CONVICTION UPON NONEXISTENT CODE SUBSECTION*

Williams first maintains that he was convicted of violating a nonexistent code subsection, and that therefore, his conviction must be reversed. At the close of the Commonwealth's evidence, Williams moved to strike the evidence,

5 Va. App. 514, \*516; 365 S.E.2d 340, \*\*341;  
1988 Va. App. LEXIS 36, \*\*\*4; 4 Va. Law Rep. 1872

contending that he was charged under the incorrect statute. The court overruled the motion, finding that Williams was charged under the appropriate section, Code § 46.1-193, but erroneously amended the warrant to show the subsection as "46.1-193h(3)," a nonexistent subsection. We hold that the error is not fatal to the conviction.

(1) [HN1] A summons must describe the offense charged. [\*\*\*5] Rule 3A:4(b). This description must comply with Rule 3A:6(a), which provides that an indictment must give an accused notice of the nature and character of the offense charged against him. *Greenwalt v. Commonwealth*, 224 Va. 498, 501, 297 S.E.2d 709, 710-11 (1982). In *Williams v. Petersburg*, 216 Va. 297, 301-02, 217 S.E.2d 893, 897 (1975), the defendant argued that his conviction for refusing to take a breath test was invalid because the warrant inaccurately recited the applicable code section. In that case, instead of referring to Code § 18.1-55.1, which required that the [\*517] breath sample be given, the warrant referred to Code § 18.1-54.1 which addressed preliminary field sobriety tests. The court found it sufficient that the warrant specifically charged the defendant with refusing to take a breath test, and held that the "misrecital [did] not invalidate the conviction." *Id.* at 302, 217 S.E.2d at 897.

In this case the traffic summons stated that Williams was charged with "speed 59/45." This description was sufficient to give him notice of the nature and character of the offense [\*\*\*6] for which he was charged. Williams does not contend that he did not know the nature of the charge against him or that he did not have an opportunity to defend against that charge. Accordingly, despite the misrecital of the applicable subsection of the statute, the description of the offense set out in the summons gave the defendant notice of the offense of which he was charged.

[\*\*342] III. INSTRUCTIONS ON CALIBRATION TEST

Next, Williams claims that the jury was incorrectly instructed upon [HN2] Code § 46.1-193.1, which provides:

In the trial of any person charged with exceeding any maximum speed limit in this Commonwealth, the court shall receive as evidence a sworn report of the results of a calibration test of the accuracy of the speedometer in the motor vehicle operated by the defendant or the arresting officer at the time of the alleged offense. Such report shall be considered by the court or jury in both determining guilt or innocence and in fixing punishment.

He argues that the court erred in refusing to give three instructions he tendered because: (1) Code § 46.1-193.1 creates an absolute defense to a speeding charge where the speedometer reading on a motor vehicle [\*\*\*7] is incorrect and is relied upon by the operator to determine his speed; (2) if the statute is not an absolute bar, it fashions a narrow and specific exemption to the *malum prohibitum* statute designed to protect those drivers who, without knowledge or intent, violate the maximum speed limit and in good faith rely upon the accuracy of their speedometers and find them incorrect; and (3) Code §§ 46.1-193.1 and 46.1-193 are conflicting and, therefore, the court gave inconsistent instructions to the jury.

[\*518] A.

The trial court refused to give the following instructions requested by the defendant:

Instruction 1:

The Court instructs the Jury that the defendant, Mr. Williams, is entitled to rely on the speed shown on his truck's speedometer. If you believe that Mr. Williams' speedometer showed him traveling at a lawful speed at the time he was stopped, and that because his speedometer was incorrect, Mr. Williams exceeded the speed limit, then you shall find the defendant, Mr. Williams, not guilty.

Instruction 2:

5 Va. App. 514, \*518; 365 S.E.2d 340, \*\*342;  
1988 Va. App. LEXIS 36, \*\*\*7; 4 Va. Law Rep. 1872

The Court instructs the Jury that if you believe from the evidence that the defendant, Mr. Williams' speedometer showed Mr. Williams to be driving at a lawful [\*\*\*8] speed at the time he was stopped by the State Trooper, then regardless of Mr. Williams' actual speed as determined by radar, the defendant, Mr. Williams, shall be found not guilty.

Instruction 3:

The Court instructs the Jury that if you believe the evidence of the mechanic who performed the calibration on Mr. Williams' truck that Mr. Williams' speedometer was incorrect, and that it showed Mr. Williams to be traveling at a lawful speed when he actually was traveling at a speed greater than the posted speed, you shall find the defendant, Mr. Williams, not guilty.

(2) We find that the legislature, [HN3] in enacting Code § 46.1-193, did not intend to bar a conviction for speeding for persons with inaccurate speedometers. Such an interpretation would discourage motorists from repairing defective speedometers and encourage tampering with them so as to prevent a conviction for speeding. We do not think the legislature intended to encourage a result [\*519] that would foster unlawful activity. *See* [HN4] Code § 46.1-308(ii). (illegal to operate motor vehicle with defective speedometer).

(3) We find no language in the statute supporting the argument that the legislature intended an [\*\*\*9] incorrect speedometer reading to constitute an absolute bar to a conviction for speeding. In a speeding case the only issue is whether the defendant's vehicle was in fact exceeding the lawful maximum speed. If so, he is guilty; if not, he is innocent. The calibration report is admissible in evidence and the fact finder under the statute may give it such weight as it deems proper under the facts and circumstances of the particular case.

(4) The gravamen of the three instructions tendered by the defendant is that they removed from the fact finder the element of discretion which the statute imposes upon it. The instructions told the fact finder [\*\*343] that if the speedometer showed Williams was traveling at a lawful rate of speed in accordance with the speedometer reading, although he was in fact exceeding the maximum speed limit permitted by law, then it must find him not guilty. The weight attached to the calibration test evidence under the terms of the statute is solely for the determination of the fact finder in arriving at its conclusion as to whether there is reasonable doubt of the guilt of the accused in view of all the proven facts and circumstances. For this reason, we conclude [\*\*\*10] that the trial court was correct in refusing the tendered instructions.

B.

Williams argues that if Code § 46.1-193.1 does not provide an absolute defense when the speedometer reading is inaccurate, it creates knowledge or intent as an element for a speeding charge, and the jury should have been so instructed.

(5) The legislature may require knowledge or intent as an element of an offense, but we hold that neither Code § 46.1-193.1, nor language contained elsewhere in the Motor Vehicle Code, so provides. If the legislature intended to make knowledge or intent an element of the offense of speeding, it would have done so as it has with other offenses in the Motor Vehicle Code. *See, e.g.*, Code § 46.1-15.1 (unlawful for one to sell car if he "knows or should reasonably know" that the odometer has been changed); Code § 46.1-363 (unlawful for one to make a "willful," material false [\*520] statement on any application for a driver's license); Code § 46.1-384(b) (unlawful to "knowingly" permit another to use one's driver's license). We, therefore, find that statutory language requiring a fact finder to "consider" calibration evidence in determining guilt or innocence of speeding [\*\*\*11] was not meant to require proof of intent or knowledge as an element of a speeding conviction. Having concluded that Code § 46.1-193.1 was not intended to make knowledge or intent an element in a speeding charge when calibration evidence is introduced, we find that the trial court did not err in refusing to so instruct the jury.

C.

Williams contends that even if Code § 46.1-193.1 does not provide a defense to a speeding charge or make knowledge or intent an element of the offense, the jury was inadequately instructed because instructions D and F were incompatible and inconsistent with each other. We disagree. The instructions given were as follows:

Instruction D:

The result of the check of the speed of the defendant's automobile by radar device is sufficient to prove his guilt unless other evidence raises a reasonable doubt as to whether the defendant in fact exceeded a speed of forty-five miles per hour.

Instruction F:

You have received as evidence a sworn report and testimony of the results of a calibration test of the accuracy of the speedometer in the motor vehicle operated by the defendant. You shall consider such report and testimony in both determining guilt [\*\*\*12] or innocence and in fixing punishment.

Instruction D paraphrases Code § 46.1-198(a) which provides that the result of a radar check is prima facie evidence of speed. Instruction F paraphrases Code § 46.1-193.1 which provides that the fact finder shall consider the speedometer calibration test in both determining guilt or innocence and in fixing punishment. [\*521] Considering these two instructions together, the only conclusion that the jury could reasonably draw is that the radar check is sufficient to prove the speed of the defendant's vehicle and that the calibration evidence must be considered by them to rebut it. In every case, the test will not prove the defendant's innocence; in some cases, the test may prove his guilt. Such is the case at bar. Williams did not present any evidence to refute the radar check. Rather than help prove his innocence, the calibration test evidence bolstered the prima facie case made by the radar check by confirming that Williams was in fact exceeding the speed limit. Furthermore, even if the calibration test evidence in this case tended to [\*\*\*344] rebut the prima facie case of speed, the statute confers upon the fact finder absolute discretion [\*\*\*13] concerning the weight to be attached to the test results.

Clearly, the calibration test evidence was relevant in fixing the punishment, and no doubt the jury considered it for this purpose. These two instructions stated the correct principles of law; therefore, we conclude that the court committed no error in giving them.

#### IV. REFUSAL TO PERMIT ARGUMENT ON COURT COSTS

During final argument, defense counsel commented to the jury that a finding of guilt would result in a fine, and also in payment of court costs by the defendant. The Commonwealth objected to the remark about court costs, and the court admonished the jury to disregard the statement. Williams asserts that the trial court erred in refusing to allow his counsel to mention his liability for court costs in the event he was found guilty.

(6) [HN5] The defendant's liability for court costs is irrelevant in the jury's determination of the defendant's guilt and punishment, and, therefore, should not be addressed or alluded to in the final argument. "Payment of costs is no part of the sentence of the court, and constitutes no part of the penalty or punishment prescribed for the offense." *Angela's Case*, 51 Va. 724 (10 Gratt.) 696, 701 (1853). [\*\*\*14] Rather, it constitutes an item of debt from the defendant to the Commonwealth for money "paid, laid out and expended for the purpose of repairing the consequences of the defendant's wrong." *Id.* Therefore, the trial court was correct in advising the [\*522] jury to disregard the statement of counsel pertaining to court costs.

For the reasons stated, the judgment of the trial court is affirmed.

*Affirmed.*

[HN2] Va. Code Ann. § 46.1-193.1 provides that in the trial of any person charged with exceeding any maximum speed limit in Virginia, the court shall receive as evidence a sworn report of the results of a calibration test of the accuracy of the speedometer in the motor vehicle operated by the defendant or the arresting officer at the time of the alleged offense. Such report shall be considered by the court or jury in both determining guilt or innocence and in fixing punishment.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview Governments > Legislation > Interpretation***

[HN3] In enacting Va. Code Ann. § 46.1-193, the legislature did not intend to bar a conviction for speeding for persons with inaccurate speedometers.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Traffic Regulation Violations > Elements***

[HN4] Va. Code Ann. § 46.1-308(ii) makes it illegal to operate a motor vehicle with a defective speedometer.

***Criminal Law & Procedure > Trials > Closing Arguments > General Overview***

[HN5] A defendant's liability for court costs is irrelevant in the jury's determination of the defendant's guilt and punishment, and, therefore, should not be addressed or alluded to in the final argument. Payment of costs is no part of the sentence of the court, and constitutes no part of the penalty or punishment prescribed for the offense.

**HEADNOTES: (1) Criminal Procedure -- Notice of the Offense -- Standard.** --A summons must describe the offense charged and must give the accused notice of the nature and character of the offense.

**(2) Motor Vehicles -- Speeding -- Calibration Evidence.** --Code § 46.1-193 was not intended to bar a conviction for speeding for persons with inaccurate speedometers.

**(3) Motor Vehicles -- Speeding -- Calibration Evidence.** --Calibration report evidence is admissible and the fact finder may give it such weight as it deems proper.

**(4) Motor Vehicles -- Speeding -- Calibration Evidence.** --The weight attached to calibration report evidence is solely for the determination of the fact finder.

**(5) Motor Vehicles -- Speeding -- Elements.** --Nothing in the Code suggests that the legislature intended knowledge or intent as an element of the offense of speeding.

**(6) Courts -- Final Argument -- Standard.** --The defendant's liability for court costs is irrelevant in the jury's determination of guilt and punishment and therefore, may not be addressed or alluded to in final argument.

**SYLLABUS:**

Defendant was convicted [\*\*\*2] of speeding. He argued that he was tried under an nonexistent code section, that the jury was improperly instructed upon the effect of calibration evidence, and that the court erred in not allowing

defense counsel to discuss defendant's potential liability for court costs.

The Court of Appeals affirmed, holding that despite the misrecital of the applicable Code section, the description of the offense in the summons gave the defendant notice of the offense of which he was charged. The Court also held that a malfunctioning speedometer does not provide an absolute defense, and that the jury was properly instructed. Finally, the Court held that the trial court properly refused to allow defense counsel to argue the defendant's potential liability for court costs.

#### **COUNSEL:**

Martin F. Clark, Jr. (Clark & Clark, P.C., on brief), for appellant.

Leah A. Darron, Assistant Attorney General (Mary Sue Terry, Attorney General, on brief), for appellee.

#### **JUDGES:**

Cole, J. Koontz, C.J., and Barrow, J., concurred.

#### **OPINION BY:**

COLE

#### **OPINION:**

[\*515] [\*\*\*340] Appellant, Billy Dean Williams, was convicted in a jury trial of speeding in violation of Code § 46.1-193 and fined twenty-five [\*\*341] dollars. He raises three issues on appeal: (1) whether his [\*\*\*3] conviction was invalid because he was tried under a nonexistent code subsection; (2) whether the jury was improperly instructed upon the effect of calibration evidence in determining guilt or innocence and punishment for speeding in accordance with Code § 46.1-193.1; and (3) whether the trial court erred in not allowing defense counsel, during final argument, to discuss Williams' potential liability for court costs. We answer each of these inquiries in the negative, and accordingly, we affirm.

##### *I. FACTS*

On March 27, 1986, Trooper G. E. Miller, Jr. clocked a 1985 Peterbuilt tractor trailer truck being operated by appellant, Billy Dean Williams, at a speed of fifty-nine miles per hour in a forty-five [\*516] mile per hour zone. The trooper was using a moving radar system. He issued Williams a traffic summons charging him with a violation of Code § "46.1-193" which sets the minimum/maximum speed limits. The summons described the charge as "speed 59/45."

At trial, the Commonwealth's evidence consisted of Trooper Miller's testimony and the result of the radar check. In his case-in-chief, Williams testified that he was aware of the forty-five mile per hour speed limit and [\*\*\*4] that, according to his speedometer, he was traveling within that speed limit. He then introduced a calibration certificate showing the result of a test conducted about five weeks after the offense. The test disclosed that a speedometer reading of forty-five miles per hour on his truck was obtained when the truck actually was going fifty-eight miles per hour.

The jury returned a verdict finding Williams guilty of speeding "58 miles per hour in a 45 miles per hour zone," and fined him twenty-five dollars. This appeal followed.

##### *II. CONVICTION UPON NONEXISTENT CODE SUBSECTION*

Williams first maintains that he was convicted of violating a nonexistent code subsection, and that therefore, his conviction must be reversed. At the close of the Commonwealth's evidence, Williams moved to strike the evidence,

contending that he was charged under the incorrect statute. The court overruled the motion, finding that Williams was charged under the appropriate section, Code § 46.1-193, but erroneously amended the warrant to show the subsection as "46.1-193h(3)," a nonexistent subsection. We hold that the error is not fatal to the conviction.

(1) [HN1] A summons must describe the offense charged. [\*\*\*5] Rule 3A:4(b). This description must comply with Rule 3A:6(a), which provides that an indictment must give an accused notice of the nature and character of the offense charged against him. *Greenwalt v. Commonwealth*, 224 Va. 498, 501, 297 S.E.2d 709, 710-11 (1982). In *Williams v. Petersburg*, 216 Va. 297, 301-02, 217 S.E.2d 893, 897 (1975), the defendant argued that his conviction for refusing to take a breath test was invalid because the warrant inaccurately recited the applicable code section. In that case, instead of referring to Code § 18.1-55.1, which required that the [\*517] breath sample be given, the warrant referred to Code § 18.1-54.1 which addressed preliminary field sobriety tests. The court found it sufficient that the warrant specifically charged the defendant with refusing to take a breath test, and held that the "misrecital [did] not invalidate the conviction." *Id.* at 302, 217 S.E.2d at 897.

In this case the traffic summons stated that Williams was charged with "speed 59/45." This description was sufficient to give him notice of the nature and character of the offense [\*\*\*6] for which he was charged. Williams does not contend that he did not know the nature of the charge against him or that he did not have an opportunity to defend against that charge. Accordingly, despite the misrecital of the applicable subsection of the statute, the description of the offense set out in the summons gave the defendant notice of the offense of which he was charged.

### [\*\*342] III. INSTRUCTIONS ON CALIBRATION TEST

Next, Williams claims that the jury was incorrectly instructed upon [HN2] Code § 46.1-193.1, which provides:

In the trial of any person charged with exceeding any maximum speed limit in this Commonwealth, the court shall receive as evidence a sworn report of the results of a calibration test of the accuracy of the speedometer in the motor vehicle operated by the defendant or the arresting officer at the time of the alleged offense. Such report shall be considered by the court or jury in both determining guilt or innocence and in fixing punishment.

He argues that the court erred in refusing to give three instructions he tendered because: (1) Code § 46.1-193.1 creates an absolute defense to a speeding charge where the speedometer reading on a motor vehicle [\*\*\*7] is incorrect and is relied upon by the operator to determine his speed; (2) if the statute is not an absolute bar, it fashions a narrow and specific exemption to the *malum prohibitum* statute designed to protect those drivers who, without knowledge or intent, violate the maximum speed limit and in good faith rely upon the accuracy of their speedometers and find them incorrect; and (3) Code §§ 46.1-193.1 and 46.1-193 are conflicting and, therefore, the court gave inconsistent instructions to the jury.

[\*518] A.

The trial court refused to give the following instructions requested by the defendant:

Instruction 1:

The Court instructs the Jury that the defendant, Mr. Williams, is entitled to rely on the speed shown on his truck's speedometer. If you believe that Mr. Williams' speedometer showed him traveling at a lawful speed at the time he was stopped, and that because his speedometer was incorrect, Mr. Williams exceeded the speed limit, then you shall find the defendant, Mr. Williams, not guilty.

Instruction 2:

5 Va. App. 514, \*518; 365 S.E.2d 340, \*\*342;  
1988 Va. App. LEXIS 36, \*\*\*7; 4 Va. Law Rep. 1872

The Court instructs the Jury that if you believe from the evidence that the defendant, Mr. Williams' speedometer showed Mr. Williams to be driving at a lawful [\*\*\*8] speed at the time he was stopped by the State Trooper, then regardless of Mr. Williams' actual speed as determined by radar, the defendant, Mr. Williams, shall be found not guilty.

Instruction 3:

The Court instructs the Jury that if you believe the evidence of the mechanic who performed the calibration on Mr. Williams' truck that Mr. Williams' speedometer was incorrect, and that it showed Mr. Williams to be traveling at a lawful speed when he actually was traveling at a speed greater than the posted speed, you shall find the defendant, Mr. Williams, not guilty.

(2) We find that the legislature, [HN3] in enacting Code § 46.1-193, did not intend to bar a conviction for speeding for persons with inaccurate speedometers. Such an interpretation would discourage motorists from repairing defective speedometers and encourage tampering with them so as to prevent a conviction for speeding. We do not think the legislature intended to encourage a result [\*519] that would foster unlawful activity. *See* [HN4] Code § 46.1-308(ii). (illegal to operate motor vehicle with defective speedometer).

(3) We find no language in the statute supporting the argument that the legislature intended an [\*\*\*9] incorrect speedometer reading to constitute an absolute bar to a conviction for speeding. In a speeding case the only issue is whether the defendant's vehicle was in fact exceeding the lawful maximum speed. If so, he is guilty; if not, he is innocent. The calibration report is admissible in evidence and the fact finder under the statute may give it such weight as it deems proper under the facts and circumstances of the particular case.

(4) The gravamen of the three instructions tendered by the defendant is that they removed from the fact finder the element of discretion which the statute imposes upon it. The instructions told the fact finder [\*\*343] that if the speedometer showed Williams was traveling at a lawful rate of speed in accordance with the speedometer reading, although he was in fact exceeding the maximum speed limit permitted by law, then it must find him not guilty. The weight attached to the calibration test evidence under the terms of the statute is solely for the determination of the fact finder in arriving at its conclusion as to whether there is reasonable doubt of the guilt of the accused in view of all the proven facts and circumstances. For this reason, we conclude [\*\*\*10] that the trial court was correct in refusing the tendered instructions.

B.

Williams argues that if Code § 46.1-193.1 does not provide an absolute defense when the speedometer reading is inaccurate, it creates knowledge or intent as an element for a speeding charge, and the jury should have been so instructed.

(5) The legislature may require knowledge or intent as an element of an offense, but we hold that neither Code § 46.1-193.1, nor language contained elsewhere in the Motor Vehicle Code, so provides. If the legislature intended to make knowledge or intent an element of the offense of speeding, it would have done so as it has with other offenses in the Motor Vehicle Code. *See, e.g.*, Code § 46.1-15.1 (unlawful for one to sell car if he "knows or should reasonably know" that the odometer has been changed); Code § 46.1-363 (unlawful for one to make a "willful," material false [\*520] statement on any application for a driver's license); Code § 46.1-384(b) (unlawful to "knowingly" permit another to use one's driver's license). We, therefore, find that statutory language requiring a fact finder to "consider" calibration evidence in determining guilt or innocence of speeding [\*\*\*11] was not meant to require proof of intent or knowledge as an element of a speeding conviction. Having concluded that Code § 46.1-193.1 was not intended to make knowledge or intent an element in a speeding charge when calibration evidence is introduced, we find that the trial court did not err in refusing to so instruct the jury.

C.

Williams contends that even if Code § 46.1-193.1 does not provide a defense to a speeding charge or make knowledge or intent an element of the offense, the jury was inadequately instructed because instructions D and F were incompatible and inconsistent with each other. We disagree. The instructions given were as follows:

Instruction D:

The result of the check of the speed of the defendant's automobile by radar device is sufficient to prove his guilt unless other evidence raises a reasonable doubt as to whether the defendant in fact exceeded a speed of forty-five miles per hour.

Instruction F:

You have received as evidence a sworn report and testimony of the results of a calibration test of the accuracy of the speedometer in the motor vehicle operated by the defendant. You shall consider such report and testimony in both determining guilt [\*\*\*12] or innocence and in fixing punishment.

Instruction D paraphrases Code § 46.1-198(a) which provides that the result of a radar check is prima facie evidence of speed. Instruction F paraphrases Code § 46.1-193.1 which provides that the fact finder shall consider the speedometer calibration test in both determining guilt or innocence and in fixing punishment. [\*521] Considering these two instructions together, the only conclusion that the jury could reasonably draw is that the radar check is sufficient to prove the speed of the defendant's vehicle and that the calibration evidence must be considered by them to rebut it. In every case, the test will not prove the defendant's innocence; in some cases, the test may prove his guilt. Such is the case at bar. Williams did not present any evidence to refute the radar check. Rather than help prove his innocence, the calibration test evidence bolstered the prima facie case made by the radar check by confirming that Williams was in fact exceeding the speed limit. Furthermore, even if the calibration test evidence in this case tended to [\*\*\*344] rebut the prima facie case of speed, the statute confers upon the fact finder absolute discretion [\*\*\*13] concerning the weight to be attached to the test results.

Clearly, the calibration test evidence was relevant in fixing the punishment, and no doubt the jury considered it for this purpose. These two instructions stated the correct principles of law; therefore, we conclude that the court committed no error in giving them.

#### IV. REFUSAL TO PERMIT ARGUMENT ON COURT COSTS

During final argument, defense counsel commented to the jury that a finding of guilt would result in a fine, and also in payment of court costs by the defendant. The Commonwealth objected to the remark about court costs, and the court admonished the jury to disregard the statement. Williams asserts that the trial court erred in refusing to allow his counsel to mention his liability for court costs in the event he was found guilty.

(6) [HN5] The defendant's liability for court costs is irrelevant in the jury's determination of the defendant's guilt and punishment, and, therefore, should not be addressed or alluded to in the final argument. "Payment of costs is no part of the sentence of the court, and constitutes no part of the penalty or punishment prescribed for the offense." *Angela's Case*, 51 Va. 724 (10 Gratt.) 696, 701 (1853). [\*\*\*14] Rather, it constitutes an item of debt from the defendant to the Commonwealth for money "paid, laid out and expended for the purpose of repairing the consequences of the defendant's wrong." *Id.* Therefore, the trial court was correct in advising the [\*522] jury to disregard the statement of counsel pertaining to court costs.

For the reasons stated, the judgment of the trial court is affirmed.

*Affirmed.*

*200 Wis. 2d 494; 546 N.W.2d 887; 1996 Wisc. App. LEXIS 255*

**February 28, 1996, Released**

**NOTICE:** [\*1] UNPUBLISHED LIMITED PRECEDENT OPINION - REFER TO LOCAL RULE 809.23(1)(B)5, STATS.

**PRIOR HISTORY:** APPEAL from a judgment of the circuit court for Ozaukee County: WALTER J. SWIETLIK, Judge.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of the judgment of the Ozaukee County Circuit Court (Wisconsin), which entered a jury verdict convicting him of operating a motor vehicle with a prohibited blood alcohol concentration in violation of *Wis. Stat. § 346.63(1)(b)*.

**OVERVIEW:** On appeal from his conviction, defendant argued that the trial court erred in admitting the result of an intoxilyzer test because of a lack of foundation as to its accuracy and that the trial court should have dismissed the charge based on the inadmissibility of the test result. The court affirmed, holding that the lack of presentation of proof of certification proving that the intoxilyzer machine had been properly tested for accuracy within the time period required under *Wis. Stat. § 343.305(6)(b)* did not render the test results inadmissible. Tests by recognized methods did not need to be proved for reliability in every case; rather, whether the test was properly conducted was a matter for the defense. The mandatory aspects regarding automatic admissibility of test results under *Wis. Stat. § 343.305(6)(c)* related only to the procedures for administering the test and not to the requirement that the accuracy of the machine be tested regularly. Although a trial court could refuse to admit test results under proper circumstances, defendant did not establish that the accuracy of the test was so questionable that its results were not probative.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** accuracy, admissibility, blood alcohol, concentration, mandatory, machine, breath, jury instruction, motor vehicle, admissible, certification, automatic, requested instruction, breath sample, test result, breathalyzer,

administered, misuse, ditch, department of transportation, motion to dismiss, chemical analysis, law enforcement, inadmissible, intervals, training, approve, certify, tested

#### ***Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > General Overview Governments > Legislation > Interpretation***

[HN1] Statutory interpretation is a question of law that is resolved without deference to the trial court.

#### ***Evidence > Scientific Evidence > Sobriety Tests***

[HN2] See *Wis. Stat. § 343.305(6)(b)*.

#### ***Evidence > Inferences & Presumptions > Presumptions***

##### ***Evidence > Scientific Evidence > General Overview***

[HN3] Tests by recognized methods, such as speedometer, breathalyzer, and radar, do not need to be proved for reliability in every case. These methods of measurement carry a presumption of accuracy; if the validity of basic tests had to be a matter of evidence in every instance, the administration of law would be seriously frustrated. Whether the test was properly conducted or the instruments used were in working order is a matter for the defense.

#### ***Evidence > Scientific Evidence > Sobriety Tests***

[HN4] The requirements of *Wis. Stat. § 343.305(6)(c)*, which outline the procedures which must be followed when a breath test is administered, must be given a mandatory reading. The test must consist of an adequate breath sample analysis, a calibration sample, and a second adequate breath sample. *Wis. Stat. § 343.305(6)(c)*. In order to be adequate, the instrument must analyze the sample and not reject it as deficient. Finally, the individual tested must provide two separate, adequate breath samples in the proper sequence. Failure to meet these requirements undermines the accuracy of the underlying test.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

##### ***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

##### ***Evidence > Scientific Evidence > Sobriety Tests***

[HN5] The mandatory aspects regarding automatic admissibility relate only to the procedures for administering a breath test, *Wis. Stat. § 343.305(6)(c)*, not to the requirements that the Department of Transportation certify the accuracy of the machines at regular intervals. *Wis. Stat. § 343.305(6)(b)*. This does not limit the power of the trial court, under proper circumstances, to refuse to admit the results of a test because the objecting party has convinced the court that the accuracy of the test is so questionable that its results are not probative.

#### ***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview***

##### ***Criminal Law & Procedure > Jury Instructions > General Overview***

##### ***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

[HN6] A trial court has wide discretion in instructing a jury. If the instructions adequately cover the law, the appellate court will find no misuse of discretion when the court refuses to give a requested instruction, even when the proposed instruction is correct.

**JUDGES:** SNYDER, J.

**OPINION BY: SNYDER****OPINION:**

SNYDER, J. Michael Sterr was convicted of operating a motor vehicle with a prohibited blood alcohol concentration, contrary to § 346.63(1)(b), *STATS.* n1 Sterr contends that the trial court erred in admitting the result of the Intoxilyzer test because of a lack of foundation as to its accuracy. In a related claim, he also argues that based on the inadmissibility of the test result, the trial court should have dismissed the § 346.63(1)(b) count at the close of the evidence. Finally, he claims that the trial court erred when it failed to give a requested jury instruction.

n1 STERR WAS ALSO CHARGED WITH OPERATING A MOTOR VEHICLE WHILE UNDER THE INFLUENCE OF ALCOHOL, CONTRARY TO § 346.63(1)(A), *STATS.* The jury found him not guilty of that charge.

[\*2]

We conclude that the lack of presentation of proof of certification (proving the machine had been properly tested for accuracy within the required time period) did not render the test results inadmissible. Therefore, the trial court's denial of the requested dismissal of the "operating with a prohibited blood alcohol concentration" count was proper. The trial court's refusal to give Sterr's requested jury instruction was also properly within its discretion. Consequently, we affirm.

The underlying incident occurred when City of Mequon Police Officer Darren Selk, on routine patrol, observed a vehicle in a ditch. After Selk stopped to offer assistance, Sterr identified himself as the driver of the vehicle and stated that he drove into the ditch when another vehicle attempted to pass him and he overcompensated to the right. During his conversation with Sterr, Selk detected an odor of alcohol; after Sterr failed field sobriety tests, he was placed under arrest and transported to the Mequon police department. An Intoxilyzer test showed his blood alcohol concentration to be 0.17%. Sterr pled not guilty to the charged violations of § 346.63(1)(a) and (b), *STATS.*, and a jury trial was held. [\*3] After Sterr was found guilty of operating a motor vehicle with a prohibited blood alcohol concentration, this appeal followed.

Sterr's first claim of error is based upon the admission of the results of the Intoxilyzer test. At trial, Sterr claimed that the test results were not admissible because the City had not introduced "certificates of accuracy," and this omission was contrary to the requirements of § 343.305(6)(b), *STATS.*

A determination of whether the test results were admissible is governed by the language of § 343.305(6)(b), *STATS.* [HN1] Statutory interpretation is a question of law that is resolved without deference to the trial court. *Sauer v. Reliance Ins. Co.*, 152 Wis. 2d 234, 240, 448 N.W.2d 256, 259 (Ct. App. 1989).

*Section 343.305(6)(b), STATS.*, requires:

[HN2] The department of transportation shall approve techniques or methods of performing chemical analysis of the breath and shall:

1. Approve training manuals and courses ... for the training of law enforcement officers in the chemical analysis of a person's breath;

...

3. Have trained technicians ... test and certify the accuracy of the equipment to be used by law enforcement officers [\*4] ... at intervals of not more than 120 days ...

The issue in this case is whether the requirements of this paragraph are a prerequisite to the automatic admissibility of the test result.

[HN3] Tests by recognized methods, such as speedometer, breathalyzer and radar, do not need to be proved for reliability in every case. *State v. Trailer Serv., Inc.*, 61 Wis. 2d 400, 408, 212 N.W.2d 683, 688 (1973). These methods of measurement carry a presumption of accuracy; if the validity of basic tests had to be a matter of evidence in every instance, the administration of law would be seriously frustrated. *Id.* at 408, 212 N.W.2d at 688-89. Whether the test was properly conducted or the instruments used were in working order is a matter for the defense. *Id.* at 408, 212 N.W.2d at 688.

The *Trailer Service* case was subsequently followed by *City of New Berlin v. Wertz*, 105 Wis. 2d 670, 314 N.W.2d 911 (Ct. App. 1981), which determined that compliance with administrative code procedures was not required as a foundation for the admissibility of breathalyzer results. *Id.* at 674, 314 N.W.2d at 913. In that case the court noted that "an attack [\*5] on the qualifications of the operator, the methods of operation or the accuracy of the equipment is a matter of defense and goes to the weight to be accorded to the test and not to the test's admissibility." *Id.* at 675 n.6, 314 N.W.2d at 913.

According to *State v. Grade*, 165 Wis. 2d 143, 149, 477 N.W.2d 315, 317 (Ct. App. 1991), [HN4] the requirements of § 343.305(6)(c), STATS., which outline the *procedures* which must be followed when the test is administered, must be given a mandatory reading. The test must consist of an adequate breath sample analysis, a calibration sample and a second adequate breath sample. See § 343.305(6)(c). In order to be adequate, the instrument must analyze the sample and not reject it as deficient. *Id.* Finally, the individual tested must provide two separate, adequate breath samples in the proper sequence. *Id.* Failure to meet these requirements undermines the accuracy of the underlying test. *Grade*, 165 Wis. 2d at 149, 477 N.W.2d at 317.

Our review of case law which addresses the requirements for the admissibility of Intoxilyzer test results leads us to conclude that [HN5] the mandatory aspects regarding [\*6] automatic admissibility relate only to the procedures for administering the test, see § 343.305(6)(c), STATS., not to the requirements that the Department of Transportation certify the accuracy of the machines at regular intervals. See § 343.305(6)(b). n2 We reiterate, as we stated in *Wertz*, that this holding does not limit the power of the trial court, under proper circumstances, to refuse to admit the results of a test because the objecting party has convinced the court that the accuracy of the test is so questionable that its results are not probative. *Wertz*, 105 Wis. 2d at 674-75, 314 N.W.2d at 913. That, however, did not happen here. n3

n2 Sterr argues that the statement in § 343.305(5)(d), STATS., "the results of a test administered in accordance with this section are admissible," requires that all portions of the statute are mandatory. Case law interpreting the requirements of § 343.305 has not supported this broad generalization. See generally *City of New Berlin v. Wertz*, 105 Wis. 2d 670, 674, 314 N.W.2d 911, 913 (Ct. App. 1981), and *State v. Grade*, 165 Wis. 2d 143, 149, 477 N.W.2d 315, 317 (Ct. App. 1991).

[\*7]

n3 We note that Sterr points to an unpublished decision, *State v. Hirthe*, No. 95-1058-CR, unpublished slip op. (Wis. Ct. App. Sept. 6, 1995), for the proposition that the language of the statute is mandatory, and automatic admissibility is dependent upon compliance with the statute. The significant difference is that in that case evidence was produced that the machine had been calibrated 167 days before the testing of the defendant's breath, which was an affirmative showing by the defense that the accuracy of the test results was suspect.

200 Wis. 2d 494; 546 N.W.2d 887;  
1996 Wisc. App. LEXIS 255, \*7

We conclude that the trial court did not err when it admitted the results of the Intoxilyzer test. Based upon the proper admission of the test results, the trial court's denial of Sterr's motion to dismiss the charge of operating a motor vehicle with a prohibited blood alcohol concentration was proper. The results of the Intoxilyzer test were properly before the jury, and the denial of the motion to dismiss was a proper exercise of discretion.

Sterr's final claim is that the trial court erred when it denied a requested jury instruction. The instruction [\*8] would have informed the jury of the fact that § 343.305(6)(b)3, *STATS.*, requires the Intoxilyzer to be certified every 120 days and that the City had offered no proof of such certification.

[HN6] A trial court has wide discretion in instructing a jury. *Wingad v. John Deere & Co.*, 187 Wis. 2d 441, 454, 523 N.W.2d 274, 279 (Ct. App. 1994). If the instructions adequately cover the law, we will find no misuse of discretion when the court refuses to give a requested instruction, even when the proposed instruction is correct. *Id.* The trial court properly determined that the lack of evidence of certification of the machine did not render inadmissible Sterr's test results. The denial of Sterr's requested instruction was in line with its earlier determination. There was no misuse of discretion.

*By the Court.*--Judgment affirmed.

This opinion will not be published. See RULE 809.23(1)(b)4, *STATS.*

[HN6] A trial court has wide discretion in instructing a jury. If the instructions adequately cover the law, the appellate court will find no misuse of discretion when the court refuses to give a requested instruction, even when the proposed instruction is correct.

**JUDGES:** SNYDER, J.

**OPINION BY: SNYDER****OPINION:**

SNYDER, J. Michael Sterr was convicted of operating a motor vehicle with a prohibited blood alcohol concentration, contrary to § 346.63(1)(b), *STATS.* n1 Sterr contends that the trial court erred in admitting the result of the Intoxilyzer test because of a lack of foundation as to its accuracy. In a related claim, he also argues that based on the inadmissibility of the test result, the trial court should have dismissed the § 346.63(1)(b) count at the close of the evidence. Finally, he claims that the trial court erred when it failed to give a requested jury instruction.

n1 STERR WAS ALSO CHARGED WITH OPERATING A MOTOR VEHICLE WHILE UNDER THE INFLUENCE OF ALCOHOL, CONTRARY TO § 346.63(1)(A), *STATS.* The jury found him not guilty of that charge.

[\*2]

We conclude that the lack of presentation of proof of certification (proving the machine had been properly tested for accuracy within the required time period) did not render the test results inadmissible. Therefore, the trial court's denial of the requested dismissal of the "operating with a prohibited blood alcohol concentration" count was proper. The trial court's refusal to give Sterr's requested jury instruction was also properly within its discretion. Consequently, we affirm.

The underlying incident occurred when City of Mequon Police Officer Darren Selk, on routine patrol, observed a vehicle in a ditch. After Selk stopped to offer assistance, Sterr identified himself as the driver of the vehicle and stated that he drove into the ditch when another vehicle attempted to pass him and he overcompensated to the right. During his conversation with Sterr, Selk detected an odor of alcohol; after Sterr failed field sobriety tests, he was placed under arrest and transported to the Mequon police department. An Intoxilyzer test showed his blood alcohol concentration to be 0.17%. Sterr pled not guilty to the charged violations of § 346.63(1)(a) and (b), *STATS.*, and a jury trial was held. [\*3] After Sterr was found guilty of operating a motor vehicle with a prohibited blood alcohol concentration, this appeal followed.

Sterr's first claim of error is based upon the admission of the results of the Intoxilyzer test. At trial, Sterr claimed that the test results were not admissible because the City had not introduced "certificates of accuracy," and this omission was contrary to the requirements of § 343.305(6)(b), *STATS.*

A determination of whether the test results were admissible is governed by the language of § 343.305(6)(b), *STATS.* [HN1] Statutory interpretation is a question of law that is resolved without deference to the trial court. *Sauer v. Reliance Ins. Co.*, 152 Wis. 2d 234, 240, 448 N.W.2d 256, 259 (Ct. App. 1989).

*Section 343.305(6)(b), STATS.*, requires:

[HN2] The department of transportation shall approve techniques or methods of performing chemical analysis of the breath and shall:

1. Approve training manuals and courses ... for the training of law enforcement officers in the chemical analysis of a person's breath;

...

3. Have trained technicians ... test and certify the accuracy of the equipment to be used by law enforcement officers [\*4] ... at intervals of not more than 120 days ...

The issue in this case is whether the requirements of this paragraph are a prerequisite to the automatic admissibility of the test result.

[HN3] Tests by recognized methods, such as speedometer, breathalyzer and radar, do not need to be proved for reliability in every case. *State v. Trailer Serv., Inc.*, 61 Wis. 2d 400, 408, 212 N.W.2d 683, 688 (1973). These methods of measurement carry a presumption of accuracy; if the validity of basic tests had to be a matter of evidence in every instance, the administration of law would be seriously frustrated. *Id.* at 408, 212 N.W.2d at 688-89. Whether the test was properly conducted or the instruments used were in working order is a matter for the defense. *Id.* at 408, 212 N.W.2d at 688.

The *Trailer Service* case was subsequently followed by *City of New Berlin v. Wertz*, 105 Wis. 2d 670, 314 N.W.2d 911 (Ct. App. 1981), which determined that compliance with administrative code procedures was not required as a foundation for the admissibility of breathalyzer results. *Id.* at 674, 314 N.W.2d at 913. In that case the court noted that "an attack [\*5] on the qualifications of the operator, the methods of operation or the accuracy of the equipment is a matter of defense and goes to the weight to be accorded to the test and not to the test's admissibility." *Id.* at 675 n.6, 314 N.W.2d at 913.

According to *State v. Grade*, 165 Wis. 2d 143, 149, 477 N.W.2d 315, 317 (Ct. App. 1991), [HN4] the requirements of § 343.305(6)(c), *STATS.*, which outline the *procedures* which must be followed when the test is administered, must be given a mandatory reading. The test must consist of an adequate breath sample analysis, a calibration sample and a second adequate breath sample. *See* § 343.305(6)(c). In order to be adequate, the instrument must analyze the sample and not reject it as deficient. *Id.* Finally, the individual tested must provide two separate, adequate breath samples in the proper sequence. *Id.* Failure to meet these requirements undermines the accuracy of the underlying test. *Grade*, 165 Wis. 2d at 149, 477 N.W.2d at 317.

Our review of case law which addresses the requirements for the admissibility of Intoxilyzer test results leads us to conclude that [HN5] the mandatory aspects regarding [\*6] automatic admissibility relate only to the procedures for administering the test, *see* § 343.305(6)(c), *STATS.*, not to the requirements that the Department of Transportation certify the accuracy of the machines at regular intervals. *See* § 343.305(6)(b). n2 We reiterate, as we stated in *Wertz*, that this holding does not limit the power of the trial court, under proper circumstances, to refuse to admit the results of a test because the objecting party has convinced the court that the accuracy of the test is so questionable that its results are not probative. *Wertz*, 105 Wis. 2d at 674-75, 314 N.W.2d at 913. That, however, did not happen here. n3

n2 Sterr argues that the statement in § 343.305(5)(d), *STATS.*, "the results of a test administered in accordance with this section are admissible," requires that all portions of the statute are mandatory. Case law interpreting the requirements of § 343.305 has not supported this broad generalization. *See generally City of New Berlin v. Wertz*, 105 Wis. 2d 670, 674, 314 N.W.2d 911, 913 (Ct. App. 1981), and *State v. Grade*, 165 Wis. 2d 143, 149, 477 N.W.2d 315, 317 (Ct. App. 1991).

[\*7]

n3 We note that Sterr points to an unpublished decision, *State v. Hirthe*, No. 95-1058-CR, unpublished slip op. (Wis. Ct. App. Sept. 6, 1995), for the proposition that the language of the statute is mandatory, and automatic admissibility is dependent upon compliance with the statute. The significant difference is that in that case evidence was produced that the machine had been calibrated 167 days before the testing of the defendant's breath, which was an affirmative showing by the defense that the accuracy of the test results was suspect.

200 Wis. 2d 494; 546 N.W.2d 887;  
1996 Wisc. App. LEXIS 255, \*7

We conclude that the trial court did not err when it admitted the results of the Intoxilyzer test. Based upon the proper admission of the test results, the trial court's denial of Sterr's motion to dismiss the charge of operating a motor vehicle with a prohibited blood alcohol concentration was proper. The results of the Intoxilyzer test were properly before the jury, and the denial of the motion to dismiss was a proper exercise of discretion.

Sterr's final claim is that the trial court erred when it denied a requested jury instruction. The instruction [\*8] would have informed the jury of the fact that § 343.305(6)(b)3, *STATS.*, requires the Intoxilyzer to be certified every 120 days and that the City had offered no proof of such certification.

[HN6] A trial court has wide discretion in instructing a jury. *Wingad v. John Deere & Co.*, 187 Wis. 2d 441, 454, 523 N.W.2d 274, 279 (Ct. App. 1994). If the instructions adequately cover the law, we will find no misuse of discretion when the court refuses to give a requested instruction, even when the proposed instruction is correct. *Id.* The trial court properly determined that the lack of evidence of certification of the machine did not render inadmissible Sterr's test results. The denial of Sterr's requested instruction was in line with its earlier determination. There was no misuse of discretion.

*By the Court.*--Judgment affirmed.

This opinion will not be published. See RULE 809.23(1)(b)4, *STATS.*

BROWN

**OPINION:**

[\*783] Mr. Vrooman appeals from a conviction for driving while under the influence of intoxicating liquor

(DWUI) in violation of § 31-5-233(a), W.S.1977.

Appellant was convicted in the justice of the peace court and his conviction was affirmed by the district court.

Appellant urges four issues:

"I. Whether the Justice Court erred in finding that there was probable cause for the arrest of the Appellant and as such erred in admitting into evidence the highway patrolman's observations of Appellant, statements made by Appellant, and the results of the breath test administered to Appellant.

"II. Whether the Justice Court erred in admitting into evidence the tape recorded statement of Appellant despite Appellant's refusal to give a statement [\*\*2] and his requests that counsel be present during questioning, both of which the arresting officer ignored.

"III. Whether the Justice Court erred in admitting into evidence the results of the breath test which was conducted after an improper advisement of Appellant's rights under the implied consent law of the State.

"IV. Whether the District Court erred in finding that the Wyoming Rules of Appellate Procedure were inapplicable to Appellant's appeal from Justice Court to the District Court."

We will affirm.

On June 12, 1979, appellant was driving southbound on Highway 26 in Grand Teton National Park. He was stopped by Highway Patrolman David Schofield (Schofield), who was patrolling north. Schofield observed two vehicles approaching him in the southbound lane. The first vehicle was a blue van; the second, appellant's vehicle, was approximately one-quarter mile behind the blue van. Schofield observed his radar gun reading between 57 miles per hour and 83 miles per hour. He thought, however, that the blue van was traveling close to the speed limit, while appellant's vehicle was exceeding the speed limit. When appellant's vehicle was about a quarter of a mile away from [\*\*3] the patrol car, it slowed down drastically.

After citing appellant for speeding, n1 Schofield smelled a strong odor of alcoholic beverage and then submitted appellant to a field test unit called an "Alcosensor." Appellant failed this test; Schofield then administered field sobriety tests. He testified that because of a combination of the alcosensor test, the smell of alcohol, and appellant's failure of field sobriety tests, he determined that there was probable cause to arrest appellant for driving while under the influence of alcohol.

n1 The citation for speeding was dismissed by the State in the justice of the peace court.

Appellant was then arrested and placed in Schofield's patrol car for transportation to Jackson, Wyoming, during which time Schofield tape recorded his conversation with appellant. Before that time Schofield had advised appellant of his *Miranda* rights, and appellant had refused to give a statement. [\*784] While being transported to Jackson, Schofield asked Vrooman to take a breathalyzer [\*\*4] test.

Schofield advised appellant of the implied consent law, after which appellant consented to take the breathalyzer test. The breathalyzer test showed appellant's blood alcohol level to be 0.11% at the time he was stopped for speeding.  
n2

n2 § 31-5-233(b)(iii), W.S.1977:

"If there was at that time ten one-hundredths of one percent (0.10%) or more by weight of alcohol in the person's blood, it shall be presumed that the person was under the influence of intoxicating liquor, to a degree which renders him incapable of safely driving a motor vehicle;"

## I

Appellant asserts that the highway patrolman did not have probable cause to stop him for speeding. He argues that any evidence that appellant was driving while under the influence of alcohol arose from the initial, illegal stop for speeding and therefore should have been suppressed. n3 We do not agree.

n3 Appellant made a timely suppression motion which was determined adversely to him.

[\*\*5]

We must initially determine whether the highway patrolman had probable cause to stop appellant for speeding. There was considerable testimony at trial concerning the reliability of the radar. There was testimony regarding Schofield's training and experience in the use of radar, as well as testimony regarding testing and calibration of the radar unit involved. Through effective cross-examination of the State's witnesses, appellant was able to cast some doubt on the accuracy of the radar clocking. However, the testimony about the accuracy of the radar clocking obscures the initial issue. While the accuracy of a radar clocking may be determinative of appellant's guilt or innocence of speeding, it does not determine whether there was probable cause to stop appellant for speeding. In addition to the radar clocking showing excessive speed, the highway patrolman observed appellant drastically reduce his speed when the patrol car could be seen by appellant. Also, the highway patrolman observed the front of appellant's vehicle dip. A combination of these circumstances certainly constituted probable cause to stop appellant for speeding.

A court must generally determine whether there [\*\*6] was probable cause for a warrantless arrest by using a standard of reasonableness, viewed with practicality and applied with good sense. *Raigosa v. State, Wyo., 562 P.2d 1009 (1977)*. Furthermore, a court must consider the facts and circumstances known to the officer which would lead a reasonably cautious and prudent man to believe that the person to be arrested has committed a crime. *Neilson v. State, Wyo., 599 P.2d 1326 (1979)*; and *DeHerrera v. State, Wyo., 589 P.2d 845 (1979)*. Stopping appellant for speeding was not a "sham" or a pretext for a warrantless search suggested by appellant but was based on probable cause.

Having determined that the highway patrolman had probable cause to stop appellant and cite him for speeding, we have no problem with finding probable cause for appellant's arrest for driving while under the influence of alcohol. The officer initially detected excessive speed and erratic driving. After issuing the speeding citation, the officer detected a strong odor of alcohol on appellant. Appellant's balance was unsteady, his face was flushed, and his speech was slurred. Appellant failed the field sobriety test. Appellant could not put his finger [\*\*7] to his nose, could not recite the alphabet, and could not count to four with his fingers. Schofield would have been remiss in his duties had he not arrested appellant for driving while under the influence of alcohol.

## II

Schofield had a small portable cassette recorder in his patrol car, which he placed on top of the console where appellant could see it. He started the recorder shortly after he got back into the vehicle, [\*\*785] and recorded all conversation with appellant, who was aware that the conversation was being recorded. The tape was stopped during periods of silence. Schofield made the recording while he drove appellant from the scene to the courthouse. Appellant was advised of his *Miranda* rights, which he indicated that he understood. Appellant made no admissions on the tape. Schofield did not threaten or coerce him in any way.

The tape which Schofield identified as being a true and accurate recording contains no evidence of interrogation or

questioning by officer Schofield. It provides evidence of the conversation with appellant and indicates that Schofield informed appellant of the implied consent law, and illustrated appellant's quality of speech and [\*\*8] general demeanor.

The justice of the peace admitted the tape into evidence " \* \* \* for the officer advising Mr. Vrooman of his rights under the implied consent law; for the quality of Mr. Vrooman's voice, and for the Court to assess his reasoning process and/or whether he is rambling." Before finding guilt, the justice of the peace stated: "The Court will reflect that it is influenced very much by the quality of the tape and the voice on the tape."

Appellant contends that the conversation after he said he wanted an attorney should have been suppressed. Appellant cites *Miranda v. Arizona*, 384 U.S. 436, 86 S. Ct. 1602, 16 L. Ed. 2d 694, 10 A.L.R.3d 974 (1966), reh. denied 385 U.S. 890, 87 S. Ct. 11, 17 L. Ed. 2d 121 and *Dryden v. State, Wyo.*, 535 P.2d 483 (1975), to support his position.

*Miranda* says that while a defendant is in custody he cannot be interrogated against his will, and that any confession resulting from such interrogation is inadmissible. *Miranda* does not apply here, because appellant made no confession. There was also no interrogation under the definition provided in *Rhode Island v. Innis*, 446 U.S. 291, 300, 100 S. Ct. 1682, 1689, 64 L. Ed. [\*\*9] 2d 297, 308 (1980):

" \* \* \* 'Interrogation,' as conceptualized in the *Miranda* opinion, must reflect a measure of compulsion above and beyond that inherent in custody itself.

"We conclude that the *Miranda* safeguards come into play whenever a person in custody is subjected to either express questioning or its functional equivalent. That is to say, the term 'interrogation' under *Miranda* refers not only to express questioning, but also to any words or actions on the part of the police (other than those normally attendant to arrest and custody) that the police should know are reasonably likely to elicit an incriminating response from the suspect. The latter portion of this definition focuses primarily upon the perceptions of the suspect, rather than the intent of the police. \* \* \*"

*Dryden v. State* held that after a defendant indicated that he wanted an attorney "the county authorities could not thereafter enter into other interrogation unless and until the defendant had himself reopened the subject." 535 P.2d at 493.

Neither the mandates of *Miranda* nor *Dryden* were violated here. The highway patrolman did not solicit a confession or admission, [\*\*10] nor were any made. The appellant was not interrogated after he indicated that he wanted a lawyer. The only conversation was the highway patrolman's advising appellant of the implied consent law and other normal conversation. The tape demonstrated to the justice of the peace the quality of appellant's speech and his general demeanor. It contained only matters that the highway patrolman could properly testify to at trial. The tape gave the justice of the peace direct information rather than the highway patrolman's characterization and impressions.

It is well established that sound recordings are admissible in criminal actions where the recording is relevant and material, and a proper foundation is laid. *State v. Warwick, Mont.*, 158 Mont. 531, 494 P.2d 627 (1972). A proper foundation was laid by the State, and the recording may thus be considered as direct evidence subject to the same admissibility as eyewitness testimony. *State v. Bassett, Mont.*, 189 Mont. 28, 614 P.2d 1054 (1980). Admissibility after a proper foundation has [\*\*786] been laid, rests within the sound discretion of the trial court. *Peterson v. State, Wyo.*, 586 P.2d 144 (1978). We hold that the [\*\*11] trial judge did not abuse his discretion by admitting the tape into evidence.

### III

After appellant's arrest for driving while under the influence of alcohol, Schofield asked him several times to take a breath test. The highway patrolman attempted to explain to appellant the implied consent law as follows:

"OFFICER SCHOFIELD: Okay, sir, under the Implied Consent Law of the State of Wyoming --

"MR. VROOMAN: I already know that.

"OFFICER SCHOFIELD: Okay. You are under arrest for driving under the influence --

"MR. VROOMAN: Okay.

"OFFICER SCHOFIELD: --of alcohol. Under the Implied Consent Law of the State of Wyoming, I am requesting that you take a chemical test to determine the degree of your intoxication. I request that you take a breath type test at the Sheriff's Office in Jackson. At your option and at your expense, you may have a blood test taken at the hospital. Okay?

"Your refusal to take this chemical test may result in your driving privileges being suspended for 30 days, regardless of whether you are convicted of the charge of D.W.U.I. If you are convicted, and you refuse this test, the suspension will be in addition to the driving under [\*\*12] the influence suspension.

"So what happens is, I am requesting that you take this test. If you refuse it, your driver's license may be suspended for 30 days. If convicted in Court after that, that suspension will also be added to the suspension for the conviction. Do you understand that?

"Mr. Vrooman: Oh yeh.

"OFFICER SCHOFIELD: Well, I just need an answer either yes or no if you will take the breath test. If you are not happy with the results of that test you can have a blood test taken at the hospital at your expense. Do you want to take either test?"

The implied consent law provides in part:

"(a) Any person who operates a motor vehicle upon a public street or highway is deemed to have given consent, subject to the provisions herein, to a chemical test of his blood, breath or urine for the purpose of determining the alcoholic content of his blood \* \* \* \*. The arrested person shall be told that his failure to submit to the chemical test may result in the suspension of his privilege to operate a motor vehicle. \* \* \* \*" § 31-6-102(a), W.S.1977.

"If a person under arrest refuses \* \* \* \* to submit to a chemical test \* \* \* \* none shall be given [\*\*13] \* \* \* \*." § 31-6-102(c), W.S.1977.

In *State v. Marquez*, Wyo., 638 P.2d 1292 (1982), we said the arrested person should be told that his failure to submit to the chemical test may result in the suspension of his privilege to drive a motor vehicle. In *State v. Chastain*, Wyo., 594 P.2d 458 (1979), we held that failure to advise an arrested person of the implied consent law rendered the result of a blood-alcohol test inadmissible in court. Here appellant was properly advised of the implied consent law. Additionally, there was abundant, even overwhelming, evidence before the court from which the judge could have found the appellant guilty without the result of the breath test. There was evidence of excessive speed, erratic driving, a strong odor of alcohol, appellant's flushed face and slurred speech, and failure of a field sobriety test. Also, appellant failed the finger-to-nose test, failed to recite the alphabet and could not count to four on his fingers.

IV

Finally, appellant asserts that on appeal to the district court, Wyoming Rules of Appellate Procedure should have

been followed rather than Rules of Criminal Procedure for justice of the peace courts and municipal [\*\*14] courts. We decline to address [\*787] that issue, if it can be characterized as an issue in this case. Appellant has not briefed his fourth assignment of error, nor has he favored us with any argument in support of the alleged error.

Appellant maintains that he unsuccessfully attempted to invoke Rule 4.03, W.R.A.P. n4 in his appeal from the justice of the peace court to the district court. We do not understand appellant's complaint. Both the electronic tapes of the proceedings in the justice court and a transcript were before the district court on appeal. Additionally, the district court had the original exhibits, papers and documents that were before the justice court. The parties submitted briefs to the district court. Rule 4.03, supra, would only be applicable if a transcript or electronic recording were not available in an appeal. There is no merit to appellant's assignment of error Number IV.

n4 Rule 4.03, W.R.A.P.:

"If no report of the evidence or proceedings at a hearing or trial was made, or if a transcript is unavailable, the appellant may prepare a statement of the evidence or proceedings from the best available means, including his recollection. The statement shall be served on the appellee, who may serve objections or propose amendments thereto within ten (10) days after service. Thereupon the statement and any objections or proposed amendments shall be submitted to the district court for settlement and approval and as settled and approved shall be included by the clerk of the district court in the record on appeal."

[\*\*15]

**OPINION:**

[\*783] Mr. Vrooman appeals from a conviction for driving while under the influence of intoxicating liquor

(DWUI) in violation of § 31-5-233(a), W.S.1977.

Appellant was convicted in the justice of the peace court and his conviction was affirmed by the district court.

Appellant urges four issues:

"I. Whether the Justice Court erred in finding that there was probable cause for the arrest of the Appellant and as such erred in admitting into evidence the highway patrolman's observations of Appellant, statements made by Appellant, and the results of the breath test administered to Appellant.

"II. Whether the Justice Court erred in admitting into evidence the tape recorded statement of Appellant despite Appellant's refusal to give a statement [\*\*2] and his requests that counsel be present during questioning, both of which the arresting officer ignored.

"III. Whether the Justice Court erred in admitting into evidence the results of the breath test which was conducted after an improper advisement of Appellant's rights under the implied consent law of the State.

"IV. Whether the District Court erred in finding that the Wyoming Rules of Appellate Procedure were inapplicable to Appellant's appeal from Justice Court to the District Court."

We will affirm.

On June 12, 1979, appellant was driving southbound on Highway 26 in Grand Teton National Park. He was stopped by Highway Patrolman David Schofield (Schofield), who was patrolling north. Schofield observed two vehicles approaching him in the southbound lane. The first vehicle was a blue van; the second, appellant's vehicle, was approximately one-quarter mile behind the blue van. Schofield observed his radar gun reading between 57 miles per hour and 83 miles per hour. He thought, however, that the blue van was traveling close to the speed limit, while appellant's vehicle was exceeding the speed limit. When appellant's vehicle was about a quarter of a mile away from [\*\*3] the patrol car, it slowed down drastically.

After citing appellant for speeding, n1 Schofield smelled a strong odor of alcoholic beverage and then submitted appellant to a field test unit called an "Alcosensor." Appellant failed this test; Schofield then administered field sobriety tests. He testified that because of a combination of the alcosensor test, the smell of alcohol, and appellant's failure of field sobriety tests, he determined that there was probable cause to arrest appellant for driving while under the influence of alcohol.

n1 The citation for speeding was dismissed by the State in the justice of the peace court.

Appellant was then arrested and placed in Schofield's patrol car for transportation to Jackson, Wyoming, during which time Schofield tape recorded his conversation with appellant. Before that time Schofield had advised appellant of his *Miranda* rights, and appellant had refused to give a statement. [\*784] While being transported to Jackson, Schofield asked Vrooman to take a breathalyzer [\*\*4] test.

Schofield advised appellant of the implied consent law, after which appellant consented to take the breathalyzer test. The breathalyzer test showed appellant's blood alcohol level to be 0.11% at the time he was stopped for speeding.  
n2

n2 § 31-5-233(b)(iii), W.S.1977:

"If there was at that time ten one-hundredths of one percent (0.10%) or more by weight of alcohol in the person's blood, it shall be presumed that the person was under the influence of intoxicating liquor, to a degree which renders him incapable of safely driving a motor vehicle;"

## I

Appellant asserts that the highway patrolman did not have probable cause to stop him for speeding. He argues that any evidence that appellant was driving while under the influence of alcohol arose from the initial, illegal stop for speeding and therefore should have been suppressed. n3 We do not agree.

n3 Appellant made a timely suppression motion which was determined adversely to him.

[\*\*5]

We must initially determine whether the highway patrolman had probable cause to stop appellant for speeding. There was considerable testimony at trial concerning the reliability of the radar. There was testimony regarding Schofield's training and experience in the use of radar, as well as testimony regarding testing and calibration of the radar unit involved. Through effective cross-examination of the State's witnesses, appellant was able to cast some doubt on the accuracy of the radar clocking. However, the testimony about the accuracy of the radar clocking obscures the initial issue. While the accuracy of a radar clocking may be determinative of appellant's guilt or innocence of speeding, it does not determine whether there was probable cause to stop appellant for speeding. In addition to the radar clocking showing excessive speed, the highway patrolman observed appellant drastically reduce his speed when the patrol car could be seen by appellant. Also, the highway patrolman observed the front of appellant's vehicle dip. A combination of these circumstances certainly constituted probable cause to stop appellant for speeding.

A court must generally determine whether there [\*\*6] was probable cause for a warrantless arrest by using a standard of reasonableness, viewed with practicality and applied with good sense. *Raigosa v. State, Wyo., 562 P.2d 1009 (1977)*. Furthermore, a court must consider the facts and circumstances known to the officer which would lead a reasonably cautious and prudent man to believe that the person to be arrested has committed a crime. *Neilson v. State, Wyo., 599 P.2d 1326 (1979)*; and *DeHerrera v. State, Wyo., 589 P.2d 845 (1979)*. Stopping appellant for speeding was not a "sham" or a pretext for a warrantless search suggested by appellant but was based on probable cause.

Having determined that the highway patrolman had probable cause to stop appellant and cite him for speeding, we have no problem with finding probable cause for appellant's arrest for driving while under the influence of alcohol. The officer initially detected excessive speed and erratic driving. After issuing the speeding citation, the officer detected a strong odor of alcohol on appellant. Appellant's balance was unsteady, his face was flushed, and his speech was slurred. Appellant failed the field sobriety test. Appellant could not put his finger [\*\*7] to his nose, could not recite the alphabet, and could not count to four with his fingers. Schofield would have been remiss in his duties had he not arrested appellant for driving while under the influence of alcohol.

## II

Schofield had a small portable cassette recorder in his patrol car, which he placed on top of the console where appellant could see it. He started the recorder shortly after he got back into the vehicle, [\*\*785] and recorded all conversation with appellant, who was aware that the conversation was being recorded. The tape was stopped during periods of silence. Schofield made the recording while he drove appellant from the scene to the courthouse. Appellant was advised of his *Miranda* rights, which he indicated that he understood. Appellant made no admissions on the tape. Schofield did not threaten or coerce him in any way.

The tape which Schofield identified as being a true and accurate recording contains no evidence of interrogation or

questioning by officer Schofield. It provides evidence of the conversation with appellant and indicates that Schofield informed appellant of the implied consent law, and illustrated appellant's quality of speech and [\*\*8] general demeanor.

The justice of the peace admitted the tape into evidence " \* \* \* for the officer advising Mr. Vrooman of his rights under the implied consent law; for the quality of Mr. Vrooman's voice, and for the Court to assess his reasoning process and/or whether he is rambling." Before finding guilt, the justice of the peace stated: "The Court will reflect that it is influenced very much by the quality of the tape and the voice on the tape."

Appellant contends that the conversation after he said he wanted an attorney should have been suppressed. Appellant cites *Miranda v. Arizona*, 384 U.S. 436, 86 S. Ct. 1602, 16 L. Ed. 2d 694, 10 A.L.R.3d 974 (1966), reh. denied 385 U.S. 890, 87 S. Ct. 11, 17 L. Ed. 2d 121 and *Dryden v. State, Wyo.*, 535 P.2d 483 (1975), to support his position.

*Miranda* says that while a defendant is in custody he cannot be interrogated against his will, and that any confession resulting from such interrogation is inadmissible. *Miranda* does not apply here, because appellant made no confession. There was also no interrogation under the definition provided in *Rhode Island v. Innis*, 446 U.S. 291, 300, 100 S. Ct. 1682, 1689, 64 L. Ed. [\*\*9] 2d 297, 308 (1980):

" \* \* \* 'Interrogation,' as conceptualized in the *Miranda* opinion, must reflect a measure of compulsion above and beyond that inherent in custody itself.

"We conclude that the *Miranda* safeguards come into play whenever a person in custody is subjected to either express questioning or its functional equivalent. That is to say, the term 'interrogation' under *Miranda* refers not only to express questioning, but also to any words or actions on the part of the police (other than those normally attendant to arrest and custody) that the police should know are reasonably likely to elicit an incriminating response from the suspect. The latter portion of this definition focuses primarily upon the perceptions of the suspect, rather than the intent of the police. \* \* \*"

*Dryden v. State* held that after a defendant indicated that he wanted an attorney "the county authorities could not thereafter enter into other interrogation unless and until the defendant had himself reopened the subject." 535 P.2d at 493.

Neither the mandates of *Miranda* nor *Dryden* were violated here. The highway patrolman did not solicit a confession or admission, [\*\*10] nor were any made. The appellant was not interrogated after he indicated that he wanted a lawyer. The only conversation was the highway patrolman's advising appellant of the implied consent law and other normal conversation. The tape demonstrated to the justice of the peace the quality of appellant's speech and his general demeanor. It contained only matters that the highway patrolman could properly testify to at trial. The tape gave the justice of the peace direct information rather than the highway patrolman's characterization and impressions.

It is well established that sound recordings are admissible in criminal actions where the recording is relevant and material, and a proper foundation is laid. *State v. Warwick, Mont.*, 158 Mont. 531, 494 P.2d 627 (1972). A proper foundation was laid by the State, and the recording may thus be considered as direct evidence subject to the same admissibility as eyewitness testimony. *State v. Bassett, Mont.*, 189 Mont. 28, 614 P.2d 1054 (1980). Admissibility after a proper foundation has [\*\*786] been laid, rests within the sound discretion of the trial court. *Peterson v. State, Wyo.*, 586 P.2d 144 (1978). We hold that the [\*\*11] trial judge did not abuse his discretion by admitting the tape into evidence.

### III

After appellant's arrest for driving while under the influence of alcohol, Schofield asked him several times to take a breath test. The highway patrolman attempted to explain to appellant the implied consent law as follows:

"OFFICER SCHOFIELD: Okay, sir, under the Implied Consent Law of the State of Wyoming --

"MR. VROOMAN: I already know that.

"OFFICER SCHOFIELD: Okay. You are under arrest for driving under the influence --

"MR. VROOMAN: Okay.

"OFFICER SCHOFIELD: --of alcohol. Under the Implied Consent Law of the State of Wyoming, I am requesting that you take a chemical test to determine the degree of your intoxication. I request that you take a breath type test at the Sheriff's Office in Jackson. At your option and at your expense, you may have a blood test taken at the hospital. Okay?

"Your refusal to take this chemical test may result in your driving privileges being suspended for 30 days, regardless of whether you are convicted of the charge of D.W.U.I. If you are convicted, and you refuse this test, the suspension will be in addition to the driving under [\*\*12] the influence suspension.

"So what happens is, I am requesting that you take this test. If you refuse it, your driver's license may be suspended for 30 days. If convicted in Court after that, that suspension will also be added to the suspension for the conviction. Do you understand that?

"Mr. Vrooman: Oh yeh.

"OFFICER SCHOFIELD: Well, I just need an answer either yes or no if you will take the breath test. If you are not happy with the results of that test you can have a blood test taken at the hospital at your expense. Do you want to take either test?"

The implied consent law provides in part:

"(a) Any person who operates a motor vehicle upon a public street or highway is deemed to have given consent, subject to the provisions herein, to a chemical test of his blood, breath or urine for the purpose of determining the alcoholic content of his blood \* \* \* \*. The arrested person shall be told that his failure to submit to the chemical test may result in the suspension of his privilege to operate a motor vehicle. \* \* \* \*" § 31-6-102(a), W.S.1977.

"If a person under arrest refuses \* \* \* \* to submit to a chemical test \* \* \* \* none shall be given [\*\*13] \* \* \* ." § 31-6-102(c), W.S.1977.

In *State v. Marquez*, Wyo., 638 P.2d 1292 (1982), we said the arrested person should be told that his failure to submit to the chemical test may result in the suspension of his privilege to drive a motor vehicle. In *State v. Chastain*, Wyo., 594 P.2d 458 (1979), we held that failure to advise an arrested person of the implied consent law rendered the result of a blood-alcohol test inadmissible in court. Here appellant was properly advised of the implied consent law. Additionally, there was abundant, even overwhelming, evidence before the court from which the judge could have found the appellant guilty without the result of the breath test. There was evidence of excessive speed, erratic driving, a strong odor of alcohol, appellant's flushed face and slurred speech, and failure of a field sobriety test. Also, appellant failed the finger-to-nose test, failed to recite the alphabet and could not count to four on his fingers.

#### IV

Finally, appellant asserts that on appeal to the district court, Wyoming Rules of Appellate Procedure should have

been followed rather than Rules of Criminal Procedure for justice of the peace courts and municipal [\*\*14] courts. We decline to address [\*787] that issue, if it can be characterized as an issue in this case. Appellant has not briefed his fourth assignment of error, nor has he favored us with any argument in support of the alleged error.

Appellant maintains that he unsuccessfully attempted to invoke Rule 4.03, W.R.A.P. n4 in his appeal from the justice of the peace court to the district court. We do not understand appellant's complaint. Both the electronic tapes of the proceedings in the justice court and a transcript were before the district court on appeal. Additionally, the district court had the original exhibits, papers and documents that were before the justice court. The parties submitted briefs to the district court. Rule 4.03, supra, would only be applicable if a transcript or electronic recording were not available in an appeal. There is no merit to appellant's assignment of error Number IV.

n4 Rule 4.03, W.R.A.P.:

"If no report of the evidence or proceedings at a hearing or trial was made, or if a transcript is unavailable, the appellant may prepare a statement of the evidence or proceedings from the best available means, including his recollection. The statement shall be served on the appellee, who may serve objections or propose amendments thereto within ten (10) days after service. Thereupon the statement and any objections or proposed amendments shall be submitted to the district court for settlement and approval and as settled and approved shall be included by the clerk of the district court in the record on appeal."

Validity, Construction, and Application of Odometer Requirement Provisions of Motor  
Vehicle Information and Cost Savings Act (49 U.S.C.A. §§ 32701 to 32711)

Ann K. Wooster, J.D.

198 A.L.R. Fed. 255

**SUMMARY:**

In 1972, Congress enacted the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991, to prohibit tampering with odometers on motor vehicles and to establish safeguards for the protection of those persons who purchase vehicles having altered or reset odometers. At the time, some 17 states had enacted legislation to curb the practice of tampering with odometers, but states without such legislation had found this practice on the increase, especially when a neighboring state had an odometer law. By prohibiting the disconnecting or turning back of odometers, Congress believed the statute would establish a national policy against odometer tampering and prevent consumers from being victimized by such abuses. In 1994, Congress revised Title 49 of the United States Code, relating to transportation, and, as part of that revision, repealed 15 U.S.C.A. §§ 1981 to 1991 and recodified the provisions without substantive change at 49 U.S.C.A. §§ 32701 to 32711. On June 9, 1998, Congress enacted the Transportation Equity Act for the 21st Century, which added subsections to the disclosure requirements of the Act allowing an exemption for the transfer of "new motor vehicles," and allowing the Secretary of Transportation to exempt such classes or categories of vehicles as deemed appropriate from these requirements, such as vehicles with a gross weight of over 16,000 pounds, or vehicles 10 or more years old. For example, in *Mayberry v. Ememessay, Inc.*, 201 F. Supp. 2d 687, 198 A.L.R. Fed. 793 (W.D. Va. 2002), the court held that an automobile buyer could not demonstrate that the dealership intended to defraud the buyer with respect to the vehicle's mileage, precluding the buyer's civil action against the dealership for violation of 49 U.S.C.A. § 32705(a)(1), requiring the transferor of a motor vehicle to provide written, accurate disclosure of the mileage registered by the odometer on vehicle title. and other federal cases that have discussed the validity, construction, and application of the odometer requirements of the Act are collected in the following annotation.

[\*2] Background, summary, and comment

[\*2a] Generally

In 1972, Congress enacted the Motor Vehicle Information and Cost Savings Act (Act)<sup>n2</sup> to prohibit tampering with odometers on motor vehicles and to establish safeguards for the protection of those persons who purchase vehicles having altered or reset odometers.<sup>n3</sup> The legislative intent expressed in the statute emphasized the purchasers' reliance on odometer information,<sup>n4</sup> and although the Act does not rely exclusively on private actions by individual consumers for its enforcement, it clearly, like the Truth in Lending Act,<sup>n5</sup> contemplates actions by private attorneys general as a substantial enforcement tool.<sup>n6</sup> It has been held that the Act is remedial in nature and should be broadly construed to effectuate its purpose.<sup>n7</sup> In legislating against the practice of tampering with the odometers of motor vehicles, the Senate found such conduct to be both widespread and clearly fraudulent, stating that because consumers rely upon odometer readings as an index of the condition and value of motor vehicles, the proposed statute mandated a national policy against the disconnecting of, or the setting back of, odometers in order to defraud purchasers of motor vehicles. At the time, the Senate noted that some 17 states had enacted legislation to curb this practice. However, states without

such legislation had found this practice on the increase, especially when a neighboring state had an odometer law. Odometers were being turned back in states without odometer laws and then cars were marketed at inflated values in states with such laws. Thus, state odometer laws were easily circumvented and people in a state with such a law were suffering because of this practice.<sup>n8</sup> By prohibiting the disconnecting or turning back of odometers, the Act would establish a national policy against odometer tampering and prevent consumers from being victimized by such abuses.<sup>n9</sup> The House of Representatives was also convinced of the fraudulent nature of such conduct.<sup>n10</sup> In 1994, Congress revised Title 49 of the United States Code, relating to transportation, and as part of that revision it repealed the original provisions of the Act<sup>n11</sup> and recodified these provisions.<sup>n12</sup> Although the recodification included some revisions, Congress stated that it intended no substantive change of the Act.<sup>n13</sup> Subsequent amendments to the Act in 1996 were similarly not meant to effect a substantive change.<sup>n14</sup> However, on June 9, 1998, Congress enacted the Transportation Equity Act for the 21st Century,<sup>n15</sup> which added a subsection to the disclosure requirements excepting from such requirements the transfers of new motor vehicles from a vehicle manufacturer jointly to a dealer and a person engaged in the business of renting or leasing vehicles for a period of 30 days or less.<sup>n16</sup> Another subsection added to the Act's disclosure requirements in 1998 provided that: "The Secretary may exempt such classes or categories of vehicles as the Secretary deems appropriate from these requirements."<sup>n17</sup>

Prior to the enactment of this subsection, a number of courts had held that the Secretary of Transportation's regulatory exemptions to the disclosure requirements of the Act were invalid because unauthorized by Congress.<sup>n18</sup> Some courts, on the other hand, had held that such regulations were valid.<sup>n19</sup> It may be possible to waive the right to an exemption by providing a disclosure statement or odometer statement to purchasers.<sup>n20</sup> It has been held constitutional to apply the disclosure requirements of the Act to the transfer of motorcycles ( § 3). As for the federal Act's relationship with state law,<sup>n21</sup> courts have held that the Act does not preempt any state law dealing with odometer fraud ( § 4) or supersede a state common-law remedy for fraud ( § 5). One court has found that under a state's doctrine of offensive collateral estoppel, an automobile seller could be estopped from litigating the issue of his liability under the Act by a prior conviction under the Act arising out of tampering ( § 6). Courts have differed on the issue of whether dual damages may be awarded under state and federal law, with one court finding that under the principles of dual sovereignty, state consumer protection damages could be awarded in addition to civil penalties under the Act ( § 7[a]), but with other courts finding that duplicative damages could not be awarded under the Act and state unfair trade practices law, consumer protection law, or common law ( § 7[b]).

A violation of the Act by itself does not automatically lead to civil liability,<sup>n22</sup> but must be accompanied by a showing of a transferor's intent to defraud for a transferee to recover damages.<sup>n23</sup> Courts disagree over the proof required to show a transferor's intent to defraud, however. The majority view is that a transferor's constructive knowledge of odometer fraud, gross negligence, or reckless disregard may support a finding of an intent to defraud ( § 8[a]). The minority view is that a transferee must show that a transferor had actual knowledge of the odometer fraud involved to show the transferor's intent to defraud ( § 8[b]). A number of courts have further clarified that proof of a transferor's negligence alone will not support a finding of an intent to defraud ( § 8[c]). Some courts have held that a transferor's intent to defraud cannot be presumed, but may be inferred by courts from the surrounding facts ( § 9). An inference of a transferor's intent to defraud may be based on the seller's actual knowledge of a violation, according to a few courts ( § 10), although such an inference may be dispelled by evidence of no intent to defraud.<sup>n24</sup> Other courts have held or recognized that an inference of a transferor's intent to defraud may be based on the transferor's dominion over a vehicle ( § 11).

It has been held that in order to be found liable under the disclosure requirements of the Act,<sup>n25</sup> one must be a transferor.<sup>n26</sup> A transferor is someone who transfers an ownership interest in a motor vehicle, according to a number of courts ( § 12[a]). However, some courts have held that someone with a nonownership interest involved in fraudulent conduct may be considered a transferor for the purposes of the disclosure requirements ( § 12[b]). Generally, it has been held that the agent of a transferor cannot be found liable for a violation of the disclosure requirements ( § 13), but an automobile auction company may be liable as a transferor if it holds title to a vehicle, even for a brief period of time, held or recognized several courts ( § 14). A transferor must exercise reasonable care concerning the reliability of an

automobile's odometer or risk liability under the disclosure requirements, held or recognized some courts ( § 15). It has been held that a transferor's experience in car sales and a vehicle's unreasonably low mileage are relevant in assessing the reasonableness of the transferor's conduct under the disclosure requirements ( § 16). Under the disclosure requirements, held or recognized many courts, a transferor has an affirmative duty to inquire regarding the accuracy of an odometer reading ( § 17), and specific circumstances giving rise to such a duty to inquire may include unreasonably low mileage in relation to the year of the car, the condition of the tires, and the condition of the interior and exterior of the car ( § 18).

Absent knowledge to the contrary, a transferor may disclose the mileage registered on a vehicle's odometer and thus fulfill any obligation under the Act.<sup>n27</sup> However, courts have held or recognized that a transferor has a duty to disclose the fact that a vehicle's mileage is unknown ( § 19), and some courts have held that less than actual knowledge is sufficient to create a duty to disclose that the mileage of a vehicle is unknown under the disclosure requirements ( § 20). When a transferor knows the true mileage of a vehicle, on the other hand, application of the Act's disclosure requirements becomes less clear. For example, where the transferor knows that a vehicle's odometer has turned over and that the vehicle has actually traveled 100,000 miles in excess of the odometer reading, the Fourth Circuit Court of Appeals has held that the transferor has a duty to disclose the total mileage ( § 21[a]), while district courts in the Third and Seventh Circuits have held that a literal reading of the disclosure requirements of the Act creates no such duty to disclose the vehicle's total mileage ( § 21[b]). For the purposes of the disclosure requirements, it has been held that the ultimate purchaser of an automobile is the "transferee" ( § 22).

Other terms or provisions of the Act have been construed by the courts. For instance, the term "motor vehicle" has been construed to mean any vehicle driven or drawn by mechanical power for use in the public streets, roads, and highways, including a motorcycle ( § 23). The word "person" as used in various provisions of the Act has been held to mean and include corporations, companies, associations, firms, partnerships, societies, and joint stock companies, individuals, and transferors and transferees under the Act ( § 24). It has also been held that the word "person" includes agents of firms and corporations acting within the scope of their employment ( § 25). A criminal offense must include the element of knowing and willful violation of the Act,<sup>n28</sup> rather than an intent to defraud as required in civil actions.<sup>n29</sup> "Knowingly and willfully" has been held to mean an intentional violation of a known legal duty ( § 26). The provision for actual damages has been held to mean the difference between the fair market value of a vehicle with its actual miles and the amount paid for the vehicle by a purchaser, and may include other incidental expenses ( § 27). It has also been held that a consumer must show reliance on an odometer statement in order to show actual damages ( § 28), and that repairs occasioned by misrepresentation of the mileage of a vehicle may be included in actual damages ( § 29).

Private civil actions must be brought under the Act within two years of the time the fraud is discovered or should have been discovered by a purchaser, it has been held ( § 30). Courts disagree, however, over the persons against whom the statute of limitations runs upon actual or constructive discovery of the fraud. District courts in the Ninth and Tenth Circuits have held that the private civil statute of limitations in the Act runs against each purchaser who discovers or constructively discovers the fraud ( § 31[a]), while a Seventh Circuit district court has held that this statute of limitations runs against all potential purchasers at the time any person having standing to sue discovers or constructively discovers the violation, absent some act of fraudulent concealment ( § 31[b]). Based on the facts and circumstances of each case, courts have found claims brought under the Act to be time-barred by the two-year private civil statute of limitations ( § 32).

A party has been found by some courts to be a transferee under the private civil provisions of the Act, based on the facts and circumstances of each case ( § 33[a]), where the party was an auctioneer, a husband whose wife's name was used for the purposes of financing, an individual who obtained ownership of an automobile, or a customer who executed a purchase order and tendered a down payment for an automobile. Other courts have not found a party to be a transferee for the purposes of bringing a private civil action based on the facts of the case ( § 33[b]), where the party was a corporation that held a security interest in an automobile or a wife who cosigned loans and kept the ledger for an automobile business run as a sole proprietorship by her husband. In particular, courts have found, based on the facts and

circumstances of each case, that a subsequent transferor who violated the Act was barred from bringing a private civil action as a transferee ( § 34), and that an employee stated a cause of action as a transferee against an employer under the private civil provisions of the Act by alleging that the employer fired him for refusing to participate in an illegal scheme to set back odometers ( § 35). Courts have also determined when a party is a transferor for the purposes of a private civil action brought under the Act. It has been found, based on the facts and circumstances of each case, that a party was a transferor ( § 36[a]) where the party was an automobile leasing corporation, an automobile auctioneer, automobile dealership, a sole proprietor of an auto dealership, a corporate car dealer, a seller who held an ownership interest, or a seller who was the title holder but used an auction house. On the other hand, courts have found that the director and agent of a corporate seller, an employee of a used automobile dealer, the president-salesman of an automobile dealership, a bank to which a seller of a new car "assigned" a buyer's financing paper, an auction service, a seller of a used car to a dealer for resale, the manager of a car dealer, and the president, general manager, and agent of an automobile dealership were not transferors under the private civil provisions of the Act, based on the facts and circumstances of each case ( § 36[b]). Courts have recognized that under the civil provisions of the Act, a transferor's agent may be held liable for odometer fraud ( § 37). In addition, it has been found that a bank to which a seller of a new car "assigned" a buyer's financing paper and a father who held the title to an automobile that was under the sole control of his son were not owners of a vehicle for the purposes of the civil provisions of the Act, based on the facts and circumstances of each case ( § 38). Finally, courts have held or recognized that an absence of privity will not protect successive transferors from civil liability under the Act ( § 39).

A number of issues arise when multiple transferors are found liable under the civil provisions of the Act. There is conflict among the circuits as to whether such transferors should be held jointly and severally liable, or separately and individually liable, to a transferee. The circuits are fairly evenly split between these views, with the Sixth and Tenth Circuits holding that liability among multiple transferors is joint and several ( § 40), the Fourth, Fifth, and Eighth Circuits holding that such liability is separate and individual ( § 42). Seventh Circuit district courts appear to have supported both views without guidance from the Seventh Circuit Court of Appeals ( §§ 40, 42). Courts have respectively found that multiple transferors were jointly and severally liable ( § 41), or separately and individually liable ( § 43), under the private civil provisions of the Act. Seventh Circuit district courts appear similarly at odds regarding the issue of allowing cross-claims among multiple transferors, with an earlier case holding that such cross-claims may be brought ( § 44[a]) and a later case holding the opposite, along with two Tenth Circuit District Court decisions ( § 44[b]).

Regarding particular violations of the civil provisions of the Act, courts have discussed violations of the tampering provisions, based on the facts and circumstances of each case.<sup>n30</sup> Specifically, courts have found a violation of the tampering provisions due to the rolling back of a vehicle's odometer ( § 45[a]), have found no violation of the tampering provisions due to the rolling back of a vehicle's odometer ( § 45[b]), have found a rolling back of a vehicle's odometer with an intent to defraud ( § 45[c]), and have found a rolling back of a vehicle's odometer without an intent to defraud ( § 45[d]). Similarly, courts have determined that a defendant did not violate the tampering provisions by disconnecting a vehicle's odometer ( § 46[a]), and have determined that a defendant did not disconnect a vehicle's odometer with an intent to defraud ( § 46[b]). It has also been found that transferors did not violate the tampering provisions of the Act by conspiring to tamper with a vehicle's odometer ( § 47[a]), that transferors conspired to tamper with a vehicle's odometer with an intent to defraud a purchaser ( § 47[b]), and that transferors did not conspire to tamper with a vehicle's odometer with an intent to defraud a purchaser ( § 47[c]).

Particular violations of the service, repair, and replacement civil provisions of the Act have also been examined, based on the facts and circumstances of each case.<sup>n31</sup> It has been found that a transferor who failed to affix a notice of odometer repair in a vehicle as required violated the Act with an intent to defraud a purchaser ( § 48), but that automobile transferors did not conspire to repair broken odometers and thus did not violate the repair provisions ( § 49). A purchaser failed to prove that a transferor had replaced a vehicle's odometer, according to one court ( § 50). Courts have found that a transferor violated the Act with an intent to defraud a purchaser by failing to affix a notice of odometer replacement ( § 51[a]), and that a transferor violated the Act by failing to affix a notice of odometer

replacement, but did so without the requisite intent to defraud ( § 51[b]). A transferor who failed to reset a new odometer in a vehicle, while violating the Act, did not do so with an intent to defraud a purchaser as required to impose liability, determined two courts ( § 52). It has been found that a transferor did not violate the Act by failing to disclose that a vehicle's engine had been replaced ( § 53[a]), and that transferors of a vehicle did not violate the Act with an intent to defraud by failing to disclose that a vehicle's engine had been replaced ( § 53[b]). Transferors of a vehicle did not conspire to violate the Act with an intent to defraud by failing to disclose that the vehicle's engine had been replaced, it has been found ( § 54).

According to the Act, every seller of a motor vehicle must furnish to the buyer a written statement reciting the odometer reading at the time of transfer and the date of transfer and certifying the accuracy of the mileage recited.<sup>n32</sup> Although disclosure of a vehicle's cumulative mileage must be written in order to comply with the Act, evidence of an oral disclosure may be relevant in determining whether the seller had an intent to defraud the buyer of a used automobile.<sup>n33</sup> On the other hand, if a written disclosure form accurately reports the correct number of miles an automobile has traveled, it has been held that inaccurate oral misrepresentations to the contrary are not actionable when the disclosure form is presented to the transferee at the time of the transfer.<sup>n34</sup> One court has held that if the state where a motor vehicle is registered makes adequate provision for disclosure of odometer information on certificates of title, then the transferor is permitted to satisfy the disclosure requirements on the certificate of title, and a violation therefore is the failure to make accurate disclosure.<sup>n35</sup> Courts have also discussed particular civil violations of the disclosure requirements of the Act, based on the facts and circumstances of each case.<sup>n36</sup> It has been found that a transferor's failure to acquire a complete odometer statement for a vehicle meant for resale showed a violation with an intent to defraud under the disclosure requirements ( § 55). Some courts have found that a transferor was liable under the disclosure requirements of the Act for failing to provide a written odometer statement with an intent to defraud a purchaser ( § 56[a]), while other courts have found that a transferor violated the civil provisions by failing to provide a written odometer statement to a purchaser, but did not possess the requisite intent to defraud ( § 56[b]). It was found that a transferor and its agent did not violate the disclosure requirements by conspiring knowingly to give no odometer statement to a purchaser ( § 57). Courts have also found that a transferor's failure to provide a complete odometer statement to a purchaser did not violate these provisions ( § 58[a]), and that a transferor who violated the Act by failing to provide a complete odometer statement to a purchaser did not possess the requisite intent to defraud ( § 58[b]). It has been found that a transferor violated the disclosure requirements by failing to disclose a vehicle's true mileage to a purchaser ( § 59[a]), that an automobile seller did not violate the Act by failing to disclose a vehicle's true mileage to a purchaser ( § 59[b]), that a transferor who failed to disclose a vehicle's true mileage to a purchaser in violation of the Act did so with the requisite intent to defraud ( § 59[c]), and that a transferor who failed to disclose a vehicle's true mileage in violation of the Act was not liable due to the lack of an intent to defraud a purchaser ( § 59[d]). A transferor and its agent did not violate the Act by conspiring to give a false odometer statement to a purchaser, one court has determined ( § 60[a]). It has also been found, however, that transferors conspired to provide false odometer statements to a purchaser with an intent to defraud, in violation of the Act ( § 60[b]).

The auto dealer with expertise has an affirmative duty to mark "true mileage unknown" if, in the exercise of reasonable care, the dealer would have reason to know that the mileage was more than that which the odometer had recorded or which the previous owner had certified.<sup>n37</sup> Making affirmative claims about the mileage of a used vehicle without knowledge is either intentionally deceitful or reckless, and thus, violates the Act.<sup>n38</sup> Continuing to discuss particular civil violations of the disclosure requirements of the Act, based on the facts and circumstances of each case, courts have found that a transferor's failure to disclose that the true mileage of a vehicle was unknown violated the Act ( § 61[a]), that the seller of an automobile did not violate the Act by failing to disclose to a purchaser that the vehicle's true mileage was unknown ( § 61[b]), that failure to disclose to a purchaser that the true mileage of a vehicle was unknown resulted in a transferor's violation of the Act with an intent to defraud ( § 61[c]), and that a transferor did not violate the Act with an intent to defraud a purchaser by failing to disclose that the true mileage of a vehicle was unknown ( § 61[d]). Courts have determined that the seller of an automobile did not violate the disclosure requirements by making a false oral statement regarding the vehicle's mileage to a purchaser ( § 62[a]), and that a transferor who violated the Act by making a false oral statement regarding a vehicle's mileage did so with an intent to defraud a purchaser ( § 62[b]).

A number of remedies are available to a prevailing purchaser under the private civil provisions of the Act, including damages. It has been held that a consumer need not show reliance on an odometer statement to prove a violation of the Act, but must show reliance to recover actual damages.<sup>n39</sup> Based on the facts and circumstances of each case, courts have awarded treble actual damages in civil actions brought by private persons under the Act<sup>n40</sup> ( § 63[a]), and in one case, a court determined that such damages should not be awarded ( § 63[b]). It has been held that an award of treble damages under the Act does not preclude an award of prejudgment interest on the amount of actual damages.<sup>n41</sup> Some courts have held that the Act does not require an automobile purchaser to be financially hurt as a prerequisite to recovery, and that in the absence of actual damages, the statute provides an alternative recovery of \$ 1,500,<sup>n42</sup> but one court has indicated that some showing of actual damage may be necessary for a court to award the statutory minimum.<sup>n43</sup> Based on the facts and circumstances of each case, courts have awarded a prevailing purchaser the statutory minimum damages of \$ 1,500 under the civil provisions of the Act ( § 64[a]), and one court determined that such an award was not justified ( § 64[b]). It has also been found that buyers were entitled to recover the expense of having a vehicle checked for odometer tampering under the Act ( § 65). Some courts have held that a transferor found liable may recoup damages or seek contribution from other transferors found liable for the same odometer fraud under the Act ( § 66[a]), but others have held that such recoupment or contribution is not allowed ( § 66[b]).

Another remedy available to a prevailing purchaser under the private civil provisions of the Act is attorney's fees.<sup>n44</sup> Based on the facts and circumstances of each case, courts have affirmed on appeal an award of attorney's fees to a plaintiff ( § 67[a]), reduced on appeal an award of attorney's fees to a plaintiff ( § 67[b]), awarded the requested amount of attorney's fees to a plaintiff at trial ( § 67[c]), reduced at trial the amount of attorney's fees requested by a plaintiff ( § 67[d]), and awarded the plaintiff attorney's fees in an amount determined at trial ( § 67[e]). Courts have awarded attorney's fees to a plaintiff in a private civil action for appeal efforts under the Act ( § 68), and have awarded attorney's fees to a plaintiff for attorney efforts made during a second trial ( § 69). Attorney's fees were not awarded, however, to a defendant ( § 70) or a third party ( § 71) in a private civil action brought under the Act, based on the facts and circumstances of each case.

Equitable remedies have also been found available to a prevailing purchaser in a private civil action brought under the Act. It has been found, based on the facts and circumstances of each case, that the equitable remedy of rescission could be ordered under the Act ( § 72), and that the equitable remedy of restitution could be ordered where a vehicle transferor was found liable ( § 73).

The Act also provides for civil actions to be brought by a state's attorney general.<sup>n45</sup> It has been found that a violation of the Act occurred in a particular state for the purposes of an attorney general civil action ( § 74), and that circumstantial evidence of the situs of a violation was sufficient for such an action ( § 75), based on the facts and circumstances of each case. Although one court has held that the two-year statute of limitations period on civil suits brought by a state attorney general under the Act runs upon the attorney general's actual or constructive discovery of the fraud ( § 76[a]), another court has held that the statute of limitations in such an action runs upon the purchaser's actual or constructive discovery of the fraud ( § 76[b]). Based on the facts and circumstances, it has been found in a civil action that purchasers represented by a state attorney general were transferees under the Act ( § 77), and that transferors were jointly and severally liable for violations of the Act in a civil action brought by a state's attorney general ( § 78). Particular violations of the Act in civil actions brought by a state's attorney general have been discussed by the courts, based on the facts and circumstances of each case. For example, it has been found that a transferor rolled back the odometer of a vehicle in violation of the tampering provisions with the requisite intent to defraud ( § 79), and that transferors conspired, with an intent to defraud, to roll back the odometers of high-mileage vehicles in violation of the tampering provisions ( § 80). Courts have also found in a civil suit brought by a state attorney general that a transferor who failed to disclose the true mileage of a vehicle violated the disclosure provisions with an intent to defraud ( § 81). It has been held in a civil action brought by a state's attorney general that the disclosure requirements prohibit a transferor from making a false statement to a transferee regarding a vehicle's mileage ( § 82). The same remedies available in a private civil action are available to a state attorney general in a civil action.<sup>n46</sup> It has been found that a

state attorney general in a civil action could recover the minimum statutory penalty of \$ 1,500 for each violation of the Act proven, based on the facts and circumstances ( § 83). The equitable remedy of restitution was not ordered in a civil action brought by a state attorney general for a violation of the Act, based on the facts and circumstances ( § 84).

Under the Act, a person that knowingly and willfully violates the statute or a regulation prescribed or order issued under the statute will be held criminally liable, and shall be fined under Title 18, imprisoned for not more than three years, or both.<sup>n47</sup> It has been found, based on the facts and circumstances, that subpoenas for the production of business records related to criminal violations of the Act should be enforced ( § 85), and that subpoenas for the production of odometer statements related to criminal violations of the Act should also be enforced ( § 86). Courts have found that the seller of an automobile was a transferor for the purposes of a criminal action brought under the Act ( § 87[a]), and that the seller of an automobile was not a transferor for the purposes of a criminal action ( § 87[b]), based on the facts and circumstances of each case. It has been held that a corporation may be responsible under the Act when two or more high-ranking or authoritative agents engage in a criminal conspiracy on its behalf ( § 88). Particular criminal violations of the Act have been examined by the courts. Regarding violations of the tampering provisions, courts have upheld convictions for rolling back vehicle odometers ( § 89), have upheld convictions for conspiring to roll back odometers ( § 90), have upheld a conviction for disconnecting a vehicle's odometer ( § 91), and have overturned a conviction for conspiring to disconnect a vehicle's odometer ( § 92), based on the facts and circumstances in each case. As for criminal violations of the disclosure requirements, based on the facts and circumstances of each case, a number of courts have upheld convictions for a transferor's failure to disclose the true mileage of a vehicle ( § 93[a]), while one court has overturned a conviction for a failure to disclose the true mileage of a vehicle because the defendant was not a transferor under the Act ( § 93[b]). There are statutory penalties available in a criminal action brought under the Act, rather than the remedies available in civil actions brought under the Act.<sup>n48</sup> Based on the facts and circumstances, one court affirmed on appeal a fine of \$ 70,000 imposed on a transferor convicted of violating the criminal provisions of the Act ( § 94), and the same court affirmed on appeal a prison sentence imposed on the transferor of three years in prison ( § 95).

[\*2b] Practice pointers

The weakness of the Motor Vehicle Information and Cost Savings Act (Act) is the difficulty of proof: it requires proof of a civil defendant's intent to defraud.<sup>n49</sup> Courts are divided as to whether a purchaser must show actual knowledge or whether constructive knowledge is sufficient. That is, if a seller does not actually tamper with the odometer but should reasonably know from the circumstances that tampering occurred, does that seller intend to deceive the purchaser when it certifies that the odometer is correct? A motor vehicle purchaser might be able to circumvent the problems of proof posed by the Act by stating an additional claim for relief for odometer tampering under a state Consumer Protection Act, which may not require proof of intent to defraud.<sup>n50</sup> It has been held that the public interest in compliance with the disclosure requirements of the Act may be protected by injunctive relief under § 32709, without regard to the defendant's intent,<sup>n51</sup> but relief in damages for private actions requires the greater showing of an intent to defraud the purchaser.

A purchaser must plead an intent to defraud under the Act with sufficient particularity, or risk having the complaint dismissed, under *Fed. R. Civ. P. 9(b)*.<sup>n52</sup> Courts have held that the burden is on the purchaser to prove fraudulent tampering by a preponderance of the evidence,<sup>n53</sup> but the mere fact that the Act requires proof of fraudulent intent is not enough to require application of the clear and convincing evidence standard.<sup>n54</sup> Counsel should be cognizant that it has been held that in an action involving multistate contracts in connection with the sale of a vehicle having an illegally altered odometer, venue may be properly laid in the federal district where the "claim arose," which district may be where resales occurred and where the ultimate purchaser allegedly sustained damages as the result of the alteration, even if the defendant neither resides nor does business in such district.<sup>n55</sup> The Act does not have a specific venue provision and therefore 28 U.S.C.A. § 1391(b) is the appropriate venue determination statute, providing that in actions brought to recover damages for violation of a federal statute, venue is proper only in the district where all defendants reside or in the district in which the claim arose.<sup>n56</sup> Although the Act provides that the court "shall award costs and a

reasonable attorney's fee to the person when a judgment is entered for that person,"<sup>n57</sup> the courts have generally recognized that the amount of attorney's fees awarded is discretionary,<sup>n58</sup> and contrary to the mandatory language of the statute, one court has suggested that whether to award attorney's fees might be discretionary.<sup>n59</sup> In particular, one court has held that court-appointed counsel fees could be awarded since the defendant assumed liability for such fees in some settlement agreements.<sup>n60</sup> It has been held that the court must provide a concise, clear explanation of its reasons for an award of attorney's fees.<sup>n61</sup> The Act provides that an award of attorney's fees shall be for a "reasonable" amount, but does not set forth any other guidance to the federal courts as to the calculation of a reasonable fees award.<sup>n62</sup> Therefore, federal courts have looked to other opinions calculating reasonable attorney's fees under other federal statutes.<sup>n63</sup> Several courts have indicated that a successful litigant must make an explicit attorney's fees request to secure the requested award amount.<sup>n64</sup> When a defendant is excluded from liability under the Act, a finding of liability on all other causes of action may support a determination that the defendant is equally liable for the attorney's fees of the buyer.<sup>n65</sup> While a few courts have held that punitive damages may be awarded under the Act even though the Act does not include a provision for such damages,<sup>n66</sup> another court has held that punitive damages may not be awarded in addition to the statutory treble damages,<sup>n67</sup> and the silence of all other courts on this issue would seem to indicate that punitive damages are generally not requested or awarded under the Act. The court must award costs to a purchaser who prevails in an odometer fraud claim under the Act.<sup>n68</sup> The issue of dischargeability of debt resulting from a violation of the Act has been considered by bankruptcy courts. One court determined that attorney's fees assessed against a bankrupt defendant for odometer fraud were dischargeable under the former Bankruptcy Act, inasmuch as attorney's fees would not be available to a plaintiff in a common-law action for fraud, but that a treble damages penalty was nondischargeable in bankruptcy.<sup>n69</sup> However, another court has held that the knowing submission by a Chapter 7 debtor of a false odometer statement constituted actual fraud under *11 U.S.C.A. § 523(a)(2)(A)*, and that the debt for \$ 2,000 incurred thereby was nondischargeable, but that the tripling of the amount owed under *15 U.S.C.A. § 1989* was a statutory penalty and was dischargeable.<sup>n70</sup> As recognized by Congress, the reading on an odometer communicates vital information concerning the value of a motor vehicle, and although in enacting the statute, Congress explicitly referred only to purchasers, both purchasers and manufacturers necessarily rely on the information conveyed by a reading of an odometer.<sup>n71</sup> It has been held that to alter or disconnect an odometer, so as to understate the number of miles actually traveled, is to make a nonverbal false statement about the value of the vehicle, and a violation of the statute against such tampering is, by its nature, a crime involving "dishonesty or false statement," for the purposes of *Fed. R. Evid. 609(a)(2)*,<sup>n72</sup> and a general release from liability obtained by an automobile dealer will be null and void with respect to the customer's claims under the Act, held one court.<sup>n73</sup>

## [\*II] VALIDITY OF ACT

### [\*3] Constitutionality of applying statute to motorcycles

It has been held that the odometer alteration disclosure requirement of the Motor Vehicle Information and Cost Savings Act, *49 U.S.C.A. § 32704*, is not so vague and uncertain as to be unconstitutional as applied to motorcycles.

Rejecting the contention that the odometer alteration disclosure requirement of *15 U.S.C.A. § 1987* (now *49 U.S.C.A. § 32704*) was so vague and uncertain as to be unconstitutional as applied to motorcycles, the court held in *Grambo v. Loomis Cycle Sales, Inc.*, *404 F. Supp. 1073 (N.D. Ind. 1975)*, that although the statute required a notice to be attached to the left door frame of a vehicle when the odometer was serviced, repaired, or replaced, a reasonable person would know that to satisfy the disclosure requirements as to motorcycle odometers, they would only need to hang a tag on the motorcycle to place potential purchasers on notice of an alteration in the mileage registered on the odometer.

## [\*III] CONSTRUCTION OF ACT

## [\*A] Relationship with State Law

## [\*4] Effect on state law -- Odometer fraud

It has been held that the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32711, does not preempt any state law dealing with odometer fraud.

The court in *Glover v. General Motors Corp.*, 959 F. Supp. 332 (W.D. Va. 1997), held that the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32701 et seq., does not preempt any state law dealing with odometer fraud, under 49 U.S.C.A. § 32711.

## [\*5] Common-law fraud

It has been held that the provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, do not supersede a state common-law remedy for fraud.

The court of appeals in *Edgar v. Fred Jones Lincoln-Mercury of Oklahoma City, Inc.*, 524 F.2d 162 (10th Cir. 1975), held that the provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), do not supersede a state common-law remedy for fraud. The court stated that the language of 15 U.S.C.A. § 1991 (now 49 U.S.C.A. § 32711), which provided that state law was not altered or affected "except to the extent that those laws are inconsistent with any provision of this subchapter and then only to the extent of the inconsistency," referred to state statutes dealing with odometer tampering, not fraud remedies, and observed that the legislative history clearly showed that the congressional concern had to do with state provisions that were less stringent than the federal law.

## [\*6] Collateral estoppel

Based on the facts and circumstances presented, it was found that under a state's doctrine of offensive collateral estoppel, an automobile seller was estopped from litigating the issue of his liability under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710, by a prior conviction under the Act arising out of tampering.

Under Kentucky's doctrine of offensive collateral estoppel, found the court in *May v. Oldfield*, 698 F. Supp. 124 (E.D. Ky. 1988), a used car salesman accused by a buyer of altering an automobile's odometer was estopped from litigating the issue of his liability by virtue of his prior conviction of mail fraud arising out of tampering with the same odometer, under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710). The court noted that the issue of alteration of the odometers was identical in both cases, and the jury in the prior criminal action was required to apply a higher burden of proof than that applicable to a civil action; the fact that the car buyer had not been party to the previous criminal prosecution did not preclude application of the doctrine of offensive collateral estoppel.

## [\*7] Dual damages under state and federal laws

## [\*7a] Awarded

Under the principles of dual sovereignty, it has been found that state consumer protection damages could be awarded in addition to civil penalties under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances.

Under the principles of dual sovereignty, Maryland's attorney general could recover a civil fine of \$ 10,200, the maximum allowable under that state's Consumer Protection Act, Md. Code Ann., Commercial Law, § 13-410, for

odometer tampering and related conduct in addition to civil penalties under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), determined the court in *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989).

\*\*\*\* Comment:

n74 n75 In so finding, the court in acknowledged the policy against duplicative punishment that appears in antitrust cases that have held that an award of treble damages is partially compensatory and partially punitive and therefore duplicative of a punitive damage award. The instant case was distinguishable, noted the court, because the state of Maryland and its attorney general were requesting a state law fine, as opposed to punitive damages, for the victims under state common law. Under principles of dual sovereignty, a state in furtherance of its public policy may punish an individual for conduct that also gives rise to punitive remedies for victims under a separate federal statute. The court therefore permitted the attorney general to recover for consumers the \$ 1,500 for each violation of federal law and at the same time recover civil penalties under state statutory law.

[\*7b] Not awarded

The courts below found, based on the facts and circumstances of each case, that damages could not be awarded under both state law and the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a).

A used car buyer who was entitled to damages from a dealer for odometer disclosure violations under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(a)), was not entitled to a duplicative award for the same violations based on state unfair trade practices and consumer protection law under La. Rev. Stat. Ann. §§ 51:1401 et seq., 51:1408, found the court in *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987).

Automobile buyers sued the seller of the automobile, the original owner, and others in the chain of title for fraudulent rollback of the odometer mileage, and the court in *Rice v. Gustavel*, 891 F.2d 594 (6th Cir. 1989), determined that the buyers were entitled to treble damages under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(a)), but that the buyers were not entitled to additional compensatory and punitive damages under their common-law fraud claims.

[\*B] Construction of Particular Terms

[\*1] Intent to Defraud Requirement

[\*8] Proof of intent to defraud

[\*8a] Constructive knowledge, gross negligence, or reckless disregard

Under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., held or recognized the courts in the cases that follow, in order to prove a seller's intent to defraud, a purchaser need only show that the seller acted with constructive knowledge, gross negligence, or reckless disregard.

Although there is no First Circuit law on the construction of the phrase "intent to defraud" under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), held the court in *Universal Underwriters Ins. Co. v. Bob Brest Buick, Inc.*, 1992 WL 129602 (D. Mass. 1992), under the majority view, purchasers need not prove either that the defendants acted willfully or with specific, actual intent to deceive, but proof that the

defendants acted with reckless disregard or gross negligence is sufficient to establish liability under the Act. As construed by the courts, the phrase "intent to defraud" is a term of art meaning something less than or different from common-law fraud, explained the court.

Insertion of the "intent to defraud" requirement in the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), providing a remedy of damages against persons who violate the Act, in no way compels the requirement of an "actual knowledge" standard, held the court in *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977); recklessness is sufficient to meet the intent to defraud requirement. The common-law principle that actual knowledge is required if punitive or exemplary damages are to be awarded in a fraud action is not applicable where an action is based on remedial legislation, reasoned the court.

Constructive knowledge, recklessness, or even gross negligence in determining and disclosing the actual mileage traveled by a vehicle may be sufficient to support a finding of an intent to defraud under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), held the court in *Auto Sport Motors, Inc. v. Bruno Auto Dealers, Inc.*, 721 F. Supp. 63 (S.D. N.Y. 1989).

The majority view is that a seller of a used car reporting that the mileage shown on the odometer is true may be held liable in the absence of actual knowledge that an odometer reading is false if the seller reasonably should have known that the odometer reading was incorrect, held the court in *Ralbovsky v. Lamphere*, 731 F. Supp. 79 (N.D. N.Y. 1990); gross negligence or acting with reckless disregard for the truth in certifying that the reading of an odometer is true may be sufficient to infer intent to defraud as a matter of law, recognized the court.

In an action brought pursuant to the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), an automobile purchaser must prove that the seller violated the statute with an intent to defraud, but the purchaser need not show actual knowledge, held the court in *Daluz v. Acme Auto Body & Sales, Inc.*, 814 F. Supp. 242 (D. Conn. 1992); rather, the purchaser may prevail by showing that the seller's statements were made recklessly or carelessly, without knowledge of their truth or falsity, or without reasonable grounds for belief in their truth.

Reckless disregard for the basic purpose of the Motor Vehicle Information and Cost Savings Act (Act) as well as the Act's specific requirement, 15 U.S.C.A. § 1988(a)(2) (now 49 U.S.C.A. § 32705(a)(1)(B)), may rise to the level of fraudulent intent and render an automobile seller liable under the Act, held the court in *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977).

Constructive knowledge, recklessness, or even gross negligence in determining and disclosing the actual mileage traveled by a vehicle will support a finding of "intent to defraud" under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), stated the Fourth Circuit Court of Appeals in *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979).

Intent to defraud may be found under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), even without proof of actual knowledge that a mileage disclosure was false, held the court in *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987), since the mere reliance on an odometer reading, in the face of other readily ascertainable information from the title and condition of a vehicle, constitutes reckless disregard rising to the level of an intent to defraud as a matter of law under the Act.

Actual knowledge of tampering with an odometer is not required in order for a dealer to be held liable under the federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (49 U.S.C.A. § 32705), held the court in *Oettinger v. Lakeview Motors, Inc.*, 675 F. Supp. 1488 (E.D. Va. 1988), but rather, constructive knowledge, recklessness, or even gross negligence in determining and disclosing a car's actual mileage are sufficient to support a finding that a dealer acted with an intent to defraud.

In *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), the court recognized that in a suit for violations of the Federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), an intent to defraud may be shown by a transferor's reckless disregard.

In *Nieto v. Pence*, 578 F.2d 640 (5th Cir. 1978), the court held that a vehicle transferor who lacks actual knowledge of the accuracy of an odometer reading at the time of sale may still be found to have intended to defraud and thus may be civilly liable for a failure to disclose that the actual mileage is unknown under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), if the transferor reasonably should have known that the odometer reading was incorrect. Although the transferor at the time of sale did not know to a certainty that the transferee would be defrauded, the court may infer that the transferor understood the risk of such an occurrence, stated the court. Moreover, continued the court, unless a violation of the Act can lead to civil liability, the Act is toothless. Even though the United States Attorney General can petition for injunctive relief when the transferor lacks an intent to defraud, noted the court, such relief, although theoretically available, is unlikely. Private prosecution is needed to make the Act effective, opined the court.

A vehicle transferor who lacks actual knowledge of the accuracy of an odometer reading may still be found to have intended to defraud and thus may be civilly liable for failure to disclose that actual mileage is unknown under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), held the Fifth Circuit Court of Appeals in *Bolton v. Tyler Lincoln-Mercury, Inc.*, 587 F.2d 796 (5th Cir. 1979). If the transferor reasonably should have known that the odometer reading was incorrect, although he or she did not know to a certainty that the transferee would be defrauded, the court may infer that the transferor understood the risk of such an occurrence, explained the court.

For the purposes of the section of the Motor Vehicle and Cost Savings Act prohibiting the knowing giving of a false statement to a transferee, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), held the district court in *Pepp v. Superior Pontiac GMC, Inc.*, 412 F. Supp. 1053 (E.D. La. 1976), evidence of negligence, especially if gross, might sustain an inference of fraud.

Actual knowledge that an odometer reading is incorrect is not necessary to prove an intent to defraud, and constructive knowledge is sufficient to create liability under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), stated the court in *Marcel v. Zamin*, 1990 WL 170130 (E.D. La. 1990).

\*\*\*\* Comment:

To the same effect as *Marcel v. Zamin*, 1990 WL 170130 (E.D. La. 1990), see *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987); *Marcel v. Zamin*, 1990 WL 150123 (E.D. La. 1990).

\*\*\*\* Caution:

A Fifth Circuit District Court has held that there is no legislative history requiring an interpretation of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), so that constructive knowledge of an intent to defraud is sufficient to show a violation of the Act where only a rule or regulation has been violated, in *Leslie v. George Thompson Ford, Inc.*, 484 F. Supp. 954 (N.D. Ga. 1979). See § 8[b].

In *Berns v. Ginn*, 1986 WL 6150 (S.D. Ohio 1986), the court recognized that gross negligence or disregard in preparing an odometer disclosure statement may support an inference of a seller's intent to defraud under the Motor Vehicle Information and Cost Savings Act (Act).

\*\*\*\* Caution:

A later Sixth Circuit Court of Appeals case and two earlier district court cases have held that a willful violation of the Act with specific intent to deceive a purchaser is necessary to support an inference of an intent to defraud. See § 8[b].

The court in *Jones v. Hanley Dawson Cadillac Co.*, 848 F.2d 803 (7th Cir. 1988), appeared to recognize in dictum that constructive knowledge, recklessness, or even gross negligence in determining and disclosing the actual mileage traveled by a vehicle may be sufficient to support a finding of intent to defraud under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710).

\*\*\*\* Comment:

To the same effect as *Jones v. Hanley Dawson Cadillac Co.*, 848 F.2d 803 (7th Cir. 1988), see *Weatherby v. J.J. Wright Oldsmobile, Inc.*, 1986 WL 2610 (N.D. Ill. 1986); *Mid-City Enterprises, Inc. v. Huffman*, 1989 WL 8815 (N.D. Ill. 1989); *Resendiz v. Eatinger*, 1990 WL 84527 (N.D. Ill. 1990); *Joe Madden Ford, Inc v. Bickel*, 1996 WL 432408 (N.D. Ill. 1996).

Under federal odometer fraud law, the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), a vehicle purchaser does not have to prove that a seller actually knew that it was supplying false or inaccurate information, and the transferor cannot insulate itself from liability by deliberately blinding itself to facts, held the court in *Ray Kim Ford, Inc. v. Daoud*, 750 F. Supp. 327 (N.D. Ill. 1990), but rather, a purchaser can prevail when the transferor's failure to comply with the requirements of the Act is due to reckless disregard for the facts or even gross negligence.

\*\*\*\* Caution:

An earlier Seventh Circuit district court decision in *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976), see § 8[b], supports the opposing view that the intent to defraud required by the Act must be inferred from actual knowledge of a false odometer setting. This decision has not been overruled by the Seventh Circuit Court of Appeals, and has been cited as support by other circuits holding that actual knowledge rather than constructive knowledge is required to show an intent to defraud.

In *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983), the court reasoned that if a person lacks knowledge that an odometer disclosure statement is false only because the person displays a reckless disregard for the truth, a fact-finder can reasonably infer that the violation was committed with an intent to defraud a purchaser under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.).

If a person lacks knowledge that an odometer disclosure statement is false only because the person displays a reckless disregard for the truth, the fact-finder can reasonably infer that a violation was committed with an intent to defraud, so as to give rise to liability under the federal odometer law, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710), stated the appeals court in *Huson v. General Motors Acceptance Corp.*, 108 F.3d 172 (8th Cir. 1997).

\*\*\*\* Comment:

To the same effect as *Huson v. General Motors Acceptance Corp.*, 108 F.3d 172 (8th Cir. 1997), see *Duval v. Midwest Auto City, Inc.*, 425 F. Supp. 1381 (D. Neb. 1977), judgment aff'd on other grounds, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978); *Busalacchi v. Williamson*, 670 F. Supp. 272 (E.D. Mo. 1987).

The "intent to defraud" required for a violation of the federal odometer tampering statute, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), includes action taken with reckless disregard, as well as action taken with the specific intent to deceive or cheat potential purchasers, held the court in *Haynes v. Manning*, 917 F.2d 450 (10th Cir. 1990).

A transferor need not have actual knowledge that an odometer statement is false before liability may be imposed under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, but rather, an intent to defraud may be inferred if the transferor lacks such knowledge only because he or she displays a reckless disregard for the truth or because the transferor closes his or her eyes to the truth, concluded the court in *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998).

\*\*\*\* Comment:

To the same effect as *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998), see *Haynes v. Manning*, 917 F.2d 450 (10th Cir. 1990); *Jenson v. CS & T Body & Paint of Salt Lake, Inc.*, 9 F.3d 117 (10th Cir. 1993) (not designated for publication); *Lavery v. R-K Leasing*, 19 F.3d 33 (10th Cir. 1994) (not designated for publication); *Charnetsky v. Gus Paulos Chevrolet, Inc.*, 754 F. Supp. 188 (D. Utah 1991); *Mayberry v. Said*, 911 F. Supp. 1393 (D. Kan. 1995).

[\*8b] Actual knowledge

In the following cases, the courts held or recognized that a purchaser must prove a seller's intent to defraud under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., by showing that the seller had actual knowledge of the violation involved.

A Fifth Circuit district court in *Leslie v. George Thompson Ford, Inc.*, 484 F. Supp. 954 (N.D. Ga. 1979), recognized that actual knowledge of a violation of a rule or regulation promulgated under the Motor Vehicle Information and Cost Savings Act (Act) is necessary to show an intent to defraud.

\*\*\*\* Caution:

However, other Fifth Circuit cases, including the Court of Appeals, have held that constructive knowledge of a violation of the Act itself is sufficient to prove an intent to defraud. See § 8[a].

In order to state a claim under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), there must be an intent to defraud, and Sixth Circuit case law defines intent to defraud as a "willful" act done with specific intent to deceive a purchaser of the mileage on a car, stated the court in *Paul's Auto World v. Boyd*, 881 F.2d 1077 (6th Cir. 1989) (not designated for publication).

Constructive knowledge of the inoperative condition of an odometer is insufficient to draw an inference of fraudulent intent under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(b) (now 49 U.S.C.A. § 32705), recognized the court in *Clayton v. McCary*, 426 F. Supp. 248 (N.D. Ohio 1976).

Intent to defraud within the purview of the odometer requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710), means to act willfully and with specific intent to deceive any purchaser or potential purchaser of a motor vehicle who inspects the odometer of a motor vehicle as an index of the condition and value of such vehicle, stated the court in *Shipe v. Mason*, 500 F. Supp. 243 (E.D. Tenn. 1978), aff'd without reported opinion, 633 F.2d 218 (6th Cir. 1980). The salient showing is that the seller acted with the intent to defraud, not that anyone was actually defrauded, noted the court.

\*\*\*\* Caution:

A Sixth Circuit district court in *Berns v. Ginn*, 1986 WL 6150 (S.D. Ohio 1986), recognized that gross negligence or disregard in preparing an odometer disclosure statement may be sufficient to support an inference of an intent to defraud

under the Act. See § 8[a].

Intent to defraud required by the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1988(b), 1989(a), 1990 (now 49 U.S.C.A. §§ 32705, 32709, 32710), must be inferred from actual knowledge of a false odometer setting, not constructive knowledge, held the court in *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976). If it is assumed that the intent to defraud required by § 1989(a) may be presumed from a finding of actual knowledge of odometer alteration, a question would nevertheless remain as to whether an intent to defraud can be based solely upon a finding of constructive knowledge that is all that seems to be required for a violation of § 1988(b), observed the court. The better view would seem to be that actual knowledge is necessary to support an inference of intent to defraud and, correspondingly, recovery under § 1989(a), held the court. Such a ruling does not render § 1988(b)'s proscription of constructive knowledge a nullity, as it would seem that a suit by the attorney general to enjoin violations of that section would lie under § 1990 of the Act, concluded the court.

\*\*\*\* Caution:

The Seventh Circuit Court of Appeals in *Jones v. Hanley Dawson Cadillac Co.*, 848 F.2d 803 (7th Cir. 1988), later appeared to hold that constructive knowledge may be sufficient to show an intent to defraud under the Act, and a string of later district court cases from the Seventh Circuit "followed" this decision. See § 8[a]. The Seventh Circuit Court of Appeals has not spoken on this issue since .

<>

To prevail on private cause of action under Federal Odometer Act, automobile owner must show that defendant intended to defraud owner with respect to a vehicle's mileage or odometer reading. 49 U.S.C.A. § 32710(a). *Lewis v. Horace Mann Ins. Co.*, 410 F. Supp. 2d 640 (N.D. Ohio 2005).

[\*8c] Negligence

The courts in the following cases held or recognized that, under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, proof of a transferor's negligence alone will not support a finding of an intent to defraud.

Mere negligence may be insufficient to sustain an award of damages in an action brought under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), held the court in *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977).

Negligence alone does not support a finding that the Motor Vehicle and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), has been violated, held the court in *Pepp v. Superior Pontiac GMC, Inc.*, 412 F. Supp. 1053 (E.D. La. 1976), and the word "knowingly" does not require a defendant to exercise every possible precaution.

While it is true that a court may infer an intent to defraud from a defendant's negligent actions, negligence alone is not enough to support a finding of liability under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), held the court in *Hill v. Bergeron Plymouth Chrysler, Inc.*, 456 F. Supp. 417 (E.D. La. 1978).

Plain and ordinary meaning of the phrase "intent to defraud" in the civil liability provision of the Odometer Act of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), envisions misconduct more invidious than mere negligence, stated the court in *Jones v. Hanley Dawson Cadillac Co.*, 848 F.2d 803 (7th Cir. 1988).

Under federal odometer fraud law, the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), held the court in *Ray Kim Ford, Inc. v. Daoud*, 750 F. Supp. 327 (N.D. Ill. 1990), mere negligence is not sufficient to suggest an intent to defraud such that civil liability can be imposed under the Act.

\*\*\*\* Comment:

To the same effect as *Ray Kim Ford, Inc. v. Daoud*, 750 F. Supp. 327 (N.D. Ill. 1990), see *Team Food Service, Inc. v. Francis Cadillac, Inc.*, 1988 WL 74730 (N.D. Ill. 1988); *Mid-City Enterprises, Inc. v. Huffman*, 1989 WL 8815 (N.D. Ill. 1989); *Joe Madden Ford, Inc v. Bickel*, 1996 WL 432408 (N.D. Ill. 1996).

Mere negligence in completing the required odometer statements will not lead to liability under the federal odometer law, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710), stated the Eighth Circuit Court of Appeals in *Huson v. General Motors Acceptance Corp.*, 108 F.3d 172 (8th Cir. 1997).

The court in *Lavery v. R-K Leasing*, 19 F.3d 33 (10th Cir. 1994) (not designated for publication) held that it did not believe that an intent to defraud under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), could be inferred from simple negligence. The Act does not impose liability on a negligent transferor, stated the court.

Simple negligence is not sufficient to impose liability under the odometer requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, held the court in *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998).

\*\*\*\* Comment:

In , the appeals court held that the district court's definition of the term "reckless disregard" under the Motor Vehicle Information and Cost Savings Act did not mislead the jury, and that the court did not abuse its discretion when, in response to a jury note regarding simple negligence, the court provided an example of negligence, in lieu of a definition.

[\*8.] 5 Specific intent requirement

The following authority considered whether the federal Odometer Act, 49 U.S.C.A. §§ 32701 et seq., has a specific intent requirement.

◇

Motor vehicle purchaser asserting a private right of action for violation of the federal Odometer Act regulation, requiring the transferor of the ownership of a motor vehicle to disclose the mileage on the title or document used to reassign title, was required to prove transferor's intent to defraud with respect to a failure to disclose the vehicle's mileage, rather than a general intent to defraud, or an intent to defraud by withholding the title for reasons unrelated to the mileage disclosure; purposes of Act were to prohibit tampering with odometers and to provide safeguards to protect vehicle purchasers with altered or reset odometers. 49 U.S.C.A. § 32710; 49 C.F.R. § 580.5(c). *Ioffe v. Skokie Motor Sales, Inc.*, 414 F.3d 708 (7th Cir. 2005), cert. denied, 126 S. Ct. 1432, 164 L. Ed. 2d 133 (U.S. 2006)

\*\*\*\* Comment:

Denying certiorari, the United States Supreme Court in *Ioffe v. Skokie Motor Sales, Inc.*, 126 S. Ct. 1432, 164 L. Ed. 2d 133 (U.S. 2006), let stand the determination of the Seventh Circuit that a motor vehicle buyer asserting a private right of

action under the Motor Vehicle Information and Cost Savings Act (Odometer Act) is required to prove the seller's intent to defraud with respect to the failure to disclose the vehicle's mileage. The Act requires the transferor to disclose the mileage on the title or document used to reassign title, and provides that a private party may recover damages from a person who violates the Act or its implementing regulations "with intent to defraud." The Seventh Circuit rejected the claim that it is sufficient to allege a general intent to defraud, as the Eleventh Circuit has held, or an intent to defraud by withholding the title for reasons unrelated to the mileage disclosure.

[\*9] Inference of intent to defraud -- Generally

In the cases below, the courts held that a transferor's intent to defraud cannot be presumed, but may be inferred under the Motor Vehicle and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., from the surrounding facts.

For the purposes of the section of the Motor Vehicle and Cost Savings Act prohibiting the knowing giving of a false statement to a transferee, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), held the court in *Pepp v. Superior Pontiac GMC, Inc.*, 412 F. Supp. 1053 (E.D. La. 1976), fraudulent intent or an intent to deceive cannot be presumed, but such intent may be inferred.

Intent to defraud under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), cannot be presumed although it can be inferred from the surrounding facts, held the court in *Clayton v. McCary*, 426 F. Supp. 248 (N.D. Ohio 1976).

[\*10] Based on actual knowledge of violation

An inference of a seller's intent to defraud may be based on the transferor's actual knowledge of a violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., held the courts in the cases that follow.

In *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), the court recognized that in a suit for violations of the Federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), an intent to defraud may be inferred from an automobile seller's involvement in a scheme to defraud, with the knowledge that many of the cars sold have incorrect odometer readings, evidencing at least reckless disregard.

In *Terry v. Whitlock*, 102 F. Supp. 2d 661 (W.D. Va. 2000), the court held that a seller who lacks actual knowledge may still "intend to defraud" in violation of 49 U.S.C.A. §§ 32701 et seq.; if a transferor reasonably should have known that a vehicle's odometer reading was incorrect, although he did not know to a certainty the transferee would be defrauded, a court may infer that he understood the risk of such an occurrence.

If a transferor has actual knowledge that the odometer reading of an automobile is incorrect and fails to disclose this to the transferee when executing a false odometer certificate, held the court in *A.B.C. Chevrolet Co. v. Kirk*, 1986 WL 10045 (N.D. Ill. 1986), a court may infer as a matter of law that the transferor did so with intent to defraud under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.).

\*\*\*\* Caution:

The court in *Ralbovsky v. Lamphere*, 731 F. Supp. 79 (N.D. N.Y. 1990), held that the inference of an intent to defraud under the odometer requirement provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), created by actual knowledge can be dispelled by evidence that there was no intent to defraud.

The court in *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983), held that if a person violates the

odometer disclosure requirement of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), with actual knowledge of committing the violation, the fact-finder can reasonably infer that the violation was committed with an intent to defraud the purchaser.

[\*11] Based on dominion over vehicle

In the following cases, the courts held or recognized that under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., an inference of a transferor's intent to defraud may be based on the transferor's dominion over a vehicle.

Where an automobile is under the owner's dominion or that of the owner's selling agent during the time that the odometer is tampered with in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991, 1988, 1989 (now 49 U.S.C.A. §§ 32701 to 32711, 32705, 32710), a purchaser may recover from the selling owner, recognized the court in *Shore v. J. C. Phillips Motor Co.*, 567 F.2d 1364 (5th Cir. 1978).

Absent explanation, an automobile dealer's sole dominion of a vehicle tends to show the dealer's responsibility for an altered odometer, held the court in *Nieto v. Pence*, 578 F.2d 640 (5th Cir. 1978), and the dealer's failure to disclose that the odometer reading is incorrect is evidence of an intent to defraud under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710). Although the transferor may not have known to a certainty that the transferee would be defrauded, the court may infer that the transferor understood the risk of such an occurrence.

