**UNITED STATES OF AMERICA, Plaintiff-Appellee, v. CLAYTON HENRY  
FENT, Defendant-Appellant.**

**No. 05-7100**

**UNITED STATES COURT OF APPEALS FOR THE TENTH CIRCUIT**

*2006 U.S. App. LEXIS 29609*

**November 30, 2006, Filed**

**NOTICE:** [\*1] RULES OF THE TENTH CIRCUIT COURT OF APPEALS MAY LIMIT CITATION TO UNPUBLISHED OPINIONS. PLEASE REFER TO THE RULES OF THE UNITED STATES COURT OF APPEALS FOR THIS CIRCUIT.

**PRIOR HISTORY:** (D.C. No. CR-05-07-01-P). (E.D. Okla.).

**DISPOSITION:** AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was charged with being a felon in possession of a firearm, in violation of *18 U.S.C.S. § 922(g)*, and possessing a firearm with an obliterated serial number, in violation of *18 U.S.C.S. § 922(k)*, and he filed a motion to suppress evidence. The U.S. District Court for the Eastern District of Oklahoma denied the motion and convicted defendant of both offenses after a jury found that defendant was guilty. Defendant appealed.

**OVERVIEW:** A deputy sheriff stopped defendant after a radar device he was using showed that defendant was driving 61 miles per hour in a 45 mile-per-hour zone. When the deputy checked a computer database, he discovered that defendant's driver's license was suspended, and he placed defendant under arrest. The deputy conducted an inventory search of defendant's vehicle and found a small amount of methamphetamine, ammunition, and a firearm with a defaced serial number. Defendant filed a motion to suppress evidence, but the district court denied the motion, convicted defendant of violating *18 U.S.C.S. § 922(g)* and (k), and sentenced him to 168 months' imprisonment. The court of appeals found that the district court did not err when it denied defendant's motion. The deputy had a reasonable basis for stopping defendant because he saw him violate the law by speeding, and he had the right to conduct an inventory search of defendant's vehicle after he arrested him for driving with a suspended license. The court of appeals also found that the district court did not violate defendant's rights when it enhanced his sentence because he possessed the weapon in connection with felony possession of drugs.

**OUTCOME:** The court of appeals affirmed the district court's judgment.

**CORE TERMS:** firearm, gun, radar, methamphetamine, inventory search, motion to suppress, possessed, sentence, felony offense, preponderance, enhancement, ammunition, truck, reasonable suspicion, traffic, motion to suppress evidence, traffic violation, close proximity, opening brief, serial number, small amount, reply brief, fact-finding, sentencing, guidelines, defaced, waived, suppression hearing, traffic stop, training

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Appeals > Briefs***

[HN1] Arguments not set forth fully in an opening brief are waived, and the United States Court of Appeals for the Tenth Circuit will not address issues raised for the first time in a reply brief.

***Constitutional Law > Bill of Rights > Fundamental Rights > Search & Seizure > General Overview******Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Vehicle Searches > General Overview***

[HN2] A traffic stop is valid under the Fourth Amendment if the stop is based on an observed traffic violation or if the police officer has reasonable articulable suspicion that a traffic or equipment violation has occurred or is occurring.

***Criminal Law & Procedure > Criminal Offenses > Weapons > Possession > Penalties******Criminal Law & Procedure > Sentencing > Adjustments******Criminal Law & Procedure > Sentencing > Guidelines***

[HN3] *U.S. Sentencing Guidelines Manual § 2K2.1(b)(5)* provides a four-level enhancement to a defendant's base offense level if the defendant used or possessed any firearm or ammunition in connection with another felony offense.

***Constitutional Law > Bill of Rights > Fundamental Rights > Criminal Process > Right to Jury Trial******Criminal Law & Procedure > Sentencing > Guidelines***

[HN4] Even after the United States Supreme Court's decision in *United States v. Booker*, facts relevant to sentencing still need only be proved by a preponderance of the evidence, as long as the U.S. Sentencing Guidelines are considered advisory. *Booker*, therefore, does not render judicial factfinding by a preponderance of the evidence per se unconstitutional. The remedial portion of *Booker* demonstrates that such factfinding is unconstitutional only when it operates to increase a defendant's sentence mandatorily.

**COUNSEL:** For UNITED STATES OF AMERICA, Plaintiff-Appellee: Gordon B. Cecil, Jeffrey A. Gallant, Office of the United States Attorney, Eastern District of Oklahoma, Muskogee, OK.

For CLAYTON HENRY FENT, Defendant-Appellant: Janice Walters Purcell, Tahlequah, OK.

**JUDGES:** Before BRISCOE, BALDOCK, and BRORBY, Circuit Judges.

**OPINION BY:** Bobby R. Baldock

**OPINION:**

**ORDER AND JUDGMENT \***

\* This order and judgment is not binding precedent, except under the doctrines of law of the case, res judicata, and collateral estoppel. The court generally disfavors the citation of orders and judgments; nevertheless, an order and judgment may be cited under the terms and conditions of *10th Cir. R. 36.3*.

Deputy Randy Hass of the Pittsburgh County Sheriff's Office discovered a small amount of methamphetamine, ammunition, [\*2] and a firearm with a defaced serial number in Defendant's truck during the course of an inventory search. The Government charged Defendant in a two-count Indictment with Felon in Possession of a Firearm, *18 U.S.C.*

§ 922(g), and Possession of a Firearm with an Obliterated Serial Number, 18 U.S.C. § 922(k). Following the district court's denial of Defendant's motion to suppress, a jury convicted Defendant on both counts. On appeal, Defendant claims the district court erred in denying his motion to suppress evidence found during the search of his vehicle. Defendant also appeals his sentence, claiming it violates his *Sixth Amendment* rights as discussed in *United States v. Booker*, 543 U.S. 220, 125 S. Ct. 738, 160 L. Ed. 2d 621 (2005). We review both the district court's denial of Defendant's motion to suppress and its sentencing determination de novo and affirm. See *United States v. Dennison*, 410 F.3d 1203, 1207 (10th Cir. 2005); *United States v. Stiger*, 413 F.3d 1185, 1191 (10th Cir. 2005).

## I.

During routine traffic patrol, Deputy Hass "clocked" Defendant's truck going 61 mph in a 45 mph zone. Deputy Hass [\*3] testified at the suppression hearing that in addition to his radar reading, his observation of the vehicle led him to conclude Defendant was traveling at a rate of speed between 60 and 70 miles per hour. During the traffic stop, Defendant was unable to produce a driver's license or proof of insurance. Using Defendant's date of birth and social security number to search the database, Deputy Hass discovered Defendant's driver's license was suspended. Deputy Hass arrested Defendant for driving with a suspended license.

Pursuant to department policy, Deputy Hass impounded Defendant's truck and conducted an inventory search. n1 During the course of the inventory search, Deputy Hass located a black bag containing a small amount of methamphetamine, ammunition and a firearm with a defaced serial number. Faced with firearm charges, Defendant filed a motion to suppress evidence found during the inventory search of his vehicle. The district court referred the matter to a magistrate judge who issued a written Report and Recommendation (R&R) recommending denial of Defendant's motion. Defendant objected to the R&R, and the district court overruled his objections and adopted the R&R. The case proceeded [\*4] to trial where a jury found Defendant guilty on both counts.

n1 Defendant's attempt to challenge the inventory search in his reply brief is waived because he failed to raise the issue in his opening brief. *Gaines-Tabb v. ICI Explosives, USA, Inc.*, 160 F.3d 613, 624 (10th Cir. 1998). ([HN1] "[A]rguments not set forth fully in the opening brief are waived."); *Codner v. United States*, 17 F.3d 1331, 1332 n.2 (10th Cir. 1994). ("[W]e will not address issues raised for the first time in a reply brief.")

The court sentenced Defendant to 168 months in prison. In calculating his sentence, the court increased Defendant's base offense level by four points in accordance with *U.S.S.G. § 2K2.1(b)(5)*. That section provides for an enhancement when a defendant possesses a firearm in connection with another "felony offense."

## II.

Defendant claims Deputy Hass did not have reasonable suspicion to stop his vehicle, and therefore the district court erred in denying [\*5] his motion to suppress. Defendant argues Deputy Hass lacked training and experience in handling his radar gun and thus, reliance on the radar gun's reading could not create the requisite reasonable suspicion necessary to stop Defendant. Defendant further argues Deputy Hass had not calibrated the radar gun in several months, resulting in an unreliable reading.

[HN2] A traffic stop is valid under the *Fourth Amendment*, "if the stop is based on an observed traffic violation or if the police officer has reasonable articulable suspicion that a traffic or equipment violation has occurred or is occurring." *United States v. Botero-Ospina*, 71 F.3d 783, 788 (10th Cir. 1995) (en banc). "Our sole inquiry is whether this particular officer had reasonable suspicion that this particular motorist violated any one of the multitude of applicable traffic and equipment regulations of the jurisdiction." *Id.* (citation and quotation marks omitted). We have no doubt this standard was satisfied here. Regardless of the amount of training Deputy Hass received in operating the radar gun, he was able to conclude, just by observing the vehicle, Defendant was speeding and thus committing a traffic [\*6] violation. Such observation is the only requirement for a valid stop under the *Fourth Amendment*. See *id.*, 71 F.3d at

787. Furthermore, Defendant offered no testimony at the suppression hearing concerning how often radar gun calibration is required or that the radar gun was malfunctioning. Accordingly, Deputy Hass's stop of Defendant's vehicle complied with the *Fourth Amendment*, and the district court properly denied his motion to suppress.

### III.

Defendant also challenges his sentence claiming the addition of four points to his base offense level contravenes the Supreme Court's holding in *United States v. Booker*, 543 U.S. 220, 125 S. Ct. 738, 160 L. Ed. 2d 621 (2005). [HN3] *Sentencing Guideline* § 2K2.1(b)(5) provides a four level enhancement to a defendant's base offense level "if the defendant used or possessed any firearm or ammunition in connection with another felony offense." *U.S.S.G.* § 2K2.1(b)(5). The district court applied this enhancement, finding Defendant possessed the firearm in connection with the uncharged felony of possessing methamphetamine. On appeal, Defendant argues because the methamphetamine offense was not submitted [\*7] to the jury, application of *U.S.S.G.* § 2K2.1(b)(5) was unconstitutional. Defendant's argument is foreclosed by our precedent.

In *United States v. Magallanez*, 408 F.3d 672, 684-85 (10th Cir. 2005), we held [HN4] even after *Booker*, facts relevant to sentencing still need only be proved by a preponderance, as long as the guidelines are considered advisory. See also *United States v. Dalton*, 409 F.3d 1247, 1252 (10th Cir. 2005) ("*Booker* therefore does not render judicial fact-finding by a preponderance of the evidence per se unconstitutional. The remedial portion of *Booker* demonstrates that such fact-finding is unconstitutional only when it operates to increase a defendant's sentence mandatorily."). The record supports the district court's conclusion Defendant possessed methamphetamine, and the close proximity of the drugs and the gun established Defendant possessed the firearm "in connection with" the felonious possession of drugs. *U.S.S.G.* § 2K2.1(b)(5). As noted by the district court, "the availability of the gun in such close proximity to the methamphetamine was sufficient evidence [\*8] of a connection between the firearm and the possession of methamphetamine, which is a felony offense in the state of Oklahoma." The court made this finding by a preponderance of the evidence. Most importantly for *Booker* purposes, the sentencing transcript clearly establishes the court applied the Guidelines in a discretionary fashion. Thus, no *Booker* error occurred.

AFFIRMED.

Entered for the Court,

Bobby R. Baldock

Circuit Judge

**United States of America, Plaintiff-Appellee, v. Heriberto Navarro-Camacho,  
Defendant-Appellant.**

**No. 97-3584**

**UNITED STATES COURT OF APPEALS FOR THE SIXTH CIRCUIT**

*186 F.3d 701; 1999 U.S. App. LEXIS 18287; 1999 FED App. 0290P (6th Cir.)*

**December 8, 1998, Argued**

**August 6, 1999, Decided**

**August 6, 1999, Filed**

**PRIOR HISTORY:** [\*\*1] Appeal from the United States District Court for the Northern District of Ohio at Toledo. No. 95-00766. John W. Potter, District Judge.

**DISPOSITION:** AFFIRMED denial of Navarro's motion to suppress and, AFFIRMED his conviction.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant sought review of the decision of the United States District Court for the Northern District of Ohio at Toledo, which denied his motion to suppress and convicted him of drug trafficking.

**OVERVIEW:** Appellant was convicted of drug trafficking and sought review of his conviction contending that the trial court erred in denying his motion to suppress, which alleged that officers of the state highway patrol rubbed "pseudo-cocaine" on his vehicle in order to induce a drug detection dog to alert, and thus, provided the officers with phony probable cause to search the vehicle. On appeal, the court held that the trial court did not err in denying appellant's motion to suppress upon the recommendation of a magistrate and affirmed appellant's conviction. The court concluded that the trial court and magistrate did not err in determining that one of the officers had probable cause to stop appellant's vehicle and that the trial court's determination that the narcotics dog was reliable was not clearly erroneous. The court further concluded that the magistrate's and trial court's factual determination that the officers did not apply pseudo-cocaine on appellant's vehicle was not clearly erroneous. Finally, the court concluded that appellant's claim that the trial court's review was not meaningful and, thus, violated his right to due process was meritless.

**OUTCOME:** The appellate court affirmed the denial of appellant's motion to suppress and his conviction for drug trafficking. The appellate court concluded that the trial court did not err in finding that probable cause existed to stop appellant's vehicle, that the narcotics dog that searched appellant's vehicle was reliable, and that the state highway patrol officers did not rub pseudo-cocaine on appellant's vehicle.

**CORE TERMS:** trooper, dog, pseudo-cocaine, videotape, motion to suppress, alerted, alert, reliable, narcotics,

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

***Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > Motions to Suppress***

***Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review > Motions to Suppress***

[HN1] Factual findings made in consideration of a motion to suppress are reviewed for clear error, while conclusions of law are reviewed de novo. A factual finding will only be clearly erroneous when, although there may be evidence to support it, the reviewing court on the entire evidence is left with the definite and firm conviction that a mistake has been committed. The evidence is reviewed in the light most likely to support a district court's decision.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Vehicle Searches***

[HN2] The decision to stop an automobile is reasonable where the police have probable cause to believe that a traffic violation has occurred.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Dog Sniff Searches***

***Evidence > Testimony > Examination > General Overview***

***Governments > Agriculture & Food > Animal Protection***

[HN3] A positive indication by a properly-trained dog is sufficient to establish probable cause for the presence of a controlled substance. When the evidence presented, whether testimony from the dog's trainer or records of the dog's training, establishes that the dog is generally certified as a drug detection dog, any other evidence, including the testimony of other experts, that may detract from the reliability of the dog's performance properly goes to the "credibility" of the dog. Lack of additional evidence, such as documentation of the exact course of training, similarly would affect the dog's reliability. As with the admissibility of evidence generally, the admissibility of evidence regarding a dog's training and reliability is committed to the trial court's sound discretion.

***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

***Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > Motions to Suppress***

[HN4] When reviewing the denial of a motion to suppress evidence, an appellate court reviews a district court's findings of fact only for clear error.

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN5] Where factual findings rest in large part on credibility determinations, an appellate court affords district courts even greater deference.

**COUNSEL:** ARGUED: Ralph E. Meczyk, Chicago, Illinois, for Appellant.

Thomas O. Secor, OFFICE OF THE U.S. ATTORNEY, WESTERN DIVISION, Toledo, Ohio, for Appellee.

ON BRIEF: Ralph E. Meczyk, Chicago, Illinois, for Appellant.

Thomas O. Secor, OFFICE OF THE U.S. ATTORNEY, WESTERN DIVISION, Toledo, Ohio, for Appellee.

**JUDGES:** Before: WELLFORD, BOGGS, and MOORE, Circuit Judges. BOGGS, J., delivered the opinion of the court. WELLFORD, J., delivered a separate concurring opinion. MOORE, J., delivered a separate opinion concurring in the result.

**OPINION BY: BOGGS**

**OPINION:** [\*\*\*2]

[\*702] **OPINION**

BOGGS, Circuit Judge. Heriberto Navarro-Camacho appeals his conviction for drug trafficking, contending that the trial court erred in denying his [\*703] motion to suppress. Navarro-Camacho alleges, *inter alia*, that members of the Ohio Highway Patrol rubbed "pseudo-cocaine" on his vehicle in order to induce a drug detection dog to alert and, thus, provide the officers with phony probable [\*\*2] cause to search the vehicle. We hold that the district court did not err in denying the motion to suppress and thus affirm defendant's conviction.

**I**

On September 29, 1995, the Ohio Highway Patrol ("OHP") received an tip indicating that defendant-appellant Heriberto Navarro-Camacho ("Navarro"), possibly in the company of others, would be transporting five or more kilograms of cocaine to the Toledo area. Navarro was said to be driving [\*\*\*3] either a blue or silver Chevrolet Suburban or a Ford Contour. The suspect vehicle was to have Illinois license plates.

Based on this information, OHP troopers Robert Stevens and Kevin Kiefer (in separate vehicles) staked out the eastbound stretch of the Ohio Turnpike just east of the Ohio-Indiana border beginning at 6 a.m. on September 30, 1995. Stevens had a narcotics dog with him in his vehicle. After nearly seven hours of unfruitful surveillance, the troopers began to drive back towards OHP headquarters in Toledo.

Shortly after 1 p.m., while driving eastbound in the direction of Toledo, Kiefer was informed by OHP trooper Robert Baranowski that a blue Chevy Suburban matching the description in the tip was driving eastbound on the Turnpike. [\*\*3] Baranowski began to follow the Suburban, then turned into a crossover and proceeded in the other direction, because he "wanted the vehicle to not think [he was] following him anymore . . . ."

Kiefer, who had turned around and was now driving westbound, pulled off the Turnpike approximately sixteen miles before the Ohio-Indiana border in a 65 mile-per-hour speed limit zone. He spotted the suspect vehicle, activated his radar, and clocked the vehicle's speed at 68 miles per hour. Upon getting the reading, Kiefer activated his overhead lights, which also turned on his in-car video camera. n1 He followed the suspect vehicle, which contained Navarro (who was the driver) and two passengers. Kiefer pulled the vehicle over and approached the car on its passenger side. Baranowski and Stevens quickly arrived on the scene in their separate cars as Kiefer began conversing with the vehicle's occupants.

n1 All of the subsequent events on September 30, 1995 are recorded on videotape.

As Kiefer was engaging the vehicle's [\*\*4] occupants in conversation, Stevens and Baranowski were near the rear of the car. Stevens then moved away from defendant's car and towards the cruiser with the mounted video camera. While [\*\*\*4] moving, Stevens, with his back turned to Baranowski, made a sort of backwards hand gesture to Baranowski. The government claims that this was a "low-five" hand slap between the troopers. Navarro suspects that this may have been an exchange of "pseudo-cocaine" between the troopers. Pseudo-cocaine is a special cocaine isomer that the police apparently sometimes use to train drug dogs. *See People v. Hollingsead*, 210 Ill. App. 3d 750, 569 N.E.2d 216, 219, 155 Ill. Dec. 216 (Ill. App. 1991); *United States v. Bockius*, 564 F.2d 1193, 1195 n.2 (5th Cir. 1977).

After making this gesture, Stevens went to his cruiser to retrieve Dingo, his narcotics dog, while Baranowski stood next to the driver's door of the Suburban, conversing with Navarro. Stevens then brought Dingo around the vehicle; the dog alerted to the presence of narcotics near the driver's door of the Suburban, at approximately where Baranowski had been standing. The officers then executed a search [\*\*5] of the vehicle, recovering five kilograms of cocaine in a duffel bag on the back seat.

Navarro filed a motion to suppress the evidence, arguing in his motion that there was no probable cause to search the vehicle [\*704] because Dingo, the narcotics dog, was not reliable. A hearing on the motion to suppress was held before a magistrate judge on March 27-28 and June 18-20, 1996, during which the magistrate judge heard from thirteen witnesses who generated 742 transcript pages of testimony. At the hearing, Navarro attempted to establish not only that Dingo was not a reliable narcotics dog, but also that (1) he was illegally stopped because he was not exceeding the speed limit, and (2) the videotape made of the stop showed Stevens passing an object to Baranowski, which may have been "pseudo-cocaine" that Baranowski may have smeared on the car in order to get Dingo to alert.

Navarro testified that he was driving "a little under 65 miles-an-hour before [he] was stopped, because [he] set the cruise control" at 62 miles per hour soon after crossing the Ohio-Indiana border. Trooper Kiefer testified, however, that he clocked Navarro at 68 miles per hour, and that he had the [\*\*\*5] calibration [\*\*6] of his radar gun checked the morning of Navarro's arrest.

Navarro called Daniel Craig, an experimental psychiatrist and veterinarian who specializes in studying the behavior of narcotics dogs, as a witness at the hearing. Craig testified that Dingo was not a reliable drug-detecting canine. He based this assertion on his finding that there were "very severe gaps in [Dingo's] training records, and in [Dingo's] utilization records, the animal [was] responding to items that [he] has not been trained on." Craig, however, admitted that Dingo's certification records were incomplete, and his opinion was based on the incomplete records. He also testified that, under the protocol for training narcotics detection dogs for the Air Force developed by Craig, a dog "is functional at certification standards" of "90 percent."

Stevens testified that Dingo was certified in 1990; that Dingo has passed his recertification every two years; and that he had trained with Dingo for between 1500 and 2000 hours. He also indicated that, although Dingo occasionally alerted falsely, his rate of reliability was between 90 and 97 percent.

Navarro also called Dr. Bobby Hunt, an expert witness in the field [\*\*7] of optics and applied mathematics, who testified that the videotape showed that an object was indeed passed from Stevens to Baranowski. FBI Agent Thomas Forgas, a photographic specialist, testified for the government that the videotape did not show the passing of an object but, rather, was simply the reflection of sunlight off of Stevens's hand. Troopers Baranowski and Stevens testified that the videotape simply depicted Stevens giving Baranowski a "low five."

The magistrate judge denied the motion to suppress, finding that:

Kiefer's testimony about Navarro's speeding was credible and Navarro's claim that he was driving at 62 miles per hour was "unpersuasive," and, thus, the initial stop was justified. [\*\*\*6]

Dingo was a reliable canine detection dog in light of, *inter alia*, "the testimony of Dr. Craig that canine detection dogs are not infallible and Trooper Stevens's testimony that Dingo's accuracy rate was between 90% and 97% . . . ."

Though he was "unable to resolve the dispute based upon the expert testimony presented," and gave equal weight to the testimony of the two experts, the officers' testimony about the "low-five" was credible and, thus, Navarro's [\*\*8] argument about police misconduct was unconvincing.

The district court reviewed the magistrate judge's report and (1) made a de novo determination that Trooper Kiefer

had probable cause for the stop; (2) adopted the magistrate's findings of fact as they related to Dingo and ruled de novo that Dingo was a reliable narcotics dog; and (3) found that the troopers did not transfer or plant a substance on Navarro's vehicle. After making a de novo determination that the search of the vehicle was [\*705] legal, the district court adopted the magistrate judge's report in all respects. It then denied the motion to suppress.

Navarro subsequently entered a conditional guilty plea pursuant to *Fed. R. Crim P. 11(a)(2)*. He now appeals.

## II

### A. The motion to suppress

[HN1] Factual findings made in consideration of a motion to suppress are reviewed for clear error, while the conclusions of law are reviewed de novo. *United States v. Ursery*, 109 F.3d 1129, 1132 (6th Cir. 1997). A factual finding will only be clearly erroneous when, although there may be evidence to support it, the reviewing court on the entire evidence is left with the definite and firm conviction that a mistake [\*9] has been committed. *United States v. Ayen*, 997 F.2d 1150, 1152 (6th Cir. 1993). The evidence is reviewed "in the light most likely to support the district court's decision." *United States v. [\*\*\*7] Braggs*, 23 F.3d 1047, 1049 (6th Cir.), cert. denied, 513 U.S. 907, 130 L. Ed. 2d 191, 115 S. Ct. 274 (1994).

#### 1. Initial stop of Navarro's vehicle

Navarro first contends that Kiefer did not have probable cause to stop his vehicle. Kiefer testified that he clocked Navarro with his radar at a speed of 68 miles per hour. The magistrate judge found Kiefer's testimony credible, the district court adopted the magistrate judge's report, and this court accords great deference to such credibility determinations. See *United States v. Cooke*, 915 F.2d 250, 252 (6th Cir. 1990). Navarro points to nothing to persuade this court that the district court and magistrate judge erred in crediting Kiefer's testimony over his testimony, notwithstanding his suggestion that it would have defied common sense for him to speed while carrying cocaine. Navarro's suggestion appears to somewhat echo Circuit Judge Edgerton in *Higgins v. United States*, 93 U.S. App. D.C. 340, 209 F.2d 819, 820 (D.C. Cir. 1954), [\*10] where Judge Edgerton questioned whether there could ever be consent to a search that actually finds contraband, contending that "no sane man who denies his guilt would actually be willing that policemen search his room for contraband which is certain to be discovered." However, as the government notes in its brief, "Case law in this circuit . . . is replete with instances of drug couriers disobeying traffic laws while transporting illegal substances."

Moreover, the Supreme Court recently ruled in *Whren v. United States*, 517 U.S. 806, 135 L. Ed. 2d 89, 116 S. Ct. 1769 (1996), that prior Court precedent

forecloses any argument that the constitutional reasonableness of traffic stops depends on the actual motivations of the individual officers involved. We of course agree with petitioners that the Constitution prohibits selective enforcement of the law based on considerations such as race. But the constitutional basis for objecting to intentionally discriminatory application of laws is the Equal Protection Clause, not the Fourth Amendment. Subjective intentions play no role in ordinary, probable-cause Fourth Amendment analysis.

[\*\*\*8]

*Id.* at 813. [\*11] Therefore, since generally "[HN2] the decision to stop an automobile is reasonable where the police have probable cause to believe that a traffic violation has occurred," *id.* at 810, the stop of Navarro's vehicle was proper.

n2

n2 Navarro has attempted to introduce evidence from an unrelated civil suit to establish that Kiefer targeted Navarro because of his race. Not only did the district court properly find this evidence to be inadmissible, but **Whren** clearly indicates that the evidence would be irrelevant for the purpose of determining whether Kiefer's stop of the vehicle violated Navarro's Fourth Amendment rights.

Navarro called three witnesses at the hearing in an attempt to establish "that Stevens used Dingo as a device to get into and search any vehicle he chose to stop, [\*706] usually those operated by Hispanics." However, Trooper Kiefer (who stopped Navarro) was not involved in any of the stops described by these witnesses and, moreover, there is no properly-admitted evidence in the record [\*\*12] that would indicate that there is any degree of selective enforcement of speeding laws by the OHP based on racial considerations.

## 2. Reliability of Dingo

Navarro next claims that the troopers did not have probable cause to search his vehicle because Dingo, the narcotics dog that alerted to the presence of cocaine, was unreliable. [HN3] A positive indication by a properly-trained dog is sufficient to establish probable cause for the presence of a controlled substance. *United States v. Diaz*, 25 F.3d 392, 393-94 (6th Cir. 1994). The **Diaz** court further explained:

When the evidence presented, whether testimony from the dog's trainer or records of the dog's training, establishes that the dog is generally certified as a drug detection dog, any other evidence, including the testimony of other experts, that may detract from the reliability of the dog's performance properly goes to the "credibility" of the dog. Lack of additional evidence, such as documentation of the exact course of training, [\*\*\*9] similarly would affect the dog's reliability. As with the admissibility of evidence generally, the admissibility of evidence regarding a dog's training and [\*\*13] reliability is committed to the trial court's sound discretion.

*Id.* at 394.

The **Diaz** court noted that "courts have not definitively addressed the issue of the quality or quantity of evidence necessary to establish a drug detection dog's training and reliability." **Id.** The magistrate and district court found that Dingo, as a factual matter, was reliable. [HN4] When reviewing the denial of a motion to suppress evidence, this court reviews the district court's findings of fact only for clear error. *See United States v. Bradshaw*, 102 F.3d 204, 209 (6th Cir. 1996), **cert. denied**, 520 U.S. 1178, 117 S. Ct. 1453, 137 L. Ed. 2d 558 (1997).

The district court's determination that Dingo was reliable was not clearly erroneous. Trooper Stevens testified that Dingo was certified in 1990; that Dingo has passed his recertification every two years; and that he had trained with Dingo for between 1500 and 2000 hours. Stevens also stated that, although Dingo occasionally alerted falsely, his rate of reliability was between 90 and 97 percent. Navarro's own expert indicated that, under the training protocol the expert had designed, a dog [\*\*14] "is functional at certification standards" of "90 percent." On these facts, the district court's finding of reliability was not clearly erroneous.

## 3. The videotape and alleged "pseudo-cocaine"

Navarro claims that shortly after the stop of his Suburban, Trooper Stevens passed a package containing "pseudo-cocaine" to Trooper Baranowski, who smeared the the package near the driver's door so that when Stevens walked Dingo around the vehicle, the dog would alert on the odor. The district court found that the troopers did not transfer or plant a pseudo-cocaine substance on Navarro's vehicle. This finding was "based on the totality of the evidence," including testimony from expert witnesses and the troopers (who claimed they did no such thing). When reviewing the [\*\*\*10] denial of a motion to suppress evidence, this court reviews the district court's findings of fact only for clear error. *See Bradshaw*, 102 F.3d at 209.

186 F.3d 701, \*706; 1999 U.S. App. LEXIS 18287, \*\*14;  
1999 FED App. 0290P (6th Cir.), \*\*\*10

The magistrate judge and district court weighed the testimony of the experts and troopers, along with the admitted videotape, and came to the conclusion that the troopers did not behave as Navarro alleges. This finding of fact was not clearly [\*\*15] erroneous. Admittedly, the encounter between Stevens and Baranowski, as depicted on the videotape, looks unnatural and [\*707] may be subject to conflicting interpretations. However, the district court conducted a full and complete evidentiary hearing to determine whether "pseudo-cocaine" was exchanged between Troopers Stevens and Baranowski and whether Baranowski rubbed that substance on Navarro's vehicle to get Dingo to falsely alert.

This court has been able to review the videotape made of the stop of Navarro's vehicle. However, the simple fact that we have been able to evaluate this key piece of evidence on direct review does not change the fact that we review the district court's findings of fact for **clear error**. The magistrate judge was able not only to view the videotape, but also to hear from an array of witnesses who testified about either (1) the videotape itself or (2) the events depicted on it. The magistrate judge did not render her decision simply by viewing the videotape; in fact, she made it clear that her factual finding that none of the alleged wrongdoing took place was based in large part on the testimony of the officers, **whom she found credible**. n3 [HN5] Where, as [\*\*16] here, factual findings rest in [\*\*\*11] large part on credibility determinations, we afford district courts even greater deference. *See Cooke, 915 F.2d at 252*.

n3 Navarro attempts to call the officers' credibility into question by claiming that Kiefer and Baranowski testified that the tip came from the DEA (it in fact came from the Michigan State Police). However, neither Baranowski nor Kiefer testified to this effect. In fact, Stevens was the only person who testified that his informational source was the DEA. During cross-examination, Stevens was asked, "You didn't know who the source of the tip was except the DEA, correct?" Stevens responded, "Yes."

This response by Stevens, however, in no way stands for the proposition that the **ultimate source** for the tip was the DEA. At best, it only stands for the proposition that **Stevens obtained** the information from the DEA. In fact, the head of the DEA task force operating in northwestern Ohio testified that he could not rule out the possibility that someone from his agency may have independently contacted officers with information about Navarro. This seems a very real possibility, considering the fact that the stakeout by Kiefer and Baranowski was an OHP-DEA "joint operation." Needless to say, Navarro's implication that this is a contradiction in testimony that calls into question the officers' credibility is very weak.

[\*\*17]

We simply do not believe that the magistrate judge's finding of fact (adopted by the district court) that the troopers did not transfer or plant a pseudo-cocaine substance on Navarro's vehicle was clearly erroneous. At the outset, Navarro's contention that, if the troopers indeed intended to illegally "find" probable cause, that they would do so by waiting until they were **in front of a video camera**, seems strained. Moreover, an independent review of the videotape does not give us a settled feeling that the fleeting interaction between Stevens and Baranowski was the transfer of any object, yet alone a package of pseudo-cocaine. We also note that, even assuming **arguendo** that he could establish that an object was passed between the troopers, Navarro does not even attempt to show that (1) the object had an odor that would cause Dingo to alert, or (2) that the object was smeared on the car.

In his briefs and at oral argument, Navarro's able counsel has constructed a narrative that has at least a possibility of being true. Navarro believes that criminal police officers repeatedly follow a policy in which they deliberately stop Hispanic motorists on trumped-up charges, exchange [\*\*18] in full view of a police video camera a substance designed to cause a drug dog to alert, apply the substance to a motorist's car, and then either allow a drug dog to alert to the substance, or simply invade the interior of the car so that the dog can more easily alert to the multi-kilogram quantities of drugs suspected to be therein. However, we must emphasize that the [\*\*\*12] alternative scenario also could be true. Drug runners speed; police stop them for speeding; and a drug dog alerts to large quantities of drugs.

In such a circumstance, as an appellate court, we do not reweigh the evidence [\*708] presented below for the

purpose of determining which scenario has the greater possibility of being true. The job of weighing the evidence belongs to the trial court, which in this case exhaustively carried out its proper function. The magistrate judge heard from thirteen witnesses during the course of a five-day-long hearing. These thirteen witnesses generated 742 transcript pages of testimony. In denying the motion to suppress, the magistrate judge took into account the credibility determinations she was entitled to make, as well as the testimony of expert witnesses. Our only role is to [\*\*19] determine if the magistrate judge's ultimate conclusions, as reviewed and confirmed by the district court, were clearly erroneous. We see no basis for overturning a decision of the factfinders in this case, whichever way they decided. Where there are two permissible views of the evidence, the factfinder's choice between them cannot be clearly erroneous. *Hernandez v. New York*, 500 U.S. 352, 369, 114 L. Ed. 2d 395, 111 S. Ct. 1859 (1991) (quoting *Anderson v. Bessemer City*, 470 U.S. 564, 574, 84 L. Ed. 2d 518, 105 S. Ct. 1504 (1985)).

Moreover, Occam's Razor also supports the magistrate judge's decision. The conspiratorial theory offered by Navarro simply does not make much sense. Navarro would have us believe that Stevens passed pseudo-cocaine to Baranowski (which Baranowski then rubbed on the car), went back to his vehicle to get Dingo, and walked Dingo around the car. According to Navarro's theory, Dingo then alerted to the exact spot where the pseudo-cocaine was applied by Baranowski. This theory begs a simple question: **why would Stevens have risked passing the pseudo-cocaine on to [\*\*\*13] Baranowski when he simply could have applied the [\*\*20] substance to the car himself?** n4

n4 For that matter, Stevens could also more easily have passed Baranowski any pseudo-cocaine when the two were out of sight of the video camera, or could have instead conspired with Kiefer, during the seven hours they were together, to do the deed.

Navarro offers us two potential answers to this question, neither of which is particularly convincing. He first contends that if Stevens had applied the substance to the vehicle himself, Stevens would not have been able to control the location and timing of Dingo's alert because Dingo may have mistakenly alerted to Stevens (who would have been exposed to the odor of the substance). This explanation makes no sense, because Stevens would have obviously had the substance on his person **before** the alleged exchange with Baranowski. The videotape shows that Stevens walked around for approximately one minute (with, if Navarro is correct, pseudo-cocaine in his possession) before allegedly passing something on to his fellow trooper. [\*\*21] If Navarro's explanation for the passage were correct, Stevens would have become "coated" with the odor of pseudo-cocaine, **whether he passed the substance on to Baranowski or not.**

Navarro's second explanation is that the exchange was necessary because, if Stevens applied the pseudo-cocaine himself, the odor of the substance would dissipate in the time it took Stevens to go back to get his dog and walk it around the car. However, the videotape shows that approximately forty seconds took place between the moment when Baranowski would have allegedly rubbed the substance on the car and the instant Dingo alerted. n5 [\*\*709] Indeed, Stevens walked [\*\*\*14] Dingo around two-thirds of the car's perimeter before he arrived at the spot where Baranowski had allegedly rubbed the pseudo-cocaine. If Stevens had been so concerned about the substance's rate of dissipation, one wonders why he wouldn't have taken Dingo **directly** to the spot where Baranowski had rubbed the pseudo-cocaine. We also note that Navarro has not introduced one shred of evidence about the dissipation rate of pseudo-cocaine.

n5 Baranowski only left the side of Navarro's car a few seconds before Dingo alerted. However, Baranowski **was talking to Navarro** for much of the time he was standing beside the driver's door. In fact, Baranowski appears to have been engaging Navarro in conversation right up until the time he moved away from the vehicle to allow Dingo to sniff the door. Since Baranowski obviously would not have rubbed pseudo-cocaine on Navarro's driver's door during a time he had commanded Navarro's undivided attention by engaging him in conversation, Baranowski could have only rubbed a substance on the door in the few seconds before he had

started talking to Navarro. Approximately forty seconds passed between this window of opportunity and the time Dingo alerted.

The fact that Baranowski was standing next to the driver's door of the Suburban also calls Navarro's theory into question in another way: would a police officer really have taken the risk of rubbing pseudo-cocaine near the driver's door of a vehicle when the driver was sitting in the front seat? After all, if Baranowski had somehow inadvertently attracted Navarro's attention while he was allegedly smearing pseudo-cocaine on the car, he likely would have been "caught" by Navarro! One would think that a dishonest police officer would apply pseudo-cocaine to the portion of a vehicle where the officer would be least likely to be "caught" applying the substance.

[\*\*22]

Navarro also asserts in his brief that "too many objective factors recommend that, not only did the officers fabricate the basis for the stop, but they manufactured the probable cause necessary to subsequently search the vehicle, all to retroactively justify seizing a significant quantity of narcotics." In other words, Navarro is implying that if he alleges that numerous findings of fact made by the court were in error, the cumulative impact of these asserted errors may somehow constitute reversible error, even if each individual questioned finding does not. This is not the case, for Navarro's assertion ignores the fact that many of the alleged errant findings he cites are mutually exclusive. For example, if the officers did smear pseudo-cocaine on Navarro's vehicle, that would imply that, at least in this case, Dingo alerted properly. Moreover, if Trooper Stevens indeed had a practice of shoving Dingo into vehicles in order to get the dog to provide a "false" alert and, therefore, probable cause (as one [\*\*\*15] of Navarro's witnesses claimed), this would imply that the pseudo-cocaine theory is untrue (why would Stevens and Baranowski have gone to all this trouble when Stevens [\*\*23] could have just shoved Dingo into Navarro's car?).

In sum, the district court's denial of the motion to suppress was proper.

#### **B. "Meaningful review"**

Although the district judge made it explicitly clear that he was conducting a de novo review of the portions of the magistrate's report to which Navarro had objected, Navarro nonetheless makes the claim that the district court's review was not "meaningful" and, thus, violated his right to due process. Without citing any relevant case law, Navarro opines that "the district court exerted no effort to actually give the case the attention it required."

Navarro's argument is meritless. He presents absolutely no evidence showing that the district court exerted "no effort," yet still makes the outlandish accusation that "the district court dismissed the spirit of the notion [of de novo review] by resolving all factual disputes in favor of the government . . . ."

### **III**

For the foregoing reasons, we AFFIRM the denial of Navarro's motion to suppress and, therefore, AFFIRM his conviction. [\*\*\*16]

**CONCUR BY: HARRY W. WELLFORD; KAREN NELSON MOORE**

#### **CONCUR:**

HARRY W. WELLFORD, Circuit Judge, concurring. I am persuaded by [\*\*24] our standard of review in this kind of case, which is heavily dependent on factual and credibility findings by the magistrate judge and the district court, that we should affirm.

This case is troubling--necessarily so by reason of defendant's challenges to the integrity and good faith of the state

186 F.3d 701, \*709; 1999 U.S. App. LEXIS 18287, \*\*24;  
1999 FED App. 0290P (6th Cir.), \*\*\*16

troopers in effectuating the stop of the vehicle, and the subsequent search and seizure of a substantial quantity of contraband found in [\*710] defendant's vehicle. Like the other judges who have been involved in the trial and in this appeal, I have read the record carefully, and I have reviewed the tape of the happenings during the traffic stop.

It is well-settled that when reviewing the district court's factual findings, we must "consider the evidence in the light most favorable to the government." *United States v. Caicedo*, 85 F.3d 1184, 1188 (6th Cir. 1996); see also *United States v. Buchanan*, 72 F.3d 1217, 1223 (6th Cir. 1995). If one were to ignore this standard in this difficult case, there would be a temptation to arrive at the different result urged upon us by defendant. We, however, must follow the law.

The defendant and his witnesses took issue [\*\*25] with the testimony of the trooper who clocked the vehicle in question as exceeding the lawful speed limit, as well as the alleged tip which alerted the troopers to the particular type of vehicle that purportedly was transporting drugs. Furthermore, the defendant contested the circumstances described by the troopers prior to the stop, and, most vehemently, the circumstances involved in the use of the trained drug-sniffing canine, Dingo. Moreover, there was some controversy about what happened between troopers Stevens and Baranowski as portrayed on the video tape, and whether they singled out [\*\*\*17] Latinos like the defendant for traffic stops and drug searches. A trier of fact might sincerely and honestly reach different conclusions based on divergent factual determinations in respect to these (and other) controversies mentioned in this case.

Viewing the evidence in a light most favorable to the government's proof as determined by the factual findings of the magistrate judge and the district judge, I conclude that we should affirm. Expert proof was developed in this case which was conflicting as to both the capabilities of Dingo, the canine, which alerted to the contraband in the [\*\*26] vehicle, and what transpired on the video tape between the troopers as they approached the type of vehicle they had purportedly been looking for over a several hour stretch. Once again, it was for the trial judge to make the necessary credibility findings on the defendant's motion to suppress.

Judge Boggs, I believe, properly devoted some attention to the circumstances of the initial stop. It is important to point out, however, that the defendant in his appellate brief at p. 29, concedes that "[he] never challenged the pretextual nature of the stop." In any event, Trooper Kiefer testified that his radar unit had been calibrated earlier that day and was, in fact, accurate and working properly. There was inadequate proof that Trooper Kiefer was involved in any improper stops of Latinos. The Supreme Court has stated, unanimously, that "subjective motivations play no role in ordinary, probable-cause Fourth Amendment analysis." *Whren v. United States*, 517 U.S. 806, 813, 135 L. Ed. 2d 89, 116 S. Ct. 1769 (1996). Thus, we do not probe into the officer's state of mind in making the traffic stop, but rather whether probable cause for the stop was demonstrated.

Despite [\*\*27] the defendant's assertions to the contrary, there was substantial evidence admitted to support the proposition that Dingo was a reliable drug-detecting canine. First, Stevens and Dingo were certified in 1990. Thereafter, every two years, Dingo passed his recertification. During that time period, Stevens trained with his dog between 1500 and 2000 hours. Additionally, Stevens produced for the court [\*\*\*18] numerous certificates, recertifications, and commendations which had been earned by Dingo for his reliability. The most recent recertification, prior to the sniff which occurred in this case, was approximately forty days before the event. Moreover, Stevens testified that since 1990, Dingo had alerted accurately between ninety and ninety-three percent of the time. Even Dr. Craig, the defendant's expert, agreed that a drug-detecting canine with a ninety percent accuracy rate should be considered [\*711] reliable. See *United States v. Berry*, 90 F.3d 148, 153 (6th Cir. 1996). The district court's finding that Dingo was reliable was not clearly erroneous.

For all of the reasons stated by Judge Boggs and under the appropriate standard of review, I concur in the opinion that [\*\*28] we shall AFFIRM. [\*\*\*19]

KAREN NELSON MOORE, Circuit Judge, concurring in the result. I am troubled by several aspects of this difficult case. First, I find the actions of Troopers Stevens and Baranowski, as recorded on video tape, to be very suspicious. However, because I cannot conclude that the district court clearly erred in denying Navarro's motion to

186 F.3d 701, \*711; 1999 U.S. App. LEXIS 18287, \*\*28;  
1999 FED App. 0290P (6th Cir.), \*\*\*19

suppress, I am compelled to concur in the result.

My second concern, and the reason for my separate writing, relates to the allegations of race and ethnicity targeting by the Ohio Highway Patrol ("OHP") and the handling of evidence of such targeting in this and similar cases. Navarro attempted to introduce evidence from an unrelated civil rights suit which alleges that Trooper Kiefer and other OHP officers have singled out Hispanic motorists for investigatory stops on the basis of minor or nonexistent traffic violations. The district court refused to consider this evidence, and, as Judge Boggs correctly points out, evidence of racial or ethnic targeting is not relevant to the determination of whether the troopers had probable cause to stop Navarro's vehicle. *See Whren v. United States*, 517 U.S. 806, 813, 135 L. Ed. 2d 89, 116 S. Ct. 1769 (1996). [\*\*29]

Although under *Whren* an officer's motive in stopping a speeder is irrelevant for Fourth Amendment analysis, the selective enforcement of traffic laws based solely on race or ethnicity would violate the Equal Protection Clause of the Fourteenth Amendment. *See United States v. Avery*, 137 F.3d 343, 355 (6th Cir. 1997). In a proper case, I believe that a defendant in Navarro's position could achieve suppression of the evidence or dismissal of the prosecution by demonstrating that the investigatory practice had a discriminatory purpose and a discriminatory effect. *See United States v. Armstrong*, 517 U.S. 456, 465, 134 L. Ed. 2d 687, 116 S. Ct. 1480 (1996) (discussing selective prosecution elements); *United States v. Jennings*, 1993 U.S. App. LEXIS 926, No. 91-5942, 1993 WL 5927, at \*4 (6th Cir. Jan. 13, 1993) (unpublished disposition) [\*\*\*20] (suggesting suppression as remedy for seizure of evidence in violation of Equal Protection Clause); *Futernick v. Sumpter Township*, 78 F.3d 1051, 1056 (6th Cir.) (noting that a "court should dismiss a case, or take other appropriate action" if defendant proves selective enforcement), *cert. denied*, 519 U.S. 928 (1996). n1

n1 Alternatively, a victim of selective enforcement could file a § 1983 action. *See Futernick*, 78 F.3d at 1056-57.

In the instant case Navarro sought to introduce the complaint from an unrelated civil rights suit as evidence in support of his Fourth Amendment claims, not to demonstrate that he had been the victim of selective law enforcement in violation of the Equal Protection Clause. The complaint does not provide evidence of disparate treatment of Hispanic motorists, moreover, and thus would not be sufficient to establish an equal protection claim. *See Armstrong*, 517 U.S. at 465. A selective enforcement claim in Navarro's case would be weakened further by the undisputed evidence that the investigation of him resulted from a tip -- a fact that undermines any assertion that he was stopped solely on the basis of his ethnicity. *See Avery*, 137 F.3d at 354 n.5. For these reasons I conclude that the district [\*\*31] court did not err in refusing to consider this evidence. The district courts should remain open, however, to the possibility of Fourteenth Amendment selective enforcement [\*712] challenges in future criminal prosecutions.

Analysis

As of: Jan 31, 2007

**UNITED STATES OF AMERICA, Plaintiff-Appellee, v. BARRY L. DARAS,  
Defendant-Appellant.**

**No. 98-4286**

**UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT**

*1998 U.S. App. LEXIS 26552*

**September 29, 1998, Submitted  
October 16, 1998, Decided**

**NOTICE:** [\*1] RULES OF THE FOURTH CIRCUIT COURT OF APPEALS MAY LIMIT CITATION TO UNPUBLISHED OPINIONS. PLEASE REFER TO THE RULES OF THE UNITED STATES COURT OF APPEALS FOR THIS CIRCUIT.

**SUBSEQUENT HISTORY:** Reported in Table Case Format at: *1998 U.S. App. LEXIS 35588*.

**PRIOR HISTORY:** Appeal from the United States District Court for the Eastern District of Virginia, at Alexandria. Claude M. Hilton, Chief District Judge. (CR-98-79).

**DISPOSITION:** AFFIRMED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of the judgment from the United States District Court for the Eastern District of Virginia, which found him guilty of driving under the influence of alcohol and speeding. Defendant asserted that the breath test, the field sobriety tests, and the evidence offered to prove the accuracy of the radar unit were inadmissible.

**OVERVIEW:** Defendant was stopped for speeding after being clocked by a radar gun. He failed several field sobriety tests and ultimately a breathalyzer test. The trial court convicted him of speeding and driving under the influence of alcohol. He challenged the decision and the admissibility of the evidence. On appeal the court affirmed. The evidence of the breathalyzer was properly admitted because the reliability of the specific machine used to perform the test was proved in prior cases and the evidence was relevant. Any procedural defects went only to the weigh of the evidence, not its admissibility, because the Assimilative Crimes Act assimilated only state substantive law pertaining to the elements of an offense and its punishment and not state procedure or rules of evidence. Further, the officer presented evidence that he was certified to use the machine and that it was working properly. The field sobriety tests were generally not scientific and required no expert testimony for them to be admissible. The accuracy of the radar unit was proved by two different calibrations, only one of which was challenged. Further, the officer's visual estimate was sufficient to support a

conviction.

**OUTCOME:** The court affirmed defendant's conviction for speeding and driving under the influence of alcohol.

**CORE TERMS:** breathalyser, breath, sobriety, machine, radar, alcohol content, reliability, reliable, scientific evidence, breath test, methodology, scientific, accuracy, mph, scientifically, admissibility, speeding, influence of alcohol, tuning fork, assimilating, calibrate, attesting, detection, admitting, untested, novel, grams, administered, horizontal, noticed

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility*

*Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence Evidence > Scientific Evidence > Sobriety Tests*

[HN1] The court reviews the magistrate judge's evidentiary rulings for an abuse of discretion. The court must affirm the convictions if, viewing the evidence and inferences in the light most favorable to the government, substantial evidence supports them.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility*

*Military & Veterans Law > Military Justice > Jurisdiction > Assimilation*

[HN2] A federal prosecution under the Assimilative Crimes Act assimilates state substantive law pertaining to the elements of an offense and its punishment. It does not generally adopt state procedure or rules of evidence. Accordingly, the failure to follow state procedures relating to the proper administration of breathalyzers goes to the weight, and not the admissibility, of the test.

**COUNSEL:** Richard E. Gardiner, Fairfax, Virginia, for Appellant.

Helen F. Fahey, United States Attorney, Jonathan R. Barr, Special Assistant United States Attorney, Alexandria, Virginia, for Appellee.

**JUDGES:** Before ERVIN and WILLIAMS, Circuit Judges, and HALL, Senior Circuit Judge.

**OPINION: OPINION**

PER CURIAM:

Barry Daras appeals from a district court order affirming a magistrate judge's judgment order finding Daras guilty, following a bench trial, of driving under the influence of alcohol and with a breath alcohol content of .08 grams or above, in violation of 18 U.S.C. § 13 (1994) (assimilating *Virginia Code* § 18.2-266), and of speeding, in violation of 32 C.F.R. § 634.25(f) (1998), (assimilating *Virginia Code* [\*2] § 46.2-870). The infractions occurred on August 24, 1997, around 2:50 a.m., at Ft. Belvoir, a military installation in Virginia. On that date, Military Police Officer Sean Grier observed Daras drive his vehicle through a posted 35 mph zone of the military base. Grier used a radar detection device to measure Daras' speed at 56 mph, and subsequently stopped him for speeding.

When Grier approached Daras, he noticed that Daras' eyes were bloodshot and that he appeared to be confused. He smelled the odor of alcohol on Daras' breath and noticed an open container of beer in the vehicle. Grier testified that Daras had difficulty getting his driver's license out of his wallet and that his speech was somewhat slurred. Daras told

Grier that he had "had a few drinks at the club."

Grier then administered three pre-exit field sobriety tests: the finger count, the alphabet test, and the counting test. Daras was unable to perform two of the three tests accurately. Grier then asked Daras to exit his vehicle. He conducted three post-exit field sobriety tests: the walk and turn test, stand on one leg test, and the horizontal gaze nystagmus test of involuntary eye movement. Grier testified that Daras [\*3] did poorly on these tests and that the results convinced him that Daras was under the influence of alcohol. Accordingly, he arrested Daras and took him to the military police station, where he used a breathalyser machine called the "Intoxilyzer 5000" to take a sample of Daras' breath. The machine reflected that Daras' breath alcohol content was .10 grams per 210 liters of breath.

On appeal, Daras challenges the admissibility of the breath test, the field sobriety tests, and the evidence offered by the Government to prove that Grier's radar detection unit was properly calibrated. He alleges that without such evidence, the evidence is insufficient to support his convictions. [HN1] We review the magistrate judge's evidentiary rulings for an abuse of discretion. See *Benedi v. McNeil-P.P.C., Inc.*, 66 F.3d 1378, 1383 (4th Cir. 1995). We must affirm the convictions if, viewing the evidence and inferences in the light most favorable to the government, substantial evidence supports them. See *United States v. Singh*, 54 F.3d 1182, 1186 (4th Cir. 1995).

Daras contends that the breath test should not have been admitted because the Government failed to present any [\*4] evidence that the Intoxilyzer 5000 was a scientifically reliable device. He avers that the trial court should have required the Government to prove the scientific validity of the methodology by which the device measures blood alcohol content, using the standards for assessing the reliability of scientific evidence set forth in *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579, 592-93, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993). But *Daubert* merely requires that the proffered scientific evidence be relevant and reliable. *Benedi*, 66 F.3d at 1384. Daras does not dispute that the evidence is relevant. Moreover, the reliability of the methodology, that is, the scientific technique by which breathalysers measure breath alcohol content, is well established. See *California v. Trombetta*, 467 U.S. 479, 489, 81 L. Ed. 2d 413, 104 S. Ct. 2528 (1984) (recognizing that accuracy of Intoxilyzers has been certified by the National Highway Traffic Safety Administration (NHTSA) since 1973); *United States v. Brannon*, 146 F.3d 1194, 1196 (9th Cir. 1998) (same); *United States v. Reid*, 929 F.2d 990, 994 (4th Cir. 1991) [\*5] (stating that breathalyser is the "best means of obtaining evidence of the breath alcohol content"). We note Daras' contention that our comment in *Reid* has no bearing on this case because it related to breathalysers in general and not specifically to the Intoxilyzer 5000. While Daras presents no reason to conclude that different breathalyser machines use a different scientific methodology, we note that the device used in *Brannon* was the same type of breathalyser used in this case, the Intoxilyzer 5000. See *Brannon*, 146 F.3d at 1195. n1 Daras further avers that the breathalyser results were inadmissible because the Government failed to comply with an allegedly assimilated Virginia statutory provision requiring proof that any breath test used by the prosecution be conducted by a person with proper training using equipment approved by the Virginia Division of Forensic Science. See Va. Code Ann. § 18.268.9. [HN2] A federal prosecution under the Assimilative Crimes Act "assimilates state substantive law pertaining to the elements of an offense and its punishment. It does not generally adopt state procedure or rules of evidence." See *United States v. Price*, 812 F.2d 174, 175 (4th Cir. 1987). [\*6] Accordingly, courts have held that the failure to follow state procedures relating to the proper administration of breathalysers goes to the weight, and not the admissibility, of the test. See *Brannon*, 146 F.3d at 1196; *United States v. Sauls*, 981 F. Supp. 909, 911 (D. Md. 1997).

n1 Many federal courts hold that *Daubert* is limited to cases involving novel, unique, or untested scientific evidence. See *Thornton v. Caterpillar, Inc.*, 951 F. Supp. 575, 578 (D.S.C. 1997); *Waitek v. Dalkon Shield Claimants Trust Fund*, 934 F. Supp. 1068, 1087-89 n.10 (N.D. Iowa 1996). We need not decide in this case whether *Daubert's* application is so limited, or whether breathalysers are novel, unique, or untested scientific evidence because we find that the breathalyser used in this case was both relevant and reliable.

We note alternatively, that the record in this case indicates that the Government demonstrated the reliability of the

equipment and the [\*7] proper administration of the test. It has already been established that the Intoxilyzer 5000 is a scientifically reliable device for measuring breath alcohol content. Further, the Government submitted into evidence a printout by the machine itself which stated that the machine had been tested and found to be accurate by the Division of Forensic Science on May 23, 1997, approximately three months prior to the date the test was conducted. Officer Grier also testified that he was a certified operator of the machine and that he tested it immediately before Daras' breath test to ensure that it was working properly at the time he administered it. Finally, Daras concedes that Grier has been properly trained to operate the machine, and identifies no error committed in the performance of the test. Accordingly, we find that the magistrate judge properly admitted and relied on the results of the breathalyser test.

Daras next challenges the admissibility of the field sobriety tests, arguing that the Government again failed to show the scientific reliability of such tests under Daubert. With the exception, however, of the horizontal gaze nystagmus (HGN) test, the field sobriety tests were [\*8] not scientific, as they involved no methodology but rather objective observations of an individual's performance on simple psychomotor tests. There was no need for any expert testimony regarding these tests. See *Hulse v. State*, 1998 MT 108, 961 P.2d 75, 93 (Mont. 1998) (recognizing that the HGN is distinguishable from other field sobriety tests because it is a scientific test). As for the HGN, we need not decide whether such tests are scientifically reliable, n2 because the results of the breathalyser, the remaining field sobriety tests, and Officer Grier's testimony were more than adequate to support Daras' conviction.

n2 For a survey of the case law discussing the reliability of such tests, see *State v. O'Key*, 321 Ore. 285, 899 P.2d 663 (Or. 1995).