[\*2] Disclosure Requirements

[\*12] Transferor

[\*12a] Ownership

The courts in the following cases held that a "transferor" for the purposes of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., is someone who transfers an ownership interest in a motor vehicle.

A "transferor" is defined by regulation as any person who transfers his ownership in a motor vehicle by sale, gift, or any means other than by creation of a security interest, 49 C.F.R. § 580.3, held the First Circuit Court of Appeals in *McGinty v. Beranger Volkswagen, Inc.*, 633 F.2d 226, 30 Fed. R. Serv. 2d 368 (1st Cir. 1980).

In *Oettinger v. Lakeview Motors, Inc.*, 675 F. Supp. 1488 (E.D. Va. 1988), the court held that a transferor for the purposes of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), is any person who transfers an ownership in a motor vehicle, by sale, gift, or any means other than by creation of a security interest, citing regulation 49 C.F.R. § 580.3.

A party must have title or some other property interest in an automobile before it may be considered a "transferor" under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), as well as the relevant regulation, 49 C.F.R. § 580.3, opined the court in *Lile v. Louisville Auto Auction*, 1985 WL 6151 (S.D. Ind. 1985).

The rules promulgated under authority of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), define "transferor" as any person who transfers his ownership in a motor vehicle by sale, gift, or any means other than by creation of a security interest, according to 49 C.F.R. § 580.3, held the court in *Riverside Lincoln Mercury Sales, Inc. v. Auto Dealers Exchange Co.*, 1987 WL 7280 (N.D. Ill. 1987). The prevailing view is that to be a transferor within the Act, a person must have an ownership interest in the vehicle, concluded the

court.

A person who had a certain legal or beneficial ownership interest in a vehicle may be considered to be a transferor for the purposes of a violation of the false odometer certification statute, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), held the court in *U.S. v. Powell*, 806 F.2d 1421 (9th Cir. 1986), even if such a person would not have been considered the owner or transferor at state law.

[\*12b] Nonownership

The courts below held that someone with a nonownership interest in a vehicle may be considered a transferor for the purposes of liability under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32705, 32710, if the person is involved in fraudulent conduct.

In order to be considered a transferor within the meaning of the criminal disclosure regulations of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1990c (now 49 U.S.C.A. § 32709(b)), held the court in *U.S. v. Ellis*, 739 F.2d 1250 (7th Cir. 1984), evidence that would constitute conclusive proof of ownership is not required, since Congress intended to adopt a nationwide standard requiring those who transfer automobiles to provide odometer statements, and in accomplishing this goal, Congress and the Secretary of Transportation used broad language to describe those falling within the ambit of the Act.

A transferor liable under the federal odometer statute, held the court in *Mayberry v. Said*, 911 F. Supp. 1393 (D. Kan. 1995), typically will be the owner of the vehicle in question, but if a nonowner and the owner are involved in a scheme of fraudulent conduct, the nonowner will be considered a transferor for the purposes of liability under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710).

\*\*\*\* Observation:

But see *C & S Nat. Bank of Savannah, Ga. v. Gilliam*, 285 S.C. 313, 329 S.E.2d 3 (Ct. App. 1985), where the court held that the lessor of a rented automobile is not a "transferor" under the Motor Vehicle Information and Cost Savings Act where the lease does not pass the title to the vehicle and where the lease merely contains an option to purchase at the end of the leased term for the residual value of the automobile.

[\*13] Agent liability

It has been held that under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, an agent of a transferor cannot be found liable for a violation.

To be held liable under the odometer requirement provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, a defendant must be a "transferor" of the vehicle, and an agent cannot be held personally liable for the transfer of a vehicle, held the court in *Powell v. Manny*, 1997 WL 135900 (N.D. N.Y. 1997).

In *Coulbourne v. Rollins Auto Leasing Corp.*, 392 F. Supp. 1198 (D. Del. 1975), the court held that the language of 15 U.S.C.A. § 1988(b) (now 49 U.S.C.A. § 32705(a)(2)) could not be read to prohibit illegal conduct by sales agents of the transferor. The court observed that in 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703), Congress had made it unlawful for "any person or his agent" to reset an odometer, and pointed out that if Congress intended to include an agent under 15 U.S.C.A. § 1988, similar language could have been used.

\*\*\*\* Caution:

n76 When 15 U.S.C.A. § 1984 was repealed and recodified as 49 U.S.C.A. § 32705, the language "any person or his

agent" was removed. However, the stated purpose of the repeal and recodification of this Act was only to revise, codify, and enact without substantive change certain general and permanent laws, related to transportation, and to make other technical improvements in the Code. Thus, it is unclear what the removal of this language meant to such a construction of the Act. It is important to note that the phrase "the owner of the vehicle or agent of the owner" is still contained in 49 U.S.C.A. § 32704, regarding the service, repair, and replacement of odometers.

See *Bryant v. Thomas*, 461 F. Supp. 613 (D. Neb. 1978), where the court held that the sole proprietor of an auto dealership, rather than the manager of the dealership, was the "transferor" for the purposes of liability under 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705).

An agent who at all times acts merely as an agent for the true owner is not a transferor under the criminal disclosure provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1988(b) (now 49 U.S.C.A. § 32705), recognized the court in *U.S. v. Powell*, 806 F.2d 1421 (9th Cir. 1986).

[\*14] Auction company liability

Under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, an automobile auction company may be liable as a transferor if it holds title to a vehicle, even for a brief period of time, held or recognized the courts in the cases below.

Automobile auction companies may be liable as transferors under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), when they have title to the automobiles they auction, even for a brief period of time, since having title, while not conclusive proof of ownership, is sufficient indicia of ownership for the purposes of the Act, held the court in *Riverside Lincoln Mercury Sales, Inc. v. Auto Dealers Exchange Co.*, 1987 WL 7280 (N.D. Ill. 1987). Conversely, automobile auction companies are not liable under the Act when they are truly intermediaries, only peripherally involved in the sales transaction, explained the court.

\*\*\*\* Comment:

To the same effect as *Riverside Lincoln Mercury Sales, Inc. v. Auto Dealers Exchange Co.*, 1987 WL 7280 (N.D. Ill. 1987), see *Lile v. Louisville Auto Auction*, 1985 WL 6151 (S.D. Ind. 1985).

The key ingredient in determining whether an auction company is a transferor under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988(a), (b) (now 49 U.S.C.A. § 32705), recognized the court in *Industrial Indem. v. Arena Auto Auction*, 638 F. Supp. 1030 (D. Minn. 1986), is whether the auction company held title to a vehicle, even for a brief period of time. Holding title may be a sufficient indicia of ownership for the Act, stated the court.

[\*15] Reasonable care of transferor

The courts in the following cases held or recognized that the transferor of an automobile must exercise reasonable care concerning the reliability of the automobile's odometer or risk liability under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32705, 32710.

Transferors of an automobile can be held liable under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), for violation of the federal odometer disclosure requirements in the absence of actual knowledge of violations if the transferors reasonably should have known that the odometer reading was incorrect, held the court in *Auto Sport Motors, Inc. v. Bruno Auto Dealers, Inc.*, 721 F. Supp. 63 (S.D. N.Y. 1989). An assessment of the reasonableness of a seller's conduct must include reference to the seller's experience in car sales, determined the court. What is reasonable for a layperson may not be so for an individual engaged in the business of

buying and selling used cars, explained the court. The legislative history incident to the relevant sections states that the test of "knowingly" was incorporated so that the auto dealer with expertise now would have an affirmative duty to mark "true mileage unknown" if, in the exercise of reasonable care, the dealer would have reason to know that the mileage was more than that which the odometer had recorded or which the previous owner had certified, noted the court. Although § 1989 of the statute (now § 32710) adds an "intent to defraud" requirement, the court stated that it did not think this section abandoned the reasonableness standard apparent in the legislative history. The apparent purpose of § 1989 (now § 32710) is to give teeth to the disclosure requirements by creating substantial civil penalties for violations of the statute, explained the court, and so a construction of § 1989 (now § 32710) that would require a finding of actual knowledge of odometer inaccuracies clearly runs contrary to the goals of the statute.

Under the Federal Odometer Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), if, in the exercise of reasonable care, an automobile's transferor would have had reason to know that the mileage was more than that which the odometer indicated or a previous owner had certified, the transferor has a duty to disclose that the actual mileage is unknown, held the court in *Heffler v. Joe Bells Auto Service*, 946 F. Supp. 348 (E.D. Pa. 1996).

If, in the exercise of reasonable care, a transferor would have had reason to know that the odometer on an automobile had "turned over," the transferor must disclose this fact on the odometer mileage statement under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), held the court in *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979). The knowledge of the "turn over" that the transferor must have is not absolute certitude, clarified the court.

A transferor who should know in the exercise of reasonable care that an automobile's odometer has turned over is required to disclose such fact to the purchaser, recognized the court in *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987), under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705).

The legislative history of § 1988 of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), makes it clear that a party must use "reasonable care" to assure the accuracy of odometer disclosure statements, stated the court in *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983).

An automobile dealer has a duty to exercise reasonable care in ascertaining the accuracy of an odometer reading before certifying its correctness under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), held the court in *Charnetsky v. Gus Paulos Chevrolet, Inc.*, 754 F. Supp. 188 (D. Utah 1991), even if the dealer does not have actual knowledge of tampering with the odometer.

[\*16] Assessing reasonableness of transferor conduct

It has been held that a transferor's experience in car sales and a vehicle's unreasonably low mileage are relevant in assessing the reasonableness of the transferor's conduct under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32705, 32710.

A dealer's experience in car sales and a vehicle's unreasonably low mileage in relation to the year and condition of the car are relevant in assessing the reasonableness of a dealer's conduct, held the court in *Daluz v. Acme Auto Body & Sales, Inc.*, 814 F. Supp. 242 (D. Conn. 1992).

[\*17] Affirmative duty to inquire

Under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32705, 32710, held or recognized courts in the following cases, a transferor has an affirmative duty to inquire regarding the accuracy of an odometer reading.

One may not consciously avoid learning that the true mileage of a vehicle is not as it appears on the odometer and factual circumstances such as would alert transferors to the probable inaccuracy of an odometer reading would give rise to a duty of further investigation under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), held the court in *Auto Sport Motors, Inc. v. Bruno Auto Dealers, Inc.*, 721 F. Supp. 63 (S.D. N.Y. 1989).

When a seller of used cars is a dealer of cars, it has an affirmative duty to discover defects in odometer mileage reporting if it reasonably should have known that the odometer reading was incorrect, under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), held the court in *Daluz v. Acme Auto Body & Sales, Inc.*, 814 F. Supp. 242 (D. Conn. 1992).

The legislative history of the Federal Odometer Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), clearly imposes an affirmative duty on a dealer to adopt practices reasonably designed to uncover incorrect odometer readings, held the court in *Heffler v. Joe Bells Auto Service*, 946 F. Supp. 348 (E.D. Pa. 1996).

Once an automobile dealer has notice of grounds for suspecting an odometer's inaccuracy, the law imposes on the dealer a duty of further inquiry, held the court in *Oettinger v. Lakeview Motors, Inc.*, 675 F. Supp. 1488 (E.D. Va. 1988), and the dealer must then investigate the facts in order to ascertain whether the odometer's mileage reading is reliable, before certifying it as such, under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705); or, if the dealer chooses not to do this, then the dealer is legally bound to inform the customer that he or she suspects the odometer is incorrect and that it should not be relied upon. In particular, a transferor is specifically obligated to review carefully all documents relating to the title and mileage of a car, and may even be required to check into the official motor vehicle records of those states where the car has been located, as part of such an affirmative duty, stated the court.

The remedial purposes of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), in the view of the court in *Cantrell v. Thaler Ford Sales, Inc.*, 485 F. Supp. 528 (S.D. Ohio 1980), dictate that the auto dealer, not the consumer, bear the burden of discovering prior misrepresentation.

The intent of Congress is to impose an affirmative duty upon dealers under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), to detect odometer irregularities, recognized the court in *Riverside Lincoln Mercury Sales, Inc. v. Auto Dealers Exchange Co.*, 1987 WL 7280 (N.D. Ill. 1987).

In *Huson v. General Motors Acceptance Corp.*, 108 F.3d 172 (8th Cir. 1997), the Eighth Circuit Court of Appeals recognized that the transferor of an automobile has a duty to inspect the vehicle and title documents before providing a mileage statement under the federal odometer law, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705).

The federal odometer law, the Motor Vehicle Information and Cost Savings Act 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), imposes an affirmative duty on automobile dealers to discover defects, stated the court in *Haynes v. Manning*, 917 F.2d 450 (10th Cir. 1990). Thus, a transferor of a vehicle may be found to have intended to defraud if the transferor had reason to know that the mileage on the vehicle was more than was reflected by the odometer or certification of the previous owner and nevertheless failed to take reasonable steps to determine the actual mileage.

An automobile dealer cannot escape liability under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, by relying solely on an odometer reading and the assertions of the previous owner, since dealers have an affirmative duty to discover odometer defects, stated the court in *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998).

## [\*18] Specific circumstances giving rise to duty to inquire

It has been held that specific circumstances may give rise to a transferor's affirmative duty to inquire under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32705, 32710.

Circumstances giving rise to a seller's duty to inquire under the odometer requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), held the court in *Auto Sport Motors, Inc. v. Bruno Auto Dealers, Inc.*, 721 F. Supp. 63 (S.D. N.Y. 1989), include unreasonably low mileage in relation to the year of the car, the condition of the tires, and the condition of the interior and exterior of the car.

## [\*19] Duty to disclose mileage unknown

Under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32705, 32710, the courts in the cases that follow held or recognized that a transferor has a duty to disclose the fact that a vehicle's mileage is unknown.

The legislative history incident to the relevant sections of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), states that the test of "knowingly" was incorporated so that the auto dealer with expertise now would have an affirmative duty to mark "true mileage unknown" if, in the exercise of reasonable care, the dealer would have reason to know that the mileage was more than that which the odometer had recorded or which the previous owner had certified, held the court in *Auto Sport Motors, Inc. v. Bruno Auto Dealers, Inc.*, 721 F. Supp. 63 (S.D. N.Y. 1989). Although § 1989 of the statute (now § 32710) adds an "intent to defraud" requirement, the court stated that it did not think this section abandoned the reasonableness standard apparent in the legislative history. The apparent purpose of § 1989 (now § 32710) is to give teeth to the disclosure requirements by creating substantial civil penalties for violations of the statute, explained the court, and so a construction of § 1989 (now § 32710) that would require a finding of actual knowledge of odometer inaccuracies clearly runs contrary to the goals of the statute.

Under a regulation promulgated pursuant to the Motor Vehicle Information and Cost Savings Act of 1972 providing that if the transferor of an automobile knows that the odometer reading differs from the number of miles the vehicle has actually traveled and that the difference is greater than that caused by an odometer calibration error, 49 C.F.R. § 580.4(c) (now 49 C.F.R. § 580.5(e)(3)), the transferor shall include a statement that the actual mileage is unknown, held the court in *Rider Oldsmobile, Inc. v. Wright*, 415 F. Supp. 258 (M.D. Pa. 1976).

The Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(a)(2) (now 49 U.S.C.A. § 32705(a)(1)(B)), and the applicable regulation, 49 C.F.R. § 580.4(c) (now 49 C.F.R. § 580.5(e)(3)), provide that if a transferor of an automobile knows the odometer reading to be different from the number of miles the vehicle has actually traveled, the transferor must disclose that the actual mileage is unknown, held the court in *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977).

Making affirmative claims about the mileage of a used vehicle without knowledge is either intentionally deceitful or reckless, and thus, violates the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), declared the court in *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987).

The Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), does not require a used automobile seller to go beyond disclosures that consist of recorded mileage and a statement that the actual mileage is unknown, recognized the court in *Tinker v. DeMaria Porsche-Audi, Inc.*, 632 F.2d 520 (5th Cir. 1980), to state its belief regarding the car's actual mileage, so long as the seller's silence does not stem from an intent to defraud.

In the event that the transferor of a used automobile knows that the odometer has turned over once and has reason to believe it has turned over more than once, the transferor should indicate that actual mileage is unknown but a minimum of 100,000 miles plus the figure shown by the odometer, in order to comply with the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(a) (now 49 U.S.C.A. § 32705(a)(1)(A)), held the court in *Suits v. Little Motor Co.*, 642 F.2d 883 (5th Cir. 1981).

In *Clayton v. McCary*, 426 F. Supp. 248 (N.D. Ohio 1976), the court held that in order to eliminate the potential loophole of an automobile dealer's providing a false odometer statement to a purchaser when the dealer is relying completely on the representations of the previous owner, the test of "knowingly" was incorporated into the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), so that the auto dealer with expertise would have an affirmative duty to mark "true mileage unknown" if, in the exercise of reasonable care, the dealer would have reason to know that the mileage was more than that which the odometer had recorded or which the previous owner had certified. This section originally allowed a person to rely completely on the representations of the previous owner, noted the court. For example, explained the court, a person could have purchased a vehicle knowing that the mileage was false but received a statement from the transferor verifying the odometer reading. Suppose an auto dealer bought a car with a 20,000 mile odometer verification, but any mechanic employed by that auto dealer could ascertain that the vehicle had at least 60,000 miles on it. The bill as introduced would have permitted the dealer to resell the vehicle with a 20,000 mile verification, stated the court.<sup>n77</sup>

The Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), envisions that when an odometer statement indicates that the true mileage is unknown, the recipient of the statement is thereby put on notice that the vehicle's odometer reading is not to be relied upon and that the recipient should make an independent investigation of the vehicle's condition and value, held the court in *Byrne v. Autohaus On Edens, Inc.*, 488 F. Supp. 276 (N.D. Ill. 1980).

[\*20] Knowledge required to create duty

Less than actual knowledge is sufficient to create a duty to disclose that the mileage of a vehicle is unknown under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, held the courts in the following cases.

Under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), held the court in *Nieto v. Pence*, 578 F.2d 640 (5th Cir. 1978), a transferor who lacks actual knowledge that an odometer reading is incorrect may still have a duty to state that the actual mileage is unknown.

Constructive knowledge that an automobile's odometer reading is less than the actual mileage is sufficient to make a transferor of an automobile civilly liable under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705) for failure to disclose that the vehicle's actual mileage is unknown, held the court in *Leach v. Bishop Bros. Auto Auction, Inc.*, 624 F.2d 34 (5th Cir. 1980).

Under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1988(b) (now 49 U.S.C.A. §§ 32705, 32705(a)(1)(B)), held the court in *Huryta v. Diers Motor Co. of Grand Island, Neb.*, 426 F. Supp. 1176 (D. Neb. 1977), the knowledge that legally requires a seller to make a statement that the actual mileage on a vehicle is unknown may consist of something less than perfect assurance that the odometer reading is incorrect.

[\*21] Transferor knows true mileage

[\*21a] Duty to disclose total mileage

It has been held that when a transferor knows that an odometer has "turned over," the transferor must disclose that the mileage is 100,000 plus the number actually appearing on the odometer, and may certify the mileage as "unknown" only when the transferor believes the odometer reading is inaccurate for some other reason, under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705.

When a transferor knows that a motor vehicle odometer has "turned over" after registering 99,999 miles, the "cumulative mileage" that must be stated under the mileage disclosure statute, Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), is the total of 100,000 plus the number actually appearing on the odometer, and the transferor may certify the mileage as "unknown" only when the transferor believes that, for some other reason, the odometer's reading is inaccurate, held the court in *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979). The court explained that it could not believe that Congress intended to enact a statute requiring that consumers be given false or misleading information.

\*\*\*\* Comment:

In so holding, the Fourth Circuit Court of Appeals in noted that the absurdity of any other application of § 1988 (now 49 U.S.C.A. § 32705) to the case of an odometer that has turned over was pointed out by the district court in *Rider Oldsmobile, Inc. v. Wright*, 415 F. Supp. 258 (M.D. Pa. 1976), see § 21[b], upon which the court below had relied. As the court noted, although a literal reading of § 1988(a) (now 49 U.S.C.A. § 32705(a)(1)(B)) could require the transferor to state that the actual mileage is unknown when he or she knows that the true mileage exceeds the figures appearing on the odometer by 100,000 miles, forcing the transferor to state that the actual mileage was "unknown" would require the transferor to violate § 1988(b) (now 49 U.S.C.A. § 32705(a)(2)), which makes it unlawful to knowingly give a false statement to the transferee in making any disclosure. Whereas the district court concluded that the statute imposes no duty upon a transferor in this situation beyond recording the numbers appearing on the odometer, the Fourth Circuit in disagreed, holding that the statute imposed a duty upon a transferor to indicate the cumulative mileage. The court noted that its interpretation of § 1988 would not impose liability upon any transferors who, in good faith, interpreted the requirements of the statute in the same manner as did the district court, since § 1989 (now 49 U.S.C.A. § 32710) of the statute requires proof of intent to defraud before liability can be imposed.

[\*21b] No duty to disclose total mileage

The courts in the cases below held that under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, a transferor has no duty to disclose that the true mileage of an automobile exceeds the figures appearing on the odometer, if the transferor knows the true mileage.

In *Rider Oldsmobile, Inc. v. Wright*, 415 F. Supp. 258 (M.D. Pa. 1976), the court held that although a literal reading of § 1988(a) (now 49 U.S.C.A. § 32705(a)(1)(B)) of the Motor Vehicle Information and Cost Savings Act (Act) could require a transferor to state that the actual mileage is unknown when he or she knows that the true mileage exceeds the figures appearing on the odometer by 100,000 miles, forcing the transferor to state that the actual mileage is "unknown" would require the transferor to violate § 1988(b) (now 49 U.S.C.A. § 32705(a)(2)), which makes it unlawful to knowingly give a false statement to the transferee in making any disclosure, and therefore a transferor in this position has no duty beyond recording the numbers appearing on the odometer. In so holding, the court stated that it had no doubt that the statute and regulations were intended to cover this situation, but only by stretching and contorting the words of the Act and the regulations could this end be achieved. This is not a proper judicial role, explained the court, and legislators ought to be able to draft statutes with clarity and care.

The disclosure requirements of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), do not impose upon a transferor a duty to disclose a vehicle's actual mileage when the transferor knows the odometer reading to be inaccurate and knows the actual mileage of the vehicle, held the court in *Byrne v. Autohaus On Edens, Inc.*, 488 F. Supp. 276 (N.D. Ill. 1980). Such a requirement would appear to be salutary in view of

the purposes of the Act, and perhaps the Act should be amended accordingly, noted the court, but it was apparently Congress's judgment that the disclosure goals of the Act could be satisfactorily met solely by the requirement that a transferor who knows the odometer reading to be inaccurate state that the actual mileage is unknown.

[\*22] Transferee

The courts in the following cases held that the ultimate purchasers of automobiles are "transferees" for the purposes of the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705.

Ultimate purchasers of automobiles are "transferees" for the purposes of an odometer tampering prosecution under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1990c (now 49 U.S.C.A. §§ 32705, 32709), concluded the court in *U.S. v. Waldrop*, 786 F. Supp. 1194 (M.D. Pa. 1991), aff'd without reported opinion, 983 F.2d 1054 (3d Cir. 1992).

The court in *State of Utah by Wilkinson v. B & H Auto*, 701 F. Supp. 201 (D. Utah 1988), recognized that the ultimate purchasers of automobiles, represented by a state attorney general, are "transferees" for the purpose of stating a cause of action for violation of the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705).

[\*3] Other Terms or Provisions

[\*23] Motor vehicle

In the cases below, the courts held that the term "motor vehicle" in the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, includes any vehicle driven or drawn by mechanical power for use in the public streets, roads, and highways, and that a motorcycle falls within this definition.

In *Grambo v. Loomis Cycle Sales, Inc.*, 404 F. Supp. 1073 (N.D. Ind. 1975), the court held that whether Congress intended the term "motor vehicle" to cover motorcycles could be found in the legislative history of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), where "motor vehicle" was described as including any vehicle driven or drawn by mechanical power for use in the public streets, roads, and highways. The court said that the description clearly covered motorcycles, and that the prohibitions and requirements of the Act applied to such vehicles.

Motorcycles fall within the protective ambit of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), held the court in *Bryant v. Thomas*, 461 F. Supp. 613 (D. Neb. 1978).

[\*24] Person

It has been held that the word "person" as used in various provisions of the Motor Vehicle Information and Cost Savings Act (Act), 49 U.S.C.A. §§ 32701 to 32711, means and includes corporations, companies, associations, firms, partnerships, societies, and joint stock companies, individuals, and transferors and transferees under the Act.

In *Stier v. Park Pontiac, Inc.*, 391 F. Supp. 397 (S.D. W. Va. 1975), the court held that the word "person" as used in various provisions of 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711) means and includes "corporations, companies, associations, firms, partnerships, societies, and joint stock companies, as well as individuals." The court further defined the term "person" to include transferors and transferees, as used in the statute.

[\*25] Agent

It has been held that the word "person" as used in various provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, includes agents of firms and corporations acting within the scope of their employment.

In *Stier v. Park Pontiac, Inc.*, 391 F. Supp. 397 (S.D. W. Va. 1975), the court held that the word "person" as used in various provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), includes agents of firms and corporations acting within the scope of their employment.

\*\*\*\* Caution:

A number of courts have held or recognized that a "transferor's" agent cannot be held personally liable for the transfer of a vehicle. See, e.g., *Powell v. Manny*, 1997 WL 135900 (N.D. N.Y. 1997); *Coulbourne v. Rollins Auto Leasing Corp.*, 392 F. Supp. 1198 (D. Del. 1975), § 13.

[\*26] Knowingly and willfully

It has been held that the phrase "knowingly and willfully" as used in the statute providing criminal penalties for odometer tampering, the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32709(b), means an intentional violation of a known legal duty.

"Knowingly and willfully" as used in the statute providing criminal penalties for odometer tampering, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1990c (now 49 U.S.C.A. § 32709(b)), means an intentional violation of a known legal duty, held the court in *U.S. v. Studna*, 713 F.2d 416 (8th Cir. 1983). Since Congress required a showing of an intent to defraud in the civil section but did not do so in the criminal section, reasoned the court, it seemed that requiring such an intent would constitute an unwarranted addition to the statute not reflected by its language.

\*\*\*\* Comment:

The Eighth Circuit Court of Appeals in noted that other courts have interpreted similar language in tax statutes to mean an intentional violation of a known legal duty. The court stated its belief that this interpretation should also apply to 15 U.S.C.A. § 1990c (now 49 U.S.C.A. § 32709(b)).

[\*27] Actual damages

In the following cases, the courts held or recognized that a purchaser's actual damages under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710, are the difference between the fair market value of the vehicle with its actual miles and the amount paid for the vehicle by the purchaser, and may include other incidental expenses.

The court in *Gonzales v. Van's Chevrolet, Inc.*, 498 F. Supp. 1102 (D. Del. 1980), held that the actual damages for giving the purchaser of a used car a false statement concerning the mileage on the car in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), are the difference between the fair market value of the car with actual miles thereon and the amount paid for the automobile by the purchaser and any other damages the purchaser has incurred. In calculating the damages to be assessed against the car dealer, the dealer was not entitled to a deduction of the amount received by the purchaser when he subsequently sold the vehicle, or a deduction of the value of the car to the purchaser during the period in which he owned and operated the car.

Although "actual damages" is not defined in the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §

1989 (now 49 U.S.C.A. § 32710), it seems reasonable to give it the meaning commonly applied to fraud cases, which is the difference between the amount paid by the purchasers, not the value of the car if it had been as represented, and the fair market retail value of a vehicle of the type purchased with the number of miles actually traveled by the car, plus such outlays as are legitimately attributable to the acts of the transferors, held the court in *Cantrell v. Thaler Ford Sales, Inc.*, 485 F. Supp. 528 (S.D. Ohio 1980). Noting that the purpose of the statute is to punish odometer tamperers by imposing civil penalties upon them and to reward purchasers who discover such tampering and bring it to the attention of the federal courts, the court determined that in view of this policy a consumer would not be "adequately protected" by an interpretation of the Act that would limit the "actual damages" recoverable against an admitted wrongdoer to the incremental amount of damage caused by that wrongdoer, assuming such damage could even be separately determined. Particularly where Congress has made explicit reference in enacting this statute to the movement of motor vehicles in interstate commerce, 15 U.S.C.A. § 1981 (now 49 U.S.C.A. § 32701(a)(4)), the court held that private prosecution to effectuate the Act would be unduly hindered by a decision that would require a consumer to pursue a claim for damages in a piecemeal manner.

Buyers of a car that had its odometer rolled back in violation of the Motor Vehicle Information and Cost Savings Act are entitled to recover as "actual damages" the difference between the amount paid for the car and its fair market retail value at the time of the sale under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), held the court in *Beachy v. Eagle Motors, Inc.*, 637 F. Supp. 1093 (N.D. Ind. 1986).

Purchasers are entitled to recover as damages under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a)(1) (now 49 U.S.C.A. § 32710(a)), the difference between the amount they paid for the car and the fair market retail value of the same car with the number of miles it has actually traveled, recognized the court in *Duval v. Midwest Auto City, Inc.*, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978).

The statutory damages under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), have been defined as the difference between the amount paid for the automobile and the fair market value of the same type of car with the number of miles it had actually traveled, plus incidental expenses, held the court in *Goeman v. Keating*, 498 F. Supp. 700 (D.S.D. 1980).

[\*28] Reliance

It has been held that a consumer must show reliance on an odometer statement in order to show actual damages under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710.

A consumer need not show reliance on an odometer statement in order to prove a violation of the federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), but such reliance is necessary to show actual damages, held the court in *Oettinger v. Lakeview Motors, Inc.*, 675 F. Supp. 1488 (E.D. Va. 1988).

[\*29] Repairs occasioned by misrepresentation

Actual damages under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710, may include repairs occasioned by the misrepresentation of a vehicle's mileage, recognized the courts in the cases that follow.

Repair bills linked to the mileage of a vehicle may be included in the actual damages awarded to a purchaser under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), recognized the district court in *Gonzales v. Van's Chevrolet, Inc.*, 498 F. Supp. 1102 (D. Del. 1980).

In *Beachy v. Eagle Motors, Inc.*, 637 F. Supp. 1093 (N.D. Ind. 1986), the court recognized that buyers of a car that has its odometer rolled back in violation of the Motor Vehicle Information and Cost Savings Act are not entitled to recover as "actual damages" repairs that are not affirmatively shown to have been occasioned by the misrepresentation inherent

in the odometer rollback under *15 U.S.C.A. § 1989(a)* (now *49 U.S.C.A. § 32710(a)*). Thus, in order for a purchaser to recover repair bills as "actual damages" under § 1989, the purchaser must show that repairs would not have been needed if the car had in fact been a car with the lower mileage indicated on the odometer, explained the court. This could include repairs that were necessitated by the increased use (as measured in miles driven) and that would not have been needed if the car had not undergone such use, observed the court, and this could be established through testimony indicating that the repair had to be made because the particular part was worn out by use consistent with the higher mileage but would not have worn out by use at the lower mileage. What is essential is that the purchaser must prove that the repair was necessitated by the extra use, emphasized the court, since although common sense might dictate that the more a vehicle is used, the more likely its parts will be worn down or in need of replacement, this notion alone is insufficient to justify awarding damages for repairs undertaken by the purchaser. The fact that a car with higher mileage commands a lower retail price indicates that the market will take into consideration the higher probability of need for repair when determining the price for the higher mileage vehicle, noted the court, and the buyer of a higher mileage vehicle will pay less for such a vehicle because the buyer knows that the costs occasioned by greater use of the car will come sooner than for a lower mileage version of the same car; the buyer gets the benefit of a lower cost up front, but assumes the risk that other costs may soon surface. Once the market forces set a price, the buyer cannot complain when those costs begin to accrue (unless they are the result of misrepresentations on the part of the seller) because that is the risk inherent in such a purchase, and that is the risk that gave the buyer a lower price in the first place, reasoned the court. The point here is that repairs occasioned by normal wear and tear of the vehicle are costs reflected in the fair market retail price of a used car, concluded the court, and therefore when an odometer rollback purchaser is awarded damages for the difference between the price paid and the fair market retail value, he or she is already "compensated" for repairs incurred because of normal wear and tear of the higher mileage vehicle -- the market's valuation of the value-depressing effect of such costs is contained in a lower fair market retail price.

See *Duval v. Midwest Auto City, Inc.*, *425 F. Supp. 1381 (D. Neb. 1977)*, judgment aff'd on other grounds, *578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978)*, where the court held that under the Motor Vehicle Information and Cost Savings Act, *15 U.S.C.A. § 1989* (now *49 U.S.C.A. § 32710*), actual damages for tampering with an odometer or the failure to provide proper certification may include such outlays as are legitimately attributable to the acts of the sellers.

[\*IV] PRIVATE CIVIL ACTIONS

[\*A] Generally

[\*30] Statute of limitations

The two-year statute of limitations for private civil actions under the Motor Vehicle Information and Cost Savings Act, *49 U.S.C.A. § 32710(b)*, does not begin to run until the fraud is discovered or should have been discovered by the purchaser, held the courts in the following cases.

The statute of limitations on a cause of action for violation of the Motor Vehicle Information and Cost Savings Act, *15 U.S.C.A. § 1989* (now *49 U.S.C.A. § 32710(b)*), a statute prohibiting tampering with motor vehicle odometers, runs from the time when the violation was discovered, not from the time when the odometer was changed, reasoned the court in *Levine v. MacNeil*, *428 F. Supp. 675 (D. Mass. 1977)*. The statute is silent on this issue, noted the court, but stated that where the gravamen of the complaint is the fraudulent concealment of a material fact, it would seem to be in accordance with general principles of law to hold that the date of discovery is the starting point for the running of the statute.

Violation of the federal odometer statute, *15 U.S.C.A. §§ 1981 to 1991* (now *49 U.S.C.A. §§ 32701 to 32711*), is considered a fraudulent act, and federal courts have similarly held that the limitations period runs from the moment the

purchaser discovered or reasonably could have discovered the fraud, held the Fourth Circuit Court of Appeals in *Ferris v. Haymore*, 967 F.2d 946 (4th Cir. 1992), as amended, (July 22, 1992).

In *Tye v. Spitzer-Dodge*, 499 F. Supp. 687 (S.D. Ohio 1980), the court held that the limitations period under the Odometer Act of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(b) (now 49 U.S.C.A. § 32710), is tolled from running until the time when the violation was first discovered by a purchaser; this interpretation follows the well-established federal doctrine that where fraud is involved in the cause of action, the statute of limitations does not begin to run until the fraud is discovered or should have been discovered by the plaintiff.

The two-year statute of limitation for actions under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989(b) (now 49 U.S.C.A. § 32710(b)), begins to run from the date of discovery or constructive discovery of a violation, stated the court in *Byrne v. Autohaus On Edens, Inc.*, 488 F. Supp. 276 (N.D. Ill. 1980). Since actions brought under the Act are founded upon fraudulent conduct, explained the court, federal courts are bound to employ the federal "discovery rule," which provides that statutes of limitation applicable to actions sounding in fraud begin to run either from the date a plaintiff discovers the fraud or from the date a plaintiff could have in the exercise of reasonable discretion discovered the fraud.

Because actions under the Federal Odometer Act (Act), 49 U.S.C.A. § 32710, involve allegations of fraudulent conduct, federal courts employ the federal "discovery rule," under which a cause of action accrues either on the date a purchaser discovers the fraud or on the date that the purchaser could have, in the exercise of reasonable diligence, discovered the fraud, held the court in *Carrasco v. Fiore Enterprises*, 985 F. Supp. 931 (D. Ariz. 1997). In so holding, the court noted that the 1994 revision notes of the Act explicitly state that the substitution of the phrase "after the claim accrues" for "from the date on which the liability arises" was intended only to eliminate unnecessary words, and that the statute of limitations provision was not substantively changed by the revisions.

\*\*\*\* Comment:

To the same effect as *Carrasco v. Fiore Enterprises*, 985 F. Supp. 931 (D. Ariz. 1997), see *Jones v. Roy Stanley Chevrolet*, 666 F. Supp. 194 (D. Mont. 1987).

In interpreting the federal discovery rule in the context of odometer rollback cases, held the court in *Davis v. Adoption Auto, Inc.*, 731 F. Supp. 1475 (D. Kan. 1990), it has been held that actual knowledge that a rollback has occurred is unnecessary to start (or alternatively, to end the tolling of) the statutory limitations period under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(b) (now 49 U.S.C.A. § 32710(b)), but rather, the test is when a prudent person under the circumstances would be led to further inquiry regarding the possibility of odometer tampering.

[\*31] Persons against whom statute runs

[\*31a] Each purchaser who discovers fraud

The courts in the cases below held that the two-year private civil statute of limitations under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b), runs against each purchaser who discovers or constructively discovers the fraud.

The statute of limitations begins to run on an action against any prior owner who violated the Federal Odometer Act (Act) under 49 U.S.C.A. § 32710(b) when the purchaser discovers or constructively discovers the violation by each prior owner, held the court in *Carrasco v. Fiore Enterprises*, 985 F. Supp. 931 (D. Ariz. 1997), and under this theory, the cause of action belongs to each purchaser, who may bring a cause of action against all prior owners who violated the Act.

The court in *John Watson Chevrolet, Inc. v. Willis*, 890 F. Supp. 1004 (D. Utah 1995), held that the two-year statute of limitations contained in the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989(b) (now 49 U.S.C.A. § 32710(b)), begins to run as against a potential plaintiff only when that plaintiff, and not any other purchaser of the automobile, knows or reasonably should know that a violation of the Act has occurred. Thus, a buyer's knowledge as to the previous owner's possible violation of the statute is not imputed to subsequent buyers, explained the court.

\*\*\*\* Comment:

In so holding, the court in chose to follow the reasoning of *Attorney General of State of Md. v. Dickson*, 914 F.2d 247, 17 Fed. R. Serv. 3d 1075 (4th Cir. 1990), an enforcement action brought by the attorney general under 15 U.S.C.A. § 1990a (now 49 U.S.C.A. § 32709), see §§ 74 to 76, 78 to 83, rather than the reasoning of *Byrne v. Autohaus On Edens, Inc.*, 488 F. Supp. 276 (N.D. Ill. 1980), see § 31[b], which like was brought under the private civil enforcement provision of 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(b)). The court stated that this was a distinction without a difference, however, because the statute of limitations for those two sections of the federal Act are substantively the same, and therefore, the reasoning in was applicable in . was based on faulty notions of public policy, stated the court in , since the focus should be on the specific policy considerations behind Congress's enactment of the Act, and not on the general policy considerations inherent in all statutes of limitations. Congress enacted the Act to punish odometer tamperers by imposing civil penalties upon them and to reward purchasers who discover such tampering and bring it to the attention of the federal courts, noted the court, and this policy would not be furthered by an interpretation of § 1989(b) (now 49 U.S.C.A. § 32710(b)) that imputes the knowledge of one prior purchaser to all later purchasers to bar a later purchaser's recovery. The court therefore refused to read such a limitation into the statute.

[\*31b] All potential purchasers

It has been held that the two-year private civil statute of limitations under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b), runs against all potential purchasers at the time any person having standing to sue discovers or constructively discovers the violation, absent some act of fraudulent concealment.

Violation of the Motor Vehicle Information and Cost Savings Act (Act) creates a single cause of action, not as many causes of action as there might be subsequent owners of the vehicle involved, held the court in *Byrne v. Autohaus On Edens, Inc.*, 488 F. Supp. 276 (N.D. Ill. 1980), and thus since a violation becomes actionable when any potential transferee has a right of action, the Act's statute of limitation begins to run as to the violation of the Act as against all potential purchasers at the time any person having standing to sue discovers or constructively discovers the violation, absent some act of fraudulent concealment, under 15 U.S.C.A. § 1989(b) (now 49 U.S.C.A. § 32710(b)). To interpret the Act's statute of limitation so that it begins to run only upon the transferee's discovery or constructive discovery of a violation, without regard to any knowledge of that violation possessed by prior owners and potential transferees, would effectively undermine the policy considerations inherent in Congress's enactment of a statute of limitation, reasoned the court. Such an interpretation could subject a violator of the Act to potential liability throughout the life of a vehicle, observed the court, and this would be true even though the alleged violator's transferee was aware of the alleged violation of the Act and had slept on his or her rights. The court refused to find that Congress intended such an inequitable result. Further, the court did not believe that its interpretation would significantly remove any of the teeth from the Act's bite, pointing out that once a violation has been discovered by a vehicle owner, before a subsequent owner will be misinformed as to the vehicle's mileage, another violation of the Act will have had to occur somewhere along the portion of the chain of title extending from the owner who discovered the violation to the subsequent complaining owner.

[\*32] Action time-barred

The courts below found that an action brought under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., was time-barred by the two-year civil statute of limitations, based on the facts and circumstances of

each case.

An action was brought by a purchaser against a prior transferor of a vehicle alleging that the transferor had turned back the odometer on the vehicle in 1973 in violation of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703), and on the transferor's motion for summary judgment, the court in *Byrne v. Autohaus On Edens, Inc.*, 488 F. Supp. 276 (N.D. Ill. 1980), determined that since the prior purchasers discovered or should have discovered the alleged violation of the Act more than two years before the commencement of the action, the alleged violation of the Act by the transferor was time-barred. An automobile purchaser who discovered, or in the exercise of reasonable diligence could have discovered, that the odometer had been disconnected on the day he purchased an automobile was barred from bringing an action under the Federal Odometer Tampering Act, Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703), more than two years after the date of this discovery, found the court in *Jones v. Roy Stanley Chevrolet*, 666 F. Supp. 194 (D. Mont. 1987). In so finding, the court noted that the purchaser did not have to wait for the car to show signs of excessive wear, indicating the odometer must have been reset or altered, before a cause of action accrued. Merely disconnecting the odometer with the intent to change the number of miles registered gives rise to an actionable claim, held the court, and assuming that the dealer did state that the odometer had been disconnected as alleged, a prudent person so informed would be led to further inquiry.

[\*B] Parties

[\*1] Transferee Status

[\*33] Transferee

[\*33a] Found

Based on the facts and circumstances of each of the following cases, the courts found that a party was a transferee for the purposes of bringing a private civil action under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

Where a husband negotiated the purchase of a used automobile and remained responsible for the debt incurred, but subsequently determined that the automobile would be placed in his wife's name for the purposes of financing, the court in *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976), found that the husband was the "transferee" of the automobile for the purposes of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1982, 1989 (now 49 U.S.C.A. §§ 32702, 32710), and was therefore a real party in interest for the purpose of proceeding under that Act to recover damages for a false odometer setting. The statutory and administrative language of the Act evince an intent to expansively prescribe the class of persons to be protected and, correspondingly, the class of persons who may bring suit thereunder, noted the court.

The intention of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), of having each transferor give odometer information to a buyer, together with extremely strong documentary evidence of ownership that an automobile auctioneer created, led the court in *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983), to conclude that the auctioneer's brief retention of the title of a car made it a "transferee" under the Act.

An automobile dealer was found liable in the district court of giving a false odometer statement with an intent to defraud under the Federal Odometer Statute, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710), and upon appeal, the court in *Van Praag v. Columbia Classics Corp.*, 849 F.2d 1106, 11 Fed. R. Serv. 3d 845 (8th Cir. 1988), found that the

individual who obtained ownership of the automobile was a real party in interest, or transferee, who could maintain an action for odometer tampering.

A customer who executed a purchase order and tendered a down payment for an automobile was a "transferee" entitled to seek relief under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), for the transferors' alleged concealment of the true mileage of the automobile, found the court in *Evans v. Paradise Motors, Inc.*, 721 F. Supp. 250 (N.D. Cal. 1989), even though the customer did not take title to or possession of the automobile upon discovering that the original odometer on the automobile had been replaced and that the automobile had greater mileage than was represented. The aggressive statutory scheme of the Act suggests a generous reading of the standing requirement, stated the court. A seller should not have a pretransfer escape hatch if the tampering is discovered before the deal is closed, reasoned the court, since the harm is already done. The buyer wants to recoup the time, money, and energy invested in the transaction, and may feel pressured to take the car when the dealer says, "[y]ou're getting a good deal even if the mileage is more," added the court. The court concluded that the most effective private attorneys general are the most vigilant and those who will detect the fraud at the earliest opportunity; certainly Congress did not intend to prevent this class from representing the public in the courts.

[\*33b] Not found

In the following cases, the courts found that a party was not a transferee for the purposes of bringing a private civil action under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances of each case.

In *Kennedy v. BMW Financial Services, N.A.*, 2003 WL 22305163 (D. Conn. 2003), the court held that the Odometer Act, 49 U.S.C.A. § 32705(c)(1), requires a transfer of the legal ownership from a lessor before its disclosure requirements are triggered and therefore, when the lessor returned the vehicle back to the dealership, the transfer was not triggered because the dealership had maintained ownership throughout the length of the lease.

An automobile dealer was found liable in the district court of giving a false odometer statement with an intent to defraud under the Federal Odometer Statute, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710), and upon appeal, the Eighth Circuit Court of Appeals in *Van Praag v. Columbia Classics Corp.*, 849 F.2d 1106, 11 Fed. R. Serv. 3d 845 (8th Cir. 1988), found that the corporation that held a security interest in the automobile was not a transferee under the pertinent regulations and thus could not maintain a cause of action under the statute.

A wife who cosigned loans and kept the ledger for an automobile business run as a sole proprietorship by her husband was not a transferee who could maintain an action for violations of the federal odometer statute, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1984, 1986, 1988, 1989 (now 49 U.S.C.A. §§ 32703, 32705, 32710), arising out of the sale to the business of automobiles with altered odometers, found the court in *Bishop v. Mid-America Auto Auction, Inc.*, 772 F. Supp. 565 (D. Kan. 1991). While the wife's position as that of a cosigner conferred an interest in the outcome of the litigation, it did not entitle her to maintain the action in her own name, held the court, since only one who is a transferee under the regulations governing a federal odometer statute may maintain a cause of action under the statute, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710). The vehicle's title was never in the wife's name, she did not have any knowledge of the purchase, and she did not see an odometer statement in conjunction with the purchase, observed the court.

[\*34] Subsequent transferor

The courts in the following cases found, based on the facts and circumstances presented, that a subsequent transferor who violated the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., was barred from bringing a private civil action as a transferee.

In *Galano v. McDonald Chevrolet-Oldsmobile, Inc.*, 644 F. Supp. 940 (W.D. Pa. 1986), the court found that where a used car dealer who purchased a car from another dealer brought an action under the Motor Vehicle and Information and Cost Savings Act, 15 U.S.C.A. §§ 1901 et seq. (now 49 U.S.C.A. §§ 32701 to 32711), to recover damages for an alleged odometer rollback, the dealer-purchaser was barred from recovery because of his own illegal action in rolling back the same car's odometer. The purchaser alleged that the used car dealer rolled back the odometer on a 1979 Cadillac Fleetwood from over 68,000 miles to 37,300 miles, a fact that the purchaser alleged that he discovered after the car was in an accident three days after he purchased it, noted the court. At the time of the accident the purchaser, who was also a used-car dealer, was transporting the car for resale, and the purchaser admitted that at the time of the accident the odometer read 17,704 miles, observed the court.

\*\*\*\* Comment:

In so finding, the court relied on the Fourth Circuit district court's decision in *Stier v. Park Pontiac, Inc.*, 391 F. Supp. 397 (S.D. W. Va. 1975), see § 34. Although was factually distinguishable from in that involved a single wrong ratified by subsequent wrongdoers and involved a separate wrong committed by a subsequent wrongdoer, the court found that the court's reluctance to let a guilty party profit would suggest that the court would find the subsequent wrongdoer's action barred.

Where a vehicle's odometer was rolled back, apparently by the original owner, then the car passed through two used car dealers who knew of the rollback, and was finally sold to a purchaser, the court in *Stier v. Park Pontiac, Inc.*, 391 F. Supp. 397 (S.D. W. Va. 1975), found that the dealers who ratified and approved the initial wrong could not recover from the prior wrongdoer, the original owner.

See *Haynes v. Manning*, 917 F.2d 450 (10th Cir. 1990), where the court held that subsequent transferors with knowledge of a false odometer statement who fail to report the actual mileage are barred from recovering damages due to their own violations of the federal odometer law, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)).

An automobile dealership could not be considered an innocent party in a chain of bad odometer statements, and therefore could not be considered a transferee for the purposes of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), determined the court in *Charnetsky v. Gus Paulos Chevrolet, Inc.*, 754 F. Supp. 188 (D. Utah 1991), where the odometer mileage statement delivered to the dealership did not contain a certification that the mileage represented was the actual mileage traveled by the vehicle, and was left unsigned, thus imposing a legal duty on the dealer to either investigate the reliability of the odometer statement before certifying it to be correct or disclose to the subsequent buyer that the actual mileage was unknown, which duty was disregarded by the dealer.

\*\*\*\* Caution:

In *Haynes v. Manning*, 917 F.2d 450 (10th Cir. 1990), the court held that private person transferors who are unaware of the requirement that they provide a federal odometer statement do not have an "intent to defraud" and their failure to make the required statement will not preclude them from seeking damages from previous transferors under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)).

[\*35] Employee of transferor

It has been held that, based on the facts and circumstances, an employee stated a cause of action as a transferee against an employer under the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710, by alleging that the employer fired him for refusing to participate in an illegal scheme to set back odometers.

A former employee brought suit against his employer, alleging that he was fired because he refused to participate in an illegal scheme to set back odometers, and on the employer's motion to dismiss, the court in *Sarratore v. Longview Van Corp.*, 666 F. Supp. 1257, 2 I.E.R. Cas. (BNA) 922 (N.D. Ind. 1987), found that the employee had stated a cause of action under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710). In so finding, the court was impressed with the salient argument made by the employee that an employer should not be able to fire an employee for refusing to violate the Act. Such could seriously undermine the basic legislative values that were the subject matter and concern of the Congress as reflected in the legislative history of this enactment, noted the court, since the principal purpose of this statute was to impose a certain variety of forced honesty in the sale of motor vehicles that was triggered by congressional concern of the widespread practice of the clandestine turning back of odometers.

[\*2] Transferor Status

[\*36] Transferor

[\*36a] Found

The courts in the following cases found, based on the facts and circumstances of each case, that a party was a transferor for the purposes of the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

In *Coulbourne v. Rollins Auto Leasing Corp.*, 392 F. Supp. 1198 (D. Del. 1975), the court held that a used automobile dealer was a "transferor" as required by the Motor Vehicle Information and Cost Savings Act. The count of the complaint charging that the automobile leasing corporation, which had sold an automobile to the purchaser, had violated provisions of 15 U.S.C.A. § 1988(a) (now 49 U.S.C.A. § 32705(a)(1)(B)), requiring the "transferor" of a motor vehicle either to disclose the cumulative mileage registered on the odometer or to disclose that the actual mileage is unknown, was sufficient to state a cause of action against the corporation, found the court.<sup>n78</sup>

The court in *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977), found that an automobile auctioneer was a transferor within the meaning of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), when it transferred ownership of a 1971 Plymouth station wagon to a purchaser. Although the auctioneer argued that its practice was not to purchase cars but simply to auction the cars while acting as an agent for the lease company, in view of the strong documentary evidence that indicated that ownership of this particular motor vehicle was in fact transferred to the auctioneer, the court rejected this argument.

In *Oettinger v. Lakeview Motors, Inc.*, 675 F. Supp. 1488 (E.D. Va. 1988), where a consumer brought an action against an automobile dealership alleging claims of odometer fraud, the court found that the dealership was a "transferor" within the meaning of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(a) (now 49 U.S.C.A. § 32705).

The court in *Duval v. Midwest Auto City, Inc.*, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), determined that a corporate car dealer, rather than the president of the corporation, was the owner and therefore transferor of a vehicle for the purposes of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705).<sup>n79</sup> The intention of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), of having each transferor give odometer information to a buyer, together with the extremely strong documentary evidence of ownership that an automobile auctioneer created, led the court in *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983), to conclude that the auctioneer's brief retention of the title of a car made it a "transferor" under the Act.

The sole proprietor of an auto dealership was a "transferor" within the definition contained in the regulation promulgated pursuant to the Motor Vehicle Information Cost and Savings Act, 49 C.F.R. § 580.3, and therefore the sole proprietor was accountable for a violation of 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), determined the court in *Bryant v. Thomas*, 461 F. Supp. 613 (D. Neb. 1978).n80

An automobile buyer brought an action to recover for odometer rollback, and after the jury returned a verdict for the buyer, the sellers moved for judgment as a matter of law and for a new trial, and the district court in *Bishop v. Mid-America Auto Auction, Inc.*, 807 F. Supp. 683 (D. Kan. 1992), determined that the evidence was sufficient to allow the jury to find that the sellers were "transferors" within the meaning of the Motor Vehicle Information Cost and Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), where one seller held an ownership interest in the vehicle and would either suffer a loss or realize a profit on the sale, and another seller was the title holder, but conducted the sale through his auction house.

[\*36b] Not found

A party was not a transferor for the purposes of the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., found the courts in the cases below, based on the facts and circumstances of each case.

The director and agent of the corporate seller of an automobile was not a "transferor" for the purposes of a section of the Motor Vehicle Information and Cost Savings Act governing odometer tampering, 15 U.S.C.A. § 1983 (now 49 U.S.C.A. § 32703), found the court in *McGinty v. Beranger Volkswagen, Inc.*, 633 F.2d 226, 30 Fed. R. Serv. 2d 368 (1st Cir. 1980), where the director never had any ownership interest in the automobile, and thus could not be liable for any misrepresentation as to the automobile's mileage. Although the purchaser contended that the director could nevertheless be held liable under 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), which imposes liability on any "person" who violates the statute, the court held that liability under this section is derivative of 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705) and dependent on a showing that the director was a "transferor." In line with the weight of authority, the court concluded that the defendant, as director and agent of the transferor, was not liable under 15 U.S.C.A. § 1989.

In *Coulbourne v. Rollins Auto Leasing Corp.*, 392 F. Supp. 1198 (D. Del. 1975), the court held that an employee of a used automobile dealer was not a "transferor" as required by the Motor Vehicle Information and Cost Savings Act. Although a count of the complaint charged that both the automobile leasing corporation, which had sold an automobile to the purchaser, as well as the employee of the corporation had violated provisions of 15 U.S.C.A. § 1988(a) (now 49 U.S.C.A. § 32705(a)(1)(B)), requiring the "transferor" of a motor vehicle either to disclose the cumulative mileage registered on the odometer or to disclose that the actual mileage is unknown, that count had to be dismissed with respect to the individual employee, a corporate sales agent, determined the court, since the sales agent had no interest in the title to the automobile, and therefore did not constitute a "transferor" within the meaning of § 1988.n81

Since, as an individual, the president-salesman of an automobile dealership never had any personal ownership interest in an automobile, found the court in *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979), he could not be held liable for a violation of the statute governing mileage disclosure when the ownership of a motor vehicle is transferred, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), and where the sole owner of the vehicle was the corporate dealership, the salesman-president was not a "transferor," notwithstanding that he made the entries found to have violated the statute.

The bank to which the seller, a dealer, of a new car "assigned" a buyer's financing paper was not a transferor under the Odometer Act of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), found the court in *Parker v. DeKalb Chrysler Plymouth*, 459 F. Supp. 184 (N.D. Ga. 1978), judgment aff'd on other grounds, 673 F.2d 1178 (11th Cir. 1982).

Neither the auction service, which merely provided the means by which a prior transferor sold a used car to a dealer, nor the seller of the used car to the dealer for resale were transferors to the party who ultimately purchased the vehicle from the dealer under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), determined the court in *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987).

In *Paul's Auto World v. Boyd*, 881 F.2d 1077 (6th Cir. 1989) (not designated for publication), an odometer tampering case where the purchaser of an automobile appealed the district court's grant of summary judgment for the previous sellers of the automobile under the Federal Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), the appeals court affirmed the district court's grant of summary judgment for one seller, since the evidence supported a finding that the seller was not a transferor as required by the Act. The court noted that the seller filed an affidavit and various documents to support his contention that he was not a transferor of the vehicle in question, and the purchaser again failed to file a response or any type of countervailing documentation.

The manager of a car dealer against which a buyer brought suit under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), for the alleged failure to disclose the true mileage of a purchased vehicle, was not a "transferor" of the vehicle under the Act, found the court in *Romans v. Swets Motors, Inc.*, 428 F. Supp. 106 (E.D. Wis. 1977), and was therefore not liable for the alleged false and fraudulent representations and failures to disclose.

An action was brought by the purchaser of an automobile to recover damages arising out of an allegedly false odometer disclosure statement, and on the defendants' summary judgment motions, the district court in *Cwiakala v. Economy Autos, Ltd.*, 587 F. Supp. 1462 (N.D. Ind. 1984), found that an individual who was the president, general manager, and agent of an automobile dealership was not a "transferor" within the meaning of the section of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), relating to odometer disclosures and, hence, could not be held personally liable for the alleged misrepresentations in the disclosure statement for the vehicle in question.

The court in *American Hardward Mutual v. Rood*, 1985 WL 3327 (N.D. Ill. 1985), found that an auction company was not the transferor of a vehicle under the definition contained in the pertinent regulation, 49 C.F.R. § 580.3, promulgated pursuant to the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1981 (now 49 U.S.C.A. § 32701), where the auction company had never acquired title to the vehicle. The auction form expressly listed the party representing the mileage and from whom title was transferred, observed the court, and the rules for the auction explicitly stated that the auction company did not warrant the veracity of the odometer reading. While an auctioneer should not be able to circumvent the clear call of the statute merely by disclaiming warranty, noted the court, here there was no indication that the auction company was acting more as an agent for the seller than for the purchaser. In other words, there was no justifiable reliance on the auctioneer here, where the auction company had made available to the purchaser the name and address of the seller, determined the court. The lack of agency, in conjunction with the express disclaimer, held the court, reduced the involvement of the auction company to that of a mere conduit as opposed to a transferor within the intent of 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705).

Where an auction company alleged that it had never acquired a legal or equitable title to the automobile that was the subject of the lawsuit in *Lile v. Louisville Auto Auction*, 1985 WL 6151 (S.D. Ind. 1985), and where it also did not appear that the auction company was an owner of record, or that there was any other evidence that the auction company had an ownership interest in the automobile, the court found that the auction company was not a transferor within the meaning of the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705).

In *Riverside Lincoln Mercury Sales, Inc. v. Auto Dealers Exchange Co.*, 1987 WL 7280 (N.D. Ill. 1987), a case concerning an inaccurate odometer reading on a vehicle sold at a used automobile auction, the court found that there

was no evidence that the auction company was a transferor within the meaning of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), where the auction company had no ownership interest in the automobile. The physical tendering of a title document is insufficient to transfer ownership to the possessor, held the court.

The president of a corporate car dealer was not the transferor of a vehicle for the purposes of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), determined the court in *Duval v. Midwest Auto City, Inc.*, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), since the owner of the vehicle, and thus its transferor, was the corporate car dealer.<sup>n82</sup> The manager of an auto dealership was not a "transferor" within the definition contained in 49 C.F.R. § 580.3, and therefore was not accountable for a violation of 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), determined the court in *Bryant v. Thomas*, 461 F. Supp. 613 (D. Neb. 1978).<sup>n83</sup>

An automobile auction company that did not own or hold title to the cars it sold was not a "transferor" under the Odometer Act of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(a), (b) (now 49 U.S.C.A. § 32705), determined the court in *Industrial Indem. v. Arena Auto Auction*, 638 F. Supp. 1030 (D. Minn. 1986), notwithstanding the fact that the auction company received a fee from both the seller and the buyer and that the buyer's check was made out to the auction company. In so finding, the court noted that the auction company had put forth affidavit testimony indicating that it never owned the Toyota in question, that the title certificate for the Toyota did not list the auction company as an owner, and that the auction company did not make out a disclosure statement, but simply passed on the seller's disclosure statement.

See *C & S Nat. Bank of Savannah, Ga. v. Gilliam*, 285 S.C. 313, 329 S.E.2d 3 (Ct. App. 1985), where the court held that liability for failure to disclose that the actual mileage of an automobile is different from the odometer reading is limited to the "transferor" of the vehicle, and the lessor of a rented automobile is not the "transferor" where the lease does not pass title to the vehicle and where the lease merely contains an option to purchase at the end of the leased term for the residual value of the automobile.

[\*37] Agent

The courts in the following cases recognized that under the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., a transferor's agent may be held liable for odometer fraud.

In *Heffler v. Joe Bells Auto Service*, 946 F. Supp. 348 (E.D. Pa. 1996), the court recognized that a sales agent of an automobile owner could be held liable for a violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710).

The court in *Delay v. Hearn Ford*, 373 F. Supp. 791, 28 A.L.R. Fed. 576 (D.S.C. 1974), recognized that an agent may be liable for rolling back an odometer in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703).

Liability under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), may properly lie against a corporate agent who violates the Act's provisions, recognized the court in *Stier v. Park Pontiac, Inc.*, 391 F. Supp. 397 (S.D. W. Va. 1975).

[\*38] Owner

In the cases that follow, the courts found that a party was not an owner of a vehicle for the purposes of the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances of each case.

The bank to which the seller, a dealer, of a new car "assigned" a buyer's financing paper was not an owner under the Odometer Act of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), found the court in *Parker v. DeKalb Chrysler Plymouth*, 459 F. Supp. 184 (N.D. Ga. 1978), judgment aff'd on other grounds, 673 F.2d 1178 (11th Cir. 1982).

A father who held the title to an automobile that was under the sole control of his son did not fall within the meaning of an "owner" in the provision of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1987 (now 49 U.S.C.A. § 32704), requiring an owner or his agent to give notice of an inaccurate odometer reading to a purchaser of the car, found the court in *Goeman v. Keating*, 498 F. Supp. 700 (D.S.D. 1980), where the father never had possession of the car, had no control over the car, and received no money upon the sale of the car.

[\*39] Absence of privity

Under the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., the courts in the cases below held or recognized that an absence of privity will not protect successive transferors from liability.

Transferors of an automobile cannot be protected from liability under the odometer requirement provisions of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), by the absence of privity between themselves and an actual purchaser, because the consumer is entitled to recover damages under the Act from each transferor in the chain of title who has made a false mileage statement with an intent to defraud, held the court in *Ralbovsky v. Lamphere*, 731 F. Supp. 79 (N.D. N.Y. 1990).

The concept of privity cannot be used to bar a buyer's recovery under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), held the court in *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979), since the dispositive finding is the transferor's intent to defraud, and the consumer may recover statutory damages from each transferor in the chain of title who has made false mileage statements with such intent.

Legal liability to an automobile purchaser is not limited to the immediate seller under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), and each successive seller may be held liable for the statutory recoveries provided, held the court in *Stier v. Park Pontiac, Inc.*, 391 F. Supp. 397 (S.D. W. Va. 1975).

\*\*\*\* Comment:

n84 In so holding, the court in relied on the previous language of the Act that provided that "any person" could be liable under § 1989(a) to show that Congress indicated an intent to extend liability to and impose liability upon any person violating the law. The language of the remedy provision of the Act was subsequently changed to read: "A person." It does not appear that Congress intended to make any substantive change to this section by amending the language in this way.

Civil liability for fraudulent misrepresentations regarding the actual mileage of a used vehicle is imposed upon each person in the chain of title who has violated the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), held the court in *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987).

By providing in the civil damage provision of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), that any person shall be liable, the statute allows an automobile buyer to sue not only the immediate seller, but also any other persons in the chain of title who may have been involved in the fraud, held the court in *Rice v. Gustavel*, 891 F.2d 594 (6th Cir. 1989).

\*\*\*\* Comment:

n85 In so holding, the court quoted the previous language of the civil damages provision of the Act that "any person" shall be liable. However, when the Act was recodified, this language was changed, and the current version of this section, 49 U.S.C.A. § 32710(a), provides that: "A person that violates this chapter or a regulation prescribed or order issued under this chapter, with intent to defraud, is liable for 3 times the actual damages or \$ 1,500, whichever is greater." It appears that Congress did not mean to effect a substantive change to this provision by amending its language.

In *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976), the court recognized that transferors of a used automobile are not insulated from liability under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1984, 1988 (now 49 U.S.C.A. §§ 32703, 32705), for a false odometer reading by virtue of any lack of privity with the ultimate purchaser of the automobile.

Actions for damages under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), are in no way limited by notions of privity, and liability extends to each and every malefactor in the chain of title, stated the court in *Riverside Lincoln Mercury Sales, Inc. v. Auto Dealers Exchange Co.*, 1987 WL 7280 (N.D. Ill. 1987).

Privity is unnecessary between a defrauded party and a party that violated the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), with an intent to defraud, held the court in *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983).

The purchaser of a vehicle on which the odometer has been altered has standing to bring an action under the Federal Odometer Act (Act), 49 U.S.C.A. §§ 32701 et seq., against all prior owners in the chain of title, even where there is no allegation that the prior owners made a false statement directly to the purchaser, held the court in *Carrasco v. Fiore Enterprises*, 985 F. Supp. 931 (D. Ariz. 1997). If a defrauded ultimate purchaser could only sue the violator of the Act who directly transferred the vehicle to the ultimate purchaser, noted the court, then each owner in the chain who discovered the violation and then perpetuated the fraud without disclosing liability would be insulated from liability merely because the vehicle was sold many times.

The concept of privity cannot be used to bar a plaintiff's recovery under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), recognized the court in *State of Utah by Wilkinson v. B & H Auto*, 701 F. Supp. 201 (D. Utah 1988).

[\*3] Multiple Transferors

[\*40] Joint and several liability -- Generally

The courts in the following cases held or recognized that defendants are jointly and severally liable under the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

The court in *Rice v. Gustavel*, 891 F.2d 594 (6th Cir. 1989), recognized that liability under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710, is to be joint and several, rather than separate and individual.

The general rule of tort law imposes liability on multiple tortfeasors through joint and several liability, and there is no provision of the Federal Odometer Act (Act) that changes this general rule, held the court in *Roberts v. Robert V. Rohrman, Inc.*, 909 F. Supp. 545, 29 U.C.C. Rep. Serv. 2d 1208 (N.D. Ill. 1995). While it is true that the purpose of the Act is to prevent odometer tampering, this may be done just as effectively using a form of joint and several liability,

concluded the court.

\*\*\*\* Caution:

An earlier Seventh Circuit district court case, *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976), held that liability is separate and individual under the Act, see § 42.

In an odometer case, each codefendant found guilty under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), is jointly and severally liable for the whole judgment to the purchaser, recognized the court in *Yowell v. Boyd Chevrolet, Inc.*, 504 F. Supp. 77 (W.D. Okla. 1980).

See *Slaymaker v. Westgate State Bank*, 241 Kan. 525, 739 P.2d 444 (1987), where the state court held that liability under the Federal Odometer Act is joint and several and not separate and individual.

[\*41] Found

Based on the facts and circumstances of each of the following cases, the courts found that multiple transferors were jointly and severally liable under the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

The court in *Simpson v. Anthony Auto Sales, Inc.*, 32 F. Supp. 2d 405 (W.D. La. 1998), found that an automobile dealership and its owner were jointly and severally liable to the extent of each purchaser's injury for violating the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710).

In *Riggs v. Anthony Auto Sales, Inc.*, 32 F. Supp. 2d 411 (W.D. La. 1998), where the district found that an automobile dealer and its owner were liable to buyers for violating the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), which prohibits the making of false statements as to the actual mileage on an automobile with the intent to defraud, the court determined that the dealer, its owner, and the lenders were jointly and severally liable to the buyers to the extent of each buyer's injury under the federal odometer law.

Automobile buyers sued the seller of an automobile, the original owner, and others in the chain of title for fraudulent rollback of the odometer mileage, and the court in *Rice v. Gustavel*, 891 F.2d 594 (6th Cir. 1989), determined that under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(a)), the liability of the seller, owner, and others was joint and several, and therefore, the buyers were not entitled to full treble damages from each defendant individually. Although the buyers contended that joint and several liability was ineffective, and that separate and individual liability was the most effective and cost efficient means to eradicate odometer tampering, the court held that this was a decision for Congress to make, not the courts. Liability for tortious conduct is normally joint and several, held the court, and Congress did not change the normal rule when it passed the Act.

[\*42] Separate and individual liability -- Generally

Under the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., held the courts below, separate and individual liability is imposed on each automobile seller who violates the Act.

The Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1989, 1989(a)(1) (now 49 U.S.C.A. §§ 32710, 32710(a)), imposes separate and individual liability for trebled damages on each automobile seller who violates the Act, held the court in *Ferris v. Haymore*, 967 F.2d 946 (4th Cir. 1992), as amended, (July 22, 1992). Joint and

several liability applies only where multiple defendants are responsible for a single tort, not where multiple defendants have each committed a separate tort, reasoned the court, and in any event, when Congress has intended to impose joint and several liability rather than separate and individual liability, it has so provided explicitly. Section 1989 (now 49 U.S.C.A. § 32710) is unmistakably punitive in character, explained the court, and spreading among several fraudulent parties what are in truth relatively small damages awards would substantially dilute the deterrent force of the statute.

\*\*\*\* Comment:

n86 n87 In so holding, the Fourth Circuit Court of Appeals in stated that it was not persuaded by the Sixth Circuit's contrary decision in *Rice v. Gustavel*, 891 F.2d 594 (6th Cir. 1989), see § 40. The court did not even purport to rest its decision that a purchaser may not recover treble damages from each seller found guilty of violating the federal odometer statute on the terms of the statute, noted the court, but simply stated that "[t]he fact that each such person shall be liable . . . does not necessarily preclude the conclusion that liability is to be joint and several, rather than separate and individual." Then, without analysis, the court invoked the common-law rule that "[l]iability for tortious conduct is normally joint and several" in holding that the federal odometer statute does not permit a purchaser to recover the full measure of damages against each defendant, pointed out the court in , adding that it did not believe that this holding could be reconciled with the plain terms of the odometer statute. The court also stated that it could not agree with that the common-law principle of joint and several liability can be imported into a provision such as 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), at least not where each fraudulent transfer was by a separate entity, because each fraudulent transfer of an automobile is a separate violation of the federal odometer statute (15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705); 49 C.F.R. § 580.5). Not only is there no evidence "that Congress was concerned with softening the blow on joint wrongdoers," which would justify a rule so at odds with the statute's punitive intent, but there is affirmative evidence that Congress intended the full punitive force of the statute to be felt by every person who defrauds the public through deceptive odometer manipulation -- joint wrongdoers no less so than others, reasoned the court. The Fourth Circuit had held in an earlier case that "judicial notions of fairness and equity must yield to the prophylactic policies of the treble-damage remedy," noted the court.

Each violation of the federal odometer law, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1983, 1988 (now 49 U.S.C.A. §§ 32703, 32705), is a separate transaction and each issuer of a false odometer statement is subject to separate and individual liability, held the court in *Alley v. Chrysler Credit Corp.*, 767 F.2d 138, 2 Fed. R. Serv. 3d 914 (5th Cir. 1985).

\*\*\*\* Caution:

In two subsequent opinions from the Western District of Louisiana joint and several liability was found with respect to an automobile dealership and its owner. See § 41.

In *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976), the court held that each person violating the provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988(b), 1989(a), 1990 (now 49 U.S.C.A. §§ 32705, 32709, 32710), concerning the alteration of odometer readings is separately subject to liability to the purchaser of the automobile.

\*\*\*\* Caution:

A later Seventh Circuit district court case, *Roberts v. Robert V. Rohrman, Inc.*, 909 F. Supp. 545, 29 U.C.C. Rep. Serv. 2d 1208 (N.D. Ill. 1995), held that liability among defendants is joint and several, see § 40.

Under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1986 (now 49 U.S.C.A. § 32703), each defendant joined in a conspiracy is liable for the whole judgment of each plaintiff, held the court in *Duval v. Midwest Auto City, Inc.*, 425 F. Supp. 1381 (D. Neb. 1977), judgment aff'd on other grounds, 578 F.2d 721, 25 Fed. R. Serv. 2d

1090 (8th Cir. 1978).

[\*43] Found

The courts in the following cases found, based on the facts and circumstances, that multiple transferors were separately and individually liable under the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

Where separate odometer statements were issued for the same vehicle, one by a credit corporation on transfer to a dealer following repossession and a second by the dealer on the sale to another, each issuer was subject to separate and individual liability under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1983, 1988 (now 49 U.S.C.A. §§ 32703, 32705), determined the court in *Alley v. Chrysler Credit Corp.*, 767 F.2d 138, 2 Fed. R. Serv. 3d 914 (5th Cir. 1985), and hence, the buyer's settlement and release of the dealer did not release the credit company from its liability.

In a civil odometer fraud action brought under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(a)), the court in *Saber v. Dileo*, 723 F. Supp. 1167 (E.D. La. 1989), found that a nonsettling defendant was separately and individually liable to the purchasers of automobiles for the full amount of the treble damages awarded, \$ 10,500, and therefore was not entitled to a reduction of the damages by the amounts the purchasers had received from the settling defendants prior to the trial.

A violator who was the last link in a chain of wrongdoers and who admitted tampering with an odometer but denied knowledge of any prior violations would be liable for the full amount of actual damage, determined the court in *Cantrell v. Thaler Ford Sales, Inc.*, 485 F. Supp. 528 (S.D. Ohio 1980), where the violator had sold the car to the claimant and where the incremental damages limited to the mileage the violator had added to the car would deny the claimant her actual damages, the difference between the price she paid for the car and the fair market value of the vehicle with the number of miles actually traveled by the car.

\*\*\*\* Comment:

The court in *Rice v. Gustavel*, 891 F.2d 594 (6th Cir. 1989), recognized that liability under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710, is to be joint and several, rather than separate and individual.

[\*44] Cross-claims among transferors

[\*44a] Allowed

It has been held that defendants under the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., should be allowed to recover on cross-claims.

In *Roberts v. Robert V. Rohrman, Inc.*, 909 F. Supp. 545, 29 U.C.C. Rep. Serv. 2d 1208 (N.D. Ill. 1995), the court concluded that since the general rule of tort law imposes liability on multiple tortfeasors through joint and several liability, and since there is no provision of the Federal Odometer Act (Act) that changes this general rule, defendants under the Act should be allowed to recover on an indemnity claim. While it is true that the purpose of the Act is to prevent odometer tampering, noted the court, this may be done just as effectively using a form of indemnification.

\*\*\*\* Caution:

An earlier Seventh Circuit district court decision, *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976), stated that such cross-claims are precluded. See § 44[b].

[\*44b] Not allowed

Cross-claims among defendants are not allowed under the civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., held or recognized courts in the following cases.

Recovery of indemnification from other persons subject to liability for violating the provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988(b), 1989(a), 1990 (now 49 U.S.C.A. §§ 32705, 32709, 32710), concerning the alteration of odometer readings, is precluded, held the court in *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976).

\*\*\*\* Caution:

A later Seventh Circuit district court decision in *Roberts v. Robert V. Rohrman, Inc.*, 909 F. Supp. 545, 29 U.C.C. Rep. Serv. 2d 1208 (N.D. Ill. 1995), held that such cross-claims should be allowed. See § 44[a].

Codefendants who are found liable with each other to a purchaser under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), are precluded from recovering on cross-claims against each other for indemnity, recognized the court in *Yowell v. Boyd Chevrolet, Inc.*, 504 F. Supp. 77 (W.D. Okla. 1980).

The court in *Charnetsky v. Gus Paulos Chevrolet, Inc.*, 754 F. Supp. 188 (D. Utah 1991), held that a cross-claim does not exist between wrongdoers under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710). A contrary holding would permit wrongdoers in the chain of bad odometer statements to benefit from prior wrongdoers, when all have contributed to violating the statute, stated the court, and to permit wrongdoers to bring an action against others in the chain would lead a subsequent wrongdoer to ignore prior violations of others and to perpetrate the wrongdoing.

[\*C] Particular Violations of Statute

[\*1] Tampering

[\*45] Odometer rolled back

[\*45a] Violation -- Found

Based on the facts and circumstances presented, it was found in the following cases that a transferor violated the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., by rolling back a vehicle's odometer.

See *Klein v. Pincus*, 397 F. Supp. 847 (E.D. N.Y. 1975), where the court noted that an automobile buyer sued under 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711) "on the ground that defendant reset or altered the odometer of a motor vehicle purchased by the plaintiff from the defendant and/or failed to disclose the cumulative mileage listed on the odometer or that the actual mileage was unknown," and where the court, while expressly holding that 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705) was violated, and while not expressly referring to the tampering provision, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703), concluded that "the defendant violated the statute in this case in the respects claimed by the plaintiff." The court referred to evidence indicating that the buyer had purchased from the defendant an automobile with approximately 40,000 miles on the odometer, that two previous owners of the automobile

had had it inspected with over 75,000 miles on the odometer, and that the defendant had purchased the automobile at an auction at a time when the odometer was in the 80,000-mile range.

In *Weatherby v. J.J. Wright Oldsmobile, Inc.*, 1986 WL 2610 (N.D. Ill. 1986), the court denied a seller's motion for summary judgment based on the purchaser's allegations that the seller altered the odometer in a car that was sold through the seller to the purchaser in violation of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703). Although the seller argued that the odometer on the car it sold to the purchaser had been altered prior to its own purchase of the car, and therefore that it lacked the intent to defraud necessary for finding a violation of the Act, the court found that while this argument might ultimately prevail, the case law provided that sellers who reasonably should know that a vehicle's odometer reading has been changed but who close their eyes to that fact can be held liable under the Act. In this case, where discovery had not been closed, the seller's conclusory and self-serving affidavits that its salesmen had no reason to suspect odometer tampering did not suffice to meet its burden under *Fed. R. Civ. P. 56* of showing undisputed facts that would exempt it from liability under the Act, concluded the court.

[\*45b] Not found

The courts in the cases that follow found that a transferor did not violate the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., by rolling back a vehicle's odometer, based on the facts and circumstances of each case.

In view of the fact that an odometer registered only two miles less at the time of resale than it did at the time of purchase by a dealer, and evidence that, after the buyer had driven the automobile for about three months, the automobile registered 16 miles less than when the buyer purchased the automobile, the court in *Clayton v. McCary*, 426 F. Supp. 248 (N.D. Ohio 1976), found that the inaccuracy of the odometer was due to a defect in the odometer and that the dealer had not illegally tampered with the odometer under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703).

The court in *Berns v. Ginn*, 1986 WL 6150 (S.D. Ohio 1986), determined that a purchaser failed to allege or provide any evidence to support the contention that a vehicle owner or the owner's employee tampered with a 1979 Toronado's odometer in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), where another seller allegedly tampered with the odometer several sales previous to the last seller's ownership. The court observed that the purchaser bought the vehicle with an odometer reading of approximately 52,150 miles from the owner and seller of the automobile, and that the owner, acting through its employee, provided an odometer statement showing the actual mileage to be approximately 52,150 miles. The owner had purchased the car the day before and received a sworn odometer statement from the previous owner that was the basis for, and virtually identical to, that which the owner disclosed to the purchaser, and the owner and seller was the last in a long line of owners of the vehicle, added the court.

[\*45c] Intent to defraud -- Found

The courts in the following cases found, based on the facts and circumstances of each case, that a transferor rolled back a vehicle's odometer in violation of the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., with an intent to defraud the purchaser.

Where a purchaser traded his automobile, with approximately 72,000 miles on the odometer, to an automobile dealer, and subsequently repurchased from the same dealer the same automobile, which had 49,000 miles on the odometer on the date of repurchase, the court in *Delay v. Hearn Ford*, 373 F. Supp. 791, 28 A.L.R. Fed. 576 (D.S.C. 1974), an action to recover damages for illegal odometer tampering, denied the dealer's motion for summary judgment, holding that the affidavits presented were sufficient to support a reasonable inference that the dealer through its agents had rolled back

the odometer in violation of § 404 of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703), and that an intent to defraud arose in the absence of an explanation of the odometer change. The court observed that since the automobile was under the dominion of the automobile dealer during the entire time in which the alleged odometer alteration took place, the conclusion of illegal tampering was compelled in the absence of a showing by the dealer as to when the rollback occurred and by whom it was done.

Suit was brought for odometer tampering under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), and the appeals court in *Shore v. J. C. Phillips Motor Co.*, 567 F.2d 1364 (5th Cir. 1978), found that evidence that the automobile purchaser was not supplied with an odometer statement on the vehicle, that the odometer reading was 20,125, and that a repair order had showed the mileage of the car to be 50,365 was sufficient to establish a violation of the Act and a showing of an intent to defraud. Where there has been a reduction in the odometer reading while a vehicle is in the possession of a transferor, fraud is implied in the absence of an explanation, held the court.

An automobile purchaser sued a seller for violation of the motor vehicular odometer requirements under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710), upon the transfer of ownership of three automobiles, and the court in *Shipe v. Mason*, 500 F. Supp. 243 (E.D. Tenn. 1978), aff'd without reported opinion, 633 F.2d 218 (6th Cir. 1980), found that as the seller offered no satisfactory explanation for setting back the odometers of these vehicles, his intent to defraud in reducing those odometer readings while the vehicles were in his possession was implied. The seller's contention that he had rolled back the odometers on the vehicles at the request of the buyer, and as a condition precedent to the buyer's purchase of the vehicles, was not a viable defense, determined the court.

Under Kentucky's doctrine of offensive collateral estoppel, found the court in *May v. Oldfield*, 698 F. Supp. 124 (E.D. Ky. 1988), a used car salesman accused by a private buyer of altering an automobile's odometer was estopped from litigating the issue of his civil liability under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), by virtue of his prior conviction of mail fraud arising out of tampering with the same odometer. The court noted that the issue of alteration of the odometers was identical in both cases, and the jury in the prior criminal action was required to apply a higher burden of proof than that applicable to a civil action; the fact that the car buyer had not been party to the previous criminal prosecution did not preclude application of the doctrine of offensive collateral estoppel.

An automobile buyer brought an action to recover for odometer rollback, and after the jury returned a verdict for the buyer, the sellers moved for judgment as a matter of law and for a new trial, and the district court in *Bishop v. Mid-America Auto Auction, Inc.*, 807 F. Supp. 683 (D. Kan. 1992), determined that the evidence was sufficient to allow the jury to find that the sellers were "transferors" within the meaning of the Motor Vehicle Information Cost and Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), and to hold them liable for odometer tampering.

[\*45d] Not found

Based on the facts and circumstances of each of the cases below, the courts found that a purchaser failed to show a transferor's intent to defraud as required to impose liability under the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, relating to odometer rollback.

In an action brought by the buyer of a used automobile against a dealer under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), alleging that the dealer altered the odometer of the vehicle with an intent to deceive the buyer, the court in *LePiere v. Phoenix Emprise, Inc.*, 500 F. Supp. 251 (E.D. Pa. 1980), found that the buyer failed to meet her burden of proving the requisite intent to defraud on the part of the dealer. There was no showing by the buyer that the dealer tampered with the odometer, observed the court, and

this case differed from the classic cases falling under the Act where at the time the vehicle was sold, the actual mileage was in excess of that indicated on the odometer. In the case sub judice, the vehicle odometer at the time the dealer sold it to the buyer registered a higher number of miles (63,000) than was on it (58,662) at the time the dealer purchased the vehicle, noted the court, and there was no testimony that the actual mileage was in excess of that indicated on the odometer. Although the buyer received a Certificate of Title indicating 86,000 miles on the vehicle when she purchased it, there was no testimony presented by the buyer to account for that mileage, found the court. Further, there was no testimony presented by the buyer concerning the written "mileage 86 743" that appeared at the top of the reassignment of title form, stated the court.

In *Paul's Auto World v. Boyd*, 881 F.2d 1077 (6th Cir. 1989) (not designated for publication), an odometer tampering case where the purchaser of an automobile appealed the district court's grant of summary judgment for the previous sellers of the automobile under the Federal Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), the appeals court affirmed the district court's grant of summary judgment for two of the three sellers, since the purchaser failed to provide any evidence of an intent to defraud on the part of these sellers. The sellers complied with all of the specific duties that they owed to the purchaser when they provided a sworn statement that the odometer readings reflected the car's actual mileage, determined the court, and the sellers provided sworn affidavits in their motions for summary judgment.

Mere showing of a discrepancy between the mileage actually showing on the odometers of a used truck-tractor and the mileage recorded on the title certificate by the previous owner was insufficient to support an inference of an intent to defraud through rolling back the odometers in the absence of evidence that the odometers, rather than the title certificates, did not show the correct reading, found the court in *Witkowski v. Mack Trucks, Inc.*, 712 F.2d 1352, 36 U.C.C. Rep. Serv. 1598 (11th Cir. 1983).

[\*46] Odometer disconnected

[\*46a] Violation of statute

It has been found that a transferor did not violate the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on an automobile odometer's disconnection, based on the facts and circumstances.

An automobile manufacturer could not be held liable to an automobile buyer under the Odometer Requirement Act of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), even if the automobile's odometer was disconnected, or never connected, by the manufacturer, found the court in *Reiff v. Don Rosen Cadillac-BMW, Inc.*, 501 F. Supp. 77 (E.D. Pa. 1980), since any such occurrence happened at some substantial distance up the chain of distribution from the buyer's purchase of the automobile. There was no assertion that the manufacturer had any direct contact with the purchaser, or, more importantly, that manufacturer made representations to the purchaser about the mileage of the automobile, observed the court.

[\*46b] Intent to defraud

It has been found, based on the facts and circumstances, that a transferor did not disconnect an automobile's odometer with an intent to defraud as required to impose liability for violation of the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

The court in *Marcel v. Zamin*, 1990 WL 170130 (E.D. La. 1990), did not find that an automobile dealer intentionally or fraudulently disconnected the odometer of an automobile prior to its sale in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1984, 1985 (now 49 U.S.C.A. § 32703), where there would have been no point in disconnecting the odometer at the time of the sale because it already registered in excess of 84,000 miles. Further, added

the court, even if the odometer was not functional while on the dealer's car lot, it was more likely than not that the odometer reading would not have been significantly greater, since the dealer purchased the auto on March 30, 1989, only 2 months prior to the sale to buyer, and the odometer registered 84,099 at the time of the transfer to the dealer by another dealer. Once the vehicle was purchased, explained the court, the dealer had no interest in the number of miles registered on the odometer and had nothing whatsoever to gain by disconnecting the odometer.

[\*47] Conspiracy to tamper with odometer

[\*47a] Violation of statute

The courts in the following cases determined that transferors did not violate the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., by conspiring to tamper with a vehicle's odometer, based on the facts and circumstances of each case.

It was alleged that both an automobile-leasing corporation and the corporation's sales agent had together conspired to sell an automobile to the purchasers with an odometer inaccurately reflecting the actual mileage, in violation of 15 U.S.C.A. § 1986 (now 49 U.S.C.A. § 32703), and the court in *Coulbourne v. Rollins Auto Leasing Corp.*, 392 F. Supp. 1198 (D. Del. 1975), determined that such allegations failed to state a cause of action against either of the defendants. Observing that 15 U.S.C.A. § 1986 provided that no person shall conspire to violate: (1) 15 U.S.C.A. § 1983 (now 49 U.S.C.A. § 32703), which precluded the sale or use of a device designed for causing odometer setbacks; (2) 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703), which prohibited the actual setting back of odometers; or (3) 15 U.S.C.A. § 1985 (now 49 U.S.C.A. § 32703), which made it unlawful to drive an automobile with a nonfunctioning odometer with intent to defraud, the court found that nothing in the purchaser's complaint could possibly be related to any of the enumerated statutory sections.

The buyer of an automobile sued the seller and manufacturer for violations of the Odometer Requirement Act of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), and the court in *Reiff v. Don Rosen Cadillac-BMW, Inc.*, 501 F. Supp. 77 (E.D. Pa. 1980), determined that there was certainly no allegation in the complaint, nor any facts stated from which to infer, that the manufacturer joined in a conspiracy to defraud the purchaser.

Insufficient evidence existed to find that the sole proprietor of an auto dealership and the dealership's manager conspired to violate the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1986 (now 49 U.S.C.A. § 32703), found the court in *Bryant v. Thomas*, 461 F. Supp. 613 (D. Neb. 1978), and thus the court could not hold the sole proprietor and manager liable for conspiracy to tamper with an odometer under the Act.

[\*47b] Intent to defraud -- Found

It has been found that transferors conspired to tamper with a vehicle's odometer with an intent to defraud a purchaser in violation of the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances.

Two automobile buyers brought suit against, among others, a dealer, its president, and a wholesale automobile dealer, alleging that they had violated the Motor Vehicle Information and Cost Savings Act (Act) by tampering with the odometers on the automobiles, and the court in *Duval v. Midwest Auto City, Inc.*, 425 F. Supp. 1381 (D. Neb. 1977), judgment aff'd on other grounds, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), found that the dealer, its president, and the automobile wholesaler had engaged in a conspiracy to tamper with odometers in violation of the Act, 15 U.S.C.A. §§ 1984, 1989 (now 49 U.S.C.A. §§ 32703, 32710), with an intent to defraud. Under the Act, where there is a reduction in an odometer reading while a vehicle is in the possession of a transferor, fraud is implied in the absence of an explanation, held the court.

[\*47c] Not found

It has been found that transferors did not conspire to tamper with a vehicle's odometer with an intent to defraud a purchaser in violation of the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances.

The court in *Berns v. Ginn*, 1986 WL 6150 (S.D. Ohio 1986), determined that a purchaser of a 1979 Toronado had not alleged or provided any evidence to support the contention that the previous owner of the vehicle or its employee was involved in a conspiracy to deprive the purchaser of his rights with an intent to defraud in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.). In so finding, the court observed that the purchaser bought the Toronado with an odometer reading of approximately 52,150 miles from the owner and seller of the automobile, and the owner, acting through its employee, provided an odometer statement showing the actual mileage to be approximately 52,150 miles. The owner had purchased the car the day before and received a sworn odometer statement from the previous owner that was the basis for, and virtually identical to, that which the owner disclosed to the purchaser, the owner was the last in a long line of owners of the vehicle, and another seller allegedly tampered with the odometer several sales previous to the last seller's ownership, noted the court. These facts did not establish that the owner or its employee intended to defraud the purchaser, or that the owner or its employee exhibited such a gross negligence or disregard in preparing the odometer disclosure statements that an intent to defraud could be inferred by their conduct, concluded the court.

[\*2] Service, Repair, and Replacement

[\*48] Failure to affix notice of odometer repair

It has been found that a transferor who failed to affix a notice of odometer repair in a vehicle as required by the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., violated this provision with an intent to defraud a purchaser, based on the facts and circumstances.

Evidence that an automobile seller who did not hold title but who had sole control over the car had repaired the car's odometer on two occasions and knew that it was inaccurate and failed to place any notice of repair in the car as required by the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1987, 1989 (now 49 U.S.C.A. §§ 32704, 32710), was sufficient to establish that the seller possessed the requisite intent to defraud the purchaser of the car such that he could be held liable for statutory damages under the Act, determined the court in *Goeman v. Keating*, 498 F. Supp. 700 (D.S.D. 1980). All that is required of a purchaser before recovery will be allowed is that a change in the odometer reading has occurred and that the seller has failed to disclose the change, held the court, and an intent to defraud arises from such proof in the absence of an explanation of the odometer change.

[\*49] Conspiracy

It has been found that automobile transferors did not conspire to repair broken odometers and thus did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32703(4), 32704(a), based on the facts and circumstances.

Where it was alleged that both an automobile-leasing corporation and the corporation's sales agent had together conspired to sell an automobile to the purchasers with an odometer inaccurately reflecting the actual mileage, the court in *Coulbourne v. Rollins Auto Leasing Corp.*, 392 F. Supp. 1198 (D. Del. 1975), determined that such allegations failed to state a cause of action against either of the defendants under the provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1986, 1987 (now 49 U.S.C.A. §§ 32703(4), 32704(a)), which concerned conspiring to

repair broken odometers. Nothing in the purchaser's complaint could possibly be related to these statutory sections, observed the court.

[\*50] Odometer replaced

It has been found that, based on the facts and circumstances, a purchaser failed to prove that a transferor had replaced a vehicle's odometer in violation of the private civil provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32703.

Where purchasers sought damages for alleged odometer tampering, and by the introduction of a photograph of the odometer taken during May 1975, showing that the instrument had a red tenths digit, an indication that the original odometer had been replaced, attempted to prove that the dealer from whom they purchased the vehicle on March 16, 1974, had altered or replaced the mileage indicator, the court in *Birdwell v. Hartsville Motors, Inc.*, 404 F. Supp. 625 (M.D. Tenn. 1975), held that the purchasers failed to prove by a fair preponderance of the evidence that the odometer had been altered or replaced at any time when the automobile was in the possession of the dealer or under the custody or control of the dealer's agents; accordingly, it was held that 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703) was not violated.

[\*51] Failure to affix notice of odometer replacement

[\*51a] Intent to defraud -- Found

Based on the facts and circumstances, it has been found that a transferor violated the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., by failing to affix a notice of odometer replacement, with an intent to defraud a purchaser.

Where the seller of an automobile had received an odometer mileage statement indicating an odometer reading on the automobile of 51,233 miles, and the seller substituted an instrument panel that contained an odometer with a reading of 21,280 miles, but no written notice of such replacement was affixed to the left door frame of the automobile as required by statute, and the buyer had no knowledge of such a replacement, the court in *Kirkland v. Cooper*, 438 F. Supp. 808 (D.S.C. 1977), found that the seller had violated the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), and that such violation was both knowing and willful so as to entitle the buyer to treble damages under the Act.

[\*51b] Not found

The courts in the following cases found that by failing to affix in a vehicle a notice of odometer replacement, a transferor did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., with an intent to defraud a purchaser, based on the facts and circumstances of each case.

Where an automobile buyer brought suit pursuant to the Motor Vehicle Information and Cost Savings Act of 1972, 15 U.S.C.A. §§ 1987, 1989(a), (b) (now 49 U.S.C.A. §§ 32705, 32710), alleging that he purchased a used automobile in which the odometer had been replaced, the court in *Levine v. Ark-Les Switch Corp.*, 451 F. Supp. 55 (W.D. Pa. 1978), determined that a previous corporate owner that was not an automobile dealer was not liable to the buyer, since it was uncontroverted that this previous owner, when it traded in the automobile, apprised the dealer that the odometer had been replaced and that the automobile's true mileage was over 29,000 miles, and since it was thus apparent that the previous owner had no "intent to defraud" in connection with the sale of the automobile, even though the previous owner had failed to give the dealer an odometer mileage statement. Although it did not appear that the previous owner's mechanic had attached a notice of the new odometer to "the left door frame," the fact that a "sticker" containing the required data was attached to a "door jamb" with a warning against its removal, clearly showed that there was no

genuine issue as to any material fact that would establish that the previous owner violated the § 1987 (now 49 U.S.C.A. § 32704) requirement with the intent to defraud anyone pursuant to 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710), concluded the court.

The owner of an automobile sued a dealer that had replaced a malfunctioning odometer in the automobile over a year before the car was sold, and on the dealer's motion for summary judgment, the district court in *Hill v. Bergeron Plymouth Chrysler, Inc.*, 456 F. Supp. 417 (E.D. La. 1978), determined that the dealer could not be held liable for violating the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), by failing to attach the required notice to the door frame absent evidence of an intent to defraud. There was no evidence in the record as to any motive on the part of the dealer for misrepresenting the mileage figure, noted the court, nor was there even an allegation that the dealer was in collusion with a transferor who may have profited from the reduced mileage figure on the odometer. If anything, the fact that the car was not sold until over a year after the dealer had replaced the odometer certainly created a strong inference that the replacement was not done by the dealer in anticipation of, or in preparation for, a sale, found the court.

Although a motor coach manufacturer that had replaced an odometer on a coach failed to affix a notice of replacement, determined the court in *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998), the manufacturer was not liable for violating the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, absent evidence that it acted with intent to defraud or stood to gain financially from its failure to affix such a notice.

[\*52] Failure to reset new odometer

Based on the facts and circumstances of each of the cases below, the courts found that a transferor who failed to reset a new odometer in a vehicle, while violating the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., did not do so with an intent to defraud a purchaser as required to impose liability.

The owner of an automobile sued a dealer that had replaced a malfunctioning odometer in the automobile over a year before the car was sold, and on the dealer's motion for summary judgment, the district court in *Hill v. Bergeron Plymouth Chrysler, Inc.*, 456 F. Supp. 417 (E.D. La. 1978), determined that the dealer could not be held liable for violating the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), by failing to reset the new odometer, absent evidence of an intent to defraud. There was no evidence in the record as to any motive on the part of the dealer for misrepresenting the mileage figure, noted the court, nor was there even an allegation that the dealer was in collusion with a transferor who may have profited from the reduced mileage figure on the odometer. If anything, the fact that the car was not sold until over a year after the dealer had replaced the odometer certainly created a strong inference that the replacement was not done by the dealer in anticipation of, or in preparation for, a sale, found the court.

Although a motor coach manufacturer that had replaced an odometer on a coach failed to reset the new odometer, determined the court in *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998), the manufacturer was not liable for violating the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 to 32711, absent evidence that it acted with intent to defraud.

[\*53] Failure to disclose engine replacement

[\*53a] Violation of statute

It has been found, based on the facts and circumstances, that a transferor did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by failing to disclose that a vehicle's engine had been replaced.

The buyers of an automobile brought an action against a transferor alleging a violation of the mileage disclosure

requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), and the court in *Michael v. Ferris Auto Sales*, 650 F. Supp. 975 (D. Del. 1987), determined that the mileage disclosure requirements were not violated when the motor vehicle, whose original engine had been replaced with an older engine, was transferred without disclosure by the transferor that the odometer reading was different from the number of miles the vehicle had actually traveled. Although the purchasers asserted that because the engine was the most important component of a vehicle, the number of miles on the engine was the number of miles the vehicle had actually traveled within the meaning of § 1988 of the statute, and that the statute and the rules promulgated thereunder required the transferor to disclose any discrepancy between the odometer reading and the number of miles on the engine, the court found that this argument failed in two respects. First, noted the court, there was no indication in the legislative history of the odometer statute that Congress intended to address any problems other than actual odometer tampering or nondisclosure to purchasers of vehicles whose odometers had been altered or reset. Nondisclosure of the replacement of vehicle components other than the odometer simply did not appear as a federal concern, regardless of the impact of such replacements on the reliability of the odometer reading as an index of a vehicle's condition and value, stated the court. Second, the purchasers' interpretation of the statute invited purchasers to take advantage of a federal treble damage remedy whenever a transferor failed to disclose that any one of the many vehicle components that tend to depreciate with mileage has been replaced with an older part, reasoned the court. Even though the engine was an important part of a motor vehicle, the purchasers' logic extended as well to the brakes, the tires, and the transmission. Congress surely did not intend, by enacting the odometer statute, to federalize such a large segment of common-law fraud, concluded the court.

[\*53b] Intent to defraud

It has been found that transferors of a vehicle did not violate with an intent to defraud the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by failing to disclose that the vehicle's engine had been replaced, based on the facts and circumstances.

The buyer of an automobile in a civil odometer fraud action against the sellers, a husband and wife, failed to establish an intent to defraud on the part of the sellers who allegedly violated the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), determined the court in *Busalacchi v. Williamson*, 670 F. Supp. 272 (E.D. Mo. 1987), where prior to the sale, the sellers revealed the fact that although the odometer had a low reading because a new engine had been installed, the actual chassis mileage was higher. There was absolutely nothing that remotely smacked of any intent to defraud, found the court, since the sellers revealed everything regarding the auto's history, nothing was hidden, there were no false statements, and there was no reckless disregard for the truth.

[\*54] Conspiracy

The transferors of a vehicle did not conspire to violate with an intent to defraud the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by failing to disclose that the vehicle's engine had been replaced, it has been found, based on the facts and circumstances.

The buyer of an automobile in a civil odometer fraud action against the sellers, a husband and wife, failed to establish an intent to defraud on the part of the sellers who allegedly violated the conspiracy provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1986 (now 49 U.S.C.A. § 32703), determined the court in *Busalacchi v. Williamson*, 670 F. Supp. 272 (E.D. Mo. 1987), where prior to the sale, the sellers revealed the fact that although the odometer had a low reading because a new engine had been installed, the actual chassis mileage was higher. There was absolutely nothing that remotely smacked of any intent to defraud, found the court, since the sellers revealed everything regarding the auto's history, nothing was hidden, there were no false statements, and there was no reckless disregard for the truth.

[\*3] Disclosure

[\*55] Failure to acquire complete odometer statement for resale

It has been found that a transferor's failure to acquire a complete odometer statement for a vehicle meant for resale showed a violation with an intent to defraud of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, based on the facts and circumstances of the following cases.

The buyer of two used automobiles brought an action against a dealer, an auction service, and the prior transferor for violation of the disclosure requirements of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988(c) (now 49 U.S.C.A. § 32705), and the court in *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987), determined that the dealer had violated the Act with an intent to defraud the purchaser by accepting a written disclosure statement that was incomplete when acquiring one of the vehicles for resale.

In *Salmeron v. Highlands Ford Sales, Inc.*, 248 F. Supp. 2d 1035 (D.N.M. 2003), the court held that even if the car dealership did not have actual possession of title of a vehicle bought from a rental car company at the time it sold a vehicle to the purchaser, the purchaser's allegations that the dealership disclosed the vehicle's accurate mileage on an application for the vehicle title and registration and on an odometer disclosure statement, rather than on the vehicle's title, were sufficient to state a claim for violation of the disclosure obligations under 49 U.S.C.A. § 32705, where the vehicle title had been reassigned before sale to the purchaser, and the title contained a space for mileage information.

[\*56] Failure to provide written odometer statement

[\*56a] Intent to defraud -- Found

The courts in the following cases have found that, based on the facts and circumstances of each case, a transferor was liable under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, for failing to provide a written odometer statement, with an intent to defraud a purchaser.

Because an automobile dealership failed to explain its failure to supply an odometer statement to a purchaser, the purchaser was entitled to recover on his claim for costs under the federal odometer disclosure law, 49 U.S.C.A. § 32705, found the district court in *Forrest v. Simonds*, 1997 WL 610761 (N.D. N.Y. 1997).

The buyer of two used automobiles brought an action against a dealer, an auction service, and the prior transferor for violation of the disclosure requirements of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988(b) (now 49 U.S.C.A. § 32705), and the court in *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987), determined that the dealer violated the Act with an intent to defraud by failing to provide the purchaser with an odometer statement for either vehicle, though its agents were clearly aware that such statements were required.

[\*56b] Not found

A transferor violated the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by failing to provide a written odometer statement to a purchaser, but the transferor did not possess the requisite intent to defraud, held the courts below, based on the facts and circumstances of each case.

Where an automobile buyer brought suit pursuant to the Motor Vehicle Information and Cost Savings Act of 1972, 15 U.S.C.A. §§ 1988, 1989(a), (b) (now 49 U.S.C.A. §§ 32705, 32710), alleging that he was misinformed of the car's true mileage, the court in *Levine v. Ark-Les Switch Corp.*, 451 F. Supp. 55 (W.D. Pa. 1978), determined that a previous corporate owner that was not an automobile dealer was not liable to the buyer, since it was uncontroverted that this

previous owner, when it traded in the automobile, apprised the dealer that the odometer had been replaced and that the automobile's true mileage was over 29,000 miles, and since it was thus apparent that the previous owner had no "intent to defraud" in connection with the sale of the automobile, even though the previous owner had failed to give the dealer an odometer mileage statement. The previous owner could not be held liable to the subsequent buyer of the automobile, because a subsequent owner-dealer falsely represented a lower mileage with intent to defraud the subsequent purchaser, added the court.

In an action brought by the buyer of a used automobile against a dealer under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), alleging that the dealer failed to give the buyer the written mileage statement required by § 1988 (now 49 U.S.C.A. § 32705) of the Act, the court in *LePiere v. Phoenix Emprise, Inc.*, 500 F. Supp. 251 (E.D. Pa. 1980), found that the buyer failed to meet her burden of proving the requisite intent to defraud on the part of the dealer. The parties, at trial, stipulated that the dealer failed to give the buyer, the transferee, the written mileage statement required by § 1988 of the Act, noted the court, but although that constituted a violation of the Act by the dealer, it did not of itself entitle the buyer to recover. To recover under the Act, held the court, the buyer must show not only a violation of the Act, but also that the commission of the violation was coupled with an intent to defraud, which the buyer in this case failed to do.

In *Birdwell v. Hartsville Motors, Inc.*, 404 F. Supp. 625 (M.D. Tenn. 1975), where the seller of an automobile that had been used as a demonstration model admitted that it had failed to furnish the buyers with an odometer disclosure form at the time of the sale, the court determined that although the failure to provide the mileage affidavit constituted a violation of 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), there could be no recovery of damages under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710) in the absence of proof of an "intent to defraud" on the part of the seller. Specifically finding that there was no proof that the seller intended to conceal a material fact from the buyers nor that the seller had attempted to mislead or deceive the buyers as to the true mileage or condition of the automobile, the court held that the buyers were not entitled to damages, costs, or attorney's fees.

Where an automobile dealer brought suit against a customer alleging that the customer made odometer misrepresentations when he traded in his 1990 Plymouth Voyager and the dealer moved for summary judgment, the court in *Joe Madden Ford, Inc v. Bickel*, 1996 WL 432408 (N.D. Ill. 1996), denied summary judgment, finding that although it may have been negligence for the customer to have failed to examine documents more carefully when mailed to him, it was not necessarily gross negligence or reckless disregard for the customer to fail to inform the dealer of the correct mileage after receiving the forms in the mail that would support an inference of intent to defraud under the federal odometer law, which requires that a person selling a motor vehicle make a written disclosure of the cumulative mileage registered by the odometer under 49 U.S.C.A. § 32705(a)(3). In addition, noted the court, the fact that the customer had previously disclosed the true mileage, which was more than 100,000 miles, to the dealer's maintenance department on a number of occasions supported a finding that the customer did not intend to defraud the dealer.

[\*57] Conspiracy

It was found that a transferor and its agent did not violate the Motor Vehicle Information and Cost Savings Act by conspiring to knowingly give no odometer statement to a purchaser, based on the facts and circumstances.

Where it was alleged that both an automobile-leasing corporation and the corporation's sales agent had together conspired knowingly to give no statement of the mileage traveled by an automobile to a purchaser in violation of the Motor Vehicle Information and Cost Savings Act, the court in *Coulbourne v. Rollins Auto Leasing Corp.*, 392 F. Supp. 1198 (D. Del. 1975), determined that these allegations were insufficient to state a cause of action, since, as a matter of law, the agent could not conspire with the corporation that was his principal, where the agent was not actuated by a personal motive beyond the expectation of a commission.

[\*58] Failure to provide complete odometer statement

[\*58a] Violation of statute

Based on the facts and circumstances of each of the following cases, the courts found that a transferor's failure to provide a complete odometer statement to a purchaser did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705.

Where an odometer mileage statement made at the time a dealership's customer traded in a used automobile contained the correct odometer reading at the time of the transaction, the date of transfer, the transferor's name and address, and the identity of the vehicle, the customer did not violate the regulation promulgated pursuant to the Motor Vehicle Information and Cost Savings Act of 1972, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), requiring a document containing such information, even though the odometer reading was 35,690 while the vehicle had actually traveled 135,690 miles, determined the court in *Rider Oldsmobile, Inc. v. Wright*, 415 F. Supp. 258 (M.D. Pa. 1976).

The purchaser of a used automobile brought an action to recover under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), and the court in *Jackson v. Columbus Dodge, Inc.*, 676 F.2d 120 (5th Cir. 1982), found that the absence of some of the information on the odometer mileage certificate was not a violation of the Act, since the sales contract provided all the information that was not included on the odometer certificate and was delivered to the automobile purchaser simultaneously with the odometer mileage certificate. In considering the seller's mileage disclosure claim, the court noted that the then applicable version of 49 C.F.R. § 580.4 (now 49 C.F.R. § 580.5) required the seller to furnish various particulars, but allowed the required information to be presented "elsewhere on a transfer document integral with the odometer disclosure." The uncontradicted affidavit of the seller asserted that the sales contract (which provided all the missing information) and the odometer mileage certificate were simultaneously delivered to the purchaser, observed the court, and the purchaser made no allegations that the odometer had been tampered with or that the seller had made any misrepresentations.

\*\*\*\* Observation:

The updated version of the regulation at issue, 49 C.F.R. § 580.5, provides as follows: "(c) In connection with the transfer of ownership of a motor vehicle, each transferor shall disclose the mileage to the transferee in writing on the title or, except as noted below, on the document being used to reassign the title. In the case of a transferor in whose name the vehicle is titled, the transferor shall disclose the mileage on the title, and not on a reassignment document. This written disclosure must be signed by the transferor, including the printed name. In connection with the transfer of ownership of a motor vehicle in which more than one person is a transferor, only one transferor need sign the written disclosure. . . ."

An automobile purchaser brought an action against a car dealer complaining of violations of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), due to the dealer's failure to complete the odometer disclosure statement in connection with the sale of an automobile, and the court in *Team Food Service, Inc. v. Francis Cadillac, Inc.*, 1988 WL 74730 (N.D. Ill. 1988), found that no violation of the Act had been shown where there was no allegation that the mileage represented on the bill of sale supplied by the dealer was inaccurate or that the odometer had been tampered with or was malfunctioning. In so finding, the court observed that the odometer statement delivered by the dealer was only incomplete in that the dealer failed to check one of the three boxes contained on that statement certifying the actual mileage on the vehicle.

[\*58b] Intent to defraud

The courts in the cases that follow determined that a transferor who violated the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by failing to provide a complete odometer statement to a purchaser, did not possess the requisite intent to defraud a purchaser, based on the facts and circumstances of each case.

Where a buyer alleged that a used automobile he purchased had been constructed from two other vehicles, one of which had been in a major collision, but the buyer did not allege that the seller either knew of these facts or was responsible for the vehicle's reconstruction, in the court *Tinker v. DeMaria Porsche-Audi, Inc.*, 632 F.2d 520 (5th Cir. 1980), determined that the seller's failure to provide the buyer with the vehicle's last license plate number in the odometer disclosure, which information was in any event publicly available, was not based upon an intent to defraud as required to render the seller liable under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710).

The failure of an automobile seller to place on an odometer disclosure statement the last license plate number of a vehicle, the address of the transferor, or the date of the statement was contrary to the regulations of the Secretary of Transportation, found the court in *Leslie v. George Thompson Ford, Inc.*, 484 F. Supp. 954 (N.D. Ga. 1979), but was not a basis for establishing liability for treble damages under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1988, 1989, (now 49 U.S.C.A. §§ 32705, 32710), in the absence of an intent to defraud. Here, not only was the correct mileage disclosed and the purpose of the Act thereby fulfilled, observed the court, but the disclosures omitted from the odometer disclosure statement were disclosed in the bill of sale, thereby fulfilling the purpose of even the regulations. Thus, the defect complained of was merely a technical one, and a higher burden of actual knowledge of the missing information was required of the seller. Even if the standard were constructive knowledge of the absence of missing information from the odometer disclosure statement, damages would not have been available because no evidence was proffered by the buyer that the seller was constructively aware of the absence of such information, concluded the court.

Although an automobile dealer violated the disclosure requirement of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), by signing an odometer report form in blank when selling an automobile to an intermediate purchaser, the dealer was not liable under 15 U.S.C.A. § 1989(b) (now 49 U.S.C.A. § 32710) to the consumer who ultimately purchased the automobile, determined the court in *Mayer v. Warren Hollon Motors*, 410 F. Supp. 768 (S.D. Ohio 1975), since an intent to defraud was not established.

Although an automobile dealer violated the disclosure provisions of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), by failing to record the last license plate number of an automobile and by failing to refer to the Act in the used car odometer mileage statement, the court in *Clayton v. McCary*, 426 F. Supp. 248 (N.D. Ohio 1976), determined that the purchaser wholly failed to present substantial evidence from which it could reasonably conclude that the dealer harbored fraudulent intent, and thus the court found that the seller was not liable under the Act.

An action was brought under the Motor Vehicle Information and Cost Savings Act (Act), and on the dealer's and creditor's motion for summary judgment, the court in *Augusta v. Marshall Motor Co.*, 453 F. Supp. 912 (N.D. Ohio 1977), judgment aff'd on other grounds, 614 F.2d 1085 (6th Cir. 1979), granted the motion, finding that the failure of an odometer mileage statement to disclose the last license plate number of the vehicle was not a violation of the Act, absent any intent of the dealer to defraud the buyer with respect to the mileage reading disclosed at the time of the purchase. In so finding, the court noted that it was not alleged that the mileage disclosed on the Odometer Mileage Statement was incorrect, or that the odometer on the purchaser's vehicle had been altered or replaced. In fact, the purchaser stated in his deposition that the mileage reading provided on this statement corresponded to that registered on the vehicle at the time it was delivered to him, observed the court.

\*\*\*\* Comment:

The court in cited to a previous regulation promulgated pursuant to the Act, 49 C.F.R. § 580.4(4), which required a transferor of a motor vehicle to furnish to the transferee a written disclosure statement signed by the transferor and containing, among other things, the last license plate number of the vehicle. The license plate number requirement is no

longer contained in the Secretary of Transportation's regulations, 49 C.F.R. §§ 580.1 to 580.17.

[\*59] Failure to disclose true mileage

[\*59a] Violation -- Found

It has been found, based on the facts and circumstances, that a transferor violated the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by failing to disclose a vehicle's true mileage to a purchaser.

Where the buyer of a used automobile sued the immediate seller, a used car dealer, the automobile dealership from which the dealer had acquired the vehicle, and the latter's president to recover for violations of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), the appeals court in *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979), found that the used car dealer's entering odometer figures of 13,175 as the odometer reading and checking the box on the disclosure statement indicating that the true mileage was unknown did not satisfy the requirement of the statute governing mileage disclosure when the ownership of a motor vehicle is transferred, on the ground that even if the dealer believed that the odometer of a four-year-old vehicle had "turned over," the dealer could not be absolutely certain. Even when a transferor who knows that an odometer has "turned over" merely records the numbers on the odometer and certifies that the true mileage is unknown, the consumer is not simply deprived of accurate mileage information but is actually misled by the form itself, concluded the court.

[\*59b] Not found

The courts in the following cases found that an automobile seller did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by failing to disclose a vehicle's true mileage to a purchaser, based on the facts and circumstances of each case.

Even though the seller of an automobile, knowing the actual mileage on the vehicle to be 135,690, traded the automobile in to an automobile dealership and, with the intent to defraud the dealership, reported the mileage to be 35,690, as shown on the automobile odometer, and failed to disclose the actual mileage, and even though the Motor Vehicle Information and Cost Savings Act of 1972 (Act) and regulations promulgated pursuant thereto were intended to impose liability in such a case, the court in *Rider Oldsmobile, Inc. v. Wright*, 415 F. Supp. 258 (M.D. Pa. 1976), found that where the seller's conduct was not covered by the plain meaning of the language of the Act or regulations, the seller was not liable to the dealership under the terms of the Act, 15 U.S.C.A. §§ 1981 et seq., 1988 (now 49 U.S.C.A. §§ 32701 et seq., 32705).

An automobile dealer's misrepresentations on an odometer mileage statement to a buyer concerning the model and body type of the vehicle sold did not violate the odometer disclosure requirements of the Motor Vehicle Information and Cost Savings Act of 1972 (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), because that Act was concerned only with misrepresentations in mileage, found the court in *Purser v. Bill Campbell Porsche Audi, Inc.*, 431 F. Supp. 1235 (N.D. Fla. 1977), where the dealer had represented to the buyer that the vehicle was a 1969 model Porsche with a 911S body type when in fact, the vehicle was a 1967 model Porsche, body type 912, into which a 1969 Porsche 911S engine had been placed.

Even assuming that constructive knowledge was the applicable standard for obtaining treble damages under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), determined the court in *Leslie v. George Thompson Ford, Inc.*, 484 F. Supp. 954 (N.D. Ga. 1979), if the standard was constructive knowledge of a false mileage disclosure, damages were not available because there was no false mileage disclosure.

An auction service that merely provided the means by which a prior transferor sold a used car to a dealer was not itself a transferor, and was therefore not liable to the ultimate buyer for the dealer's failure to disclose that two vehicles'

odometers were unreliable under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), determined the court in *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987).

A car buyer who alleged that the seller of a used 1981 Mercedes Benz SE violated the Motor Vehicle Information and Cost Savings Act and sought to hold the seller liable pursuant to 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710) failed to offer any evidence that the odometer statement was false, found the court in *Moss v. Farr Motor Co.*, 82 F.3d 418 (6th Cir. 1996) (not designated for publication), where all agreed that the disclosure statement provided by the seller to the buyer accurately reflected the odometer reading of the "grey market" automobile that had originally been manufactured for use outside the United States and was subsequently "Americanized" for sale within the United States. In so finding, the court dismissed the buyer's argument that because of the necessary conversion of grey market automobiles, the odometers of these vehicles are inherently unreliable. A simple mathematical formula converts kilometers to miles with reasonable accuracy (a kilometer equals approximately 0.62 miles), observed the court. Furthermore, noted the court, the buyer offered minimal evidence that the odometer reading was in fact false.

A truck purchaser brought an action against a motor credit corporation and dealership alleging violations of the federal odometer disclosure requirements under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), due to a failure to disclose the actual mileage of the truck, and the court in *Mitchell v. White Motor Credit Corp.*, 627 F. Supp. 1241 (M.D. Tenn. 1986), found that the truck was exempt from the disclosure requirements as a large commercial vehicle according to 49 C.F.R. § 580.5(a)(1) (now 49 C.F.R. § 580.17(a)(1)). Although the method of weighing the vehicle by weighing only the cab did not conform with the regulatory definition, the court determined that the transferors of the vehicle, the gross vehicle weight rating of which was 45,000 pounds, were within the class of transferors contemplated by the regulatory exception to the odometer disclosure requirements.

\*\*\*\* Comment:

n88 n89 Although many courts have held such exemptions an invalid exercise of regulatory authority, Congress amended the Act in June of 1998 to state that: "The Secretary may exempt such classes or categories of vehicles as the Secretary deems appropriate from these requirements."

In *Riverside Lincoln Mercury Sales, Inc. v. Auto Dealers Exchange Co.*, 1987 WL 7280 (N.D. Ill. 1987), a case concerning an inaccurate odometer reading on a vehicle sold at a used automobile auction, the court found that there was no genuine issue of material fact that the auction company was subject to the disclosure requirements of the Motor Vehicle Information and Cost Savings Act 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), since there was no evidence that the auction company was a transferor of the Oldsmobile at issue.

An automobile auction company that did not own or hold title to the cars it sold was not a "transferor" under the Odometer Act of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(a), (b) (now 49 U.S.C.A. § 32705), determined the court in *Industrial Indem. v. Arena Auto Auction*, 638 F. Supp. 1030 (D. Minn. 1986), and thus the auction company was not liable to a buyer when an automobile's odometer proved inaccurate, notwithstanding the fact that the auction company received a fee from both the seller and the buyer, and that the buyer's check was made out to the auction company.

[\*59c] Intent to defraud -- Found

Based on the facts and circumstances of each of the following cases, the courts determined that a transferor who failed to disclose a vehicle's true mileage to a purchaser in violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, did so with the requisite intent to defraud.

Where a seller called a purchaser's attention to a vehicle's odometer reading of approximately 40,000 miles at the time

the purchaser bought the used automobile that was represented to have been the seller's personal vehicle, the court in *Klein v. Pincus*, 397 F. Supp. 847 (E.D. N.Y. 1975), held that the evidence was sufficient to show that the seller had, with an intent to defraud, failed to disclose that the odometer reading was incorrect in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705). Two previous owners were shown to have had the vehicle inspected when the odometer reading was over 75,000 miles, and the seller had purchased the vehicle at an automobile auction with approximately 80,000 miles on the odometer, noted the court.

In *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977), the court held that an odometer mileage statement supplied to the purchaser of a used car by a dealership that recited the current odometer reading, but that failed to alert the buyer to existing odometer irregularities that had been noted in the odometer mileage statement supplied to the dealership by the previous owner, was a representation made either with actual knowledge of its falsity, or with such reckless disregard of the truth as to satisfy the "intent to defraud" requirement and permit the imposition of liability for a violation of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711). It was no defense to assert that defects in the design or supervision of the dealership's record-keeping system were responsible for the misrepresentation in this case, rather than employee recklessness per se, noted the court. In the first place, stated the court, recklessness on the part of individual dealership employees was amply proven. What was more important, however, was that the maintenance of a thorough, well-supervised record-keeping system with respect to Odometer Mileage (OM) Statements was a clear, implicit requirement of the Act. At the very least, it should be required that sales personnel read and accurately represent to prospective purchasers the content of an automobile's file, and that OM Statements be certified only upon the basis of back-up information actually available in the file, concluded the court.

Where the buyer of an automobile brought suit against the dealer from which she purchased the car for violations of the federal odometer disclosure requirements under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), the court in *Ralbovsky v. Lamphere*, 731 F. Supp. 79 (N.D. N.Y. 1990), found that the dealer, which had been informed by the transferor of the vehicle that the odometer had not been functioning, at the very least was grossly negligent or acted with reckless disregard for the truth in certifying that the reading of the odometer was true when the dealer transferred the car to the buyer, so that an intent to defraud by the dealer could be inferred as a matter of law, and the buyer could recover from the dealer under the Act.

The buyer of a used automobile, alleging violations of 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), sued the corporate seller of the vehicle, the corporation's salesman, another corporate agent who certified the automobile's odometer reading, and two previous owners in the vehicle's chain of title, and the court in *Stier v. Park Pontiac, Inc.*, 391 F. Supp. 397 (S.D. W. Va. 1975), determined that each of the named defendants was liable under 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), where it was stipulated that during all transactions between the previous owners and between the present buyer and seller, the odometer mileage was represented to be approximately 18,000 miles, while an inspection sticker on the windshield indicated that the vehicle had traveled nearly 55,000 miles. The court observed that each of the defendants had engaged in an activity forbidden by Congress, and that the language of the section indicated an intention to impose liability on any person who violated its provisions.

In *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987), where the buyer of a used truck moved for summary judgment in an action against the original seller and successive transferors, alleging odometer fraud under the Motor Vehicle Information and Cost Savings Act (Act), seeking treble damages and attorney's fees, the court found that the transferors' mere reliance on the truck's odometer reading, in the face of other readily ascertainable information from the title and condition of the truck, was reckless disregard that rose to the level of an intent to defraud, as a matter of law, under 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705). While noting that it would be reluctant to hold, as a matter of law, that the transferors should have known that a nine-year-old truck with 47,778 miles indicated a suspiciously low mileage, the court nevertheless stated that with the exercise of minimal care, the transferors could have discovered that the odometer reading they were certifying was false, had they inspected the original seller's title, which showed a mileage of 62,000 miles in 1979. If the transferor has a reason to know by the exercise of reasonable care that the odometer has turned

over and the transferor does not inform the purchaser, the majority of cases hold that an intent to defraud may be inferred from that violation of the Act and regulations, stated the court.<sup>n90</sup>

Evidence revealed that an automobile dealer acted with fraudulent intent when it certified to a consumer that a car's odometer reading was accurate, and thus the dealer violated the federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), found the court in *Oettinger v. Lakeview Motors, Inc.*, 675 F. Supp. 1488 (E.D. Va. 1988), where having received title documents, the dealer had reason to suspect fraudulent tampering of the odometer, and therefore the dealership was deemed to have known all that a minimal inspection would have revealed. The law does not and cannot tolerate such willful ignorance in the face of obvious warning signs -- signs that would have moved reasonable people to undertake further inquiry, stated the court.

In *Suits v. Little Motor Co.*, 642 F.2d 883 (5th Cir. 1981), the court found that where an automobile dealer had actual knowledge that the odometer on an automobile had "turned over" after registering 99,999 miles and knew that the actual mileage was 100,073 miles but did not so indicate to the buyer, as a matter of law the dealer evidenced an intent to defraud under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(a) (now 49 U.S.C.A. § 32705(a)(1)(A)). At trial the dealer had testified that one of his reasons for failing to indicate that the actual mileage equaled 100,073 miles was the possibility that the vehicle's odometer had turned over more than once and, therefore, that the actual mileage was 200,073 or 300,073 miles, observed the court. In the event that a transferor knows that an odometer has turned over once and has reason to believe it has turned over more than once, the transferor should indicate that the actual mileage is unknown but a minimum of 100,000 miles plus the figure shown by the odometer, stated the court. Since the dealer had no reason to believe that the odometer had turned over more than once, however, this requirement would not apply in the instant case, determined the court. While the facts of the case sufficiently evidenced fraudulent intent under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), held the court, the dealer's business practices buttressed the conclusion that the dealer intended to defraud where the car dealer's common practice, as he testified, was to sell the car prior to receiving the papers and thus indicate that the vehicle's true mileage was unknown. Obvious steps would have assured his possession of the previous transferor's mileage disclosure form at the time he sold a car: he could have physically taken the disclosure form with him along with the car at the time of purchase, instead of arranging to have the statement mailed, or he could have waited to place the car for sale until the papers arrived by mail. Either course would have precluded an excuse for failing to provide potential customers with accurate information, concluded the court, adding that in its judgment, Congress did not intend the Act to allow car dealers to operate in such a manner, and that such behavior manifested a clear intent to defraud.

\*\*\*\* Comment:

The court observed that the dealer's stated reason for failing to disclose the fact that the odometer on an automobile had turned over after registering 99,999 miles was that the buyer of a 10-year-old car with an odometer reading of 73 miles knows the odometer has turned over. This did not necessarily follow, found the court, even though the dealer checked the statement indicating that odometer calibration error was not responsible for the disparity between the actual mileage and the odometer reading. A buyer provided such disclosure might conclude that the seller was unsure as to whether the odometer had turned over or had been turned back, explained the court. Since, in the latter case, it could have been turned back, for example, from 10,073 to 73 miles, this would still leave a wide range in the beliefs the buyer could form as to the vehicle's actual mileage, noted the court. In the more typical case, continued the court, where the odometer reading showed a larger figure, the buyer might conclude that the seller was uncertain as to whether the odometer had been turned back, had turned over, or showed actual (though unusually low) mileage.

A used car dealer's receipt of a disclosure statement from the previous owner of a vehicle indicating that the odometer reading could not be relied upon, and the dealer's performance of extensive repairs on another vehicle over the course of six months, which should have brought to light the fact that that vehicle's odometer was nonfunctional, conferred on the dealer constructive knowledge that the odometer readings on both vehicles were incorrect, and raised a duty to disclose that information to the individual who subsequently purchased the two cars under the Motor Vehicle Information and

Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32705), found the court in *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987).

The court in *Simpson v. Anthony Auto Sales, Inc.*, 32 F. Supp. 2d 405 (W.D. La. 1998), found that an automobile dealership and its owner were liable to purchasers for violating the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), which prohibits the making of false statements as to the actual mileage on an automobile with the intent to defraud, by defrauding the purchasers with regard to the actual mileage on their vehicles. Each of the purchasers bought an automobile from the dealership that possessed an odometer that had been altered while in the dealership's possession, found the court, and in connection with the auto sales, the purchasers executed and signed various documents, including sales invoices, retail installment contracts, security contracts, consumer credit contracts, and financing applications.

The victims of an odometer rollback scheme brought suit against an automobile dealer and its owner, and the lenders to whom their installment contracts were assigned, and upon the victims' motions for summary judgment and the lender's motion for partial summary judgment, the district court in *Riggs v. Anthony Auto Sales, Inc.*, 32 F. Supp. 2d 411 (W.D. La. 1998), found that the automobile dealer and its owner were liable to the buyers for violating the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), by making false statements as to the actual mileage on the automobiles with an intent to defraud. Therefore, the court held the dealer, its owner, and the lenders jointly and severally liable to the buyers to the extent of each buyer's injury under the federal odometer law.

An automobile purchaser sued a seller for violation of the motor vehicular odometer requirements under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710), upon the transfer of ownership of three automobiles, and the court in *Shipe v. Mason*, 500 F. Supp. 243 (E.D. Tenn. 1978), aff'd without reported opinion, 633 F.2d 218 (6th Cir. 1980), found that the seller had violated the Act with an intent to defraud the purchaser by issuing false odometer certificates. The seller's contention that he had issued false odometer certificates on these vehicles at the request of the buyer, and as a condition precedent to the buyer's purchase of the vehicles, was not a viable defense, held the court.

Where the original seller of an automobile admitted that he knew the odometer reading of 36,738 miles to be inaccurate at the time of sale, and that despite such knowledge he sold the car to an auction company without disclosing the true mileage or that the odometer did not accurately reflect the vehicle's true mileage, in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), the court in *A.B.C. Chevrolet Co. v. Kirk*, 1986 WL 10045 (N.D. Ill. 1986), found the seller liable to the car dealer that ultimately purchased the automobile from the auction company.

Since the seller of an automobile admitted that his failure to disclose the car's actual mileage upon transferring the vehicle violated the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), and since the seller admitted that he had actual notice that the odometer did not reflect the correct mileage the car had traveled, and that he did not disclose this fact to the purchasers of the car, the court in *Resendiz v. Eatinger*, 1990 WL 84527 (N.D. Ill. 1990), determined that the seller was liable for violating the Act with an intent to defraud. Although the seller argued that the purchasers failed to show he acted with an intent to defraud, the court rejected this argument, stating that even if the seller were able to claim that the odometer disclosure provided to him by the chauffeur service that sold him the car was insufficient to alert him to the inaccuracy of the odometer reading, the seller still acted with an intent to defraud within the meaning of the Act because an intent to defraud on the part of the transferor may be inferred by a finding of gross negligence, constructive knowledge, or reckless disregard of facts that would indicate the actual mileage.

The court in *Woodfield Ford Sales v. Broniek*, 1992 WL 38401 (N.D. Ill. 1992), found that a car dealer had proven by a preponderance of the evidence each element of its allegation that a car purchaser failed to disclose the true mileage on

his trade-in, a 1986 Volvo, in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), and that the Volvo was worth less than the dealer's \$ 10,000 appraisal, which was based upon the lower mileage figure. In particular, noted the court, the dealer proved by a preponderance of the evidence that the purchaser intentionally did not disclose the existence of the additional 51,388 miles that were on the Volvo. When the purchaser was asked why he didn't detect the significantly lower number on the odometer statement when he received it two days later in the mail, observed the court, the purchaser answered that he put all the papers away without looking at them and that it was not until he was called by the dealer's lawyer several months later that he learned of the Volvo mileage problem. The purchaser's negligence in this regard was exacerbated by his own experience the previous year when he had purchased the Volvo, found the court, since the significance of the real mileage and the existence of odometer certifications were emphasized by the seller of the Volvo that had provided the purchaser with a similar odometer statement reflecting the actual miles that were on the Volvo in spite of the new odometer and with correspondence to confirm the purchaser's knowledge of that fact.

When an auctioneer's procedure for preparing odometer disclosure statements -- filling in the mileage simply by looking at a vehicle's odometer -- was combined with its ignoring an altered title on which erasure was clear and apparent, the district court could reasonably have found that the auctioneer showed a reckless disregard for the truth, showing an intent to defraud, determined the appeals court in *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983); since the auctioneer was a transferor and transferee under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), the auctioneer could be held liable for the false odometer disclosure statement.

A finding of misrepresentation of the mileage on a vehicle with an intent to defraud under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988(a), (b) (now 49 U.S.C.A. § 32705), was supported by a finding that the original information provided by the sellers as to the vehicle's mileage was incorrect, and that they did not specifically point out the mistake as soon as possible but rather, merely forwarded the correct odometer statement without acknowledging that the mileage on the correct statement was materially different from what it was initially represented to be and sent along an accompanying title that incorrectly stated the mileage, determined the appeals court in *Hughes v. Box*, 814 F.2d 498 (8th Cir. 1987). The contradictory nature of the documents, along with the initial misrepresentation of the vehicle's actual mileage, could hardly be characterized as the type of disclosure contemplated by the Act, noted the court, concluding that there was sufficient evidence presented at trial for the jury to conclude that the sellers had violated the Act. Given the broad purpose of the Act to protect motor vehicle purchasers from inaccurate mileage representations by sellers, held the court, the transferor of an automobile has some duty to specifically and unambiguously alert the transferee to the fact that the transferor's initial representation of a vehicle's mileage was incorrect and to make clear the vehicle's actual mileage.

The manager of an auto dealership who completed an odometer certificate for a motorcycle based only on the odometer reading at the time the motorcycle was purchased, without checking the files to see if there was a different reading on the certificate of title obtained when the dealership acquired the motorcycle, violated the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), found the court in *Bryant v. Thomas*, 461 F. Supp. 613 (D. Neb. 1978), and the manager's actions constituted a recklessness that rose to the level of fraudulent intent and could be attributed to the dealer for whom the manager was acting as agent. See § 59[d].

The Tenth Circuit Court of Appeals in *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998), found that the fact that a motor coach dealer acted with reckless disregard concerning the accuracy of a motor coach's odometer statement, as required to impose liability under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, was supported by evidence that the dealer relied solely on the assertions of the consignor of the coach to ascertain whether its odometer reading was correct and did nothing to independently verify the accuracy of the odometer reading.

[\*59d] Not found

Courts found, based on the facts and circumstances of each of the following cases, that a transferor who failed to disclose a vehicle's true mileage in violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, was not liable due to the lack of an intent to defraud a purchaser.

In *Locascio v. Imports Unlimited, Inc.*, 309 F. Supp. 2d 267 (D. Conn. 2004), subsequent determination, 2004 WL 964186 (D. Conn. 2004), the court held that an automobile dealer did not violate the Odometer Act (Act), even though the dealer did not provide the customer with a title certificate and consequently did not comply with the Act's requirement that correct mileage be set forth on the certificate because the customer failed to make the necessary showing that the seller intended to commit fraud regarding the mileage.

In *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977), an action by an automobile buyer against a seller and auctioneer, alleging a violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), the court found that the evidence established that the seller did not know that the automobile's actual mileage was in excess of that indicated on the odometer when he sold the vehicle and that the seller did not intend to defraud the buyer.

In *Gavin v. Koons Buick Pontiac GMC, Inc.*, 28 Fed. Appx. 220 (4th Cir. 2002), the court held that a deviation between a used truck's odometer reading and the odometer disclosure prepared by the vehicle dealership lacked materiality, and thus the dealership was not liable to the buyer under the Federal Odometer Act 49 U.S.C.A. § 32710(a), where a misstatement of only approximately three miles was insufficient to show intent to defraud.

In *Robinette v. Griffith*, 483 F. Supp. 28 (W.D. Va. 1979), a used automobile purchaser's action against a seller for the alleged failure to disclose the true mileage as required by the Federal Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1901 et seq., 1988 (now 49 U.S.C.A. §§ 32701 et seq., 32705), the court found that the purchaser's pleading failed to state a claim where the complaint alleged none of the elements of fraud or the circumstances surrounding the seller's alleged violation. Although the purchaser's allegations, if true, stated a claim under the Act, to recover damages for this alleged violation, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710) requires that a seller's violation must be with an intent to defraud, held the court. The purchaser's pleading, found the court, was deficient in that it failed to aver the circumstances constituting fraud with the particularity required by *Fed. R. Civ. P. 9(b)*. A bare allegation of fraud does not satisfy the pleading requirements of *Fed. R. Civ. P. 9(b)*, stated the court.

In *Mayberry v. Ememessay, Inc.*, 201 F. Supp. 2d 687, 198 A.L.R. Fed. 793 (W.D. Va. 2002), the court held that an automobile buyer could not demonstrate that the dealership intended to defraud the buyer with respect to the vehicle's mileage, precluding the buyer's civil action against the dealership for violation of 49 U.S.C.A. § 32705(a)(1), requiring the transferor of a motor vehicle to provide written accurate disclosure of mileage registered by the odometer on the vehicle title; even though odometer mileage was not disclosed on the title, but on a separate odometer disclosure statement, the automobile buyer acknowledged that she received an accurate statement of mileage on the dealership's odometer disclosure statement, and that she had no evidence that the odometer was tampered with or manipulated.

Although a used automobile seller could have provided a fuller disclosure by adding "actual mileage of approximately 41,000" as the last transferor had indicated, found the court in *Tinker v. DeMaria Porsche-Audi, Inc.*, 632 F.2d 520 (5th Cir. 1980), the mileage disclosures made by the seller, which stated that the actual mileage was unknown and that the cumulative mileage registered on the odometer was 39,266, did not demonstrate any fraudulent intent and thus did not violate the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710). The difference between 41,000 and 39,266 miles was negligible, noted the court, and a buyer given the information the buyer was provided would be likely to conclude that the actual mileage was greater than the 39,266 miles shown. The court stated that it did not have before it a case in which a dealer states that the actual mileage is unknown and gives the odometer reading without saying more, knowing that the actual mileage is 100,000 miles greater than that shown. Although the seller would have provided fuller disclosure by adding "actual mileage approximately

41,000," such a statement was neither required by the Act nor misleading in its absence, concluded the court.

An automobile seller's negligence in failing to investigate and determine whether the odometer was working did not constitute a violation of the section of the Motor Vehicle and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), prohibiting the knowing giving of a false statement to a transferee, with an intent to defraud, found the court in *Pepp v. Superior Pontiac GMC, Inc.*, 412 F. Supp. 1053 (E.D. La. 1976), since evidence showed that the seller checked out the automobile according to industry practices and did not notice any odometer problem, that the speedometer operating off the same cable as the odometer was working, and that the mileage shown on the odometer approximately matched the mileage given by the previous owner. In addition, the seller's employees had attested that they had no actual knowledge that the odometer was malfunctioning, no evidence had been offered that there was a willful violation, and not a scintilla of evidence had ever been hinted at that would suggest, or that would justify an inference that the seller had any intent to defraud, concluded the court.

The bank to which the seller, a dealer, of a new car "assigned" a buyer's financing paper was not subject to liability under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), found the court in *Parker v. DeKalb Chrysler Plymouth*, 459 F. Supp. 184 (N.D. Ga. 1978), judgment aff'd on other grounds, 673 F.2d 1178 (11th Cir. 1982), where uncontroverted evidence showed that no employee or agent of the bank had any knowledge with respect to the odometer disclosures required by the Act, that no employee or agent of the bank had an intent to defraud the buyer in regard to the alleged violations of the odometer disclosure requirements, and that the bank had never been a transferor or owner of the car the buyer purchased. Furthermore, found the court, since civil liability under the Act was predicated on an "intent to defraud," but since, in the instant case, the new car buyer did not allege any intent by the dealer to defraud, nor allege facts from which the court might infer an intent to defraud, the buyer also failed to state a cause of action under the Act against the dealer.

Although the purchaser of an automobile proved that various dealers and an auction company had failed to provide the proper disclosure statements regarding the automobile's mileage, as required by the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), the court in *Marcel v. Zamin*, 1990 WL 150123 (E.D. La. 1990), found that the purchaser failed to produce a scintilla of evidence of an intent to defraud on the parts of the dealers and auction company. Each of these transferors indicated the mileage on the vehicle to be in excess of 84,000 miles, observed the court, and no evidence whatsoever was introduced by the purchaser to suggest that these defendants had any knowledge, either actual or constructive, that the odometer was not functioning or that it had been rolled back. Further, one could infer from the evidence that the odometer was in fact connected and functioning because the mileage increased by a mile or a few miles in these transfers, which occurred only days apart, noted the court.

The court in *Marcel v. Zamin*, 1990 WL 170130 (E.D. La. 1990), did not find that an automobile dealer intentionally or fraudulently furnished to the purchaser of an automobile a false statement that the mileage of the vehicle was 84,079 when in fact, at the very least, it was 84,099. Although the court did not find credible the testimony of the dealer that he obtained that mileage figure from the purchaser, whom he had asked to look at the odometer and give him the mileage, the court determined that the purchaser failed to prove that the dealer's violation of the Odometer Disclosure Regulations, 49 CFR § 580.4(a) to (c) (now 49 C.F.R. § 580.5) was done with an intent to defraud as required by the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710). At most, found the court, the dealer was guilty of a technical violation of the rules.

Where an automobile dealer filled out an odometer statement both when he purchased an automobile and when he resold it, and those statements showed a loss of two miles between the time of purchase and the time of resale, the dealer had constructive knowledge of the vehicle's defective odometer and the inaccurate odometer reading, violating the disclosure provisions of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), but the court in *Clayton v. McCary*, 426 F. Supp. 248 (N.D. Ohio 1976), determined that the dealer was nevertheless not liable under the Act, since there was no evidence of an intent to defraud.

A purchaser bought a 1979 Toronado with an odometer reading of approximately 52,150 miles from the owner and seller of the automobile, and the owner, acting through its employee, provided an odometer statement showing the actual mileage to be approximately 52,150 miles, having purchased the car the day before and received a sworn odometer statement from the previous owner that was the basis for, and virtually identical to, that which the owner disclosed to the purchaser, and the court in *Berns v. Ginn*, 1986 WL 6150 (S.D. Ohio 1986), determined that the purchaser had not alleged or provided any evidence to support the contention that the owner or its employee knew or should have known that the odometer had previously been altered in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705). The facts did not establish that the owner or its employee intended to defraud the purchaser, or that the owner or its employee exhibited such a gross negligence or disregard in preparing the odometer disclosure statements that an intent to defraud could be inferred by their conduct, determined the court, but rather the facts established that the owner was the last in a long line of owners of the vehicle and that another seller had allegedly tampered with the odometer several sales previous to the last seller's ownership.

An automobile dealer could not be held civilly liable under the disclosure requirements of the Motor Vehicle Information and Cost Savings Act (Act) to the purchaser of a car with an altered odometer on the basis of the dealer's failure to notice a missing turn signal lens suggesting that the automobile's dashboard had been removed, determined the court in *Jones v. Hanley Dawson Cadillac Co.*, 848 F.2d 803 (7th Cir. 1988), since under the Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), the dealer's mere negligence was insufficient to support a finding of an intent to defraud.

The purchaser of a used automobile brought an action against a dealership from which he had bought the automobile, alleging a violation of the odometer disclosure requirements of the Motor Vehicle Information and Cost Savings Act (Act), 49 U.S.C.A. § 32705, and the Seventh Circuit Court of Appeals in *Diersen v. Chicago Car Exchange*, 110 F.3d 481, 37 Fed. R. Serv. 3d 400 (7th Cir. 1997), determined that although the National Highway Traffic Safety Administration lacked the authority to promulgate a regulation exempting vehicles 10 or more years old from the Act's odometer disclosure requirements, the purchaser failed to establish an intent to defraud on the part of the seller in any event.

\*\*\*\* Caution:

n91 n92 Although many courts have held such exemptions an invalid exercise of regulatory authority, Congress amended the Act in June of 1998 to state that: "The Secretary may exempt such classes or categories of vehicles as the Secretary deems appropriate from these requirements."

The seller of a used automobile was not liable to the husband of a purchaser under the disclosure provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988(b), 1989(a), 1990 (now 49 U.S.C.A. §§ 32705, 32709, 32710), for damages for an allegedly false odometer setting, found the court in *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976), where the seller made an un rebutted prima facie showing by affidavit that it did not have actual knowledge of the odometer alteration.

Where an automobile dealer brought suit against a customer alleging that the customer made odometer misrepresentations when he traded in his 1990 Plymouth Voyager, and the dealer moved for summary judgment, the court in *Joe Madden Ford, Inc v. Bickel*, 1996 WL 432408 (N.D. Ill. 1996), denied summary judgment, finding that although it may have been negligence for the customer to have failed to examine the sale documents more carefully when mailed to him, it was not necessarily gross negligence or reckless disregard to fail to inform the dealer of the correct mileage after receiving the forms in the mail that would support an inference of intent to defraud under the federal odometer law, which prohibits making any false statements in this disclosure under 49 U.S.C.A. § 32705(a)(1)(A). In addition, noted the court, the fact that the customer had previously disclosed the true mileage, which was more than 100,000 miles, to the dealer's maintenance department on a number of occasions supported a finding that the customer did not intend to defraud the dealer.

In *Hamilton v. O'Connor Chevrolet, Inc.*, 2004 WL 1403711 (N.D. Ill. 2004), the court upheld a summary judgment in favor of the defendant where the plaintiffs failed to present any evidence that the defendant intended to defraud them with respect to the car's mileage or its odometer reading.

The seller of a pickup truck brought an action against a buyer to recover for violation of the federal odometer rollback statute in connection with a trade-in, and following the district court's dismissal of the claim, the appeals court in *Walt Bennett Ford, Inc. v. Goynes*, 969 F.2d 603 (8th Cir. 1992), opinion corrected, (Aug. 7, 1992), found that the buyer lacked the intent to defraud necessary to run afoul of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), where the buyer disclosed to the seller's employee that the stated mileage on the odometer and disclosure form for the trade-in was incorrect, and where the buyer signed the disclosure statement based on the employee's assurances that only the actual mileage shown on the odometer needed to be reported.

The buyers of a used car sued the manufacturer's credit company, which had repossessed the car before selling it at auction to a dealer who made the sale to the buyers, for alleged violations of the federal odometer law, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), and the Eighth Circuit Court of Appeals in *Huson v. General Motors Acceptance Corp.*, 108 F.3d 172 (8th Cir. 1997), determined that the failure of the credit company to inspect the vehicle or title documents before providing the mileage statements did not show an intent to defraud, as necessary for liability under the odometer law, in the absence of evidence that the investigation would have revealed a potential problem with the odometer.

The manager of an auto dealership who completed an odometer certificate for a motorcycle based only on the odometer reading at the time the motorcycle was purchased, without checking the files to see if there was a different reading on the certificate of title obtained when the dealership acquired the motorcycle, could not be charged with violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), with an intent to defraud, given the lack of positive evidence that the manager had anything to do with the odometer adjustment, found the court in *Bryant v. Thomas*, 461 F. Supp. 613 (D. Neb. 1978). See § 59[c].

Even if a father who held title to a car that was under the sole control of his son was considered an owner within the meaning of the provision of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1987 (now 49 U.S.C.A. § 32704), requiring that the owner or his agent give notice of an inaccurate odometer reading to a purchaser of the car, determined the court in *Goeman v. Keating*, 498 F. Supp. 700 (D.S.D. 1980), there was no evidence that the father possessed the requisite intent to defraud the purchaser such that he could be held liable for violating the Act.

An automobile credit corporation's disclosure of an automobile's odometer readings did not violate the federal disclosure statute, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(a)(2) (now 49 U.S.C.A. § 32705(a)(1)(B)), found the court in *Bedsworth v. G & J Automotive, Inc.*, 650 F. Supp. 763 (E.D. Mo. 1986), where the corporation listed the mileage in the application for a repossession title as an estimated figure in light of the prior title indication that the odometer was broken, and the inaccuracy was attributable to clerical error on the state's part and could not support the requisite finding of an intent to defraud. The court stated that the credit corporation had met its obligation of providing accurate information to the state of Missouri, and that the corporation's liability could not be grounded on a subsequent clerical error by the state.

In *Watkins v. Lowe*, 895 F.2d 1419 (9th Cir. 1990) (not designated for publication), where a used car salesman with over 20 years' experience purchased a 1982 Cadillac Eldorado from the lessee intending to resell it, the court found that although the lessee knew that the mileage disclosed by the odometer was 100,000 miles less than what the car had actually traveled, the lessee was not liable for a violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(c) (now 49 U.S.C.A. § 32705), for a failure to disclose the true mileage, since there was no intent to defraud the purchaser. In so finding, the court observed that the service records for the car were left in the glove compartment when it was delivered to the purchaser and revealed that the odometer had turned over.

In light of uncontroverted evidence establishing that the face of a certificate of title for an automobile clearly indicated that the odometer had turned over, and that a car shop's president orally informed the purchaser of that fact at the time of transfer, the appeals court in *Jenson v. CS & T Body & Paint of Salt Lake, Inc.*, 9 F.3d 117 (10th Cir. 1993) (not designated for publication), found that the district court had properly determined that as a matter of law, the car shop did not violate the federal odometer statute, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), with the requisite intent to defraud.

A truck purchaser alleged that a leasing company, through its agent, violated the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), by intentionally or recklessly failing to disclose that the truck's actual mileage exceeded what the odometer showed when the truck was sold, and the court in *Lavery v. R-K Leasing*, 19 F.3d 33 (10th Cir. 1994) (not designated for publication), found that the purchaser failed to show an intent to defraud as required by the Act where one record-keeping error, surrounded by undisputedly correct practices in similar transactions, did not amount to record-keeping sloppy enough to evidence reckless disregard. There was no evidence that the leasing company closed its eyes to the truth or was anything but a negligent transferor, determined the court, based on the undisputed facts that the leasing company sold 11 identical trucks at the same auction and the disclosure statements were accurate for all of the trucks except the one the purchaser subsequently acquired. In addition, noted the court, the leasing company received no special benefit from the sale of the purchaser's truck.

The purchasers of a 1988 GMC pickup truck from a car dealer appealed the district court's dismissal of their action for odometer fraud based on an allegation that the dealer falsely represented the mileage on the pickup for the purpose of fraudulently inducing the purchasers to buy the vehicle, in violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705(a), and the appeals court in *Pickens v. Mike Haughton Ford, Inc.*, 166 F.3d 1221 (10th Cir. 1999) (not designated for publication), affirmed, since the purchasers had articulated no explanation for their failure to respond to the dealer's motion to dismiss or their failure to seek reconsideration of the district court's order. Further, there was no indication that a manifest injustice would result from affirmance of the district court's order, concluded the court.

The purchasers failed to establish an intent to defraud in connection with the sale of a used truck-tractor, even though the sellers of the truck-tractor had failed to disclose to the purchasers in writing a discrepancy between the mileage actually showing on the vehicle's two odometers and the higher mileage recorded on the title certificate by the previous owner, determined the court in *Witkowski v. Mack Trucks, Inc.*, 712 F.2d 1352, 36 U.C.C. Rep. Serv. 1598 (11th Cir. 1983), where there was no evidence that anyone had tampered with the cab odometer or that it was malfunctioning, the purchasers stipulated that the hub odometer was tamper-proof, and tractors with higher mileages were selling for about the same price the purchasers had paid.

Where an automobile buyer did not allege that the mileage represented on the odometer of the automobile purchased was inaccurate, or that the odometer had been tampered with or was malfunctioning, and where the difference in the mileage at issue was less than 100 miles, no intention of fraud was fairly chargeable to the automobile seller, found the court in *Lawrence v. Franklin Inv. Co., Inc.*, 468 F. Supp. 499 (D.D.C. 1978), and the buyer could not prevail in an action brought against the seller under the section of the Odometer Act governing a civil action to enforce liability for violations of the odometer requirements, the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)). The purchaser's allegations went entirely to establishing that the seller was aware of his failure to comply with the disclosure requirements of the Act, observed the court, and whatever the efficacy of such allegations in an action grounded upon § 1988 (now 49 U.S.C.A. § 32705), they did not allege the "intent to defraud" necessary under § 1989 (now 49 U.S.C.A. § 32710).

See *Hubbard v. Bob McDorman Chevrolet*, 104 Ohio App. 3d 621, 662 N.E.2d 1102 (10th Dist. Franklin County 1995), where the state court determined that a purchaser could not recover under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), from the seller of a motor vehicle with

318 fewer miles on the odometer than were actually on the vehicle, as the purchaser failed to demonstrate that the seller knew of the discrepancy.

[\*60] Conspiracy

[\*60a] Violation of statute

It has been found that a transferor and its agent did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by conspiring to give a false odometer statement to a purchaser, based on the facts and circumstances.

Where it was alleged that both an automobile-leasing corporation and the corporation's sales agent had together conspired knowingly to give a false statement of the mileage traveled by an automobile to the purchaser in violation of the Motor Vehicle Information and Cost Savings Act, the court in *Coulbourne v. Rollins Auto Leasing Corp.*, 392 F. Supp. 1198 (D. Del. 1975), determined that these allegations were insufficient to state a cause of action, since, as a matter of law, the agent could not conspire with the corporation that was his principal, where the agent was not actuated by a personal motive beyond the expectation of a commission.

[\*60b] Intent to defraud

Based on the facts and circumstances, it has been found that transferors conspired to provide false odometer statements to a purchaser with an intent to defraud, in violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705.

Two automobile buyers brought suit against, among others, a dealer, its president, and a wholesale automobile dealer, alleging that they had violated the Motor Vehicle Information and Cost Savings Act (Act) by giving false odometer certifications, and the court in *Duval v. Midwest Auto City, Inc.*, 425 F. Supp. 1381 (D. Neb. 1977), judgment aff'd on other grounds, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), found that the dealer, its president, and the automobile wholesaler engaged in a conspiracy to give false odometer certifications in violation of the Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), with an intent to defraud the purchasers.

[\*61] Failure to disclose true mileage unknown

[\*61a] Violation -- Found

It has been found that a transferor's failure to disclose that the true mileage of a vehicle was unknown violated the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, based on the facts and circumstances.

Where the seller of an automobile had reason to know that the mileage could be that registered on the automobile's odometer plus 100,000 miles, found the court in *Leach v. Bishop Bros. Auto Auction, Inc.*, 624 F.2d 34 (5th Cir. 1980), the seller was obligated to disclose that the mileage was unknown rather than provide a statement showing the mileage as shown on the odometer under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705). Although the district court had granted summary judgment for the seller, holding that "(t)he mileage was unknown to the defendant and, under the semantic double speak of 15 U.S.C.A. § 1988, [the seller] could not disclose the mileage as 'unknown,'" the court reversed, believing that Congress did not intend for an automobile seller to misrepresent the mileage to a buyer if the seller knew, or had reason to know, that the mileage could be that registered on the odometer plus the 100,000 at the time of his disclosure.

[\*61b] Not found

The courts in the cases that found that, based on the facts and circumstances of each case, the seller of an automobile did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by failing to disclose to a purchaser that the vehicle's true mileage was unknown.

Where the seller of a used automobile knew that the actual mileage of a used car was 135,690, but was prohibited from making false statements on the required documents under a section of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988(b) (now 49 U.S.C.A. § 32705(a)(2)), found the court in *Rider Oldsmobile, Inc. v. Wright*, 415 F. Supp. 258 (M.D. Pa. 1976), the seller could not be held liable under such Act for violating a regulation promulgated pursuant thereto requiring the seller of a used automobile who is aware of a disparity between the odometer reading and the actual mileage to include a statement that the actual mileage is unknown, even though the mileage appearing on the odometer and reported pursuant to the other regulation was 35,690. Forcing the seller to state that the actual mileage was "unknown," as appeared to be the thrust of 49 C.F.R. § 580.4(c) (now 49 C.F.R. § 580.5(e)(3)), would have required the seller to violate § 1988(b) (now 49 U.S.C.A. § 32705(a)(2)), which made it unlawful knowingly to give a false statement to the transferee in making any disclosure required by such rules, held the court. Consequently, the court determined that it could not adhere to the strictly literal and fundamentally nonsensical interpretation of 49 C.F.R. § 580.4(c), which would hold the seller liable for failing to make a statement that the actual mileage was "unknown" to him when, in fact, he did know the actual mileage.

The failure of a corporate car dealer's president to furnish car buyers with the required statement disclosing that the true mileage of the vehicles was unknown did not violate the statute that imposes liability upon a "transferor" who fails to make such required disclosure to a transferee, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), found the court in *Duval v. Midwest Auto City, Inc.*, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), where the owner of the vehicles and thus the "transferor" was the corporate car dealer, not its president.

[\*61c] Intent to defraud -- Found

Failure to disclose to a purchaser that the true mileage of a vehicle was unknown resulted in a transferor's violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, with an intent to defraud, found the courts in the cases that follow, based on the facts and circumstances of each case.

Where an automobile auctioneer, found to be the transferor of a vehicle, prepared an odometer statement for a vehicle simply on the basis of the odometer reading, but failed to disclose that the actual mileage was not known, the auctioneer's reckless disregard for the basic purpose of the Motor Vehicle Information and Cost Savings Act (Act) as well as the Act's specific requirement, 15 U.S.C.A. § 1988(a)(2) (now 49 U.S.C.A. § 32705(a)(1)(B)), rose to a level of fraudulent intent and rendered it liable under the Act, determined the court in *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977). This was true, held the court, notwithstanding the fact that the buyer subsequently transferred the automobile, intentionally or unintentionally, in violation of the Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710).

Preparing odometer statements simply on the basis of a used truck's odometer reading, and then failing to disclose to the buyer that the actual mileage of the truck was unknown, demonstrated a reckless disregard for the basic purposes of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), as well as specific requirements of the Act, rendering successive transferors of the truck civilly liable under the Act to the buyer, determined the court in *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987). The statute and applicable regulation, 49 C.F.R. § 580.4(c) (now 49 C.F.R. § 580.5(e)(3)), provide that if the transferor knows the odometer reading to be different from the number of miles the vehicle has actually traveled, the transferor must disclose that the actual mileage is unknown, concluded the court.

Under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), found the Fifth Circuit Court of Appeals in *Nieto v. Pence*, 578 F.2d 640 (5th Cir. 1978), a transferor who

lacked actual knowledge that a vehicle's odometer reading was incorrect was still found to have intended to defraud and thus was civilly liable for a failure to disclose that a vehicle's actual mileage was unknown where, in the exercise of reasonable care, the seller would have had reason to know that the vehicle's mileage was more than that which the odometer had recorded or the previous owner had certified.

An original automobile seller's failure to check the box on an odometer statement certifying that to the best of his knowledge the odometer reading as stated was not the actual mileage and should not be relied on, when the seller admittedly knew the odometer reading was inaccurate, only supported the conclusion that the seller intended to defraud a transferee under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), determined the court in *A.B.C. Chevrolet Co. v. Kirk*, 1986 WL 10045 (N.D. Ill. 1986). Thus, the court granted summary judgment in favor of the transferee and against the seller as to liability.

Where an automobile dealer either knew directly of the falseness of odometer readings or was reckless in his disregard of the obvious indications that the odometer readings were false in *Duval v. Midwest Auto City, Inc.*, 425 F. Supp. 1381 (D. Neb. 1977), judgment aff'd on other grounds, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), the court found that the dealer knowingly failed to provide certification that the actual mileage on the vehicles was unknown, and that the dealer could not escape liability by telling a vehicle buyer that he only knew that the prior transferor had certified the mileage on the odometer to the dealer, under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705). Under the Act, explained the court, liability is placed on each transferor who makes no discertification of mileage or a false certification knowingly.

[\*61d] Not found

Based on the facts and circumstances of each of the following cases, the courts found that a transferor did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, with an intent to defraud a purchaser by failing to disclose that the true mileage of a vehicle was unknown.

In *Robinette v. Griffith*, 483 F. Supp. 28 (W.D. Va. 1979), a used automobile purchaser's action against a seller for the seller's alleged failure to disclose a lack of knowledge of the true mileage of the vehicle as required by the Federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1901 et seq., 1988 (now 49 U.S.C.A. §§ 32701 et seq., 32705), the court found that the purchaser's pleading failed to state a claim where the complaint alleged none of the elements of fraud or the circumstances surrounding the seller's alleged violation. Although the purchaser's allegations, if true, stated a claim under the Act, to recover damages for this alleged violation, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), required that the seller's violation include an intent to defraud, held the court. The purchaser's pleading, found the court, was deficient in that it failed to aver the circumstances constituting fraud with the particularity required by *Fed. R. Civ. P. 9(b)*. A bare allegation of fraud does not satisfy the pleading requirements of *Fed. R. Civ. P. 9(b)*, stated the court.

A district court's finding that an automobile dealer, sued by buyers to recover for alleged violations of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), based on the dealer's failure to disclose that the actual mileage of a vehicle was unknown, knew that the actual mileage was unknown, was clearly erroneous, determined the appeals court in *Yates v. Tindall and Son Pontiac*, 531 F.2d 293 (5th Cir. 1976), in view of uncontradicted evidence that when a financing corporation sold the vehicle to the dealer it furnished an odometer disclosure statement representing the mileage to be 4,180, and there was no evidence to prove that the odometer then read differently, i.e., allegedly in excess of 14,000 miles, or that the dealer knew or had reason to know that its seller's statement was false.

Motor vehicle buyers brought suit against a dealer and a salesman under the Motor Vehicle Information and Cost Savings Act (Act), alleging that the dealer provided an odometer certificate that recorded the odometer reading, but did not show that the actual mileage was unknown, and the court in *Huryta v. Diers Motor Co. of Grand Island, Neb.*, 426

*F. Supp. 1176 (D. Neb. 1977)*, found that although the prior owner had certified the true mileage as "unknown" on the certification received by the dealer, and the dealer had violated the Act, 15 U.S.C.A. § 1988(b) (now 49 U.S.C.A. § 32705(a)(1)(B)), by failing to include a statement that the actual mileage was unknown, the dealer's failure to certify the mileage as "unknown" for that one vehicle was insufficient to establish an intent to defraud, absent evidence that the dealer turned back the odometer, participated in any way, or had a history of dealing in vehicles with altered odometers.

In *Watkins v. Lowe*, 895 F.2d 1419 (9th Cir. 1990) (not designated for publication), where a used car salesman with over 20 years' experience purchased a 1982 Cadillac Eldorado from the lessee intending to resell it, the court found that although the lessee knew that the mileage disclosed by the odometer was 100,000 miles less than what the car had actually traveled, the lessee was not liable for a violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(a)(2) (now 49 U.S.C.A. § 32705(a)(1)(B)), for a failure to indicate that the mileage was unknown, since there was no intent to defraud the purchaser. In so finding, the court observed that the service records for the car were left in the glove compartment when it was delivered to the purchaser and revealed that the odometer had turned over.

[\*62] False oral statement regarding mileage

[\*62a] Violation of statute

In the following cases, the courts determined that the seller of an automobile did not violate the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., by making a false oral statement regarding the vehicle's mileage to a purchaser, based on the facts and circumstances of each case.

Where an automobile lessee brought an action against an automobile dealership alleging a violation of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), the Third Circuit Court of Appeals in *Francesconi v. Kardon Chevrolet, Inc.*, 888 F.2d 18 (3d Cir. 1989), held that assuming the Act applied to the leased automobile at issue, the car salesman's inaccurate oral representations as to the amount of miles the car had traveled were not actionable under the Act, since a written disclosure form accurately reported the correct number of miles and the disclosure form was presented to the lessee at the time of transfer.

An automobile dealer's oral misrepresentations to a buyer concerning the model and body type of the vehicle sold did not violate the odometer disclosure requirements of the Motor Vehicle Information and Cost Savings Act of 1972 (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), because the Act was concerned only with misrepresentations in mileage, found the court in *Purser v. Bill Campbell Porsche Audi, Inc.*, 431 F. Supp. 1235 (N.D. Fla. 1977). In this case, noted the court, the dealer had represented to the buyer that the vehicle was a 1969 model Porsche with a 911S body type when in fact, the vehicle was a 1967 model Porsche, body type 912, into which a 1969 Porsche 911S engine had been placed.

In *Watkins v. Lowe*, 895 F.2d 1419 (9th Cir. 1990) (not designated for publication), where a used car salesman with over 20 years' experience purchased a 1982 Cadillac Eldorado from the lessee intending to resell it, the court determined that no affirmative misrepresentations regarding the car's mileage were made to the purchaser under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988(b) (now 49 U.S.C.A. § 32705), where there was conflicting testimony as to whether the lessee or the person using the car ever affirmatively represented the car's mileage to the purchaser, either by reference to a specific mileage or by describing the car as a "low mileage" vehicle.

[\*62b] Intent to defraud

Based on the facts and circumstances of each of the following cases, the courts found that a transferor who violated the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, by making a false oral statement regarding a vehicle's mileage, did so with an intent to defraud a purchaser.

Where a seller called a purchaser's attention to a vehicle's odometer reading of approximately 40,000 miles at the time the purchaser bought the used automobile that was represented to have been the seller's personal vehicle, the court in *Klein v. Pincus*, 397 F. Supp. 847 (E.D. N.Y. 1975), held that the evidence was sufficient to show that the seller had, with an intent to defraud, made a false oral statement regarding the odometer reading in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705). Two previous owners were shown to have had the vehicle inspected when the odometer reading was over 75,000 miles, and the seller had purchased the vehicle at an automobile auction with approximately 80,000 miles on the odometer, noted the court.

In *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977), the court held that a false representation made to the purchaser of a used car by a sales agent that the odometer reading on a car was accurate "to the best of [his] knowledge" was a representation made either with actual knowledge of its falsity, or with such reckless disregard of the truth, as to satisfy the "intent to defraud" requirement and permit the imposition of liability for a violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711).

A used car dealer's newspaper advertisement describing a four-year-old automobile, on which the odometer had "turned over" and registered 13,175 miles, as a "low mileage" vehicle as well as any false oral statement, i.e., that the 110,020 mileage figure on the title certificate was an error, constituted a violation of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1988(b), 1989 (now 49 U.S.C.A. §§ 32705, 32710), which provided that no transferor shall give a false statement to a transferee in making any disclosure required by the Act, found the Fourth Circuit Court of Appeals in *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979). Ample evidence was produced at trial to support the jury's conclusion that the dealer knowingly provided false mileage information to the purchaser either on the odometer mileage statement itself or in other representations he made, and that he did so with an intent to defraud, concluded the court, and thus the court held that the jury's verdict on this issue should be reinstated. A transferor cannot insulate himself from liability under the statute by completing the odometer mileage statement correctly, and then contradicting that statement with false oral claims, held the court.

[\*D] Remedies

[\*1] Damages

[\*63] Treble damages

[\*63a] Awarded

The courts in the following cases have awarded treble damages in civil actions brought by private persons under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a), based on the facts and circumstances of each case.

Where the buyer of a used automobile presented proof that the seller had tampered with the vehicle's odometer and had failed to make the required disclosure that the instrument reading did not accurately reflect the miles the vehicle had traveled, the court in *Klein v. Pincus*, 397 F. Supp. 847 (E.D. N.Y. 1975), observing that the buyer had paid \$ 1,500 for the vehicle and had sold it a year later for \$ 80 and that the seller admitted the automobile should not have depreciated more than \$ 300 or \$ 400 in that time, calculated the statutory damage by subtracting \$ 480 from the purchase price, finding the damage to be \$ 1,020, which when trebled pursuant to the provisions of 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), resulted in total damages of \$ 3,060.

Since the seller of an automobile had received an odometer mileage statement indicating an odometer reading on the automobile of 51,233 miles, and the seller substituted an instrument panel that contained an odometer with a reading of

21,280 miles, but no written notice of such replacement was affixed to the left door frame of the automobile as required by statute and the buyer had no knowledge of such replacement, the court in *Kirkland v. Cooper*, 438 F. Supp. 808 (D.S.C. 1977), found that the seller had violated the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), and that the buyer of the automobile was entitled to recover from the seller treble damages in the amount of \$ 2,123.70 under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)).

The prevailing consumer in federal Motor Vehicle Information and Cost Savings Act (Act) litigation was entitled to recover an amount of \$ 1,756.40 in actual damages, and since the consumer had a statutory right to treble damages under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), she was awarded \$ 5,269.20 by the court in *Oettinger v. Lakeview Motors, Inc.*, 675 F. Supp. 1488 (E.D. Va. 1988). An automobile purchaser's actual damages to be trebled under the Act are to be measured by the purchase price paid for the car, less the fair market value of the car with its higher actual mileage, plus any expenses shown to be attributable to the wrongful acts of the seller, held the court.

A used car dealer's liability for the failure to disclose the unreliability of an odometer reading was three times the difference between the fair-market value of the car with the actual mileage thereon, and the amount paid for the vehicle by the buyer, in the absence of any additional damages caused by the odometer rollback, or \$ 4,500, under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), found the court in *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987). Expert testimony at trial established that the price differential between a 1980 Toyota Tercel with 66,124 miles and one with 34,367 miles was \$ 1,500, observed the court. The odometer rollback caused no additional damages to the purchaser, and thus, the damages for the dealer's infraction in failing to disclose the unreliability of the Tercel's odometer reading was three times \$ 1,500, or \$ 4,500, explained the court.

Automobile purchasers sued a seller for odometer rollbacks in violation of the Motor Vehicle Information and Cost Savings Act, upon the transfer of ownership of three automobiles, and the court in *Shipe v. Mason*, 500 F. Supp. 243 (E.D. Tenn. 1978), aff'd without reported opinion, 633 F.2d 218 (6th Cir. 1980), awarded damages under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)) to one purchaser in an amount equal to the sum of three times the actual damages of \$ 2,006, or an aggregate of \$ 6,018, and to another purchaser in an amount equal to three times the actual damages of \$ 1,400, or an aggregate of \$ 4,200.

A used automobile purchaser brought an action against a seller for odometer fraud under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), and after the district court reduced the jury's damage award, the appeals court in *Haluschak v. Dodge City of Wauwatosa, Inc.*, 909 F.2d 254, 17 Fed. R. Serv. 3d 159 (7th Cir. 1990), determined that the jury's award of \$ 7,500, statutorily tripled to \$ 22,500, to the purchaser of the used car, the odometer of which had been fraudulently set back some 80,000 miles, was, even if slightly excessive, not so "monstrously excessive" or a "product of passion and prejudice" as to justify being set aside by the court. Thus, the court remanded with instructions to reinstate the jury's verdict and award treble damages in the amount of \$ 22,500.

The buyers of a car that had its odometer rolled back in violation of the Motor Vehicle Information and Cost Savings Act (Act) were entitled to recover as "actual damages" the difference between the amount paid for the car and its fair market retail value at the time of sale, or \$ 2,975, which when trebled under the Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), amounted to \$ 8,925, and after subtracting settlements with other defendants in the amount of \$ 1,750, came to \$ 7,175, determined the court in *Beachy v. Eagle Motors, Inc.*, 637 F. Supp. 1093 (N.D. Ind. 1986). The buyers were not entitled to recover repair costs, added the court, since they made no attempt to show that any of the repairs undertaken would not have been necessary at the lower mileage.

See *Woodfield Ford Sales v. Broniek*, 1992 WL 38401 (N.D. Ill. 1992), where the court found that since a car dealer had proven by a preponderance of the evidence each element of its allegation that a car purchaser had failed to disclose the true mileage on his trade-in, a 1986 Volvo, in violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), and that the Volvo was worth less than the dealer's \$ 10,000 appraisal,

which was based upon the lower mileage figure, the car dealer suffered actual damages of \$ 5,000, and pursuant to its discretion to triple the actual damages under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), the court doubled the award for a total award of \$ 10,000.

Two automobile buyers brought suit against, among others, a dealer, its president, and a wholesale automobile dealer, alleging that they had violated the Motor Vehicle Information and Cost Savings Act (Act) by tampering with odometers on the automobiles, and the court in *Duval v. Midwest Auto City, Inc.*, 425 F. Supp. 1381 (D. Neb. 1977), judgment aff'd on other grounds, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), found that one buyer was entitled to actual damages in the amount of \$ 820, which tripled according to the Act amounted to \$ 2,460. Although substantial repairs were reasonably done on the car, added the court, no attempt was made to establish what amount represented repairs that would not have been necessary had the car been the lower-mileage vehicle the odometer indicated it was.

[\*63b] Not awarded

Under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a), treble damages have not been awarded in a civil action brought by a private person, based on the facts and circumstances.

Treble compensatory damages could not be awarded to the buyer of a used truck alleging that the successive transferors of the truck violated the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(a)), absent proof of actual damages, found the court in *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987). However, the court granted partial summary judgment in favor of the buyer against the transferors, in an amount to be set after further submissions to the court regarding evidence of actual damages and after a hearing on damages if requested by any party.

[\*64] Statutory minimum of \$ 1,500

[\*64a] Awarded

The statutory minimum amount of \$ 1,500 damages available to private persons bringing civil actions under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a), was awarded by courts in the cases below, based on the facts and circumstances of each case.

Where the purchaser of a used car brought an action against a dealer seeking statutory damages and equitable relief based on a claim that the dealer violated the disclosure provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), by failing to disclose to the purchaser that the vehicle's odometer mileage reading was inaccurate, the court in *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977), determined that the dealer was liable and ordered the dealer to pay the statutory minimum penalty of \$ 1500, where the true value of the automobile was very difficult to determine since its true mileage was unknown. The court granted rescission of the sale and based damages upon such a rescission.

In *Forrest v. Simonds*, 1997 WL 610761 (N.D. N.Y. 1997), the district court found that an automobile purchaser was entitled to recover on his claim for damages under the federal odometer disclosure law, awarding \$ 1,500 under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a), since the purchaser did not claim actual damages.

An automobile auctioneer, found to be the transferor of a vehicle, prepared an odometer statement for the vehicle simply on the basis of the odometer reading, but failed to disclose that the actual mileage was not known, and the court in *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977), determined that the auctioneer's reckless disregard for the basic purpose of the Motor Vehicle Information and Cost Savings Act (Act) as well as the Act's specific requirement, 15 U.S.C.A. § 1988(a)(2) (now 49 U.S.C.A. § 32705(a)(1)(B)), rose to a level of fraudulent

intent and rendered it liable to a subsequent purchaser of the vehicle for \$ 1,500 in statutory damages under the Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710).

Where the buyer of a used automobile sued the immediate seller, a used car dealer, the automobile dealership from which the dealer had acquired the vehicle, and the latter's president to recover for violations of the statute governing mileage disclosure when the ownership of a motor vehicle is transferred, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988, 1989 (now 49 U.S.C.A. §§ 32705, 32710), the appeals court in *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979), ordered the district court to enter judgment on the jury's verdict, awarding the minimum statutory damages as provided in § 1989 (now 49 U.S.C.A. § 32710(a)).

In *Gimarc v. Neal*, 417 F. Supp. 129 (D.S.C. 1976), an action for a violation of the odometer requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq., (now 49 U.S.C.A. §§ 32701 et seq.), wherein the jury returned a verdict in the sum of \$ 450 as actual damages, the court found that the purchaser was entitled to a judgment for \$ 1,500 under the statute, since it was an amount greater than three times the actual damages.

A used car dealer's failure to disclose the inaccuracy of a car's odometer reading created liability for the statutory minimum of \$ 1,500 under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), found the court in *Williams v. Toyota of Jefferson, Inc.*, 655 F. Supp. 1081 (E.D. La. 1987), since the car had a nonfunctioning odometer and it was impossible to determine its actual mileage.

In *Duval v. Midwest Auto City, Inc.*, 425 F. Supp. 1381 (D. Neb. 1977), judgment aff'd on other grounds, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), upon a finding that the automobile sellers had violated the Motor Vehicle Information and Cost Savings Act (Act) in connection with the sale of an automobile, the court determined that the amount of the purchasers' actual damages under 15 U.S.C.A. § 1989(a)(1) (now 49 U.S.C.A. § 32710(a)) was \$ 247 that, if tripled, was less than the \$ 1,500 minimum provided in the Act, and thus the purchasers would have been entitled to recover \$ 1,500.

The statutory damages under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), have been defined as the difference between the amount paid for the automobile and the fair market value of the same type of car with the number of miles it had actually traveled, plus incidental expenses, and applying this test to the facts of the case, the court in *Goeman v. Keating*, 498 F. Supp. 700 (D.S.D. 1980), found that a purchaser who paid \$ 3,000 for a car and received \$ 2,800 when selling it with an unknown odometer reading, and who expended \$ 274.99 in interest for financing his purchase of the car, was entitled to actual damages in the amount of \$ 474.9

since treble damages were less than the statutory \$ 1,500, the purchaser was entitled to \$ 1,500 -- the greater of the actual damages trebled and the sum of \$ 1,500.

[\*64b] Not awarded

Based on the facts and circumstances, it has been found that a transferee who prevailed in a private civil action was not entitled to the statutory minimum damages of \$ 1,500 under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a).

An automobile dealership that had received an automobile as a trade-in whose odometer mileage reading was 100,000 less than the number of miles the automobile had actually been driven and that subsequently brought an action against the transferor under the Motor Vehicle Information and Cost Savings Act of 1972 (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), was not entitled to an award of damages under the Act, found the court in *Rider Oldsmobile, Inc. v. Wright*, 415 F. Supp. 258 (M.D. Pa. 1976), since the dealership had sustained a loss of \$ 900 from the transaction, the difference between the fair market value of the car with its actual mileage and the fair market value of the car with a mileage of 100,000 less than its actual mileage, according to an accepted document within the

automobile industry for the valuation of used cars.

[\*65] Odometer check

It has been found that buyers were entitled to recover the expense of having a vehicle checked for odometer tampering under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a), based on the facts and circumstances.

Buyers were entitled under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), to a \$ 25 expense for having a vehicle checked for odometer tampering, found the court in *Beachy v. Eagle Motors, Inc.*, 637 F. Supp. 1093 (N.D. Ind. 1986).

[\*66] Recoupment or contribution

[\*66a] Allowed

In the cases that follow, the courts held that a transferor found liable may recoup damages or seek contribution from other transferors found liable for the same odometer fraud under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a).

The recoupment rule under the odometer statute, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), should be identical to the rule under the antitrust laws that a plaintiff's treble damages award must be diminished by any amounts received in settlement, held the Sixth Circuit Court of Appeals in *Rice v. Gustavel*, 891 F.2d 594 (6th Cir. 1989).

Settlements made with other defendants by the buyer of a car that has had its odometer rolled back in violation of federal law should be subtracted from the total damages awarded to the buyers under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), recognized the court in *Beachy v. Eagle Motors, Inc.*, 637 F. Supp. 1093 (N.D. Ind. 1986).

In *Roberts v. Robert V. Rohrman, Inc.*, 909 F. Supp. 545, 29 U.C.C. Rep. Serv. 2d 1208 (N.D. Ill. 1995), the court concluded that since the general rule of tort law imposes liability on multiple tortfeasors through joint and several liability, and since there is no provision of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), that changes this general rule, defendants under the Act should be allowed to recover on a contribution claim. While it is true that the purpose of the Act is to prevent odometer tampering, noted the court, this may be done just as effectively using a form of contribution.

\*\*\*\* Caution:

An earlier Seventh Circuit district court decision has held that such recoupment or contribution is not allowed. See § 66[b].

Under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), held the court in *Duval v. Midwest Auto City, Inc.*, 425 F. Supp. 1381 (D. Neb. 1977), judgment aff'd on other grounds, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), payment by one tortfeasor diminishes the amount of the claim against the other tortfeasors on account of the harm for which each is liable. The array of techniques for controlling violators or potential violators militates against a holding that each violator should be required to pay the full judgment and not receive a diminution of its liability by reason of payment by another, reasoned the court. If the statute depended entirely or primarily upon the civil liability provision to deter incipient violators, or if the civil liability provision were not itself punitive, the argument for requiring each violator to pay without benefit of credit for payment by another would be stronger, noted the court.

[\*66b] Not allowed

A transferor found liable under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(a), may not recoup damages or seek contribution from other transferors found liable for the same odometer fraud, held the courts in the cases that follow.

The Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710), does not provide a right of recoupment to the seller, held the Fourth Circuit Court of Appeals in *Ferris v. Haymore*, 967 F.2d 946 (4th Cir. 1992), as amended, (July 22, 1992). Therefore, recognized the court, where the purchaser of an automobile with an altered odometer brings suit against a seller, settlements that the purchaser has reached with the other odometer tampering defendants under the Act cannot be set off or recouped.

\*\*\*\* Comment:

In so holding, the Fourth Circuit Court of Appeals in stated that it was not persuaded by the Sixth Circuit's contrary decision in *Rice v. Gustavel*, 891 F.2d 594 (6th Cir. 1989), see § 66[a]. Specifically, the court in rejected the argument advanced by the court that the recoupment rule under the odometer statute should be identical to the rule under the antitrust laws that a plaintiff's treble damages award must be diminished by any amounts received in settlement. This argument failed to recognize the marked differences between the damages provisions of the antitrust laws and of the federal odometer statute, stated the court, since whereas § 4 of the Clayton Act by terms limits an antitrust plaintiff to "recover threefold the damages by him sustained," 15 U.S.C.A. § 15, the federal odometer statute does not limit a purchaser's recovery by some factor of the purchaser's actual damages. Indeed, the terms of the federal odometer statute expressly entitle a purchaser to recover treble damages from each seller found to have violated the statute, held the court, and the rule that an antitrust plaintiff's award must be reduced by amounts received in settlement from coconspirators simply has no bearing on the recoupment rule under the differently worded odometer statute. The separate opinion written in also suggested that odometer fraud is adequately deterred and sufficient compensation provided through other enforcement provisions of the federal odometer statute, but whether there is or is not adequate deterrence and compensation without permitting a purchaser to recover multiple treble damages awards is irrelevant, concluded the court in , since Congress determined that treble damages awards are necessary to achieve the degree of deterrence and compensation that it wished to exist, and courts are without authority to adjust those levels of deterrence and compensation through application of common law or equitable principles. The court noted that even if Congress' intent were less clear from the face of the statute than the court believed it was, the court would be reluctant to announce a different rule. Section 1989 (now 49 U.S.C.A. § 32710) is unmistakably punitive in character, explained the court, and granting recoupment under this section to a guilty defendant would substantially dilute not only the section's punitive, but also its deterrent, force.

In *Alley v. Chrysler Credit Corp.*, 767 F.2d 138, 2 Fed. R. Serv. 3d 914 (5th Cir. 1985), the court held that a buyer's settlement and release of one defendant does not release another defendant from its liability under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)).

A nonsettling defendant is not entitled to a reduction of damages under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)), by the amounts the purchasers have received from the settling defendants prior to the trial, held the court in *Saber v. Dileo*, 723 F. Supp. 1167 (E.D. La. 1989).

Recovery of contribution from other persons subject to liability for violating the provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988(b), 1989(a), 1990 (now 49 U.S.C.A. §§ 32705, 32709, 32710), concerning the alteration of odometer readings is precluded, held the court in *Mataya v. Behm Motors, Inc.*, 409 F. Supp. 65 (E.D. Wis. 1976).

## \*\*\*\* Caution:

Two later Seventh Circuit district court decisions have held that such recoupment or contribution is allowed. See § 66[a].

[\*2] Attorney's Fees

[\*67] Plaintiff

[\*67a] Award affirmed on appeal

Based on the facts and circumstances of each of the following cases, the courts affirmed on appeal an award of attorney's fees to a plaintiff in a private civil action under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b).

The appeals court in *Duval v. Midwest Auto City, Inc.*, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978), determined that the district court had properly awarded the purchasers of a used vehicle attorney's fees in the amount of \$ 14,205.65 under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(b)), even though the combined statutory damages recoverable by all the purchasers was only \$ 3,960. Where a remedial statute such as the Act requires that attorney's fees be awarded as an element of recovery, held the court, the fact that the trial court's award of attorney's fees exceeds the amount of damages recovered is not in itself sufficient to establish an abuse of discretion. In making this award, the district court had applied the guidelines recommended in the American Bar Association's Code of Professional Responsibility, Disciplinary Rule 2-106, noted the court, and those guidelines had frequently been approved by the appeals court as a standard for determining reasonable attorney's fees. Under all the circumstances, continued the court, the fact that two of the four purchasers had entered into a settlement with another defendant that precluded them from recovering from the corporate car dealer and its president did not require a reduction in the total amount of attorney's fees awarded, since after the settlement, the case proceeded to trial on the claims of all four purchasers and the liability of the dealer and its president to each purchaser was established, since the case required the same amount of preparation whether there were one or more purchasers, and since there was no showing that any significant portion of the total work product would not have been performed had the case preceded only on the claims of the purchasers who did not effect a settlement.

In *Evans v. Paradise Motors, Inc.*, 788 F. Supp. 1079 (N.D. Cal. 1991), an odometer tampering case in which the jury awarded \$ 1,500 in statutory damages for an Odometer Act violation, the court determined that the automobile buyer's attorneys were entitled to fees of \$ 47,116.80 and costs of \$ 610.55 under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a)(2) (now 49 U.S.C.A. § 32710(b)), where the attorneys staffed the case economically and billed for reasonable amounts of time for each segment of the case, showed extraordinary skill in the case with novel legal issues and unusual defense tactics, and achieved an outstanding result. In awarding attorney's fees in an odometer tampering case, the court explained that it considered the time and labor required, the novelty and difficulty of the questions involved, the requisite skill, the preclusion of other employment, the customary fee, whether the fee was fixed or contingent, time limitations, the amount involved and results obtained, the experience, reputation, and ability of the attorneys, the undesirability of the case, the nature and length of the professional relationship with the client, and awards in similar cases.

Considering the inherent complexity of a lawsuit instituted for the alleged violation of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), creating liability for tampering with an automobile odometer, and the number of issues that a purchaser's attorneys had to address, the \$ 5,000 attorney's fees awarded by the district court following a jury verdict for the purchaser was well within the standard of reasonableness, found the appeals court in *Fleet Inv. Co., Inc. v. Rogers*, 620 F.2d 792 (10th Cir. 1980). The

appeals court determined that the award of attorney's fees was not limited to the amount set by a fee arrangement between the parties that was contingent on the return of a verdict larger than what was awarded by the jury, but was to be measured not only by the amount of recovery to the purchaser, but also by nonmonetary benefits accruing to others, that is, the public at large from successful vindication of a national policy to protect consumers from fraud in the used car business.

[\*67b] Award reduced on appeal

The courts in the cases that follow determined that the amount of attorney's fees awarded to a plaintiff in a private civil action under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b), had to be reduced on appeal, based on the facts and circumstances of each case.

In *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983), an action for a violation of the odometer disclosure provisions of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), the appeals court found that an award of \$ 12,000 in attorney's fees upon a request for \$ 27,000, with a damages award of \$ 1,500, was out of line when compared to other awards under the Act, even when inflation was taken into account for the other earlier cases, and thus, the award would be reduced to \$ 8,000. There must be some relationship between the amount of damages involved and the amount of attorney's fees awarded, held the court. Undoubtedly the Act allows for fees to exceed damages, noted the court, but \$ 12,000 in fees was too far out of proportion to the \$ 1,500 award to be considered reasonable.

While a motor coach buyer's claims against husband and wife consignors were "virtually inseparable" at the beginning of the buyer's suit under the Motor Vehicle Information and Cost Savings Act, found the court in *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998), once the husband's and wife's interests diverged, issues with respect to each of them became distinct and separable, and, when the buyer prevailed against only the estate of the husband, the district court should have allocated attorney's fees under 49 U.S.C.A. § 32710(b), but should not have awarded the buyer those fees attributable to the pursuit of the claim against the wife after she distanced herself from her husband.

[\*67c] Requested amount awarded at trial

It has been found that in a private civil action, the requested amount of attorney's fees would be awarded to a plaintiff at trial under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b), based on the facts and circumstances.

Buyers of a car that had its odometer rolled back in violation of the Motor Vehicle Information and Cost Savings Act were awarded attorney's fees at the requested rate of \$ 60 an hour for total of 126.2 hours of attorneys' work, or \$ 7,572, detailed in an affidavit under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(b)), determined the court in *Beachy v. Eagle Motors, Inc.*, 637 F. Supp. 1093 (N.D. Ind. 1986).

[\*67d] Requested amount reduced at trial

Based on the facts and circumstances of each case, the courts below awarded a reduced amount of requested attorney's fees at trial to a plaintiff in a private civil action brought under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b).

In *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977), an action brought by an automobile buyer against a seller and an auctioneer from whom the seller had obtained the automobile, the court reduced the amount of attorney's fees requested under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(b)), by the time spent on the unsuccessful claim against the seller of the

automobile. In light of the evidence presented at trial, the court was not convinced that it was necessary to proceed to trial against both defendants in order to discover the source of the fraud, explained the court. The court found therefore that the evidence established that, upon prevailing against the auctioneer, the buyer was entitled to attorney's fees in the amount of \$ 1,185. Although the buyer's role as a private attorney general was somewhat tainted by his actions subsequent to bringing this lawsuit, he was nonetheless entitled to recover reasonable attorney's fees and costs, concluded the court.

An automobile purchaser who prevailed in an odometer alteration suit brought pursuant to the Motor Vehicle Information and Cost Savings Act (Act) petitioned for attorney's fees under *15 U.S.C.A. § 1989* (now *49 U.S.C.A. § 32710(b)*), and the court in *Bayless v. Irv Leopold Imports, Inc.*, *659 F. Supp. 942 (D. Or. 1987)*, determined that considering the results obtained and the unnecessary time incurred, the attorney's fees request of \$ 20,249.83 would be reduced to \$ 8,500. In formulating an award under the attorney's fees provision of the Act, the court sought guidance from opinions calculating attorney's fees under other federal statutes authorizing payment of such awards.

Prosecution of a claim that resulted in an award of actual damages of \$ 5,000 under the Motor Vehicle Information Cost and Savings Act, *15 U.S.C.A. § 1989* (now *49 U.S.C.A. § 32710(b)*), could not support the requested attorney's fees of more than \$ 160,000, determined the court in *Bishop v. Mid-America Auto Auction, Inc.*, *807 F. Supp. 683 (D. Kan. 1992)*, since the case was not unusual or complex and involved a single rollback rather than a conspiracy, even though the buyer was awarded substantial punitive damages. Thus, the court held that the purchaser's requested attorney's fees were wholly unreasonable and would not be granted. If the purchaser wished to pursue his request for attorney's fees, noted the court, he would have to resubmit a reasonable request without charges for services unrelated to the federal odometer statute claim. While there could have been some overlap for services devoted both to a common-law fraud claim and the federal odometer statute claim, the court was not convinced that the purchaser was entitled to an award that did not differentiate between the two. Therefore, the court directed the purchaser to submit his request with this reservation in mind.

An attorney who represented purchasers in an action brought under the Motor Vehicle Information and Cost Savings Act, *15 U.S.C.A. §§ 1981 et seq.* (now *49 U.S.C.A. §§ 32701 et seq.*), in which the purchasers received statutory damages of \$ 1,500 applied for attorney's fees, and the district court in *Lindsey v. Anderson & Sons Auto Sales, Inc.*, *690 F. Supp. 1028 (N.D. Ga. 1988)*, determined that the attorney was entitled to a fee award of \$ 9,728, representing 102.4 hours of work at a rate of \$ 95 per hour, although the attorney claimed that she should be compensated at \$ 125 per hour based in part on the contention that commercial litigation was most comparable to the work performed in this action. An Odometer Act case is a very routine, unsophisticated lawsuit most closely akin to collection matters, to suits on account, and to small actions for breach of contract, held the court, and the prevailing rate for attorneys of the same skill and experience in collection law matters where counterclaims are filed or in minor breach of contracts was \$ 75 to \$ 100 per hour. Because the court judged the attorney's skill as above average, it believed that the reasonable fee would be \$ 95 per hour.

[\*67e] Award amount determined at trial

In a private civil action brought under the Motor Vehicle Information and Cost Savings Act, *49 U.S.C.A. § 32710(b)*, the courts in the following cases determined the amount of attorney's fees to award to a plaintiff at trial, based on the facts and circumstances of each case.

In *Cirrincone v. Pratt Chevrolet, Oldsmobile & Pontiac*, *275 F. Supp. 2d 26 (D. Me. 2003)*, the court held that although the buyer failed to establish the amount of damages in the form of excess vehicle damage or loss in the value of the vehicle due to odometer fraud, the buyer was more likely than not to succeed under *49 U.S.C.A. § 32705(a)*, which authorized the award of costs and attorney's fees for a successful plaintiff, and that buyer's counsel submitted an affidavit asserting that he anticipated spending 50 hours on the case at a rate of \$ 150 per hour, and that costs would amount to at least \$ 1,500.

In *Klein v. Pincus*, 397 F. Supp. 847 (E.D. N.Y. 1975), where the buyer of a used automobile recovered treble damages in the amount of \$ 3,060 from the seller of the vehicle who had illegally tampered with the odometer, the court held that the buyer was in addition entitled to reasonable attorney's fees of \$ 1,000 under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(b)).

Where the purchaser of a used car brought an action against a dealer seeking statutory damages and equitable relief based on a claim that the dealer violated the disclosure provisions of the Motor Vehicle Information and Cost Savings Act by failing to disclose that the vehicle's odometer mileage reading was inaccurate, the court in *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977), determined that the dealer was liable and ordered the dealer to pay \$ 1,200 in attorney's fees.

The purchaser of a used car from a dealer brought an action under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1901 et seq. (now 49 U.S.C.A. §§ 32701 to 32711), charging the dealer with knowingly having given the purchaser a false statement concerning the mileage on a car with intent to defraud the purchaser, and on a motion for a new trial or remittitur, the court in *Gonzales v. Van's Chevrolet, Inc.*, 498 F. Supp. 1102 (D. Del. 1980), found that the attorney for the purchaser who prevailed in this action was entitled to recover an award of fees of \$ 9,000, plus costs. This amount was slightly less than 50% in excess of the lodestar figure, noted the court. A purchaser's attorneys are entitled to compensation for time spent preparing fee petitions and successfully appealing a fee award when the fee award is statutorily authorized, held the court.

In an action for a violation of the odometer requirements of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), consideration of the time spent, the skill employed, the reputation and skill of the successful purchaser's counsel, the diligence of counsel and the objective of Congress in having attorneys adequately compensated required an award in the sum of \$ 1,000 for attorney's fees, found the court in *Gimarc v. Neal*, 417 F. Supp. 129 (D.S.C. 1976). Considerations that may control the fixing of attorney's fees in a case involving an alleged violation of the odometer requirements of the Act necessarily are flexible and not absolute, and, if submitted without proof of the specific time involved, resolve themselves into a question of reasonableness, explained the court.

\*\*\*\* Observation:

The court in stated that if an attorney is to be awarded a fee commensurate with the assistance given to the purchaser, the fee could easily overshadow the amount that is recovered for the purchaser. If one is to take the matter of recovery as a measure, then first-class attorneys will be discouraged from engaging in this sort of litigation, and the purpose and intent of Congress would be entirely aborted, noted the court. Perhaps it would be easy for courts to "pass the buck" back to the United States Congress, observed the court, but justice demands that the courts give a decision and that the attorney be awarded a reasonable fee. If the court set a precedent awarding attorney's fees in such a niggardly fashion as to discourage from handling this type of litigation the kind of lawyers wanted in federal court, then it would have aborted the purpose of Congress in passing the legislation, reasoned the court. In an effort to solve this problem, which takes on immense proportions when one considers the number of cases that could evolve from violations of this statute, the court stated that it faces an obvious dilemma, since experience showed that niggardly fee schedules discourage good lawyers, but on the other hand, overly generous attorney's fees might be productive of otherwise unworthy litigation.

Where the seller of an automobile had received an odometer mileage statement indicating an odometer reading on the automobile of 51,233 miles, and the seller substituted an instrument panel that contained an odometer with a reading of 21,280 miles, but no written notice of such replacement was affixed to the left door frame of the automobile as required by statute and the buyer had no knowledge of such replacement, the court in *Kirkland v. Cooper*, 438 F. Supp. 808 (D.S.C. 1977), found that the seller had violated the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 to 1991 (now 49 U.S.C.A. §§ 32701 to 32711), and that the buyer of the automobile was entitled to attorney's fees

in the amount of \$ 2,000.

Automobile purchasers' attorneys in a civil odometer fraud action were entitled to a fee award under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a)(2) (now 49 U.S.C.A. § 32710(b)), reflecting 135.55 hours of legal work at \$ 100 per hour, in view of the time and labor required, the amount involved and the results obtained, and awards in similar cases, and the award was to be apportioned among the defendants in a court-specified manner, determined the court in *Saber v. Dileo*, 723 F. Supp. 1167 (E.D. La. 1989). The most important factor in assessing attorney's fees is the results obtained, continued the court, and where a purchaser has obtained excellent results, his or her attorney should recover a full compensatory fee. Normally this will encompass all hours reasonably expended on the litigation, and indeed in some cases of exceptional success an enhanced award may be justified, held the court.

[\*68] Appeal fees

Based on the facts and circumstances of each of the following cases, the courts awarded attorney's fees to a plaintiff in a private civil action for appeal efforts under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b).

A used automobile purchaser who prevailed on retrial of an odometer fraud claim was entitled to a reasonable award for the time involved in the preparation and argument of the appeal, under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a)(2) (now 49 U.S.C.A. § 32710(b)), found the Seventh Circuit Court of Appeals in *Haluschak v. Dodge City of Wauwatosa, Inc.*, 909 F.2d 254, 17 Fed. R. Serv. 3d 159 (7th Cir. 1990).

A successful purchaser filed a motion seeking an award of additional attorney's fees for legal services rendered on appeal from a judgment entered in an action under the Motor Vehicle Information and Cost Savings Act, and the court in *Fleet Inv. Co., Inc. v. Rogers*, 505 F. Supp. 522 (W.D. Okla. 1980), determined that the purchaser was entitled to an award of \$ 3,600 for legal services rendered on appeal under 15 U.S.C.A. § 1989(a)(2) (now 49 U.S.C.A. § 32710(b)). This fee, held the court, was based on the nature of the litigation, the presence of some complex features in the case, the amount involved, the time required of counsel, the skill required and possessed by counsel, the result obtained for the purchaser, and a reasonable hourly rate considered customary in the community in a case of this kind. It would be inconsistent with the intent of Congress, in providing for attorney's fees, to dilute a fee award by refusing to compensate an attorney for the time reasonably spent establishing a rightful claim to a fee or on appellate work defending a judgment, reasoned the court. The district court had the power and was the proper forum in which to determine reasonable attorney's fees for services performed on appeal, added the court.

[\*69] Second trial fees

Attorney's fees have been awarded to a plaintiff in a private civil action under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b), for attorney efforts made during a second trial, based on the facts and circumstances.

A used automobile purchaser who prevailed on retrial of an odometer fraud claim was entitled to \$ 12,560 in attorney's fees under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(a)(2) (now 49 U.S.C.A. § 32710(b)), found the Seventh Circuit Court of Appeals in *Haluschak v. Dodge City of Wauwatosa, Inc.*, 909 F.2d 254, 17 Fed. R. Serv. 3d 159 (7th Cir. 1990). Although the seller argued that the purchaser should not receive attorney's fees incurred in the second trial, the court allowed such fees, because the costs of additional relitigation were created in large part by the sellers, the second trial was a worthwhile option for the purchaser and his counsel, and because denying attorney's fees for retrials would burden the purchaser's rights under 15 U.S.C.A. § 1989(a) (now 49 U.S.C.A. § 32710(a)) in a manner not intended by Congress. Removing the right to reasonable attorney's fees for a second trial would effectively foreclose that option for many litigants, thus removing their right to a jury determination of their case, and the court would not countenance such a result.

[\*70] Defendant

Attorney's fees were not awarded to a defendant in a private civil action under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b), based on the facts and circumstances of each case.

In *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977), an action by an automobile buyer against a seller and an auctioneer from whom the seller had obtained the automobile, the court found that the seller was not entitled to the requested attorney's fees under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(b)), in the amount of \$ 3,406.66 (85.16 hours at \$ 40 per hour) as against the buyer, even though the court had held that the seller was not liable to the buyer under the Act.

In *Miller's Apple Valley Chevrolet Olds-Geo, Inc. v. Goodwin*, 177 F.3d 232 (4th Cir. 1999), where the defendant moved for costs and attorney's fees against an automobile dealer who had unsuccessfully brought an action against a customer under the Motor Vehicle Information and Cost Savings Act of 1972, alleging odometer fraud in connection with trade-in, the court held that the 49 U.S.C.A. § 32710(b) authorizes an award of costs and attorney's fees only to a prevailing plaintiff, and not to any prevailing party, and thus the defendant customer could not recover costs and attorney's fees under the Act.

[\*71] Third party

A third party defendant was not awarded attorney's fees under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32710(b), based on the facts and circumstances in a private civil action.

In *Hathcock v. G & M Builders, Inc.*, 601 F.2d 846 (5th Cir. 1979), a suit brought under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1987 to 1989 (now 49 U.S.C.A. §§ 32704, 32705, 32710), to redress an alleged violation consisting of a failure to disclose the accurate mileage of a used car, the appeals court determined that the district court had properly refused to assess attorney's fees against the seller in favor of a successful third-party defendant. Although the seller argued that the literal language of the statute was broad enough to allow the award of its attorney's fees because the language did not limit the award of fees to successful plaintiffs, the court found this argument wholly without merit for three separate and independently sufficient reasons. First, and most compelling, the court did not think that the statute was intended to authorize an award of attorney's fees to a party in the position of the third-party defendants. The seller was a plaintiff with respect to the third-party defendants, and it would subvert the purpose of the Act to award attorney's fees against an unsuccessful plaintiff, explained the court. A different result should not obtain merely because of the posture of this lawsuit, stated the court. Second, and equally important, the underlying judgment on which the third-party defendants sought to predicate fee liability against the seller had been reversed in the court's opinion. Finally, concluded the court, even had it decided that attorney's fees were authorized by the statute in this situation, the award of fees was discretionary with the trial judge, and the appeals court could not say that the trial judge abused his discretion in refusing to exercise it in favor of the third-party defendants.

[\*3] Equitable Remedies

[\*72] Rescission

It has been found that the equitable remedy of rescission may be ordered in an action brought under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances of each case.

Rescission being an equitable remedy based on the law of contracts, its place in a statutory action for legal damages that sounds in tort must be considered, but even the common law recognized concurrent legal and equitable jurisdiction in

fraud cases, as a correlate of equity's broad prerogative to remedy fraudulent wrongs, held the court in *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977), concluding that there could thus be little question that the court could properly exercise pendent equitable jurisdiction and order rescission in a case brought under the Motor Vehicle Information and Cost Savings Act.

In *Irby-Greene v. M.O.R., Inc.*, 79 F. Supp. 2d 630 (E.D. Va. 2000), the court held that under "FTC Holder Rule," purchaser of a used automobile could seek rescission of an installment contract against the assignee based on the assignor's alleged violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32705.

[\*73] Restitution

The equitable remedy of restitution has been ordered, based on the facts and circumstances, where a vehicle transferor was found liable under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

Where the purchaser of a used car brought an action against the dealer seeking statutory damages and equitable relief based on a claim that the dealer violated the disclosure provisions of the Motor Vehicle Information and Cost Savings Act by failing to disclose that the vehicle's odometer mileage reading was inaccurate, the court in *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977), determined that the dealer was liable and ordered the dealer to make restitution for the full value of the automobile purchased from it, including the value of the installment note (\$ 1,750), the down payment (\$ 221.70), and the trade-in allowance for the purchaser's 1967 Ford Falcon (\$ 50). In return, the dealer would retain ownership and possession of automobile, held the court.

In *U.S. v. Suva*, 44 Fed. Appx. 87 (9th Cir. 2002), where the defendant was convicted of the alteration of used motor vehicle odometers under 49 U.S.C.A. § 32709(b), the court held that the defendant's plea agreement, which expressly provided that the district court was not bound by it, could not limit the district court's discretion in imposing restitution, in prosecution for conspiracy, alteration of used motor vehicle odometers, interstate transportation of forged securities, and engaging in money laundering of funds derived from the interstate transportation of stolen vehicles.

[\*V] ATTORNEY GENERAL CIVIL ACTIONS

[\*A] Generally

[\*74] Situs of violation

It has been found that a violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., occurred in a particular state for the purposes of an attorney general civil action, based on the facts and circumstances.

In *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), where the state of Maryland and its attorney general sued for violations of the Federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), in connection with the "rolling-back" of odometers of high-mileage vehicles, the court found that the inaccurate disclosure of or failure to disclose odometer information under 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705) could be inferred to have occurred in Maryland, where odometers on the subject vehicles were rolled back in that state, the bases of operations of conspiracy were in that state, and the purchasers titled the vehicles there.

\*\*\*\*\* Observation:

The Act, 49 U.S.C.A. § 32709(c), provides that an attorney general may bring a civil action to enjoin a violation in the

United States district court for the judicial district in which the violation occurred or the defendant is found, resides, or does business.

[\*75] Circumstantial evidence

It has been found that circumstantial evidence of the situs of a violation was sufficient for the purposes of an attorney general civil action brought under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances.

Circumstantial evidence that Maryland was the situs of odometer alterations was sufficient in a suit by the state of Maryland and its attorney general for violations of the Federal Motor Vehicle Information and Cost Savings Act (Act), under 15 U.S.C.A. § 1990a(a) (now 49 U.S.C.A. § 32709(c)), determined the court in *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), particularly where direct evidence implicated the defendants in numerous violations of the Act, leaving open only a formal question of which state's attorney general would act as custodian for the claims and recoveries on behalf of the victims. The Act empowers the attorney general of a state to sue only with respect to violations that "occurred" in that state, held the court.

[\*76] Statute of limitations

[\*76a] Runs upon attorney general's discovery

It has been held that the two-year statute of limitations period on suits by a state attorney general under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., runs upon the attorney general's actual or constructive discovery of the fraud.

In *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), the court held that the two-year limitations period on suits by a state attorney general under the Federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1990a(b) (now 49 U.S.C.A. § 32709(d)(2)), is tolled until the attorney general's discovery of the alleged violations. Such an action is subject to the discovery rule governing federal causes of action, stated the court, which provides that the statute of limitations applicable to actions sounding in fraud begins to run from the date the fraud is discovered or the date that it could have been discovered in the exercise of reasonable diligence.

[\*76b] Runs upon purchaser's discovery

In civil suits brought by a state attorney general under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., it has been held that the two-year statute of limitations period runs upon the vehicle purchaser's actual or constructive discovery of the fraud.

The two-year statute of limitations on odometer fraud suits brought by the attorney general on behalf of damaged automobile purchasers under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1989(b) (now 49 U.S.C.A. § 32710(b)), begins to run, as to each purchaser's claim, at the time the purchaser discovered or should have discovered the seller's alleged fraud, held the court in *State of Utah by Wilkinson v. B & H Auto*, 701 F. Supp. 201 (D. Utah 1988). The date the state discovers the alleged violation of the fraud statute is irrelevant, stated the court, since the state has no greater rights than those upon whose behalf it brings the action.

[\*B] Parties

[\*77] Transferee

Based on the facts and circumstances presented, it has been found in a civil action that purchasers represented by a state attorney general were transferees under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

The court in *State of Utah by Wilkinson v. B & H Auto*, 701 F. Supp. 201 (D. Utah 1988), determined that the ultimate purchasers of automobiles, represented by a state attorney general, were "transferees" for the purpose of stating a cause of action for violation of the disclosure requirements of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705).

[\*78] Joint and several liability

It has been found that transferors were jointly and severally liable for violations of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances in a civil action brought by a state attorney general.

Participants in a conspiracy to violate the federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), were jointly and severally liable for violations committed by the other conspirators during the course and in furtherance thereof, held the court in *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989).

[\*C] Particular Violations of Statute

[\*1] Tampering

[\*79] Odometer rolled back

Based on the facts and circumstances presented, it has been found in a civil suit brought by a state attorney general that a transferor rolled back the odometer of a vehicle in violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., with the requisite intent to defraud.

In *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), where the state of Maryland and its attorney general sued for violations of the Federal Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), in connection with the "rolling-back" of odometers of high-mileage vehicles, the court found that an intent to defraud could be inferred from the automobile seller's knowledge that many of the cars sold had incorrect odometer readings, evidencing at least reckless disregard. The court held that each time an automobile seller alters an odometer, a separate violation of the Act occurs.

[\*80] Conspiracy

It has been found in a civil suit brought by a state attorney general that transferors conspired, with an intent to defraud, to roll back the odometers of high-mileage vehicles in violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances.

Coconspirators were liable for violations of the federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), in connection with the "rolling-back" of the odometers of high-mileage vehicles committed by members of their conspiracy during the course of and in furtherance of the conspiracy, determined the court in *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989). The sellers were sufficiently linked to the conspiracy to roll back the odometers of 355 high-mileage vehicles and were

thereby liable for statutory violations associated with each vehicle, held the court, where the names of both sellers appeared in chain of title for 186 of those vehicles, the names of one seller or the other appeared in chain of title of 111 others, and the sellers were otherwise implicated in the sale of remaining 58 vehicles. Furthermore, added the court, contrary to the coconspirators' contention, the record contained ample evidence establishing an intent to defraud. In addition to confessing guilt before the judge during his arraignment, the record showed that one coconspirator testified fully to the entire conspiracy at another coconspirator's trial, describing the arrangement pursuant to which 400 to 500 used vehicles were redocumented and thereafter transferred from one coconspirator to the next, observed the court. The coconspirator also admitted that he rolled back somewhat more than 100 vehicles and that he knew the other seller had rolled back 30% to 40% of the remainder of the 400 to 500 vehicles, and described the involvement of his son as well as other coconspirators, and this same coconspirator had not come forward to dispute any of these admissions, noted the court.

[\*2] Disclosure

[\*81] Failure to disclose true mileage

It has been found in a civil suit brought by a state attorney general that a transferor who failed to disclose the true mileage of a vehicle violated the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., with an intent to defraud, based on the facts and circumstances.

In *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), the court recognized that in a suit for violations of the Federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), an intent to defraud could be inferred from an automobile seller's involvement in a scheme to defraud and the knowledge that many of the cars sold had incorrect odometer readings, evidencing at least reckless disregard.

[\*82] False oral statement regarding mileage

It has been held that in a civil suit brought by a state attorney general, the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., prohibits a transferor from making a false statement to a transferee.

In *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), the court held that the Federal Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), prohibits a transferor of a motor vehicle from making a false oral statement to a transferee in violation of rules adopted under the section, which are set forth at 49 C.F.R. §§ 580.1 et seq.

[\*D] Remedies

[\*83] Statutory minimum of \$ 1,500

A state attorney general in a civil action could recover the minimum statutory penalty of \$ 1,500 for each violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., based on the facts and circumstances, it has been found.

In *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989), where the state of Maryland and its attorney general sued for violations of the Federal Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1981 et seq. (now 49 U.S.C.A. §§ 32701 et seq.), in connection with the "rolling-back" of odometers of high-mileage vehicles, the court found that Maryland's attorney general could recover \$ 1,500, representing the minimum statutory

penalty when a victim proved no damage, for each of the 355 violations of the Act involving tampering with odometers under *15 U.S.C.A. § 1989(a)* (now *49 U.S.C.A. § 32710(a)*). To deter odometer tampering, noted the court, the Act provides remedies that assure not only that victims are compensated fully for any damage caused but also that violators are penalized by the trebling of the damage or, in the absence of damage, by awarding a minimum amount of \$ 1,500. When the victim proves no damage, continued the court, the victim receives the minimum statutory amount of \$ 1,500 as a penalty. Should the victim, however, prove damage in the action, whether under the Act or on a common-law theory, the victim ought not to receive automatically the \$ 1,500 penalty, but rather should receive a sum that is the damage trebled or \$ 1,500, whichever is greater, stated the court. In that circumstance, to avoid receiving compensatory damages twice, the victim could not recover under other theories of compensatory damage, concluded the court.

[\*84] Restitution

The equitable remedy of restitution was not ordered in a civil action brought by a state attorney general for a violation of the Motor Vehicle Information and Cost Savings Act, *49 U.S.C.A. §§ 32701 et seq.*, based on the facts and circumstances.

In *Attorney General of Maryland v. Dickson*, *717 F. Supp. 1090 (D. Md. 1989)*, where the state of Maryland and its attorney general sued for violations of the Federal Motor Vehicle Information and Cost Savings Act (Act), *15 U.S.C.A. §§ 1981 et seq.* (now *49 U.S.C.A. §§ 32701 et seq.*), in connection with the "rolling-back" of odometers of high-mileage vehicles, the court found that the attorney general of Maryland was not entitled to recover a restitutionary award.

[\*VI] CRIMINAL ACTIONS

[\*A] Generally

[\*85] Subpoena power -- Production of business records

It has been found, based on the facts and circumstances, that subpoenas for the production of business records related to criminal violations of the Motor Vehicle Information and Cost Savings Act, *49 U.S.C.A. §§ 32701 et seq.*, should be enforced.

Grand jury subpoenas for the production of business records related to an investigation into putative criminal violations of odometer regulations by automobile dealers under the Motor Vehicle Information and Cost Savings Act, *15 U.S.C.A. § 1990* (now *49 U.S.C.A. § 32706(e)(C)*), did not make overly broad or burdensome requests, found the court in *In re Grand Jury Subpoena Duces Tecum Served on Allied Auto Sales, Inc.*, *606 F. Supp. 7 (D.R.I. 1983)*.

[\*86] Production of odometer statements

Based on the facts and circumstances presented, it has been found that subpoenas for the production of odometer statements related to criminal violations of the Motor Vehicle Information and Cost Savings Act, *49 U.S.C.A. §§ 32701 et seq.*, should be enforced.

Sole proprietors operating automobile dealerships moved to quash subpoenas duces tecum requiring them to produce odometer statements for their motor vehicles under the Motor Vehicle Information and Cost Savings Act, *15 U.S.C.A. § 1990(d)* (now *49 U.S.C.A. § 32709*), and after the district court quashed the subpoenas, the appeals court in *In re Grand Jury Subpoena Duces Tecum Served Upon Underhill*, *781 F.2d 64 (6th Cir. 1986)*, found that the odometer statements were not protected by the Fifth Amendment, and that the act of producing such statements came within the required-records exception to the Fifth Amendment where the requirement to maintain the statements was regulatory in

nature, the statements were records that automobile dealers would ordinarily keep, and the statements assumed public aspects because the transferors were required to provide signed copies to buyers.

[\*B] Parties

[\*87] Transferor

[\*87a] Found

The courts in the following cases found, based on the facts and circumstances of each case, that the seller of an automobile was a transferor for the purposes of a criminal action brought under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

An automobile seller convicted under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1988(b), 1990(c) (now 49 U.S.C.A. §§ 32705, 32709), for giving a false mileage statement to a transferee was found to be a transferor within the meaning of § 1988(b) (now 49 U.S.C.A. § 32705) by the court in *U.S. v. Henson*, 848 F.2d 1374 (6th Cir. 1988), where the seller gave, or caused a transferor to give, a false odometer statement to a transferee as alleged in the indictment. A defendant may be found to be a transferor under the Act, held the court, where the seller gives, or causes a transferor to give, a false odometer statement to a transferee. In so holding, the court stated that it believed Congress used language in § 1988(b) (now 49 U.S.C.A. § 32705) similar to that used in 18 U.S.C.A. § 2(b), under which defendants can be convicted as causers, even though they are not legally capable of personally committing the act forbidden by the federal statute, and even though the agent caused to do the criminal act was guiltless of the crime. Thus, even assuming a defendant was not a transferor within the meaning of § 1988(b), the jury could find that the defendant adopted a transferor's acts and capacity by causing a transferor to commit a criminal act, concluded the court.

\*\*\*\* Comment:

n93 The Sixth Circuit Court of Appeals in noted that it had examined the legislative history of the Act and did not find any pronouncements inconsistent with the conclusion it reached in this case. If the court were to accept the seller's interpretation that only transferors who give or cause to be given a false odometer statement can be convicted, stated the court, it would create a gaping loophole in the law that would hinder, rather than promote, accurate reporting of mileage information to the consumer. For example, proposed the court, an automobile dealer's corrupt employee could alter the odometer statements of his employer's vehicles without the latter's knowledge, and under the seller's interpretation, this employee could not be convicted under § 1990(c) (now 49 U.S.C.A. § 32709) because the employee would not be a transferor. The court did not believe that the Act countenances such an outcome. Furthermore, the court noted the Ninth Circuit Court of Appeals' decision in *U.S. v. Powell*, 806 F.2d 1421 (9th Cir. 1986), see § 87[b], which found that an employee was not a "transferor" but also stated that the government's argument that the employee should be held liable under § 1990(c) because he caused his employer, the transferor, to violate § 1988(b) by furnishing mileage certificates that he knew to be false. The court stated that this was certainly a viable theory, although it refused to consider this theory because the argument was raised for the first time on appeal.

Automobile dealers and their accomplices in a scheme to "launder" automobile titles through states other than Illinois so as to avoid the Illinois requirement of including a "salvaged vehicle" notation on the titles were "transferors" within the meaning of the federal odometer disclosure regulations of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1990c (now 49 U.S.C.A. § 32709(b)), determined the court in *U.S. v. Ellis*, 739 F.2d 1250 (7th Cir. 1984), inasmuch as each dealer claimed to own the vehicles in question when applying for new titles. Evidence that would constitute conclusive proof of ownership was not required under the Act, added the court. Congress intended to adopt a nationwide standard requiring those who transfer automobiles to provide odometer statements, explained the court, and

in accomplishing this goal, Congress and the Secretary of Transportation used broad language to describe those falling within the ambit of the Act. To make the application of this standard vary depending upon the person's state of residence and state of mind would severely undercut the effectiveness of the Act, determined the court. By all objective evidence, found the court, the dealers in this case transferred ownership of the automobiles, nothing more was required to subject them to the requirements of the Act, and the dealers could not claim that the transfers were sham and thereby avoid the consequences of their actions.

[\*87b] Not found

Based on the facts and circumstances presented, it has been found that the seller of an automobile was not a transferor for the purposes of a criminal action brought under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq.

An agent of a sole proprietorship that was engaged in the business of purchasing used cars from auto auctions and reselling them to used car retailers was not a transferor under the criminal disclosure provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), determined the court in *U.S. v. Powell*, 806 F.2d 1421 (9th Cir. 1986), since even though the agent had held himself out as the owner of the vehicles at issue, arranged the sales, and signed the sales certificates as the transferor, he was at all times merely an agent for the true owner, found the court.

\*\*\*\* Caution:

Circuit Judge Ferguson dissented in , arguing that while a transferor may be the only one liable in civil proceedings, this limitation was specifically and intentionally eliminated by Congress for the imposition of criminal liability. To conclude otherwise thwarts the general purpose of the statute and makes fine-line distinctions contrary to congressional intent and statutory language, argued the judge.

[\*88] Corporation

It has been held that a corporation may be responsible when two or more high-ranking or authoritative agents engage in a criminal conspiracy on its behalf, under the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32703.

In *U.S. v. Hugh Chalmers Chevrolet-Toyota, Inc.*, 800 F.2d 737 (8th Cir. 1986), the court held that under the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32703, a corporation may be responsible when two or more high-ranking or authoritative agents engage in a criminal conspiracy on its behalf.

[\*C] Particular Violations of Statute

[\*1] Tampering

[\*89] Odometer rolled back

In the following cases, the courts upheld convictions for rolling back vehicle odometers in violation of the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32703, 32709, based on the facts and circumstances in each case.

In *U.S. v. Brandon*, 599 F.2d 112 (6th Cir. 1979), the court determined that evidence that automobiles had been

purchased by dealers and kept on their used car lot under their possession and control until the date on which the altered odometers were observed was sufficient to sustain their convictions for altering the odometers on two automobiles under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. §§ 1984, 1990(c) (now 49 U.S.C.A. §§ 32703, 32709), despite the dealers' contentions that the automobiles involved had been sold to a cousin of one of the dealers.

Evidence that seven automobiles had a higher mileage when purchased by a used car dealer than was shown when they were sold by the dealer and testimony that the dealer had been personally involved in causing the alteration of the odometers to a lower mileage sustained the dealer's conviction for altering the odometers under the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. §§ 32703, 32709), determined the court in *U.S. v. Townsend*, 796 F.2d 158, 21 Fed. R. Evid. Serv. 71 (6th Cir. 1986). Although the government produced no direct evidence that the dealer actually altered the odometers, noted the court, the government produced sufficient circumstantial evidence from which the jury could have reasonably concluded that the dealer altered or directed someone else to alter the odometer of each of the seven cars.

A vehicle transferor was convicted before the district court of violating the Motor Vehicle Information and Cost Savings Act provisions concerning odometer tampering, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703), and upon appeal, the court in *U.S. v. Studna*, 713 F.2d 416 (8th Cir. 1983), upheld the conviction, finding that the transferor had knowingly and willfully violated a known legal duty.

Sufficient evidence existed to support a used automobile seller's conviction based on 28 counts of odometer tampering, determined the appeals court in *U.S. v. Berndt*, 86 F.3d 803 (8th Cir. 1996), under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32703(2).

[\*90] Conspiracy

Based on the facts and circumstances of each of the following cases, the courts upheld convictions for conspiring to roll back odometers in violation of the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32703, 32709.

Although a convicted defendant in *U.S. v. Carroll*, 166 F.3d 334 (4th Cir. 1998) (not designated for publication), claimed that the evidence was insufficient to support the verdict of conviction for conspiring to alter the odometers of hundreds of motor vehicles, in violation of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32703(2), 32709(b), the appeals court found that even the abbreviated recitation of facts in its opinion showed that the defendant's claim was entirely without merit.

The evidence was sufficient to support an auto broker employee's conviction of conspiracy to alter motor vehicle odometers under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1986 (now 49 U.S.C.A. § 32703), found the court in *U.S. v. Fallon*, 776 F.2d 727, 19 Fed. R. Evid. Serv. 632 (7th Cir. 1985), where the prosecution introduced documents showing that the employee purchased cars with high mileage readings and resold them with lower mileage readings, and introduced testimony that the employee was the auto broker's manager at a time when 95% of the cars sold were altered, that the employee used the state auto titling process to conceal the odometer rollbacks, and that the employee discussed the odometer rollbacks with others.

Sufficient evidence existed to support a conviction based on a conspiracy between two defendants to purchase high-mileage vehicles, tamper with the odometers, and sell the same vehicles with significantly fewer miles listed on the odometer, determined the appeals court in *U.S. v. Berndt*, 86 F.3d 803 (8th Cir. 1996), under the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32703(4).

[\*91] Odometer disconnected

It has been found that a conviction for disconnecting a vehicle's odometer in violation of the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32703, was supported by the evidence, based on the facts and circumstances.

A finding that an automobile dealership had disconnected a vehicle's odometer in violation of a criminal statute, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. § 32703), was sufficiently supported by evidence that the vehicle had been in the custody and control of dealership, and that it was sold with an inoperative odometer and with uncharacteristic tire-tread wear, found the court in *U.S. v. Hugh Chalmers Chevrolet-Toyota, Inc.*, 800 F.2d 737 (8th Cir. 1986).

[\*92] Conspiracy

Based on the facts and circumstances presented, it has been found that a conviction for conspiring to disconnect a vehicle's odometer in violation of the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32703, was supported by the evidence.

The finding that an automobile dealership had conspired to disconnect a vehicle's odometer in violation of a criminal statute, the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1986 (now 49 U.S.C.A. § 32703), was sufficiently supported by evidence that the general manager of automobile dealership had ordered an employee to disconnect the car's odometer, the vehicle had been in the custody and control of the dealership, and that it was sold with an inoperative odometer and with uncharacteristic tire-tread wear, held the court in *U.S. v. Hugh Chalmers Chevrolet-Toyota, Inc.*, 800 F.2d 737 (8th Cir. 1986). Although the dealership claimed that as a corporate entity it could not be subject to criminal prosecution for conspiracy solely among its own agents, the court disagreed, holding that a corporation may be responsible when two or more high-ranking or authoritative agents engage in a criminal conspiracy on its behalf.

[\*2] Disclosure

[\*93] Failure to disclose true mileage

[\*93a] Conviction upheld

The courts in the cases that follow determined that the conviction of a vehicle transferor for failure to disclose the vehicle's true mileage under the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32705, 32709, was supported by the evidence, based on the facts and circumstances of each case.

After carefully reviewing the record, and making all reasonable inferences favorable to the government, the court in *U.S. v. Henson*, 848 F.2d 1374 (6th Cir. 1988), could find no merit to an automobile seller's contention that there was insufficient evidence to support the jury's verdict that he gave, or caused a transferor to give, false odometer statements to transferees under the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. §§ 1988(b), 1990(c) (now 49 U.S.C.A. §§ 32705, 32709), and the court therefore affirmed the seller's conviction.

Where a car transferor appealed from his conviction on five counts of furnishing a false odometer statement in connection with the sale of five automobiles, in violation of 15 U.S.C.A. §§ 1988(b) and 1990(c) (now 49 U.S.C.A. §§ 32705, 32709), the appeals court in *U.S. v. Barker*, 932 F.2d 975 (10th Cir. 1991) (not designated for publication), agreed with the district court that the documentary evidence in combination with the testimony of a Department of Motor Vehicles representative and of the transferor himself provided sufficient evidence to support the government's case, and the conviction, beyond a reasonable doubt.

[\*93b] Conviction overturned

It has been determined, based on the facts and circumstances presented, that the conviction of a vehicle transferor for failure to disclose the vehicle's true mileage under the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. § 32705, was not supported by the evidence.

An agent of a sole proprietorship that was engaged in the business of purchasing used cars from auto auctions and reselling them to used car retailers was not a transferor under the disclosure provisions of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), and thus could not be found guilty under the statute prohibiting the false certification of an odometer mileage reading by transferors as he had no legal or beneficial ownership interest in the transferred cars, determined the court in *U.S. v. Powell*, 806 F.2d 1421 (9th Cir. 1986), reversing the agent's conviction.

\*\*\*\* Caution:

Circuit Judge Ferguson dissented in , arguing that while a transferor may be the only one liable in civil proceedings, this limitation was specifically and intentionally eliminated by Congress for the imposition of criminal liability. To conclude otherwise thwarts the general purpose of the statute and makes fine-line distinctions contrary to congressional intent and statutory language, argued the judge. The agent in this case committed prohibited, criminal acts by filing false certificates, stated the judge, dissenting from the majority's reversal of the agent's conviction on the false certification counts.

[\*D] Statutory Penalty

[\*94] Fine

Based on the facts and circumstances, a fine imposed on a transferor convicted of violating the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., was affirmed on appeal.

A fine of \$ 70,000 imposed upon a dealer convicted on seven counts of altering odometers under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. §§ 32703, 32709), was well within the range permitted by the statute and the dealer failed to demonstrate any abuse of discretion, found the court in *U.S. v. Townsend*, 796 F.2d 158, 21 Fed. R. Evid. Serv. 71 (6th Cir. 1986). The maximum punishment for altering odometers was a \$ 50,000 fine, noted the court.

[\*95] Prison sentence

A prison sentence imposed on a transferor convicted of violating the criminal provisions of the Motor Vehicle Information and Cost Savings Act, 49 U.S.C.A. §§ 32701 et seq., was affirmed on appeal, based on the facts and circumstances.

A sentence of three years in prison imposed upon a dealer convicted on seven counts of altering odometers under the Motor Vehicle Information and Cost Savings Act, 15 U.S.C.A. § 1984 (now 49 U.S.C.A. §§ 32703, 32709), was well within the range permitted by the statute and the dealer failed to demonstrate any abuse of discretion, found the court in *U.S. v. Townsend*, 796 F.2d 158, 21 Fed. R. Evid. Serv. 71 (6th Cir. 1986).

## FOOTNOTES

n1 This annotation supersedes 28 A.L.R. Fed. 584 (1976), which was based on the earlier version of the statute, previously codified at 15 U.S.C.A. §§ 1981 to 1991.

n2 Pub. L. 92-513, Title IV, S 401, Oct. 20, 1972, 86 Stat. 961. Originally codified at 15 U.S.C.A. §§ 1981 to 1991, the Act was subsequently repealed by Act July 5, 1994, P.L. 103-272, § 7(b), 108 Stat. 1379, except for rights and duties that matured, penalties that were incurred, and proceedings that were begun before enactment (see note preceding 49 U.S.C.A. § 101). The subject matter formerly covered by the Odometer Requirement Provisions is now covered in Title 49, Subtitle VI -- Motor Vehicle and Driver Programs, Part C -- Information, Standards, and Requirements, Chapter 327 Odometers (49 U.S.C.A. §§ 32701 to 32711).

n3 See, e.g., *Jones v. Fenton Ford, Inc.*, 427 F. Supp. 1328 (D. Conn. 1977) (Congress intended to impose affirmative duty upon dealers to detect odometer irregularities); *Kantorczyk v. New Stanton Auto Auction, Inc.*, 433 F. Supp. 889 (W.D. Pa. 1977) (Congress did not draft statute with intention that used car dealer could buy vehicle at auction, drive vehicle as personal car, sell car for profit, and then follow his customer into court claiming fraud); *Gonzales v. Van's Chevrolet, Inc.*, 498 F. Supp. 1102 (D. Del. 1980) (to insure good-faith dealing in automobile industry, to establish safeguards for protection of public, and to punish odometer tamperers); *Michael v. Ferris Auto Sales*, 650 F. Supp. 975 (D. Del. 1987); *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979) (purpose of statute is to enable purchaser of motor vehicle to know how many miles vehicle has traveled, as guide to its safety, reliability, and value); *Delay v. Hearn Ford*, 373 F. Supp. 791, 28 A.L.R. Fed. 576 (D.S.C. 1974); *Stier v. Park Pontiac, Inc.*, 391 F. Supp. 397 (S.D. W. Va. 1975) (purpose is to punish odometer tamperers by imposing civil liability upon them, and to reward purchasers who discover such tampering and bring it to the attention of the federal courts); *In re Grand Jury Subpoena Duces Tecum Served Upon Underhill*, 781 F.2d 64 (6th Cir. 1986) (provisions serve overall purpose of enforcement of an essentially regulatory program, such that automobile dealer's records sought by grand jury fall within required records exception to Fifth Amendment); *Clayton v. McCary*, 426 F. Supp. 248 (N.D. Ohio 1976); *Shipe v. Mason*, 500 F. Supp. 243 (E.D. Tenn. 1978), aff'd without reported opinion, 633 F.2d 218 (6th Cir. 1980) (to prohibit tampering with odometers on motor vehicles and to establish safeguards for protection of purchasers who rely heavily on odometer reading as index of condition and value of vehicle); *Mitchell v. White Motor Credit Corp.*, 627 F. Supp. 1241 (M.D. Tenn. 1986); *Arnold v. Smith Motor Co., Brookfield, Missouri*, 389 F. Supp. 1020 (N.D. Iowa 1974) (to curb the practice of importing vehicles with tampered odometers from a neighboring state with no regulation into a state that did prohibit such conduct).

n4 See Note, Consumer Protection, 50 Wash. & Lee L. Rev. 271, 314 (1993). 49 U.S.C.A. § 32701 provides: Findings and purposes; (a) Findings. -- Congress finds that -- (1) buyers of motor vehicles rely heavily on the odometer reading as an index of the condition and value of a vehicle; (2) buyers are entitled to rely on the odometer reading as an accurate indication of the mileage of the vehicle; (3) an accurate indication of the mileage assists a buyer in deciding on the safety and reliability of the vehicle; and (4) motor vehicles move in, or affect, interstate and foreign commerce. (b) Purposes. -- The purposes of this chapter are -- (1) to prohibit tampering with motor vehicle odometers; and (2) to provide safeguards to protect purchasers in the sale of motor vehicles with altered or reset odometers. Added Pub. L. 103-272, § 1(e), July 5, 1994, 108 Stat. 1048.

n18 See *Davis v. Dils Motor Co.*, 566 F. Supp. 1360, 36 U.C.C. Rep. Serv. 792 (S.D. W. Va. 1983) (regulation exempting any vehicles having a gross vehicle weight rating of more than 16,000 pounds was held at variance with the Act and void); *Diersen v. Chicago Car Exchange*, 110 F.3d 481, 37 Fed. R. Serv. 3d 400 (7th Cir. 1997) (National Highway Traffic Safety Administration lacked authority to promulgate regulation exempting vehicles 10 or more years old); *Lair v. Lewis Service Center, Inc.*, 428 F. Supp. 778 (D. Neb. 1977) (rejected by, *Mitchell v. White Motor Credit Corp.*, 627 F. Supp. 1241 (M.D. Tenn. 1986)) (regulation exempting vehicles with gross weight of over 16,000 pounds unauthorized and void); *Orca Bay Seafoods v. Northwest Truck Sales, Inc.*, 32 F.3d 433 (9th Cir. 1994) (regulation exempting large trucks from odometer disclosure rules invalid); *Lee v. Gallup Auto Sales, Inc.*, 135 F.3d 1359 (10th Cir. 1998) (regulation exempting transfers of vehicles 10 or more years old from Act's odometer disclosure requirements invalid); *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998) (regulatory exemption from odometer disclosure requirements for transferors of vehicles with gross vehicle weight rating of more than 16,000 pounds invalid as unauthorized exercise of authority).

n19 See, e.g., *Baker v. Cawthon Motor Co.*, 629 F.2d 410 (5th Cir. 1980) (49 C.F.R. § 580.5(b) (now 49 C.F.R. § 580.17(b)), purporting to provide an exemption from the odometer disclosure requirements of the Motor Vehicle Information and Cost Savings Act (Act), 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), for "a transfer of a new vehicle prior to its first transfer for purposes other than resale" was intended to exempt transfers of a vehicle that occur before its first transfer to a consumer and thus was not applicable to the sale of a new demonstrator car to a consumer); *Leslie v. George Thompson Ford, Inc.*, 484 F. Supp. 954 (N.D. Ga. 1979) (regulation that required disclosure on an odometer disclosure form of the date of transfer, the name and address of the transferor, and the last license plate number of the transferred vehicle was valid); *Mitchell v. White Motor Credit Corp.*, 627 F. Supp. 1241 (M.D. Tenn. 1986) (exemption for transfers of large commercial vehicles valid because neither arbitrary nor capricious).

n20 See *Smith v. Walt Bennett Ford, Inc.*, 314 Ark. 591, 864 S.W.2d 817 (1993).

n21 See 49 U.S.C.A. § 32711.

n22 See, e.g., *Nieto v. Pence*, 578 F.2d 640 (5th Cir. 1978); *Jones v. Hanley Dawson Cadillac Co.*, 848 F.2d 803 (7th Cir. 1988); *Huycke v. Greenway*, 876 F.2d 94, 13 Fed. R. Serv. 3d 94 (11th Cir. 1989).

n23 See, e.g., *LePiere v. Phoenix Emprise, Inc.*, 500 F. Supp. 251 (E.D. Pa. 1980) (commission of violation must be coupled with intent to defraud); *Ryan v. Edwards*, 592 F.2d 756 (4th Cir. 1979) (proof of intent to defraud required before liability can be imposed); *Robinette v. Griffith*, 483 F. Supp. 28 (W.D. Va. 1979); *Attorney General of Maryland v. Dickson*, 717 F. Supp. 1090 (D. Md. 1989) (same requirement in civil action brought by state Attorney General); *Shore v. J. C. Phillips Motor Co.*, 567 F.2d 1364 (5th Cir. 1978) (requirement of intent to defraud while committing violation); *Nieto v. Pence*, 578 F.2d 640 (5th Cir. 1978); *Tinker v. DeMaria Porsche-Audi, Inc.*, 632 F.2d 520 (5th Cir. 1980); *Pepp v. Superior Pontiac GMC, Inc.*, 412 F. Supp. 1053 (E.D. La. 1976); *Leslie v. George Thompson Ford, Inc.*, 484 F. Supp. 954 (N.D. Ga. 1979) (there are two levels of violations -- those that give rise to a penalty because accompanied by an intent to defraud, and those not giving rise to a penalty because not accompanied by an intent to defraud); *Tye v. Spitzer-Dodge*, 499 F. Supp. 687 (S.D. Ohio 1980); *Mitchell v. White Motor Credit Corp.*, 627 F. Supp. 1241 (M.D. Tenn. 1986); *Jones v. Hanley Dawson Cadillac Co.*, 848 F.2d 803 (7th Cir. 1988); *Byrne v. Autohaus On Edens, Inc.*, 488 F. Supp. 276 (N.D. Ill. 1980); *Huycke v. Greenway*, 876 F.2d 94, 13 Fed. R. Serv. 3d 94 (11th Cir. 1989).

n24 *Ralbovsky v. Lamphere*, 731 F. Supp. 79 (N.D. N.Y. 1990).

n50 See, for example, Mont. Admin. R. § 8.78.204(3), (12). See also Construction and Application of State Statute Making It Unlawful To Tamper with Motor Vehicle Odometer, 76 A.L.R.3d 981 (1977).

n51 See *Parker v. DeKalb Chrysler Plymouth*, 459 F. Supp. 184 (N.D. Ga. 1978), judgment aff'd on other grounds, 673 F.2d 1178 (11th Cir. 1982); *U.S. v. Ellis*, 739 F.2d 1250 (7th Cir. 1984); *U.S. v. Studna*, 713 F.2d 416 (8th Cir. 1983); *Lawrence v. Franklin Inv. Co., Inc.*, 468 F. Supp. 499 (D.D.C. 1978). See § 2[a].

n52 See, e.g., *McGinty v. Beranger Volkswagen, Inc.*, 633 F.2d 226, 30 Fed. R. Serv. 2d 368 (1st Cir. 1980) (*Fed. R. Civ. P. 9(b)* requires specification of the time, place, and content of an alleged false representation, but does not require the pleading of circumstances or evidence from which fraudulent intent could be inferred; thus, it was sufficient for an automobile purchaser to have pled that a seller's intent was fraudulent where the complaint as a whole alleged that, in selling the car to the purchaser, the seller represented the car's mileage as 26,514 even though the odometer had "turned over" and the mileage was over 100,000 miles); *Levine v. MacNeil*, 428 F. Supp. 675 (D. Mass. 1977) (complaint was not defective in the particularity with which the

allegations of fraud were pleaded, since the allegations sufficiently complied with *Fed. R. Civ. P. 9(b)*); *Reiff v. Don Rosen Cadillac-BMW, Inc.*, 501 F. Supp. 77 (E.D. Pa. 1980) (although complaint did not, in terms, state that dealer possessed intent to defraud, whether factual allegations encompassed assertion that dealer had actual knowledge that odometer reading was incorrect at the time car was sold to purchaser, or merely assertion that dealer proceeded with sale in reckless disregard of odometer's accuracy, requisite intent to defraud would permissibly be inferred from facts alleged); *Robinette v. Griffith*, 483 F. Supp. 28 (W.D. Va. 1979) (used car purchaser failed to plead a fraud claim with sufficient particularity to support a finding of an intent to defraud; rule governing particularity with which circumstances constituting fraud must be pleaded, *Fed. Rules Civ. Proc. Rule 9(b)*, applicable to all claims of fraud); *Roberts v. Robert V. Rohrman, Inc.*, 909 F. Supp. 545, 29 U.C.C. Rep. Serv. 2d 1208 (N.D. Ill. 1995) (vehicle buyer's allegations that automobile's odometer had been replaced twice without her knowledge and with intent that she believed that odometer reading at time of purchase was accurate stated cause of action); See also Construction and Application of Provision of *Rule 9(B)*, *Federal Rules of Civil Procedure*, That Circumstances Constituting Fraud or Mistake Be Stated with Particularity, 27 A.L.R. Fed. 407 (1976).

n53 See *Landrum v. Goddard*, 921 F.2d 61 (5th Cir. 1991) (statute is silent as to the requisite burden of proof, and where Congress has not prescribed a particular standard of proof and the Constitution is similarly silent, courts must dictate which standard is to be applied); *Birdwell v. Hartsville Motors, Inc.*, 404 F. Supp. 625 (M.D. Tenn. 1975) (fair preponderance of the evidence standard should be applied); *Haynes v. Manning*, 917 F.2d 450 (10th Cir. 1990) (causes of action based on fraud for violations of the federal odometer statutes are governed by the preponderance of the evidence standard of proof, not the state's standard for common-law fraud).

n54 See *Landrum v. Goddard*, 921 F.2d 61 (5th Cir. 1991).

n55 See *Arnold v. Smith Motor Co., Brookfield, Missouri*, 389 F. Supp. 1020 (N.D. Iowa 1974) (venue must be determined under 28 U.S.C.A. § 1391(b), balancing the contacts involved is a reasonable method of determining where the "claim arose," and convenience of the litigants should be considered in determining the place of trial).

n56 See *Schenefeld v. Colorado Auction Services Corp.*, 1986 WL 3673 (D.S.D. 1986) (cause of action arises in the district where the complaining party purchased the vehicle in question).

n57 49 U.S.C.A. § 32710(b).

n58 See, e.g., *Saber v. Dileo*, 723 F. Supp. 1167 (E.D. La. 1989); *Woodfield Ford Sales v. Broniek*, 1992 WL 38401 (N.D. Ill. 1992).

n60 See *Walitalo v. Iacocca*, 968 F.2d 741 (8th Cir. 1992).

n61 See, e.g., *Krieger v. Gold Bond Bldg. Products, a Div. of National Gypsum Co.*, 863 F.2d 1091, 48 Fair Empl. Prac. Cas. (BNA) 1050, 48 Empl. Prac. Dec. (CCH) P 38550, 27 Fed. R. Evid. Serv. 506 (2d Cir. 1988); *Saber v. Dileo*, 723 F. Supp. 1167 (E.D. La. 1989); *Penn v. San Juan Hospital, Inc.*, 528 F.2d 1181 (10th Cir. 1975); *Strebel v. Milton Wagstaff Motor Co., Inc.*, 46 F.3d 1152 (10th Cir. 1995).

n62 See 49 U.S.C.A. § 32710; *Bayless v. Irv Leopold Imports, Inc.*, 659 F. Supp. 942 (D. Or. 1987); *Evans v. Paradise Motors, Inc.*, 788 F. Supp. 1079 (N.D. Cal. 1991).

n63 See, e.g., *Duval v. Midwest Auto City, Inc.*, 578 F.2d 721, 25 Fed. R. Serv. 2d 1090 (8th Cir. 1978)

(American Bar Association's Code of Professional Responsibility, Disciplinary Rule 2-106 and Johnson factors); *Tusa v. Omaha Auto. Auction Inc.*, 712 F.2d 1248 (8th Cir. 1983) (lodestar amount and Johnson factors); *Walitalo v. Iacocca*, 968 F.2d 741 (8th Cir. 1992) (lodestar amount, rather than percentage of each purchaser's recovery); *Bayless v. Irv Leopold Imports, Inc.*, 659 F. Supp. 942 (D. Or. 1987) (Kerr factors); *Evans v. Paradise Motors, Inc.*, 788 F. Supp. 1079 (N.D. Cal. 1991) (Kerr factors); *Fleet Inv. Co., Inc. v. Rogers*, 620 F.2d 792 (10th Cir. 1980) (measured by amount of recovery to plaintiff as well as nonmonetary benefit accruing to others, such as public at large); *Bishop v. Mid-America Auto Auction, Inc.*, 807 F. Supp. 683 (D. Kan. 1992) (whether case unusual or complex, number of violations involved); *Lindsey v. Anderson & Sons Auto Sales, Inc.*, 690 F. Supp. 1028 (N.D. Ga. 1988) (beginning point is "reasonable hourly rate," or prevailing market rate in relevant legal community for similar services or similar clients by lawyers of reasonably comparable skills, experience, and reputation).

n64 See, e.g., *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987) (attorney's fees could not be awarded absent evidence regarding the application for attorney's fees); *Bishop v. Mid-America Auto Auction, Inc.*, 807 F. Supp. 683 (D. Kan. 1992) (while there could have been some overlap for services devoted both to common-law fraud claim and the federal odometer statute claim, the court was not convinced that the purchaser was entitled to an award that did not differentiate between the two); *Lindsey v. Anderson & Sons Auto Sales, Inc.*, 690 F. Supp. 1028 (N.D. Ga. 1988) (information contained in record created by plaintiffs' counsel was inadequate for court to make a determination of reasonable hourly rate for attorney's fees).

n65 *Evans v. Paradise Motors, Inc.*, 788 F. Supp. 1079 (N.D. Cal. 1991).

n66 *Aldridge v. Billips*, 656 F. Supp. 975 (W.D. Va. 1987) (recognized that punitive damages may be awarded for fraudulent misrepresentations in the sale of a used vehicle; however, punitive damages could not be awarded to the buyer of a used truck alleging that the successive transferors of the truck violated the Act, 15 U.S.C.A. § 1989 (now 49 U.S.C.A. § 32710(a)), absent proof of actual damages; court granted partial summary judgment in favor of the buyer against the transferors, in an amount to be set after further submissions to the court regarding evidence of actual damages and after a hearing on damages if requested by any party); *Bishop v. Mid-America Auto Auction, Inc.*, 807 F. Supp. 683 (D. Kan. 1992) (evidence was sufficient to allow a jury to find that transferors had engaged in a fraudulent course of conduct to sell vehicles with rolled-back odometers in violation of the Act, 15 U.S.C.A. § 1988 (now 49 U.S.C.A. § 32705), and, thus, to support awards of \$ 250,000 and of \$ 100,000 in punitive damages, despite the small award of actual damages to the buyer, found the court, where there was evidence of a course of conduct, evidence that the rollbacks could be very lucrative, evidence of federal statutory and regulatory requirements, including criminal penalties for violations, and evidence that it was unlikely for an individual consumer to discover the rollback; court held that the nature, extent, and enormity of the wrong, the intent of the party committing it, and circumstances attending the transaction involved should be considered when awarding punitive damages, and that any mitigating circumstances that may bear upon any of these factors may be considered to reduce such damages).

n67 *Glover v. General Motors Corp.*, 959 F. Supp. 332 (W.D. Va. 1997) (held that a purchaser who brings a successful action under the Act, 49 U.S.C.A. §§ 32701 et seq., based on odometer fraud may not recover punitive damages, since the Act contains a provision allowing recovery of treble damages, 49 U.S.C.A. § 32710(a), which serves the same function as common-law punitive damages of punishing the wrongdoer and deterring similar conduct in the future; to allow both treble damages and common-law punitive damages would grant a duplicative remedy, which Congress did not intend, and might raise serious due process questions).

n68 See, e.g., *Haluschak v. Dodge City of Wauwatosa, Inc.*, 909 F.2d 254, 17 Fed. R. Serv. 3d 159 (7th Cir. 1990) (prevailing purchaser awarded costs of retrial and costs associated with appeal); *Fleet Inv. Co., Inc. v. Rogers*, 620 F.2d 792 (10th Cir. 1980) (travel mileage costs of four witnesses beyond the 100-mile limit specified in Fed. R. Civ. P. 45(e) awarded).

n89 See 49 *U.S.C.A.* § 32705(a)(5).

n90 The *Aldridge* court found that a material issue of disputed fact existed as to whether the original seller of the used truck signed the odometer mileage statements in blank when transferring the truck to the dealer, precluding summary judgment on the buyer's claim against the original seller alleging odometer fraud under the Act.

n91 See, e.g., *Davis v. Dils Motor Co.*, 566 F. Supp. 1360, 36 U.C.C. Rep. Serv. 792 (S.D. W. Va. 1983); *Lair v. Lewis Service Center, Inc.*, 428 F. Supp. 778 (D. Neb. 1977) (rejected by, *Mitchell v. White Motor Credit Corp.*, 627 F. Supp. 1241 (M.D. Tenn. 1986)); *Orca Bay Seafoods v. Northwest Truck Sales, Inc.*, 32 F.3d 433 (9th Cir. 1994); *Lee v. Gallup Auto Sales, Inc.*, 135 F.3d 1359 (10th Cir. 1998); *Suiter v. Mitchell Motor Coach Sales, Inc.*, 151 F.3d 1275 (10th Cir. 1998).

Admissibility in State Court Proceedings of Police Reports as Business Records

George L. Blum, J.D.

*111 A.L.R.5th 1*

**NOTICE:** The present annotation supersedes the annotation at *77 A.L.R.3d 115*.

**SUMMARY:**

The common law has developed a rule that entries in books of account made in the regular course of business by a person other than the party who offers them in evidence are admissible, provided that they are proved by the person who made them, and a number of jurisdictions have enacted statutes that, while not abrogating the common-law rule, have enlarged upon it so as to permit a writing or record of any act or transaction to be admissible in evidence if it appears that the records were made in the regular course of any business. The issue arises as to the admissibility in state court proceedings of police reports as business records. In *Sikora v. Gibbs*, *132 Ohio App. 3d 770, 726 N.E.2d 540, 111 A.L.R. 5th 685 (10th Dist. Franklin County 1999)*, for example, the court held that a memorandum written by a police officer, whose issuance of a citation to the plaintiff gave rise to a malicious prosecution action, would not be admissible in support of a summary judgment motion under the "business records" exception to the hearsay rule. The court held that a memorandum written by the police officer regarding the incident did not fall within the "business records" exception, particularly since the source of information and the circumstances of preparation indicated a lack of trustworthiness, the court stressing that given that the source of the information was the accused in the present case, it could not be said that the memorandum was prepared by a person who was independent of the parties. This annotation collects those state cases in which the courts have determined the admissibility as evidence of police reports as business records in state court proceedings.

ARTICLE OUTLINE

**ARTICLE:** [\*I] PRELIMINARY MATTERS

[\*1] Introduction

[\*1a] Scope

This annotation<sup>1</sup> collects those state cases that have determined the admissibility as evidence of police reports<sup>2</sup> as business records in state court proceedings. The annotation considers the question of whether such reports are within the ambit of the business records exception to the hearsay rule, and if so, what factors affect the admissibility of the report under the exception. The annotation is concerned only with admissibility of police reports under the business records exception to the hearsay rule, and does not consider in depth whether an individual police report may be admissible on grounds other than the business record exception, except insofar as such question may be made an integral part of the discussion of the business records issue by an individual court.

A number of jurisdictions may have rules, regulations, constitutional provisions, or legislative enactments bearing on this subject; since these are discussed herein only to the extent that they are reflected in the reported cases within the scope of this annotation, the reader is advised to consult the appropriate statutory or regulatory compilations.

Letters to or from customers or suppliers as business records under statutes authorizing reception of business records in evidence, *68 A.L.R.3d 1069*

Proof, by radar or other mechanical or electronic devices, of violation of speed regulations, *47 A.L.R.3d 822*

Admissibility of report of police or other public officer or employee, or portions of report, as to cause of or responsibility for accident, injury to person, or damage to property, *69 A.L.R.2d 1148*

Admissibility of hospital record relating to cause or circumstances of accident or incident in which patient sustained injury, *44 A.L.R.2d 553*

Privilege of custodian, apart from statute or rule, from disclosure, in civil action, of official police records and reports, *36 A.L.R.2d 1318*

Admissibility, in personal injury or death action arising out of airplane accident, of documents and reports pertaining to investigations, *23 A.L.R.2d 1360*

Verification and authentication of slips, tickets, bills, invoices, etc., made in regular course of business, under the Uniform Business Records as Evidence Act, or under similar "Model Acts", *21 A.L.R.2d 773*

Admissibility of Summaries or Charts of Writings, Recordings, or Photographs Under *Rule 1006 of Federal Rules of Evidence*, *198 A.L.R. Fed. 427*

Admissibility of records other than police reports, under *Rule 803(6), Federal Rules of Evidence*, providing for business records exception to hearsay rule, *61 A.L.R. Fed. 359*

Admissibility, over hearsay objection, of police observations and investigative findings offered by government in criminal prosecution, excluded from public records exception to hearsay rule under Rule 803(8)(B) or (C), Federal Rules of Evidence, *56 A.L.R. Fed. 168*

Admissibility of credit reports under Federal Business Records Act (*28 U.S.C.A. § 1732(a)*), *19 A.L.R. Fed. 988*

Accident reports by employees of litigant as admissible under Federal Business Records Act (*28 U.S.C.A. § 1732*), *10 A.L.R. Fed. 858*

Admissibility of hospital records under Federal Business Records Act (*28 U.S.C.A. § 1732(a)*), *9 A.L.R. Fed. 457*

Personal checkbook or account as business record under Federal Business Records Act (28 U.S.C.A. § 1732), 8 A.L.R. Fed. 919

C.J.S., Evidence § 924

[\*2] Summary and comment

[\*2a] Generally

The so-called "shop-book rule," under which a party to a lawsuit may, independently of any statute expressly authorizing him or her to do so, give in evidence, in support of a claim, books of account even though the entries have been made by the party, is said to be a creature of American common law that acts in derogation of the English common-law principle that a party shall not be permitted to make his or her own evidence.<sup>n3</sup> In addition to the "shop-book rule," the common law has also developed a rule that entries in books of account made in the regular course of business by a person other than the party who offers them in evidence are admissible, provided that they are proved by the person who made them.<sup>n4</sup> A number of jurisdictions have now enacted statutes that, while not abrogating the common-law rule, have enlarged upon it so as to permit a writing or record of any act or transaction to be admissible in evidence, notwithstanding the availability or nonavailability of the maker or makers of the records to testify, if it appears that the records were made in the regular course of any business, and that it was the regular course of such business to make such memorandum or record at the time of the act or occurrence in question.<sup>n5</sup>

While the basic content of these statutes is generally similar, the phraseology of an individual statute may differ according to which of several drafts, drawn up by scholars, was used as the model. For example, American Law Institute, Model Code of Evidence, Rule 514(1) provides that a writing offered as a memorandum or record of an act, event, or condition is admissible as tending to prove the occurrence of the act or event or the existence of the condition if the judge finds that it was made in the regular course of a business and that it was the regular course of that business for one with personal knowledge of such an act, event, or condition to make such a memorandum or record or to transmit information thereof to be included in such a memorandum or record, and for the memorandum or record to be made at or about the time of the act, event, or condition or within a reasonable time thereafter. Paragraph (3) of the Rule states that the word "business" as used in paragraph (1) includes every kind of occupation and regular organized activity, whether conducted for profit or not.

The Uniform Business Records as Evidence Act, promulgated by the National Conference of Commissioners on Uniform State Laws, provides at Uniform Business Records as Evidence, § 2, that a record of an act, condition, or event shall, insofar as relevant, be competent evidence if the custodian or other qualified witness testifies to its identity and the mode of its preparation, and if it was made in the regular course of business, at or near the time of the act, condition, or event, and if, in the opinion of the court, the sources of information, and method and time of preparation, were such as to justify its admission. Uniform Business Records as Evidence, § 1 states that the term "business" shall include every kind of business, profession, occupation, calling, or operation of institutions, whether carried on for profit or not.

The Rules of Evidence promulgated by the National Conference of Commissioners on Uniform State Laws provides in Uniform State Laws, Rules of Evidence, Rule 63(13) that writings offered as memoranda or records of acts, conditions, or events to prove the facts stated therein, if the judge finds that they were made in the regular course of a business at or about the time of the act, condition, or event recorded, and that the sources of information from which made and the method and circumstances of their preparation were such as to indicate their trustworthiness, constitute an exception to the general rule that evidence of a statement that is made other than by a witness while testifying at the hearing offered to prove the truth of the matter stated is hearsay evidence and inadmissible. Uniform State Laws, Rules of Evidence, Rule 62(6) provides that "a business" as used in Uniform State Laws, Rules of Evidence, Rule 63(13) shall include

every kind of business, profession, occupation, calling, or operation of institutions, whether carried on for profit or not. The commissioners' note to Uniform State Laws, Rules of Evidence, Rule 62 states that the definition of "a business" is from the Uniform Business Records as Evidence Act.

The Uniform Rules of Evidence promulgated in 1974 by the National Conference of Commissioners on Uniform State Laws supersede the Uniform Rules of Evidence previously approved in 1953. Uniform State Laws, Rules of Evidence, Rule 803(6) provides that a memorandum, report, record, or data compilation, in any form, of acts, events, conditions, opinions, or diagnoses, made at or near the time by, or from information transmitted by, a person with knowledge, if kept in the course of a regularly conducted business activity, and if it was the regular practice of that business activity to make the memorandum, report, record, or data compilation, all as shown by the testimony of the custodian or other qualified witness, unless the source of information or the method of circumstances of preparation indicate lack of trustworthiness, is not excluded by the hearsay rule, even though the declarant is available as a witness. The Rule further provides that the term "business" includes business, institution, association, profession, occupation, and calling of every kind, whether or not conducted for profit.

The issue arises as to the admissibility in state court proceedings of police reports as business records. A number of jurisdictions have taken the view that, depending upon its content, all or part of a police report will be admissible as a business record at the reporter level, without the testimony of the reporting officer, provided that certain qualifications of trustworthiness are met ( § 3). In this regard, it has been held that unless a police report is made in the regular course of police business, and unless it is the regular course of police business to keep such a report, the report cannot be admitted as a business record exception to the hearsay rule ( § 5). A number of cases have held that a police report will not be admissible under the business records exception where it is apparent that the reporting officer did not have firsthand knowledge of the facts that he or she was recording ( § 6). In addition, it has been held in several cases that police reports are admissible as evidence under the business records exception only when made at or near the time of the event or occurrence being recorded ( § 7). Under these rules of qualification, it is generally held that the content of a police report that was not the result of the reporting officer's own observations, but was the product of statements made to the officer by third persons, cannot be admitted into evidence under the business records exception to the hearsay rule, unless the third party making the statement was under a business duty to do so ( § 8). Similarly, it has been held that the opinions or conclusions of the reporting officer, or the opinions and conclusions of witnesses making statements to the reporting officer, which opinions and conclusions are contained in a police report, will not be admissible as evidence under the business records exception where the reporting officer or witness would not be qualified to state such opinions or conclusions if testifying in person ( § 9).

It has been held in a number of jurisdictions that, in any event, police reports generally are not admissible in evidence, either because there is in existence a statute that proscribes the admissibility in evidence of certain types of police reports ( § 4[a]), or because the courts did not expressly recognize that police reports constituted "business records" within the meaning of that exception to the hearsay rule ( § 4[b]).

With regard to the availability of the reporting officer to testify in court, it has been held that the officer's presence in court does not mean that his or her report should be admitted as evidence without qualification under the business records exception to the hearsay rule ( § 10). The question has also been raised as to whether a police report may be admitted in evidence as a business record when it appears that it was made with the primary purpose in mind of its use as evidence in court proceedings ( § 11).

In some jurisdictions that generally recognize the admissibility of police reports as evidence, it has been held that an objection to the admissibility of material contained in such a report must be specific in nature, a general objection to the report as a whole being insufficient ( § 12).

Generally speaking, it may be said that in those jurisdictions that generally recognize the admissibility of police reports under the business records exception to the hearsay rule, whether a particular report is admissible in part or in whole

depends upon the facts and circumstances surrounding the making of the report, and the content of the report.