Finally, Daras contends that the trial court erred by admitting a Certificate of Calibration attesting to the accuracy of the radar unit used by Officer Grier, and by admitting a Certificate of Accuracy attesting to the accuracy [\*9] of the 35 mph tuning fork used to calibrate the radar unit. The Government also presented, however, a Certificate of Accuracy for a 65 mph tuning fork which was also used to calibrate the radar unit. Daras raises no objection to the admission of this evidence which, by itself, was sufficient to establish the accuracy of the radar unit and support his speeding conviction. See *United States v. O'Shea*, 952 F. Supp. 700, 703 (D. Colo. 1997). Moreover, the Government correctly points out that the officer's visual estimate is also sufficient, by itself, to support a conviction. See *United States v. Wornom*, 754 F. Supp. 517, 519 (W.D. Va. 1991). We therefore affirm the order of the district court. We dispense with oral argument because the facts and legal contentions are adequately presented in the materials before the court and argument would not aid the decisional process.

**UNITED STATES OF AMERICA, Plaintiff-Appellee, v. CECIL R. FERGUSON,  
Defendant-Appellant.**

**No. 91-6316**

**UNITED STATES COURT OF APPEALS FOR THE SIXTH CIRCUIT**

*989 F.2d 202; 1993 U.S. App. LEXIS 5002*

**October 1, 1992, Argued**

**March 19, 1993, Decided**

**March 19, 1993, Filed**

**SUBSEQUENT HISTORY:** [\*\*1] Vacated on Grant of Rehearing En Banc April 26, 1993, Reported at: *1993 U.S. App. LEXIS 27861*.

**PRIOR HISTORY:** On Appeal from the United States District Court for the Western District of Tennessee. District No. 91-20024. Jerome Turner, District Judge.

**DISPOSITION:** REVERSED and VACATED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed the judgment of the United States District Court for the Western District of Tennessee, which denied his motion to suppress and convicted him of possession with intent to distribute cocaine in violation of *21 U.S.C.S. § 851(a)(1)*.

**OVERVIEW:** An officer became suspicious of the activities of defendant and his companion at a motel. The officer positioned himself across the street so that he could observe the two as they drove to a room, drove to another car to retrieve a briefcase, and returned to the room. The officer noticed that their car had no visible license plate and pulled them over. The officer observed a pistol and envelopes containing cocaine in the car and arrested defendant. The officer then found plastic bags, scales, and drug notes in the briefcase. Defendant appealed his conviction for possession with intent to distribute cocaine in violation of § 851(a)(1). The court held that the denial of a motion to suppress the weapons and drugs seized during the arrest was clearly erroneous. A reasonable officer would not have stopped defendant because his vehicle had no visible plate, absent some additional invalid purpose. The court found that the officer sought to conduct an investigatory drug stop based on his testimony that one of the reasons he stopped the vehicle was what he observed at the motel and that he made no inquiry into the absence of the plate, which he did not notice until he followed the vehicle.

**OUTCOME:** The court reversed defendant's possession conviction and vacated his sentence.

**CORE TERMS:** license plate, visible, pretextual, reasonable officer, suspicion, motel, suspicious, driving, mile, police officer, motivation, briefcase, drove, motion to suppress, illegitimate, license, pulled, driver, probable cause, drug activity, investigatory, cocaine, traffic, front seat, stopping, noticed, guard, objective test, invalid, mph

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN1] In determining when an investigatory stop is unreasonably pretextual, the proper inquiry is not whether the officer could validly have made the stop but whether under the same circumstances a reasonable officer would have made the stop in the absence of the invalid purpose. The "reasonable officer" standard is the controlling standard regarding pretextual stops.

**COUNSEL:**

For UNITED STATES OF AMERICA, Plaintiff - Appellee: Christopher E. Cotten, Asst., U.S. Attorney, Argued & Briefed, 901-544-4013, Office of the U.S. Attorney, 167 N. Main Street, Suite 1026 Federal Office Building, Memphis, TN 38103.

For CECIL RAYMOND FERGUSON, Defendant - Appellant: Eugene A. Laurenzi, Argued & Briefed, 901-528-1702, Agee, Allen, Godwin, Morris & Laurenzi, 263 Court Street, Second Floor, Memphis, TN 38103.

**JUDGES:** Before: KEITH, JONES, and BOGGS, Circuit Judges. KEITH, Circuit Judge, delivered the opinion of the court, in which JONES, Circuit Judge, joined. BOGGS, Circuit Judge, delivered a separate dissenting opinion.

**OPINION BY: KEITH**

**OPINION:**

[\*202] KEITH, Circuit Judge. Appellant, Cecil R. Ferguson, appeals his conviction and sentence for possession with intent to distribute cocaine, in violation of 21 U.S.C. § 841(a)(1). For the foregoing reasons, we REVERSE appellant's conviction and VACATE his sentence.

I.

At approximately 1:30 a.m. on October 18, 1990, Officer Ernie Writesman was on routine patrol at the Royal Oaks Motel parking lot in Memphis, Tennessee. While [\*203] talking with the motel's security guard and conducting a security check, Writesman observed Ferguson drive into the parking lot in a 1977 Lincoln. Ferguson was followed by Leonard Lester, who was driving a 1977 Ford.

Writesman observed Ferguson and Lester park their cars opposite one another near room 203. Ferguson then got out of his car and walked towards Writesman and the guard. The guard asked Ferguson if [\*\*2] he could help him. Ferguson replied that he was looking for room 212 to return the Lincoln which he had borrowed earlier. After getting directions from the guard, Ferguson proceeded back towards his vehicle. Having overheard the conversation between Ferguson and the guard, Writesman drove towards the front of the motel where he saw Lester lay down across the front seat of the Ford. Suspicious of Ferguson and Lester, Writesman drove across the street where he could observe them undetected.

Writesman observed Ferguson get into the Ford with Lester. Lester drove to a position near room 410. Ferguson entered the room and in a few minutes came out and got back in the Ford. The two men then drove to the Lincoln,

where Ferguson retrieved a grey briefcase. Ferguson got back into the Ford, and he and Lester again drove to room 410. Ferguson entered the room with the briefcase and in a few minutes returned, still carrying the briefcase. Ferguson then got back into the Ford with Lester and they left the motel parking lot heading east on Summer avenue. Having observed this activity, Writesman followed the men and pulled them over when he noticed, for the first time, that Lester's Ford had no visible [\*\*3] license plate.

Upon stopping the Ford, Lester got out of the vehicle and walked over to Writesman, who asked Lester for his driver's license. Writesman asked Lester "what he was up to" and Lester stated that he had been at the motel with a woman. Writesman then placed Lester in the back seat of the police car and called for assistance. As Writesman was waiting for backup, Ferguson remained in the front seat of the Ford. Once his backup arrived, Writesman approached the Ford and observed a .22 caliber pistol laying on the front seat. Writesman also noticed a plastic bag in the vehicle containing several envelopes, the contents of which were later identified as cocaine. Ferguson, who was sitting in the front seat holding a briefcase, was then placed under arrest. A search of the briefcase revealed zip-lock plastic bags, scales, and what are apparently drug notes.

The government contends that Writesman stopped Lester's vehicle because it had no visible license plate, which is a violation of Memphis City Ordinance 21- 269. When asked at the suppression hearing why he stopped the vehicle, Writesman stated: "There were a couple of reasons why I stopped it. Number one was the activity that [\*\*4] I just observed at the Royal Oak Motel. And then the fact that it had no license plate on it that could be seen." (App. at 66). Although Writesman stated that one of the reasons he stopped the vehicle was because it had no visible license plate, while on the scene of the stop, he made no inquiry or investigation concerning the absence of a visible license plate on the Ford, nor did he give Lester a citation for having no visible license plate. It was not until Writesman reviewed photographs from the scene of the stop that he learned that there was a drive out tag lying on the shelf of the rear window of the Ford.

Ferguson and Lester were charged with possession of cocaine with intent to distribute, in violation of *21 U.S.C. § 841(a)(1)* and *18 U.S.C. § 2*. They were also charged with carrying and using a firearm during and in relation to a drug trafficking crime, in violation of *18 U.S.C. § 924(c)*. Ferguson filed a motion to suppress the evidence seized during his arrest, alleging that the stop and search of the Ford was "pretextual, unreasonable and illegal," in that no probable [\*\*5] cause existed for the stop. (App. at 6). This motion was heard by a magistrate who concluded that the stop and search was based on a reasonable suspicion and was not pretextual. The magistrate's recommendation was adopted by the district court.

[\*204] Pursuant to a negotiated plea agreement, Ferguson pled guilty to the drug offense and the government dismissed the weapons charge. Ferguson reserved the right to appeal the denial of his motion to suppress. At sentencing, the court refused to consider Ferguson's challenge to the validity of two prior state felony convictions used to categorize him as a career offender under the Sentencing Guidelines. On appeal, Ferguson argues that the court erred in denying his motion to suppress and in categorizing him as a career offender. Each of these issues are discussed below.

## II.

Ferguson contends that his Fourth Amendment right against unreasonable searches and seizures was violated because Officer Writesman's stop and search of Lester's vehicle was unreasonably pretextual. Specifically, Ferguson argues that the absence of a visible license plate on the Ford served as a pretext to stop and search the vehicle for drugs. The district court, however, [\*\*6] found that the stop was based on probable cause and was not pretextual. We must review the district court's findings of fact as to Ferguson's motion to suppress under the clearly erroneous standard. *United States v. Duncan*, 918 F.2d 647, 650 (6th Cir. 1990), cert. denied, 114 L. Ed. 2d 461, 111 S. Ct. 2055 (1991).

Ferguson argues that the weapon and drugs seized as a result of the stop should not have been admitted into evidence against him. See *Wong Sun v. United States*, 371 U.S. 471, 486-87, 9 L. Ed. 2d 441, 83 S. Ct. 407 (1963) (Court suppressed the use of narcotics discovered as a result of illegal police activity as "fruit of the poisonous tree").

This Circuit's standard for determining when a police investigatory stop is illegally pretextual is explained in *United States v. Pino*, 855 F.2d 357, 361 (6th Cir. 1988), **cert. denied**, 493 U.S. 1090, 110 S. Ct. 1160, 107 L. Ed. 2d 1063 (1990). In *Pino*, we adopted the Eleventh Circuit's analysis regarding pretextual stops, applying the reasoning of *United States v. Smith*, 799 F.2d 704 (11th Cir. 1986), **cert. denied**, U.S. , 112 S. Ct. 428, 116 L. Ed. 2d 448 (1991). [\*\*7] In *Smith*, the Eleventh Circuit wrote:

That [HN1] in determining when an investigatory stop is unreasonably pretextual, the proper inquiry . . . is not whether the officer **could** validly have made the stop but whether under the same circumstances a reasonable officer **would** have made the stop in the absence of the invalid purpose.

799 F.2d at 709 (emphasis in original). We note that the "reasonable officer" standard articulated in *Smith* and adopted by this Court in *Pino* is the controlling standard in this Circuit regarding pretextual stops. *Pino*, 855 F.2d at 361; **see also** *United States v. Crotinger*, 928 F.2d 203, 206 (6th Cir. 1991).

In *Smith*, a Florida Highway Trooper and a Drug Enforcement Agent followed two men traveling on Interstate 95 in a 1985 Mercury. The Trooper testified that they followed the vehicle because the men matched a drug courier profile. According to the Trooper, they followed the vehicle for about a mile and a half and pulled the vehicle over when they noticed the vehicle start to weave. After stopping the men, the Trooper questioned the driver about the ownership [\*\*8] of the vehicle and also called for a drug dog to sniff the vehicle for drugs. With the assistance of the dog, the officers discovered cocaine in the trunk of the vehicle. The two men were arrested and charged with cocaine possession and conspiracy to distribute. They filed motions to suppress the cocaine found in their trunk, alleging that the stop of their vehicle was unreasonable. The trial court ruled that the stop was legal.

On appeal, the Eleventh Circuit wrote that "the stop was unreasonable not because the officer secretly hoped to find evidence of a greater offense, but because it was clear that an officer would have been uninterested in pursuing the lesser offense absent that hope." 799 F.2d at 710. In analyzing the objective evidence in the case, the court noted that:

What turns this case is the overwhelming objective evidence that [Agent] Vogel had no interest in investigating possible [\*\*205] drunk driving charges: he began pursuit before he observed any "weaving" and, even after he stopped the car, he made no investigation of the possibility of intoxication. . . . Based on this objective evidence, we conclude that a reasonable officer would not have [\*\*9] stopped the car absent an additional, invalid purpose.

799 F.2d at 710-11. We think that the investigatory stop at issue in the instant case is disturbingly similar to the stop that was found to be pretextual in *Smith*.

In this case, Officer Writesman began his pursuit of Ferguson and Lester before he noticed that Lester's vehicle had no visible license plate. Writesman became suspicious of the two men when he saw Lester lay down across the front seat of the Ford, shortly after overhearing Ferguson's conversation with the guard. Writesman positioned himself across the street from the motel so that he could observe Ferguson and Lester's activity from a position of concealment. He observed Ferguson get out of his vehicle and then into the vehicle with Lester. He observed them drive to room 410, where Ferguson entered the room and came out a few minutes later. He continued to observe the men drive back to the Lincoln to retrieve a briefcase and then back to room 410, where Ferguson entered the room with the briefcase. When the two men finally left the motel parking lot, heading east on Summer avenue, Writesman followed them. According to Writesman's testimony, [\*\*10] he did not notice that Lester's vehicle did not have a visible license plate until he began following the vehicle. Furthermore, Writesman stated that one of the reasons he stopped the vehicle was because of what he observed at the motel. We also think it is significant that Writesman made no inquiry or investigation whatsoever concerning the absence of a visible license plate on the Ford, nor did he give Lester a citation for not having a visible license plate.

Based on our review of the evidence in this case, we do not believe that a "reasonable officer" would have stopped Lester because his vehicle had no visible license plate, absent some additional, invalid purpose. The objective evidence,

which includes Writesman own testimony, shows that Writesman was not interested in giving Lester a warning or a citation for driving a vehicle with no visible license plate. Although Writesman testified that he routinely stops vehicles that do not display a visible license plate, there is overwhelming evidence that Writesman stopped the vehicle because he wanted to conduct an investigatory drug stop, suspicious of the activity he observed at the motel. Accordingly, we find that the district [\*11] court's denial of Ferguson's motion to suppress the weapon and drugs seized during his arrest is clearly erroneous.

This case is distinguishable from **Pino** and **Crotinger**, where this Court applied the **Smith** analysis and found that the challenged police stops were not illegally pretextual in either case. In **Pino**, an officer observed a vehicle swerving on and off the freeway, nearly hitting the guardrail. The officer pulled the vehicle over, questioned the driver, and decided to give the driver a citation and to arrest the driver for illegal lane changing. **Pino**, 855 F.2d at 358-59. Applying the "reasonable officer" analysis from **Smith**, we held that the stop of the vehicle was not pretextual, noting that the officer's "observation of the swerving vehicle gave him probable cause to believe that Pino had violated one or more . . . Tennessee motor vehicle statutes." *Id.* at 361.

In **Crotinger**, an officer using a speed radar detector pulled over a vehicle for going 66 mph in a 55 mph zone. Upon approaching the car, the officer observed white pills on the floor and detected the smell of marijuana. The officer [\*12] obtained written consent from the owner of the vehicle to conduct a search of containers and compartments within the vehicle. A search was conducted and marijuana was found. The defendant, however, challenged the introduction of the marijuana as evidence against him, on the ground that it was illegally obtained as the result of a pretextual traffic stop. We rejected this argument and held that probable cause existed for stopping the vehicle and that "objectively, it is reasonable for a police officer operating a speed trap to stop and ticket [\*206] vehicles going 66 mph in a 55 mph zone." **Crotinger**, 928 F.2d at 206.

Based on clearly established precedent in this Circuit, we think the district court committed reversible error by denying Ferguson's motion to suppress. Therefore, we reverse Ferguson's conviction. Accordingly, we need not address Ferguson's argument that the district court erred by refusing to consider his challenge to the validity of two prior convictions used to categorize him as a career offender.

III.

For the foregoing reasons, we **REVERSE** appellant's conviction and **VACATE** his sentence.

**DISSENT BY: BOGGS**

**DISSENT:**

BOGGS, Circuit Judge, dissenting. There [\*13] is only one question posed by this case: would "the reasonable police officer," an objective construct, stop a car driving at 1 a.m. with no visible license plate? The district court found as a fact that the reasonable officer **would** have made such a stop. There is no basis in the record, and no basis in common sense, for holding that finding clearly erroneous. Therefore, the district court's ruling and the defendant's conviction must stand, and I respectfully dissent.

Although the court professes allegiance to the objective test, it buttresses its conclusion with subjective evidence and concentrates primarily on Officer Writesman's actions after the stop was made. The court displays its reliance on a subjective test in this summary of its reasoning: "Although Writesman testified that he routinely stops vehicles that do not display a visible license plate, there is overwhelming evidence that Writesman stopped the vehicle because he wanted to conduct an investigatory drug stop, suspicious of the activity he observed at the motel." (slip op. at 7) This confuses the analysis. There is no question that Writesman was partially motivated by his suspicion of drug activity. He admitted [\*14] his suspicion on the stand. However, the existence of an illegitimate motivation does not render a concurrent legitimate motivation pretextual. To the contrary, it is irrelevant. The proper inquiry is whether a reasonable

officer would have stopped Ferguson and Lester "in the **absence** of an illegitimate motivation." *Smith*, 799 F.2d at 708 (emphasis added). By focusing entirely on the illegitimate motivation and whether it was the true or dominant reason for the stop, the court, despite ostensibly adhering to the objective test, has applied a subjective test.

This holding has several undesirable consequences. First, the court appears to be reserving the right to declare any stop unreasonable when it believes that the ostensible reason -- no matter how reasonable and justified by the circumstances -- is not the true or dominant motivation for the stop. Second, the court's holding apparently presumes a constitutional right to be free from public observation based on suspicious conduct that does not amount to probable cause. No such right exists. See, e.g., *United States v. Knotts*, 460 U.S. 276, 281, 75 L. Ed. 2d 55, 103 S. Ct. 1081 (1983). The essence [\*15] of good police work is to notice what appears to be out of the ordinary, the possible precursors or indicia of unlawful conduct, to take appropriate steps to confirm or deny those suspicions, within constitutional limits, and then to take appropriate action when violations are observed or probable cause appears. That is exactly what happened here.

Officer Writesman made no bones about the fact that his observation led him to believe that unlawful conduct might be afoot. In fact, Officer Writesman admitted that he did not notice the missing license until, prompted by the suspicious activity at the motel, he began following the Ford. Therefore, Officer Writesman probably would not have noticed the license violation if he had not followed up on his suspicions. However, these circumstances do not alter our analysis. Conduct arousing suspicion of criminal activity does not immunize a citizen from being stopped for a different, though significant, violation of the law. On the contrary, suspicious conduct is likely to attract police scrutiny and increase the probability of being stopped for traffic violations or other offenses. Increased [\*207] scrutiny alone is not a constitutional violation. [\*16] A citizen's constitutional rights are violated only if the stated motivation for the stop is not objectively reasonable and is thus an **unreasonable** pretext for an illegitimate motivation.

*Smith*, *Pino*, and *United States v. French*, 974 F.2d 687 (6th Cir. 1992), all involve this same situation -- an officer observing suspicious conduct, following a vehicle, and making a traffic stop based on alleged violation of traffic regulations. In each of these cases, the traffic violation is, in some sense, a "pretext" to the end of obtaining information about the suspected crime, and the suspicion is a "but-for" cause of the stop, because the officer would not have been in a position to observe the violation had it not been for the suspicion.

Of course, not every minor violation of traffic regulations justifies a stop. As the Eleventh Circuit stressed, the question is not whether a reasonable officer **could** legally have stopped the defendant, but whether a reasonable officer **would** have stopped the defendant. *Smith*, 799 F.2d at 708. The appropriate inquiry under the objective test is whether the traffic violation is [\*17] one that is so minor (e.g., failing to signal before changing lanes on an open road; going one mile an hour over the speed limit; or failing to come to an absolutely complete stop before turning right at a stop sign) that a reasonable officer would not have stopped an unsuspecting car, or whether the stop was for a reason that would have led a reasonable officer to make the stop under any circumstances.

The cases give us some considerable guidance in assessing where this line should be drawn. *Crotinger* is particularly instructive, as it provides a calibration with which we are all familiar. *Crotinger* was driving 66 miles an hour in a 55 mile an hour zone. It is quite likely that many readers of this opinion have done so, and quite likely that most would have felt somewhat aggrieved at being stopped, though such a stop would be close to the line. At 20 miles an hour over the limit, most of us, I believe, would feel that the officer was quite justified, and at 3 miles an hour over the limit, virtually everyone would feel that a reasonable officer would not have made the stop. *Crotinger*, 928 F.2d at 206.

The other two Sixth Circuit cases are even more [\*18] problematic than *Crotinger*. In *Pino*, an officer pulled alongside a rental car that he suspected was driven by a drug courier. When the driver saw the officer passing, he panicked, abruptly braked and swerved onto the shoulder. The officer, now highly suspicious, played a cat-and-mouse game with the defendant. He drove more and more slowly in an attempt to force the defendant to pass him again, but only succeeded when he pulled to a complete stop on the shoulder. A subsequent search confirmed the officer's

suspicion of drug activity. Not surprisingly, the officer did not claim that he stopped the defendant because his driving raised suspicion of drug activity. Instead, the officer claimed there was probable cause that the defendant violated several traffic regulations, such as those prohibiting passing a vehicle on the right, weaving, endangering pedestrians, and not using blinkers. We accepted the officer's explanation and upheld the stop. *Pino*, 855 F.2d at 361. Of course, the same activity -- erratic driving -- heightened the officer's suspicion of the drug activity and provided the grounds for the minor traffic offenses. In essence, the stop [\*\*19] was not pretextual because the defendant's panicked response to the sight of a police officer was so pronounced that the officer could classify it as a traffic offense. n1

n1 However, the difficulty with *Pino* is not that the officer's dominant motive for the stop was undoubtedly suspicion of drug activity. The problem is that the two motives are inseparable; they are really one motive with two characterizations -- one legitimate and one illegitimate. But the legitimate reason for the stop, the traffic offense, would have never materialized had the officer not zealously followed up on the illegitimate motive. The officer's suspicion and investigation, in effect, precipitated the erratic driving. In contrast, Officer Writesman's actions in no way provided the grounds for the stop; he did not cause or contribute to the license violation. His suspicion and subsequent observation only provided the opportunity to notice the lack of a license. Thus, it is difficult to understand how a judge could uphold *Pino* and yet vote to reverse this case.

[\*\*20]

[\*208] In *French*, police officers followed a vehicle for nearly 50 miles before stopping it for speeding. Applying the objectively reasonable analysis, we found that the stop for speeding was valid even though one officer admitted, not surprisingly, that he was partially motivated by the suspicion of drug trafficking. *French*, 974 F.2d at 691-92. We stated that the officers "acted in an objectively reasonable manner because the Mercedes was, in fact, speeding" -- even though the car was clocked at only seven miles an hour over the limit. *Id.* at 692.

Finally, in *Smith* itself, the only case in which a stop was ruled invalid, the relevant conduct was "weaving" by 6 inches onto the shoulder and not looking at the nearby patrol car. The *Smith* court properly held that a reasonable officer would not have made the stop.

The conduct here, in my view, was clearly more egregious than that in *Crotinger*, *Pino*, and *French*. Driving with no visible vehicle registration is a violation of Memphis City Ordinance § 21-269. It is a significant offense, certainly comparable to the offenses that justified the stops in *Pino* [\*\*21] , *French* and *Crotinger*, and Writesman, a police officer with sixteen years of experience, testified that he routinely stops cars that do not display a license. Ferguson failed to present, and the court does not provide, any evidence or argument that Writesman's conduct is not consistent with that of a reasonable police officer or that Memphis police officers routinely choose not to enforce this ordinance.

If I drove around town for any length of time with no visible license plate, I would not be surprised at all to be stopped as soon as I was observed by an officer going in the same direction who was not otherwise engaged. Having in fact been stopped by a reasonable police officer for the lesser and more difficult-to-detect offense of not displaying an auto inspection decal, it strikes me very forcefully that Officer Writesman's action in stopping a car with no visible license plate does not clearly brand him as an unreasonable police officer. The court's opinion today is impossible to square with the objective test that is the law in this circuit, and I therefore dissent.

**CORE TERMS:** intoxilyzer, influence of alcohol, breath, machine, accuracy, breathalyzer, administered, driving, alcohol, motor vehicle, reliability, testing, alcohol content, tested, self-calibration, proven, blood, standard operating procedure, field sobriety test, chemical analysis, federal law, regulations, twice, conducting, scientific, seatbelt, driver, miles, odor of alcohol, certifying

**COUNSEL:** [\*1] For Jerry E. Jackson (1), Defendant: Omodare B. Jupiter, LEAD ATTORNEY, FEDERAL PUBLIC DEFENDER, Jackson, MS.

**JUDGES:** William H. Barbour, Jr., United States District Judge.

**OPINION BY:** William H. Barbour, Jr.

**OPINION:**

**OPINION AND ORDER**

Jerry E. Jackson appeals his conviction for driving under the influence of alcohol in violation of 36 C.F.R. § 4.23 by challenging the sufficiency of the evidence underlying that conviction. Upon finding that there is sufficient evidence to support the conviction, this Court affirms.

**I. Background Facts**

On November 5, 2005, while conducting stationary radar on the Natchez Trace Parkway, United States Park Ranger Jerome Timmons, Jr. ("Timmons") observed a motor vehicle traveling at an excessive rate of speed. After radar confirmed that the vehicle was traveling at fifty-seven miles per hour, which is seven miles greater than the posted speed limit of fifty miles per hour, Timmons initiated a traffic stop. Upon approaching the vehicle, Timmons observed that Appellant was the driver of the vehicle, and that none of the occupants of the vehicle - which included three adults and four children - were restrained with seatbelts. [\*2]

Upon questioning Appellant, Timmons detected the odor of alcohol. Appellant admitted that he had consumed a quart of "King Cobra" approximately five hours earlier, and that his wife may have had an open container of "King Cobra" in the vehicle from which he had taken a few sips. Based on these statements and his observations, Timmons suspected that Appellant was under the influence of alcohol and, therefore, conducted a field sobriety test. The test results, as reported by Timmons, were that Appellant had nystagmus with maximum deviation in both eyes, was unable to heel-to-toe walk, was unable to follow instructions as to the manner in which the tests were to be performed (Appellant having taken twenty-three steps after Timmons requested that he take nine), was unable to pivot turn on one

foot, and miscounted when performing a one-leg stand test. Results of a portable breathalyzer test administered at the scene were positive for alcohol. After conducting the field sobriety test, Timmons escorted Appellant to the Claiborne County Sheriff's Department and administered a breathalyzer test using the "Intoxilyzer 8000" ("Intoxilyzer"). Consistent with standard operating procedure, Appellant [\*3] was tested twice and his breath alcohol content level registered 0.099 and 0.084, respectively. Thereafter, Appellant was cited for speeding, failure to wear a seatbelt, and driving under the influence of alcohol in violation of 36 C.F.R. § 4.23.

On May 6, 2006, Appellant appeared before United States Magistrate Judge James C. Sumner at which time he pleaded guilty to the charges of speeding and failure to wear a seatbelt. Judge Sumner also heard testimony on the charge of driving while under the influence of alcohol. At the hearing, the Intoxilyzer results were admitted into evidence without objection from Appellant. Judge Sumner found that Timmons's observations during the field sobriety test established probable cause for conducting the breathalyzer test, and that the Intoxilyzer results supported a finding that Appellant was guilty of operating a motor vehicle while under the influence of alcohol. Appellant now challenges of the sufficiency of the evidence underlying his DUI conviction.

## II. Standard of Review

Pursuant to *Rule 58(g)(2)(D) of the Federal Rules of Criminal Procedure*, when reviewing a conviction [\*4] by a magistrate judge the "scope of the appeal is the same as in an appeal to the court of appeals from a judgment entered by a district judge." In this circuit, "[t]he standard of review for sufficiency of the evidence is 'whether, after reviewing the evidence in the light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt.'" *United States v. Bellew*, 369 F.3d 450, 452 (5th Cir. 2004) (quoting *Jackson v. Virginia*, 443 U.S. 307, 319, 99 S. Ct. 2781, 61 L. Ed. 2d 560 (1979)). See also *United States v. Mitchell*, 777 F.2d 248, 260-61 (5th Cir. 1985).

## III. Discussion

Appellant was convicted under 36 C.F.R. § 4.23, which provides, in relevant part:

- (a) Operating or being in actual physical control of a motor vehicle is prohibited while:
  - (1) Under the influence of alcohol, or a drug, or drugs, or any combination thereof, to a degree that renders the operator incapable of safe operation; or
  - (2) The alcohol concentration in the operator's blood or breath is 0.08 grams or more of alcohol per 100 millimeters of blood or 0.08 grams of [\*5] alcohol per 210 liters of breath . . . .

Judge Sumner found Appellant guilty of operating a motor vehicle while under the influence of alcohol solely on the Intoxilyzer results, which indicted that Appellant had a breath alcohol content of 0.099 and 0.084. n1

n1 Under 36 C.F.R. § 4.23(d), results of quantitative tests "are intended to supplement the elements of probable cause used as the basis for the arrest of an operator" charged with operating a motor vehicle under the influence of alcohol and "are not intended to limit the introduction of any other competent evidence bearing upon the question of whether the operator, at the time of the alleged violation, was under the influence of alcohol . . ." In several unpublished opinions of the United States Court of Appeals for the Fifth Circuit, which may be considered persuasive authority under the local rules of that court, convictions for driving under the influence of alcohol have been upheld on appeal based only on the observations of law enforcement personnel. See e.g. *United States v. Smith*, No. 05-50890, 171 Fed. Appx. 438 (5th Cir. Mar. 16, 2006) (affirming DUI conviction based on evidence that defendant had been drinking, driving, and officers at the scene testified that her breath smelled of alcohol, her eyes were glossy, she did not speak in a normal volume, and she failed three

field sobriety tests); *United States v. Vaillancourt*, No. 04-50279, 108 Fed. Appx. 977 (5th Cir. Sept. 21, 2004) (affirming conviction of DUI based on evidence that defendant had been drinking, had a strong odor of alcohol on her breath, had bloodshot and glassy eyes, was unable to perform a dexterity test, and was unable to complete an intoxilyzer test).

[\*6]

Under 36 C.F.R. § 4.23(c):

(3) Any test or tests for the presence of alcohol and drugs shall be determined by and administered at the direction of an authorized person.

(4) Any test shall be conducted by using accepted scientific methods and equipment of proven accuracy and reliability operated by personnel certified in its use.

During the hearing before Judge Sumner, Timmons testified that he received formal training regarding the use of the "Intoxilyzer 8000", that he was certified to use this type of machine, and that he had been administering breathalyzer tests using this type of machine for approximately eight months. Based on this testimony, the Court finds that Timmons was "authorized" and "certified" to use the subject Intoxilyzer as required under 36 C.F.R. § 4.23(c)(3) & (4).

Timmons further testified that Appellant was tested twice using the Intoxilyzer in accordance with the standard operating procedure for that machine. The standard operating procedure includes testing a suspected driver twice, and complying with a pre-programmed twenty-five minute waiting period before each test is administered during [\*7] which time the driver is observed and the machine performs a self-diagnostic test to determine whether it is properly calibrated. Although Timmons did not know the margin of error or the date on which the subject Intoxilyzer was manually calibrated, he testified that a Mississippi State Trooper checks the machine on a monthly basis. Timmons also testified that the Intoxilyzer performs a self-calibration check before and after each breathalyzer test is administered. As explained by Timmons, during the self-calibration check, the Intoxilyzer analyzes the content of a canister attached to the machine, which registers .078 when tested. If the Intoxilyzer detects an error during the self-calibration check, the machine will not work. Timmons testified that the subject Intoxilyzer performed the self-calibration checks and was functioning properly on the date Appellant was tested.

Based on this testimony, the Court finds that the Intoxilyzer tests administered to Appellant were conducted "using accepted scientific methods and equipment of proven accuracy and reliability" for the purposes of 36 C.F.R. § 4.23(c)(4). See *California v. Trombetta*, 467 U.S. 479, 489 n.9, 104 S. Ct. 2528, 81 L. Ed. 2d 413 (1984) [\*8] (recognizing that the Intoxilyzer has passed the accuracy requirements established by the National Highway Traffic Safety Administration of the Department of Transportation); *United States v. Brannon*, 146 F.3d 1194, 1196 (9th Cir. 1998) (finding that the methodology of breathalyzer testing "is well known and unchallenged"); *United States v. Reid*, 929 F.2d 990, 994 (4th Cir. 1991) (finding that the "best means of obtaining evidence of the breath alcohol content, and the least intrusive way of testing, is the breathalyzer test."); *Volk v. United States*, 57 F. Supp. 2d 888, 897 (N.D. Cal. 1999) ("The admissibility and general reliability of Intoxilyzer test results is well-established.").

Appellant also challenges the sufficiency of the evidence by arguing the Government failed to produce a document certifying that the subject Intoxilyzer was accurate, as required under Mississippi law. In support of this argument, Appellant cites *Mississippi Code Annotated Section 63-11-19*, which provides, in relevant part:

A chemical analysis of the person's breath, blood or urine, to be considered valid under the [\*9] provisions of this section, shall have been performed according to methods approved by the State Crime Laboratory created pursuant to *Section 45-1-17* and the Commissioner of Public Safety and performed by an individual possessing a valid permit issued by the State Crime Laboratory for making such analysis. The State Crime Laboratory and the Commissioner of Public Safety are authorized to approve

satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct such analyses, and to issue permits which shall be subject to termination or revocation at the discretion of the State Crime Laboratory . . . .

The State Crime Laboratory shall make periodic, but not less frequently than quarterly, tests of the methods, machines or devices used in making chemical analysis of a person's breath as shall be necessary to ensure the accuracy thereof, and shall issue its certificate to verify the accuracy of the same.

*MISS. CODE ANN. § 63-11-19* (1972 & Supp. 1999). In accordance with this statute, the Mississippi Supreme Court has held:

[I]ntoxilyzer results may be admitted into evidence if a proper foundation [\*10] has been laid.

A chemical analysis of a person's breath, blood, or urine is deemed valid only when performed according to approved methods; performed by a person certified to do so; and performed on a machine certified to be accurate.

*Fisher v. City of Eupora*, 587 So. 2d 878, 888 (Miss. 1991) (quoting *Gibson v. Mississippi*, 458 So. 2d 1046, 1047 (Miss. 1985)). Thus, under Mississippi law, the prosecutor must submit documentation certifying the accuracy of an intoxilyzer before the test results obtained by that device may be admitted as evidence at trial. See *Johnston v. Mississippi*, 567 So. 2d 237, 239 (Miss. 1990).

In the case *sub judice*, however, Appellant was convicted of driving under the influence of alcohol under federal law - not Mississippi law. In this regard, the Code of Federal Regulations provides: "Unless specifically addressed by regulations in this chapter, traffic and the use of vehicles within a [national] park area are governed by State law." 36 C.F.R. § 4.2(a). The Regulations, specifically 36 C.F.R. § 4.23, address both driving while under the influence [\*11] of alcohol and applicable testing procedures. Additionally, while the Regulations require that tests used for the purpose of determining alcohol content be conducted using "equipment of proven accuracy and reliability", there is no requirement that the equipment be certified by a third party before the results of those tests can be admitted as evidence. Accordingly, the Court finds that Appellant's argument that the Government was required to comply with the certification requirement of *Mississippi Code Annotated Section 63-11-19* is without merit. See *United States v. Berry*, 866 F.2d 887, 890 (6th Cir. 1989) (finding that the Code of Federal Regulations "does not contemplate or call for the incorporation of state DUI statutes into a federal DUI charge."); *United States v. Farmer*, 820 F. Supp. 259, 263 (W.D. Va. 1993) (finding that as the offense of DUI and related testing procedures are specifically addressed by 36 C.F.R. § 4.23, the court is not required to consider the evidentiary or procedural requirements of state DUI law when reviewing a defendant's DUI conviction under federal law); *United States v. Coleman*, 750 F. Supp. 191, 193 (W.D. Va. 1990) [\*12] (finding, consistent with 36 C.F.R. § 4.2, that "federal law preempts state law on the issue of intoxicated motor-vehicle operators within national park areas, and this Court is not bound to follow [state court] precedent" when interpreting 36 C.F.R. § 4.23).

#### IV. Conclusion

The Court finds that the Government presented sufficient evidence to show that Timmons was "authorized" and "certified" to use the subject Intoxilyzer as required under 36 C.F.R. § 4.23(c)(3) & (4); the Intoxilyzer tests administered to Appellant were conducted "using accepted scientific methods and equipment of proven accuracy and reliability" thus satisfying 36 C.F.R. § 4.23(c)(4); and the Intoxilyzer test results showed Appellant had a blood alcohol content of 0.099 and 0.084, both of which are greater than the legal limit of 0.08. The evidence, viewed in the light most favorable to the Government, was sufficient to convict Appellant of driving while under the influence of alcohol on the Natchez Trace Parkway in violation of 36 C.F.R. § 4.23. Accordingly, the ruling of United States [\*13] Magistrate Judge James C. Sumner is AFFIRMED.

For the foregoing reasons:

IT IS THEREFORE ORDERED that the ruling of United States Magistrate Judge James C. Sumner is AFFIRMED.

IT IS FURTHER ORDERED that the Stay of Execution of Sentence, which was entered on August 15, 2006, is hereby vacated. Appellant shall report to the United States Probation Officer assigned to this case on or before January 30, 2007.

SO ORDERED this the 23rd day of January, 2007.

s/ William H. Barbour, Jr.

UNITED STATES DISTRICT JUDGE

**CIVIL ACTION NO. 93-2771 CONSOLIDATED ACTIONS**

**UNITED STATES DISTRICT COURT FOR THE DISTRICT OF NEW JERSEY**

*960 F. Supp. 844; 1997 U.S. Dist. LEXIS 2772*

**March 11, 1997, Decided**

**March 11, 1997, FILED and ENTERED ON THE DOCKET**

**SUBSEQUENT HISTORY:** [\*\*1] As Amended March 12, 1997.

**DISPOSITION:** Motion of Plaintiff Robert T. Hulmes to Alter or Amend Judgment entered pursuant to *Fed. R. Civ. P. 59(e)* and Plaintiff's alternative motion for new trial pursuant to *Fed. R. Civ. P. 59(a)* DENIED.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Plaintiff injured party sought relief from judgment on his suit against defendant manufacturers for products liability related to an all-terrain vehicle (ATV). The jury found no design defect, but found the ATV defective by reason of a failure to warn and found that plaintiff was 66 percent at fault for his injuries. The court entered judgment in favor of defendants on all counts pursuant to *N.J. Stat. Ann. §§ 2A:15-5.1* and *15-5.2* (1987).

**OVERVIEW:** Plaintiff, riding an ATV manufactured by defendants, crashed into his brother's ATV while intoxicated and while exceeding the speed limit. The court denied plaintiff's motion to amend the judgment, finding that the jury was properly allowed to consider plaintiff's fault in causing the accident even though it also found that defendant failed to warn plaintiff of the ATV's possible dangers. The court further found that judgment for the defendants was proper under *N.J. Stat. Ann. § 2A:15-5.1* (1987) because the jury found that plaintiff's fault exceeded the combined fault of defendants. The court also denied plaintiff's motion for a new trial, finding that (1) the evidence of alcohol consumption was properly admitted under *Fed. R. Evid. 803(6)* and was relevant to plaintiff's tendency to heed warnings, (2) the jury instructions on comparative fault were proper where plaintiff voluntarily encountered the "known danger" of an accident, although not from the specific design flaw of tipping over, of which plaintiff complained, and (3) the lay testimony of the investigating police officer was properly admitted due to his experience in investigating accidents.

**OUTCOME:** The court denied plaintiff's motions to amend the judgment or obtain a new trial.

**CORE TERMS:** comparative fault, failure to warn, new trial, warning, fault, design defect, collision, product liability, known danger, heeding, amend, omission, rebut, alcohol consumption, proximate cause, tanaka, comparative negligence, notice, lab, video, encountered, causative, brochure, testing, riding, motion in limine, admitting, wheel, special verdict, legal effect

#### **LexisNexis(R) Headnotes**

##### ***Civil Procedure > Judgments > Relief From Judgment > Motions for New Trials***

##### ***Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend***

[HN1] The decision whether to grant a new trial pursuant to *Fed. R. Civ. P. 59(a)* lies within the district court's sound discretion. Errors in judicial rulings or in the conduct of the court warrant a new trial where the error or conduct was prejudicial. However, even if the court determines that an error was made, it should not grant a new trial unless it also determines that the error was so prejudicial that refusal to take such action appears to the court inconsistent with substantial justice. *Fed. R. Civ. P. 61*.

##### ***Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend***

[HN2] Under *Fed. R. Civ. P. 59(e)*, a district court may alter or amend a judgment: (1) when there has been an intervening change in the law; (2) when new evidence becomes available only after trial; (3) if the court has committed clear legal error; or (4) if the judgment without amendment would create a manifest injustice.

##### ***Civil Procedure > Judgments > Relief From Judgment > Motions for New Trials***

##### ***Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend***

[HN3] Courts should not lightly disturb jury verdicts. In reviewing the propriety of a jury verdict, the court's obligation is to uphold the jury's award if there exists a reasonable basis to do so. The court must defer to the jury whenever its findings are reasonably supported by the record, and must draw all reasonable inferences in favor of the verdict winner.

##### ***Torts > Negligence > Defenses > Assumption of Risk > Elements & Nature > Voluntariness***

##### ***Torts > Negligence > Defenses > Comparative Negligence > Common Law Concepts > Assumption of Risk***

##### ***Torts > Products Liability > Strict Liability***

[HN4] The product liability law of New Jersey recognizes that accidental injuries are often the result of a combination of causes. However, the doctrine of strict liability strikes a balance in favor of plaintiffs by requiring a defendant to produce evidence that the plaintiff voluntarily encountered a known danger, before the jury is allowed to compare the plaintiff's conduct with the alleged product defect on the question of causation. When the evidence points to a voluntary assumption of a known risk, it is proper to instruct the jury on comparative fault.

##### ***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview***

##### ***Torts > Negligence > Defenses > Comparative Negligence > Multiple Parties > General Overview***

##### ***Torts > Products Liability > Duty to Warn***

[HN5] The failure to rebut the "heeding presumption," meaning that the plaintiff would have heeded a proper warning, may constitute proof that a defendant's failure to warn contributed to the plaintiff's injuries.

##### ***Torts > Negligence > Defenses > Comparative Negligence > General Overview***

##### ***Torts > Products Liability > Plaintiff's Conduct***

***Torts > Products Liability > Strict Liability***

[HN6] In strict product liability cases, as a general rule, once the jury has found that the defect was a substantial causative factor, the proximate cause inquiry is at an end and the defendant is liable. However, where the evidence supports a charge on comparative fault, that is, where there is competent evidence that the plaintiff voluntarily encountered a known danger, the proximate cause inquiry must continue.

***Civil Procedure > Pleading & Practice > Pleadings > Amended Pleadings > General Overview******Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend******Torts > Negligence > Defenses > Comparative Negligence > General Overview***

[HN7] Where a plaintiff fails to demonstrate that the jury's assignment of 66 percent of the causative fault to the plaintiff was inconsistent with its finding that a failure to warn was a proximate cause of the accident, plaintiff's motion to alter or amend the judgment will be denied.

***Civil Procedure > Pleading & Practice > Pleadings > Amended Pleadings > General Overview******Civil Procedure > Trials > Judgment as Matter of Law > General Overview******Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend***

[HN8] Judgment as a matter of law is an extraordinary remedy when urged by an unsuccessful plaintiff who bore the burden of proof at trial.

***Civil Procedure > Judgments > Relief From Judgment > Motions for New Trials******Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview******Evidence > Procedural Considerations > Rulings on Evidence***

[HN9] Where a contention for a new trial is based on the admissibility of evidence, the trial court has great discretion which will not be disturbed on appeal absent a finding of abuse.

***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview******Civil Procedure > Appeals > Standards of Review > General Overview***

[HN10] On a claim that the trial court erroneously instructed the jury, the court must review the charge as a whole, in light of the evidence, to determine whether it adequately conveyed the controlling legal principles.

***Evidence > Procedural Considerations > Rulings on Evidence******Evidence > Relevance > Relevant Evidence***

[HN11] A .10 percent blood alcohol content, when considered with independent evidence that alcohol has been consumed, can constitute supplementary evidence of unfitness to drive, at least as competent as traditional eyewitness testimony of drunken behavior.

***Torts > Negligence > Causation > General Overview******Torts > Products Liability > Design Defects******Torts > Products Liability > Plaintiff's Conduct***

[HN12] Evidence of alcohol consumption may be relevant in a product liability action on the issues of misuse and proximate cause.

***Torts > Negligence > Causation > Proximate Cause > General Overview******Torts > Negligence > Defenses > Comparative Negligence > General Overview******Torts > Products Liability > Duty to Warn***

[HN13] Evidence of alcohol consumption is relevant in a failure to warn case to rebut the "heeding presumption" that

inures to the plaintiff's benefit. Clearly, evidence that a plaintiff who has been warned about consuming alcohol prior to riding his all-terrain vehicle, and nevertheless, does so, is relevant to rebut the "heeding presumption," in that it portrays an individual who is unlikely to heed warnings.

***Evidence > Hearsay > Exceptions > Business Records > General Overview***

***Evidence > Hearsay > Rule Components > Nonverbal Conduct***

[HN14] Blood tests conducted as a routine matter in a hospital are admissible under *Fed. R. Evid. 803(6)*, which does not require the proponent to establish a chain of custody.

***Evidence > Hearsay > Exceptions > Business Records > General Overview***

[HN15] It is the opponent's burden to show that the source of information or the method or circumstances of preparation of otherwise admissible business records indicate lack of trustworthiness. The opponent must point to deficiencies in the manner in which specific records are kept.

***Evidence > Hearsay > Exceptions > Business Records > General Overview***

[HN16] A party seeking to introduce evidence under *Fed. R. Evid. 803(6)* need not be able to produce, or even identify, the specific individual upon whose first-hand knowledge the memorandum, report, record or data compilation was based.

***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview***

***Torts > Negligence > Defenses > Comparative Negligence > Procedure***

***Torts > Products Liability > Design Defects***

[HN17] A comparative fault charge in a products liability action is only permissible when the evidence supports a finding that the plaintiff voluntarily and knowingly encountered a risk of injury from a defective product.

***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview***

***Civil Procedure > Judgments > Relief From Judgment > Motions for New Trials***

[HN18] As a threshold matter, a party challenging a jury instruction on a particular matter must establish that the jury in fact reached that matter. A motion for a new trial on issues that a jury did not reach will not be granted.

***Torts > Negligence > Defenses > Assumption of Risk > Elements & Nature > Knowledge of Danger***

***Torts > Negligence > Defenses > Comparative Negligence > General Overview***

***Torts > Products Liability > Plaintiff's Conduct***

[HN19] The precise nature of the "known danger" which the plaintiff is said to voluntarily encounter in a products liability action must be defined by the facts of the individual case. It should not be defined so broadly that mere negligence by the plaintiff can be equated with voluntarily encountering a "known danger." Neither can the term be defined so narrowly that the jury is prevented from considering a plaintiff's comparative fault unless it can be shown that the plaintiff was aware of the precise defect which is alleged to have caused her injuries. The cases speak of a "known danger" not a "known defect."

***Evidence > Procedural Considerations > Rulings on Evidence***

***Torts > Products Liability > Duty to Warn***

[HN20] A plaintiff cannot demonstrate any prejudice from the exclusion of documents, much less any impact on his substantial rights, where the jury found in his favor on a failure to warn theory, and it was on notice of the adequacy of the warning that plaintiff sought to introduce this evidence.

***Evidence > Testimony > Lay Witnesses > General Overview***

[HN21] Lay opinions of a technical nature may only be admitted when the witness possesses sufficient and relevant specialized knowledge or experience to offer the opinion. The proponent of lay opinion testimony must demonstrate some connection between the special knowledge or experience of the witness, however acquired, and the witness's opinion.

***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview  
Torts > Negligence > Defenses > Comparative Negligence > General Overview***

[HN22] In New Jersey, trial courts should instruct the jury as to the legal effect of the application of the comparative negligence statute to the jury's findings.

***Torts > Negligence > Defenses > Comparative Negligence > General Overview***

[HN23] In New Jersey, a plaintiff will recover as long as his or her comparative fault is not greater than the combined fault of the defendants. *N.J. Stat. Ann. § 2A:15-5.1* (1987).

***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview******Civil Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Harmless Error Rule***

[HN24] New Jersey recognizes that the omission of the "ultimate outcome" charge can sometimes be harmless error.

***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview******Torts > Negligence > Defenses > Comparative Negligence > Procedure***

[HN25] In a complex case involving multiple issues and numerous parties, the trial court, in the exercise of sound discretion, can withhold the instruction if it would tend to mislead or confuse the jury.

***Civil Procedure > Federal & State Interrelationships > Erie Doctrine******Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview******Civil Procedure > Trials > Jury Trials > Verdicts > Special Verdicts***

[HN26] The phrasing of a special verdict in a federal district court is a matter of procedure governed by the federal rules and not by state practice.

***Evidence > Scientific Evidence > Daubert Standard******Evidence > Testimony > Experts > Admissibility******Evidence > Testimony > Experts > Daubert Standard***

[HN27] The Daubert test requires the district court to determine whether novel or untested methodologies are sufficiently reliable that expert witness conclusions based upon them can be of some use to the jury.

**COUNSEL:** Appearances:

For Robert T. Hulmes, Plaintiff: Lewis M. Levin, Esq., Joseph Viola, Esq., Lewis M. Levin & Associates, Philadelphia, PA. For Sherry Hertlein, Plaintiff: David Bross, Esq., Cherry Hill, NJ.

For Honda Motor Company, Ltd., Honda Research and Development Group, Ltd., Honda R & D North America, Inc., and American Honda Motor Company, Inc., Defendants: Robert St.L. Goggin, Esq., Brian C. Darreff, Esq., Marshall, Dennehy, Warner, Coleman & Goggin, Marlton, N.J. Paul G. Cereghini, Esq., Bowman & Brooke, Phoenix, AZ.

**JUDGES:** STEPHEN M. ORLOFSKY, United States District Judge

**OPINION BY: STEPHEN M. ORLOFSKY****OPINION:**

[\*849] OPINION

**ORLOFSKY**, District Judge:

This product liability lawsuit against defendants, Honda Motor Company, Ltd., Honda Research and Development Group, Ltd., Honda R & D North America, Inc., and American Honda Motor Company, Inc. (collectively referred to as "Honda") was tried before this court and a jury from September 24, [\*\*2] 1996, through October 31, 1996. The jury returned a special verdict in which it found no design defect in the subject All Terrain Vehicle ("ATV"). However, the jury found the ATV defective by reason of a failure to warn. In response to special interrogatories requesting an allocation of comparative fault, the jury found the plaintiff, Robert Hulmes ("Hulmes" or the "plaintiff"), sixty-six (66) percent at fault for his injuries. On October 31, 1996, the court entered judgment in favor of defendants on all counts pursuant to *N.J. Stat. Ann. §§ 2A:15-5.1* and 15-5.2. Judgment was also entered against Sherry Hertlein, Hulmes's former spouse, on her derivative per quod action.

Plaintiff now moves to alter or amend the judgment pursuant to *Fed. R. Civ. P. 59(e)*, or, alternatively, for a new trial pursuant to *Fed. R. Civ. P. 59(a)*. n1 Plaintiff's motions require this court to revisit and plumb once again the murky depths of New Jersey's Product Liability Law. For the reasons set forth below, plaintiff's motions will be denied.

n1 Rule 59 provides, in pertinent part:

(a) Grounds. A new trial may be granted to all or any of the parties and on all or part of the issues (1) in an action in which there has been a trial by jury, for any of the reasons for which new trials have heretofore been granted in actions at law in the courts of the United States; and (2) in an action tried without a jury, for any of the reasons for which rehearings have heretofore been granted in suits in equity in the courts of the United States. On a motion for a new trial in an action tried without a jury, the court may open the judgment if one has been entered, take additional testimony, amend findings of fact and conclusions of law or make new findings and conclusions, and direct the entry of a new judgment.

....

(e) Motion to Alter or Amend Judgment. Any motion to alter or amend a judgment shall be filed no later than 10 days after entry of the judgment.

*Fed. R. Civ. P. 59.*

[\*\*3]

**I. Standards Governing Rule 59 Motions**

[HN1] The decision whether to grant a new trial pursuant to *Federal Rule of Civil Procedure 59(a)* lies within the district court's sound discretion. *Allied Chemical Corp. v. Daiflon, Inc.*, 449 U.S. 33, 36, 66 L. Ed. 2d 193, 101 S. Ct. 188 (1980); *Wagner v. Fair Acres Geriatric Ctr.*, 49 F.3d 1002, 1017 (3d Cir. 1995). Errors in judicial [\*850] rulings or in the conduct of the court warrant a new trial where the error or conduct was prejudicial. 6A James Wm. Moore, Moore's Federal Practice § 59.08(2) (2d ed. 1996). However, even if the court determines that an error was made, it

should not grant a new trial unless it also determines that the error was so prejudicial that "refusal to take such action appears to the court inconsistent with substantial justice." *Fed. R. Civ. P. 61*. See also *Bhaya v. Westinghouse Elec. Corp.*, 709 F. Supp. 600, 601 (E.D. Pa. 1989), aff'd, 922 F.2d 184 (3d Cir. 1990).

[HN2] Under *Federal Rule of Civil Procedure 59(e)*, a district court may alter or amend a judgment: (1) when there has been an intervening change in the law; (2) when new evidence becomes available only after trial; (3) if the court has [\*\*4] committed clear legal error; or (4) if the judgment without amendment would create a manifest injustice. *North River Ins. Co. v. Cigna Reinsurance Co.*, 52 F.3d 1194, 1218 (3d Cir. 1995). Hulmes offers no new evidence, nor does he claim that there has been a change in the controlling law. Rather, plaintiff contends that this court has committed clear legal error.

[HN3] Courts should not lightly disturb jury verdicts. "In reviewing the propriety of a jury verdict, [this Court's] obligation is to uphold the jury's award if there exists a reasonable basis to do so." *Motter v. Everest & Jennings, Inc.*, 883 F.2d 1223, 1230 (3d Cir. 1989). See also *Bruce Lincoln-Mercury, Inc. v. Universal C.I.T. Credit Corp.*, 325 F.2d 2, 21 (3d Cir. 1963). This court must defer to the jury whenever its findings are reasonably supported by the record, and must draw all reasonable inferences in favor of the verdict winner. *Blum v. Witco Chem. Corp.*, 829 F.2d 367, 372 (3d Cir. 1987) (citing *Massarsky v. General Motors Corp.*, 706 F.2d 111, 117 (3d Cir. 1983)).

## II. Discussion

Because plaintiff's motion to alter or amend the judgment and his motion for a new trial are both, [\*\*5] in part, based on his assertion that this court misapplied the comparative fault provisions of New Jersey's product liability law, I will briefly discuss this issue before turning to plaintiff's other contentions.

[HN4] The product liability law of New Jersey recognizes that accidental injuries are often the result of a combination of causes. However, the doctrine of strict liability strikes a balance in favor of plaintiffs by requiring a defendant to produce evidence that the plaintiff voluntarily encountered a known danger, before the jury is allowed to compare the plaintiff's conduct with the alleged product defect on the question of causation. *Cartel Capital Corp. v. Fireco of N.J.*, 81 N.J. 548, 562-63, 410 A.2d 674 (1980). This balance advances the overall purpose of New Jersey's product liability law by stressing the manufacturer's primary responsibility to design and market safe products. Nevertheless, when the evidence points to a voluntary assumption of a known risk, it is proper to instruct the jury on comparative fault. *Ladner v. Mercedes-Benz*, 266 N.J. Super. 481, 495, 630 A.2d 308 (App. Div. 1993), certif. denied, 135 N.J. 302, 639 A.2d 301 (1994).

Hulmes asks [\*\*6] this court to amend the judgment so as to award him damages based upon the jury's finding that the ATV was defective by reason of a failure to warn, notwithstanding the jury's finding as to his comparative fault, which Hulmes argues is "irrelevant" to his failure to warn claim. Alternatively, plaintiff seeks a new trial based upon his contention that his is not a case to which comparative fault properly applies.

### A. Plaintiff's Motion to Alter or Amend the Judgment

Hulmes first contends that he is entitled to judgment in his favor based upon the jury's finding of a failure to warn, and asks this court to enter judgment in the full amount of the jury's verdict. Plaintiff argues that the jury's assignment of comparative fault is irrelevant on the question of defendants' failure to warn. n2

n2 Elsewhere, Hulmes contends that it was error to give the charge on comparative fault, even as to his claim of design defect. This contention is addressed, and refuted, in part II.B.4, infra.

[\*851] At trial, Hulmes [\*\*7] claimed not to have received certain warnings which were distributed by Honda some years after he had purchased his ATV. Hulmes testified that, had he received these warnings concerning the

ATV's safety, he "would have got rid of it." Tr. of Oct. 1, 1996, part A, at 42. The jury found that the ATV was defective by reason of Honda's failure to warn of the danger of severe injury which could result from roll-over or tip-over accidents in which the rider is jettisoned. Plaintiff argues that comparative fault is inapplicable "where the harm incurred is the very risk about which defendant had a duty to warn." *Crispin v. Volkswagenwerk AG*, 248 N.J. Super. 540, 565, 591 A.2d 966 (App. Div.), certif. denied, 126 N.J. 385, 599 A.2d 162 (1991).

In *Crispin*, the trial court declined to reduce the jury's award by the 25 percent by which the jury had found the plaintiff at fault. *Id.* at 549. The trial court based its decision upon the fact that the jury had found the defendant liable on a failure to warn theory. *Id.* The Appellate Division affirmed, while stressing that the case was "unique" because it presented a pure "second collision" scenario. *Id.* at 564, 567. In a "crashworthiness," [\*\*8] or "second collision" case, the jury is only concerned with the incremental injuries suffered as the result of the defect. In *Crispin*, the jury found that Volkswagen failed to warn the plaintiff that the use of a seat belt was especially necessary "in light of the collapsing seat, a feature built into the automobile by design." *Id.* at 565. The Appellate Division concluded that, because the only damages at issue were those that resulted from the "second collision," the plaintiff's contributory fault "in causing the original accident was not at issue." *Id.* at 568 (emphasis added).

In the singular context of "second collision" injuries, a defendant's failure to warn a user of its product of a "special requirement," without which the product will be unsafe, may well preclude consideration of comparative fault. In *Crispin*, the Appellate Division concluded that the plaintiff should not be penalized for failure to use a seat belt when the special importance of using a seat belt in view of the automobile's peculiar seat design was not conveyed to him. By contrast, the warning which Honda failed to deliver to Hulmes, Exhibit P-524, did not outline any specific action [\*\*9] or steps that Hulmes should have taken to avoid the accident in question. It merely warned, albeit in some detail, that roll-over or ejection accidents were a possible result of even a minor collision. This is simply not a case in which application of comparative fault principles would, in effect, blame the plaintiff for not doing something which he was not told he should do. On the contrary, plaintiff's testimony that he would have "gotten rid" of the ATV had he been warned of its instability, belies his assertion that this case is controlled by *Crispin*. Hulmes's accident was not "caused" by his failure to "get rid" of the ATV, except in the most tenuous sense, nor was it shown at trial that the absent warning would have urged ATV owners to dispose of their ATVs.

Moreover, the plaintiff's failure to use a seat belt was the only contributing cause on the plaintiff's part which was asserted in *Crispin*. Here, evidence was presented that Hulmes was riding his ATV while intoxicated, that he was exceeding the speed limit on a paved road, and that he collided with his brother's all terrain vehicle.

*Crispin* was further vindicated by the jury's finding that the seat design was [\*\*10] defective. The jury in this case found no design defect in the Honda ATV. Plaintiff's failure to warn theory, on which the jury held the defendants liable, did not encompass warnings against riding while intoxicated, which warnings were certainly given, or warnings against driving at excessive speed. In sum, there is an insufficient nexus between the defendants' failure to warn Hulmes of the need to exercise caution when riding his ATV, and Hulmes's comparative fault in causing the accident to sustain the comparison with *Crispin*.

Plaintiff also argues that the "heeding presumption" enunciated in *Coffman v. Keene Corp.*, 133 N.J. 581, 628 A.2d 710 (1993), sets [\*\*852] forth an independent comparative fault analysis, which displaces traditional comparative fault and renders any instruction on comparative fault erroneous. Plaintiff's Brief at 12-13. In essence, plaintiff suggests that when a jury finds a failure to warn defect and, in addition, finds that the defendant has failed to rebut the "heeding presumption," a directed verdict in plaintiff's favor is mandated. The "heeding presumption," however, does not sweep so broadly.

*Coffman* held that [HN5] the failure to rebut the "heeding [\*\*11] presumption" "may constitute proof that a defendant's failure to warn contributed to the plaintiff's injuries." *Coffman*, 133 N.J. at 591. *Coffman* was a multiple defendant asbestos case. The jury was instructed to apportion liability among the nine defendants. n3 It is not clear that the jury in *Coffman* apportioned any fault to the plaintiff.

n3 Keene Corp., the only defendant to appeal, was assigned fifteen (15) percent of the causative fault. *Coffman*, 133 N.J. at 593.

On appeal, Keene Corp. argued that the burden should be upon the plaintiff to prove that he would have heeded a proper warning and thereby avoided the inhalation of asbestos fibers. The Supreme Court of New Jersey rejected this argument, deciding as a matter of public policy to place the burden on the manufacturer to rebut a presumption that the plaintiff would have heeded a proper warning. *Id.* at 603. In dicta, the *Coffman* court seems to equate evidence of the comparative fault of the plaintiff with evidence which would [\*\*12] rebut the "heeding presumption." *Id.* This is unsurprising, in that a defendant will normally produce evidence of the plaintiff's comparative fault on all issues relating to causation, including the "heeding presumption." *Coffman* simply did not address a plaintiff's comparative fault in the context of multiple causative factors.

In this case, the jury was charged that unless Honda succeeded in rebutting the heeding presumption, it must find that the "plaintiff has demonstrated that the inadequate warning was a proximate cause of his injuries." Tr. of Oct. 23, 1996 at 78. Even after giving Hulmes the benefit of the "heeding presumption," the jury was not required to find that the failure to warn was the sole proximate cause of Hulmes's injuries.

In this case, the jury heard evidence that Hulmes made modifications to his ATV to increase its performance, that Hulmes was riding at an excessive speed, and that Hulmes had consumed alcohol shortly before his tragic accident. In light of all the evidence, the jury could have concluded that the failure to warn, even though it was one proximate cause of the plaintiff's injuries, was not the sole, or even the major contributing [\*\*13] factor in causing the accident.

In his reply brief, plaintiff restates his arguments, again suggesting that to sustain the jury's verdict for the defendants in this case would allow "mere negligence" on the plaintiff's part to support the defense of comparative fault. Reply Brief at 6-7. This is not so.

Plaintiff is correct that [HN6] in strict product liability cases, as a general rule, once the jury has found that the defect was a substantial causative factor, the proximate cause inquiry is at an end and the defendant is liable. However, where the evidence supports a charge on comparative fault, that is, where there is competent evidence that the plaintiff voluntarily encountered a known danger, the proximate cause inquiry must continue. In this case, the jury proceeded to compare the fault of the plaintiff with that of the defendants in causing the accident. It was required to do so because there was evidence from which it could have concluded that Hulmes, an experienced ATV rider, knew of the danger from riding while intoxicated, that he knew of the risk of injury from a collision, and that he proceeded in spite of these "known dangers." That there may have been some other danger highlighted [\*\*14] in P-524 n4 which was not then known to plaintiff does not mean that Hulmes did not voluntarily encounter a known danger. It merely proves that he did not voluntarily encounter [\*853] the danger described in P-524. Based upon the evidence presented, the jury allocated to Honda thirty-four (34) percent of the fault for causing the accident, the amount which the jury found was related to Honda's failure to warn.

n4 P-524 is a warning issued to ATV owners by Honda through its dealers pursuant to a consent decree with the Consumer Products Safety Commission. Hulmes apparently never received this warning at the time it was issued.

It is telling that plaintiff maintains that the jury's finding of liability for a failure to warn and its allocation of fault are not "inconsistent" verdicts. See Reply Brief at 5 n.3. Rather, plaintiff insists that the allocation of fault is simply "irrelevant" in a failure to warn case. *Id.*; see also Plaintiff's Brief at 2. This argument proves too much. Several New Jersey cases support [\*\*15] the application of comparative fault principles to a failure to warn case. See *Ladner*, 266 N.J. Super. 481, 630 A.2d 308; *Dixon v. Jacobsen Mfg. Co.*, 270 N.J. Super. 569, 592, 637 A.2d 915 (App. Div. 1994);

*Butler v. PPG Indus.*, 201 N.J. Super. 558, 564-65, 493 A.2d 619 (App. Div. 1985). If Hulmes were correct that a comparison of a plaintiff's and defendant's degrees of causative fault is always irrelevant once the jury has found a failure to warn, these cases would presumably say so. They do not so hold.

[HN7] Because the plaintiff has failed to demonstrate that the jury's assignment of sixty-six (66) percent of the causative fault to the plaintiff was inconsistent with its finding that a failure to warn was a proximate cause of the accident, plaintiff's motion to alter or amend the judgment will be denied. n5

n5 Plaintiff also renews his motion for judgment as a matter of law pursuant to *Fed. R. Civ. P. 50(b)*, relying on the same arguments presented in his motion to alter or amend the judgment. Plaintiff's Brief at 14-15. [HN8] Judgment as a matter of law "is an extraordinary remedy when urged by an unsuccessful plaintiff who bore the burden of proof at trial." *Link v. Mercedes-Benz*, 788 F.2d 918, 921 (3d Cir. 1986). Because there was ample evidence introduced at trial to support the jury's verdict, judgment as a matter of law must be denied.

[\*\*16]

### ***B. Plaintiff's Motion for a New Trial***

In support of his motion for a new trial, plaintiff claims that this court erred in ruling on several evidentiary issues, and in its instructions to the jury. Plaintiff also contends that the verdict was against the weight of the evidence and that the trial was fundamentally unfair.

[HN9] "Where a contention for a new trial is based on the admissibility of evidence, the trial court has great discretion . . . which will not be disturbed on appeal absent a finding of abuse." *Link v. Mercedes-Benz*, 788 F.2d 918, 921 (3d Cir. 1986). [HN10] On a claim that the trial court erroneously instructed the jury, the court must review the charge as a whole, in light of the evidence, to determine whether it adequately conveyed the controlling legal principles. *Id.* at 922.

#### ***1. The Admission of Evidence of Alcohol Consumption***

Hulmes contends that this court erred in admitting evidence that he had consumed alcohol shortly before the accident which led to this lawsuit. The court first ruled on this issue on plaintiff's motion in limine seeking to exclude all such evidence. *Hulmes v. Honda Motor Co.*, 936 F. Supp. 195 (D.N.J. 1996). The court [\*\*17] revisited this issue on plaintiff's motion for certification of an interlocutory appeal pursuant to 28 U.S.C. § 1292(b). *Id.* at 207-12. Despite these earlier rulings, plaintiff's counsel once again attempted to "reargue" the admissibility of this evidence when other pre-trial motions were decided immediately following jury selection. Tr. of Sept. 24, 1996 at 7-20.

Plaintiff's motion for a new trial based upon this court's denial of his motion in limine to exclude all evidence of alcohol consumption presents no new arguments. There is nothing this court can add to what it has previously written on this subject. It is sufficient to note that plaintiff argues for a per se rule against the admission of evidence of alcohol consumption by a plaintiff in a civil trial in the "absence of traditional forms of 'supplemental evidence.'" Plaintiff's Brief at 18. By "traditional forms," plaintiff presumably means eyewitness testimony that the plaintiff was visibly affected either in motor coordination, or speech by alcohol. For obvious reasons no such evidence was presented at this trial. However, the cases do not support the per se rule for which the plaintiff contends. [\*\*18] Indeed, in *Guzzi v. Clarke*, 252 N.J. Super. 361, 599 A.2d 956 (L. Div. 1991), the Law Division admitted evidence of alcohol consumption absent any evidence of "drunken behavior." *Id.* at 366. Plaintiff makes no effort to distinguish *Guzzi*. Instead, plaintiff again mischaracterizes this court's holding. This court did not proclaim that a .10 percent blood alcohol content itself rendered alcohol evidence admissible. Rather, this court ruled that [HN11] a .10 percent BAC, when considered with independent evidence that alcohol had been consumed, n6 could constitute supplementary evidence of unfitness to drive, at least as competent as "traditional" eyewitness testimony of "drunken behavior." *Hulmes*, 936 F. Supp. at 205-06.

n6 For example, in this case there was testimony from the flight nurse on the medivac helicopter that an amber fluid smelling of alcohol was suctioned from the plaintiff's stomach shortly after the accident. Tr. of Oct. 8, 1996 at 204-07.

## 2. Specific Evidence of Alcohol Consumption [\*\*19]

Plaintiff contends that, notwithstanding this court's decision to admit such evidence, the evidence of alcohol consumption which was admitted in this case was irrelevant, and therefore should have been excluded under *Fed. R. Evid. 401*.

Hulmes contends that the evidence of alcohol consumption was irrelevant to his design defect claim because that claim was based upon a theory that the ATV's instability caused it to flip over and eject the rider after the wheel of Hulmes's ATV impacted the wheel of his brother's ATV. Hulmes argues that it was at this moment that the alleged design defect came into play, and therefore, that nothing that occurred before the wheels of the two ATVs touched is relevant, and once the collision occurred, there was nothing that Hulmes could have done to prevent the unfortunate results of the accident.

In deciding plaintiff's motion in limine on this subject, this court opined that [HN12] evidence of alcohol consumption may be relevant in a product liability action on the issues of misuse and proximate cause. *Hulmes*, 936 F. Supp. at 201. Plaintiff now seeks to focus the design defect inquiry entirely on the events that took place after the collision of [\*\*20] the two ATVs. Plaintiff cannot now contend that Hulmes's behavior before the wheels of the two ATVs touched is irrelevant to the proximate cause inquiry, without also requiring this court to engage in a "crashworthiness" or "second collision" analysis. Plaintiff, however, never pursued a "crashworthiness" theory at trial. n7 Accordingly, the jury had to determine the cause or causes of this accident from the totality of the circumstances. The plaintiff's fitness to drive bears directly upon that determination.

n7 Counsel for plaintiff did argue that his client's behavior prior to the touching of the tires was irrelevant, see Tr. of Sept. 24, 1996 at 14, but he never presented a "second collision" scenario either to this court or to the jury. Notably, in a "crashworthiness" case, it is the plaintiff who must demonstrate what percentage of his or her injuries are directly attributable to the "second collision" and what percentage would have occurred as a result of the "first collision," even if an alternative safer design had been used in the product in question. See *Huddell v. Levin*, 537 F.2d 726, 737-38 (3d Cir. 1976). In other words, the burden rests upon the plaintiff in such cases to prove the extent of enhanced injuries attributable to the defective design.

[\*\*21]

Hulmes similarly takes issue with this court's conclusion that evidence of alcohol consumption was relevant to his failure to warn theory. *Id.* Plaintiff contends that the rationale for this court's conclusion "must be that a [blood alcohol content] between .09% and .11% could theoretically make the needed warning incoherent." Plaintiff's Brief at 21. Hulmes then argues that such evidence is irrelevant because "the needed warning should have been given to him years prior to the day of the accident." *Id.* This argument is disingenuous. As this court has previously explained, [HN13] evidence of alcohol consumption is relevant in a failure to warn case to rebut the "heeding presumption." *Hulmes*, 936 F. Supp. at 201. Clearly, evidence that a plaintiff who has been warned about consuming alcohol prior to riding his ATV, and nevertheless, does so, is relevant to rebut the "heeding presumption," in that it portrays an individual who is unlikely to heed warnings. Accordingly, plaintiff's challenge to the evidence [\*855] of alcohol consumption based upon relevance is without merit.

More specifically, Hulmes criticizes the admission of a Cooper Hospital Lab Report reflecting plaintiff's serum [\*\*22] blood alcohol level at or around the time of his admission. Plaintiff contends that the lab report is inadmissible

hearsay. Hulmes further contends that this court never specifically addressed his objection to the lab report on hearsay grounds, but only addressed the authentication issue. See *Hulmes*, 936 F. Supp. at 206-07. Plaintiff suggests that this court "misconstrued" his arguments on the in limine motion. Plaintiff's Brief at 27. If so, plaintiff had numerous opportunities to disabuse the court of its "misconstruction."

On October 15, 1996, before defendants' expert, Dr. Herbert Moskowitz, testified, the following exchange occurred between plaintiff's counsel and the court regarding the admissibility of the Cooper Hospital Lab Report.

THE COURT: Your objection is the admissibility of the Cooper Hospital records?

MR. LEVIN: That's correct.

THE COURT: And reliability of the information contained therein?

MR. LEVIN: Our objection is specifically focused on the lab report.

THE COURT: Well whatever, it's the Cooper Hospital record and particularly the lab report which is reflected in the Cooper Hospital records.

MR. LEVIN: Yes.

THE [\*\*23] COURT: And I have ruled on that already in that opinion.

MR. LEVIN: My concern was that the record as it was reflected in the motion in limine does not show in terms of close particularity the basis of our concerns with the accuracy of that record.

THE COURT: Well, your concern is with a specific entry on that record, is it not?

MR. LEVIN: Yes, sir.

THE COURT: Well this dealt with the admissibility of the Cooper Hospital records. And obviously, you'll have a chance to contest on cross-examination and through your own rebuttal expert the reliability of the entry. So I think if your concern is have you preserved the objection --

MR. LEVIN: That's one of my concerns.

THE COURT: You have.

MR. LEVIN: Thank you.

Tr. of Oct. 15, 1996 at 147-48. Hulmes now contends that Honda failed to establish through the testimony of a "qualified witness" that the lab report at issue was trustworthy under the business records exception to the hearsay rule. *Fed. R. Evid. 803(6)*. Honda insists that Hulmes waived this objection by not raising it at trial. Plaintiff's counsel cryptically observed on October 15th that the record might not "show in terms of close [\*\*24] particularity the basis of our concerns with the accuracy of that record," referring to the lab report. Nowhere in the course of this colloquy did plaintiff's counsel utter the word "hearsay" or refer to *Fed. R. Evid. 803(6)*.

On September 24, 1996, before the jury was selected, counsel addressed the admissibility of the alcohol-related evidence. Again, plaintiff's counsel objected to this evidence, including the Cooper Hospital lab report, about which the following exchange occurred:

THE COURT: Let's be specific so that I and [defendants' counsel] know what you're talking about.

MR. LEVIN: Okay.

THE COURT: There is evidence of a blood alcohol test?

MR. LEVIN: Yes. And, your Honor has allowed that subject to --

THE COURT: I'll allow that.

MR. LEVIN: Subject to cross-examination.

Tr. of Sept. 24, 1996 at 21. Once again, this court's ruling on the plaintiff's in limine motion to exclude this evidence was alluded to by plaintiff's counsel and nowhere was an objection made based on hearsay grounds, or a reference made to *Fed. R. Evid 803(6)*.

Plaintiff's omission of any reference to the hearsay rule is especially glaring when this court [\*\*25] pointed to Rule 803(6) in its Opinion on the motion in limine, noting that "some courts have ruled that [HN14] blood tests conducted [\*856] as a routine matter in a hospital are admissible under *Fed. R. Evid. 803(6)*, which does not require the proponent to establish a 'chain of custody.'" *Hulmes, 936 F. Supp. at 207 n.9* (citations omitted). Moreover, on the motion in limine, Honda submitted a lengthy deposition of a senior technologist in the Cooper Hospital chemistry laboratory, Ms. Barbara Snyder, recounting the procedures which are followed to safeguard blood samples. Plaintiff protests, as he did in arguing the in limine motions, that the identity of the technician who drew the blood for the test is unknown, as is the identity of the technician who performed the tests or entered the results into the computer. As noted, the records of the exact time of the blood test and of the most recent calibration of the test equipment were unavailable as a result of Cooper Hospital's document retention policy. See *Hulmes, 936 F. Supp. at 206-07*. Plaintiff recognizes that [HN15] it is his burden to show that "the source of information or the method or circumstances of preparation [\*\*26] indicate lack of trustworthiness." Plaintiff's Brief at 29 (citing *In re Japanese Electronic Products Antitrust Litigation, 723 F.2d 238, 289 (3d Cir. 1983)*). Plaintiff must point to "deficiencies in the manner in which specific records are kept." *In re Japanese Electronic Products, 723 F.2d at 289*. The absence of information due to the expiration of the hospital's standard document retention period simply does nothing to support an assertion of lack of trustworthiness.

Furthermore, it is clear that Ms. Snyder was a "qualified person," within the meaning of Rule 803(6), who could have testified to the regular business practices of the Cooper Hospital chemistry laboratory. n8 Plaintiff cannot now be heard to complain that she did not testify, especially in light of plaintiff's repeated opportunities to state his hearsay objection to this report, and his repeated failure to make this objection plain. For these reasons, plaintiff's motion for a new trial based upon his belated hearsay objection to the Cooper Hospital lab report must be denied.

n8 [HN16] A party seeking to introduce evidence under Rule 803(6) need not "be able to produce, or even identify, the specific individual upon whose first-hand knowledge the memorandum, report, record or data compilation was based." Federal Rules of Evidence, Note to Paragraph (6), 1974 Enactment, Federal Civil Judicial Procedure and Rules 393 (West 1996).

[\*\*27]

### 3. Violation of Statute

Plaintiff contends that it was error for the court to instruct the jury on New Jersey's Motor Vehicle law on operating a motor vehicle with a blood alcohol concentration of 0.10 percent or more by weight and on exceeding the legal speed

limit of twenty-five (25) miles per hour.

Plaintiff's sole support for this assertion of error is *Ladner v. Mercedes-Benz*, 266 N.J. Super. 481, 630 A.2d 308, in which the Appellate Division held that it was error to instruct the jury on the statutory requirement that vehicle operators set the parking brake because it invited the jury to consider the plaintiff's negligence on the fifth prong of the risk/utility analysis. n9 See *Ladner*, 266 N.J. Super. at 492-93. The Appellate Division's recommendation was a limiting instruction. *Id.* at 493-94. In this case, the jury received just such a limiting instruction. The jury was specifically charged that it could only consider a violation of either statute "on the question whether plaintiff would have heeded an adequate warning had one been given." Tr. of Oct. 23, 1996 at 78.

n9 This prong is generally stated as: The ability of foreseeable users to avoid danger by the exercise of care in the use of the product. See *Cepeda v. Cumberland Engineering Co.*, 76 N.J. 152, 174, 386 A.2d 816 (1978).

[\*\*28]

If, as plaintiff goes on to suggest, it was error to give these instructions because they were only marginally relevant to the "heeding presumption," it was surely harmless error. The jury found that Honda was liable for its failure to warn the plaintiff. Implicit in that finding is the jury's conclusion that Honda failed to rebut the "heeding presumption." Accordingly, the instructions on statutory violations, even if error, cannot support a motion for a new trial.

[\*857] 4. *The Comparative Fault Instruction*

Hulmes contends that it was error to instruct the jury on comparative fault, and that he is therefore entitled to a new trial. Plaintiff correctly notes that [HN17] a comparative fault charge in a products liability action is only permissible when the evidence supports a finding that the plaintiff voluntarily and knowingly encountered a risk of injury from a defective product. *Johansen v. Makita USA, Inc.*, 128 N.J. 86, 94, 607 A.2d 637 (1992). Hulmes contends that the court's charge on comparative fault was not tailored to the specific design defect alleged in this case, i.e., the instability of the ATV and its lack of bumpers on the rear wheels. Plaintiff essentially contends [\*\*29] that the charge on comparative fault allowed the jury to define the "known danger" which plaintiff voluntarily encountered at too high a level of generality. There is no merit to this contention.

In keeping with New Jersey's Model Jury Charges - Civil §§ 5.34H and 5.34I, the jury was instructed that, only if it found that "Robert Hulmes was at fault by voluntarily and unreasonably proceeding to encounter a known danger and that action was a proximate cause of the accident," should it proceed to "compare the fault of each party." Tr. of Oct. 23, 1996 at 79-80. As to the alleged design defect, the instability and lack of a bumper system, the jury found, in response to special interrogatory number 1-A, that there was no design defect in the Honda ATC250R. Clearly, the jury was not asked to compare, and it must be assumed that it did not compare, the fault of Honda in defectively designing the ATV with the fault of Hulmes in voluntarily encountering a "known danger." Indeed, the jury need not even have considered the questions of design defect and nature of the "known danger" together. Had it done so, the jury must necessarily have set the fault of Honda at 0%, since it found no design [\*\*30] defect. Accordingly, even if it was error to instruct the jury on comparative fault as it related to the issue of "design defect," the error was harmless.

[HN18] "As a threshold matter, a party challenging a jury instruction on a particular matter must establish that the jury in fact reached that matter. A motion for a new trial on issues that a jury did not reach will not be granted." *Farra v. Stanley-Bostitch, Inc.*, 838 F. Supp. 1021, 1027 (E.D. Pa. 1993) (citing *Markovich v. Bell Helicopter Textron, Inc.*, 805 F. Supp. 1231, 1241 (E.D. Pa.), aff'd, 977 F.2d 568 (3d Cir. 1992); *Field v. Omaha Standard, Inc.*, 582 F. Supp. 323, 332 (E.D. Pa. 1983), aff'd, 732 F.2d 145 (3d Cir. 1984)), aff'd, 31 F.3d 1171 (3d Cir. 1994). The conclusion that the jury need not have reached the comparative fault issue on the question of design defect is inescapable. This alone is sufficient to deny plaintiff the relief he requests in this portion of his motion.

More importantly, however, this case properly raised an issue of plaintiff's comparative fault. Plaintiff seeks to

define the "known danger" element as the danger presented by an allegedly unstable design and the absence of rear [\*\*31] wheel bumpers. Plaintiff characterizes defendants' definition of the same element as mere knowledge that one can be injured in an accident, which plaintiff claims would erase the threshold requirement of a knowing assumption of risk. Neither of these end points properly defines the test of a known risk. [HN19] The precise nature of the "known danger" which the plaintiff is said to voluntarily encounter must be defined by the facts of the individual case. It should not be defined so broadly that mere negligence by the plaintiff can be equated with voluntarily encountering a "known danger." Neither can the term be defined so narrowly that the jury is prevented from considering a plaintiff's comparative fault unless it can be shown that the plaintiff was aware of the precise defect which is alleged to have caused her injuries. The cases speak of a "known danger" not a "known defect." See *Ladner*, 266 N.J. Super. at 495 ("It is not knowledge of the defect . . . that is required to be proven, but, rather, evidence that plaintiff voluntarily and unreasonably encountered a known danger.").

*Lewis v. American Cyanamid Co.*, 294 N.J. Super. 53, 682 A.2d 724 (App. Div. 1996), is instructive [\*\*32] on this important distinction. In *Lewis*, the plaintiff was injured when an aerosol insecticide which he was using in his [\*\*858] kitchen caught fire. The Appellate Division discussed, in considerable detail, the New Jersey rule on comparative fault in product liability actions, before remanding the case for reconsideration, inter alia, of whether the plaintiff had actual knowledge of the particular risk of fire as opposed to a mere generalized knowledge of the risk of injury, possibly from the toxicity of the insecticide. n10

n10 It must be noted that the Appellate Division criticized the trial court's jury charge, which apparently did not track the language of § 5.34H of the Model Jury Charges-Civil. *Lewis*, 294 N.J. Super. at 79. In *Hulmes*'s case, the jury was charged in accordance with § 5.34H.

*Hulmes* argued at trial that the ATV was defectively designed because it was unreasonably unstable and could easily roll over in the event of an accident, throwing the rider. The "danger" he must knowingly have [\*\*33] encountered, therefore, is the danger of injury from a similar accident. There was evidence that *Hulmes* was aware of this danger, even if he was unaware of the exact center of gravity of his ATV. Plaintiff testified that he was aware of the danger presented by a collision. Tr. of Oct. 1, 1996, part B, at 55. *Hulmes* also testified that his brother punctured his lung after being thrown from a four-wheeled ATV. *Id.* at 61-63.

In *Dixon v. Jacobsen Mfg. Co.*, 270 N.J. Super. 569, 592, 637 A.2d 915 (App. Div. 1994), the plaintiff testified that he was unaware that a rotating impeller blade was located in a snowthrower's discharge chute, therefore, he could not be contributorily at fault for the accident which severed some of his fingers. The Appellate Division held that the testimony created a jury question on contributory fault, because the jury could have inferred a knowledge of the relevant danger from the plaintiff's testimony. Here, *Hulmes* testified that he did not know and had never asked about the details of his brother's ATV accident. Tr. of Oct. 1, 1996, part B, at 62. *Hulmes*'s brother, Nicholas, testified that *Hulmes* may have been there at the time of his own ATV accident [\*\*34] and that he and his brother may have witnessed other riders involved in ATV accidents. Tr. of Oct. 3, 1996, part A, at 49-51. These testimonial inconsistencies presented a jury question as to whether *Hulmes* was aware of the danger of an accident similar to the one in which he was involved, and yet voluntarily encountered that danger. Accordingly, there was ample justification for a jury charge on comparative fault in this case.

##### 5. The "U-Haul Documents"

Plaintiff contends that this court erred in excluding certain warning labels produced by U-Haul for a fleet of Honda ATVs which it maintained for the rental market. These labels were attached to the U-Haul ATVs and were more detailed and extensive than the warning labels that appeared on *Hulmes*'s Honda ATC250R.

At the July 1, 1996 hearing on the motions in limine, and again on October 3, 1996, the court expressed concern

that U-Haul might not have been qualified to design an appropriate warning label for an ATV, and the record was devoid of any testimony from a representative of U-Haul regarding these warnings. Tr. of July 1, 1996 at 161-72; Tr. of Oct. 3, 1996, part B, at 54. This, concern, however, largely preceded [\*\*35] plaintiff's counsel's suggestion that he sought to introduce the U-Haul warnings only for notice. Id. at 55. On this motion, Hulmes repeats his assertion that these documents constituted "vivid evidence" of notice. Plaintiff's Brief at 38. Plaintiff contends that this court "misconstrued the vividness of the evidence to prove just what it was offered for as undue prejudice to Honda." Id.

As the court understands plaintiff's argument, these documents were offered as evidence of notice that U-Haul considered the warnings Honda provided with its vehicles inadequate in view of the purposes for which U-Haul had purchased these ATVs. This court's conclusion that plaintiff did not lay a sufficient foundation as to U-Haul's purpose and experience with these vehicles goes directly to plaintiff's notice argument. Thus, this court's concern with the "content" of the U-Haul warnings was not the result of some mistaken notion that plaintiff sought to introduce [\*\*859] these documents for their truth. n11 Rather, that concern addressed the nature of the notice these documents purportedly gave to Honda. Plaintiff simply never established what this notice contained, other than notice that U-Haul [\*\*36] put additional warning labels on its ATVs. This fact is, at best, of marginal relevance in a case of a purchaser of an ATV, not of the same model as those in the U-Haul fleet, who admitted to having read the owner's manual that accompanied his ATV "cover to cover." Tr. of Oct. 1, 1996, part B, at 4.

n11 Exhibit P-594, for example, warned that the vehicle could "flip every which way."

Moreover, insofar as these documents provided any notice of the insufficiencies of Honda's warnings, the U-Haul documents were cumulative of much of the plaintiff's evidence, as the court pointed out at the time. Tr. of Oct. 3, 1996 at 60. Ultimately, this court excluded these documents because they were potentially inflammatory and confusing to the jury, as well as cumulative of other evidence. Id. at 64-65. Plaintiff has not demonstrated that, in so doing, this court misapplied *Fed. R. Evid. 403*.

Indeed, [HN20] plaintiff cannot demonstrate any prejudice from the exclusion of these documents, much less any impact on his substantial [\*\*37] rights, because the jury found in his favor on the failure to warn theory, and it was on notice of the adequacy of the warning that plaintiff sought to introduce this evidence. For all these reasons, a new trial on this basis must be denied.

#### 6. Lay Opinion Testimony

Plaintiff contends that this court erred in admitting the opinion of Officer James Mikulski under *Fed. R. Evid. 701*. Rule 701 allows opinions of non-experts to be heard when those opinions or inferences are "rationally based on the perception of the witness and (b) helpful to a clear understanding of the witness' testimony or the determination of a fact in issue." *Fed. R. Evid. 701*.

Based upon his post-accident investigation, Officer Mikulski testified that Hulmes was traveling over the posted speed limit of twenty-five (25) miles per hour at the time of the accident. Tr. of Oct. 8, 1996 at 174. Officer Mikulski also offered his opinion that the accident resulted from "driver inattention" because he could find no "debris" or other impediments which might have caused the accident. Id. at 177-78. Plaintiff's counsel cross-examined Officer Mikulski at some length about the measurements upon which he based his conclusions [\*\*38] regarding the speed of Hulmes's ATV, concluding:

Q. You are not saying here today that you have any real scientific technical accurate focused determination that this is the precise spot where the event occurred; is that right?

A. That's correct, sir.

Id. at 193.

This issue was explored during the consideration of the parties' numerous motions in limine. At that time, this court noted that [HN21] lay opinions of a technical nature may only be admitted when "the witness possesses sufficient and relevant specialized knowledge or experience to offer the opinion." *Asplundh Mfg. Div. v. Benton Harbor Engineering*, 57 F.3d 1190, 1202 (3d Cir. 1995). Asplundh further requires the proponent of lay opinion testimony to demonstrate "some connection between the special knowledge or experience of the witness, however acquired, and the witness's opinion." Id.

In keeping with the Asplundh standard, this court determined that Officer Mikulski had been a Mantua Township police officer for approximately five years at the time of the accident, before which he had worked in the Gloucester County sheriff's department for six years. Officer Mikulski is a graduate [\*\*39] of the Camden City Police Academy. Although "particular educational training is of course not necessary," id., Officer Mikulski testified that, since graduation from the police academy, he had completed three additional courses related to motor vehicle accident investigation. Tr. of Oct. 8, 1996 at 135. Officer Mikulski also testified that he had investigated from fifty to one hundred motor vehicle accidents prior to Hulmes's accident. Id. at 136.

[\*860] Plaintiff's sole ground for attacking Officer Mikulski's testimony is that Officer Mikulski is not competent to offer an opinion on a "technical" matter such as the speed of the ATV or the cause of the accident. Plaintiff does not suggest that Officer Mikulski's opinion is based on other opinions or reports or on anything other than the facts as they appeared to him at the scene of the accident. Rather, plaintiff claims that Officer Mikulski's testimony, because it did not demonstrate his "familiarity with the influences of the vehicle's design on flipping," should have been excluded. Plaintiff urges upon this court a singularly broad reading of Asplundh.

In Asplundh, a maintenance supervisor, who "[did] not seem to have [\*\*40] anything to do with designing or evaluating the design of machinery," testified that a piece of machinery had failed due to metal fatigue which he attributed to faulty design. *Asplundh*, 57 F.3d at 1205. The correlative would exist in this case had Officer Mikulski, lacking any experience in ATV design, testified that Hulmes's accident was caused by design flaws in the Honda ATC250R. The proposition that a lay witness cannot give an opinion which must necessarily be based upon expertise which he lacks, does not lead to the conclusion that a lay witness may never testify unless he has technical expertise in all aspects of the case. To read Asplundh for this proposition would completely eliminate lay opinion testimony from any case involving a "technical" issue. This cannot have been the Third Circuit's intention.

Officer Mikulski's duty in investigating Hulmes's accident required him to form an opinion as to the cause of the accident and to note that opinion on the accident investigation form. See *Ernst v. Ace Motor Sales, Inc.*, 550 F. Supp. 1220, 1223-24 (E.D. Pa. 1982), aff'd, 720 F.2d 661 (3d Cir. 1983) (police officer who arrived at the scene of an automobile [\*\*41] accident was permitted to testify to the point of impact as a lay witness based on his experience and his perception of physical evidence at the scene). Officer Mikulski testified at trial to no more than he was required to observe in his professional capacity. Plaintiff was given ample opportunity to cross-examine Officer Mikulski and to challenge his testimony before the jury. Accordingly, plaintiff's motion for a new trial on this ground will be denied.

#### 7. The "Ultimate Outcome" Charge

Plaintiff contends that this court erred in failing to instruct the jury on the "ultimate outcome" of its deliberations on the comparative fault of the parties, that is, that a finding of fifty-one (51) percent or greater causative fault on the part of Hulmes would bar his recovery. Although plaintiff's counsel now stresses the importance of an "ultimate outcome" charge to his case, he was slow to assert this argument at trial.

Neither plaintiff's original requested points for charge, nor his amended requests, contained an "ultimate outcome" charge. This omission might be interpreted merely to reflect plaintiff's belief, which is vigorously pressed in this

motion, that a comparative fault charge [\*\*42] was never appropriate in this case. Notably, however, plaintiff opposed the comparative fault charge immediately after seeing a first draft of the court's instructions to the jury without mentioning the "ultimate outcome" charge. Tr. of Oct. 22, 1996 at 229-44. The following morning, the court returned to the draft jury instructions and special interrogatories. Tr. of Oct. 23, 1996 at 2. At that time, plaintiff pressed a distinct request, based on New Jersey's Model Jury Charge § 5.34G, for a limiting instruction on proximate cause "where comparative negligence is not applicable." See Plaintiff's Requested Point for Charge No. 22, subsection 2. The court ultimately refused to give this charge based upon its conclusion that the doctrine of comparative fault was applicable to this case. Tr. of Oct. 23, 1996 at 17. Plaintiff's counsel concluded:

THE COURT: Is there anything else you wish to place on the record, Mr. Levin? You want to consult with your counsel?

MR. LEVIN: Yes, sir.

(short pause)

MR. LEVIN: Thank you, your Honor, nothing else on the points for charge or the jury verdicts.

THE COURT: Pardon?

[\*861] MR. LEVIN: Nothing else on the points for [\*\*43] charge or the jury verdict.

Tr. of Oct. 23, 1996 at 22. Following some discussion of the exhibit list, the jury was brought in and the charge read. *Id.* at 46-98. Not until the court asked for any "additional objections" to the charge did plaintiff's counsel first address the omission of an "ultimate outcome" charge. *Id.* at 100. Even then, counsel was unable to cite any New Jersey caselaw in support of such an instruction in a product liability case. *Id.* at 101. Plaintiff now asserts that the omission of an "ultimate outcome" charge in this case adversely affected his substantial rights, necessitating a new trial. I disagree.

In *Roman v. Mitchell*, 82 N.J. 336, 413 A.2d 322 (1980), the Supreme Court of New Jersey held that [HN22] trial courts should instruct the jury as to the legal effect of the application of the comparative negligence statute to the jury's findings. That court also observed, "there is nothing in the statute which specifically requires that the jury be instructed" on the ultimate outcome. *Id.* at 345. The rule in New Jersey is thus a judge-made rule. n12

n12 As such, it is a response to the judge-made rule against informing the jury of the effect of its conclusions. This rule, also called the "blindfold" rule, probably was first announced by the Wisconsin Supreme Court in 1890. *Ryan v. Rockford Ins. Co.*, 77 Wis. 611, 46 N.W. 885 (Wis. 1890). See Stuart F. Schaffer, Comment, Informing the Jury of the Legal effect of Special Verdict Answers in Comparative Negligence Actions, 1981 *Duke L.J.* 824, 830 (1981).

[\*\*44]

The Roman court reasoned that a jury would be "better able to fulfill its fact-finding function" if informed of the legal effect of its findings. *Id.* at 346. The court did not elaborate on its rationale, but instead, relied primarily on *Seppi v. Betty*, 99 Idaho 186, 579 P.2d 683 (Idaho 1978), in which the Idaho Supreme Court discussed the then emerging trend toward allowing the trial judge to instruct the jury on the effect of its allocation of fault. See *id.* at 686-92.

Two observations about *Seppi* must be noted. First, the Idaho Supreme Court held that it was not reversible error to inform the jury of the ultimate outcome of the apportionment of comparative fault. *Id.* at 692. In contrast to *Seppi*, and without further discussion, the New Jersey Supreme Court fashioned an affirmative rule that the jury should be so

informed, except in complex cases "involving multiple issues and numerous parties . . . if it would tend to mislead or confuse the jury." *Roman*, at 346-47. Second, the court in *Seppi* based its conclusion, at least in part, on the concern that a fifty-fifty division of fault would be "singularly attractive to a jury," and that such [\*\*45] a division would bar the plaintiff's recovery in Idaho. *Seppi*, 579 P.2d at 690.

[HN23] In New Jersey, a plaintiff will recover as long as his or her comparative fault is "not greater than" the combined fault of the defendants. *N.J. Stat. Ann. § 2A:15-5.1* (West 1987). Indeed, the *Seppi* court noted that "Wisconsin, though not changing its rules to permit informing the jury of the legal effect of their answers, did adopt a 'no greater than' comparative negligence statute," and that such a statute "gives the plaintiff the benefit of the attractive 50-50 apportionment of negligence." *Seppi*, 579 P.2d at 691. See also *Roman*, 82 N.J. at 355-56 (Clifford, J., dissenting) (noting that New Jersey's Comparative Negligence Act was patterned on Wisconsin's act, and arguing that it should, therefore, be interpreted in accordance with the constructions placed upon it by Wisconsin courts, absent any contrary direction from the New Jersey Legislature).

The rationale for the "blindfold rule" was succinctly stated by the Wisconsin Supreme Court.

Under our system of jurisprudence, the jury is the finder of fact and it has no function in determining how the law should be applied to the [\*\*46] facts found. It is not the function of a jury in a case between private parties on the determination of comparative negligence to be influenced by sympathy for either party, nor should it attempt to manipulate the apportionment of negligence to achieve a result that may seem socially desirable to a single juror or to a group of jurors.

*McGowan v. Story*, 70 Wis. 2d 189, 234 N.W.2d 325, 329 (Wis. 1975).

[\*862] Where the giving or withholding of an instruction on the legal effect of the jury's comparative negligence findings is discretionary, one court approved such an instruction following "an inquiry from the jury that strongly implied confusion and speculation." *Schabe v. Hampton Bays Union Free School Dist.*, 103 A.D.2d 418, 480 N.Y.S.2d 328, 337 (N.Y. App. Div. 1984). However, it seems equally probable that an "ultimate outcome" instruction following such an inquiry could have a pernicious effect. This was amply illustrated in *Riley v. K Mart Corp.*, 864 F.2d 1049 (3d Cir. 1988). In *Riley*, an "ultimate outcome" instruction was given along with the initial charge. However, in answering a communication from the jury, the district court failed to repeat the "ultimate [\*\*47] outcome" instruction. The jury returned a verdict assigning thirty (30) percent of the comparative fault to the defendant and seventy (70) percent to the plaintiff, and set the plaintiff's damages at \$ 250,000.00. *Riley*, 864 F.2d at 1051. Presumably, based upon its "ultimate outcome" instruction, which was intended to inform the jury that no damages were to be awarded if the plaintiff's negligence exceeded fifty (50) percent, the district court faced what it considered an inconsistent verdict. *Id.* at 1052. Accordingly, the district court again explained the effect of the comparative negligence findings and the jury returned to deliberations. *Id.* The jury revised the special verdict to reflect 49.9% negligence on the plaintiff's part and 50.1% on K Mart's part, and damages in the amount of \$ 150,000.00. *Id.* The district court entered judgment in favor of the plaintiff for \$ 75,150.00. *Id.*

The Third Circuit vacated and remanded, pointedly noting that "after being reminded of Pennsylvania's rule on comparative negligence, the jury revised its still warm factual findings to reach the damage award it desired. In a matter of minutes, the plaintiff's damages dropped by [\*\*48] \$ 100,000.00 and the defendant's negligence increased by 20%." *Id.* at 1054. The Third Circuit further opined that, in view of the jury's original apportionment of negligence, the judgment for the plaintiff "seems to fly in the face of the Commonwealth of Pennsylvania's clearly expressed policy of denying recovery to a plaintiff whose negligence exceeds that of the defendant. To uphold the judgment entered below would be to sanction a verdict disrespectful of the applicable substantive law." *Id.* at 1055.

Moreover, it is not clear that the omission of an "ultimate outcome" charge in this case, even if it was error, adversely affected any substantial right of the plaintiff. [HN24] New Jersey recognizes that the omission of the

"ultimate outcome" charge can sometimes be harmless error.

In *Vartenissian v. Food Haulers, Inc.*, 193 N.J. Super. 603, 475 A.2d 626 (App. Div. 1984), the Appellate Division of the New Jersey Superior Court found "substantial deficiencies" in the trial court's charge to the jury. *Id.* at 609. Among these was the omission of an "ultimate outcome" charge. *Id.* 610. The appellate court noted that plaintiff's counsel failed to object to the omission of the [\*\*49] charge. *Id.* However, the Vartenissian court did not rest its decision on counsel's failure to object. Instead, the court held that, by resolving the case through its assignment of eighty (80) percent of the negligence to the plaintiff and only twenty (20) percent to the defendant truck driver, "the jury could not have found that [the defendant truck driver] was more negligent than the plaintiff." *Id.* Accordingly, the Vartenissian court ruled that the omission of the "ultimate outcome" charge was harmless error. *Id.*

The reasoning of Vartenissian is compelling. In Hulmes's case, the jury assigned sixty-six (66) percent of the causative fault to the plaintiff and only thirty-four (34) percent to the defendants. This result is not suggestive of a jury entranced by the "singularly attractive" alternative of a roughly fifty-fifty split. Nor was there any communication from the jury hinting that the jurors were hampered in any way in their deliberations by the absence of an "ultimate outcome" instruction. In view of the jury's assignment of roughly twice as much causal fault to Hulmes, it is difficult to believe that any substantial right of the plaintiff's has [\*\*50] been infringed. Given the jury's allocation of sixty-six (66) percent comparative fault to Hulmes, I conclude that the omission of the [\*\*863] "ultimate outcome" charge in this case, even if error, was harmless error.

Moreover, the New Jersey Supreme Court's holding in Roman that an "ultimate outcome" instruction should be given in a comparative negligence case was not absolute. As the court noted: [HN25] "In a complex case involving multiple issues and numerous parties, the trial court, in the exercise of sound discretion, could withhold the instruction if it would tend to mislead or confuse the jury." *Roman*, 82 N.J. at 346-47.

This product liability case required the jury to consider two sophisticated and doctrinally distinct theories of liability and to weigh considerable expert testimony on difficult issues such as dynamic stability. New Jersey's Product Liability law, which employs presumptions and multiple part tests of risk versus utility, is highly nuanced. Indeed, there is no reported New Jersey case which has considered whether an "ultimate outcome" charge should be given in a product liability case. n13 Given the complexity of the task the jury was asked to undertake, in my view, [\*\*51] to have given the "ultimate outcome" charge in this case would have misled or confused the jury.

n13 The New Jersey Model Jury Charges suggest that an "ultimate outcome" charge may be given in a product liability case if the language of the charge is tailored to the circumstances. Model Jury Charges - Civil § 8.21(A) n.1. The only case cited in the Model Jury Charges, however, is not a product liability case. See *Williams v. Town of Phillipsburg*, 171 N.J. Super. 278, 408 A.2d 827 (App. Div. 1979).

Defendants maintain that *Roman v. Mitchell* is not controlling in this case in any event because this court's instruction to the jury upon submission of special interrogatories is a matter of federal procedure, rather than state substantive law. See *Fed. R. Civ. P. 49(a)*. See also *Theodorv v. Lipsey*, 237 F.2d 190, 193 (7th Cir. 1956). Plaintiff, without citation to caselaw or other authority, characterizes this contention as "ludicrous." Reply Brief at 8.

Plaintiff has pointed to no published [\*\*52] case from any Circuit Court of Appeals reversing a district court for failure to give an "ultimate outcome" instruction in even the simplest of comparative negligence cases. Nor has this court's research revealed such a case. On the other hand, there are federal appellate cases standing for the proposition that the scope and content of a district court's special verdict is controlled by *Fed. R. Civ. P. 49(a)* and not by state law.

In *Lowery v. Clouse*, 348 F.2d 252 (8th Cir. 1965), a diversity action, then-Circuit Judge Blackmun confronted the mirror image of the argument which plaintiff presses on this motion. At the time, Minnesota courts held that, when a special verdict was used, it was reversible error if the jury was "advised, expressly or by implication, of the result of its

findings." *Id. at 260* (citations omitted). It was argued that the district court's charge "impliedly" informed the jury of the legal effect of its answers. *Id. at 259*. The Eighth Circuit nevertheless affirmed, holding that [HN26] the phrasing of the special verdict in a federal district court "is a matter of procedure governed by the federal rules and not by state practice." *Id. at 260*. This holding [\*\*53] was subsequently reaffirmed by a different panel of that court. See *Davis v. Oberholtzer*, 588 F.2d 243, 246 (8th Cir. 1978).

The conclusion that giving or withholding an "ultimate outcome" charge is procedural finds further support in those states which have accomplished uniformity on this issue through amendments to their Rules of Civil Procedure. See, e.g., Texas R. Civ. P. 277 ("The court shall also instruct the jury to answer the damage question or questions without any reduction because of the percentage of negligence or causation, if any, of the person injured."); Minn. R. Civ. P. 49.01(b) ("The court shall inform the jury of the effect of its answers to the comparative fault question . . . , unless the court is of the opinion that doubtful or unresolved questions of law or complex issues of law or fact are involved which may render such instruction or comment erroneous, misleading, or confusing to the jury.").

Because the omission of an "ultimate outcome" charge in this case, if it was error, was harmless error, and, as noted, even under New Jersey law, it was within the court's [\*\*864] discretion to refuse to give such a charge, plaintiff's motion for a new trial on this [\*\*54] basis will be denied. Accordingly, it is unnecessary to determine whether the decision to give or withhold an "ultimate outcome" charge upon the submission of special verdicts is governed by federal procedural law or state substantive law in a diversity action in this court.

#### 8. Comparative Risk Analysis

Plaintiff argues that this court erred in admitting testimony based upon comparative risk analysis. In deciding plaintiff's motions in limine, this court ruled that, as a general matter, the comparative risk of ATV riding, snow mobiling or bungee jumping was irrelevant in a product liability case. As was pointed out then, "there is some degree of risk of an unhappy outcome associated with almost every human endeavor." Tr. of July 1, 1996 at 7. However, it was then understood that testimony concerning comparative risk analysis might be admissible to rebut certain documentary evidence relating to the Consumer Products Safety Commission's investigation into ATVs, were such evidence admitted. *Id. at 8-9*.

Prior to trial, plaintiff again sought to admit evidence drawn from the Consumer Products Safety Commission's ATV investigation. Some of this material was admitted, thereby [\*\*55] opening the door to rebuttal evidence in the form of comparative risk analysis. The danger that the jury would accord undue authority to an investigation conducted by an official arm of the government required the admission of some evidence which would tend to rebut the CPSC data. It was for this purpose alone that the comparative risk analysis testimony was admitted. Plaintiff was aware that the court would allow this evidence for that purpose. At the charging conference, plaintiff failed to request a limiting instruction confining the jury's consideration of this evidence to its value in rebutting the CPSC material. In view of all these factors, plaintiff's motion for a new trial on this basis must be denied.

#### 9. The "Super Trike" Brochure

Plaintiff maintains that this court erred in excluding from evidence an advertising brochure prepared by Honda for a small segment of Japanese consumers. Plaintiff characterizes this document as an admission by a party opponent going to the issue of design defect. It is nothing of the kind. This document contains nothing which could be termed an admission of "defect."

As to plaintiff's claims that the "Super Trike" brochure was crucial evidence [\*\*56] on his failure to warn theory, plaintiff presented no evidence that the brochure was ever intended as a warning of any kind. Apparently, the brochure was advertising material which was sold in Japan to a limited number of off-road motorcycle enthusiasts. Therefore, plaintiff's characterization of this brochure as a "warning" that was delivered to the Japanese consumer, but withheld from the American consumer is unsupported by the record and highlights the potential for prejudice arising from this

brochure had it been admitted into evidence. See Tr. of Oct. 3, 1996, part B, at 79. Moreover, I am again constrained to observe that, as to plaintiff's failure to warn theory, the exclusion of this document could not have prejudiced the plaintiff, since the jury found in his favor.

#### *10. The Honda Advertising "Outtakes"*

Masayuki Tanaka testified as an expert on behalf of Honda concerning the testing of ATVs. As part of his testimony, Mr. Tanaka showed videos of ATVs performing under test conditions. Plaintiff contends that, in cross-examining Mr. Tanaka, he should have been allowed to play "outtakes" from a Honda promotional video which showed ATVs flipping over. The court concluded [\*\*57] that plaintiff had laid no foundation for screening the "outtakes" in rebuttal, because there was no evidence that the test conditions about which Mr. Tanaka testified were in way similar to the conditions under which the promotional video was filmed. Tr. of Oct. 17, 1996 at 18-19. It remains entirely unclear how Mr. Tanaka could usefully have commented on these "outtakes" without some knowledge of the conditions under which the filming took place. Accordingly, plaintiff's motion for a new trial on this ground will be denied.

#### [\*865] *11. Evidence of Modifications*

Plaintiff asserts that a new trial is warranted because the evidence of modifications which he made to his ATV created the impression in the minds of the jurors that Hulmes's Honda ATC250R was, at the time of the accident, "no longer the same product" which he purchased. Plaintiff's Brief at 49. This topic was exhaustively discussed during argument on pre-trial issues. Tr. of Sept. 25, 1996 at 204-09. Honda stipulated that it would not seek to show substantial modification or misuse of the ATV. *Id.* Honda offered the evidence in question solely to show that Hulmes was an experienced ATV enthusiast. There is no reason to believe [\*\*58] that the jury used this information for any other purpose. Hulmes's experience, *vel non*, goes to his knowledge of the danger presented by the vehicle and the likelihood that he would have heeded additional warnings. The jury found in Hulmes's favor on the failure to warn issue. Accordingly, this evidence could not have prejudiced Hulmes's substantial rights and his motion based on this ground must be denied.

#### *12. The Aftermath of the Accident*

Plaintiff claims that this court erred in admitting testimony that Nick Hulmes, plaintiff's brother, pulled him from underneath the pickup truck where he came to rest after that accident. Plaintiff argued that the evidence allowed the jury to conclude incorrectly that some or all of plaintiff's injuries resulted from the conduct of Nicholas Hulmes. There is no merit to this argument.

Honda stipulated that the evidence of Nicholas Hulmes's post-accident conduct was not being offered to show that Nicholas Hulmes exacerbated the injuries suffered by the plaintiff. Tr. of Sept. 25, 1996 at 132. Honda offered the evidence to establish that Nicholas Hulmes had removed a beer bottle from his brother's waistband before the paramedics arrived [\*\*59] on the scene. The court allowed this testimony as relevant to the issue of alcohol consumption. This issue has been addressed above and need not be reconsidered now. Plaintiff's motion based on the post-accident conduct of Nicholas Hulmes will be denied.

#### *13. Dr. Mercaldi's Testimony*

David W. Mercaldi, Honda's engineering expert, offered an opinion of the speed of Hulmes's ATV at the time of the accident based upon certain tests he performed. Tr. of Oct. 21, 1996 at 50. Plaintiff contends that these tests were unreliable and that Mercaldi's evidence inadmissible under *Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993). These tests were extensively described by Dr. Mercaldi, out of the presence of the jury. Tr. of Oct. 21, 1996 at 46-105. At this Rule 104 hearing, Honda successfully demonstrated by a preponderance of the evidence that Dr. Mercaldi's test methodologies were reliable. The burden of proving by a preponderance that expert testimony is reliable is not meant to be an onerous one. *In re Paoli R.R. Yard PCB*

*Litigation*, 35 F.3d 717, 743-45 (3d Cir. 1994). Indeed, Honda filed an in limine motion seeking to [\*\*60] bar the testimony of plaintiff's engineering expert, also based upon an appeal to Daubert, which was denied. Tr. of July 1, 1996 at 159. In denying Honda's motion this court adopted the view that whether the alternative designs suggested by plaintiff's expert were feasible, or whether the testing methods employed were state-of-the art, were not proper issues for a threshold determination under Daubert. See *In re Paoli*, 35 F.3d at 744 ("The grounds for the expert's opinion merely have to be good, they do not have to be perfect."). Rather, [HN27] Daubert requires the district court to determine whether novel or untested methodologies are sufficiently reliable that conclusions based upon them can be of some use to the jury. *Id.*

In this spirit, the court admitted the testimony of plaintiff's expert, Dr. Huston, and the jury heard his opinions regarding what he considered to be flaws in the designs of various Honda ATVs. On cross-examination, Honda vigorously attacked the sufficiency of the testing upon which Dr. Huston based his opinions. In its case, Honda put on Dr. Mercaldi, in part, to refute Dr. Huston's conclusions regarding Honda ATV designs. The court applied [\*\*61] the same rationale [\*\*866] in admitting Dr. Mercaldi's testimony that it applied in admitting Dr. Huston's testimony. There was no error in so doing.

Plaintiff also objects to the timing of the disclosure of photographs and videotapes of Dr. Mercaldi's testing procedures. When this objection was raised at the Rule 104 hearing, the court limited his testimony and video presentation to tests of which plaintiff's counsel received timely submissions in still picture or video format. Tr. of Oct. 21, 1996 at 105-13.

The tests which Dr. Mercaldi performed were intended to rebut assertions made by plaintiff's engineering expert, Dr. Jeffrey Huston, at his deposition. The still photographs of these tests were presented to plaintiff's counsel at Dr. Mercaldi's deposition on August 12, 1996, only a few weeks after the tests were completed. It is difficult to imagine how plaintiff was prejudiced by this production, even if it was not as timely as humanly possible. This is especially so in that Dr. Mercaldi was not allowed to testify about, or describe any tests which were not presented in some form to plaintiff's counsel at his deposition. Plaintiff's assertion of surprise, therefore, is unfounded. [\*\*62]

#### *14. Testimony of Glynn and Tanaka*

Plaintiff objects to the admission of the testimony of Edward F. Glynn, Assistant to the Executive Vice-President of American Honda Motor Company, Inc., and Masayuki Tanaka, an expert for Honda who supervised product testing of ATVs. It is difficult to determine the basis for this objection. Plaintiff appears to argue that this testimony was more prejudicial than probative. However, plaintiff fails to cite particular testimony and describe how it prejudiced his case. Instead, plaintiff paints with a broad brush, faulting the court for allowing the witnesses "to present lengthy multimedia presentations to the jury as if the trial were a shareholders' meeting." Plaintiff's Brief at 55.

To place this argument in perspective, plaintiff called Mr. Glynn during his case-in-chief to testify regarding the CPSC's ATV investigation and specifically Honda's efforts to disseminate a safety letter as part of its consent decree with the CPSC. Tr. of Oct. 7, 1996 at 33-107. Honda recalled Mr. Glynn during its case to develop further Honda's response to the CPSC investigation and its product warning procedures. Honda was under an ongoing duty, even after the [\*\*63] ATV in question left its control, to take reasonable steps to warn the user of any newly discovered defects. The question of the reasonableness of Honda's actions in light of the CPSC investigation was for the jury to decide. Mr. Glynn's testimony addressed this issue.