In civil cases, a number of courts have held that all or part of varied police reports would be admissible at the time of trial as evidence under the business records exception to the hearsay rule, including: automobile accident reports ( § 13[a]), slip-and-fall accident reports ( § 14[a]), assault and battery reports ( § 15[a]), "incident" or arrest reports ( § 17[a]), telephone reports ( § 18[a]), offense reports ( § 20[a]), and investigative reports ( § 22[a]). Other courts, however, given the particular circumstances presented, have ruled to the contrary ( §§ 13[b], 14[b], 15[b], 17[b], 18[b], 20[b], 22[b]).

In other civil cases, courts have held that all or part of police custody reports would be admissible at the time of trial as evidence under the business records exception to the hearsay rule ( § 21). Other courts, however, have held in civil cases that all or part of varied police reports would not be admissible at the time of trial as evidence under the business records exception to the hearsay rule, including: police memoranda ( § 16), complaint reports ( § 19), presentence reports ( § 23), summary reports ( § 24), and laboratory reports ( § 25).

In criminal cases, a number of courts have held that all or part of varied police reports would be admissible at the time of trial as evidence under the business records exception to the hearsay rule, including: "incident" or arrest reports ( § 26[a]), speedometer, Breathalyzer, and other test reports ( § 27[a]), complaint reports ( § 28[a]), teletype or telephone reports ( § 29[a]), receipts for property ( § 33[a]), and investigative reports ( § 38[a]). Other courts, however, given the particular circumstances presented, have ruled to the contrary ( §§ 26[b], 27[b], 28[b], 29[b], 33[b], 38[b]).

In other criminal cases, a number of courts have held that all or part of varied police reports would be admissible at the time of trial as evidence under the business records exception to the hearsay rule, including: victim reports ( § 30), radio logs ( § 31), vehicle use forms ( § 34), memoranda ( § 37), and offense reports ( § 39). Other courts, however, have held in criminal cases that all or part of varied police reports would not be admissible at the time of trial as evidence under the business records exception to the hearsay rule, including: letters of police personnel ( § 32), booking sheets ( § 35), and officer's disciplinary reports ( § 36).

[\*2b] Practice pointers

It is generally held by the courts that for evidence such as police reports to be admissible as a business record, a proper foundation must be laid to establish the necessary indicia of reliability. That foundation should generally include the following: (1) the record must be made in the regular course of the business or entity that keeps the records; (2) the record must have been made at the time of, or in close proximity to, the occurrence of the act, condition, or event recorded; (3) the evidence must support a conclusion that after recordation the document was kept under circumstances that would preserve its integrity; and (4) the sources of the information from which the entry was made and the circumstances of the preparation of the document were such as to indicate its trustworthiness. It is typically held that the requisite foundation can be made by the custodian of the records.<sup>n6</sup>

The purpose for which police records are sought to be introduced frequently determines whether a court will find in those records the requisite trustworthiness for admissibility as business records. For instance, in prosecutions for narcotics violations, notations made by government agents on envelopes in which narcotics purchased from defendants have been placed, which describe the circumstances of the transaction, have been admitted as business records for the limited purpose of proving the chain of custody of the evidence. Police reports have also been admitted, for example, to: prove or disprove a defendant's alibi; show the fact that a crime was reported have been held admissible as business records; show the defendant's knowledge that violent acts regularly occurred on its premises; establish a flaw in the story of defense witness who testified she saw the defendant at the site of police investigation of purse-snatching far from the location of the robbery with which the defendant was charged, at the time of the robbery; and impeach a witness.<sup>n7</sup>

A party failing in its attempt to prevent the admission into evidence at the time of trial a police report may wish to request of the court a limiting instruction explaining to the jury the precise purpose for which the subject police report was admitted.<sup>n8</sup>

It should be noted that where a defendant in a criminal action is attempting to introduce a police report pursuant to a business records exception to a hearsay rule, the state may not be entitled to object to its admission on the ground that the individual preparing the report is unavailable. That is, some courts hold that the prosecution, unlike a criminal defendant, enjoys no right of confrontation under the federal or pertinent state constitution.<sup>n9</sup>

Similarly, it has been held that since police reports of the factual events and details of a criminal case are generally made for the purpose of successfully prosecuting a crime, the reasons that might otherwise provide a basis to assume reliability of such reports as business records do not exist where police reports are offered by the prosecution in a criminal proceeding. It does not necessarily follow, however, some courts have held, that such records may not be admissible when proffered by a defendant in a criminal trial.<sup>n10</sup>

It has been noted that while typically the "business records" and the official records exception apply to written hearsay, the business records exception has been relied upon, in certain circumstances, to allow testimony based upon records or documents.<sup>n11</sup>

When a police report contains out-of-court assertions by others, an additional level of hearsay is contained in the report and an exception for that hearsay must also be found, such that reports cannot establish more than their maker could if he or she was testifying in court on their subject matter, it has been noted.<sup>n12</sup>

Typically, the type of "business" envisioned in a state's business records exception to the hearsay rule, by which certain documents, including police reports, may be admissible at trial, includes business, institution, association, profession, occupation, and calling of every kind, whether or not conducted for profit.<sup>n13</sup>

It has been noted that trustworthiness no longer serves as a mere philosophical justification for the admission of evidence otherwise excluded as hearsay, but rather, trustworthiness is itself an express threshold condition of admissibility. That is, the courts have commented, the business records exception to the hearsay rule, on its face, provides that evidence such as police reports, otherwise meeting the literal requirements of the rule, shall not be admissible where the source of information or the method or circumstances of preparation indicate a lack of trustworthiness.<sup>n14</sup>

The fact that a particular police report may be deemed inadmissible under the business records exception does not mean, of course, that it might not be admissible, at least in part, under some other exception to the operation of the hearsay rule, or that it might not be admissible for some limited purpose other than supporting the truth of the matter asserted therein. An attorney attempting to have a police report admitted under the business records exception to the hearsay rule should take care to show not only that the report was made in the regular course of police business, but also that it was the regular course of police business to make such a report under the circumstances presented. This can be shown by the testimony of the reporting officer, by the custodian of the police report files, or by any other person "qualified" to relate police procedures under a given set of circumstances. It should also be borne in mind that the business records exception normally only removes the objection to the admissibility of the report itself, so that the personal observations of the reporter can be admitted into evidence without the reporter's direct testimony. However, where the report relates the content of statements made to the reporter by third persons, the so-called "double hearsay" situation is present, and the business records exception will not operate to render admissible the reporter's account of statements made to him by others, since the reporter would not be qualified to relate these statements even if testifying in person. If the third party is acting under a business duty in making the statements to the reporting officer, it can be strongly argued that the third-party statements, as recorded in the police reports, would be admissible under the business records exception. Similarly, if the statement of the third party falls under some other exception to the hearsay rule, then it can be argued

that the third-party statement, as recorded by the officer in the course of his duty, will be admissible.

Some courts do recognize that if the police report was based entirely upon the officer's own observations, then it will be admissible as a business record exception to the hearsay rule, particularly if the officer is available to testify. However, unless the report itself clearly, beyond any reasonable doubt, reveals that it is in fact based upon the reporting officer's own observations, the court in question cannot be sure that such is in fact the case, and probably will exclude the evidence. The inadmissibility of a police report cannot be circumscribed by the simple expedient of an affidavit by the person who prepared the report that everything contained in it is true and correct. In such an instance it would be incumbent upon the affiant to couch such evidentiary fact in testimonial language indicating that what he was testifying to were matters within his own knowledge and not such as were contained in a police report.<sup>n15</sup> Even if it is found that a police report was based on the officers' personal observations, and yet was excluded by the trial court, such exclusion, even if erroneous, will not be prejudicial where the officers who prepared the report are available as witnesses. This is particularly the case where the officers did in fact testify at the trial and the report in question was used to refresh their recollections.<sup>n16</sup> If any portion of a police report being admitted into evidence as a business record was not admissible, it is incumbent upon the objecting party to point out the inadmissible parts with specificity and to give reasons why the specified parts were not admissible. It is not the court's duty to separate the inadmissible parts of the report from the admissible parts.<sup>n17</sup> The fact that there is authority for the admissibility of police reports as business records has been advanced as reasoning for permitting the investigating officer to testify as to his findings and conclusions, where a state statute absolutely prohibits the admissibility of the record itself.<sup>n18</sup> While it is generally true that when a party fails to object to a police accident report's being put in evidence at trial, it is too late to raise the question on appeal, yet where the appellant was not represented by counsel at trial, the appellate court may reserve the right to notice a prejudicial error even in the absence of objection.<sup>n19</sup>

[\*II] ADMISSIBILITY OF POLICE REPORTS UNDER BUSINESS EXCEPTION, GENERALLY

[\*3] View that police reports, properly qualified, are admissible

The courts in the following cases have taken the view that a police report will be admissible as a business record at the reporter level, without the testimony of the recording officer, provided that certain qualifications of trustworthiness are met.

ALABAMA

*Reeves v. King*, 534 So. 2d 1107 (Ala. 1988)

*McLaughlin v. City of Homewood*, 548 So. 2d 580 (Ala. Crim. App. 1988)

*Bates v. State*, 574 So. 2d 868 (Ala. Crim. App. 1990)

*Stevens v. Stanford*, 766 So. 2d 849 (Ala. Civ. App. 1999), reh'g denied, (Dec. 17, 1999)

ALASKA

*Adkins v. Lester*, 530 P.2d 11 (Alaska 1974), reh'g denied, 532 P.2d 1027 (Alaska 1975), § 4[a] (recognizing rule)

ARKANSAS

*Dyas v. State*, 260 Ark. 303, 539 S.W.2d 251 (1976)

*Hess v. Treece*, 286 Ark. 434, 693 S.W.2d 792 (1985)

## CALIFORNIA

*Taylor v. Centennial Bowl, Inc.*, 65 Cal. 2d 114, 52 Cal. Rptr. 561, 416 P.2d 793 (1966) (police "incident" report)  
*Rousseau v. West Coast House Movers*, 256 Cal. App. 2d 878, 64 Cal. Rptr. 655 (2d Dist. 1967) (drunkenness and disorderly conduct report)  
*People v. Ferguson*, 129 Cal. App. 3d 1014, 181 Cal. Rptr. 593 (1st Dist. 1982) For California cases holding police accident reports inadmissible, see § 4[a]

## COLORADO

*People v. Stribel*, 199 Colo. 377, 609 P.2d 113 (1980)  
*Lannon v. Taco Bell, Inc.*, 708 P.2d 1370 (Colo. Ct. App. 1985)

## CONNECTICUT

*Mucci v. LeMonte*, 157 Conn. 566, 254 A.2d 879 (1969)  
*Hutchinson v. Plante*, 175 Conn. 1, 392 A.2d 488 (1978)  
*Bonner v. Winter*, 175 Conn. 41, 392 A.2d 436 (1978)  
*State v. Sharpe*, 195 Conn. 651, 491 A.2d 345 (1985)  
*Swenson v. Sawoska*, 215 Conn. 148, 575 A.2d 206 (1990)  
*O'Sullivan v. DelPonte*, 27 Conn. App. 377, 606 A.2d 43 (1992)  
*Paquette v. Hadley*, 45 Conn. App. 577, 697 A.2d 691 (1997)  
*State v. Masse*, 1 Conn. Cir. Ct. 381, 24 Conn. Supp. 45, 186 A.2d 553 (App. Div. 1962)  
*Zadroga v. Commissioner of Motor Vehicles*, 42 Conn. Supp. 1, 597 A.2d 848, 4 Conn. L. Rptr. 461 (Super. Ct. 1991)

## DELAWARE

*Johnson v. State*, 253 A.2d 206 (Del. 1969)

## DISTRICT OF COLUMBIA COURT

*Leiken v. Wilson*, 445 A.2d 993 (D.C. 1982)  
*Montgomery v. U.S.*, 517 A.2d 313 (D.C. 1986)

## GEORGIA

*Payne v. State*, 232 Ga. App. 591, 502 S.E.2d 526 (1998) (overruled on other grounds by, *Baker v. State*, 252 Ga. App. 695, 556 S.E.2d 892 (2001))

## HAWAII

*State v. Ing*, 53 Haw. 466, 497 P.2d 575 (1972)

## ILLINOIS

*People v. Tsombanidis*, 235 Ill. App. 3d 823, 176 Ill. Dec. 426, 601 N.E.2d 1124 (1st Dist. 1992)

## INDIANA

*Wells v. State*, 254 Ind. 608, 261 N.E.2d 865 (1970)

*Perry v. State*, 541 N.E.2d 913 (Ind. 1989)

## MAINE

*State v. Therriault*, 485 A.2d 986 (Me. 1984)

## MARYLAND

*Aetna Cas. & Sur. Co. v. Kuhl*, 296 Md. 446, 463 A.2d 822 (1983)

*Holcomb v. State*, 307 Md. 457, 515 A.2d 213 (1986)

*Ali v. State*, 314 Md. 295, 550 A.2d 925 (1988)

*Honick v. Walden*, 10 Md. App. 714, 272 A.2d 406 (1971)

## MASSACHUSETTS

*Com. v. Trapp*, 396 Mass. 202, 485 N.E.2d 162 (1985), appeal after remand on other grounds, 423 Mass. 356, 668 N.E.2d 327 (1996)

*Kelly v. O'Neil*, 1 Mass. App. Ct. 313, 296 N.E.2d 223 (1973) (by implication)

## MICHIGAN

*Moncrief v. City of Detroit*, 398 Mich. 181, 247 N.W.2d 783 (1976)

*Solomon v. Shuell*, 435 Mich. 104, 457 N.W.2d 669 (1990)

*People v. Miller*, 88 Mich. App. 210, 276 N.W.2d 558 (1979), judgment rev'd on other grounds, 411 Mich. 321, 307 N.W.2d 335 (1981)

## MINNESOTA

*City of Fairmont v. Sjostrom*, 280 Minn. 87, 157 N.W.2d 849 (1968) (apparently recognizing rule)

## MISSISSIPPI

*Copeland v. City of Jackson*, 548 So. 2d 970 (Miss. 1989)

*Hurt v. State*, 757 So. 2d 1102 (Miss. Ct. App. 2000)

*Mississippi State Dept. of Human Services v. Fargo*, 771 So. 2d 935 (Miss. Ct. App. 2000), reh'g denied, (Aug. 29, 2000)

#### MISSOURI

*Ryan v. Campbell "66" Exp., Inc.*, 304 S.W.2d 825 (Mo. 1957) (recognizing rule)  
*Thomas v. Wade*, 361 S.W.2d 671 (Mo. 1962)  
*State v. Taylor*, 486 S.W.2d 239 (Mo. 1972)  
*Penn v. Hartman*, 525 S.W.2d 773 (Mo. Ct. App. 1975)  
*Nelson v. Holley*, 623 S.W.2d 604 (Mo. Ct. App. W.D. 1981)  
*State ex rel. Pini v. Moreland*, 686 S.W.2d 499 (Mo. Ct. App. E.D. 1984)  
*State v. Cuno*, 869 S.W.2d 285 (Mo. Ct. App. E.D. 1994)

#### NEBRASKA

*Doe v. Gunny's Ltd. Partnership*, 256 Neb. 653, 593 N.W.2d 284 (1999)  
*Sacco v. Carothers*, 257 Neb. 672, 601 N.W.2d 493 (1999)

#### NEW JERSEY

## VIRGINIA

*Hooker v. Com.*, 14 Va. App. 454, 418 S.E.2d 343 (1992)

## WASHINGTON

*State v. Bradley*, 17 Wash. App. 916, 567 P.2d 650 (Div. 2 1977)

According to the court in *Mucci v. LeMonte*, 157 Conn. 566, 254 A.2d 879 (1969), generally speaking, a police report may be admitted as a business entry, the court adding, however, that the fact that such a report is generally admissible does not require that everything contained in the report be admitted into evidence. The court stated that for an item contained in a report to be admissible, it must be based on the entrant's own observation or on information of others whose business it was to convey information to the entrant.

The court in *Moncrief v. City of Detroit*, 398 Mich. 181, 247 N.W.2d 783 (1976), held that a police report is a writing that may be admitted into evidence at trial as an exhibit if the proponent can demonstrate that it meets the requirements of the business records exception. However, the court noted, because of the "nature" of police business and the circumstances under which such reports are usually made, the possibility of police reports so qualifying is typically unlikely. Nevertheless, the court stressed, the report could be received into evidence if the proponent is able to demonstrate that the report constitutes its author's past recollection recorded.

In *State v. Taylor*, 486 S.W.2d 239 (Mo. 1972), the court, of the opinion that the purpose of the Uniform Business Records as Evidence Law, as enacted in Missouri (*Mo. Ann. Stat. § 490.690*), was to enlarge the operation of the common-law rule providing for the admission of business records as an exception to the hearsay rule, took the position that a police laboratory report, or any part thereof, would be admissible as an exception to the hearsay rule where there is a preliminary showing of the identity of the record, the mode and time of its preparation, and that it was made in the regular course of police business.

In determining that a certificate of inspection indicating that a Breathalyzer machine was in good operating condition would be admissible as a business record in a prosecution for driving while under the influence of intoxicating liquor, the court in *State v. McGeary*, 129 N.J. Super. 219, 322 A.2d 830, 77 A.L.R.3d 106 (App. Div. 1974), observed that under the New Jersey court rule that makes business records admissible to prove the facts stated therein under certain circumstances, the term "business" includes "every kind of business, governmental activity, profession, occupation, calling or operation of institutions, whether carried on for profit or not," and that it was clear that police reports, with certain qualifications, are admissible thereunder as an exception to the hearsay rule.

See *People v. Foster*, 27 N.Y.2d 47, 313 N.Y.S.2d 384, 261 N.E.2d 389 (1970), in which the court, apparently in dictum, stated that it was not improper for the trial court to allow the prosecution to place in evidence, in a speeding prosecution, a speedometer deviation record to prove the reliability of the speedometer used to clock the speed of the defendant's car, the court further stating that although such a record is considered hearsay, it is admissible under the business entry exception to the hearsay rule if the court finds that it was made in the regular course of any business and that it was the regular course of such business to make it.

According to the court in *Keith v. Polier*, 109 N.C. App. 94, 425 S.E.2d 723 (1993), highway accident reports may be admissible as a business records exception to the hearsay rule pursuant to N.C. Gen. Stat. § 8C-1, Rule 803(6) if they are properly qualified and authenticated. To qualify for admissibility, the court instructed, the following requirements must be met: such reports must be authenticated by their writer, prepared at or near the time of the acts reported, by or from information transmitted by a person with knowledge of the acts, kept in the course of a regularly conducted business activity, with such being a regular practice of that business activity unless the circumstances surrounding the report indicate a lack of trustworthiness.

The court in *Com. v. Russell*, 459 Pa. 1, 326 A.2d 303 (1974), held that it was not error to admit into evidence certain reports prepared by a murdered undercover police officer in a prosecution arising out of that murder, the court adding that the admission of such a report in evidence is within the purpose of the business records exception where there is sufficient evidence that the report has a degree of trustworthiness.

Where a qualifying witness testified that certain records, which were proffered for admission in the defendant's criminal prosecution ( § 33), were prepared in the regular course of police business, at or near the time of the reported incident, and, that although he didn't remember the particular incident with which the reports were concerned, his signature as reviewing officer was on the report, the records were properly qualified as business records (28 P.S. § 91b), the court held in *Com. v. Kelly*, 245 Pa. Super. 351, 369 A.2d 438 (1976), judgment aff'd on other grounds, 484 Pa. 527, 399 A.2d 1061 (1979).

<>

Police reports are normally admissible under the business records exception to the hearsay rule; statements of witnesses repeated in those reports, however, are not generally admissible, unless another hearsay exception applies. C.G.S.A. § 52-180(a). *DeMarkey v. Fratturo*, 80 Conn. App. 650, 836 A.2d 1257 (2003).

Police report generally is admissible as a "business record" under business records exception to hearsay rule. C.G.S.A. § 52-180. *Housing Authority of the City of Hartford v. Deleon*, 79 Conn. App. 300, 830 A.2d 298 (2003).

[\*4] View that police reports are not admissible

[\*4a] Under state statute

The courts in the following cases held that due to the existence of a statute proscribing the admissibility in evidence of certain types of police reports, a police report would not be admissible in evidence as a business record.

See *Adkins v. Lester*, 530 P.2d 11 (Alaska 1974), reh'g denied, 532 P.2d 1027 (Alaska 1975), in which the court, while holding that the testimony of the investigating officer would be admissible in a civil action arising out of an automobile accident, nevertheless held that the officer's police report filled out at the time of his investigation would not be admissible in evidence as a business record exception to the hearsay rule, in view of an Alaska statute (*Alaska Stat. § 28.35.080(e)*) providing that no accident report can be used in evidence in a criminal or civil action arising out of the accident that is the subject of the report. The court clearly indicated, however, that were it not for the statute, police reports might be admissible under the business records exception to the hearsay rule.

According to the court in *Wallin v. Insurance Co. of North America*, 268 Ark. 847, 596 S.W.2d 716 (Ct. App. 1980), the lower tribunal erred in admitting into evidence an "investigative report" ( § 22[b]) in a civil action as that type of police report is proscribed from admission by Uniform Rules of Evidence, Rule 803(8), which specifically provides that such reports by the police or other law enforcement personnel are not within the business records exception to the hearsay rule. It was a fact question for the jury to determine whether the insured died as a result of suicide, the court related, and

the burden of proof was on the plaintiffs to prove that death was not a result of suicide. The ruling of the lower tribunal in receiving in evidence the report of an officer over the objections of the beneficiaries of the subject life insurance policy required reversal, the court determined, for the challenged excerpts of the report were clearly hearsay and the report was not admissible pursuant to the prevailing statute.

In *Summers v. Burdick*, 191 Cal. App. 2d 464, 13 Cal. Rptr. 68 (1st Dist. 1961), an action by a pedestrian struck by an automobile, the court held that the trial court had acted correctly in precluding certain police reports, which had been used to refresh the memory of the investigating officer, from being admitted into evidence pursuant to, inter alia, Cal. Veh. Code § 20012. Affirming a judgment for the defendant, the court rejected the argument of the plaintiff that since the investigating officer was examined and cross-examined as to the contents of the report, it should have been admitted into evidence on offer of the plaintiff. The court noted that the plaintiff had cited no authority to support his argument, the reason being that it is well established in California that police reports are not admissible under the Uniform Business Records as Evidence Act, nor under the provisions of the California Vehicle Code.

See *Kramer v. Barnes*, 212 Cal. App. 2d 440, 27 Cal. Rptr. 895 (1st Dist. 1963), a civil action arising out of a chain-reaction automobile collision, in which the court held that the police report of the accident could not be admitted into evidence under the Uniform Business Records as Evidence Act (Cal. Civ. Proc. Code § 1953e), in view of a provision of the California Vehicle Code (Cal. Veh. Code § 20012) that precluded the use of such reports as evidence.

The court in *Smith v. Frisch's Big Boy, Inc.*, 208 So. 2d 310 (Fla. Dist. Ct. App. 2d Dist. 1968), in holding that a police accident report would not be admissible as evidence, commented that even if the hearsay evidence in question was deemed admissible under the Uniform Business Records as Evidence Act, or as a "shop book" as contemplated by the Florida Shop Book Rule, nevertheless there was in existence an independent Florida statute (Fla. Stat. Ann. § 92.36) regarding accident reports, which provided that no such report could be used as evidence in any trial, civil or criminal, arising out of an accident.

Determining that a letter written by a California police officer regarding an automobile accident would not be admissible in an Illinois prosecution for contributing to the delinquency of a minor, the court in *People v. Marselle*, 20 Ill. App. 3d 1012, 314 N.E.2d 21 (3d Dist. 1974), stated that, apart from constitutional issues, the letter would not be admissible in this cause under an Illinois statute (S.H.A. ch. 110A, § 236) that permitted certain business and professional writings or records to be admitted as an exception to the hearsay rule, since such statute specifically provided that the rule should not apply to the introduction into evidence of police accident reports.

The court in *Wilkinson v. Mullen*, 27 Ill. App. 3d 804, 327 N.E.2d 433 (1st Dist. 1975), stated that police reports are generally not admissible in Illinois, and pointed out that it was provided in an Illinois Supreme Court Rule (Ill. Supreme Court Rules, rule 236(b)) that they are specifically excluded from the general rule allowing the admission of business records. The court went on to say, however, that their use has been allowed to refresh the memory of a witness, and where a proper foundation has been laid, certain portions of a police report have been admitted into evidence as past recollection recorded.

While recognizing that in some jurisdictions police reports have been held admissible under a "business records" exception to the hearsay rule, the court in *Webster v. Central Paving Co.*, 51 Mich. App. 62, 214 N.W.2d 707 (1974), expressed the view that this could not be the case in Michigan, which had a statute (Mich. Comp. Laws Ann. § 257.624) strictly barring statutorily mandated reports from admission into evidence.

[\*4b] Police report not "business record"

The courts in the following cases refused to admit as evidence, under a business records exception to the hearsay rule, certain police reports sought to be admitted in their entirety, on the basis that these reports did not constitute a "business record" within the meaning of that exception.

In *Oliver v. State*, 475 So. 2d 655 (Ala. Crim. App. 1985), the facts of which are more fully discussed at § 33, receipts that an investigator gave to the police for money removed from a criminal defendant and his companions did not constitute a business record and, therefore, was not admissible under the business records exception to the hearsay rule.

The court in *Welch v. Medlock*, 79 Ariz. 247, 286 P.2d 756 (1955), held that a "fatality sheet" filled out by an Arizona highway patrol officer who had investigated, but did not observe, a fatal automobile accident was not admissible in evidence under the business records exception to the hearsay rule, the court expressing the opinion that the report did not come within the purview of a "business record" as defined in the recently adopted Uniform Business Records as Evidence Act.

See *Layne v. Hartung*, 87 Ariz. 88, 348 P.2d 291 (1960) (overruled in part on other grounds by, *Odekirk v. Austin*, 90 Ariz. 97, 366 P.2d 80 (1961), in which the defendant sought to have admitted as evidence an accident report prepared by a police officer pertaining to the accident in question, where the court stated that it was apparent from the record that the defendant offered the exhibit in evidence under the Uniform Business Records as Evidence Act, as adopted in Arizona, and further stated that it had been held in *Welch v. Medlock*, 79 Ariz. 247, 286 P.2d 756 (1955), this section, that such an accident report was not a "business record" within the meaning of the Act, and was therefore inadmissible, the court concluding that this rule applied to the exhibit in the instant case.

According to the court in *Polster v. Griff's of America, Inc.*, 34 Colo. App. 161, 525 P.2d 1179 (1974), a slip-and-fall action, the lower tribunal had properly sustained an objection to the admission of the police report of the accident on the grounds that it contained hearsay upon hearsay, because it contained the statements of a third party recorded by a police officer, and because the witness offered by the defendant to identify the report had no personal knowledge of the contents of the report, the court expressing the view that police reports "of this nature" do not fall within the business records exception to the hearsay rule, and furthermore, where such reports do contain hearsay they would be inadmissible in any event.

The court in *Wilder v. Classified Risk Ins. Co.*, 47 Wis. 2d 286, 177 N.W.2d 109 (1970), rejected the view that police reports of an automobile accident should be admitted under Wisconsin's business record statute (*Wis. Stat. Ann. § 889.18*), as an exception to the hearsay rule, in a personal injury action by a pedestrian. The court expressed the opinion that the business entry statute was not intended to serve as a vehicle for the admission of an investigational report by the police, and added that although investigational reports are prepared in the ordinary course of a police officer's duty, they are not an integral part of a larger transaction or business. While admitting that the statute made any writing or record of an occurrence or event admissible as evidence of such occurrence or event, the court felt that the "regular course of any business" did not refer to law enforcement. The court distinguished police reports from such things as hospital reports, where the persons making the entries have personal knowledge in most cases or rely on statements of employees or persons in the business or hospital who have a duty to make the statements relied upon. The court concluded that the basis for allowing the business entry rule as an exception to the hearsay rule does not exist in the case of police reports, but did specifically state that police records of arrests stand on a different footing and may be admissible as a business record.

\*\*\*\* Observation:

The court overruled an earlier decision, *Voigt v. Voigt*, 22 Wis. 2d 573, 126 N.W.2d 543 (1964) (overruled in part on other grounds by, *Wilder v. Classified Risk Ins. Co.*, 47 Wis. 2d 286, 177 N.W.2d 109 (1970)), insofar as that decision left any implication that a police accident report might be considered as a business entry under the relevant Wisconsin statute. The court noted that in that case it had inferred that a police accident report was an official record, but the report in that case was inadmissible because the officer who made it was dead at the time of trial, and thus could not be cross-examined concerning a statement that he took from one of the parties at a hospital to the effect that his car had slid into the path of the other car. In retrospect, the court felt that it would have been better to have based the exclusion in on

the ground that the statement was hearsay because the full application of the official records doctrine admits hearsay, that being the purpose of the exception. The court felt that it had been a bit misleading to state in that case that a police traffic accident report is a public document, and then to limit its admissibility to only those facts of which the report maker has personal knowledge. As to such facts, stated the court, a traffic accident report is admissible without the testimony of the officer making the report, and the death of the officer would not make such part of the report inadmissible.

<>

Narrative portions of police report are not admissible under business records exception to the hearsay rule. *Armour v. State*, 594 S.E.2d 765 (Ga. Ct. App. 2004).

### [\*III] FACTORS AFFECTING ADMISSIBILITY UNDER BUSINESS RECORDS EXCEPTION

#### [\*A] Generally

#### [\*5] Report made in regular course of police business

The courts in the following cases held that unless a police report is made in the regular course of police business, and unless it is the regular course of police business to keep such a report, the report will not be admissible as a business record exception to the hearsay rule.

#### WISCONSIN

*Mitchell v. State*, 84 Wis. 2d 325, 267 N.W.2d 349 (1978)

In *Rousseau v. West Coast House Movers*, 256 Cal. App. 2d 878, 64 Cal. Rptr. 655 (2d Dist. 1967), the court held that certain police reports would be admissible in evidence, the court observing that the reports in question reflected direct observations of the reporting officers and hence were admissible under the Uniform Business Records as Evidence Act, which makes admissible the observations of an informant having the business duty to observe and report, which observations are made in the regular course of business.

According to the court in *Leiken v. Wilson*, 445 A.2d 993 (D.C. 1982), a properly qualified police report is admissible at the time of trial, the court commenting that factual observations in such a report may be admissible under the business records exception to the hearsay rule (D.C. Civil Rule 43-1(a)) if, for example, the report was made and reported in the regular course of business.

See *Payne v. State*, 232 Ga. App. 591, 502 S.E.2d 526 (1998) (overruled on other grounds by *Baker v. State*, 252 Ga. App. 695, 556 S.E.2d 892 (2001)), where the court, allowing into evidence certificates of inspection of a breath-testing machine ( § 27[a]), commented that the documents were valid business records, particularly given the testimony of the arresting officer that such certificates were made in the ordinary course of business of the police department, and that it was the ordinary course of business of the department to maintain such records.

The court in *State v. Ing*, 53 Haw. 466, 497 P.2d 575 (1972), pointed out that the question of offering into evidence a speed-test card, which vouched for the accuracy of the speedometer of a police vehicle, could readily be resolved by the reasoning that since regular tests are made and the records of those tests are kept by the police department, the cards can be introduced as an ordinary business entry of evidence of such records indicating the routine testing of speedometers.

In *Copeland v. City of Jackson*, 548 So. 2d 970 (Miss. 1989), the court held that a police report prepared by law enforcement officials in the regular course of their activities would be admissible at the time of trial. Here, the court remarked, a police chief testified at length that the report was written by its author in the regular course of his duties. While the report in question was allowed into evidence for identification purposes, it was never admitted into evidence

for the jury to view, the court remarking that it was error for the lower tribunal to not allow this report into evidence, though it was harmless error in view of the additur granted by the court and thus did not require a new trial. In holding the police report admissible, the court stressed, it should not be understood that it was holding all the contents of the report necessarily admissible. That is, the court explained, there may be notations in such a report that are recitations of statements of others, and would be inadmissible even though the officer were present in court testifying, the court concluding that the report was simply a substitute for the officer appearing in person and testifying.

The court in *State v. Lungsford*, 167 N.J. Super. 296, 400 A.2d 843 (App. Div. 1979), in holding that a police investigative report, which contained a statement of a declarant, would not be admissible in the defendant's criminal prosecution pursuant to the business records exception to the hearsay rule, commented that one of the critical circumstances importing reliability under the business records exception doctrine is the fact that the informant whose declaration is so recorded is under a duty, in the context of the activity in which the record is made, to make an honest and truthful report, a fact not present in the instant matter. The court held that the business records exception is predicated not only on the circumstance that the record itself is kept in the usual course of the business but also on the circumstance that the recorded information is obtained by the recorder from a declarant having a "business" duty to communicate it truthfully.

According to the court in *Bracco v. Mabstoa*, 117 A.D.2d 273, 502 N.Y.S.2d 158 (1st Dep't 1986), a police officer's report concerning a motor vehicle accident ( § 13[a]) would be admissible, for it was clearly made in the regular course of business, as a result of which they were admissible as a business record under *N.Y. C.P.L.R. 4518(a)*.

The court in *Fisher v. Thompson*, 50 N.C. App. 724, 275 S.E.2d 507 (1981), held that the contents of a police automobile accident report prepared shortly after a motor vehicle accident qualified for admission in evidence in the plaintiff's personal injury action under the business records hearsay exception, particularly given the testimony of a police officer that the report was prepared in the regular course of his business. The court noted at the outset that a police officer testified that he prepared the subject report in the normal course of his employment and that it was standard procedure to do so shortly after investigating an accident. He authenticated the report by identifying the handwriting thereon as his own, the court remarked, such that it appeared that the contents of the report qualified for admission under the hearsay exception for entries made in the regular course of business.

According to the court in *Lepire v. Motor Vehicles Division*, 47 Or. App. 67, 613 P.2d 1084 (1980), the statutory phrase "regular course of business," with respect to the business records exception to the hearsay rule, is a term of art, and the words have come to be a shorthand expression or symbol for a doctrine, the essence of which is the reliance on records where the circumstances in which they were made furnish sufficient checks against inducements to misstate to make them trustworthy, give them some "badge of truthfulness." The court, holding that a particular police "custody report" ( § 21) was not admissible in a civil action, pointed out that the mere fact that records are routinely prepared does not satisfy the requirement of the state's business records exception to the hearsay rule (*Or. Rev. Stat. § 41.690*) that the report, to be admissible, be "made in the regular course of business." Instead, the court indicated, it is the character of the records and their earmarks of reliability acquired from their source and origin and the nature of their compilation, that is the test of whether records are prepared in the "regular course of business." The basis of the rule allowing business records into evidence as an exception to the hearsay rule is the probability of trustworthiness of records because they were routine reflections of the day-to-day operations of a business, the court stressed. All the exceptions to the hearsay rule are based on the belief that something about the out-of-court statement insures or tends to insure its truthfulness, and therefore the jury need not evaluate the maker's demeanor for signs of credibility, the court continued, and the business records exception to the hearsay rule is in keeping with this theory of inherent believability. Giant businesses, the court explained, involve many departments that must interact as well as deal with outsiders over long periods of time, and precise communication and accurate records are extremely important if these interactions are to succeed. That is, the court concluded, a company cannot lie to itself on a day-to-day basis and survive because business records serve as the corporation's memory.

In *Quint v. Pawtuxet Val. Bus Lines*, 114 R.I. 473, 335 A.2d 328 (1975), the court, after expressing the opinion that a police report does come within the ambit of the Rhode Island Business Record statute (*R.I. Gen. Laws 1956, § 9-19-13*), stated that under that statute, if the trial judge is satisfied that the writing of a record was made in the regular course of business and that it was the regular business to make the entry at the time of the event, then the writing may be admitted into evidence under the exception to the hearsay rule.

According to the court in *Porter v. State*, 623 S.W.2d 374 (*Tex. Crim. App. 1981*), a transcript of police radio transmissions ( § 31) would be admissible pursuant to the business records exception to the hearsay rule (*Tex. Rev. Civ. Stat. Ann. art. 3737e, § 2*) in the defendant's criminal prosecution where, inter alia, a police officer testified that the recording was made in the regular course of business, that it was the regular course of the police department for an employee of the police with personal knowledge of the event to make the recording, and that the recording was made at the same time as the events recorded.

The court in *State v. Bertul*, 664 P.2d 1181 (*Utah 1983*), the facts of which are more fully discussed at § 35, held that witness statements recorded by officers were not made in the regular course of the witness' business and therefore did not have the indicia of reliability associated with routine and regularly recorded entries upon which reliance is placed by the organization, such that they were not admissible under the business records exception to the hearsay rule (*Utah Rules of Evid., Rule 63(13)*). However, the court remarked, such a document may be admissible if the witness' statement to the police officer meets the requirements of some other exception to the hearsay rule.

◇

Defendant's arrest report was admissible under business records exception to hearsay rule; arrest report merely included biographical information and the type of charge to be brought against defendant, arrest records were kept in the regular course of business at police department, and arrest report was made near the time of the arrest event, prepared by an officer with personal knowledge, and was kept in the regular and routine course of business at department. *Rules of Evid., Rule 803(6)*. *Tate v. State*, 835 N.E.2d 499 (*Ind. Ct. App. 2005*).

Truck driver's written statement to police investigator regarding cause of accident was not admissible in personal injury suit as business record, inasmuch as driver was under no business duty to report incident to police. *Carr v. Burnwell Gas of Newark, Inc.*, 803 N.Y.S.2d 834 (*App. Div. 4th Dep't 2005*).

[\*6] Necessity of reporter's personal knowledge

In the following cases, the courts held that a police report will not be admissible under the business records exception to the hearsay rule where it is apparent that the reporting officer did not have firsthand knowledge of the facts that he or she was recording.

*Mitchell v. State*, 84 Wis. 2d 325, 267 N.W.2d 349 (1978)

In finding admissible in evidence a police accident report which contained the investigating officer's own personal observations concerning such factors as the condition of the weather and the road surface, the time of day and the location of the vehicles when the officer arrived at the scene, the court in *Mucci v. LeMonte*, 157 Conn. 566, 254 A.2d 879 (1969), stated that in order for such a report to be admissible, it must be based on the entrant's own observation or the information of others whose business it was to convey information to the entrant.

The court in *Honick v. Walden*, 10 Md. App. 714, 272 A.2d 406 (1971), held that items contained in police accident reports that are within the personal observation of the investigating officer are admissible under the business record statute (Md. Code 1957, art. 35, § 59), but that items based on hearsay and conclusions of the officer are inadmissible.

In *Hurt v. State*, 757 So. 2d 1102 (Miss. Ct. App. 2000), the facts of which are more fully discussed at § 39, the court, without detailed discussion, held that a campus police supervisor would be qualified under the business records exception to the hearsay rule (Miss. Rules of Evid., Rule 803(6)) to testify about the contents of a police offense report since, inter alia, he had personal knowledge regarding the contents of the document.

The court in *Porter v. State*, 623 S.W.2d 374 (Tex. Crim. App. 1981), held that a police report consisting of transcriptions of police radio broadcasts ( § 31) would be admissible at the defendant's criminal prosecution where, inter alia, a police officer testified that it was the ordinary course of business for an employee or officer to have personal knowledge of the transmissions and broadcasts recorded on the tape. The court rejected the defendant's argument that the officer did not have personal knowledge of the acts and events preserved in the transcription, the court commenting that *Tex. Rev. Civ. Stat. Ann. art. 3737e*, § 2 provides, in pertinent part, that the identity and mode of preparation of the memorandum or record in accordance with the provisions of the statute may be proved by the testimony of the entrant, custodian, or other qualified witness even though the witness may not have personal knowledge as to the various items or contents of such memorandum or record. Here, the court stated, the subject officer testified he was the custodian of the sound recording, such that the defendant's contention was without merit, the court concluding that a proper predicate for the admission of the tape recording as a business record was established.

Determining that the mere fact that the written statement of a witness to a traffic accident was made part of the highway department's file on the wreck did not make it admissible as a business record exception to the hearsay rule, the court in *Logan v. Grady*, 482 S.W.2d 313 (Tex. Civ. App. Fort Worth 1972), noted that the Texas Business Record statute (*Tex. Rev. Civ. Stat. Ann. art. 3737e*, § 1(b)) requires that some employee or representative who either made the record or transmitted the information therein contained to another to record must have had personal knowledge of the act or event reflected by such record, in order for such record to be admissible under the business records exception to the hearsay rule.

According to the court in *Layton City v. Peronek*, 803 P.2d 1294 (Utah Ct. App. 1990), a police incident report would not be admissible in the defendant's probation violation hearing pursuant to the business records exception to the hearsay rule (Utah Rules of Evid., Rule 803(6)), where the officer testifying about the events related in the report stated that he had no personal knowledge of the incident upon which his affidavit was based. The officer testified that a file is normally maintained on each person incarcerated at the jail, although he did not know if a file was maintained for the subject defendant, the court remarked, and the officer further testified that he supervised the persons who are the custodians of the prisoner files, yet he was not the custodian of any of the files.

Reasoning that a police report contained details of which a police officer had no personal knowledge, but instead, merely repeated the declaration of another made to the officer over the phone, the business records exception (Wash. Rev. Code Ann. § 908.03(6)) did not allow admission of such report, the court held in *Mitchell v. State*, 84 Wis. 2d 325, 267 N.W.2d 349 (1978), the facts of which are more fully discussed at § 29.

◇

To qualify as business record under business records exception to hearsay rule, police report must be based entirely upon police officer's own observations or upon information provided by observer with business duty to transmit such information. C.G.S.A. § 52-180. *Housing Authority of the City of Hartford v. Deleon*, 79 Conn. App. 300, 830 A.2d 298 (2003).

[\*7] Timeliness of report

The courts in the following cases held that police reports are not admissible as evidence under the business records exception if they do not satisfy the requirement of timeliness.

ALABAMA

*Reeves v. King*, 534 So. 2d 1107 (Ala. 1988)

## TENNESSEE

*West End Recreation, Inc. v. Hodge*, 776 S.W.2d 101 (Tenn. Ct. App. 1989)

While holding that a police officer's report filled out at the time of his investigation would be inadmissible because of an Alaska statute (*Alaska Stat. § 28.35.080(e)*), the court in *Adkins v. Lester*, 530 P.2d 11 (Alaska 1974), reh'g denied, 532 P.2d 1027 (Alaska 1975), surmised that, absent such a statute, police reports may be admissible under the business records exception to the hearsay rule, since the investigator is usually an expert, at least to the extent of being experienced in investigation, and since the report is generally prepared from investigations made at the time of the incident and thus tends to represent a more competent evaluation of the occurrence than subsequent investigation.

In determining that the lower tribunal did not commit error by refusing to admit into evidence in a prosecution for murder of a prison guard an "incident" report prepared by a police officer, such report sought to be admitted under the Uniform Business Records as Evidence Act (*Cal. Civ. Proc. Code § 1953e*), the court in *People v. Bazaure*, 235 Cal. App. 2d 21, 44 Cal. Rptr. 831 (3d Dist. 1965), noted, inter alia, that it appeared elsewhere in the record of the trial that the police report in question was not written up until approximately 30 days after the stabbing death of the prison guard.

See *Gregory v. State Bd. of Control*, 73 Cal. App. 4th 584, 86 Cal. Rptr. 2d 575 (4th Dist. 1999), as modified on denial of reh'g, (July 27, 1999), where the court, in denying a defendant's request to admit summary police reports under the business records exception to the hearsay rule ( § 24), held that such evidence is admissible pursuant to *Cal. Evid. Code* § 1280 if the writing was made by and within the scope of duty of a public employee, the writing was made at or near the time of the event, and the sources of information and the method and time of its preparation were such as to indicate its trustworthiness, the court adding that even assuming other criteria were met here, the in-lieu summary reports were not made at or near the time of the event.

Commenting that under a New Jersey statute (*N.J. Stat. Ann. 2A:82-35*), evidence of the identity and the method and time of preparation of a police accident record must satisfy the trial court that its admission is justified, the court in *Brown v. Mortimer*, 100 N.J. Super. 395, 242 A.2d 36 (App. Div. 1968), an action arising out of a collision between two automobiles in a department store parking lot, held that the trial court had made an implicit finding that the statutory standard had been complied with, the police report in question having been admitted as a business record under the Uniform Business Records as Evidence Act.

[\*B] Content of Report

[\*8] Statements made to reporting officer

In the following cases the courts held that the content of a police report that was not the result of the reporting officer's own observations, but was the product of statements made to the officer by third persons, could not be admitted into evidence under the business records exception to the hearsay rule, unless the third party making the statement was under a business duty to do so.

#### WASHINGTON

*State v. Bradley*, 17 Wash. App. 916, 567 P.2d 650 (Div. 2 1977)

The court in *People v. Ferguson*, 129 Cal. App. 3d 1014, 181 Cal. Rptr. 593 (1st Dist. 1982), held that a police report would not be admissible in the defendant's grand theft prosecution pursuant to the business records exception to the hearsay rule (*Cal. Evid. Code* § 1271), where it contained inadmissible hearsay in that it was evidence of an out-of-court statement made by the defendant.

In *State v. Masse*, 1 Conn. Cir. Ct. 381, 24 Conn. Supp. 45, 186 A.2d 553 (App. Div. 1962), the court, in commenting upon the admissibility of police reports under the business records exception to the hearsay rule (*Conn. Gen. Stat. Ann.* § 52-180), said that statements contained in police reports that were made by volunteers or others outside of the police department, who are under no duty to make observations or record them as members of the police organization, are treated as hearsay and do not come under the exception provided by the statute. The court added that this is particularly true of reports containing statements of witnesses as to their own observations, opinions, or speculations.

The court in *Canaan v. State*, 541 N.E.2d 894 (Ind. 1989), without detailed explanation, held that hearsay statements made to the police by a non-testifying defendant were not rendered admissible at the defendant's prosecution for murder, burglary, and attempted criminal deviate conduct under the business records exception by the fact that the officer's notes from the conversation were filed in the record of the cause, the court adding that the police officer's notes did not change their character with regard to admissibility merely because they were filed in the police records.

The statement of a party did not come within the business records exception to the hearsay rule Md. Code Ann., Cts. & Jud. Proc. § 10-101(b), as it was not a memorandum of the accident such as the statute contemplated, but was merely the party's explanation of his part in the event, the court held in *Aetna Cas. & Sur. Co. v. Kuhl*, 296 Md. 446, 463 A.2d 822 (1983). The statement, the court elaborated, is not accorded the reliability necessary to come within the business

records exception because the party had no duty to make a truthful statement, and in fact, as was the case with the accused, the witness had every motive to lie. The police officer taking the statement had no firsthand knowledge as to whether the events happened as the party had indicated, the court related, the officer, instead, merely having a written record of what the witness told him, such that the statement was hearsay not falling within the business records exception.

According to the court in *Com. v. Meech*, 380 Mass. 490, 403 N.E.2d 1174 (1980), a statement given to the police by a person who died prior to trial was not admissible pursuant to the business records exception to the hearsay rule (*Mass. Gen. Laws Ann. ch. 233, § 78*) where the declarant was under no business duty to make the statement. The defendant was convicted of first-degree murder and assault and battery with a dangerous weapon, and the court, on review of the defendant's appeal, affirmed. The court, without detailed discussion, held that the lower tribunal did not err in refusing to admit the police report containing the statement under the business records exception.

Commenting that two levels of hearsay are involved in many police reports, the first level being the extrajudicial statements of the officer as to what he himself saw or otherwise observed, the second being the statements made to the officer by other persons during the course of his investigations, the court in *Kelly v. O'Neil*, 1 Mass. App. Ct. 313, 296 N.E.2d 223 (1973), expressed the view that the better rule is that the second level of hearsay appearing in a police officer's report is not admissible in evidence under business entry statutes (*Mass. Gen. Laws Ann. ch. 233, § 78; Mass. Gen. Laws Ann. ch. 90, §§ 26, 29*).

According to the court in *Hewitt v. Grand Trunk Western R. Co.*, 123 Mich. App. 309, 333 N.W.2d 264 (1983), a statement from a bystander contained in a police report regarding the actions of a decedent just before his death would not be admissible pursuant to the business records exception to the hearsay rule Mi. R. Rev. M.R.E. 803(6) in the wrongful death action brought by the decedent's representative. The court reasoned that the primary foundational requirement that the declarant be acting in the regular course of his or her business when making the statement was lacking, such that the statement to the effect that the decedent had jumped in front of the train was not admissible under the business records exception to the hearsay rule.

The court in *State v. Lungsford*, 167 N.J. Super. 296, 400 A.2d 843 (App. Div. 1979), holding that statements contained in a police investigative report would not be admissible ( § 38[b]) pursuant to the business records exception to the hearsay rule (N.J. Rules of Evidence, Rule 63(13)) in the defendant's prosecution for knowing possession of a motor vehicle with an altered serial number, reasoned that if a declarant is not available to testify and if the statement is not admissible under some other exception to hearsay rule, such as excited utterance or dying declaration, then the admissibility cannot be predicated exclusively upon the circumstance that the statement was made to a police officer who paraphrased its content in his or her report.

In *Quint v. Pawtuxet Val. Bus Lines*, 114 R.I. 473, 335 A.2d 328 (1975), the court held that that part of a police accident report that contained statements of the principals involved in the accident was properly held inadmissible as evidence, the court commenting that while the police department's personnel are in the business of recording statements, the witnesses were not, and those statements would not come within the reach of the business exception statute (*R.I. Gen. Laws 1956, § 9-19-13*) even though the police report itself would, the problem being essentially one of "double hearsay." The court clarified its statement by pointing out that while the business records exception may serve to justify admitting out-of-court declarations of the entrant, it does not follow that this justifies admitting the statement of someone else merely because the maker of the record relates it. Thus, the court added, in order for the third party's statement to be admissible as part of the police report, that party must have had a business duty of transmitting the information to the reporter.

[\*9] Opinions or conclusions of reporting officer

The courts in the following cases held that opinions or conclusions of the reporting officer contained in a police report,

or the opinions and conclusions of witnesses making statements to the reporting officer, would not be admissible as evidence under the business records exception to the hearsay rule where the reporting officer or the witness making the statements would not be qualified to state such opinions or conclusions if testifying in person.

## UTAH

*State v. Bertul*, 664 P.2d 1181 (Utah 1983)

See *Adkins v. Lester*, 530 P.2d 11 (Alaska 1974), reh'g denied, 532 P.2d 1027 (Alaska 1975), in which the court, although stating that police reports are not admissible as evidence in Alaska because of a statute (*Alaska Stat.* § 28.35.080(e)), appeared to suggest that, at least insofar as accident investigation is concerned, the investigating officer may be an expert, and that his opinions and conclusions with regard to his investigation may be admissible as evidence. The court noted that two safeguards are generally present to protect against an investigator's conclusions being given undue weight by the jury: the discretionary power of the trial court to exclude opinions that would be highly prejudicial, and the fact that such conclusions are open to dispute by contrary evidence.

The court in *Julian v. Randazzo*, 380 Mass. 391, 403 N.E.2d 931 (1980), held that expressions of opinion of a police officer contained within a police report would not be admissible in a civil action ( § 22[b]) pursuant to the business records exception to the hearsay rule. A police lieutenant testified that he was assigned to make the usual investigation made when a police officer discharges his weapon; the officer stated in his report that the defendant police officer was "justified in using his firearm." The plaintiff objected to the admission of the report on the ground that it contained the opinion of the officer based upon hearsay statements. The report contained a narrative account of the incident, and, in general, the account agreed with the defendant officer's account, while differing from those of other witnesses. The court stated that it was apparent that most of the narrative was supplied by police officers, and the lieutenant testified that in preparing the report, he spoke with the defendants, read their reports, interviewed the plaintiff and at least one of the other bystander witnesses, and had the assistance of other officers. A record of a primary fact, the court instructed, made by a public officer in the performance of official duty is or may be competent prima facie evidence as to the existence of that fact, but records of investigations and inquiries conducted, either voluntarily or pursuant to requirement of law, by public officers concerning causes and effects involving the exercise of judgment and discretion, expressions of opinion, and making conclusions are not admissible in evidence as either public records or business records. Reasoning thusly, the court determined that the conclusion of the subject report, comprising the investigating officer's opinion and recommendation, was not admissible.

In noting upon its holding that the lower tribunal had erred in sustaining a general objection to the admissibility of a police accident report under the Uniform Business Records as Evidence Law even though the objection was based, *inter alia*, on the fact that it contained conclusions of the investigating officer, the court in *Stegall v. Wilson*, 416 S.W.2d 658 (Mo. Ct. App. 1967), emphasized that its holding should not be interpreted as meaning that a police officer's report that

undertakes to diagnose the nature and extent of injuries of a victim of a collision would be admissible if a specific objection has been made thereto.

See *Stevens v. Kirby*, 86 A.D.2d 391, 450 N.Y.S.2d 607 (4th Dep't 1982), an action seeking damages for injuries sustained in a fight involving patrons of a tavern in its parking lot, where the court held that error by the lower tribunal in admitting a state liquor authority report as a business record was prejudicial, particularly in view of an award of punitive damages, since inadmissible conclusions and opinions contained in the report were highly inflammatory and since the report could appear to the jury as an official determination that the subject tavern owner acted negligently in failing to control her patrons and to take precautions for patrons' safety.

See *Lewis v. Merrill*, 228 Or. 541, 365 P.2d 1052 (1961), in which the court refused to admit into evidence in an action for assault and battery a police report of an earlier burglary of the plaintiff's premises in which report it had been stated by the officer that the plaintiff "believed" that certain persons were responsible for the act. The court observed that had the officer who made the report been on the witness stand, he would not have been permitted to testify to the plaintiff's belief, for that would have been only the conclusion of the witness.

The court in *State v. Bertul*, 664 P.2d 1181 (Utah 1983), the facts of which are more fully discussed at § 35, held that, as with business records, investigative reports of governmental officials containing opinions not based on firsthand knowledge are not admissible at the time of trial, pursuant to Utah Rules of Evid., Rule 63(15). Police reports of crimes, however, should ordinarily be admitted when offered by the defendant in a criminal case to support his or her defense, the court indicated, but, when offered by the prosecution, they should ordinarily be excluded, except when offered to prove simple, routine matters that are based on firsthand knowledge of the maker of the report and do not involve conclusions, and when the circumstances of their preparation indicate their trustworthiness. In the instant case, though, the court stressed, since the booking sheet in question was offered by the defendant, the trial court erred in excluding the booking sheet even though it contained what might be considered a conclusion regarding the state of the criminal defendant's intoxication.

[\*C] Other Factors

[\*10] Availability of reporter to testify

The courts in the following cases held that the presence of the reporting police officer in court, and his or her availability to testify, did not mean that the officer's report should be admitted as evidence without qualification under the business records exception to the hearsay rule.

See *MacLean v. City and County of San Francisco*, 151 Cal. App. 2d 133, 311 P.2d 158 (1st Dist. 1957), where the court commented that even if a police report had been improperly excluded when offered in evidence as a business record, the error could not have been prejudicial where the officers who prepared it were available as witnesses and, in fact, did testify at the trial, and where, in fact, the report in question was used to refresh their recollections.

See *Summers v. Burdick*, 191 Cal. App. 2d 464, 13 Cal. Rptr. 68 (1st Dist. 1961), an automobile accident case in which the court rejected the argument of the plaintiff pedestrian that since the investigating officer was examined and cross-examined as to the contents of his police accident report, it should have been admitted into evidence on offer of the plaintiff. Noting that the plaintiff had cited no authority to support his argument, the court stated that in any event police reports are not generally admissible under the Uniform Business Records as Evidence Act (*Cal. Civ. Proc. Code § 1953e*), nor under the provisions of the California Vehicle Code (*Cal. Veh. Code § 20012*).

Where the police officer making a police report containing certain statements was unavailable to testify at the time of trial, his report would not be admitted as a "business record," the court held in *Ziamba v. City of New Orleans*, 411 So.

2d 697 (*La. Ct. App. 4th Cir. 1982*), the facts of which are more fully discussed at § 26[b].

Even assuming, arguendo, that the police accident report in question did meet the qualifications set forth in the Uniform Business Records as Evidence Law, the court in *Hamilton v. Missouri Petroleum Products Co.*, 438 S.W.2d 197 (*Mo. 1969*), took the position that qualification of the report as a business record would mean that there was not available the objection that the person who prepared the report was not present to be cross-examined, and observed that in the instant case the person preparing the report was available for cross-examination, and that the report was being used to refresh his recollection. The court expressed the view that the "business entry" exception would not mean that the contents of the report were admissible in evidence even though they would not have been admissible if the person who prepared the report was testifying as to those matters placed in the report.

According to the court in *Rogalsky v. Plymouth Homes, Inc.*, 100 N.J. Super. 501, 242 A.2d 655 (*App. Div. 1968*), certification denied, 52 N.J. 167, 244 A.2d 298 (*1968*) and (overruled on other grounds by, *State v. LaBrutto*, 114 N.J. 187, 553 A.2d 335, 81 A.L.R.4th 853 (*1989*)), an objection to the admission into evidence of a police report of an automobile accident should have been sustained, the court commenting that the report contained much of what the investigating officer himself had orally testified to.

The court in *Schneiderman v. Strelecki*, 107 N.J. Super. 113, 257 A.2d 130 (*App. Div. 1969*), certification denied, 55 N.J. 163, 259 A.2d 915 (*1969*), rejected the contention that a police officer's hit-and-run accident report, otherwise inadmissible under the business records exception, was not made admissible in view of the fact that the officer who had prepared it had testified substantially to the information it contained, the court noting that it was only after the officer's oral testimony was excluded that counsel qualified the report and offered it in evidence. However, the court did appear to agree that to permit a police officer to testify as to the facts contained in an accident report made by him and thereafter to allow his report into evidence would be to give the party seeking admission "two bites of the apple." The court felt that the better rule would be to exclude the report when its contents had been fully developed by oral testimony.

See *Snyder v. Portland Traction Co.*, 182 Or. 344, 185 P.2d 563 (*1947*), where the court, holding that no error was committed in sustaining an objection to an offer in evidence of a traffic accident report in a personal injury action, stated that in any event the defendant was not prejudiced by the exclusion of the report, since the investigating officer did testify about what he observed immediately following the accident in question.

<>

Police report was not admissible in suppression hearing to establish probable cause to stop defendant's vehicle under business records exception to hearsay rule, where author of report was deceased and unavailable to testify. Rules of Evid., Rule 803(6), 42 Pa.C.S.A. *Com. v. Raab*, 2004 PA Super 63, 845 A.2d 874 (*2004*).

[\*11] Report made primarily for use in court

The courts in the following cases held that where it appears that a police report sought to be admitted as a business record was made with the purpose in mind of its use as evidence in court proceedings, it should not be permitted in evidence as a business record.

Reports prepared by police officers who had knowledge of the possibility of wrongful death litigation stemming from an officer-involved shooting incident lacked the required trustworthiness within the meaning of the business records exception to the hearsay rule (Mi. R. Rev. M.R.E. 803(6)), as a result of which exhibits were improperly admitted into evidence in the wrongful death action brought by a widow against the officers who shot and killed her husband, the court held in *Solomon v. Shuell*, 435 Mich. 104, 457 N.W.2d 669 (*1990*). The lower tribunal improperly concluded that

the sources of information and the circumstances under which the four police reports were prepared did not lack trustworthiness as that term is narrowly defined in the code provision under inquiry, the court noted at the outset. As to the officer's motivation to misrepresent, the court commented that, in this case, the motivation to misrepresent was obvious and indicated a lack of trustworthiness. The statements of two officers, the court continued, were taken during the course of the department's homicide investigation, which they knew could result in a criminal prosecution, and they, along with a police sergeant, would also be subject to the department's internal affairs investigation, which could result in interdepartmental discipline. Finally, it was highly probable that the officers and the city faced civil litigation and potential liability, for although the trial court rejected this potential motivation to misrepresent as too speculative, it did recognize that even an officer who did not fire a single shot at the decedent, possibly was "anything but totally frank with the homicide investigators," the court concluded.

See *People v. Foster*, 27 N.Y.2d 47, 313 N.Y.S.2d 384, 261 N.E.2d 389 (1970), in which the court, apparently in dictum, rejected a defendant's contention that a speedometer deviation record made by a police department inspector should not be allowed in evidence because the record had been made with the primary purpose of being used as proof in court. The court stated that while it was true that such records may later be used in litigation, such was not the sole purpose when the report was made, and therefore it should not be excluded merely because this was a possible future use.

\*\*\*\* Caution:

See, however, *People v. Crant*, 42 Misc. 2d 350, 248 N.Y.S.2d 310 (City Ct. 1964), in which the court held that a speedometer test card filled out and signed by a police officer, indicating the results of a calibration test performed on the speedometer against which the defendant's speed had been measured, would not be admissible in evidence as a "shop-book" record, since it was apparent that the record was compiled for primary use as an exhibit in court proceedings. The court felt that the statutory "shop-book" rule was designed to permit incidental testimonial use of records that are made and kept primarily for nontestimonial purposes, rather than the other way around.

The court in *Sikora v. Gibbs*, 132 Ohio App. 3d 770, 726 N.E.2d 540, 111 A.L.R. 5th 685 (10th Dist. Franklin County 1999), the facts of which are more fully discussed at § 16, held that a police memorandum that was prepared primarily for use in a court case would not be admissible as a "business record." The subject report was written by a defendant police officer, whose issuance of a citation to the plaintiff gave rise to a malicious prosecution action. The court, holding that the report was not admissible in support of a summary judgment motion under the business records exception to the hearsay rule (Ohio Evid. R. 803(6)), pointed out the memorandum was clearly prepared in anticipation of trial. That is, the court remarked, the memorandum was prepared by the subject officer exclusively for the Legal Section of the Columbus Police Department approximately three weeks after the plaintiff filed her causes of action against the defendant. Documents prepared in anticipation of litigation substantially undermine the presumed guarantee of circumstantial trustworthiness in qualified business records, the court instructed. The court stressed that it was not making a determination that the subject officer was untrustworthy, but rather was finding that under the pertinent legal analysis, the circumstances of preparation indicated a lack of trustworthiness, as a result of which the memorandum did not meet the requirements of the business-record exception found in Ohio Evid. R. 803(6).

In *Lepire v. Motor Vehicles Division*, 47 Or. App. 67, 613 P.2d 1084 (1980), the facts of which are more fully discussed at § 21, the court held that a police custody report was properly excluded from the plaintiff's civil action where the report was, in substantial part, made primarily for use in court. That is, the court elaborated, the report undoubtedly functioned in part as a memorandum of the day-to-day activities of the department, but it was the report's utility as an aid in litigation that was the more significant basis for its preparation. Consequently, the court concluded, the necessary earmarks of reliability and trustworthiness were absent.

The court in *Layton City v. Peronek*, 803 P.2d 1294 (Utah Ct. App. 1990), held that a police report containing an alcohol breath test would not be admissible in the defendant's probation revocation proceeding pursuant to the business records exception to the hearsay rule (Utah Rules of Evid., Rule 803(6)), where it appeared that the document was

prepared, at least in part, for use in court. The court commented that police reports made for the purpose of prosecuting an offense and offered by the prosecution lack sufficient reliability so as to be admissible under the business records exception. Here, the court stressed, the subject police report was made with the intent to submit it to the court for "prosecution" of a probation violation, the court adding that the report was accompanied by a police lieutenant's sworn affidavit, which in form and substance was virtually identical to a criminal complaint.

<

Police laboratory report, which identified substance found on defendant as heroin, was not admissible under business records exception to hearsay rule, where report was prepared in anticipation of litigation. MRE 803(6). *People v. McDaniel*, 670 N.W.2d 659 (Mich. 2003).

[\*12] Nature of objection to admission

The courts in the following cases held that any objection to the admissibility of material contained in a police report must be specific in nature, a general objection to the report as a whole being insufficient.

A general objection made to the admission in evidence under the business records exception of a whole police report, and not directed to specific portions thereof that might have been inadmissible, was held properly overruled by the court in *Mucci v. LeMonte*, 157 Conn. 566, 254 A.2d 879 (1969). In holding that it would not order a new trial on the basis of the plaintiff's claim that the court committed error by failing to exclude from the report the officer's conclusions, the court stated that the plaintiff did not make the specific claim of inadmissibility before the trial court, and that therefore the trial court was not alerted to the claim that the plaintiff was raising for the first time on appeal. The court expressed the view that if the plaintiff had made, at trial, the specific objection now being urged before the appeals court, the portion of the report objected to should and probably would have been deleted, or the jury charged concerning the matter.

In *Thomas v. Wade*, 361 S.W.2d 671 (Mo. 1962), an action arising out of an automobile accident, the appellate court was faced, inter alia, with considering the effect on the admissibility of a police accident report of the plaintiff's "waiver" of any objection to the authenticity report, although the plaintiff did state that certain portions thereof might or might not be objectionable. The court stated that the plaintiff's subsequent general objection to the police record as the "rankest form of hearsay," after the defendant attempted to introduce part of it in evidence, was not a valid objection, in that although it might be admitted that part of the record containing the statement that was read to the jury from the report was hearsay, yet objections to such records as hearsay are not effective if the records have been properly qualified either by proof or admission under the Uniform Business Records Act, and it is only when specific and legally proper objections are made to parts of the record, on grounds other than hearsay generally, that such parts may be properly excluded.

According to the court in *Stegall v. Wilson*, 416 S.W.2d 658 (Mo. Ct. App. 1967), an action arising out of injuries sustained by the plaintiff in a vehicular collision, a general objection to the introduction in evidence of a police accident report, where such introduction was made under the Uniform Business Records as Evidence Law, could not be sustained on the basis that the report was hearsay, nor on the basis, as stated by the objection, that there was "no chance for cross-examination of the party who made [the report]." The court noted that the very purpose of the Uniform Law was to create a statutory exception to the hearsay rule, and to permit into evidence those business records without benefit of testimony by the person or persons who made the records. The court did express the opinion, however, that if proper specific objections had been made to certain parts of the report, as containing conclusions of the investigating officer, or as containing self-serving statements by the parties, then there might have been grounds for sustaining such objections.

## [\*IV] ADMISSIBILITY UNDER PARTICULAR CIRCUMSTANCES

## [\*A] In Civil Actions

## [\*13] Automobile accident reports

## [\*13a] Held admissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a police automobile accident report would be admissible as evidence under the business records exception to the hearsay rule.

An automobile accident report that contained the investigating police officer's own personal observations, such as the condition of the weather and the road surface, the time of day, and the location of the vehicles when the officer arrived at the scene, and in which the officer concluded that the driver of the vehicle in which the plaintiff was riding had failed to yield the right of way and that the defendant's vehicle had entered the intersection first, was held by the court properly admitted into evidence in *Mucci v. LeMonte*, 157 Conn. 566, 254 A.2d 879 (1969), where the plaintiff objected generally to the admission of the whole report, and not to specific portions thereof that might have been inadmissible. Noting that, generally speaking, a police report may be admitted as a business entry, the court stated that the fact that a report is generally admissible does not require that everything contained in the report be admitted into evidence, and that for an item contained in a report to be admissible, it must be based on the entrant's own observation or information of others whose business it was to convey information to the entrant. Moreover, the court added, a police officer's conclusion about the cause of or responsibility for an injury is merely an opinion that the officer would not be permitted to give if he were on the witness stand, and there is all the more reason for excluding such an opinion when the officer, as in the instant case, was not under oath and subject to cross-examination. In holding that it would not order a new trial on the basis of the plaintiff's claim that the court committed error by failing to exclude from the report the officer's conclusions concerning the cause of the accident, the court stated that the plaintiff did not make this specific claim of inadmissibility before the trial court, and that therefore the trial court was not alerted to the claim that the plaintiff was raising for the first time on appeal. The court stated that had the plaintiff made, at the trial, the objection that was now being urged before the appeals court, the portion objected to should and probably would have been deleted, or the jury charged concerning the matter. The court commented that the police report was generally admissible if it was made in the regular course of business, if it was the regular course of business to make such a record, and if the record was made when the act, transaction, or event occurred, or within a reasonable time thereafter, and that if any portions of the report were not admissible, it was incumbent upon the objecting party to point out the inadmissible parts with specificity and to give reasons why the specified parts were not admissible. The court added that the trial record did not disclose whether the trial court examined the report or whether the court was requested to do so before making its ruling, but that in any event, it was not the court's duty to separate the inadmissible parts of the report from the admissible parts.

The court in *Copeland v. City of Jackson*, 548 So. 2d 970 (Miss. 1989), an action for personal injuries arising from a collision between an automobile and a city garbage truck, held that the lower tribunal erred by refusing to admit into evidence a police report prepared at the time of the accident in accordance with rules established by the city police department. A motorist injured in a collision with a city-owned garbage truck brought action against the city and its driver for alleged negligence, the lower tribunal entered judgment on verdict for the motorist, the city appealed, the state supreme court remanded, and, on retrial, the jury awarded the plaintiff \$ 40,000 in damages and found him to be 30% contributorily negligent, the trial judge granted additur to \$ 350,000 for the plaintiff but reduced the award by 30% to \$ 245,000, and the state supreme court, on review of the appeal by the motorist and city, held, inter alia, that the police reports prepared during the investigation of the accident were admissible under the business records exception to the hearsay rule. The court commented that according to Miss. Rules of Evid., Rule 803(6), which governs the admissibility of police reports, the source of the material at issue must be an informant with knowledge who is acting in

the course of the regularly conducted activity. Here, the court explained, the subject police report was prepared at the time of the accident in accordance with the rules established by the police department of the city, the court commenting that, as a general principle, reports prepared by law enforcement officials in the regular course of their activities should be admissible into evidence.

In *Schneiderman v. Strelecki*, 107 N.J. Super. 113, 257 A.2d 130 (App. Div. 1969), certification denied, 55 N.J. 163, 259 A.2d 915 (1969), an action under the New Jersey Unsatisfied Claim and Judgment Fund Act by a pedestrian who was struck by a hit-and-run driver, the court expressed the view that a routine report of an automobile accident prepared by the investigating policeman in pursuance of his duty and duly filed in the regular course of business, where relevant and not otherwise inadmissible, may be received as evidence as a business record under the New Jersey rules of evidence. The police report in question contained the statement of the victim, obtained shortly after the occurrence, that the signal light at the intersection had changed while she was in the middle of the intersection and when she went to run to the next corner she was struck by the truck. The court took the position that in view of the nature of the case and the claim being made by the plaintiff, the police report would have been relevant evidence on her behalf, since she was the only eyewitness who testified, and since she was vigorously cross-examined in an effort to affect her credibility and raise an inference that the accident did not occur as she had testified. The court further explained that in the absence of corroborating testimony the jury could very well have been dubious as to her veracity, and the fact that the occurrence was officially reported by the police as having involved an unknown driver and owner tended to substantially support this phase of her testimony. The court rejected the defendant's urging that the report was rendered inadmissible because it contained the victim's hearsay account of the happening of the accident, the court commenting that it was at a loss to understand how this prejudiced the defendant, in view of a somewhat different version to which the victim testified at the trial. In any event, continued the court, it could not be determined from the record whether the victim's statement as recorded in the report qualified as a spontaneous declaration made at the scene immediately upon the arrival of the officer, or whether it was no more than a later, self-serving narration of past events. Reversing a judgment for the defendant, the court commented that, undoubtedly, these issues would be determined at the new trial when and if an objection was made to the offer of the report in evidence. The court also rejected the defendant's contention that the report was not admissible in view of the fact that the officer who had prepared it had testified substantially to the information it contained, the court noting that it was only after the officer's oral testimony was excluded that counsel qualified the report and offered it in evidence. However, the court did appear to be in agreement with the defendant that to permit a police officer to testify as to the facts contained in an accident report made by him and thereafter to allow his report into evidence would be to give a plaintiff "two bites of the apple." The court felt that the better rule would be to exclude the latter when its contents have been fully developed by oral testimony. The court noted that the report in the instant case was admissible not only as establishing that the driver of the truck had left the scene of the accident before the arrival of the officer, but also as pointing to the possibility that a witness whose name and address were contained therein had seen the occurrence.

See *Schlobohm v. Command Trucking Corp.*, 52 A.D.2d 844, 382 N.Y.S.2d 816 (2d Dep't 1976), a brief memorandum decision affirming an interlocutory judgment by a lower appellate court in a negligence action for personal injury damages, the court said that the trial court could have admitted a police memorandum into evidence upon the issue of the existence of a stop sign, as it was a report made in the regular course of business, though this theory was not urged as a ground of admission.

See the following additional cases in which the courts held, under the particular circumstances presented, that all or part of a police automobile accident report would be admissible as evidence under the business records exception to the hearsay rule, where --

-- in an automobile negligence case, the lower tribunal entered judgment for the defendants, and the court, on review of the plaintiff's appeal, ordered a new trial, the court commenting that a police report of an accident generally is admissible as a business entry if it was made in the regular course of business, if it was the regular course of business to make such a report, and if the report was made when the accident occurred or within a reasonable time thereafter, the

court stressing that these requirements were satisfied in the instant case; that the trooper had no independent recollection of the accident or the parties, so long as there was sufficient evidence for the court to find that the report met the statutory criteria of *Conn. Gen. Stat. Ann. § 52-180*, the court pointed out. *Hutchinson v. Plante*, 175 Conn. 1, 392 A.2d 488 (1978).

-- in a case in which a wife brought an action against her husband to recover damages for personal injuries suffered as a result of a collision between an automobile being operated by him, in which the wife was a passenger, and a motor vehicle operated by a co-defendant, the lower tribunal entered judgment on a jury's verdict for the plaintiff against her husband, and both the husband and wife appealed, and the court, on review, held that the lower tribunal erred in refusing to allow into evidence a portion of a police report referring to the co-defendant's description of how the accident occurred; the court pointed out that *Conn. Gen. Stat. Ann. § 52-180* provides for the admission into evidence of a business record if it is found that the entry was made in the regular course of any business, and that it was the regular course of such business to make such writing or record at the time of such act, transaction, occurrence, or event or within a reasonable time thereafter, the court adding that in the instant case, a member of the New Haven police department testified that police reports are made in the normal course of business of the department and that it is the duty of the investigating officer to submit a report of any accident investigated, and the evidence established that the report of the accident was made approximately two hours after the accident by the investigating officer, who, it was stipulated, did not actually witness the accident, evidence that established that the requirements of the code provision under inquiry were satisfied. *Bonner v. Winter*, 175 Conn. 41, 392 A.2d 436 (1978).

-- in a case in which the driver of a vehicle brought a negligence action against the driver of the second vehicle for injuries sustained in a motor vehicle accident, the lower tribunal entered judgment for the driver of the second vehicle, and the court, on review of the appeal of the driver of the first vehicle, affirmed, the court commenting that any error in admitting into evidence an alleged hearsay statement in the police officer's accident report was harmless; as a general rule, a police accident report is admissible as a business record under *Conn. Gen. Stat. Ann. § 52-180*, the court pointed out, though the rule does not automatically allow everything in a police report into evidence, the court adding that the plaintiff correctly asserted that the officer declined to testify that he distinctly remembered which operator was the source of the statement at issue, and, even if it were to be assumed that the statement was hearsay, it could not be concluded that its admission required reversal, for there was sufficient other evidence to support the jury's verdict, including the location of the damage on the plaintiff's car. *Swenson v. Sawoska*, 215 Conn. 148, 575 A.2d 206 (1990).

-- in a case in which the owner of a parked automobile, which had been struck by a vehicle driven by the offending motorist and owned by his fiancé, appealed from a judgment entered by the small claims branch of the superior court in favor of the driver and owner of the offending vehicle in a damages action, and the court, on review, held that factual observations in a police report may be admissible under the business records exception to the hearsay rule (D.C. Civil Rule 43-1(a)) if made and reported in the regular course of business, the court adding that statements of third parties recorded in police reports may be admissible if they fall within another exception to the hearsay rule, such as the exception for admissions; in the instant case, however, the court continued, there was no reversible error committed by the lower tribunal in excluding the police report, for, with the lower tribunal's help, the owner of the parked motor vehicle was able to elicit on the examination of the driver of the motor vehicle that collided with the parked vehicle's owner the substance of that individual's statement to the police, as well as the fact that the driver was charged with having faulty brakes. *Leiken v. Wilson*, 445 A.2d 993 (D.C. 1982).

-- the court stated that it would consider that the police report was a record of an act or event that was made in the regular course of business by the police department at or near the time of the act or event, and that the source of information, and method and time of preparation, were such to justify its admission in evidence, thus eliminating any hearsay objection to the police report but not making admissible any evidence that would be incompetent if offered in person; the court stated that the plaintiff's objection that the police record was the "rankest form of hearsay" was not a valid objection, in that although it might be admitted that the part of the record containing the statement that was read to the jury was hearsay, yet objections to such records as hearsay are not effective if the records have been properly

qualified either by proof or admission under the Uniform Business Records Act, and it is only when specific and legally proper objections are made to parts of the record, on grounds other than hearsay generally, that such parts may be properly excluded. *Thomas v. Wade*, 361 S.W.2d 671 (Mo. 1962).

-- in an action for injuries sustained in a collision between a motor scooter and an automobile, the court held that the lower tribunal had erred in sustaining a general objection to the admissibility of a police accident report under the Uniform Business Records as Evidence Law even though the objection was based, inter alia, on the fact that it contained conclusions of the investigating officer, the court observing that the objecting counsel did not contend that the records were not within the contemplation of the Uniform Law, nor was there objection to admission of the record on the grounds that it was irrelevant, or that the custodian did not testify to its identity and mode of preparation, or that it was not made in the regular course of business; the court emphasized that by holding in the instant case that the police report was improperly excluded, insofar as it might have contained conclusions of the officer, such holding was not intended to mean that a police officer's report that undertakes to diagnose the nature and extent of injuries of a victim of a collision is admissible if a specific objection is made thereto, the court adding that there was no specific objection made in the instant case. *Stegall v. Wilson*, 416 S.W.2d 658 (Mo. Ct. App. 1967).

-- the court held that a diagram that indicated the positions of automobiles that had just been involved in an accident, and that indicated the location and length of skidmarks, such diagram being included in the police report of the accident, was properly admitted as evidence under the Uniform Business Records as Evidence Act (*N.J. Stat. Ann.* 2A:82-35), the court rejecting the claim that the diagram contained in the report was based on the opinion of the officer; as to the position of the cars shown on the diagram, the court felt that it was obvious that they were not placed there by the officer and would not be likely to be understood by the jury to purport to show the exact position of the cars either before or after the collision, but merely to indicate the direction in which they had been proceeding, the court adding that neither of the parties had denied that they were driving in the directions so indicated. *Brown v. Mortimer*, 100 N.J. Super. 395, 242 A.2d 36 (App. Div. 1968).

-- the court held that although an automobile accident report filled out by a deputy sheriff who did not testify at the trial contained the deputy's summary of what the defendant told him at the time of the accident, the police record was properly received in evidence as a business record, the proof satisfying each of the specific conditions imposed upon its admissibility by a statute (*N.Y. C.P.L.R.* 4518(a)) rendering competent a memorandum or record of any occurrence or event if made in the regular course of any business, provided it was the regular course of such business to make it; the court commented that it had been claimed by the defendant that the admission of the report was objectionable on hearsay grounds, but noted that the statement would have been admissible, in any event, as admissions of a party. *Chemical Leaman Tank Lines, Inc. v. Stevens*, 21 A.D.2d 556, 251 N.Y.S.2d 240 (3d Dep't 1964).

-- in a proceeding to stay arbitration of an uninsured motorist claim, the insurer appealed from the lower tribunal's judgment denying its application and directing the parties to proceed to arbitration at the earliest date, and the court, on review, reversed and remanded, the court commenting that the police report, in which the officer had recorded the number assigned to the insurer in the blank for insurance code information, was sufficient to raise a triable issue of fact as to whether the company insured the owner of the offending vehicle; police reports are admissible pursuant to the business records exception to the hearsay rule, and while, ordinarily, any statements by the driver made to the officer and incorporated in the accident report fall within no recognized exception to the hearsay rule and would not be admissible as regards the insurer, under New York law, insurance identification cards are required to be produced upon the request of a police officer, the court adding that since the driver of the offending vehicle was under legal compulsion to produce the insurance identification card and since the card itself was admissible as an exception to the hearsay rule, proof of the card's presentation would render the insurance code entry admissible and would shift the burden on the insurer to come forward with some proof that it either did not insure the presenter or that it had followed the requisite procedure for cancellation. *Eagle Ins. Co. v. Olephant*, 81 A.D.2d 886, 439 N.Y.S.2d 159 (2d Dep't 1981).

-- the court, in an action involving a collision between a bus and bicycle, the statement of a bus driver, who was a

participant in the accident, and his explanation of the incident as reported to a police officer was admissible as a record made in the regular course of business, the court commenting that the bus driver acknowledged that he halted the bus precisely because of a passenger's statement, and, as the driver was a participant in the accident, his explanation of the incident as reported to the police officer was admissible as a business record. *Flynn v. Manhattan and Bronx Surface Transit Operating Authority*, 94 A.D.2d 617, 462 N.Y.S.2d 17 (1st Dep't 1983), order aff'd on other grounds, 61 N.Y.2d 769, 473 N.Y.S.2d 154, 461 N.E.2d 291 (1984).

-- in a case in which a plaintiff was seriously injured in a head-on collision with a stolen car, the court held that the defendant's admission, recorded in a police report, that his motor vehicle was parked in front of his house, unlocked, with his keys in the ignition when it was stolen would be admissible as a police business record to establish negligence, such that the lower tribunal's entry of summary judgment in favor of the defendant was improper; the lower tribunal erroneously concluded that the admission contained in the police report was insufficient to raise the existence of a triable issue of fact concerning where the vehicle was located, for issue finding, and not issue determination, is the function of summary judgment, the court indicated, adding that the defendant's admission, recorded in police business records, was available for the plaintiff's use as evidence-in-chief in establishing negligence, and the relative weight to be accorded the admission in light of his subsequent explanation was properly determined by a jury. *Shea v. Johnson*, 101 A.D.2d 1018, 476 N.Y.S.2d 706 (4th Dep't 1984).

-- in a case in which a bus passenger brought an action against a municipally owned bus company for injuries that resulted from falling on a bus step, the lower tribunal entered judgment on a jury verdict in favor of the bus company, and the court, on review of the passenger's appeal, reversed and remanded, the court holding that statements in the reports of a police officer and bus company dispatcher and the statement contained in a police officer's memo book were within the business records exception to the hearsay rule (*N.Y. C.P.L.R. 4518(a)*); some of the pages of the officer's memo book were marked for identification and read to the jury, and, in addition, the accident report prepared by the officer was admitted into evidence, along with the report of the defendant's dispatcher, reports that were clearly made in the regular course of business and were admissible as a business record. *Bracco v. Mabstoa*, 117 A.D.2d 273, 502 N.Y.S.2d 158 (1st Dep't 1986).

-- in a case in which a plaintiff brought an action for personal injuries sustained as a result of a motor vehicle accident, the plaintiff moved for a declaration that the license plate number as reported by a witness to the accident and contained in the police report would be admissible at trial, and the court, on review, held that the police report containing a statement of an eyewitness to the accident could not be admitted into evidence for its truth under the business records exception, the court commenting, however, that a police report is clearly a business record, as the police officer preparing such report is under a business duty to investigate the subject of the report and memorialize the details thereof; here, the court elaborated, the witness was not under a business duty to impart the information, but the entrant, a police officer, was under a business duty to obtain and record the statement, such that the court, pursuant to *N.Y. C.P.L.R. 4518(a)*, has the discretion to admit the police report to establish that the witness's statement as to the license plate number of the fleeing vehicle was made, the court adding that although another hearsay exception would be required for the police report to be admitted for its truth, here, the citizen's identification of the license plate number as memorialized in the police report qualified as a past recollection recorded, and the license plate number was properly admissible, though the citizen was unwilling or unable to testify at the time of trial, where the citizen observed the accident, the police officer recorded the citizen's statement regarding the license plate within minutes of the accident, and the citizen testified in deposition that the police report was accurate and that he intended the information report to be accurate. *Jones v. Gelineau*, 154 Misc. 2d 930, 587 N.Y.S.2d 99 (Sup 1992).

-- in a pedestrian's action seeking recovery for injuries sustained when struck by an automobile, the court held that a police report of the accident would be admissible in evidence except for that part of the report in which the officer expressed his conclusion that the "operator failed to give pedestrian right of way"; the court felt that insofar as the New York Civil Practice Act (N.Y. Civil Practice Act, § 374-a) permits admissibility of records made in the regular course of business, the law was never intended to expand the ancient shop-book rule, from which it was derived, to such an extent

as to allow in evidence the conclusion or opinion of a police officer, simply because it was included in a report, no matter upon what information it was based, the court thus concluding that the police report, including the officer's report as to what third persons at the scene of the accident had told him, would be admissible in evidence, but that the officer's conclusion as to fault would be deleted. *Skoller v. Short*, 35 N.Y.S.2d 68 (City Ct. 1942).

-- in a case in which a plaintiff, whose car was struck by the defendant's car in an intersection, brought a negligence claim for injuries she sustained in a collision, the lower tribunal entered judgment on a jury verdict finding that, though the defendant was negligent, the plaintiff was contributorily negligent and was not, therefore, entitled to recover any damages, the plaintiff appealed, and the court, on review, affirmed; the court, in so ruling, referenced the testimony of a police officer that he prepared the motor vehicle accident report in the normal course of his employment and that it was standard procedure to do so shortly after investigating an accident. *Fisher v. Thompson*, 50 N.C. App. 724, 275 S.E.2d 507 (1981).

-- in a case in which personal and property damages arising out of a highway collision were sought, the court held that a highway patrol officer's accident reports were admissible as "business records" where, inter alia, the officer stated that he had observed the scene of the accident, had spoken with both drivers, and later prepared his first report as part of the standard protocol of officers, the court adding that pursuant to N.C. Gen. Stat. § 8C-1, Rule 803(6), highway accident reports may be admissible, as a business records exception to the hearsay rule, and, to be admissible, such reports must be authenticated by their writer, prepared at or near the time of the act reported, by or from information transmitted by a person with knowledge of the acts, kept in the course of a regularly conducted business activity, with such being a regular practice of that business activity unless the circumstances surrounding the report indicate a lack of trustworthiness; here, the court indicated, the reports were fully authenticated and a proper foundation laid by the trooper's testimony, the substance of which complied with the business records exception. *Wentz v. Unifi, Inc.*, 89 N.C. App. 33, 365 S.E.2d 198 (1988).

-- in a case in which one driver brought a negligence suit against the estate of a second driver for injuries arising out of an automobile accident, the lower tribunal entered judgment on a jury verdict stating that the first driver was not injured by the negligence of the second driver, and the court, on review of the appeal of the first driver, ordered a new trial, the court holding that the police report of the automobile accident containing statements made at the scene of the accident by the second driver was sufficiently trustworthy to be admissible under the exception to the hearsay rule for business records of a regularly conducted activity (N.C. Gen. Stat. § 8C-1, Rule 803(6)); here, the court related, an officer testified that on the date of the accident, he completed a form based on information received from the two drivers and his own investigation of the accident, he prepared the report during the course and scope of his employment as a police officer and further as a regularly conducted business activity, he reviewed the accident report with the parties at the accident and neither objected to his conclusions, and, subsequent to the accident, the officer filed the report with his immediate supervisor, who in turn filed the report with the records division of the police department, the court adding that the officer's testimony provided proper authentication and tended to show that the report was sufficiently trustworthy and was therefore admissible under the business records exception to the hearsay rule. *Keith v. Polier*, 109 N.C. App. 94, 425 S.E.2d 723 (1993).

-- in a case in which a rear-ended motorist sued the rear-ending motorist to recover for personal injuries sustained in a four-car chain collision, the lower tribunal entered judgment on a jury verdict for the rear-ended motorist, and the court, on review of the rear-ending motorist's appeal, held a state trooper's accident report admissible under the business records exception to the hearsay rule (N.C. Gen. Stat. § 8C-1, Rule 803(6)); even though the report referred to an unidentified motorist who fled the scene, and whom the trooper thus never interviewed, the trooper prepared the report from statements given by drivers at the scene, each of whom possessed firsthand knowledge of the collision and involvement therein of the unidentified motorist, and no driver, including the defendant driver, objected to the narrative contained in the report. *Nunnery v. Baucom*, 135 N.C. App. 556, 521 S.E.2d 479 (1999).

-- in a case in which it was proven at trial that police officers are under an obligation by reason of their employment to

enter in the police blotter the happenings or accidents within their knowledge, and where it was shown that a police blotter did contain a written entry made by a since-deceased policeman regarding a particular automobile accident, and where that entry was dated the same day that the accident to which this suit referred had happened, the court held that said writings were properly admitted into evidence by the trial court; in so holding, the court recognized that it has long been a settled rule of law that a memorandum in writing, made by a person since deceased, which writing was made when the fact it records took place, and was made in the ordinary course of the writer's business, and corroborated by other circumstances, is admissible in evidence. *Medina v White Star Bus Line* (1934) 47 Puerto Rico 532.

-- in a wrongful death action resulting from an automobile-train collision, the court held that the lower tribunal did not commit error by admitting into evidence, on the defendant's motion, a police officer's report of the incident, the report being offered in evidence after the plaintiffs had introduced in evidence a copy of a sketch of the scene prepared by the same officer, which showed the location of a brakeman with a light, and various objects on the ground, and the approximate speed and approximate length of skidmarks of the approaching automobile before it struck the train; in overruling the plaintiffs' points of appeal regarding the admission of this evidence, the court pointed out that it had been qualified in strict accordance with the provisions of the Texas business entry statute (*Tex. Rev. Civ. Stat. Ann. art. 3737e*), the court adding that the plaintiffs were given ample opportunity to object, that they did so, and that the trial court passed on these objections as they arose, no error appearing. *Blakney v. Panhandle & S. F. Ry. Co.*, 381 S.W.2d 143 (*Tex. Civ. App. El Paso 1964*), writ refused n.r.e., (Oct. 28, 1964).

[\*13b] Held inadmissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a police automobile accident report would not be admissible as evidence under the business records exception to the hearsay rule.

An automobile accident report of an investigating officer did not come under the business records exception to the hearsay rule, and was thus not admissible at the time of trial, the court held in *Plenkers v. Chappelle*, 420 So. 2d 41 (*Ala. 1982*). An action was instituted to recover for injuries sustained by the plaintiff when his automobile was struck by the defendant's vehicle while the plaintiff was attempting to secure the hood of his motor vehicle. The lower tribunal entered judgment on verdict for the defendant, and, after the denial of a motion for new trial, the plaintiff appealed; the court, on review, affirmed. At the time of the accident, the plaintiff's automobile was stopped in the wrong lane of a road and the plaintiff was attempting to refasten his hood that had blown off; in his effort to secure the hood, the plaintiff, apparently standing in front of the only working headlight on his vehicle, was injured by the defendant, who claimed that he noticed the plaintiff's peril too late to avoid hitting the plaintiff's car. The plaintiff argued, on appeal, that the lower tribunal's order permitting the cross-examination of a state trooper concerning matters contained in his accident investigation report constituted reversible error. The court held that the automobile accident report of an investigating officer is not admissible into evidence because it does not come under the business records exception to the hearsay rule. The record in the instant case disclosed that the plaintiff's attorney asked the witness several questions regarding a diagram drawn by him and included in his accident report, the same diagram being admitted into evidence at the trial as a plaintiff exhibit. Since the plaintiff initially introduced this portion of the trooper's report, defense counsel was entitled and justified, by virtue of the doctrine of curative admissibility, to cross-examine the trooper about matters relevant to the diagram portion of his accident report. The rule of curative admissibility is applicable even though the defendant failed to object to the plaintiff's initial questioning of the trooper and the introduction of the accident diagram, the court reasoned as it affirmed the judgment of the lower tribunal.

A police accident report would not be admissible as a business record in a personal injury action brought by a bicyclist against a driver arising out of a motor vehicle-bicycle accident, the court held in *Stevens v. Stanford*, 766 So. 2d 849 (*Ala. Civ. App. 1999*), reh'g denied, (Dec. 17, 1999). A minor bicyclist, acting through his mother and next friend, sued a motor vehicle driver, alleging that the driver negligently operated the car that struck the bicyclist; the lower tribunal entered summary judgment for the driver, and the court, on review of the bicyclist's appeal, affirmed. In so ruling, the

court commented that the accident report was inadmissible because neither of the investigating officers was a witness to the accident and their report recounted the statements and conclusions of others. Accident reports are inadmissible only if they violate the hearsay rule, and while such a report may be admitted pursuant to a valid exception, here, the report of the automobile accident did not fall within any exception to the hearsay rule, and was therefore inadmissible.

According to the court in *Baughman v. Collins*, 56 Conn. App. 34, 740 A.2d 491 (1999), certification denied, 252 Conn. 923, 747 A.2d 517 (2000), a motor vehicle accident report containing unredacted hearsay statements made by three individual bystanders would not be admissible as a business record (Conn. Gen. Stat. Ann. § 52-180) in a motorist's personal injury action against a police officer and city arising from an accident with the police vehicle. The court commented that an out-of-court statement that is offered to establish the truth of the matters contained therein is hearsay, and that the business records exception to the hearsay rule provides that not every statement contained in a document qualifying as a business record is necessarily admissible. The court added that to be admissible under the code provision, the contents of a business record must be based on the entrant's own observations or on information transmitted to the entrant by an observer whose business duty it was to transmit it to the entrant. A police report generally is admissible as a business record under the statute, the court instructed, but, to qualify for admission, the report must be based entirely upon the police officer's own observations or upon information provided by an observer with a business duty to transmit such information, such that a report prepared by an officer in charge of an accident investigation is admissible in its entirety, despite the fact that it contains information received from other officers assisting in the investigation, though such a report is not admissible if it contains information furnished by a mere bystander. The court concluded that because the subject police report contained unredacted hearsay statements made by three bystanders, it was not admissible as a business record.

According to the court in *State v. Edgman*, 447 N.E.2d 1091 (Ind. Ct. App. 4th Dist. 1983), the lower tribunal properly refused, in a personal injury action, to make a police report of an automobile accident a full exhibit pursuant to the business records exception to the hearsay rule where the officer who initially prepared the report had died, and where the officer who attempted to introduce the report did not witness the accident and thus had no firsthand knowledge concerning the accident. A plaintiff who was seriously injured in a two-car collision, and whose wife was killed, brought suit against the state for negligent design, construction, and maintenance of a roadway; the lower tribunal entered judgment in favor of the plaintiff, and the court, on review of the state's appeal, affirmed. In so ruling, the court held that the lower tribunal correctly refused to admit a police accident report prepared by an officer who died prior to trial, a report that the state offered during direct examination of an officer who conducted a follow-up investigation at the hospital but was not present at the accident scene. The state requested the entire report be admitted as evidence or, in the alternative, that the officer be permitted to read notations by the author regarding the speed limit at the accident site and other facts, the court pointed out, the state arguing that the report came within the business record exception to the hearsay rule. The court commented that, pursuant to the business records exception to the hearsay rule, documentary evidence is admissible if identified by its entrant or one under whose supervision it is kept and shown to be an original or first permanent entry, made in the routine course of business, at or near the time of the recorded transaction, by one having both a duty to so record and personal knowledge of the transaction represented by the entry. Here, the court related, it was clear that while the author of the report was under a business duty to make such report, he did not personally view the accident, and that any persons who might have had personal knowledge thereof were not reporting within the regular course of business, such that the report was not admissible in its entirety because significant information contained therein was not based on the personal observation of the preparer of the report. That is, the court stressed, the report was not within the business records exception to the hearsay rule. Moreover, the court indicated, the lower tribunal did not err in excluding evidence in the report relating details as to the location of the accident, for this information, unlike notations in the report such as lane markings, was not based on his personal observation, the court adding that the officer's narrative description of the accident represented either statements given to him by witnesses and bystanders or conclusions and opinions he formed from his observation of the position of automobiles on the roadway.

The court in *Kelly v. O'Neil*, 1 Mass. App. Ct. 313, 296 N.E.2d 223 (1973), reversing a judgment for the plaintiff in an

automobile accident case, held that the trial court's admission into evidence of the police accident report constituted error where such report contained a listing of several distinct violations of the motor vehicle code, accompanied by boxes permitting or requiring the officer to check the violations he might attribute to particular operators, and where such violations so listed called for conclusions by the officer, and where the report also contained a verbal description of the accident in which the officer had included statements to the effect that the plaintiff and witnesses had stated that the defendant had put his headlights on after the collision. Noting that two levels of hearsay were involved in this report, the first level being the extra-judicial statements of the officer as to what he himself saw or otherwise observed, the second being the statements made to the officer by other persons during the course of his investigation, the court felt that better-reasoned cases from other jurisdictions hold that the second level of hearsay appearing in a police officer's report is not admissible in evidence under entry statutes (*Mass. Gen. Laws Ann. ch. 233, § 78*; *Mass. Gen. Laws Ann. ch. 90, §§ 26, 2*

*Mass. Gen. Laws Ann. ch. 90, § 29*). With regard to the admissibility of the plaintiff's signed carbon copy of the accident report that the plaintiff herself had filed with the police department pursuant to statutory requirement, the court felt that much of what had been said as to the police report itself would apply with equal force to the plaintiff's report. More immediately, however, stated the court, for any document to be admissible as a business entry, the court must first find, among other things, that the entry was made in the regular course of business and that it was the regular course of such business to make such memorandum or record at the time the act or occurrence occurred, or within a reasonable time thereafter. The court was of the opinion that in no sense could it be found or said that the plaintiff had prepared her accident report in the regular course of any business in which she was engaged, or that it was her regular course to prepare such reports, the fact that the police department maintained such reports on file in the regular course of its business being immaterial.

According to the court in *Webster v. Central Paving Co., 51 Mich. App. 62, 214 N.W.2d 707 (1974)*, an action for damages arising out of an automobile accident, the police accident report, which had been prepared by an officer at the time of the accident who died prior to trial, would not be admitted into evidence under the so-called "business records" exception to the hearsay rule. It appeared from the facts that the accident report in question contained a statement allegedly made by the plaintiff to the deceased officer in which she said that "the last she remembers was that she was passing a blue car." The defendants sought to introduce this statement in the report to impeach plaintiff's testimony at trial where she explicitly recalled all facts up to the time of the accident. Even assuming that the defendants could have shown that the statement made by the plaintiff constituted a party admission or a *res gestae* statement, the court felt that the report would still not be admissible since it was prepared by a now-unavailable witness, and the defendant therefore must show a hearsay exception for the report itself to be admitted into evidence. Although recognizing that in some jurisdictions police records have been held admissible under the "business records" exception to the hearsay rule, the court felt that such could not be the case in Michigan, which has a statute (*Mich. Comp. Laws Ann. § 257.624*) strictly barring statutorily mandated reports from admission into evidence.

The court in *Hamilton v. Missouri Petroleum Products Co., 438 S.W.2d 197 (Mo. 1969)*, an action arising out of injuries sustained in an automobile-truck collision, held that the investigating officer, while on the witness stand, could not read from his police accident report regarding statements made by the defendant immediately following the accident, because, *inter alia*, the police report would not constitute a business record admissible in evidence under the Uniform Business Records as Evidence Law, as enacted in Missouri. Assuming that the police report did meet the qualifications set forth in the statute, to wit, that it was a record of an act, condition, or event made in the regular course of business, at or near the time of the act, condition, or event, the court felt that qualification of the report as a business record would mean that there was not available the objection that the person who prepared the report was not present to be cross-examined. Observing that in the instant case the person preparing the report was available for cross-examination, and that the report was being used to refresh his recollection, the court expressed the view that the "business entry" exception to the hearsay rule would not mean that the contents of the report were admissible in evidence even though they would not have been admissible if the person who prepared the report was testifying as to those matters placed in the report. The court expressed the view that whether the testifying officer placed the defendant's statement in his report

was of no consequence except as a basis of refreshing his recollection. For the purposes of proving the truth of the facts stated, said the court, the officer could not, over the objection of the plaintiff, testify as to what the defendant told him following the accident, and in this regard it was immaterial whether the officer was testifying solely from his recollection or after he had refreshed his recollection by referring to what he had written in the report.

In *Toll v. State*, 32 A.D.2d 47, 299 N.Y.S.2d 589 (3d Dep't 1969), an action for personal injuries arising out of an automobile collision involving a state-owned vehicle, the court, adopting as a workable guide regarding the admission of police officer reports in accident cases the fact that such a report may be admitted as proof of the facts recorded therein if the entrant of those facts was the witness or the person giving the entrant the information was under a business duty to relate the facts to the entrant, stated that if neither of these two requisites is satisfied, but the report recites a statement of an outsider, the record may nevertheless be admitted to prove that the statement recorded therein was made by the outsider, even though the main facts set forth in the business record would be hearsay. The court stated that the facts recited in the statement by the outsider may be proved by the business record if the outsider's statement qualifies as a hearsay exception. In the instant case, the collision not having been witnessed by the officer who filed the accident report, and there being no proof that whoever gave him the facts had a business duty to do so, the report was not admissible to prove the main facts, said the court, and since no other hearsay exception applied to the information from outsiders to the trooper, the trial court's admission of the report was error. The court also stated that since the police report contained the conclusion of the officer as to the factors contributing to the impact and it being impressionable for the officer to testify to his conclusions, his written conclusions should have been excluded if the report had otherwise been acceptable. In this regard, the court explained that the business entry statute lifts the barrier of the hearsay objection, but it does not overcome any other exclusionary rule that might properly be invoked.

The court in *Quint v. Pawtuxet Val. Bus Lines*, 114 R.I. 473, 335 A.2d 328 (1975), held that the trial justice did not err when he refused to make a police accident report a full exhibit under the Rhode Island business record legislation. The defendant's statement, which was taken at the scene, was read in full during plaintiff counsel's direct examination of one of the investigating officers, but the plaintiff's statement, which tended to indicate that defendant's schoolbus shot into the street in front of her, was not admitted because of its hearsay aspects and also because the report contained conclusions of the officer. The court noted that under the Rhode Island business record statute, if the trial judge is satisfied that the writing of a record was made in the regular course of business and that it was the regular business to make the entry at the time of the event, the writing may be admitted into evidence under the exceptions to the hearsay rule, the entrant's or maker's lack of personal knowledge as to events listed in the document going to the weight rather than the admissibility of the record. Of the opinion that a police report can come within the ambit of the statute (*R.I. Gen. Laws 1956, § 9-19-13*), the court stated that while the police department's personnel were in the business of recording statements, the plaintiff was not, and her statement would not come within the reach of the statute even though the report itself did, the problem being essentially one of "double hearsay." The court explained that while the business records exception may serve to justify admitting out-of-court declarations of the entrant, it does not follow that this justifies admitting the statement of someone else because the maker of the record relates it. Thus, the court continued, the majority of courts who have considered the admissibility of the contents of a police report pursuant to a business records statute require that the record be based upon the maker's own observation or upon information transmitted to him by an observer who has the business duty of transmitting such information, and that this record be of such a nature that the person making the report, if called as a witness, could properly testify as to the material it contains. The court concluded under the circumstances of the case that the trial judge could not be faulted in culling the police report, since the business records exception was never intended to make an entire record admissible where oral testimony as to its disputed portions would be inadmissible.

In *Vladyka v. Page*, 135 Vt. 252, 373 A.2d 539 (1977), the court held that admission into evidence of a police officer's report of an automobile accident report in a civil action resulting from the accident was prejudicial error. The administratrix of an estate of an automobile driver brought a civil action as a result of an automobile accident; the lower tribunal denied relief, and the court, on review of the appeal of the administratrix, reversed and remanded. At trial, the court pointed out, a police officer was called to testify during the course of the defendant's case, and, upon direct

examination, his report was offered into evidence as a business record kept in the ordinary course of business, pursuant to *Vt. Stat. Ann. 12 § 1700*, and, on this basis, the trial court admitted the document over the timely objection of counsel for the plaintiff. The court observed that *Vt. Stat. Ann. 12 § 1700*, entitled the "Uniform Business Records as Evidence Act," provides for the admissibility of certain records made in the regular course of business. The court commented that the police accident report did not fall within the ambit of the code provision under inquiry. That is, the court indicated, the business-entry statute was intended to serve as a vehicle for the admission of an investigational report by the police, the court adding that although investigational reports are prepared in the ordinary course of a police officer's duty, they are not an integral part of a larger transaction or business. While the statute makes any writing or record of occurrence or event admissible as evidence of such occurrence or event, the "regular course of business" does not refer to law enforcement. The court pointed out that even in those jurisdictions that allow the admission of police accident reports into evidence as "business records," an exception has been grafted making such records inadmissible where the report contains objectionable hearsay, conclusions, or unsupported opinions. The police report admitted into evidence in the present case was replete with such conclusions and opinion, for included was an indication by the officer that the vehicle driven by the plaintiff "failed to yield the right of way."

See the following additional cases, in which the courts held, under the particular circumstances presented, that all or part of a police automobile accident report would not be admissible as evidence under the business records exception to the hearsay rule, where --

-- in a case in which suit was brought seeking recovery for personal injuries allegedly sustained in an automobile collision, the lower tribunal entered judgment for the defendant, and the court, on review of the plaintiffs' appeal, reversed and remanded, the court commenting that an accident report written by an investigating police officer relating to the collision was not admissible within the "business records" exception to the exclusionary rule, the court explaining that, to be admissible, that portion of the report sought to be introduced must come within the ambit of some other exception to the hearsay rule, and here, the report would be admissible as a "past recollection recorded" exception to the exclusionary rule, where the officer testified that he was not present when the collision occurred and that he did not remember anything of the interview with the defendant, but he did recognize his signature and handwriting on the report, and that he made the recording at the time of his investigation, and at that time he must have known the recording's veracity. *Dennis v. Scarborough*, 360 So. 2d 278 (Ala. 1978).

-- the court held that a "fatality sheet" filled out by an Arizona highway patrolman who had investigated, but did not observe, the fatal automobile accident upon which the action was based, would not be admissible as a "business record" under the provisions of the Uniform Business Records as Evidence Act, as adopted in Arizona (A.C.A. Supp. 1952, § 23-314(a), (b)), where, over the plaintiff's objection, the entire report, which contained statements damaging to the plaintiff's case, was admitted in evidence and read to the jury; reversing a judgment for the defendant, the court held that while the document could be admitted solely for the purpose of impeaching the witness who authored it, there was no basis for admitting the entire document, the court apparently taking the position, however, that the Uniform Business Records as Evidence Act was primarily intended to liberalize and broaden the "shop-book rule" and to enlarge the operation of the business records exception to the hearsay evidence rule. *Welch v. Medlock*, 79 Ariz. 247, 286 P.2d 756 (1955).

-- in an action arising out of an automobile collision, the defendant sought to have admitted as evidence an accident report prepared by a police officer pertaining to the accident in question, but objection was made to the entire report on the grounds that it constituted hearsay evidence, after which the defendant sought to offer the exhibit for the limited purpose of disclosing the alleged legal speed at the place where the accident occurred, which fact had been inserted in the report by the police officer making the investigation, the court concluded that the lower tribunal's admittance of the report constituted prejudicial error, and remanded the case for a new trial, the court stating that it was apparent from the record that the defendant offered the exhibit in evidence under the Uniform Business Records Act, as adopted in Arizona (Ariz. Rev. Stat. § 12-2262); observing that uncontradicted evidence at trial showed that at the time of the accident the defendant was traveling in an area of a municipality in which the legal speed limit was 30 miles per hour,

and noting that in the police report in question the legal speed limit was stated at 35 miles per hour, the court concluded that the statement as to the speed limit contained in the accident report was purely hearsay, and an incorrect conclusion of the officer who prepared the report. *Layne v. Hartung*, 87 Ariz. 88, 348 P.2d 291 (1960) (overruled in part on other grounds by, *Odekirk v. Austin*, 90 Ariz. 97, 366 P.2d 80 (1961)).

-- in a wrongful death action arising out of an automobile accident allegedly caused by malfunctioning traffic-control devices, the plaintiff sought to have admitted as evidence of the fact that the municipality had been made aware of the condition prior to the accident a police report of the accident that contained the statement that the police radio center had received notification of the condition from a certain officer prior to the accident, and that such information had been relayed to the maintenance unit, the court held that the admission of that evidence was error, and affirmed an order granting a new trial, the court reasoning that the source of the information contained in the police report did not appear, and that it could not have been within the personal knowledge of the investigating officer, and that it was therefore hearsay, and not admissible as a business record; the court implied that the report under consideration contained numerous opinions and statements of purported facts that would not have been admissible as oral testimony, there being no business duty on the part of persons who made statements to the reporting officer, and that the extract from the report that was received at bar was therefore essentially hearsay, not admissible under the suggested exceptions to the hearsay rule, or under the *Uniform Act*. *Hoel v. City of Los Angeles*, 136 Cal. App. 2d 295, 288 P.2d 989 (2d Dist. 1955).

-- in a civil action arising out of a chain-reaction automobile collision involving several cars, in which the defendant, the driver of the second car in the chain, sought to have admitted into evidence the investigating officer's affidavit that purported to give evidentiary value to a police report, the court held that the police report itself would not be admissible in evidence under the Uniform Business Records as Evidence Act (*Cal. Civ. Proc. Code § 1953e*), and that in any event the admissibility of police reports is precluded by the terms of the California Vehicle Code (*Cal. Veh. Code § 20012*), the court adding that the proscription cannot be obviated by the simple expedient of an affidavit by the person who prepared the report that everything contained in it is true and correct, and that if he is called as a witness he can testify competently to the facts in said police report; the court noted that the apparent purpose of the affidavit was to show that the plaintiff, the driver of the lead vehicle, made an admission that the defendant's vehicle had come to a complete stop, and that it was only when the defendant's vehicle was hit from behind that it was pushed into the back of the plaintiff's car, the court commenting that such an admission, although not conclusive of the facts stated therein, would constitute affirmative and substantive evidence of such facts, but added that it was incumbent upon the affiant to couch such evidentiary facts in testimonial language indicating that what he was testifying to were matters within his own knowledge and not such as were contained in a police report. *Kramer v. Barnes*, 212 Cal. App. 2d 440, 27 Cal. Rptr. 895 (1st Dist. 1963).

-- in a case in which an action was brought for injuries sustained in a hit-and-run accident, the lower tribunal entered judgment on a jury verdict for the defendants, and the court, on review of the plaintiff's appeal, held that while there was an error committed by the lower tribunal in admitting the statements contained in a police report under the business records exception to the hearsay rule, the error was harmless; it was clear, the court indicated, that statements in the police report by a witness to the motor vehicle accident did not satisfy the requirements of the business records exception, because in order for that to be the case there must be a finding that the person who made the statement had a duty to report it, the court adding that there was no evidence in the instant case tending to show that the unidentified witness belonged to a particular class of persons, much less a class having a duty to report observations of an accident, such that the lower tribunal improperly allowed the statement into evidence under the business record exception to the hearsay rule, though the error in the admission was harmless. *O'Shea v. Mignone*, 35 Conn. App. 828, 647 A.2d 37 (1994), certification denied, 231 Conn. 938, 651 A.2d 263 (1994) and related reference, 1997 WL 331033 (*Conn. Super. Ct.* 1997), judgment aff'd on other grounds, 50 Conn. App. 577, 719 A.2d 1176 (1998), certification denied, 247 Conn. 941, 723 A.2d 319 (1998).

-- a police report containing only isolated notes as to an experimental accident test run would not, the court held, come within the category of either a business record, under the Florida version of the Uniform Business Records as Evidence

Act, or of a "shop book" as contemplated by the Florida Shop Book Rule statute (Fla. Stat. Ann. § 92.37), the court adding that the two police officers who handled the accident in question apparently conducted an independent test of the plaintiff's claim that he was traveling at or under the allowable speed limit, by measuring the skid marks of a car traveling at the speed at which the plaintiff indicated that he was going at the time of the accident; in rejecting the defendant's contention that the evidence was admissible as a business record, the court stated that, even assuming that the police report was admissible under the Florida statute, there was an independent Florida statute, Fla. Stat. Ann. § 92.37, regarding accident reports, which provided that no such report shall be used as evidence in any trial, civil or criminal, arising out of an accident, the court thus concluding that it was reversible error to admit, over objection, the testimony in question as to the speed of the test car. *Smith v. Frisch's Big Boy, Inc.*, 208 So. 2d 310 (Fla. Dist. Ct. App. 2d Dist. 1968).

-- a police record of a call for an ambulance following an automobile collision in which the plaintiff was allegedly injured was held by the court inadmissible as a business record exception to the hearsay rule, the court commenting that the plaintiff had conceded that the police report was hearsay evidence, and expressing the view, without further discussion of the matter, that the plaintiff's specific reference to the business records exception was clearly misplaced; the court felt that even if the report were admissible, nonetheless the failure of the lower tribunal to admit it would not constitute reversible error, in view of the above-stated purpose of the evidence, since the plaintiff successfully introduced considerable testimony regarding the extent of her injuries, the police report simply being cumulative. *Douglas v. Chicago Transit Authority*, 3 Ill. App. 3d 318, 279 N.E.2d 44 (1st Dist. 1972).

-- in an action for personal injuries sustained by a motorcyclist in a collision with an automobile, it was held by the court that the investigating officer should not have been permitted to testify at trial that he had marked on his police report that the plaintiff's speed was too fast, and that the defendant had failed to yield the right of way, since the "business entry" exception to the hearsay rule does not permit the admission of documents that are not "records of acts, conditions or events" that are sought to be proved; in the instant case, the court stated, what was sought were the officer's recorded conclusions, not his recorded observations as to physical conditions, the court further stating that it had been specifically held by Kansas courts that police reports were not admissible to show conclusions of an investigating officer. *Smith v. Hall's Estate*, 215 Kan. 262, 524 P.2d 684 (1974).

-- in a personal injury action arising out of a rear-end automobile collision, the court held that items contained in police accident reports that are within the personal observation of the investigating officer are admissible under the business record statute (Md. Code 1957, art. 35, § 59), but that items based on hearsay and conclusions of the investigating officer are inadmissible; although reversing a judgment for the plaintiff on other grounds, the court noted that in the instant case the plaintiff's counsel on direct examination of the officer confined himself to matters in the accident report that the officer personally observed, there being, therefore, no basis for admitting the entire police report on cross-examination, the court commenting that the admission as evidence of that part of the police accident report based upon the personal observation of the investigating officer would be proper, this including such things as the damage to the automobiles involved, which was observed by the officer. *Honick v. Walden*, 10 Md. App. 714, 272 A.2d 406 (1971).

-- in a case in which a passenger on a bus brought a personal injury suit for damages allegedly resulting from a bus accident, the intermediate appellate tribunal held that the facts presented did not support a finding of negligence, and the state supreme court, on review, affirmed, the court holding that there was no attempt by the plaintiff's counsel to show that the document was made by the witness from personal observation or was prepared contemporaneously with the event and based on his personal knowledge rather than, for example, statements of bystanders or witnesses. *Moncrief v. City of Detroit*, 398 Mich. 181, 247 N.W.2d 783 (1976).

-- that portion of a police accident report that contained a diagram purporting to show the scene and the positions of objects and persons at the scene of the accident was held by the court to have been erroneously admitted as evidence, where it was not made clear as to whether the diagram depicted the scene of the accident as the investigating officer found it, or whether the diagram was made with the assistance of witnesses to the accident; while stating that a police

report, properly qualified, can be admitted into evidence under the business record exception to the hearsay rule, the court took the view that it was not the intention of the Uniform Business Records Act to make admissible any evidence that would be incompetent if offered in person. *Penn v. Hartman*, 525 S.W.2d 773 (Mo. Ct. App. 1975).

-- in an action for wrongful death arising from an automobile collision in which the plaintiffs' daughter was killed when the vehicle in which she was riding was struck from behind, the lower tribunal entered judgment on a jury verdict for the defendant and the court, on review of the plaintiffs' appeal, affirmed, the court holding that a written signed statement of the driver contained in the highway patrol officer's official report was not rendered admissible simply because it was contained in a business record; the court, in so ruling, rejected the plaintiffs' argument that the witness' written signed statement contained in the report of the accident was admissible under the Uniform Business Records as Evidence Law (Mo. Ann. Stat. § 490.660), and that the witness' written signed statement was on a separate sheet of paper attached to the officer's official report and made a part of the report, the court pointing out that the officer's report of the accident met the requirements for admission as a business record, but that did not make all the contents of such report admissible, for the witness statement contained therein, inadmissible as hearsay, did not become admissible because contained in a business record. *Nelson v. Holley*, 623 S.W.2d 604 (Mo. Ct. App. W.D. 1981).

-- the court held in a case brought by a minor pedestrian against the driver of an automobile to recover for personal injuries sustained in a pedestrian-motor vehicle accident, that as it was not demonstrated that purported prior inconsistent statements of the plaintiffs' witnesses were made by them to the person who wrote the police report, or reported to that person by others who had a duty to do so, it was prejudicial error to admit the police report containing those statements into evidence, since the statute (Mo. Ann. Stat. § 490.660) permitting police reports to be admitted into evidence as business records merely eliminated a hearsay objection to the report itself. *Nash v. Sauerberger*, 629 S.W.2d 491 (Mo. Ct. App. E.D. 1981).

-- in a case in which the lower tribunal entered judgment in an action for injuries sustained in an automobile accident, the court, on review, held that a copy of an accident report prepared by officers would not be allowed on the basis of the business record rule, the court commenting that the officer who apparently investigated the accident and reported it on a state uniform accident report form did not testify and that the original accident report was not produced; it was error for any evidence to come in through the plaintiff's exhibit, for nothing in the exhibit itself was admissible under the Uniform Business Records as Evidence Law because, being an errant photocopy of an antecedent record, the exhibit was not made in the regular course of police department "business" nor was it a contemporary of what it purported to record, the court pointed out as it cited *Mo. Ann. Stat. § 490.680. Ellis v. Smith*, 640 S.W.2d 163 (Mo. Ct. App. E.D. 1982).

-- in a case in which a motorist brought a personal injury action against another motorist involved in a motor vehicle accident, the lower tribunal entered judgment in favor of the plaintiff, the defendant appealed, and the court, on review, affirmed, the court rejecting the defendant's argument that the lower tribunal erred in not admitting the Missouri Highway Patrol Report of the accident, the court commenting that it is generally recognized that the business records exception does not make admissible anything contained in the record or report that would not be admissible if testified to by the maker of the record or report, as a result of which the content of a police report that was not the result of the reporting officer's own observations, but was the product of statements made to the officer by third persons, could not be admitted into evidence under the business records exception to the hearsay rule, unless the third party making the statement was under a business duty to do so; pointing out that this rule is applicable in Missouri, the court further rejected the defendant's argument that because the plaintiff introduced the "collision diagram" portion of the report, the lower tribunal should have admitted the report in toto, the court remarking that upon the plaintiff's objection, the lower tribunal properly rejected the defendant's offer that included inadmissible hearsay. *Edgell v. Leighty*, 825 S.W.2d 325 (Mo. Ct. App. S.D. 1992), reh'g and/or transfer denied, (Feb. 27, 1992).

-- in an action arising out of an automobile accident, in which each of the parties claimed that the other had crossed the center line of the highway and was therefore responsible for the accident, the court held that the plaintiff's objection to

the admission into evidence of a police report of the automobile accident should have been sustained, the court commenting that the report contained much of what the investigating officer had orally testified to, including matters that were inadmissible, the defendant's statement to the officer, and a diagram depicting the officer's opinion as to the point of impact; after holding that the report was not admissible as "past recollection recorded," since the officer had sufficient recollection to testify and did testify fully as to everything in the report, the court further stated that in view of what the report contained and the fact that the officer had testified as to what was set forth therein, there would be no substance in the defendant's argument that the report was admissible as a business record. *Rogalsky v. Plymouth Homes, Inc.*, 100 N.J. Super. 501, 242 A.2d 655 (App. Div. 1968), certification denied, 52 N.J. 167, 244 A.2d 298 (1968) and (overruled on other grounds by, *State v. LaBrutto*, 114 N.J. 187, 553 A.2d 335, 81 A.L.R.4th 853 (1989).

-- assuming arguendo that since an investigating officer had practically read his entire accident report into evidence at the trial, his testimony should be evaluated for admissibility as though it were the report that had itself been directly received in evidence, the court held that the accident report would be inadmissible under the business record exception to the hearsay rule, because the witnesses were not under any "business duty" to render a truthful account of the accident to the investigating officer; the court noted that the Supreme Court of New Jersey had been firm in following the general requirement of the business entry exception to the hearsay evidence rule, that where the business entry consists of information supplied the entrant by another, the informant must be shown to have been under a "business duty" to supply honest information to the entrant, that being the heart of the rationale of the exception. *Sas v. Strelecki*, 110 N.J. Super. 14, 264 A.2d 247 (App. Div. 1970).

-- in an action for damages for the wrongful death of a motorcyclist who collided with the defendants' truck, the court held that the investigating officer's police report would not be admissible as evidence since it was not made in the regular course of any business, profession, occupation, or calling, the court adding, in holding the police report inadmissible under the statute (N.Y. Civil Practice Act, § 374-a), that the police officer who made it was not present at the time of the accident, that the memorandum was made from hearsay statements of third persons who happened to be present at the scene of the accident when he arrived, and that it did not appear whether or not these witnesses actually saw the accident and stated to him what they knew, or stated what some other persons had told them; the court felt that the purpose of the legislature in enacting that statute was to permit a writing or record made in the regular course of business to be received in evidence, without the necessity of calling as witnesses all of the persons who had any part in making it, provided the record was made as a part of the duty of the person making it, or on information imparted by persons who were also under a duty to impart such information. *Johnson v. Lutz*, 253 N.Y. 124, 170 N.E. 517 (1930).

-- in an action for personal injuries sustained by a pedestrian wherein the pedestrian claimed that as she was crossing the track in front of a stopped streetcar, the streetcar operator started the car with his head turned away, the defendant claiming that the plaintiff had crossed the tracks in front of the already-moving car and then suddenly jumped back in order to avoid being hit by another vehicle, the court held that it was reversible error to admit in evidence a police blotter containing a report of the investigating police officer who did not see the accident but based his conclusion, "responsibility pedestrian," upon statements made to him by others, including the streetcar operator; the court felt that since the statements to the police officer were not made by any persons in the regular course of any business, to admit the report would be contrary to the intent of the business records provision of the New York Civil Practice Act, the court noting that the statute (N.Y. Civil Practice Act, § 374-a) provided that the trial court must determine whether any particular entry was made in the regular course of any business, the court adding that in the instant case in order to show that this record was inadmissible, it was only necessary to point out that the statements made to the policeman were not made by any persons in the regular course of any business. *Needle v. New York Rys. Corp.*, 227 A.D. 276, 237 N.Y.S. 547 (1st Dep't 1929).

-- in a personal injury action arising out of an automobile accident, the court held that a so-called police blotter, apparently containing information regarding the accident, would not be admitted into evidence where no proper foundation had been laid for its admission, and that for the same reason the police blotter would not be deemed admissible under that section of the New York Civil Practice Act (N.Y. Civil Practice Act, § 374-a) that provided for

the admission of records made in the regular course of business. *Amsden v. Washington Bridge Exp. Lines*, 248 A.D. 645, 287 N.Y.S. 855 (3d Dep't 1936).

-- the court held that it was prejudicial error under the circumstances of the case for the trial court to receive in evidence the accident report filed by the investigating officer regarding an automobile accident that occurred in Vermont, the court commenting that the police officer, a member of a Vermont police force, was never called to testify at the trial, and there was no indication in the report itself save by possible inference as to his source or sources for the information recorded; while recognizing that reports of police officers made upon their own observation and while carrying out their police duties are generally admissible in evidence, the court emphasized that police reports have consistently been held inadmissible to establish the main fact where the information contained in the police blotter came from witnesses not engaged in the police business in the course of which the memorandum was made, or where the person giving the information had every reason to give a biased and false report. *Yeargans v. Yeargans*, 24 A.D.2d 280, 265 N.Y.S.2d 562 (1st Dep't 1965).

-- statements contained in a police accident report to the effect that the plaintiffs in the resulting civil action had failed to stop on a signal and that the defendant driver was not guilty of any contributing violation, constituted conclusions of the investigating officer as to the cause of the accident, which conclusions were prejudicial and which were not admissible as entries made in the regular course of business, the court held; the court noted that the police officer who prepared the report did not actually witness the accident, nor did he recall the accident at the time of trial, the court further noting that there was also a notation on the report as to how the violation was determined, that it was "based on statements of parties and witnesses," but that the report did not state that there were any eyewitnesses to the accident nor that the plaintiff had admitted to the investigating officer that he had failed to stop on a signal or light. *Sinkevich v. Cenkus*, 24 A.D.2d 903, 264 N.Y.S.2d 979 (2d Dep't 1965).

-- in an action for personal injuries arising out of an automobile accident, the court held that a police accident report, which contained statements of one of the parties made to the investigating officer, had been improperly admitted as evidence to establish the main fact, presumably who was at fault; reversing the trial court's ruling that the report was admissible because it was made in connection with police business and such fact was conclusive as to its admissibility, the court stated that police reports are not admissible to establish the main fact where the information contained in the police records are hearsay, the court adding that the defendant's statement contained in the report was exculpatory, it not being an admission against interest, and that the officers who made the report had recorded facts conveyed by the defendant of which they had no personal knowledge, the court observing that one of the vices of police reports is that they appear to the jury as official determinations after an investigation. *Mahon v. Giordano*, 30 A.D.2d 792, 291 N.Y.S.2d 854 (1st Dep't 1968).

-- in a case in which passengers in an automobile involved in a collision with a train brought an action against the owner of the automobile, the driver of the automobile, and the railroad for injuries allegedly sustained, the court held that the lower tribunal's admission into evidence of a police accident report under the business record exception to the hearsay rule (*N.Y. C.P.L.R. 4518(a)*) constituted prejudicial and reversible error, where the report had been prepared by an officer who had not witnessed the accident, the officer testified to having interviewed several witnesses whose names or identities he could not remember except for the engineer and the motorman of the train involved in the accident, the officer was initially certain that he had not interviewed the plaintiffs or defendant but he later testified to having had conversation with the defendant, and the source of the information contained in the report that concluded the cause of the accident to have been the excessive speed of the defendant's car was unclear. *Murray v. Donlan*, 77 A.D.2d 337, 433 N.Y.S.2d 184 (2d Dep't 1980).

-- in a proceeding to stay arbitration, an insured appealed from the judgment of the lower tribunal, which granted a permanent stay of arbitration on the ground that the insured did not establish, as required by his insurance policy, that there had been physical contact between the insured's vehicle and a hit-and-run vehicle, and the court, on review, reversed, the court holding that a police accident report with ambiguous entries was inadmissible to show there had

been physical contact between the insured's vehicle and the hit-and-run vehicle where no proper foundation was laid for the admission of such a report and, in any event, it was inadmissible under the business record rule; since the court, on review, has the power to grant the judgment that upon the evidence should have been granted by the trial court sitting without a jury, the judgment below would be reversed and the proceeding dismissed, the court concluded. *Matter of Utica Mut. Ins. Co.*, 97 A.D.2d 422, 467 N.Y.S.2d 259 (2d Dep't 1983).

-- in an action to recover damages for personal injuries arising from a two-vehicle accident, the court held that reversible error occurred when the lower tribunal admitted into evidence a police report concerning the accident, the report containing statements of the defendant driver concerning, inter alia, her opinion that the plaintiff had caused the accident, the court reasoning that under the particular circumstances presented, no hearsay exception justified the admission into evidence of the defendant's statements through the medium of the police report as a business record; the error in admitting the report, the court opined, that set forth a party's opinion that the cause of the accident was "the motorcycle [driven by the plaintiff] was going too fast," was compounded when the trial court charged the jury that if they found the plaintiff had exceeded the posted speed limit of 40 miles per hour, they could "consider the violation some evidence of negligence on the part of the plaintiff . . . along with the other evidence in the case." *Auer v. Bienstock*, 104 A.D.2d 350, 478 N.Y.S.2d 681 (2d Dep't 1984).

-- the court held that a motor vehicle accident report prepared by a member of the sheriff's department who came upon the scene of the accident approximately 30 minutes after its occurrence was not admissible as a business record where the reporting officer was not a witness to the accident and the person who had relayed the information to the officer was under no business duty to do so; the court rejected the argument that while the document was hearsay, it was admissible as an exception to the hearsay rule under the business records exception (C.P.L.R. 4518), the court stressing that police reports are admissible as business records if the reporting officer witnesses the accident or if the person who relayed the information to the officer was under a business duty to do so; otherwise, the court elaborated, the facts stated in the report may be proved by a business record only if the statement qualifies as a hearsay exception, such as an admission. *Turner v. Spaide*, 108 A.D.2d 1025, 485 N.Y.S.2d 593 (3d Dep't 1985).