Similarly, Mr. Tanaka's testimony concerning Honda ATV design and product testing was relevant to rebut testimony from plaintiff's expert regarding purported "design flaws." Mr. Tanaka was identified as an expert in ATV design who could testify to the design choices made by Honda. This was appropriate in view of the testimony of Dr. Huston, who made a broad attack on three-wheeled ATVs, preferring a four-wheeled design including a roll cage. Accordingly, there was no error in admitting this testimony.

In connection with this argument, plaintiff maintains that tanaka should not have been permitted to "illustrate" his testimony relating to Honda's testing procedures with laser videos. Plaintiff maintains that these videos were irrelevant to any issue in the case. As noted above, Mr. Tanaka was called, in part, to rebut testimony from plaintiff's design expert, Dr. Huston, and the use of videos in support of mr. Tanaka's [\*\*64] testimony was entirely permissible. Accordingly, no substantial right of the plaintiff's was infringed.

*15. Weight of the Evidence and Fundamental Fairness*

Finally, plaintiff argues that the jury's verdict was against the weight of the evidence and that the trial was fundamentally unfair. These arguments merely summarize the issues plaintiff has presented in these motions. As set forth above, plaintiff fails to meet the standard which would allow this court to set aside the jury's verdict. Plaintiff's argument that the trial lacked fundamental fairness is entirely unpersuasive. Accordingly, plaintiff's motion for a new trial based on the [\*\*867] weight of the evidence and fundamental fairness will be denied.

### **III. Conclusion**

For all the reasons set forth above, plaintiff's motion to alter or amend the judgment pursuant to *Fed. R. Civ. P. 59(e)*, and his alternative motion for a new trial pursuant to *Fed. R. Civ. P. 59(a)*, will be denied. The court will enter an appropriate order.

STEPHEN M. ORLOFSKY

United States District Judge

Dated: March 11, 1997

#### **ORDER**

This matter having come before the Court on March 7, 1997, on the Motion of Plaintiff, Robert T. Hulmes, to Alter [\*\*65] or Amend the Judgment entered in this case on October 31, 1996, and Plaintiff's alternative Motion for a New Trial, and Plaintiff, Sherry Hertlein having joined the motion, Lewis M. Levin, Esq., Joseph Viola, Esq., and Robert Murphy, Esq., of Lewis M. Levin & Associates, appearing on behalf of Plaintiff, Robert T. Hulmes, David S. Bross, Esq., appearing on behalf of Plaintiff, Sherry Hertlein, and Robert St.L. Goggin, Esq. and Brian C. Darreff, Esq., of Marshall, Dennehy, Warner, Coleman & Goggin, and Paul G. Cereghini, Esq., of Bowman & Brooke, appearing on behalf of the Defendants, Honda Motor Company, Ltd., Honda Research and Development Group, Ltd., Honda R & D North America, Inc., and American Honda Motor Company, Inc.; and,

The Court having considered the briefs, the trial transcripts and trial exhibits, for the reasons set forth in this Court's OPINION, filed concurrently with this ORDER,

It is on this 11th day of March, 1997, ORDERED that the Motion of Plaintiff, Robert T. Hulmes, to Alter or Amend the Judgment entered in this case on October 31, 1996, pursuant to *Fed. R. Civ. P. 59(e)*, and Plaintiff's alternative motion for a new trial pursuant to *Fed. R. Civ. P. 59(a)*, are [\*\*66] DENIED.

**UNITED STATES DISTRICT COURT FOR THE EASTERN DISTRICT OF  
PENNSYLVANIA**

*523 F. Supp. 1281; 1981 U.S. Dist. LEXIS 15073; 9 Fed. R. Evid. Serv.  
(Callaghan) 630*

**October 13, 1981**

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Plaintiff driver and plaintiff passengers filed an action against defendant corporation and defendant employee seeking to recover for damages resulting from a collision involving two trucks. The court entered judgment on a jury verdict in favor of plaintiffs, and defendants filed a motion for a new trial.

**OVERVIEW:** The trucks operated by the driver and the corporation's employee collided on a two-lane section of a highway under construction. One of the trucks crossed into the other truck's lane, but neither operator could remember the accident. Defendants claimed that evidence of tachograph readings from their truck was improperly admitted without a foundation. They also claimed that the trial judge improperly refused to charge the jury regarding the driver's violation of Interstate Commerce Commission regulations and that the verdict was against the weight of the evidence. The court held that defendants were not entitled to a new trial. The court ruled that (1) no foundation regarding the accuracy of the tachograph was required prior to admission of the evidence because the tachograph was a relatively unsophisticated device and the jury could therefore comprehend the impeachment of its accuracy; (2) the jury charge requested by defendants would have usurped the jury's role as fact finder by stating that the evidence showed a violation; and (3) the verdict was not against the weight of the evidence.

**OUTCOME:** The court denied defendants' motion for a new trial of the action of the driver and passenger which arose out of a truck collision.

**CORE TERMS:** tachograph, accuracy, speed, speedometer, scientific, chart, regulation, lane, recording, driver, inaccuracy, cable, watch, measurement, impeachment, new trial, driving, traffic, output, truck, wrong side, proponent, harmless, reconstruction, manufacturer, calibration, rotor, prejudicial, novel, reasonable accuracy

**LexisNexis(R) Headnotes**

***Civil Procedure > Judgments > Relief From Judgment > Motions for New Trials***

[HN1] To prevail on a motion for a new trial, a party must show not only that there was error, but also that any error was not harmless.

***Evidence > Competency > General Overview******Evidence > Testimony > Credibility > General Overview******Evidence > Testimony > Lay Witnesses > Personal Knowledge***

[HN2] A witness is deemed competent to testify unless it is nearly impossible that he had first-hand observation. Fed. R. Evid. 601, 602. The quality of a witness's observations is not an issue for foundations; it is a matter for impeachment.

***Torts > Negligence > Proof > Violations of Law > General Overview******Torts > Transportation Torts > Motor Vehicles***

[HN3] Under Pennsylvania law, driving on the wrong side of the road without an excuse is per se negligent.

***Torts > Negligence > Causation > General Overview******Torts > Negligence > Proof > Violations of Law > General Overview******Torts > Transportation Torts > Motor Vehicles***

[HN4] In Pennsylvania, driving faster than the speed limit is not negligent unless speed is also a proximate cause of the accident.

**OPINION BY:**

GILES

**OPINION:**

[\*1282]

**MEMORANDUM**

Before me is defendants' motion for a new trial. For the reasons which follow the motion will be denied.

**I. BACKGROUND**

Oncoming tractor trailers sideswiped in the dark of night. Neither driver recalled the impact. Nobody else witnessed the accident. The collision occurred on a portion of Interstate Route 78 ("I-78") which, because of construction, was a two-lane undivided highway. All traffic was routed onto the westbound section of the road, with westbound traffic restricted to what usually would be the outside driving lane, and eastbound traffic in the usual inside passing lane. Plaintiff n1 had been driving a box-type tractor-trailer westward in the outside lane. Defendant, who was driving east in a tanker tractor-trailer, loaded with a liquid, had been traveling in a four-lane section of I-78 and then went through a cross-over onto the two-lane section. The accident occurred approximately two-tenths of a mile after defendant made the [\*\*2] cross-over. After trial, the jury found for plaintiffs. Defendants moved for a new trial.

n1. "Plaintiff(s)" refers to the plaintiff(s) in Civil Action No. 78-3911: Ray Adkins, Charles Fletcher, and Lori Fletcher. "Defendant(s)" refers to the plaintiff(s) in Civil Action No. 79-0241: Donald Dirickson, Robert Coffman, and Union Carbide Corporation. The claims of Dirickson and Union Carbide in 79-0241 should have been raised in 78-3911 as mandatory counterclaims. (Plaintiffs, however, raised no objection to bringing these claims in a separate action.) Coffman, who was a passenger at the time of the accident, was not a defendant in 78-3911. Thus, he properly brought his claims in a separate action.

## [\*1283] II. NEW TRIAL MOTION

Defendants raise four grounds for a new trial: (A) admission of evidence derived from a tachograph as partial proof of the speed of defendants' truck; (B) preclusion of defense counsel's proposed method of attempting to recall or incorporate trial and deposition testimony [\*\*3] by other witnesses; (C) refusal of a point for charge on Interstate Commerce Regulations, which were not introduced at trial; and (D) a verdict allegedly against the weight of the evidence.

[HN1] To prevail on their motion, defendants must show not only that there was error, but also that any error was not harmless. See *Fed.R.Civ.Pro.* 61.

### A. Tachograph Evidence

The tachograph in question in this suit is a speed measuring and recording device. In essence, it is a recording speedometer. It consists of an ordinary speedometer connected to a recording device which charts on a circular graph, speed, distance travelled, and engine use. n2 As part of plaintiffs' case-in-chief, a tachograph chart was introduced, and an expert interpreted the chart as recording the speed of defendants' truck at impact as 41-42 miles per hour. Notes of Testimony, 3.80 (hereinafter cited as N.T.). That expert, however, could not vouch that the tachograph had recorded accurately. *Id.* 3.98, 3.108-.110. Defendant timely objected to this testimony and asked that it be stricken. *Id.* 3.73, 3.98. The objection was overruled. Defendants now raise this ruling as ground for a new trial.

n2. Descriptions and photographs of tachographs may be found in Conrad, *The Tachograph As Evidence of Speed*, 8 *Wayne L.Rev.* 287, 288-91 (1962). On admission of tachograph evidence, see generally E. Fisher, *Legal Aspects of Speed Measurement Devices* 9-11 (1967); 3 S. Gard, *Jones on Evidence* § 15:16 (1972) (hereinafter cited as Jones); McCormick on Evidence § 210, at 516 (E. Cleary ed. 1972) (hereinafter cited as McCormick); 2 Wigmore on Evidence § 665a (Chadbourn rev. ed. 1970) (hereinafter cited as Wigmore); Annot., 73 *A.L.R.2d* 1025 (1960). See also J. Richardson, *Modern Scientific Evidence* §§ 9.1-14 (1974); A. Moenssens & F. Inbau, *Scientific Evidence in Criminal Cases*, § 13.01-12 (2d ed. 1978); J. Wigmore, *The Science of Judicial Proof* §§ 220-232 (3d ed. 1937); Annot., 47 *A.L.R.3d* 822 (1973); Annot., 49 *A.L.R.2d* 469 (1956); Annot., 21 *A.L.R.2d* 1200 (1952).

[\*\*4]

Citing *Villegas v. Bryson*, 16 *Ariz.App.* 456, 494 *P.2d* 61 (1972), they argue that the proponent of tachograph evidence must lay a foundation by showing the accuracy of the particular tachograph.

At trial, defendants, characterizing the tachograph evidence as "scientific," argued that the proponent must show (1) general scientific acceptance, and (2) accuracy of the particular device. See J. Wigmore, *supra* note 2, at 450. See generally J. Richardson, *supra* note 2, § 9.2. In connection with this argument, it is important to note two points. First, the general scientific acceptance of the tachograph is not at issue in this case. If it were, I would take judicial notice of its acceptance. Second, if one accepts the rule proffered by defendants concerning the foundation required for "scientific" proof, then characterizing evidence as "scientific" puts the rabbit into the hat. Thus, the question whether evidence is "scientific" can be thought of as a different aspect of the question what foundation is required. n3

n3. See note 9 infra. In the post-trial motion papers, defendants have dropped this characterization.

Furthermore, both parties have obscured the issues by sometimes treating the issue as an expert-evidence problem under *Fed.R.Evid. 702-703*. This incorrectly describes the problem here. Plaintiff not only introduced expert testimony, but also the original tachograph chart, exhibit P-17, and two enlargements, one approximately four times larger than the original, P-21, the other approximately nine times larger. P-22. Also, if the expert's only role was interpretation of the chart (rather than an independent opinion of speed), see Plaintiffs' Memorandum 3-4, then it follows that if the chart was inadmissible, then expert interpretation was incompetent or irrelevant.

[\*\*5]

Not only do plaintiffs challenge the proposition that the proponent of the use of the device must lay a foundation for its accuracy, but they also submit that there was indeed evidence of accuracy presented at the trial. These arguments, therefore, raise three questions for the court: (1) whether [\*1284] accuracy was a necessary foundation in this case; (2) if so, whether the foundation was laid; and (3) if a proper foundation did not exist, whether the error was harmless.

#### 1. Accuracy As Part of Foundation

Is a showing of accuracy a prerequisite to introducing tachograph evidence, or does accuracy vel non merely go to the weight of the evidence? See, e.g., McCormick, supra note 2, § 210, at 515; J. Wigmore, supra note 2, § 220, at 450. The few jurisdictions which have reached this question directly have held that the foundation for introduction of tachograph testimony must include a showing of "the accuracy of the particular tachograph which made the chart." *Villegas v. Bryson*, 16 *Ariz.App.* 456, 458, 494 *P.2d* 61, 63 (1972); see *Bell v. Kroger*, 230 *Ark.* 384, 386-87, 323 *S.W.2d* 424, 426 (1959); *Great Coastal Express, Inc. v. Schrufer*, 34 *Md.App.* 706, 714-16, 369 *A.2d* 118, [\*\*6] 124-25 (1977) (quoting trial judge n4); *Thompson v. Chicago & Eastern Illinois Railroad*, 32 *Ill.App.2d* 397, 405, 178 *N.E.2d* 151, 155 (1961); Jones, supra note 2, § 15:16, at 46; McCormick, supra note 2, § 210, at 516; Conrad, supra note 2, at 297. Contra, Wigmore, supra note 2, § 665a, at 917; but see *Hall v. Dexter Gas Co.*, 277 *Ala.* 360, 365, 170 *So.2d* 796, 800-01 (1964) (admissible on showing that it was ordinary business record); but cf. *NLRB v. Pacific Intermountain Express Co.*, 228 *F.2d* 170, 172 (8th Cir. 1955) (NLRB proceeding), cert. denied, 351 *U.S.* 952, 76 *S. Ct.* 850, 100 *L. Ed.* 1476 (1956); *People v. Dusing*, 5 *N.Y.2d* 126, 128, 155 *N.E.2d* 393, 394, 181 *N.Y.S.2d* 493, 495 (1959); *Nicholas v. Penny*, (1950) 2 *KB* 466, 473-74, (accuracy goes to weight of speedometer evidence), quoted in *People v. Dantonio*, 18 *N.J.* 570, 581, 115 *A.2d* 35, 41 (1955). See also *Bourn v. Department of Employment Security*, 134 *Vt.* 490, 365 *A.2d* 253 (1974) (in unemployment insurance case, employer carries risk of non-persuasion of accuracy of its tachographs).

n4. The appellate decision consists almost entirely of a reproduction of the trial judge's opinion.

[\*\*7]

None of these decisions, however, is controlling as to Pennsylvania law. Their precedential value depends on the persuasiveness of their logic. Examination of the cases does not disclose an explanation or rationale for their respective holdings. See, e.g., *Villegas*, 16 *Ariz.App.* at 458, 494 *P.2d* at 63 ("the law and common sense require"); *Great Coastal Express*, 34 *Md.App.* at 716, 369 *A.2d* at 124 (no reason given but quoted the trial judge who relied entirely on precedent from other jurisdictions); *Thompson*, 32 *Ill.App.2d* at 405, 178 *N.E.2d* at 155 (no reason); Jones, supra note 2, § 15:16, at 46 (no reason); McCormick, supra note 2, § 210 at 516 (merely relates majority rule; does not take independent view); Conrad, supra note 2, at 296 (unless showing of accuracy required "scientific proof of this nature becomes meaningless"; "common sense requires"). But see *Bell*, 323 *S.W.2d* at 426 ("because we are here dealing with a novel concept of evidence"); *Nicholas*, (1950) 2 *K.B.* at 473 (if very slight inaccuracy would make substantial difference in outcome, court may demand strict showing of accuracy); *id.* 474 (accuracy may be attacked effectively on

cross-examination); Wigmore, supra [\*\*8] note 2, § 665a at 917 (scientists customarily rely on statements of others whose accuracy is unchecked; unfeasible for professional to test every instrument himself). Thus, not finding the precedent from other jurisdictions enlightening or persuasive, I shall start my analysis from scratch.

The competence of possibly inaccurate tachograph recordings seems most analogous to the competence of possibly inaccurate witness observations. See J. Wigmore, supra note 2, § 220. Wigmore refers to this problem as "(perception) by scientific process." Id. at 448. [HN2] A witness is deemed competent to testify unless it is nearly impossible that he had first-hand observation. 3 J. Weinstein & M. Berger, Weinstein's Evidence, P 602(02), at 602-5 (1978); see *Fed.R.Evid.* 601, 602. The quality of a witness's observations is not an issue for foundations; it is a matter for impeachment. See, e.g., Wigmore, supra note 2, § 658(b). By analogy, it would appear that the accuracy of a first-hand [\*1285] speed measurement is also a matter for impeachment.

Evidence based on scientific measurement may pose difficulties not presented by eyewitness testimony. In particular, a court must contemplate [\*\*9] the possibility that the mere introduction of "scientific" or other metric evidence may create an impact upon the jury such that the evidence cannot be effectively impeached.

First, the measurement technique may be highly sophisticated in contrast to the simplified output of the device. Examples of such techniques might be neutron activation analysis or radar. The jury may readily understand the output, e.g., speed, but impeachment based on the measuring technique itself, e.g., the Doppler effect, may be disproportionately difficult to comprehend.

Second, the device may be used so infrequently that the range of accuracy may be totally outside a layman's experience. For instance, a juror may accept a radar speed-gun reading of 50 m. p. h. as absolutely accurate, rather than accurate to plus or minus 5 m. p. h. Conversely, a normal fact trier reasonably may be expected to know that watches or commonly used instruments, like speedometers, are subject to some inaccuracy. Thus, even if a juror does not understand the inner workings of a watch, he will be receptive to evidence of inaccuracy. See J. Wigmore, supra note 2, § 220, at 450 (instruments such as telephone, thermometer, [\*\*10] and theodolite, used commonly "without controversy or doubt" require no foundation).

Third, although based upon established techniques, the device may be so novel that its manufacturers have not yet ironed out all the wrinkles or its operators have not yet acquired the experience necessary for routinely accurate calibration. Thus, it would be unfair to accord any presumption that the device was accurate. In contrast, a watch manufacturer may be fairly presumed to make a reasonably accurate watch and to adjust it with reasonable accuracy before placing it on the market. Likewise, the average watch user may be presumed to set or reset the watch with reasonable accuracy. See id.

A fourth, related reason is that the measurement device may be delicate, subject to environmental influences, or otherwise require adjustment each time it is used. Examples might be a scientific balance, an electronic device which must constantly be recalibrated because of temperature or humidity changes, or a Prather Speed Device. See J. Richardson, supra note 2, § 9.3.

Fifth, a small degree of inaccuracy over a continuous range of calibration might make a vast, quantum difference in the quality of [\*\*11] evidence. See J. Wigmore, supra note 2, § 220, at 450 (no foundation needed for certain instruments, especially "where no issue turns on minute accuracy.") For example, a miniscule difference in alignment of a voice spectrograph or neutron activation analyzer could change an expert's testimony on the identity of a voice or batch of chemicals. See generally A. Moenssens & F. Inbau, supra note 2, §§ 9.01-.10, 12.01-.09.

Sixth, evidence which may be sufficiently reliable in a civil case may be suspect when introduced as proof beyond a reasonable doubt in a criminal case. See, e.g., *People v. Dusing*, 5 N.Y.2d 126, 128, 155 N.E.2d 393, 394, 181 N.Y.S.2d 493, 495 (1959) (untested radar or speedometer evidence is admissible, but insufficient to sustain speeding conviction); 75 Pa.Cons.Stat. Ann. § 3368 (evidence from untested speed-timing device is inadmissible in traffic

prosecution).

Seventh, if the particular device is an official, government device and the authenticating testimony is from a government official, then the jury may be swayed disproportionately. This may be one reason that many jurisdictions have passed laws restricting evidence of speed-timing devices in criminal [\*\*12] prosecutions. See, e.g., 75 *Pa.Cons.Stat. Ann.* § 3368 (Purdon 1975).

Eighth, the proponent of the measurement may have better control of evidence [\*1286] of accuracy vel non. n5 (But federal discovery rules tend to eliminate any advantage on his part.) Finally, in every case, the court should be alert for any peculiarities of the device or technique involved.

n5. Note that the seventh and eighth factors vary from case to case. Thus they seem poor candidates for setting a general rule about tachographs. They may, however, justify an exception to the general rule.

Almost all of these factors weigh in favor of the general admission of tachograph evidence. First, a tachograph is a relatively unsophisticated device, working on the same mechanical principles as a speedometer. See Conrad, *supra* note 2, at 288; N.T. 4.120 (defendants' expert's testimony that "the tachograph is based upon simple concepts of velocity, time and distance"). Thus, a jury could comprehend impeachment of accuracy. For instance, [\*\*13] in this case, defendants introduced comprehensible impeachment evidence relative to: resolution of problems due to thickness of the stylus blade, N.T. 3.87-.89; possibly incorrect calibration of the cable which drives the tachometer, id. 3.87-.89, .97-.98, .102-.103; driver tampering, id. 3.90-. 92; incorrect zeroing of the speed recordings, id. 3.92-.93; and other alleged inaccuracies. See, e.g., id. 4.140-.143.

Second, although ordinary fact finders may be unfamiliar with the record portion of a tachograph, it is reasonable to expect them to be familiar with the speedometer portion, and to be receptive to evidence of inaccuracy. This expectation is especially reasonable when, as here, the evidence is that a tachograph works in the same way as a speedometer, see id. 3.66, and that the recording disk's accuracy correlates with that of the tachograph speedometer. See id. 3.75.

Third, even assuming that tachograph evidence was novel in 1959, see *Bell*, 323 *S.W.2d* at 426, it is by now old hat. In addition to the cases cited above, tachograph evidence has been accepted (without comment) in dozens of cases. n6 The principles used in the Sangamo tachograph in this case are exactly the [\*\*14] same as those described for the Sangamo tachograph pictured in Conrad's 1953 article. See Conrad, *supra* note 2.

n6. See, e.g., *Edwards v. Mayes*, 385 *F.2d* 369 (4th Cir. 1967); *Grooms v. Minute-Maid*, 267 *F.2d* 541 (4th Cir. 1959); *Warren v. Pacific Intermountain Express Co.*, 183 *Cal.App.2d* 155, 6 *Cal.Rptr.* 824 (1960); *Smith v. American Mut. Liab. Ins. Co.*, 125 *Ga.App.* 273, 187 *S.E.2d* 299 (1972); *People v. Pittman*, 55 *Ill.2d* 39, 302 *N.E.2d* 7 (1973); *Kenney v. Churchill Truck Lines*, 6 *Ill.App.3d* 983, 286 *N.E.2d* 619 (1972); *Weishaar v. Canestrone*, 241 *Md.* 676, 217 *A.2d* 525 (1966); *Heiserman v. Baltimore & A. R.R.*, 15 *Md.App.* 657, 292 *A.2d* 140 (1972); *Hodges v. American Bakeries Co.*, 412 *S.W.2d* 157 (Mo.1967); *Dixon v. Campbell Sixty-Six Express, Inc.*, 321 *S.W.2d* 473 (Mo.1959); *State v. Dantonio*, 18 *N.J.* 570, 115 *A.2d* 35 (1955); *Tetreault v. State*, 50 *Misc.2d* 170, 269 *N.Y.S.2d* 812 (Ct.Cl.1966); *People v. Williams*, 23 *Misc.2d* 581, 196 *N.Y.S.2d* 790 (Sup.Ct.1960); *Benner v. Weaver*, 394 *Pa.* 503, 147 *A.2d* 388 (1959); *Tennessee Trailways, Inc. v. Ervin*, 222 *Tenn.* 523, 438 *S.W.2d* 733 (1969); *Sanchez v. Billings*, 481 *S.W.2d* 911 (Tex.Civ.App.1972); *Bourn v. Department of Employment Security*, 134 *Vt.* 490, 365 *A.2d* 253 (1976); *Western Packing Co. v. Visser*, 11 *Wash.App.* 149, 521 *P.2d* 939 (1974). See also *People v. Barbic*, 105 *Ill.App.2d* 360, 244 *N.E.2d* 626 (1969).

Tachograph evidence seems also routinely admitted in NLRB proceedings. See, e.g., *Buckley v. NLRB*, 432 *F.2d* 409 (9th Cir. 1970), cert. denied, 401 *U.S.* 1002, 91 *S. Ct.* 1246, 28 *L. Ed. 2d* 535 (1971); *Illinois Ruan Transp. Co. v. NLRB*, 404 *F.2d* 274, 281-82 (8th Cir. 1968) (dissent); *NLRB v. Stafford Trucking, Inc.*, 371 *F.2d*

523 F. Supp. 1281, \*1286; 1981 U.S. Dist. LEXIS 15073, \*\*14;  
9 Fed. R. Evid. Serv. (Callaghan) 630

244 (7th Cir. 1966); *NLRB v. Pacific Intermountain Express Co.*, 228 F.2d 170 (8th Cir. 1955), cert. denied, 351 U.S. 952, 76 S. Ct. 850, 100 L. Ed. 1476 (1956).

[\*\*15]

Fourth, the tachograph is a sturdy mechanical device which need not be recalibrated for each use. Fifth, both the tachograph's output and the expert's opinion embraced a continuous scale of speed. A small error in adjustment would result in a proportionate, rather than quantum, change in output. In fact, defendant's own expert used this principle in calculating a correction factor, see N.T. 4.146, which enabled him to use the tachograph to check his opinion.

All but one of the remaining factors weigh in favor of admissibility without foundation. The tachograph here was a private instrument, not backed by police [\*1287] testimony. This is a civil case, rather than a prosecution for a traffic violation. n7 Here, the opponent of the tachograph had control of the evidence.

n7. The proposition that 75 *Pa.Cons.Stat.Ann.* § 3368 applies to civil cases is demonstrably absurd. The result would be that a civil witness would be precluded from stating his speedometer reading unless he had tested speedometer 60 days before the reading.

[\*\*16]

One peculiarity of tachographs, however, weighs in favor of a foundation. The tachograph generally is not a piece of original equipment made by the truck manufacturer. The tachograph (of which Sangamo is the only major American manufacturer, N.T. 3.70), is installed separately, and replaces the normal speedometer. N.T. 3.66. Although Sangamo calibrates the instrument internally, Id. 3.89, accurate operation depends on receipt of proper input from the truck rotor cable. Id. 3.74-.75. If the rotor cable does not turn at the correct rate (1,000 turns per mile), a ratio adapter must be installed. Id. 3.90. There was no direct evidence that the rotor cable revolved at the proper rate. n8

n8. But the tachograph expert testified a record of speed is important to truck owners, and that "(s)peed is (an) ... integral part of ... maintenance." N.T. 3.101.

On balance, however, this peculiarity is not enough to outweigh the other factors. The most important of those are the first four: a tachograph operates [\*\*17] on simple, understandable principles, removed from the frontiers of science; the range of accuracy of the key portion the speedometer is within the experience of most jurors; there is great experience in its manufacture, operation, and use as evidence; and by its nature, it does not require frequent adjustment. I therefore hold that, in this case, accuracy of the particular tachograph was a matter of impeachment going to the weight of the evidence, rather than a matter of foundation. n9 See, e.g., *NLRB v. Pacific Intermountain Express Co.*, 228 F.2d 170, 172 (8th Cir. 1955), cert. denied, 351 U.S. 952, 76 S. Ct. 850, 100 L. Ed. 1476 (1956); *People v. Dusing*, 5 N.Y.2d 126, 128, 155 N.E.2d 393, 394, 181 N.Y.S.2d 493, 495 (1959); *State v. Dantonio*, 18 N.J. 570, 580-81, 115 A.2d 35, 40-41 (1955); *Nicholas v. Penny*, (1950) 2 KB 466, 473-74 .

n9. This holding alternatively may be viewed as stating that a tachograph, like a speedometer, is insufficiently "scientific" to require the foundation usually needed for scientific evidence. See note 3 supra.

[\*\*18]

## 2. Foundation in This Case

Because of the split of authority on the question whether a foundation is necessary, I shall also decide whether, if a

foundation was required, it was laid in this case. I hold that it was not.

The substantial question as to accuracy of defendants' tachograph is that discussed above was the rotor cable properly calibrated at 1000 r. p.m.? See text preceding note 8 supra. Plaintiffs had evidence showing reasonable accuracy on all other significant points. For instance, the tachograph was internally calibrated, N.T. 3.89; it had not been tampered with, id. 3.90-.92; and errors due to wear of the stylus blade or its moving off zero were resolved in defendants' favor. Id. 3.108. There was no testimony as to the calibration, no independent test of the tachograph, and no "proof line" test as in *Villegas*. See *16 Ariz.App. at 458, 494 P.2d at 63*. Because accuracy depended on the correct alignment of the cable, and no significant competent evidence supported correct alignment, no foundation was laid for the accuracy of the particular instrument.

### 3. Harmless Error

Even if the tachograph testimony was admitted erroneously, it was harmless for three reasons. [\*\*19] First, the impact speed measured by the tachograph is compatible with the impact speed propounded by defendants. Compare N.T. 3.80 (41-42 m.p.h. measured by tachograph), with id. 4.150 (32-45 m.p.h. estimated by defendants' expert). Second, plaintiff's expert, independent of the tachograph, reconstructed the speed at impact as 43-49 m.p.h. Id. 3.146. Thus, the tachograph output roughly corroborated independent evidence of speed [\*1288] from two other sources. Finally, and most importantly, the impact speed was only tangentially relevant to the ultimate factual question who was in the wrong lane. See id. 5.136.

This accident occurred only because one driver strayed out of his lane of traffic and onto the other side of the road. [HN3] Under Pennsylvania law, driving on the wrong side of the road without an "excuse" is per se negligent. *Mihalic v. Texaco, Inc.*, 377 F.2d 978, 981 (3d Cir. 1967); *Matkevich v. Robertson*, 403 Pa. 200, 202-03, 169 A.2d 91, 93 (1961); see *Kenworthy v. Burghart*, 241 Pa.Super. 267, 277-82, 361 A.2d 335, 340-43 (1976), appeal dismissed, 478 Pa. 20, 385 A.2d 975 (1978). n10 In this case, each driver claimed the other was on the wrong side, and neither [\*\*20] offered an "excuse." Thus, whoever was on the wrong side was negligent. At the request of both parties, I so instructed the jury, N.T. 6.25, without objection.

n10. *Kenworthy* also states that *Matkevich* was overruled in part on other grounds. 241 Pa.Super. at 281 n.8, 361 A.2d at 342 n.8.

The significance of defendants' speed was secondary. It provided plaintiff with a theory of how defendants got to the wrong lane. n11 As defendants' counsel stated in conference, this is not "really a speed case. It's more a control of vehicle case." Id. 5.142. Thus, the theory is secondary, because as noted above, on the evidence in this case, negligence was established merely by showing that one driver was on the wrong side. n12 The tachograph evidence therefore had only tertiary significance. It reinforced plaintiffs' expert's independent reconstruction of defendants' speed.

n11. The speed limit at the cross-over was 30-35 m.p.h. N.T. 2.33. The tachograph chart recorded the speed as over the limit, N.T. 3.80 (41-42 m.p.h.), while defendant's expert's estimate overlapped the limit. N.T. 4.150 (32-45 m.p.h.).

[\*\*21]

n12. [HN4] In Pennsylvania, driving faster than the speed limit is not negligent unless speed is also a proximate cause of the accident. *Rhoads v. Ford Motor Co.*, 514 F.2d 931, 935 (3d Cir. 1975). Thus speed was not negligent unless it caused defendant to be in the wrong lane, which was negligent anyway. Had speed been the primary underlying negligence, the tachograph evidence might have had greater impact.

Because the parties had at best a dim recollection of the accident, and because there were no eyewitnesses, each side called an expert to try to reconstruct the accident. Defendants' expert, Dr. Batterman, opined that the accident happened in defendants' lane. N.T. 4.182. His opinion was based on examination and photographs of the damaged vehicles and the accident scene, especially gouge marks in the road. Based on the same kind of information, plaintiff's expert, Dr. Treitterer, reached the opposite conclusion. Id. 3.140, 3.140-.154. Thus, the case boiled down to which expert the jury believed. n13 Because neither expert relied on the tachograph chart, its effect on the ultimate factual [\*\*22] issue was, at most, insignificant. Thus, if admission of the tachograph evidence was error, it was harmless.

n13. There are many reasons why the jury properly could credit plaintiffs' expert. There were differences in the quality of the information the experts relied on, as well as different demeanors during testimony. Three other items stood out at trial. First, the experts' qualifications differed significantly. Second, the qualifications of plaintiffs' expert were unquestioned, N.T. 3.136, while defendants' expert was subject to serious cross-examination on his qualifications. Id. 4.124-.133. Third, by testifying that defendants' tanker-trailer "definitely should be" baffled to control stability, id. 4.209, defendants' expert supported plaintiffs' argument that lack of baffling was negligent and a cause of lack of control preceding the accident.

#### B. Exclusion of Evidence

Defendants also assign as error two refusals to permit questions and answers attempting to recall prior testimony. Defendants [\*\*23] claim that it was erroneous to prevent their accident reconstruction expert from reading aloud six pages of plaintiff's deposition. Defendants' Memorandum of Law, at 2-3; see N.T. 4.178-.181. This was not error. First, *Fed.R.Civ.Pro. 32(a)(4)* precluded defendants from reading in only pages 20-26 (where plaintiff said the road was straight,) without also reading in page [\*1289] 37, (where plaintiff said the road curved slightly and was "practically straight to a professional driver"). See N.T. 4.220. It was within the court's discretion to insist that the deposition be as though the witness were then present and testifying. See *Fed.R.Civ.Pro. 32(a); Fed.R.Evid. 611(a)*. Finally, I cannot understand how the ruling could have been prejudicial; defendant could have, but did not choose to, interrupt the expert's testimony in order to read in the deposition. N.T. 4.181. In any event, the six pages were admitted and read to the jury. Id. 4.214-.220.

Second, defendants claim that the court erroneously refused to permit questioning of defendants' expert concerning the percentage error in the tachograph recording of mileage. n14 Defendants' Memorandum of Law, at 3-4; see N.T. [\*\*24] 4.141-.146. Objections to the questions were sustained because they attempted to recall testimony, id. 4.141-.142, .145. The court's eventual ruling, however, allowed defendants to pose assumptions "without stating or suggesting that those assumptions are founded in testimony." Id. 4.145. Defendants never did so. It was not error to require that questions be posed without introduction of hearsay in the form of attempted recollection of testimony of a non-party. Furthermore, even if erroneous, I cannot perceive, and defendants do not explain, n15 why such a restriction in the form of question was prejudicial.

n14. Because mileage error is proportional to speed error, see N.T. 3.100, the expert then would have applied that percentage to calculate the alleged error in the speed recording.

n15. Indeed, Defendants' Memorandum contains no citation of the transcribed record. This has made all of the motion more difficult to deal with.

#### C. Point for Charge

Defendant argues that the court erroneously refused [\*\*25] their point for charge number four. Defendants' Memorandum of Law, at 4; see N.T. 5.146. This charge consisted of large portions of ICC regulations, 49 C.F.R. §§ 392.3, 395.2, 395.3 (1980); a statement that the evidence showed that plaintiff had violated the regulations and an instruction that if the jury found that violation of regulations was the proximate cause, the jury must find plaintiff negligent. n16 This instruction was refused. It usurped the jury's role as fact finder by stating that the evidence showed a violation. Also, it is not clear to me that the evidence would allow the jury to find that plaintiff had been "on duty" for fifteen hours. See 49 C.F.R. §§ 395.2(a), 395.3(a)(2). Furthermore, I viewed the subject matter of the regulation (limiting the number of hours a driver may be on duty) as more properly a matter for argument to the jury. N.T. 5.146. Defendants' contention, which they were permitted to argue, was that as a result of being on duty so long, plaintiff fell asleep at the wheel.

n16. The proposed charge is contained in the record only in plaintiffs' answer to the new-trial motion. (Plaintiffs have accurately reproduced the proposed charge submitted to me.) Defendants' quotation of 49 C.F.R. § 395.2 erroneously omitted paragraph (a)(4). This would have been noted if defendants had asked me to take notice of the regulation. They never did so. See *Fed.R.Evid. 201*.

[\*\*26]

It was not error to refuse this instruction. Pennsylvania law does not support the contention that such a charge is mandatory. In the only case involving this instruction, *Ridley v. Boyer*, 426 Pa. 28, 31-32, 231 A.2d 307, 308-09 (1967), the Pennsylvania Supreme Court held merely that such a charge was not erroneous. *Id. at 32, 231 A.2d at 309* ("The court was on the highway of proper instruction, when it spoke thus.") (Musmanno, J.). In any event, refusal was not prejudicial. Defendants were allowed to argue this issue to the jury as a matter of fact. Indeed, defendants were not precluded from introducing and explaining the regulation in the trial or thereafter, arguing the regulation to the jury. n17 Most important, the issue whether [\*\*1290] the regulations were violated is only tangentially related to the ultimate issue of where the accident occurred. See part II.A.3. *supra*.

n17. The transcript filed by defendants omits both opening and closing argument. Counsel, however, is required to file a transcript of the entire trial, see E.D.Pa.R.Civ.Pro. 20(e). I therefore deem the omission to be a waiver of any argument in support of the motion based on remarks that counsel made or failed to make at opening or closing.

[\*\*27]

#### D. Verdict Against Weight of Evidence

Finally, defendants argue that the verdict was against the weight of the evidence because plaintiffs' expert's reconstruction of the accident conflicted directly with plaintiff's version. I perceive no such conflict. For the reasons given in plaintiffs' memorandum, the expert's reconstruction of the accident is compatible with plaintiff's testimony.

For the above reasons, defendants' motion for a new trial must be denied.

Trade Cas. (CCH) P74,452*

**March 27, 1973**

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Plaintiff brought a patent infringement action against defendant in regard to two of its patents and defendant counterclaimed unfair competition and antitrust violations.

**OVERVIEW:** Plaintiff sued defendant for infringement of two patents and defendant counterclaimed for antitrust violations and unfair competition. This court held that defendant infringed plaintiff's patents, but plaintiff's second patent was invalid for obviousness, and not entitled to protection against defendant's infringement. Finally, the court held that defendant did not prove any of its counterclaims. This court held that defendant could be guilty of contributory infringement, even though it sold only to purchasers who could not be accused of directly infringing the first patent. Although defendant's device differed from the specifications in the second patent, it was sufficiently covered by the claims in the second patent. Defendant failed to prove that the first patent was lacking in novelty or obvious or that its two inventions were in public use on sale at the time of patent application. However, the invention in the second patent was already patented and obvious.

**OUTCOME:** Judgment was entered for plaintiff on the first patent and defendant's counterclaims and for defendant on the second patent.

**CORE TERMS:** distance, patent, speed, pulse, invention, counter, apparatus, checking, register, generating, switch, connected, target, divide, measuring, measurement, time switch, stopping, computation, electrical, operable, starting, turning, time measurement, infringement, binary, electronic, proportional, specifications, manually

**LexisNexis(R) Headnotes**

***Patent Law > Infringement Actions > Infringing Acts > Contributory, Indirect & Induced Infringement******Patent Law > Infringement Actions > Infringing Acts > Intent & Knowledge******Patent Law > Ownership > Conveyances > Licenses***

[HN1] Under 35 U.S.C.S. §§ 271(c) and (d), the fact that the infringing device's purchasers have been previously licensed to use the patented device does not establish that subsequent purchasers will be so licensed, or that the infringer did not sell its devices knowing the same to be especially made or especially adapted for use in an infringement.

***Patent Law > Subject Matter > Products > Compositions of Matter******Patent Law > Subject Matter > Products > Machines******Patent Law > Subject Matter > Products > Manufactures***

[HN2] 35 U.S.C.S. § 101 provides for the patentability of the invention or discovery of any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof. "Process" is defined by 35 U.S.C.S. § 100(b) as process, art or method, and includes a new use of a known process, machine, manufacture, composition of matter, or material.

***Patent Law > Anticipation & Novelty > General Overview***

[HN3] Certain conditions are imposed for patentability of an invention as defined; among these is the requirement that the invention not have been patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States.

***Patent Law > Anticipation & Novelty > General Overview******Patent Law > Claims & Specifications > Enablement Requirement > General Overview******Patent Law > U.S. Patent & Trademark Office Proceedings > Continuation Applications > General Overview***

[HN4] 35 U.S.C.S. § 102 imposes a condition that a patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the difference between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

***Patent Law > Nonobviousness > Elements & Tests > General Overview***

[HN5] Under 35 U.S.C.S. § 103, the scope and content of the prior art are to be determined; differences between the prior art and the claims at issue are to be ascertained; and the level of ordinary skill in the pertinent art resolved. Against this background, the obviousness or nonobviousness of the subject matter is determined.

***Patent Law > Date of Invention & Priority > General Overview******Patent Law > Subject Matter > Processes > General Overview***

[HN6] For a process to be patentable, at least one mode of reducing it to practical use must be disclosed.

***Patent Law > Infringement Actions > Defenses > Patent Invalidity > Validity Presumption******Patent Law > Infringement Actions > Infringing Acts > General Overview******Patent Law > Nonobviousness > Evidence & Procedure > Presumptions & Proof***

[HN7] 35 U.S.C.S. § 282 invests in every patent a presumption of validity.

***Patent Law > Statutory Bars > Experimental Use > Elements******Patent Law > Statutory Bars > Public Use Bar > General Overview***

[HN8] The kind of public use contemplated by 35 U.S.C.S. § 102(b) seems to be that of public disclosure or of

357 F. Supp. 1222, \*; 1973 U.S. Dist. LEXIS 14317, \*\*;  
177 U.S.P.Q. (BNA) 737; 1973-1 Trade Cas. (CCH) P74,452

commercial exploitation. Experimental use of the invention, however, is not to be considered public use.

***Patent Law > Claims & Specifications > Description Requirement > General Overview***

***Patent Law > Date of Invention & Priority > General Overview***

[HN9] 35 U.S.C.S. § 120 refers only to the application for patent, which must contain the required reference; the invention in the original application, however, must be disclosed in accordance with 35 U.S.C.S. § 112.

***Patent Law > Anticipation & Novelty > General Overview***

[HN10] A combination of old elements is patentable only when the whole in some way exceeds the sum of its parts. The fact that the old elements had not previously been so combined does not itself resolve the issue, nor is commercial success pertinent, absent the required showing of invention.

**JUDGES: [\*\*1]**

Tyler, D.J.

**OPINION BY:**

TYLER

**OPINION:**

[\*1224] TYLER, D.J.:

This action for patent infringement, with counter-claims for antitrust violations and unfair competition, was commenced in July of 1970. Thereafter, the case was tried before the undersigned, sitting without a jury, over a period of nine days in late April and early May, 1972. After a careful review of the entire record -- including the more than 1300 pages of trial transcript, the voluminous documentary evidence and the briefs submitted by the parties--and the relevant law, I have made the following findings of fact, and drawn the following conclusions of law.

Plaintiff is a corporation organized under the laws of the State of Delaware, with its principal place of business in Chicago, Illinois. Defendant is a New York corporation, with its principal place of business in Greenwich, Connecticut; it manufactures the allegedly infringing product, an electronic speed computer called the "TDS". Plaintiff is the owner by assignment of the two patents which form the basis of this suit. The earlier of the two is U.S. Patent No. 3,182,331, issued May 4, 1965 to Arthur N. Marshall, for a "Method of Speed Indication" (hereinafter [\*\*2] the "Marshall method patent"); the second is U.S. Patent No. 3,530,382, issued September 22, 1970 to John W. Liston, Gordon E. Gee, and William K. Oliver, for a "System for Speed Indication Utilizing Digital Distance and Digital Time Measuring Apparatus" (hereinafter the "Liston patent"). As perhaps suggested by the titles of the two patents, the Liston patent is an electronic digital device designed to practice the methods included in the Marshall method patent for measuring and recording the speed of one moving vehicle from a second vehicle.

More specifically, the nine claims to invention contained in the Marshall method patent and set out in the appendix n1 describe various methods of "determining [\*1225] and identifying the speed of a checked vehicle from a checking vehicle wherein said checking vehicle has a distance measuring unit which can measure and identify a selected distance traveled by said checking vehicle and a time measuring unit which can measure time and a directly readable speed measuring means which can combine said selected distance and time to identify the speed of said checked vehicle. . . ." Marshall method patent at p. 11. The specifications and drawings [\*\*3] of the patent disclose an electro-mechanical computer whereby the methods can be reduced to practical application; although the patent itself is not limited to any particular device, but refers to the methods generally, it is clear that the only means of practicing the methods at the time the patent was granted was via this electro-mechanical computer. Indeed, this particular device is the subject of

U.S. Patent No. 3,276,029, issued September 27, 1966 to Arthur Marshall for an "Apparatus for Speed Indication" (hereinafter "Marshall apparatus patent"). Originally, both methods and apparatus claims were included in the same application, but the Patent Office on December 16, 1963 required restriction of the application for purposes of examination, and Marshall chose to prosecute the methods claims first. The Marshall apparatus patent is not at issue in this suit, since the Liston patent represents a substantial improvement in function and performance of the methods, and replaced the more primitive mechanical computer shortly after its development for commercial production.

n1 See Appendix A.

Although the Marshall apparatus patent is not an issue in this suit, it would be helpful in understanding the [\*\*4] application of the Marshall methods and Liston refinements to describe it here. Put briefly, the apparatus is designed to fit compactly into a police car or other "checking vehicle". A rigid base plate serves as mounting for all of the moving component parts. The device has two lead screws, set perpendicular to each other in overlying planes: the "distance" lead screw is driven by a flexible shaft which is connected to the automobile transmission in which the device is mounted; the "time" lead screw is driven by an accurate constant speed electric motor. A solenoid clutch provides the means for engaging the flexible shaft and distance lead screw; this clutch in turn is controlled by a manually operable "distance" switch. The electric motor is similarly controlled by a manually operable "time" switch, which is placed next to the distance switch. Each of the two lead screws are connected to internally threaded nuts, which in turn are connected to a single movable carriage plate. When the distance lead screw is engaged, it drives the threaded nut, which consequently causes the carriage plate to move in one direction in proportion to the distance traveled by the vehicle; when the [\*\*5] time lead screw is engaged, it drives its connecting nut, thereby causing the carriage plate to move in a direction at right angles to the movement caused by the distance lead screw when operated alone, and proportional to the time elapsed. Operated together, or consecutively without resetting to zero, the lead screws cause the carriage to move to a position dependent upon the ratio of time to distance (i.e., speed). An indicator rod and an indicator scale graduated in miles per hour and attached to the carriage provide a directly readable indication of the speed of the target vehicle. Means are also provided for resetting the apparatus to "zero" after a reading has been taken.

As the second introductory paragraph of the Marshall method patent asserts, "the invention is intended to be used with the vehicles of law enforcement officers, enabling them to quickly and accurately check the vehicle speeds of potential violators of highway speed laws including the speed laws of urban localities and highway or turnpike speed laws." The various claims of the patent describe methods of using the specified apparatus for determining the speed of one car from another moving vehicle, [\*1226] [\*\*6] whereby the time switch of the apparatus is closed when the checked target or vehicle passes a first reference point and stopped after the vehicle passes a second selected reference point; the distance switch is closed when the checking or police vehicle passes the first reference point, and stopped when it passes the second reference point. The resultant speed indication reports the average speed of the checked vehicle between the two points selected.

It should be noted that the apparatus in effect measures the distance traveled by the target vehicle and the time in which it takes to travel the distance, and combines the two to yield the resultant average speed. The distance measurement can be made either before, during, or after the time measurement, and the speed of the target vehicle need bear no relation to the average speed of the police car between the two selected reference points. The checking vehicle can proceed either over a path "substantially equivalent" to that traveled by the target vehicle (claim 1), or over an "equal path" (claim 2). Claims 3 and 4 refer to methods for recording the speed of the target vehicle when measured in the manner described in claims 1 and [\*\*7] 2, respectively. Claim 5 describes a method of determining the speed of a checked vehicle where the distance measurement is taken first, so that the checking vehicle remains stationary while timing the checked vehicle. Claim 6 describes a method of speed determination whereby the distance measurement step occurs after the starting of the time measurement. Claim 7 describes a speed determination method whereby both time and distance measurement steps are commenced simultaneously; claim 8 describes another method of simultaneously commencing time and distance measurement as the checking vehicle passes the target vehicle. Claim 9 describes a

method whereby the speed of a checked vehicle is determined as it travels toward the checking vehicle.

Plaintiff also complains that 19 claims of the Liston patent n2 are infringed; all of these are directed to various combinations of circuits and circuit elements of an electronic computer, which is designed to be mounted in one vehicle for determining the speed of another vehicle as described in the Marshall method patent. For present purposes, the Liston patent is sufficiently described in the abstract to the patent:

"An improved speed measuring [\*\*8] and indicating apparatus which can be mounted in a first vehicle and operated therefrom to determine the speed of a second vehicle, the apparatus including first means coupled to the driving mechanism of the first vehicle for generating a number of electrical pulses proportional to the distance traveled by the first vehicle, second means for generating a number of electrical pulses proportional to the time required for the second vehicle to travel the same distance, and means for dividing the distance pulses by the time pulses to indicate the average speed of the vehicle over the foregoing distance, the apparatus also including readout means for indicating such speed and time and distance switches for manual actuation by an operator."

n2 See Appendix B.

Plaintiff is also the owner by assignment of the registered trademark "VASCAR", an acronym for Visual Average Speed Computer And Recorder. The trademark was registered by Arthur Marshall in 1966 and originally applied by him to his electro-mechanical apparatus. Plaintiff currently utilizes the trademark to designate its speed computer produced under the Liston patent.

As of the date of trial, plaintiff had sold over 5,000 VASCAR speed computers, [\*\*9] and paid approximately \$390,000 in royalties under the Marshall patent. Most of these sales were of the electronic computer type as specified in the Liston patent, the commercial production of [\*1227] which began in 1968. Since that time, plaintiff has widely advertised its speed computers, and they have been widely accepted -- to the extent that nearly 40 different states have purchased the devices for use in traffic control.

Defendant has been producing for commercial sale since 1969 an electronic speed computer known as a "TDS" computer (for Time, Distance, Speed). The TDS is a computer module designed to be utilized in speed enforcement programs of law enforcement agencies, and it is undisputed that it can practice, and has been utilized to practice, the methods of the Marshall method patent. Since 1969, defendant has sold approximately 250 of its TDS speed computers, principally to the states of North Carolina, Wisconsin and Florida. It is the production and sale of the TDS computers which plaintiff alleges to constitute infringement of its two patents in this suit.

In addition to denying that the sale of its TDS computers infringes in any way the patents of plaintiff, [\*\*10] defendant has unleashed a veritable broadside of affirmative defenses and counterclaims. The affirmative defenses attack the validity of the patents in suit, on the grounds, *inter alia*, that they do not promote the progress of science; that they lack novelty; that they are obvious and wholly anticipated in the prior art; that the subject matter was in public use or on sale for more than one year prior to the filing of the applications; that the subject matter was abandoned; that the specifications are ambiguous and overbroad, and fail to adequately disclose the subject matter to permit application or use of the invention. In addition, defendant has counterclaimed: (1) for declaratory judgment that plaintiff's patents are invalid; (2) for damages under the antitrust statutes, 15 U.S.C. §§ 1 et seq., alleging that plaintiff monopolized the market through its fraudulent procurement and use of the patents; and (3) for damages for unfair competition under 28 U.S.C. § 1338(b).

### *I. Infringement of Plaintiff's Patents.*

Defendant did not seriously contest at trial the charge that the manufacture, sale, and demonstration usage of its TDS speed computers directly and contributorily infringe, and actively induce infringement of, the nine claims of the plaintiff's Marshall method patent and claims 1 through 6, 9 through 15, and 17 through 21 of the Liston patent, within the meaning of 35 U.S.C. §§ 271(a), (b) and (c). Indeed, the record is relatively clear on this initial issue.

Defendant sells its devices through approximately 60 independent law enforcement equipment distributors and through several manufacturers' representative operations. It also distributes all over the country and at trade shows a significant volume of sales material, included within which are descriptions of use of the TDS computer to measure the speed of target vehicles. There are also frequent visitations to defendant's factory by police agencies, during which demonstrations are given of various modes of using the TDS for measuring the speed of target vehicles. Finally, a training manual is included with the purchase of each TDS unit. These materials and demonstrations make clear beyond peradventure that the TDS computer is designed principally to practice the methods described in the Marshall method patent, and that it is so utilized. Nor is there much merit to defendant's contention that there are other substantial non-infringing uses for the TDS computer -- the chief such use cited being to measure the speed of the vehicle in which the device is mounted. As defendant's own sales material candidly asserts, "the Smith and Wesson TDS Computer is an electronic time and distance speed measuring device used in a patrol car to determine the vehicle speed of potential traffic violators." Plaintiff's Exhibit 146.

Defendant seeks to rebut this conclusion that it has infringed the Marshall method patent by asserting that virtually all of the 250 TDS devices it sold were [\*1228] purchased by governmental agencies for police use in the states of North Carolina, Wisconsin, and Florida -- which agencies had previously purchased plaintiff's VASCAR devices and applied the Marshall methods. Since plaintiff's practice was not to charge a purchaser for a license under the Marshall method patent independently of the price for the VASCAR device, it is argued that these purchasers received an implied license to practice the methods, which persisted even after the purchasers decided not to utilize the VASCAR devices any longer. It is further contended that plaintiff could not enforce the restriction of practice of the methods to use with the VASCAR device, since this would constitute an illegal tie-in. Thus, defendant concluded that it cannot be guilty of contributory infringement, since it sold only to purchasers who could not be accused of directly infringing the Marshall method patent.

This argument ignores the fact that plaintiff never refused to grant any prospective purchaser a license under the Marshall method patent; indeed, as the evidence indicated, plaintiff was never asked for such a license. Secondly, the record established that plaintiff was proceeding in good faith to rely upon the validity of its Liston patent, which covers the VASCAR device. These facts are sufficient to distinguish this situation from those where a patentee seeks to extend the coverage of its patent monopoly by tying in sales of unpatented goods with its patented products or processes. See, e.g., *Aro Manufacturing Co., Inc. v. Convertible Top Replacement Co., Inc.*, 365 U.S. 336 (1961). [HN1] Finally, the contentions of defendant cannot escape the thrust of §§ 271(c) and (d): the fact that VASCAR purchasers have been previously licensed to use the Marshall methods does not establish that subsequent purchasers will be so licensed, or that defendant did not sell its devices "knowing the same to be especially made or especially adapted for use in an infringement. . . ."

As for the Liston patent, the situation is similar, although somewhat more complicated due to the complexity of the apparatus. Claim 1 is essentially the lynchpin of the Liston patent, upon which the remaining claims are dependent. It is directed to a combination of various circuits and elements of an electronic computer, including the following: distance pulse generating means which generates a plurality of electrical pulses proportional to the distance traveled by the vehicle in which the computer is located; time pulse generating means which generates electrical time pulses proportional to elapsed time, manually operable distance switch and time switch means; electrical distance counter means and electrical time counter means, operatively connected to the distance and time switches, to count the distance and time pulses; divide circuit means for "in effect" dividing the number of distance pulses contained in the distance counter by the number of time pulses in the time counter, such that the quotient will be indicative of the speed of the

target vehicle; speed readout means for visual display of this speed.

The TDS speed computers contain virtually all of the elements and circuits described above. The one principal difference is that the TDS does not use divide circuit means for combining distance and time pulses to obtain the resultant speed of the target vehicle. Rather, the TDS utilizes a different circuit, which includes a repetitive strobe of complements and a scale circuit, and operates as follows: When the time and distance switches are closed, distance and time pulse generators feed pulses respectively of 1000 per mile and 10 per second into distance and time counters. When the time and distance switches are opened, the computation commences. The complement of the number of these pulses in the primary counters is then fed into secondary registers (the complement being the difference between the capacity of the register and the number of pulses in the primary counter). A [\*1229] computer clock sends pulses simultaneously to both secondary register for each one pulse to the secondary time register, at a ratio of 360 pulses to the secondary register for each one pulse sent to the secondary distance register. Every time the secondary time register is filled to capacity by these clock pulses, an output pulse is sent to the readout circuit. The time register is reset to the complement of the number of pulses in the primary time register repeatedly until the secondary distance register is filled once to capacity. At this time the computation is completed: the number of times the secondary time register is filled is equal to the number of pulses in the time counter divided into the number of pulses in the distance counter, multiplied by 360; this 360 multiplier is a conversion factor which produces the resultant speed indication measured in tenths of a mile per hour. Although this process is seemingly complex, it can be seen that it effectively divides distance into time; this is sufficient to bring the function within the language of the first claim of the Liston patent, which requires only divide means "ineffect" divides distance pulses into time pulses.