-- in a case in which a personal injury action was filed arising out of a motor vehicle hit-and-run accident, the lower tribunal entered judgment on a jury verdict in favor of the plaintiff, and the court, on review of the defendant's appeal, reversed and remanded, the court noting that error occurred when the lower tribunal, over defense counsel's objection, received into evidence a police report, prepared by a civilian employee of the police department who was not at the scene, containing the statement that a witness stated that the "truck was from UPS," the court instructing that not only was the statement hearsay, but it pertained to the ultimate factual issue in the case; the report did not qualify as a business record, for the witness was under no business duty to report the accident to the police, nor did his statement qualify as a declaration against interest or fall under any other exception of the hearsay rule and, the court declared, since the report contained a hearsay statement relevant to the ultimate issue of fact, the admission of the statement contained in the report constituted prejudicial and reversible error, the court adding that generally, the testimony of a witness may not be corroborated or bolstered by evidence of prior consistent statements made before trial since an untrustworthy statement is not made more trustworthy by repetition. *Sansevere v. United Parcel Service, Inc.*, 181 A.D.2d 521, 581 N.Y.S.2d 315 (1st Dep't 1992).

-- holding that no error was committed in sustaining an objection to an offer in evidence of a "Traffic Accident Report" in a personal injury action arising out of a collision between a bus and an automobile, the court took the position that the statute known as the Uniform Business Records as Evidence Act had no application, the court noting that the defendant had urged that the report made by the investigating officer, and filed with police records, was admissible because it was a record of an "act, condition or event," as provided in that statute; the court observed from the record that the police officer did not see the collision occur, and noted that his report, in the main, was based upon what various individuals, including interested parties, told him about the accident, such evidence being pure hearsay, the court stating that, in any event, the defendant was not prejudiced by the exclusion of the report, since the investigating officer did testify about what he observed immediately following the accident. *Snyder v. Portland Traction Co.*, 182 Or. 344, 185 P.2d 563

(1947).

-- a police accident report that had been written up at police headquarters subsequent to the accident by several officers, only one of whom was identified, all of whom arrived on the scene after the accident had occurred, was held by the court not admissible in evidence under the Uniform Business Records as Evidence Act; the court felt that the Uniform Act was not intended to make relevant that which is not relevant, nor to make all business and professional records competent evidence regardless of by whom, in what manner, and for what purpose they are compiled, or offered, the court pointing out that the statute (28 P.S. § 91a) itself conditions the admissibility of such a record upon the court's being of the opinion that the sources of information, and method and time of preparation, were such as to justify its admission, the court concluding that in the present instance, it was clearly erroneous to permit the introduction of this police report into evidence, and remanded the cause for a new trial. *Haas v. Kasnot*, 371 Pa. 580, 92 A.2d 171 (1952).n20

-- in a case in which a moped operator who was injured in a fall brought an action against the owners of the dog that allegedly caused the fall, the court held that a police accident report was not admissible as a business record to prove the manner in which the accident occurred absent showing that the sources of information appearing in the police record were trustworthy; the court commented that the plaintiff failed to demonstrate that the police accident report and the hospital records were admissible as business records to prove the manner in which the accident occurred, for here, the plaintiff did not demonstrate that the source of the information appearing in the police and hospital records were trustworthy. *Liles v. Balmer*, 389 Pa. Super. 451, 567 A.2d 691 (1989), on remand to, 1992 WL 1369476 (Pa. C.P. 1992), order aff'd on other grounds, 439 Pa. Super. 238, 653 A.2d 1237 (1994), reargument denied, (Mar. 1, 1995).

-- in an action arising out of an automobile accident, the defendant sought to have the written report of the police officer who investigated the accident admitted into evidence; upholding the trial court's refusal to admit this report as a business record, the court simply said that in this case the report did not qualify for admission, because it included not only what the officer observed at the scene, but also what the parties told him about how the accident happened. *Mercurio v. Fascitelli*, 116 R.I. 237, 354 A.2d 736 (1976).

-- the court stated that the mere fact that the written statement of a witness to a traffic accident was made part of the highway department's file on the wreck did not make it admissible as a business record exception to the hearsay rule, the court commenting that in order for an exhibit to become admissible as a business record under the appropriate Texas statute (*Tex. Rev. Civ. Stat. Ann. art. 3737e*, § 1(b)), it is necessary that the one offering it lay a proper predicate for its admission by proving the existence of each of the essential elements set out in the statute; reversing a "take nothing" judgment based on a verdict that found both motorists guilty of negligence, the court concluded that the report, which contained statements tending to show that the plaintiff had just passed another car in an unsafe manner, and that such act was a cause of the accident, did not satisfy the requirements of the statute, and should not have been admitted. *Logan v. Grady*, 482 S.W.2d 313 (*Tex. Civ. App. Fort Worth* 1972).

◇

Statements that were part of police investigation of automobile accident were inadmissible under the business records exception to the hearsay rule since they were inadmissible under public records exception. LSA-C.E. art. 803(6), (8)(b)(i). *Sims v. Liberty Mut. Ins. Co.*, 897 So. 2d 834 (*La. Ct. App. 3d Cir.* 2005).

[\*14] Slip-and-fall accident reports

[\*14a] Held admissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a slip-and-fall

accident police report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

According to the court in *Zaulich v. Thompkins Square Holding Co.*, 10 A.D.2d 492, 200 N.Y.S.2d 550 (1st Dep't 1960), a personal injury action arising out of plaintiff's fall from the second-floor landing of a fire escape, a police report of the accident, signed by the investigating officer, was admissible as a record made in the regular course of business. The court felt it unnecessary to decide whether the police officer's own memorandum book was likewise admissible as a business record, since, in any event, both the report and the memorandum book were at least competent evidence to rebut the inference attempted to be created by plaintiff's counsel that the testimony of the patrolman was a recent fabrication. The court noted that while the plaintiff denied attempting such an inference, the record of examination of the officer supported the inference that his testimony was being assailed as a possible recent fabrication, and that under those circumstances, the exclusion from evidence of the police officer's report and memorandum book to bolster the officer's testimony constituted prejudicial error.

Police department reports containing a bystander's report regarding a slip-and-fall victim's actions at the time of her accident would be admissible under the business records exception to the hearsay rule, the court held in *Taft v. New York City Transit Authority*, 193 A.D.2d 503, 597 N.Y.S.2d 374 (1st Dep't 1993). An administratrix of a decedent's estate brought an action for wrongful death of the decedent, who allegedly fell between subway cars and was hanging on as the train left the station. The lower tribunal entered summary judgment in favor of the transit authority, and the court, on review of the appeal of the administratrix, reversed. The court pointed out that a statement of a platform conductor was contained in the police report to the effect that he was approached by an "extremely agitated," unidentified man who told him that approximately one minute earlier, he saw a woman trying to board a train through pantograph gates between cars, and that she slipped and was hanging on as the train left the station. The spontaneous declaration exception applies to statements made by bystanders as well as participants, and the bystander need not be identified as long as the statements are sufficiently corroborated by other evidence, the court remarked. The spontaneous description of events by an unidentified bystander, made substantially contemporaneously with the observation, is admissible under the present sense impression exception to the hearsay rule, if the description is sufficiently corroborated by other evidence, the court continued, and corroboration is necessary to admit the statement under this exception, because it lacks the reliability that a statement made under shock or excitement affords. Here, the court observed, the statement of the declarant, whom the platform conductor described as agitated, gesturing wildly, and as if in a state of shock, provided the reliability lacking in a present sense impression statement. Since the declarant's statement was independently admissible as an exception to the hearsay rule, the reports of the transit authority and the New York City Police Department containing the statement would be admissible as "business records" pursuant to *N.Y. C.P.L.R. 4518(a)*.

[\*14b] Held inadmissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a slip-and-fall accident police report would not be admissible as evidence under the business records exception to the hearsay rule in a civil action.

According to the court in *MacLean v. City and County of San Francisco*, 151 Cal. App. 2d 133, 311 P.2d 158 (1st Dist. 1957), a bus passenger who was injured when she allegedly stepped in some wet mortar while walking from the bus to the curb was not entitled to have admitted as evidence, under the business records exception, a police report that indicated that the woman had slipped on wet mortar and that in fact the fire department had to be called by the police to wash down the street in order "to prevent another reoccurrence of this mishap." While stating that it was the general rule before the adoption of the so-called Model Act, adopted in some states, or the Uniform Act, adopted in California (*Cal. Civ. Proc. Code § 1953e*), that such reports were not admissible, the court expressed the view that it was well settled that the adoption of either of these two statutes did not change the existing rule. The court explained that the reason why such police records are not ordinarily admissible is that they are ordinarily based upon the description of witnesses and

others at the scene of the accident, who are not giving information under a business duty to render reports to the police. In the instant case, stated the court, the excluded report did not disclose on its face whether it was based on the officers' own observations or upon the observations of third parties. The court added that if it was based upon the observations of third parties, the report would have to be excluded, but that even if it was based on the officers' personal observations, its exclusion, even if erroneous, could not have been prejudicial because the officers who prepared it were available as witnesses and, in fact, did testify at the trial, and the report in question was in fact used to refresh their recollections. The court felt that it was evident from the record that the officers' testimony adequately covered the contents of the report.

The court in *Polster v. Griff's of America, Inc.*, 34 Colo. App. 161, 525 P.2d 1179 (1974), an action for personal injuries sustained when the plaintiff slipped and fell on a snow- and ice-covered incline leading to defendant's place of business, where the defendant appealed from an adverse judgment on the basis that the trial court erred in excluding an official police record of an incident involving the plaintiff subsequent to the accident involved in the instant suit, and that such police report was admissible as an official business record for the purpose of impeaching the witness, affirming the judgment for the plaintiff, noted that the plaintiff had objected to the admission of the report on the grounds that it contained hearsay upon hearsay because it contained statements of a third party recorded by a police officer, and because the witness offered by the defendant to identify the report had no personal knowledge of the contents of the report. The court expressed the view that police reports of this nature do not fall within the "business records exception" to the hearsay rule, and furthermore, where such reports contain hearsay, they would be inadmissible in any event.

See *Wolf v. Kaufmann*, 227 A.D. 281, 237 N.Y.S. 550 (1st Dep't 1929), motion granted, 254 N.Y. 598, 173 N.E. 882 (1930), a wrongful death action arising out of the decedent's fall down a flight of stairs on the defendant's premises, in which the court held that the receipt in evidence of a hospital record containing the report of a police officer that was based upon hearsay information obtained by him after the accident was erroneous, for the same reasons set forth in the decision of *Needle v. New York Rys. Corp.*, 227 A.D. 276, 237 N.Y.S. 547 (1st Dep't 1929), § 13[b].

[\*15] Assault and battery reports

[\*15a] Held admissible

The courts in the following cases held, under the particular circumstances presented, that all or part of an assault and battery police report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

In *Taylor v. Centennial Bowl, Inc.*, 65 Cal. 2d 114, 52 Cal. Rptr. 561, 416 P.2d 793 (1966), an action against a proprietor arising out of an assault sustained by plaintiff on the premises, the court held that an officer's testimony, which was based in large part upon police reports of prior incidents on the premises, would be admissible as evidence if the contents were based on the testifying officer's own observations, or the observations of other police officers or public officials whose job it was to know the facts recorded. Reversing a judgment for the defendant on the basis that it was unclear as to whether the testimony was properly excluded, the court pointed out that the hearsay objection to it was not valid if the police reports were admissible under the Uniform Business Records as Evidence Act. The court stated that the problem arose in the instant case because business records are not admissible under an exception to the hearsay rule when they are not based upon the report of an informant having the business duty to observe and report.

A police report indicating that an accident occurred in a case in which an insurer brought a declaratory judgment action seeking a determination of whether coverage existed under two policies for injuries sustained by two men in an assault and battery would come within the business records exception to the hearsay rule statute (Md. Code Ann., Cts. & Jud. Proc. § 10-101(b)), though statements made by witnesses or parties to the accident to the officer would not come within the code provision ( § 15[b]), the court held in *Aetna Cas. & Sur. Co. v. Kuhl*, 296 Md. 446, 463 A.2d 822 (1983). The rationale behind the business records exception is that the writer is under a duty to make a truthful report, the court

remarked, the court instructing that obviously, the making of investigations and the receiving of information concerning crime is usual police business, such that a police record is admissible to prove, for example, that a report of crime was made by a member of the public and when the report was made and received.

[\*15b] Held inadmissible

The courts in the following cases held, under the particular circumstances presented, that all or part of an assault and battery police report would not be admissible as evidence under the business records exception to the hearsay rule in a civil action.

According to the court in *Aetna Cas. & Sur. Co. v. Kuhl*, 296 Md. 446, 463 A.2d 822 (1983), while a police report involving an assault and battery would be admissible to establish that an accident occurred, and the parties involved ( § 15[a]), it would not be admissible to prove the truth of the contents of that report since members of the public, whether targets of investigation, witnesses, or victims, are not under a duty in the nature of a business duty to make an honest and truthful report, the court adding that such "citizen" declarations are virtually universally held to constitute excluded hearsay in respect of otherwise admissible police reports. Here, the court remarked, a party's statement would not come within the statute because it was not a memorandum of the accident such as the statute (Md. Code Ann., Cts. & Jud. Proc. § 10-101(b)) contemplates, but was merely one individual's explanation of his part in the event.

The court in *Lewis v. Merrill*, 228 Or. 541, 365 P.2d 1052 (1961), an action for assault and battery, held that a police report of an earlier burglary upon the plaintiff's premises, in which report it had been written by the investigating officer that the complainant, the plaintiff in the instant action, believed that his ex-wife and her cousin, the defendant in the instant action, were responsible, would not be admissible in evidence under the Oregon version of the Uniform Business Records as Evidence Act (*Or. Rev. Stat. § 41.690*), on the theory that the statement was relevant on the subject of malice and would be admissible for purposes of impeachment. The court expressed the opinion that it was unnecessary to decide whether the Act was applicable to a record of this character, since the exhibit would be inadmissible in any event, because it did not purport to state what the plaintiff said concerning the identity of the burglars, but what the plaintiff "believes." The court observed that had the officer who made the report been on the witness stand, he would not have been permitted to testify to the plaintiff's belief, for that would have been only the conclusion of the witness, and added that if the officer could not so testify himself, the testimony would not acquire admissibility simply because it was included in the officer's report, even were the report as a whole admissible under the "uniform act."

[\*16] Memorandum

The following authority considered, under the particular circumstances presented, whether all or part of a police memorandum report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

According to the court in *Sikora v. Gibbs*, 132 Ohio App. 3d 770, 726 N.E.2d 540, 111 A.L.R. 5th 685 (10th Dist. Franklin County 1999), a memorandum written by a police officer, whose issuance of a citation to the plaintiff gave rise to a malicious prosecution action, would not be admissible in support of a summary judgment motion under the "business records" exception to the hearsay rule. The plaintiff was a member of the community organization "Copwatch," which was formed to monitor police activities; one evening, the plaintiff was observing police procedures when two members of Copwatch were arrested. The two members were placed into a police transport vehicle and transported from the scene; the plaintiff claimed that she began following the police wagon in her vehicle, intending to discover where the volunteers were being taken and then to make arrangements for their release, but, before the police vehicle arrived at its destination, the plaintiff's vehicle was stopped, and the defendant police officer issued a citation to the plaintiff for following near an emergency or safety vehicle traveling in response to an alarm, a citation that was subsequently dismissed at the request of the prosecutor for insufficient evidence. The plaintiff thereafter filed a complaint against the defendant, alleging that the actions of the subject police officer constituted malicious prosecution.

The court held that a memorandum written by the police officer regarding the incident did not fall within the "business records" exception of Ohio Evid. R. 803(6), which provides, inter alia, that a memorandum, report, record, or data compilation, in any form, of acts, events, or conditions, made at or near the time by, or from information transmitted by, a person with knowledge, if kept in the course of a regularly conducted business activity, and if it was the regular practice of that business activity to make the memorandum, report, record, or data compilation, all as shown by the testimony of the custodian, unless the source of information or the method or circumstances of preparation indicate lack of trustworthiness, is admissible. Here, the court indicated, the source of information and the circumstances of preparation indicated a lack of trustworthiness. Given that the source of the information was the accused in the present case, it could not be said that the memorandum was prepared by a person who was independent of the parties and unaware of the importance of the data contained in the memorandum. Reasoning thusly, the court concluded that the memorandum constituted inadmissible hearsay to which no exception applies, such that the lower tribunal improperly relied upon it in determining the motions for summary judgment, as a result of which the plaintiff's third assignment of error would be sustained.

[\*17] "Incident" or "arrest" reports

[\*17a] Held admissible

The following authority held, under the particular circumstances presented, that all or part of a police "incident" or "arrest" report would be admissible as evidence in a civil action under the business records exception to the hearsay rule in a civil action.

In *Rousseau v. West Coast House Movers*, 256 Cal. App. 2d 878, 64 Cal. Rptr. 655 (2d Dist. 1967), a personal injury action arising out of an automobile accident, the court affirmed the trial judge's decision to allow into evidence, at the urging of the defendant, certain police reports made at the time of the plaintiff's prior arrests for drunkenness both before and after the accident in question. Noting that the records were relevant and admissible on two issues: first, to refute the plaintiff's claim that certain physical difficulties were of recent origin and had been caused by an accident that had brought about a change in personality and mode of life; and second, to rebut plaintiff's claim that his motor difficulties subsequent to the accident resulted from traumatic epilepsy, and to prove, instead, that they resulted from excessive use of alcohol, the court observed that the reports in question reflected the direct observations of the arresting officers and hence were admissible as business records under the Uniform Business Records as Evidence Act, which makes admissible the observations of an informant having the business duty to observe and report, which are made in the regular course of business at or near the time of the event, from sources of information that are considered trustworthy.

[\*17b] Held inadmissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a police "incident" or "arrest" report would not be admissible as evidence in a civil action under the business records exception to the hearsay rule in a civil action.

In *Dunaway v. King*, 510 So. 2d 543 (Ala. 1987), the court, in a case in which a shooting victim brought an action against his assailant's father for negligently entrusting a handgun and motor vehicle to the assailant, held that a police incident report containing hearsay statements was properly excluded by the lower tribunal. The court, without detailed discussion, commented that a police incident report has, in the past, been held inadmissible as evidence. Here, the court remarked, the incident report contained the hearsay statements of one individual regarding the circumstances surrounding the victim's death, and did not contain the personal observations of the investigating officer, as a result of which the lower tribunal properly excluded this report.

According to the court in *Ziamba v. City of New Orleans*, 411 So. 2d 697 (La. Ct. App. 4th Cir. 1982), an incident report

would not be admissible in the plaintiff's suit for false arrest where there was no logical basis to believe that in all probability the report was trustworthy. The plaintiff was arrested for the crimes of simple burglary, possession of stolen property, assault of an officer, and resisting arrest; he remained in police custody for 36 hours and, after review of the police report, the district attorney declined to prosecute the plaintiff for any of these offenses. During the trial of the plaintiff's claim of damages for false arrest, the plaintiff testified that he was innocent of these crimes, that he was at another place working offshore in the Gulf of Mexico when the burglary occurred, and that he was never in possession of stolen property; the plaintiff possessed payroll receipts and crewboat logs corroborating his alibi, and the city conceded the arrests for assault of an officer and resisting arrest were without any basis. In an attempt to prove probable cause for the arrest of the plaintiff for burglary and possession of stolen property, the city offered as evidence the police report of the investigating officer. The custodian of the records of the police reports was present and prepared to testify during trial to establish a foundation for the introduction of the report of the burglary and possession of the stolen property, but the police officer subpoenaed for the purpose of showing that the investigating officer was no longer employed by the police department and could not be located did not appear to testify. The trial judge refused to receive the offer of the police report because the investigating officer who prepared the report was not present in court to testify, and the city did not produce witnesses to testify that he could not be found and that he was not otherwise subject to the processes of court. The court held that permanent business records, regularly kept during the operation of a business, have been recognized by Louisiana courts as an exception to the hearsay rule, for they are offered to prove the truth of the matter asserted therein, and it is usually sufficient to show as a basis for their receipt as evidence that certain conditions have been met, the court remarked: they are permanent, regularly kept records; the record was made within a reasonable time after the occurrence of the event; and the information was furnished by one having a business duty to report or record the event in the regular course of business. Here, the court commented, the city failed to meet at least one condition precedent to the admission of the police report by failing to show the officer who prepared the report was genuinely unavailable, the court adding that since the plaintiff's arrest for assault and resisting arrest was conceded to be erroneous, there was no logical basis to believe that in all probability the report was trustworthy, and it was within the trial judge's discretion to refuse to receive it as evidence for that reason alone.

The court in *Willie v. American Cas. Co.*, 547 So. 2d 1075 (La. Ct. App. 1st Cir. 1989), held that police incident reports regarding past crimes at a shopping center were not admissible under the business records exception to the hearsay rule where most, if not all, of the reports were not mental impressions of the authors themselves but rather that of victims or witnesses to the alleged crimes, though, given the particular circumstances presented, the introduction of the reports was harmless error. In the plaintiff's tort action for damages resulting from a gunshot injury following the plaintiff's abduction from a shopping center, the court held that the lower tribunal erred in admitting police incident reports of crimes occurring on the shopping center premises under the business records exception to the hearsay rule, the court pointing out that La. Code of Evidence, art. 802 provides that hearsay is not admissible except as specifically provided within the Code by other legislation, and here, the lower tribunal accepted police incident reports of crimes occurring on the shopping center's premises based on the business records exception. Under the jurisprudence prior to the Code of Evidence, four factors were required of such records to be admissible under this exception, the court instructed: whether the person who made the record is unavailable for testimony, or production of said person would be a needless burden; the writing is the first writing reflecting the transaction; the records are identified at trial by one familiar with the bookkeeping procedure used by the business keeping the records; and the evidence is reliable. While testimony was received, the court indicated, that an officer testified that she collected reports from the department's files reflecting incidents at the shopping center for the two-year period prior to the date of the subject incident, and that such reports were maintained as a normal business practice, and while testimony of the various authors of the reports unquestionably would have been an undue burden, most, if not all, of these reports were not the mental impressions of the authors themselves but rather that of victims or witnesses to the alleged crimes. That is, the court elaborated, the reports contained hearsay within hearsay, the court concluding that the inadmissible hearsay statements in the police reports were no more than a description of the alleged crimes.

An incident report made by the police detailing the circumstances of a police officer's fatal shooting of the decedent would not be admissible in the widow's wrongful death action since the report lacked trustworthiness within the

meaning of the business records exception, the court held in *Solomon v. Shuell*, 435 Mich. 104, 457 N.W.2d 669 (1990). The decedent's widow brought a wrongful death action after her husband was shot by police officers; the lower tribunal entered judgment on a jury verdict for the widow, but found the victim contributorily negligent, the widow appealed, the intermediate appellate tribunal affirmed, and the state supreme court, on review, reversed and remanded. The court noted at the outset that the traditional business records hearsay exception (Mi. R. Rev. M.R.E. 803(6)) is justified on grounds of trustworthiness. Where, however, the court remarked, the source of information or the person preparing the report has a motivation to misrepresent, trustworthiness can no longer be presumed, and the justification for the business records exception no longer holds true. The evolution of the business records hearsay exception clearly indicated that Mi. R. Rev. M.R.E. 803(6) eliminated burdensome common-law restrictions and broadened the scope of the exception, the court related. In order to ensure the same high degree of accuracy and reliability upon which the traditional, but narrowly construed business records exception was founded, the current rules also recognize that trustworthiness is the principal justification giving rise to the exception, the court stated. As such, the court continued, Mi. R. Rev. M.R.E. 803(6) provides that trustworthiness is presumed, subject to rebuttal, when the party offering the evidence establishes the requisite foundation, the court adding that even though proffered evidence may meet the literal requirements of the rule, the presumption of trustworthiness is rebutted where the source of information or the method or circumstances of preparation indicate lack of trustworthiness. Thus, the court pointed out, in cases like the instant matter, upon a party's timely objection, the court must determine as a question of admissibility whether the proffered evidence lacks trustworthiness. Upon the basis of a review of the record, the court concluded that the lower tribunal improperly held that the proffered exhibits did not lack trustworthiness.

The court in *Hewitt v. Grand Trunk Western R. Co.*, 123 Mich. App. 309, 333 N.W.2d 264 (1983), a wrongful death action, held that a police incident report containing a statement of a bystander that the decedent had jumped in front of the train was inadmissible under the business records exception (Mi. R. Rev. M.R.E. 803(6)). A wrongful death action was brought against a railroad; the lower tribunal entered judgment on a verdict in favor of the railroad, the decedent's administratrix appealed, and the court, on review, reversed and remanded. The business records exception to the hearsay rule is justified, the court instructed, on grounds analogous to those underlying other exceptions to the hearsay rule. Unusual reliability is regarded as furnished by the fact that in practice regular entries have a comparatively high degree of accuracy, as compared to other memoranda, because such books and records are customarily checked as to correctness by systematic balance-striking, because the very regularity and continuity of the records is calculated to train the record-keeper in habits of precision, and because in actual experience the entire business of the nation and many other activities constantly function in reliance upon entries of this kind, the court elaborated. The business records exception has validity, the court pointed out, if all participants, including the observer or participant furnishing the information to be recorded, were acting routinely, under a duty of accuracy, with employer reliance on the result, or, in short, in the regular course of business, the court stated, but if the supplier of the information does not act in the regular course, an essential link is broken, and the assurance of accuracy does not extend to the information itself, and the fact that it may be recorded with scrupulous accuracy is of no avail. Here, the court stressed, the report was not admissible as a business record because the primary foundational requirement that the declarants or informants must be acting in the regular course of their business when making the statements was lacking, the court adding that this foundational element is critical as the business records exception is premised on the assumption that the statements of a declarant acting in the regular course of his or her business are inherently trustworthy.

According to the court in *Canty v. New York City Health and Hospitals Corp.*, 158 A.D.2d 271, 550 N.Y.S.2d 673 (1st Dep't 1990), an incident report containing a statement by a plaintiff in his action against a corporation for negligent failure to respond to "911" telephone calls was not admissible under the business records exception to the hearsay rule. The plaintiff brought an action for severe emotional fright and shock alleging that negligence by a city health and hospitals corporation in responding to a "911" call resulted in a premature birth taking place at home rather than at a hospital. The lower tribunal entered judgment on a jury verdict awarding damages; an appeal was taken and the court, on review, affirmed. The verdict in the plaintiff's favor was based on the negligence of the health and hospital corporation in responding to a "911" call concerning the plaintiff, a 21-year-old married woman, who was, at the time, approximately seven months pregnant with her first child, the court pointed out. After the third call, at which time there

had still been no response from the emergency medical service, the plaintiff gave birth, the court continued. The baby was alive, still encased in the amniotic sac, the court pointed out, and an ambulance finally arrived at the plaintiff's apartment approximately 90 minutes after the first "911" call. The jury found the defendant corporation negligent in its emergency treatment of the infant, who, after surviving for 24 hours, died, according to the autopsy report, from respiratory distress syndrome, as well as pulmonary hemorrhage and bleeding in the brain, the court observed. The court rejected the defendant's argument that the lower tribunal committed reversible error in excluding a statement, contained in a police report, allegedly attributed to the plaintiff's husband that his first two phone calls were, not to "911," but to a hospital. The document did not qualify for admission as a business record exception to the hearsay rule, the court instructed, for not only must the entrant be under a business duty to record the event, but the informant, as well, must be under a similar duty to report the occurrence to the entrant. Here, the court related, while the defendant demonstrated that a former police officer, the recorder of the underlying facts, was under a duty to report the incident, the officer conceded at trial that he could not identify the person who furnished the information for the report, such that the source of the information was unknown, and the incident report thus properly excluded as a business record exception to the hearsay rule.

[\*18] Telephone report

[\*18a] Held admissible

The following authority held, under the particular circumstances presented, that all or part of a police telephone report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

According to the court in *Doe v. Gunny's Ltd. Partnership*, 256 Neb. 653, 593 N.W.2d 284 (1999), a computer printout of data showing that the police department received approximately 1,700 telephone calls during a five-year period prior to the sexual assault of a bar patron, requesting that police be dispatched to an eight-block area including and surrounding the building where the subject assault occurred, was admissible under the business records exception to the hearsay rule (Neb. Evid. R. 803(5)) in the patron's negligence action against the building owner. The court held that the lower tribunal erred in barring the admission of the telephone printout, the court noting that the code provision under inquiry provides, in pertinent part, that the following are not excluded by the hearsay rule: a memorandum, report, record, or data compilation, in any form, of acts, events, or conditions, other than opinions or diagnoses, made at or near the time of such acts, events, or conditions, in the course of a regularly conducted activity, if it was the regular course of such activity to make such memorandum, report, record, or data compilation at the time of such act, event, or condition, or within a reasonable time thereafter, as shown by the testimony of the custodian or other qualified witness unless the source of information or method or circumstances of preparation indicate lack of trustworthiness. The circumstances of the making of such memorandum, report, record, or data compilation, including lack of personal knowledge by the entrant or maker, may be shown to affect its weight, the court instructed. The subject document met the criteria of the code provision and, as such, fell within the exception to the hearsay rule, the court stated. In so ruling, the court commented that the custodian of the records testified that all of the calls the police department receives are recorded by the operators and that records of the time, content, and place of dispatch are kept in the regular course of business. That is, the court elaborated, the plaintiff laid the proper foundation to have the exhibit admitted as a business record, and the trial court should have admitted the exhibit.

[\*18b] Held inadmissible

The following authority held, under the particular circumstances presented, that all or part of a police telephone report would not be admissible as evidence under the business records exception to the hearsay rule in a civil action.

In *West End Recreation, Inc. v. Hodge*, 776 S.W.2d 101 (Tenn. Ct. App. 1989), the court held that a police record of a telephone call in which an anonymous caller stated that "another bomb" was about to explode on the premises was not admissible as a "business record," though the erroneous admission of the record by the lower tribunal was not

prejudicial. Bowling alley owners brought a suit against a natural gas utility and heater manufacturer, seeking to recover for an explosion and fire at the bowling alley. The lower tribunal entered a jury verdict for the utility and the manufacturer, and the court, on review, affirmed. In so ruling, the court rejected the plaintiff's argument that the testimony by the unidentified declarant took the report out of the business records exception to the hearsay rule, and its admission into evidence was prejudicial error sufficient to warrant a mistrial. The Uniform Business Records as Evidence Act was enacted to provide a broad exception to the hearsay rule to enable litigants to introduce and use business records without calling the numerous witnesses who were involved in preparing or keeping them. The Act does not render all business records admissible, but instead gives the trial judge the discretion to determine whether the particular record sought to be introduced is sufficiently trustworthy to be admitted, the court instructed. The trustworthiness of a record is determined by considering the source of the information contained in the record as well as the time and the manner in which the record was prepared, the court remarked. In order for the police record to be admissible to prove the truth of the statements contained therein, each statement, standing on its own, must be admissible, the court elaborated. Here, the court indicated, the primary statement in the case, the police record, qualified as a business record under Tenn. Code Ann. § 24-7-111(c) because it was regularly prepared in the course of business at or near the time of the act by a qualified witness. However, the court related, the anonymous caller's statement contained in the police report could be used to prove the truth of what he asserted only if he was acting in the routine of business when he made it or if it qualified under another exception to the hearsay rule, circumstances that did not exist in the instant case. However, the court concluded, since the trial lasted 12 days and other substantial evidence existed to support the jury verdict that was approved by the trial judge, the error in allowing the statement by the lower tribunal did not affect the verdict so as to require the judgment to be set aside.

[\*19] Complaint reports

The following authority considered, under the particular circumstances presented, whether all or part of a police complaint report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

In an action brought by a police officer against a city director for intentional infliction of emotional distress, police reports concerning complaints lodged by the director against the officer were admissible under the business records exception to the hearsay rule, where each report was submitted through its author, who was subject to cross-examination on its contents, and where many of the statements in one report were admissions by the director and thus not hearsay, the court held in *Hess v. Treece*, 286 Ark. 434, 693 S.W.2d 792 (1985). A lawsuit was instituted by a police officer to recover against a city director, the lower tribunal entered judgment awarding the officer compensatory and punitive damages, and the court, on review of the city director's appeal, affirmed. The court rejected the city director's argument that the lower tribunal erred in admitting certain police reports into evidence under the "business records" exception to the hearsay rule (Ark. Unif. R. Evid. 803(6)), including memoranda made by police personnel regarding the case. More specifically, the city director argued that the reports were inadmissible under Ark. Unif. R. Evid. 803(8), which prohibits the introduction of investigative reports by police and other law enforcement personnel, factual findings resulting from special investigation of a particular complaint, case, or incident, or any matter as to which the source of information or other circumstances indicate lack of trustworthiness, the court indicated. Although these reports may not technically have come within the business records exception, the court continued, the lower tribunal has substantial latitude under Ark. Unif. R. Evid. 803(24) to admit evidence that it feels meets the spirit of the rule. Here, the court stressed, in each instance the report was submitted through its author, who was subject to cross examination on its contents, and, in addition, many of the statements in one of the memoranda to which the city director objected were admissions, and were thus not hearsay under Ark. Unif. R. Evid. 801(d)(2), such that it could not be determined that the lower tribunal erred in admitting this evidence.

[\*20] Offense report

[\*20a] Held admissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a police offense report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

In a negligence action brought against a restaurant by a customer who sustained injuries during a robbery on the restaurant premises, the lower tribunal properly admitted into evidence police offense reports concerning earlier robberies at the restaurant under the business records exception to the hearsay rule, the court held in *Lannon v. Taco Bell, Inc.*, 708 P.2d 1370 (Colo. Ct. App. 1985). The plaintiff sued a restaurant, seeking recovery of damages he sustained when, after perceiving a robbery in progress, he turned and ran, thereby startling the robber, who fired at him, striking him in the hand. The lower tribunal entered judgment on a jury verdict in favor of the plaintiff, and the restaurant appealed; the court, on review, held that police offense reports concerning other robberies at the restaurant were admissible pursuant to the business records exception. In so ruling, the court disagreed with the restaurant's contention that the lower tribunal erred in admitting into evidence police offense reports concerning other robberies at the restaurant, and that the police reports were not covered by the business records exception to the hearsay rule set forth in Colo. R. Evid. 803(6). While the question of whether police offense reports fall under the business records hearsay exception had not been specifically addressed in the state, the court remarked, the drafters of *Fed. R. Evid. 803(6)*, which is identical to Colo. Rev. Stat. Ann. § 803(6), contemplated including police reports within the business records exception when the other requirements of the rule are met, as a result of which such offense reports would be admissible in civil cases. The circumstances presented adequately satisfied the requirements of Colo. Rev. Stat. Ann. § 803(6), the court indicated, for the reports were kept in the regular course of police department business, and were made shortly after the robberies from information transmitted by restaurant employees who were present at the robberies. Moreover, the court declared, the subject offense reports did not indicate a lack of trustworthiness, and the reports represented "factual findings" pursuant to an authorized police investigation, such that their admission was proper.

Police offense reports regarding other disturbances at a bar owner's place of business, would, upon proper foundation, be admissible as business records in an injured bar patron's action against a bar owner, the court held in *Sacco v. Carothers*, 257 Neb. 672, 601 N.W.2d 493 (1999). A bar patron who was injured in a fight with a fellow patron, which occurred outside the bar after the bartender instructed patrons that if they did not take it outside, she would call police, brought an action against the bar owner; the lower tribunal entered judgment on a jury verdict for the owner, the court, on the patron's appeal, reversed and remanded. On remand, the lower tribunal entered jury verdict in favor of the bar owner, and the court, on review of the patron's appeal, reversed and remanded for a new trial. The contested police reports, the court noted at the outset, consisted of 30 police reports describing police calls to the area surrounding the subject premises over an approximate three-year period, the court pointing out that more than half of these incidents pertained to fights or disturbances, and the disturbances described on the forms included separating patrons who were "shoving and pushing," removing "drunken" persons from the bar, and breaking up fights in or near the tavern. The court held that the calls to which the police responded were relevant as evidence regarding fights and disturbances in and near the defendant's premises and thus, the foreseeability of fights and disturbances in or outside the tavern related to foreseeability as it pertained to the defendant's duty. The police reports, upon proper foundation, were admissible as business records pursuant to Neb. Evid. R.803(5), and were relevant to the issue of the bar owner's duty to protect the plaintiff from injury from third persons, the court instructed. The police reports were also relevant, the court continued, as they pertained to the breadth of the duty the owner owed patrons, the court adding that because the owner owed the plaintiff a duty of reasonable care in light of the circumstances, the information in the police reports would be useful in defining the scope of the duty owed by the owner by more fully developing the record as to the context in which the duty was to be performed, and would also be relevant as they may have pertained to proximate cause. Given the particular circumstances presented, the court concluded, the police reports were relevant and otherwise admissible, and their exclusion was error since a substantial right of the plaintiff was prejudiced by its exclusion.

[\*20b] Held inadmissible

The following authority held, under the particular circumstances presented, that all or part of a police offense report

would not be admissible as evidence under the business records exception to the hearsay rule in a civil action.

In a negligence action by hotel customers against a hotel owner and others resulting from a theft of jewelry, furs, and other property from their room, the court in *Schear v. Motel Management Corp. of America*, 61 Md. App. 670, 487 A.2d 1240 (1985), held that computer printout offense reports compiled by the police concerning other crimes that had been reported to the police in the vicinity of the hotel would not be admissible under the business records exception to the hearsay rule (Md. Code Ann., Cts. & Jud. Proc. § 10-101(b)). The lower tribunal granted a motion for directed verdict by the hotel manager and entered judgment in favor of the management corporation and hotel owner, and the court, on review of the plaintiff's appeal, affirmed. The court, in so ruling, rejected the argument that the lower tribunal erred in refusing to admit into evidence computer printouts, which were compiled by a county police department, listing crimes that had been reported to and investigated by the police as having occurred at or in the vicinity of the subject hotel, and the assertion that the printouts were relevant to establish that the hotel and its management had knowledge of a high incidence of reported crime at the hotel but failed to take reasonable steps in prevention thereof. The business record exception is contained in Md. Code Ann., Cts. & Jud. Proc. § 10-101(b), the court instructed, which provides that a writing or record made in the regular course of business as a memorandum or record of an act, transaction, occurrence, or event is admissible to prove the act, transaction, occurrence, or event. It is true, the court remarked, that police accident reports are admissible under the business records exception, and summaries or compilations of business records may similarly be admissible. However, the court elaborated, the printouts proposed for admission into evidence were not accident reports, but were merely lists of unverified complaints of crimes made by unidentified individuals. The attempt to characterize the printouts as admissible police reports was based upon the fact that the only crime reports included in the compilation were those in which a police officer investigated the complaint, the court stressed, but since the reported crimes contained in these printouts were not based upon the personal observations of the investigating officer, they constituted hearsay that was inadmissible under the business records exception.

[\*21] Custody report

The following authority considered, under the particular circumstances presented, whether all or part of a police custody report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

According to the court in *Lepire v. Motor Vehicles Division*, 47 Or. App. 67, 613 P.2d 1084 (1980), a police custody report would not be admissible in a proceeding to suspend a driver's license under the business records exception to the hearsay rule (*Or. Rev. Stat. § 41.690*). An appeal was taken from the suspension of the petitioner's driver's license, the lower tribunal entered a directed verdict in favor of the petitioner, and the court, on review, reversed and remanded. Police reports are admissible as "business records" when they satisfy the requirements of *Or. Rev. Stat. § 41.690*, the court commented. Here, an officer of the subject police department, the custodian of documents and reports, testified as to the identity of the report and the mode of its preparation, the officer stating that any time a person is taken to jail, the arresting officer is required by the police department to complete a custody report before the end of his shift and hand it in to be corrected by either the chief or lieutenant, such that the report is prepared as a matter of routine. The custody report offered into evidence in the instant case was not made in the "regular course of business" within the meaning of *Or. Rev. Stat. § 41.690*, the court stressed, for it was not the type of systematic entry subject to regular examination, relied upon because of its customary accuracy, that justifies the business records exception to the hearsay rule. That is, the court elaborated, the custody report undoubtedly functioned in part as a memorandum of the day-to-day activities of the department, but it was the report's utility as an aid in litigation that was the more significant basis for its preparation. Reasoning thusly, the court concluded that the sources of information and the method and time of preparation were not such as to justify the report's admission pursuant to the business records exception to the hearsay rule, as a result of which the custody report was properly excluded by the lower tribunal.

[\*22] Investigative report

[\*22a] Held admissible

The following authority held, under the particular circumstances presented, that all or part of a police investigative report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

According to the court in *U. S. Fire Ins. Co. v. Skatell*, 596 S.W.2d 166 (Tex. Civ. App. Texarkana 1980), writ refused n.r.e., (June 25, 1980), an action to recover under insurance policies for the loss of stolen jewelry, a police report of theft investigation was properly admitted pursuant to the business records exception to the hearsay rule (*Tex. Rev. Civ. Stat. Ann. art. 3737e*). An insured sued to collect benefits under two policies issued by insurers covering jewelry that was stolen from the insured's home; the lower tribunal rendered judgment for the insured, and the court, on review of the insurers' appeals, affirmed. In so ruling, the court rejected the argument that reversible error was committed when the lower tribunal admitted into evidence a police report of the theft investigation, the court noting that, after lengthy objections and arguments, the lower tribunal excluded everything in the police report except the fact that the insured had reported a theft, and those matters that the investigating police officers had personally found and reported in their investigation, the trial judge thereafter carefully instructing the jury and allowing only the admitted portions of the report to be read to the jury. The fact that the insured reported the theft of his jewelry was admissible, not for the truth of the statement, but to show that the insured had made such a report, an operative fact in itself because the credibility of the testimony that a theft had occurred had been attacked, the court remarked, and the other portion of the exhibit, being the report by the investigating officers of what they actually found, as distinguished from what others had said or done, was shown to meet the requirements of the business records act, and was therefore admissible.

<>

Police report concerning search of tenant's apartment, which revealed presence of marijuana, was admissible under business records exception to hearsay rule in city housing authority's summary process action against tenant, which sought possession of rental premises, since report had been prepared by investigating officer and was based on his personal knowledge of events and on information that had been provided to him by officers with business duty to report the information. C.G.S.A. § 52-180. *Housing Authority of the City of Hartford v. Deleon*, 79 Conn. App. 300, 830 A.2d 298 (2003).

[\*22b] Held inadmissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a police investigative report would not be admissible as evidence under the business records exception to the hearsay rule in a civil action.

In *Wallin v. Insurance Co. of North America*, 268 Ark. 847, 596 S.W.2d 716 (Ct. App. 1980), an action by beneficiaries of a life insurance policy and accidental death policy, both of which contained a suicide exclusion clause, and wherein both insurance companies asserted suicide as a defense, the court held that the lower tribunal erred in admitting excerpts of a sheriff's investigative report containing statements of persons as to the mental state of the insured since said excerpts were clearly hearsay and since the report itself was not admissible as a business record under Uniform Rules of Evidence, Rule 803(8). The ruling of the lower tribunal in receiving in evidence the report of the sheriff over the objections of the beneficiaries of the policies required reversal, the court determined, the court rejecting the argument of the insurers that even if the evidence was erroneously admitted, it was merely cumulative and harmless error not requiring reversal. That is, the court explained, the hearsay statement in the report attributed to the decedent's uncle was substantially stronger against the plaintiff's case than other evidence in the record concerning prior hospitalizations for mental disorders and past history of driving-while-intoxicated-type accidents and reckless driving, the court adding that the error in admitting this incompetent evidence was compounded by permitting the hearsay statement by the uncle to be singled out and separately reread to the jury.

In a civil action brought against police officers for assault, assault and battery, false imprisonment, and "negligent denial of medical care," the lower tribunal erred in admitting into evidence a police investigation report that concluded that the defendant officer was justified in using his firearm, the court held in *Julian v. Randazzo*, 380 Mass. 391, 403 N.E.2d 931 (1980), the facts of which are more fully discussed at § 9. The court commented that while police reports may be admissible as business records pursuant to *Mass. Gen. Laws Ann. ch. 233, § 78*, statements in such a report made by bystanders may be inadmissible as "second level" or "totem-pole" hearsay. Moreover, the court continued, there is authority that police reports should ordinarily be excluded when offered by the party at whose instance they were made. While the defendants argued that any error in this respect did not affect the substantial rights of the plaintiff, in view of the discrepancies in the eyewitness testimony, the aura of officialdom inherent in the report, and the fact that it was taken to the jury room during the jury's deliberations, it could not be held that the error was harmless.

[\*23] Presentence report

The following authority considered, under the particular circumstances presented, whether all or part of a police presentence report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

In *Dunaway v. King*, 510 So. 2d 543 (Ala. 1987), the court held that a presentence report was not admissible pursuant to the business records exception to the hearsay rule in a shooting victim's negligent entrustment action. A shooting victim brought an action against the assailant's father for negligently entrusting a handgun and truck to the assailant; the lower tribunal granted summary judgment in favor of the assailant's father, the shooting victim appealed, and the court, on review, affirmed. The court, with respect to a presentence report, which had been prepared by the Alabama Board of Pardons and Paroles, and which was attached by the plaintiff as an exhibit to his brief in opposition to the defendant's motion for summary judgment, held that the report was not admissible under the business records exception to the hearsay rule, because no predicate was laid for its admission as a business record. For a report such as this to be admissible, the proponent of the report must show that it was made in the regular course of business and that it was the regular course of business to make such a report at the time of the event noted or within a reasonable time thereafter (Ala. Rule Civ. Proc. Rule 44(h)). Here, the court stressed, the exhibit was not sufficiently authenticated as a business record.

[\*24] Summary report

The following authority considered, under the particular circumstances presented, whether all or part of a police "summary" report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

Hearsay contained in summary reports submitted by the police department in lieu of actual police reports about a shooting would not come within the business records exception to the hearsay rule (*Cal. Evid. Code § 1280*), the court held in *Gregory v. State Bd. of Control*, 73 Cal. App. 4th 584, 86 Cal. Rptr. 2d 575 (4th Dist. 1999), as modified on denial of reh'g, (July 27, 1999). A claimant filed a petition for writ of mandate and complaint for declaratory relief after the Board of Control denied a request for compensation under the Victims of Crime Restitution Program without obtaining a full crime report from a law enforcement agency; the lower tribunal declared that the Board had a duty to obtain the report and ordered it to approve the claim, and the court, on review, held, inter alia, that summary reports would not be admissible pursuant to the business records exception to the hearsay rule. A claimant under the Victims Program has the burden of establishing by a preponderance of the evidence that, as a direct result of a crime, the victim or derivative victim incurred an injury that resulted in a pecuniary loss, the court indicated and once a derivative victim establishes a prima facie right to benefits, the burden shifts to the Board to prove the victim's contribution to his or her injuries or death justifies nonpayment. It was undisputed that the burden shifted to the Board to prove the victim's conduct contributed to his death, the court pointed out, and the Board relied primarily upon the two in-lieu reports provided by the Department, forms that were prepared 11 and 20 months, respectively, after the victim's death, and

neither of which was completed by the officer preparing the initial police report, and neither form suggesting that the officer completing it was involved in the investigation of the subject victim's killing. Hearsay, the court remarked, is evidence of a statement that was made other than by a witness while testifying at the hearing and that is offered to prove the truth of the matter stated, and here, the Department's in-lieu reports contained multiple hearsay, and did not come within the business records exception to the hearsay rule. Even assuming other criteria were met for the admissibility of the summary reports in the instant case, the court concluded, they were not made at or near the time of the event ( § 7).

[\*25] Laboratory report

The following authority considered, under the particular circumstances presented, whether all or part of a police laboratory report would be admissible as evidence under the business records exception to the hearsay rule in a civil action.

In *New York County Dist. Attorney's Office v. Rodriguez*, 141 Misc. 2d 1050, 536 N.Y.S.2d 933 (City Civ. Ct. 1988), a summary holdover proceeding to evict a drug dealer from property used for illegal drug trade, business, or manufacture, the court held that police laboratory reports concluding that a white substance found outside the apartment was heroin would be admitted pursuant to the business records exception to the hearsay rule. The county district attorney initiated a proceeding based on an allegation that a tenant used his apartment as the headquarters of a large narcotics operation; the court held that evidence established that a particular apartment located in a public housing authority building was the nerve center and headquarters of a large drug operation where drugs were stored and sold, and thus established illegal trade, business, or manufacture warranting eviction of the tenant and her family. The police laboratory analysis reports under inquiry clearly set forth that the entries were made within a reasonable time of the acts recorded, the court remarked, for one report was made on the same day of the test and the other two reports revealed that the reports were made within one to two days of the test. Additionally, the court remarked, the petitioner established a proper foundation for the admission of the police laboratory reports pursuant to the business records exception (*N.Y. C.P.L.R. 4518(a)*), the court stated, through the testimony of a police officer and a police chemist. The rules governing the admission of business records were promulgated to assure the accuracy and trustworthiness of the information contained in the records, the court indicated, and the petitioner met its burden in establishing the accuracy and trustworthiness of the police laboratory reports as required under the code provisions at issue.

[\*B] In Criminal Actions

[\*26] "Incident" or "arrest" reports

[\*26a] Held admissible

In the following cases, police "incident" or "arrest" reports were held admissible by the courts as evidence in criminal actions under the business records exception to the hearsay rule under the particular circumstances presented.

An incident report prepared by a police officer would be admissible pursuant to the business records exception at the time of the defendant's prosecution for receiving stolen property in the second degree, the court held in *Bates v. State*, 574 So. 2d 868 (Ala. Crim. App. 1990). The criminal defendant argued on appeal that the lower tribunal erred in allowing into evidence the Alabama Uniform Incident Report and testimony concerning the identification of the subject stolen property, and the record indicated that a deputy who investigated this case testified extensively concerning the missing items, without objection from the defendant. Thereafter, on redirect examination, the state sought to introduce the incident report into evidence, and the defendant objected to its admission, stating that it could be used to refresh the witness's recollection but should not be admitted because the state had not laid the proper predicate for the business record exception to the hearsay rule. Incident reports made by investigating officers, although generally hearsay, may be introduced if they meet one of the hearsay exceptions, the court commented. In order to lay a proper predicate for the

admission into evidence under the business records exception to the hearsay rule, the following must be established, the court instructed: testimony by any witness, frequently the custodian of the record, that the document now exhibited to the witness is a record of the business; that the witness knows the method, that is, the standard operating procedure, used in the business of making records of the kind now exhibited to the witness; and that it was the regular practice of the business to make records of such kind and to make them at the time of the event recorded or within such specified period thereafter as could be found by the trier of fact to be reasonable. Here, the court stated, a deputy testified that the incident report was a record of police business that is always made in the investigation of an incident, such that a proper predicate was laid. In so ruling, the court rejected the defendant's argument that, even if the report met the business records exception, it should not have been admitted into evidence because it was not the best evidence of the identification of the stolen property, the court explaining that while the defendant submitted that an original handwritten list, which contained the serial numbers of the guns in the victim's family's possession, would have been the best evidence of the missing guns, the record indicated that the list contained the serial numbers of every gun in the family's possession, and did not specify those that were stolen during the burglary, such that the incident report, which did specify and identify the stolen guns, was the best evidence.

The court in *Johnson v. State*, 253 A.2d 206 (Del. 1969), an appeal from a conviction for vehicle larceny, held that the testimony of a police officer to the effect that the defendant was a passenger in the stolen vehicle at the time it was stopped by police could properly be buttressed by the acceptance in evidence of the officer's notebook in which the events that transpired had been recorded. In holding that the trial court did not commit error in permitting the notebook into evidence, the court noted that the admission of the notebook, as a business record, was on safe ground, since the witness had stated that it was kept in connection with the performance of his duty as a police officer, and that the entries were made therein shortly after the vehicle check took place. The court further noted that although the police department is not a "business" in the ordinary sense of the word, it is in the "business" of law enforcement, and the reports and records kept in connection with such enforcement are "business records" within the meaning of the Delaware statute (Del. Code Ann. 10 § 4310) allowing the admission of such records as competent evidence.

According to the court in *Scott v. Nassau County*, 43 Misc. 2d 648, 252 N.Y.S.2d 135 (Sup 1964), an action for false arrest and for personal injuries sustained through the use of excessive force in the making of the arrest, a motion for discovery of any statement made by the arresting officer, including an official report made by the officer to his commanding officer with regard to the arrest, would be granted. While admitting that discovery may be had only of documents admissible in evidence, the court was of the opinion that the report in question would nonetheless be discoverable in litigation not involving a unit of government as a report made in the regular course of business, and because it might reasonably contain admissions by the arresting officer. The court then noted that the only question before it was whether the official nature of the communication was sufficient reason for denying plaintiff the disclosure to which he would otherwise be entitled.

[\*26b] Held inadmissible

The courts in the following cases held that police "incident" or "arrest" reports were inadmissible under the business records exception to the hearsay rule under the circumstances presented.

In *People v. Bazzaure*, 235 Cal. App. 2d 21, 44 Cal. Rptr. 831 (3d Dist. 1965), an appeal from the defendant's conviction of the murder of a prison guard, the court upheld the lower tribunal's order sustaining of the prosecution's objection to the admission, pursuant to the Uniform Business Records as Evidence Act (*Cal. Civ. Proc. Code § 1953e*), into evidence of an "incident" report prepared by an officer. In so ruling, the court stated that the purpose of the offer of this evidence was to impeach certain witnesses of the prosecution, and that it was not stated to the court who the witnesses were nor what statements the report would have impeached. The court added that the relevancy of the report was not pointed out, except as it might have been guessed by the subsequent questioning of the officer who made it. The court also noted that it appeared elsewhere in the record that the report in question was not written until 30 days after the stabbing death of the prison guard.

An incident report should not have been admitted pursuant to the business records exception in a defendant's murder prosecution, the court held in *State v. Milner*, 206 Conn. 512, 539 A.2d 80 (1988), habeas corpus denied, 1998 WL 851441 (Conn. Super. Ct. 1998), judgment aff'd on other grounds, 63 Conn. App. 726, 779 A.2d 156 (2001), but the admission of the report, given the particular circumstances presented, was non-prejudicial. The defendant was convicted in the lower tribunal of murder, the defendant appealed, and the court, on review, affirmed. The defendant argued that the lower tribunal erred in admitting a portion of a detective's incident report indicating that a caller had heard a woman yelling "Help me, Robert, help me," because the state failed to demonstrate that the caller had a business duty to report the information to the police, the court remarked. The court agreed with the argument of the state, which conceded that the lower tribunal erred in admitting that portion of the detective's report, that the defendant failed to demonstrate that the lower tribunal's error resulted in any prejudice, as a result of which he failed to provide any ground for reversing his conviction. To be admissible under the business record exception of *Conn. Gen. Stat. Ann. § 52-180*, the court commented, the business record must be one based upon the entrant's own observations or upon information transmitted to the entrant by an observer whose business duty it was to transmit it to him. Statements obtained from volunteers are not admissible though included in a business record because it is the duty to report in a business context that provides the reliability to justify this hearsay exception, and information in a business record obtained from a person with no duty to report is admissible only if it falls within another hearsay exception, the court related. Given the particular circumstances presented in the instant case, the court pointed out, the lower tribunal erred in admitting the hearsay statements contained in the subject report because the identity of the caller was unknown, thus preventing a determination as to whether it was the caller's business duty to report such information. Where, however, an evidentiary ruling has been found to be erroneous but the error does not implicate a constitutional right of the defendant, the burden rests upon the defendant to establish the harmfulness of the error, the court indicated. Here, the court noted, the inferences that could be drawn from the report were numerous, particularly in light of the various accounts of what the victim allegedly screamed at five o'clock that morning. The detective's report, which the defendant had admitted as an exhibit, indicated that an anonymous male caller heard a woman scream "Robert, no, no, Robert, no no," the detective also testified that other phone calls were received from people who stated they heard the victim scream "no, robber, no, robber," and numerous other witnesses testified they heard screams only and no specific words. Thus, the court reasoned, the erroneous admission of the detective's one-page incident report was harmless error.

According to the court in *State v. Masse*, 1 Conn. Cir. Ct. 381, 24 Conn. Supp. 45, 186 A.2d 553 (App. Div. 1962), a physician's report as to the sobriety of the defendant in a drunkenness prosecution, which report was made part of a police report regarding the defendant's arrest, was inadmissible under the "business entry" statute (*Conn. Gen. Stat. Ann. § 52-180*) to show the guilt of the accused. The evidence indicated that the examining physician had filled out the report and signed it, and it was then returned to the police department by the attending officer. While noting that police reports may be introduced in evidence if they are made in the regular course of police business, if it is the regular course of business to make them, and if the report is made at or near the time of the act, transaction, or event, the court nevertheless noted that statements of volunteers and of those outside the police department, who are under no duty to make observations or record them as members of the police organization, even though such statements are made part of the police records or reports, are treated as hearsay, and do not come under the exception provided by the statute. The court noted that there was no evidence that the physician in question was a member of the police department or under any duty to the department to make the report that was admitted in evidence, and that the fact that his observations and opinions were expressed on a mimeographed form of the police department did not make it a record or report of that department. Holding that the trial court erred in admitting the report into evidence, the court concluded that the record was no more and no less than a statement of the physician's own observations and opinions, made in the course of his own medical practice, and added that even if the report had been offered as a medical record made by the physician, there was no evidence under which it would have qualified as such under the statute or any other pertinent exceptions to the hearsay rule.

In *Brown v. State*, 274 Ga. 31, 549 S.E.2d 107 (2001), on remand to, 251 Ga. App. 80, 553 S.E.2d 386 (2001), the court held that the narrative portion of a police incident report would not be admissible under the business records hearsay

exception (*Ga. Code Ann. § 24-3-14*) in the defendant's criminal prosecution. The defendant was convicted in the lower tribunal of possession of cocaine with intent to distribute, the intermediate appellate tribunal affirmed, and the state supreme court, on review of the defendant's appeal, reversed. While the narrative portion of a police report may meet the technical requirements of the statute, it does not have the reliability inherent in other documents that courts have traditionally considered to be business records, such that the narratives contained in police reports generated in connection with police investigations are not the appropriate subject of an exception to the hearsay rule, the court instructed. The court determined that the evidence contained in the subject police report narrative were not facts that should properly be admitted under the business records exception to the hearsay rule, the court adding that the lower tribunal erred when it allowed a police officer to read into evidence the narrative portion of a police report of which he had no personal knowledge and did not prepare, and the Court of Appeals erred in affirming that ruling. The court reasoned that were it to conclude that the police report narrative in the subject case were admissible, serious public policy implications would result. That is, the court related, an alteration in the administration of the system of criminal prosecutions might result. Since almost all prosecutions are based on incidents in which witness statements are taken and those, along with police officers' statements, are made part of some police agency's reporting system, it is reasonable to expect that in the future it might be the rare case in which the witnesses actually come to court and testify, the court continued. Such a practice would run afoul of the accused's rights to confrontation mandated under the federal constitution, the court elaborated, the court pointing out that out-of-court statements that fall within a firmly rooted hearsay exception are deemed to satisfy the constitutional requirement of reliability usually provided by a witness's oath-taking and subjection to cross-examination because such an exception is the result of judicial and legislative experience assessing the trustworthiness of that type of out-of-court statement. Reasoning thusly, the court concluded that the intermediate appellate tribunal erred in upholding the lower tribunal's ruling permitting the officer's reading of the police report narrative into evidence for purposes of demonstrating a similar transaction and in considering the similar transaction in determining the sufficiency of the evidence supporting the appellant's conviction.

The court in *Cranwill v. Donahue*, 132 Ill. App. 3d 873, 87 Ill. Dec. 883, 478 N.E.2d 22 (3d Dist. 1985), held that a deputy sheriff's arrest report was not admissible as a business record, such that admitting the report at the time of trial was reversible error. The plaintiff was arrested by two police officers and charged with driving under the influence of alcohol; the plaintiff was taken to the sheriff's office and given two Breathalyzer tests, which he passed, though the sheriff's department nonetheless issued an arrest citation and the plaintiff had to post bond. After remand, the lower tribunal entered judgment on a jury verdict in favor of the sheriff and deputy in the plaintiff arrestee's action alleging false arrest, false imprisonment, and other claims, and the plaintiff appealed; the court, on review, held that the deputy sheriff's arrest report was inadmissible on hearsay grounds, and the error in admitting the report, which found its way into jury room, was prejudicial. Illinois courts have generally held that a police report is not admissible in corroboration of a witness' testimony, and that the mere attempt to introduce such an exhibit may be considered reversible error, the theory behind this line of cases being that police reports are in the nature of hearsay or state conclusions, the court noted at the outset. Not all errors committed at trial, however, constitute grounds for reversal, the court continued, for only those errors that are prejudicial to the rights of the complaining party are reversible. In the present case, the defendants' first brought up the existence of the arrest report in their opening statement, and they next brought the police report to light during the examination of a sheriff, who the plaintiff had called as an adverse witness, the court observed. Subsequently, during their case-in-chief, the defendants were successful in placing the police report in evidence as a business record, but the lower tribunal reversed itself and disallowed admittance of the report, the court elaborated. The plaintiff raised objections throughout the trial concerning the defendants' use of the report and many of the arguments made by the adverse parties concerning the report were made in the presence of the jury, and these circumstances, coupled with the undisputed fact that the police report found its way into the jury room, were enough to show prejudice to the plaintiff's case-in-chief, the court stressed.

A police incident report, which indicated that an unidentified individual approached a police officer with details regarding the victim's death as possibly related to another murder committed by someone else, was inadmissible under the business records exception to the hearsay rule, Ky. Rules of Evidence, Rule 803(6), particularly since statements reflected in the report did not qualify for admission under any other recognized exception to the hearsay rule, the court

held in *Manning v. Com.*, 23 S.W.3d 610 (Ky. 2000), reh'g denied, (Aug. 24, 2000). The defendant was convicted in the lower tribunal of first-degree manslaughter, and the court, on review of the defendant's appeal, affirmed. In so ruling, the court rejected the defendant's argument that the lower tribunal erred by denying admission of an officer's police report that contained information regarding a female who approached the officer regarding the victim's death, the court pointing out that the defendant's defense was that the death of the victim was related to the death of a third party, who was murdered the next day, such that the defendant sought access to the police report, as well as the investigative file on an individual who had entered a guilty plea to the murder of the third party. This report, the court related, was not admissible under the business records exception to the hearsay rule, the court observing that the code provision allows for the possibility that police reports might be admissible under the business records exception. However, the court continued, if a report is admissible pursuant to Ky. Rules of Evidence, Rule 803(6), then all parts of the report must be admissible under some hearsay exception. If a particular entry in the record would be inadmissible for another reason, it does not become admissible just because it is included in a business record, the court indicated, and hearsay within hearsay is inadmissible unless each part of the combined statements conforms with a recognized exception to the hearsay rule, the court declared. Consequently, anything in the police report regarding what an unidentified female may have told the officer, or what anyone else may have said, would be inadmissible, as these statements did not qualify for admission under any other hearsay exception, the court stated, and the defendant was not prejudiced by the lower tribunal's ruling since the bulk of the report was inadmissible.

The court in *State v. Gremillion*, 542 So. 2d 1074 (La. 1989), reh'g denied, (June 2, 1989), held, without detailed discussion, in a case in which the defendant was convicted of manslaughter, that a victim's statement to the police that three men had attacked him was not admissible under the business records exception to the hearsay rule at the time of trial, despite the fact that the statement had been recorded by the deputy in the course of his employment as a police officer.

A police incident report prepared by one police officer that included statements made to him by another police officer regarding fingerprints that had been lifted at the scene of a robbery was inadmissible in evidence under the business records exception to the hearsay rule (Mass. Gen. Laws Ann. ch. 278, §§ 33A to 33G), the court held in *Com. v. Alves*, 6 Mass. App. Ct. 572, 380 N.E.2d 701 (1978). The court, affirming the defendant's conviction of armed robbery, rejected the defendant's assignment as error the trial judge's exclusion at the time of trial a police report on the robbery in which were recorded certain statements that could be viewed as indicating that fingerprints, which were not identifiable as belonging to the defendant, had been lifted by another officer at the scene of the robbery. The defendant more specifically contended that the trial judge's exclusion of the report and the judge's limitation of counsel's questioning of the testifying officer with regard to the report prevented him from fully developing a potential defense based on mistaken identification, the court pointed out. However, the court explained, the portion of the report that the defendant sought to introduce appeared to have consisted of the testifying officer's extra-judicial recording of that which had been stated to him by the officer at the scene of the robbery, the court adding that the defendant's contention that this second-level hearsay was admissible under either the business records or the official written statements exception to the hearsay rule was erroneous.

The lower tribunal properly refused to allow a theft defendant to introduce as a business record a police report allegedly containing exculpatory statements made by the defendant to the witness, where the witness' statements to the reporting officer were inadmissible hearsay, the court held in *State v. Vance*, 633 S.W.2d 442 (Mo. Ct. App. W.D. 1982). The defendant was convicted of attempting to steal a parked refrigerator trailer unit by trying to hitch the unit to a tractor unit, and the court, on review of the defendant's appeal, affirmed. While qualification as a business record under *Mo. Ann. Stat. § 490.680* offsets the objection that the person who prepared the report is not present for cross-examination, the code provision does not make all records competent evidence regardless of by whom, in what manner, or for what purpose they were compiled or offered, the court noted at the outset. Qualification under the act does not make admissible any evidence that would be incompetent if offered in person, the court declared. If the content of the record could not have been testified to by the reporter had he or she been offered as a witness present in court, then that content will not be admitted into evidence as a part of a business record, the court indicated. Here, the court elaborated, the

report contained statements made by a witness to an officer based upon the witness's observations and, as such, was hearsay and not admissible under any exception to the hearsay rule. As the trial judge noted, the court stressed, if the officer had been present to testify, he could not have testified as to what the witness had told him. The court pointed out that the witness's statement failed to corroborate the defendant's assertion that he had an honest belief that he had a right to hook up the trailer, the court adding that evidence is relevant if it logically tends to prove or disprove a fact in issue or to corroborate evidence that itself is relevant and bears on the principal issue. Here, the court noted, the witness's statement would corroborate the defendant's testimony that a certain vehicle was present at the scene on the night of the offense, but did not support the defendant's claim that he was deceived by the vehicle's owner into believing that the vehicle owner owned the trailer.

The trial court properly refused to admit two highway patrol incident reports as business records in a prosecution for assault, where the documents were apparently prepared by state highway patrol personnel and sent to a sheriff's office, although a deputy sheriff was not able to testify as to, inter alia, the mode of preparation of documents, the court held in *State v. Luleff*, 781 S.W.2d 199 (Mo. Ct. App. E.D. 1989). The defendant was convicted of second-degree assault and armed criminal action by the lower tribunal, and the court, on review of the defendant's appeal, affirmed. The defendant contended that the lower tribunal erred in refusing to admit the contested exhibits as business records of the county sheriff's office pursuant to *Mo. Ann. Stat. § 490.680*. In order to qualify under the contested code provision, the court instructed, a custodian or other qualified witness must testify to the record's identity, the mode of its preparation, and the fact that it was made in the regular course of business, at or near the time of the act, condition, or event. Here, the court continued, the defendant attempted to qualify the exhibits through the testimony of a deputy sheriff, rather than a custodian or other qualified witness from the patrol, but the deputy was not able to testify as to the mode of preparation of the exhibits, or that they were made in the regular course of business, at or near the time shown on the exhibits. Absent such a showing, the lower tribunal did not err or abuse its discretion in refusing to admit the exhibits, the court concluded.

The court in *Miranda v. State*, 101 Nev. 562, 707 P.2d 1121 (1985), held that an incident report containing a witness's statement would not be admissible at the time of the defendant's criminal trial. The defendant was convicted of first-degree murder with use of a deadly weapon, robbery with use of a deadly weapon, and grand larceny, and the court, on review of the defendant's appeal, affirmed. At trial and again on appeal, the defendant asserted that the lower tribunal should have admitted the transcribed statements under the "business records" exception to the hearsay rule contained in *Nev. Rev. Stat. § 51.135(1)*, the court pointed out. The business records exception to the hearsay rule generally permits a party to introduce into evidence reports made during the regularly conducted course of business, such that the police report itself, which was made when the witness gave his statement to police, would have been admissible as substantive evidence to demonstrate such things as the date on which the report was made or the fact that the statement was actually taken, the court declared. However, the court continued, the business records exception does not itself permit a party to introduce into evidence the actual contents of an out-of-court statement given to police by a witness to a crime concerning the events of the crime itself. Any statement given by a witness to a police officer is itself hearsay and must itself be independently admissible under a separate and distinct exception to the hearsay rule, the court indicated.

\*\*\*\* Comment:

The court stressed that although the defendant failed to make this argument either at trial or in his briefs on appeal, to the extent that the defendant's out-of-court statements to the police were inconsistent with his trial testimony, they were independently admissible as substantive evidence under *Nev. Rev. Stat. § 51.135(1)*, the statutory exception to the hearsay rule that permits the introduction of prior inconsistent statements made by a testifying witness. Accordingly, the lower tribunal should have admitted any transcribed statements made by the witness that were inconsistent with his trial testimony, the court pointed out, but the defendant was not prejudiced by this error. That is, the court explained, the prior inconsistent statements given by the witness would not have served to exculpate the defendant, but instead, the inconsistencies in question pertained primarily to the sequence of events surrounding the commission of the offense,

such that, at best, the defendant might have used the inconsistent statements to impeach the witness's overall credibility as a witness. The defendant, however, the court explained, was given a full opportunity to accomplish this at his trial, when the lower tribunal permitted him to extensively cross-examine the witness concerning his prior inconsistent statements.

In *State v. Morrell*, 803 P.2d 292 (Utah Ct. App. 1990), the court, without detailed discussion, held that a police incident report referred to by a police officer in a criminal defendant's robbery prosecution was not admissible pursuant to the business records exception (Utah Rules. Of Evid. 803(6)), the court adding that police reports are not eligible for admission under the rule except in certain limited circumstances not applicable in the instant case.

According to the court in *Hooker v. Com.*, 14 Va. App. 454, 418 S.E.2d 343 (1992), an incident report would not be admissible as a business record in the defendant's prosecution for petit larceny. Appealing from a conviction for a third offense of petit larceny, the defendant asserted that certain testimony should not have been admitted because it was hearsay, while the commonwealth asserted that the testimony was admissible under the business records exception to the hearsay rule, but that if it was not admissible, its admission was harmless. The court, concluding that a proper foundation for the admission of the testimony was not laid and that although part of the testimony was harmless, the remainder of it was not harmless, reversed. The subject offense arose from the theft of merchandise, and three employees of a store testified that they saw the defendant take merchandise from the store without paying for it, the court pointed out, and, in addition, copies of two judgments of conviction, establishing that a person named James Lee Hooker had previously been convicted of petit larceny, were introduced into evidence. The commonwealth attempted, through a detective's testimony, to link the instant defendant with the James Lee Hooker previously convicted of petit larceny, the court observed, the court commenting that the detective, who had investigated the incident, testified that the name of the person who had stolen the merchandise had been given to him by the store's security guard and that the name on the police report was given as a "James Lee Hooker." The detective also testified that he used this name to search the police department's computer database and retrieve information indicating that a person named James Lee Hooker previously had been convicted of two prior offenses of petit larceny. The business records exception allows introduction into evidence of regular business entries of persons, other than the parties, where the entrant is unavailable to testify at trial and where the trustworthiness of the entries are established by showing the regularity of preparation of the records and the fact that they are relied upon in the transaction of business by those for whom they are kept, the court instructed. In the instant case, the court continued, no foundation was laid for admitting either the incident report or the computer information under the business records exception to the hearsay rule, for no evidence of the regularity of the preparation of the report or the computer data was presented. No evidence showed the extent to which either was relied upon in the transaction of business by those for whom these records were kept. Without a proper foundation for their admissibility, neither the report nor the computer information was admissible into evidence as an exception to the hearsay rule, the court determined.

[\*27] Speedometer, Breathalyzer, and other test reports

[\*27a] Held admissible

The courts in the following cases held that police test reports of the accuracy of police car speedometers, and police-operated Breathalyzer machines, and other tests, would be admissible as evidence under the business records exception to the hearsay rule.

According to the court in *McLaughlin v. City of Homewood*, 548 So. 2d 580 (Ala. Crim. App. 1988), a driving under the influence prosecution, a police report containing results of a driver's blood alcohol test would be admissible pursuant to the business records exception to the hearsay rule. The defendant appealed his municipal court conviction for driving under the influence of alcohol, the lower tribunal affirmed, and the court, on review of the defendant's appeal, affirmed. In so ruling, the court rejected the defendant's argument that the prosecutor failed to prove the proper predicate for the results of his blood alcohol test, the defendant specifically asserting that a log, which contained information concerning

the inspection of the machine by a sergeant of the State Troopers office and also contained the defendant's test results, was improperly admitted into evidence under the business records exception to the hearsay rule. The court pointed out that during the testimony of an officer of the police department, the officer responded that the log was kept in the ordinary course of business of the police department, and that he was one of the custodians of the log. The defendant argued that because the officer was not the sole custodian of this log, the police report containing the laboratory results was not properly admitted under the business records exception to the hearsay rule, the court elaborated. There is no requirement that every custodian of the log must testify before it can be admitted into evidence, the court concluded.

The record of a police car speedometer calibration test was admissible in the defendant's speeding prosecution as a "business record," the court held in *People v. Stribel*, 199 Colo. 377, 609 P.2d 113 (1980). The defendant was charged with speeding, and a police officer testified that the posted speed limit was 30 miles per hour and that the speedometer on his patrol car read 48 miles per hour as he followed the defendant at a uniform distance and speed. A comparison of the speedometer reading with the calibration card for the patrol car showed that the speed of the patrol car actually was 46 miles per hour. At the time of trial, a parking control officer testified that he saw a mechanic take calibration readings for the patrol car and note them on a calibration card, he signed the card and gave it to the officer, who countersigned, and that the officer kept the original card in a locked filing cabinet and put a copy in the patrol car. Based upon the control officer's testimony, the city offered in evidence the record of the calibration test to prove the accuracy of the police officer's determination of the defendant's speed. The defendant objected, arguing that the admission of the record was hearsay, and as such, it should be excluded from evidence because of the lack of opportunity for the defendant to test, by cross-examination, the accuracy of the calibration test. The objection was overruled by the municipal court, but the district court held that the test was not admissible under either the business records exception or the official governmental records exception to the hearsay rule. The city argued that the record was admissible under the business records exceptions to the hearsay rule. The business records exception, Colo. Crim. P. 26.2, the court pointed out, provides that any writing or record, if made in the regular course of any business, may be admissible, even if it would ordinarily be excluded as hearsay in a criminal case. While it is true, the court indicated, that police records are held inadmissible for failure to comply with the business records exception because the records are "accident reports," calibration tests are performed routinely by police departments. There is no dispute here that the tests were performed in the ordinary course of business, for their primary use is in speeding prosecutions to validate the police officer's speedometer and support his or her testimony, but the records of the speedometer calibrations are not prepared and kept for the purpose of proving in court that any particular defendant was speeding, the court remarked.

See *Payne v. State*, 232 Ga. App. 591, 502 S.E.2d 526 (1998) (overruled on other grounds by, *Baker v. State*, 252 Ga. App. 695, 556 S.E.2d 892 (2001)), where the court held that the state laid the proper foundation for certificates of inspection of a breath-testing machine, such that the certificates were admissible as business records. The defendant was convicted in the lower tribunal of driving under the influence of alcohol to the extent that it is less safe to drive and driving with an alcohol concentration of 0.10 grams or more, and the court, on review of the defendant's appeal, affirmed. The court rejected the defendant's argument that the admission of the certificates violated his rights under the confrontation clause. The court pointed out that not only had the certificates been prepared in the regular course of business ( § 5), but a testifying witness was familiar with the methods by which such records are kept. Moreover, the court remarked, the certificates of inspection were prepared on the dates the inspections were conducted, such that the defendant's argument that the state did not lay a proper foundation for admission of the certificates as business records pursuant to *Ga. Code Ann. § 24-3-14* was unpersuasive.

The court in *State v. Ing*, 53 Haw. 466, 497 P.2d 575 (1972), a prosecution for speeding in which the question was raised as to the admissibility in evidence under the hearsay rule of a speed-test card certifying the accuracy of the speedometer of the police vehicle that was used to clock the defendant's speed, after noting that the defendant at trial failed to adduce evidence bringing into issue the accuracy of the speedometer of the arresting officer's vehicle, and that the defendant further failed to question the date of the speed-test card or the frequency of the speed tests of the speedometer in question, pointed out that the problem of offering into evidence the speed-test card could be readily resolved by the reasoning that since regular tests are made and the records of those tests kept by the city and county, or

the police department, the card could be introduced as an ordinary business entry of evidence of such record indicating the routine testing of speedometers.

A police report of a chemical analysis performed by a state chemist was admissible in a prosecution for delivery of cocaine under the business records exception to the rule against hearsay (S.H.A. ch. 38, § 115-5(a)), the court held in *People v. Tsombanidis*, 235 Ill. App. 3d 823, 176 Ill. Dec. 426, 601 N.E.2d 1124 (1st Dist. 1992). The defendant was convicted of delivering more than 30 grams of a controlled substance, and the court, on review of the defendant's appeal, affirmed. In so ruling, the court rejected the defendant's assertion that the lower tribunal should have excluded a Drug Enforcement Agency (DEA) form that contained the chemical analysis of the drug evidence and another form that authorized the destruction of the drug evidence, since the forms constituted hearsay evidence. The business records exception to the rule against hearsay is premised on the recognition that records of an act, occurrence, or event that are routinely made at the time of the occurrence, or within a reasonable time thereafter, are normally sufficiently reliable to be admissible in evidence despite their hearsay character, and the credibility of a business record depends on the regular, prompt, and systematic nature of the entry and the fact that it is relied on in the operation of the business, the court remarked. Since the rationale of the business records exception is the probability of trustworthiness, records prepared for litigation, or during an investigation of an alleged offense, are not normally admissible, even if it is part of the regular course of business to make such records, the court stated, and this includes police reports. However, the court indicated the two DEA forms were admissible under the business records exception to the rule against hearsay, for one form contained the report of the chemical analysis performed by a DEA chemist, the court reasoning that DEA chemical analysis reports are sufficiently trustworthy and have sufficient indicia of reliability to fall within the exception. The other form, the court related, authorized the destruction of the drug evidence, and an agent testified that he completed the form pursuant to regular office practice. The nature of that form was clearly administrative, and was not prepared during an investigation of an alleged offense or during an investigation relating to pending or anticipated litigation, as a result of which it was admissible under the business records exception to the rule against hearsay, the court concluded.

In *State v. Taylor*, 486 S.W.2d 239 (Mo. 1972), an appeal from a conviction for second-degree burglary, the court held that the lower tribunal did not abuse its discretion by admitting into evidence, as a business record, a police laboratory report prepared by the chief criminologist, which report dealt with a microscopic examination of the defendant's clothing. The court noted that the specific objection to the evidence was that the report was not sufficiently identified as a business record, and further noted that the trial court refused to admit the whole report in evidence, permitting only portions of it to be read in evidence. The court felt that the purpose of the Uniform Business Records as Evidence Law, as enacted in Missouri (*Mo. Ann. Stat. § 490.690*), was to enlarge the operation of the common-law rule providing for the admission of business records as an exception to the hearsay rule, and that in order for a record to qualify there must be a preliminary showing of the identity of the record, and the mode and time of its preparation, and that it was made in the regular course of business. In upholding the admissibility of certain portions of the report, the court expressed the view that a trial court must of necessity have a reasonable discretion in its determination of whether the statutory requirements for the admissibility of evidence as a business entry have been met.

The court in *State v. McGeary*, 129 N.J. Super. 219, 322 A.2d 830, 77 A.L.R.3d 106 (App. Div. 1974), held that a certificate of inspection indicating that a Breathalyzer machine was in good operating condition would be admissible as a business record in a prosecution for driving while under the influence of intoxicating liquor, where it appeared that the inspection and testing of the Breathalyzer instrument, and the filling out of the certificate, were performed by a member of the New Jersey state police pursuant to his official duties. The court observed that under the New Jersey court rule that makes business records admissible to prove the facts stated therein under certain circumstances, the term "business" includes "every kind of business, governmental activity, profession, occupation, calling or operation of institutions, whether carried on for profit or not," and that it is clear that police reports with certain qualifications are admissible thereunder as an exception to the hearsay rule. The court reasoned that the inspecting police officer would appear to have little reason to violate his duty and certify that an instrument had been inspected and found to be in good operating order when in truth and in fact it had not been so found, there being little likelihood of and absolutely no reason for the

fabrication of the inspection certificate, no purpose being served thereby. The court observed that it is not only important to and in the interests of the police department that a Breathalyzer is functioning properly, but is also in the interests of a defendant and all the citizens of the state. The court thus felt that there were compelling reasons for the inspecting officer to properly and honestly perform his duty in inspecting the instrument and recording the results of the inspection on the certificate. The court emphasized that the fact certified to by the inspecting officer here was within his personal knowledge, and distinguished the present situation from one in which, for example, an opinion was stated by a police officer in a police report as to the cause of an automobile accident. The court felt that in the latter instance the opinion would not be admissible as part of a business record. Accordingly, the court concluded that strong and convincing indicia of trustworthiness existed for the admission of the inspection certificate as business record exception to the hearsay rule.<sup>n21</sup>

According to the court in *State v. Weller*, 225 N.J. Super. 274, 542 A.2d 55 (Law Div. 1986), a blood-alcohol test would be admissible in a drunk driving accident case pursuant to the business records exception to the hearsay rule (N.J. Evid. R. 63(13)). The defendant was convicted of driving under the influence of alcohol, the intermediate appellate tribunal reversed, the state supreme court remanded the matter, and the court held that a contested laboratory police report would be admissible at the time of trial. The conditions under which the laboratory report might be admitted into evidence pursuant to N.J. Evid. R. 63(13), as a hearsay exception, are threefold, the court indicated: the report must be made in the regular course of business; it must be prepared within a short time of the test performed; and the source of information from which it was made and the method and circumstances of its preparation must be such as to justify its admission. The court observed that while it was clear that the first two requirements had been satisfied, the third factor, related to the method and circumstances of the document's preparation, needed further analysis. Here, the court indicated, the subject test, the headspace gas chromatography test, is a "classic objective test" that requires virtually no subjective analysis by the examiner. Moreover, the court stated, the evidence indicated that approximately 1,200 tests were performed in a six-month period, and the same routine is followed in each analysis, factors indicating that the analysis is performed with great regularity, under procedure guidelines that the examiner is required to follow. Additionally, the court indicated, the defendant did not suggest any persuasive reason why the one performing the analysis would have a motive to single out a specific analysis for the purpose of rendering an untrustworthy report, the court adding that each forensic chemist is subject to having his or her work periodically checked by a unit supervisor, such that there is an incentive to make an accurate and reliable analysis. Given the particular circumstances presented, the court held, the state clearly demonstrated the reliability of the blood test results when they are obtained as a result of the procedure present here, the court declared. Reasoning thusly, the court concluded that the laboratory test was admissible as a business record pursuant to N.J. Evid. R. 63(13).

In *People v. Foster*, 27 N.Y.2d 47, 313 N.Y.S.2d 384, 261 N.E.2d 389 (1970), the court, apparently in dictum, held that the trial court did not err, in a prosecution for speeding, in allowing the prosecution to place in evidence a speedometer deviation record to prove the reliability of the speedometer that was used to clock the speed of the defendant's car. The court stated that although such a record is considered hearsay, it is admissible under the business entry exception to the hearsay rule that provides that any writing or record, as a memorandum or record of any occurrence or event, shall be admissible in evidence as proof of that occurrence or event, if the court finds that it was made in the regular course of any business and that it was the regular course of such business to make it. The court thus concluded that if the officer who made the deviation record could testify that it was made in the ordinary course of police business of maintaining highway safety, and that it was the regular course of police business to make such a record, then the record would be admissible. The court rejected the defendant's contention that a speedometer deviation record made by a police department inspector should not be allowed in evidence because the record had been made with the primary purpose of being used as proof in court, the court stating that while it is true that such records may later be used in litigation, such was not the sole purpose when they were made, and therefore they should not be excluded merely because this was a possible future use. The court added that had a proper foundation been laid for admission of the speedometer deviation record as a business entry, it should have been received in evidence even if proper objection had been taken at trial.

The court in *Matter of Ronald B.*, 61 A.D.2d 204, 401 N.Y.S.2d 544 (2d Dep't 1978), held that a police ballistics report

could be admitted in the defendant's delinquency matter under the business records exception to the hearsay rule *N.Y. C.P.L.R. 4518(a)*. A 14-year-old student was determined to be a juvenile delinquent by the family court, and the court, on review of the defendant juvenile's appeal, affirmed. The evidence presented indicated that the defendant, while at school, was confronted by a school official regarding his purported possession of a pistol. Another official arrived at the scene and the weapon was ultimately taken from the juvenile; a ballistics test revealed that the gun was operable. On appeal, the defendant argued that a ballistics report could not be admitted under the business records exception to the hearsay rule and that, therefore, the person who prepared the report would be required to testify. The court held that the exception to the hearsay rule, set forth in *N.Y. C.P.L.R. 4518(a)*, provides that any writing or record, whether in the form of an entry in a book or otherwise, made as a memorandum or record of any act, transaction, occurrence, or event, shall be admissible in evidence in proof of that act, transaction, occurrence, or event, if the judge finds that it was made in the regular course of any business and that it was the regular course of such business to make it, at the time of the act, transaction, occurrence, or event, or within a reasonable time thereafter. The defendant did not question the reliability of the ballistics report, but asserted that the test was specifically made for the purpose of litigation and thus did not fall within the business records exception, the court pointed out. However, the court stressed, a ballistics report does further the business of the police department, and it is not prepared solely for litigation, but is a routine test conducted on almost all of the guns confiscated by the police and may, in fact, defeat litigation if the gun is found to be inoperable, the court observing that it is a simple test that can be performed by any police officer and consists mainly of pulling the trigger. The court noted that various reports, involving tests more complicated than a ballistics test, have been held admissible as an exception under the business records rule, including autopsy reports prepared by a medical examiner to determine cause of death. Ballistic evidence, among a variety of kindred scientific methods, is freely accepted in the courts for their general reliability, without the necessity of offering expert testimony as to the scientific principles underlying them, the court concluded.

See *State v. Walker*, 53 Ohio St. 2d 192, 7 Ohio Op. 3d 368, 374 N.E.2d 132 (1978), where the court held that a log book maintained by the police related to the maintenance of a Breathalyzer machine, if not admissible as a business record in the defendant's criminal prosecution, would be admissible as an "official record." The defendant was convicted of operating a motor vehicle while under the influence of alcohol and he appealed; the court, on review, affirmed. The court rejected the defendant's assertion that two pages from a permanent police log book maintained by the police department in accordance with regulations promulgated by the Director of Health relating to calibration tests performed by police officers on breath analysis machines was inadmissible in evidence as an exception to the hearsay rule. The court acknowledged that the Business Records as Evidence Act (Ohio Rev. Code. Ann. 2317.40), which allows the admission into evidence of records without substantiation by the person who actually performed the acts that resulted in such record, is not applicable to criminal proceedings so as to allow the admission into evidence under such act of, for example, hospital records showing the results of a physical examination of an alleged rape victim. The court, however, rejected the defendant's argument that the right of confrontation includes the right of cross-examination of the person who is the actual witness against him, and, if applicable in a criminal case, the business records as evidence act denies the criminal defendant such right. That is, the court declared, there is no general rule proscribing the introduction in evidence of all documents that may qualify as a business record. The court held though, that the documentary evidence under inquiry would be admissible under the Official Reports as Evidence Act pursuant to Ohio Rev. Code. Ann. 2317.42, for the document was sufficiently reliable to warrant its admissibility in evidence despite the fact that the declarant is not present at trial.

In *Waldo v. State*, 705 S.W.2d 381 (Tex. App. San Antonio 1986), petition for discretionary review granted, (Apr. 29, 1987) and judgment aff'd on other grounds, 746 S.W.2d 750 (Tex. Crim. App. 1988), a murder prosecution, the court held that the lower tribunal properly admitted two laboratory reports containing blood analysis and comparison tests between the blood of the victim and the blood found on the accused after the arrest, pursuant to the business records exception to the hearsay rule (Tex. Rev. Civ. Stat. Ann. art. 3737e). The defendant was convicted of murder, and the court, on review of the defendant's appeal, affirmed. In so ruling, the court rejected the defendant's argument that the admission into evidence of the two laboratory reports containing blood analysis and comparison tests was in error. The serologist who prepared the reports was not available, the court continued, but the predicate was testified to by the

supervisor of the crime laboratory of the City of San Antonio. This individual, the court remarked, testified that the laboratory reports were made in the normal course of business for the laboratory, that they were made by an individual who worked under his supervision and who had personal knowledge of the event, that the record was made at or near the time of the event, and that he was the custodian of records. Rejecting the defendant's additional argument that he was deprived of the right of confrontation and cross-examination of the witness who prepared the exhibits, the court stressed that there was no testimony that the exhibits were prepared solely for the defendant's criminal prosecution rather than in the course of business of the crime laboratory. That is, the court concluded, the exhibits bore sufficient indicia of reliability and trustworthiness as to accord the same protection provided by the constitutional rights of confrontation.

<>

Police officer's testimony that radio shop issues certificate of testing and accuracy of laser-based speed-measuring device "for purposes like today," i.e., court proceedings, and that people who prepared certificate knew they were regularly brought into court, did not indicate that certificate was prepared "solely for litigation purposes," so as to exceed scope of business records exception to rule against hearsay, in trial for speeding; certification document was prepared in regular course of police department's business to ensure that laser was accurately measuring speed and meeting manufacturer's specifications for the output and detection circuits. M.S.A. § 169.14, subd 10(b); 50 M.S.A., Rules of Evid., Rule 803(6). *State v. Ali*, 679 N.W.2d 359 (Minn. Ct. App. 2004).

[\*27b] Held inadmissible

The courts in the following cases held that police reports containing test results of the accuracy of a police vehicle speedometer, or a police-operated Breathalyzer machine, or other tests, would not be admissible in evidence under the business records exception to the hearsay rule.

A testing certificate related to an alcohol breath test given a motorist would not be admissible under the business records exception to the hearsay rule, the court held in *Mullinax v. State*, 231 Ga. App. 534, 499 S.E.2d 903 (1998). The defendant was convicted of driving under the influence, and the court, on review of the defendant's appeal, reversed. The defendant, on appeal, enumerated as error the lower tribunal's admission the testing certificates for the Intoxilyzer 5000 without requiring the proper foundation pursuant to the business records exception to the hearsay rule (*Ga. Code Ann. § 24-3-14*). Breath-testing device certificates, the court remarked, are records made within the regular course of the business within the meaning of the code provision and may, upon the proper foundation being laid, be introduced into evidence under the business record exception to the hearsay rule. The court pointed out that (*Ga. Code Ann. § 24-3-14*) provides that any writing or record, whether in the form of an entry in a book or otherwise, made as a memorandum or record of any act, transaction, occurrence, or event shall be admissible in evidence in proof of the act, if the trial judge shall find that it was made in the regular course of any business and that it was the regular course of such business to make the memorandum or record at the time of the act, or within a reasonable time thereafter. Here, the court stated, a police officer testified that he was familiar with the actual book in which the records were maintained, where the book was maintained, and that it contained documents prepared by the trooper whose job it was to maintain and calibrate the Intoxilyzer 5000 machines, the court adding that the officer also testified that he did not know if the documents were made contemporaneously with the testing, and that he further agreed that the extent of his knowledge regarding the certificates was that he knew where they were kept and that he had seen them at different points in time. Here, the court noted, the police officer was unable to provide additional information satisfying the foundational requirements of (*Ga. Code Ann. § 24-3-14*), as a result of which the lower tribunal erroneously admitted the results of the criminal defendant's breath test, such that his "per se" driving under the influence conviction would necessarily be reversed.

According to the court in *State v. Matulewicz*, 101 N.J. 27, 499 A.2d 1363 (1985), a state police chemist's laboratory regarding the identification of a controlled dangerous substance would not be admissible as a business record. In the

defendant's prosecution for marijuana possession, the lower tribunal determined that a state police chemist's laboratory report identifying a controlled dangerous substance as marijuana was admissible in evidence, and the defendant appealed; the intermediate appellate tribunal, on review, reversed and remanded, and the state supreme court, on review of the state's petition for certiorari, held that the admissibility of the state police chemist's report must be informed by an evidential record addressing all relevant factors. The issue raised by the defendant, the court indicated, focused upon whether the laboratory report could be admitted as a business record pursuant to the hearsay exception in N.J. Evid. R. 63(13). Although it is apparent that the "business entry" hearsay exception delineated in the code provision carries the potential of broad application, parameters do exist to restrict its scope, the court noted at the outset. That is, the court instructed, the statute posits three preliminary conditions to the admissibility of evidence pursuant to this hearsay exception: the writing must be made in the regular course of business; it must be prepared within a short time of the act, condition, or event being described; and the source of the information and the method and circumstances of the preparation of the writing must justify allowing it into evidence. The court stressed that in the instant case, it was the latter prerequisite that caused some concern, the court adding that the Uniform Business Records as Evidence Act, (*N.J. Stat. Ann. 2A:82-34*), which incorporated language similar to that found in N.J. Evid. R. 63(13), was founded upon the theory that records that are properly shown to have been kept as required normally possess a circumstantial probability of trustworthiness, and therefore ought to be received in evidence. The factual record here, the court continued, was devoid of evidence that would elucidate the "method and circumstances" involved in the preparation of the forensic chemist's laboratory report. The court stressed that the admissibility of the state police chemist's report must be informed by an evidential record that addresses all relevant factors, as a result of which the case would be remanded for retrial, the court concluding that in the event the case proceeded to trial and the state sought to introduce the chemist's report into evidence as a business record, it would then become necessary for the state to develop a factual record to establish the availability of the hearsay exception.

The court in *State v. Conners*, 129 N.J. Super. 476, 324 A.2d 85 (*App. Div. 1974*), an appeal from a conviction for driving while under the influence of intoxicating liquor, affirmed the trial court's ruling that the inspection certificates for the Breathalyzer machine were inadmissible in evidence, on the ground that the record revealed that the state failed to authenticate the inspection certificates in any manner, and failed to lay any foundation qualifying the inspection certificates as business records under N.J. Evid. R. 63(13). The court noted, furthermore, that such inspection certificates are inadmissible as reports of a public official by virtue of N.J. Evid. R. 63(13), and added that it could not find that the trial judge abused his discretion in the instant case in excluding the inspection certificates, since it appeared that the intention of the state to offer them in evidence was not made known to the defendant in sufficient time to provide him with a fair opportunity to prepare to meet them.

In *People v. Crant*, 42 Misc. 2d 350, 248 N.Y.S.2d 310 (*City Ct. 1964*), a prosecution for violating a local speeding ordinance, the court held that a test card filled out and signed by a police officer, which card indicated the results of a calibration test performed on the speedometer against which defendant's speed had been measured, would not be admissible in evidence as a "shop-book" record, since it was apparent that the record was compiled for primary use as an exhibit in court proceedings. Stating the general rule that incompetent evidence does not become competent through its inclusion in a "shop-book" record, the court noted that the statutory "shop-book" rule was designed to permit incidental testimonial use of records that are made and kept primarily for non-testimonial purposes, rather than the other way around.

An examination sheet and report of an unavailable police chemist that stated that substance on a pipe seized from a criminal defendant was cocaine resin were matters observed by law enforcement personnel and, therefore, were not within the business records exceptions to the hearsay rule, the court held in *Davenport v. State*, 856 S.W.2d 578 (*Tex. App. Houston 1st Dist. 1993*). The defendant was convicted of possession of a controlled substance, and she appealed; the court, on review, reversed and remanded. The record indicated that a police officer arrived at a motel in response to numerous complaints of narcotics activity taking place at that location, and that the officer saw that the defendant standing outside one of the motel rooms, the court remarked. As the defendant stepped out of his car, the officer saw the defendant throw down a crack cocaine pipe and a push wire, the court continued, and, after the officer retrieved the

pipe, he arrested the defendant. At the defendant's bench trial, a supervisor in the police lab testified from a police chemist's report and examination sheet that the resin removed from the crack pipe tested positive for cocaine, and that the amount was determined to be approximately 40 milligrams of pure cocaine, the court indicated. This testimony and the examination sheet were admitted over repeated hearsay and confrontation objections by the defendant, and the examination sheet was admitted as a "business record" under Tex. R. Crim. Evid. 803(6). The chemist was on vacation out of the country at the time of the defendant's trial, the court elaborated, and the testifying officer did not participate in the preparation of the report or examination sheet. The court agreed with the defense argument that the lower tribunal erred in admitting the testimony of the officer as to the actions of the chemist, which the officer did not observe personally and about which she could only testify based on documents prepared by the chemist. The subject chemist's examination and the officer's testimony based on the chemist's reports were admitted as business records, the court pointed out, but, pursuant to *Cole v. State*, 839 S.W.2d 798 (Tex. Crim. App. 1990), reh'g on petition for discretionary review granted, (July 3, 1991) and decision clarified on reh'g, (Oct. 21, 1992), this section, the examination sheet and reports were not admissible as a business record, and because the chemist's reports were not admissible as business records, the officer's testimony from those reports was likewise inadmissible as a business record.

See *Layton City v. Peronek*, 803 P.2d 1294 (Utah Ct. App. 1990), where the court held that an alcohol breath test was inadmissible under the business record exception (Utah Rules of Evid., Rule 803(6)) where the incident report containing the breath test was not routine, but instead completed due to one jailor's suspicion, the record lacked evidence that accepted testing procedures were used or that a qualified technician performed the test, the report was made with the intent to prosecute the defendant's probation violation, the custodian of records was not present in court, and the police lieutenant who tried to introduce the report lacked qualifications to lay its foundation.

◇

Department of law enforcement lab report introduced through records custodian, who supervised chemist who tested alleged contraband, who wrote report summarizing his findings, and who performed test to ascertain weight and character of alleged contraband, was inadmissible under business records exception to hearsay rule; report lacked indicia of reliability characteristic of hospital record cases as hospital tested patient's blood alcohol for benefit of patient's treatment, but State tested alleged drug samples to incriminate and convict accused. West's F.S.A. § 90.803(6). *Rivera v. State*, 917 So. 2d 210 (Fla. Dist. Ct. App. 5th Dist. 2005).

[\*28] Complaint reports

[\*28a] Held admissible

The courts in the following cases held that police reports of complaints made by citizens were admissible as evidence under the business records exception to the hearsay rule.

In *People v. Jackson*, 40 A.D.2d 1006, 338 N.Y.S.2d 760 (2d Dep't 1972), an appeal from the defendant's conviction of assault and possession of a dangerous weapon, the court reversed the conviction, stating that a police report sought to be introduced into evidence as a business record by the defendant should be admitted into evidence if it indicated that the source of the information contained in it was the complaining witness. The court stated that the fact that the officer who recorded the entry was not the officer who obtained the information did not impair the admissibility of the report under the business record rule. The court added that if the complaining witness was the source of the information it should have been admitted in evidence as a statement inconsistent with his testimony at trial that he had immediately identified the defendant as the perpetrator.

The court in *People v. Giesa*, 71 Misc. 2d 506, 337 N.Y.S.2d 233 (City Crim. Ct. 1972), held that a police department complaint report, which the arresting officer, before coming into court, had personally obtained from the officer in

charge of the clerical files, which report related the ownership and the larceny of the vehicle in question, described the vehicle and stated its value, and gave the registration and vehicle identification number as well as other particulars, all of these facts being supplied by the owner-complainant at the time he reported the loss of his car, was admissible as evidence under the business entry exception to the rule against hearsay. Noting that there was ample precedent for the admission of police records into evidence under this exception, the court noted that the report recited essential information given to the police by one who not only had intimate knowledge of the facts, but also had the right and obligation to report the crime. The court further stated that the information was reported within minutes after the loss of the car was discovered.

In *People v. Meyers*, 72 Misc. 2d 1003, 340 N.Y.S.2d 505 (City Crim. Ct. 1973), the court recognized that there was authority to the effect that a police department complaint report reciting facts relating to the ownership of and larceny of a motor vehicle, and containing other basic information supplied by the owner-complainant, at the time he reported the loss of his car, was a business entry exception to the rule against admissibility of hearsay evidence. The court said that the business entry exception permits admission into evidence of a memorandum or record of any transaction, occurrence, or event made in the regular course of business, as proof of such happening, provided it was made in accordance with regular practice and simultaneously with or within a reasonable time after the event. To the argument that the information supplied the investigating officer by the owner of the automobile was not furnished in the course of the proponent's business, and therefore did not come within the exception, the court felt that there may indeed be a "business duty" basis for accepting a police report to demonstrate ownership of the car, and prima facie evidence of its theft, in view of the fact that each insured automobile owner is under contract to notify his insurer in writing of accident or theft of an automobile and also to notify the police. The court felt that the rationale for such a policy requirement is quite obvious, since not only may a report to the police result in recovery of the vehicle, but it may serve to apprehend the thief and protect others from thieves. In any event, stated the court, the ownership of a motor vehicle may be readily established as a business record, since the automobile owner is required to apply for its registration with proof of ownership, and the same law makes registration a prerequisite for operating the vehicle on the public highways of the state. The court concluded that since the Commissioner of Motor Vehicles is directed to receive applications for registration and maintain a record of such registrations, the record of registration may be admitted as prima facie evidence of ownership.

Permitting an officer to testify concerning the call received by the police department dispatcher's office regarding a vehicle involved in a hit-and-run accident with the plaintiff was held by the court not erroneous in *Wheeler v. Cain*, 62 Tenn. App. 126, 459 S.W.2d 618 (1970), the court expressing the opinion that such evidence was competent under the Tennessee version of the Uniform Business Records as Evidence Act. The court noted that the officer who testified was the radio dispatcher who was on duty when the report in question came in, and that said officer testified that a record is made of all calls received at the police department from people reporting accidents and the movement of squad cars. The court noted that the officer also testified that these records are made on a tape and also on computer cards in the regular course of business of the police force. The court further related that the officer testified that he received a report of the hit-and-run accident in question and that the person calling him described the car that had left the scene of the accident, and that a subsequent call from officers at the scene divulged a license number. Holding this testimony admissible, the court overruled the defendant's assignment of error based thereon.

◇

Under New York law, police complaint report containing robbery victim's hearsay description of her assailant would have been admissible in robbery trial as business record through officer who signed the report. *Harris v. Senkowski*, 298 F. Supp. 2d 320 (E.D. N.Y. 2004) (applying New York law).

[\*28b] Held inadmissible

The courts in the following cases held that police reports of complaints made by citizens would not be admissible under the business records exception to the hearsay rule to show the truth of the matters asserted, since the complaining witness was deemed to be under no business duty to make the complaint in question.

In *Territory of Hawaii v. Makaena*, 39 Haw. 270, 1952 WL 7346 (1952), a burglary prosecution in which the prosecutor sought to have admitted, under a statute (Haw. Rev. Stat. § 9902) providing for the admissibility of business records, a so-called "offense report," in which was contained, among other things, statements made by the burglary victims to the police officers, stating that it was error to permit the prosecution to put the offense report in evidence, and reversing the defendant's conviction, the court held that if such a police record is admissible, the act recorded is merely that a complaint was made, and could be admissible only for the purpose of proving that a complaint was made to the police, and not as to the correctness of the report to the officer, or that, in the instant case, the premises were entered and money and jewelry stolen. The court went on to state that to permit in evidence, as a business record, the statements of the victims contained in the police report, would be to admit hearsay evidence, which derived its value not from the credibility of the witness, or reporter, himself, but depended upon the veracity and credibility of other persons whom the jury never sees or whose credibility it has no chance to weigh.

Material contained in a police complaint report filled out by an officer who took the information over the telephone was held by the court inadmissible as evidence under the business records exception in *Wells v. State*, 254 Ind. 608, 261 N.E.2d 865 (1970). The court observed that under the common-law rule, without benefit of modification by statute, a business entry, in order to qualify as an exception to the hearsay rule, must consist of the original entries, must have been made in the regular course of business at or near the time of the event recorded, and must have been within the firsthand knowledge of someone whose business duty it was to observe and report the facts, and, in addition, the witness who had knowledge of the facts must be unavailable. The heart of the rule, continued the court, is the requirement that the observation, reporting, and the recording of the facts all be made by someone in the regular course of the business, the court adding that without this there is no assurance of the accuracy and reliability of the fact that justifies the admission of the record as evidence of the facts asserted therein. Turning its attention to the facts involved in this particular instance, the court observed that the complaint report in question was filled out by the officer in the regular course of his duties as an employee of the police department, but that of all the information placed on the report by the officer, he actually had firsthand knowledge only of the date, time, log number, case number, his own name, and the use of a phone to report the complaint. The court stated that the reporter did not have firsthand knowledge that the caller was the complainant in the instant action, nor that there actually had been a breaking and entering of the complainant's premises. The caller, the court related, who as far as the officer knew at the time of recording may or may not have had firsthand knowledge of the burglary, was not an employee of the police department and was not acting in the regular course of business of the police department in observing and reporting the facts to the reporting officer. While concluding that the trial court did commit error in permitting the report into evidence, the court felt that such error was not reversible in the instant case because the defendant was in no way prejudiced thereby, since the erroneously admitted evidence merely purported to show that the complainant reported a burglary at a particular time, and the defendant did not at the trial, nor on appeal, challenge the fact that the complainant's premises were broken into on the date alleged, and that the complainant discovered this fact the following day, and reported it to the police.

The court in *Olson v. State*, 262 Ind. 329, 315 N.E.2d 697 (1974), held that a complaint report filled out by a police officer while talking to the complainant on the phone, which report indicated that a certain numbered license plate was lost or stolen from the complainant's residence at a particular time, did not fall within the requisites for the business records exception to the hearsay rule, and was therefore inadmissible in evidence. Noting that the complaint report was being used to show that the license plate had been lost or stolen at a certain time, the court noted that, as such, it was an out-of-court statement by the complainant offered to show the truth of the matters asserted therein and resting upon the credibility of an out-of-court asserter. The court further stated that in order for a document to fall within the business records exception to the hearsay rule, the facts asserted therein must have been within the firsthand knowledge of someone whose business duty it was to observe and report the facts. Concluding that the facts of the time and the place of the theft and the number of the license plate involved were not within the firsthand knowledge of the officer who

received the telephone complaint and who filled out the report, the court further concluded that the report was hearsay in nature and that the trial court's admission of the exhibit over the defendant's objections was reversible error.

In *City of Fairmont v. Sjostrom*, 280 Minn. 87, 157 N.W.2d 849 (1968), the court held that a police log report that contained statements made by the complainant to the effect that he had been run off the road by the defendant's car was improperly admitted as evidence in the defendant's prosecution for driving while intoxicated. After noting that the complainant's statements would be hearsay unless made in court by the complainant himself, the court noted that the Uniform Business Records as Evidence Act, as enacted in Minnesota, was not intended to make proof out of that which is not proof, and that it does not make a record admissible when oral testimony of the same facts, based on hearsay, would be inadmissible. The court went on to state that business records, to be admissible, must be based on the entrant's own observation or some information transmitted to him by an observer who has the business duty of transmitting such information to him. The court felt that if the informant of the person who makes the record entry is under no duty to anyone to make a truthful account of the facts thus recorded, the record should not be admissible as proof of such facts. The court concluded that the statute (*Minn. Stat. Ann. § 600.01*) was not intended to permit the receipt in evidence of entries based on voluntary hearsay statements made by third parties not engaged in the business or under any duty with respect thereto. Returning to the facts of the case, the court indicated that since the entry in the police log constituted hearsay, and was the only evidence that the defendant's car was being operated within the vicinity of the incident, the record therefore contained no valid proof that the defendant was driving, and his conviction of violating an ordinance proscribing driving while under the influence of liquor should not stand.

A complaint report containing a complainant's statement would not qualify under the business records exception to the hearsay rule, the court held in *People v. Vallejos*, 125 A.D.2d 352, 508 N.Y.S.2d 615 (2d Dep't 1986). The defendant was convicted of rape in the first degree and robbery in the first degree, and the court, on review of the defendant's appeal, affirmed. The court, without detailed explanation or discussion, held that the lower tribunal properly found that the police report that contained the complainant's statement did not qualify under the business records exception to the hearsay rule for admission in evidence, pursuant to *N.Y. C.P.L.R. 4518(a)*.

[\*29] Teletype or telephone report

[\*29a] Held admissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a police teletype or telephone report would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

In *People v. Fields*, 74 Misc. 2d 109, 344 N.Y.S.2d 413 (*Dist. Ct. 1973*), a prosecution for unauthorized use of a motor vehicle, the court held that a certified copy of the police teletype message identifying the car in which the defendants were observed to be riding as one reported stolen would be admissible as a business entry under a New York statute (*N.Y. C.P.L. 100.40*) permitting such entries if properly qualified. Of the opinion that New York case law on the subject supports the proposition that there is no rule that admits police reports in all cases, and there is no rule that excludes police reports in all cases, the court noted that in the instant case the police department was under a duty to receive and check the report of the owner of the vehicle and was under a duty to transmit that information to the police of other jurisdictions, and those police of other jurisdictions were under a duty to receive, record, and act on the information. The court felt that the teletype message was the regular course of such communication, and also noted that the copy of the teletype record had been certified, and concluded from that fact that the police report in question was non-hearsay evidence sufficient to establish, if true, that defendants did not have the consent of the owner when they took the automobile.

According to the court in *State v. Bradley*, 17 Wash. App. 916, 567 P.2d 650 (*Div. 2 1977*), a robbery prosecution in which the accused's alibi raised the question of the exact time of an unrelated purse snatching that occurred some

distance away, a computer printout of phone calls to the police indicating the time the purse snatching was reported and the officers were dispatched was admissible as a business record (*Wash. Rev. Code Ann. § 5.45.010*). The court, in so ruling, rejected the defendant's argument that the trial court erred in admitting the computer printout since the police report contained double hearsay. That is, the court indicated, the report contained the statements of the person who received the call, dispatched the officers, and recorded the time of their arrival, and the printout contained the declarations of the person who placed the phone call and described the nature and location of the incident. The printout, the court elaborated, was a record of an event made in the regular course of business that satisfied the requirements for admission under the Uniform Business Records as Evidence Act, *Wash. Rev. Code Ann. § 5.45.010*, the court adding that a document that qualifies as a business record cannot be denied admission on the ground that the person who entered the information in the record does not testify in court. Thus, the court emphasized, the statements of the person who received the phone call came within an exception to the hearsay rule for business records. The court further rejected the defendant's assertion that the admission of the computer printout as a business record denied him a constitutional right to confront witnesses, the court stressing that this objection to evidence properly admitted as a business record under the subject code provision is without merit.

[\*29b] Held inadmissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a police teletype or telephone report would not be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

A police telephone report would not be admissible pursuant to the business records exception to the hearsay rule (*Cal. Evid. Code § 1271*) in the defendant's prosecution of grand theft, the court held in *People v. Ferguson*, 129 Cal. App. 3d 1014, 181 Cal. Rptr. 593 (1st Dist. 1982). The record at issue consisted of a police record that served to support the defendant's claim that he had called the police to report a vehicle repossession when he took a motor vehicle back from a third party; when the third party attempted to move the document into evidence, an objection was made and sustained on the basis of hearsay. The record, the court noted at the outset, was inadmissible hearsay in that it was evidence of an out-of-court statement made by the defendant, offered to prove the truth of the matter asserted, that is, that he had repossessed a vehicle. Police records may, in some circumstances, be admissible under the business records exemption to the hearsay rule, but in order to be considered under the exception, a proper foundation must be established, the court elaborated: the report must be shown to have been made in the regular course of business; at or near the time of the act, condition, or event; the custodian or other qualified witness must testify to its identity and the mode of its preparation; and finally, the sources of information and method and time of preparation must be such as to indicate its trustworthiness. Here, the court stressed, no such foundation was laid, such that the evidence was properly excluded.

A police teletype report prepared by an officer regarding his initial investigation of alleged crimes would not be admissible at the time of trial under the business records exception to the hearsay rule, the court held in *Riddle v. State*, 273 Ind. 112, 402 N.E.2d 958 (1980). The defendant was convicted of burglary, rape, and criminal deviate conduct, and the court, on review of the defendant's appeal, affirmed. In so ruling, the court rejected the defendant's assertion that the lower tribunal erred in refusing to admit into evidence a case report prepared by an officer concerning the officer's initial investigation of the crimes. While the officer himself did not testify and was not subpoenaed by the defendant, the court remarked, the defendant claimed that two items on the report could have been used to impeach the testimony of the victim and were admissible under several theories. The court elaborated that the first statement which the defendant wished to have admitted was a line that had "Victim's Cond:" typed on the far left-hand side of the page and then the words "heavy drinker" on the same line but far over on the right-hand side of the page, and the second statement was a handwritten notation at the bottom of the page near a description of the suspect's clothes, "Possible Narc Dealer." Both statements were ambiguous because from their locations on the page they could refer to either the victim or the defendant, the court indicated, and, furthermore, the typewritten part of the page was a teletype report that the officer had called in when he first investigated the crime and the handwritten portions of the report were apparently notations made by a different officer at a later time. This report was clearly hearsay and did not fall within the business

records exception to the hearsay rule since the defendant made no effort to establish a foundation by having it identified by its entrant or the official in charge of keeping the records, the court declared. The statements could not be regarded as admissions against interest since there was no evidence that the victim said anything about drinking or drugs, the court stated. Finally, the statements were certainly made at a time too far removed from the crime to be considered part of the *res gestae*, such that there was no error in refusing to admit the police report, the court concluded.

A police telephone report containing statements of an individual with knowledge of a crime was erroneously admitted by the lower tribunal pursuant to the business records exception to the hearsay rule (*Wis. Stat. Ann. § 908.03(6)*), the court held in *Mitchell v. State*, 84 Wis. 2d 325, 267 N.W.2d 349 (1978), though, given the particular circumstances presented, the error was harmless. The defendant was convicted of driving a motor vehicle without the owner's consent and he appealed; the court, on review, affirmed. The only direct evidence adduced at the preliminary examination regarding the vehicle owner's ownership of the motor vehicle was the testimony of the arresting officer concerning the recovery of the car and his phone conversation with the owner thereafter, the court pointed out, and the judge presiding over the preliminary examination admitted into evidence two reports prepared by the arresting officer, including a long-distance telephone report, describing the conversation with the vehicle owner. The court held that the rules of evidence apply to preliminary examinations, and here the lower tribunal relied on the business records exception in admitting the record, the court adding that this exception allows the introduction of documents made in the course of a regularly conducted activity, which includes police reports. The state, the court pointed out, conceded that the owner's statements contained in the police telephone report were not admissible as a record of a regularly conducted activity, but instead, that the contents of the reports were admissible under the residual exception for hearsay testimony not included among the enumerated exceptions to the hearsay rule but having comparable circumstantial guarantees of trustworthiness. The defendant, conversely, pointed out that the police reports admitted in the instant case were of the type covered by the business records exception but did not fit under that exception, the defendant arguing that to admit the report under the residual exception would be to circumvent the requirements of the business records exception. The court concluded that the statements made to the police over the telephone by the victim concerning the theft of an automobile had some guarantees of trustworthiness, but they did not have sufficient guarantees of trustworthiness to be admissible under the residual hearsay exception in *Wis. Stat. Ann. § 908.03(24)*, and since the statements did not fall within any of the enumerated exceptions to the rule in that code provision, their admission was error.

[\*30] Victim report

The following authority considered, under the particular circumstances presented, whether all or part of a victim report would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

In *Com. v. Russell*, 459 Pa. 1, 326 A.2d 303 (1974), an appeal from a defendant's conviction for murder of a police undercover agent, the court held that the trial court did not commit error by admitting into evidence certain reports prepared by the victim that mentioned previous drug contacts and conversations with the defendant. In holding that the admission of the report did not violate the Business Records Act, the court stated that the victim transcribed the report from notes made by him at or near the time of the transaction and that mere typographical and stylistic errors delayed its filing. The court noted that the unsubmitted report remained in the control of either the victim or the qualifying witness, and concluded that since the evidence had a degree of trustworthiness and was within the purpose of the Act, the trial judge properly admitted the report. In so holding, the court rejected the urging of the defendant that the report improperly introduced evidence of his prior criminal activity that was normally inadmissible, the court stating that where the evidence is offered to prove matters other than criminal activity, the trial judge, in his discretion, may admit it. The court further stated that, even assuming that the mention of drug involvement did imply prior criminal activity, the prosecution introduced the report to show the close relationship between the defendant and the victim, and that, as such, it was admissible.

[\*31] Radio log

The courts in the following cases considered, under the particular circumstances presented, whether all or part of a police radio log report would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

Portions of police radio logs reporting two calls made by a victim to the police shortly before he was murdered met the requirements for admissibility of the business records statute (Ark. Stats. § 28-928), the court held in *Dyas v. State*, 260 Ark. 303, 539 S.W.2d 251 (1976). The defendant was convicted before the lower tribunal of capital felony-murder, and he appealed; the court, on review, affirmed. The subject logs were admitted into evidence under the exception to the hearsay rule for records made in the regular course of business, during the testimony of the dispatcher, the court remarked. The code provision under inquiry permits the introduction into evidence of records made in the regular course of business, the entries having been made to record an act, transaction, occurrence, or event, if made in the regular course of business, the court observed. Here, the court indicated, there was sufficient evidence in the record to meet the requirements of the statute to show that the records were regularly kept and made within a reasonable time after the event recorded, such that there was no error in the lower tribunal's admission of the logs as they reflected that the two calls were received on the evening in question from the victim, the nature of the report given by the victim, and the fact that the police investigated and found the report to be false, the court adding that these were the sort of "transactions" the statute contemplated.

The court in *Gamble v. State*, 215 Tenn. 26, 383 S.W.2d 48 (1964), involving a prosecution of two police officers for larceny, held that police radio logs that contained notations as to which police unit was assigned to a particular call were original records, made in the regular course of police business, and would be admissible in evidence under the Uniform Business Records as Evidence Act.

In *Porter v. State*, 623 S.W.2d 374 (Tex. Crim. App. 1981), a prosecution for capital murder arising from the slaying of a police officer, the court held that the lower tribunal properly admitted a tape recording and transcript of a tape of radio transmissions of police on the day the police officer was shot pursuant to the business record exception to the hearsay rule. The court rejected the defendant's argument that the tape recording and a transcript of the tape were improperly admitted in evidence, the court pointing out that a police sergeant testified that radio communications of the police department were continuously recorded 24 hours a day, that he had the care, custody, and control of the tape, and that the tape was prepared in the ordinary course of business of the police department. The officer added that the entries on the tape were made contemporaneously with the events they described and that while he was not present when the recordings were made, no changes in the tape had been made. Moreover, the court observed, a civilian dispatcher for the police who was working on the day of the shooting stated that the recording was accurate and that no alterations had been made to it and that he could identify all the voices on the tape, either by recognizing the sound of their voices or by their call number. The court instructed that *Tex. Rev. Civ. Stat. Ann. art. 3737e, § 2*, the state business records act, provides that a business record is admissible as evidence of an event if it was made in the regular course of business, it was the regular course of that business for an employee of that business with personal knowledge of the event to make a record, and it was made at or near the time of the event. The court rejected the defendant's argument that the subject record was not fundamentally trustworthy and should therefore not be admitted, the court stating that the document's trustworthiness could not be questioned. That is, the court remarked, here the document was not made with a specific view toward prosecution in mind and, as a matter of fact, it is a rare situation in which such a recording would provide any probative value to a case. The court explained that the sound recording in the instant case allowed the police department to review the procedures used by their officers and to insure that information transmitted was accurately recorded, the court concluding that the sound recording was of such trustworthiness as to guarantee the same protection provided by the rights of confrontation and cross-examination.

[\*32] Letter of officer

The following authority considered, under the particular circumstances presented, whether all or part of the letter of a police officer would be admissible as evidence under the business records exception to the hearsay rule in a criminal

action.

According to the court in *People v. Marselle*, 20 Ill. App. 3d 1012, 314 N.E.2d 21 (3d Dist. 1974), an appeal from a criminal defendant's conviction for contributing to the delinquency of a minor, the lower tribunal committed error by admitting into evidence a letter written by a California policeman regarding an automobile accident, in which letter it was stated by the writer that he had been told that the defendant and the minor in question had been seen together. Noting that, except for the direct testimony of the complaining minor, the letter in question was the only evidence of any substance that tended to place the complaining minor with the defendant, the court stated that, apart from constitutional issues, the letter would not have been admissible in this cause under an Illinois statute (S.H.A. ch. 110A, § 236) that permitted certain business and professional writings or records to be admitted as exceptions to the hearsay rule, since such statute specifically provided that the rule should not apply to the introduction into evidence of police accident reports. Concluding that the "business entry" statute would be unavailable as a statutory basis for admissibility of the letter, and that it likewise did not come under any of the express exclusions from the hearsay rule, the court reversed the defendant's conviction, stating that it could not determine whether the defendant, in the absence of such evidence, would have been found guilty beyond a reasonable doubt.

[\*33] Receipts for property

[\*33a] Held admissible

The courts in the following cases held, under the particular circumstances presented, that all or part of police receipts for property would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

According to the court in *Perry v. State*, 541 N.E.2d 913 (Ind. 1989), evidence consisting of police evidence vault logs, listing the dates on which drugs were received from an informant, would be admissible as evidence under the business records exception to the hearsay rule. The defendant was convicted of three counts of dealing in controlled substances and judgment was entered in the lower tribunal; the court, on review, affirmed. In so ruling, the court rejected the defendant's arguments that state police evidence vault logs that listed the dates on which the drugs were received by certified mail and the times at which they were removed and replaced, and by whom, were improperly admitted at the time of trial. An officer who analyzed the controlled substances testified that he made some of the entries on the logs, and other markings on the logs were made by persons other than that officer, the court pointed out. The defendant made hearsay objections to the exhibits on the basis that the persons other than the testifying officer who made entries on the logs were not present and subject to cross-examination, and he asserted that the business records exception to the hearsay rule was inapplicable because the state failed to establish the proper foundation, the court pointed out. However, the court stressed, an exhibit qualifies under the business records exception to the hearsay rule when the sponsor of the exhibit shows that it is part of the records kept in the routine course of business and placed in the record by one authorized to do so who had personal knowledge of the transaction represented at the time of entry, the court adding that the exception does not mandate that the sponsor of the exhibit personally made it, filed it, or had firsthand knowledge of the transaction represented by it. Here, the court pointed out, the subject officer testified that the log sheets were filled out and maintained in the normal course of business with the Indiana State Police, and he stated that the evidence custodian was the only person who had access to the vault, and he further explained that a log was kept that records when evidence is removed and returned to the vault and that some of the entries on the log were made by himself and some were made by persons other than himself. All of the records on the log indicated that they were entered by an evidence custodian, such that the evidence adduced at trial established that the logs were made by persons authorized to do so and who had personal knowledge of the transactions represented at the time of entry. Reasoning thusly, the court found that the foundation was properly established to admit the evidence under the business records exception of the hearsay rule.

The court in *Com. v. Kelly*, 245 Pa. Super. 351, 369 A.2d 438 (1976), judgment aff'd on other grounds, 484 Pa. 527, 399 A.2d 1061 (1979), held that a police property receipt was admissible at the time of the defendant's criminal

prosecution. The defendant was convicted of one count of obstructing the administration of the law, three counts of perjury, and one count of bribery; the court, on review, affirmed. In so ruling, the court rejected the defendant's assignment of error in the admission of a police property receipt. While the defendant asserted that these records were not properly qualified as business records pursuant to 28 P.S. § 91b, the court disagreed, commenting that contrary to the argument of the defendant, a witness called for the purpose of qualifying a business record need not have any personal knowledge of the facts that are reported in the particular records. The code provision under inquiry provides that a record of an act, condition, or event shall, in so far as relevant, be competent evidence if the custodian or other qualified witness testifies to its identity and the mode of its preparation, and if it was made in the regular course of business at or near the time of the act, condition, or event, and if in the opinion of the court, the sources of information, method and time of preparation were such as to justify its admission, the court instructed. Here, the court pointed out, the qualifying witness, a police lieutenant, testified that the complained-of records were prepared in the regular course of police business, at or near the time of the reported incident. Although the witness did not remember the particular incident with which the reports were concerned, his signature as reviewing officer was on the report. As such, the court noted, the police property receipts were properly qualified as business records.

[\*33b] Held inadmissible

The court in the following case held, under the particular circumstances presented, that all or part of police receipts for property would not be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

According to the court in *Oliver v. State*, 475 So. 2d 655 (Ala. Crim. App. 1985), receipts for property relative to money removed from the defendant, even if considered "business records," would not be admissible under an exception to the hearsay rule. The defendant was convicted of first-degree theft of property, and the court, on review of the defendant's appeal, held that the admission of an investigator's inadmissible hearsay testimony as to denominations of money removed from the defendant and his companions when they were placed in jail was reversible error. More specifically, a sheriff's department investigator was permitted to testify to the amount of money and the denominations of the money removed from the defendant and his two companions when they were placed in the city jail even though she did not personally observe the removal of the money; the trial judge ruled that while circumstantial evidence is hearsay, it was "permissible." The court commented that this testimony, and the receipts the investigator gave to the police for the money, constituted inadmissible hearsay evidence. Even if the receipts were considered a police report, they were not admissible as an exception to the hearsay rule under the business records exception and, even if police reports were admissible as business records in Alabama, in this case the prosecutor did not lay a proper predicate for the admission of business records, the court stressed. This hearsay testimony was incriminating and tended to connect the defendant to the crime charged, such that it could not be considered harmless error, the court pointed out. Although the defendant admitted having approximately \$ 50 on his person, he did not testify about the particular denominations possessed and it was the evidence of the denominations of the money that was so incriminating, the court declared as it reversed the judgment of the lower tribunal and remanded the matter.

[\*34] Vehicle use form

The following authority considered, under the particular circumstances presented, whether all or part of a police vehicle use form would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

Mandatory vehicle use forms completed by police personnel were admissible under the business records exception to the hearsay rule in the criminal defendant's narcotics prosecution, the court held in *Montgomery v. U.S.*, 517 A.2d 313 (D.C. 1986). The defendant was convicted of possession of heroin, and the court, on review of the defendant's appeal, affirmed. The court rejected the defendant's argument that the lower tribunal erred in admitting into evidence a police form under the business records exception to the hearsay rule on the ground that it was made with a view toward litigation. A well-known exception to the hearsay rule, the admission of records generally kept in the course of business,

has long been recognized in the District of Columbia, and is applicable to both civil and criminal cases, the court pointed out. The factual observations in a police report may be admissible under the business records exception to the hearsay rule if made and reported in the regular course of business, the court elaborated. Although it is true that the business records exception does not apply to records that have been prepared with an eye toward litigation, here, the form under inquiry qualified as a business record, the court pointed out. That is, the court explained, police officers are required to complete the form under inquiry each day that they use a police vehicle, and the report enables the officers to document the condition of the vehicle and also to account, in skeletal form, for their activities for the day. It is part of routine police procedure designed to serve several internal, administrative purposes, not to aid a prosecution, and the information contained in the report in the subject case did not summarize the prosecution's case, the court noted, but instead, was only a brief outline of the officers' activities of the day. Lastly, the lower tribunal explicitly found that the vehicle use form admitted into evidence in this case was not made in anticipation of litigation, a ruling that had ample support in the record, the court concluded.

[\*35] Booking sheet

The courts in the following cases considered, under the particular circumstances presented, whether all or part of a police booking sheet would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

A police department booking sheet would not be admissible in the defendant's criminal prosecution, the court held in *State v. Harry*, 741 S.W.2d 743 (Mo. Ct. App. E.D. 1987), post-conviction relief denied, 800 S.W.2d 111 (Mo. Ct. App. E.D. 1990), reh'g and/or transfer denied, (Dec. 12, 1990). The defendant was convicted of first-degree robbery and armed criminal action, and was adjudicated a prior and persistent offender before the lower tribunal. The court, on review of the defendant's appeal, affirmed. The court rejected the defendant's assertion that the lower tribunal erred in sustaining the state's objection to the admission of the police department booking sheet into evidence. The lower tribunal has a wide latitude in determining whether a sufficient foundation has been established to allow the admission of records under the Uniform Business Records as Evidence Act (*Mo. Ann. Stat. § 490.660*), the court remarked. A police report may generally be admitted into evidence when qualified under the act, but in order to be admissible under the act, the proponent of the report must show that the report was based either upon the entrant's observations or on the information of others with a duty to transmit it to the entrant. The court observed that a detective entered the defendant's age, height, and weight in the report apparently based upon the defendant's statements, and the defendant attempted to use the report to prove the truth of the matter stated therein, that being the defendant's true height, weight, and age. The detective could not testify as to the defendant's hearsay statement regarding his age, the court indicated, the court adding that the act would not serve to transform this inadmissible hearsay into admissible evidence simply because the information was recorded. Reasoning thusly, the court concluded that the lower tribunal correctly excluded the police booking sheet from evidence.

The court in *State v. Bertul*, 664 P.2d 1181 (Utah 1983), held that the lower tribunal's exclusion of a police "booking sheet" from evidence, proffered by the defendant to support his defense of intoxication, was not prejudicial error where intoxication would not have served as a defense to the charge of burglary. The defendant was convicted of burglarizing a pharmacy, and he was seen leaving the premises by a witness who identified him at the time of trial. At trial the defendant, who did not dispute his participation in the crime, relied on a defense of voluntary intoxication, the defendant contending that he had consumed an inordinate amount of alcoholic beverages the night of the crime, was subject to blackouts when drinking, and had blacked out the night of the burglary and remembered nothing of it. The testimony of the officer who made the arrest was that the defendant had obviously been drinking but did not appear intoxicated; during cross examination of the officer, the defendant proffered what appeared to be a copy of the "booking sheet," which apparently was filled out at the county jail when the defendant was booked at 6:30 a.m. the day of the burglary, the burglary being committed approximately three hours prior to the arrest. The defendant's apparent purpose in offering the booking sheet was to substantiate his claim of intoxication; in making out a booking sheet, the booking officer writes in a number indicating the arrestee's degree of intoxication, and the number is based on the conclusion of

the "searching officer" who verbally communicates his conclusion to the booking officer. A "1" indicates that the searching officer concluded that he or she believed that the arrestee, at the time of booking, was so intoxicated that he could not be booked, a "2" indicates obvious intoxication, and a "3" indicates that the arrested person had been drinking. The booking sheet offered by the defendant was marked with the number "2"; the lower tribunal ruled that the document was inadmissible hearsay. The booking sheet and the code number on it were clearly hearsay, the court remarked, for they were out-of-court statements offered to prove the truth of the information contained on the sheet, and were thus inadmissible unless they fell within one of the exceptions to the hearsay rule. The court, on review of the defendant's appeal, reversed, the court holding that the booking sheet should have been admitted as a "business record," the court adding that the rules governing the business record exception are construed broadly. In holding that the document was admissible, the court pointed out that the searching officer who supplied the information acted in the regular course of his duties in reporting to the booking officer.

[\*36] Officer's disciplinary reports

The following authority considered, under the particular circumstances presented, whether all or part of a police officer's disciplinary report would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

An officer's disciplinary report would not be admissible in a defendant's criminal prosecution, the court held in *Com. v. Trapp*, 396 Mass. 202, 485 N.E.2d 162 (1985), appeal after remand on other grounds, 423 Mass. 356, 668 N.E.2d 327 (1996). The defendant was found guilty of murder in the first degree, armed robbery, and larceny; the defendant appealed his convictions and the denial of his motion for new trial, and the court, on review, held that certain records would not be admissible under the business records exception to the hearsay rule. At the time of trial, the judge admitted as business records three Officer's Disciplinary Reports describing incidents involving the defendant while he was detained at a house of correction awaiting trial. According to one of the reports, three weeks before the trial the defendant and another inmate engaged in a verbal altercation, each threatening to kill the other, another report indicated that eight months before trial, the defendant was found to be in possession of a small amount of marijuana, and the third report showed that approximately 15 months before trial, three weeks after his arrest, the defendant was involved in a fight with two other inmates. These records were admitted as business records under *Mass. Gen. Laws Ann. ch. 233, § 78*, which provides that before business records can be admitted, the judge must make four preliminary findings: that the entry was made in good faith, in the regular course of business, before the beginning of the proceeding, and that it was the usual course of business to make the entry at the time of the event or within a reasonable time thereafter. The records offered were made while the defendant was in custody awaiting trial. When the commonwealth has custody and control of the accused, it cannot be said that the dispute or controversy between the accused and the commonwealth has not already begun, for the purposes of admitting hearsay declarations, the court indicated. Thus, pursuant to the code provision under inquiry, the Officer's Disciplinary Reports made after the defendant was in pretrial detainment at the house of correction would not be admissible as business records. There could be no question, the court declared, that the use of the subject records was prejudicial to the defendant and, considered cumulatively, the evidence of threats in 1977 and of misconduct between arrest and trial were so prejudicial that the admission of such evidence would require reversal of the judgments and a new trial.

[\*37] Memorandum

The following authority considered, under the particular circumstances presented, whether all or part of a police memorandum would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

In *Holcomb v. State*, 307 Md. 457, 515 A.2d 213 (1986), a prosecution for murder, the court held that a police incident report containing a detective's account of the defendant's unacknowledged confession was properly admitted into evidence as a business record, where the defendant's statement, although second-level hearsay, was excepted from the

hearsay rule as an admission of a party-opponent. In a prosecution for murder, the lower tribunal admitted as a business record a contemporaneous memorandum, prepared by a police officer, but not signed by the defendant, that contained an accused's oral confession. The court, granting certiorari, affirmed, the court holding that a business record made by a detective following the criminal defendant's polygraph examination, which included his recollection of a question and answer session in which the defendant confessed to the murder, was admissible to prove the truth of the facts related in the defendant's statement. The Maryland business records statute defines "business" to include "business, profession, and occupation of every kind" (Md. Code Ann., Cts. & Jud. Proc. § 10-101(a)), the court noted at the outset. In general, those portions of the report of a police investigation that record the facts obtained by the direct sense impressions of the investigating officer are admissible as a business record while those portions that report objectionable hearsay and opinions of the investigator are inadmissible as a business record, the court elaborated. With respect to the use of the business records exception at the second level of hearsay, the court instructed that if the declarant is not available to testify and if the statement is not admissible under some other exception to the hearsay rule, such as excited utterance or dying declaration, then admissibility cannot be predicated exclusively upon the circumstance that the statement was made to a police officer who paraphrased its content in his report. That is, the court elaborated, the business record exception is predicated not only on the circumstance that the record itself is kept in the usual course of the business but also on the circumstance that the recorded information is obtained by the recorder from a declarant having a "business" duty to communicate it truthfully. Here, the court stressed, the criminal defendant, the declarant, made an admission to the detective, who recorded it in the course of "business." As such, the court reasoned, the lower tribunal correctly held that the business record was admissible to prove the truth of the facts related in the defendant's statement because the second level hearsay fell within the exception for admissions by a party-opponent.

[\*38] Investigative report

[\*38a] Held admissible

The following authority held, under the particular circumstances presented, that all or part of a police investigative report would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

A police investigative report would be admissible pursuant to the business records exception in the defendant's rape prosecution, the court held in *State v. Therriault*, 485 A.2d 986 (Me. 1984). At his second trial, the defendant was convicted of rape, and he appealed; the court, on review, vacated the judgment and remanded the matter. The test for admissibility under Me. Rules of Evid., Rule 803(6), the court noted at the outset, focuses on the knowledge of the person making the report, the contemporaneity of the making of the report with the observance of the facts being reported, the "regularity" of the recording and keeping of the report, and the report's trustworthiness. The presiding justice labeled the report in the present case "investigative" and, as such, ruled that it could not qualify for admission under the statutory business records exception, the court pointed out, but the test for admissibility under the provision does not concern the "investigative" or "non-investigative" nature of the report being offered. The fact that the report was "investigative" in the sense that it was completed at the request of a local police department and concerned the investigation of possible criminal activity in a particular case did not, per se, remove the report from the business records exception, the court stated, such that the justice erred when he concluded that an "investigative" report could not qualify for admission under Me. Rules of Evid., Rule 803(6). The justice also erred in concluding that the report was untrustworthy, the court observed. Lack of trustworthiness is a proper ground for excluding from evidence an otherwise qualified business record, but here, the record on appeal revealed no basis for such a conclusion, the court remarked. Commonly, a "lack of trustworthiness" finding is predicated on a finding that the record was altered after it left the control of the preparer or custodian of the report, or that the preparer had some motivation to misrepresent or misstate results contained in the report, or that the report was prepared in anticipation of litigation. Here, the court stressed, there was no indication that the subject laboratory report was altered after the preparer completed it, and its authenticity was not disputed at trial.

&lt;&gt;

Reports of State Bureau of Investigation (SBI) agent that contained information on chain of custody of DNA material and agent's DNA analysis were business records for purposes of exception to hearsay rule for business records, where agent's supervisor was responsible for creating and implementing laboratory policies regarding record keeping, and supervisor testified that agent created reports contemporaneously with his work as part of regular practice of agency and within the ordinary course of agency business. Rules of Evid., Rule 803(6), West's N.C.G.S.A. § 8C-1. *State v. Forte*, 629 S.E.2d 137 (N.C. 2006).

[\*38b] Held inadmissible

The courts in the following cases held, under the particular circumstances presented, that all or part of a police investigative report would not be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

A purportedly exculpatory investigative report discovered in the records of the police department and provided to defense counsel prior to trial was appropriately excluded from evidence in the defendant's murder prosecution, the court held in *Fields v. Com.*, 12 S.W.3d 275 (Ky. 2000). The court pointed out that the subject report was unsigned and consisted primarily of hearsay information obtained by its unidentified author from witnesses who implicated other individuals in the murder of the victim, the report concluding with the statement: "I myself, believe after talking with these people and listening to their stories, that the burglary and murder took place earlier that evening and that the other people had ran off and left [the defendant] because he had gotten" too wild for them, after which the defendant returned to the victim's apartment and "broke in there looking for her." A police officer speculated that the report had been authored by the defendant's father, a former employee of the subject police department who was employed by another police department on the date of the victim's murder, the court pointed out. The defendant's father, the court continued, admitted that he had conducted his own investigation and prepared a report that he furnished to the subject police department, though he was never called upon to identify the particular report. The report consisted almost exclusively of the kind of "investigative hearsay" that has been consistently condemned, the court stressed, the court commenting that this kind of evidence is no more admissible when offered by the defendant than when offered by the commonwealth. Moreover, the court remarked, the subject report did not fall within the business records exception to the hearsay rule, since there was no proof that the person who prepared the report was under a business duty to do so (Ky. Rules of Evidence, Rule 803(6)). If the report was, indeed, prepared by the defendant's father, the court emphasized, he did so at a time when he was not an employee of the subject police department.

The court in *State v. Dorsey*, 706 S.W.2d 478 (Mo. Ct. App. E.D. 1986), held that a police investigative report would not be admissible in the defendant's criminal prosecution pursuant to the business records exception to the hearsay rule. In so ruling, the court rejected the defendant's assertion that the lower tribunal erred in refusing to admit parts of police reports that contained statements of the officer who inspected the crime scene under the business records exception of the hearsay rule, the court commenting that the defendant did not argue in his brief but made the argument at trial that the records would show the defendant was released by the police initially but that a co-defendant was not released. That is, the court stated, the defendant attempted to prove his innocence through the release. The lower tribunal ruled, however, the court continued, that even if the police reports were business records, they would be inadmissible under the circumstances presented. The lower tribunal is necessarily vested with broad discretion in ruling evidentiary matters, the court noted, and here, the lower tribunal correctly ruled in denying the statements contained in the records on grounds other than non-qualification under the Business Records Act, the court concluding that the Act does not make evidence admissible that would be incompetent if offered in person.

In a prosecution for the knowing possession of a motor vehicle with an altered serial number for which no verified statement had been filed with the Division of Motor Vehicles within 10 days of possession and receiving a motor vehicle known to have been stolen and belonging to another, the hearsay of the alleged car owner contained in a police

investigative report was inadmissible under the business records exception to the hearsay rule (N.J.S.A. Rules of Evidence, Rules 8, 63(30)), the court held in *State v. Lungsford*, 167 N.J. Super. 296, 400 A.2d 843 (App. Div. 1979). The court held that the trial judge erred in holding that the hearsay statement of the vehicle owner was admissible under the business records exception, the court adding that while police records may qualify as business records for certain purposes and in certain respects, they are nevertheless not vehicles by which substantive evidential status may be conferred upon the otherwise hearsay declarations of a victim of or witness to a crime, accident, or other occurrence. The business records exception, the court explained, was founded upon the twin principles of reliability and necessity, and originally conceived as an aid to commercial litigation, the theory of the exception is that records made in the usual course of business normally possess a circumstantial probability of trustworthiness. The court pointed out that two criteria, the recording of the information in the usual course of the business activity and the providing of that information by a declarant whose duty it is to supply it truthfully, must be met before the trial judge is free to exercise his discretion in admitting or excluding the business entry based upon his ultimate evaluation of its reliability. Here, the court indicated, the second of these criteria was not met. Obviously, the court related, the making of investigations and the receiving of information concerning crime is usual police business, such that a police record is admissible to prove, for example, that a report of crime was made by a member of the public and when the report was made and received. It is not, however, the court stressed, admissible to prove the truth of the contents of that report since members of the public, whether targets of investigation, witnesses, or victims, are not under a duty, in the nature of a business duty, to make an honest and truthful report. Thus, such "citizen" declarations are virtually universally held to constitute excluded hearsay in respect of otherwise admissible police reports, the court concluded.

<>

Reports admitted by trial court, which were prepared by police department crime laboratory with respect to DNA evidence, did not qualify as business record under exception to hearsay rule and, as technicians who prepared reports did not testify, reports should not have been admitted in prosecution for rape, involuntary deviant sexual intercourse (IDSI), unlawful contact with minor, aggravated indecent assault, endangering the welfare of a child, and corrupting the morals of a minor. Rules of Evid., Rule 803(6), 42 Pa.C.S.A.; 18 Pa.C.S.A. §§ 3123, 3125, 3131, 4304, 6301, 6318. *Com. v. Twitty*, 2005 PA Super 193, 876 A.2d 433 (2005).

[\*39] Offense report

The following authority considered, under the particular circumstances presented, whether all or part of a police offense report would be admissible as evidence under the business records exception to the hearsay rule in a criminal action.

A campus police supervisor would be a qualified witness under the state business records exception to the hearsay rule (Miss. Rules of Evid., Rule 803(6)) for the purposes of testifying about the contents of a police offense report, the court held in *Hurt v. State*, 757 So. 2d 1102 (Miss. Ct. App. 2000). The defendant was convicted by the lower tribunal of taking possession of or taking away a motor vehicle, and the court, on review of the defendant's appeal, affirmed. The defendant contended that the testimony of the police supervisor regarding the contents of the police offense report prepared by a campus police officer was "blatant hearsay" and a violation of his constitutional rights, the defendant further arguing that in allowing the supervisor to testify regarding the contents of the report when he did not prepare it was a violation of Miss. Rules of Evid., Rule 803(6). The defendant, the court pointed out, conceded that the code provision under inquiry provides that either the custodian of records or any other qualified witness may testify about business records and records of regularly conducted activity, such as the police offense report, but he asserted that the state failed to produce the testimony of the custodian or any other qualified witness. The court disagreed, instructing that the supervisor was a qualified witness under the provisions of Miss. Rules of Evid., Rule 803(6). That is, the court remarked, it was clear that the supervisor was present at the time that the victim came in to report the theft of his motor vehicle, and the record was further clear that the supervisor, who was the shift supervisor, and took the victim's oral complaint. Moreover, the court stated, the record clearly indicated that just prior to the time the victim appeared to

report the theft of his automobile, the supervisor had spoken with a deputy about the possible theft of the very same vehicle and had performed a check of the campus parking decal to determine ownership. The defendant perhaps would have a point if the source of the information in the report regarding the time had been the victim, an informant not acting within the course and scope of the activities of the campus police department, the court emphasized. However, the court stressed, the fact that the report was made pursuant to the victim's complaint did not make the victim the source of the information about the time indicated in the report, the court stressing that since the supervisor had personal knowledge about the time that was shown on the offense report, this testimony fell squarely within the meaning of Miss. Rules of Evid., Rule 803(6) and did not constitute inadmissible hearsay.

[\*39.] 5 Autopsy report

The following authority considered whether an autopsy report was admissible in a murder trial under the business or public record exceptions to the hearsay rule.

◇

Findings in autopsy report prepared by Office of the Chief Medical Examiner of New York qualified as business records, and thus findings in report were not testimonial and were not subject to Confrontation Clause requirements; autopsy reports were reports kept in course of regularly conducted business activity, Office conducted thousands of routine autopsies every year, and reports did not constitute observations of a police officer. U.S.C.A. Const.Amend. 6; *Fed.Rules Evid.Rule 803(6)*, 28 U.S.C.A. *U.S. v. Feliz*, 467 F.3d 227 (2d Cir. 2006), for additional opinion, see, 2006 WL 3044420 (2d Cir. 2006).

Redacted autopsy report was admissible in murder trial under the business or public record exceptions to hearsay rule; deputy medical examiner testified that autopsy reports were records kept during the regularly conducted business activity of the Office of the Chief Medical Examiner and that the rough body drawings and notations taken during the autopsy, which were referenced by examiner, were regularly relied upon in the field in order to come to a conclusion or opinion. *Fed.Rules Evid.Rule 803(8)*, 28 U.S.C.A.; West's Ann.Md.Code, Courts and Judicial Proceedings, §§ 10-101(b), 10-204; West's Ann.Md.Code, Health-General, § 5-311(d); West's Ann.Md.Code, State Government, § 10-611(g); Md.Rule 5-803(b)(6). *Rollins v. State*, 392 Md. 455, 897 A.2d 821 (2006).

[\*40] Latent print report

The following authority considered the admissibility in state court proceedings of a police officer's latent print report under the business records exception to the hearsay rule.

◇

Police officer's latent print report, which described activities and results in connection with his lifting fingerprints from apartment that had allegedly been burglarized and forwarding them to police department, was testimonial in nature and could not be admitted under business records exception to hearsay rule; fingerprints were not taken simply for administrative use, rather, they were taken with ultimate goal of apprehending and successfully prosecuting a defendant, regardless of fact that report was not prepared at prosecution's request, and was made before defendant's identity became known. *People v. Hernandez*, 7 Misc. 3d 568, 794 N.Y.S.2d 788 (Sup 2005).

## FOOTNOTES

n1 The present annotation supersedes the annotation at 77 A.L.R.3d 115.

n2 A precise definition of the term "police report" is rendered difficult by the many different types of information that are kept on file by a police agency. Essentially, it is the intent of this annotation to deal with those types of police documents that contain a written account of a specific occurrence or event that has required police investigation. Such items as accident reports and crime reports filled out by the investigating officers are considered police reports for the purposes of this annotation, as are the police logs of phoned-in complaints and transcriptions of police radio communications. Not considered police reports for the purposes of this annotation are those police documents that are kept primarily as records for reference purposes, such as arrest records, fingerprint files, and the like. Similarly, the various types of referential and statistical data that are compiled by other agencies but that are available for police use, are not considered herein.

n3 See *Am. Jur. 2d, Evidence* § 1290.

n4 See *Am. Jur. 2d, Evidence* § 1291.

n5 See, *Am. Jur. 2d, Evidence* §§ 1294 to 1299.

n6 See, for example, *State v. Bertul*, 664 P.2d 1181 (Utah 1983), where the court, reasoning thusly, held that whether police records are admissible depends on the nature of the records and the purpose for which they are offered, the court adding that police records of routine matters are admissible under Utah Rules of Evid., Rule 63(13), such as the day a crime was reported.

n7 See, for example, *Lepire v. Motor Vehicles Division*, 47 Or. App. 67, 613 P.2d 1084 (1980).

n8 See, for example, *Lannon v. Taco Bell, Inc.*, 708 P.2d 1370 (Colo. Ct. App. 1985), where the court, citing CJI-Civ.2d 11:9 and C.R.C.P. 61, held that the lower tribunal's failure to give such an instruction was not reversible error where the party objecting to the admission of a police report failed to demonstrate how the absence of such an instruction was prejudicial to its defense against a suit brought by a plaintiff seeking recovery of damages he sustained when, after perceiving a robbery in progress, he turned and ran, thereby startling the robber, who fired at him, striking him in the hand.

n9 See, for example, *State v. Therriault*, 485 A.2d 986 (Me. 1984), where the court, holding that a police report was admissible pursuant to the governing business records statutory provision (Me. Rules of Evid., Rule 803(6)) despite the fact that the preparer of the pertinent report was dead, rejected the assertion that if the report were admissible at all, it would be so only if it were subject to cross-examination. That is, the court explained, the code provision, by its terms, does not predicate the admission of a business record on the ability of the opposing party to cross-examine the preparer of the record, and the rule applies to all cases where the admissibility of a business record is at issue, regardless of whether the declarant is available. Moreover, the court stressed, the state's inability to cross-examine the preparer of the report offered in the present case was of no consequence to the report's admissibility under the business records exception, such that the trial judge erred in concluding that the subject report was inadmissible because of the state's inability to cross-examine.

n10 See, for example, *State v. Bertul*, 664 P.2d 1181 (Utah 1983).

n11 See, for example, *Hooker v. Com.*, 14 Va. App. 454, 418 S.E.2d 343 (1992).

n12 See, for example, *Mitchell v. State*, 84 Wis. 2d 325, 267 N.W.2d 349 (1978), where the court commented, in a case in which a criminal defendant objected to the introduction of a police telephone report in his prosecution for driving a motor vehicle without the vehicle owner's consent, that the defendant's hearsay objection was not to the details of which the officer had personal knowledge but to the repetition of declarations made by the vehicle owner to the officer over the phone. The business records exception, the court declared, did

not allow admission of this second level of hearsay.

n13 See, for example, *Hurt v. State*, 757 So. 2d 1102 (Miss. Ct. App. 2000), citing Miss. Rules of Evid., Rule 803(6).

n14 See, for example, *Solomon v. Shuell*, 435 Mich. 104, 457 N.W.2d 669 (1990), where the court, citing Mi. R. Rev. M.R.E. 803(6), pointed out that the evolution of the business records hearsay exception from its common-law origins to the current Rules of Evidence further supports this interpretation, the court explaining that, beginning in the 1920s, various model and uniform acts were formulated to ease the burdensome restrictions that had developed under the common-law business records exception. Many of the limitations, such as the narrow definition of "business," the requirements of "originality," and the unavailability of all participants involved in the preparation of a record, no longer served to ensure the practical trustworthiness of the proffered evidence, the court indicated.

n15 See *Kramer v. Barnes*, 212 Cal. App. 2d 440, 27 Cal. Rptr. 895 (1st Dist. 1963).

n16 See *MacLean v. City and County of San Francisco*, 151 Cal. App. 2d 133, 311 P.2d 158 (1st Dist. 1957).

n17 *Mucci v. LeMonte*, 157 Conn. 566, 254 A.2d 879 (1969).

n18 *Adkins v. Lester*, 530 P.2d 11 (Alaska 1974), reh'g denied, 532 P.2d 1027 (Alaska 1975).

n19 *Levin v. Green*, 106 A.2d 136 (Mun. Ct. App. D.C. 1954).

n20 In a subsequent appeal, *Haas v. Kasnot*, 377 Pa. 440, 105 A.2d 74 (1954), the court noted that while the error of the first trial had been avoided in the second trial, it was nevertheless true that one of the police officers, who had not made the record in question, was allowed to read from it that there were three cars involved in the accident, but that this statement was promptly stricken from the record. Moreover, the court added, this officer was able to testify and did testify of his own knowledge that when he came to the scene he saw three cars there "that were wrecked." The court further noted that another policeman who joined in making the report was allowed to use it at the second trial to refresh his recollection, the court being of the opinion that this was obviously permissible as long as the trial court properly refused to allow the record itself to be introduced into evidence.

n21 The court disagreed with that portion of the opinion in an earlier New Jersey case, *State v. Conners*, 125 N.J. Super. 500, 311 A.2d 764 (County Ct. 1973), judgment aff'd on other grounds, 129 N.J. Super. 476, 324 A.2d 85 (App. Div. 1974), in which the court had held that the inspection certificate was admissible "without testimony and cross-examination of the coordinator who tested the machine," as proof that the Breathalyzer was in proper working order.

*State v. Masse*, 1 Conn. Cir. Ct. 381, 24 Conn. Supp. 45, 186 A.2d 553 (App. Div. 1962)  
*State v. Milner*, 206 Conn. 512, 539 A.2d 80 (1988), habeas corpus denied, 1998 WL 851441 (Conn. Super. Ct. 1998), judgment aff'd on other grounds, 63 Conn. App. 726, 779 A.2d 156 (2001)  
*State v. Sharpe*, 195 Conn. 651, 491 A.2d 345 (1985)  
*Swenson v. Sawoska*, 215 Conn. 148, 575 A.2d 206 (1990)  
*Zadroga v. Commissioner of Motor Vehicles*, 42 Conn. Supp. 1, 597 A.2d 848, 4 Conn. L. Rptr. 461 (Super. Ct. 1991)

#### DELAWARE

*Johnson v. State*, 253 A.2d 206 (Del. 1969)

#### GEORGIA

*Brown v. State*, 274 Ga. 31, 549 S.E.2d 107 (2001), on remand to, 251 Ga. App. 80, 553 S.E.2d 386 (2001)  
*Ga. Code Ann. § 24-3-14*  
*Payne v. State*, 232 Ga. App. 591, 502 S.E.2d 526 (1998) (overruled on other grounds by, *Baker v. State*, 252 Ga. App. 695, 556 S.E.2d 892 (2001))

#### HAWAII

*State v. Ing*, 53 Haw. 466, 497 P.2d 575 (1972)  
*Territory of Hawaii v. Makaena*, 39 Haw. 270, 1952 WL 7346 (1952)

#### ILLINOIS

*People v. Tsombanidis*, 235 Ill. App. 3d 823, 176 Ill. Dec. 426, 601 N.E.2d 1124 (1st Dist. 1992)

#### INDIANA

*Canaan v. State*, 541 N.E.2d 894 (Ind. 1989)  
*Olson v. State*, 262 Ind. 329, 315 N.E.2d 697 (1974)  
*Perry v. State*, 541 N.E.2d 913 (Ind. 1989)  
*Riddle v. State*, 273 Ind. 112, 402 N.E.2d 958 (1980), related reference, 491 N.E.2d 527 (Ind. 1986)  
*State v. Edgman*, 447 N.E.2d 1091 (Ind. Ct. App. 4th Dist. 1983)

*Wells v. State*, 254 Ind. 608, 261 N.E.2d 865 (1970)

#### KANSAS

*Smith v. Hall's Estate*, 215 Kan. 262, 524 P.2d 684 (1974)

#### KENTUCKY

*Fields v. Com.*, 12 S.W.3d 275 (Ky. 2000)

*Manning v. Com.*, 23 S.W.3d 610 (Ky. 2000), reh'g denied, (Aug. 24, 2000)

#### LOUISIANA

*Dobson v. Louisiana Power and Light Co.*, 550 So. 2d 1334 (La. Ct. App. 1st Cir. 1989), writ granted, 559 So. 2d 129 (La. 1990) and writ granted, 559 So. 2d 129 (La. 1990) and judgment aff'd in part and amended on other grounds, 567 So. 2d 569 (La. 1990), reh'g denied, (Oct. 18, 1990)

*Southern County Mut. Ins. Co. v. Bryant*, 385 So. 2d 1286 (La. Ct. App. 3d Cir. 1980)

*State v. Gremillion*, 542 So. 2d 1074 (La. 1989), reh'g denied, (June 2, 1989)

*Ziamba v. City of New Orleans*, 411 So. 2d 697 (La. Ct. App. 4th Cir. 1982)

#### MAINE

*State v. Therriault*, 485 A.2d 986 (Me. 1984)

#### MARYLAND

*Aetna Cas. & Sur. Co. v. Kuhl*, 296 Md. 446, 463 A.2d 822 (1983)

*Ali v. State*, 314 Md. 295, 550 A.2d 925 (1988)

*Ali v. State*, 314 Md. 295, 550 A.2d 925 (1988) (abrogation recognized on other grounds by, *Wiggins v. State*, 352 Md. 580, 724 A.2d 1 (1999))

*Holcomb v. State*, 307 Md. 457, 515 A.2d 213 (1986)

*Honick v. Walden*, 10 Md. App. 714, 272 A.2d 406 (1971)

*Schear v. Motel Management Corp. of America*, 61 Md. App. 670, 487 A.2d 1240 (1985)

#### MASSACHUSETTS

*Com. v. Alves*, 6 Mass. App. Ct. 572, 380 N.E.2d 701 (1978)

*Com. v. Meech*, 380 Mass. 490, 403 N.E.2d 1174 (1980)

*Com. v. Trapp*, 396 Mass. 202, 485 N.E.2d 162 (1985), appeal after remand on other grounds, 423 Mass. 356, 668 N.E.2d 327 (1996)

*Julian v. Randazzo*, 380 Mass. 391, 403 N.E.2d 931 (1980)

*Kelly v. O'Neil*, 1 Mass. App. Ct. 313, 296 N.E.2d 223 (1973)

*Kelly v. O'Neil*, 1 Mass. App. Ct. 313, 296 N.E.2d 223 (1973) (by implication)

*Mass. Gen. Laws Ann. ch. 233, § 78*

#### MICHIGAN

*Hewitt v. Grand Trunk Western R. Co.*, 123 Mich. App. 309, 333 N.W.2d 264 (1983)

*Mich. Comp. Laws Ann. § 257.624*

*Moncrief v. City of Detroit*, 398 Mich. 181, 247 N.W.2d 783 (1976)

*People v. Miller*, 88 Mich. App. 210, 276 N.W.2d 558 (1979), judgment rev'd on other grounds, 411 Mich. 321, 307 N.W.2d 335 (1981)  
*Solomon v. Shuell*, 435 Mich. 104, 457 N.W.2d 669 (1990)

#### MINNESOTA

*City of Fairmont v. Sjostrom*, 280 Minn. 87, 157 N.W.2d 849 (1968)  
*City of Fairmont v. Sjostrom*, 280 Minn. 87, 157 N.W.2d 849 (1968) (apparently recognizing rule)  
*Minn. Stat. Ann. § 600.01*

#### MISSISSIPPI

*Copeland v. City of Jackson*, 548 So. 2d 970 (Miss. 1989)  
*Hurt v. State*, 757 So. 2d 1102 (Miss. Ct. App. 2000)  
*Mississippi State Dept. of Human Services v. Fargo*, 771 So. 2d 935 (Miss. Ct. App. 2000), reh'g denied, (Aug. 29, 2000)

#### MISSOURI

*Ellis v. Smith*, 640 S.W.2d 163 (Mo. Ct. App. E.D. 1982)  
*Hamilton v. Missouri Petroleum Products Co.*, 438 S.W.2d 197 (Mo. 1969)  
*Mo. Ann. Stat. § 490.660*  
*Mo. Ann. Stat. § 490.680*  
*Mo. Ann. Stat. § 490.690*  
*Nash v. Sauerberger*, 629 S.W.2d 491 (Mo. Ct. App. E.D. 1981)  
*Nelson v. Holley*, 623 S.W.2d 604 (Mo. Ct. App. W.D. 1981)  
*Nelson v. Holley*, 623 S.W.2d 604 (Mo. Ct. App. W.D. 1981).  
*Penn v. Hartman*, 525 S.W.2d 773 (Mo. Ct. App. 1975)  
*Ryan v. Campbell "66" Exp., Inc.*, 304 S.W.2d 825 (Mo. 1957)  
*Ryan v. Campbell "66" Exp., Inc.*, 304 S.W.2d 825 (Mo. 1957) (recognizing rule)  
*State ex rel. Pini v. Moreland*, 686 S.W.2d 499 (Mo. Ct. App. E.D. 1984)  
*State v. Cuno*, 869 S.W.2d 285 (Mo. Ct. App. E.D. 1994)  
*State v. Dorsey*, 706 S.W.2d 478 (Mo. Ct. App. E.D. 1986)  
*State v. Taylor*, 486 S.W.2d 239 (Mo. 1972)  
*State v. Vance*, 633 S.W.2d 442 (Mo. Ct. App. W.D. 1982)  
*Stegall v. Wilson*, 416 S.W.2d 658 (Mo. Ct. App. 1967)  
*Stegall v. Wilson*, 416 S.W.2d 658 (Mo. Ct. App. 1967) (recognizing rule)  
*Thomas v. Wade*, 361 S.W.2d 671 (Mo. 1962)

#### NEBRASKA

*Doe v. Gunny's Ltd. Partnership*, 256 Neb. 653, 593 N.W.2d 284 (1999)  
*Sacco v. Carothers*, 257 Neb. 672, 601 N.W.2d 493 (1999)

#### NEVADA

*Miranda v. State*, 101 Nev. 562, 707 P.2d 1121 (1985)  
*Nev. Rev. Stat. § 51.135(1)*

#### NEW JERSEY

*Brown v. Mortimer*, 100 N.J. Super. 395, 242 A.2d 36 (App. Div. 1968)  
 N.J. Stat. Ann. 2A:82-34  
 N.J. Stat. Ann. 2A:82-35  
*Rogalsky v. Plymouth Homes, Inc.*, 100 N.J. Super. 501, 242 A.2d 655 (App. Div. 1968), certification denied, 52 N.J. 167, 244 A.2d 298 (1968) and (overruled on other grounds by, *State v. LaBrutto*, 114 N.J. 187, 553 A.2d 335, 81 A.L.R.4th 853 (1989)) (apparently recognizing rule)  
*Sas v. Strelecki*, 110 N.J. Super. 14, 264 A.2d 247 (App. Div. 1970)  
*Schneiderman v. Strelecki*, 107 N.J. Super. 113, 257 A.2d 130 (App. Div. 1969), certification denied, 55 N.J. 163, 259 A.2d 915 (1969)  
*State v. Lungsford*, 167 N.J. Super. 296, 400 A.2d 843 (App. Div. 1979)  
*State v. Matulewicz*, 101 N.J. 27, 499 A.2d 1363 (1985)  
*State v. McGeary*, 129 N.J. Super. 219, 322 A.2d 830, 77 A.L.R.3d 106 (App. Div. 1974)  
*State v. McGeary*, 129 N.J. Super. 219, 322 A.2d 830, 77 A.L.R.3d 106 (App. Div. 1974) (recognizing rule)  
*State v. Weller*, 225 N.J. Super. 274, 542 A.2d 55 (Law Div. 1986)

## NEW YORK

JURISDICTIONAL TABLE OF STATUTES AND CASES

INDEX OF TERMS

TABLE OF REFERENCES

ARTICLE OUTLINE

**ARTICLE:** [\*I] Introduction

[\*1] Preliminary matters

[\*1a] Scope

This annotation<sup>1</sup> collects the reported cases which have expressly considered issues relating to the admissibility and sufficiency, in a prosecution<sup>2</sup> for violation of speed regulations,<sup>3</sup> of evidence obtained by the use of a radar speedmeter or other mechanical or electronic device which automatically registers the speed of passing vehicles.

Although some of the issues considered herein are governed in some jurisdictions by statutes or ordinances, these laws are discussed only to the extent that they are reflected in the reported cases pertinent to this annotation; and no attempt has otherwise been made to state the relevant statutory law in any jurisdiction.

[\*2] Summary and comment

[\*2a] Generally

The cases which have considered issues relating to the admissibility and sufficiency of radar evidence have indicated that there are three basic prerequisites to a conviction of speeding based upon radar readings: (1) the scientific reliability of the radar speedmeter as a recorder of speed; (2) the accuracy of the particular speedmeter used in a given case; and

(3) the proper operation of the radar equipment.

Although the early cases involving radar evidence required expert testimony as to the nature and function of a radar speedmeter and the scientific principles upon which it was based,<sup>n4</sup> it is now generally agreed that the reliability of radar is a proper subject for judicial notice.<sup>n5</sup> There has also been some legislative acceptance of the radar speedmeter;<sup>n6</sup> and statutory provisions permitting the use of radar in speed regulation enforcement have been held to eliminate the necessity, in speeding prosecutions, of presenting expert evidence as to radar's ability to measure speed.<sup>n7</sup>

While the general reliability of radar may be judicially noticed, it is still necessary in each speeding prosecution based on radar evidence to prove the accuracy of the particular speedmeter involved,<sup>n8</sup> although there is some disagreement as to whether the accuracy issue is one affecting the admissibility of radar evidence,<sup>n9</sup> or only its sufficiency.<sup>n10</sup>

Among the various methods of testing the accuracy of a radar speedmeter,<sup>n11</sup> the most commonly employed tests are those performed by holding calibrated tuning forks in front of the speedmeter's receiver, and by driving through the radar beam a police patrol car equipped with a calibrated speedometer. The cases themselves do not establish any definite guidelines regarding the proper time and place of conducting tests upon the accuracy of a radar device;<sup>n12</sup> and the sufficiency of the proof offered to establish the accuracy of a radar speedmeter is a matter determined largely in the light of the facts of each particular case.<sup>n13</sup> There is widespread agreement, however, that the adequacy of any test for accuracy is dependent upon the accuracy of the testing apparatus itself, although there is some authority to the contrary.<sup>n14</sup>

Under statutory provisions pertaining to radar evidence in speeding prosecutions, it has been held that in requiring proof of the machine's accuracy, the legislature did not intend to demand absolute exactness.<sup>n15</sup> And with regard to accuracy certificates executed in accordance with statutory provisions, and offered as proof of radar speedmeter accuracy, one case has held that the certificate need not contain the explicit statement that the speedmeter tested had, in fact, been found to be accurate,<sup>n16</sup> while in another case the certificate was ruled inadmissible for failing to state explicitly that the testing apparatus was itself accurate.<sup>n17</sup>

The cases agree that to sustain a speeding conviction on radar evidence, it must be shown that the radar device was properly operated; in this connection, it is also generally conceded that the police officer operating the speedmeter need not be an expert in the science of radar or of electronics in order to be considered properly qualified to work the device and to testify as to its readings.<sup>n18</sup>

Where the statute permitting the use of radar in speed regulation enforcement requires that the particular device used be of an approved type, it has been held that affirmative proof that the radar equipment used to time a motorist's speed was actually approved by the proper authority is necessary to a conviction based upon evidence obtained by the equipment.<sup>n19</sup> And where radar warning signs are required by statute, it has been held that proof of the erection of these signs is a prerequisite to a speeding conviction based on radar evidence.<sup>n20</sup> But it has also been held that the warning signs need not be so placed<sup>n21</sup> or so worded<sup>n22</sup> as to indicate that radar is, at the time, being used in the immediate area of the signs, since the purpose of the signs is only to give motorists adequate notice that radar may be in use at some point along the road on which they are traveling.<sup>n23</sup> An objection based upon a structural deficiency in a radar warning sign was upheld in one case, however, where the sign was inadequately illuminated or reflectorized to comply with statutory requirements.<sup>n24</sup>

The argument that the use of a radar speedmeter constituted a "speed trap," and hence was entrapment, has been rejected.<sup>n25</sup> And courts have also denied that a statutory provision permitting state police "officers" to use radar equipment in speed regulation enforcement required that a speedmeter be operated by more than one officer.<sup>n26</sup>

The contention that the officers operating radar equipment had mistakenly identified the defendant's vehicle as the vehicle detected speeding by the radar device was held not supported by the evidence in those cases where it was

raised.n27

Because of the possibility of error existing even in a tested radar speedmeter, there is some authority to the effect that a speeding conviction will not be sustained where the radar evidence indicates that the defendant motorist was traveling only slightly in excess of the legal speed limit.n28

In addition to the radar speedmeter, law enforcement officers have made use of several other electronic or mechanical devices in an effort to detect speeding violations. Where there was sufficient evidence to establish the scientific reliability, the accuracy, and the proper operation of the device in question, speeding convictions were sustained on evidence obtained by the use a "speed watch,"n29 a "Photo-Speed-Recorder,"n30 a "Foto-Patrol,"n31 and a "visual average speed computer recorder" (VASCAR).n32 But in the absence of adequate evidence establishing the accuracy of "speed watch" equipment and the qualifications of the officer operating it, speeding charges based on evidence produced by the device were dismissed.n33

[\*2b] Practice pointers

One of the most dramatic innovations in traffic law enforcement is the introduction of the radar speedmeter to record the rates of speed of vehicles suspected of going faster than the speed limit prescribed for the area of road on which they are traveling. The radar speedmeter was originally developed for use by traffic engineers in studying vehicle speeds in relation to zoning, curves, grades, intersection approaches, etc. Soon after it was developed, however, police and highway departments began using it to obtain information recording speed habits of drivers in different localities, to establish speed zones, and later, to enforce speed laws. The radar speedmeter has obtained its most widespread publicity in this latter field. And it is this latter type of radar speed reading that most often finds its way into court as evidence.n34

Radar devices are of two general types. The "pulse" type radar used by the military operates by sending forth at regular intervals a beam of radio microwaves which, coming into contact with the object to be detected, is reflected or bounced back to the receiver. The waves move in both directions at the speed of light, so that by computing the time lapse between sending and reception, the distance of the detected object may be determined, and by computing distance changes over a time interval, the speed of movement of the object can be learned. The radar speed-testing devices used in traffic control operate by a similar but distinct method, in which a continuous beam of microwaves is sent out at a fixed frequency, the operation depending upon the physical law that when such waves are intercepted by a moving object, the frequency changes in such a ratio to the speed of the intercepted object that by measuring the change of frequency, the speed may be determined.n35

In operation the radar device is set up along the side of the road, usually in or upon a parked police car, with the beam played along the highway. When the attached graph or dial shows that a passing car is speeding, the police officer in the car radios ahead a description of the car to another officer stationed some distance farther on, and the car is intercepted by this officer.n36

Generally speaking, there are three methods of checking the accuracy of a radar speedmeter.n37 Internal tests may be performed using test equipment and procedures to check such things in the instrument itself as the crystal detector, the cavity output, the frequency calibration, and the indicator calibration. An alternate method of calibrating the indicator circuit to within an accuracy of better than one percent is by utilizing a universally accepted means of producing constant frequency waves -- a tuning fork. Tuning forks are often manufactured and calibrated by the same company which manufactures the radar device and are shipped with the device as part and parcel of the total radar apparatus. These forks are cut in such a manner as to emit frequencies which will register certain readings upon a radar set which is properly operating, and the reading to be registered is usually marked upon the fork itself. A third method of testing is performed by two police officers, one of whom operates the radar machine itself while the other drives through the radar "zone of influence" a police patrol car equipped with a calibrated speedometer. By radio messages, the officers are

able to compare the readings upon the patrol car's speedometer with those readings registered upon the radar speedmeter. This type of test raised hearsay problems in early speeding prosecutions based on radar evidence,<sup>n38</sup> where the comparative readings of the speedometer and speedometer were presented in the testimony of a single police officer. In more recent cases, each police officer is asked to testify as to the reading which he observed on the instrument in his presence. The similarity between the readings becomes obvious, and the hearsay problem is overcome.<sup>n39</sup> A fourth type of test involved the use of what was called, in *People v Lynch (1969) 61 Misc 2d 117, 304 NYS2d 985*, infra § 7[b], an "internal switch," which activated a calibrated electronic tone within the machine itself, which was calibrated to register a certain speed on the radar unit's meter.

Cases concerned with the legal sufficiency, in various aspects, of methods of checking the accuracy of a radar speedmeter are collected in §§ 6-8, infra.

[\*II] Admissibility and sufficiency of evidence obtained by use of radar speedmeter

[\*A] Reliability of radar generally

[\*3] General rule in absence of statute that judicial notice may be taken of radar's ability to measure speed

When data secured by radar speedmeters are proffered in evidence, the first question presented to the courts is the general one of whether it can be assumed or judicially noted that the principle involved, and the means of applying that principle to the problem in question, are so clearly apt to the end in view as to show without expert testimony that it is in fact feasible to detect speed with this device.<sup>n40</sup> In most of those jurisdictions in which this question has been presented, apparently in the absence of relevant statute, it has been held, as the following cases indicate, that judicial notice might be taken of the general reliability of a radar speedmeter to measure the speed of motor vehicles.

In *Everight v Little Rock* (1959) 230 Ark 695, 326 SW2d 796, the court said that the usefulness of radar equipment for testing the speed of vehicles had become so well established that the testimony of an expert to prove the reliability of radar in this respect was not necessary, and that judicial knowledge of such fact could be taken by the courts.

In reversing a dismissal of a speeding prosecution based upon evidence obtained by the use of a radar device, the court in *People v MacLaird* (1968) 264 Cal App 2d 972, 71 Cal Rptr 191, held that the trial judge had erred in refusing to take judicial notice of the use, validity, and accuracy of a radar device as a scientific method of measuring speed, and that the prosecution should not have been required to call an expert witness to establish this commonly known and accepted proposition. The court was careful to point out, however, that taking judicial notice of the principle of radar as an electronic device which scientifically and accurately measured the speed of moving objects was altogether different from judicially noticing the accuracy and operating efficiency of the particular radar device used to measure the speed of the defendant's vehicle in a particular case.

It was held in *State v Tomanelli* (1966) 153 Conn 365, 216 A2d 625, that the scientific accuracy of the Doppler-shift principle for the measurement of speed, if the principle was correctly applied, was, in the discretion of the trial court, a proper subject of judicial notice, so that especially where, as in this case, no evidence attacking it was proffered, expert testimony in explanation of the principle was not a necessary prelude to the introduction of radar evidence.

Noting that eminently qualified expert testimony had been offered to establish the principle of Radio Detection and Ranging as being the use of exact laws of science and nature in the measurement of distance and speed, the court in *State v Graham* (1959, Mo App) 322 SW2d 188, pointed out that this principle was supported by the evidence in a great many cases and by the declarations of numerous authorities, and held that it was now time for the courts, which must of necessity maintain a conservative attitude, to recognize by judicial knowledge that a radar speedometer was a device which, within a reasonable engineering tolerance, and when properly functioning and properly operated, could accurately measure speed in terms of miles per hour.

Noting that since World War II, members of the public had become generally aware of the widespread use of radar methods, and did not question the general accuracy and effectiveness of such methods, the court in *State v Dantonio* (1955) 18 NJ 570, 115 A2d 35, 49 ALR2d 460, said that it would seem that radar speedometer readings should be received in evidence upon a showing that the meter was properly set up and tested by the police officers, without any need for independent expert testimony by electrical engineers as to its general nature and trustworthiness. The court added that the possibility of error would not wholly vitiate the admissibility of the evidence but would simply affect its weight, the state conceding that the readings were not conclusive but merely constituted admissible evidence to be weighed by the trier of facts.

In New York, expert testimony was required in all speeding prosecutions based upon radar evidence,<sup>n41</sup> until the Court of Appeals in *People v Magri* (1958) 3 NY2d 562, 170 NYS2d 335, 147 NE2d 728, first recognized the general reliability of the radar speedometer as a device for measuring the speed of motor vehicles, and declared that it would no longer be necessary in each speeding prosecution to produce an expert to testify regarding the nature and function of a speedometer and the scientific principles underlying its operation.

Prior to the decision in *Magri* (NY) supra, the propriety of taking judicial notice of the general effectiveness of a tested radar speedometer was recognized in *People ex rel. Igoe v Nasella* (1956) 3 Misc 2d 418, 155 NYS2d 463, although in finding a motorist guilty of speeding upon evidence obtained by the use of a radar device, the court based its ruling as to the admissibility of the radar evidence upon expert testimony regarding the reliability of radar in measuring speed, and upon evidence offered to prove the proper testing and operation of the particular device used in this case. As to the contention that taking judicial notice would, in effect, raise the radar readings to such final and conclusive proof of guilt as to foreclose all chance of exculpation, the court agreed that, to a marked degree, a speeding trial would become a contest between man and machine, but asserted that in view of the conceded engineering tolerance, approximating 2 miles per hour, in the radar device, the weight to be accorded the machine's readings in the face of the entire proof in each case would still be a substantial question for the trier of fact.

Pointing out that it was proper to take judicial notice of the general reliability of radar to measure speed, the court in *People v Wylie* (1958) 13 Misc 2d 310, 179 NYS2d 901, affirmed a speeding conviction, and held that the defendant motorist's rights on appeal were not prejudiced as a result of the failure of the court stenographer's stenograph machine to record the expert testimony offered by the prosecution to explain the nature and function of the speedometer which was used to clock the motorist's speed. The court stated that the expert's testimony was superfluous and not at all necessary to the prosecution's case, and pointed out, without discussion, that the well-presented-and-prepared prosecution case showed convincingly that the radar device was properly tested and operated.

Radar evidence was held properly admitted in a prosecution for violation of speed regulations in *Hardaway v State* (1957) 202 Tenn 94, 302 SW2d 351, the court reviewing extensive expert testimony regarding the construction, theory, operation, and accuracy of radar equipment. In affirming a speeding conviction, however, the court emphasized that

radar evidence was not to be considered conclusive, but was simply admissible and subject to cross-examination, leaving to the triers of fact the determination of the weight to be given the radar evidence in view of all the other evidence. The court pointed out that the propriety of taking judicial notice of the accuracy of a radar speedometer was not presented in this case, since a noted electronics expert had testified as to the accuracy of the instrument used here; but the court expressed approval of recent cases in which such judicial notice was taken, and suggested that the question might be settled by a legislative enactment.

&lt;&gt;

In charging the jury, the court in *State v Moffitt* (1953) 48 Del 210, 100 A2d 778, explained that its ruling that radar evidence of speeding was admissible was based upon expert testimony regarding the construction, the operation, and the purpose of a radar speedometer, its margin of error when properly functioning, and the ways and means of testing its accuracy. The court then submitted to the jury the question whether, under all the circumstances of the present case, the radar device was in fact accurate in its measurement of the speed of the defendant's vehicle.

There is, in addition to the earlier New York cases discussed supra, some authority to the effect that expert testimony explaining the nature and functions of a radar speedometer is essential in a speeding prosecution based upon radar evidence.<sup>n42</sup>

&lt;&gt;

Traffic court properly convicted driver of speeding based on radar indication of speed, where driver challenged only general reliability of radar speed-measuring devices and no evidence suggested that particular unit used by officer was improperly calibrated or operated. *State v Kane* (1992, Idaho App) 836 P2d 569 (citing annotation).

Laser evidence to measure the speed of vehicles constituted new or novel evidence, and thus a Frye hearing had to be held before the evidence could be admitted in trial against motorist charged with speeding violation; the issue of scientific acceptance of laser technology to measure the speed of vehicles had not been adequately litigated. *People v. Canulli*, 275 Ill. Dec. 207, 792 N.E.2d 438 (App. Ct. 4th Dist. 2003).

Evidence as to reliability of radar as means of detecting speed was not precluded solely by fact that judicial notice had been taken of radar's reliability, thus trial court erred in excluding testimony of defendant, who was expert witness, as to reliability of radar devices in general. *People v Beil* (1979) 76 Ill App 3d 924, 32 Ill Dec 290, 395 NE2d 400.

Evidence obtained through the use of a radar gun is analyzed as scientific evidence, and is admissible provided there is proof that the test device was operating accurately and that the test was performed by qualified individuals. *State v. Cochrane*, 897 A.2d 952 (N.H. 2006).

In prosecution for speeding trial court erroneously admitted into evidence speed reading obtained by speed measuring device where state failed to prove scientific reliability of device either by expert testimony or through judicial notice. *State v Musgrave* (1979) 171 NJ Super 477, 410 A2d 64.

See *State v Finkle*, 128 NJ Super 199, 319 A2d 733 affd 66 NJ 139, 329 A2d 65, § 19.

In prosecution for speeding, testimony by police officer that he clocked defendant at 62 mph with moving radar device and that device was calibrated and in good working order was insufficient to sustain conviction for speeding where there was no expert testimony concerning technical theory of operation of device nor any testimony as to its scientific accuracy and reliability; although expert testimony is not necessary in cases involving stationary radar units, judicial

notice of moving radar has not been established and, although one type of moving radar device has been given judicial notice by at least one appellate court, this notice does not automatically extend to all models of moving radar and did not extend to particular model used by police officer. *Kirtland Hills v Logan* (1984, Lake Co) 21 Ohio App 3d 67, 21 Ohio BR 71, 486 NE2d 231.

Judicial notice of radar set's accuracy was not proper where defendant presented expert testimony calling accuracy into question and state failed to present rebuttal expert testimony attesting to set's accuracy. *State v Freeman* (1985) 24 Ohio Misc 2d 7, 24 Ohio BR 131, 493 NE2d 571.

In prosecutions for speeding prosecution is not required to call expert witnesses to establish accuracy of radar. *Masquelette v State* (1979, Tex Crim) 579 SW2d 478.

For purposes of demonstrating the reliability of radar evidence, the underlying scientific theory of radar is valid as a matter of law. *Maysonet v. State*, 91 S.W.3d 365 (Tex. App. Texarkana 2002).

Even though trial court may take judicial notice of reliability of underlying principles of speed radar detection based on Doppler effect, court erred in taking judicial notice as to reliability and accuracy of moving radar device; prosecution failed to carry its burden of proof as to accuracy of device where trooper failed to establish use of verify button to ascertain squad car's speed as entered into radar's speed equation. *State v Hanson* (1978) 85 Wis 2d 233, 270 NW2d 212 (citing annotation).

[\*4] Effect of statutory provisions permitting use of radar in speed regulation enforcement

As the following cases indicate, the effect of statutes permitting the use of radar speedmeters to enforce speed regulation is to foreclose the question whether expert testimony is necessary to establish the reliability of a speedmeter as a speed detection device.

In *United States v Dreos* (1957, DC Md) 156 F Supp 200, where a motorist was charged with speeding on the Baltimore-Washington Parkway, a road under the concurrent jurisdiction of the State of Maryland and the United States, it was said that the use of a radar speedmeter, like the use of cameras and X-rays, had reached such general acceptance by state legislatures, executive departments of state and Federal Governments, courts, and the public, that it was no longer necessary for the prosecution to offer expert testimony, as it did in this case, to explain the theory and operation of the radar equipment, at least where there was a statute or regulation similar to applicable sections of the Maryland Code and National Capital Parks Regulations permitting radar speed detection. The court said that it was sufficient to show that the equipment had been properly tested and checked, that it was manned by a competent operator, that proper operative procedures were followed, and that proper records were kept. Adding that the evidence in the instant case showed that all these requirements were complied with, the court concluded that it was shown beyond a reasonable doubt that the defendant was driving at least 65 miles per hour where the maximum speed permitted was 55 miles per hour.

Citing numerous cases holding that, without statutory aid, the data obtained by the use of scientific instruments for measuring speed was admissible in a speeding prosecution only after expert witnesses had testified as to the theory, operation, and accuracy of the instruments, the court in *Royals v Commonwealth* (1957) 198 Va 876, 96 SE2d 812, pointed out that the Virginia radar statute made the rate of speed indicated by radio microwaves or other electrical devices admissible evidence in any proceeding where the speed of a motor vehicle was at issue, without the necessity of proving by expert testimony the theory and operation of the method of measuring speed; but the court emphasized that the statute did not eliminate the necessity for the prosecution to prove that the machine used for measuring speed had been properly set up and recently tested for accuracy. And a speeding conviction was reversed in this case, because the prosecution had failed to introduce "any legal evidence" tending to show that the radar machine to measure the speed of the defendant motorist had been properly set up and recently tested for accuracy.

In *Thomas v Norfolk* (1966) 207 Va 12, 147 SE2d 727, a speeding prosecution based upon radar evidence, the action of a trial judge in declining to allow the defendant motorist to question the accuracy of radar as a reliable method of determining the speed of his car was held proper and in accord with the terms of the Virginia statute permitting the use of radio microwaves or other electrical devices to check the speed of motor vehicles, and further providing that "[t]he results of such checks shall be accepted as prima facie evidence of the speed of such motor vehicle in any court or legal proceedings where the speed of the motor vehicle is at issue." Rejecting the motorist's argument that the trial judge was, in effect, creating a conclusive presumption that the radar set was accurate at the time of the alleged offense, the court pointed out that the ruling was directed at the motorist's intention to introduce expert testimony to contest the basic reliability of the radar set in question as opposed to the proper testing of that set, and noted that the trial judge's ruling specifically protected the motorist's right to elicit or present testimony as to the proper or improper testing of the unit.

On a related note the validity of these statutes has been upheld in several cases.

Thus, a motorist's argument that he was denied due process of law in violation of the Federal Constitution by a statutory provision which permitted the use of radar in speed regulation enforcement was rejected in *Commonwealth v Gideon* (1962) 28 Pa D & C2d 157, 4 Adams Co Leg J 11, the court affirming the motorist's conviction of speeding at 60 miles per hour in a zone where speed was restricted to 50 miles per hour. The motorist contended that the statute placed an unconscionable burden on motorists, since the use of radar allowed an instantaneous timing of speed for fractions of a second, making it impossible for the motorists to disprove charges of speed violations. The motorist also argued that electronic devices such as the radar speedmeter were subject to error and might be affected by various factors such as weather conditions, X-ray machines, welding apparatus, the presence of iron ore, or any large moving objects, and that a motorist apprehended for speeding by the use of radar could not be expected to know of the presence of the myriad factors that might affect the radar reading. Noting that the motorist's speed was not timed only for an instant but over the course of 300 feet which, at a speed of 60 miles per hour, would have been traversed in 3 1/3 seconds, the court pointed out that the motorist had offered no evidence to show that radar generally, or the equipment used in this case, was not accurate; and that there was no indication in the record of the presence of any accuracy-affecting factors in the vicinity of the radar unit used to time the defendant motorist's speed. On the contrary, the court said, the officer operating the equipment testified specifically that there were no X-ray machines or power stations in the vicinity, and that there was no other traffic moving at the time. The court also observed that many other jurisdictions had accepted the use of radar in measuring the speed of motor vehicles, and pointed to the complete lack of any cases in which the use of radar as a means of measuring speed had been held to be unconstitutional. The court concluded that the use of radar to measure speed could properly be added to the list of scientific discoveries which have been judicially accepted.<sup>n43</sup>

In affirming a speeding conviction based upon radar evidence which indicated that the defendant motorist was operating his motor vehicle at a speed of 62 miles per hour in a 55-mile-per-hour zone, the court in *Dooley v Commonwealth* (1956) 198 Va 32, 92 SE2d 348, app dismd 354 US 915, 1 L Ed 2d 1432, 77 S Ct 1377, held that the due process clause of the Fourteenth Amendment to the Constitution of the United States was not contravened by a statutory provision permitting "the use of radio microwaves or other electrical device" to check the speed of motor vehicles, and further providing that "[t]he results of such checks shall be accepted as prima facie evidence of the speed of such motor vehicle in any court or legal proceedings where the speed of the motor vehicle is at issue." The court said that the test generally applied to determine the constitutionality of statutes making proof of a certain fact prima facie or presumptive evidence of another fact was whether there was a natural and rational evidentiary relation between the fact proven and the fact presumed. That there was a natural and rational evidentiary relation existing between the results of a speed checked by radio microwaves and the speed of the motor vehicle checked by them, could hardly be denied, said that court, adding that in recent years the public had become generally aware of the widespread use of radio microwaves or other electrical devices in detecting the speed of motor vehicles or other moving objects; and that while the intricacies of such devices might not be fully understood, their general accuracy and effectiveness were not seriously questioned. Emphasizing that the proper testing of the machine was a matter stipulated by the parties, and that no attempt had been made to show that the radar equipment did not properly record the defendant's speed, the court pointed out that if any of those conditions

and happenings which the defendant argued could affect the correct reading of radar under given circumstances had actually occurred, the defendant could have introduced evidence to rebut the prima facie presumption created by the statute. And the court stated that the statute did not shift the burden of proof, as contended by the defendant, but merely created a rule of evidence under which the burden of going forward with evidence shifted to the defendant after the prosecution had offered the radar check of the speed of the defendant's motor vehicle as proof of excessive speed. The statute did not determine the guilt of the defendant, the court said, nor did it shift the burden of ultimate proof, nor deprive the defendant of the presumption of innocence. The court concluded that the statute was a valid enactment.n44

<>

Statutory conditions for admissibility of radar results were met where officer operating device was sufficiently trained in classroom and in field, officer testified as to setting up and operating device, device was operated with minimal distortion or interference, and device was tested by accurate external methods when it was set up, by means of tuning fork and speedometer of squad car, both of which had been recently calibrated. *State v Dow (1984, Minn App) 352 NW2d 125.*

Trial court in speeding prosecution properly admitted evidence of radar speed measurement under statute recognizing accuracy of radar devices and authorizing use of results in evidence, where officer testified that he was qualified to use device and that it was operating properly at time of speed measurement. *Billings v Skurdal (1986, Mont) 730 P2d 371, cert den (US) 95 L Ed 2d 508, 107 S Ct 1902, reh den (US) 96 L Ed 2d 384, 107 S Ct 2492.*

[\*B] Accuracy of particular radar set

[\*5] Necessity of proving accuracy

[\*5a] View that evidence of accuracy is a prerequisite to admissibility of radar evidence

A basic element of proof in a speeding prosecution based upon radar evidence involves the accuracy of the particular radar unit used to clock the defendant motorist's speed; and the cases generally agree that no conviction may be had upon radar evidence alone, absent proof of the machine's accuracy. Whether this accuracy issue is one affecting the admissibility of radar evidence or merely its sufficiency is not so clear-cut. The following cases have taken the view that evidence tending to show the accuracy of the particular speedometer involved in a given case is a necessary prerequisite to the admissibility of evidence of speed obtained by the use of the speedometer.

*Seattle v Peterson* (1985) 39 *Wash App* 524, 693 P2d 757 (citing annotation)

Pointing out that judicial notice could extend only to the scientific accuracy of the Doppler-shift principle as a means of measuring speed if the principle was correctly applied, the court in *State v Tomanelli* (1966) 153 *Conn* 365, 216 A2d 625, stated that judicial notice did not extend to the accuracy or efficiency of any given instrument designed to employ the principle, and that whether the instrument itself was accurate and was accurately operated must necessarily be demonstrated to the satisfaction of the trier in order to render the evidence produced by it admissible.

In outlining the various prerequisites to the admissibility of radar evidence in a prosecution for violation of speed regulations, the court in *State v Graham* (1959, *Mo App*) 322 SW2d 188, noted, as a general rule, that the character of the radar device was such that to be acceptable as correctly indicating speed, it must have been carefully tested and found to be correct at or near the time of its use in traffic regulation.

◇

See *Aurora v McIntyre* (1986, *Colo*) 719 P2d 727, § 7[d].

Once State introduced a certified copy of the Department of Public Safety's (DPS) list of approved laser speed detection devices in trial for speeding, evidence of speed measured by an approved laser speed detection device was admissible. *O.C.G.A. § 40-14-17. Odum v. State*, 564 S.E.2d 490 (*Ga. Ct. App.* 2002).

See *People v Burch*, 19 *Ill App 3d* 360, 311 NE2d 410, § 8[a].

Although in defendant's case judge, over defendant's objection, permitted police officer to testify as to radar readings without requiring foundation regarding radar unit's accuracy and although defendant's conviction for speeding was

upheld, court noted that in any speeding case tried after date of present opinion, where radar readings from untested equipment are admitted over objection and without independent corroborative evidence, any judgment of guilt would be reversed. *Commonwealth v Whyngaught (1979) 377 Mass 14, 384 NE2d 1212*.

Officer complied with relevant servicing requirements under *Ferency*, which imposed certain requirements on admission of radar speedometer readings into evidence, in speeding case; although motorist elicited testimony from officer at hearing indicating that radar speedometer had not been serviced for approximately 13 months, officer testified that, on basis of his training and instruction, the Michigan Speed Measurement Task Force did not recommend any servicing for speedometer unit, and thus, requirement at issue only mandated service as recommended, and did not mandate any specific actions. *City of Adrian v. Strawcutter, 259 Mich. App. 142, 673 N.W.2d 469 (2003)*.

See *State v Dow (1984, Minn App) 352 NW2d 125, § 4*.

Testimony by officer that he calibrated radar gun with two tuning forks, was certified radar training instructor, observed speeding defendant's vehicle approaching at higher rate of speed than other freeway traffic, and that radar gun locked onto defendant's car and displayed speed of 76 mph supported speeding conviction. *Berkeley v Stringfellow (1990, Mo App) 783 SW2d 501*.

Evidence that radar unit operated by officer and properly tested for accuracy recorded defendant's speed as 52 miles per hour was sufficient to sustain charge of speeding, and additional opinion testimony of arresting officer would not be required. *Kansas City v Corley (1977, Mo App) 552 SW2d 30*.

Admissibility of speed readings produced by laser speed detector requires a showing that the law enforcement officer operating the device received appropriate training and that relevant pre-operational checking procedures were satisfied. *Matter of Admissibility of Motor Vehicle Speed Readings Produced by LTI Marksman 20-20 Laser Speed Detection System, 314 N.J. Super. 233, 714 A.2d 381 (Law Div. 1998)*.

In prosecution for speeding wherein police officer testified that he had "clocked" defendant's vehicle with moving radar unit, trial court erred in exercising judicial notice as to evidential competence of moving, as oppose to stationary, radar unit, but error was harmless where same police officer gave eyewitness opinion testimony that defendant's vehicle was speeding. *Kirtland Hills v Logan (1984, Lake Co) 21 Ohio App 3d 67, 21 Ohio BR 71, 486 NE2d 231*.

In order to introduce evidence of a defendant's speed derived from the use of radar detection device, the Commonwealth must offer a certificate by the Secretary of Transportation certifying the agency which performed the tests on the device as an official testing station, and must introduce a certificate of accuracy of such device, signed by the person who performed the tests and the engineer in charge of the testing station, and which certification must show that device was accurate when tested, and that device was tested within 60 days of date it was used to calibrate the defendant's speed. 75 Pa. C.S.A. §§ 3362(a), 3368(d). *Com. v. Kaufman, 2004 PA Super 152, 849 A.2d 1258 (2004)*.

See *State v Hanson (1978) 85 Wis 2d 233, 270 NW2d 212, (citing annotation), § 3*.

[\*5b] View that evidence of accuracy is not a prerequisite to admissibility but affects only sufficiency of radar evidence

It was expressly held in the following cases that the accuracy of the particular radar device used to clock a motorist's speed was an issue affecting the sufficiency of the radar evidence, and not its admissibility.

Acknowledging that where there was reasonable and sufficient proof of the accuracy of a radar instrument, the reading taken therefrom might of itself be sufficient for a conviction of speeding, the court in *People v Abdallah (1967) 82 Ill App 2d 312, 226 NE2d 408*, pointed out also that where the accuracy of a particular radar device was unproved, the

readings taken therefrom were unproved, the readings taken therefrom were admissible in evidence, although they would be insufficient in themselves to convict for a traffic violation.

Expressing the opinion that there was sufficient proof of the accuracy of the particular radar unit in question for the trier of fact to find the defendant motorist guilty of speeding, based solely upon the reading taken from the radar unit, the court in *People v Barbic* (1969) 105 Ill App 2d 360, 244 NE2d 626, recognized that where the accuracy of a particular radar device was unproved, the results thereof would be insufficient to convict for a traffic violation, although such results were admissible as evidence; and that where, on the other hand, there was reasonable and sufficient proof of the accuracy of the radar instrument, the reading taken therefrom might of itself be sufficient for a conviction.

And pointing out that evidence obtained by the use of an "untested" radar unit would be insufficient of itself to sustain a conviction for speeding, the court in *People v Magri* (1958) 3 NY2d 562, 170 NYS2d 335, 147 NE2d 728, held that although the radar speedometer used in this case must be regarded as "untested" because of the failure to establish in the record evidence of four accuracy tests, the radar evidence of the defendant's speed was admissible and was sufficient, when taken together with the corroborative opinion testimony given by two police officers, to sustain a speeding conviction.

Although an early New York case expressed the view that the admissibility of radar evidence was dependent upon proof of the machine's accuracy,<sup>n45</sup> the court declared in *People v Dusing* (1959) 5 NY2d 126, 181 NYS2d 493, 155 NE2d 393, that a reading from an untested speedometer or radar device was admissible, although it would not be sufficient in itself to sustain a speeding conviction. Holding that the trial judge should not have ruled out radar evidence of speed merely because the radar unit had been tested against an automobile speedometer which had not been shown to be accurate, the court pointed out that the deficiency in this proof could be overcome by the opinion testimony offered by two admittedly experienced and qualified police officers who from separate positions had observed the defendant's oncoming automobile.

In holding that radar evidence was sufficient, without corroborative opinion testimony as to speed, to sustain a speeding conviction, the court in *People v Blattman* (1966) 50 Misc 2d 606, 270 NYS2d 903, stated that the Dusing Case (NY) supra, had established the rule that a reading from an untested radar device was admissible, but was not, without more, sufficient for a speeding conviction, and that the resulting deficiency in proof could be supplied by the testimony of qualified observers.

<>

Evidence was sufficient to support conviction for driving in excess of maximum lawful speed; even if police officer was using speed detection device without city permit, officer made visual estimate that defendant was driving at 73 or 74 miles per hour in 55 miles per hour zone. *O.C.G.A. § 40-6-181. Stone v. State*, 571 S.E.2d 488 (Ga. Ct. App. 2002).

Evidence of accuracy of radar equipment went only to weight to be assigned to reading and was not foundational requirement for admission of radar reading into evidence. *State v Caron* (1987, Me) 525 A2d 1049.

See *State v Wilcox*, 40 Ohio App 2d 380, 69 Ohio Ops 2d 333, 319 NE2d 615, § 8[b].

Evidence was insufficient where prosecution failed to prove that radar type speedometer was accurate and functioning properly at time speed was checked and where sole evidence was reading secured by use of radar type speed meter. *State v Bonar*, 40 Ohio App 2d 360, 69 Ohio Ops 2d 320, 319 NE2d 388.

Arresting officer's testimony setting forth his training and experience in use of radar unit, in addition to his testimony describing tuning-fork test on day defendant was stopped, was reasonable and sufficient proof of accuracy of radar unit,

and reading taken therefrom was admissible even though tuning fork used to test accuracy of radar device was itself not tested for accuracy. *State v Sprague (RI) 322 A2d 36.*

[\*6] Statutory provisions affecting sufficiency of test for accuracy

[\*6a] Definition of term "accurate"

A Pennsylvania statute providing, in part, "No conviction shall be had upon evidence obtained through the use of radar apparatus unless. . . it has been calibrated and *tested for accuracy and found accurate* or adjusted for accuracy within a period of thirty days prior to the alleged violation," was held in the following cases not to require absolute accuracy in radar speedmeters.

In *Commonwealth v Perdok (1963) 411 Pa 301, 192 A2d 221*, it was held that the word "accurate" in the statutory provision quoted above was not meant to require absolute exactness, since no machine was capable of such precise measurement. The court pointed out, however, that the legislature also did not intend that the variance between true speed and the speed indicated on a radar unit should be of such a magnitude as to prejudice the motorist whose speed was measured by the device. In the present case, where the "Certificate of Radar Speedmeter Accuracy" showed a variance of less than one mile per hour between true speed and the indicated speed at all speeds up to 90 miles per hour, the differential between true and indicated speed was said not to prejudice the defendant motorist, whose speed was measured at 59 miles per hour, the court explaining that after making adjustments for the variance indicated by the certificate, the true speed of the motorist at the time of his arrest was 58.7 miles per hour, considerably in excess of the 50-mile-per-hour legal limit which he was charged with violating. A speeding conviction was reversed, however, on other grounds.

And it was held in *Commonwealth v McConnell (1965) 35 Pa D & C2d 541*, that the above statutory provision did not demand absolute exactness, since no machine was capable of such precise measurement, but required only that the variance between true speed and indicated speed should not be of such a magnitude as to prejudice the motorist whose speed was clocked. In affirming the speeding convictions of three motorists, the court noted that the radar speedmeter readings in question of 65, 61, and 65 miles per hour indicated, according to the respective certificates of speedmeter accuracy, that the motorists were traveling respectively at 65.5, 60.4, and 65.2 miles per hour. Without stating the speed limits which the motorists were supposed to have violated, the court concluded that the motorists were not harmed by the minute degree of inaccuracy in the radar units which had measured their speed.

Thus, in ruling admissible radar evidence which indicated that a motorist was driving at a speed of 63 miles per hour in a 50-mile-per-hour speed zone, the court in *Commonwealth v O'Malley (1962, Pa) 53 Luzerne Leg Reg 87*, rejected the motorist's contention that the certificate of accuracy offered by the prosecution showed in fact that the speedmeter was inaccurate, rather than accurate, and failed to comply with the requirements of the above-quoted statutory provision. The certificate indicated that the radar speedmeter had been tested within the 30-day period required by the Code, but also indicated some slight variance between indicated speed and true speed at all speeds other than 60 miles per hour. Noting that earlier decision regarded 99 percent accuracy sufficient compliance with the code requirements as to speedometers in state police vehicles used to enforce speed regulations, the court pointed out that in clocking the motorist's speed at 63 miles per hour, the radar speedmeter used here was between 100 percent and 98.8 percent accurate, since the certificate indicated that the speedmeter registered 60 miles per hour at a true speed of 60 miles per hour, and 65 miles per hour at a true speed of 64.9 miles per hour. The court concluded that the radar apparatus had been shown to be accurate within acceptable tolerances, and sustained an order suspending the motorist's motor vehicle operating privileges for 2 months.

See *Commonwealth v Gernsheimer* (1980, Pa Super) 419 A2d 528, § 6[b].

[\*6b] Sufficiency of test certificate

A few cases have considered problems relating to statutory provisions authorizing the admission of test certificates as evidence of the accuracy of a radar speedometer. In one case it was held that the certificate need not state expressly that the speedometer had been found to be accurate, since this conclusion was implicit in the mere issuance of the certificate.

Under statutory provisions requiring, in part, proof of the accuracy of radar apparatus as a prerequisite to a speeding conviction based upon evidence obtained by the use of the apparatus, and further providing for the establishment of official radar testing stations authorized to test radar apparatus and to issue certificates indicating that the tests were made, it was held in *Commonwealth v Perdok* (1963) 411 Pa 301, 192 A2d 221, that it was not necessary for the official testing station to make the precise statement that "this machine has been found accurate," in order to comply with the statutory requirement that the apparatus be found accurate. The court said that the conclusion that the machine had been found to be accurate was manifested by the title of the document, "Certificate of Radar Speedometer Accuracy." Having adjusted the machine for accuracy, the court added, the testing station issued the certificate in question, and it was the court's opinion that if the testing station had been unable to adjust and calibrate the machine within acceptable limits, the certificate would not have been issued.

On the other hand, another case has held that the certificate must clearly indicate that the testing apparatus was itself accurate.

Thus, in a speeding prosecution based upon radar evidence, a certificate indicating that the radar device in question had been tested for accuracy on six occasions within a 2-hour period on the night of the defendant motorist's arrest, by driving a police patrol car with a "calibrated" speedometer past the device, was held in *Sweeny v Commonwealth* (1971) 211 Va 668, 179 SE2d 509, 47 ALR3d 817, not admissible as evidence of the speedometer's accuracy, since it did not sufficiently comply with that section of the Virginia radar statute which provided for the admissibility of "a certificate, executed and signed by the officers calibrating or testing such [radar] device as to its accuracy as well as to the accuracy of the speedometer of any motor vehicle used in such test, and stating the time of such test, type of test and results of testing." The court pointed out that while the certificate in question indicated that the speeds reflected on the radar meter during the test were identical with the speeds reflected on the speedometer of the police vehicle driven past the radar beam, this fact would indicate that the radar meter was reflecting the correct speed only if the reading of the automobile speedometer was accurate. As the court noted, however, the certificate signed by the police officers indicated only that the speedometer had been "calibrated," or in other words, had been "tested for accuracy." The court said that the statutory provision in question must be strictly construed and fully complied with, if a certificate was to be used in evidence; and the court emphasized that the use of the word "calibrate" did not necessarily indicate that the speedometer had been found to be accurate. The court concluded that the certificate was improperly admitted in evidence, and in reversing the motorist's conviction, pointed out that there was no other evidence in the record showing the accuracy of the speedometer which was used as a test upon the accuracy of the radar apparatus.

◇

See *Commonwealth v Nardei* (1980, Pa Super) 420 A2d 612, § 12.

Document approving specified radar system as speed timing device and certifying specified laboratory as approved testing laboratory into evidence was not error, notwithstanding those documents predated effective date of vehicle code, where there was nothing to suggest that code was intended to revoke prior approval of radar apparatus and appointment of stations for calibrating and testing approved apparatus, and where both electronic device and testing and calibration station were approved after effective date of code. *Commonwealth v Kerns* (1980, Pa Super) 420 A2d 542.

Under statute providing that certificate from radar testing station showing that calibration and tests were made within required period and that device was accurate will be competent and prima facie evidence of those facts in every proceeding which violation of statute is charged, where certificate establishing testing station as official station contained state seal and certificate which established accuracy of particular radar device did not contain seal, but was certified by signature of person who calibrated device and by signature of person in charge of testing station and device was tested and found to be accurate within required period all of requirements of statute were met; where radar or other electronic device is used to calibrate defendant's speed in prosecution for violation of speeding laws, in order to introduce results of evidence Commonwealth must offer certificate, certified by secretary of transportation or designee certifying agency which performs test on device as official testing station and must introduce certificate of electronic device accuracy into evidence which must be signed by person who performed test and engineer in charge of testing station, must show device was accurate when tested and must show that particular device was tested within 60 days of date it was used to calibrate particular defendant's speed. *Commonwealth v Gernsheimer (1980, Pa Super) 419 A2d 528*.

Certificate stating that speedometer of test vehicle had been calibrated and that speedometer was found to be accurate after calibration met statutory requirements. *Howell v Commonwealth, 213 Va 590, 194 SE2d 758*.

[\*7] Factors affecting sufficiency of test for accuracy

[\*7a] Generally

There are various methods of checking the accuracy of a radar speedometer,<sup>n46</sup> and, as indicated in § 5[a], supra, proof of its accuracy is essential to a speeding conviction based solely on the radar evidence. The following subsections will examine various factors affecting the sufficiency of a test upon the accuracy of a radar device, such as the time and place of making the test, the type of test conducted, and the necessity of showing the accuracy of the testing apparatus.

<>

Trial court's finding that police officer failed to conduct sufficient external testing of laser speed tracking device for accuracy both before and after defendant was stopped for speeding supported determination to exclude results of speed testing. *Neb.Rev.St. § 60-6,192(1)(d). State v. Hall, 269 Neb. 228, 691 N.W.2d 518 (2005)*.

At time defendant was clocked by S-80 radar device at speed unreasonable for conditions, S-80 radar was in good condition for accurate use, where qualified radar expert had checked device three times on date of incident and had found each time that each calibration result was what it should have been, and where procedure followed by him was in accordance with radar manufacturer's instructions. *Pemberville v Dietrich (1983) 7 Ohio Misc 2d 48, 7 Ohio BR 399, 455 NE2d 727*.

Trial court erred in denying driver charged with speeding cross-examination of state's radar expert as to expert's qualifications, since proof that particular radar unit used to clock driver's speed was properly designed, manufactured and calibrated is prerequisite to admission of speed reading. *City of Bellevue v Lightfoot (1994) 75 Wash App 214, 877 P2d 247*.

[\*7b] Type of test conducted

In considering whether a radar device had been shown to be accurate, the courts in the following cases held that the particular testing procedures used were sufficient to measure a radar unit's accuracy.

Where a motorist convicted of the crime of speeding contended that the evidence of speed recorded on a radar unit was improperly admitted into evidence, since the tests for accuracy conducted by the operator of the unit by means of 40- and 60-mile-per-hour tuning forks were insufficient to test the overall accuracy of the radar unit in the range from 20 to 100 miles per hour, the court in *State v Carta (1963) 2 Conn Cir 68, 194 A2d 544*, certif den (Conn) 197 A2d 932, reviewed expert testimony to the effect that the two tuning forks used to test the accuracy of this machine were sufficient to test a range of 20 to 70 miles per hour and that a reading of 51 miles per hour, the speed at which the defendant motorist was clocked, on a unit tested only by the 40- and 60-mile-per-hour forks, was an accurate measurement of speed. Regarding the contention that the radar unit should have been given an additional test by driving a car with a calibrated speedometer through the radar field, the court noted expert testimony that such a test was not absolutely necessary but should be made in most cases, as a means of substantiating the tuning-fork test; and the court said that there was no authority to be found for the proposition that both the tuning-fork test and the test-car test were necessary to establish the accuracy of a radar device. In affirming the conviction, the court pointed out that the question of the adequacy of the test for accuracy here had properly been submitted to the jury.

In affirming a speeding conviction based upon evidence obtained by the use of a radar speedometer, the court in *People v Abdallah (1967) 82 Ill App 2d 312, 226 NE2d 408*, denied, in effect, that the testing of a radar device by a single tuning fork would not suffice to establish its accuracy, although in answering the motorist's argument on this point, without addressing the problem directly, the court merely pointed out that the case upon which the motorist had relied did not support his proposition.

Tests involving the use of an internal switch and the use of tuning forks were held sufficient to establish the accuracy of a radar speedometer, in *People v Lynch (1969) 61 Misc 2d 117, 304 NYS2d 985*, the court rejecting an argument that test runs by police vehicles through the zone of influence of a radar speedometer were essential in proving the accuracy of radar equipment. It was pointed out that the internal switch test was a calibration by an electronic tone within the machine itself, and that the tuning forks used were calibrated to emit frequencies equivalent to readings on the speedometer of 50 and 30 miles per hour. Noting testimony by the officer operating the radar equipment that the tests had been performed both before and after each setup of the machine on the day in question and had indicated no irregularities in the radar unit, the court affirmed a speeding conviction based on the radar evidence and said that it was inconceivable that the internal check and the two tuning-fork tests could all have been inaccurate to the same degree.

<>

In one case it was held that testing a radar speedometer by the use of a tuning fork which was an integral part of the machine would not, alone, sufficiently demonstrate the accuracy of the device, so that a conviction of speeding could not be sustained solely on evidence derived from the device.

Thus, referring to a test of a radar speedometer by use of a tuning fork which was an integral part of the machine as "bootstrapping," the court in *State v Gerdes (1971) 291 Minn 353, 191 NW2d 428*, reversed a speeding conviction which had been based solely on evidence obtained by the use of a radar speedometer which the operating officer had tested by pressing a button on the machine which indicated whether the radio waves from the antenna head were being properly emitted and received. Pointing out that the only other test performed by the officer was "to take a reading of traffic which by personal observation he estimated to be approximately 30 m.p.h.," the court said that it was proper for the trial judge to take judicial notice of the reliability of radar as a means of establishing speed, but that it would not be proper to take such notice of the accuracy of a particular radar set. On the occasion when the machine is set up, the court continued, its accuracy must be tested in some external manner by a reliably calibrated tuning fork or by an actual test run, using another vehicle with an accurately calibrated speedometer.

<>

Conviction for speeding was upheld where: (1) accuracy of radar unit was established by evidence that officer had tested unit's internal calibration devices and checked unit before and after defendant's arrest by using two different tuning forks which had been checked by manufacturer; (2) qualifications of officer to operate radar device were established by evidence that officer had received several hours of classroom and field training as to particular radar unit in question and had used unit for over a year as highway patrolman; and (3) expert testimony regarding construction and method of operation of radar unit was not prerequisite to officer's testimony as to reading obtained by him. *State v Primm* (1980) 4 Kan App 2d 314, 606 P2d 112 (citing annotation).

See *State v Dow* (1984, Minn App) 352 NW2d 125, § 4.

In speeding prosecution radar evidence was properly received where evidence that police officer tested radar unit for accuracy before and after he checked speed of defendant's car by striking two tuning forks against hard object and holding them up to radar unit, and that each month tuning forks were tested for accuracy by use of digital frequency counter was sufficient to prove radar units were accurate without proof that digital frequency counter had been tested for accuracy. *Kansas City v Tennill* (1982, Mo App) 630 SW2d 173.

See *State v Ahern* (1982) 122 NH 744, 449 A2d 1224, § 9.

Performance testing of laser speed detector demonstrated sufficient reliability that speed readings produced by such detector should generally be received as evidence of the speed of motor vehicles without the need for expert testimony in individual prosecutions arising under the motor vehicle laws, in light of prior determination that using laser to measure speed was widely accepted in relevant scientific community and was valid. *Matter of Admissibility of Motor Vehicle Speed Readings Produced by LTI Marksman 20-20 Laser Speed Detection System*, 314 N.J. Super. 233, 714 A.2d 381 (Law Div. 1998).

Proof of accuracy of radar speed gun was not sufficient where only test performed to check accuracy was by use of single 50 m.p.h. tuning fork. *State v Readding* (1978) 160 NJ Super 238, 389 A2d 512 (citing annotation).

See *People v Bellizzi* (1980) 108 Misc 2d 209, 441 NYS2d 147, § 8[b].

Although accuracy of radar unit and testing apparatus are generally essential to speeding conviction based solely on radar evidence, use of two tuning forks, one producing reading of 30 mph and other producing 80 mph, to calibrate moving radar device was corroborative, since it is unlikely that two forks would be inaccurate to same degree. *State v Bechtel* (1985, Wayne Co) 24 Ohio App 3d 72, 24 Ohio BR 126, 493 NE2d 318, motion overr.

Testimony of state trooper as to his training in use of radar devices, that he had used device for eight months as a trooper on average of one to two days per week, that he had calibrated the radar device using both unit's own internal calibration system and two external tuning forks approximately one hour prior to defendant's arrest for speeding and then 12 minutes after arrest and that on both occasions radar unit was operating properly satisfied criteria that speed meter be expertly tested within reasonable proximity following arrest and that testing be done by means which do not rely on radar device's own internal calibration and raised rebuttable presumption that radar device was functioning accurately; where operating officer employed two tuning forks to test radar device at two different speeds, it was not required that tuning fork's accuracy be tested by some other device. *State v Kramer* (1981) 99 Wis 2d 700, 299 NW2d 882.

Where officer who used radar device in determining speed of motorist's vehicle using both internal crystal and external tuning fork test 25 minutes before arresting defendant for speeding and again 25 minutes after using device, and at both times results showed device was working properly, evidence satisfied requirement to establish rebuttable presumption of accuracy of moving radar device that device be expertly tested within reasonable proximity following arrest and that

testing be done by means which do not rely on device's own internal calibrations, even though there was no evidence that officer possessed any expert training in using tuning fork test nor any testimony regarding accuracy of tuning forks themselves. *State v Mills* (1981) 99 Wis 2d 697, 299 NW2d 881.

[\*7c] Time and place of conducting test

Whether tests upon the accuracy of a radar device were conducted at a proper time<sup>47</sup> and a proper site to establish the machine's ability to measure precisely the speed of passing vehicles has been at issue infrequently in cases involving speeding prosecutions based on radar evidence. See the following cases.

## ILLINOIS

*Schaumburg v Pedersen* (1978) 60 Ill App 3d 630, 18 Ill Dec 99, 377 NE2d 252 (citing annotation)

In one case a speeding conviction was reversed where tests upon the accuracy of the radar unit involved were considered too remote to insure the machine's effectiveness. Where in a prosecution for speeding, no test of the radar speedometer used to determine a motorist's speed was made at the site of, or immediately prior to the time of, his arrest, the radar evidence was held inadmissible in *St. Louis v Boecker* (1963, Mo App) 370 SW2d 731, the court reversing a conviction which had been based solely on the radar readings. Noting that the accuracy and proper functioning of a radar speedometer, an instrument "dealing with delicate measurement," might easily be affected by its movement from place to place, the court pointed out that the only test upon the machine used in this case was made at some unknown time and at some undisclosed place. Even if it was assumed, the court said, that the radar unit was operating properly at the time of the test, evidence to that effect would have no probative force to establish that the machine was accurate and functioning properly after what may have been (for all that the evidence showed) a great number of individual movements, to far distant sites, over a substantial period of time. The court recognized the difficulties encountered by the authorities in the enforcement of traffic laws and ordinances, and said that such efforts were to be encouraged, but emphasized that requiring that proof be adduced that a radar speedometer was tested and found to be operating properly at the site of, and reasonably close to the time of, an arrest should not place an undue burden on the prosecution, and should at the same time protect the rights of motorists.

In another case, however, the accuracy of the radar device was held established by tests conducted at the beginning and end of a 7-hour period, despite evidence that the machine had been moved occasionally in the meantime. In *Thomas v Norfolk* (1966) 207 Va 12, 147 SE2d 727, a motorist appealing a speeding conviction based upon radar evidence which indicated that he had been traveling at 46 miles per hour in a 30-mile-per-hour zone argued unsuccessfully that accuracy tests conducted at another site several hours before, and several hours after, his arrest, did not constitute adequate proof that the radar set which clocked his speed was operating accurately at the time and place of his arrest. The officers operating the unit had testified that prior to, and after, the motorist's arrest, a number of automobiles passed through the radar beam at excessive speeds, and that each of these cars was stopped. In each instance, after the alleged speeder had passed the radar beam, the machine was turned off and the speeder chased and apprehended in the radar vehicle. Subsequently, the radar vehicle was returned to the check point, parked, and set for the next speeder. In denying that this occasional change of the radar set's location necessarily interfered with its accuracy, the court pointed out that proof of the instrument's accuracy at 2:30 p.m. and at 9:30 p.m., in the absence of evidence to the contrary, warranted the inference that the machine was operating accurately during the interim, or at 4 p.m., the time of the defendant's arrest. The court also noted that the motorist had presented no evidence indicating that the radar set had to be tested for accuracy at the exact site of its use in clocking his speed, nor any evidence that the use of the radar car in apprehending other speeders interfered with the accuracy of the radar set installed in that car. The evidence was sufficient in the court's opinion to warrant the finding that the radar set had been properly set up and recently tested for accuracy, and the motorist's conviction was, therefore, affirmed.

<>

Radar device that was tested for accuracy three weeks after defendant's arrest and found to be working properly was tested within reasonable time within meaning of statute requiring that radar device be tested within reasonable time following arrest to accord it presumption of accuracy sufficient to support conviction. *State v Stoll* (1983) 39 Conn Supp 313, 464 A2d 64.

Where police officer who was operating radar unit made necessary tests to insure its proper functioning and accuracy just hours before defendant's automobile was checked and also at end of officer's shift, and on both occasions tests indicated proper functioning of machine, relying solely on his training and depending on accuracy of unit after testing, police officer could give speed of defendant's automobile as calibrated by radar unit. *State v Harper* (1978, Del) 382 A2d 263.

See *State v Primm* (1980) 4 Kan App 2d 314, 606 P2d 112, (citing annotation), § 7[b].

See *State v Dow* (1984, Minn App) 352 NW2d 125, § 4.

In speeding prosecution there was sufficient proof of accuracy of radar unit at time of its use relative to offense, and evidence was sufficient to establish that adopted testing procedures supported finding that unit was operating accurately, where unit was tested approximately seven months before date in question and five months thereafter and was found to be accurate, expert testified in detail as to procedures followed which led to certification for accuracy and that tuning forks were utilized to secondarily check unit's accuracy, and trooper testified that he made tests with tuning forks while his patrol vehicle was stationary in both stationary and moving mode of unit. *State v Hunziker* (1982, Mo App) 638 SW2d 793.

State failed to make prima facie case in speeding prosecution when it failed to prove that radar unit was tested at site of arrest and reasonably close in time to arrest, notwithstanding that unit was tested four hours before arrest at trooper's home and five hours after arrest and was found to be operating properly at those times. *State v Weatherwax* (1982, Mo App) 635 SW2d 34.

[\*7d] Accuracy of testing apparatus

A number of cases have considered whether it is necessary in proving the accuracy of a radar speedmeter to prove also that the apparatus used to test the radar device was itself accurate. Many, but not all, of these cases have ruled that proof of the accuracy of testing apparatus is a necessary prerequisite to proof of the accuracy of the radar unit.<sup>n48</sup>

In affirming the conviction of a motorist whose allegedly excessive speed was measured by a radar speedmeter, the court in *State v Tomanelli* (1966) 153 Conn 365, 216 A2d 625, pointed out that the admissibility of radar evidence was dependent upon proof of the accuracy of the particular radar set used to measure the defendant's speed, and said that

where the accuracy of the instrument was tested by the use of tuning forks, it was obvious that the tuning forks themselves must be shown to be accurate before their use could be accepted as a valid test of the radar instrument. The court then observed that while no attempt had been made in the present case to establish the accuracy of the tuning forks which had been used to test the accuracy of the radar unit in question, both before and after the motorist's speed was recorded, no effort had been made by the motorist to attack the accuracy of the tuning forks; and the court concluded that under these circumstances the accuracy of the radar unit was unimpeached.

Thus, where a motorist contested his speeding conviction, arguing that the foundation for the radar evidence of speed was deficient, since the state had failed to produce evidence that the tuning forks which were used to test the accuracy of the radar equipment had themselves been tested within a reasonable time prior to their use on the day of his arrest, the court in *State v Lenzen (1962) 24 Conn Supp 208, 189 A2d 405*, held that the admission of the radar evidence was justified by evidence that the tuning forks, which were calibrated to indicate readings on the speedometer of 40, 60, and 80 miles per hour, had been tested for accuracy by the manufacturer; that the radar set had been tested by the use of the tuning forks both before and after it was placed in operation on the day of the motorist's arrest and had, on both occasions, indicated readings identical with the numbers stamped on the forks; and that the radar unit was also tested by running a police car with a calibrated speedometer through its zone of influence and comparing the speed indicated on the radar device with the speed indicated on the car's speedometer. The favorable results of the various tests upon the accuracy of the radar device, as well as the fact that not one but three forks were used, went far, in the opinion of the court, to indicate that both the forks and the radar device were functioning properly on the day in question.

Pointing out that the value of tests upon a radar speedometer's accuracy would depend upon the accuracy of the measuring device against which the radar was checked, the court in *State v Graham (1959, Mo App) 322 SW2d 188*, stated that testing a speedometer for accuracy by running a police patrol car through the device's zone of influence at speeds of 50 miles per hour and 70 miles per hour, when the patrol car's speedometer was not shown to be accurate, would probably not be sufficient to render radar evidence admissible in a prosecution for speeding where the speedometer indicated only a slight difference between the speed of the defendant's vehicle and the legal limit. However, the court continued, since the speedometer indicated in the present case that the defendant motorist was driving in excess of 15 miles per hour over the legal limit, and since the accuracy of the speedometer had been confirmed by tests conducted with tuning forks calibrated to register 50 miles per hour and 70 miles per hour on the radar dial, the accuracy tests were sufficient to render the radar speedometer evidence admissible; and a conviction of speeding was affirmed.

In *St. Louis v Boecker (1963, Mo App) 370 SW2d 731*, a prosecution for speeding based upon evidence obtained by the use of a radar speedometer, where the court was primarily concerned with the time and place of testing the radar unit, it was pointed out that the value of any test of a radar speedometer depended upon the accuracy of the measuring device against which it was checked, whether the measuring device used was an automobile speedometer, a stopwatch, or as in the instant case, a tuning fork. The court accepted without question the principle of testing a radar speedometer by use of a tuning fork, but noted that all measuring devices were the product of human endeavor and therefore subject to error in manufacture, or to subsequent impairment and damage, and that because of the precise measurement which must be made in order to determine the accuracy of a radar unit, it was apparent that any imperfection in the tuning fork would materially affect the speed registered on the radar dial. Thus, in the absence of any evidence that the tuning fork used to test the radar unit in the present case was itself accurate, the court doubted that the city's evidence was sufficient to establish prima facie that the radar speedometer was functioning properly, even at the time the test was made.

Testimony by the officer operating a radar device that a few days prior to, and a few days after, a motorist's arrest for speeding, the two tuning forks which were used to check the accuracy of the speedometer had been calibrated in the officer's presence by electronic equipment, and had been found to need no adjustment, was held a sufficient showing of the accuracy of the tuning forks, in *Kansas City v Hill (1969, Mo App) 442 SW2d 89*, the court recognizing that proof of the accuracy of the speedometer was necessary to the admissibility of radar evidence, and that the value of any check upon the accuracy of the radar unit would depend upon the accuracy of the measuring device against which it was

tested.

See *State v Dantonio* (1955) 18 NJ 570, 115 A2d 35, 49 ALR2d 460, infra § 8[a], where it was held that the defendant in a speeding prosecution had waited too long to contest the state's failure to offer affirmative evidence establishing the accuracy of patrol car speedometers used to test the accuracy of a radar speedmeter, the court remarking, however, that it would have been the better course for the state to have introduced testimony on this point.

It was the opinion of the court in *People v Sachs* (1955) 1 Misc 2d 148, 147 NYS2d 801, that as a prerequisite to a speeding conviction based upon evidence obtained by the use of a radar speedmeter, the prosecution should be required to present operative and mechanical proof to the effect that the speedometer on the motorcycle or other police vehicle used to test the accuracy of the radar device had itself been tested and found to be accurate.

In the absence of proof of the accuracy of a tuning fork which was used to test a radar speedmeter, a conviction of speeding based upon evidence obtained by the use of the speedmeter was reversed in *People ex rel. McCann v Martirano* (1966) 52 Misc 2d 64, 275 NYS2d 215. The court stated that for radar evidence alone to support a conviction of speeding, the accuracy of the radar unit must be established beyond a reasonable doubt by clear, convincing, and unequivocal proof. The court added that it was certainly not beyond the realm of possibility that the pitch of the tuning fork had been affected in some way so that it was no longer an accurate fork. And the court declared that although this fork had been calibrated to emit frequencies which would register a 40-mile-per-hour reading on the radar unit, as it did when it was used to test the radar device which clocked the defendant's speed, it was not inconceivable that both the unit and the tuning fork were inaccurate to and in the same degree.

In *Biesser v Holland* (1967) 208 Va 167, 156 SE2d 792, the court recognized that the accuracy of a test of radar apparatus by the use of a tuning fork would necessarily depend upon the type and the accuracy of the tuning fork which was used.

And see *Sweeney v Commonwealth* (1971) 211 Va 668, 179 SE2d 509, 47 ALR3d 817, supra § 6[b], where it was pointed out that the statutory provision to the effect that the accuracy of a radar device used to measure the speed of motor vehicles might be proved by a certificate signed by the officers testing the accuracy of the device required that the certificate reflect not only the accuracy of the radar apparatus, but also the accuracy of the speedometer of any motor vehicle used in conducting the accuracy tests. The court pointed out that a certificate reflecting identical speeds registered on a radar meter and on a police vehicle's speedometer would only indicate that the radar meter was accurate if the automobile speedometer was accurate. If the speedometer were defective or inaccurate to the same degree as the radar meter, the court continued, then both devices would be reflecting an improper speed. While this was unlikely, the court said, it demonstrated the necessity that the speedometer of the motor vehicle used to test the radar meter be accurate.

The necessity of proving the accuracy of testing apparatus was also recognized, at least impliedly, in the following cases where the courts were more concerned with questions relating to the sufficiency of such proof.

Evidence that a radar speedmeter had been tested by use of a tuning fork and by comparison with a police car speedometer both before and after the device had been used for determining the speed of motor vehicles was held sufficient to sustain a speeding conviction, in *People v Stephens* (1967) 52 Misc 2d 1070, 277 NYS2d 567, the court stating that although the prosecution's offer of the test car's calibrated speed record was ruled inadmissible and no offer of proof had been made as to the accuracy of the tuning fork, the prosecution should not be subjected to the burden of offering proof of the accuracy of both the calibrated tuning fork and the speedometer of the test car beyond the simple comparative analysis made in the instant case. The court pointed to the possible frustration of law enforcement that might result from slavish adherence to hypertechnical requirements of myriad testings of the components of every device used to measure the accuracy of other measuring devices. It was more than coincidence, the court concluded, that four testings of the radar device indicated a speed of 50 miles per hour; it was inconceivable that the radar unit, the

tuning fork, and the test car speedometer could all have been inaccurate to and in the same degree.

In affirming a speeding conviction based upon radar evidence, the court in *Farmer v Commonwealth* (1964) 205 Va 609, 139 SE2d 40, rejected an argument that as part of the proof necessary to establish the accuracy of the radar unit the prosecution was required to prove the accuracy of the tachometer which had been used to calibrate the speedometer of the police patrol car driven through the radar beam as a test upon the radar's accuracy. The court feared that agreement with the motorist's contention would lead to the further requirement of proof of the accuracy of the instrument or instruments by which the accuracy of the tachometer was tested, and said that common sense demanded that there be a "point of faith somewhere," noting that a calibrated master speedometer was generally accepted as being prima facie correct.

<>

There is some authority to the effect that the prosecution in a speeding prosecution based upon radar evidence is not required to prove the accuracy of equipment used to test the radar device.

Pointing out that the readings of radar equipment designed to determine the speed of motor vehicles were admissible as evidence of speed if a sufficient foundation was laid as to the accuracy of the equipment in operation, the court in *Peterson v State* (1957) 163 Neb 669, 80 NW2d 688, affirmed a speeding conviction and rejected the defendant motorist's argument that there must be foundation evidence as to the accuracy of a police car speedometer used to test radar equipment before the speedometer evidence could be accepted as a foundation for the accuracy of the readings of the radar unit. The court was of the opinion that the testimony of a police officer as to the speedometer reading of a car driven by him at a given time was competent prima facie evidence of the speed of the car at that time; and the court concluded, therefore, that evidence produced in part by cross-examination of the state's witnesses which showed that the patrol car used in testing the radar equipment used in this case had been bought new and had been used only a few weeks, that it had normal tires, and that the speedometer had been tested and was found to be accurate, was sufficient foundation for the admission of the radar evidence, the court finding it unnecessary to discuss issues relating to whether the testimony regarding the testing of the speedometer was hearsay in that the person who tested the speedometer was not called as a witness.

A motorist's argument that any comparative testing devices used to determine whether radar equipment was accurate and functioning properly must themselves be proved accurate was rejected by the court in *State v Snyder* (1969) 184 Neb 465, 168 NW2d 530, since such a chain of evidence might have to proceed ad infinitum. Noting that statutory provisions permitted the use of radar to measure the speed of motor vehicles and rendered the results of such determinations acceptable as prima facie evidence of speed in any court or legal proceeding where speed was at issue, the court said that a speeding conviction might be sustained upon reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly, and affirmed the motorist's conviction here on evidence that the radar equipment was tested within a few hours of its use, by means of a calibrated tuning fork and by comparison with the speedometer of a patrol car driven through the radar field, although there was apparently no evidence as to how recently the tuning fork had been calibrated, and the only evidence as to the accuracy of the patrol car speedometers was testimony that the speedometer on one of the cars had been calibrated some 3 months before the defendant's arrest and had been checked with radar approximately every other week since that time.

And in affirming a speeding conviction based upon radar evidence, the court in *Cromer v State* (1964, Tex Crim) 374 SW2d 884, pointed out that the state was not required to prove the accuracy of the speedometer in the police patrol car which was driven through the radar beam as a test upon the accuracy of the radar apparatus.

<>

Defendant was properly convicted of speeding based on evidence derived from radar device, notwithstanding that tuning fork used to calibrate device had not been recertified within one year prior to its use, where arresting officer testified he had used single tuning fork to test radar device prior to its use on day of offense, and where tuning fork had been previously certified and was recertified as accurate approximately three and one-half months later. *Aurora v McIntyre* (1986, Colo) 719 P2d 727.

See *People v Walker* (1980, Colo) 610 P2d 496, § 8[b].

Where all requirements as to proper foundation for admissibility of radar evidence were met, that is that officer stated his qualification and training in use of K-55 radar unit, internal calibration, external tests and light tests were performed to check operational integrity of radar unit, and officer identified car as tracked vehicle, and where court determined efficacy of K-55 unit to perform functions for which it was designed, testimony as to speed of car was admissible. *State v Newton* (1980, Del) 421 A2d 920.

See *People v Beil* (1979) 76 Ill App 3d 924, 32 Ill Dec 290, 395 NE2d 400, § 8[a].

See *State v Shimon* (Iowa) 243 NW2d 571, § 8[a].

See *State v Dow* (1984, Minn App) 352 NW2d 125, § 4.

In prosecution for manslaughter by culpable negligence in operating automobile, trial court did not err in admitting evidence of reading shown by radar unit directed toward defendant's car, notwithstanding that 18 days after defendant's arrest, device was tested and found to be in need of repairs for malfunction which showed constant reading of "00," where device was tested one month prior to defendant's arrest and found to be in proper working order, officer testified that he checked unit with two tuning forks shortly before seeing defendant's car and unit showed expected reading, unit was not malfunctioning by giving reading of "00 all of time" at time it purported to show speed of defendant's vehicle and thus it would appear that malfunction did not occur until thereafter, and tuning forks used were found to be accurate both before and after they were used to test unit. *State v Dahlgren* (1982, Mo) 627 SW2d 53.

See *State v Moore* (1985, Mo App) 700 SW2d 880, § 8[a].

See *State v Hunziker* (1982, Mo App) 638 SW2d 793, § 7[c].

See *State v Ahern* (1982) 122 NH 744, 449 A2d 1224, § 9.

See *State v Bechtel* (1985, Wayne Co) 24 Ohio App 3d 72, 24 Ohio BR 126, 493 NE2d 318, motion overr, § 7[b].

See *State v Doles* (1980) 70 Ohio App 2d 35, 24 Ohio Ops 3d 25, 433 NE2d 1290, § 8[b].

There was sufficient evidence to support conviction for speeding where arresting officer testified that he performed both external test of accuracy of radar speed detection device using calibrated tuning fork and internal test using component unit within radar itself, both tests indicated radar was operating accurately, and no evidence was presented to suggest that radar device was operating otherwise, notwithstanding defendant's contention that testing devices used in verifying accuracy of radar unit had not been proven accurate themselves; officer's testimony regarding his classroom and field training, in regard to particular radar unit in question and his experience with equipment was sufficient to establish his qualifications to operate device. *Shears v State* (1982, Okla Crim) 648 P2d 841 (citing annotation).

[\*8] Evidence of accuracy in particular cases

[\*8a] Accuracy held sufficiently demonstrated

In the following cases involving speeding prosecutions where the accuracy of the radar device used to clock a motorist's speed was at issue, it was held that the accuracy of the radar unit had been adequately proved.

There was held to be sufficient evidence to show that the radar equipment in question had been properly tested and checked, in *United States v Dreos (1957, DC Md) 156 F Supp 200*, where, although the manner of testing was not disclosed in the opinion, the court noted testimony to the effect that the officer operating the radar equipment had tested its accuracy immediately after he set it up in the location near the defendant's arrest and tested it again before he removed it, about 2 hours later, with satisfactory results both times. There was also evidence that an electrical engineer from a research laboratory which made periodic calibration checks of radar devices for the State of Maryland and the Commonwealth of Virginia, as well as for the United States Park Police, had checked the equipment in question 8 months prior to the defendant's arrest; that he checked the transmitter-receiver and the speedometer again one month after the defendant's arrest; and that on both occasions the equipment was recording accurately, with less than one percent of error at any speed.

Pointing out that while it was proper to take judicial knowledge of the usefulness of radar equipment for testing the speed of motor vehicles, it would always be necessary to prove the accuracy of the particular equipment used in the case being tried, the court in *Everight v Little Rock (1959) 230 Ark 695, 326 SW2d 796*, affirmed a speeding conviction based upon evidence obtained by the use of radar equipment, where the accuracy of the equipment was substantiated by expert testimony that the speedometer used in this case was accurate within 2 miles per hour up to 100 miles per hour, was simple to operate, and was virtually impossible to set up improperly, and by testimony offered by the police officers operating the equipment that it had been tested on the morning in question and was found to be working properly.

A speeding conviction based upon radar evidence was affirmed in *People v Abdallah (1967) 82 Ill App 2d 312, 226 NE2d 408*, where the accuracy of the radar device was tested by the use of a single tuning fork.

Where a radar speedometer clocked a truck's speed at 62 miles per hour, although a tachograph device installed in the truck indicated that the truck's speed did not exceed the 50-mile-per-hour limit at the time of the alleged violation, the court in *People v Barbic (1969) 105 Ill App 2d 360, 244 NE2d 626*, upheld the truckdriver's conviction of speeding, pointing out that testimony by the police officers operating the radar device that the device had been tested for accuracy a total of five times on the day of defendant's arrest, both before and after the arrest, and that the percentage of error in testing was less than one percent, was sufficient proof of the accuracy of the radar unit to establish the defendant's guilt. As to the defense based on the reading of the tachograph chart, the court said that the substantial testimony was that both the radar device and the tachograph were accurate, although a possibility of error at the time of the arrest existed in connection with each device; and that it was therefore the function of the trial judge, as trier of fact, to determine the credibility of the witnesses and the weight to be accorded their testimony.

Rejecting a bus driver's argument that the foundation for the admission of radar evidence in a prosecution for speeding might be laid only by the testimony of an expert witness regarding the construction, operation, and purpose of the particular machine used, its margin of error, and the ways and means of testing its accuracy, the court in *Dietze v State (1956) 162 Neb 80, 75 NW2d 95*, stated that the results of experimentation could also provide a proper foundation for the admission of evidence of speed, and held that a sufficient foundation for the radar evidence was furnished here by

testimony as to tests of the accuracy of the readings of the meter made by checking the readings with the known speed of other motor vehicles operated by members of the highway patrol both before and after the time of the defendant bus driver's arrest. In the light of common knowledge and the experience of the ages, the court said, nothing appeared more convincing with regard to the accuracy of inanimate mechanisms than a course of experiments which disclosed the production of unvarying results. The bus driver's conviction of speeding was reversed, however, since the record of the remarks of the trial judge, who was the trier of fact in this case, indicated a probability that he could not consider fairly, along with other evidence as to speed, evidence that the bus involved in this case was equipped with a governor which allegedly restricted its speed to 60 miles per hour, the legal limit in the area where the bus driver was accused of speeding.

Evidence that radar equipment was tested within a few hours of its use, by means of a calibrated tuning fork, or by comparison with the speedometer of a motor vehicle driven through the radar field, and was functioning properly, was held sufficient evidence of the accuracy of the radar equipment to sustain a conviction of speeding, in *State v Snyder* (1969) 184 Neb 465, 168 NW2d 530, the court pointing out that, by statute, the speed of any motor vehicle might be determined by the use of radio microwaves or other electronic devices, and the results of such determinations were admissible as prima facie evidence of the speed of the motor vehicle in any court or legal proceeding where the speed of the motor vehicle was at issue. The defendant's argument that any comparative testing devices used to determine whether the particular radar equipment was accurate and functioning properly must themselves have been proved accurate was rejected by the court, since such a chain of evidence might have to proceed ad infinitum. Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly was all that was required, said the court.

Evidence that the officers who had operated the radar device at the time the defendant's speed was checked were sufficiently qualified to set up the equipment and had duly tested it before its use, against the speedometers of the police cars, had tested the meter to see that it registered "zero" when nothing was in range, and had tested needle reaction by the use of the designated switch, was held in *State v Dantonio* (1955) 18 NJ 570, 115 A2d 35, 49 ALR 2d 460, to justify the reception of the evidence of the meter reading to support a conviction of speeding. Asserting that radar evidence was properly admissible upon a showing that the speedometer was properly set up and tested by the officers operating it, the court pointed out that the state's failure to offer affirmative evidence to establish that the speedometers in the police cars had been recently tested would not justify the exclusion of the radar evidence in this case, where the accuracy of the speedometers was not raised by the defendant until the testimony had been fully completed and summations were taking place.

In affirming the speeding conviction of a motorist whose appeal raised issues not pertinent to this annotation, the court in *State v Packin* (1969) 107 NJ Super 93, 257 A2d 120, noted that the motorist's speed had been clocked by radar and that there was proof to support the accuracy of the radar apparatus.

Although saying that the basic efficiency of radar as a means of testing speed must be demonstrated by expert testimony before the evidence could be admitted, the court in *People v Torpey* (1953) 204 Misc 1023, 128 NYS2d 864, apparently took the view that the accurate operation of the device on the occasion when defendant's speed was checked was sufficiently demonstrated by testimony of the police officers making the arrest that they had checked the device by driving their police car through its beam on the morning of the arrest, the officer who operated the police car and the one who operated the radar testifying that they registered identical speeds, and it being further shown that the speedometer on the car had been tested before and after the arrest was made, and found accurate.

Pointing out that the radar speedometer was no different from any other scientific device and that admissibility of tests made by it depended entirely upon its accuracy and reliability, the court in *People v Sarver* (1954) 205 Misc 523, 129 NYS2d 9, admitted evidence of speeding obtained by the use of a radar speedometer after the prosecution had presented ample expert testimony relating to the nature and function of a radar device and had shown that the speedometer used in this case, which had been acquired by the police department some 6 months prior to the arrest in question, had been

frequently tested during the 6-month period and found to be accurate and had been calibrated or tested on the morning of the day in question, when a police car was run past the radar device and the reading on the police car's speedometer was compared to the recording on the graph of the electromatic speedmeter. The court concluded that the radar evidence was sufficient to sustain the charge of speeding.

In sustaining a speeding conviction based upon evidence obtained by the use of a radar speedmeter, the court in *People v Sachs (1955) 1 Misc 2d 148, 147 NYS2d 801*, required proof that at the beginning and the end of the radar device's tour of duty on the day of the defendant motorist's arrest a motorcycle or other police vehicle equipped with a calibrated speedometer had been driven through the radar zone of influence in order to test the accuracy of the radar set.

Evidence that a radar speedmeter had been tested against an untested speedometer of a police patrol car and had been tested by the tuning-fork method was held sufficient to establish the accuracy of the radar equipment, in *People v Johnson (1960) 23 Misc 2d 11, 196 NYS2d 227*, although a speeding conviction based upon the radar evidence was reversed because the prosecution had failed to allege and prove the erection and display of any signs indicating the existence and limit of the 60-mile-per-hour speed regulation established by the Thruway Authority.

Although primarily concerned with issues relating to the admissibility in a prosecution for speeding of testimony by two deputy sheriffs maintaining a radar control along a highway as to their opinion regarding the speed of the defendant's vehicle when passing through the radar beam, the court in *People v Smalley (1970) 64 Misc 2d 363, 314 NYS2d 924*, pointed out with regard to the officers' testing of the radar device by the use of a 35-mile-per-hour tuning fork and a 65-mile-per-hour tuning fork that while it could not be established on trial that the officer reading the indicating meter knew which of the two forks was being held in front of the radar device during the testing process, this failure of proof would not, in view of the wide variation in the calibration of the two forks, invalidate the testing process. The court also noted, however, that the trial judge had properly excluded evidence relating to the accuracy of the speedometer of the police car driven through the radar beam as a test on the radar unit's accuracy, since the prosecution had failed to lay a sufficient foundation for this evidence, presenting testimony only by the deputy sheriff who took part in the test as driver of the car, but not presenting the observer to that test. Nevertheless, the reading taken from the radar unit, though an untested unit, was considered, along with the opinion testimony of the police officers, sufficient evidence of speeding to sustain the defendant motorist's conviction.

The court in *East Cleveland v Ferrell (1958) 168 Ohio St 298, 7 Ohio Ops 2d 6, 154 NE2d 630*, affirmed a speeding conviction based solely upon a reading taken from a radar speedmeter and held, inter alia, that the accuracy of the particular speedmeter used in this case had been adequately demonstrated by the uncontroverted testimony of the city electrician that the meter had been checked by him on the morning of the violation, had been calibrated by injecting into it known frequencies checked against those transmitted by the United States Bureau of Standards radio station, and had been checked in its actual operation, after installation in the police car, by driving another police car through the radar beam and comparing the meter-registered speed with actual speedometer readings; and that the meter had been found to be working properly in all respects.

Where, on the day before a truck driver allegedly drove through a radar beam at 53 miles per hour, 13 miles per hour in excess of the legal limit, the radar speedmeter had been tested for accuracy at an official testing station in accordance with the provisions of the statute permitting the use of radar to enforce speed regulations, and on the day of the alleged violation the speedmeter's accuracy had been confirmed by tests performed with 35-, 50-, 60-, 65-, and 100-mile-per-hour tuning forks, it was held in *Commonwealth v Long (1965, Pa) 84 Dauph Co 255*, that there was overwhelming evidence to sustain the truck driver's speeding conviction, despite his contention that at the time of the alleged violation he was operating his vehicle in ninth gear at approximately 45 miles per hour, as evidenced by his truck's tachometer.

And see the Pennsylvania cases discussed in § 6[a], supra, where the degree of accuracy established with regard to the radar units in question was held sufficient to comply with the statutory provision authorizing the use of radar evidence

in speeding prosecutions.

Evidence that a radar unit had been checked for accuracy at the time that it was first set up on the day in question, by use of a 60-mile-per-hour tuning fork and by driving a patrol car past the unit at 60 miles per hour, was held, along with the other testimony by the other police officers who had operated and tested the radar device, sufficient to sustain a speeding conviction, in *Holley v State* (1963, *Tex Crim*) 366 SW2d 570, the court noting that the ample opinion testimony, independent of the radar findings, regarding the defendant motorist's speed and the conditions of the highway at the time of his arrest, overcame the apparently inadvertent failure to show the results of accuracy tests conducted after the defendant's arrest and at the end of the unit's operation on the day in question.

And in affirming speeding convictions based upon radar evidence, the courts in the following cases held that the accuracy of the radar device which had been used to clock the motorist's speed was sufficiently shown, where --

-- the radar operator tested the accuracy of the set with 40-, 60- and 80-mile-per-hour tuning forks both before and after the defendant motorist's speed was recorded, the court concluding that although no attempt was made to establish the accuracy of the tuning forks, no effort was made by the defendant to attack the accuracy of the forks, and under these circumstances the accuracy of the radar unit was unimpeached. *State v Tomanelli* (1966) 153 Conn 365, 216 A2d 625.

-- tests with 40-, 60-, and 80-mile-per-hour tuning forks were conducted at the beginning and end of the radar set's period of operation on the day in question, and a test car with a calibrated speedometer was driven through the radar zone at a speed of 60 miles per hour shortly after the radar device was set up, and the speedometer reading was compared to the 60-mile-per-hour speed indicated on the radar's meter and graph. *State v Lenzen* (1962) 24 Conn Supp 208, 189 A2d 405.

-- tests with 40- and 60-mile-per-hour tuning forks were conducted at the beginning and end of the radar set's period of operation on the day of defendant motorist's arrest, the court rejecting an argument that adequate testing of the device demanded, in addition to the tests conducted, tests with an 80-mile-per-hour tuning fork and by running a car with a calibrated speedometer through the radar field. *State v Carta* (1963) 2 Conn Cir 68, 194 A2d 544, supra § 7[b], cert den (Conn) 197 A2d 932.

-- there was evidence that both before and after the defendant motorist's speed was recorded, the police officer operating the radar unit had tested the accuracy of the instrument by using three tuning forks, which had been calibrated 2 months prior to the day of the arrest in question to produce readings on the radar unit of 40 miles per hour, 60 miles per hour, and 80 miles per hour. *State v Naumec* (1966) 3 Conn Cir 575, 222 A2d 239.

-- there was evidence that the radar set, which had been factory-tested less than 2 months prior to the defendant motorist's arrest, had been tested for accuracy at the beginning and the end of its period of operation on the day of the defendant's arrest by the use of 40-, 60-, and 80-mile-per-hour tuning forks, which were factory-tested every 6 months; and there was no evidence produced upon which the defendant could claim that he had shown the tuning forks to be inaccurate and therefore the radar machine to be inadequately tested. *State v McCoy* (1966) 4 Conn Cir 109, 226 A2d 116.

-- there was evidence that the radar speedometer had been checked by "the usual test," using tuning forks described as 40-, 60-, and 80-mile-per-hour tuning forks, which themselves had been tested a month earlier than the date in question, and with a minute tolerance for error, had been found to be accurate. *State v Greenman* (1969) 6 Conn Cir 160, 268 A2d 808.

-- the officers operating the radar equipment testified that the set had been checked for accuracy only a few minutes prior to the defendant motorist's arrest, both by driving a car past it at a set speed and by use of a tuning fork, the court pointing out that conflicting testimony regarding the presence of other vehicles in the radar's zone of influence at the

time defendant's speed was measured did not warrant a reversal of a finding of fact by the trial court. *People v Cash* (1968) 103 Ill App 2d 20, 242 NE2d 765.

-- the officer who had operated the radar unit testified that he had allowed it to warm up properly before it was placed in operation, and that he had twice tested the machine with a tuning fork, once immediately before the defendant's car entered into the radar field and once 3 hours prior to that time. *People v Stankovich* (1970) 119 Ill App 2d 187, 255 NE2d 461.

-- the operating officer testified that the accuracy of the radar instrument had been tested a few hours prior to the defendant motorist's arrest, by the use of a calibrated tuning fork and by comparison with the speedometer of a police cruiser driven through the radar field. *Honeycutt v Commonwealth* (1966, Ky) 408 SW2d 421.

-- comparisons of 50- and 70-mile-per-hour radar readings with 50- and 70-mile-per-hour speeds registered on the apparently untested speedometer of a police patrol car driven through the radar zone of influence were confirmed by tests using tuning forks, so calibrated to correspond with oscillations activating the radar meter registration of 50 miles per hour and 70 miles per hour. *State v Graham* (1959, Mo App) 322 SW2d 188.

-- it was shown that the accuracy of the radar device was checked at the start and finish of its use at a particular location by the use of two recently calibrated tuning forks, which had been cut to register frequencies equivalent to readings on the meter of 35 miles per hour and 50 miles per hour. *Kansas City v Hill* (1969, Mo App) 442 SW2d 89.

-- there was evidence that a police patrol car was driven past the radar unit on two occasions, once before and once after the time of the defendant motorist's arrest, for the purpose of comparing the readings on the patrol car's speedometer with those indicated on the radar speedometer, the court rejecting the motorist's argument that the state was required to demonstrate the accuracy of the patrol car speedometer before using the speedometer readings to establish the accuracy of the radar unit, and denying that the readings of the radar speedometer and the patrol car speedometer were not sufficient to prove guilt beyond a reasonable doubt. *Peterson v State* (1957) 163 Neb 669, 80 NW2d 688.

-- there was evidence that the radar set had been tested at the beginning and at the end of its use on the day of the defendant motorist's arrest, by the use of two tuning forks calibrated to register readings of 25 miles per hour and 50 miles per hour, and by comparison with the speedometer of a police test car driven through the radar zone of influence at 40 miles per hour. *People v Blattman* (1966) 50 Misc 2d 606, 270 NYS2d 903.

-- the officer operating the radar equipment testified that he had tested it for accuracy both before and after the defendant's arrest by using a tuning fork calibrated to register 50 miles per hour on the radar meter and by comparing the radar meter readings with those indicated on the speedometer of a police test car driven through the radar zone of influence at 50 miles per hour, the court stating that it was more than coincidence that four testings of the radar device indicated speeds of 50 miles per hour, and that it was inconceivable that the radar unit, the tuning fork, and the test car speedometer could all have been inaccurate to, and in, the same degree. *People v Stephens* (1967) 52 Misc 2d 1070, 277 NYS2d 567.

-- it was shown that on the night in question the radar device was checked: (1) about 2 hours prior to the defendant motorist's arrest by the use of a 65-mile-per-hour tuning fork and by comparison with the speedometer of a police patrol car driven through the radar beam at 35 miles per hour; (2) about 20 minutes prior to defendant's arrest, by use of a 65-mile-per-hour tuning fork and by comparison with the speedometer of a police patrol car driven through the radar beam at 40 miles per hour; and (3) about 10 minutes after the defendant's arrest by the use of a 65-mile-per-hour tuning fork. *People v Stuck* (1967) 54 Misc 2d 811, 283 NYS2d 564.

-- the officer operating the radar equipment allowed the set to warm up for 15 minutes and then activated an internal calibration by an electronic tone within the machine itself, and also tested the machine with tuning forks calibrated to

register readings of 50 and 30 miles per hour, and the officer confirmed on redirect examination that he tested the machine "before and after each set up" on the day in question and had found no irregularities. *People v Lynch* (1969) 61 Misc 2d 117, 304 NYS2d 985.

-- there was evidence that both before and after a motorist's arrest the radar device used to time his speed was tested by using a tuning fork calibrated to register a reading of 65 miles per hour on the radar meter, and by comparing the speed indicated on the radar set with that registered on the speedometer of a police patrol car driven through the radar beam. *Cromer v State* (1964, Tex Crim) 374 SW2d 884.

-- there was evidence that both before and after the radar unit had been set up, a state trooper had driven through the radar zone of influence at varying speeds of from 50 to 80 miles per hour in a vehicle equipped with a speedometer calibrated by the use of a tachometer. *Farmer v Commonwealth* (1964) 205 Va 609, 139 SE2d 40.

-- it was shown that the radar set had been tested for accuracy by comparing its readings with those registered on the calibrated speedometer of a police patrol car driven through the radar beam at speeds of 30, 40, and 50 miles per hour, and there was corroborative testimony that the set had also been checked with factory pretested tuning forks calibrated to register speeds of 35 and 50 miles per hour on the radar meter. *Thomas v Norfolk* (1966) 207 Va 12, 147 SE2d 727.

<>

In prosecution for speeding, testimony by police officer that he had calibrated radar machine in accordance with instructions he had received was sufficient to establish accuracy of radar reading, even though officer could not explain functioning of machine. *People v Flaxman* (1977) 74 Cal App 3d Supp 16, 141 Cal Rptr 799.

Trial court's reliance on uncontested admission of laser calibration certificate and officer's testimony in speeding prosecution, which established that calibration of laser used to determine vehicle speed was accurate and working properly, was proper for purposes of allowing into evidence laser reading that indicated defendant was traveling well over designated speed limit, and thus, supported conviction for speeding. C.G.S.A. § 14-219(c). *State v. Parham*, 70 Conn. App. 223, 797 A.2d 599 (2002).

See *State v Newton* (1980, Del) 421 A2d 920, § 7[d].

There was sufficient evidence to support conviction for speeding, notwithstanding defendant's contention that state failed to establish accuracy of radar, where state trooper testified that according to radar unit defendant's vehicle was traveling at rate 12 miles per hour in excess of speed limit, and defendant presented no evidence or expert testimony demonstrating inaccuracies of particular unit or circumstances which would cause inaccuracy. *People v Boalbey* (1980) 90 Ill App 3d 738, 46 Ill Dec 113, 413 NE2d 553.

State laid sufficient foundation to admit radar evidence where officer testified that he tested device both before and after issuance of citation, indicated that there was nothing to interfere with device, and stated that in his opinion, device was working accurately. *People v Beil* (1979) 76 Ill App 3d 924, 32 Ill Dec 290, 395 NE2d 400.

Where arresting officer testified that he tested his radar apparatus before and after its use in apprehending defendant while utilizing electronic plug-in device, evidence sufficiently established accuracy of radar unit. *People v Burch*, 19 Ill App 3d 360, 311 NE2d 410.

Evidence of reading on radar speed meter was admissible in prosecution for speeding, notwithstanding there was no foundation testimony as to accuracy of device used to test radar unit, where tests performed on radar unit by use of tuning fork and comparison with police vehicle speedometer were performed only hours before defendant was observed

operating his car at high speed and, after defendant was so observed and his speed recorded as 94 miles per hour, tuning fork was again employed to check accuracy of equipment which produced same reading of 50 miles per hour obtained earlier in evening. Furthermore, such evidence was sufficient to support defendant's conviction of speeding 94 miles per hour in 55 mile-per-hour zone. *State v Shimon (Iowa) 243 NW2d 571.*

In negligent homicide prosecution, proper foundation was laid for admissibility of measurement by radar of defendant's speed where before he went on duty, trooper tested set for accuracy with calibrated tuning forks, furnished by manufacturer with unit, and testified that he determined unit on day of incident was functioning properly, and where state trooper testified in detail as to his past training and experience as operator of radar equipment. *State v Spence (1982, La) 418 So 2d 583* (citing annotation).

In prosecution for speeding, state laid sufficient foundation to admit testimony by troopers about speed of defendant's car, where state established that trooper calibrated radar unit in accordance with manufacturer's specifications, using two or more tuning forks supplied with unit, and both troopers using unit were experienced in its use and operation. *State v Creel (1986, La App 2d Cir) 490 So 2d 711.*

Accuracy of radar equipment used to check speed of motor vehicle is sufficiently shown by testimony of officer that he had faithfully followed all checkout and startup procedures, had performed two calibration tests, was certified operator of particular device, and that maintenance records existed. *Fitzwater v State (1984) 57 Md App 274, 469 A2d 909.*

Accuracy of radar speed meter was adequately checked by use of two tuning forks, one internal and one external, where both were calibrated by manufacturer to register and in fact did register same speed. *State v McDonough (Minn) 225 NW2d 259.*

Officer's testimony as to training and calibration of radar unit on date of speeding citation sufficiently established accuracy of readout, where officer had training in four different schools in preceding ten years and performed five separate calibration tests on day of citation. *State v Bogren (1987, Minn App) 410 NW2d 383.*

See *State v Dow (1984, Minn App) 352 NW2d 125*, § 4.