The similarities between the remaining claims and the TDS computer will only briefly be described here. The TDS is adapted to be connected to the odometer drive connector in the automobile transmission (claim 2). The TDS also has distance register means whereby distance information in the distance counter can be retained in a non-destruct basis to permit several speed computations with the same distance input as described in the "park and wait" method of the Marshall method patent (claim 3 or the Liston patent). Both the Liston patent and the TDS have "compute start means" (claim 4). Although claim 5 specifies a four-element "and" gate means, and the TDS has two conventional (two-element): "and" gates, they both perform the equivalent functions. The divide circuit means specified in claim 6 includes means of repetitive subtraction; the TDS provides for the substantial equivalent by entering the complements of time and distance pulses in secondary registers and adding clock pulses to these registers until filled -- effectively adding counts to a negative number until it reaches zero. The TDS also has binary coded decimal counters and a digital speed readout, consisting of tubes lighted by decoder/drivers (claim 9). Claim 10 describes reset means selectively operable to reset the entire device or to reset just the time component and readout; the TDS contains an erase switch which clears time and distance circuits, and a distance lock, which provides for the retention of the distance information upon actuation of the erase switch. The TDS has a time pulse generating means which is an oscillator means producing a predetermined number of time pulses per second, and which is actuated by the manually operable time switch (claim 11). The TDS distance and time counter means are binary counters (claim 12). The current production models of the TDS (Models 5 and 5-1) have means responsive to overflow pulses from the distance counter means to indicate to the operator that the capacity of the distance counter had been exceeded (claim 13). The TDS distance pulse generating means is comprised of a light source, a photosensitive element, and an interrupter, which consist of a cylindrical rotor with four equally spaced openings allowing light to strike the photosensitive element four times for each revolution of the rotor. This is within the description of claim 15. Claim 17 specifies that the interrupting means is connected to the odometer cable; the TDS distance pulse generator is adapted to be so connected. The TDS contains the error indicating means specified in claim 18, as well as the combinations of the foregoing claims which are described in claims 19, 20 and 21.

In sum, although the TDS speed computer may differ in some details from the specifications in the Liston patent, I find that it is sufficiently covered by the claims to invention heretofore cited [\*1230] such that its production, sale and use by defendant constitute infringement of those claims within 35 U.S.C. § 271.

Thus, I find that plaintiff's two patents are infringed directly and indirectly as charged. The next step, of course, is

to determine whether, given the infringement, they can be enforced in the face of defendant's attack on their validity.

## II. Validity of the Marshall Method Patent

[HN2] Section 101 of 35 U.S.C. provides for the patentability of the invention or discovery of "any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof. . . ." "Process" is defined by 35 U.S.C. § 100(b) as "process, art or method, and includes a new use of a known process, machine, manufacture, composition of matter, or material." [HN3] Certain conditions are then imposed for patentability of an invention as defined; among these is the requirement that the invention not have been "patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States. . . ." 35 U.S.C. § 102(b). [HN4] Section 102 then imposes a further condition:

"A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the difference between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made."

Defendant attacks the validity of the Marshall method patent principally on the ground that it is obvious, and that it was in public use or on sale more than one year prior to the filing of the patent application in 1963. The issue of obviousness will be resolved first; as will become apparent, the novelty of the invention is not seriously in dispute, since the standard is to be liberally construed, and the prior art contains no identical disclosure of the method claims. *Shaw v. E.B. & A.C. Whiting Company*, 417 F.2d 1097 (2d Cir.), cert. den. 397 U.S. 1076, reh. den. 398 U.S. 954 (1969); *Rich Products v. Mitchell Foods, Inc.*, 357 F.2d 176 (2d Cir. 1966).

### a. Obviousness of Marshall Method Patent

As the Supreme Court has observed:

". . . the § 103 condition . . . lends itself to several basic factual inquiries. [HN5] Under § 103, the scope and content of the prior art are to be determined; differences between the prior art and the claims at issue are to be ascertained; and the level of ordinary skill in the pertinent art resolved. Against this background, the obviousness or nonobviousness of the subject matter is determined." *Graham v. John Deere Co.*, 484 U.S. 1, 17 (1966).

There were several methods utilized by police to measure the speed of potential traffic violators prior to the development of the Marshall and Liston patents. Three of these methods involve premeasuring a selected distance along a highway, and timing the vehicles as they traverse the distance: the average speed of the target vehicle is then computed by dividing distance by time. The Enoscope method entails the positioning of two mirrors on opposite sides of the road, with one mirror at a 45 degree angle to reflect light along the road so that it is visible to an observer with a stopwatch at the end point; as the vehicle passes the mirrors, the person timing it starts a stopwatch when he sees the flash of light, and stops the watch when the vehicle passes his own terminal [\*1231] position. A variation of this technique is the "speed watch", where two hoses are laid parallel to each other across the road, and connected to a timing device, which is actuated when the vehicle crosses the first and stopped when it crosses the second. Both of these methods require the use of equipment which is readily visible to the motorist; in addition, several police personnel are necessary to man the stationary equipment and the chase vehicle. A third variation, the "aerial survey", involves visual observation of vehicles by airplanes, timing them by stopwatch as they traverse painted markings on the roadway, and then radioing ahead to the "chase" car to apprehend violators.

Another method of measuring the speed of traffic vehicles, and one in use throughout the country, is by radar. Radios signals are beamed down a roadway by an electronic unit; the difference between the frequency of the transmitted signals and the frequency of the signals reflected by oncoming vehicles is proportional to the speed of the vehicle. Speed detection by radar has its difficulties, however; the radar unit must be set up and recalibrated every time a new position is selected. The radar unit is also visible to motorists. In addition, police personnel must be stationed at a particular point and perform only that function. Finally, there are a variety of factors involved in the measurement of frequency differentials which render radar unreliable under certain conditions.

It should be noted that none of these prior methods of speed detection could be performed by one policeman in the course of discharging other regular patrol duties: all of the methods involve the pre-positioning of observer, timing device, and pursuing vehicle, in addition to the demarcation of the segment of the roadway over which the vehicle is to be timed. Indeed, the only technique for measuring the speed of a moving vehicle from another vehicle which is contained in the prior art is that of "speedometer pacing", whereby the police vehicle trails the target vehicle at a fixed distance for a certain length of time, so that the police vehicle is proceeding at the same speed as that of the target vehicle. Again, an alert motorist might easily detect such trailing; since the speed of the police vehicle must be the same as that of the target, moreover, an accurate speed indication may be difficult if the traffic is heavy or the path of travel uneven. Finally, there is no means of recording the speed so "clocked", other than in the memory of the policeman.

Given this background, it can be seen that the Marshall method patent represents a substantial advance over the prior "art" of speed detection. A police car equipped with an apparatus capable of performing the steps described in the patent need not be positioned in any predetermined spot; the vehicle need not trail the target vehicle at a constant speed or distance -- or even, for that matter, "trail" the target vehicle at all. The measuring devices are not visible to the motorist, and the measurements themselves can be made virtually anywhere. The actual measurement and recording of speed, and the apprehension of violators, can be performed by a single policeman in a single vehicle; since the speed measurement can be made from a moving vehicle, the police car can proceed with other patrol duties as well. In sum, the Marshall methods permit a much more efficient utilization of limited police resources while increasing the likelihood of apprehension of speeders.

Whether this advance over the prior art of speed detection would have been obvious to a person having ordinary skill in the art at the time of invention is another matter. Defendant contends that it would be "inconscionable" to monopolize the well-known principle of measuring the distance traveled by a vehicle, measuring the time elapsed in traveling the distance, and dividing the distance by time to derive the speed or velocity of the vehicle. On this basis, [\*1232] it is argued that the Marshall methods are not substantially distinguishable from the Enoscope, Sky Watch, and Speedometer Pacing methods discussed above. But surely this misses the mark: the Marshall method patent claims as invention a particular *method* of measuring time and distance, and of combining the two to determine the speed of another vehicle; none of these other techniques teaches the utilization of a speed detector within the car for performing the methods as specified, nor can it be said that the Marshall methods represent an obvious derivation or extension of the principles taught in these techniques.

But the resolution of this contention casts into even sharper focus the second horn of this particular obviousness dilemma. Arthur N. Marshall was perhaps not the first to think of the "concept" of measuring the speed of a moving vehicle from another vehicle with the use of a speed computer or apparatus -- but he was the first to reduce this concept to practical application. [HN6] And it has been the rule for some time that for a process to be patentable, at least one mode of reducing it to practical use must be disclosed. See, e.g., *Tilghman v. Proctor*, 102 U.S. 707 (1880); *Expanded Metal Company v. Bradford*, 214 U.S. 366 (1909). Put differently, Marshall invented both a method and an apparatus to practice the method. Given the invention of the apparatus, the method might indeed seem obvious; yet at the time of the filing of the application for the method patent the only apparatus which could practice the method was that disclosed in the specifications of the application.

Defendant sought to rebut at trial the conclusion that the prior art contained no such apparatus that could practice the Marshall methods, by introducing a number of patents which are set out in the margin. n3 At trial, however,

defendant's expert witness Craig Garretson, an associate professor of physics and engineering at C.W. Post College, only identified two of these (Eaton and Pellerin) as capable of performing any of the Marshall methods, namely those indicated in figures 13 and 14 of the specifications. On cross examination, however, Dr. Garretson was led to admit that both patents disclosed devices which were intended to measure the speed of the vehicle in which they were set, and over relatively long periods of time. Indeed, all five patents relied on by defendant disclose mechanical computers which are principally designed for this purpose; none contain separate time and distance switches. moreover, which are capable of independent operation to permit separate measurement and storing of the time and distance information necessary for the computation of speed of another vehicle. Finally, it should be noted that Dr. Garretson had not seen the mechanical embodiment of any of these patents - including the Marshall apparatus - and based his testimony on his reading of the patents alone. No evidence was provided which indicated that nay of these computers were capable of performing the Marshall methods as specified in an efficient manner without substantial redesign, nor does it appear that any of these devices was so redesigned to perform these methods.

n3 U.S. Patent No. 1,450,410, dated 4/3/23, for an "indicator" (Cox); French Patent No. 668,791, dated 7/22/29, for an "Appartus for Indicating the Ratio of Two Variables" (Palme); U.S. patent No. 3,172,722, dated 3/9/65, for a "Photographic Speed Measuring Apparatus" (Brown); U.S. Patent No. 1,407,134, dated 2/21/22, for a "Calculating Instrument" (Eaton); U.S. Patent No. 2,903,322, dated 9/8/59, for a "Vehicle Maximum Speed Indicator" (Webster); U.S. Patent No. 2,341,118, dated 2/8/44, for a "Vehicle Speed Recorder" (Rodanet); U.S. Patent No. 1,907,549, dated 5/9/33, for a "Method of Measuring Speeds Photographically" (Kahrs); U.S. Patent No. 2,871,008, dated 1/27/59, for a "Method of Obtaining Evidence of Traffic Signal Violations" (Abell); U.S. Patent No. 3,306,762, dated 5/29/62, for a "Trip Speed Averager" (McDonough).

[\*1233] The analysis of the prior art, and its comparison with the patent insuit, as directed by the Supreme Court in *Graham v. John Deer Co.*, *supra*, by no means disposes of the issue of obviousness. In a frequently cited passage, Judge Learned Hand described the plight of the court when confronted with such a situation:

"The test laid down is indeed misty enough. It directs us to surmise what was the range of ingenuity of a person 'having ordianry skill' in an 'art' with which we are totally unfamiliar. . . . To judge on our own that this or that new assemblage of old factors was, or was not, 'obvious' it to substitute our ignorance for the acquaintance with the subject of those who were familiar with it. There are indeed some sign posts: e.g. how long did the need exist; how many tried to find the way; how long did the surrounding and accessory arts disclose the means; how immediately was the invention recognized as an answer by those who used the new variant?" *Reiner v. I. Leon Co., Inc.*, 285 F.2d 501, 503-4 (2d Cir. 1960).

Since no direct evidence was introduced at trail as to what an individual familiar with the "art" would have considered obvious at the time of the invention, this court is basically left with its own judgment, to be guided by the "sign posts" suggested by Judge Hand, and which received favorable comment by the Supreme court in *Graham*.

In this case, all of the signposts point to an indication of nonobviousness. The evidence at trial establishes that Arthur Marshall conceived his idea and reduced it to a rough prototype in 1958; on November 3 of that year he filed his first patent application for a "Speed Indicator", which also coantained at least the broad outlines of the method claims which were to become the subject matter of his second application filed in 1963. Not until December of 1965 was the first mechanical speed detection device sold -- to the Indiana State Police. Over this period of time, Marshall logged over four thousand hours of travel and consultation with state and local police, and spent over \$ 150,000 in developing his VASCAR computer and winning over the public before it was sold. Since assigning his rights to his two patents to the plaintiff in March of 1967, Marshall and his group, as stated heretofore, have received from plaintiff over \$ 390,000

357 F. Supp. 1222, \*1233; 1973 U.S. Dist. LEXIS 14317, \*\*10;  
177 U.S.P.Q. (BNA) 737; 1973-1 Trade Cas. (CCH) P74,452

in royalties.

The evidence also indicates that the initial resistance of potential purchasers was finally overcome only after significant efforts; but at present VASCAR is enjoying great commercial success and is rapidly supplanting older methods and devices for speed detection. The need for such an invention existed since the development of the automobile; the long existence of the means necessary to bring about the invention, and its very simplicity, suggest that the invention was by no means "obvious" to those familiar with the art or the problem.

[HN7] The conclusion that the Marshall method patent is not invalid for obviousness is strengthened by the presumption of validity which 35 U.S.C. § 282 invests in every patent. It has been observed that this is

". . . a presumption which is perhaps too often minimized in the courts. . . . Expertness and experience in passing upon patents lie primarily in the Patent Office and these important factors are only partially offset by the greater concentration and the additional relevant evidence which can be brought to bear in any particular patent litigation in the courts. The presumption of validity is entitled to particular weight when, as here, the file wrapper discloses a careful consideration in the Patent Office before issue."

*Georgia-Pacific Corporation v. United States Plywood Corporation*, 258 F.2d 124 (2d Cir.), cert. den. 358 U.S. 884 (1958).

The file wrappers of the several Marshall applications reveal that the [\*1234] Patent Office indeed paid careful attention to the patentability of the claimed inventions. The original application for a patent for a "Speed Indicator" was filed on November 3, 1958; on May 27, 1959, the claims were rejected in light of *Palme*, among others. On November 24, 1959, Marshall amended his second claim, and added two new claims, one of which was for a method of determining the speed of a motor vehicle. These two new claims were again rejected in April of 1960 as indefinite and unpatentable over *Palme* in view of *Gordon*. A new (apparatus) claim 5 was added by Marshall in October, 1960; this was finally rejected. On November 22, 1960, Marshall filed a Rule 116 amendment, adding a new method claim 6, which he alleged was omitted from his prior amendment through inadvertence, to replace rejected method claim 4. This amendment was not permitted by the Patent Office, however; thus, Marshall took his appeal from the final rejection of his remaining apparatus claim in April of 1961, and additionally requested that claim 6 be entered. On appeal, only the apparatus claim was considered, since it was held that the method claim was not properly within the appeal. On March 29, 1963, the Examiner's decision rejecting this claim was upheld on the basis that ". . . the claim presented . . . does not distinguish appellant's arrangement with sufficient particularity from the device shown by *Palme*."

Shortly before this final rejection of his original application, on February 11, 1963, Marshall filed a second application, asserting that this was "a continuation-in-part of my prior copending application Serial Number 771,276, filed Nov. 3, 1958. . . ." Both apparatus and methods claims were described in much greater detail than in the original application. On December 16, 1963, the Examiner required Marshall to restrict his application for examination, and provisionally to elect to pursue either his apparatus or his method claims, since the Examiner had determined that "the two inventions as grouped above are distinct each from the other because the methods as claimed are not the exclusive process of using the apparatus." Consequently, on June 17, 1964 Marshall amended his application and elected to pursue his methods claims; by way of a supplemental amendment dated September 2, 1964, he cancelled his apparatus claims and asserted that they would be included "in a continuation-type case to be filed." Certain statements in this supplemental amendment indicate, however, that the Examiner requested Marshall to cancel his reference to his original 1958 application. Marshall complied with this request, but added the following: "In cancelling this paragraph, applicant does not, of course, sacrifice or abandon its legal right to rely on its earlier filing date of its abandoned application for any *invention* common to the two cases." On May 4, 1965, the amendment was allowed and a patent issued; the references cited by the Examiner were *Kahrs*, *Rodanet*, *Abell*, *Webster*.

Marshall's other division of his application, that for an apparatus patent, was allowed in part on September 27, 1966, certain of the claims having been rejected as substantially met by *Cox*. The references cited by the Examiner were *Cox*,

357 F. Supp. 1222, \*1234; 1973 U.S. Dist. LEXIS 14317, \*\*10;  
177 U.S.P.Q. (BNA) 737; 1973-1 Trade Cas. (CCH) P74,452

Webster, and and English patent, unnamed in the file wrapper.

Thus, the Patent Office considered virtually all of the prior art cited by defendant as indicating the obviousness of the Marshall method patent. The only two patents which were introduced by defendant and not cited by the patent Office were those of Eaton and of McDonough. The Eaton patent, U.S. Patent No. 1,407,134, dated February 21, 1922, is for a "calculating instrument", designed for "giving a direct reading of the quotient of two factors one of which increases or decreases at a variable rate". As previously noted, this invention was intended to relate specifically to measuring the speed of the vehicle in which it was placed; it cannot be [\*1235] said to teach the methods claimed as invention in the Marshall method patent. The second patent, to McDonough, U.S. Patent No. 3,036,762, was issued on May 29, 1962 for a "Trip Speed Averager", which is "a device capable of continuously indicating the average speed over the distance which has been traversed". Again, the relevance of this invention to the Marshall method patents is elusive, and defendant did not pursue the matter at trial its introduction.

It has been clear at least since the case of *Cochrane v. Deener*, 94 U.S. 780 (1876) that a process itself is patentable, independent of the means utilized to practice it. Defendant seems to argue in a post-trial letter dated January 8, 1973 that the absence of alternative means of performing the methods make them somehow functional and unpatentable. But the recent relevant law is to the contrary, *Application of Traczy-Hornoch*, 397 F.2d 856 (C.C.P.A. 1968). The policy underpinnings for this position are persuasively stated in the *Traczy-Hornoch* decision, 397 F.2d at 868:

"The essential difficulty is in the fact that, although at the time of the application only one apparatus may be known which is capable of carrying out the process, others may become available later. In which case of course, the inventor may be cheated of his invention. It is peculiarly our responsibility to see that the decisional law does not require this kind of inequity."

Although courts are not to permit excessive extension of the monopoly power inherent in the grant of a patent, they must also recognize that the patent represents one of the most significant spurs to inventive activity in a mixed, capitalist economy. On the basis of all of the evidence, defendant has failed to establish that the Marshall method patent is lacking in novelty or that it would have been obvious to one ordinarily skilled in the art.

#### *b. Public Use or Sale of Marshall Method Patent*

Defendant also contends that the method claims covered in the Marshall method patent were "on sale" or in "public use" more than one year prior to the filing of the application on February 11, 1963. 35 U.S.C. § 102(b). Although the issue is rather close, I find that the patent is not invalid for these reasons.

The first disclosure of his invention was made by Marshall to his patent attorney in 1958, prior to the filing of his original application. At approximately the same time, Marshall approached the Superintendent of the Virginia State Police to explore the possibility of there being any practical application of his invention for policeman. According to Marshall, the Superintendent voiced doubts about the problem of depth perception, and the matter was dropped.

After the filing of the application, Marshall sought a manufacturer to develop his device and to get onto the market. In early 1959, he demonstrated the original apparatus to the President of a company called Robertshaw-Fulton; after some consideration, the company decided not to pursue the matter, but sent Marshall a check for \$ 1000 for his time. Then on March 18, 1959, Marshall assigned his rights under his pending patent application to Southern Steel & Stove Corp., under a contract to improve the apparatus. Southern was unsuccessful, being largely bothered by the problem of timing and depth perception in the use of the apparatus; in July of 1959 they notified Marshall of their decision not to continue, but did not "return" his patent rights until January 23, 1961. This formality apparently not being considered necessary by Marshall until that time. There is no indication in the record, however, that Southern ever made any sales effort to market VASCAR.

In June, 1960 Marshall and a local firm, Progressive Engineering Corporation, developed a second version of the [\*1236] apparatus, which represented a significant improvement: time and distance planes were superimposed; new speed indication means with more accurate gradations were introduced; two switches were added, placed close to each other for easy manipulation; a new means of easily and precisely zeroing the equipment was also included. After this development, the Franklin Institute in Philadelphia was engaged to test the device on a confidential basis. Following a successful analysis, Marshall, in October, went to the convention of the International Association of Chiefs of Police (IACP) in Washington, for the "dual purpose" of learning more about police operations, and identifying the organizations which sold to police units. While there, he talked to the sales manager of a company called Federal Laboratories.

Approximately one month later, Marshall went to the Federal Laboratories factory and demonstrated his machine. He left it there for their examination; they in turn employed a retired police lieutenant, Lieutenant Venia, to use the apparatus and to evaluate it. In April, 1961, Federal Laboratories determined that it was not interested in the Marshall device.

Similarly, in May of 1961, following the Federal Laboratories rejection, Marshall demonstrated his machine to Kent-Moore Organization, Inc., in Detroit, leaving it with them for analysis. They in turn dropped the matter in July, 1961.

This was essentially the last "promotional" activity undertaken by Marshall prior to February 11, 1962 -- the critical date for § 102(b) purposes. In early 1962, Marshall and Progressive Engineering rebuilt the machine again, this time coming up with a slightly smaller, somewhat improved version. Following this came a period over a year's inactivity of his. Then, in September, 1963, he took the improved machine to the executive offices of the IACP, and consulted with its research division. Finally, in February-March of 1964, Marshall launched a concerted campaign to police organizations across the country, in which he demonstrated his invention, and distributed a prepared brochure. Defendant contends that this activity prior to February, 1962 proves that Marshall had in effect put his methods into public use, and that his efforts were directed towards determining the salability of his invention, rather than its workability.

[HN8] The kind of "public use" contemplated by 35 U.S.C. § 102(b) seems to be that of public disclosure or of commercial exploitation. Experimental use of the invention, however, is not to be considered public use. *Robine v. Apco, Inc.*, 386 F.3d 267 (2d Cir. 1967); *Shaw v. E.B. & A.C. Whiting Company, supra*.

Although defendant asserts that Marshall made no attempt at secrecy in his dealings, the evidence presented at trial leads to the contrary conclusion. Marshall testified specifically that he discussed the confidentiality of his invention with everyone with whom he consulted. This is reinforced by certain correspondence between Marshall and several of the organizations with whom he had contact in this period of time. The fact that Lt. Venia, an employee of Federal Laboratories, demonstrated the apparatus to several former associates, does not amount to the kind of disclosure which would invalidate the patent in question: these demonstrations were merely part of Venia's assigned task of evaluating the performance of the *device*, and there is no indication in the record that the specific methods involved in this suit were actually disclosed. Moreover, no proof was adduced that any of the companies with whom Marshall dealt in this critical period actually made any sales effort.

The rule prohibiting commercial exploitation of an invention for more than a year before the application for a patent is designed to insure that an inventor will not be able to extend the patent monopoly for more than the statutory period by delaying the filing of [\*1237] his application. But here Marshall had filed a patent application in 1958; although the claims contained therein are directed principally to the apparatus, the specifications also reveal the outline of the methods subsequently patented under his "continuation in part" application. There is no evidence that Marshall in fact delayed his application; rather, the initial application was somewhat artlessly phrased, so that its terms were too ambiguous to qualify for patent, and required consequent reapplication.

357 F. Supp. 1222, \*1237; 1973 U.S. Dist. LEXIS 14317, \*\*10;  
177 U.S.P.Q. (BNA) 737; 1973-1 Trade Cas. (CCH) P74,452

Marshall was essentially submitting his *apparatus* to various companies for testing and evaluation with the purpose of developing the device for manufacture and production. It was not "on sale" in the traditional sense. See, e.g., *Amphenol Corporation v. General Time Corporation*, 397 F.2d 431 (7th Cir. 1968); *Chemithon Corporation v. Procter & Gamble Company*, 287 F. Supp. 291 (D. Md. 1968), *aff'd. per curiam*, 427 F.2d 893 (4th Cir.), *cert. den.* 400 U.S. 925 (1970). Rather, Marshall had but one model of his apparatus invention, which he was in the process of developing over the period. This was not a submission by sample to a prospective purchaser; instead, Marshall was looking for a company to acquire the rights *under his patent application*, to produce and distribute his apparatus which could practice his methods. Aside from the difficulty with the concept of these particular methods ever being "on sale" in such a situation, I find that Marshall's disclosure of the methods in his pursuit of a manufacturer for his *apparatus* did not constitute public use or sale such as to invalidate his patent.

One final point should be addressed here. Plaintiff contends that it is entitled to the benefit of the earlier filing date, conferred by 35 U.S.C. § 120, of Marshall's original (1958) patent application. The 1963 application did in fact refer to the original application, but the Patent Office required that the reference and the characterization of the application as a "continuation-in-part" of the earlier one be stricken. Marshall did this, but purported to reserve all rights to any inventions disclosed in the original application. [HN9] In this respect, it should be noted that § 120 refers only to the *application* for patent, which must contain the required reference; the invention in the original application, however, must be disclosed in accordance with § 112. Although the specifications of the original application do contain certain directions as to the practice of the methods, these are not disclosed with the particularity required by § 112; moreover, the original application does not "conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.." In other words, the claims of the original application are not readable onto the claims of the subsequent application, nor are the specifications sufficiently precise, to entitle the 1963 application to claim a filing date of 1958. See *Carter-Wallace, Inc. v. Otte*, F.2d (2d Cir. 1972). This was the basis, presumably, for the Patent Office's requirement that reference to the prior application be stricken.

### *c. Inadequate Disclosure of Mode of Utilizing Methods*

Defendant also argues that the Marshall method patent contains no disclosure of how to visually determine when the target vehicle passes certain checking points, given problems in depth perception, and that this failure renders the patent invalid because of inadequate disclosure. 35 U.S.C. § 112. More specifically, defendant asserts that the use of shadows is essential to successful practice of the Marshall methods, that Marshall knew of this "shadow technique" for a long time, and that his failure to reveal this in his patent renders it invalid. But at trial, defendant's own witness, Trooper Aldin Asp, testified that shadows were really only one means of overcoming the parallax problem, and [\*1238] that he himself utilized other means as well -- such as a bumper flash going over a hill, triangulation, crossing railroad tracks or other lines or patches on a road. I find that the patent sufficiently discloses the mode of utilizing the methods to comply with § 112, and that the shadow technique in particular would be obvious to one acquainted with the teachings of the Marshall method patent, and is only one means of correcting the problem of depth perception.

In sum, I conclude that the Marshall method patent is valid, and that the claims to invention included therein are entitled to protection against infringement by defendant.

### *III. Validity of the Liston Patent*

As in its attack on the Marshall method patent, defendant challenges the validity of the Liston patent on the grounds, *inter alia*, of obviousness and of public use or sale more than one year prior to the filing of the application for a patent.

#### *a. Obviousness of the Liston Patent*

Plaintiff admits that "most if not all of the individual electronic circuits and circuit components used in the device described and claimed in the Liston et al patent . . . are all separately old and have been used before in different

357 F. Supp. 1222, \*1238; 1973 U.S. Dist. LEXIS 14317, \*\*10;  
177 U.S.P.Q. (BNA) 737; 1973-1 Trade Cas. (CCH) P74,452

combinations to perform different computer functions." Plaintiff's Post-Trial Proposed finding of Fact No. 64. Plaintiff claims, however, that the Liston patent described a combination of these old elements, which itself represents a unique configuration, and that this development of a "fool-proof" in-car speed computer is by no means obvious.

[HN10] A combination of old elements is patentable "only when the whole in some way exceeds the sum of its parts. . . ." *Great Atlantic & Pacific Tea Co. v. Supermarket Equipment Corp.*, 340 U.S. 147, 152 (1950). The fact that the old elements had not previously been so combined does not itself resolve the issue, *Lemelson v. Topper Corporation*, 450 F.2d 845 (2d Cir. 1971), cert. den. 405 U.S. 989 (1972), nor is commercial success pertinent, absent the required showing of invention. *Anderson's-Black Rock, Inc. v. Pavement Salvage Co., Inc.*, 396 U.S. 57 (1969).

The problem is thus to determine whether the combination of old elements represented by the Liston patent would have been as a whole "obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. . . ." 35 U.S.C. § 103. Here the relevant date is February 27, 1969, the filing date of the Liston patent. On the basis of the evidence presented at trial. It is my conclusion that the Liston patent is invalid as failing to meet the stringent standards for invention for combination patents in this circuit.

Defendant's principal witness at the trial on this issue on this issue was Dr. Craig Garretson, an associate professor of physics and engineering at C.W. Post College. Dr. Garretson only received his Ph.D. in electrical engineering in 1969, but had received his bachelor's degree in electrical engineering in 1949 and his master's in 1953. Although his testimony is to be considered in light of the fact that he had never had any industrial experience in the *design* of digital computers in 1967-68, when the Liston device was developed, it was evident at trial that he was familiar with their operation, and had subsequently acquired more experience through his work at C.W. Post. Put briefly, Dr. Garretson testified persuasively that the elements and their combinations as embodied in the Liston patent would have been obvious to one familiar with the art in 1967-68. Indeed, as it appeared at trial, the novelty of the Liston device lies in the fact that it is a combination to practice the methods of the Marshall method patent, and that it is the first electronic digital computer which could successfully replace Marshall's patented apparatus [\*1239] But this "novelty" cannot be said to be invention within the contemplation of § 103: Dr. Garretson provided convincing proof, unrebutted by plaintiff, that the combination as a whole, with perhaps minor variations in particular elements, would have been apparent to one familiar with the art.

None of the extrinsic aids previously discussed with reference to the Marshall method patent require a contrary conclusion. The only reference cited by the Examiner in granting the Liston patent were the three Marshall patents; the file wrapper for the Liston patent itself is not in evidence, but there is no indication that the Patent Office gave careful consideration to the problem of finding invention in a combination of old elements.

The "signpost" pointing to validity for the Marshall method patent do not point in the same direction for the Liston patent. Plaintiff acquired Marshall's patent rights in the spring of 1967, and contracted very shortly thereafter with Nicordyne, Inc., to develop an electronic speed computer to supplant the Marshall electro-mechanical apparatus. An initial "breadboard" device was delivered in September, 1967; due to a number of inadequacies, this was redesigned in November, 1967. Field tests were then run on 25 of these redesigned modules from January through April of 1968, with a series of improvements being made as the results of the tests came in. Finally, on March 20, 1968, Microdyne was given approval to commence assembly of the first 250 production units; these units were first shipped to customers at the end of May, 1968.

Thus, it cannot be said that the Liston device was a response to a long-felt need, since the Marshall method patent had only been issued two years earlier. No evidence appears that there were many unsuccessful attempts to solve the problem of converting the Marshall apparatus into a fully integrated electronic digital computer. Rather, the history of the Liston patent reveals a concerted engineering effort to create a workable electronic prototype, proceeding in stages to remove the "bugs" from the model as it developed, with little real impediment. The real "invention" embodied in the Liston patent, as it turns out, was already patented -- by Marshall. It is therefore my conclusion that the Liston patent is invalid for obviousness, as defined by 35 U.S.C. § 103.

*b. Liston Patent On Sale or In Public Use*

Although the foregoing would dispose of the issue of the Liston patent's validity, mention might be made of defendant's contention that the Liston device was on sale or in public use more than one year before the filing date of February 27, 1969. This is based on the fact that plaintiff had received, in late 1967 and early 1968, several orders for electronic VASCAR devices from potential customers who had become aware that plaintiff was in the process of developing an electronic speed computer. Plaintiff also in this same period sent out a list of tentative performance specifications for its electronic VASCAR, in response to a request from the State of Ohio. In addition, the vice-president of plaintiff's Signal Division responded to a similar order from the State of North Carolina (which did not specify whether the VASCAR devices would be of an electrical type; enclosed in the letter also were photographs of dummy mockups of the tentative modules.

This is insufficient to demonstrate that the new electronic VASCAR units were "on sale" at this period. At the time of this correspondence, plaintiff had not yet developed for commercial production the device which would be described in the Liston patent; nor had [\*1240] it any workable units of the electronic VASCAR for sale. Indeed, defendant has not met its burden of establishing that plaintiff ever offered for sale on an unsolicited basis, even for future delivery, its electronic VASCAR. See *Hobbs v. United States Atomic Energy Commission*, 451 F.2d 849 (5th Cir. 1971).

*IV. Defendant's Counterclaims*

As for defendant's affirmative defense of patent misuse, and its counterclaims for unfair competition, antitrust violations, and trademark abuse, [\*\*11] a brief discussion of the record should suffice to demonstrate that defendant has failed to make out its contentions.

Defendant basically relies on two arguments in support of its claims. First, it presses the fact that plaintiff has never licensed anyone other than purchasers of its VASCAR computer to practice the Marshall methods; indeed, plaintiff has apparently never set a price on such a license, but instead includes the "implied license" in the purchase price of the computer. This practice, it is argued, amounts to an illegal tying arrangement, whereby plaintiff is able to increase its monopoly power beyond the normal bounds of its patents.

The evidence in the case reveals, however, that plaintiff has never been requested to grant a license under the Marshall method patent, independent of its VASCAR device, nor has it ever, consequently, refused a license to any applicant. Arthur Marshall, indeed, testified at trial that he offered a license to defendant in the fall of 1971, after the commencement of this suit. As noted *supra*, page 13, plaintiff had the right to rely upon the validity of its Liston patent: since it owned the method patent, it could legitimately proceed [\*\*12] to sell a device to practice those methods. On this state of the record, it cannot be said that plaintiff's sales practices and failure to grant a separate license under the Marshall method patent constitute patent misuse or any conceivable violation of the antitrust statutes.

Secondly, it is asserted that plaintiff has locked defendant out of certain competitive bids, by causing various state purchasing agencies to utilize specifications prepared by the plaintiff for inviting these bids; allegedly, the specifications are not functionally required for efficient speed detection, but serve rather to exclude defendant's TDS computer from consideration, since it does not conform to the requirements of such bid invitations. The evidence at trial established that it was indeed standard practice in the bidding process for a manufacturer of speed computers to submit proposed "specifications" which in effect amounted to a description of the capabilities and operation of its own device. Defendant engaged in this practice as well, and succeeded in changing several proposed specifications to conform to its own device. It is also clear that the governmental agencies were free to select among [\*\*13] the proposals, and even to change their specifications -- which they did in three instances to defendant's advantage. At the same time, there were indications at trial that the specifications attacked by defendant as nonfunctional -- e.g., the storage capacity and unit of measure for the distance and time registers -- might produce a more efficient computer. In sum, I cannot find in these practices either an intent or an attempt to monopolize the sale of electronic speed computers.

357 F. Supp. 1222, \*1240; 1973 U.S. Dist. LEXIS 14317, \*\*13;  
177 U.S.P.Q. (BNA) 737; 1973-1 Trade Cas. (CCH) P74,452

Defendant also purports to find in various actions by plaintiff further "evidence" of unfair competition, patent misuse, and antitrust violations. It cites the fact that plaintiff informed several prospective customers that it owned the patents in suit and had brought an infringement action against defendant. Plaintiff likewise wrote the Community College of Raleigh, North Carolina, that it would be a violation of its Marshall [\*1241] method patent if the college were to utilize a TDS computer in demonstrating the Marshall methods to police officers. It is true also that plaintiff brought suit for infringement in July, 1969 against the American Data Company and others. Unlike defendant, however, [\*\*14] I am unable to find any untoward significance in these activities: plaintiff in these actions was understandably proceeding to protect its rights as provided by law, and there is no indication that the suits were a sham.

Defendant also finds fault in the March 16, 1967 agreement, as supplemented by the August 12, 1968 agreement, whereby the Marshall group assigned its rights in the Marshall patents and the trademark VASCAR to the plaintiff. This set of agreements is alleged to constitute a conspiracy between the parties to divide the market for electronic speed computers, with the intent to monopolize the same. By the agreements, plaintiff received all interests in the Marshall patents, and rights in the Western Hemisphere to use the registered trademark VASCAR. The significance of this "market division" is almost totally undercut by the uncontested fact that neither Marshall nor plaintiff has ever attempted to market speed computers of any kind in the Eastern Hemisphere; nor is there any evidence that significance was ever intended to be placed by the parties on this passage. Also under the agreement, the plaintiff covenanted it would not contest the validity of the Marshall [\*\*15] patents, and that it would prosecute suits for their infringement -- surely typical and proper provisions in this general context.

Although the issue is not addressed in the pleadings, defendant next charges that plaintiff has induced purchasers to publicly display and use the term VASCAR in certain uncontrolled fashions, similar to the "radar" it replaces; this, it is argued, justifies stripping plaintiff of its trademark protection for the word VASCAR. Moreover, it is urged that such use of the name creates yet another barrier to the successful marketing of defendant's TDS device. Again, defendant produced no evidence that plaintiff had actively sought to induce such "uncontrolled" usages of its trademark; nor, for that matter, do such usages actually appear in the record. Finally, defendant asserts that plaintiff had unfairly disparaged the quality of its TDS computers, and that plaintiff obtained its patents illegally and fraudulently. But no evidence was introduced to support these bare allegations.

#### *V. Conclusion*

In conclusion, I find that defendant's manufacture, sale and use of the TDS electronic speed computer infringes plaintiff's Marshall method patent directly [\*\*16] and indirectly as alleged. I find further that plaintiff's Liston patent is invalid for obviousness, and therefore not entitled to protection against defendant's infringement. Finally, defendant has not made out satisfactorily at trial any of its counterclaims sounding in unfair competition, trademark or patent misuse, or antitrust.

On the basis of the foregoing conclusions, the parties and their counsel should settle an order and judgment disposing of the issues in this case. In this regard, plaintiff has requested an injunction restraining defendant and all of its privies from further infringement of the patents. From what has been said, it is clear that plaintiff is entitled to an injunction only in respect to the Marshall method patent. 35 U.S.C. § 283. Also, of course, plaintiff has sought damages for defendant's infringement. 35 U.S.C. § 284. From the record heretofore made, it might be surmised that the damages for infringement of the Marshall patent will not amount to any substantial sum, if for no other reason because the defendant has sold only 250 of its units which embrace the method invented by Mr. Marshall. If [\*1242] plaintiff still seriously presses the [\*\*17] issue of damages, it is theoretically entitled to an accounting. Counsel, therefore, are advised that this court will refer for hearing and report on any accounting issues to a magistrate of this court upon specific request of plaintiff's counsel. Finally, all other issues have been plainly enough resolved heretofore in this opinion to enable counsel to settle an appropriate order and judgment on those matters.

#### APPENDIX A

(Marshall method patent claims) 3,182,331 in the shape, size and arrangement of parts may be resorted to, without departing from the spirit of the invention or scope of the subjoined claims.

Having thus described my invention, I claim:

1. A method of determining and identifying the speed of a checked vehicle from a checking vehicle has a distance measuring unit which can measure and identify a selected distance traveled by said checking vehicle and a time measuring unit which can measure time and a directly readable speed measuring means which can combine said selected distance and time to identify the speed of said checked vehicle comprising the steps of

starting the time measurement when the checked vehicle passes a first selected point,

stopping [\*\*18] the time measurement when the checked vehicle passes a second selected point, said time starting and stopping steps being accomplished by starting and stopping said time measuring unit,

moving said checking vehicle from said first to said second selected point over substantially the same path traveled by said checked vehicle,

starting the distance measurement when the checking vehicle passes said first selected point,

stopping said distance measurement when the checking vehicle passes said second selected point, said distance starting and stopping steps being accomplished by starting and stopping said distance measuring unit, combining the resultant identified time measurement and distance measurement in said directly readable speed measuring means in a predetermined manner to produce a speed identification, the distance measurement steps being independent as to time of execution whereby the selected distance may be measured before, during and/or after the time measurement steps.

2. A method of determining and identifying the speed of a checked vehicle from a checking vehicle wherein said checking vehicle has a distance measuring unit which can measure and identify [\*\*19] a selected distance traveled by said checking vehicle and a time and a directly readable speed measuring means which can combine said selected distance and time to identify the speed of said checked vehicle comprising the steps of

starting the time measurement when the checked vehicle passes a first selected point,

stopping the time measurement when the checked vehicle passes a second selected point, said time starting and stopping steps being accomplished by starting and stopping said time measurement unit,

moving said checking vehicle from a first to a second reference point over a path equal to the path traveled by said checked vehicle,

starting the distance measurement when the checking vehicle passes said first reference point equivalently related to said first selected point,

stopping said distance measurement when the checking vehicle passes said second reference point equivalently related to said second selected point, said distance starting and [\*\*20] stopping steps being accomplished by starting and stopping said distance measuring unit,

combining the resultant identified time measurement and distance measurement in said directly readable [\*\*20] speed measuring means in a predetermined manner to produce a speed identification, the distance measurement steps being independent as to time of execution whereby the selected distance may be

measured before, during and/or after the time measurement steps.

3. A method of determining and identifying the speed of a checked vehicle from a checking vehicle as defined in claim 1 and including the step of recording the speed by making a permanent record on a recording material conforming with the speed identification produced by said directly readable speed measuring means.

4. A method of determining and identifying the speed of a checked vehicle from a checking vehicle as defined in claim 2 and including the step of recording the speed by making a permanent record on a recording material conforming with the speed identification produced by said directly readable speed measuring means.

5. A method of determining and identifying the speed of a checked vehicle from a checking vehicle as defined in claim 2 and wherein the distance measurement steps occur prior to the time measurement steps to enable the checking vehicle to be at a fixed position when timing the checked vehicle. [\*\*21]

6. A method of determining and identifying the speed of a checked vehicle from a checking vehicle as defined in claim 2 and wherein the distance measurement step occurs after the starting of the time measurement step whereby the checking vehicle may be distant from said first reference point at the time of starting the time measurement.

7. A method of determining and identifying the speed of a checked vehicle from a checking vehicle as defined in claim 2 and wherein the time measurement steps and the distance measurement steps occur simultaneously with the checking vehicle traveling substantially the same path traveled by said checked vehicle.

8. A method of determining and identifying the speed of a checked vehicle from a checking vehicle as defined in claim 2 and wherein the starting of the time measurement step and the distance measurement step occurs simultaneously as the checked vehicle passes the checking vehicle and the stopping of the distance measurement step occurs at said second reference point to enable determination of the speed of a passing checked vehicle without traveling at the same speed as the checked vehicle.

9. A method of determining and identifying [\*\*22] the speed of a checked vehicle from a checking vehicle as defined in claim 2 and wherein the checked vehicle is traveling toward said checking vehicle and wherein the starting of the time measurement step occurs when the checked vehicle passes a first selected point, the stopping of the time measurement step and the starting of the distance measurement step occurs when the vehicles pass each other in opposite directions, and stopping of the distance measurement step occurs at the second reference point.

#### APPENDIX B

(Liston patent claims) 3,530,382

While we have described our invention in certain preferred forms, we do not intend to be limited to such forms, except insofar as the appended claims [\*1244] are so limited, since modifications coming within the scope of our invention will readily occur to those skilled in the art, particularly with out disclosure before them.

We claim:

1. Apparatus intended [\*\*23] to be mounted in one motor vehicle and operated by a driver thereof for measuring the average speed of another motor vehicle or target vehicle being observed by the driver of the one vehicle, the improvement comprising, in combination, distance pulse generating means connected to the one vehicle for generating a plurality of electrical distance pulses the number of which is proportional to distance travelled by said one vehicle, manually operable distance switch means, time pulse generating means for generating a plurality of electrical time pulses the number of which is proportional to elapsed time, manually operable time switch means, electrical distance counter means for counting said distance pulses, said distance switch means serving to operatively connect said distance counter means with said distance pulse generating means, electrical time counter means for counting said time pulses, said time switch mean serving to operatively connect said time counter means with said time opulse generating means, divide circuit means for in effect dividing the number of distance pulses in said distance counter means by the number of time pulses in said time counter means whereby the resulting [\*\*24] quotient will indicate the speed of the target vehicle, and speed readout menas for visibly displaying said speed.

2. The invention of claim 1 where said distance pulse generating maens is connected mechanically to a mechanical drive component of the one vehicle so as to be driven therefrom an amount proportional to the distance travelled by the one vehicle.

3. The invention of claim 1 including distance register menas connected between said distance counter means and said divide circuit means, and means for transferring the distance uinformation in the distance counter means to the distance register means on a non-destruct basis so as to permit repeated us of the same distance inforamtion in subsequent speed computations.

4. The invention of claim 1 including compute start means for initiating a speed start means for initiating a speed computation by said divide circuit means, said compute start means being automatically operable in response to four conditions comprising the turning on of said distance switch means, the turning off of said distance switch means, the turning on of said time switch means and the turning off of said time switch means.

5. The invention of claim [\*\*25] 4 where said compute start means includes four element: and" gate means having four inputs, a first gate element being enabled when said distance switch is turned on, a second gate element being enabled when said distance switch is turned off, a third gate element being enabled when said time switch is turned on, and a fourth gate element being enabled when said time switch is turned off, said gate means being responsive to the foregoing four enables to produce an output signal which is utilized to initiate a speed computation by said divide circuit means.

6. The invention of claim 1 where said divide circuit means includes subtractor means which repeatedly subtracts the number of said time pulses form the number of said distance pulses, means for stopping the computation process when the number of remaining distance pulses is reduced to zero or becomes negative, and speed counter means for counting the number of suggessful subtractions prior to the stopping of the computation process, said speed counter means being connected with said speed readout means.

[\*1245] 7. The invention of claim 6 including distance shift register means conected between said distance counter means. [\*\*26] and said subtractor means. means for transferring the distance information in the distance counter means to said distance shift register means on a nondestruct basis so as to permit repeated use of the same distance information in subsequent speed computations, control counter means pulsed by computer clock means for controlling the feeding of the distance information in said distance shift register mmeans and the time information in said subtractor means simultaneously and in serial fashion, the distance remainder inforamtion being fed back to said distance shift register means after each subtraction.

8. The invention of claim 7 where binary multiplier means is added to the least significant side of said distance shift

register means, and sign-sensing means is added to the most significant side of said distance shift register means, said sign-sensing means being utilized to stop the computation process when the distance remainder in the distance shift register means goes through zero and becomes negative.

9. The invention of claim 6 where said speed counter means comprises a binary coded decimal counter, means for transmitting one pulse to said speed counter means each time a successful [\*\*27] subtraction is performed, and lamp segment decoder/driver means connected with said speed counter means, said speed readout means comprising a lamp segment display connected with said lamp segment decoder means for displaying a lighted digital speed reading corresponding to the number of pulses transmitted to said speed counter means.

10. The invention of claim 1 including reset means selectively operable to reset the entire apparatus or to reset all of the time components and readout means without resetting the distance counter means.

11. The invention of claim 1 where said time pulse generating means comprises oscillator means which produces a predetermined number of electrical time pulses per second, said oscillator means being connected to said time counter means by said manually operable time switch means whereby said time counter means will count said time pulses only when said time switch means is turned on.

12. The invention of claim 1 where said distance counter means and said time counter means each comprises a binary counter.

13. The invention of claim 1 including means responsive to overflow pulses from said distance counter means or said time counter means to [\*\*28] indicate to an operator that the capacity thereof has been exceeded.

14. The invention of claim 1 including computer clock means and control counter means for controlling the feeding of the distance information in the distance counter and the time information in the time counter to said divide circuit means. said time and distance information being fed to said divide circuit means simultaneously in serial fashion.

15. The invention of claim 1 where said distance pulse generating means comprises a light source in combination with photo-sensitive means, and rotatable light interrupting means interposed between said light source and said photo-sensitive means, interrupting means having a plurality of circumferentially spaced openings which permit light from said light source to strike said photosensitive means a predetermined number of times for each revolution of said interrupting means, and means connecting said interrupting means with a mechanical drive component for said one vehicle whereby said interrupting means will be driven from said drive component an amount proportioned to the distance travelled by said one vehicle.

16. The invention of claim 1 where said time pulse [\*\*29] generating means is manually [\*1246] adjustable to permit variation of the frequency thereof for calibration purposes.

17. The invention of claim 4 where said interrupting means is connected to the odometer cable of said vehicle so as to be rotated thereby.

18. The invention of claim 1 including error indicating means for indicating to an operator that an error has been made in the manual operation of the apparatus, said error indicating means being responsive to any of the following conditions comprising turning on the distance switch for a distance in excess of the capacity of the distance counter, turning on the time switch for a time in excess of the capacity of the time counter, turning on the distance switch a second time without clearing the distance counter of information previously stored therein, and turning on the time switch a second time without clearing the time counter of information previously stored therein.

19. Apparatus intended to be mounted in one motor vehicle and operated by a driver thereof for measuring the average speed of another motor vehicle or target vehicle being observed by the driver of the one vehicle, the improvement comprising, in combination, [\*\*30] distance pulse generating means connected to the one vehicle for

generating a plurality of electrical distance pulses the number of which is proportional to distance travelled by said one vehicle, said distance pulse generating means being connected mechanically to a mechanical drive component of the one vehicle so as to be driven therefrom an amount proportional to the distance travelled by the one vehicle, manually operable distance switch means, time pulse generating means for generating a plurality of electrical time pulses the number of which is proportional to elapsed time, manually operable time switch means, electrical distance counter means for counting said distance pulses, said distance switch means serving to operatively connect said distance counter means with said distance pulse generating means, electrical time counter means for counting said time pulses, said time switch means serving to operatively connect said time counter means with said time pulse generating means, divide circuit means for in effect dividing the number of distance pulses in said distance counter means by the number of time pulses in said time counter means whereby the resulting quotient will indicate [\*\*31] the speed of the target vehicle, distance register means connected between said distance counter means and said divide circuit means, means for transferring the distance information in the distance counter means to the distance register means on a non-destruct basis so as to permit repeated use of the same distance information in subsequent speed computations, compute start means for initiating a speed computation by said divide circuit means, said compute start means being automatically operable in response to four conditions comprising the turning on of said distance switch means, the turning off of said distance switch means, the turning on of said time switch means and the turning off of said time switch means, and speed readout means for visibly displaying the speed as determined by said divide circuit means.

20. The invention of claim 19 where said divide circuit means includes subtractor means which repeatedly subtracts the number of said time pulses from the number of said distance pulses, means for stopping the computation process when the number of remaining distance pulses is reduced to zero or becomes negative, and speed counter means for counting the number of successful [\*\*32] subtractions prior to the stopping of the computation process, said speed counter means being connected with said speed readout means.

21. Apparatus intended to be mounted in one motor vehicle and operated by a driver thereof for measuring the average speed of another motor vehicle or target vehicle being observed by the driver of the one vehicle, the improvement [\*1247] comprising in combination, distance pulse generating means connected to the one vehicle for generating a plurality of electrical distance pulses the number of which is proportional to distance travelled by said one vehicle, said distance pulse generating means being connected mechanically to a mechanical drive component of the one vehicle so as to be driven therefrom an amount proportional to the distance travelled by the one vehicle, manually operable distance switch means, time pulse generating means comprising oscillator means which produces a predetermined number of electrical time pulses per second, manually operable time switch means, binary distance counter means for counting said distance pulses said distance switch means serving to operatively connect said binary distance counter means with said [\*\*33] distance pulse generating means, binary time counter means for counting said time pulses, said oscillator means being connected to said time counter means by said manually operable time switch means whereby said binary time counter means will count said time pulses only when said time switch means is turned on, divide circuit means for dividing the number of distance pulses in said binary distance counter means by the number of time pulses in said binary time counter means whereby the resulting quotient will indicate the speed of target vehicle, said divide circuit means including subtractor means which repeatedly subtracts the number of said time pulses from the number of said distance pulses, means for stopping the computation process when the number of remaining distance pulses is reduced to zero or becomes negative, speed counter means for counting the number of successful subtractions prior to the stopping of the computation process, speed readout means connected to said counter means, distance register means connected between said binary distance counter means and said divide circuit means, means for transferring the distance information in the binary distance counter means [\*\*34] to the distance register means on a nondestruct basis so as to permit repeated use of the same distance information in subsequent speed computations, compute start means for initiating a speed computation by said divide circuit means, said compute start means being automatically operable in response to four conditions comprising the turning off of said distance switch means, the turning off of said distance switch means, the turning on of said time switch means, and the turning off of said time switch means, reset means selectively operable to reset the entire apparatus of to reset all of the time components and readout means without resetting the binary distance counter means, and computer clock means and control counter

**UNITED STATES of America v. George C. DREOS****Crim. No. 23812****UNITED STATES DISTRICT COURT FOR THE DISTRICT OF MARYLAND,  
CRIMINAL DIVISION***156 F. Supp. 200; 1957 U.S. Dist. LEXIS 2760***October 11, 1957****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Plaintiff United States prosecuted defendant for operating a motor vehicle at an excessive speed. Defendant raised the issues of jurisdiction, use of radar equipment, and proof of criminal intent.

**OVERVIEW:** The United States brought an action against defendant for speeding on a parkway on which the United States had concurrent jurisdiction with the state. Defendant raised the issues of jurisdiction, use of radar equipment, and proof of criminal intent. The court dismissed defendant's arguments and held that the United States had proven defendant's guilt beyond a reasonable doubt. The court held that the United States had concurrent jurisdiction and that concurrent jurisdiction was sufficient to justify the enforcement of the law under which defendant was prosecuted. The court found that the United States had shown that the radar equipment had been properly tested and that a competent operator that used proper procedure and kept proper records manned it. The court ruled that criminal intent was not a required element for prosecution under the statute that the United States had applied in his prosecution.

**OUTCOME:** The court dismissed defendant's issues and held that the United States had established guilt beyond a reasonable doubt in the prosecution of defendant for operating a vehicle at excessive rates.

**CORE TERMS:** parkway, federal government, concurrent, radar, concurrent jurisdiction, speed, regulation, condemnation, needful, highway, built, notice, exclusive jurisdiction, acquisition, acquire, criminal jurisdiction, territory, speedometer, ceded, judicial process, condemned, purview, criminal intent, motor vehicle, police power, public use, designated, situated, traffic, arsenal

**LexisNexis(R) Headnotes***Civil Procedure > Jurisdiction > Subject Matter Jurisdiction > General Overview**Civil Rights Law > Section 1983 Actions > Elements > Color of State Law > General Overview*

***Constitutional Law > The Judiciary > Jurisdiction > Concurrent Jurisdiction***

[HN1] 40 U.S.C.S. § 255 reads as follows: Notwithstanding any other provision of law, the obtaining of exclusive jurisdiction in the United States over lands or interests therein which have been or shall hereafter be acquired by it shall not be required; but the head or other authorized officer of any department or independent establishment or agency of the government may, in such cases and at such times as he may deem desirable, accept or secure from the state in which any lands or interests therein under his immediate jurisdiction, custody, or control are situated, consent to or cession of such jurisdiction, exclusive or partial not theretofore obtained, over any such lands or interests as he may deem desirable and indicate acceptance of such jurisdiction on behalf of the United States by filing a notice of such acceptance with the governor of such state or in such other manner as may be prescribed by the laws of the state where such lands are situated. Unless and until the United States has accepted jurisdiction over lands hereafter to be acquired as aforesaid, it shall be conclusively presumed that no such jurisdiction has been accepted.

***Civil Rights Law > Section 1983 Actions > Elements > Color of State Law > General Overview***

[HN2] The court construes the phrase "other needful buildings" as embracing whatever structures are found to be necessary in the performance of the functions of the federal government.

***Civil Rights Law > Section 1983 Actions > Elements > Color of State Law > General Overview***

[HN3] The United States upon land of which it is the proprietor has complete power to exclude all persons therefrom, to issue special permits to certain persons to go thereon, to construct roads and prescribe the manner in which they shall be used, and who shall use them.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN4] The use of radar equipment in determining the speed of a motor vehicle has been approved in a number of cases. The use of this apparatus, like the use of speedmeters, cameras, and x-rays, has now reached such general acceptance by state legislatures, executive departments of state and federal governments, the courts, and the public, that it is no longer necessary for the prosecution to offer expert testimony to explain the theory and operation of the radar equipment, at least where there is a statute similar to art. 35, § 99 of the Maryland Code or a valid regulation such as the one we have in this case. 36 C.F.R. 3.28(d). It is sufficient to show that the equipment has been properly tested and checked, that it was manned by a competent operator, that proper operative procedures were followed, and that proper records were kept.

***Admiralty Law > Practice & Procedure > Jurisdiction******Civil Procedure > Jurisdiction > Personal Jurisdiction & In Rem Actions > In Personam Actions > General Overview******Civil Procedure > Jurisdiction > Subject Matter Jurisdiction > General Overview***

[HN5] 18 U.S.C.S. § 7 provides: Special maritime and territorial jurisdiction of the United States defined. The term 'special maritime and territorial jurisdiction of the United States', as used in this title, includes any lands reserved or acquired for the use of the United States, and under the exclusive or concurrent jurisdiction thereof, or any place purchased or otherwise acquired by the United States by consent of the legislature of the state in which the same shall be, for the erection of a fort, magazine, arsenal, dockyard, or other needful building.

***Civil Procedure > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview***

[HN6] 18 U.S.C.S. § 13 provides: Laws of states adopted for areas within federal jurisdiction. Whoever within or upon any of the places now existing or hereafter reserved or acquired as provided § 7 of this title, is guilty of any act or omission which, although not made punishable by any enactment of Congress, would be punishable if committed or omitted within the jurisdiction of the State, Territory, Possession, or District in which such place is situated, by the laws thereof in force at the time of such act or omission, shall be guilty of a like offense and subject to a like punishment.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN7] Maryland Code, art. 66 1/2, § 176, as in force in August, 1956 provides: No motor vehicle shall be operated upon any highway of this state at a rate of speed greater than fifty miles per hour, or fifty-five miles per hour on dual lane through highways, under any circumstances or conditions. Violation of Paragraph (d) shall be deemed to be a misdemeanor and any person upon conviction shall be fined not less than ten dollars nor more than one hundred dollars.

**COUNSEL:** [\*\*1]

Leon H. A. Pierson, U.S. Atty., and William J. Evans, Asst. U.S. Atty., Baltimore, Md., for plaintiff.

George C. Dreos, pro se.

**JUDGES:**

Before 1943 the Maryland Code contained the three sections quoted below, which were enacted by chap. 743 of the Acts of 1906. They are now codified as secs. 31, 35 and 36 of Art. 96 of the Annotated Code of Maryland, 1951 ed.

**OPINION BY:**

THOMSEN

**OPINION:**

[\*201]

The information in this case charges that: 'On or about the 15th day of August, 1956, in Prince George's County, in the State and District of Maryland, George C. Dreos did, on lands reserved or defined for use of the United States and under the concurrent jurisdiction of the United States and the State of Maryland, to wit, the Baltimore-Washington Parkway, operate a motor vehicle \* \* \* at a rate of speed exceeding fifty-five (55) miles per hour. U.S.C. Title 18, Sections 7(3) and 13, Annotated Code of Maryland, (1951), Art. 66 1/2, Sec. 176.' n1

[\*202] Defendant, a lawyer, raises three issues: (1) jurisdiction, (2) use of radar equipment in determining the speed of the car, and (3) proof of criminal intent.

(1) Defendant states the first issue as follows:

'Whether this Court has [\*\*2] jurisdiction of this case in view of the provision of the U.S. Constitution, to wit: Article I, Section 8, Clause 17, which provides that 'the Federal Government shall exercise exclusive legislation \* \* \* over all places purchased by the consent of the legislature of the state in which the same shall be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings' and Article 4 of the Bill of Rights of the Constitution of Maryland which provides, "That the people of this State have the sole and exclusive right of regulating the internal government and police thereof, as a free sovereign and independent State"?'

He concedes that the Government properly acquired legal title to the land upon which the Washington half of the Baltimore-Washington Parkway was built, over which he is charged with speeding, and concedes that the term 'building' in Art. I, sec. 8, clause 17 includes 'whatever structures are found to be necessary in the performance of the functions of the federal government'. *James v. Dravo Contracting Co.*, 302 U.S. 134, 58 S.Ct. 208, 213, 82 L.Ed. 155. He contends, however, that highway roadbeds are not structures and that the Federal Government [\*\*3] did not acquire either exclusive or concurrent jurisdiction over the land condemned for the construction of the parkway.

Defendant's statement of the issue is too narrow. For the reasons set out below, concurrent legislative jurisdiction in the United States sufficient to justify the enactment and enforcement of the law under which defendant is prosecuted

in this case may be sustained either under Art. I, sec. 8, clause 17, quoted above, or under Art. IV, sec. 3, clause 2 of the Constitution of the United States, which reads as follows:

'The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as to Prejudice any Claims of the United States, or of any particular State.'

The problem of jurisdiction over federal areas within the states is difficult and complicated. It is the subject of a recent two volume report entitled 'Jurisdiction over Federal Areas within the States', prepared by an Interdepartmental Committee and published by the Government Printing Office, vol. 1 in 1956 and vol. 2 in 1957. This report considers at [\*\*4] great length the legislative, administrative and judicial history of the problem over the years, and analyzes the present situation in the several states with respect to land acquired and held by the Federal Government for various purposes. I will not repeat that historical discussion, but will refer only to the Federal and State statutes which affect this case.

[\*203] The Baltimore-Washington Parkway is divided into two roughly equal parts. The Baltimore half was built by the State of Maryland on land owned by the State; the Washington half was built by the Federal Government on land owned by the United States.

The Washington half, comprising a small portion within the District of Columbia and a much larger portion within the territorial boundaries of the State of Maryland, is regarded as an extension of the park system of the District of Columbia and its environs; it was constructed and developed and is administered and maintained by the Secretary of the Interior, through the National Park Service, subject to the provisions of the Act of Congress of Aug. 25, 1916, 39 Stat. 535, 5 U.S.C.A. § 485, the provisions of which were extended over and made applicable to the parkway [\*\*5] by the Act of Aug. 3, 1950, 64 Stat. 400. See also 16 U.S.C.A. §§ 1c, 2, 3, and 40 U.S.C.A. §§ 70 to 74, together with notes and annotations thereto.

The parkway passes through areas acquired by the Federal Government at different times and for different purposes, so the several areas do not have the same legislative jurisdictional status. Portions of the land on which the parkway was built were acquired originally by the War Department (where the road passes through Fort George G. Meade), by the Department of Agriculture (near Beltsville), and by the Resettlement Division (near Greenbelt). The portion on which the offense charged in this case occurred was acquired in 1944 through condemnation proceedings in the United States District Court for the District of Maryland, Civil No. 2272. n2

'31. The consent of the State of Maryland is hereby given in accordance with the seventeenth [\*204] clause, eighth section of the first article of the constitution of the United States, to the acquisition by the United States by purchase, condemnation or otherwise of any land in this State required for sites for custom houses, courthouses, post-offices, arsenals or other public buildings [\*\*6] whatever, or for any other purposes of the government.'

'35. Exclusive jurisdiction in and over any land so acquired by the United States shall be and the same is hereby ceded to the United States for all purposes except the service upon such sites of all civil and criminal process of the courts of this State, but the jurisdiction so ceded shall continue no longer than the said United States shall own such lands.'

'36. The jurisdiction ceded shall not vest until the United States shall have acquired the title to said lands by purchase, condemnation or otherwise; and so long as the said lands shall remain the property of the United States when acquired as aforesaid, and no longer, the same shall be and continue exempt and exonerated from all State, county and municipal taxation, assessment, or other charges which may be levied or imposed under the authority of this state.'

In 1943 the Maryland Legislature passed two acts, chap. 644, now codified as sec. 32 of Art. 96, and chap. 687, now codified as sec. 46. They provide:

'32. The consent of the State of Maryland is hereby given, in accordance with the Seventeenth Clause, Eighth Section of the First Article of the Constitution [\*\*7] of the United States, to the acquisition by the United States by purchase, condemnation, gift or otherwise of any land, rights of way, easements, etc., in this State required or needed by the United States for the construction of a parkway, highway, motorway or freeway between the City of Washington, D.C., and the City of Baltimore, Maryland, the consent hereby given to apply particularly to all parklands acquired or to be acquired in the name of the State of Maryland by the Maryland-National Capital Park and Planning Commission pursuant to the authority of Chapter 448 of the Acts of 1927, as amended. \* \* \*

'46. Notwithstanding anything contained in any of the sections of this Article to the contrary the State of Maryland hereby reserves as to all lands within the State hereafter acquired by the United States or any agency thereof, whether by purchase, lease, condemnation or otherwise, and as to all property, persons and transactions on any such lands, jurisdiction and authority to the fullest extent permitted by the Constitution of the United States and not inconsistent with the Governmental uses, purposes, and functions for which the land was acquired or is used. Nothing in this [\*\*8] section shall be deemed or construed to restrict the jurisdiction and authority of the State over any lands heretofore acquired by the United States, or any agency thereof, or over property, persons or transactions on any such lands.'

Sec. 46 (chap. 687 of the Acts of 1943) was probably inspired (a) by the decision of the Supreme Court in *James v. Dravo Contracting Co.*, 302 U.S. 134, 58 S.Ct. 208, 82 L.Ed. 155, which clearly recognized the possibility of concurrent legislative jurisdiction under Art. 1, sec. 8, cl. 17 of the Constitution, and (b) by the amendments of R.S. 355 effected by the Act of Feb. 1, 1940, 54 Stat. 19, and the Act of Oct. 9, 1940, 54 Stat. 1083, 40 U.S.C.A. § 255. In 1943 and 1944 the relevant portion of what is now [HN1] 40 U.S.C.A. § 255 read as follows:

'Notwithstanding any other provision of law, the obtaining of exclusive jurisdiction in the United States over lands or interests therein which have been or shall hereafter be [\*205] acquired by it shall not be required; but the head or other authorized officer of any department or independent establishment or agency of the Government may, in such cases and at such times as he may deem desirable, accept [\*\*9] or secure from the State in which any lands or interests therein under his immediate jurisdiction, custody, or control are situated, consent to or cession of such jurisdiction, exclusive or partial not theretofore obtained, over any such lands or interests as he may deem desirable and indicate acceptance of such jurisdiction on behalf of the United States by filing a notice of such acceptance with the Governor of such State or in such other manner as may be prescribed by the laws of the State where such lands are situated. Unless and until the United States has accepted jurisdiction over lands hereafter to be acquired as aforesaid, it shall be conclusively presumed that no such jurisdiction has been accepted.'

Pursuant to those statutes, on November 3, 1953, the Assistant Secretary of the Interior, on behalf of the United States, accepted concurrent jurisdiction over the Federal half of the Washington-Baltimore Parkway by filing a notice of such acceptance with the Governor of Maryland. n3

A. Jurisdiction under Art. 1, sec. 8, cl. 17. Defendant argues in effect that since the United States Constitution has now been held not to require the acquisition by the United States of any [\*\*10] jurisdiction in lands purchased by it with the consent of the Legislature of the State, the Maryland Act of 1943, ch. 687, quoted above, indicates that it was the intent of the Maryland Legislature to retain full jurisdiction in the State, and that the United States can acquire only a proprietary interest over lands in Maryland. On the other hand, the Government notes that before the passage of the Act of 1943 the State had frequently ceded exclusive jurisdiction to the United States, and argues that by the passage of the Act of 1943 the Legislature only intended to reserve concurrent jurisdiction to the State, and now offers to cede concurrent jurisdiction to the United States, to be accepted or rejected by the United States in accordance with 40 U.S.C.A. § 255.

The Government's contention is supported not only (1) by the notice of November 3, 1953, set out in note 3 above, but also (2) by an opinion of the Attorney General of Maryland dated July 8, 1955, unreported, n4 and (3) by [\*\*206] the report of the Interdepartmental Committee for the Study of Jurisdiction of Federal Areas within the States, which found, vol. 1, p. 98, note 2, that a part of the Federal half of the [\*\*11] Baltimore-Washington Parkway located within

the territorial boundaries of the State of Maryland is under the exclusive criminal jurisdiction of the United States, and a part under concurrent criminal jurisdiction.

Construing the phrase 'other needful buildings' in Art. 1, sec. 8, cl. 17, the Supreme Court, in *James v. Dravo Contracting Company*, said: [HN2] 'We construe the phrase 'other needful buildings' as embracing whatever structures are found to be necessary in the performance of the functions of the federal government.' 302 U.S. at page 143, 58 S.Ct. at page 213. That case dealt with land acquired by the United States for locks and dams. No case involving land acquired for the construction of a road has been cited or found, but an aqueduct carrying water to the *District of Columbia*, *Reddall v. Bryan*, 14 Md. 444, 478, appeal dismissed 24 How. 420, national cemeteries, *Wills v. State*, 50 Tenn. 141; steamship piers, *United States v. Mayor and Council of City of Hoboken, D.C.*, 29 F.2d 932; aeroplane stations, *United States v. City of Buffalo*, 2 Cir., 54 F.2d 471, certiorari denied 285 U.S. 550, 52 S.Ct. 406, 76 L.Ed. 940, have been held to be within the purview of Art. 1, sec. 8, cl. [\*\*12] 17. I hold that the land condemned for the construction of the parkway comes within the purview of Art. 1, sec. 8, cl. 17.

I also agree with the Attorney General of Maryland that the United States acquired concurrent legislative jurisdiction over the lands condemned in 1944 in Civil Action #2272 in this Court. It is not necessary in this case to determine whether the jurisdiction of the United States over other parts of the parkway, built on land acquired before 1940, is exclusive or concurrent. I agree with the Attorney General of Maryland that the Federal Government has at least concurrent criminal jurisdiction over all of that portion of the parkway built on lands owned by the United States however acquired.

Defendant contends that the police power of a state cannot be delegated to a private person, that the Federal Government stands in that category in this instance, and that the State Legislature cannot alienate, surrender, or abridge the right to exercise the police power of the State by any grant, contract, or delegation. This argument is answered by the fact that the Federal Government acquired the lands in question for a valid public use, within the purview of Art. [\*\*13] 1, sec. 8, cl. 17 of the Constitution of the United States, which takes precedence over any state constitution or statute. The grant of concurrent legislative jurisdiction to the Federal Government by the Maryland [\*207] Legislature does not violate Art. 4 of the Declaration of Rights of the Constitution of Maryland. It preserves to the people of the State the right to exercise full civil and criminal jurisdiction over the land, consistent with the governmental purposes for which the property was acquired by the United States. The governmental purpose of maintaining a parkway carries with it the power to regulate traffic on that parkway.

B. Jurisdiction under Art. 4, sec. 3, cl. 2. The power to make and enforce the necessary rules and regulations for the management of federal property need not depend, constitutionally, on the acquisition by the Federal Government of legislative jurisdiction under Art. 1, sec. 8, cl. 17. Art. 4, sec. 3, cl. 2, provides: 'The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as [\*\*14] to Prejudice any Claims of the United States, or of any particular State.'

In *Robbins v. United States*, 8 Cir., 284 F. 39, at page 45, the court said: '\* \* \* we are of the opinion that the power of the government to regulate the traffic on those highways, as it has done by congressional enactment and rules thereby authorized, rests on the secure footing that it is a valid exercise of control over the property of the government, even though it is of the nature of police power, and that it is sustained by section 3, art. 4, of the federal Constitution, which entitles the government to make all needful regulations respecting its territory and property.'

In *King v. Edward Hines Lumber Co., D.C.D.Ore.* 68 F.Supp. 1019, 1022, the court held: [HN3] 'The United States upon land of which it is the proprietor has complete power to exclude all persons therefrom, to issue special permits to certain persons to go thereon, to construct roads and prescribe the manner in which they shall be used, and who shall use them.'

As we have seen, the Federal half of the Baltimore-Washington Parkway is a part of the National Park System. 39

Stat. 535, 64 Stat. 400; 16 U.S.C.A. §§ 1c, 2, 3. Congress therefore [\*\*15] has the power to regulate the use of the parkway or to delegate that authority to the executive branch. The Assimilative Crimes Act, 18 U.S.C.A. § 13, is valid and applicable in this case.

(2) Defendant's second issue is 'whether, as a matter of law, the standards used by the police on the day and date in question were sufficiently definite to establish guilt beyond a reasonable doubt'. He questions 'the reliability of the radar instruments that were being used, and the qualifications of the police personnel using it'. The facts on this point are as follows:

On August 15, 1956, at 8:52 a.m., defendant was operating his automobile in the northbound lane of the Baltimore-Washington Parkway, near the Laurel-Bowie interchange in Prince George's County, Maryland. Beside a straight level stretch of that lane, Officer Andrus, of the United States Park Police, had set up his radar transmitter-receiver apparatus about 3 feet from the pavement facing the oncoming traffic at an angle of 10 to 15 degrees. Officer Andrus was sitting in an automobile parked about 60 feet away with the speedometer and recording graph in the car and with a good view of traffic on the road. He had been adequately [\*\*16] trained in the operation of this radar equipment. He had tested the accuracy of the equipment immediately after he set it up in that location, and tested it again before he removed it, about two hours later, with satisfactory results both times. An electrical engineer at the Aeronca Research Laboratories, which makes periodic calibration checks of radar devices for the State of Maryland and the Commonwealth of Virginia, as well as for the United States Park Police, had checked the equipment on December 13, 1955. He checked the transmitter-receiver and [\*208] speedometer again on September 15, 1956. On both occasions the equipment was recording accurately, with less than 1% of error at any speed.

On the morning of August 15, 1956, Officer Hawkins, operating the catch car, was stationed about 300 yards north of Officer Andrus. The police cars were in radio communication with each other. When defendant's automobile passed through the radar beam, the speedometer and the chart registered a speed of 66 m.p.h. Officer Andrus noted the speed and the license number, called to Officer Hawkins to stop the car with that number and charge the driver with speeding, followed defendant's [\*\*17] car with his eye until it was stopped, and wrote the speed and the license number on the chart. Officer Hawkins obtained defendant's name, address, etc., and gave him a notice of traffic violation. He identified defendant in court. The posted speed on the highway at that point was 55 m.p.h., the maximum permitted by the Maryland statute at that time. Signs reading 'Speed Checked by Radar' were also posted along the Parkway, as required by sec. 3.28(d) of the National Capital Parks Regulations, 36 C.F.R. 3.28(d), 20 F.R. 8637, November 15, 1955. See also Maryland Code, Art. 35, sec. 99. One such sign was located well within the four mile limit.

Dr. John M. Kopper of the Johns Hopkins University, a recognized authority in the field of electronics, who has testified in radar cases in several states, explained the theory and operation of the radar device and showed that properly checked and set up such equipment records speed accurately, with any deviation tending to record a lower than actual speed.

Defendant cross-examined all the government witnesses but offered no evidence himself.

[HN4] The use of radar equipment in determining the speed of a motor vehicle has been approved in [\*\*18] a number of cases; e.g. *Dooley v. Commonwealth*, 198 Va. 32, 92 S.E.2d 348, appeal dismissed 354 U.S. 915, 77 S.Ct. 1377, 1 L.Ed.2d 1432; *State v. Dantonio*, 18 N.J. 570, 115 A.2d 35, 39, 40, 49 A.L.R.2d 460. See also 16 Md.L.Rev. 1, 17; 33 N.C.L.Rev. 343.

The use of this apparatus, like the use of speedometers, cameras, and x-rays, has now reached such general acceptance by state legislatures, executive departments of state and federal governments, the courts, and the public, that it is no longer necessary for the prosecution to offer expert testimony, as it did in this case, to explain the theory and operation of the radar equipment, at least where there is a statute similar to Art. 35, sec. 99 of the Maryland Code or a valid regulation such as the one we have in this case, 36 C.F.R. 3.28(d). It is sufficient to show that the equipment has been properly tested and checked, that it was manned by a competent operator, that proper operative procedures were

followed, and that proper records were kept.

The evidence in the instant case shows that all of these requirements were complied with. It also shows beyond a reasonable doubt that defendant was driving at least 65 m.p.h. where [\*\*19] the maximum speed permitted was 55 m.p.h.

(3) Defendant's third issue -- that the government failed to prove criminal intent on his part to violate the statute -- is frivolous. It is similar to the plea of Ko-Ko in the ever popular operetta, n5 and the Mikado's denial of that plea is in accord with Wharton's Criminal Law, 12th ed., Vol. 1, sec. 143, and other American authorities. The statute involved in the instant case does not require proof of any criminal intent.

Defendant's guilt has been established beyond a reasonable doubt.

n1. Title [HN5] *18 U.S.C. § 7*: 'Special maritime and territorial jurisdiction of the United States defined. The term 'special maritime and territorial jurisdiction of the United States', as used in this title, includes: \* \* \* (3) Any lands reserved or acquired for the use of the United States, and under the exclusive or concurrent jurisdiction thereof, or any place purchased or otherwise acquired by the United States by consent of the legislature of the State in which the same shall be, for the erection of a fort, magazine, arsenal, dockyard, or other needful building.'

Title [HN6] *18 U.S.C. § 13*: 'Laws of states adopted for areas within federal jurisdiction. Whoever within or upon any of the places now existing or hereafter reserved or acquired as provided in section 7 of this title, is guilty of any act or omission which, although not made punishable by any enactment of Congress, would be punishable if committed or omitted within the jurisdiction of the State, Territory, Possession, or District in which such place is situated, by the laws thereof in force at the time of such act or omission, shall be guilty of a like offense and subject to a like punishment.'

[HN7] Maryland Code, Art. 66 1/2, sec. 176, as in force in August, 1956: '(Speed Restrictions.) \* \* \* (d) No motor vehicle shall be operated upon any highway of this State at a rate of speed greater than fifty miles per hour, or fifty-five miles per hour on dual lane through highways, under any circumstances or conditions. \* \* \* (f) (Penalties.) \* \* \* Violation of Paragraph (d) shall be deemed to be a misdemeanor and any person upon conviction shall be fined not less than Ten (\$ 10.00) Dollars nor more than One Hundred (\$ 100.00) Dollars.'

[\*\*20]

n2. The petition for condemnation alleged:

'1. That under and by virtue of the provisions of the National Recovery Act, approved June 16, 1933 (48 Stat. 195), the Fourth Deficiency Act, Fiscal Year 1933, approved June 16, 1933 (48 Stat. 274, *43 U.S.C.A. § 256a*); the Emergency Appropriation Act, Fiscal Year 1935, approved June 19, 1934 (48 Stat. 1055); the Act of August 1, 1888, 25 Stat. 357 (U.S.C. Title 40, Sec. 257); The Act of February 26, 1931, 46 Stat. 1421 (U.S.C. Title 40, Secs. 258a to 258(e)); and the Reorganization Act of 1939, 53 Stat. 561, in accordance with the provisions of which Plan Numbered I was submitted to the Congress on April 25, 1939, and was made effective on July 1, 1939, by Joint Resolution of June 7, 1939 (Public Resolution No. 20 -- 76th Congress); and all other acts or parts of acts supplementary to or amendatory of the said acts, the Administrator of the Federal Works Agency is authorized to acquire on behalf of the United States of America by condemnation under judicial process such lands or interest therein in the State of Maryland as may be necessary in his discretion for military purposes and for other public uses; \* \* \*

'2. That under the authority in him vested by the said Acts of Congress, the Administrator of the Federal

Works Agency has found and determined that it is necessary and advantageous to the interests of the United States of America to acquire the hereinafter described lands for the said public use by condemnation under judicial process, and the Administrator of the Federal Works Agency has selected and designated the hereinafter described lands for use in the construction, repair and improvement of a public highway and parkways in the State of Maryland designated as the Washington-Baltimore Parkway in Prince George's and Anne Arundel Counties, Maryland, and for other public uses. \* \* \*'

The declaration of taking stated that 'the public use for which said lands are taken is to provide for the construction of a public highway and parkways for a project designated as the Washington-Baltimore Parkway'. The judgment on the declaration of taking, entered by Judge Chesnut, found 'that the United States of America is entitled to acquire property by condemnation under judicial process for the purposes set forth and prayed in said petition'.

[\*\*21]

n3. The relevant portions of the notice are as follows: 'The Department of the Interior, under authority of the act of Congress approved August 3, 1950 (64 Stat. 400), has jurisdiction over land acquired for the Baltimore-Washington Parkway through acquisition, or by transfer from other Federal agencies, as provided in the aforementioned act. \* \* \* The laws of the State of Maryland (Sections 28, 32 and 46, Article 96, Maryland Code, Annotated, 1951) permit the assumption of concurrent Federal jurisdiction over lands within the State acquired by the United States for public purposes. \* \* \* Accordingly, notice is hereby given that the United States accepts concurrent jurisdiction in respect of all lands which have been acquired by the Federal Government for the Baltimore-Washington Parkway within the State of Maryland. It is understood that the United States has exclusive jurisdiction over that portion of the Parkway which occupies lands within the Fort Meade Military Reservation.'

n4. After discussing the relevant statutes and cases, Attorney General Sybert concluded: 'It is our opinion that exclusive jurisdiction of the lands in the Parkway acquired by the Department of Interior from the Federal agencies was and still is in the Federal Government. Jurisdiction over the other lands specifically acquired for the Parkway by the United States from the State of Maryland and from citizens of the State who owned them, in view of the express intention that concurrent rather than exclusive jurisdiction be taken by the United States, is in both the United States and the State of Maryland. We realize that the effect of what has been said is that on the Federal portion of the parkway, areas where Federal jurisdiction is exclusive will be interspersed with areas where the State has jurisdiction concurrent with the Federal Government. We point out, however, that as to the entire Federal portion of the Parkway, Federal jurisdiction will be clear, so that no hazard to the public safety will result. The proper delineation of areas of concurrent State authority will doubtless pose substantial problems in the administration of State law, but in view of the situation, and in the absence of any specific action by the United States to revest concurrent jurisdiction in the State of Maryland, we are obliged to recognize and apply the law as we understand it. The State of Maryland may exercise full criminal and civil jurisdiction over the lands over which it has concurrent jurisdiction with the United States, provided it does not interfere with the purpose and functions of the *Federal Government*. *Atkinson v. State Tax Commission of Oregon*, 303 U.S. 20, 58 S.Ct. 419, 82 L.Ed. 621. \* \* \* If the Maryland laws and regulations conflict with the Federal laws and regulations, then the Maryland laws and regulations must give way to the Federal laws and regulations. The courts of Maryland, of course, do not have jurisdiction of crimes which are violations of the Federal law, but one act may be an offense against the law of both the State and the Federal Government, and in such case the courts of both have jurisdiction over the offense. *Saxton v. People of State of California*, 189 U.S. 319, 23 S.Ct. 543, 47 L.Ed. 833.'

[\*\*22]

n5. Gilbert & Sullivan, *The Mikado*, Act 2.

Analysis

As of: Jan 31, 2007

**STEPHEN C. COLLIER, Appellant, v. MUNICIPALITY OF ANCHORAGE,  
Appellee.**

**Court of Appeals No. A-9404, No. 2054**

**COURT OF APPEALS OF ALASKA**

*138 P.3d 719; 2006 Alas. App. LEXIS 112*

**July 14, 2006, Decided**

**NOTICE:** [\*1] THIS OPINION IS SUBJECT TO CORRECTION BEFORE PUBLICATION IN THE PACIFIC REPORTER. READERS ARE REQUESTED TO BRING ERRORS TO THE ATTENTION OF THE CLERK OF THE APPELLATE COURTS.

**SUBSEQUENT HISTORY:** Rehearing denied by *Collier v. Municipality of Anchorage, 2006 Alas. App. LEXIS 131 (Alaska Ct. App., July 28, 2006)*

**PRIOR HISTORY:** Appeal from the District Court, Third Judicial District, Anchorage, Suzanne Cole, Magistrate. Trial Court No. 3AN-05-10882 MO.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was convicted, before the District Court, Third Judicial District, Anchorage, Alaska, of speeding. Defendant appealed.

**OVERVIEW:** Defendant was clocked doing 78 miles per hour in a 65 mile per hour zone, in violation of Anchorage, Alaska, Municipal Code 09.26.030(C). On appeal, he contended that the officer improperly obtained evidence against him, which was his driver's license and proof of registration and insurance, after he invoked his Fifth Amendment right to the assistance of counsel. He also argued that he was denied necessary discovery at trial. And, finally, he argued that Alaska R. Crim. P. 16(a) was unconstitutional. The appellate court first noted that there was no Fifth Amendment right to counsel in this instance because there was no evidence that this was anything but a routine traffic stop. There was no Sixth Amendment right to counsel because criminal proceeding had not yet commenced. In addition, defendant's right against self-incrimination was not violated when the officer asked for defendant's driver's license. As to the discovery issue, defendant claimed that all the information he requested should have been disclosed; however, the magistrate had the discretion to limit to discovery which was relevant. Defendant received all relevant discovery.

**OUTCOME:** Defendant's conviction was affirmed.

**CORE TERMS:** discovery, license, Criminal Rule, driver's, right to counsel, traffic stop, self-incrimination, speeding,

prosecutor, laser, registration, recording, dispatch, custody, certificate, miles, assistance of counsel, disclosure, effective law enforcement, adversary system, items requested, obligatory, compulsory, chartering, demanded, training, motorists, traffic, ticket, video

*Criminal Law & Procedure > Interrogation > Miranda Rights > General Overview*  
*Criminal Law & Procedure > Interrogation > Miranda Rights > Right to Counsel During Questioning*  
 [HN1] The right to counsel under the Fifth Amendment only arises during custodial interrogation.

*Constitutional Law > Bill of Rights > Fundamental Rights > Criminal Process > Assistance of Counsel*  
*Criminal Law & Procedure > Interrogation > Miranda Rights > Right to Counsel During Questioning*  
*Criminal Law & Procedure > Counsel > General Overview*  
*Criminal Law & Procedure > Counsel > Right to Counsel > General Overview*  
 [HN2] The Sixth Amendment right to counsel attaches only upon the commencement of adversary criminal proceedings, not during purely investigative stages of a case.

*Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Self-Incrimination Privilege*  
*Criminal Law & Procedure > Interrogation > Miranda Rights > Self-Incrimination Privilege*  
 [HN3] The Fifth Amendment of the United States Constitution and Alaska Const. art. 1, § 9 provide that no person shall be compelled in any criminal proceeding to be a witness against himself.

*Transportation Law > Private Motor Vehicles > Operator Licenses*  
 [HN4] Alaska law requires motorists to have in their possession a valid driver's license and to present that license for inspection upon demand by a peace officer.

*Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Self-Incrimination Privilege*  
*Criminal Law & Procedure > Interrogation > Miranda Rights > Self-Incrimination Privilege*  
*Governments > State & Territorial Governments > Licenses*  
*Transportation Law > Private Motor Vehicles > Operator Licenses*  
 [HN5] The Fifth Amendment privilege against compulsory self-incrimination does not extend to the requirement that motorists produce a driver's license--and thereby identify themselves for purposes of prosecution.

*Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > General Overview*  
 [HN6] Alaska R. Crim. P. 16(a) mandates that discovery prior to trial shall be as full and free as possible consistent with protection of persons, effective law enforcement, and the adversary system. Alaska R. Crim. P. 16(b)(1)(A) requires the prosecuting attorney to disclose the names, addresses, and statements of persons known by the government to have knowledge of relevant facts, written or recorded statements made by the accused or a co-defendant, documents or objects obtained from the accused or intended to be used at trial, and records of prior convictions of the defendant and any witnesses the prosecutor intends to call. Alaska R. Crim. P. 16(b)(3) requires the prosecution to disclose material or information within its possession or control that tends to negate the guilt or reduce the punishment of the accused. Alaska R. Crim. P. 16(b)(7) allows the court in its discretion to require disclosure of other relevant material and

information. And, finally, Alaska R. Crim. P. 16(b)(8) states that the prosecution is not required to disclose legal research or attorney work product.

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > General Overview***

***Criminal Law & Procedure > Trials > Judicial Discretion***

[HN7] A magistrate has discretion under Alaska R. Crim. P. 16(b)(7) to order the disclosure of relevant material and information.

**COUNSEL:** Stephen C. Collier, Pro se, Anchorage.

Rachel Plumlee, Assistant Municipal Prosecutor, and Frederick H. Boness, Municipal Attorney, Anchorage, for the Appellee.

**JUDGES:** Before: Coats, Chief Judge, and Mannheimer and Stewart, Judges.

**OPINION BY:** STEWART

**OPINION:**

STEWART, Judge.

Stephen C. Collier was convicted of speeding. n1 On appeal, he contends that the officer improperly obtained evidence against him -- his driver's license and proof of registration and insurance -- after he invoked his *Fifth Amendment* right to the assistance of counsel. He also argues that he was denied necessary discovery at trial. And, finally, he argues that Alaska Criminal Rule 16(a) is unconstitutional. We affirm.

n1 Anchorage Municipal Code (AMC) 09.26.030(C).

[\*2]

*Facts and proceedings*

On May 12, 2005, Anchorage Police Officer James Conley stopped Collier on the Glenn Highway near the South Birchwood exit for driving seventy-eight miles per hour in a sixty-five mile-per-hour zone. Officer Conley cited Collier under Anchorage Municipal Code 09.26.030(C) for speeding.

On June 1, 2005, Collier filed an eleven-page discovery request, seeking information on the creation of the courts, the chartering of Anchorage, "the true name of the 'government' accuser," IRS documents, and police operating procedures. On July 26, 2005, the court granted the motion in part, noting that the city is responsible for providing discovery materials to Collier, "e.g., officer's notes of traffic stop."

At the trial on August 29, 2005, the Municipality stated that it had provided Collier with the following discovery:

copies of the ticket, the certificate of calibration for the radar instrument the officer used, Officer Conley's certificate of training for laser speed detection, and a compact disk with the video recording of the traffic stop ... . The only thing left that we could find to be discovered to the defendant is the recording of ... the police [\*3] dispatch calls. Sent defendant the notice that is available.

Collier said he did not request or want the dispatch communications. The court then reviewed the remaining discovery requests and found that "none of the other items requested are either relevant, within the agency and control of the

prosecutor's office, nor required as obligatory discovery under Rule 16."

In its case in chief, the Municipality called Officer Conley, who testified that on the morning of May 12, 2005, he was parked on the Glenn Highway watching traffic. He saw a white General Communication, Inc. van traveling at what appeared to be eighty miles per hour. His laser indicated that the van was actually going seventy-eight miles per hour. He pulled the van over for speeding. Collier produced his driver's license and told the officer that he thought he was going seventy to seventy-two miles per hour. Collier apparently then asked if he was under arrest and demanded an attorney. At trial, Collier argued that he was denied discovery and that Officer Conley illegally asked for his driver's license and proof of registration and insurance after he had requested an attorney. The court held that the Municipality [\*4] had provided all relevant discovery and that Collier did not have a right to counsel because he was "neither being interrogated, nor was he in custody." The court found Collier guilty of violating AMC 09.26.030. This appeal followed.

#### *Discussion*

*Collier's claim that his right to counsel and privilege against self-incrimination were violated during the traffic stop*

Collier claims that the traffic stop was a "constitutional seizure" that entitled him to invoke his *Fifth Amendment* right to assistance of counsel. He asserts that, after he told the police he was invoking his right to counsel, the police could not require him to produce his driver's license until his counsel arrived on the scene. n2

n2 Collier also claims that his rights to counsel and his privilege against self-incrimination were violated when the officers demanded his registration and proof of insurance. We have not addressed this claim because we do not see how proof of registration or insurance could be used against Collier as evidence of speeding.

[\*5]

We find no merit to this claim. [HN1] The right to counsel under the *Fifth Amendment* only arises during custodial interrogation, and Collier concedes he was not in custody for purposes of *Miranda v. Arizona*. n3 We agree that Collier was not in *Miranda* custody. Routine traffic stops generally do not constitute *Miranda* custody and thus do not trigger the right to counsel. n4 Here, Officer Conley stopped Collier, asked for his license and proof of registration and insurance, and then cited him for speeding. There is no evidence that this was anything other than a routine traffic stop. Because Collier was not in custody, Officer Conley did not violate Collier's *Fifth Amendment* right to counsel when he asked for Collier's driver's license. n5

n3 *See Miranda v. Arizona*, 384 U.S. 436, 444, 86 S. Ct. 1602, 1612, 16 L. Ed. 2d 694 (1966); *see also Berkemer v. McCarty*, 468 U.S. 420, 439-43, 104 S. Ct. 3138, 3150-52, 82 L. Ed. 2d 317 (1984); *Clark v. Anchorage*, 112 P.3d 676, 678-79 & n.4 (Alaska App. 2005).

n4 *Berkemer*, 468 U.S. at 439-43, 104 S. Ct. at 3150-52; *Blake v. State*, 763 P.2d 511, 515 (Alaska App. 1988).

[\*6]

n5 *See id.*

To the extent that Collier may be asserting that his *Sixth Amendment* right to assistance of counsel was violated, we recognized in *Thiel v. State* n6 that [HN2] the *Sixth Amendment* right to counsel attaches "only upon the commencement

of adversary criminal proceedings," not during "purely investigative stages of a case." n7 When Officer Conley stopped Collier for speeding, adversary criminal proceedings had not commenced. Accordingly, Officer Conley did not violate Collier's *Sixth Amendment* right to an attorney.

n6 762 P.2d 478 (Alaska App. 1988).

n7 *Id.* at 481 (citing *Moran v. Burbine*, 475 U.S. 412, 429-30, 106 S. Ct. 1135, 1145-46, 89 L. Ed. 2d 410 (1986); *Maine v. Moulton*, 474 U.S. 159, 170, 106 S. Ct. 477, 484, 88 L. Ed. 2d 481 (1985); *Kirby v. Illinois*, 406 U.S. 682, 688, 92 S. Ct. 1877, 1881, 32 L. Ed. 2d 411 (1972)).

[\*7]

Finally, Collier appears to claim that Officer Conley violated his privilege against self-incrimination by demanding his driver's license. [HN3] The *Fifth Amendment of the United States Constitution* and *article 1, section 9 of the Alaska Constitution* provide that no person shall be compelled in any criminal proceeding to be a witness against himself.

[HN4] Alaska law requires motorists to have in their possession a valid driver's license and to present that license for inspection upon demand by a peace officer. n8 Collier argues that requiring him to present his license violated his privilege against compulsory self-incrimination because it identified him for the purpose of prosecution.

n8 AS 28.15.011(b); AS 28.15.131.

In *Byers v. California*, n9 the United States Supreme Court addressed the closely related issue of whether it violates the privilege against compulsory self-incrimination to require motorists to produce identification at the scene of an accident. [\*8] n10 The Court noted that "[e]ven if we were to view the statutory reporting requirement as incriminating in the traditional sense, in our view it would be the 'extravagant' extension of the privilege Justice Holmes warned against to hold that it is testimonial in the *Fifth Amendment* sense." n11 The disclosure of the driver's name and address is "an essentially neutral act" and "[w]hatever the collateral consequences ... the statutory purpose is to implement the state police power to regulate use of motor vehicles." n12 Moreover, "[a] name, linked with a motor vehicle, is no more incriminating than the tax return, linked with the disclosure of income ... . It identifies but does not by itself implicate anyone in criminal conduct." n13

N9 402 U.S. 424, 91 S. Ct. 1535, 29 L. Ed. 2d 9 (1971).

n10 *Id.* at 427, 91 S. Ct. at 1537.

n11 *Id.* at 431, 91 S. Ct. at 1539.

n12 *Id.* at 432, 91 S. Ct. at 1540.

n13 *Id.* at 433-34, 91 S. Ct. at 1540.

[\*9]

We have also held that [HN5] the Fifth Amendment privilege against compulsory self-incrimination does not extend to the requirement that motorists produce a driver's license -- and thereby identify themselves for purposes of prosecution. n14 Officer Conley, therefore, did not violate Collier's privilege against self-incrimination when he demanded that Collier produce his driver's license.

n14 *Winterrowd v. State*, 139 P.3d 590, 2006 Alas. App. LEXIS 97, P.2d , Alaska App. Opinion No. 2050 (June 23, 2006).

*Collier's request for additional discovery*

On June 1, 2005, Collier filed an eleven-page discovery request, seeking information on the creation of the courts, the chartering of Anchorage, "the true name of the 'government' accuser," IRS documents, and police operating procedures. The Municipality provided Collier with a copy of the ticket, the certification of the laser used in this case, Officer Conley's training certificate for operating the laser, and the video recording of the traffic stop. The prosecutor [\*10] also offered to provide Collier with the recording of the radio traffic between the officer and dispatch, but Collier said he did not want the dispatch communications. Magistrate Cole found that "none of the other items requested are either relevant, within the agency and control of the prosecutor's office, nor required as obligatory discovery under Rule 16."

Collier argues that all the information he requested should have been disclosed because it would have had a direct bearing on the trial. We overturn discovery orders only for abuse of discretion. n15

n15 See *R.E. v. State*, 878 P.2d 1341, 1345 (Alaska 1994); *Linne v. State*, 674 P.2d 1345, 1354-55 (Alaska App. 1983).

Several sections of Criminal Rule 16 are relevant to this appeal. [HN6] Criminal Rule 16(a) mandates that "discovery prior to trial shall be as full and free as possible consistent with protection of persons, effective law enforcement, and the adversary system." Criminal Rule 16(b)(1)(A) requires the prosecuting attorney [\*11] to disclose the names, addresses, and statements of persons known by the government to have knowledge of relevant facts, written or recorded statements made by the accused or a co-defendant, documents or objects obtained from the accused or intended to be used at trial, and records of prior convictions of the defendant and any witnesses the prosecutor intends to call. Criminal Rule 16(b)(3) requires the prosecution to disclose material or information within its possession or control that tends to negate the guilt or reduce the punishment of the accused. Criminal Rule 16(b)(7) allows the court in its discretion to require disclosure of other relevant material and information. And, finally, Criminal Rule 16(b)(8) states that the prosecution is not required to disclose legal research or attorney work product. None of these sections requires the prosecution to disclose information on the creation of the courts, the chartering of Anchorage, or any of the other documents Collier requested.

[HN7] Magistrate Cole had discretion under Criminal Rule 16(b)(7) to order the disclosure of "other relevant material and information." But she correctly found that "none of the other items requested are either [\*12] relevant, within the agency and control of the prosecutor's office, nor required as obligatory discovery under Rule 16." The only relevant information within the Municipality's control (the ticket, the laser certification, Officer Conley's training certificate for operating the laser, the video recording of the traffic stop, and the dispatch communications) was provided or made available to Collier. The rest was either nonexistent, irrelevant, or publicly available. None had a tendency to negate his guilt. n16 Magistrate Cole therefore did not abuse her discretion in refusing to order additional discovery. n17

n16 See *Scott v. State*, 519 P.2d 774, 778 (Alaska 1974).

n17 See *R.E.*, 878 P.2d at 1345; *Linne*, 674 P.2d at 1354-55.

*Collier's claim that Criminal Rule 16 is unconstitutional*

In passing, Collier argues that Criminal Rule 16 is unconstitutional. His entire argument, raised only in his conclusion, is as follows:

[T]his court should hold [\*13] that Criminal Rule 16(a) is unconstitutional, as the withholding of any inculpatory or exculpatory evidence material from the Accused must be disclosed and under no circumstance can evidence be withheld to protect persons (the State of Alaska), protect effective law enforcement (Alaska State Troopers, Anchorage Police Department and other Police Departments and Police) and the adversary system (Judges, Attorneys, Prosecutors and other court personnel) or any other entity.

Collier appears to be arguing that Criminal Rule 16(a) unconstitutionally limits discovery by providing that discovery should be as full and free as possible "consistent with protection of persons, effective law enforcement, and the adversary system." But he does not cite any legal authority for this position. He also does not show how he was prejudiced. As noted above, Collier received all relevant discovery. n18

n18 *See Adamson v. Univ. of Alaska*, 819 P.2d 886, 889 n.3 (Alaska 1991).

#### *Conclusion*

Collier's [\*14] conviction is AFFIRMED.

Analysis

As of: Jan 31, 2007

**STEPHEN C. COLLIER, Appellant, v. MUNICIPALITY OF ANCHORAGE,  
Appellee.**

**Court of Appeals No. A-9404, No. 2054**

**COURT OF APPEALS OF ALASKA**

*138 P.3d 719; 2006 Alas. App. LEXIS 112*

**July 14, 2006, Decided**

**NOTICE:** [\*1] THIS OPINION IS SUBJECT TO CORRECTION BEFORE PUBLICATION IN THE PACIFIC REPORTER. READERS ARE REQUESTED TO BRING ERRORS TO THE ATTENTION OF THE CLERK OF THE APPELLATE COURTS.

**SUBSEQUENT HISTORY:** Rehearing denied by *Collier v. Municipality of Anchorage, 2006 Alas. App. LEXIS 131 (Alaska Ct. App., July 28, 2006)*

**PRIOR HISTORY:** Appeal from the District Court, Third Judicial District, Anchorage, Suzanne Cole, Magistrate. Trial Court No. 3AN-05-10882 MO.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was convicted, before the District Court, Third Judicial District, Anchorage, Alaska, of speeding. Defendant appealed.

**OVERVIEW:** Defendant was clocked doing 78 miles per hour in a 65 mile per hour zone, in violation of Anchorage, Alaska, Municipal Code 09.26.030(C). On appeal, he contended that the officer improperly obtained evidence against him, which was his driver's license and proof of registration and insurance, after he invoked his Fifth Amendment right to the assistance of counsel. He also argued that he was denied necessary discovery at trial. And, finally, he argued that Alaska R. Crim. P. 16(a) was unconstitutional. The appellate court first noted that there was no Fifth Amendment right to counsel in this instance because there was no evidence that this was anything but a routine traffic stop. There was no Sixth Amendment right to counsel because criminal proceeding had not yet commenced. In addition, defendant's right against self-incrimination was not violated when the officer asked for defendant's driver's license. As to the discovery issue, defendant claimed that all the information he requested should have been disclosed; however, the magistrate had the discretion to limit to discovery which was relevant. Defendant received all relevant discovery.

**OUTCOME:** Defendant's conviction was affirmed.

**CORE TERMS:** discovery, license, Criminal Rule, driver's, right to counsel, traffic stop, self-incrimination, speeding,

prosecutor, laser, registration, recording, dispatch, custody, certificate, miles, assistance of counsel, disclosure, effective law enforcement, adversary system, items requested, obligatory, compulsory, chartering, demanded, training, motorists, traffic, ticket, video

**OPINION:**

STEWART, Judge.

Stephen C. Collier was convicted of speeding. n1 On appeal, he contends that the officer improperly obtained evidence against him -- his driver's license and proof of registration and insurance -- after he invoked his *Fifth Amendment* right to the assistance of counsel. He also argues that he was denied necessary discovery at trial. And, finally, he argues that Alaska Criminal Rule 16(a) is unconstitutional. We affirm.

n1 Anchorage Municipal Code (AMC) 09.26.030(C).

[\*2]

*Facts and proceedings*

On May 12, 2005, Anchorage Police Officer James Conley stopped Collier on the Glenn Highway near the South Birchwood exit for driving seventy-eight miles per hour in a sixty-five mile-per-hour zone. Officer Conley cited Collier under Anchorage Municipal Code 09.26.030(C) for speeding.

On June 1, 2005, Collier filed an eleven-page discovery request, seeking information on the creation of the courts, the chartering of Anchorage, "the true name of the 'government' accuser," IRS documents, and police operating procedures. On July 26, 2005, the court granted the motion in part, noting that the city is responsible for providing discovery materials to Collier, "e.g., officer's notes of traffic stop."

At the trial on August 29, 2005, the Municipality stated that it had provided Collier with the following discovery:

copies of the ticket, the certificate of calibration for the radar instrument the officer used, Officer Conley's certificate of training for laser speed detection, and a compact disk with the video recording of the traffic stop ... . The only thing left that we could find to be discovered to the defendant is the recording of ... the police [\*3] dispatch calls. Sent defendant the notice that is available.

Collier said he did not request or want the dispatch communications. The court then reviewed the remaining discovery requests and found that "none of the other items requested are either relevant, within the agency and control of the

prosecutor's office, nor required as obligatory discovery under Rule 16."

In its case in chief, the Municipality called Officer Conley, who testified that on the morning of May 12, 2005, he was parked on the Glenn Highway watching traffic. He saw a white General Communication, Inc. van traveling at what appeared to be eighty miles per hour. His laser indicated that the van was actually going seventy-eight miles per hour. He pulled the van over for speeding. Collier produced his driver's license and told the officer that he thought he was going seventy to seventy-two miles per hour. Collier apparently then asked if he was under arrest and demanded an attorney. At trial, Collier argued that he was denied discovery and that Officer Conley illegally asked for his driver's license and proof of registration and insurance after he had requested an attorney. The court held that the Municipality [\*4] had provided all relevant discovery and that Collier did not have a right to counsel because he was "neither being interrogated, nor was he in custody." The court found Collier guilty of violating AMC 09.26.030. This appeal followed.

#### *Discussion*

*Collier's claim that his right to counsel and privilege against self-incrimination were violated during the traffic stop*

Collier claims that the traffic stop was a "constitutional seizure" that entitled him to invoke his *Fifth Amendment* right to assistance of counsel. He asserts that, after he told the police he was invoking his right to counsel, the police could not require him to produce his driver's license until his counsel arrived on the scene. n2

n2 Collier also claims that his rights to counsel and his privilege against self-incrimination were violated when the officers demanded his registration and proof of insurance. We have not addressed this claim because we do not see how proof of registration or insurance could be used against Collier as evidence of speeding.

[\*5]

We find no merit to this claim. [HN1] The right to counsel under the *Fifth Amendment* only arises during custodial interrogation, and Collier concedes he was not in custody for purposes of *Miranda v. Arizona*. n3 We agree that Collier was not in *Miranda* custody. Routine traffic stops generally do not constitute *Miranda* custody and thus do not trigger the right to counsel. n4 Here, Officer Conley stopped Collier, asked for his license and proof of registration and insurance, and then cited him for speeding. There is no evidence that this was anything other than a routine traffic stop. Because Collier was not in custody, Officer Conley did not violate Collier's *Fifth Amendment* right to counsel when he asked for Collier's driver's license. n5

n3 *See Miranda v. Arizona*, 384 U.S. 436, 444, 86 S. Ct. 1602, 1612, 16 L. Ed. 2d 694 (1966); *see also Berkemer v. McCarty*, 468 U.S. 420, 439-43, 104 S. Ct. 3138, 3150-52, 82 L. Ed. 2d 317 (1984); *Clark v. Anchorage*, 112 P.3d 676, 678-79 & n.4 (Alaska App. 2005).

n4 *Berkemer*, 468 U.S. at 439-43, 104 S. Ct. at 3150-52; *Blake v. State*, 763 P.2d 511, 515 (Alaska App. 1988).

[\*6]

n5 *See id.*

To the extent that Collier may be asserting that his *Sixth Amendment* right to assistance of counsel was violated, we recognized in *Thiel v. State* n6 that [HN2] the *Sixth Amendment* right to counsel attaches "only upon the commencement

of adversary criminal proceedings," not during "purely investigative stages of a case." n7 When Officer Conley stopped Collier for speeding, adversary criminal proceedings had not commenced. Accordingly, Officer Conley did not violate Collier's *Sixth Amendment* right to an attorney.

n6 762 P.2d 478 (Alaska App. 1988).

n7 *Id.* at 481 (citing *Moran v. Burbine*, 475 U.S. 412, 429-30, 106 S. Ct. 1135, 1145-46, 89 L. Ed. 2d 410 (1986); *Maine v. Moulton*, 474 U.S. 159, 170, 106 S. Ct. 477, 484, 88 L. Ed. 2d 481 (1985); *Kirby v. Illinois*, 406 U.S. 682, 688, 92 S. Ct. 1877, 1881, 32 L. Ed. 2d 411 (1972)).

[\*7]

Finally, Collier appears to claim that Officer Conley violated his privilege against self-incrimination by demanding his driver's license. [HN3] The *Fifth Amendment of the United States Constitution* and *article 1, section 9 of the Alaska Constitution* provide that no person shall be compelled in any criminal proceeding to be a witness against himself.

[HN4] Alaska law requires motorists to have in their possession a valid driver's license and to present that license for inspection upon demand by a peace officer. n8 Collier argues that requiring him to present his license violated his privilege against compulsory self-incrimination because it identified him for the purpose of prosecution.

n8 AS 28.15.011(b); AS 28.15.131.

In *Byers v. California*, n9 the United States Supreme Court addressed the closely related issue of whether it violates the privilege against compulsory self-incrimination to require motorists to produce identification at the scene of an accident. [\*8] n10 The Court noted that "[e]ven if we were to view the statutory reporting requirement as incriminating in the traditional sense, in our view it would be the 'extravagant' extension of the privilege Justice Holmes warned against to hold that it is testimonial in the *Fifth Amendment* sense." n11 The disclosure of the driver's name and address is "an essentially neutral act" and "[w]hatever the collateral consequences ... the statutory purpose is to implement the state police power to regulate use of motor vehicles." n12 Moreover, "[a] name, linked with a motor vehicle, is no more incriminating than the tax return, linked with the disclosure of income ... . It identifies but does not by itself implicate anyone in criminal conduct." n13

N9 402 U.S. 424, 91 S. Ct. 1535, 29 L. Ed. 2d 9 (1971).

n10 *Id.* at 427, 91 S. Ct. at 1537.

n11 *Id.* at 431, 91 S. Ct. at 1539.

n12 *Id.* at 432, 91 S. Ct. at 1540.

n13 *Id.* at 433-34, 91 S. Ct. at 1540.

[\*9]

We have also held that [HN5] the Fifth Amendment privilege against compulsory self-incrimination does not extend to the requirement that motorists produce a driver's license -- and thereby identify themselves for purposes of prosecution. n14 Officer Conley, therefore, did not violate Collier's privilege against self-incrimination when he demanded that Collier produce his driver's license.

n14 *Winterrowd v. State*, 139 P.3d 590, 2006 Alas. App. LEXIS 97, P.2d , Alaska App. Opinion No. 2050 (June 23, 2006).

*Collier's request for additional discovery*

On June 1, 2005, Collier filed an eleven-page discovery request, seeking information on the creation of the courts, the chartering of Anchorage, "the true name of the 'government' accuser," IRS documents, and police operating procedures. The Municipality provided Collier with a copy of the ticket, the certification of the laser used in this case, Officer Conley's training certificate for operating the laser, and the video recording of the traffic stop. The prosecutor [\*10] also offered to provide Collier with the recording of the radio traffic between the officer and dispatch, but Collier said he did not want the dispatch communications. Magistrate Cole found that "none of the other items requested are either relevant, within the agency and control of the prosecutor's office, nor required as obligatory discovery under Rule 16."

Collier argues that all the information he requested should have been disclosed because it would have had a direct bearing on the trial. We overturn discovery orders only for abuse of discretion. n15

n15 See *R.E. v. State*, 878 P.2d 1341, 1345 (Alaska 1994); *Linne v. State*, 674 P.2d 1345, 1354-55 (Alaska App. 1983).

Several sections of Criminal Rule 16 are relevant to this appeal. [HN6] Criminal Rule 16(a) mandates that "discovery prior to trial shall be as full and free as possible consistent with protection of persons, effective law enforcement, and the adversary system." Criminal Rule 16(b)(1)(A) requires the prosecuting attorney [\*11] to disclose the names, addresses, and statements of persons known by the government to have knowledge of relevant facts, written or recorded statements made by the accused or a co-defendant, documents or objects obtained from the accused or intended to be used at trial, and records of prior convictions of the defendant and any witnesses the prosecutor intends to call. Criminal Rule 16(b)(3) requires the prosecution to disclose material or information within its possession or control that tends to negate the guilt or reduce the punishment of the accused. Criminal Rule 16(b)(7) allows the court in its discretion to require disclosure of other relevant material and information. And, finally, Criminal Rule 16(b)(8) states that the prosecution is not required to disclose legal research or attorney work product. None of these sections requires the prosecution to disclose information on the creation of the courts, the chartering of Anchorage, or any of the other documents Collier requested.

[HN7] Magistrate Cole had discretion under Criminal Rule 16(b)(7) to order the disclosure of "other relevant material and information." But she correctly found that "none of the other items requested are either [\*12] relevant, within the agency and control of the prosecutor's office, nor required as obligatory discovery under Rule 16." The only relevant information within the Municipality's control (the ticket, the laser certification, Officer Conley's training certificate for operating the laser, the video recording of the traffic stop, and the dispatch communications) was provided or made available to Collier. The rest was either nonexistent, irrelevant, or publicly available. None had a tendency to negate his guilt. n16 Magistrate Cole therefore did not abuse her discretion in refusing to order additional discovery. n17

n16 See *Scott v. State*, 519 P.2d 774, 778 (Alaska 1974).

n17 See *R.E.*, 878 P.2d at 1345; *Linne*, 674 P.2d at 1354-55.

*Collier's claim that Criminal Rule 16 is unconstitutional*

In passing, Collier argues that Criminal Rule 16 is unconstitutional. His entire argument, raised only in his conclusion, is as follows:

[T]his court should hold [\*13] that Criminal Rule 16(a) is unconstitutional, as the withholding of any inculpatory or exculpatory evidence material from the Accused must be disclosed and under no circumstance can evidence be withheld to protect persons (the State of Alaska), protect effective law enforcement (Alaska State Troopers, Anchorage Police Department and other Police Departments and Police) and the adversary system (Judges, Attorneys, Prosecutors and other court personnel) or any other entity.

Collier appears to be arguing that Criminal Rule 16(a) unconstitutionally limits discovery by providing that discovery should be as full and free as possible "consistent with protection of persons, effective law enforcement, and the adversary system." But he does not cite any legal authority for this position. He also does not show how he was prejudiced. As noted above, Collier received all relevant discovery. n18

n18 *See Adamson v. Univ. of Alaska*, 819 P.2d 886, 889 n.3 (Alaska 1991).

*Conclusion*

Collier's [\*14] conviction is AFFIRMED.

**JUDGES:** Swager, J. We concur: Marchiano, P. J., Stein, J.

**OPINION BY:** Swager

**OPINION:**

Michael F. Odom appeals a judgment sentencing him to probation for a period of five years, with a condition of one year in county jail, following convictions for driving under the influence of alcohol. We affirm.

**PROCEDURAL BACKGROUND**

An information filed on June 28, 2000, in Napa County charged appellant with two counts of driving under the influence of alcohol in violation of *Vehicle Code section 23152*, subdivision (a) and subdivision (b). It alleged that the offenses were punishable as a felony by reason of a prior conviction described in *Vehicle Code section 23550.5*.

Appellant pled not guilty.

Prior to trial, appellant filed a motion in limine to exclude evidence of a preliminary [\*2] alcohol-screening (PAS) test and requested a hearing under *Evidence Code section 402*, subdivision (b). The trial court denied the motion to exclude the evidence after conducting the requested hearing on the first day of trial.

Following two days of testimony, the jury found appellant guilty as charged. In a separate bifurcated proceeding, the trial court found the allegation pursuant to *Vehicle Code section 23550.5* to be true. On March 22, 2002, the trial court suspended imposition of sentence and granted probation for a period of five years on the condition, among others, that appellant spend one year in county jail.

## FACTUAL BACKGROUND

A California Highway Patrol officer, Brian Compton, testified that at 5:35 p.m. on April 11, 2000, he was driving south on a two-lane road in Napa County and saw a red Jeep traveling at an excessive rate of speed in the opposite direction. When he obtained a radar reading showing that the vehicle was traveling 78 miles per hour in a 55-miles-per-hour zone, he made a U-turn and activated his overhead lights. The vehicle stopped by turning into a driveway. Officer Compton identified appellant as [\*3] the driver of the vehicle.

As he approached the window of the driver's seat, officer Compton smelled the odor of alcohol and saw an open 24-ounce bottle of beer on the floor. He asked appellant if he had anything alcoholic to drink. Appellant replied that he drank a 24-ounce can of beer approximately an hour earlier at 4:30 p.m. Officer Compton observed that appellant's speech was low and slurred and his eyes red and watery and that he was unsteady on his feet as he left the vehicle. He asked appellant a standard series of questions to assess his physical condition and then administered five field sobriety tests intended to measure motor control and mental concentration. Appellant did poorly on all the tests.