In prosecution for speeding, testimony by highway patrol officer as to certification of accuracy of radar speed gun, that before using unit he had performed three different tests to check its accuracy -- tuning fork test, internal calibration test, and checking it against patrol car's speedometer -- and that he was trained to determine accuracy of speed gun prior to its operation and to correct for spurious readings, was sufficient to satisfy prosecution's burden of proving accuracy of particular radar speed gun used to determine defendant's speed at time of his arrest. *State v Calvert (1984, Mo) 682 SW2d 474.*

Evidence supported conviction for speeding based on radar measurement, where citing officer testified that he had received training in use and calibration, that he had tested unit before and after clocking defendant, and that tuning forks used for testing had themselves been tested three months prior to citation. *State v Guenther (1988, Mo App) 744 SW2d 564.*

In prosecution for speeding, trooper's testimony that he had used tuning forks to check accuracy of moving radar unit before starting his shift and "right after" defendant's arrest was sufficient to meet state's burden of proving that radar unit was checked for accuracy reasonably close to time of its use; evidence that trooper tested tuning forks with frequency finder was sufficient to establish accuracy of tuning forks. *State v Moore (1985, Mo App) 700 SW2d 880.*

See *State v Hunziker (1982, Mo App) 638 SW2d 793*, § 7[c].

See *Kansas City v Tennill (1982, Mo App) 630 SW2d 173*, § 7[b].

See *State v Ahern* (1982) 122 NH 744, 449 A2d 1224, § 9.

Performance testing of laser speed detector demonstrated sufficient reliability that speed readings produced by such detector should generally be received as evidence of the speed of motor vehicles without the need for expert testimony in individual prosecutions arising under the motor vehicle laws, in light of prior determination that using laser to measure speed was widely accepted in relevant scientific community and was valid. *Matter of Admissibility of Motor Vehicle Speed Readings Produced by LTI Marksman 20-20 Laser Speed Detection System*, 314 N.J. Super. 233, 714 A.2d 381 (Law Div. 1998).

In prosecution for speeding, radar device was scientifically reliable and accurate in speed detection of vehicles, its accuracy being up to one mile plus-or-minus per 100 miles an hour, and training of officer who used device, in light of its design simplicity, was sufficiently established. *State v Boyington* (1978) 159 NJ Super 426, 388 A2d 276.

Certificates of calibration and accuracy of radar machine and tuning fork used to test machine were properly admitted in evidence in prosecution for speeding as proof of accuracy of devices used for testing proper operation of machine on morning in question, notwithstanding no proof was offered to qualify certificates as records made in regular course of business, where certificates were used by court solely as evidence of proper operating condition of radar device as prerequisite to admissibility of radar readings and where such evidence appeared to be reliable. *State v Cardone*, 146 NJ Super 23, 368 A2d 952.

Use of four external tuning forks to test radar unit total of 12 times within period of approximately 90 minutes, including 8 tests before defendant's vehicle was stopped for speeding and 4 tests afterward, with 3 tests by each of 4 forks producing radar reading identical to that for which particular fork was calibrated, was adequate to demonstrate accuracy of radar unit. *State v Overton*, 135 NJ Super 443, 343 A2d 516.

Radar unit's accuracy was adequately established in prosecution for speeding, where properly trained officer testified that unit had been calibrated by use of two tuning forks prior to arrest, notwithstanding failure to test unit after arrest. *People v Farrell* (1987) 137 Misc 2d 926, 523 NYS2d 383.

Radar equipment used in charging defendant with speeding was properly tested where trooper, before putting unit in operation, made various calibration tests, including internal calibration tests as well as tests with two tuning forks, one showing a readout of 35 miles per hour and other 65 miles per hour. *People v Maniscalco* (1978) 94 Misc 2d 915, 405 NYS2d 888.

Although he did not qualify himself as expert, unobjected to testimony of police officer that he observed defendant's vehicle through his rearview mirror travelling at speed estimated at 75 miles per hour and that he pursued defendant in his own vehicle for one-quarter mile at "a high rate of speed," was, in view of substantial difference between speed limit of 30 miles per hour and estimated speed of defendant's vehicle, sufficient to corroborate reading of 70 miles per hour on untested radar unit and to sustain defendant's conviction for speeding. *People v Cunha* (1978) 93 Misc 2d 467, 402 NYS2d 925.

Motorist was properly convicted of speeding solely upon evidence obtained from NR-7 moving radar device mounted on moving patrol vehicle where record contained: (1) expert testimony as to construction of device and its method of operation in determining speed of approaching vehicle from opposite direction; (2) evidence that device was in good condition for accurate work; and (3) evidence that officer using device was one qualified for its use by training and experience. *State v Shelt*, 46 Ohio App 2d 115, 75 Ohio Ops 2d 103, 346 NE2d 345.

Accuracy of K-55 radar unit was sufficiently demonstrated where judicial notice had been accorded to general accuracy and reliability of unit for measuring speed of vehicles and where officer issuing citation at issue was shown to have

been properly qualified to operate unit, unit was in good operating condition and had been properly calibrated both by the use of tuning fork certified for its calibration and by use of its internal calibration device and operator had properly read unit in that he had visually identified speed violator, monitor had indicated violation, and audio had indicated and that target vehicle was violator. *Akron v Gray* (1979) 60 Ohio Misc 68, 14 Ohio Ops 3d 303, 397 NE2d 429.

Evidence of driver's speed as measured by radar device was properly admitted in speeding prosecution where officer using device testified that he had calibrated it internally and externally at beginning of his shift on day he issued citation to driver and he testified that he had received on the job training on use of equipment for 6 months. *Jackson v Oklahoma* (1984, Okla Crim) 678 P2d 725.

See *Shears v State* (1982, Okla Crim) 648 P2d 841 (citing annotation), § 7[d].

Certificate of accuracy of radar that contained signatures of person who performed tests and engineer in charge of testing station was sufficient to comply with statutory prerequisite to introduction into evidence of results of speed timing device utilized by officer in determining that defendant was travelling at 80 miles per hour, notwithstanding fact that date on which accuracy of radar was certified was typed instead of handwritten. *Commonwealth v Gussey* (1983, Pa Super) 466 A2d 219.

See *Commonwealth v Gernsheimer* (1980, Pa Super) 419 A2d 528, § 6[b].

See *State v Sprague* (RI) 322 A2d 36, § 5[b].

Evidence was sufficient in speeding prosecution to support trial court's finding that radar unit utilized by officer had been accurate and that defendant was guilty of exceeding legal speed limit of 55 miles per hour, where trial court properly took judicial notice of general reliability of radar speedometers as devices for measuring speed of auto, where arresting officer testified that he was certified to operate radar unit and that he had calibrated unit to ensure that it was operating correctly before he came in contact with defendant, and where officer further testified that defendant's vehicle had been two-tenths of mile from radar unit when it was clocked at 69 miles per hour. *State v Amarantes* (1983) 143 Vt 348, 465 A2d 1383.

Trial court properly considered certificates authenticating accuracy of speed measuring devices in speeding infraction prosecution, even though they were not properly part of the officers' testimony and no prosecuting attorney was there to offer them; rules governing prosecution of a contested hearing on a traffic infraction contemplate that the hearing may proceed without a prosecuting attorney and without the citing officer's presence, while rule governing certification made in authenticating accuracy of a speed measuring device allows the certificate to stand in the stead of an expert witness and, thus, requiring a prosecuting attorney's presence to offer expert's certificate into evidence would run contrary to entire statutory scheme. IRLJ 3.3(b, c), 6.6(b); West's RCWA 46.63.080. *City of Bellevue v. Hellenthal*, 144 Wash. 2d 425, 28 P.3d 744 (2001).

Whether stationary radar device was inaccurate or unreliable was matter of defense as there is presumption of accuracy automatically arising by use of stationary units, and conviction for speeding was affirmed where defense failed to rebut presumption on accuracy. *Wauwatosa v Collett* (1980, App) 99 Wis 2d 522, 299 NW2d 620.

[\*8b] Accuracy held not sufficiently demonstrated

Under the particular circumstances of the following cases involving speeding prosecutions where the accuracy of the radar device used to clock a motorist's speed was at issue, it was held that the accuracy of the radar unit had not been sufficiently established.

Thus, the accuracy of a radar speedmeter was held not to have been adequately established by a test conducted with a

tuning fork which was an integral part of the machine itself, in *State v Gerdes (1971) 291 Minn 353, 191 NW 2d 428*, the court reversing a speeding conviction which had been based solely on the radar evidence, and calling such a test "bootstrapping."

In holding the evidence insufficient to establish the accuracy of a radar unit at the time the defendant motorist's speed was checked, the court in *St. Louis v Boecker (1963, Mo App) 370 SW2d 731*, although resting its decision upon the fact that no test of the radar speedometer was made at the site of or immediately preceding the defendant's arrest, expressed grave doubts that the evidence of a test performed with a single tuning fork which had not itself been shown to be accurate was sufficient evidence to establish prima facie that the radar speedometer used in this case was functioning properly, even at the time the test was made.

See also *People v Magri (1958) 3 NY2d 562, 170 NYS2d 335, 147 NE2d 728*, where, although a radar device had been tested for accuracy on the day in question by running a police "chase car" through the radar beam on two separate occasions and comparing the radar readings with the speeds registered on the car's speedometer, and by striking a 50-mile-per-hour sounding fork in front of the transmitter-receiver both before and after the defendant motorist's alleged speeding violation, the results of these tests did not appear adequately in the record. Stating that evidence obtained from an untested radar device was insufficient, standing alone, to sustain a conviction for speeding, the court regarded the radar speedometer used in this case as an untested speedometer, but affirmed a speeding conviction, since the radar evidence was corroborated by the opinion testimony of the police officers operating the unit.

In *People ex rel. McCann v Martirano (1966) 52 Misc 2d 64, 275 NYS 2d 215*, supra § 7[d], the accuracy of a radar unit was held not sufficiently established in the absence of proof that the tuning fork which was used to test the radar device was itself accurate.

Where in a speeding prosecution there was no showing as to what the speedometer of a radar unit registered when a police patrol car was driven by the device as a test upon its accuracy, a speeding conviction based upon the readings taken from the radar unit was reversed in *Wilson v State (1959, Tex Crim) 328 SW2d 311*, the court pointing out that the accuracy of the radar unit at the time of clocking a motorist's speed was an essential element of the state's case.

Where the police officer operating a radar speedometer testified that he had tested the accuracy of the device by the use of a "tuning fork," which was not otherwise described, but failed to explain the manner of testing and failed to relate the results of the test, it was held that the radar evidence was insufficient to establish beyond a reasonable doubt the guilt of a motorist who had allegedly been clocked by radar at 48 miles per hour in a 35-mile-per-hour zone, in *Biesser v Holland (1967) 208 Va 167, 156 SE2d 792*, the court reversing the conviction of the motorist, and pointing out that the statute which permitted the use of radar to measure the speed of motor vehicles and provided that the results of such measurements should be accepted as prima facie evidence of speed "in any court or legal proceedings where the speed of the motor vehicle is at issue" did not eliminate the necessity for the prosecution to prove that the device used for measuring speed had been properly set up and recently tested for accuracy. Pointing out also that tests upon the accuracy of radar machines should be made both before and after the machines were used and that the accuracy of tuning-fork tests would necessarily depend on the type and accuracy of the tuning fork used in the test, the court noted that the only evidence of the accuracy of the tuning fork in this case was testimony by the officer operating the radar device that the fork had been tested by some unknown member of the police department, which was objected to as hearsay and ruled inadmissible.<sup>n49</sup>

In reversing a speeding conviction based upon radar evidence, because the prosecution had failed to introduce "any legal evidence" tending to show that the radar machine used to measure the speed of the defendant motorist had been properly set up and recently tested for accuracy, the court in *Royals v Commonwealth (1957) 198 Va 876, 96 SE2d 812*, pointed out that the officer operating the radar machine at the time of the defendant's arrest had testified on direct examination that according to the regulations of the department of state police and the practice of police officers, radar units were tested for accuracy both before and after their use at each location at which they were set up, by comparing

the radar readings with the speeds registered on the calibrated speedometer of a police patrol car run through the radar beam, but on cross-examination stated that he did not know whether or not the tests of the machine used in this case were made on the day of the defendant's arrest, and had merely assumed that the officers who set up the machine at that location and removed it had made the tests required by the department. Noting that the use of radar or other electrical devices to check the speed of vehicles was permitted by a statute which also provided that "The results of such checks shall be accepted as prima facie evidence of the speed of such motor vehicle in any court or legal proceedings where the speed of the motor vehicle is at issue," the court held that this statute was intended to render evidence obtained by the use of radar or other electrical devices admissible without the necessity of proving by expert testimony the theory and operation of these devices, but that the statute did not eliminate the necessity to prove that the machine used for measuring speed in a particular case had been properly set up and recently tested for accuracy.

This same motorist was again arrested for speeding later in the same day and while driving on the same highway in another county of Virginia. His conviction of driving at 70 miles per hour in a 55-mile-per-hour zone, as determined by a radar speedometer, was reversed in *Royals v Commonwealth* (1957) 198 Va 883, 96 SE2d 816, the court stating that although proper testing of the accuracy of the radar device was a vital issue in this case, the only evidence on this point was clearly hearsay or mere deductions offered by one trooper who apparently was operating the device at the time of the defendant's arrest and who testified that he "understood" the accuracy tests to have been made both before the machine was put in operation and after its use on this occasion, although he did not see the tests made and did not know who made them, and by another trooper who had driven his patrol car through the radar beam, testing the accuracy of the device at the time that it was set up, and who testified to the performance of accuracy tests prior to the machine's removal from this location, although he also stated that he did not know who had made those tests.

And a speeding conviction based upon radar evidence was reversed on the ground that the state's evidence as to the testing of the accuracy of the radar device was hearsay and should not have been admitted, in *Crosby v Commonwealth* (1963) 204 Va 266, 130 SE2d 467, where the trial judge erroneously permitted the state trooper who had operated the radar machine on the day in question to testify, over objection, as to the speed reading registered on the speedometer of the patrol car driven through the radar zone as a test upon the unit's accuracy, although the trooper had personally observed only the readings registered on the radar meter itself. Recognizing the necessity to carry out the tests for accuracy on radar machines both before and after they were used, and the necessity in a subsequent prosecution for speeding of proving these tests by proper evidence, the court rejected an argument to the effect that upon a showing that the radar machine was in fact functioning, the statute which permitted the use of radar to check the speed of motor vehicles rendered the functioning prima facie correct. While the statute did provide, in part, "such checks shall be accepted as prima facie evidence of the speed" of a motor vehicle, the court declared that this provision contemplated that the radar equipment had been checked to insure accuracy, and added that the burden of showing the accuracy of the radar machine was on the prosecution. The court pointed out that, in ruling the trooper's testimony admissible upon the erroneous conception of the accuracy test as one operation to which only one of the troopers involved need testify, the trial judge had denied the motorist the right to be confronted by his accusers and to examine both officers who had collaborated in testing the accuracy of the radar machine as to the sufficiency of the test they had performed.n50

<>

Use of single uncalibrated tuning fork did not provide legally sufficient foundation to support reading taken from radar device, and thus conviction of speeding was properly reversed; where tuning fork is used to calibrate radar device prosecution must show, for evidence to be admissible, that two tuning forks have been used or that single tuning fork used has been certified as accurate within one year of test. *People v Walker* (1980, Colo) 610 P2d 496.

In prosecution for exceeding speed limit in violation of city ordinance, prosecution failed to make prima facie case that radar unit was functioning properly at time defendant's speed was tested and thus state failed to make admissible case against defendant, where police officer testified that he was certified to operate radar gun which he used to test

defendant's speed, he identified two tuning forks used to verify accuracy of radar gun, but when he was asked whether, prior to time he started using radar, he did anything to check accuracy of radar gun, he testified that it was policy of department prior to using instrument to check it with two tuning forks, and in light of burden which city had, officer's testimony was insufficient to establish beyond reasonable doubt that radar unit was found to be operating properly at site of and reasonably close in time to arrest of defendant. *Jackson v Langford* (1983, Mo App) 648 SW2d 927.

See *State v Weatherwax* (1982, Mo App) 635 SW2d 34, § 7[c].

In prosecution for speeding, evidence concerning use of radar gun to determine defendant's speed was inadmissible, although police officer tested radar with tuning fork, by means of its internal calibration equipment, and by having fellow officer conduct drive-through test in his patrol car, where none of the tests was itself tested for accuracy. *Ballwin v Collins* (Mo App) 534 SW2d 280.

Where in municipal court prosecution for speeding police officer was permitted to testify that he had measured driver's speed at 68 m.p.h. in 45 m.p.h. zone with K-55 device and, over defendant's objection to admission into evidence the state had not proven scientific reliability of device either by expert testimony or through judicial notice, court admitted evidence, superior court judge erred in permitting state to supplement municipal court record with evidence of scientific reliability of K-55 unit and, as that reading was sole evidence of driver's speed, conviction should be reversed, notwithstanding that superior court judge concluded that device was scientifically reliable and that its speed readings were admissible into evidence. *State v Musgrave* (1979) 171 NJ Super 477, 410 A2d 64.

Judgment of conviction of speeding was reversed where it was apparently based on reading from radar unit located in police vehicle traveling in opposite direction from oncoming vehicle; before such radar readings could be considered reliable, there must be testimony detailing operative principles underlying capability of radar unit to accurately compensate for relative speeds and directions of respective vehicles. *People v Bellizzi* (1980) 108 Misc 2d 209, 441 NYS2d 147.

There was insufficient evidence to support defendant's conviction for speeding where it was improper for trial court to take judicial notice of dependability of K-55 radar unit mounted in patrol car driving in opposite direction from defendant's car in absence of any expert testimony with respect to construction of K-55 radar unit and its method of operation with respect to its ability to differentiate speed of vehicle approaching moving patrol car from opposite direction from combined speed at which they are moving toward each other in any case within jurisdiction of trial court; testimony of state patrolman concerning use of internal calibration as well as use of tuning forks supplied by manufacturer would have been sufficient to establish that radar unit was in good condition for accurate work had proper basis for judicial notice of dependability of mobile radar unit been established in jurisdiction by evidence describing construction and method of operation of radar unit. *State v Doles* (1980) 70 Ohio App 2d 35, 24 Ohio Ops 3d 25, 433 NE2d 1290.

Evidence was insufficient to support conviction for speeding solely on basis of reading from speed meter where there was no testimony concerning the accuracy of the particular speed meter involved, particularly with respect to moving vehicles, or qualifications of person checking, calibrating and using meter. *State v Wilcox*, 40 Ohio App 2d 380, 69 Ohio Ops 2d 333, 319 NE2d 615.

See *State v Bonar*, 40 Ohio App 2d 360, 69 Ohio Ops 2d 320, 319 NE2d 388, § 5[b].

Accuracy of radar not sufficiently established, due to insufficient evidence that speedometer of testing vehicle was accurate. *Whitehead v Lynchburg*, 213 Va 742, 195 SE2d 858.

See *State v Hanson* (1978) 85 Wis 2d 233, 270 NW2d 212, (citing annotation), § 3.

[\*C] Proper operation of radar set

[\*9] Generally; expertise required of operator

It is generally recognized that proper operation of a radar device is a prerequisite to a speeding conviction based on evidence obtained by use of the device,<sup>n51</sup> and no case has been found to dispute this point. Moreover, in no reported case was it necessary for the court to weigh or discuss evidence tending to prove or disprove that the radar equipment involved had been properly operated

An issue closely related to the proper operation of the radar unit involves the qualifications required of the police officer manning the radar equipment. In this regard, among the following cases, where the sufficiency of a radar operator's training or experience was at issue, there was general agreement that the operator of a radar speedometer need not be an expert in the science of radar or electronics.

Thus, in considering whether, in a prosecution for violation of speed regulations, the officer operating a radar speedometer was qualified to testify as to the accuracy and operation of the instrument used to clock the defendant motorist's speed, the court in *State v Tomanelli (1966) 153 Conn 365, 216 A2d 625*, felt that it was unnecessary to recite in detail the evidence offered to establish the qualifications of the radar operator, but was satisfied, upon a review of the evidence, that the trial judge was amply justified in concluding that the operator was qualified to testify on these subjects. The court pointed out that it had discovered no writer who stated that the operation of police radar required the technical knowledge of a radar scientist.

Where a motorist charged with speeding attempted to dispute the admissibility of evidence obtained by the use of a radar speedometer by contesting, inter alia, the qualifications of the operator of the radar device, it was held that the motorist's objections were properly overruled, in *State v Naumec (1966) 3 Conn Cir 575, 222 A2d 239*, the court stating that the operation of police radar required no technical knowledge of radar science, and pointing out that the officer who had clocked the defendant's speed had been performing on the radar detail for 4 months and had previously received instructions in radar operation at the state police traffic division.

In *State v McCoy (1966) 4 Conn Cir 109, 226 A2d 116*, the court affirmed a speeding conviction and held, inter alia, that the operator of a radar device used by the state police to monitor the speed of vehicles on a highway was qualified to testify as to the accuracy and operation of the radar machine without proof that he had the knowledge of a radar scientist.

In *State v Moffitt (1953) 48 Del 210, 100 A2d 778*, a speeding prosecution based in part upon evidence obtained by the use of a radar speedometer which had been operated by two highway troopers, the court stated that the mere fact that the radar clocking of defendant's speed had been made by persons not skilled in electronics was not of sufficient import to render the radar evidence inadmissible.

In affirming a speeding conviction based upon evidence obtained by the use of a radar speedometer, the court in *People v Abdallah (1967) 82 Ill App 2d 312, 226 NE2d 408*, rejected the defendant motorist's argument that the arresting police officer was "wholly unqualified to operate any radar set under any circumstances" because he had no knowledge of the scientific principles involved in the operation of the radar instrument, had no knowledge of the frequency or power output of the instrument, and had no knowledge of the scope of the radar beam. Pointing out that the operator of a radar instrument did not have to be an expert in the science or theory underlying the functions of the instrument, the court said that his familiarity with the device and its operation was adequate qualification to operate the device, and added that the sufficiency of his familiarity was a question of weight and credibility for the jury, and that in the present case the operating officer had had 5 1/2 years of on-the-job experience with this type of radar equipment.

Testimony by the police officer who operated the radar speedmeter which had been used to clock a motorist's speed at 76 miles per hour in a 65-mile-per-hour zone that he had been trained in the use of the radar unit and had operated it approximately 60 to 100 days per year for several years was held evidence of his qualification to operate the device sufficient to sustain the motorist's conviction of speeding, in *People v Cash (1968) 103 Ill App 2d 20, 242 NE2d 765*, the court noting also that there was sufficient evidence to prove the accuracy of the device, and that conflicting testimony as to the presence of other vehicles within the radar's zone of influence at the time the defendant's speed was measured did not warrant a reversal of a finding of fact by the trial court.

In considering whether there had been established a sufficient foundation for the introduction of radar evidence of speeding the court in *People v Stankovich (1970) 119 Ill App 2d 187, 255 NE2d 461*, pointed out, inter alia, that the operator of the radar instrument did not have to be an expert in the science or theory underlying the functions of the instrument, and said that the qualifications of the police officer in this case as an operator of the radar unit were sufficiently established by evidence that he had attended indoctrination and training classes for police officers conducted by the company which manufactured the radar unit, and had also attended a 1-day familiarization session given by the police department several years earlier.

Affirming a speeding conviction based upon evidence obtained by the use of a radar speedmeter, the court in *Honeycutt v Commonwealth (1966, Ky) 408 SW2d 421*, held that evidence indicating that the policeman operating the radar device had received 13 weeks' training as a radar repairman and had operated radar equipment for almost 2 years was sufficient to show the policeman's qualification to operate and interpret the radar device properly. In demonstrating a radar operator's qualifications for purposes of laying a foundation for the admissibility of radar evidence, the court said that it was sufficient to show that the operator had such knowledge and training as enabled him properly to set up, test, and read the instrument. The court stated that it was not required of a radar operator that he understand the scientific principles of radar or have the ability to explain its internal workings, and said that a few hours' instruction normally should be enough to qualify a radar operator.

In holding that a state trooper who had attended for a short time a school of instruction on the use of a radar speedmeter was adequately qualified to operate the device for purposes of admitting evidence obtained by the device in a prosecution for speeding, the court in *State v Graham (1959, Mo App) 322 SW2d 188*, stated that the intelligent use of a radar speedmeter did not require that the operator understand all of the intricate steps in its manufacture or its process of operation, and noted that according to authority on the subject of radar, a reasonably intelligent person could learn to operate such a device after 1 1/2 hours' instruction.

In *People v Magri (1958) 3 NY2d 562, 170 NYS2d 335, 147 NE2d 728*, a speeding prosecution based upon radar evidence and the opinion testimony of the police officers operating the radar equipment, the court held that the police officers had been shown to be sufficiently qualified to operate the radar equipment used by the state park police by evidence that they had been instructed in the operation of the radar device at a school in Connecticut as well as at one connected with the police department, and that each officer had also served on radar patrol duty for 5 years.

Pointing out that a prerequisite to sustaining a speeding conviction based solely upon evidence obtained by the use of a radar speedmeter was proof that the witness relying upon the radar apparatus as the source of his testimony was qualified for its use by training and experience, the court, in *East Cleveland v Ferrell (1958) 168 Ohio St 298, 7 Ohio Ops 2d 6, 154 NE2d 630*, observed that in a police radar unit consisting of a car containing the radar apparatus and a "chase" car, the officer in charge of the radar car was merely required to read a dial on the speedmeter in the same way that a speedometer dial was read, and said that an officer with 5 years of experience was certainly qualified to do that.

A state highway patrolman who had had 3 hours' training initially and 6 months' experience in the use of a radar speedmeter was held sufficiently qualified to operate the machine properly, in *Hardaway v State (1957) 202 Tenn 94, 302 SW2d 351*.

Although concerned primarily with the insufficiency of the state's proof of the accuracy of a radar device at the time of a motorist's arrest for speeding, the court in *Wilson v State* (1959, *Tex Crim*) 328 SW2d 311, apparently considered 9 1/2 years of experience in highway traffic work sufficient qualification for a highway patrolman to operate a radar speedmeter, and to testify in a speeding prosecution as to readings obtained from the device.

In *Cromer v State* (1964, *Tex Crim*) 374 SW2d 884, where a motorist's speed was measured at 76 miles per hour in a 55-mile-per-hour zone by a portable radar set mounted on a highway patrol car, it was held that the state was not required to call qualified experts to testify as to the principles underlying radar apparatus and as to the manner and means of testing the accuracy of a radar set. Pointing out that there was no question here as to the admissibility of the radar evidence, which had been introduced without objection, the court held that the testimony of the patrolmen operating the radar apparatus as to the speed shown by the device, which they were trained to operate and to test for accuracy, and which they did operate and test and find accurate, was sufficient to sustain a finding by the jury that the motorist was driving at a speed in excess of 70 miles per hour. The court noted that the patrolmen agreed that they had not been trained in and were not experts on the mechanics of the radar set, or how to repair it, but that they testified that they had received instructions and had been trained in its operation and in how properly to test it for accuracy.

◇

In prosecution for speeding, in which police officer testified that defendant drove 45 mph in 25 mph zone and that he had been certified in 1980 to operate radar device upon which his testimony was based, officer's certification was not invalidated by statute providing that police radar operators had one year from March 22, 1983, to complete new training or have previous training determined to be equivalent, where defendant's trial was in January, 1984. *Price v State* (1985) 285 Ark 148, 685 SW2d 506.

For officer to testify as to speed based on reading of K-55 radar device, he need not understand scientific operation of device provided that he is properly trained to operate, test and read unit. *State v Newton* (1980, *Del*) 421 A2d 920.

See *State v Primm* (1980) 4 Kan App 2d 314, 606 P2d 112 (citing annotation), § 7[b].

See *State v Spence* (1982, *La*) 418 So 2d 583 (citing annotation), § 8[a].

A testifying officer's testimony regarding results obtained from radar gun is not expert testimony even though the technical mechanisms underlying how the radar gun works is not common knowledge. Rules of Evid., Rule 701. *State v. Cochrane*, 897 A.2d 952 (N.H. 2006).

In prosecution for operating motor vehicle in excess of speed limit officer's qualifications to operate radar equipment were sufficiently established where officer testified that he had been state trooper for approximately four years prior to date in question, he was familiar with use of radar and had often correctly set up and tested radar equipment, and he had completed two-day course and was certified in operating radar; there was sufficient evidence as to accuracy of unit on day in question where trooper testified that he calibrated unit before and after alleged violation and had followed procedural steps printed on outside of radar equipment, he used two external tuning forks, set at different speeds, and use of two tuning forks provided sufficient assurance that tuning forks themselves were accurate because each tuning fork corroborated accuracy of other. *State v Ahern* (1982) 122 NH 744, 449 A2d 1224.

Evidence supported trial court's judgment of guilt in speeding prosecution, where, although court noted gross inexperience of rookie state trooper who operated radar speed gun and issued citation, experienced supervisor who rode along with rookie at time citation was issued testified that she calibrated speed gun and that rookie followed all proper procedures, including prior visual determination that defendant's car was speeding. *State v. Ferrier*, 105 Ohio App. 3d 124, 663 N.E.2d 729 (3d Dist. Van Wert County 1995).

See *State v Shelt*, 46 Ohio App 2d 115, 75 Ohio Ops 2d 103, 346 NE2d 345, § 8[a].

See *State v Wilcox*, 40 Ohio App 2d 380, 69 Ohio Ops 2d 333, 319 NE2d 615, § 8[b].

See *Jackson v Oklahoma* (1984, Okla Crim) 678 P2d 725, § 8[a].

See *Shears v State* (1982, Okla Crim) 648 P2d 841 (citing annotation), § 7[d].

Officer's testimony that he was certified to use radar gun to detect speed, that he calibrated and tested his radar instrument on day he stopped defendant for speeding, and that gun used radar waves to calculate speed was sufficient to establish proper foundation for admitting radar evidence. Rules of Evid., Rule 702. *Mills v. State*, 99 S.W.3d 200 (Tex. App. Fort Worth 2002), petition for discretionary review filed, (Mar. 26, 2003).

Trooper's uncontroverted testimony was sufficient to sustain conviction for speeding, where trooper testified that he visually observed defendant traveling at high rate of speed on interstate highway, radar clocked defendant going 95 miles per hour in 70 mile per hour zone, trooper was certified in use of radar device, and trooper tested radar prior to his shift to ensure its accuracy. V.T.C.A., Transportation Code §§ 545.351(a), 545.352(a, b). *Nam Hoai Le v. State*, 963 S.W.2d 838 (Tex. App. Corpus Christi 1998), petition for discretionary review refused, (July 1, 1998).

See *State v Mills* (1981) 99 Wis 2d 697, 299 NW2d 881, § 7[b].

n52

[\*D] Effect of other statutory provisions

[\*10] Prohibition against "speed traps"

The contention that evidence obtained by a radar device should be excluded because such devices constitute an illegal speed trap was rejected by the courts in the following cases.n53

According to a statement in 43 Cal L Rev 710 at 713, it was held, in the unpublished case of *Salem v Franz* (Or) June 22, 1954, that the use of the radar speedmeter did not violate a speed-trap law similar to that discussed in the *Beamer* Case, supra, since the distance measured by the device was not the highway but the wave length of the broadcast beam.

A statute forbidding the admission of evidence obtained by use of a speed trap, and defining such a trap as a particular section of a highway measured as to distance and with boundaries marked or otherwise determined in order that the speed of a vehicle might be calculated by securing the time it took the vehicle to travel the known distance was held in *Ex parte Beamer* (1955) 133 Cal App 2d 63, 283 P2d 356, not to have been violated by the use of evidence secured by a radar speedmeter, the court saying that when such a device was used, no particular section of the highway was marked, since any few inches of the roadway within the effective range of the instrument could have been used for measuring purposes, and the device could be used anywhere on the highway wherever it was located, whether stationary or on a moving vehicle. It was also said that the evidence could not be rejected merely because it involved the measurement of the distance a vehicle traveled on the highway and the computation of the time it took to travel that distance, since this process was necessarily involved in any evidence as to speeding. The absence of any trap was also held to be evidenced by the facts that the officers operating the device were dressed in uniform, and that the automobile upon which the meter was mounted was properly painted in the distinctive colors usually used on police cars, and was parked at the curb in plain view.

See *State v Moffitt* (1953) 48 Del 210, 100 A2d 778, where the court instructed the jury that whether or not they agreed with the policy of using hidden radar equipment to detect speeders was not an issue before them, since in the absence of

legislation to the contrary the highway department had the power to determine the manner of patrolling the highways.

Since radar speedmeter reading did not involve the "lapsed time" required by a vehicle to travel through a measured section of highway, but judged speed by measuring the amount of frequency variation between the signal transmitted down a highway and that reflected back to the unit's receiving antenna, the court in *State v Ryan (1956) 48 Wash 2d 304, 293 P2d 399*, held that the use of a radar unit did not constitute a "speed trap" within the meaning of a statutory provision rendering evidence of speed obtained from a speed trap inadmissible.

<>

In prosecution for violating basic speed law, citing officer's testimony based on use of radar establishing that motorist was traveling 16 miles per hour over speed limit in 30 mile-per-hour zone was properly admitted, notwithstanding contention that engineering and traffic survey produced by prosecution did not justify posted speed and that therefore section of street covered by survey was speed trap, where engineering and traffic survey covering street section contained all of required elements governing contents of such survey. *People v Smith (1981) 118 Cal App 3d Supp 7, 173 Cal Rptr 659*.

In prosecution for driving on highway at speed greater than 55 miles per hour, trial court properly admitted radar evidence to establish that defendant had been speeding, despite defendant's contention that evidence of his alleged speeding violation was inadmissible under statute which excluded speed trap evidence, since 55 miles per hour speed limit in effect on area of highway in question was not prima facie speed limit; area in question was not speed trap which is defined as particular section of highway with prima facie speed limit that is unjustified by engineering and traffic survey. *People v Miller (1979) 90 Cal App 3d Supp 35, 153 Cal Rptr 192*.

[\*11] Requirements as to radar-warning signs

[\*11a] Necessity of proving existence of signs

The statutes which permit the use of radar speedmeters or other electronic devices in speed regulation enforcement usually require that signs warning motorists of the use of electronic speed detection equipment be erected along those highways where the devices may be used. That these signs have been erected was regarded, in the following cases, as an element essential to a conviction in a speeding prosecution based on radar evidence.

And taking judicial notice of the existence of signs warning motorists of radar speed checks was held reversible error in *Commonwealth v Brose (1963) 412 Pa 276, 194 A2d 322*, the court pointing out that in failing to prove that official warning signs had been erected on the highway at the point of the defendant's arrest, the prosecution had omitted an element essential to its case under the statutory provisions authorizing the use of radar to prove speed regulation violations.

Thus, where there was a total absence of proof that official radar-warning signs had been erected along the highway where the defendant motorist's speed was timed, and that the radar device used was of a type approved by the secretary of highways, the court in *Commonwealth v Sheetz (1962) 27 Pa D & C2d 566, 10 Chester Co 415*, reversing a speeding conviction based on the radar evidence, declared that affirmative proof of both of these facts was a necessary prerequisite to a speeding conviction under the statutory provisions permitting the use of radar in measuring the speed of motor vehicles.

As also recognizing the necessity of proving the existence of radar-warning signs, see *Sabatino License (1963) 31 Pa D & C2d 215, infra § 11[b]*.

That a court may not take judicial notice of the existence of official radar-warning signs was also recognized in *McClelland's License* (1965) 36 Pa D & C2d 378, 15 Bucks Co LR 48, where a speeding conviction based upon radar evidence was reversed because, inter alia, the record was totally silent as to the erection, at the time in question, of any official warning signs along the Pennsylvania Turnpike indicating that radar was in operation, as required by statute.

Failure to prove that the "radar enforced" signs along the highway in question met the specifications established by the secretary of highways in accordance with statutory authority was held fatal to a prosecution for speeding based upon radar evidence, in *Commonwealth v Taylor* (1966) 38 Pa D & C2d 749, the court acquitting a motorist whose speed had allegedly been clocked by radar at 31 miles per hour in excess of the posted 50-mile-per-hour maximum speed.

[\*11b] Permanence and placement of signs; proximity of radar

In considering where radar warning signs should be placed along highways, and whether they should be permanently positioned or set up only temporarily when radar is actually in operation, the following cases have indicated that sufficient compliance with the radar statute requires only that permanent signs be erected at reasonable intervals so as to give motorists notice that radar may be in use at some point along the highway.

In finding radar evidence sufficient to convict a motorist of speeding, in *Commonwealth v Lewis* (1964, Pa) 82 Dauph Co 153, the court rejected the motorist's argument that the state was required to prove that he had seen a radar-warning sign. The court pointed out that the radar-warning sign closest to the point of the motorist's arrest was located about 3.4 miles back down the highway in the direction of the motorist's travel, and that between this sign and the radar checkpoint there were nine rural roads from which access could be had to the highway upon which the motorist was arrested. Although the defendant motorist did not take the stand and testify as to where he entered the highway, it was his argument that if he had entered the highway from one of the nine side roads, he would not have been able to see any official warning sign, and that he must therefore be found not guilty of the speeding charge. The court expressed the opinion, however, that the state was not required to erect radar-warning signs at every crossroad, but only at reasonable intervals along highways upon which radar would be used to measure the speed of motor vehicles, and said that in the present case there were two official and adequate radar-warning signs within a distance of 4.8 miles -- a much shorter distance than the 10-mile maximum interval permitted by the regulations of the secretary of highways. The court added that these signs were erected at reasonable places, so that the motorist was legally presumed to have knowledge of their existence.

Similarly, it was held in *Commonwealth v Fornwalt* (1964) 203 Pa Super 411, 202 A2d 115, that the provision of the "Radar Act" which required official warning signs to be erected on the highways, indicating "that radar is in operation," did not require the erection of signs only on the particular highways and at the particular times that radar was in fact being used. The motorist's argument that the statute forbade permanent radar-warning signs was based upon the use of the verb "is," which he said indicated a legislative intent that the signs be temporary in nature, limited to the time and place of state police use of radar devices. In rejecting this contention, the court pointed out that during the process of the enactment of the "Radar Act," an amendment which would have added the words "at the immediate time and place" to the clause requiring the erection of warning signs was defeated in the state senate. The court added that giving the authority for control of the signs to the secretary of highways was indicative of legislative intent to have permanent signs erected, since this authority would otherwise have to be given to the state police, who alone could determine when and where signs of a temporary nature should be erected.n54

That no sign warning of radar enforcement of speed regulations had been erected on the 2-mile portion of a highway traveled by a motorist prior to his apprehension for speeding as detected by radar apparatus, was held not a valid defense to a speeding charge in *Sabatino License* (1963) 31 Pa D & C2d 215. The court recognized that the erection of proper warning signs was a statutory prerequisite to a conviction of speeding based upon evidence obtained through the use of radar apparatus, but denied that the statute required, as the motorist in effect contended, the erection upon all state highways of two warning signs, one for traffic proceeding in each direction, at every intersection with any road from

which vehicular traffic would enter those highways. Pointing out that the statute required only that warning signs be placed at reasonable intervals and places, the court concluded that the three warning signs which had been placed along the 5-mile length of the bypass upon which the defendant motorist was traveling at the time of his apprehension constituted sufficient compliance with the statutory requirements and the regulations established by the secretary of highways, although there was in fact no sign erected in defendant's direction of travel upon the 2-mile portion of the bypass which he had traversed. But see *Gibson License (1964) 36 Pa D & C2d 476*, where, in the absence of any evidence which would indicate what rules and regulations were established by the secretary of highways regarding the intervals at which radar warning signs were to be erected, the court was unable to determine whether three warning signs within a distance of 7 miles were in fact erected at the required intervals, and concluded that the highway in question was not posted in conformity with the law as to radar signs.

See *Commonwealth v Wrye (1963) 32 Pa D & C2d 385*, infra § 11[c], where, in rejecting a motorist's argument that radar-warning signs should state explicitly that "radar is in operation," the court pointed out that the statute's use of the word "erected" indicated a legislative intent that the signs be permanently placed, rather than set up only at those times when and at those places where a radar device was actually in operation.

In holding evidence of speeding obtained by the use of radar speedmeters sufficient to convict three motorists whose speeds had been clocked by the devices, the court in *Commonwealth v McConnell (1965) 35 Pa D & C2d 541*, pointed out, inter alia, that the prosecution had presented adequate proof that in accordance with the statute permitting the use of radar to enforce speed regulations, signs had been erected warning motorists of the presence of radar, and that at least one such sign was erected within 10 miles of the spot where each of the motorists drove through a radar beam, the distance being measured from the radar zone in question back along the motorist's route of travel. There was evidence in the record of the regulations adopted and amended by the secretary of highways which established the size, color, and type of warning signs to be used and the intervals at which the signs should be erected along highways. The motorists argued that the prosecution had proved the erection of only one sign, and that an "interval" could not be proven until the positions of at least two signs were established. The court held, however, that the purpose of the radar statute was to warn the traveling public that radar was in use, and, noting that each motorist had passed one sign within 10 miles of the spot where his speed was timed by radar, the court said that as far as these motorists were concerned, the full purpose of the act had been served, and that the location of the next sign along their proposed routes could not possibly be relevant.

And in *Commonwealth v Schoenfeld (1963, Pa) 54 Luzerne Leg Reg R 213*, the court pointed out that the erection of radar warning signs was not limited, under the statute, to the exact time and place of a radar speedmeter's use by the state police to detect speed regulation violations.

Although reversing on other grounds a speeding conviction based upon radar evidence, the court in *Royals v Commonwealth (1957) 198 Va 876, 96 SE2d 812*, rejected the motorist's argument that his conviction was illegal because the prosecution had failed to present adequate proof of compliance with the section of the radar statute which provided that "[n]o operator of a motor vehicle may be arrested under this section unless signs have been placed at the State line on the primary highway system, and outside cities and towns having over 3,500 population, on the primary highways to indicate the legal rate of speed and that the speed of motor vehicles may be measured by radio microwaves or other electrical devices." The court pointed out that the object of this provision of the statute was to eliminate the possible contention that the use of radar to determine a motorist's rate of speed was an entrapment creating a feeling of hostility between the motoring public and police officers, and said that the posting of the required signs gave every motorist using the highway between signs a fair warning that radar might be in use and that he would violate the speed limit at his peril. In this case, the motorist had been proceeding in a westerly direction when he was clocked by radar a few miles east of a town having a population in excess of 3,500. The court noted proof that the required signs were posted on the highway in and around the town; and the motorist admitted that he was informed at a service station just prior to his arrest that radar was being used to the west of him on the highway over which he was traveling. Thus, the court said, he had constructive notice from signs posted on the highway and actual knowledge that officers were using radar on this particular highway to measure the speed of motorists. The court concluded that proof of these two facts

showed sufficient compliance with the provision of the statute.

◇

Presenting problems akin to the question of the proper placement of statutorily required "radar warning" signs is the issue of the proper location of the radar device itself, where a statutory provision forbids its use within a specified distance of certain regulatory signs. In this regard, a few cases have considered problems relating to the construction of an Illinois statute providing generally that a posted speed limit would suspend the applicability of the general state speed limit prescribed in a foregoing section of the statute, and further providing that "[e]lectronic speed-detecting devices shall not be used within 500 feet beyond any such sign in the direction of travel; if so used in violation hereof, evidence obtained thereby shall be inadmissible in any prosecution for speeding."

Applying this statutory provision, the court in *People v Russell (1970) 120 Ill App 2d 197, 256 NE2d 468*, reversed a speeding conviction based upon the reading of a radar device which, according to the testimony of the officer operating the equipment, was being operated within 6 inches of "a" speed limit sign when the defendant motorist drove through its zone of influence. Pointing out that the statutory provision provided the motorist with an affirmative defense, the court saw no necessity to decide whether the phrase "any such sign," referring to the statutory requirement of posting speed limit signs, was intended by the legislature to refer to any sign denoting a speed limit or only to the first sign, in what might prove to be a series of signs, upon entry into a changed speed zone. Since the evidence offered by the state to prove the existence of other speed signs in the area failed to establish whether the sign in question was or was not the first in a series of signs, the court concluded that the state had failed, even on its own theory of interpretation of the statute, to meet its burden of proof to overcome the motorist's affirmative defense.

However, addressing itself directly to the question whether police might employ a radar speed detection device within 500 feet of any speed limit sign, the court in *People v Johannsen (1970) 126 Ill App 2d 31, 261 NE2d 551*, affirmed a speeding conviction, where the only evidence of the defendant motorist's speed was ascertained by the use of a radar device which the operating officer had testified was set up within 200 feet of a sign indicating a 35-mile-per-hour speed limit, but where the officer further testified that there was another 35-mile-per-hour speed limit sign about three-quarters of a mile before the sign in question. Pointing out that statutes must be reasonably construed in accordance with practical application, the court expressed the opinion that the intention of the legislature was to give a driver time to adjust to the speed limit before subjecting him to radar detection. The court pointed out that the motorist in this case had obviously been informed of the 35-mile-per-hour speed limit more than 500 feet in advance of the radar device, and said that to require radar devices to be placed more than 500 feet beyond any sign, regardless of how many similar signs had preceded it and had been passed by the vehicle in question, would be unreasonable.

[\*11c] Illumination and wording of signs

In attempting to establish a defense in a speeding prosecution based on radar evidence, motorists in a number of cases have argued that radar-warning signs in the area of their arrests failed, because of alleged structural deficiencies, to comply with the statutory provision which required the posting of such signs.

In one case a speeding charge was dismissed where the radar-warning sign and other traffic control signs in the area of the motorist's arrest were found to be inadequately illuminated or reflectorized so as not to conform to statutory requirements. Under statutory provisions requiring law enforcement officers to post signs warning motorists of the use of radar or other mechanical or electrical timing devices for the determination of speed, and requiring that signs intended to convey their messages during hours of darkness be reflectorized or illuminated, the court in *State v Wibelt (1967) 9 Ohio Misc 158, 38 Ohio Ops 2d 245, 223 NE2d 834*, dismissed a charge of speeding, brought against a motorist who was clocked by radar at 60 miles per hour in a 45-mile-per-hour zone at night, where it was found that the highway markers and control signs were not illuminated, that the "Speed Meter Ahead" sign definitely was not

illuminated or reflectorized, and that there was no definite proof in the evidence that the 45-mile-per-hour speed control sign was reflectorized.

<>

Motorists' objections based upon the wording of radar-warning signs were rejected by the courts in the following cases.

And it was pointed out, inter alia, in *Commonwealth v Fornwalt (1964) 203 Pa Super 411, 202 A2d 115*, that it was not necessary for radar-warning signs to contain the language "radar is in operation," since any sign that would "indicate" this fact would, in the court's opinion, meet the requirement of the "Radar Act."

In *Commonwealth v Schoenfeld (1963, Pa) 54 Luzerne Leg Reg R 213*, a sign containing the words "Radar Enforced" was held to comply with the statutory provision requiring the erection of signs warning "that radar is in operation."

And signs marked "Radar Enforced" were held sufficient to comply with a statutory directive that signs indicating "that radar is in operation" be posted, in *Commonwealth v Giller (1964, Pa) 54 Luzerne Leg Reg R 215*, the court noting that the words "Radar Enforced Now" were not required by the statute.

A sign marked "Radar Enforced" was held to comply with the statutory command that signs be erected warning motorists of the use of radar to measure the speed of motor vehicles, in *Commonwealth v Lewis (1964, Pa) 82 Dauph Co 153*, the court expressing the opinion that the words "Radar in Operation" were not specifically required by the statutory provision, and that the words "Radar Enforced" would cause an ordinary, prudent motorist to be put on notice "that radar is in operation" and that radar apparatus was available to check the speed of his vehicle.

Pointing out that the entire radar act would be useless and ineffective if police were required to post the exact time and place where radar was then and there operating, the court in *Commonwealth v Wrye (1963) 32 Pa D & C2d 385*, held that signs stating merely "Radar Enforced" were sufficient to comply with the statutory provision requiring the posting of signs warning motorists that radar was in operation. The court stated that it was a strained construction of the act to require radar-warning signs to be set on the road in the same manner as "Men Working" signs used by highway work crews to indicate the presence of men in the road ahead. In support of this position, the court noted that the act itself did not specify the wording required to be on the sign, and that the use of the word "erected" in the statute, indicating substantial or permanent construction, and the legislature's delegating to the secretary of highways the authority to designate the intervals at which warning signs were to be placed, both indicated a legislative intent that the signs should be erected on all highways on which radar speed detection devices were to be used. Quite obviously, the court said, radar units could not be operated at the same time on each mile of state highways. The court concluded that compliance with the statute requires only that the signs "indicate" that radar is in operation, or, in other words, warn a traveler that somewhere on the highway system on which he is traveling, radar is being used to detect speed violation.

[\*12] Requirement that radar set be of approved type

In the following cases, where the statute permitting the use of radar to enforce speed regulations required that the particular device used be of a type approved by a designated state official, it was held that affirmative proof that the radar set used to clock a motorist's speed was in fact approved for police use by the proper authority was necessary to a speeding conviction based on the evidence produced by the device.

A speeding conviction based upon radar evidence was reversed in *Commonwealth v Perdok (1963) 411 Pa 301, 192 A2d 221*, since the prosecution had failed to offer any competent evidence to prove that the radar device used was "of a type approved by the Secretary" as required by statute. In this connection, it was pointed out that although the "Certificate of Radar Speedmeter Accuracy" contained a statement that the device was of a proper type, the certificate

was admissible under the statute only to prove the accuracy of the radar apparatus, and the statement on the certificate regarding the type of device involved was hearsay and inadmissible in the absence of proof that the certificate fell within the business records or official statements exceptions to the hearsay rule.<sup>n55</sup>

A speeding conviction based upon radar evidence was reversed in *Commonwealth v Sheetz* (1962) 27 Pa D & C2d 566, 10 Chester Co 415, where there was a total absence of proof in the record that the radar apparatus used was of a type approved by the secretary of highways, and that official warning signs indicating that radar was in operation had been erected on the highway in question by the proper authority. The court pointed out that affirmative proof of both of these facts was a necessary prerequisite to a speeding conviction under the statutory provisions permitting the use of radar in measuring the speed of motor vehicles.

And in *McClelland's License* (1965) 36 Pa D & C2d 378, 15 Bucks Co LR 48, a speeding violation was held not sufficiently established, in the absence of any proof that the radar equipment used to clock the defendant motorist's speed was of a type approved by the secretary of revenue as required by the statute permitting the use of radar speedmeters to enforce speed regulations.

[\*13] Construction of term "officers"

It was held in the following cases that a statutory provision permitting state police "officers" to make use of radar equipment in speed regulation enforcement did not require that the radar device be operated by more than one officer.

And in *Commonwealth v Keeney* (1963, Pa) 59 Lanc L Rev 31, a speeding prosecution based upon evidence obtained by the use of a radar speedmeter, the court rejected the motorist's argument that the proof against him was deficient in that it indicated that only one officer had timed his speed, whereas the statute permitting the use of radar in measuring the speed of motor vehicles required that the timing be made by "officers" of the Pennsylvania state police. The court pointed out that the statute was indefinite with regard to the number of "officers" required to time a motorist's speed, and said that if the legislature had intended that the radar tests be made by a certain number of officers of the Pennsylvania state police, it would clearly have so stated.

The definition of the word "officers" in the Pennsylvania statute permitting the use of radar to measure the speed of motor vehicles was also considered in *Re Appeal from Suspension of Operator's License of Simon* (1964, Pa) 65 Lack Jur 121, where it was held that the terms of the statute encompassed all "members" of the Pennsylvania state police, without regard to their status on the police force. The court also expressed the opinion that there was nothing in the language or history of the statute which would indicate that there must be more than one officer in each of the cars used by a police radar unit in order to fulfil the statutory requirements, even though in many instances, as in this case, there were in fact two members of the state police in both the radar car and the so-called "chase" car.

A statutory provision permitting the rate of speed of any vehicle to be "timed. . . by officers of the Pennsylvania State Police through the use of radio-microwaves" was held in *Commonwealth v Wrye* (1963) 32 Pa D & C2d 385, not to require two or more officers to be located in the police vehicle with the radar equipment. Affirming a conviction of a truckdriver whose speed was timed by a single police officer seated in a vehicle with the radar timing device in front of him, the court expressed the opinion that if the legislature had intended to require two police officers to operate radar equipment used for enforcing speed regulations, it would have specifically spelled out that fact in that section of the statute which listed specific prerequisites to a conviction of speeding based upon radar evidence. The court cited a number of other instances in the Vehicle Code where the word "officers" was used, although it was quite clear that the act did not require two or more officers to be present, and the court noted that the Statutory Construction Act provided that the singular would include the plural and the plural the singular. The court concluded that although the Vehicle Code was a penal statute and should be strictly construed, the word "officers" in the radar statute referred to any officer of the Pennsylvania state police who might be assigned to the radar detail.

## [\*14] Miscellaneous provisions or construction problems

The courts in the following cases discussed various problems relating to the construction of miscellaneous statutes affecting proof of speed by radar.

In reversing a speeding conviction based upon the readings obtained from a radar speedmeter, the court in *Dayton v Adams* (1967) 9 Ohio St 2d 89, 38 Ohio Ops 2d 223, 223 NE2d 822, held that the police officer operating the radar device was incompetent to testify as a witness for the prosecution because he had been operating the device from an unmarked city-owned vehicle, in violation of a statute which provided that "Any motor vehicle used by a member of the state highway patrol or by any other peace officer, while said officer is on duty for the exclusive or main purpose of enforcing the motor vehicle or traffic laws of this state, provided the offense is punishable as a misdemeanor, shall be marked in some distinctive manner or color."

In affirming the speeding conviction of a motorist who had been clocked by radar at 60 miles per hour in a zone where speed was restricted to 50 miles per hour, the court in *Commonwealth v Gideon* (1962) 28 Pa D & C2d 157, 4 Adams Co Leg J 11, denied that the statute which authorized the use of radar to enforce speed regulations required that a motorist's speed be timed by radar for a distance of a quarter of a mile, as was the case with speed measurements made by speedometer in police patrol cars. In explanation, the court pointed out that the statutory provisions relating to the measurement of speed of motor vehicles provided for several types of measurements, and added that since the radar equipment made an instantaneous measurement of the rate of speed of a vehicle, no distance was specified for such a measurement in the statute. Had the legislature intended otherwise, the court said, it would have so provided specifically, as was done in the case of measurements by speedometer. Noting also that the Statutory Construction Act provided for a presumption that the legislature did not intend a result that was absurd, impossible of execution, or unreasonable, the court concluded that to require the measurement of the rate of speed by radar to be for a distance of a quarter of a mile would render that portion of the statute referring to radar speed measurements useless and inoperative.

In affirming a speeding conviction based upon radar evidence, the court in *Commonwealth v Wrye* (1963) 32 Pa D & C2d 385, rejected the defendant truckdriver's argument that the radar timing device must, under the Pennsylvania radar statute, be located on the highway right of way. The court said that in requiring the rate of speed to be timed on the highway, the act was referring to the vehicle being timed, and not to the radar unit doing the timing. So long as it could be shown that the radar unit operated safely and accurately, the court said, its location was immaterial.

Although reversing on other grounds a speeding conviction based on radar evidence, the court in *Royals v Commonwealth* (1957) 198 Va 876, 96 SE2d 812, found no merit in the defendant motorist's contention that the statute permitting the use of radar in speed regulation enforcement required the prosecution to procure a mechanical record of the speed of the motor vehicle as registered by the radar set, and to introduce in evidence a graph of that speed. The court pointed out that the statute contained no such requirement, and said that the result of a radar measurement of speed might be established either by a graph of a mechanical recorder properly identified or by the testimony of the police officers who observed the speed registered by the radar machine.n56

## [\*E] Other considerations

## [\*15] Sufficiency of evidence as to identification of speeding vehicle

Under the particular facts of the following cases, it was held that there was no merit to motorists' arguments that their vehicles had been mistakenly identified as those detected speeding by radar speedmeters.

In rejecting a motorist's contention that the police officers operating a radar unit mistakenly identified his automobile as the vehicle picked up by radar, the court in *People v McNulty* (1968) 90 Ill App 2d 465 (abstract), 233 NE 2d 229,

affirmed a speeding conviction based upon the radar evidence, and said that the motorist's guilt was established beyond a reasonable doubt by evidence disclosing that two veteran police officers had identified the defendant motorist as the driver of the vehicle in question, and had testified that there was no vehicle in the defendant's lane of traffic or interfering with identification of the defendant's automobile, and that the license plate number recorded by the officer operating the radar device was identical to the number radioed back to him by the two officers in the chase car.

In *Honeycutt v Commonwealth* (1966, Ky) 408 SW2d 421, a motorist convicted of traveling at 50 miles per hour in a 35-mile-per-hour zone contended that evidence obtained by the use of a radar speedmeter should not have been admitted, because, inter alia, there was insufficient proof that his car was the one that caused the speedmeter to show a reading of 50 miles per hour. In rejecting this argument, the court reviewed testimony by the police officer who had operated the radar device that he had estimated the speed of the defendant's vehicle, from visual observation alone, at approximately 40 to 45 miles per hour; that he had observed the defendant's car passing others at the same time the radar dial showed a fluctuating reading with a 50-mile-per-hour maximum; and that when the dial stabilized at 50 miles per hour, the defendant's car was in front by itself, nearest to the radar unit. The court stated that this evidence reasonably pointed to the defendant's car as the offending vehicle; and in answering a further contention made by the defendant, the court expressed the opinion that the radar evidence was not reduced to worthlessness by the remote chance of coincidence that a southbound vehicle broke clear from a passing situation, at 50 miles per hour, at the same moment that the defendant's car got out in front in the northbound lanes. Additionally, the court noted that the policeman's testimony indicated with reasonable certainty that a southbound car, when it entered the range field of the radar, would have been beyond the northbound cars, and therefore would not have registered a stabilized reading on the radar unit.

The identification of the defendant's truck by the state police officer who was operating the radar device, and the corroborative testimony of another state police officer who was aiding in the operation of the radar unit on the night in question, were held, in *Commonwealth v Bartley* (1963) 411 Pa 286, 191 A2d 673, to be sufficient evidence to convince the trial judge beyond a reasonable doubt that the defendant's truck was the vehicle which registered 60 miles per hour on the radar meter which was being used to determine the speed of vehicles in a 50-mile-per-hour zone.

[\*16] Difference between alleged speed of accused and legal limit

The few cases which have considered the problem have indicated that a motorist should not be convicted of speeding on radar evidence showing his speed to have been only slightly in excess of the legal limit.

In *State v Graham* (1959, Mo App) 322 SW2d 188, a speeding prosecution based upon evidence obtained from a radar unit which had been tested for accuracy by running a police patrol car through its zone of influence at speeds of 50 and 70 miles per hour, the court pointed out that since the patrol car's speedometer was not shown to be accurate, these tests would probably not be sufficient proof of accuracy to render the radar evidence admissible in a case where the speedmeter indicated only a slight difference between the speed of the defendant's vehicle and the legal limit. In affirming the speeding conviction in this case, however, the court pointed out that the radar speedmeter had indicated that the defendant was driving in excess of 15 miles per hour over the legal limit, and that the accuracy of the radar device had been confirmed by tests conducted with tuning forks calibrated to register 50 miles per hour and 70 miles per hour on the radar instrument.

Interpreting the *Graham Case*, *supra*, as indicating that radar speed readings showing a motorist's speed to be only 1 to 3 miles per hour over the legal limit should not be admitted in a prosecution for speeding, the court in *Kansas City v Hill* (1969, Mo App) 442 SW2d 89, held, inter alia, that radar evidence indicating a motorist's speed to have been 8 miles per hour in excess of the lawful limit was acceptable in evidence.

It was pointed out in *Sabatino License* (1963) 31 Pa D & C2d 215, that under the statute permitting the state police to enforce speed regulations by the use of radar speedmeters, no conviction of a motor vehicle operator might be had on

evidence obtained through the use of radar apparatus unless, inter alia, the speed recorded by the radar device was 6 or more miles per hour in excess of the legal speed limit.

[\*III] Admissibility and sufficiency of evidence obtained by use of other devices

[\*17] "Speed watch"

[\*17a] Conviction sustained or affirmed

Under the particular facts of the following cases, evidence obtained by the use of a "speed watch," or, as it is apparently also known, a Prather speed device or "electric timer," was held to support speeding convictions.

Evidence of speed obtained by the use of a Prather speed device, consisting of two rubber hoses stretched across a highway at a measured distance and activated by the wheels of passing cars so that by measuring with a stopwatch the time a car took to pass from one to the other of the hoses, its speed could be mathematically computed, was held in *Carrier v Commonwealth (1951, Ky) 242 SW2d 633*, to support a conviction where it was established by "proof of a high quality" that the device fulfilled the function for which it was designed, and was mechanically sufficient at the time it was used in connection with the defendant's apprehension.

The speeding conviction of a city bus driver was held justified by evidence obtained through the use of a "speed watch," a device which consisted of a stopwatch and two rubber tubes stretched across a roadway at a premeasured distance and which computed the speed of a passing vehicle by measuring automatically the time in which the vehicle traversed the distance between the tubes, in *People v Kenney (1958) 354 Mich 191, 92 NW2d 335*, where it was shown that the method of operation of this device was simple and accurate; that the officers operating the device had properly set it up and checked it for accuracy before using it on the day in question; that an expert had examined this particular speed watch and found it to be working accurately at least three times in a 60-day period, including an inspection 3 days after the arrest made in this case; and that the officer operating the equipment had personally observed the defendant's bus and estimated its speed at something in excess of the legal limit. The court pointed out that although this was a test case in which the defendant had offered no evidence to indicate that the instrument in question was mechanically or scientifically inaccurate, it was not necessary to find that the speed watch was infallible in order to admit its readings as evidence. And the court found without merit the defendant's contention that the evidence should have been suppressed, because he was unable to cross-examine the device.

Evidence obtained by the use of a similar device, which was referred to as an "electric timer," and which consisted of two rubber tubes stretched across the width of a street and a control panel containing a stopwatch, a switch, and a reset button, was held properly admitted, in *Webster Groves v Quick (1959, Mo App) 323 SW2d 386, n57* where the motorist was convicted of driving at a speed of 40 miles per hour in a 30-mile-an-hour zone. In rejecting the motorist's argument that the operating officer's testimony as to the readings of the timer constituted hearsay evidence, the court pointed out that the hearsay rule could not be applied to what a witness, on the stand and subject to cross-examination, observed, either through his own senses or through the use of scientific instruments. The court went on to say that the circumstantial guaranty of the trustworthiness of testimony relating to the use of scientific instruments was satisfied by the exercise of the right to cross-examination of the witness on the stand, both as to the results obtained by him and as to the reliability and accuracy of the device which he used. The reliability and accuracy of the electric timer were adequately shown, said the court, by evidence that a police vehicle was driven through the device on the morning of the arrest in question and its speed was accurately measured; and that the stopwatch was tested, and found to be accurate, during the week of the defendant's arrest and during the first week of the preceding and subsequent months. The court emphasized that the persons who had conducted these tests were subjected to rigorous cross-examination. As to the motorist's contention that it was error to admit evidence of the accuracy tests performed on the stopwatch, for the reason that at the time of the tests the watch was not connected to the timer cable and hoses as it was on the morning of the

motorist's arrest, the court failed to see any merit in this argument, since the accuracy of the stopwatch would depend upon its own mechanism and have no relation to the other pieces of equipment.

Where a motorist allegedly drove through a "speed watch" device at 46 miles per hour, her conviction for violating a 30-mile-per-hour speed limit ordinance was affirmed in *People v Asheroff (1955) 12 Misc 2d 10, 174 NYS2d 525*, the court stating that there was sufficient evidence to establish the accuracy of the "speed watch," even though test certificates purporting to establish the accuracy of police car speedometers against which the accuracy of the "speed watch" had been tested were ruled inadmissible. Referring to unchallenged expert testimony by an admittedly qualified engineer that he was familiar with, and had tested and examined, the speed watch equipment, and that it was capable of correctly ascertaining the speed of a motor vehicle within plus or minus 2 miles per hour, the court said this testimony alone would be sufficient to support the conviction. The court added that despite the inadmissibility of the speedometer test certificates, testimony that the speedometers and the speed watch showed identical speeds on the same day that the speed watch recorded the speed of the defendant's vehicle was not without probative value, even assuming that none of these speed-recording devices had been tested.

Where a "speed watch" had been tested for accuracy by driving police patrol cars, whose speedometers had previously been checked for accuracy, across the hoses which formed a part of the machine, evidence derived from the device was held, along with testimony by the police officer operating the "speed watch" as to his opinion of the defendant's speed, sufficient to sustain a conviction for speeding, in *People v Duskin (1958) 11 Misc 2d 945, 174 NYS2d 527*, the court stating that although expert testimony had been offered in this case to establish the reliability of the "speed watch" device, expert testimony as to the scientific principles underlying the "speed watch" device was no longer necessary.

Evidence that a "speed clock" or "whammy," which was operated by two highway patrolmen who had tested the device and found it to be working properly, registered a motorist's speed at 79 miles per hour in a 55-mile-per-hour speed zone, was held sufficient to sustain a conviction of speeding in excess of 70 miles per hour, in *State v Clark (1967) 272 NC 114, 157 SE2d 621*, the court noting testimony by the motorist that he had crossed the whammy at a speed of 55-60 miles per hour, and stating only that this conflicting evidence presented a very simple fact issue for the determination of the jury.

[\*17b] Conviction not sustained or affirmed

Under the particular facts of the following cases, speeding charges based upon "speed watch" evidence were dismissed because of the prosecution's failure to lay a proper foundation for the introduction of the "speed watch" readings.

Testimony by one of the officers operating a "speed timer" which was used to clock a motorist's speed that "[w]e put the two tubes across the center of the road, then we took down the box and hooked it up and Durkin ran it through a few times and I made sure that it was working properly," along with statements that the timer had been in use for approximately 1 hour and 20 minutes at the time of the motorist's arrest and had been set up in front of two named stores, was held to be insufficient proof of the motorist's speed and of the accuracy of the speed-timing device, in *People v Charles (1958) 15 Misc 2d 401, 180 NYS2d 635*. The court pointed out that there was no other proof in the record of the qualifications of the police officer to operate the speed-timing equipment, no other proof regarding the accuracy of the speed-timing equipment, nor any tests made to determine its accuracy prior to the time of its use in this case, and no other proof of the manner in which the equipment had been set up or of the proper spacing of the hoses which activated the machinery. While testimony as to the general scientific principles underlying the operation of this type of speed-timing equipment was no longer necessary, the court said, it was still necessary to prove that any particular instrument was in proper operating order, had been properly tested, and was being properly operated at the time of the alleged violation; and the court concluded that the failure of the prosecution to establish these points required that the information in this case be dismissed.

It was held that there was an insufficient foundation for the introduction of evidence obtained by the use of a "Speed

Watch," in *People v Tiedeman* (1960) 25 Misc 2d 413, 207 NYS2d 95, where the prosecution had failed to offer adequate proof as to the accuracy of the device and as to the operating officer's qualifications to operate it. It was stated that in the absence of scientific proof of the accuracy of the instrument itself, testimony that the machine was checked against a calibrated speedometer, under conditions assuring the accuracy of such a test, would have been a sufficient basis for the introduction of speed watch readings; but that the evidence offered in the present case indicated that the speedometer of the patrol car, which had been driven through the speed watch as a test upon its accuracy, had been calibrated a short time prior to the day of the defendant motorist's arrest and found to be somewhat inaccurate, although this inaccuracy was not accounted for by the officers who tested and operated the speed watch on the date in question. Furthermore, the court pointed out, the machine had been in operation some 2 hours and 15 minutes at the time the defendant in this case was arrested, and it would seem the better practice, after such a period of operation, to test the machine before dismantling it and discontinuing its operation at that particular location, so that the machine's accuracy throughout the period of operation could be established. The court then noted the absence of evidence as to the operating officer's qualification to operate the speed watch, and said that as a minimal requirement, testimony should have been offered to show his training and experience in the operation of the device as a foundation for his testimony on its reading. Because of these deficiencies in the evidence the court reversed the defendant's speeding conviction and dismissed the charges against him.

[\*18] Photographic devices

In the following cases, speeding convictions were sustained upon evidence derived from electronic devices involving the use of photography.

Thus, a conviction based upon evidence obtained by a "Photo-Speed-Recorder" which operated by taking two pictures, at a measured time interval, of the speeding automobile, and then calibrating the difference in the size of the automobile in the two photographs so as to determine, by a mathematical formula, the distance traveled in the time elapsed, was sustained in *Commonwealth v Buxton* (1910) 205 Mass 49, 91 NE 128, as against the objection that the ex parte experiments intended to show the reliability of the machine were insufficient and also that the prosecution had failed to establish the trustworthiness of the stopwatch mechanism which was an integral part of the apparatus. The court said that whether evidence of the experiments should be admitted depended largely upon the discretion of the trial judge, and that in the instant case the result of the experiments did not depend upon the fluctuations of human agency nor on conditions whose relations to the result were uncertain, but upon the immutable working of natural laws, so that the trial judge might well have found that such experiments were likely to be more reliable than the conjectural statement of an eyewitness. The court asserted that it was desirable to have some machine whose action, depending upon the uniform working of the laws of nature, would record the speed of a moving object; and the court said that the fact that the experimenter was not an expert was not fatal to the introduction of the machine in evidence. Evidence as to the accuracy of the stopwatch was also held admissible and sufficient to support the verdict.

See also *People v Hildebrandt* (1955) 308 NY 397, 126 NE2d 377, 49 ALR2d 449, where a speeding conviction based upon evidence obtained by a "photo-traffic" camera which took two photographs of a moving vehicle at a set time interval was reversed because of the absence of any evidence to show that the defendant, who was the registered owner of the car and who was not notified of the alleged offense until 2 weeks after it was supposed to have happened, was operating the car at the time the pictures were taken.

And a motorist's violation of a village speed ordinance was held established beyond a reasonable doubt, in *People v Pett* (1958) 13 Misc 2d 975, 178 NYS 2d 550, where his speed was clocked at 41 miles per hour in a 30-mile-per-hour zone by a speed measuring device known as a "Foto-Patrol," which consisted of two parallel tapes cemented to a roadway across a lane of traffic and 36 inches apart and connected to two boxes which in turn were connected to a camera and strobe light set upon a stanchion on the sidewalk beside the roadway. It was explained that the machine was basically an electronic counter which was started and stopped as passing vehicles made contact with the two tapes in the roadway; that the count thus arrived at was automatically compared to a predetermined count programmed into the machine's

computer; and that when the measured count exceeded the predetermined count, which in this case was the equivalent of a speed of 40 miles per hour, the strobe light and camera were activated to photograph the license plate of the speeding vehicle and to record the measured speed of the vehicle on the photograph in terms of figures which could be decoded by reference to a prepared table or chart. Because this was the first case involving the use of the Foto-Patrol, the court pointed out that the prosecution was required to present expert testimony establishing the reliability of the device. And it was noted that the requisite evidence of reliability was supplied by one expert who testified that he had inspected the device, and found it to be accurate, on the evening before the defendant motorist was apprehended, and by another expert who testified that he had developed the film and had prepared the conversion chart, using a definite formula involving time, rate, and distance. The court then noted that the accuracy of the device was substantiated by evidence that the officers operating the machine had compared its readings with the speeds indicated on the calibrated speedometer of a police patrol car driven through the device both before and after the time of the defendant's apprehension. Giving some weight also to opinion testimony as to the defendant's speed offered by one of the officers operating the Foto-Patrol, the court concluded that the machine had accurately recorded the defendant's speed at the time in question.

[\*19] "VASCAR"

A speeding conviction was sustained in the following case where the motorist's speed was determined by the use of a device known as a "VASCAR."

Thus, in *People v Persons* (1969) 60 Misc 2d 803, 303 NYS2d 728, a motorist was convicted of speeding upon evidence derived from a "visual average speed computer recorder" (VASCAR). It was explained that this instrument was designed to measure the distance traveled by a vehicle and the time elapsed in traveling that distance, so that the average speed of the vehicle over the distance could be computed by mathematical formulae and visually displayed to the operator of the device. Since the accuracy and reliability of this device had not yet been challenged in the New York courts, the court pointed out that the prosecution was required to present expert testimony as to the construction, operation, accuracy, and reliability of the device, as well as the scientific principles upon which the machine was based. This evidence was supplied by duly qualified experts who had been in charge of the development, manufacture, and marketing of VASCAR, and the court found that the machine was an accurate and proper instrument for detecting speed violations on highways, if properly tested and used. With regard to the machine's accuracy, the court first recognized that because of the human factor involved in operating speed-detecting devices, it was impossible to measure exact speed; and the court noted that there was evidence to indicate that due to the extensive training and testing of VASCAR operators, human error would result in a measurement error of less than one mile per hour. Adding that proof of proper testing was the key to demonstrating the accuracy of the VASCAR device, the court observed that the accuracy of the machine used in this case was sufficiently and convincingly proved by testimony of the operating officer that he had tested the machine, using a one-half mile course, which had been measured by a certified measuring tape, and a stopwatch, the accuracy of which had been tested by WWV, the radio station whose accuracy was universally recognized. The court also pointed out that the officer's testimony concerning his clocking of the defendant motorist was clear and exact, and proved beyond a reasonable doubt that he had properly operated the VASCAR device in measuring the defendant's speed.

[\*20] Miscellaneous devices

The courts in the following cases adjudicated whether a speeding conviction was warranted where the motorist's speed was determined by the use of miscellaneous devices.

<>

Event data recorder (EDR) in manslaughter defendant's automobile was not "device" within scope of statute regulating

police use of speed-measuring devices, where EDR was internal to vehicle and installed by manufacturer, and recorded defendant's speed on impact without any intervention by police officer. West's F.S.A. § 316.1905(1). *Matos v. State*, 899 So. 2d 403 (Fla. Dist. Ct. App. 4th Dist. 2005).

Sufficient evidence supported finding that motorist had violated statute requiring compliance with speed limit; reading from laser speed-detection device used to measure speed of motorist's vehicle indicated that motorist had been driving 42 miles per hour, and area in which motorist was driving had posted speed limit of 25 miles per hour. HRS § 291C-102. *State v. Stoa*, 112 Haw. 260, 145 P.3d 803 (Ct. App. 2006).

Testimony of officers who participated in speed detail, and measurement of defendant's speed taken by lidar equipment, provided sufficient evidence upon which to base defendant's conviction for speed in a school zone. McKinney's Vehicle and Traffic Law § 1180(c)(1). *People v. Deep*, 12 Misc. 3d 1137, 821 N.Y.S.2d 381 (City Ct. 2006).

Laser speed detector, used by law enforcement officers to detect when motorists are speeding, is reliable and accurate scientific measure of speed of moving object, if the device is used in accordance with certain procedures delineated by manufacturer, i.e., laser is pointed so that red dot on scope is aligned with reflective area on target vehicle, target vehicle is moving either directly toward or away from laser or at no more than slight angle, and laser was properly calibrated prior to use, which calibration included self-test done by the instrument internally and a measurement at distance conducted on test range, which distance test must be conducted on test range prior to use of device before each shift, with laser measuring a known distance. *Upper Arlington v. Limbert*, 138 Ohio Misc. 2d 30, 2005-Ohio-7159, 856 N.E.2d 336 (Mun. Ct. 2006).

## FOOTNOTES

n1 Superseding the annotation at 49 A.L.R.2d 469.

n2 The use of information obtained from a tachograph or other device as evidence of speed in a civil action is not within the scope of this annotation.

n3 The term "regulations" is intended to encompass all types of speed control enactments, whether federal, state, or municipal.

n4 See, for example, *State v. Moffitt* (1953) 48 Del 210, 100 A2d 778; *People v. Torpey* (1953) 204 Misc 1023, 128 NYS2d 864; and *People v. Beck* (1954) 205 Misc 757, 130 NYS2d 354. Note that in *People v. Pett* (1958) 13 Misc 2d 975, 178 NYS2d 550, *infra* § 18, expert testimony explaining the nature, construction, and operation of the "Foto-Patrol" was required, since this was the first case involving its use. And in *People v. Persons* (1969) 60 Misc 2d 803, 303 NYS2d 728, *infra* § 19, the first case dealing with evidence of speed obtained from a "visual average speed computer recorder" (VASCAR), expert testimony was necessary to explain the device.

n5 § 3, *infra*.

n33 § 17[b], *infra*.

n34 Speed, Proof 2., 11 Am. Jur. Proof of Facts 1 And see Kopper, The Scientific Reliability of Radar Speed Meters. 33 NC L Rev 343. The word radar is formed from the capitalized letters in "RAdio Detection And Ranging."

n35 The "Doppler effect," which is the basis of the police radar, is familiarly experienced when driving past

a car whose horn or siren is sounding, the pitch or frequency of the sound falling suddenly just as the vehicle is passed. For a strong criticism of radar speed-check devices on technical grounds, see Carosell & Coombs, *Radar Evidence in the Courts*, 32 *Dicta* 323. The authors contend that the Doppler or frequency radar ordinarily used in the police instruments, unlike the pulse radar commonly used by the military, is subject to many limitations as to accuracy and by way of interference from objects or power sources other than the moving automobile which is being checked. Also noting the possibility of interference with police radar from outside sources, see 1 Ridenour, *Massachusetts Institute of Technology Radiation Laboratory Series 132* (1947) cited in Comment, 10 *Rutgers L Rev* 454.

n36 Where the radar equipment is portable and is contained totally within a police vehicle, or where the police officer operating the radar equipment is able to "unhook" from radar equipment set up outside his car along the side of the road, a single police officer may perform both the function of radar operator and of "chase car" driver.

n37 11 Am Jur Proof of Facts, Speed; Proof 3 Supp, Expert Testimony as to Theory of Operation and General Scientific Accuracy of Radar Speed Meter in Reading Traffic Speeds.

n38 For example, testimony of the police officers who had operated the radar device at the time defendant's speed was checked, that earlier on the same day a police car had been driven through the radar beam, and that the speed observed on the speedometer of that car by one of the officers was the same as the radar reading observed by the other, was held in *People v Offermann* (1953) 204 Misc 769, 125 NYS2d 179, to have been improperly admitted, since it necessarily depended upon the hearsay statements of each officer to the other as to the reading each had made. Also sustaining a hearsay objection is *Crosby v Commonwealth* (1963) 204 Va 266, 130 SE2d 467, *infra* § 8[b].

n39 See, for example, *State v Graham* (1959, Mo App) 322 SW2d 188.

n40 Cases discussing the effect of legislative acceptance of radar devices are dealt with in § 4, *infra*.

n41 Evidence of speeding obtained by the use of a radar speedmeter was ruled admissible after the prosecution had offered ample expert testimony to demonstrate that the device was sufficiently accurate, in *People v Sarver* (1954) 205 Misc 523, 129 NYS2d 9, the court pointing out that the radar speedmeter was no different from any other scientific device, and that admissibility of tests made by it depended entirely upon its accuracy and reliability. Where there was detailed expert testimony regarding the construction and operation of a radar device, and the expert also testified that the operator of the equipment could tell when it was out of calibration and could quite easily determine when it was not working properly, the court in *People ex rel. Laibowitz v Katz* (1954) 205 Misc 522, 129 NYS2d 8, sustained a conviction based upon radar evidence, saying that the equipment was a scientifically reliable device which, if properly operated and functioning, fell in the category of recognized instruments used to determine the speed of moving vehicles. And in the absence of expert testimony explaining the construction, nature, and function of a radar speedmeter as a reliable instrument for the measurement of the speed of motor vehicles, speeding convictions based on radar evidence were reversed in *People v Offermann* (1953) 204 Misc 769, 125 NYS2d 17

*People v Torpey* (1953) 204 Misc 1023, 128 NYS2d 864; *People v Beck* (1954) 205 Misc 757, 130 NYS2d 354; and *People v Jamison* (1957) 8 Misc 2d 408, 165 NYS2d 906.

n42 For cases involving statutes allowing the admission of radar evidence, but expressly, or by possible implication, recognizing the necessity of expert evidence in the absence of such a statute, see § 4, *infra*.

n43 Prior to the enactment of the Pennsylvania statute permitting the use of radar by the Pennsylvania state police to measure the speed of motor vehicles, radar evidence of speed was held highly competent and admissible in *Demarest License* (1955) 5 Pa D & C2d 197, after the prosecution had introduced expert

testimony explaining in some detail the principles underlying the radar equipment used in this case, had presented evidence that the machine had been twice tested for accuracy during the day in question, and had shown that the radar equipment was operated by members of the Pennsylvania state police who had been specially trained in setting up and operating such equipment.

n44 The court in *Royals v Commonwealth* (1957) 198 Va 876, 96 SE2d 812, adhered to the decision in *Dooley v Commonwealth* (1956) 198 Va 32, 92 SE2d 348, app dismd 354 US 915, 1 L Ed 1432, 77 S Ct 1377, supra, and without discussion, reaffirmed the constitutionality of the statute authorizing the use of radar to measure the speed of motor vehicles.

n45 *People v Sarver* (1954) 205 Misc 523, 129 NYS2d 9.

n46 See detailed discussion in § 2[b], supra.

n47 The lack of any agreement among the courts of various jurisdictions as to a general guideline regarding the proper time for conducting accuracy tests is illustrated by the following cases. For example, in *State v Carta* (1963) 2 Conn Cir 68, 194 A2d 544, certif den (Conn) 197 A2d 932, the court said that in a prosecution for violation of speed regulations the speed recorded on a radar unit might be admissible in evidence, provided, inter alia, the accuracy of the radar unit at the time in question was established by tests made within a reasonable time before and after the speed was recorded. And in submitting to the jury issues related to the accuracy of a radar device and its ability to measure the speed of the defendant motorist's vehicle under all the circumstances of the present case, the court in *State v Moffitt* (1953) 48 Del 210, 100 A2d 778, instructed them that before they could return a verdict of guilty based solely upon the radar evidence, they must be satisfied beyond a reasonable doubt, inter alia, that the radar device had been properly tested for accuracy within a reasonable time from the date of its use in clocking the defendant's speed. In affirming a speeding conviction based upon radar evidence, the court in *People v Stankovich* (1970) 119 Ill App 2d 187, 255 NE2d 461, placed some emphasis upon the fact that the accuracy of the radar speedometer in question had been tested twice on the day of the defendant motorist's arrest, once about 3 hours prior to his arrest and again just shortly before the motorist's car entered the radar device's zone of influence. And in *Honeycutt v Commonwealth* (1966, Ky) 408 SW2d 421, the accuracy of a radar speedometer was held established by a test conducted a few hours before it was used to clock the defendant motorist's speed. The court in *State v Graham* (1959, Mo App) 322 SW2d 188, stated that for radar evidence to be admissible in a prosecution for violation of speed regulations, it must be shown that the device was carefully tested and found to be accurate at or near the time of its use in traffic regulation.

n48 It should be noted that in those jurisdictions which require proof of the radar's accuracy as a prerequisite to admissibility of radar evidence, proof of the accuracy of the testing apparatus has by necessary implication become a prerequisite to admissibility of radar evidence. On the other hand, in jurisdictions where the accuracy of the radar unit is treated as a matter affecting only the weight of radar evidence, proof of the accuracy of the testing apparatus is critical in determining whether the radar evidence alone will support a speeding conviction. For example, in New York it was held in *People v Dusing* (1959) 5 NY2d 126, 181 NYS2d 493, 155 NE2d 393, that failure to prove the accuracy of a speedometer used to test radar equipment would not render evidence of the radar reading inadmissible in a prosecution for speeding, although it might affect the weight to be given to the radar evidence.

n49 It was pointed out in *Sweeny v Commonwealth* (1971) 211 Va 668, 179 SE2d 509, 47 ALR3d 817, supra § 6[b], that, following the decision in the Biesser Case (Va) supra, the Vehicle Code was amended to obviate the necessity of having two troopers testify in every contested speeding case which involved the use of radar. It was the intention of the legislature, the court said, to provide, in cases where any question should arise as to the calibration or accuracy of any radio microwave or any other electrical device, that such accuracy could be shown by a certificate of the officers who conducted the test of the device, and who had knowledge of its accuracy.

n50 As sustaining a hearsay objection to the testimony of two officers as to comparative radar and speedometer readings where each individually observed one reading only, see *People v Offermann* (1953) 204 Misc 769, 125 NYS2d 179. However, this difficulty may be easily avoided. See discussion in § 2[b], supra.

n52 Statutory provisions pertaining specifically to the accuracy of radar equipment are discussed in § 6, supra; the general effect of statutes permitting the use of radar, upon issues relating to the overall reliability of radar to measure speed, is dealt with in § 4, supra.

n53 Note that the "speed watch" devices referred to in § 17, infra, the "Foto-Patrol" instrument discussed in

§ 18, *infra*, and the "VASCAR" gadget dealt with in § 19, *infra*, would apparently be considered speed traps under the statutes discussed in this section, since they depend upon the time taken by a car to traverse a measured section of the highway.

n54 In *Murray Motor Vehicle Operator License Case (1964) 203 Pa Super 418, 202 A2d 118*, the court, without discussion, and basing its decision upon the reasons set forth in *Commonwealth v Fornwalt (1964) 203 Pa Super 411, 202 A2d 115*, *supra*, held that speeding convictions based upon radar evidence had been erroneously reversed on the grounds that the radar warning signs in the area of the arrest did not meet the requirements of the Vehicle Code.

n55 It was noted by way of dictum, in *Commonwealth v Weaver (1963) 30 Pa D & C2d 631, 11 Chester Co 150*, that a certificate under the hand and seal of the secretary of revenue, in which he issued formal approval of certain types of radar speedmeters, was admissible, under the "official statements" exception to the hearsay rule, to prove that the radar device used in this case was of a type approved by the secretary, as required by statute. With regard to the fact that the certificate was dated 6 months prior to the date of the defendant's arrest, the court said that there was certainly no justification for requiring repeated approvals of radar apparatus for each and every speeding violation detected by the device, and added that an approval of a radar instrument, once issued, presumably would continue until revoked. A memorandum from the secretary of revenue to the commissioner of the Pennsylvania state police notifying him that the secretary issued approval "of Model S2 electronic speed meter and Model S5 electromatic speed meter manufactured by the Automatic Signal Device, Eastern Industries, Inc., as approved equipment for use by Pennsylvania State Police," was held in *Commonwealth v McConnell (1965) 35 Pa D & C2d 541*, to be admissible under the "official statements" exception to the hearsay rule as proof that the radar speedmeter used in this case to measure a motorist's speed was "of a type approved by the secretary" in accordance with the statute permitting the use of radar to enforce speed regulations.

n56 See also *State v Lenzen (1962) 24 Conn Supp 208, 189 A2d 405*, where the court rejected a motorist's contention that the best evidence rule required, as evidence of tests conducted upon the accuracy of a radar speedmeter, the introduction of the radar graph's recording of the results of tuning-fork and test-car tests. The court pointed out that the best evidence rule comprehended a situation where the evidence offered was clearly substitutionary in its nature, although directed to the same issue as the original evidence which was withheld, and that the rule would not prohibit a witness from testifying to what he observed on a visual mechanical indicating device, even though the indication was mechanically reduced to writing on a graph at the same time.

n57 The motorist's contention that his conviction of speeding on the basis of the reading of this electric timer had violated his constitutional rights by depriving him of his right to confront and cross-examine the witnesses against him was answered in the earlier decision, *Webster Groves v Quick (1959, Mo) 319 SW2d 543*, where the court held that the purported constitutional issues were without substance and only colorable, since the constitutional provisions in question applied to crimes against the state, and did not apply to proceedings by municipalities for violations of municipal police regulations, which were not considered to be prosecutions for crime in a constitutional sense.

## INDEX OF TERMS (Go to beginning)

Accuracy of apparatus used in testing radar § 7[d]

Accuracy of nonradar type of speed detecting device §§ 17- 19

Accuracy of particular radar device --

-certificate of accuracy of radar speedmeter, infra

-necessity of proving accuracy § 5

-sufficiency of evidence of § 8

-test of particular radar set for accuracy, infra

"Accurate," definition of statutory term § 6[a]

Admissibility of evidence --

-device other than radar speedmeter, evidence obtained by use of §§ 17- 19

-radar speedmeter, evidence obtained by use of §§ 3- 16

Admissibility or merely sufficiency of radar evidence, failure to prove accuracy of particular radar set as affecting § 5

Approved type, effect of statutory requirement that radar set be of § 12

Basic prerequisites to conviction based upon radar speed readings § 2[a]

Best evidence objection § 14

Burden of showing accuracy of radar device §§ 2[b], 8[b]

Certificate of accuracy of radar speedmeter --

-admissibility of § 6[b]

- particular facts stated in § 6
- sufficiency of certificate § 6[b]
- Changed speed zone, operation of radar speed detector in proximity to sign indicating § 11[b]
- Comment § 2
- Corroborative opinion testimony as to speed by police officer observing defendant's vehicle §§ 5[b], 8
- Difference between alleged speed and legal limit as factor § 16
- Due process clause, validity of statute authorizing use of radar in speed regulation enforcement under § 4
- Electric timer § 17
- Experience in operation of radar speedometer as factor § 9
- Expertise required of radar set operator § 9
- Expert testimony --
- concerning accuracy of nonradar speed timing device § 17[a]
- concerning accuracy of particular radar speedometer § 8[a]
- explaining nature, function and scientific principles of radar speedometer §§ 2[a], 3, 4
- refusal to allow motorist to contest basic reliability of radar device by introduction of § 4
- reliability and scientific basis of VASCAR device § 19
- reliability of photographic speed measuring device § 18
- "Foto-Patrol" speed measuring device § 18
- General reliability of radar speedometer to measure speed of motor vehicles as subject of judicial notice §§ 3, 4
- Governor allegedly limiting speed, vehicle equipped with § 8[a]
- Hearsay objections §§ 8[b], 17[a] evidence as to state approval of type of radar apparatus used, § 12
- Highway right-of-way, timing speed on highway with radar device located outside of § 14
- Identification of speeding vehicle, sufficiency of evidence as to § 15
- Illumination or reflectorization of radar warning signs, statutory requirement of § 11[c]
- Internal or integral method of testing accuracy of radar device §§ 2[b], 7[b], 8[a]
- Introduction §§ 1, 2
- Judicial notice --
- accuracy of particular radar device used § 5[a]
- existence of signs warning motorist of radar speed checks § 11[a]
- scientific basis, functioning, and general reliability, of radar speed measuring device §§ 3, 4
- Location of radar device --
- different when measuring defendant's speed than when tested for accuracy § 7[c]
- outside highway right of way § 14
- proximity to posted speed limit sign § 11[b]
- Location of radar warning signs § 11[b]
- Measured distance between actuating devices on highway, speed detector automatically timing passage through § 17
- Mechanically recorded graph of speed registered by radar device, introduction in evidence as not essential under particular statute § 14
- Mistake as to vehicle actuating radar speed reading, sufficiency of evidence concerning § 15
- Number and location of radar warning signs § 11[b]
- "Officers," construction of term in statute concerning use of radar in speed regulation enforcement § 13
- Photographic devices, evidence obtained by use of § 18
- "Photo-Speed-Recorder," evidence obtained by use of § 18
- Police officer's violation of statute by using unmarked vehicle in operating radar § 14
- Posted speed limit sign, construction of statute prohibiting operation of electronic speed-detecting device within 500 feet beyond § 11[b]
- Posting of highway with radar warning signs, necessity and sufficiency of § 11
- Practice pointers § 2[b]
- Prather speed device § 17
- Preliminary matters § 1

Proper operation of radar set, necessity of proving § 9  
 Qualifications of operator of nonradar speed measuring device §§ 17[b], 19  
 Qualifications of radar set operator, proof concerning § 9  
 Quarter-mile timing distance, applicability to radar timing of statute requiring § 14  
 "Radar Enforced," sufficiency of warning sign stating only § 11[c]  
 Radar speedmeter, evidence obtained by use of §§ 3- 15  
 Recording device in defendant's vehicle, variation between radar speed reading and speed registered by § 8[a]  
 Reflectorized or illuminated warning signs of radar or other devices for determining speed, statutory requirement of § 11[c]  
 Related matters § 1[b]  
 Reliability of radar generally §§ 3, 4  
 Reliability of speed measuring devices other than radar, necessity and sufficiency of proof of §§ 17- 19  
 Scientific and technical aspects of radar speed-detecting devices § 2[b]  
 Scope of annotation § 1[a]  
 Signs warning of use of radar, statutory requirements concerning --  
 -existence of signs, necessity of proving § 11[a]  
 -illumination of signs § 11[c]  
 -permanence of signs § 11[b]  
 -placement of signs § 11[b]  
 -proximity of radar § 11[b]  
 -wording of signs § 11[c]  
 Single officer in police vehicle, statute as authorizing operation and reading of radar speed detection device by § 13  
 Slightly excessive speed recorded, admissibility and sufficiency of radar evidence in situation involving § 16  
 Spacing of permanent radar warning signs along highway § 11[b]  
 Speed measuring devices other than radar, evidence obtained by use of §§ 17- 19  
 Speedometer of other vehicle used in testing radar speedmeter, necessity of showing accuracy of §§ 6[b], 7[d], 8[a]  
 Speed registered by radar as provable by testimony of police officer although mechanically recorded graph of speed registered not procured and introduced § 14  
 "Speed traps," effect of statutory prohibition of § 10  
 "Speed watch," evidence obtained by use of § 17  
 State-approved type of radar apparatus, necessity of proof that radar used was § 12  
 Statutory factors --  
 -provisions expressly concerning radar devices or their use, generally §§ 4, 6, 12, 13, 14  
 -signs warning of radar use, provisions requiring § 11  
 -"speed traps," prohibition of § 10  
 -timing speed for a quarter-mile, applicability of statutory requirement § 14  
 -unmarked vehicle, prohibiting use of, in traffic law enforcement § 14  
 Sufficiency of evidence --  
 -accuracy of radar set § 8  
 -device other than radar speedmeter, evidence obtained by use of §§ 17- 19  
 -radar speedmeter, evidence obtained by use of §§ 3- 16  
 Sufficiency rather than admissibility of radar evidence, failure to prove accuracy of radar device as affecting § 5  
 Summary § 2  
 Tachograph speed recording device in vehicle, discrepancy between radar speed clocking and record of § 8[a]  
 Testing nonradar timing device for accuracy, necessity and sufficiency of §§ 17- 19  
 Test of particular radar set for accuracy --  
 -certificate of accuracy § 6  
 -correspondence of results obtained from different types of tests, significance of § 7[d]  
 -factors affecting sufficiency of test §§ 6, 7  
 -methods of testing or checking accuracy §§ 2[b], 6[b], 7, 8

-sufficiency of evidence of accuracy § 8  
 -test runs through radar zone §§ 2[b], 6[b], 7[b, d], 8, 16  
 -time and place of conducting test § 7[c]  
 Tolerances in testing accuracy of radar device § 6[a]  
 Training and qualifications of police officer operating radar device, sufficiency of § 9  
 Training and testing of operators of VASCAR speed measuring device, proof concerning § 19  
 Tuning fork method of testing accuracy of radar device §§ 2[b], 7[b, d], 8, 16  
 Two or more officers in police vehicle with radar equipment, statute as not requiring presence of § 13  
 Unmarked vehicle, police officer's violation of statute by operating radar in § 14  
 Validity of statute permitting use of radar in speed regulation § 4  
 "VASCAR," evidence obtained by use of § 19  
 "Visual average speed computer recorder," evidence obtained by use of § 19  
 Warning signs. Signs warning of use of radar, statutory requirements concerning, *supra*  
 Wheels of vehicle traveling measured distance, stop watch timing device activated by § 17  
 Wording of radar warning signs, sufficiency under statutory requirements § 11[c]

ARTICLE OUTLINE

**ARTICLE:** [\*I] Preliminary Matters

[\*1] Introduction

[\*1a] Scope

This annotation<sup>1</sup> consists of a collection of cases that discuss whether a witness, expert or nonexpert, may give opinion testimony as to the speed of a motor vehicle, based on skid marks<sup>2</sup> and other physical facts at the scene of the accident.<sup>3</sup> Excluded are cases that involve the issue whether an eye witness is competent to testify as to speed of a motor vehicle,<sup>4</sup> and cases that involve the admissibility of expert opinion testimony as to speed based on the appearance or condition of the motor vehicle after an accident, where there were no skid marks.<sup>5</sup>

[\*1b] Related matters

Admissibility of expert testimony regarding questions of domestic law, *66 A.L.R.5th 135*

Products liability: admissibility of experimental or test evidence to disprove defect in motor vehicle, *64 A.L.R.4th 125*

Proof, by radar or other mechanical or electronic devices, of violation of speed regulations, *47 A.L.R.3d 822*

Automobiles: Liability of motorist for collision as affected by attempts to avoid dog or other small animal in road, *41 A.L.R.3d 1124*

Admissibility in evidence, in automobile negligence action, of charts showing braking distance, reaction times, etc, *9 A.L.R.3d 976*

Expert or opinion evidence as to speed based on appearance or condition of motor vehicle after accident, *93 A.L.R.2d 287*

Admissibility and probative effect of testimony that motor vehicle was going "fast" or the like, *92 A.L.R.2d 1391*

Judicial notice of drivers' reaction time and of stopping distance of motor vehicles traveling at various speeds, *84 A.L.R.2d 979*

Admissibility of experimental evidence, skidding tests, or the like, relating to speed or control of motor vehicle, *78 A.L.R.2d 218*

Admissibility of opinion evidence as to point of impact or collision in motor vehicle accident case, *66 A.L.R.2d 1048*

Admissibility of opinion evidence as to the cause of an accident or occurrence, *38 A.L.R.2d 13*

Admissibility of opinion evidence as to whether vehicle involved in collision was standing still or moving, *33 A.L.R.2d 1250*

Admissibility of evidence as to tire tracks on or near highway, *23 A.L.R.2d 112*

Expert or opinion testimony as to speed of vehicle by one who had no view, or only momentary view, of vehicle at time of accident, *156 A.L.R. 382*

Opinion as to distance within which automobile can be stopped, *135 A.L.R. 1404*

Opinion evidence as to speed of automobile or motorcycle, *94 A.L.R. 1190*

Opinion evidence as to speed of automobile or motorcycle, *70 A.L.R. 540*

[\*2] Background, summary, and comment

[\*2a] In general

The speed at which a motor vehicle was traveling immediately before, or at the time of, an accident, is often an important factor on the issue of the defendant's negligence,<sup>n6</sup> or the plaintiff's contributory negligence,<sup>n7</sup> in personal injury and wrongful death actions. Speed may also be an important factor in proving recklessness, wantonness, wilful misconduct, or gross negligence, in an action under a guest statute.<sup>n8</sup> And it may be an important factor in criminal prosecutions arising out of the operation of a motor vehicle.<sup>n9</sup>

Where a person of ordinary experience, intelligence, and ability was in a position to observe the movement of the motor vehicle at the time in question, he is generally held competent to give opinion testimony as to the speed of the vehicle, based on his observations and experience.<sup>n10</sup> On the other hand, where there is no eyewitness or friendly witness available to testify as to speed of a motor vehicle, its speed must be inferred from the physical facts, including skid marks, and the circumstances of the accident.<sup>n11</sup> Although there is authority to the contrary,<sup>n12</sup> a substantial number of courts have held that the speed of a motor vehicle, as based on skid marks and other physical facts, is a subject for expert opinion testimony.<sup>n13</sup> Thus, qualified expert witnesses, such as law enforcement officers,<sup>n14</sup> various engineers,<sup>n15</sup> and certain other witnesses,<sup>n16</sup> have been allowed to give opinion testimony as to the speed of a motor vehicle based on physical facts in addition to skid marks, such as the point of impact, the position of vehicles after the collision, damage to the vehicles, and the like. On the other hand, a lay or nonexpert witness who has not observed the

movement of the vehicle or vehicles at the time in question is not competent to give opinion testimony as to speed based on skid marks plus other physical facts.<sup>n17</sup> The rationale is that such opinion testimony would invade the province of the jury, which is as qualified to estimate the speed of a motor vehicle from the physical facts as is the lay or nonexpert witness.<sup>n18</sup>

Although most courts have permitted a qualified expert witness to estimate the speed of a motor vehicle on the basis of skid marks made *before and after* impact,<sup>n19</sup> the Alabama court limits opinion testimony as to speed to that based on skid marks *before* impact.<sup>n20</sup> And in Nebraska, modern cases indicate that the expert witness is limited to opinion testimony as to the *minimum* speed of the vehicle, based on skid marks.<sup>n21</sup>

As to cases tried in federal courts, the subject matter of this annotation may be affected by the Federal Rules of Evidence which became effective July 1, 1975.

[\*2b] Practice pointers

Before opinion testimony as to the speed of a motor vehicle, based on skid marks and other physical facts, may be admitted in evidence, counsel must show that the witness is qualified as an expert on the subject of determining speed, and he must lay a proper foundation by proving the evidentiary facts on which the expert's opinion is to be based.<sup>n22</sup>

Since the law gives the trial court considerable discretion in determining whether a witness qualifies as an expert,<sup>n23</sup> it is difficult to state precisely when a witness such as a police officer, highway patrolman, or other law enforcement officer will be considered qualified to give expert opinion testimony based on skid marks and other physical facts, on the question of the speed of a motor vehicle. Although there are a few decisions to the contrary,<sup>n24</sup> most appellate courts have held that the trial court does not abuse its discretion in permitting a law enforcement officer to give such opinion testimony where the witness testifies that he has had special training and substantial experience in the investigation of motor vehicle accidents, including their causes and the determination of speed based on physical evidence.<sup>n25</sup>

A proper foundation for a law enforcement officer's opinion as to speed may be laid by showing, for example, that he went to the scene of the accident; that he observed the size, weight, and type of vehicles involved in the accident; that he observed the type of highway surface, its condition, and the level or grade of the highway at the point of impact; that he observed the skid marks that appeared to have been made by the vehicle in question; that he measured the length of the skid marks and studied their depth and intensity; that he was able to determine the point of impact; that he observed the position of the vehicle or vehicles after the collision; that he observed the extent of the damage to each vehicle; and that he observed other debris scattered at the scene of the accident.<sup>n26</sup> If the witness does not have personal knowledge of these factors, it is necessary to prove the relevant facts by testimony of other competent witnesses,<sup>n27</sup> lay or expert, and then elicit the expert's opinion by incorporating the necessary facts into a hypothetical question addressed to the expert witness.<sup>n28</sup>

Engineers of various kinds -- such as mechanical engineers and safety engineers -- have been held qualified to testify as to the speed of a motor vehicle, on the basis of skid marks and other physical facts, where their testimony first established that they knew how to determine the speed of certain objects on the basis of certain physical laws or formulas, such as the coefficient of friction.<sup>n29</sup> On the other hand, their testimony has sometimes been excluded on the ground that no proper foundation had been laid in that the necessary facts were not properly incorporated into a hypothetical question addressed to the expert witness.<sup>n30</sup>

Although charts showing statistical data on the length of skid marks made by various vehicles traveling at various rates of speed are hearsay where they have been prepared by persons other than the witness,<sup>n31</sup> an expert witness may consider certain standard or recognized skid charts in forming his opinion as to the speed of a motor vehicle based on stopping distances. In fact, at least one court has said that it would take judicial notice of certain skid charts used by the

state highway patrol.n32 But a police officer's opinion testimony as to speed based solely on these charts has been held inadmissible on the ground that the charts are hearsay.n33

A party is more likely to be successful in having opinion testimony as to speed admitted in evidence if he offers to show the speed of the vehicle at the moment it started to skid, as distinguished from speed at the moment of impact with another vehicle or object. This can be shown by testimony as to how fast a vehicle would have to be traveling to make skid marks of a given length up to the point of impact, as distinguished from skid marks made after impact.n34

As a word of caution, questions that ask the expert to give an opinion whether a party's vehicle was traveling at an "excessive rate of speed" are clearly objectionable on the ground that they call for a conclusion of law, at least where the ultimate issue in the case is whether the party was driving his vehicle at an excessive rate of speed.n35 Counsel should, therefore, merely try to prove the rate of speed and leave it to the court or jury to decide whether the rate of speed was excessive.

Although opinion testimony as to speed is usually introduced to prove that a party's vehicle was traveling at an excessive rate of speed, it may also be used effectively to show that he was operating his vehicle at a safe or reasonable speed.n36

[\*II] Opinion testimony of particular witnesses

[\*3] Law enforcement officers

[\*3a] Opinion as to speed held admissible

In the following cases various law enforcement officers, such as policemen, highway patrolmen, sheriffs, and accident investigators employed by law enforcement agencies, were held qualified as experts and allowed to give opinion testimony as to the speed of a motor vehicle, based on skid marks and other physical facts:

## SUPREME COURT

*Bonner v Polacari* (1965, CA10 Okla) 350 F2d 493

*White v Zutell* (1959, CA2d NY) 263 F2d 613

For federal cases involving state law, see state headings infra

## ALABAMA

*Jackson v Vaughn* (1920) 204 Ala 543, 86 So 469

*Stanley v Hayes* (1964) 276 Ala 532, 165 So 2d 84

*Rosen v Lawson* (1967) 281 Ala 351, 202 So 2d 716 (opinion based on skid marks before impact)

*Knight v Borgan* (1958) 52 Wash 2d 219, 324 P2d 797

In affirming a judgment for the plaintiff, the court in *Rosen v Lawson* (1967) 281 Ala 351, 202 So 2d 716, held that it was proper to permit a highway patrolman who had investigated the accident -- a collision between defendant's car and a car driven by plaintiff's decedent -- to testify as to the speed of the defendant's automobile immediately before the wreck, as based on 45 feet of skid marks made before impact, the point of impact, and damage to the vehicles. The defendant contended that the witness was asked to express an opinion as to speed on the basis of skid marks "from the point of impact," and that under Alabama law such evidence is not admissible. The court, recognizing that opinion testimony as to speed of a vehicle, based on skid marks made after impact, is not admissible under Alabama law, pointed out that the only evidence of skid marks in this case was of skid marks made before impact.

In an action for personal injuries allegedly sustained as the result of the deceased driver's wilful misconduct in the operation of his automobile, in which plaintiff was riding as a guest, the court in *Hoffman v Slocum* (1963) 219 Cal App 2d 100, 32 Cal Rptr 635, held that the trial court, in a nonjury trial, had not erred in permitting an officer of the Los Angeles police department to testify that in his opinion the decedent's car was traveling at least 80 miles per hour immediately before the accident, such testimony being based on skid marks and other physical evidence. In rejecting the defendant's contention that the witness was not properly qualified to make a determination of speed based on the physical conditions observed after the vehicle came to rest, and that the subject of speed was not one for expert testimony, the court pointed out that the witness had been in the accident investigating unit of the police department for 12 years, and during that time he had investigated 5,000 accidents; that as part of his training he had attended two courses in accident investigation, and these courses included instructions in the use of skid marks to determine speed; that this officer had arrived at the scene of the accident little more than an hour after its occurrence; that he had personally observed the condition of the road, the damage to a power pole and fence, and the position of the decedent's vehicle, as well as the damage it sustained; and that he had measured the skid marks and had taken photographs which were introduced into evidence. The court, noting that the officer did not purport to state the speed of the vehicle upon the basis of any scientific application of the principles of physics, said that he was simply a man who had seen more wreckage than most, and that for 12 years it had been his business to observe the consequences of highway accidents and study their causes. Judgment was affirmed for plaintiff.

In an action arising out of an intersection collision between the plaintiff's and defendant's automobiles, the court in *Davis v Ward* (1963) 219 Cal App 2d 144, 32 Cal Rptr 796, in affirming a judgment for the defendant, held that the trial court had not abused its discretion in permitting a traffic officer who had investigated the accident to state his opinion as to the speed of the plaintiff's automobile where his opinion was based on physical facts found at the scene of the accident, including skid marks, damage to the vehicles, and other pertinent details. In rejecting the plaintiff's contention that the officer was not qualified to testify as to the speed, the court said that a traffic officer whose duties include the investigation of automobile accidents may qualify as an expert entitled to give an opinion respecting the speed of

automobiles involved in an accident, based on his observations obtained in the course of his investigation thereof. The witness testified that in his opinion the plaintiff driver was traveling between 45 and 50 miles per hour at the time of the collision.

In affirming judgments for the plaintiffs in actions under the Colorado guest statute, the court in *Ferguson v Hurford* (1955) 132 Colo 507, 290 P2d 229, held that the trial court had properly permitted a state highway patrolman to give opinion testimony as to the speed of the defendant's automobile, which went out of control as it rounded a curve on a mountain road. The witness testified that he had been a highway patrolman seven and a half years, that he had investigated about 120 accidents each year, two-thirds of which were accidents on mountain highways, that 95 percent of one-car accidents involved excessive speed, that he was familiar with the highway in question and had investigated the accident in this case, that by personal experiment he knew that 55 miles an hour was the maximum speed at which a car could be driven around the curve in question, that at that speed the marks of both right and left wheels were plainly discernible, and that a safe speed was 50 miles per hour. In addition, he testified that he observed the tire marks made by the automobile in question, that for 240 feet on the "black topped" road only the left wheels of the automobile left any mark, and that when it left the highway, the car was precipitated down a 40-foot embankment faced with large boulders and thereafter traveled 90 feet before coming to rest. On the basis of these facts, the witness was permitted to testify that in his opinion the automobile was going in excess of 70 miles per hour.

In *Myers v Korbly* (1958, Fla App) 103 So 2d 215, an action for wrongful death of a 17-year-old boy who was killed when the defendant's automobile, in which he was riding as a guest, went off the road, the court, in affirming a judgment for the plaintiff, held that the trial court had not abused its discretion in finding the captain of the Miami police department qualified to testify as to the "critical speed" of the defendant's automobile as it went out of control on a curve, skidded sideways for a distance of about 200 feet, and hit two palm trees before coming to a stop. The court pointed out that the witness was director of training for the city police academy; that he had attended Northwestern University Traffic Institute for traffic police administration; that the course included subjects dealing with physical laws and accident investigation to determine what happened before, during, and after an automobile collision; that necessary statistics were provided at Northwestern on the basis of tests conducted there; that the witness had conducted various experiments with various types of automobiles on various surfaces; that he had machines to test the physical ability of a driver, including distance perception and brake reaction time; that he had conducted more than 6,500 tests; and that he had experience in determining the coefficient of friction. The court also quoted from a physics book which discussed a formula used by the witness for computing the speed of two objects that collide on different surfaces. Although the court concluded that the trial court had not abused its discretion in allowing the opinion testimony as to critical speed, it said that had the police officer's testimony been the sole evidence from which the jury could have made a determination of the speed of the defendant's automobile, the judgment would be reversed.

In an action by a child who was injured when struck by the defendant's automobile, the court in *Etheridge v Hooper* (1961) 104 Ga App 227, 121 SE2d 323, held admissible a police officer's opinion testimony that the speed of the defendant's vehicle at the time of the occurrence was from 20 to 25 miles per hour. In affirming a judgment for the defendant, the court pointed out that the witness had been investigating traffic accidents in and around Atlanta for at least 6 years, that he had been on the police force 28 years, that he had investigated the accident in this case, and that he had based his opinion as to the speed of the vehicle on the physical evidence at the scene, including skid marks, the distance the vehicle traveled from the place of impact to the place where the vehicle stopped, and other circumstances.

In reversing a judgment for the plaintiff, the court in *Central Container Corp. v Westbrook* (1962) 105 Ga App 855, 126 SE2d 264, held that the trial court had not abused its discretion in admitting an investigating police officer's testimony as to the speed of the defendant's truck, based upon 254 feet of skid marks made by the truck after it collided with the plaintiff's car, the relative positions of the vehicles after the accident, and the damage to both vehicles. The court said that if by further examination of the police officer it developed that his opinion was based on inadequate knowledge, the objection to his testimony would go to the credibility of the witness rather than to the admissibility of his testimony.

In an action to recover damages for injuries sustained in a collision between the plaintiff's automobile and the defendant's cattle truck, the court in *Cherry v State Auto. Ins. Asso.* (1957) 181 Kan 205, 310 P2d 907, rejected the plaintiff's contention that the trial court erred in permitting a highway patrolman to testify as to the speed of the plaintiff's automobile, as based on a photograph of the skid marks made by the plaintiff's car. The court pointed out that the witness had served as a highway patrolman for 10 years, that he had attended the Northwestern University Traffic Institute and several other courses offered by the highway patrol relating to traffic investigation and physical evidence, and that he had conducted tests as to distances an automobile, traveling at different speeds, will go after the brakes have been applied.

In a parents' action for their infant son's wrongful death arising out of a collision of two automobiles, the court in *Foreman v Heinz* (1959) 185 Kan 715, 347 P2d 451, affirming a judgment for the plaintiffs, held that a sheriff and a police officer were qualified experts, and where a proper foundation was laid, it was proper for them to give their opinion as to the speed of an automobile involved in a collision, based on the length of skid marks, location of the vehicles, damage to the vehicles, and independent tests. The sheriff testified that while he was sheriff he had investigated 1,500 to 2,000 traffic accidents, and that while a police officer with the city he had investigated 2,500 to 3,000 traffic accidents, and that he had served as a patrolman, motorcycle traffic officer, and traffic-accident investigator for the police department. The police officer testified that he had been a police officer for over 18 years and presently was a lieutenant in the traffic division of the department, that one of his principal duties was to investigate accidents and make conclusions as the result of such investigations, that he was a graduate of the Traffic Institute at Northwestern University, had attended various other traffic schools, and had taught an accredited course at Wichita University and at Kansas University on various phases of accident investigation and traffic control.

In an action for wrongful death of a person who occupied the status of a guest under the Kansas guest statute, the court in *Johnson v Huskey* (1960) 186 Kan 282, 350 P2d 14, held that a highway patrolman who had more than 16 years of service as a highway patrolman, had read and studied Northwestern University Traffic Institute literature on the determination of speed of automobiles based on skid marks and other physical evidence, and had investigated this and many other accidents, was qualified to testify as to the speed of the defendant's automobile at the time of the accident, as based on the skid marks and damage to the automobiles. The court said that after proper foundation has been laid, a witness so qualified as an expert may give his opinion as to the speed of an automobile involved in a collision, based upon the length of skid marks, damage and location of vehicles and distance traveled by them, and other circumstances existing at the scene of the accident.

In consolidated actions for personal injuries and wrongful death of occupants of an automobile that went off a road as it was passing the defendant's tractor-trailer, the court in *Moore v Wheeler* (1968, Ky) 425 SW2d 541, in affirming a judgment for the defendant, held that the testimony of a highway patrolman concerning the speed of the plaintiff's vehicle before the accident in question was properly admitted over plaintiff's objection that the witness was not qualified to testify as to speed where his testimony was based on skid marks made by the car. The court pointed out that the witness had been a member of the highway patrol for more than 6 years, had investigated more than 450 accidents, and had received special schooling on the various techniques and procedures involved in investigating traffic accidents, and that he was at the scene of the accident immediately after it happened and had personally gathered all the information upon which his opinion was based.

In an action for personal injuries sustained by a passenger in an automobile that collided with the defendant's taxicab at an intersection, the court in *Dillenschneider v Campbell* (1961, Mo App) 350 SW2d 260, in affirming a judgment for the plaintiff, held that the trial court had not abused its discretion in permitting a police officer to testify as to the speed of the defendant's taxicab, as based on skid marks, where the witness had been a police officer for 6 years, had investigated accidents for 3 1/2 years, had conducted tests by measuring the length of skid marks made by many cars at different speeds, and had figured the coefficient of friction necessary to determine speed and braking distances.

In *Edwards v Rudowicz* (1963, Mo App) 368 SW2d 503, an action for personal injuries suffered by a 3 1/2-year-old

child, the court held that the trial court had not abused its discretion in permitting a police officer to testify as to the speed of the defendant's automobile, on the basis of the skid marks made by the vehicle before it struck the child. The court pointed out that the witness had been a police officer 8 1/2 years, that he had familiarized himself with the stopping distances of automobiles, that he knew the stopping distance for a car that was traveling 30 miles per hour, and that he had investigated the accident in this case himself. He testified that the skid marks were longer than the average length of skid marks made by a car going 30 miles an hour.

In *State v Bosch* (1952) 125 Mont 566, 242 P2d 477, two passengers in the defendant's automobile were killed when the automobile in which they were riding went off the road while the driver was attempting to avoid hitting a car without taillights in front of him and also an oncoming car. In affirming the defendant's conviction for manslaughter, the court held that no error was committed in allowing a highway patrolman to give opinion testimony as to the speed of the defendant's automobile. The court pointed out that the witness had 11 years of service as a highway patrolman, had investigated many automobile accidents, had special training in traffic problems, and had attended traffic schools where he studied the cause and effect of skid marks. He had also examined and measured the skid marks made by the defendant's automobile, and had found the longest skid mark to be 181 feet long. From tables furnished by the Northwestern Traffic Institute, and his experiences, he testified that in his opinion the defendant's automobile was traveling at the minimum speed of 72 miles an hour at the time the skid marks were made.

In *Graham v Rolandson* (1967) 150 Mont 270, 435 P2d 263, an action for the wrongful death of an 8-year-old boy who, while riding a bicycle, was struck by an automobile driven by the defendant, the court rejected the defendant's contention that the witness, a former highway patrolman, was not qualified to give opinion testimony as to the speed of the defendant's car, based on the length of skid marks. The court pointed out that the witness had over 20 years of experience in investigating automobile accidents and their causes, including the determination of speed of automobiles based on skid marks and the surrounding circumstances, and that he had been schooled in the use of graphs and charts used by the National Safety Council and the Montana Highway Patrol in determining speed from skid marks. The court said that the facts that the witness had retired from the highway patrol some 6 years before the trial, that he had first heard of the accident in question approximately 2 weeks before trial, through plaintiff's counsel, that he did not measure any drag factor or coefficient of friction on the particular road surface involved, and that as a highway patrolman he would not be permitted to testify in a case where his investigation was made a year and a half after the accident, were facts that affected the weight rather than the admissibility of his testimony.

In *Tate v Borgman* (1958) 167 Neb 299, 92 NW2d 697, an action to recover damages for personal injuries and property damage sustained in a collision between the plaintiff's automobile and the defendant's taxicab, the court, in reversing a judgment for the defendant, held that it was error to exclude the testimony of a police officer as to the speed of the defendant's taxicab, based on skid marks, stopping time, and reaction time. In rejecting the defendant's contention that a proper foundation had not been laid, the court pointed out that the witness testified that he had been a police officer engaged in traffic matters for 10 years or more; that he had had specialized training at Northwestern University in determining stopping distances of cars at various speeds; that he had made experiments testing the formula for estimating speed from skid marks; that his experiments showed the formula to be true; that the type of car makes no difference; that the weight of a car makes no difference; that the grade and condition of the pavement have to be considered; that the condition of the tires on good pavement makes no appreciable difference; and that the type of brakes makes no difference after the wheels are sliding. The police officer testified that a car "at that particular location" traveling at 35 miles per hour should slide approximately 59 feet; that at 40 miles per hour the slide should approximate 77 feet; that at 45 miles per hour the slide should be in excess of 95 feet; that at 50 miles per hour the slide should be 110 feet to 112 feet; and that at 60 miles per hour the slide should be approximately 117 feet. In the instant case, the vehicle made 61 feet of skid marks before the impact. From this evidence, and other evidence as to the positions of the vehicles after impact, and the damage to the vehicles, the court concluded that the jury could properly have inferred that defendant's speed was in excess of the 40 miles per hour she testified to when the brakes took hold and locked the wheels in skid position.

In an action for wrongful death of a pedestrian who was struck by the defendant's taxicab, the court in *Nisi v Checker Cab Co.* (1960) 171 Neb 49, 105 NW2d 523, in affirming a judgment for the plaintiff, upheld the propriety of the testimony of a captain of the Nebraska safety patrol as to the speed of the defendant's taxicab, based on skid marks and other physical facts. The court pointed out that the witness had been associated with the patrol for 22 years and was in charge of the education and training division of the patrol; that he had been awarded a fellowship by Northwestern University in the study of traffic administration, which included specialized study of the investigation of physical facts; that he had had class work and had conducted tests at various speeds with different types of automobiles to compute various speeds from various stopping distances, and had made skid mark and speed computations; and that following his work at Northwestern University he had conducted a training course for new officers in the Nebraska safety patrol and was an instructor on the subject of skid marks. The court further pointed out that the witness testified that he had made an examination of the area where the accident in this case occurred; that the surface of the street was an asphalt-type pavement with coarse sand ground into the asphalt; that in arriving at an estimate and opinion relating to the speed of the taxicab as judged from the skid marks, he would take into consideration the type of paved surface of the street, the grade, and the condition of the pavement, whether it was wet or dry; that the weight of the automobile would make slight difference with respect to figuring speed from skid marks; that the condition of the tread on the tires would not make any difference on the stopping distance; that with respect to skidding with the wheels locked, the cramping of the wheels to the right or left makes no difference in the driver's ability to stop the car; that after the brakes are locked the driver would be unable to steer the car, since the wheels would be unable to turn; and that assuming a grade of 5.4 percent on the street where the taxicab left a total of 69 feet of skid marks, he estimated the speed of the taxicab to have been 34 or 35 miles an hour, which would be a minimum speed.

In *Hanberry v Fitzgerald* (1963) 72 NM 383, 384 P2d 256, an action for injuries sustained in a collision between the plaintiff's car and the defendant's bus, the court, in affirming a judgment for the plaintiff on condition of remittitur, held that the trial court had not abused its discretion in allowing the testimony of a former police officer who specialized in testimony as an expert on speed. The defendant argued that the witness did not know whether the defendant's bus was skidding at an angle, and, not knowing about this factor, he could not form an opinion as to its speed. In rejecting the contention, the court concluded that the defendant placed undue emphasis upon certain answers made by the witness, without considering his testimony as a whole. The court pointed out that the witness arrived at his determination of speed from the theory that the wheels of the bus were locked, and that as based upon the skid marks it was immaterial whether the bus was skidding sideways or traveling in a normal direction.

In *Saladow v Keystone Transp. Co.* (1934) 241 App Div 161, 271 NYS 293, the court reversed a judgment for the defendant on the ground that it was error to exclude the testimony of a witness who was attached to the police department as an automotive expert, concerning the speed of the defendant's motor vehicle at the time it struck the decedent pedestrian. The witness had testified that he had examined the defendant's motor vehicle and had found that it had four-wheel brakes and was in good mechanical condition. He then attempted to testify that the vehicle could not have made four skid marks about 60 feet long unless it was exceeding the maximum speed limit.

In *Ruther v Tyra* (1952) 207 Okla 112, 247 P2d 964, an action for injuries sustained in a head-on automobile collision, the court, in affirming a judgment in favor of the defendant on his cross petition, held that the trial court had not abused its discretion in permitting the defendant to cross-examine the plaintiff's witness, a trooper of the state highway patrol, as to the speed of the plaintiff's automobile, as based on skid marks and other physical facts. In rejecting the plaintiff's contention that his witness was not qualified to give such an opinion, the court pointed out that the witness testified that he had been a member of the highway patrol for 9 years, that he had arrived at the scene of the accident about 15 minutes after it occurred, that he had studied the automobiles and that the plaintiff's Studebaker's weight was considerably more than that of the defendant's Ford, that he observed tire marks on the pavement, that the Studebaker marks were 157 feet long, and that plaintiff's left front tire crossed the centerline of the highway 34 feet from the point of collision. He further testified that a study of automobiles provides a rule-of-thumb theory that an automobile traveling at a speed of 60 miles per hour will travel 90 feet in one second, or that the feet traveled per second will be one and one-half times the miles per hour at which the vehicle is traveling. He further testified for plaintiff that he was

familiar with the reaction time required of a person confronted with an emergency, to do something intended to meet the emergency, and that the average reaction time varies from one-half to three-quarters of a second for one to apply brakes when the need occurs. He further testified as to the factors of efficiency in applying brakes, such as condition of the brakes, and condition of the tires and of the road surface. The plaintiff had produced a chart showing the distance a car will travel per second at any given speed, and had the witness testify as to distances required to stop a moving car, on average pavement, while traveling at different rates of speed. Over plaintiff's objection, the highway patrolman was permitted, on cross-examination, to testify that the plaintiff's car was traveling 75 to 80 miles per hour just before the brakes were applied. In holding the testimony admissible, the court said that while a layman knows that a speeding car will produce skid marks upon a pavement when the brakes are applied, and while it is a scientific fact that the speed of a motor vehicle can be closely approximated from the skid marks and other physical facts at the scene of the collision, the method of computing such speed from the physical facts is not a matter of common knowledge, and that such computation can be made only by an expert who has given special study to the subject.

In *Continental Oil Co. v Elias* (1956, Okla) 307 P2d 849, an action for injuries sustained in a collision between the plaintiff's car and the defendant's truck, which made a left turn in front of the plaintiff's car, the court held that the trial court had not abused its discretion in permitting a police officer to testify that the speed of plaintiff's automobile was reduced a minimum of 60 miles per hour and a maximum of 65 miles per hour, as based on 75 feet of skid marks and the damage to the vehicles. The court pointed out that the witness had been a police officer in the city of Tulsa for 26 years, had been assigned to the traffic department, had taken special training courses in traffic and safety engineering work, including a course at Northwestern University Traffic Institute, and had taught such a course at Oklahoma University and Oklahoma A. & M. The court added that the witness qualified as a traffic engineer, or highway safety engineer, and as an expert as to the speed of a motor vehicle traveling on the highway, and his answer to the question propounded was based upon skid marks made by the automobile and other physical facts that he had observed.

In *Groninger & King, Inc. v T. I. M. E. Freight, Inc.* (1963, Okla) 384 P2d 39, the court, in affirming a judgment for the plaintiff, held that the trial court had not abused its discretion in permitting a highway patrolman to testify as to the speed of the defendant's truck at the time it forced the plaintiff's vehicle off the highway, where such testimony was based on skid marks made by the defendant's truck, the condition of the roadway, and the damage to the vehicles. The court pointed out that the witness had completed the required course of study to become a highway patrolman, that he had attended refresher courses on investigation of traffic accidents, and that he had 15 years of experience investigating automobile accidents for the state of Oklahoma.

In *Thomas v Harper* (1964) 53 Tenn App 549, 385 SW2d 130, an action for injuries sustained by a 12-year-old boy who, while riding a bicycle, was struck by a taxicab owned by the defendant, the court, in affirming a judgment for the plaintiff, held that the trial court had not abused its discretion in permitting an officer to testify that he had made certain tests at the place of the collision and that in his opinion the defendant's automobile was being driven at least 45 miles per hour at the time it left some 105 feet of skid marks. Rejecting the defendant's contention that no proper foundation had been laid for the opinion in that the road surface was not shown to be the same as at the time the accident happened and there was a difference in the temperature at the time of the two tests, the court pointed out that the objection went to the weight of the testimony, and not to the competency of it. The court added that the law is well settled that an expert witness may give his opinion as to the speed of an automobile from the length of its skid marks.

In affirming a judgment for the plaintiff, the court in *Beynon v Cutberth* (1965, Tex Civ App) 390 SW2d 352, held that the trial court had not erred in permitting a traffic investigator to give his estimate of the speed of the plaintiff's automobile before it collided with the defendant's automobile, based on the witness' examination of the automobiles at the scene of the accident and the skid marks made by the plaintiff's automobile. In rejecting the defendant's contention that the witness was not qualified as an expert, the court pointed out that the witness had been a traffic investigator with the Amarillo police department for approximately 18 months at the time of trial, that his job was to investigate automobile accidents, that he had investigated hundreds of accidents since September, 1963, that he had examined the cars at the scene of the accident, and that he had examined the skid marks made by the plaintiff's car and found 43 feet

of skid marks. He testified that he estimated the speed of the plaintiff's car at 25 to 28 miles per hour when the driver applied his brakes before the collision.

In an action to recover damages for personal injuries sustained when the plaintiff's automobile was struck by the defendant's train at a rural railroad crossing, the court in *Billingsley v Southern Pacific Co.* (1966, Tex Civ App) 400 SW2d 789, error ref n r e, held that the opinion testimony of a Texas highway patrolman constituted evidence of probative force in support of the jury's findings that the plaintiff was operating his automobile at an excessive rate of speed as he approached the railroad crossing. In support of its finding that the highway patrolman was qualified to give opinion testimony as to speed, the court pointed out that the witness had been a highway patrolman for 30 years, that he had investigated numerous collisions throughout the state, and that he had attended a 14-week school in Austin, conducted by the department of public safety, where he received training in the investigation of traffic accidents. The court also pointed out that the witness had been produced by the plaintiff, and was qualified by the plaintiff as an expert accident investigator, and that he was called to investigate the accident involved in this case, had made a personal investigation of the physical facts, including the location of the debris, as well as the measurement of skid marks leading up to the crossing, and had found 35 steps of skid marks up to the point about 18 inches beyond the first rail of the crossing. The witness established the point of contact between the automobile and the train, and upon measuring the distance from the automobile to the crossing found it to be 350 feet. There were no breaks in the skid marks. After the plaintiff's counsel had qualified the witness as to his ability to determine speeds of vehicles from skid marks, the witness testified that a vehicle going 60 miles per hour would require 270 feet within which to stop, and that a motorist approaching this crossing would be 150 feet from the crossing before he could determine whether a train was approaching. On cross-examination, the defendant's counsel elicited from the witness that at the time of his investigation he estimated the speed of the plaintiff's vehicle at 70 miles per hour prior to application of brakes, and he estimated, without objection, that a "safe speed" at that particular location under the existing conditions was 35 miles per hour.