Following the field sobriety tests, officer Compton asked appellant to perform two preliminary alcohol screening device tests. The first test, performed at 5:47 p.m. indicated a blood-alcohol content of 0.101; the second test performed at 5:49 indicated a blood-alcohol content of 0.102. Officer Compton then arrested appellant and took him to the Napa County Detention Center. Upon being told he was required to take a blood-alcohol test, appellant chose to take a breath test using [\*4] an Intoxilyzer 5000. Before administering the test, officer Compton observed appellant for 15 minutes. Appellant provided his first breath sample at 6:33, which showed a blood-alcohol content of 0.09. A second breath sample registered as invalid on the machine. A third breath sample given at 6:35 again indicated a blood-alcohol content of 0.09.

Two other witnesses presented testimony supporting the reliability of the two breath tests. Officer Warren Bullis testified that he was responsible for maintenance and calibration of PAS devices in the Napa area. He had tested the PAS device used in appellant's test on April 7, 2000, and again on April 14, 2000, and found that it was working properly. A criminalist, Michael Potts, testified concerning the accuracy and significance of blood-alcohol testing. In his opinion, the blood-alcohol test results at the county detention center confirmed the field observations and PAS test taken an hour earlier.

In his defense, appellant presented the testimony of a forensic toxicologist, Jeffrey Zehnder, who explored possible inaccuracies and uncertainties in the two breath tests and the field sobriety tests.

## DISCUSSION

In his only assignment of [\*5] error, appellant maintains that the trial court erred in denying his motion to exclude the results of the PAS tests. The motion in limine objected to the admission of this evidence on multiple grounds, including noncompliance with *California Code of Regulations, title 17, section 1215* et seq., lack of foundation under *People v. Adams (1976) 59 Cal. App. 3d 559, 131 Cal. Rptr. 190*, and the discretionary authority under *Evidence Code*

*section 352* to exclude time-consuming, prejudicial, confusing, and misleading evidence. In this appeal, appellant now argues only that the trial court abused its discretion in failing to exclude the evidence under *Evidence Code section 352*.

### 1. Standard of Review

*Evidence Code section 352* confers on the trial court discretion to "exclude evidence if its probative value is substantially outweighed by the probability that its admission will (a) necessitate undue consumption of time or (b) create substantial danger of undue prejudice, of confusing the issues, or of misleading the jury." "Evidence is substantially more prejudicial than probative [\*6] [within the meaning of section 352] if, broadly stated, it poses an intolerable 'risk to the fairness of the proceedings or the reliability of the outcome' [citation]." (*People v. Waidla* (2000) 22 Cal. 4th 690, 724, 996 P.2d 46.)

"Under *Evidence Code section 352*, the trial court enjoys broad discretion in assessing whether the probative value of particular evidence is outweighed by concerns of undue prejudice, confusion or consumption of time. [Citation.] Where, as here, a discretionary power is statutorily vested in the trial court, its exercise of that discretion 'must not be disturbed on appeal *except* on a showing that the court exercised its discretion in an arbitrary, capricious or patently absurd manner that resulted in a manifest miscarriage of justice. [Citations.]' [Citation.]" (*People v. Rodrigues* (1994) 8 Cal. 4th 1060, 1124-1125, 885 P.2d 1.) n1

n1 In his opening brief, appellant complains that the trial court did not "formally balance" the probative and prejudicial effects of the evidence, apparently suggesting that the court must make a formal statement on the record balancing the probative value of the evidence against its prejudicial impact. Though language in certain early cases can be read as supporting appellant's position, it is now established that the trial court is not required "to place on the record the process by which it concluded that the probative value of the evidence outweighed its prejudicial impact, . . ." (*People v. Catlin* (2001) 26 Cal. 4th 81, 122; *People v. Waidla*, *supra*, 22 Cal. 4th 690, 724, fn. 6; *People v. Mickey* (1991) 54 Cal. 3d 612, 656, 286 Cal. Rptr. 801, 818 P.2d 84.)

[\*7]

### 2. Legal Background

Under *Vehicle Code section 23612*, subdivision (a), any person who drives a motor vehicle is deemed to have given consent to chemical testing of his blood or breath for the purpose of determining his blood-alcohol content, if lawfully arrested for violation of *Vehicle Code section 23152*. In addition, section 23612, subdivision (h), authorizes an officer at the scene of the investigation to use a preliminary alcohol-screening test, or PAS test, which will indicate the "concentration of alcohol based on a breath sample in order to establish reasonable cause to believe the person was driving a vehicle in violation of Section . . . 23152 . . . . [The PAS test is to be used as] a field sobriety test and . . . as a further investigative tool." It does not satisfy a person's obligation to submit to a chemical or blood test under the implied consent law, and before administering the PAS test, an officer "shall advise the person [under investigation] of that fact and of the person's right to refuse to take the [test]." (*Veh. Code*, § 23612, subd. (i).)

As explained in *People v. Bury* (1996) 41 Cal. App. 4th 1194, 1201, [\*8] a PAS test is not a new scientific procedure that would require a *Kelly/Frye* hearing to establish the admissibility of the test results. In fact, "breath tests to determine blood-alcohol concentration have long been recognized by decisional law in California as scientifically valid." (*Id.* at p. 1201.) For more than 25 years, the administration of breath-alcohol tests has been regulated by *California Code of Regulations, title 17, section 1221 et seq.*

The leading decision on the admission of breath test evidence, *People v. Adams* (1976) 59 Cal. App. 3d 559, 131 Cal. Rptr. 190, authorized the admission of test results upon a showing of compliance with the title 17 regulations (*People v. Adams*, *supra*, at p. 567) or, alternatively, upon proof of three foundational prerequisites: "(1) the particular

apparatus utilized was in proper working order, (2) the test used was properly administered, and (3) the operator was competent and qualified." (*Id.* at p. 561.) In *People v. Williams* (2002) 28 Cal. 4th 408, the court followed the *Adams* decision in upholding the admission of [\*9] test results from use of a PAS device. Though there was evidence of noncompliance with certain title 17 regulations, the court held that the trial court acted within its discretion in admitting the test results in view of evidence supporting a finding that the alternative foundational prerequisites for admission of the test were satisfied. (*People v. Williams, supra*, at p. 417.) Noncompliance with the regulations affected "the weight of the evidence, not its admissibility." (*Id.* at p. 414.)

In this appeal, appellant does not contest the admissibility of the PAS test results under the *Adams-Bury-Williams* line of decisions. He maintains only that the trial court abused its discretion in refusing to exclude the evidence under *Evidence Code section 352* on the ground that its probative value was substantially outweighed by the probability of prejudice. He notes that the *Williams* decision did not present an issue under section 352 since the defendant refused the implied-consent tests and the PAS test was therefore the only evidence of blood-alcohol content. In contrast, the PAS test here was duplicative and subject to a proper [\*10] objection in appellant's in limine motion.

Appellant argues that the admission of the PAS test results was highly prejudicial because it appeared to confirm the testing at the county detention center, which indicated a marginal level of intoxication. He maintains that the test results in fact were cumulative evidence that had minimal corroborative value because the results were subject to a much higher range of inaccuracy than the later testing of appellant's breath sample at the detention center. The defense expert testified that the PAS device was routinely subject to a 0.02 range of inaccuracy and could be still more inaccurate where the breath sample was contaminated with mouth alcohol. Unlike the Intoxilyzer 5000 used at the detention center, the PAS device lacked a function known as a "slope detector" designed to identify misleading test results due to mouth alcohol. The presence of an open beer can raised the possibility of such contamination, despite appellant's denial of having consumed alcohol in the previous hour, as did the invalid test at the detention center. On the arresting officer's own admission, the PAS test was administered in a more informal manner than the later [\*11] Intoxilyzer 5000 test.

The prosecution, however, presented other evidence tending to support the probative value of the PAS test result. An expert witness, Michael Potts, testified that the two breath tests indicated a declining level of blood alcohol, reflecting the liver's ability to eliminate alcohol from the blood, which was consistent with appellant's own account that he had consumed alcohol an hour earlier in San Francisco. In his opinion, the PAS test tended to corroborate the other evidence of intoxication -- the field sobriety tests and the laboratory testing at the detention center. The invalid test at the detention center could not have been the result of mouth alcohol because a further test, performed within a minute, confirmed the first test result.

On this record, we see no basis for finding that the trial court abused its discretion in overruling appellant's objection based on *Evidence Code section 352*. The objection was essentially based on the supposition that the test results may have been contaminated by mouth alcohol. The trial court could reasonably accept evidence rebutting this claim. In the exercise of its discretion, the court was free [\*12] to give credence to the prosecution's expert testimony, particularly in light of the fact that this testimony was consistent with appellant's own statements at the time of the field investigation.

The judgment is affirmed.

**OPINION BY:** Swager

**OPINION:**

Michael F. Odom appeals a judgment sentencing him to probation for a period of five years, with a condition of one year in county jail, following convictions for driving under the influence of alcohol. We affirm.

**PROCEDURAL BACKGROUND**

An information filed on June 28, 2000, in Napa County charged appellant with two counts of driving under the influence of alcohol in violation of *Vehicle Code section 23152*, subdivision (a) and subdivision (b). It alleged that the offenses were punishable as a felony by reason of a prior conviction described in *Vehicle Code section 23550.5*.

Appellant pled not guilty.

Prior to trial, appellant filed a motion in limine to exclude evidence of a preliminary [\*2] alcohol-screening (PAS) test and requested a hearing under *Evidence Code section 402*, subdivision (b). The trial court denied the motion to exclude the evidence after conducting the requested hearing on the first day of trial.

Following two days of testimony, the jury found appellant guilty as charged. In a separate bifurcated proceeding, the trial court found the allegation pursuant to *Vehicle Code section 23550.5* to be true. On March 22, 2002, the trial court suspended imposition of sentence and granted probation for a period of five years on the condition, among others, that appellant spend one year in county jail.

## FACTUAL BACKGROUND

A California Highway Patrol officer, Brian Compton, testified that at 5:35 p.m. on April 11, 2000, he was driving south on a two-lane road in Napa County and saw a red Jeep traveling at an excessive rate of speed in the opposite direction. When he obtained a radar reading showing that the vehicle was traveling 78 miles per hour in a 55-miles-per-hour zone, he made a U-turn and activated his overhead lights. The vehicle stopped by turning into a driveway. Officer Compton identified appellant as [\*3] the driver of the vehicle.

As he approached the window of the driver's seat, officer Compton smelled the odor of alcohol and saw an open 24-ounce bottle of beer on the floor. He asked appellant if he had anything alcoholic to drink. Appellant replied that he drank a 24-ounce can of beer approximately an hour earlier at 4:30 p.m. Officer Compton observed that appellant's speech was low and slurred and his eyes red and watery and that he was unsteady on his feet as he left the vehicle. He asked appellant a standard series of questions to assess his physical condition and then administered five field sobriety tests intended to measure motor control and mental concentration. Appellant did poorly on all the tests.

Following the field sobriety tests, officer Compton asked appellant to perform two preliminary alcohol screening device tests. The first test, performed at 5:47 p.m. indicated a blood-alcohol content of 0.101; the second test performed at 5:49 indicated a blood-alcohol content of 0.102. Officer Compton then arrested appellant and took him to the Napa County Detention Center. Upon being told he was required to take a blood-alcohol test, appellant chose to take a breath test using [\*4] an Intoxilyzer 5000. Before administering the test, officer Compton observed appellant for 15 minutes. Appellant provided his first breath sample at 6:33, which showed a blood-alcohol content of 0.09. A second breath sample registered as invalid on the machine. A third breath sample given at 6:35 again indicated a blood-alcohol content of 0.09.

Two other witnesses presented testimony supporting the reliability of the two breath tests. Officer Warren Bullis testified that he was responsible for maintenance and calibration of PAS devices in the Napa area. He had tested the PAS device used in appellant's test on April 7, 2000, and again on April 14, 2000, and found that it was working properly. A criminalist, Michael Potts, testified concerning the accuracy and significance of blood-alcohol testing. In his opinion, the blood-alcohol test results at the county detention center confirmed the field observations and PAS test taken an hour earlier.

In his defense, appellant presented the testimony of a forensic toxicologist, Jeffrey Zehnder, who explored possible inaccuracies and uncertainties in the two breath tests and the field sobriety tests.

## DISCUSSION

In his only assignment of [\*5] error, appellant maintains that the trial court erred in denying his motion to exclude the results of the PAS tests. The motion in limine objected to the admission of this evidence on multiple grounds, including noncompliance with *California Code of Regulations, title 17, section 1215* et seq., lack of foundation under *People v. Adams (1976) 59 Cal. App. 3d 559, 131 Cal. Rptr. 190*, and the discretionary authority under *Evidence Code*

*section 352* to exclude time-consuming, prejudicial, confusing, and misleading evidence. In this appeal, appellant now argues only that the trial court abused its discretion in failing to exclude the evidence under *Evidence Code section 352*.

### 1. Standard of Review

*Evidence Code section 352* confers on the trial court discretion to "exclude evidence if its probative value is substantially outweighed by the probability that its admission will (a) necessitate undue consumption of time or (b) create substantial danger of undue prejudice, of confusing the issues, or of misleading the jury." "Evidence is substantially more prejudicial than probative [\*6] [within the meaning of section 352] if, broadly stated, it poses an intolerable 'risk to the fairness of the proceedings or the reliability of the outcome' [citation]." (*People v. Waidla* (2000) 22 Cal. 4th 690, 724, 996 P.2d 46.)

"Under *Evidence Code section 352*, the trial court enjoys broad discretion in assessing whether the probative value of particular evidence is outweighed by concerns of undue prejudice, confusion or consumption of time. [Citation.] Where, as here, a discretionary power is statutorily vested in the trial court, its exercise of that discretion 'must not be disturbed on appeal *except* on a showing that the court exercised its discretion in an arbitrary, capricious or patently absurd manner that resulted in a manifest miscarriage of justice. [Citations.]' [Citation.]" (*People v. Rodrigues* (1994) 8 Cal. 4th 1060, 1124-1125, 885 P.2d 1.) n1

n1 In his opening brief, appellant complains that the trial court did not "formally balance" the probative and prejudicial effects of the evidence, apparently suggesting that the court must make a formal statement on the record balancing the probative value of the evidence against its prejudicial impact. Though language in certain early cases can be read as supporting appellant's position, it is now established that the trial court is not required "to place on the record the process by which it concluded that the probative value of the evidence outweighed its prejudicial impact, . . ." (*People v. Catlin* (2001) 26 Cal. 4th 81, 122; *People v. Waidla*, *supra*, 22 Cal. 4th 690, 724, fn. 6; *People v. Mickey* (1991) 54 Cal. 3d 612, 656, 286 Cal. Rptr. 801, 818 P.2d 84.)

[\*7]

### 2. Legal Background

Under *Vehicle Code section 23612*, subdivision (a), any person who drives a motor vehicle is deemed to have given consent to chemical testing of his blood or breath for the purpose of determining his blood-alcohol content, if lawfully arrested for violation of *Vehicle Code section 23152*. In addition, section 23612, subdivision (h), authorizes an officer at the scene of the investigation to use a preliminary alcohol-screening test, or PAS test, which will indicate the "concentration of alcohol based on a breath sample in order to establish reasonable cause to believe the person was driving a vehicle in violation of Section . . . 23152 . . . . [The PAS test is to be used as] a field sobriety test and . . . as a further investigative tool." It does not satisfy a person's obligation to submit to a chemical or blood test under the implied consent law, and before administering the PAS test, an officer "shall advise the person [under investigation] of that fact and of the person's right to refuse to take the [test]." (*Veh. Code*, § 23612, subd. (i).)

As explained in *People v. Bury* (1996) 41 Cal. App. 4th 1194, 1201, [\*8] a PAS test is not a new scientific procedure that would require a *Kelly/Frye* hearing to establish the admissibility of the test results. In fact, "breath tests to determine blood-alcohol concentration have long been recognized by decisional law in California as scientifically valid." (*Id.* at p. 1201.) For more than 25 years, the administration of breath-alcohol tests has been regulated by *California Code of Regulations, title 17, section 1221 et seq.*

The leading decision on the admission of breath test evidence, *People v. Adams* (1976) 59 Cal. App. 3d 559, 131 Cal. Rptr. 190, authorized the admission of test results upon a showing of compliance with the title 17 regulations (*People v. Adams*, *supra*, at p. 567) or, alternatively, upon proof of three foundational prerequisites: "(1) the particular

apparatus utilized was in proper working order, (2) the test used was properly administered, and (3) the operator was competent and qualified." (*Id.* at p. 561.) In *People v. Williams* (2002) 28 Cal. 4th 408, the court followed the *Adams* decision in upholding the admission of [\*9] test results from use of a PAS device. Though there was evidence of noncompliance with certain title 17 regulations, the court held that the trial court acted within its discretion in admitting the test results in view of evidence supporting a finding that the alternative foundational prerequisites for admission of the test were satisfied. (*People v. Williams, supra*, at p. 417.) Noncompliance with the regulations affected "the weight of the evidence, not its admissibility." (*Id.* at p. 414.)

In this appeal, appellant does not contest the admissibility of the PAS test results under the *Adams-Bury-Williams* line of decisions. He maintains only that the trial court abused its discretion in refusing to exclude the evidence under *Evidence Code section 352* on the ground that its probative value was substantially outweighed by the probability of prejudice. He notes that the *Williams* decision did not present an issue under section 352 since the defendant refused the implied-consent tests and the PAS test was therefore the only evidence of blood-alcohol content. In contrast, the PAS test here was duplicative and subject to a proper [\*10] objection in appellant's in limine motion.

Appellant argues that the admission of the PAS test results was highly prejudicial because it appeared to confirm the testing at the county detention center, which indicated a marginal level of intoxication. He maintains that the test results in fact were cumulative evidence that had minimal corroborative value because the results were subject to a much higher range of inaccuracy than the later testing of appellant's breath sample at the detention center. The defense expert testified that the PAS device was routinely subject to a 0.02 range of inaccuracy and could be still more inaccurate where the breath sample was contaminated with mouth alcohol. Unlike the Intoxilyzer 5000 used at the detention center, the PAS device lacked a function known as a "slope detector" designed to identify misleading test results due to mouth alcohol. The presence of an open beer can raised the possibility of such contamination, despite appellant's denial of having consumed alcohol in the previous hour, as did the invalid test at the detention center. On the arresting officer's own admission, the PAS test was administered in a more informal manner than the later [\*11] Intoxilyzer 5000 test.

The prosecution, however, presented other evidence tending to support the probative value of the PAS test result. An expert witness, Michael Potts, testified that the two breath tests indicated a declining level of blood alcohol, reflecting the liver's ability to eliminate alcohol from the blood, which was consistent with appellant's own account that he had consumed alcohol an hour earlier in San Francisco. In his opinion, the PAS test tended to corroborate the other evidence of intoxication -- the field sobriety tests and the laboratory testing at the detention center. The invalid test at the detention center could not have been the result of mouth alcohol because a further test, performed within a minute, confirmed the first test result.

On this record, we see no basis for finding that the trial court abused its discretion in overruling appellant's objection based on *Evidence Code section 352*. The objection was essentially based on the supposition that the test results may have been contaminated by mouth alcohol. The trial court could reasonably accept evidence rebutting this claim. In the exercise of its discretion, the court was free [\*12] to give credence to the prosecution's expert testimony, particularly in light of the fact that this testimony was consistent with appellant's own statements at the time of the field investigation.

The judgment is affirmed.

**Theodore BEST, Defendant Below, Appellant, v. STATE of Delaware, Plaintiff  
Below, Appellee**

[NO NUMBER IN ORIGINAL]

**Supreme Court of Delaware**

*328 A.2d 141; 1974 Del. LEXIS 317*

**October 31, 1974**

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a decision of a Superior Court (Delaware), which affirmed his conviction before a justice of the peace for driving a motor vehicle while under the influence of intoxicating liquor in violation of *Del. Code Ann. tit. 21, § 4176*.

**OVERVIEW:** Defendant contested his conviction for drunk driving by arguing that evidence of his alcohol level, as taken by the Omicron Intoxilizer, should not have been admitted into evidence without a sufficient foundation being laid regarding the reliability of this relatively new device. Defendant argued that it was error to admit the evidence based on the testimony of only the police officer in charge of the records of the device, without any evidence from the state chemist. The court affirmed the conviction. The court found that in prior case law the superior court had heard evidence concerning the function and reliability of the device from the state chemist and upon such evidence had ruled that the device was sufficiently reliable to permit the admission of its results. The court considered this unappealed decision *stare decisis* on the issue of the reliability of the device.

**OUTCOME:** The court affirmed the ruling admitting evidence of defendant's alcohol level and the judgment against defendant for driving a motor vehicle while under the influence of intoxicating liquor.

**CORE TERMS:** breath, testing, motor vehicle, reliable, intoxication, influence of intoxicating liquor, trial de novo, authorize, percentage of alcohol, police officer, omicron, reliability, so-called, accuracy, arrest, blood

**LexisNexis(R) Headnotes**

***Evidence > Scientific Evidence > Blood Alcohol***

[HN1] The Omicron Intoxilizer device is a reliable and trustworthy method of testing the percentage of alcohol present in an accused's system at the time of his submission to such a test.

**COUNSEL:** [\*\*1]

Karl Haller, Asst. Public Defendant, Georgetown, for defendant below, appellant.

Lawrence Steele, II, Deputy Atty. Gen., Georgetown, for plaintiff below, appellee.

**JUDGES:**

Herrmann, C.J., Duffy, J., and Marvel, Vice Chancellor.

**OPINION BY:**

MARVEL

**OPINION:**

[\*142] Following his conviction before a Justice of the Peace on a charge of driving a motor vehicle while under the influence of intoxicating liquor, 21 Del.C. § 4176, the appellant took an appeal to the Superior Court, where, after a trial de novo, he was again convicted of the same offense. The sentence imposed was sixty days in jail and a fine of \$500.00. The present appeal ensued.

Introduced at the trial de novo in the Superior Court under the so-called Business Records Statute n1 was evidence of alcoholic intoxication on the part of the appellant at the time of his arrest deemed sufficient to warrant conviction. Such evidence was derived from a test of his breath through its analysis by means of a device known as an Omicron Intoxilizer. Prior to its testing of appellant's breath the device in question has been allegedly cleared and checked for accuracy by the State Chemist. The device purports to calculate the percentage [\*\*2] of alcohol present in a person's breath.

n1 10 Del.C. § 4310.

The State also introduced so-called calibration tests to the effect that the device in issue was operating properly both before and after samples of appellant's breath had been taken. And while the State Chemist was not present at appellant's trial, the police officer in charge of the records of the Omicron Intoxilizer, whereby appellant's breath was tested, testified as to its proper operation and condition at the time of appellant's arrest and testing. In addition, the arresting officer testified that while on patrol he saw an over-turned motor vehicle at the side of the road in which he found appellant in an apparently intoxicated condition. Appellant was thereupon arrested and taken to police headquarters where the Omicron Intoxilizer test was administered.

Appellant now contends that unlike the analysis of blood samples or the use of a [\*143] drunkometer for the detection of intoxication, the device in question represents a relatively [\*\*3] recent technique, that it has not been established as acceptable in this jurisdiction, and that in submitting the findings of such device as to appellant's alleged intoxication the State failed to introduce expert testimony concerning the reliability of the device, particularly that of the State Chemist explaining the theory of the test and vouching for the accuracy of the device. The evidence of the test and its results was introduced by the police officer in charge of the records of the device over appellant's objection.

In the recent case of *State v. Moore, Del.Super., 307 A.2d 548*, the Superior Court, following the presentation by the State of testimony concerning the theory and workings of the Omicron Intoxilizer device by experts in the fields of chemistry, n2 physics and electronics, concluded that the process was reliable, stating:

". . . I cannot hold under any of the theories advanced by the defendant that it has been shown that

the device is so unreliable so that results obtained by its use are inadmissible as a matter of law. Indeed, there is uncontroverted testimony in the record that the result of the use of the device in question is at least as reliable, and probably [\*\*4] more so, than the method previously used in this State for the same purpose."

n2 The State Chemist was among those who testified at such trial as to the workings and reliability of the omicron intoxilizer.

No appeal was taken in the *Moore* case. We therefore conclude that such ruling constitutes for the Superior Court, at least, a precedent in this State to the effect that [HN1] the Omicron Intoxilizer device is a reliable and trustworthy method of testing the percentage of alcohol n3 present in an accused's system at the time of his submission to such a test. The decision in *Moore* is not attacked by appellant and we express no opinion thereon.

n3 11 Del.C. § 3507 and 21 Del.C. § 4176 both authorize medical or chemical analysis of breath, blood or urine to determine whether or not the driver of a motor vehicle was under the influence of intoxicating liquor. In addition the former statute authorizes a testing of saliva.

[\*\*5]

Accordingly, there being no other Delaware decision on the subject, the trial judge in the instant case was entitled to rely upon the ruling of the Superior Court in *Moore* under the principle of stare decisis. Compare *State v. Moffitt*, 48 Del. 210, 9 Terry 210, 100 A.2d 778, in which the trustworthiness of radar for testing the speed of a motor vehicle was held to have been established.

Finally, we hold that the Business Records Act is applicable in this case, *Johnson v. State*, Del.Sup., 253 A.2d 206. Accordingly, it was not error to admit in evidence thereunder documents showing that the Omicron machine had been checked by the State Chemist although he was not present at the trial.

The judgment below is affirmed.

**OPINION BY:**

MARVEL

**OPINION:**

[\*142] Following his conviction before a Justice of the Peace on a charge of driving a motor vehicle while under the influence of intoxicating liquor, 21 Del.C. § 4176, the appellant took an appeal to the Superior Court, where, after a trial de novo, he was again convicted of the same offense. The sentence imposed was sixty days in jail and a fine of \$500.00. The present appeal ensued.

Introduced at the trial de novo in the Superior Court under the so-called Business Records Statute n1 was evidence of alcoholic intoxication on the part of the appellant at the time of his arrest deemed sufficient to warrant conviction. Such evidence was derived from a test of his breath through its analysis by means of a device known as an Omicron Intoxilizer. Prior to its testing of appellant's breath the device in question has been allegedly cleared and checked for accuracy by the State Chemist. The device purports to calculate the percentage [\*\*2] of alcohol present in a person's breath.

n1 10 Del.C. § 4310.

The State also introduced so-called calibration tests to the effect that the device in issue was operating properly both before and after samples of appellant's breath had been taken. And while the State Chemist was not present at appellant's trial, the police officer in charge of the records of the Omicron Intoxilizer, whereby appellant's breath was tested, testified as to its proper operation and condition at the time of appellant's arrest and testing. In addition, the arresting officer testified that while on patrol he saw an over-turned motor vehicle at the side of the road in which he found appellant in an apparently intoxicated condition. Appellant was thereupon arrested and taken to police headquarters where the Omicron Intoxilizer test was administered.

Appellant now contends that unlike the analysis of blood samples or the use of a [\*143] drunkometer for the detection of intoxication, the device in question represents a relatively [\*\*3] recent technique, that it has not been established as acceptable in this jurisdiction, and that in submitting the findings of such device as to appellant's alleged intoxication the State failed to introduce expert testimony concerning the reliability of the device, particularly that of the State Chemist explaining the theory of the test and vouching for the accuracy of the device. The evidence of the test and its results was introduced by the police officer in charge of the records of the device over appellant's objection.

In the recent case of *State v. Moore, Del.Super., 307 A.2d 548*, the Superior Court, following the presentation by the State of testimony concerning the theory and workings of the Omicron Intoxilizer device by experts in the fields of chemistry, n2 physics and electronics, concluded that the process was reliable, stating:

". . . I cannot hold under any of the theories advanced by the defendant that it has been shown that

the device is so unreliable so that results obtained by its use are inadmissible as a matter of law. Indeed, there is uncontroverted testimony in the record that the result of the use of the device in question is at least as reliable, and probably [\*\*4] more so, than the method previously used in this State for the same purpose."

n2 The State Chemist was among those who testified at such trial as to the workings and reliability of the omicron intoxilizer.

No appeal was taken in the *Moore* case. We therefore conclude that such ruling constitutes for the Superior Court, at least, a precedent in this State to the effect that [HN1] the Omicron Intoxilizer device is a reliable and trustworthy method of testing the percentage of alcohol n3 present in an accused's system at the time of his submission to such a test. The decision in *Moore* is not attacked by appellant and we express no opinion thereon.

n3 11 Del.C. § 3507 and 21 Del.C. § 4176 both authorize medical or chemical analysis of breath, blood or urine to determine whether or not the driver of a motor vehicle was under the influence of intoxicating liquor. In addition the former statute authorizes a testing of saliva.

[\*\*5]

Accordingly, there being no other Delaware decision on the subject, the trial judge in the instant case was entitled to rely upon the ruling of the Superior Court in *Moore* under the principle of stare decisis. Compare *State v. Moffitt*, 48 Del. 210, 9 Terry 210, 100 A.2d 778, in which the trustworthiness of radar for testing the speed of a motor vehicle was held to have been established.

Finally, we hold that the Business Records Act is applicable in this case, *Johnson v. State*, Del.Sup., 253 A.2d 206. Accordingly, it was not error to admit in evidence thereunder documents showing that the Omicron machine had been checked by the State Chemist although he was not present at the trial.

The judgment below is affirmed.

**STATE OF DELAWARE v. RICHARD SABOL****Cr. A. No.: 9902001043****COURT OF COMMON PLEAS OF DELAWARE, NEW CASTLE***1999 Del. C.P. LEXIS 31***September 19, 1999, Submitted****September 23, 1999, Decided****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant brought a motion to suppress arguing that a police officer did not have probable cause to believe that defendant was operating his motor vehicle in violation of *Del. Code Ann. tit. 21, § 4177(a)*.

**OVERVIEW:** Defendant brought a motion to suppress. Defendant argued that police officer did not have probable cause to believe that defendant was operating his motor vehicle in violation of *Del. Code Ann. tit. 21, § 4177(a)*. The court concluded that the record supported a finding of probable cause. Defendant had failed several field sobriety tests administered to him by the police officer. Thus, the court held that the totality of the circumstances gave the police officer probable cause to suspect that defendant was driving under the influence of alcohol or drugs.

**OUTCOME:** The court denied defendant's motion to suppress, holding that the record supported the police officer's belief that probable cause existed to conclude that defendant was driving under the influence of alcohol or drugs.

**CORE TERMS:** probable cause, alcohol, breath, blood, walk, driving, odor of alcohol, motor vehicle, finger, nose, lane, alcohol concentration, bloodshot, correctly, driver, clues, heel, toe, police officer, concentration, performing, swayed, missed, administered, influence of alcohol, amount of alcohol, alphabet, alcoholic, demeanor, moderate

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Arrests > Probable Cause*

*Criminal Law & Procedure > Arrests > Warrantless Arrest*

*Criminal Law & Procedure > Search & Seizure > Warrantless Searches > General Overview*

[HN1] A police officer is authorized to make a warrantless arrest and search when he has probable cause to believe that a crime or a violation of the Motor Vehicle Code has been committed.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

*Criminal Law & Procedure > Arrests > Probable Cause*

[HN2] Probable cause is an elusive concept which is not subject to precise definition. It lies, somewhere between

suspicion and sufficient evidence to convict and exists when the facts and circumstances within the officer's knowledge are sufficient in themselves to warrant a man of reasonable caution in the belief that an offense has been or is being committed. Specifically, when there is probable cause that an offense which involves driving under the influence has been committed, a police officer may take all of the steps which the officer took in this case.

***Criminal Law & Procedure > Arrests > Probable Cause***

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge***

[HN3] A police officer has probable cause to believe a defendant has violated *Del. Code Ann. tit. 21, § 4177* when the officer possesses information which would warrant a reasonable man in believing that such a crime has been committed.

***Criminal Law & Procedure > Arrests > Probable Cause***

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge***

[HN4] A finding of probable cause does not require the police officer to uncover information sufficient to prove a suspect's guilt beyond a reasonable doubt or even to prove that guilt is more likely than not.

***Criminal Law & Procedure > Arrests > Probable Cause***

[HN5] The possibility there may be a hypothetically innocent explanation for each of several facts revealed during the course of an investigation does not preclude a determination that probable cause exists for an arrest.

***Criminal Law & Procedure > Arrests > Probable Cause***

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Particularity***

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge***

[HN6] Probable cause exists where the facts and circumstances within the officer's knowledge and of which they had reasonable trustworthy information are sufficient in themselves to warrant a man of reasonable caution in the belief that an offense has been or is being committed.

**COUNSEL:** [\*1] R. David Favata, Esquire, Deputy Attorney General, Department of Justice, Wilmington, DE, Attorney for State.

Louis B. Ferrara, Esquire, Louis B. Ferrara, P. A., Wilmington, DE, Attorney for Defendant.

**JUDGES:** JOHN K. WELCH, ASSOCIATE JUDGE.

**OPINION BY:** JOHN K. WELCH

**OPINION:**

**ORDER AND DECISION ON DEFENDANT'S MOTION TO SUPPRESS**

On Monday, September 19, 1999, the Court heard defendant's Motion to Suppress which was previously filed and docketed with the Court Clerk on April 26, 1999. After carefully reviewing the evidence presented and testimony received, the Court finds the following facts to be supported by the trial record.

**The Facts**

Corporal Lawrence T. Coyle ("Officer" or "Trooper Coyle") is employed by the Delaware State Police and was so employed on January 30, 1999 at 1:40 a.m. on patrol in the vicinity of Route 202 in New Castle County, Delaware. At

that location, Trooper Coyle testified he observed a 1998 Olds Caravan, gold in color, traveling northbound on Route 202. Officer Coyle testified the vehicle appeared to be travelling at a "high rate of speed." Officer Coyle testified he had been stopped in the left turn lane at Foulk Road southbound on Route 202 when [\*2] he observed the defendant's vehicle and therefore activated his Stalker Radar in a stationery mode and received a reading. Officer Coyle testified that he is trained and certified in the use of the Stalker Radar device in 1989 at Police Headquarters and has received an 8-hour class at the Academy on the Stalker unit.

At this point, through direct examination of Office Coyle, the State attempted to lay a foundation to lay the necessary foundation to establish that the Stalker radar unit in question used. Defendant's counsel requested voir dire of the witness.

It was established in the record that Mr. Willie Thomas of the Division of Communications was the author of the calibration log. No actual logs were presented to the Court for review. Nor were the originals of the certification logs produced in Court. Officer Coyle testified that he had never met Mr. Thomas of the Division of Communications. Officer Coyle testified he never observed Mr. Thomas make any contemporaneous entries into the actual log book and had not spoken with Mr. Thomas. He could not state with factual specificity any details of Mr. Thomas' training and expertise in order to certify that the calibration of [\*3] the Stalker unit or the certificate of accuracy was correct. D.R.E. 803(6). After further argument on the issue, the Court made a, evidentiary ruling that pursuant to D.R.E. 803(6) that the records were not admissible under the Business Records Rule.

Officer Coyle testified that the posted speed limit on Route 202 at the subject location was 45 miles per hour. He testified based upon his training and experience the defendant was exceeding the speed limit by a "large degree."

Officer Coyle testified that he made a U-turn and proceeded northbound and got behind the defendant's vehicle and observed erratic driving. Officer Coyle testified the defendant could not keep his motor vehicle within the lane and Officer Coyle therefore activated his emergency equipment. Officer Coyle testified the defendant made an abrupt turn into the Fairfax Shopping Center. At all times, Officer Coyle testified he was approximately fifty (50) feet from the defendant's vehicle.

Officer Coyle testified that the defendant "moved into the center lane" and "back in the right lane with his wheels crossing the dotted line, approximately two to three times." Officer Coyle identified the defendant in the Courtroom. [\*4]

Officer Coyle testified that there was "very light" traffic conditions as far as traffic flow. He testified that possibly "one or two cars" were driving on Route 202 at the time of the traffic stop of the defendant. Officer Coyle testified that he has had no previously maintenance problems with his speedometer in his 1998 Ford Crown Victoria patrol car.

Next, Officer Coyle testified that he contacted the defendant in his driver's seat of his motor vehicle and could detect a "strong to moderate" odor of alcoholic beverages. Officer Coyle testified the defendant's eyes were "very blood shot" and his speech was "slurred." Officer Coyle testified he advised defendant he was stopped for speeding. The defendant produced his driver's license, insurance and registration card "with no difficulty." Officer Coyle testified at that time defendant's eyes were also "glassy" and that the defendant informed him when questioned that he said "I had two beers."

#### A. The Alphabet Test

Officer Coyle testified he advised the defendant he was going to give him a standard field sobriety test. First, Officer Coyle testified that he fully explained the alphabet test and instructed the defendant to [\*5] state, "A to Z" in a clear concise voice. Officer Coyle testified while he started to write the numbers on his hand that the defendant missed, the defendant "missed and transposed too numerous letters to write down." Based upon this performance Officer Coyle testified the defendant failed the alphabet test.

#### B. The HGN Test

Next, Officer Coyle testified he administered the HGN test to the defendant. After a proper foundation was laid by the State, the Court ruled that the prosecutor had met the foundation requirements required in *Zimmerman v. State, Del. Supr.*, 693 A.2d 311 (1997). n1

n1 Footnote no. 8 in *Zimmerman* sets forth the requirements that must be laid by the investigating officer that the HDN test was performed in accordance with the National Highway Traffic Safety Administration ("NHTSA") standards which inter alia include a correlation between alcohol ingestion and nysgatmus; how other possible causes might be marked; what margin of error has been shown in statistical surveys; and cause of observed symptoms of staginess. Without going into the factual record following legal argument, the Court was satisfied that the State laid such a proper foundation in the trial record.

[\*6]

Officer Coyle testified that the defendant had four (4) or more "clues" and that the HGN test was 65% reliable with a 35% error that the defendant may be impaired or under the influence.

#### C. Walk and Turn Test

Next, Officer Coyle administered the walk and turn test to the defendant. Officer Coyle testified he instructed the defendant to stand facing him, and walk heel to toe for nine (9) steps; make a pivot turn and walk nine (9) steps backward. He explained to the defendant that he was instructed to keep his "arms down at all times," and the defendant indicated he understood that test.

Officer Coyle testified the first nine (9) steps, the defendant "wobbled, swayed, and had poor balance." On the third step Officer Coyle testified the defendant stepped off the line, and there was "no heel to toe" on the second step.

Officer Coyle testified that the defendant correctly took a pivot step and turned "okay," although the turn was "slow and hesitant." Officer Coyle testified that on the second nine (9) steps backward the defendant also "wobbled and swayed" and stepped off the line on the tenth step, and took eleven (11) steps instead of nine (9) steps. Based upon this performance, [\*7] Officer Coyle testified the defendant failed the walk and turn test.

#### D. One-Legged Stand Test

Next, defendant was asked to perform the one-legged stand. At this point, Officer Coyle testified the defendant stated, "I can't do it because I have a hernia." Officer Coyle testified that prior to the administration of all field tests at the scene he asked the defendant whether he had "any injuries" or "disabilities" that would prevent him from performing the field tests and the defendant had previously indicated he "did not."

#### E. Finger to Nose Test

Next, Officer Coyle administered the finger-to-nose test. He advised the defendant through instructions to stand with his feet together, eyes closed, with his palms upward and instructed to touch the tip of the finger on the tip of his nose that he touches. Officer Coyle testified the defendant's body swayed "in the beginning of the test" but the defendant completed the right and left index finger correctly.

Officer Coyle testified that in his eleven (11) years of experience he has dealt with "300 D.U.I.s and approximately thousands of individuals under the influence." He testified he looks at such factors that include demeanor, [\*8] ability to communicate, ability to follow instructions and breath, speech, condition of the eyes, and moderate to strong odors of

alcohol. Based upon his experience Officer Coyle concluded that he believed the defendant was under the influence and his ability to drive a motor vehicle was impaired. Officer Coyle testified he based this conclusion on the odor of alcoholic beverages on the defendant, the field test results, defendant's demeanor, and his bloodshot, glassy eyes.

On cross-examination Officer Coyle testified that he believed the finger to nose test results were a "draw" because defendant swayed. Officer Coyle conceded that the defendant performed the test and listened to the instructions correctly and touched the tip of his nose with the proper fingers correctly. Officer Coyle testified that the order of the test was alphabet; HGN; walk and turn; and finger to nose. Officer Coyle testified he would have administered the PBT and usually does but could not have the necessary PBT brought to the scene.

Officer Coyle testified that he intended to turn left at Foulk Road and he believed the defendant had a green light because he had a green light. He testified the next light [\*9] on Route 202 would have been Independence Mall and Route 41 respectively. Officer Coyle testified that he put on his emergency equipment after the Route 141 intersection green light at Route 202 and then noticed the defendant move out of lane. Officer Coyle testified the defendant crossed the lane and "the tires went over the lane on each side two to three times." Officer Coyle testified that when he put the emergency equipment on his vehicle he had a basis to stop the defendant who pulled in the "big parking lot at the Acme" at a 45-degree angle. Officer Coyle testified that this was not "a safe place to park" although there was no other traffic around.

Officer Coyle testified he noticed the defendant had a "moderate to strong" odor of alcohol and that his AIR report indicate the eyes were "bloodshot" and "glassy." Officer Coyle testified his AIR report indicated the defendant's speech was "fair, sometimes slurred."

Officer Coyle testified the defendant made a "normal exit" from his motor vehicle. He testified that the field tests were performed in an area some distance away from his motor vehicle and that the defendant had "no trouble when walking normally." n2

n2 This was further explained in the record that the "normal walking" was when defendant was not performing the subject field tests.

[\*10]

Officer Coyle testified that the most "number of clues" a defendant can display when given HGN test is six (6) and that the choices for results of the HGN are zero (0), two (2), four (4), or six (6). He testified that the percent of reliability for HGN test for four is 65% chance the defendant is under the influence or alternatively, 35% not under the influence when four (4) clues are indicated. Officer Coyle testified that the more clues indicated the more accurate the test. Officer Coyle could not testify from his training and experience at the Police Academy what the percentage of accuracy was when six (6) clues are indicated but agreed with defense counsel that it was probably 77%. Officer Coyle testified that he is comfortable in concluding that he followed the NHTSA guidelines in instructing this defendant and performing the HGN test.

Officer Coyle testified that the defendant's clothing was "orderly, blue jeans and white sneakers" and that defendant's face was "normal" and that the attitude was "polite and cooperative" and the defendant's demeanor was "fine."

With regards to the heel to toe test, Officer Coyle testified he could not remember whether the defendant performed [\*11] the test on an imaginary line or on a white line in the parking lot. Officer Coyle reiterated his testimony that the defendant took steps and missed heel to toe on the second step and stepped off the line on the third step and performed the test eight (8) of the nine (9) steps on the line and never raised his arms on the first nine (9) steps. Officer Coyle testified the defendant missed the heel to toe once and stepped off the line on the tenth step.

With regards to the finger-to-nose, Officer Coyle testified the defendant's performance was "even" even though the defendant touched his nose correctly on both tests on his right and left hands.

### The Law

As provided in *Spinks v. State, Del. Supr., 571 A.2d 788 (1990)*, probable cause is defined as follows:

Under Delaware law, [HN1] a police officer is authorized to make a warrantless arrest and search when he has probable cause to believe that a crime or a violation of the Motor Vehicle Code has been committed. *21 Del. C. § 701; Garner v. State, Del. Supr., 314 A.2d 908, 910 (1973)*. [HN2] Probable cause is an elusive concept which is not subject to precise definition. It lies, 'somewhere between [\*12] suspicion and sufficient evidence to convict' and 'exists when the facts and circumstances within . . . [the officer's] knowledge . . . [are] sufficient in themselves to warrant a man of reasonable caution in the belief that an offense has been or is being committed. *State v. Cochran, Del. Supr., 372 A.2d 193, 195 (1977)* (internal quotations omitted); *Thompson v. State, Del. Supr., 539 A.2d 1052, 1055 (1988)*. Specifically, when there is probable cause that an offense which involves driving under the influence has been committed, a police officer may take all of the steps which the officer took in this case. See, *State v. Cooliey, Del. Supr., 457 A.2d 352, 354 (1983)*. (emphasis supplied)

Under *State v. Maxwell, Del. Supr., 624 926, 929-30 (1993)*, probable cause is defined further:[HN3]

[A] police officer has probable cause to believe a defendant has violated *21 Del. C. § 4177* . . . 'when the officer possesses' information which would warrant a reasonable man in believing that [such] a crime has been committed. *Clendeniel v. Voshell, Del. Supr., 562 A.2d 1167, 1170 (1989)* . . . [HN4] A finding of [\*13] probable cause does not require the police officer to uncover information sufficient to prove a suspect's guilt beyond a reasonable doubt or even to prove that guilt is more likely than not. (citation omitted). . . [HN5] the possibility there may be a hypothetically innocent explanation for each of several facts revealed during the course of an investigation does not preclude a determination that probable cause exists for an arrest. (citation omitted) . . . [HN6] 'probable cause exists where the facts and circumstances within [the officer's] knowledge and of which they had reasonable trustworthy information [are] sufficient in themselves to warrant a man of reasonable caution in the belief that 'an offense has been or is being committed.' (citation omitted)

See, also *Delaware v. Prouse, 440 U.S. 663 (1979)*; *Coleman v. State, Del. Supr., 562 A.2d 1171, 1174 (1989)*.

### Sec. 4177. Driving a vehicle while under the influence; evidence; arrests; and penalties.

(a) No person shall drive a vehicle:

- (1) When the person is under the influence of alcohol;
- (2) When the person is under the influence of any drug;
- (3) When the person is [\*14] under the influence of a combination of alcohol and any drug;
- (4) When the person's alcohol concentration is .10 or more; or
- (5) When the person's alcohol concentration is, within 4 hours after the time of driving, .10 or more.

(b) In a prosecution for a violation of subsection (a) of this section:

- (1) the fact that any person charged with violating this section is, or has been, legally entitled to use alcohol or a drug shall not constitute a defense.
- (2) Repealed.

(3) The charging document may allege a violation of subsection (a) without specifying any particular subparagraph of subsection (1) and the prosecution may seek conviction under any of the subparagraphs of subsection (a).

(c) For purposes of subchapter III of Chapter 27 of this title, this section and § 4177B of this title, the following definitions shall apply:

(1) "Alcohol concentration of .10 or more" shall mean:

a. An amount of alcohol in a sample of a person's blood equivalent to .10 or more grams of alcohol per hundred milliliters of blood; or

b. An amount of alcohol in a sample of a person's breath equivalent of .10 or more grams per two hundred ten liters of breath.

(2) "Chemical test" or [\*15] "test" shall include any form or method of analysis of a person's blood, breath or urine for the purposes of determining alcohol concentration or the presence of drugs which is approved for use by the Forensic Sciences Laboratory, Office of Chief Medical Examiner, the Delaware State Police Crime Laboratory, any state or federal law enforcement agency, or any hospital or medical laboratory. It shall not, however, include a preliminary screening test of breath performed in order to estimate the alcohol concentration of a person at the scene of a stop or other initial encounter between an officer and the person.

(3) "Drive" shall include driving, operating, or having actual physical control of a vehicle.

(4) "Vehicle" shall include any vehicle as defined in § 101(48) of this title, any off-highway vehicle as defined in § 101(54) of this title and any moped as defined in § 101(53) of this title.

(5) "While under the influence" shall mean that the person is, because of alcohol or drugs or a combination of both, less able than the person would ordinarily have been, either mentally or physically, to exercise clear judgment, sufficient physical control, or due care in the driving of [\*16] a vehicle.

(6) "Alcohol concentration of .20 or more" shall mean:

a. An amount of alcohol in a sample of a person's blood equivalent to .20 ore more grams of alcohol per hundred milliliters of blood; or

b. An amount of alcohol in a sample of a person's breath equivalent to 20 or more grams per two hundred ten liters of breath.

...

(g) For purposes of a conviction premised upon subsection (a) of this section, or any proceeding pursuant to this Code in which an issue is whether a person was driving a vehicle while under the influence, evidence establishing the presence and concentration of alcohol or drugs in the person's blood, breath or urine shall be relevant and admissible. Such evidence may include the results from tests of samples of the person's blood, breath or urine taken within 4 hours after the time of driving or at some later time. In any proceeding, the resulting alcohol or drug concentration reported when a test, as defined in subsection (c)(2) of this section, is performed shall be deemed to be the actual alcohol or drug concentration in the person's blood, breath or urine without regard to any margin of error or tolerance factor inherent in such tests. [\*17]

(1) Evidence of an alcohol concentration of .05 or less in a person's blood, breath or urine sample taken within 4 hours of driving and tested as defined in subsection (c)(2) of this section is prima facie evidence that the person was not under the influence of alcohol within the meaning of this statute. Evidence of an alcohol concentration of more than .05 but less than .10 in a person's blood, breath or urine sample taken within 4 hours of driving and tested as defined in subsection (c)(2) of this section shall not give rise to any presumption that the person was or was not under the influence of alcohol, but such fact

may be considered with other competent evidence in determining whether the person was under the influence of alcohol.  
(emphasis supplied)

### Opinion and Order

The Court of Common Pleas must make a determination in this trial record under the "totality of the circumstances" as viewed by reasonable police officer in light of his training and experience whether Officer Coyle had, in fact, probable cause to conclude that the defendant was driving under the influence of alcoholic liquor or drugs. *21 Del. C. § 4177(a), State v. Quinn*, Del. [\*18] Super., Cr. A. No. N94-08-1657AC, Gebelein, J. (March 8, 1995).

With regard to evidence that exists in the record to support a finding of probable cause, the record indicates that the defendant was speeding at the time he was stopped by Officer Coyle. The record indicates the defendant crossed the center and right traffic dotted lines approximately two to three (2-3) times. The defendant had a "strong to moderate odor" of alcoholic beverages on his person. The defendant's eyes were "very bloodshot" and his speech was "fair, sometimes slurred." There was an admission by the defendant that he had been drinking alcoholic beverages on the night in question. The evidence indicates the defendant clearly failed the alphabet test, failed the HGN test with four or more clues with a reliability rate of 65% that the defendant may be impaired or under the influence.

With regards to the walk and turn test, the defendant "wobbled, swayed, and had poor balance" but missed only the third step on the front nine (9) steps and the heel to toe step. The defendant performed adequately on the pivot step and took two (2) additional steps on the back nine (9) steps in the walk and turn test. The Court considers [\*19] these facts an adequate performance, or "pass" on the walk and turn test.

With regard to the one-legged stand, the defendant refused that test, even though earlier he had indicated he no injuries or disabilities that would prevent him from performing the standard field tests.

With regards to the finger to nose test, the defendant passed the test with both right and left index finger correctly.

With regards to evidence that exists in the defendant's favor, Officer Coyle's AIR report and testimony at trial indicated the defendant's speech was "fair, sometimes slurred." n3 Defendant had a "normal exit" from his motor vehicle and walked "normally" when not performing the field tests. The defendant produced his driver's license, registration card and insurance card without difficulty to Officer Coyle. Defendant's clothing was "orderly" and the defendant's face was "normal" and the defendant's attitude was "polite and cooperative." The defendant's demeanor was listed on the AIR report as "fine." The Court believes the defendant passed the walk and turn test sufficiently. The defendant also passed the finger to nose test successfully.

n3 This is a "mixed" factor which the Court weighs in part for the defendant, and in part, against the defendant.

[\*20]

As stated in *Higgins v. Shahan*, Del. Super., Civ. A. No. 94A-06-006, Lee, J. (January 18, 1995) these "facts support a determination of probable cause to have arrested [defendant] for violating *21 Del. C. § 4177(a)*. Other similar cases are in accord. See, *State v. Maxwell*, 624 A.2d at 931 (accident, strong odor of alcohol, defendant driver's admission of drinking and defendant's dazed appearance provided probable cause); *Glass v. State*, Del. Supr., No. 5, 1988, Walsh, J. (June 13, 1988) (accident, odor of alcohol on defendant's breath, and defendant's confused and disoriented state were sufficient to establish probable cause); *Spinks v. State*, Del. Supr., No. 481, 1988, Christie, C.J. (January 17, 1990) (accident, defendant's deliberate, unnatural movements, defendant's smell of alcohol, and his wandering into the roadway twice were sufficient to establish probable cause); *State v. Otto*, Del. Super., C.A. No. IK-93-04-0109, Steele, R.J. (November 12, 1993) (accident, defendant's smelling of alcohol, defendant's slurred speech

and bloodshot eyes, and his admission of having visited a bar established probable cause); *State v. Gunter*, Del. [\*21] Super., Cr. A. No. S93-02-0485A, Lee, J. (May 28, 1993) (accident, defendant's admission he was the driver, the odor of alcohol emanating from defendant, an open beer container in the disabled car, defendant's glassy, bloodshot eyes, and defendant's unsteady walk were sufficient to establish probable cause).

As stated in *Price v. Voshell*, Del. Super., C.A. No. 90A-12-1, AP, Barron, J. (May 10, 1991):

While a combination of odor of alcohol plus bloodshot and watery eyes and mumbled or slurred speech without more could arguably not constitute probable cause to believe a violation of § 4177(a) had occurred, see: *Esham v. Voshell*, Del. Super., C.A. No. 86A-SE-1, Chandler, J., slip op. (March 2, 1987) (speed and odor of alcohol, standing alone, do not constitute probable cause to believe the driver was driving in violation of 21 Del. C. § 4177(a); *State v. Silva*, CCP Cr. A. No. 90-03-0678, Bradley, J. (Aug. 28, 1990) (accident and odor of alcohol does not constitute probable cause for drawing the offender's blood), I conclude that the addition of a PBT test failure to that combination clearly passes the probable cause threshold.

Under the facts of the case, the [\*22] Court concludes the record supports a finding of probable cause to believe the defendant was operating his motor vehicle in violation of 21 Del. C. § 4177(a). The Court requests that the matter be docketed for trial at the Court's earliest convenience with notice to counsel of record.

**IT IS SO ORDERED THIS 23rd day of September, 1999.**

**STATE OF DELAWARE v. RICHARD SABOL****Cr. A. No.: 9902001043****COURT OF COMMON PLEAS OF DELAWARE, NEW CASTLE***1999 Del. C.P. LEXIS 31***September 19, 1999, Submitted****September 23, 1999, Decided****CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant brought a motion to suppress arguing that a police officer did not have probable cause to believe that defendant was operating his motor vehicle in violation of *Del. Code Ann. tit. 21, § 4177(a)*.

**OVERVIEW:** Defendant brought a motion to suppress. Defendant argued that police officer did not have probable cause to believe that defendant was operating his motor vehicle in violation of *Del. Code Ann. tit. 21, § 4177(a)*. The court concluded that the record supported a finding of probable cause. Defendant had failed several field sobriety tests administered to him by the police officer. Thus, the court held that the totality of the circumstances gave the police officer probable cause to suspect that defendant was driving under the influence of alcohol or drugs.

**OUTCOME:** The court denied defendant's motion to suppress, holding that the record supported the police officer's belief that probable cause existed to conclude that defendant was driving under the influence of alcohol or drugs.

**CORE TERMS:** probable cause, alcohol, breath, blood, walk, driving, odor of alcohol, motor vehicle, finger, nose, lane, alcohol concentration, bloodshot, correctly, driver, clues, heel, toe, police officer, concentration, performing, swayed, missed, administered, influence of alcohol, amount of alcohol, alphabet, alcoholic, demeanor, moderate

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Arrests > Probable Cause*

*Criminal Law & Procedure > Arrests > Warrantless Arrest*

*Criminal Law & Procedure > Search & Seizure > Warrantless Searches > General Overview*

[HN1] A police officer is authorized to make a warrantless arrest and search when he has probable cause to believe that a crime or a violation of the Motor Vehicle Code has been committed.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

*Criminal Law & Procedure > Arrests > Probable Cause*

[HN2] Probable cause is an elusive concept which is not subject to precise definition. It lies, somewhere between

suspicion and sufficient evidence to convict and exists when the facts and circumstances within the officer's knowledge are sufficient in themselves to warrant a man of reasonable caution in the belief that an offense has been or is being committed. Specifically, when there is probable cause that an offense which involves driving under the influence has been committed, a police officer may take all of the steps which the officer took in this case.

***Criminal Law & Procedure > Arrests > Probable Cause***

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge***

[HN3] A police officer has probable cause to believe a defendant has violated *Del. Code Ann. tit. 21, § 4177* when the officer possesses information which would warrant a reasonable man in believing that such a crime has been committed.

***Criminal Law & Procedure > Arrests > Probable Cause***

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge***

[HN4] A finding of probable cause does not require the police officer to uncover information sufficient to prove a suspect's guilt beyond a reasonable doubt or even to prove that guilt is more likely than not.

***Criminal Law & Procedure > Arrests > Probable Cause***

[HN5] The possibility there may be a hypothetically innocent explanation for each of several facts revealed during the course of an investigation does not preclude a determination that probable cause exists for an arrest.

***Criminal Law & Procedure > Arrests > Probable Cause***

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Particularity***

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > Personal Knowledge***

[HN6] Probable cause exists where the facts and circumstances within the officer's knowledge and of which they had reasonable trustworthy information are sufficient in themselves to warrant a man of reasonable caution in the belief that an offense has been or is being committed.

**COUNSEL:** [\*1] R. David Favata, Esquire, Deputy Attorney General, Department of Justice, Wilmington, DE, Attorney for State.

Louis B. Ferrara, Esquire, Louis B. Ferrara, P. A., Wilmington, DE, Attorney for Defendant.

**JUDGES:** JOHN K. WELCH, ASSOCIATE JUDGE.

**OPINION BY:** JOHN K. WELCH

**OPINION:**

**ORDER AND DECISION ON DEFENDANT'S MOTION TO SUPPRESS**

On Monday, September 19, 1999, the Court heard defendant's Motion to Suppress which was previously filed and docketed with the Court Clerk on April 26, 1999. After carefully reviewing the evidence presented and testimony received, the Court finds the following facts to be supported by the trial record.