In *Taylor v Johnson* (1966) 18 Utah 2d 16, 414 P2d 575, the plaintiff's husband was killed when the defendant's car struck the rear of a trailer that the plaintiff's husband was hitching to the rear of a car on a public highway at night. In affirming a judgment for the plaintiff in a wrongful death action, the court held that the trial court had not abused its discretion in allowing investigating officers to testify that the speed of defendant's automobile was at least 71 miles per hour immediately before the collision, calculated from the skid marks and the coefficient of friction. The court pointed out that the officers had many years of experience in investigating automobile accidents, and that they used precalculated charts the accuracy of which was not questioned.

<>

In some cases a police officer has been allowed to give opinion testimony as to the speed of a motor vehicle, based on skid marks and other physical evidence, although the courts referred to the witness as a nonexpert.

In *Gunter v Willingham* (1967) 116 Ga App 700, 158 SE2d 255, the court, in affirming a judgment for the plaintiff in an action for injuries sustained while riding as a guest passenger in the defendant's automobile, held that a police officer, although not qualified as an expert, was competent to testify that in his opinion the cause of the accident was speed, which he estimated to be 100 miles per hour, as based on the length of the car's skid marks, the distance it rolled over, the damage to the vehicle, and the condition of the road. Although the court recognized that ordinarily a witness who has not actually observed the vehicle in motion must qualify as an expert to give his opinion as to speed based on various external data, it also stated that a lay witness may give opinion testimony as to speed where he relates the facts on which such opinion is based.

In an action for wrongful death of a passenger in an automobile which the defendant's 82-year-old intestate was driving when it went off a road, the court in *Zellers v Chase* (1964) 105 NH 266, 197 A2d 206, sustaining the plaintiff's

exceptions to the granting of the defendant's motion for a directed verdict and motion for judgment notwithstanding the verdict, held that the trial court had not abused its discretion in permitting a state trooper, although not an expert, to give opinion testimony to the effect that the wheel marks indicated that the defendant's car had been accelerating for some distance before it went off the road. The court pointed out that although the witness did not claim to be an expert, it was his duty to investigate accidents, he was on the scene shortly after the occurrence, and he saw the tire tracks while they were still fresh and plain.

<>

Trial court in personal injury action arising from automobile accident properly allowed investigating police officer to give opinion of speed of vehicle based on physical damage to vehicle, where opinion was also based on skid marks and other investigative criteria. *Henry v Butts (1991, Ala) 591 So 2d 849.*

In action for wrongful death and injuries sustained in collision between motorcycles and automobile, any error in exclusion of officer's opinion as to speed of car at time of accident based on skid marks and comparison speed tests performed in his patrol car would have been harmless, where officer was permitted to testify that his patrol car would have to have been traveling at least 40 miles per hour to leave same skid marks as car, and that variance between patrol car and car involved in accident would mean that latter must have been traveling in excess of 40 miles per hour, and therefore essence of officer's conclusion was before jury. *Bailey v Lenord (1981, Alaska) 625 P2d 849.*

In view of training, experience, and on-the-scene investigation of physical facts involved in accident, including road conditions, road surface, skid marks, damages of guardrail, and damages to automobile, police officer was correctly allowed to express his opinion concerning speed of vehicle at time of 1-car accident. *Meader v People (Colo) 497 P2d 1010.*

Opinion as to speed of motor vehicle, based apparently on skid marks and other physical facts, given by patrolmen, who were experts in accident investigation, was admissible. *Cox v Bonser (Colo App) 507 P2d 1128.*

In wrongful death action, state trooper, who gained experience in traffic investigation over 3-year period and who received accident training at police academy, was properly allowed to testify with respect to speed of decedent's vehicle, where opinion was not based simply on length of skidmark, but was also based on damage to vehicles involved, location of vehicles after impact, and areas of impact. *Wise v George C. Rothwell, Inc. (CA3 Del) 496 F2d 384* (applying Del law), on remand for consideration of matters not herein relevant (DC Del) *382 F Supp 563.*

Opinion of police officer, who testified that he had had 3 years' experience in investigation of automobile accidents and had been trained in connection with this work, and that, considering physical facts and indication of skid marks and tire marks at scene of accident, there was no speed indication according to the skid marks, was not objectionable, since question whether witness is qualified to give opinion as expert upon subject under investigation was one for court, and not for witness. *Reeves v Morgan, 121 Ga App 481, 174 SE2d 460, revd on other grounds 226 Ga 697, 177 SE2d 68.*

Eight-year veteran police officer who investigated two-car collision was qualified as expert and properly testified that neither vehicle was traveling at excessive speed, where officer was experienced traffic investigator whose specialized knowledge and specific experience with accidents made his testimony as to speed of defendant's car material. *Micklos v Highsmith (1986, 3d Dist) 149 Ill App 3d 779, 103 Ill Dec 83, 500 NE2d 1154, app den (Ill) 108 Ill Dec 419, 508 NE2d 730.*

See *Ryan v Payne (Ky) 446 SW2d 273, § 5[a].*

Failure of police lieutenant to personally inspect road surface to determine coefficient of friction used in speed estimate

went to weight of his testimony but did not render it inadmissible where he fully explained scientific and empirical basis for coefficient of friction he used in his calculations. *Uhlik v Kopec*, 20 Md App 216, 314 A2d 732 (citing annotation).

Investigating police officer was properly allowed to testify as to causes of automobile accident, including estimation of speed by reference to standard chart of speed based on skid marks, where officer's testimony did not go beyond limitations imposed by trial court and gave jury clearer understanding of facts at issue. *Mitchell v Steward Oldford & Sons, Inc.* (1987) 163 Mich App 622, 415 NW2d 224.

Police officer who had been investigating accidents for 15 years was qualified to offer expert opinion as to speed of automobile involved in accident, based on length of skidmarks. *Brummitt v Chaney*, 18 Mich App 59, 170 NW2d 481.

Trial court in personal injury action properly allowed expert testimony by two peace officers as to probable speed of plaintiff's vehicle, which skidded off bridge allegedly due to sand and paint left on bridge, where both officers had lengthy histories in accident reconstruction as well as ample specialized training. *Miller v Stiglet, Inc.* (1988, Miss) 523 So 2d 55.

Trial court in prosecution for careless and imprudent driving properly admitted opinion testimony of officer who investigated collision, where trained traffic officer concluded that skid marks made by defendant's tires in gravel road indicated excessive speed for conditions and offense could be based on same. *State v Kaikkonen* (1988, Mo App) 756 SW2d 643.

Highway patrol officer who testified he had been patrolman for 12 years, had investigated about 1,500 accidents, and had training in accident investigation, including how to estimate speed from length of skidmarks and damage to automobiles was competent to testify as to speed of vehicle in action arising out of collision between two vehicles; question was not one of admissibility of testimony but weight it was to be given. *Goodnough v State* (1982, Mont) 647 P2d 364 (citing annotation).

Testimony of police officer as to relative speeds of vehicles involved in accident, based on type of skid marks, damage done to all vehicles, direction and distance that vehicles traveled after impact, condition of pavement, weather conditions, and other relevant circumstances, was properly admitted in evidence, where he had 8 years' experience in investigating accidents, had attended seminars and lectures concerning accident investigations, had a duty, in investigating accidents, to formulate opinion as to speed of various vehicles before impact, and, in doing so, took into consideration skid marks, type of impact, amount of damage done, and auto reaction and travel after impact. *Graham v Banks* (Okla App) 463 P2d 1014.

Since state trooper, who had 8 years of experience dealing with traffic matters, testified that he was familiar with chart which correlated speed with length of skid marks, it was not error to allow him to testify as to facts deduced by mere application of chart. *Jamison v Kline* (CA3 Pa) 454 F2d 1256 (applying Pa law).

Trial court did not err in permitting police officer to testify, based on skid marks, as to estimate of speed at which driver was traveling in action arising out of automobile-pedestrian accident on theory that officer was unqualified to testify as expert or that he was testifying on ultimate issue in case where officer testified that he had taken college seminars in traffic safety and traffic accidents and had attended state police seminars on traffic safety, he had been officer for eight years, and officer's testimony was confined to estimating speed at which defendant motorist had been traveling based on those experiences. *Morris v Moss* (1981) 290 Pa Super 587, 435 A2d 184.

Where police officer testified that skid marks from defendant's car were 88 feet long and that he had investigated countless such accidents in his 25 years of experience, court did not err in permitting officer to state that, based upon his examination of the accident scene, he "could not see where there had been any speeding whatsoever" since officer may, based upon skid measurements and his expertise, state approximate speed of car even though he was not present at

accident and since statement was not grossly speculative opinion. *Rosato v Nationwide Ins. Co.* (1979, Pa Super) 397 A2d 1238.

Police officer had special knowledge that qualified him, in intoxication manslaughter prosecution arising from vehicle accident, to render an opinion concerning the speed of defendant's vehicle at time it struck victims' vehicle; officer testified that he had been assigned to the special traffic investigations section, officer testified that he had received basic, intermediate, and advanced training in accident reconstruction, including speed reconstruction, officer testified that he had 80 hours of accident reconstruction training, and officer testified that he had done accident reconstruction for the special traffic investigations section. Rules of Evid., Rule 702. *Pena v. State*, 155 S.W.3d 238 (Tex. App. El Paso 2004) (citing annotation).

Mexican Federal Police supervisor who was traffic officer who investigated bus accident was qualified to estimate speed of bus at accident scene, where officer's first-hand examination of scene and training in accident reconstruction qualified him to give opinion testimony as to speed of bus from skid marks found on pavement and shoulder. *Trailways, Inc. v Clark* (1990, Tex App Corpus Christi) 794 SW2d 479, motion overr (Nov 7, 1990) and writ den (Dec 31, 1990) and reh overr (Jan 30, 1991).

Opinion of law enforcement officer as to speed of motor vehicle, based on skid marks and other circumstances at scene of accident, was properly admissible, where witness had extensive experience in investigating accidents and had attended special schools. *Bates v Barclay* (Tex Civ App) 484 SW2d 955, error ref n r e.

While opinion on speed cannot be based solely upon physical or impact damage to automobile, opinion of police officer, who had training and experience, as to speed of vehicles involved, based on his personal investigation of circumstances surrounding accident, including skid marks, was properly admissible. *Adams v Smith* (Tex Civ App) 479 SW2d 390.

Opinion of trooper who investigated one-car accident, as to speed of vehicle prior to collision, based on skid marks left by tire, road-surface conditions, fact that tire tread was good, damage to and location of vehicle after it had sheared off telephone pole, and condition of pole (that it was solid, not full of dry rot), was properly admitted, where police officer could not have meaningfully communicated what he perceived to jury without giving his opinion, and where trooper had 3 years of experience in investigating traffic accidents at time of accident and about 10 years at time of trial. *Talley v Fournier*, 3 Wash App 808, 479 P2d 96.

In action resulting from automobile accident, patrolman who had 13 years service, investigated many accidents, attended training courses in accident investigation, investigated accident in issue and determined that there were skid marks for 183 feet was properly allowed to testify as to speed of plaintiff's vehicle. *Runnion v Kitts* (Wyo) 531 P2d 1307 (citing annotation).

[\*3b] Opinion as to speed held inadmissible

Although it is recognized that a qualified law enforcement officer may give opinion testimony as to the speed of a motor vehicle on the basis of skid marks and other physical facts, in the following cases opinion testimony of law enforcement officers was excluded on the ground that proper foundations for their opinions had not been laid.

## WASHINGTON

*Kiehn v Sprague School Dist.* (1958) 52 Wash 2d 565, 324 P2d 446

In a case involving an automobile collision at a highway intersection, the court in *Ross v Newsome* (1961, CA5 Ga) 289 F2d 209, held that the trial court had not abused its discretion in sustaining the plaintiff's objection to a highway patrolman's opinion testimony as to the speed of the vehicles, based on skid marks made by each vehicle before the point of impact. The court pointed out that the witness had previously said that he could not give an estimate of speed, and that the facts upon which he purported to give an opinion were insufficient.

In *Johnson v Battles* (1951) 255 Ala 624, 52 So 2d 702, an action under the Alabama homicide statute for a death which

occurred when the automobile in which the decedent was riding collided with an automobile owned and operated by the defendant, the court held that the trial court had not abused its discretion in refusing to allow the defendant to cross-examine the plaintiff's witness, a highway patrolman, as to the speed of the defendant's automobile, as based on 72 feet of skid marks, where the only evidence as to the witness' qualification to testify as an expert was that he had been a member of the highway patrol for 5 1/2 years, during which time he had investigated many automobile accidents.

In *Jowers v Dauphin* (1962) 273 Ala 567, 143 So 2d 167, the plaintiff was injured when an automobile driven by the defendant struck the rear end of the pickup truck in which the plaintiff was a passenger. Distinguishing between skid marks made before and after impact of two motor vehicles, the court reversed a judgment for the plaintiff on the ground that it was prejudicial error to admit the testimony of a highway patrolman as to the speed of both vehicles immediately before the collision, based on skid marks made after impact. The court added that it is a matter of common knowledge that when two moving objects collide they may behave in a manner which seemingly defies all the laws of physics.

Testimony of a highway patrolman was held erroneously admitted, in *Campbell v Barlow* (1962) 274 Ala 627, 150 So 2d 359, where he based his opinion as to the speed of the automobile involved in a collision on the distances of the vehicles from the point of impact, damage to the vehicles, the scattered debris, and markings on the road after impact. The court pointed out that there was no evidence of skid marks made before impact.

In *Huguley v State* (1957) 39 Ala App 104, 96 So 2d 315, cert den 266 Ala 697, 96 So 2d 319, the defendant was prosecuted for manslaughter as the result of the death of a passenger in an automobile which was struck by the automobile driven by the defendant. There was testimony that the defendant had been drinking. The defendant's conviction for second degree manslaughter was reversed on the ground that prejudicial error was committed in allowing the state's witness, a highway patrolman, to testify that in his opinion, based on 111 feet of skid marks and the amount of damage to each vehicle, the speed of the defendant's vehicle before the skid marks started was roughly 80 miles per hour. Although recognizing that a nonobserver may testify as to the speed of an automobile on the basis of skid marks, particularly where there has been a collision and the object hit offers little or no resistance, such as a boy on a bicycle, the court concluded that the state had failed to present sufficient data on which the witness could give a scientific opinion as to the speed of the defendant's car.

In *Ransom v Weisharr* (1963) 236 Ark 898, 370 SW2d 598, an action for injuries sustained by a pedestrian struck by the defendant's automobile, the court reversed a judgment for the defendant on the ground that it was error to admit the testimony of a police officer as to the speed of the defendant's automobile where he had not witnessed the speed of the car or seen the scene of the accident and the skid marks, had not inspected the brakes of the car, did not know the condition of the tread of the tires and did not know the extent to which the tires were inflated, did not know the number of passengers in the car as it affected the weight of the vehicle, and had conducted tests for skid factors at a place other than the scene of the accident, with a different car, on the morning of the trial. The court concluded that there were too many unknown factors which, according to the testimony of the witness himself, influenced the results and should be considered by an expert before opinion testimony as to speed based on skid marks should be admitted.

In *Baldwin v Schipper* (1964) 155 Colo 197, 393 P2d 363, an action for injuries sustained by a passenger in an automobile that collided with the defendant's automobile, the court, in affirming a judgment for the defendant, said that the trial court did not err in excluding a police officer's opinion testimony as to the speed of the defendant's vehicle, based on the damage to the vehicles, their location after the impact, and skid marks made by the defendant's vehicle after the point of impact.

In actions for wrongful death arising out of a collision of two automobiles at an unmarked country intersection, the court in *Deaver v Hickox* (1967) 81 Ill App 2d 79, 224 NE2d 468, reversed a judgment for the plaintiff on the ground that it was error to permit a state highway police officer to testify as to the speed of the vehicles before the collision, on the basis of skid marks, damage to the vehicles, and other physical facts. The court pointed out that the witness had been

a state police officer for about 8 years; that he had 6 weeks' recruit training at the State Police Academy, a 2-week course on traffic patrol and accident investigation at Northwestern University, a 2-week refresher course conducted by Northwestern University, and a 1-month course in basic police work at the University of Illinois Police Institute in Champaign, Illinois; and further, that ambiguous testimony indicated that the determination of speed in reference to skid marks and damage to vehicles was studied. One court noted that the officer had investigated between 450 and 500 automobile accidents. In support of its holding that the witness should not have been allowed to give his opinion as to the speed of the vehicles, the court said that in the colloquy with the court, the witness largely abandoned the use of any training and education upon the subject of computing the speed, but expressed reliance upon his investigation of accidents over his 8 years of police service. The court further pointed out that the record was bare upon whether the accident investigations the witness referred to included any tests or computations or other determinations of speed of vehicles based upon physical damage, and that the witness had never previously qualified as an expert upon the subject. The court also observed, first, that no statement was elicited from the witness, or from others, that there exists a science requiring special skills beyond the ken of the average juror from which a judgment of speed with reference to the vehicles involved could be made with any degree of certainty; second, no statement was elicited from the witness that he was possessed of the skills necessary to make a determination of such speed with relative certainty from the facts presented to him; third, no discussion was elicited with reference to the factors involved in making a determination of speed either from skid marks or damage to the vehicles, or from a combination of the two; fourth, assuming that special skills exist from which a determination of speed may be made with relative certainty, no inquiry was made as to whether such special skills beyond the ken of the average juror were in fact employed by the witness, or anyone else in the case; fifth, if particular factors were employed to make the determination of speed, those factors were not analyzed in any manner sufficient to enable the jury to determine whether all factors used in arriving at the judgment were, in fact, present; sixth, as to the degree of certainty of the officer's opinion, an entirely different impression was gained from the testimony presented to the jury from that presented to the court out of the presence of the jury; and seventh, it appeared that if it may be assumed that there is a science involving special skills for determining speeds of vehicles from the physical facts, which skills are beyond the ken of the average juror, it affirmatively appeared that the officer did not use those skills, but relied rather upon his own general experience, which the officer himself described as speculation.

In *Pickett v Kolb* (1967, Ind App) 231 NE2d 856, superseded (Ind) 237 NE 2d 105, an action for injuries sustained when plaintiff's automobile collided with a tractor operated by the defendant, the court, in affirming a judgment for the defendant, held that the trial court had not abused its discretion in sustaining the defendant's objection to a question addressed to the plaintiff's witness, a police officer, concerning the speed that would cause the vehicle to leave 120 feet of skid marks.

In reversing a judgment for the plaintiff and ordering a new trial, the court in *B-Line Cab Co. v Hampton* (1952, Ky) 247 SW2d 34, held that it was error to admit a police officer's testimony -- as to the speed of the defendant's taxicab at the time it struck the plaintiff, a pedestrian -- based on skid marks made by the taxi. The court said that while the witness might have given his expert opinion concerning the relationship of skid marks to speed, his testimony concerning the speed of this particular taxi, which he did not observe in motion, was incompetent.

In *Jackson v Trogan* (1961) 364 Mich 148, 110 NW2d 612, an action for personal injury sustained in an automobile accident, the court reversed a judgment for the defendant on the ground that it was reversible error to admit a police officer's testimony as to the speed of the plaintiff's vehicle, where the police officer's opinion was based on skid marks made by the plaintiff's automobile before impact, and where the evidence did not show that he had experience in investigating automobile accidents. The court pointed out that the witness could not prove the speed of the plaintiff's vehicle by mathematical computation, that he based his opinion on a chart and on his own reasoning, and that there was no evidence as to the weight of the vehicles, the condition of the road, or the type of highway surface at the place of the accident.

A hypothetical question addressed to a police officer for the purpose of eliciting expert opinion testimony as to the

speed of a motor vehicle based on skid marks and other physical facts was held insufficient in *Grapentin v Harvey* (1962) 262 Minn 222, 114 NW2d 578, where it failed to state facts as to the condition of the highway and the length of the skid marks. The court pointed out that the testimony of the investigating officer was unclear as to the exact length of the skid marks made by the front wheels and by the rear wheels, and that his description of the highway as a regular and concrete highway was too vague on which to base expert opinion testimony. The court recognized that a hypothetical question need not contain all the small or unimportant details, but declared that such a question must contain the evidentiary facts that are necessary to support expert opinion.

In *Pierson v Edstrom* (1968, 281 Minn 102, 160 NW2d 563, the court held that it was error to permit cross-examination of the plaintiff's witness, a traffic officer, as to whether there was anything inconsistent between the defendant's statement to the officer that he was going 25 miles per hour and the witness' experience in investigating automobile accidents, the location and position of the defendant's vehicle after the accident, and the location of the skid marks. The court said that the officer, who was not an eyewitness to the accident, was not qualified to give an opinion as to the speed of the defendant's car.

In *Gray v Turner* (1962) 245 Miss 65, 145 So 2d 470, a police officer's testimony as to the speed of the defendant's automobile, based on 120 feet of skid marks, was held properly excluded where his testimony would have been based solely on a mathematical chart given to him at a police academy. The court pointed out that the witness had no personal knowledge of the mathematical or physical factors involved, and that the chart was hearsay.

In *Marsh v Johnson* (1968, Miss) 209 So 2d 906, a widow's action for wrongful death of her husband, who was killed when the defendant's truck collided with the automobile in which he was a passenger, the court, in affirming a judgment for the plaintiff, said that it was error to permit a police chief with 31 years of experience as a policeman, who had investigated many accidents, to testify as to the speed of the defendant's truck, on the basis of 92 feet of skid marks. But since there was other evidence from which the jury could determine the speed of the defendant's vehicle, the error was held nonprejudicial.

In *Piechota v Rapp* (1947) 148 Neb 442, 27 NW2d 682, an action for wrongful death of a 17-year-old girl who was riding in the defendant's automobile, which went off the road and struck a building, the court, in reversing a judgment for the plaintiff, held that it was prejudicial error to allow a sheriff to testify as to the speed of the defendant's automobile where his opinion was based on skid marks and experiments conducted by him. The sheriff testified that he had made experiments as to speed on the curve in question a week or two after the accident, that he was an experienced driver and acquainted with the road, that he had used an automobile in the experiment that was about the same size as the defendant's automobile, that he drove the car around the curb at a speed of 45 miles per hour, and that his opinion, based on these experiments, was that the defendant's car must have been traveling at the minimum speed of 60 miles per hour when it went around the curve. In stating that the opinion testimony as to speed should have been excluded, the court pointed out that the sheriff knew the road and was driving it for the purpose of making an experiment, whereas the defendant had only slight knowledge of the road, and was driving while under the influence of intoxicating liquors.

In *Cormier v Conduff* (1968, NH) 241 A2d 795, actions for injuries sustained in a collision of two automobiles near the crest of a hill, it was held that the trial court had not abused its discretion in refusing to admit a police officer's testimony as to the speed of the defendant's Volkswagen, based on 156 feet of skid marks. The police officer had about 10 years of experience in police work, including special training in the investigation of accidents. The officer proposed to compute the speed of the defendant's automobile before the accident by use of a template. The defendant's objection to the offered testimony called the trial court's attention to the fact that the skid marks were not over a level road but over the crest of a hill. The trial court excluded the opinion evidence as to speed on the ground that it would not aid the jury.

In *Nesta v Meyer* (1968) 100 NJ Super 434, 242 A2d 386, an action for injuries sustained in an intersection collision of two automobiles, the court, in affirming a judgment for the defendant, held that the trial court had not abused its

discretion in refusing to permit a police officer to testify as to the speed of the plaintiff's car on the basis of skid marks. The court pointed out that the officer was not an engineer and had no special training in assessing the speed of vehicles from skid marks or other indicia at the scene, and that it is a matter of common knowledge that skid marks may be affected not only by the speed at which a vehicle is being driven, but by the condition of the surface of the highway, the type of tread and degree of wear of the tires, the weight of the vehicle, and the condition of the brakes and manner in which they were applied.

In *Tyndall v Harvey C. Hines Co.* (1946) 226 NC 620, 39 SE2d 828, an action for injuries sustained by a girl who was struck by the defendant's truck as she was walking on the shoulder of a highway, the court reversed a judgment for the plaintiff on the ground that it was error to permit a state highway patrolman to give opinion testimony as to the rate of speed of the defendant's truck, based on marks the truck made on the shoulders of the road and upon the grass. The marks were not brake marks but were marks made when the truck made a sudden turn, thus shifting the weight to one side or the other. In support of its conclusion, the court pointed out that the witness had not seen the truck in motion, that he saw certain marks on the road, and that when he gave his estimate of speed he was not speaking of what he saw, but was giving a conclusion reached upon a consideration of the facts that he had observed. In addition, he gave a plain, clear, and distinct description of the signs, marks, and conditions he had found at the scene of the collision, so that ordinary jurymen could readily understand and appreciate what he had seen. Thus, the court concluded that the jury was as well qualified as he to determine what inferences the facts about which he testified permitted or required.

In *Bailey v Rhodes* (1954) 202 Or 511, 276 P2d 713, an action under the Oregon guest statute for injuries sustained when the automobile owned and operated by the defendant went off the road and plunged down an embankment, the court, in reversing a judgment for the plaintiff and ordering a new trial, held that prejudicial error was committed in permitting a state police officer to give opinion testimony as to the speed of the defendant's automobile where his opinion was based on physical facts which he observed in investigating the accident. The court said that when the matter of speed is involved, the question primarily is not how fast the automobile was traveling in specific miles per hour, but whether its speed, whatever it may have been in miles per hour, was excessive under all the facts, circumstances, and conditions existing at the time. The court added that competent and qualified eyewitnesses who have observed a motor vehicle in motion may give their opinion as to the rate of speed it was traveling, but one not an eyewitness cannot express an opinion based solely upon the physical facts existing after an accident, as to the rate of speed prior to the accident. A jury is as well able to draw its own inferences and reach its own conclusions from the facts presented as is the witness. Such testimony invades the province of the jury.

In determining the speed of the plaintiff's motor scooter, which collided with the defendant's pickup truck, the court in *Austin v Hoffman* (1964, Tex Civ App) 379 SW2d 103, in affirming a judgment for the plaintiff, held that the trial court had not abused its discretion in excluding a police officer's testimony as to the speed of the plaintiff's motor scooter, based on the physical damage to the truck and scooter, and the skid marks left by the scooter. The court pointed out that the officer stated that he had never had any special training in school to determine how fast a vehicle must have been going to bend metal so many inches or make a dent of a certain size, did not know how much force it takes to bend the metal, and had made no such tests, and that such tests would have to be made to make an accurate estimate of speed.

In an action by the occupant of an automobile against the manufacturer of the automobile for injuries sustained in an accident allegedly caused by a defective braking system, the court in *Standard Motor Co. v Blood* (1964, Tex Civ App) 380 SW2d 651, in affirming a judgment for the plaintiff, held that the trial court had not abused its discretion in excluding the testimony of four police officers concerning the speed of the plaintiff's automobile -- based on skid marks and other facts -- before the moment that its brakes allegedly failed.

In *Terbay v Pat Canon Excavating Co.* (1965, Tex Civ App) 396 SW2d 482, error ref n r e, the court held that the testimony of a police officer concerning the speed of a dump truck was properly excluded on the ground that the officer was not sufficiently qualified to express an opinion. The court pointed out that although the witness had considerable training in the proper manner of investigating car collisions and had a great deal of experience in this field, he had no

knowledge or experience qualifying him to estimate the speed of cars from the amount of damage sustained by them, nor did he have any knowledge or experience which would qualify him to express an opinion as to the speed of the dump truck based on its skid marks left on a steep downgrade on wet, muddy, and slick pavement.

In *Kiehn v Sprague School Dist.* (1958) 52 Wash 2d 565, 324 P2d 446, the court reversed a judgment for the plaintiff on the ground that it was error to allow a highway patrolman to give opinion testimony to the effect that the plaintiff's vehicle was not traveling at an excessive rate of speed at the time of the accident, where he had been asked how fast a car would be going to lay down a skid mark of 98 feet "and at that time stop," and where the uncontradicted evidence showed that the car did not stop after skidding, but collided with the defendant's bus.

<>

Opinion testimony of experienced police officer as to speed of automobile at time of accident, based in part upon scuff marks believed to have been made at point of impact and measured distance between point of impact and automobile, was inadmissible because automobile was not shown to have come to skidding halt and it was not established where driver had initially applied brakes. *McWhorter v Clark (Ala)* 342 So 2d 903.

Opinion of state trooper as to speed of defendant's car prior to collision should not have been admitted where trooper did not know exact distance of skid marks made by defendant's car. Opinion as to speed of plaintiff's truck prior to collision, while it was based on skid marks made after impact and upon condition of 2 vehicles, and therefore was not admissible, was harmless, since plaintiff himself testified that his speed was about 35 miles per hour prior to impact, while trooper's opinion was that plaintiff was traveling at about 40 miles per hour. *Giles v Gardner*, 287 Ala 166, 249 So 2d 824 (citing annotation).

Testimony by police officer as to speed of vehicle based on skid marks is not admissible where marks were made at time of impact or thereafter. *Holuska v Moore (Ala)* 239 So 2d 192.

Where there was lack of testimony concerning police officer's qualifications to give his opinion of defendant's speed at time of accident and where question put to officer was not clearly predicated on skidmarks made before impact but was based on what officer had observed talking to other persons, proper foundation was not laid for officer to express opinion as to speed of defendant's vehicle and trial court correctly refused to admit officer's testimony. *Hughes v Southern Haulers, Inc.* (1979, Ala App) 379 So 2d 601.

See *Bailey v Lenord* (1981, Alaska) 625 P2d 849, § 3[a].

Trial court correctly ruled that state trooper could not testify as to exact speed of automobile from examination of skid marks at scene of accident where trooper was not familiar with concept or calculation of friction coefficient. *Ball v Cameron* (1984) 282 Ark 357, 668 SW2d 942.

Police officer's expert testimony, in which he estimated the speed of motorist's vehicle, was inadmissible, though officer was qualified as expert, where officer took no measurements, made no calculations, and had no factual basis for his opinion. *Dozier v. Hodges*, 849 So. 2d 1094 (Fla. Dist. Ct. App. 3d Dist. 2003).

In action against city for failure to maintain certain traffic devices properly, allegedly resulting in death of motorist upon collision with street divider, testimony of police officers as to speed of vehicle, based on their observation of scene of accident, physical damage to vehicle, distance traveled, and tire marks left on pavement after vehicle struck divider, was not admissible, such testimony being conjectural and being only competent to show speed of automobile after collision with divider and not taking into account significance of previous collision so as to make proposed opinion relevant to speed of vehicle prior to collision. *Jorstad v Lewiston*, 93 Idaho 122, 456 P2d 766.

Accident investigator was properly allowed to testify about length of skid marks and average stopping distances of automobiles according to insurance reference book, where investigator gave no opinion concerning speed of car before accident. *Viehweg v Thompson* (1982, App) 103 Idaho 265, 647 P2d 311.

Admission of testimony of investigating officer as to speed of car based on nomograph test of skid marks constituted reversible error where officer was not qualified as expert in use of nomograph; even if he was qualified as expert, such testimony would have been inadmissible where there were two eyewitnesses capable of judging speed of car. *Diederich v Walters* (Ill App) 334 NE2d 283.

In wrongful death action arising out of collision between car and defendant's disabled truck stopped on highway, question asked of expert witness as to whether skid marks indicated violation of speed laws by decedent's car called for legal conclusion and trial court erred in overruling defendant's objection. *Schlichte v Franklin Troy Trucks* (1978, Iowa) 265 NW2d 725.

Opinion of police officer as to speed of vehicle before it struck pedestrian, based on skid marks, was not admissible, because (1) in giving his opinion, officer did not consider road surface, character of tires, and weight of vehicle, although estimation of speed based on skid marks without considering said factors may be made, if expert is shown to have experience testing vehicles of different weights, with tires in different conditions, on pavement in different conditions and varying grades, which experience expert in this case did not have; and (2) officer failed to state factual basis for his opinion. *Bernal v Bernhardt* (Iowa) 180 NW2d 437 (citing annotation).

Testimony of police officer as to vehicle speed based on measurement of skidmarks by use of template was inadmissible where, because of lack of training, understanding, and experience in use of template, officer could not qualify as an expert. *State v Rogers* (La) 324 So 2d 358 (citing annotation).

Skid marks and physical damage to culvert struck by plaintiff's automobile do not, standing alone, constitute proof of excessive speed under all circumstances. *Craig v Burch* (La App) 228 So 2d 723, writ refused 255 La 475, 231 So 2d 393.

Objections to questions whether police officer had opinion as to speed of defendant's vehicle at point of impact, and whether he had opinion as to maximum and minimum rates of speed defendant lost in incurring 162 feet of skid marks, were properly sustained, in view of fact that officer was not specifically questioned as to his expertise in estimating speed from his investigation of physical facts following accident. In any event, trial court has discretion to determine whether or not witness is sufficiently qualified to express expert opinion. *Owens v Creaser*, 14 Md App 593, 288 A2d 394, revd on other grounds 267 Md 238, 297 A2d 235.

Testimony of police officer as to speed of car involved in accident was inadmissible as hearsay where testimony was based on computation of speed from skidmarks observed by the officer but actual calculations were performed by another officer. *Haanke v Ball* (Mich App) 230 NW2d 333 (citing annotation).

Investigating officer's testimony, in negligence action by motorist, arising out of vehicle accident that occurred after driver crossed double yellow lines while skidding on ice, concerning his opinion that driver's speed was unsafe lacked sufficient foundation. *Arricale v. Leo*, 744 N.Y.S.2d 109 (App. Div. 4th Dep't 2002).

Trial court in action for wrongful death and personal injuries arising from intersection accident between tractor-trailer and automobile erroneously admitted police officer's estimate of truck's speed just before collision, where record failed to show officer's specific training and experience as to skid marks and failed to show scope of facts such as weight of vehicle, tire size and pressure, and similar facts necessary to estimate speed. *Johnson v Attkisson* (1986, Tenn App) 722 SW2d 390.

Trial court erred in declaring trooper to be expert witness as to speed of defendant's vehicle when it struck boy crossing road, where officer testified he had been such for five years, part of one week's annual training consisted of measure of skid marks and interpretation of speed from them, he drove car at given speed and applied his brakes, correlated his knowledge of speed and length of marks with marks laid by defendant to template supplied by state and arrived at speed ten miles per hour under that testified to by defendant, trooper did not know comparative weights of two vehicles or their tire types and pressures, and trooper had only proffered opinion of template as expert. *Walters v Glidwell* (1978, *Tenn App*) 572 SW2d 657.

Trial court properly excluded testimony of officer investigating head-on collision that cause of accident was that pick-up was driving faster than conditions would permit, even though trooper had been with department of public safety eight and one-half years, had received 17 weeks of training, and had investigated 350 accidents, and though officer testified he saw "eraser marks" on highway indicating defendant's westbound vehicle went into skid or hydroplaned after hitting puddle of water, went into eastbound lane, and struck plaintiff's vehicle, and that officer's training was that car could hydroplane at 56 mph when running through water. *Clark v Cotten* (1978, *Tex Civ App*) 573 SW2d 886.

Opinion of police officer as to speed of motor vehicle, based on skid marks, was not admissible, where witness did not consider other factors, such as material of road surface, material of tires, tire tread, temperature, air pressure in tires, and weight of car. *Orndoff v Rowan (W Va)* 192 SE2d 220.

[\*4] Engineers

[\*4a] Opinion as to speed held admissible

A number of cases hold or recognize that an engineer who qualifies as an expert may give opinion testimony as to the speed of the motor vehicle based on skid marks and other physical facts.

## PENNSYLVANIA

*Stacy v Thrower Trucking, Inc.* (1978, *Pa Super*) 384 A2d 1274

In *Anglin v Nichols* (1956) 80 Ariz 346, 297 P2d 932, an action arising out of the collision of the plaintiff's car and the defendant's pickup truck at an intersection, plaintiff's car made 167 feet of skid marks leading to the point of impact. A safety engineer testified that a car driven at 55 miles an hour will lay down skid marks of 162 feet on pavement, and that about 7 feet should be added where the car is on a graveled highway. The witness' figures were based on over a thousand experiments conducted by the witness, involving all makes of cars, and on courses taken at Yale University, Yale Bureau of Traffic Research, and at Northwestern Traffic Institute. The court affirmed a judgment for the defendant on the ground that the plaintiff was contributorily negligent.

In *Snyder v New York Cent. Transport Co.* (1966) 4 Mich App 38, 143 NW2d 791, an action for injuries sustained when the automobile in which the plaintiff was riding collided with the defendant's tractor-trailer, the court, in affirming a judgment for the defendant, held that a mechanical engineer's testimony as to the speed of the plaintiff's automobile, based on skid marks and other physical facts, was properly admitted. In recognizing that the witness was qualified as an expert in his field, the court pointed out that he was a professor of mechanical engineering at the University of Detroit for the immediately preceding 4 years; that he had a Bachelor of Science degree in aeronautical engineering and mathematics, a Master of Science and Engineering Mechanics, and a doctorate in mechanical engineering, from the University of Michigan, and a Master of Science and Mechanical Engineering degree from Wayne State University; that he was a registered engineer in the state of Michigan; that prior to his professorship at the University of Detroit, he taught at Wayne State University for 5 years, and for 7 years taught automotive engineering at the Henry Ford

Community College; that he was also a director of the Transport Research Institute, which studied the various safety factors of automobiles, conducted experiments of taking vehicles out and colliding them with each other under various conditions, and then comparing results with anticipated results from studies made prior to the experiment; that he had extensively experimented with many vehicles as to skidding properties, speed, and damage resulting to vehicles by reason of collision under varying conditions; and that for 4 years he had worked as principal engineer with the Ford Motor Car Company and had directed analytical research at that time in the crash safety program. In giving his opinion on the speed of the plaintiff's vehicle, he was informed of the following factors testified to by witnesses at the scene: 44 feet of skid marks made by plaintiff's vehicle, the make and weight of plaintiff's automobile, the composition of the pavement, that it was a cold, clear night and the pavement described as dry, or slightly moist with dew; and photographs of the scene and the damage to plaintiff's automobile. From these factors, and applying a specialized scientific knowledge and experience, he gave his opinion that plaintiff was traveling a minimum of 40 miles per hour just before the accident. On the question of speed, assuming no impact or that plaintiff stopped within the 44 feet of skid marks without being stopped by running into an object, he estimated the minimum speed of plaintiff's car to be 32 1/2 miles per hour. The court concluded that the opinion testimony of the witness as to the speed of the plaintiff's automobile, deduced from the physical facts in the case, was within that area of knowledge in which the average juror would be unschooled and unexperienced, and that the evidence was, therefore, properly received.

In *Di Nizio v Burzynski* (1963) 81 NJ Super 267, 195 A2d 470, the court said that in an appropriate case, where the speed of a vehicle is an issue, opinion evidence from qualified experts bearing thereon is properly receivable in evidence in reply to a hypothetical question which includes the evidence in the case concerning the course, length, and nature of the skid marks left by such vehicle, and likewise, expert testimony as to average reaction time, and opinion evidence as to speed and distance traveled based thereon, may be received. Although the trial court had excluded testimony of a traffic engineer concerning the speed of the defendant's automobile at the time it struck the infant pedestrian, the court, in affirming a judgment for the defendant, held that the exclusion of the testimony did not constitute prejudicial error in view of other evidence as to speed and lookout.

In *Billingsley v Southern Pacific Co.* (1966, Tex Civ App) 400 SW2d 789, error ref n r e, an action for injuries sustained when the plaintiff's vehicle was struck by the defendant's train at a rural railroad crossing, the court, in affirming a judgment for the defendant railroad, held that testimony of a consulting engineer as to the speed of the plaintiff's vehicle was evidence of probative force to support the jury's finding that the plaintiff's vehicle was traveling at an excessive rate of speed at the time it struck the train. The witness, a consulting engineer called by the defendant railroad, had been engaged in accident analysis work since 1948, and had made a study of the automobile involved in the collision. He had also made photographs of the vehicle, and testified in great detail that he had examined exhibits showing the skid marks at the scene of the accident and had determined that the speed of the plaintiff's vehicle when the brakes were first applied was within the range from 56 miles per hour to a speed "in excess of" 65 miles per hour. He based his opinion upon his observations at the scene of the accident, examination of the damage to the vehicle, the defendant's photographic exhibits, measurements, mathematical calculations, and testimony in the record.

In *State v Lingman* (1939) 97 Utah 180, 91 P2d 457, the defendant was prosecuted for criminal negligence in causing the death of a woman who was driving an automobile that collided with an automobile driven by the defendant at a city intersection. Although the defendant's conviction for involuntary manslaughter was reversed on other grounds, the court held that a mechanical engineer's testimony as to the speed of the defendant's automobile, based on tire marks made by the car as it was pushed sidewise, was admissible. The witness was asked to testify as to speed on the basis of certain information as to weight of cars, type of highway, positions of the cars, point of impact, and the marks made by the car, which was struck as it skidded sideways and diagonally across and off the highway. The witness was asked his opinion as to the speed of the defendant's car at the moment of impact, which he computed according to a mathematical formula based upon the distance the impact had driven the struck car.

Engineer, who had previously been employed as expert in 40-50 cases involving accident reconstruction, was properly permitted to state opinion as to minimum speed of vehicle based upon length of skid marks before and after collision, friction coefficient of pavement, weight of vehicles involved, and distance between center of gravity of other automobile and point at which it was struck by vehicle. *Spain v McNeal (Dist Col App) 337 A2d 507.*

Admittedly qualified expert witness should have been allowed to give opinion as to speed at time of accident since plaintiff properly laid predicate to hypothetical question as to speed of defendant's vehicle. *Taylor v Posey (Fla App) 283 So 2d 118.*

Introduction of traffic engineer's testimony regarding defendant's estimated speed just before accident, based primarily on skid marks, did not deprive plaintiff of fair trial, though it served to bolster defendant's approximation of his speed, where there had been no eye witnesses, where evidence was responsive to one of main thrusts of plaintiff's case and was generally consistent with testimony introduced by plaintiff's own witnesses, and where, under the circumstances, expert testimony was necessary for interpretation of what skid marks meant about speed of defendant's vehicle. *Coffey v Hancock (1984, 3d Dist) 122 Ill App 3d 442, 77 Ill Dec 677, 461 NE2d 64.*

In action based on breach of implied warranty against car manufacturer brought by driver and passenger for injuries received in rear-end collision in which allegedly defectively designed gas tank ruptured, testimony of expert witness as to speed of co-defendant's car was admissible, even though there was eyewitness lay testimony on same point, where expert was engineer with extensive background in automobile collisions and had published articles that defendant's employees admittedly read, and where lay testimony was subject to considerable doubt in light of poor weather conditions and sudden nature of collision. *Elsasser v American Motors Corp. (1978) 81 Mich App 379, 265 NW2d 339.*

Opinion of mechanical engineer as to speed of defendant's automobile just prior to application of brakes and collision, given on basis of full disclosure to him of all relevant facts and testimony then in evidence, and arrived at after said expert conducted independent investigation and tests, including consideration of length of skid marks left by defendant's automobile, was properly admissible. *Le Mieux v Bishop (Minn) 209 NW2d 379.*

Trial court did not err when it permitted testimony by mechanical engineer as to calibration of speedometer of truck and skid tests and as to speed of truck at times brakes were applied based on known length of skid marks created when driver applied his brakes prior to striking nine-year-old plaintiff, where jury was properly instructed on how to evaluate assumed facts which formed basis of expert's opinion. *King v Branch Motor Express Co. (1980) 70 Ohio App 2d 190, 24 Ohio Ops 3d 250, 435 NE2d 1124, motion overr.*

Admission of opinion as to speed of vehicle of expert witness, who was licensed civil engineer, head of engineering firm specializing in highway design and accident reconstruction, and assistant dean of engineering and professor at university, was proper where opinion was based on weight of car, length of skid marks, grade of street, characteristics of road surface and other considerations which he identified. *Haeberle v Peterson (1978, Pa Super) 396 A2d 738.*

Opinion of consulting engineer as to speed of motor vehicle, based upon testimony of police officer as to skid marks and other circumstances at time of accident, expert's own examination of photographs and his evaluation of weight of several vehicles, was properly admissible, where engineer had specialized in analysis of accidents or collisions for more than 20 years. *Bates v Barclay (Tex Civ App) 484 SW2d 955, error ref n r e.*

[\*4b] Opinion as to speed held inadmissible

Although the following cases recognize that an engineer who is qualified as an expert may testify as to the speed of the motor vehicle, as based on skid marks and other physical facts, each holds such testimony inadmissible on the ground that no proper foundation had been laid on which his opinion could be based.

In an action by the driver of a Greyhound bus against the owner of a truck that collided with the bus, the court in *Solomon Dehydrating Co. v Guyton* (1961, CA8 Neb) 294 F2d 439, cert den 368 US 929, 7 L Ed 2d 192, 82 S Ct 366, held that testimony of a professor of mechanical engineering was properly excluded where he sought to give his opinion as to the speed of the plaintiff's bus, based solely on the evidence (which included skid marks) he had heard and had seen presented at the trial, and where the hypothetical question put to him failed to include the fact that the plaintiff's bus had pushed the defendant's truck 110 feet sideways after the impact.

Stating that a qualified expert may, upon the laying of a proper foundation, give his opinion as to the minimum speed which a vehicle must have been traveling to lay down the skidmarks shown in the evidence, the court in *Flory v Holtz* (1964) 176 Neb 531, 126 NW2d 686, nevertheless held that the trial court had not abused its discretion in refusing to allow the plaintiff's expert witness, a professor of mechanical engineering, to testify as to the speed of the defendant's truck before impact, or the speed of the plaintiff's vehicle and the defendant's vehicle at the moment of impact, where the hypothetical question addressed to the witness failed to state sufficient facts on which he could base his opinion. In affirming a judgment for the defendant, the court recognized that the witness was qualified as an expert, but said that there was considerable speculation concerning the facts on which his opinion as to speed was based. The court pointed out that the stopping distances of the vehicles after the accident were merely estimates, that the highway patrolman had estimated the distance that the plaintiff's pickup traveled after the accident, assuming a point of impact, and that the hypothetical question assumed that nothing had happened in the collision, other than the impact itself, to affect the distance the vehicles traveled after the impact. The court also pointed out that there was no testimony as to the coefficient of friction to be used by the witness, or any data as to how it was obtained, that there was no evidence of the tire pressure of any of the tires on the vehicles, or evidence of the depth or intensity of the skid mark, or of the temperature of the surface of the highway, or of the effect of a recently dragged surface with loose gravel in the center. The court also said that the coefficient to be used would depend considerably upon the type and condition of the vehicles involved and the exact condition of the surface of the highway where the collision occurred, and although the witness testified that he had performed experiments or had seen experiments performed on a like surface and knew the coefficient to be used, there was no testimony that he had seen experiments involving a pickup and a truck, nor was there any evidence from which it could be ascertained that the experiments he had performed or witnessed had been performed on a similar surface.

In *Brugh v Peterson* (1968) 183 Neb 190, 159 NW2d 321, 29 ALR3d 236, an action for wrongful death of a guest in the defendant Fischer's automobile, which collided at an intersection with an automobile owned by the codefendant Peterson, the court said that the trial court erred in permitting a professor of engineering mechanics to state his opinion as to the speed of the defendant Peterson's automobile, including the impact, and that his testimony should have been confined to speed based upon skid marks only. The trial court had permitted the witness to testify, over objection, that the defendant's automobile was traveling at not less than 52 miles per hour before the accident. The witness testified that he had determined a coefficient of friction by experimentation, and that upon the basis of the skid marks made by the defendant's automobile prior to the impact, it had a minimum speed of not less than 30 miles per hour if it was assumed that the automobile had stopped at the point of impact without impact. The court said that this evidence was proper, and that a qualified expert, upon laying a proper foundation, may give his opinion as to the minimum speed which a vehicle must have been traveling to lay down the skid marks shown in the evidence. The court pointed out that the witness' determination of the speed of the defendant's automobile, including the impact, involved an application of the law of conservation of energy, the law of conservation of momentum, and the law of recovery. It was essentially a mathematical calculation in which it was necessary to determine a large number of factors and variables. Some were determined by experimentation, and others were determined by inspection of the photographs taken at the scene of the accident. Others were determined by assumption. In holding that the witness' opinion as to the speed of the defendant's automobile should have been based upon skid marks only, the court said that the expert opinion depended upon the resolution of so many variables that it was, in effect, a statement of a possibility, and that under the circumstances in this case the expert testimony was neither necessary nor advisable as an aid to the jury. The court affirmed the defendant Fischer's motion for judgment notwithstanding the verdict, and sustained the codefendant Peterson's motion for a new

trial.

◇

Trial court did not err in excluding expert testimony of mechanical engineer as to speed of car where engineer testified on assumption that vehicle had left skidmarks of 174 feet, it would have been traveling between 64 and 72 miles per hour, but where investigating officer's testimony indicated that skid marks left by vehicle were approximately 100 feet in length. *Thibodeaux v Hulin Marble & Granite Works, Inc. (1980, La App) 386 So 2d 136.*

Opinion evidence as to speed based on calculations critically based on skid marks was properly excluded, there being no adequate demonstration of proper state of the art. *People v Zimmerman, 385 Mich 417, 189 NW2d 259* (citing annotation).

Testimony of engineer as to speed of vehicle, based on skid marks and in part upon crash damage, lacked sufficient foundation, both as to scientific basis for testimony and as to qualifications of witness. *Stein v Ohlhauser (ND) 211 NW2d 737* (citing annotation).

[\*5] Other witnesses

[\*5a] Opinion as to speed held admissible

Other witnesses have been held qualified as experts and permitted to give opinion testimony as to the speed of a motor vehicle based on skid marks and other physical facts.

Although the testimony of two witnesses was held inadmissible on other grounds, the court in *Linde v Emmick (1936) 16 Cal App 2d 676, 61 P2d 338*, said that the witnesses were sufficiently qualified as experts to testify as to the speed of the defendant's vehicle, as based on skid marks left by the vehicle at the scene of the accident. Each witness testified that he had driven all types of vehicles for over 20 and 30 years respectively, and had tested brakes on all kinds of roads, under all kinds of weather and road conditions.

In an action to recover damages for personal injuries sustained in a collision between the defendant's taxicab and a schoolbus on which the plaintiff, a minor, was riding, the court in *Harmon v Givens (1953) 88 Ga App 629, 77 SE2d 223*, held that a busdriver with 30 years of experience in operating a bus was qualified to give opinion testimony as to the speed of the defendant's taxicab before it "slowed down." The court pointed out that the witness' previous testimony that the taxicab was moving at 30 miles per hour when it struck the schoolbus, based on the appearance of the two vehicles a few minutes afterward and on his experience and observation of automobiles during 30 years of driving a schoolbus, had been admitted without objection. The court added that the opinion objected to, as to the speed of the taxicab before it slowed down, was based upon the speed at the time of the collision. The defendants admitted in their answer that the taxicab had skidded 24 feet before striking the school bus, and had introduced testimony to the same effect. The court said that on the basis of this fact and the witness' experience as a driver, his opinion as to how much the speed of the taxicab was reduced before it struck the schoolbus was admissible.

In affirming the defendant's conviction for manslaughter, the court in *State v Bosch (1952) 125 Mont 566, 242 P2d 477*, held that no error was committed in allowing an automobile mechanic to give opinion testimony as to the speed of the defendant's automobile. The court pointed out that the witness had 10 years' experience as a mechanic, had attended a braking school and a mechanics school, had regularly adjusted brakes on customers' cars, and was familiar with skid marks. The witness testified that he heard the screech of the defendant's automobile at the time of the accident, which took place across the highway from his driveway, that he was at the scene of the wreck about the same time as the highway patrolman arrived, and that in his opinion a car, in order to leave the tracks that this one had, would have to go

at an excessive rate of speed of over 60 miles an hour.

In *Heidner v Germschied* (1919) 41 SD 430, 171 NW 208, two witnesses, who showed themselves to be familiar with the handling of cars, and who had examined the roadbed and the skid marks made by the defendant's automobile, gave their opinion as to the rate of speed at which the defendant's car was going at the time of the accident. The court said that there was no error in the receipt of this evidence where there was evidence of the kind of car, the condition of the roadbed, the place where the brakes were applied, the place where the child was struck, and the length of the skid marks.

In *Monday v Millsaps* (1953) 37 Tenn App 371, 264 SW2d 6, the court, in affirming a judgment for the plaintiffs in consolidated actions for personal injuries sustained in a collision between an automobile and a truck, held that the trial court had not abused its discretion in permitting an expert witness to testify as to the minimum speed of the defendant's truck, as based on skid marks. The court pointed out that the witness had been employed for 4 years at Oak Ridge as chief of the analytical services and assistant to the traffic engineer, where his duties involved a reviewing of all traffic accidents, reports, and the like for that area; that since 1936 he had investigated and reviewed approximately 6,000 cases, and since being at Oak Ridge had investigated 50 accidents and had reviewed approximately 3,500 reported accidents; that in 1944 he completed a course at Northwestern University on traffic accident investigations, where he had as an instructor an eminent authority on traffic accidents; that he had subsequently run numerous tests on skid marks in connection with the U.S. Army while on special duty in the Caribbean and Panama Canal Zone; that in 1950, at the request of the FBI, he taught "Determining Minimum Speed From Skidmarks" to the Knoxville police; and that in 1951, on the invitation of the chief of the Tennessee highway patrol, he gave the same course to the officers of the highway patrol at Nashville. Upon being asked a hypothetical question based upon matters previously testified to by other witnesses, the expert witness testified that from the 100 feet of skid marks made by the dual wheels of the truck, its minimum speed was not less than 48 miles per hour and was probably more.

For additional cases recognizing that a qualified expert witness may give opinion testimony as to the speed of a motor vehicle, based on skid marks and other physical facts, see:

<>

Crush data and length of skid marks provided reliable basis for accident reconstruction expert to form opinion on speed of approaching vehicle. 28 U.S.C.A. *Fed. Rules Evid. Rule 702 Ford v. Nationwide Mut. Fire Ins. Co., 62 Fed. Appx. 6 (1st Cir. 2003).*

Testimony from accident reconstructionist was admissible in personal injury case, despite questions as to whether expert's opinion of speed of automobile was based on sufficient facts and data and whether opinion was derived from application of scientific or technical methods that were acceptable in his field, since expert arguably applied principles and methods to sufficient facts and data, his opinion was product of reliable principles and methods, and it was for jury to assess his credibility. *Fed. Rules Evid. Rule 702, 28 U.S.C.A. Melberg v. Plains Marketing, L.P., 332 F. Supp. 2d 1253 (D.N.D. 2004).*

Generally, expert, not eyewitness to collision, can testify as to estimated speed of automobile predicated on distance tires skidded or were dragged along highway before impact, but not predicated on distance tires skidded after impact. Skid marks before impact, point of impact, and damage to vehicles, are three factors upon which expert can validly predicate opinion as to speed. *Maslankowski v Beam, 288 Ala 254, 259 So 2d 804.*

In action to recover damages for injuries sustained as result of accident in which plaintiff's car was hit from behind by defendant's vehicle when plaintiff stopped to make left turn, trial court erred in excluding evidence of severity of impact as indicated by rate of speed, length of tire marks after defendant applied his brakes, and distance between cars after impact since such items of evidence were relevant to probable extent of plaintiff's injuries. *Berndston v Annino (1979) 177 Conn 41, 411 A2d 36.*

Opinion testimony of accident reconstruction expert was admissible in action arising from auto-pedestrian accident, notwithstanding that initial "shadow" skid marks had disappeared from accident site at time of investigation, where opinion corroborated defendant's testimony and was helpful to jury. *Andrews v. Tew By and Through Tew, 512 So. 2d 276 (Fla. Dist. Ct. App. 2d Dist. 1987).*

Admission of expert opinion testimony of qualified accident reconstructionist as to motorist's speed prior to head-on collision with left-turning motorist was warranted, in motorist's personal injury action against left-turning motorist; although expert never investigated collision or visited accident scene, opinion was based upon length of skid marks left by motorist's vehicle before point of collision, motorist's deposition testimony as to her speed before collision, and circumstantial evidence from physical damage to both vehicles. *Cox v. Allen, 567 S.E.2d 363 (Ga. Ct. App. 2002).*

Trial court properly allowed, over objection, admission of testimony of expert witness concerning speed at which defendants' truck was traveling immediately prior to collision with car in which plaintiff was passenger, where expert had personal knowledge of length and character of skid marks left by truck, extent of damage to vehicles, distance by which collision displaced car, and listed weight for each vehicle; where evidence adequately supported expert's testimony; and where jury was accurately charged on weight to be given such testimony. *Mitchell v Reece (1978) 145 Ga App 553, 244 SE2d 99.*

While expert testimony as to speed of automobile, based on length of skidmarks, force of impact, type of vehicle, condition of road, and all surrounding factors, is competent, expert must be shown to have had some special training and experience in this field, and testimony of police officer solely as to what is shown by skid-speed tables would be hearsay. *Ryan v Payne (Ky) 446 SW2d 273.*

Where testimony of eye witnesses as to speed of vehicle was unsatisfactory to defendants, defendants could call expert to testify as to speed, based upon skid mark measurements made by police officer and upon expert's tests of friction coefficient of highway surface, and such testimony would be admissible even though tests were made three years after accident. *Bohach v Thompson (Minn)* 239 NW2d 764.

In action by driver of Jeep against its manufacturer to recover for injuries sustained in accident as to which there were no witnesses and of which plaintiff had no memory, having been found unconscious by side of road near overturned Jeep, trial court did not abuse its discretion in permitting plaintiff's accident reconstruction expert to testify that plaintiff's Jeep began to roll while vehicle was traveling at speed of 25-30 mph, that rollover occurred while Jeep was still on road, and that rollover was result of Jeep's defective design, where witness had carefully examined accident scene and physical evidence still there, where he had spoken with persons present at scene when accident was discovered who pointed out location where plaintiff was found and spot where Jeep came to rest, and also described tire marks left by Jeep on roadway as it swerved out of control, where witness examined appraiser's damage report and photographs taken of vehicle after accident, where he also spoke with subsequent owner of Jeep, who had repaired it, and where, finally, witness was familiar with handling and rollover characteristics of Jeep, based on his review of highway accident statistics, his study of other Jeep accidents, and his observation of numerous rollover tests involving Jeep. *Jeep Corp. v Murray (1985, Nev)* 708 P2d 297, *CCH Prod Liab Rep P 10751*.

Testimony as to speed of vehicles involved and point of impact, provided by expert witness who testified as to results of his experiments, his personal knowledge of handling characteristics of vehicles similar to one of vehicles involved in accident, and his observation of photographs of accident scene and of vehicles involved, had proper foundation where a police officer also testified as to measurements he had taken on scene, including length of skid marks. *Tobeck v United Nuclear-Homestake Partners (App)* 85 NM 431, 512 P2d 1267.

Opinion of expert as to speed of motor vehicle just prior to collision, based not only upon tire marks, but also upon expert's own analysis of scene as shown by photographs, was admissible. *Batt v State, 28 Utah 2d 417, 503 P2d 855*.

[\*5b] Opinion as to speed held inadmissible

The following cases hold that a witness who does not qualify as an expert may not give opinion testimony as to the speed of a motor vehicle, based on skid marks and other physical facts.

In an action for injuries sustained in a collision between the plaintiff's motorcycle and the defendant's automobile, the court in *Nelson v Hedin (1918)* 184 Iowa 657, 169 NW 37, held that a witness who did not see the defendant's car in motion, but observed the marks made in the street by the skidding of the wheels, was not competent to testify as to the rate of speed the car must have been moving at the time. In affirming a judgment for the defendant, the court said that it would be proper for the witness to prove the skid marks, if any, their appearance, length, and other circumstances relating thereto, and the jury could draw all legitimate inferences therefrom as well and as correctly as the witness.

In an action for damages for injuries sustained by a pedestrian when struck by the defendant's automobile, the court in *Ward v Zerzanek (1940)* 227 Iowa 918, 289 NW 443, in upholding the defendant's motion for a directed verdict, held that it was proper to exclude the plaintiff's testimony as to the speed of the defendant's car at the time of the accident, based solely on his observation of skid marks. The court said that although a witness may describe the marks, the inference to be drawn from them is solely within the province of the jury.

In an action for wrongful death of a pedestrian who was allegedly struck by the defendant's motorcar, the court in *Wisniewski v Weinstock (1943)* 130 NJL 58, 31 A2d 401, affd 135 NJL 202, 50 A2d 894, in affirming a judgment for the defendant, held that the trial court had not abused its discretion in excluding a truckdriver's testimony as to the speed of the defendant's automobile, based on an examination of the length of the skid mark made by the vehicle. In support of

its decision, the court, after pointing out that the witness had been a truck chauffeur for 15 years, said that that fact, standing alone, did not qualify him to express an expert opinion concerning the speed of the car, which he had not seen in motion, on the basis of the skid marks that he related to the car. Moreover, the court said, a sufficient foundation had not been laid to qualify him.

In *Everart v Fischer (1914) 75 Or 316, 145 P 33*, different result reached on reh *75 Or 321, 147 P 189*, the court, on rehearing, held that it was error to admit a woman's opinion testimony as to the speed of a motor vehicle based only on skid marks. The court pointed out that skid marks alone are not enough on which to base expert opinion, and that since the condition of the road, the tires, the brakes, the weather, and the weight of the car were all important factors that had not been presented in evidence, the witness' opinion testimony should have been excluded.

In an action to recover damages for personal injuries sustained by a pedestrian who was struck by the defendant's automobile, the court in *Cleasby v Taylor (1934) 176 Wash 251, 28 P2d 795*, in reversing a judgment for the plaintiff, held that it was error to admit the testimony of two witnesses concerning the speed of the defendant's automobile, based on skid marks. The witnesses were shown the skid marks made in the road about a week or 10 days after the accident. The court pointed out that neither of the witnesses had seen the defendant's car in motion, and therefore their conclusion or opinion was mere speculation or guess.

<>

There being no evidence as to how or where witness became expert in stopping distances of motorcycles, and no evidence that witness had personal knowledge of scientific processes or formulas underlying tables he proposed to use to determine stopping distance and length of skidmarks of vehicle traveling at specified speed, his opinion was correctly excluded. *Flick v James Monfredo, Inc. (DC Pa) 356 F Supp 1143*, affd without op (CA3 Pa) *487 F2d 1394*.

In personal injury action arising out of two-car collision, trial court did not abuse its discretion in granting new trial on grounds of error in admitting opinion of defendant's accident-reconstruction expert as to speed of plaintiff's automobile, where many factual assumptions made by expert in arriving at opinion, including "average acceleration," "average turning radius," expert's own estimation of lengths of deviated skid marks, and, without explanation, certain coefficient of friction of tires on pavement, lacked sufficient evidentiary support. *Richard v Scott (1978) 79 Cal App 3d 57, 144 Cal Rptr 672*.

Since hypothetical question presented to expert witness lacked sufficient predicate, objection to expert's opinion on speed of vehicles involved in accident, opinion being based on skid marks, should have been sustained. *Nat Harrison Associates, Inc. v Byrd (Fla App) 256 So 2d 50*.

Trial court properly excluded proffered testimony of plaintiff's accident reconstruction expert in action arising from fatal collision of truck and automobile, where expert's opinion testimony as to speed was inadmissible because eyewitness testimony as to speed was available. *Colonial Trust & Sav. Bank v Kasmar (1989, 3d Dist) 190 Ill App 3d 967, 138 Ill Dec 57, 546 NE2d 1112*, app den (Ill) *142 Ill Dec 880, 553 NE2d 394*.

Nonexpert opinion as to speed of motor vehicle based on skid marks was not admissible. *Suchy v Moore, 29 Ohio St 2d 99, 58 Ohio Ops 2d 194, 279 NE2d 878*.

Where accident reconstruction expert in action for personal injuries sustained in motorcycle-jeep collision was told to assume, inter alia, that there was skid mark on left rear wheel of jeep eight feet from right-hand side of usable part of road and that skid mark was twelve feet long, and expert testified that by looking at damage to vehicles and by determination of speed and other factors witness concluded that right fork of motorcycle struck jeep first and that motorcycle was traveling in its correct lane and jeep was over center line in motorcycle's lane, court was entitled to

conclude that witness' estimate of speed of vehicles on which his evidence on their point of impact depended lacked reliable factual foundation and was speculative and properly excluded evidence since witness determined speed of vehicles in large part from its examination of damage to motorcycle and description of damage to jeep and did not conduct test to determine energy consumed from damage done. *Kingsbury v Hickey* (1982) 56 Or App 492, 642 P2d 339, petition den 293 Or 146, 651 P2d 143.

In action for injuries sustained by minor pedestrian while crossing street to board school bus, court erred in permitting father of minor, who did not witness accident, to testify as to his opinion of speed of vehicle which struck minor pedestrian based upon skid marks and tests he performed since mere fact that father had driven vehicle in excess of 25 years did not support finding that the was expert on skid marks and estimate of speeds therefrom. *Alves v Jones* (1978, Tenn App) 577 SW2d 204.

Expert opinion testimony regarding defendant's speed was properly excluded where witness refused to give more specific opinion in absence of evidence as to length of skid marks. *Crowe v Prinzing*, 77 Wash 2d 895, 468 P2d 450.

## FOOTNOTES

n1 Earlier annotations at 156 ALR 382 and 23 A.L.R.2d 112 need no longer be consulted on the point annotated.

n2 The term "skid marks," as used in this annotation, includes all kinds of tire marks or marks made by the skidding of the vehicle in question.

n3 Rarely is a witness asked to give his opinion as to the speed of a motor vehicle based solely on skid marks. In most cases skid marks are merely one factor that is considered with other factors such as the size and weight of the vehicles, the extent of damage to the vehicles, the position of the vehicle after impact, and the nature and condition of the highway where the accident occurred. Cases involving the admissibility of opinion as to speed based on these factors are included herein only if skid marks were also considered.

n4 See 70 ALR 540; 94 ALR 1190; 156 ALR 382.

n5 See 93 A.L.R.2d 287.

Automobiles: Speeding prosecution based on observation from aircraft

A. M. Vann.

*27 A.L.R.3d 1446*

#### JURISDICTIONAL TABLE OF STATUTES AND CASES

#### TABLE OF REFERENCES

#### ARTICLE OUTLINE

#### **ARTICLE:** [\*1] Generally

Diligent search revealed only two reported cases involving prosecution for speeding based on observation from an aircraft. However, because the practice of highway speed detection by means of surveillance from the air was initiated in the United States more than a decade ago,<sup>n1</sup> and has apparently been growing since, it seems quite certain that such litigation will be met with increasing frequency.

Legal issues occurring in other speeding prosecutions may, of course, occur in air observation cases as well. But it would appear that the particular fact of observation from an aircraft may create questions special to the subject matter of this annotation, ranging from due process considerations to technical issues as to the means employed.<sup>n2</sup>

The procedure for determining speed was apparently the same in both reported cases, and in neither case was any question raised as to the reliability or accuracy of the means employed, the only mechanical device involved, aside from the aircraft itself, which merely afforded a vantage for observation, being a stopwatch,<sup>n3</sup> used for timing the passage of the ground vehicle over a measured distance marked by painted lines on the highway.<sup>n4</sup>

One case raised an issue as to whether a posted sign warning of the imminence of a speed-timing arrangement<sup>n5</sup> was sufficient to comply with a statute. In the other, consideration was given to the legality of the defendant's arrest on the basis of information transmitted to the arresting officer by observers in the sky.

In *State v Cook* (1965) 194 Kan 495, 399 P2d 835, an appeal by the state from an order discharging the defendant on the ground that his arrest for speeding was illegal, the arrest having been effected by an officer on the ground on the basis of information radioed to him by two officers in an airplane, who checked the speed of the defendant's automobile by means of a stopwatch against previously established highway markings, and followed the automobile, keeping it in sight until they observed the stopping of it by the arresting officer stationed 3 1/2 miles distant, it was the defendant's position that no offense had been committed in the officers' presence, and further, that any arrest which resulted from the filing of the information was void because the arresting officer had verified the information without having personal

knowledge of the facts alleged. The court, however, saying that a crime is committed in the presence of an officer when facts and circumstances occurring within his observation, in connection with what may be considered as common knowledge, give him probable cause to believe or reasonable grounds to suspect that such is the case, and that for the purpose of determining the justification of an arrest effected by one member of a three-officer team from information conveyed to him by the others, the knowledge of one was the knowledge of all, held in sustaining the appeal, that the defendant was deemed to have committed the offense of speeding in the presence of the arresting officer and that the arrest was legal.

In *State v Peters* (1965) 9 oapp2d 343, 224 NE2d 916, it was contended by the defendant that the testimony of police officers who had clocked the defendant's automobile for a measured distance of one-quarter mile, using a stopwatch in an airplane, was improperly admitted in that the procedure employed by the officers failed to comply with a statute requiring the posting of a warning sign not less than 750 feet nor more than 1,500 feet in advance of any mechanical or electrical timing device or any component part of such device for the determination of the speed of a motor vehicle over a measured distance of a highway, the warning sign in this instance having been located 1,056 feet in advance of the first line painted on the highway but more than 1,500 feet from the stopwatch in the plane at the time when the defendant's vehicle traversed the second line. The court, however, finding that the purpose of the statute was to apprise the unwary motorist of his entry into a zone where speed was to be determined by radar or some other mechanical or electrical timing device, interpreted the provision as requiring the warning to be within the given distance of any one rather than every component part of the device, and held that, the procedure followed by the officers having been consistent with the statute's directive, their testimony was admissible, and the court affirmed a judgment of conviction.

Possession or operation of device for detecting or avoiding traffic radar as criminal offense, 17 A.L.R.4th 1334

Proof, by radar or other mechanical or electronic devices, of violation of speed regulations, 47 A.L.R.3d 822

Admissibility of experimental evidence, skidding tests, or the like, relating to speed or control of motor vehicle, 78 A.L.R.2d 218

Admissibility in evidence, in civil action, of tachograph or similar paper or tape recording of speed of motor vehicle, railroad locomotive, or the like, 73 A.L.R.2d 1025

Proof, by means of radar or photographic devices, of violation of speed regulations, 49 A.L.R.2d 469

Presumption and burden of proof of accuracy of scientific and mechanical instruments for measuring speed, temperature, time, and the like, 21 A.L.R.2d 1200

Expert or opinion testimony as to speed of vehicle by one who had no view, or only momentary view, of vehicle at time of accident, 156 A.L.R. 382

Evaluation of the measurement of motor vehicle ground speed from aircraft. 52 J Crim L, C & PS 213 (1961)

Speed traps and the use of airplanes. 14 *Hastings LJ* 427

<>

In prosecution for speeding, municipal court erred in dismissing speeding charge against motorist whose speed had been measured by highway patrol officer from airplane, on basis of findings that the evidence had been obtained by means of "speed trap," where officer had verified speed by use of measured markers placed on highway by state transportation department, and had paced motorist with airplane to determine speed; motorist's speed was not calculated by use of any

"particular section" of highway or by computing time it took vehicle to travel a "known distance" and method used therefore did not constitute a speed trap as defined in statute. *People v Darby* (1979, 4th Dist) 95 Cal App 3d 707, 157 Cal Rptr 330.

Evidence of speed at which defendant charged with speeding violation was clocked with stopwatches by two police officers engaged in air traffic control was admissible where both watches tested properly two weeks after arrest and had been calibrated for accuracy six weeks before defendant's arrest; evidence was sufficient to convict defendant of speeding violation where state presented evidence of training and experience of two officers who used stopwatches in airplane over speed zone, and there was sufficient evidence of accuracy of stopwatches to create issue of fact for jury, notwithstanding defendant's testimony that she did not exceed speed limit. *People v Wilson* (1981) 97 Ill App 3d 505, 53 Ill Dec 80, 423 NE2d 272.

Trial court properly admitted evidence regarding distance measurement and speed where officer was monitoring traffic from aircraft, using stop watch to time motor vehicles as they passed through series of five hash marks painted on highway; although officer did not take measurements of hash mark zones until three months after citation was issued to defendant, witnesses testified that marks had not been moved or changed in interim, and tape measure was obtained from Department of Transportation, whose employees originally measured zones and painted hash marks on highway. *State v Frandsen* (1986, Minn App) 391 NW2d 59.

Evidence in speeding prosecution was sufficient to establish speed of defendant's vehicle as clocked by police officer using stop watch in airplane where officer had been trained and certified for clocking ground vehicles from aircraft, stop watch was tested one month prior to and one day after speeding violation and was found to be accurate and was tested on machine which was accepted method for determining accuracy of watches; although officer in aircraft was traveling at altitude of 1,800 feet at time he observed defendant's automobile, offense was committed in presence of that officer on ground who stopped vehicle at direction of officer in airplane. *State v Chambers* (1980) 207 Neb 611, 299 NW2d 780.

Truck driver was properly convicted of speeding, where officer testified that he observed truck from aircraft, activated stopwatch as vehicle crossed calibration line on pavement, stopped watch at second line, and calculated speed from time and known distance. *Commonwealth v Baslick* (1989) 389 Pa Super 413, 567 A2d 671.

## FOOTNOTES

n1 State police in Indiana began using air observation as a means of detecting speeding highway vehicles in April, 1956, as reported in 52 J Crim L, C & PS 213 (1961).

n2 While noting that of over 3,000 arrests effected over a 1-year period in Indiana as a result of the air observation method of detecting highway speeders, convictions averaged more than 99 percent, the author of the article in 52 J Crim L, C & PS 213 (1961), observes in a footnote that acquittals in some cases were based on the courts' uncertainty as to the element of error inherent in the method.

n3 As early as 1906, the stopwatch was given some judicial recognition as a reliable device for measuring a time interval. See the English case of *Plancq v Marks* (1906, Eng) 94 LT 577, 22 Times L 432 (Div Ct), in which a police officer's testimony as to the time in which the defendant's car traversed a measured distance, as registered on the officer's stopwatch, was found by the court to be evidence of fact rather than of opinion and sufficient to support the conclusion that the defendant was speeding, under a statute which provided that no one should be convicted of speeding merely upon the opinion of one witness as to the rate of speed.

n4 For a description of experiments designed to test the accuracy of ground speed determinations made

from the air in such manner, see the article in 52 J Crim L, C & PS 213 (1961).

n5 A discussion of the question whether such arrangement for the detection of speed of motor vehicles by means of air observation constitutes a "speedtrap" within the meaning of a California statute prohibiting the use of a speedtrap to obtain evidence as to the speed of any vehicle for the purpose of an arrest or prosecution under the California Vehicle Code is found in *14 Hastings LJ 427*.

**ARTICLE:** [\*I] Introduction

[\*1] Prefatory matters

[\*1a] Scope

The present annotation<sup>1</sup> discusses cases<sup>2</sup> dealing with the question whether or under what circumstances a person accused of crime in a state court<sup>3</sup> is entitled to inspection or disclosure of evidence in the possession or under the control of the prosecution.

The term "evidence" as used herein refers to any statements, documents, papers, records, books, articles, or tangible objects, except for grand jury minutes, whether or not such items are admissible in evidence at the trial. Cases dealing with the accused's right to disclosure of the identity of an informant<sup>4</sup> or other nonevidentiary information relevant to the case<sup>5</sup> are not within the scope of the present discussion. Also beyond the scope of the annotation are cases dealing with the accused's right to examine a witness and take a deposition,<sup>6</sup> or his right to have the complaining witness examined by medical experts,<sup>7</sup> or his right to visit the scene of the alleged crime.<sup>8</sup>

The annotation includes all cases dealing with the production of evidence which appeared or was shown to be in the possession of the prosecuting attorney or his representatives or other law enforcement officers subject to his control. Also referred to herein are a number of cases wherein an accused requested the production of evidence allegedly, but not actually, in the possession of the prosecution and the court considered questions as to the accused's burden of showing that the evidence sought by him was actually in the possession of the prosecution. On the other hand, clearly beyond the scope of the annotation are cases dealing with the accused's right to production of private memoranda, documents, or books in the possession of an ordinary or expert prosecution witness or any other third party,<sup>9</sup> and

cases dealing with the accused's right to disclosure of documents or other evidence in the possession of a federal law enforcement agency but not released to the prosecution.n10

The annotation discusses the accused's right to inspection or disclosure of evidence at any stage of a criminal prosecution. It should be noted, however, that since the discussion is limited to the right of the defense, as distinguished from the right of a particular defense witness as such, to inspect evidence, the treatment herein does not purport to include cases dealing with the distinct question whether before a writing is to be used by the prosecution at trial in its cross-examination of a defense witness (including the defendant as a witness) such writing must be shown to the witness for his inspection.n11

The discussion here covers all questions relating to the accused's right to inspection or disclosure of evidence, except those relating to the defendant's right to inspection of a statement of a prosecution witness for purposes of cross-examination or impeachment.n12 Beyond the scope of the present discussion are such distinct questions as whether an accused has the right to have returned evidence illegally seized by the prosecution, whether a trial court's error in denying an inspection or disclosure of evidence is ground for the reversal of a judgment of conviction because it is prejudicial to the defendant, and what is the proper writ to compel or to prevent an inspection or disclosure of evidence in the possession of the prosecution.n13

[\*2] Background and comment

[\*2a] Summary

Traditionally, a person accused of crime has been held not, as a matter of right, entitled to inspection or disclosure of evidence in the possession of the prosecution.<sup>n15</sup> In a number of recent cases, however, this general rule has been relaxed.<sup>n16</sup> And, moreover, practically all the cases recognize that a trial court has the discretionary power to permit inspection of evidence in the possession of the prosecution,<sup>n17</sup> at least where the requested evidence is relevant and material to the case<sup>n18</sup> or is admissible in evidence<sup>n19</sup> or is favorable to the accused,<sup>n20</sup> or where inspection of the requested evidence by the accused is necessary to avoid delay in trial or to protect his basic constitutional rights or disclosure thereof is otherwise necessary for a fair trial or in the interest of justice.<sup>n21</sup> While the refusal to permit an accused to inspect evidence in the possession of the prosecution does not ordinarily violate his constitutional right to due process of law,<sup>n22</sup> it is well established that suppression by the prosecution of material evidence exculpatory of the accused is a violation of due process, irrespective of the good or bad faith of the prosecution.<sup>n23</sup>

While the issue whether in a *proper* case an accused may be permitted to inspect evidence in the possession of the prosecution has generally been resolved by the courts in favor of the accused, the question still remains largely unsettled as to when a "proper" case is presented. A review of the decisions, particularly in the light of the kind or type of evidence involved, reveals that in determining whether an inspection or disclosure should be allowed in a particular case, the attitude taken by the court as to the limit of discovery to be allowed to an accused has been as important a factor as the necessity of the accused for the requested inspection or disclosure, and that, although dealing with more or less analogous factual situations, the courts have frequently reached different conclusions.<sup>n24</sup> The only generalizations that may be made as to the trend of the decisions in relation to the discovery and inspection of different kinds or types of evidence are that most courts are reluctant to permit an accused to inspect statements made by other persons<sup>n25</sup> or reports made by police or investigating officers in connection with the case,<sup>n26</sup> although many courts have shown some liberality as to the discovery of written materials or tangible objects which were used or otherwise directly involved in the commission of the charged offense.<sup>n27</sup> As to the producibility of the so-called "work product" of the prosecuting attorney, although all the cases agree that such work product is not subject to inspection by the defense, they are not altogether clear as to what constitutes the "work product" of the prosecution.<sup>n28</sup>

Where there is a statute or rule of criminal procedure expressly providing for discovery of the prosecution's evidence, the accused's right to discovery is of course governed by such statute or rule at least as to matters provided therein.<sup>n29</sup> As to whether such a statute or rule of criminal procedure excludes the right to inspection or disclosure of matters not expressly provided for therein, the views are divided. The view prevailing in Arizona<sup>n30</sup> and Maryland<sup>n31</sup> is that the accused's right to discovery of the prosecution's evidence is not limited to matters provided for in its rules of criminal procedure, but that he may be allowed to inspect matters not provided therein under the inherent power of the trial court, while the view adopted by the Delaware courts<sup>n32</sup> is that the accused's right to inspection of the prosecution's evidence

is limited to matters which are discoverable under the relevant rule of criminal procedure. The civil statute or the code of civil procedure providing for discovery and inspection of evidence in the possession of an adverse party has generally been held not applicable to criminal cases,<sup>n33</sup> although a contrary conclusion has been reached in a few cases.<sup>n34</sup>

In order to be allowed an inspection or disclosure of evidence in possession of the prosecution, ordinarily<sup>n35</sup> the accused must properly assert and pursue his right to such evidence by making a timely request for production thereof<sup>n36</sup> in the proper court<sup>n37</sup> and by taking other necessary steps as required under the circumstances.<sup>n38</sup> It is his burden to show facts justifying inspection or sufficient reason why inspection should be allowed.<sup>n39</sup> The production of the prosecution's evidence is not allowed to the accused for merely exploratory purposes or for the purpose of prying into the prosecution's preparation for trial.<sup>n40</sup>

The rules governing the accused's right to inspection or disclosure of evidence seem to be generally the same regardless of at what stage of a criminal prosecution the inspection or disclosure is requested.<sup>n41</sup> In some cases, however, the fact that the accused's request for inspection was made during the trial while the evidence in question was in court has been given particular consideration in granting an inspection.<sup>n42</sup> And it is well established that the accused is entitled to inspection of a writing or an object in the possession of the prosecution when such item is offered in evidence at the trial of the case.<sup>n43</sup> On the other hand, the decisions are not altogether clear as to whether and under what circumstances the accused is entitled to inspection of a writing in the possession of the prosecution where the writing itself is not offered in evidence but a witness has testified to its contents or in relation thereto, or where the writing is marked for identification in court, but not offered in evidence, or where the writing is used by the prosecuting attorney during the trial in his examination of the accused or a witness.<sup>n44</sup>

[\*2b] Practice pointers

While the case law at the present time (1966) would support the statement that in criminal cases the accused has, if any, only a very limited right to discovery, there appears to be a definite trend toward a more liberal rule, as the result of court decisions in some states like California, and the enactment of discovery statutes or rules in other jurisdictions. One may hazard a guess that, other things being equal, this trend toward liberality will continue, primarily as a result of the "bleeding over" into the criminal area of the attitudes which have developed in connection with the liberal civil discovery rules now adopted in many jurisdictions.<sup>n45</sup> Accordingly, defense attorneys feeling the desire or need for discovery should not be too discouraged by the existing state of the case law nor should a prosecutor rely too heavily on the "established" rules, since a false and dangerous sense of security may result.

Defense counsel seeking to establish or expand the right of the accused to discovery will want to argue in concepts of fundamental fairness: that the aim of the trial is full disclosure of the truth, not merely a conviction, that the state, with all its resources, is in a much better position than the accused to investigate and present its case, especially if the accused is made to "fight in the dark,"<sup>n46</sup> and that a prosecutor who has properly done his duty has nothing to fear from full disclosure, since he, as well as the defense attorney, should be as interested in acquitting the innocent as in convicting the guilty. It may also be argued that the arguments against full disclosure are demonstrably mere bugaboos as shown by the fact that the adversary system has not only survived but flourished in the civil area notwithstanding the widespread development of discovery procedures there.

The prosecutor seeking to sustain the established restrictive discovery rules, on the other hand, should argue that it would be unfair to require disclosure by the prosecution, in view of the fact that the accused is protected against similar disclosure by the privilege against self-incrimination and also that to force disclosure of the prosecution's case in advance of trial would enable the accused to suborn or intimidate witnesses or otherwise fake or destroy essential evidence to meet the prosecution's case. And it may also be argued that prosecutors, if faced with the duty to make full disclosure, may forgo prosecution in many cases in order to avoid tipping the hand of the police or enforcement agencies in the continuing war against organized crime, since many prosecutions represent merely a skirmish in this campaign.<sup>n47</sup>

Where discovery is sought, the defense counsel will have a much better chance of success in most jurisdictions if he can present or argue his motion in such terms as to show that the matter as to which discovery is sought is closely involved in the crime, that it would in fact be difficult or impossible to prepare a defense without the information in question, and that it is not otherwise available to accused and is available to or in the possession of the prosecution. The more definite the motion in identifying the matter sought, the more likely it is to be successful, since there is an observable tendency to dispose of indefinite requests, no matter how meritorious otherwise, with the pejorative "fishing expedition." Clearly, the courts are more likely to entertain a motion for discovery if it is shown that the information or evidence sought is relevant to the charge and would be admissible in evidence for or against the accused. The best case of all for discovery is made where it appears that the prosecution is withholding matter that would be exculpatory of the accused.

The prosecutor, desiring to resist discovery will, where such a course is otherwise proper, try to present the contentions that the information sought is not relevant or essential to the defense, that its disclosure would unfairly hamper the prosecution in this or other cases, and that it is or was available to the accused if proper diligence had been exercised. Assuming a liberal attitude on the part of the court toward discovery, the best course for the prosecution would appear to be to identify the information sought as its "work product" rather than as "evidence."

Aside from attempts to obtain information as to the prosecution's case and evidence by a motion for discovery, defense counsel should not ignore more traditional methods of compelling disclosure. It may be that a motion attacking the indictment or information, or seeking a bill of particulars, may effectively bring out the information the accused desires. Similarly, the possibilities of obtaining information from the grand jury proceedings or from the report of the preliminary hearing should not be ignored. And a pretrial conference, properly conducted, may also afford opportunities for obtaining information.<sup>n48</sup>

◇

Mandamus did not lie to obtain production of report prepared by narcotics officers, for purpose of use in cross-examination of such officer at preliminary hearing, on grounds that object of preliminary hearing would be defeated if defendants aggrieved by adverse rulings of justices of peace were allowed to look to superior court for supervision over such rulings prior to final determination of hearing. *State ex rel. Corbin v Superior Court of Maricopa County*, 100 Ariz 104, 412 P2d 45.

Chain-of-custody problems proofing continuous possession of "known print" allegedly taken from defendant and marked with his name need not be disclosed by prosecution to defense prior to trial, and defendant suffered no prejudice when prosecutor surprised defense at trial by moving for production of a new set of defendant's fingerprints in effort to overcome failure to establish chain of custody for original prints. *People v Davis (1982) 106 Ill App 3d 260, 62 Ill Dec 40, 435 NE2d 838*.

[\*II] In general

[\*3] Rule that ordinarily accused has no right to inspection or disclosure

The following cases support, either explicitly or by necessary implication, the general rule that in the absence of a statute or court rule to the contrary, a person accused of crime is not, as a matter of right, entitled to inspection or disclosure of evidence in the possession of the prosecution.<sup>n49</sup>

*State v Herman* (1935) 219 Wis 267, 262 NW 718, infra

Thus, in *Edens v State* (1963) 235 Ark 996, 363 SW2d 923, wherein it appeared that the accused filed a pretrial motion for a bill of particulars asking for such matters as copies of any instruments to be used in evidence by the prosecution, any statements taken by the prosecution from its witnesses, and other similar information, the court, noting that the motion, although denominated a motion for a bill of particulars, was actually a request for discovery, held that the motion was properly denied. The court noted that the Arkansas discovery statute did not apply to criminal cases.

Following the rule that in the absence of statute a defendant in a criminal case has no right of inspection prior to the time an exhibit is actually offered in evidence at the trial, the court in *Walker v People* (1952) 126 Colo 135, 248 P2d 287, upheld the refusal to grant an order for the production of evidence in the possession of the prosecution, including blood and other stains, hair, fibers, and similar materials, found in the course of the investigation of the homicide, and upon which the defendant had hoped to conduct chemical experiments.

Noting that in criminal cases the right of examination and inspection of the prosecution's evidence by a defendant is nonexistent unless required by statute, and that in Colorado there was neither a statute nor a precedent authorizing the defendant's counsel to make an examination or inspection of the prosecution's evidence prior to the time it was offered at the trial, the court in *Mendelsohn v People* (1960) 143 Colo 397, 353 P2d 587, involving a prosecution for burning to defraud an insurer, held that there was no error in denying the defendant's pretrial motion for an order requiring the prosecution to return to him his business records which had previously been surrendered to the district attorney.

In *Padgett v State* (1912) 64 Fla 389, 59 So 946, it was held that the trial court did not abuse its discretion in denying the defendant's motion for an order requiring the prosecution to produce all articles in the possession of the prosecution intended to be adduced in evidence against the defendant, the court apparently taking the view that the defendant was not, as a matter of right, entitled to such production.

The denial of the defendant's petition, filed prior to the trial of the case, for production of certain documents and articles in the possession of the prosecuting attorney was upheld in *Walker v State* (1959) 215 Ga 128, 109 SE2d 748, 927, the court noting that there was no law in Georgia that gave to the defendant in a criminal case the right to inspect the file of the prosecuting attorney before it was put on trial.

To the same effect is *Blevins v State* (1965) 220 Ga 720, 141 SE2d 426, wherein the court, noting that there was no statute or rule of procedure in Georgia requiring a solicitor general or other prosecuting officer to make his evidence,

documentary or otherwise, available to the accused or his counsel before trial, upheld the denial of the defendant's pretrial petition for an order granting defendant and his attorney the right to inspect (1) every written statement made by any witness, (2) written reports or statements in the possession of the solicitor general which were prepared by employees of a state crime investigation agency, and (3) clothing and any other object removed from the body of the victim of the alleged murder.

In *Wendling v Commonwealth* (1911) 143 Ky 587, 137 SW 205, the court, in holding that it was not error for the trial court to refuse to require the prosecution to produce before the trial, for inspection by the defendant, clothing and other articles which were subsequently introduced as evidence by the prosecution, said that it knew of no practice that made it incumbent upon the Commonwealth to submit before the trial for the inspection and examination of the accused or his counsel articles in the possession of the Commonwealth that it proposed to introduce as incriminating evidence against him, although both the accused and his counsel should have full and free opportunity to examine them when offered as evidence.

In *Kinder v Commonwealth* (1955, Ky) 279 SW2d 782, the court, following the rule that neither the accused nor his counsel is entitled to inspect and examine, before the trial, articles or evidence in the possession of the prosecution, upheld an order denying the defendant's pretrial motion to compel the prosecution to produce, for inspection by the defendant, the following items: (1) a copy of the FBI ballistic laboratory report; (2) the results of paraffin tests taken of the defendant and codefendants; (3) a copy of any signed statement or confession which the prosecution intended to introduce as evidence; (4) the gun and pellets the prosecution intended to introduce in evidence; and (5) the pellets that had been introduced in the trial of a co-defendant.

Noting that an accused is not entitled, prior to trial, to have the prosecution furnish him with the evidence upon which it intends to rely for his conviction, including evidence that has been reduced to writing by the prosecuting attorney for the latter's convenience, the court in *State v Williams* (1947) 211 La 782, 30 So 2d 834, rejected the defendant's contention that it was error for the trial court to deny his request for production of certain documents in the possession of the district attorney.

In *Commonwealth v Jordan* (1911) 207 Mass 259, 93 NE 809, affd 225 US 167, 56 L ed 1038, 32 S Ct 651, the court, upholding the denial of the defendant's pretrial motion for an order requiring the prosecuting attorney to furnish him with a copy of the report concerning the autopsy performed on the body of the homicide victim, a copy of an alleged confession made by the defendant, and all weapons and other exhibits and things in possession of the prosecuting attorney, pointed out that the motion was not in any sense a motion for a bill of particulars, but was rather an attempt to compel the prosecution to disclose in part at least the evidence on which it relied; that so far as any information in the possession of the prosecution was necessary to enable the defendant to understand the nature of the crime with which he was charged and to prepare his defense, he was entitled to have it furnished to him in the form of a bill of particulars, upon a proper motion to that effect; that there was no rule of law which required the prosecution to comply with such production or which gave a defendant the right to ask it; that whether to grant or refuse the motion was within the discretion of the trial court; and that even if it was assumed in favor of the defendant, without so deciding, that the court had power to revise the action of the trial court, there was no showing which should lead it to do so.

Noting that there is no general right of discovery by statute or rule in Missouri in criminal cases, and indicating that evidence in the possession of the prosecution should not be produced for inspection by the defense unless there is a satisfactory showing that the requested evidence is of such nature that without it the defendant's trial would be fundamentally unfair, the court in *State v Spica* (1965, Mo) 389 SW2d 35, upheld the denial of the defendant's pretrial motion for inspection of (1) tape recordings of his conversations with the widow of the victim of the alleged murder, (2) motion pictures taken at the time they were engaged in the conversations, and (3) a written statement made by the widow to the police. As to the tape recordings and motion pictures, the court said that the defendant was not entitled to examine them in advance of trial in the absence of a showing that their production was necessary to make the trial fundamentally fair. As to the statement of the widow to the police, the court pointed out that this document was not used

in the trial of the defendant either as evidence or to refresh the recollection of any witness, and that there was no showing that it was favorable to the defendant.

In *State ex rel. Keast v District Court of Fourth Judicial Dist.* (1959) 135 Mont 545, 342 P2d 1071, a prohibition proceeding to prevent the respondent judge from granting an order requiring the prosecuting attorney to produce, for inspection by the defendant, certain written material and tangible objects (including rifles, shells, bullets, clothing, and parts of a human body) taken by or on the order of the prosecuting attorney from the defendant's home in connection with the prosecution of the crime charged against him, the court rejected the contentions, made in support of the order of the respondent judge, that the judge had jurisdiction to order inspection of written material in a criminal case by virtue of the provision in the code of civil procedure relating to inspection of writings, and that as to tangible objects, the judge had inherent power, in his discretion, to order them produced for inspection. Noting that under the common law there was no right to have inspection of evidence in the hands of the prosecution, and that in Montana there was no constitutional provision or specific statute authorizing such inspection, the court held (1) that, assuming that the provision for civil discovery was applicable to criminal cases, the defendant in the present case was not entitled, under that provision, to inspection of written materials as ordered by the respondent judge, because, in order to allow inspection under the statute, the papers sought to be inspected must be admissible in evidence, and there was no showing as to what the written material sought to be inspected consisted of or whether it was relevant to the defense; and (2) that whether or not the respondent judge had inherent power to compel production of the articles in question for the defendant's inspection need not be decided, since the defendant did not show proper cause to move the respondent judge to exercise any discretion which he might have had. The court observed that even under the view that a trial judge has inherent power to require inspection, the right to inspection is not absolute, but is in the discretion of the judge, and that the device of inspection could not be used by the defense to go on a "fishing expedition" in hope that something would turn up to aid the defense. The most that could be said of the defendant's sweeping motion in the present case, the court said, was that it was an attempt to go on a tour of investigation in hope of finding something that would aid him, without showing anything as to how inspection might aid in producing evidence relevant to the defense.

In *Cramer v State* (1944) 145 Neb 88, 15 NW2d 323, the court, in upholding the denial of the defendant's application to inspect "the purported confession and other statements and documents" in the possession of the prosecution, held that the defense counsel in a criminal prosecution has no right to inspect or compel the production of evidence in the possession of the prosecution unless a valid reason exists for so doing; that the defendant has no inherent right to invoke such means of examining the prosecution's evidence merely in the hope that something may be uncovered which would aid his defense; and that in the administration of these rules the trial court has a broad judicial discretion and it is only when such discretion is abused that error can be based thereon.

In *State v Hahn* (1937, CP) 10 Ohio Ops 29, 25 Ohio L Abs 449, affd 59 Ohio App 178, 11 Ohio Ops 560, 27 Ohio L Abs 27, 17 NE2d 392, app dismd 133 Ohio St 440, 11 Ohio Ops 106, 14 NE2d 354, app dismd 305 US 557, 83 L ed 351, 59 S Ct 75, wherein the defendant filed a pretrial motion to compel the prosecuting attorney to exhibit to the defendant, for his inspection, all documents in the possession of the prosecution which were expected to be offered in evidence at the trial, and, on his motion for a new trial after the jury returned a verdict finding him guilty, contended that it was error to have admitted various documents in evidence without giving him the opportunity to inspect them, the court, in rejecting the defendant's contention, noted that the trial court had no authority to make an order granting the defendant the right to inspect any document in the hands of the prosecuting attorney until it was admitted as evidence in the trial, and that the Ohio Code of Civil Procedure providing for the right to inspect any document in the possession of the adverse party was not applicable to criminal cases.

In *Application of Killion* (1959, Okla Crim) 338 P2d 168, the court, denying the defendant's motion for permission to inspect a tape-recorded conversation had by him with the county attorney, noted that in the absence of statutory authority, the defendant in a criminal case has no absolute right to pretrial inspection or to compel the prosecution to produce documents and reports that may be beneficial to him, nor does he have an inherent right to examination of the prosecution's evidence merely in the hope that something may turn up which would aid his defense or supply clues for

gathering evidence; and that unless the requested documents are evidence themselves, "as in cases of forgery, threatening letters, etc., which are the very essence of the case," they should not ordinarily be required for inspection in pretrial proceedings. These rules were also recognized in *State ex rel. Sadler v Lackey* (1957, *Okla Crim*) 319 P2d 610.

Noting that a defendant has no inherent right to examination of the prosecution's evidence in the hope that something may turn up which will aid or supply clues for gathering evidence, the court in *Melchor v State* (1965, *Okla Crim*) 404 P2d 63, rejected the defendant's argument that the committing magistrate had, in the conduct of the preliminary hearing, erroneously refused to order the county attorney to allow him to examine certain exhibits.

In *State v Di Noi* (1937) 59 RI 348, 195 A 497, reh den 60 RI 37, 196 A 795, the court, upholding the denial of the defendant's pretrial motion for permission to examine the blunt instrument allegedly used in the commission of the crime charged, held that the defendant in a criminal case has no right to inspection of the prosecution's evidence, except under special and unusual circumstances where a strict adherence to the rule would amount almost to a denial of his constitutional rights; that in such special and unusual circumstances it is within the sound discretion of the trial judge to relax the rigor of the rule a sufficient extent to assure the defendant a reasonably fair opportunity to prepare his defense; and that the test in such a case is whether or not there is a real necessity for the defendant to inspect the articles in the possession of the prosecution in order to be able to prepare his defense. Adding that a necessity for inspection under special and unusual circumstances would arise but rarely, the court concluded that such circumstances did not appear to exist in the present case.

Relying on the rule that evidence in the hands of the district attorney is not a public document and not subject to inspection of the defendant prior to its introduction at the trial, the court in *Lopez v State* (1952) 158 Tex Crim 16, 252 SW2d 701, cert den 344 US 893, 97 L ed 691, 73 S Ct 213, upheld the trial court's refusal to grant, prior to the trial, an order requiring the prosecuting attorney to allow the defendant to inspect and copy his confessions and other evidence in the hands of the prosecution. To the same effect is *Smith v State* (1951) 156 Tex Crim 253, 240 SW2d 783.

In *State v Lavallee* (1960) 122 Vt 75, 163 A2d 856, the court, noting that under the common law the defendant in a criminal case did not have the right to inspect objects or writings in advance of trial, and that in Vermont no such right was conferred by any statute,<sup>n50</sup> upheld the denial of the defendant's pretrial motion for permission to inspect all reports of investigators, police officers, and informers who were to testify at the trial, and any other relevant statements or reports in the possession of the prosecution touching the subject matter of the case.

Following the view that as a general rule the accused is not, as a matter of right, entitled to inspect evidence in the possession of the prosecution before trial, and stating that a different rule would tend to subject the prosecuting attorney to great annoyance and to the probable destruction or loss of material evidence, and also would tend to compel the prosecution not only to furnish the accused with a full bill of particulars, but also to supply him with the physical evidence it intends to introduce upon the trial, the court in *Abdell v Commonwealth* (1939) 173 Va 458, 2 SE2d 293, wherein the defendant was charged with the murder of his wife, held that it was not error to deny the defendant's pretrial motion for permission to inspect a diary kept by the defendant and certain notes written by him prior to the commission of the alleged offense.

In *State v Herman* (1935) 219 Wis 267, 262 NW 718, the court, stating that the rule was well established that a person accused of crime enjoys no right to inspection of evidence relied upon by the prosecution for his conviction, held that the trial court did not commit error in denying the defendant's pretrial motion for inspection of the prosecuting attorney's transcript of the testimony given at a so-called John Doe hearing on a complaint which was related to the present prosecution.

The rule that ordinarily a person accused of crime is not, as a matter of right, entitled to inspection or disclosure of evidence in the possession of the prosecution has been relaxed in some recent cases. See, for example, the following cases:

#### WASHINGTON

*State v Thompson* (1959) 54 Wash 2d 100, 338 P2d 319, infra § 10[b]

Thus, in *People v Chapman* (1959) 52 Cal 2d 95, 338 P2d 428 (a case not within the scope of this annotation because dealing with the production of a prosecution witness' statement for purposes of impeachment) the court, in holding that it was error to deny the defendant's request for the production, said: "The defendant in a criminal case can on a proper showing compel production of documents in the possession of the People which are relevant and material to the defense." The rule to the same effect was also recognized in *People v Cathey* (1960) 186 Cal App 2d 217, 8 Cal Rptr 694.

See also *People v Morris* (1964) 226 Cal App 2d 12, 37 Cal Rptr 741, where the court, in holding that the trial court's error in allowing the testimony of certain prosecution witnesses whose names were not on the pretrial list of witnesses was not prejudicial under the circumstances, noted: "A defendant's right to pre-trial discovery in a criminal case is well established in California. . . . This right is in accord with the philosophy. . . that the defendant's right to discovery is a corollary to his right to a fair trial and extends to the names of the prosecution witnesses and reports of expert witnesses for the People."

In *State v Superior Court* (1965, NH) 208 A2d 832, 7 ALR3d 1, involving a prosecution for murder, the court, concluding that a trial court has the inherent power to permit an accused to inspect before trial writings and objects in the possession of the prosecution if it finds that such inspection is required by justice, upheld an order of the trial court granting an inspection of guns and bullets taken from the defendant's home, bullets removed from the victim's body, a "knife or sharp instrument used in the slaying," clothing worn by the defendant and victim and other ladies' apparel specifically described in the motion, specimens of hair taken from the defendant's person, a certain automobile owned by the defendant, and vacuum sweepings and a piece of fiber insulation taken from that automobile or another automobile of the defendant. As to that part of the trial court's ruling which denied the defendant's request for inspection of "[a]utopsy slides, photographs, movies, [autopsy] reports, contemporaneous notes (both recorded and written), laboratory and chemical reports, and parts of the body of [the victim] and contents thereof," the court, pointing out that the defendant's counsel were furnished with a report of the autopsy performed on the body of the victim, held (1) that any photographs, movies, and photographic or specimen slides taken or made as a part of the autopsy could properly be made available to the defendant, particularly since the corpse of the victim had been cremated; (2) that "parts" or "contents" of the corpse which had been preserved could also be made available to the defendant; (3) that if any "contemporaneous notes" were made under the direction of the medical referee in the course of preparing the report of the autopsy which was already furnished to the defendant, they also might be furnished in the trial court's discretion; and (4) that, on the other hand, such notes made by or on behalf of the attorney general, or his staff, and laboratory and chemical reports made as a part of the state's investigation, stood upon a different footing, and were not subject to pretrial discovery.

<>

Where trial court denied discovery of felony records, if any, of prosecution witnesses and motion to discover extra judicial statements of such witnesses, denial was proper absent showing of some prejudice to defendant. *People v Pearson* (Colo) 546 P2d 1259.

No error was committed in armed robbery trial in regard to defendant's right to discovery, where no state statute or rule of practice required discovery in criminal cases, and where defendant's counsel had access to state's entire file. *Sims v State* (1979) 148 Ga App 733, 252 SE2d 910.

See *Barker v State* (1977) 144 Ga App 339, 241 SE2d 11, § 11.

State has no duty to investigate to obtain exculpatory information, but rather has duty to provide defendant with exculpatory information which is in state's possession, custody, control or of which state has knowledge. *State v Edwards* (1982, La) 420 So 2d 663.

Pre-trial motion to produce gun and related items was properly denied as state was not required to produce physical evidence it intended to use at trial except copy of written confession in possession of prosecutor, production of taped confession, or some of confiscated narcotic evidence in narcotic prosecution; nor was it necessary for state to produce "rap sheet" of prosecuting witness for purpose of informing defendant as to criminal record of witness for use to impeach testimony particularly where state brought prior criminal record of witness to jury's attention and defendant cross-examined witness in detail concerning his prior conviction and produced detailed information concerning such

convictions. *State v Brumfield (La)* 329 So 2d 181.

Defense counsel's motion for dossier of all state witnesses, especially that of victim, was properly denied; prosecution is not required to produce evidence it intends to use at trial, except in limited circumstances. *State v Groves (La)* 311 So 2d 230.

Defendant was not entitled as of right, by pretrial motion, to names of state witnesses and to details of state's evidence where state did not withhold information of any exculpatory evidence and where it furnished defendant with information of alleged method of commission of crime. *State v Thomas (La)* 310 So 2d 517.

See *State v Hudson*, 253 La 992, 221 So 2d 484, § 17.

In Louisiana all evidence relating to pending criminal trial which is in possession of district attorney or police (except written confession of accused) is privileged, and not subject to inspection by accused unless and until introduced in evidence at trial. *State v Johnson*, 249 La 950, 192 So 2d 135, cert den 388 US 923, 18 L Ed 2d 1374, 87 S Ct 2144.

In prosecution for simple assault and battery and assault with dangerous weapon, state had no duty to inform defendant that five of jurors on panel had been part of prior panel in case tried by same assistant prosecutor, who had convicted another defendant for atrocious assault and battery. *State v Abernathy*, 137 NJ Super 83, 347 A2d 813.

See *State v Turner (App)* 81 NM 571, 469 P2d 720, § 8.

Discovery of many requested items denied where possibility of prejudice to prosecution was substantial and clearly outweighed convenience of defendants, and where denial did not unduly prejudice defendants. *People v Matera*, 52 Misc 2d 674, 276 NYS2d 776.

Except when accused proves exceptional circumstances and compelling reasons for disclosure, as general rule criminal defendant has no right to discover state's evidence against him prior to trial; therefore, trial court did not abuse its discretion in excluding defendant from proceeding during which co-defendant pled guilty to related charges. *Commonwealth v Vickers (1978, Pa Super)* 394 A2d 1022.

See *State v. Smart*, 274 S.C. 303, 262 S.E.2d 911 (1980), § 18.

Defendant in criminal trial is not entitled to examine prior to trial "any evidence which the State may have in its possession," under *Dennis v United States*, 384 US 855, 16 L Ed 2d 973, 86 S Ct 1840. *McDuff v State (Tex Crim)* 431 SW2d 547.

A defendant in a criminal case does not have a general right to discovery of evidence in possession of the State. *Luvano v. State*, 183 S.W.3d 918 (Tex. App. Eastland 2006), reh'g overruled, (Mar. 1, 2006).

In prosecution for aggravated robbery, defendant's motion for production of arresting officer's report, copy of complainant's report of vehicle being stolen, copy of inventory made by arresting officers, copy of complainant's statement to police concerning weapon, and copy of inventory made by police on receipt of weapon was properly denied where motion for production did not state any reason for request, nor did it show specifically what items were expected to be included in foregoing that were of exculpatory nature, and as defendant had no constitutional right to inspect state's entire file. *Rigsby v State* (1983, Tex App Houston (14th Dist)) 654 SW2d 737.

[\*4] Constitutional objections to denial of inspection or disclosure

[\*4a] Generally

In some state cases it has been recognized that the refusal to permit an accused person to inspect before trial evidence in the possession of the prosecution does not necessarily violate his constitutional right to due process of law.

Thus, in *People v Lindsay* (1964) 227 Cal App 2d 482, 38 Cal Rptr 755, it was held that pretrial discovery in favor of a defendant is not required by due process.

In *State v Thompson* (1957) 50 Del 456, 134 A2d 266, the court, in denying the defendants' motion for production of statements of prospective witnesses, police reports made in the course of their criminal investigations, and the results of polygraph tests, blood tests, and fingerprint examinations, held that the pretrial disclosures sought in the present case were not required by due process.

The trial court's refusal to permit the defendant to inspect before trial evidence in the possession of the prosecution was held not violative of the due process clause of the Federal Constitution in *Commonwealth v Bartolini* (1938) 299 Mass 503, 13 NE2d 382, cert den 304 US 565, 82 L ed 1531, 58 S Ct 950, the court pointing out that during the trial the defendant was given an opportunity to examine any evidence introduced by the prosecution, and that he had had full and adequate opportunity to prepare his defense and to meet all evidence against him.

See also *State v Goldberg* (1964) 261 NC 181, 134 SE2d 334, cert den 377 US 978, 12 L ed 2d 747, 84 S Ct 1884, infra 17, wherein the court, upholding the denial of the defendants' pretrial request for production of the reports of the investigation conducted by the state bureau of investigation in connection with the present prosecution, rejected the defendants' contention that the denial of production amounted to a violation of the defendants' rights guaranteed by the state and federal constitutions.

The view that the refusal to permit an accused person to inspect his confession before trial in a state criminal prosecution does not necessarily violate his right to due process of law guaranteed by the Federal Constitution has also been recognized in the following federal cases, which involved a petition for writ of habeas corpus by a prisoner convicted in a state court.

In *Cicenia v Lagay* (1958) 357 US 504, 2 L ed 2d 1523, 78 S Ct 1297, a habeas corpus proceeding based on the contention that the conviction of the petitioner for murder in a New Jersey state court violated the due process guaranteed by the Fourteenth Amendment, particularly because the petitioner was required to plead to the indictment for murder without the opportunity to inspect his confession, the court, rejecting the petitioner's contention, held that in view of the rule in New Jersey that the trial judge has discretion whether or not to allow inspection before trial, the discretionary refusal of the trial judge to permit inspection in the present case did not offend the Fourteenth Amendment.

Stating that while refusal to give the defense a copy of the defendant's confession may not be the better practice, failure to do so will not violate due process in the absence of a showing of prejudice, the court in *Application of Tune* (1956, CA3 NJ) 230 F2d 883, cert den 351 US 987, 100 L ed 1500, 76 S Ct 1057, a habeas corpus proceeding by a prisoner convicted in a state court, held that the refusal of the prosecution to allow defense counsel to inspect the defendant's confession prior to trial was not a denial of due process under the circumstances.

In *Welch v Beto* (1964, DC Tex) 234 F Supp 484, a habeas corpus proceeding, the court said that the refusal to furnish the defense a defendant's confession before trial in the state courts did not deny the constitutional rights of the defendant.

On the other hand, see *State v Dorsey* (1945) 207 La 928, 22 So 2d 273, infra § 13[d], holding that to deny an accused a pretrial inspection of his written confession was in violation of his constitutional rights.

&lt;&gt;

The denial of the defendant's motion, made after the verdict was returned, for production of documents in the prosecution's possession was held not violative of due process under the circumstances in *People v Norman* (1960) 177 Cal App 2d 59, 1 Cal Rptr 699, cert den 364 US 820, 5 L ed 2d 51, 81 S Ct 56, infra § 9[d].

And the defendant's contention that she was denied due process of law at the time of the preliminary hearing because her motion for production of certain incriminating tape recordings in the possession of the prosecution, which motion was made prior to the preliminary hearing, was not granted until such hearing was concluded, was rejected in *People v Aadland* (1961) 193 Cal App 2d 584, 14 Cal Rptr 462, although it was argued that the failure to allow the production of the recordings prior to the hearing curtailed proper cross-examination of the witnesses, and although it was shown that the cause was submitted on the transcript of the preliminary hearing, without introducing any additional testimony. Noting that the preliminary proceeding is subject to limited appellate review after judgment, and that the value to a defendant of seeing statements made by prosecution witnesses is to enable him to impeach testimony of the witnesses at the trial, the court pointed out that while a period of approximately 3 months had elapsed between the production of the recordings in question and the date of trial, the defendant had suggested no reason for the failure to avail himself of the material theretofore made accessible; and that under the circumstances it must be assumed that if the material possessed any intrinsic worth, the defendant certainly would not have hesitated to make use of it.

&lt;&gt;

See *Warren v State*, 292 Ala 71, 288 So 2d 826.

See *State v Traenkner* (Del) 314 A2d 202.

Due process clause did not entitle defendant to pre-trial discovery of written statements of prosecution witnesses in district attorney's files. *State v Gray* (La) 286 So 2d 644.

Even though state must not conceal material evidence, there was no denial of due process requiring reversal of defendant's conviction of manslaughter because of district attorney's failure to furnish defendant with copy of FBI report to effect that there was not enough material on lethal weapon to determine what caused stain thereon, since proof was overwhelming that tire tool was weapon used by defendant, and even if defendant had been furnished report it would not have constituted evidence sufficient to permit jury to render verdict of not guilty. *Murphree v State* (Miss) 228 So 2d 599.

See *State v Lewis* (1982, Mo App) 637 SW2d 421, § 23.

See *State v Charity* (1982, Mo App) 637 SW2d 319, § 16[a].

Pretrial discovery of accused's statements, although "the better practice," is not constitutionally compelled by Fourteenth Amendment, and discovery at trial, coupled with continuance if necessary, is probably adequate to meet constitutional requirements. *Mears v State* (Nev) 422 P2d 230, cert den 389 US 888, 19 L Ed 2d 188, 88 S Ct 124, reh den 389 US 945, 19 L Ed 2d 303, 88 S Ct 299.

See *State v Turner* (App) 81 NM 571, 469 P2d 720, § 8.

See *People v Anderwkavich* (1982) 117 Misc 2d 218, 457 NYS2d 718, § 18.

See *People ex rel. Hairston v Adult Detention Center*, 76 Misc 2d 1010, 352 NYS2d 326, § 19.

Defendant in homicide prosecution was not denied due process by trial court's refusal to order state to disclose whether prosecutions were pending against state's chief witness, whether state had records or information revealing prior felony convictions attributed to such witness, or whether state had records or information showing prior misconduct or bad acts committed by witness, where defendant failed completely to show that state knew of any prior misconduct on part of prosecuting witness, and where, on cross-examination, defense counsel failed to ask witness if he had ever been convicted. *State v Ford* (1979) 297 NC 144, 254 SE2d 14.

See *State v Abernathy* (1978) 295 NC 147, 244 SE2d 373, § 9[a].

See *State v Gaddis (Tenn)* 530 SW2d 64, § 25[d].

Provision in federal and state constitutions that accused has right to be informed, with some degree of certainty, of crime of which he stands accused does not necessitate prosecution furnishing him with its proof. *Bosley v State (Tenn)* 401 SW2d 770.

See *Epperson v State* (1983, Tex App Tyler) 650 SW2d 110, § 17.

[\*4b] Suppression by prosecution of evidence favorable to defense

It is well established that suppression by the state of material evidence exculpatory to the accused is a violation of due process, irrespective of the good or bad faith of the prosecution.<sup>n51</sup> This rule is of course applicable both in the situation where the state suppresses material documentary evidence or tangible objects (types of evidence treated in this annotation)<sup>n52</sup> and the situation where the state suppresses any other material information.<sup>n53</sup> Without attempting to go into the issue of what amounts to a "suppression" of evidence or when the state may be considered to have suppressed evidence favorable to the accused,<sup>n54</sup> the treatment here intends to illustrate cases where the rule under consideration has been applied to the suppression of evidence of the type within the scope of this annotation, by way of denial of discovery or inspection.

## VIRGINIA

*Lowe v Commonwealth (1977, Va) 239 SE2d 112, cert den (US) 55 L Ed 2d 526, 98 S Ct 1502*

In *Brady v Maryland (1963) 373 US 83, 10 L ed 2d 215, 83 S Ct 1194*, a proceeding on certiorari involving a petition for postconviction relief by a prisoner convicted in a Maryland state court, wherein the petitioner contended that he was deprived of a fair trial by reason of the fact that notwithstanding that prior to the trial of the case his counsel requested the prosecution to allow the defense to examine an accomplice's extrajudicial statements, the prosecution did not disclose at or before the trial the accomplice's confession admitting that he had actually strangled the victim, the United States Supreme Court, in holding that the prosecution's suppression of the accomplice's confession violated the due process clause of the Fourteenth Amendment, concluded that the suppression by the prosecution of evidence favorable to an accused upon request violates due process where the evidence is material either to guilt or to punishment, irrespective of the good faith or bad faith of the prosecution. The Supreme Court affirmed the decision of the Maryland Court of Appeals in the same case, reported in *Brady v State (1961) 226 Md 422, 174 A2d 167*, wherein it was held that there was a duty on the part of the prosecution to produce the accomplice's confession or at least to inform the defense of its existence, and that the suppression or withholding by the prosecution of material evidence exculpatory to an accused is a violation of due process.

In *United States ex rel. Almeida v Baldi (1952, CA3 Pa) 195 F2d 815, 33 ALR2d 1407, cert den 345 US 904, 97 L ed 1341, 73 S Ct 639, reh den 345 US 946, 97 L ed 1371, 73 S Ct 828*, it was held that the petitioner, who was convicted of murder in a Pennsylvania state court, was deprived of due process of law where the prosecution had deliberately suppressed evidence, including a certain bullet, tending to show that the petitioner did not fire the fatal shot.

In *United States ex rel. Butler v Maroney (1963, CA3 Pa) 319 F2d 622*, involving a petition for writ of habeas corpus by a prisoner convicted of murder in a Pennsylvania state court, it was held that the due process clause of the Federal Constitution was violated where during the trial of the petitioner the prosecution withheld, notwithstanding request for it by the defense, a statement given to the police by the petitioner in which was related an admission by a prosecution witness which was favorable and vitally material to the defense.

The rule that it is a denial of due process if the state has obtained a conviction by the intentional suppression of evidence was also recognized in *Barbee v Warden, Maryland Penitentiary (1964, CA4 Md) 331 F2d 842, infra § 6[a]*.

In *Powell v Wiman (1961, CA5 Ala) 287 F2d 275*, an appeal from the District Court's judgment denying an application for a writ of habeas corpus filed by a prisoner convicted of robbery in an Alabama state court on the basis primarily of the testimony of an alleged accomplice, who was called as a witness in the trial of the petitioner after he (the accomplice) had pleaded not guilty by reason of insanity as to the charge made against him, it was held that the prosecution's suppression of vital evidence adversely reflecting on the credibility of the accomplice amounted to a denial of due process of law where it was shown, inter alia, that at the time of the petitioner's trial, the prosecution had a letter and other information which adversely reflected on the accomplice's sanity; and that the prosecution attorney had permitted the accomplice to testify, without correction, to material facts directly contrary to a written statement which the attorney had previously taken from the accomplice, and, furthermore, had bolstered the accomplice's testimony by reference to the statement, without disclosing the contents thereof to the defense. Pointing out, however, that the present

opinion had gone beyond the findings of the District Court in elaborating upon the prosecution's suppression of vital evidence upon the petitioner's trial, the court remanded the cause to the District Court for further proceedings to determine whether the prosecution had disclosed any evidence to the petitioner's counsel before he was tried and convicted. On a later appeal of the same case from an order of the District Court on remand, the court in *Wiman v Powell* (1961, CA5 Ala) 293 F2d 605, further held (1) that the evidence that prior to the trial of the petitioner the prosecution had in its possession a psychiatrist's report tending to show the insanity of the accomplice, but the prosecuting attorney declined the defense's request to see the report, with the statement that it would not show that the accomplice was insane, was so misleading as to amount to an instance of suppression of evidence; and (2) that the District Court's finding that the accomplice's statement in the possession of the prosecution, but not available to the petitioner's counsel, conflicted with the accomplice's testimony given as a witness for the prosecution, and that the prosecution had actually bolstered the accomplice's testimony by reference to the statement, while keeping the contents thereof to itself, was sufficient to support the conclusion that the petitioner's conviction had been obtained in violation of the Fourteenth Amendment.

Following the rule that the suppression by the prosecution of evidence favorable to an accused violates due process where the evidence is material either as to guilt or as to punishment and has been requested by accused, the court in *People v Hoffman* (1965) 32 Ill 2d 96, 203 NE2d 873, a prosecution for the killing of a woman in a hotel room, reversed a judgment of conviction where it appeared that notwithstanding a request by the defendant during the course of the trial, the prosecution refused to produce a pair of men's shorts which were found by the police in the closet of the hotel room during their investigation and, when found, were wet in the frontal area, and which apparently did not belong to the defendant. The court appointed out that the shorts were potentially as material, if not more so, than the item of the victim's clothing offered and received in evidence.

See also *State v Cook* (1965) 43 NJ 560, 206 A2d 359, *infra* § 11[g], where the court, in holding that the defendant was entitled to examine, in preparation for trial, a medical report of the state's psychiatrist who had examined the defendant while he was in custody on murder charges, observed that a prosecuting attorney must deal fairly and may not constitutionally withhold material evidence which favors the defendant, and that disclosure of such psychiatric reports as the one sought by the defendant in the present case would not only aid in ferreting out the truth, but would also avoid any question of unconstitutional withholding.

In *Trimble v State* (1965) 75 NM 183, 402 P2d 162, wherein a minister of a church was charged with murder for the killing of a member of the board of stewards of the church, it was held that the defendant's constitutional right to due process of law was violated (1) by the prosecution's taking from the defendant and failure to return or produce a copy of a letter allegedly written by him to his presiding bishop about 6 weeks before the homicide advising the bishop of his difficulties with the victim because of improper advances being made by the victim to the defendant's wife, and (2) by the prosecution's taking from him a tape recording of a conversation between the victim and the minister's wife, wherein the victim made indecent suggestions, and its subsequent return of the tapes in a condition different than when taken in that the matters material to his defense had been erased from them. Noting that the defendant's position was that he had shot the victim in self-defense when the victim approached with a coffee table raised to strike him because he had accused the victim of having made improper advances to his wife, the court said that the presence and existence of the letter and tape recording in order to prove or substantiate the defendant's version of the reason for the argument between him and the victim and to support his claim of self-defense would seem to be too apparent for argument.

And see *People v Preston* (1958) 13 Misc 2d 802, 176 NYS2d 542, where the court, in holding that certain hospital reports and an autopsy report requested by the defendant could not be excluded under any evidentiary rule, so as to bar them from being disclosed to the defendant, noted that any action or omission by the district attorney which prevents a defendant from presenting evidence which may establish his innocence may result in a denial of due process of law under the Fourteenth Amendment, and that, even under an exclusionary rule of evidence, if withholding the documents in question in the present case might result in deprivation of procedural due process, inspection must nevertheless be granted.

The rule that the prosecution's failure to reveal evidence that may be usable by an accused may be a denial of the fairness required under the due process clause of the Constitution was noted in *People v Whitmore* (1965) 45 Misc 2d 506, 257 NYS2d 787, infra § 22[a], a case involving the suppression of a laboratory report which was evidently favorable to the defense.

The prosecution's failure to disclose the results of ballistic tests indicating that the murder weapon was a long-barreled .38 caliber revolver was held violative of the accused's right to due process of law in *McMullen v Maxwell* (1965) 3 Ohio St 2d 160, 32 Ohio Ops 2d 150, 209 NE2d 449, where the prosecution had no evidence to connect the accused with the long-barreled revolver, but proceeded on the theory that the killing had been committed with a snub-nosed .38 caliber revolver. The court said that in order for the nondisclosure to amount to a denial of due process the evidence must be vital and material to the issue of guilt or penalty.

◇

In state prosecution for possession of dynamite with intent to use for illegal purpose, failure of prosecution to disclose that sheriff's deputy had destroyed explosive that was subject of prosecution, though reprehensible, did not unconstitutionally prejudice defendant where it was undisputed that defendant had possessed dynamite two days prior to date specified in indictment. *Fambo v Smith* (1977, CA2 NY) 565 F2d 233.

In prosecution for rape, failure of prosecution to provide FBI lab reports of exculpatory nature to defendant prior to trial despite discovery order did not deny defendant effective defense in violation of due process or deprive defendant of his right to fair trial where reports were introduced into evidence by defendant and were considered by jury, where defendant's counsel requested and received recess to evaluate reports, and where revelation of reports did not force defendant to repudiate previous defensive posture. *Gorham v Wainwright* (1979, CA5 Fla) 588 F2d 178.

Question whether defendant's rights protected by due process clause of Fourteenth Amendment were violated by denial of his motions for pretrial production of prosecution's evidence should be determined in camera by state court, under circumstances of this case; if, after examination of demanded evidence, state court determines that favorable evidence "material either to guilt or to punishment" has been suppressed, then defendant convicted of murder must be granted new trial. *Williams v Dutton* (CA5 Ga) 400 F2d 797.

See *State v Jones* (1978) 120 Ariz 556, 587 P2d 742, § 11.

Failure of prosecution to reveal existence of knife found at scene of crime constituted denial of due process, even though (1) admissibility of knife might be questionable, and (2) defense did not request knife until learning of its existence after trial. *State v Fowler*, 101 Ariz 561, 422 P2d 125.

See *People v Morgan* (1980, Colo) 606 P2d 1296, § 27[b].

See *State v Carrione* (1982) 188 Conn 681, 453 A2d 1137, cert den (US) 76 L Ed 2d 347, 103 S Ct 1775, § 9[b].

See *State v Grasso* (1977) 172 Conn 298, 374 A2d 239, § 8.

Defendants in prosecution for unlawful possession of dangerous drug were not entitled to relief on grounds that urine test results should have been furnished to defense counsel and that government knowingly presented false testimony where results of urinalysis were as readily available to defense counsel as they were to prosecutor, who did not see results until they were produced at trial by defendants. *Holt v United States* (1978, Dist Col App) 381 A2d 1388.

Failure by prosecution to reveal report that police at one time heard rumor pointing finger of suspicion at individual known by name other than defendant's did not constitute suppression of evidence favorable to accused where such report was inadmissible hearsay and did not reach level of evidence material to guilt or innocence of accused. *United States v Sedgwick* (1975, *Dist Col App*) 345 A2d 465.

Failure of prosecution to disclose to defendant in murder prosecution that police had questioned on day of murder eyewitness who at defendant's trial identified him as perpetrator of crime, or failure to include that witness' name on list of state witnesses demanded by defendant did not constitute impermissible suppression of evidence favorable to defendant where there was no showing that shortly after murder witness had made statements to police that were favorable to defendant, and where witness did not identify defendant as perpetrator of crime until immediately prior to trial. *Stroud v State* (1980) 246 Ga 717, 273 SE2d 155.

No suppression of evidence resulted from prosecution's failure to provide defendant, in response to his pretrial nonspecific for discovery of exculpatory material, with notes of investigating officer's report respecting oral statements made to him by state witnesses where content of notes was furnished defendant in form of officer's testimony at defendant's preliminary hearing, and where there was no showing by defendant that notes added to or differed from officer's testimony. *Chafin v State* (1980) 246 Ga 709, 273 SE2d 147.

Constitutional right of defendant in criminal manslaughter prosecution to confront hostile witnesses was not violated by denial of his discovery motion for production of statements given to law enforcement officials by two key prosecution witnesses and desired by defendant for impeachment purposes where it was clear from their trial testimony that statements must have been inculpatory rather than exculpatory and that they were in nowise impeaching in character. *Odom v State* (1980) 156 Ga App 119, 274 SE2d 117.

In response to discovery motion in rape prosecution, trial court properly ordered state to reveal to defendant any information known to it which was arguably favorable to defendant and of exculpatory nature, together with any such information acquired by state after date of order. *Burke v State* (1980) 153 Ga App 769, 266 SE2d 549.

In prosecution for murder, trial court did not err in refusing to order production of letter written by prosecutor to prosecutor's office in Alaska requesting that embezzlement charges against witness be dismissed on grounds of insufficiency of evidence, where specific letter at issue, even if it had been produced, would not have had material effect on outcome of trial in light of substantial evidence produced regarding dismissal of charges against witness in return for his testimony rendering letter merely cumulative, government's case did not rest solely on witness' testimony in that witness was called by prosecution for limited purpose of testifying about map that codefendant had shown him indicating where victim might have been buried, statements of witness incriminating defendant were brought out on cross-examination by defense counsel, and even without these incriminating statements testimony of other witnesses was sufficient to support jury's verdict of manslaughter. *State v Arnold* (1983) 66 Hawaii 175, 657 P2d 1052.

See *Chung v Lanham*, 53 Hawaii 617, 500 P2d 565, § 7.

In prosecution for rape, defendant was not denied due process by state's failure to reveal evidence of hospital show-up in which victim was unable to identify defendant, where defendant was unable to demonstrate any surprise or unfairness in state's failure to provide requested information in that defendant knew before trial that confrontation occurred and failed either to ask court to compel compliance or to seek continuance at trial to interview witnesses, and defendant was able to make full and effective use of evidence adduced at trial in that victim admitted that she was unable to identify defendant at hospital. *People v Smith* (1982) 111 Ill App 3d 895, 67 Ill Dec 565, 444 NE2d 801.

In prosecution for armed robbery, State's failure to disclose that witness did not identify defendant at show-up did not deny defendant his due process and statutory rights, since State cannot disclose any exculpatory evidence which it does not possess, no matter how specific, relevant and material it may be, and in instant case, court could have reasonably