**The Facts**

Corporal Lawrence T. Coyle ("Officer" or "Trooper Coyle") is employed by the Delaware State Police and was so employed on January 30, 1999 at 1:40 a.m. on patrol in the vicinity of Route 202 in New Castle County, Delaware. At

that location, Trooper Coyle testified he observed a 1998 Olds Caravan, gold in color, traveling northbound on Route 202. Officer Coyle testified the vehicle appeared to be travelling at a "high rate of speed." Officer Coyle testified he had been stopped in the left turn lane at Foulk Road southbound on Route 202 when [\*2] he observed the defendant's vehicle and therefore activated his Stalker Radar in a stationery mode and received a reading. Officer Coyle testified that he is trained and certified in the use of the Stalker Radar device in 1989 at Police Headquarters and has received an 8-hour class at the Academy on the Stalker unit.

At this point, through direct examination of Office Coyle, the State attempted to lay a foundation to lay the necessary foundation to establish that the Stalker radar unit in question used. Defendant's counsel requested voir dire of the witness.

It was established in the record that Mr. Willie Thomas of the Division of Communications was the author of the calibration log. No actual logs were presented to the Court for review. Nor were the originals of the certification logs produced in Court. Officer Coyle testified that he had never met Mr. Thomas of the Division of Communications. Officer Coyle testified he never observed Mr. Thomas make any contemporaneous entries into the actual log book and had not spoken with Mr. Thomas. He could not state with factual specificity any details of Mr. Thomas' training and expertise in order to certify that the calibration of [\*3] the Stalker unit or the certificate of accuracy was correct. D.R.E. 803(6). After further argument on the issue, the Court made a, evidentiary ruling that pursuant to D.R.E. 803(6) that the records were not admissible under the Business Records Rule.

Officer Coyle testified that the posted speed limit on Route 202 at the subject location was 45 miles per hour. He testified based upon his training and experience the defendant was exceeding the speed limit by a "large degree."

Officer Coyle testified that he made a U-turn and proceeded northbound and got behind the defendant's vehicle and observed erratic driving. Officer Coyle testified the defendant could not keep his motor vehicle within the lane and Officer Coyle therefore activated his emergency equipment. Officer Coyle testified the defendant made an abrupt turn into the Fairfax Shopping Center. At all times, Officer Coyle testified he was approximately fifty (50) feet from the defendant's vehicle.

Officer Coyle testified that the defendant "moved into the center lane" and "back in the right lane with his wheels crossing the dotted line, approximately two to three times." Officer Coyle identified the defendant in the Courtroom. [\*4]

Officer Coyle testified that there was "very light" traffic conditions as far as traffic flow. He testified that possibly "one or two cars" were driving on Route 202 at the time of the traffic stop of the defendant. Officer Coyle testified that he has had no previously maintenance problems with his speedometer in his 1998 Ford Crown Victoria patrol car.

Next, Officer Coyle testified that he contacted the defendant in his driver's seat of his motor vehicle and could detect a "strong to moderate" odor of alcoholic beverages. Officer Coyle testified the defendant's eyes were "very blood shot" and his speech was "slurred." Officer Coyle testified he advised defendant he was stopped for speeding. The defendant produced his driver's license, insurance and registration card "with no difficulty." Officer Coyle testified at that time defendant's eyes were also "glassy" and that the defendant informed him when questioned that he said "I had two beers."

#### A. The Alphabet Test

Officer Coyle testified he advised the defendant he was going to give him a standard field sobriety test. First, Officer Coyle testified that he fully explained the alphabet test and instructed the defendant to [\*5] state, "A to Z" in a clear concise voice. Officer Coyle testified while he started to write the numbers on his hand that the defendant missed, the defendant "missed and transposed too numerous letters to write down." Based upon this performance Officer Coyle testified the defendant failed the alphabet test.

#### B. The HGN Test

Next, Officer Coyle testified he administered the HGN test to the defendant. After a proper foundation was laid by the State, the Court ruled that the prosecutor had met the foundation requirements required in *Zimmerman v. State, Del. Supr.*, 693 A.2d 311 (1997). n1

n1 Footnote no. 8 in *Zimmerman* sets forth the requirements that must be laid by the investigating officer that the HDN test was performed in accordance with the National Highway Traffic Safety Administration ("NHTSA") standards which inter alia include a correlation between alcohol ingestion and nysgatmus; how other possible causes might be marked; what margin of error has been shown in statistical surveys; and cause of observed symptoms of staginess. Without going into the factual record following legal argument, the Court was satisfied that the State laid such a proper foundation in the trial record.

[\*6]

Officer Coyle testified that the defendant had four (4) or more "clues" and that the HGN test was 65% reliable with a 35% error that the defendant may be impaired or under the influence.

#### C. Walk and Turn Test

Next, Officer Coyle administered the walk and turn test to the defendant. Officer Coyle testified he instructed the defendant to stand facing him, and walk heel to toe for nine (9) steps; make a pivot turn and walk nine (9) steps backward. He explained to the defendant that he was instructed to keep his "arms down at all times," and the defendant indicated he understood that test.

Officer Coyle testified the first nine (9) steps, the defendant "wobbled, swayed, and had poor balance." On the third step Officer Coyle testified the defendant stepped off the line, and there was "no heel to toe" on the second step.

Officer Coyle testified that the defendant correctly took a pivot step and turned "okay," although the turn was "slow and hesitant." Officer Coyle testified that on the second nine (9) steps backward the defendant also "wobbled and swayed" and stepped off the line on the tenth step, and took eleven (11) steps instead of nine (9) steps. Based upon this performance, [\*7] Officer Coyle testified the defendant failed the walk and turn test.

#### D. One-Legged Stand Test

Next, defendant was asked to perform the one-legged stand. At this point, Officer Coyle testified the defendant stated, "I can't do it because I have a hernia." Officer Coyle testified that prior to the administration of all field tests at the scene he asked the defendant whether he had "any injuries" or "disabilities" that would prevent him from performing the field tests and the defendant had previously indicated he "did not."

#### E. Finger to Nose Test

Next, Officer Coyle administered the finger-to-nose test. He advised the defendant through instructions to stand with his feet together, eyes closed, with his palms upward and instructed to touch the tip of the finger on the tip of his nose that he touches. Officer Coyle testified the defendant's body swayed "in the beginning of the test" but the defendant completed the right and left index finger correctly.

Officer Coyle testified that in his eleven (11) years of experience he has dealt with "300 D.U.I.s and approximately thousands of individuals under the influence." He testified he looks at such factors that include demeanor, [\*8] ability to communicate, ability to follow instructions and breath, speech, condition of the eyes, and moderate to strong odors of

alcohol. Based upon his experience Officer Coyle concluded that he believed the defendant was under the influence and his ability to drive a motor vehicle was impaired. Officer Coyle testified he based this conclusion on the odor of alcoholic beverages on the defendant, the field test results, defendant's demeanor, and his bloodshot, glassy eyes.

On cross-examination Officer Coyle testified that he believed the finger to nose test results were a "draw" because defendant swayed. Officer Coyle conceded that the defendant performed the test and listened to the instructions correctly and touched the tip of his nose with the proper fingers correctly. Officer Coyle testified that the order of the test was alphabet; HGN; walk and turn; and finger to nose. Officer Coyle testified he would have administered the PBT and usually does but could not have the necessary PBT brought to the scene.

Officer Coyle testified that he intended to turn left at Foulk Road and he believed the defendant had a green light because he had a green light. He testified the next light [\*9] on Route 202 would have been Independence Mall and Route 41 respectively. Officer Coyle testified that he put on his emergency equipment after the Route 141 intersection green light at Route 202 and then noticed the defendant move out of lane. Officer Coyle testified the defendant crossed the lane and "the tires went over the lane on each side two to three times." Officer Coyle testified that when he put the emergency equipment on his vehicle he had a basis to stop the defendant who pulled in the "big parking lot at the Acme" at a 45-degree angle. Officer Coyle testified that this was not "a safe place to park" although there was no other traffic around.

Officer Coyle testified he noticed the defendant had a "moderate to strong" odor of alcohol and that his AIR report indicate the eyes were "bloodshot" and "glassy." Officer Coyle testified his AIR report indicated the defendant's speech was "fair, sometimes slurred."

Officer Coyle testified the defendant made a "normal exit" from his motor vehicle. He testified that the field tests were performed in an area some distance away from his motor vehicle and that the defendant had "no trouble when walking normally." n2

n2 This was further explained in the record that the "normal walking" was when defendant was not performing the subject field tests.

[\*10]

Officer Coyle testified that the most "number of clues" a defendant can display when given HGN test is six (6) and that the choices for results of the HGN are zero (0), two (2), four (4), or six (6). He testified that the percent of reliability for HGN test for four is 65% chance the defendant is under the influence or alternatively, 35% not under the influence when four (4) clues are indicated. Officer Coyle testified that the more clues indicated the more accurate the test. Officer Coyle could not testify from his training and experience at the Police Academy what the percentage of accuracy was when six (6) clues are indicated but agreed with defense counsel that it was probably 77%. Officer Coyle testified that he is comfortable in concluding that he followed the NHTSA guidelines in instructing this defendant and performing the HGN test.

Officer Coyle testified that the defendant's clothing was "orderly, blue jeans and white sneakers" and that defendant's face was "normal" and that the attitude was "polite and cooperative" and the defendant's demeanor was "fine."

With regards to the heel to toe test, Officer Coyle testified he could not remember whether the defendant performed [\*11] the test on an imaginary line or on a white line in the parking lot. Officer Coyle reiterated his testimony that the defendant took steps and missed heel to toe on the second step and stepped off the line on the third step and performed the test eight (8) of the nine (9) steps on the line and never raised his arms on the first nine (9) steps. Officer Coyle testified the defendant missed the heel to toe once and stepped off the line on the tenth step.

With regards to the finger-to-nose, Officer Coyle testified the defendant's performance was "even" even though the defendant touched his nose correctly on both tests on his right and left hands.

### **The Law**

As provided in *Spinks v. State, Del. Supr., 571 A.2d 788 (1990)*, probable cause is defined as follows:

Under Delaware law, [HN1] a police officer is authorized to make a warrantless arrest and search when he has probable cause to believe that a crime or a violation of the Motor Vehicle Code has been committed. *21 Del. C. § 701; Garner v. State, Del. Supr., 314 A.2d 908, 910 (1973)*. [HN2] Probable cause is an elusive concept which is not subject to precise definition. It lies, 'somewhere between [\*12] suspicion and sufficient evidence to convict' and 'exists when the facts and circumstances within . . . [the officer's] knowledge . . . [are] sufficient in themselves to warrant a man of reasonable caution in the belief that an offense has been or is being committed. *State v. Cochran, Del. Supr., 372 A.2d 193, 195 (1977)* (internal quotations omitted); *Thompson v. State, Del. Supr., 539 A.2d 1052, 1055 (1988)*. Specifically, when there is probable cause that an offense which involves driving under the influence has been committed, a police officer may take all of the steps which the officer took in this case. See, *State v. Cooliey, Del. Supr., 457 A.2d 352, 354 (1983)*. (emphasis supplied)

Under *State v. Maxwell, Del. Supr., 624 926, 929-30 (1993)*, probable cause is defined further:[HN3]

[A] police officer has probable cause to believe a defendant has violated *21 Del. C. § 4177* . . . 'when the officer possesses' information which would warrant a reasonable man in believing that [such] a crime has been committed. *Clendeniel v. Voshell, Del. Supr., 562 A.2d 1167, 1170 (1989)* . . . [HN4] A finding of [\*13] probable cause does not require the police officer to uncover information sufficient to prove a suspect's guilt beyond a reasonable doubt or even to prove that guilt is more likely than not. (citation omitted). . . [HN5] the possibility there may be a hypothetically innocent explanation for each of several facts revealed during the course of an investigation does not preclude a determination that probable cause exists for an arrest. (citation omitted) . . . [HN6] 'probable cause exists where the facts and circumstances within [the officer's] knowledge and of which they had reasonable trustworthy information [are] sufficient in themselves to warrant a man of reasonable caution in the belief that 'an offense has been or is being committed.' (citation omitted)

See, also *Delaware v. Prouse, 440 U.S. 663 (1979)*; *Coleman v. State, Del. Supr., 562 A.2d 1171, 1174 (1989)*.

### **Sec. 4177. Driving a vehicle while under the influence; evidence; arrests; and penalties.**

(a) No person shall drive a vehicle:

- (1) When the person is under the influence of alcohol;
- (2) When the person is under the influence of any drug;
- (3) When the person is [\*14] under the influence of a combination of alcohol and any drug;
- (4) When the person's alcohol concentration is .10 or more; or
- (5) When the person's alcohol concentration is, within 4 hours after the time of driving, .10 or more.

(b) In a prosecution for a violation of subsection (a) of this section:

- (1) the fact that any person charged with violating this section is, or has been, legally entitled to use alcohol or a drug shall not constitute a defense.
- (2) Repealed.

(3) The charging document may allege a violation of subsection (a) without specifying any particular subparagraph of subsection (1) and the prosecution may seek conviction under any of the subparagraphs of subsection (a).

(c) For purposes of subchapter III of Chapter 27 of this title, this section and § 4177B of this title, the following definitions shall apply:

(1) "Alcohol concentration of .10 or more" shall mean:

- a. An amount of alcohol in a sample of a person's blood equivalent to .10 or more grams of alcohol per hundred milliliters of blood; or
- b. An amount of alcohol in a sample of a person's breath equivalent of .10 or more grams per two hundred ten liters of breath.

(2) "Chemical test" or [\*15] "test" shall include any form or method of analysis of a person's blood, breath or urine for the purposes of determining alcohol concentration or the presence of drugs which is approved for use by the Forensic Sciences Laboratory, Office of Chief Medical Examiner, the Delaware State Police Crime Laboratory, any state or federal law enforcement agency, or any hospital or medical laboratory. It shall not, however, include a preliminary screening test of breath performed in order to estimate the alcohol concentration of a person at the scene of a stop or other initial encounter between an officer and the person.

(3) "Drive" shall include driving, operating, or having actual physical control of a vehicle.

(4) "Vehicle" shall include any vehicle as defined in § 101(48) of this title, any off-highway vehicle as defined in § 101(54) of this title and any moped as defined in § 101(53) of this title.

(5) "While under the influence" shall mean that the person is, because of alcohol or drugs or a combination of both, less able than the person would ordinarily have been, either mentally or physically, to exercise clear judgment, sufficient physical control, or due care in the driving of [\*16] a vehicle.

(6) "Alcohol concentration of .20 or more" shall mean:

- a. An amount of alcohol in a sample of a person's blood equivalent to .20 ore more grams of alcohol per hundred milliliters of blood; or
- b. An amount of alcohol in a sample of a person's breath equivalent to 20 or more grams per two hundred ten liters of breath.

...

(g) For purposes of a conviction premised upon subsection (a) of this section, or any proceeding pursuant to this Code in which an issue is whether a person was driving a vehicle while under the influence, evidence establishing the presence and concentration of alcohol or drugs in the person's blood, breath or urine shall be relevant and admissible. Such evidence may include the results from tests of samples of the person's blood, breath or urine taken within 4 hours after the time of driving or at some later time. In any proceeding, the resulting alcohol or drug concentration reported when a test, as defined in subsection (c)(2) of this section, is performed shall be deemed to be the actual alcohol or drug concentration in the person's blood, breath or urine without regard to any margin of error or tolerance factor inherent in such tests. [\*17]

(1) Evidence of an alcohol concentration of .05 or less in a person's blood, breath or urine sample taken within 4 hours of driving and tested as defined in subsection (c)(2) of this section is prima facie evidence that the person was not under the influence of alcohol within the meaning of this statute. Evidence of an alcohol concentration of more than .05 but less than .10 in a person's blood, breath or urine sample taken within 4 hours of driving and tested as defined in subsection (c)(2) of this section shall not give rise to any presumption that the person was or was not under the influence of alcohol, but such fact

may be considered with other competent evidence in determining whether the person was under the influence of alcohol.  
(emphasis supplied)

### Opinion and Order

The Court of Common Pleas must make a determination in this trial record under the "totality of the circumstances" as viewed by reasonable police officer in light of his training and experience whether Officer Coyle had, in fact, probable cause to conclude that the defendant was driving under the influence of alcoholic liquor or drugs. *21 Del. C. § 4177(a), State v. Quinn*, Del. [\*18] Super., Cr. A. No. N94-08-1657AC, Gebelein, J. (March 8, 1995).

With regard to evidence that exists in the record to support a finding of probable cause, the record indicates that the defendant was speeding at the time he was stopped by Officer Coyle. The record indicates the defendant crossed the center and right traffic dotted lines approximately two to three (2-3) times. The defendant had a "strong to moderate odor" of alcoholic beverages on his person. The defendant's eyes were "very bloodshot" and his speech was "fair, sometimes slurred." There was an admission by the defendant that he had been drinking alcoholic beverages on the night in question. The evidence indicates the defendant clearly failed the alphabet test, failed the HGN test with four or more clues with a reliability rate of 65% that the defendant may be impaired or under the influence.

With regards to the walk and turn test, the defendant "wobbled, swayed, and had poor balance" but missed only the third step on the front nine (9) steps and the heel to toe step. The defendant performed adequately on the pivot step and took two (2) additional steps on the back nine (9) steps in the walk and turn test. The Court considers [\*19] these facts an adequate performance, or "pass" on the walk and turn test.

With regard to the one-legged stand, the defendant refused that test, even though earlier he had indicated he no injuries or disabilities that would prevent him from performing the standard field tests.

With regards to the finger to nose test, the defendant passed the test with both right and left index finger correctly.

With regards to evidence that exists in the defendant's favor, Officer Coyle's AIR report and testimony at trial indicated the defendant's speech was "fair, sometimes slurred." n3 Defendant had a "normal exit" from his motor vehicle and walked "normally" when not performing the field tests. The defendant produced his driver's license, registration card and insurance card without difficulty to Officer Coyle. Defendant's clothing was "orderly" and the defendant's face was "normal" and the defendant's attitude was "polite and cooperative." The defendant's demeanor was listed on the AIR report as "fine." The Court believes the defendant passed the walk and turn test sufficiently. The defendant also passed the finger to nose test successfully.

n3 This is a "mixed" factor which the Court weighs in part for the defendant, and in part, against the defendant.

[\*20]

As stated in *Higgins v. Shahan*, Del. Super., Civ. A. No. 94A-06-006, Lee, J. (January 18, 1995) these "facts support a determination of probable cause to have arrested [defendant] for violating *21 Del. C. § 4177(a)*. Other similar cases are in accord. See, *State v. Maxwell*, 624 A.2d at 931 (accident, strong odor of alcohol, defendant driver's admission of drinking and defendant's dazed appearance provided probable cause); *Glass v. State*, Del. Supr., No. 5, 1988, Walsh, J. (June 13, 1988) (accident, odor of alcohol on defendant's breath, and defendant's confused and disoriented state were sufficient to establish probable cause); *Spinks v. State*, Del. Supr., No. 481, 1988, Christie, C.J. (January 17, 1990) (accident, defendant's deliberate, unnatural movements, defendant's smell of alcohol, and his wandering into the roadway twice were sufficient to establish probable cause); *State v. Otto*, Del. Super., C.A. No. IK-93-04-0109, Steele, R.J. (November 12, 1993) (accident, defendant's smelling of alcohol, defendant's slurred speech

and bloodshot eyes, and his admission of having visited a bar established probable cause); *State v. Gunter*, Del. [\*21] Super., Cr. A. No. S93-02-0485A, Lee, J. (May 28, 1993) (accident, defendant's admission he was the driver, the odor of alcohol emanating from defendant, an open beer container in the disabled car, defendant's glassy, bloodshot eyes, and defendant's unsteady walk were sufficient to establish probable cause).

As stated in *Price v. Voshell*, Del. Super., C.A. No. 90A-12-1, AP, Barron, J. (May 10, 1991):

While a combination of odor of alcohol plus bloodshot and watery eyes and mumbled or slurred speech without more could arguably not constitute probable cause to believe a violation of § 4177(a) had occurred, see: *Esham v. Voshell*, Del. Super., C.A. No. 86A-SE-1, Chandler, J., slip op. (March 2, 1987) (speed and odor of alcohol, standing alone, do not constitute probable cause to believe the driver was driving in violation of 21 Del. C. § 4177(a); *State v. Silva*, CCP Cr. A. No. 90-03-0678, Bradley, J. (Aug. 28, 1990) (accident and odor of alcohol does not constitute probable cause for drawing the offender's blood), I conclude that the addition of a PBT test failure to that combination clearly passes the probable cause threshold.

Under the facts of the case, the [\*22] Court concludes the record supports a finding of probable cause to believe the defendant was operating his motor vehicle in violation of 21 Del. C. § 4177(a). The Court requests that the matter be docketed for trial at the Court's earliest convenience with notice to counsel of record.

**IT IS SO ORDERED THIS 23rd day of September, 1999.**

Analysis

As of: Jan 31, 2007

**HOUSE v. THE STATE****No. 75172****Court of Appeals of Georgia***184 Ga. App. 724; 362 S.E.2d 429; 1987 Ga. App. LEXIS 2828***October 21, 1987, Decided****SUBSEQUENT HISTORY:** [\*\*\*1]

Rehearing Denied November 3, 1987. Certiorari Applied For.

**PRIOR HISTORY:**

D.U.I., etc. Gwinnett State Court. Before Judge Winegarden.

**DISPOSITION:***Judgment affirmed.***CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged a judgment of the Gwinnett State Court (Georgia), which entered a jury verdict convicting defendant of driving under the influence of alcohol and speeding. Defendant argued that the trial court erred in overruling his motion for a directed verdict as to both counts.

**OVERVIEW:** Defendant also argued that trial court erred in allowing a trooper to repeatedly comment on his opinion as to defendant's state of sobriety. On appeal, the court disagreed. The court first determined that ample evidence existed from which any rational trier of fact could conclude beyond a reasonable doubt that defendant was guilty of the charged offenses. Thus, the motion for directed verdict was properly denied. Likewise, the State was properly permitted to recall the trooper before its case had rested, and the trooper was properly permitted to express his opinion on defendant's sobriety. Any cumulative error that may have occurred was harmless because it was highly probable that such error did not contribute to the judgment. Further, the trial court did not err in refusing to charge the jury that driving after consuming small amounts of alcohol was not illegal because the requested language did not contain a complete and true exposition and was not adequately adjusted to the case. Moreover, the trial judge's refusal to give the charge was based on a proper implicit determination that the requested language would not have assisted and might even have confused the jury.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** trooper, enumerated, motor vehicle, enumeration, adjusted, consume, alcoholic beverage, state trooper, cumulative, alcoholic, harmless, sobriety, beverage, driving, alcohol, radar

**LexisNexis(R) Headnotes**

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

*Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview Evidence > Testimony > Examination > General Overview*

[HN1] In the context of a trial on charges of driving under the influence of alcohol and speeding, a trial judge does not abuse his discretion in allowing the prosecution to recall a state trooper to the stand before the prosecution rests its case.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview*

*Criminal Law & Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Cumulative Errors Evidence > Relevance > Confusion, Prejudice & Waste of Time*

[HN2] In the context of a trial on charges of driving under the influence of alcohol and speeding, cumulative error is harmless where it is highly probable that such error does not contribute to the judgment.

*Civil Procedure > Judicial Officers > Judges > General Overview*

*Civil Procedure > Trials > Jury Trials > Jury Instructions > Requests for Instructions*

*Criminal Law & Procedure > Jury Instructions > Particular Instructions > Elements of the Offense*

[HN3] A written request to charge which is legal and adjusted to a distinct matter in issue, and which may materially aid the jury, should be given in the language requested, although covered by other instructions of the charge in more general and abstract terms. A trial judge does not err in refusing to give a requested charge if it does not contain a complete and true exposition of the law and is not sufficiently adjusted to the case.

**COUNSEL:**

*G. Hughel Harrison, Michael White*, for appellant.

*Gerald N. Blaney, Jr., Solicitor*, for appellee.

**JUDGES:**

Birdsong, Chief Judge. Deen, P. J., and Pope, J., concur.

**OPINION BY:**

BIRDSONG

**OPINION:**

[\*724] [\*\*430] Appellant David W. House appeals his conviction of driving under the influence of alcohol ( *O.C.G.A. § 40-6-391 (a) (1)*) and speeding ( *O.C.G.A. § 40-6-181*). A Georgia State Patrol trooper, using a radar detection device, determined that appellant was driving his motor vehicle upon a state highway at a speed of 71 miles per hour. Upon stopping appellant and observing his physical condition, which included glassy eyes, slightly slurred

184 Ga. App. 724, \*724; 362 S.E.2d 429, \*\*430;  
1987 Ga. App. LEXIS 2828, \*\*\*1

speech, strong smell of alcoholic beverage on the breath, and a slight unsteadiness of foot, the trooper elected to subject appellant to certain tests for intoxication. Appellant submitted to a state administered chemical test, and the test results reflected appellant's blood-alcohol content as being .10 percent by weight of alcohol. *Held*:

1. Appellant's first enumerated [\*\*\*2] error is that the trial court erred in overruling the motion for directed verdict as to both counts. Our review of the transcript convinces us that ample evidence exists "from which any rational trier of fact could conclude beyond a reasonable doubt that appellant was guilty of [the offenses] charged." *Jackson v. Virginia*, 443 U.S. 307 (99 S. Ct.2781, 61 L. Ed. 2d 560).

Further, we are satisfied that the prosecution substantially complied with the requisite evidentiary requirements in the admission of State Exhibits 7 and 8 (certificate of radar calibration and Federal Communication Commission's station license, respectively). *O.C.G.A. § 24-3-14; Wiggins v. State*, 249 Ga. 302 (290 SE2d 427). Appellant's objection at trial to the admission of State Exhibits 7 and 8, in large measure, was predicated upon the basis that it constituted error for the trial judge to allow the prosecution to *recall* the state trooper to give testimony which would lay the foundation for the admission of these two exhibits. Appellant has failed to list specifically this issue as an enumerated error, although he refers to it as "Enumeration of Error No. 2" in his brief. Nevertheless, in the interests [\*\*\*3] of judicial economy, we will resolve this issue. We find that [HN1] the trial judge did not abuse his discretion in allowing the prosecution to recall the state trooper to the stand before the prosecution had rested its case. See [\*725] generally *Britten* [\*\*431] *v. State*, 221 Ga. 97 (143 SE2d 176); *Traylor v. State*, 163 Ga. App. 473 (294 SE2d 707).

2. Appellant's second enumerated error is that the trial court erred in allowing the trooper, over appellant's objection, to state repeatedly his opinion as to appellant's state of sobriety. The trial transcript reveals that the trooper was asked his opinion as to two matters: first, as to whether appellant was under the influence of alcoholic beverages and, secondly, whether appellant would have been a less safe driver if he had not been in that impaired condition. As to the latter question, the trooper expressed his opinion at least twice. We are satisfied that the trooper could so express his opinion as to appellant's sobriety. See generally *O.C.G.A. §§ 24-9-65 and 24-9-67; Fisher v. State*, 177 Ga. App. 465 (339 SE2d 744). Further, our examination of the transcript satisfies us that the trooper's testimony as to [\*\*\*4] these issues was not cumulative; however, assuming without deciding that [HN2] cumulative error occurred, such error was harmless as it is "highly probable that [any such] error did not contribute to the judgment." *Johnson v. State*, 238 Ga. 59, 61 (230 SE2d 869).

3. Appellant's third enumeration of error is that the trial judge erred by stating in the presence of the jury, during a colloquy with appellant's counsel regarding the wording of a question, that "It is similar to the old question, do you still beat your wife?" This comment is not within the range of comments prohibited by *O.C.G.A. § 17-8-57*. See *Pratt v. State*, 167 Ga. App. 819 (307 SE2d 714) and cases cited therein. We note that appellant neither objected to this remark nor made a timely motion for a mistrial based thereon. *Miller v. State*, 180 Ga. App. 525 (349 SE2d 495). Moreover, the trial judge charged the jury that he had not expressed or intimated any opinions, while making rulings during trial regarding the case facts, witness credibility, weight of the evidence, or defendant's guilt or innocence. Thus, we are satisfied that the comment in issue was rendered harmless in any event.

4. Appellant's fourth [\*\*\*5] enumeration of error contends the trial judge erred in refusing to give a charge which appellant had requested in writing. Specifically, appellant requested the following charge: "I charge you that it is not a violation of the laws of the State of Georgia to consume small amounts of an alcoholic beverage and drive a motor vehicle. It is a violation of the laws to consume such amounts of alcohol affecting the ability to drive a motor vehicle safely."

The Georgia Supreme Court has held that [HN3] "[a] written request to charge which is legal and adjusted to a distinct matter in issue, and which may materially aid the jury, should be given in the language requested, although covered by other instructions of the charge in more general and abstract terms." *Redding v. State*, 214 Ga. 524 (106 SE2d 5), citing *Randall v. State*, 210 Ga. 435 (80 SE2d 695). The [\*726] trial judge concluded that the matters addressed in the requested charge could be argued to the jury, but that the charge would not be given. Implicit in the

184 Ga. App. 724, \*726; 362 S.E.2d 429, \*\*431;  
1987 Ga. App. LEXIS 2828, \*\*\*5

judge's ruling was his determination that the requested charge would not assist and might even confuse the jury. Further, the trial judge observed that "there [\*\*\*6] are some people that could consume small amounts of alcoholic beverages, whatever that means, and still be unsafe." We agree with the express and implied conclusions of the trial judge, and conclude that the requested charge was potentially misleading as to the correct rule of law applicable in appellant's case. Accordingly, the trial judge did not err in refusing to give the requested charge, as it did not contain a complete and true exposition of the law and was not sufficiently adjusted to the case. *Bassett v. State*, 119 Ga. App. 639 (168 SE2d 343). The enumerated error is without merit.

5. Appellant's final enumeration of error is that the trial judge erred by failing to charge, and by deliberately omitting from the charge relating to the provisions of *O.C.G.A. § 40-6-392 (b) (1)*, the language contained in subparts (b) (2) and (b) (3) thereof. We find that appellant's proposed charge was not adequately adjusted to the [\*\*432] facts of this case. Accordingly, we find this enumerated error to be without merit. *Hill v. State*, 211 Ga. 683, 685 (88 SE2d 145); *Anderson v. State*, 163 Ga. App. 603, 604 (4) (295 SE2d 564); *Bassett v. State*, *supra*.

*Judgment affirmed [\*\*\*7] .*

Rehearing Denied November 3, 1987. Certiorari Applied For.

**PRIOR HISTORY:**

D.U.I., etc. Gwinnett State Court. Before Judge Winegarden.

**DISPOSITION:**

*Judgment affirmed.*

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged a judgment of the Gwinnett State Court (Georgia), which entered a jury verdict convicting defendant of driving under the influence of alcohol and speeding. Defendant argued that the trial court erred in overruling his motion for a directed verdict as to both counts.

**OVERVIEW:** Defendant also argued that trial court erred in allowing a trooper to repeatedly comment on his opinion as to defendant's state of sobriety. On appeal, the court disagreed. The court first determined that ample evidence existed from which any rational trier of fact could conclude beyond a reasonable doubt that defendant was guilty of the charged offenses. Thus, the motion for directed verdict was properly denied. Likewise, the State was properly permitted to recall the trooper before its case had rested, and the trooper was properly permitted to express his opinion on defendant's sobriety. Any cumulative error that may have occurred was harmless because it was highly probable that such error did not contribute to the judgment. Further, the trial court did not err in refusing to charge the jury that driving after consuming small amounts of alcohol was not illegal because the requested language did not contain a complete and true exposition and was not adequately adjusted to the case. Moreover, the trial judge's refusal to give the charge was based on a proper implicit determination that the requested language would not have assisted and might even have confused the jury.

**OUTCOME:** The court affirmed the judgment of the trial court.

**CORE TERMS:** trooper, enumerated, motor vehicle, enumeration, adjusted, consume, alcoholic beverage, state trooper, cumulative, alcoholic, harmless, sobriety, beverage, driving, alcohol, radar

speech, strong smell of alcoholic beverage on the breath, and a slight unsteadiness of foot, the trooper elected to subject appellant to certain tests for intoxication. Appellant submitted to a state administered chemical test, and the test results reflected appellant's blood-alcohol content as being .10 percent by weight of alcohol. *Held*:

1. Appellant's first enumerated [\*\*\*2] error is that the trial court erred in overruling the motion for directed verdict as to both counts. Our review of the transcript convinces us that ample evidence exists "from which any rational trier of fact could conclude beyond a reasonable doubt that appellant was guilty of [the offenses] charged." *Jackson v. Virginia*, 443 U.S. 307 (99 S. Ct.2781, 61 L. Ed. 2d 560).

Further, we are satisfied that the prosecution substantially complied with the requisite evidentiary requirements in the admission of State Exhibits 7 and 8 (certificate of radar calibration and Federal Communication Commission's station license, respectively). *O.C.G.A. § 24-3-14; Wiggins v. State*, 249 Ga. 302 (290 SE2d 427). Appellant's objection at trial to the admission of State Exhibits 7 and 8, in large measure, was predicated upon the basis that it constituted error for the trial judge to allow the prosecution to *recall* the state trooper to give testimony which would lay the foundation for the admission of these two exhibits. Appellant has failed to list specifically this issue as an enumerated error, although he refers to it as "Enumeration of Error No. 2" in his brief. Nevertheless, in the interests [\*\*\*3] of judicial economy, we will resolve this issue. We find that [HN1] the trial judge did not abuse his discretion in allowing the prosecution to recall the state trooper to the stand before the prosecution had rested its case. See [\*725] generally *Britten* [\*\*431] *v. State*, 221 Ga. 97 (143 SE2d 176); *Traylor v. State*, 163 Ga. App. 473 (294 SE2d 707).

2. Appellant's second enumerated error is that the trial court erred in allowing the trooper, over appellant's objection, to state repeatedly his opinion as to appellant's state of sobriety. The trial transcript reveals that the trooper was asked his opinion as to two matters: first, as to whether appellant was under the influence of alcoholic beverages and, secondly, whether appellant would have been a less safe driver if he had not been in that impaired condition. As to the latter question, the trooper expressed his opinion at least twice. We are satisfied that the trooper could so express his opinion as to appellant's sobriety. See generally *O.C.G.A. §§ 24-9-65 and 24-9-67; Fisher v. State*, 177 Ga. App. 465 (339 SE2d 744). Further, our examination of the transcript satisfies us that the trooper's testimony as to [\*\*\*4] these issues was not cumulative; however, assuming without deciding that [HN2] cumulative error occurred, such error was harmless as it is "highly probable that [any such] error did not contribute to the judgment." *Johnson v. State*, 238 Ga. 59, 61 (230 SE2d 869).

3. Appellant's third enumeration of error is that the trial judge erred by stating in the presence of the jury, during a colloquy with appellant's counsel regarding the wording of a question, that "It is similar to the old question, do you still beat your wife?" This comment is not within the range of comments prohibited by *O.C.G.A. § 17-8-57*. See *Pratt v. State*, 167 Ga. App. 819 (307 SE2d 714) and cases cited therein. We note that appellant neither objected to this remark nor made a timely motion for a mistrial based thereon. *Miller v. State*, 180 Ga. App. 525 (349 SE2d 495). Moreover, the trial judge charged the jury that he had not expressed or intimated any opinions, while making rulings during trial regarding the case facts, witness credibility, weight of the evidence, or defendant's guilt or innocence. Thus, we are satisfied that the comment in issue was rendered harmless in any event.

4. Appellant's fourth [\*\*\*5] enumeration of error contends the trial judge erred in refusing to give a charge which appellant had requested in writing. Specifically, appellant requested the following charge: "I charge you that it is not a violation of the laws of the State of Georgia to consume small amounts of an alcoholic beverage and drive a motor vehicle. It is a violation of the laws to consume such amounts of alcohol affecting the ability to drive a motor vehicle safely."

The Georgia Supreme Court has held that [HN3] "[a] written request to charge which is legal and adjusted to a distinct matter in issue, and which may materially aid the jury, should be given in the language requested, although covered by other instructions of the charge in more general and abstract terms." *Redding v. State*, 214 Ga. 524 (106 SE2d 5), citing *Randall v. State*, 210 Ga. 435 (80 SE2d 695). The [\*726] trial judge concluded that the matters addressed in the requested charge could be argued to the jury, but that the charge would not be given. Implicit in the

**STATE OF HAWAII, Plaintiff-Appellee, v. CHERYL L. STOA,  
Defendant-Appellant**

**NO. 26272**

**INTERMEDIATE COURT OF APPEALS OF HAWAII**

*112 Haw. 260; 145 P.3d 803; 2006 Haw. App. LEXIS 397*

**August 7, 2006, Decided**

**PRIOR HISTORY:** [\*\*1] APPEAL FROM THE DISTRICT COURT OF THE FIRST CIRCUIT. HPD Traffic No. 5587958MO.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was found to have committed the traffic infraction of noncompliance with speed limit prohibited by the District Court of the First Circuit (Hawai'i). Defendant appealed.

**OVERVIEW:** Defendant argued that the trial court erred by admitting the evidence of her speed based on the laser speed measuring device used by the officer because no expert testimony was presented. The court of appeals disagreed. In light of the officer's testimony regarding his testing of the functionality of his laser gun unit, his qualifications and experience, the posted speed limit in the area where he was performing traffic enforcement duties, the circumstances within which he used the laser gun in measuring defendant's speed, and the forty-two-mile-per-hour reading on the laser gun, sufficient evidence was provided to sustain the denial of defendant's motion for judgment of acquittal. The officer testified that he performed the required functionality tests on the laser gun prior to his patrol, and the readings indicated that the device was functioning properly. He testified that he had a valid certification for operating the laser gun and he had twenty years' experience in performing traffic enforcement duties. Therefore, Hawai'i joined the other states that had taken judicial notice of the scientific acceptance of the accuracy and reliability of laser speed-measuring devices.

**OUTCOME:** The determination that defendant committed the offense was affirmed. However, because the district court erroneously found defendant "guilty" of the offense, which was a civil traffic infraction rather than a crime, the judgment was vacated and the case was remanded for entry of a replacement judgment in favor of the State that complied with the applicable statutes governing traffic infractions.

**CORE TERMS:** laser, speed, gun, radar, scientific, judicial notice, target, accuracy, reliability, detector, pulse, measurement, distance, speed limit, traffic, mile, technology, speeding, runner, beam, speed-measuring, admissible, measuring, meter, wave, frequency, reliable, functioning, tested, expert testimony

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN1] See *Haw. Rev. Stat. § 291C-102* (1993 and Supp. 2003).

***Evidence > Judicial Notice > Scientific & Technical Facts******Evidence > Testimony > Experts > Admissibility***

[HN2] Generally, where the admission of testimony on a scientific technique presents an issue of first impression, the technique's reliability is not a proper subject of judicial notice. To be admissible, expert testimony as to the scientific validity and reliability of the new or novel technique is required or the technique must be recognized as scientifically valid at least once by an appellate court within the trial court's jurisdiction.

***Criminal Law & Procedure > Counsel > General Overview******Evidence > Judicial Notice > Scientific & Technical Facts***

[HN3] Once a scientific principle is sufficiently established, a court may take judicial notice of the validity of that principle. Similarly, a court may take judicial notice of the validity of the technique applying that principle. In either case the effect is the same: judicial notice relieves the offering party of the burden of producing evidence on these issues. The scientific principle involved need not be commonly known in order to be judicially noticed; it suffices if the principle is accepted as a valid one in the appropriate scientific community. In determining the intellectual viability of the proposition, of course, the judge is free to consult any sources that he thinks are reliable, but the extent to which judges are willing to take the initiative in looking up the authoritative sources will usually be limited. Therefore, it is the task of counsel to find and to present in argument and briefs such references, excerpts and explanations as will convince the judge that the fact is certain and demonstrable. After a number of courts take judicial notice of a principle, subsequent courts begin to dispense with the production of these materials and to take judicial notice of the principle as a matter of law established by precedent.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Scientific Evidence > General Overview***

[HN4] Evidence of the accuracy of a particular radar unit is necessary to sustain a conviction for speeding obtained solely by radar. The accuracy of a particular radar unit can be established by showing that the operator tested the device in accordance with accepted procedures to determine that the unit was functioning properly and that the operator was qualified by training and experience to operate the unit.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Judicial Notice > Scientific & Technical Facts***

[HN5] Hawai'i joins the other states that have taken judicial notice of the scientific acceptance of the accuracy and reliability of laser speed-measuring devices.

***Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > Factual Issues******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence******Evidence > Procedural Considerations > Circumstantial & Direct Evidence***

[HN6] "Substantial evidence" as to every material element of the offense charged is credible evidence which is of sufficient quality and probative value to enable a person of reasonable caution to support a conclusion. And as trier of fact, the trial judge is free to make all reasonable and rational inferences under the facts in evidence, including circumstantial evidence.

**COUNSEL:** On the briefs:

Cheryl L. Stoa, defendant-appellant, Pro se.

Loren J. Thomas, deputy prosecuting attorney, City and County of Honolulu, for plaintiff-appellee.

**JUDGES:** WATANABE, PRESIDING J., FOLEY, AND NAKAMURA, JJ.

**OPINION BY:** WATANABE

**OPINION:**

[\*261] OPINION OF THE COURT BY WATANABE, PRESIDING J.

This appeal concerns the admissibility of the readings from a laser device used to measure the speed of a motor vehicle.

Defendant-Appellant Cheryl L. Stoa (Stoa) contends that the District Court of the First Circuit (the district court) n1 erred in finding her "guilty" of Noncompliance with Speed Limit Prohibited, in violation of *Hawaii Revised Statutes (HRS) § 291C-102* (Supp. 2003), n2 because the district court's judgment was based solely on evidence obtained from a laser speed-measuring device and no foundational evidence of the universal acceptance of the scientific accuracy and reliability of the device was ever adduced by Plaintiff-Appellee State of Hawai'i (the State).

n1 The Honorable Peter Van Name Esser presided.

[\*\*2]

n2 *Hawaii Revised Statutes § 291C-102* (1993 and Supp. 2003) provides:

**Noncompliance with speed limit prohibited.** (a) [HN1] No person shall drive a vehicle at a speed greater than a maximum speed limit and no person shall drive a motor vehicle at a speed less than a minimum speed limit established by county ordinance.

(b) The director of transportation with respect to highways under the director's jurisdiction may place signs establishing maximum speed limits or minimum speed limits. Such signs shall be official signs and no person shall drive a vehicle at a speed greater than a maximum speed limit and no person shall drive a motor vehicle at a speed less than a minimum speed limit stated on such signs.

(c) If the maximum speed limit is exceeded by more than ten miles per hour, a surcharge of \$ 10 shall be imposed, in addition to any other penalties, and shall be deposited into the neurotrauma special fund.

We conclude that the scientific accuracy and reliability of the laser device used to clock the speed of Stoa's vehicle can be judicially [\*\*3] noticed. Accordingly, we affirm the district court's determination that Stoa was traveling in excess of the speed limit on the day in question. However, because the offense that Stoa was "found guilty" of committing is a civil traffic infraction and not a crime, we vacate the judgment and remand this case to the district court for entry of a replacement judgment in favor of the State that complies with the applicable statutes governing traffic infractions. See

*State v. Rees*, 107 Hawai'i 508, 115 P.3d 687 (App.), reconsideration denied, 108 Hawai'i 76, 116 P.3d 718, cert. denied, 108 Hawai'i 59, 116 P.3d 701 (2005).

#### FACTUAL BACKGROUND

At the November 25, 2003 trial below, Honolulu Police Department (HPD) Sergeant Milton Yamada (Sergeant Yamada), the State's only witness, testified that on August 15, 2003, he was assigned to perform traffic enforcement patrol duties in the Kailua area. Equipped with an LTI n3 20-20 laser gun (laser gun), he set up operations at 1225 Keolu Drive and faced traffic going in the makai n4 direction towards the shopping center.

n3 Although the transcript of the November 25, 2003 proceedings indicate that Honolulu Police Department Sergeant Milton Yamada stated that he was equipped with an "LT1 20-20" laser gun, the reference should have been to an "LTI 20-20" laser gun.

[\*\*4]

n4 The Hawaiian word "makai" means "on the seaside, toward the sea, in the direction of the sea." M.K. Pukui & S.H. Elbert, *Hawaiian Dictionary* 225, 114 (1986).

At approximately 9:30 a.m., he observed a vehicle going faster than the posted speed limit of twenty-five miles per hour. Aiming [\*262] his laser gun at the license plate of the vehicle from a distance of 757 feet, he locked in a reading for the vehicle's speed of forty-two miles per hour. He thereafter stopped the vehicle and cited Stoa, the vehicle's driver, for speeding.

Sergeant Yamada testified that at the time of Stoa's offense, the weather was clear, traffic was moderate, the road conditions were good, and no other vehicles were near Stoa's vehicle. There was also a clearly visible twenty-five-mile-per-hour speed limit sign posted by the City and County of Honolulu at the 1300 block, which Stoa passed as she approached Sergeant Yamada's position. At the deputy prosecutor's request and with no objection from Stoa, the district court took judicial notice that the speed limit sign was posted in accordance with the speed schedule [\*\*5] on file in the City and County of Honolulu.

Sergeant Yamada further stated that on the day he issued the citation to Stoa, he was certified to use the laser gun, having completed four hours of classroom work and four hours of road instruction on its use. He had been performing traffic enforcement duties for the entire twenty years of his HPD service. Prior to beginning his patrol that day, Sergeant Yamada performed the required series of functionality tests on the laser gun, which included the "self-test," the "display test," the "scope alignment test," and the "calibration test." The results of these tests indicated that the laser gun was working properly.

Objecting to Sergeant Yamada's testimony about the readout of the laser gun, Stoa argued that "the laser speed measurement has not been universally accepted as accurate and reliable." She also requested that the district court review some materials critical of the reliability of the LTI 20-20 laser gun that she had downloaded from the internet. However, because Stoa could not identify the specific website or publication from which the materials were gathered and thereby produce foundational evidence sufficient to assure [\*\*6] the district court that the materials came from a reputable source, the district court would not accept the materials into evidence.

At the close of Sergeant Yamada's direct examination, the district court instructed Stoa to begin her cross-examination

of Sergeant Yamada. The entire cross-examination was as follows:

Q Did you measure my speed by any other means other than laser?

A Just the laser gun.

MS. STOA: Okay. That's all I have to ask, Your Honor.

Stoa declined to testify. In open court, however, she filed a Hawai'i Rules of Penal Procedure (HRPP) Rule 29 Motion for Judgment of Acquittal and a memorandum in support of the motion. She argued therein that acquittal was warranted because the only evidence of the speed of her vehicle was obtained through the use of a laser speed-measuring device and the State "did not offer any expert testimony as to the accuracy of laser speed measurement in general or the device used by the officer in this case in particular[.]" Stoa also argued that

[t]he use of laser technology to measure the speed of an automobile constitutes "new" or "novel" evidence and has not been universally accepted as accurate [\*\*7] and reliable. Only a handful of jurisdictions have upheld judicial notice of laser speed-measuring technology at the appellate level.

In denying Stoa's Motion for Judgment of Acquittal, the district court expressed its belief that laser devices are fair to defendants because they are more accurate than pacing or police guesswork, and more scientific. The district court also stated that it was taking judicial notice of the laser gun:

So this machine helps people. It keeps officers from making mistakes. I believe--I've been handling laser trials for eight years. I'm gonna take judicial notice of that fact. I'm gonna take judicial notice of the fact that there have been literally thousands of convictions under this machine.

I'm gonna take judicial notice of the fact that a lot of officers have been trained to use the machine; and that if we have many trials on--with expert witness[es] every time we have a speeding trial in the Kaneohe [\*263] Court or the other courts, we're gonna spend all our time in speeding trials.

....

So I'm gonna take judicial notice of--this is somewhat strange--but of the number of speeding trials I've heard, the observations of the [\*\*8] officers I've heard; and I also believe there is [Intermediate Court of Appeals] authority addressing these cases. I wish I had it in front of me to quote to you, but I don't.

The court then found that the prosecution had proved, beyond a reasonable doubt, that Stoa had driven forty-two miles per hour in a twenty-five-mile-per-hour zone, or seventeen miles per hour over the speed limit, and ordered Stoa to pay an \$ 85 fine, plus \$ 37 in court costs, which the court stayed for thirty days pending notice of appeal. The district court's Notice of Entry of Judgment and/or Order and Plea/Judgment, finding Stoa "guilty" of violating *HRS* § 291C-102, was filed on December 15, 2003 and this appeal followed.

## DISCUSSION

### A. The Admissibility of Readings from a Laser Speed-Measuring Device

[HN2] Generally, "where the admission of testimony on a scientific technique presents an issue of first impression, the technique's reliability is not a proper subject of judicial notice." *State v. Ito*, 90 Hawai'i 225, 242, 978 P.2d 191, 208

112 Haw. 260, \*263; 145 P.3d 803;  
2006 Haw. App. LEXIS 397, \*\*8

(*App. 1999*) (quoting *29 Am. Jur. 2d Evidence* § 94, at 137 (1994)). [\*\*9] To be admissible, expert testimony as to the scientific validity and reliability of the new or novel technique is required or the technique must be recognized as scientifically valid at least once by an appellate court within the trial court's jurisdiction. *Ito, 90 Hawaii at 242, 978 P.2d at 208*. However,

[HN3] [o]nce a scientific principle is sufficiently established, a court may take judicial notice of the validity of that principle. Similarly, a court may take judicial notice of the validity of the technique applying that principle. In either case the effect is the same: judicial notice relieves the offering party of the burden of producing evidence on these issues.

1 P. Giannelli & E. Imwinkelried, *Scientific Evidence* § 1-2, at 2 (2d ed.1993) (footnotes omitted). An eminent treatise on evidence further points out that

the [scientific] principle involved need not be commonly known in order to be judicially noticed; it suffices if the principle is accepted as a valid one in the appropriate scientific community. In determining the intellectual viability of the proposition, of course, the judge is free to consult any sources that he [or [\*\*10] she] thinks are reliable, but the extent to which judges are willing to take the initiative in looking up the authoritative sources will usually be limited. By and large, therefore, it is the task of counsel to find and to present in argument and briefs such references, excerpts and explanations as will convince the judge that the fact is certain and demonstrable. Puzzling enough in this regard, it has been noted that "nowhere can there be found a definition of what constitutes competent or authoritative sources for purposes of verifying judicially noticed facts." *And it should be noted, after a number of courts take judicial notice of a principle, subsequent courts begin to dispense with the production of these materials and to take judicial notice of the principle as a matter of law established by precedent.*

2 *McCormick on Evidence* § 330, at 395 (footnotes omitted, emphasis added).

Id. (brackets and emphasis in original).

Stoa argues that "[n]o Appellate Court in Hawai'i has recognized widespread acceptance of the reliability or accuracy of laser technology as a means of measuring speed." She also notes that courts in several other jurisdictions have [\*\*11] held that the technique of using laser-based devices to measure vehicle speed has not reached the scientific stage of verifiable certainty so as to allow evidence from such devices to be admissible without expert testimony. She cites, for example, *Izer v. State, 236 Ga. App. 282, 511 S.E.2d 625, 627 (Ga. Ct. App. 1999)* (holding that although some courts have accepted laser evidence, "it cannot be said that a *substantial* number of courts have recognized the technique" and "[c]onsidering [\*264] the dearth of authority showing the scientific certainty of the technique, as well as the absence of expert testimony on the subject, the trial court erred in admitting the evidence"); *People v. Canulli, 341 Ill. App. 3d 361, 792 N.E.2d 438, 445, 275 Ill. Dec. 207 (Ill. App. Ct. 2003)* (holding that "the use of Lidar laser technology to measure the speed of an automobile constitutes 'new' or 'novel' evidence" and therefore, an evidentiary hearing conducted pursuant to *Frye v. United States, 54 App. D.C. 46, 293 F. 1013 (D.C. Cir. 1923)* "was necessary to determine whether these instruments were admissible as a matter of law"); and *State v. Sapphire, 2000 Ohio App. LEXIS 5767, 2000 WL 1803852, [\*\*12] \*4 (Ohio Ct. App. 2000)* (an unpublished opinion, n5 holding that the trial court committed prejudicial error by admitting the evidence of the reading of an Ultralite 20/20 laser unit because there was "nothing in the record to show that the trial court has ever received expert evidence on and determined that the laser device used in this case is dependable and accurate, and because it appears that no court of binding authority upon the Xenia Municipal Court has ever taken judicial notice of this laser device").

112 Haw. 260, \*264; 145 P.3d 803;  
2006 Haw. App. LEXIS 397, \*\*12

n5 We note that pursuant to Hawai'i Rules of Appellate Procedure Rule 35(c), "[a] memorandum opinion or unpublished dispositional order shall not be cited in any other action or proceeding except when the opinion or unpublished dispositional order establishes the law of the pending case, res judicata or collateral estoppel, or in a criminal action or proceeding involving the same respondent."

Although the Hawai'i appellate courts have not had occasion to consider the admissibility of readings from [\*\*13] a laser speed-measuring device, the Hawai'i Supreme Court has upheld a speeding conviction based on the "testimony of a single police officer who relied upon a reading from a K-15 radar speed detection device (K-15 gun) which clocked the speed of [the appellant's] vehicle at seventy miles per hour in a fifty-five mile per hour zone." *State v. Tailo*, 70 Haw. 580, 580, 779 P.2d 11, 12 (1989). n6 The issue on appeal in Tailo was "whether the State must prove the accuracy of a tuning fork used in verifying the accuracy of the K-15 gun before results of that device are admissible as evidence of a speeding violation." *Id.* at 580-81, 779 P.2d at 12. However, the supreme court took the opportunity to address the question of the admissibility of radar gun evidence as proof of a speeding violation and held:

The scientific principles upon which the radar gun is based are well established. The radar gun is a system which transmits a continuous flow of microwaves on a constant frequency which are reflected back whenever they strike a target. When the target is an approaching vehicle, the speed of the vehicle causes the deflected waves to return on [\*\*14] a different and higher frequency than those sent out. A phenomena known as the Doppler effect posits that the faster the vehicle is moving into the radar transmissions, the higher the frequency of the reflected waves received by the radar gun. The radar gun measures the difference in the frequencies of the transmitted wave and the received wave, which enables it to use the Doppler effect to calculate the speed of the approaching vehicle. *See Kopper, The Scientific Reliability of Radar Speedmeters*, 16 Md. L. Rev. 1 (1956).

Because of the strength of the scientific principles on which the radar gun is based, every recent court which has dealt with the question has taken judicial notice of the scientific reliability of radar speedmeters as recorders of speed. *See State v. Gerdes*, 291 Minn. 353, 191 N.W.2d 428 (1971); *People v. MacLaird*, 264 Cal. App. 2d 972, 71 Cal. Rptr. 191 (1968); *State v. Tomanelli*, 153 Conn. 365, 216 A.2d 625 (1966); and Annotation, *Proof, by Radar [\*\*265] or Other Mechanical or Electronic Devices, of Violation of Speed Regulations*, 47 A.L.R.3d 822, 831-35 (1973). [\*\*15] These courts have also consistently held that [HN4] evidence of the accuracy of the particular radar unit is necessary to sustain a conviction for speeding obtained solely by radar. *State v. Primm*, 4 Kan. App. 2d 314, 606 P.2d 112 (1980); Annotation, *Proof, by Radar or Other Mechanical or Electronic Devices, of Violation of Speed Regulations*, 47 A.L.R.3d 822, 837-39 (1973). "The accuracy of a particular radar unit can be established by showing that the operator tested the device in accordance with accepted procedures to determine that the unit was functioning properly and that the operator was qualified by training and experience to operate the unit." *State v. Spence*, 418 So. 2d 583, 588 (La. 1982); *Gerdes, supra*; *Primm, supra*.

*Id.* at 582, 779 P.2d at 13.

n6 Although the Hawai'i Supreme Court did not explicitly say that it was "taking judicial notice" of the accuracy of the radar technology, it noted that other courts had taken judicial notice of its accuracy when it held that a properly tested radar unit creates a presumption that the particular unit's reading is accurate. *State v. Tailo*, 70 Haw. 580, 582-83, 779 P.2d 11, 13-14 (1989).

[\*\*16]

In concluding that the reading from a radar gun was admissible as prima facie evidence of speed, the supreme court thus relied on three factors: (1) the well-established scientific principles upon which the radar gun was premised; (2) the fact that other courts had taken judicial notice of the scientific reliability of radar guns as recorders of speed; and (3) the proven accuracy of the particular radar gun used, established by evidence that (a) the device was tested according to accepted procedures and was determined to be functioning properly, and (b) the operator of the device was qualified by training and experience to operate the device. *Id.*

Applying the criteria used by the supreme court in *Tailo* to justify admission of the reading of a radar gun into evidence, we conclude that the district court properly admitted into evidence the reading of the laser gun used by Officer Yamada to measure the speed of Stoa's vehicle.

First, the laser gun is technologically premised on well-understood scientific principles.

In *Goldstein v. State*, 339 Md. 563, 664 A.2d 375 (Md. 1995), the Court of Appeals of Maryland was called upon to determine whether [\*\*17] measurements taken with an LTI 20-20 laser gun were properly admitted into evidence. At trial, each side had called a scientific expert to testify about the reliability and acceptance of the LTI 20-20 in the particular scientific community. The State's expert testified that the particular laser gun was generally accepted as reliable and capable of accurately measuring speed of a vehicle within one mile per hour. The defense expert testified that the LTI 20-20 was not generally accepted, due primarily to flaws in the particular device. However, both experts had agreed that "in theory laser technology could be used to measure the speed of a motor vehicle." *Id.* at 376.

In concluding that the results were admissible, the court provided the following explanation of the scientific reliability of laser speed-detection technology generally:

Our analysis begins by examining the operation of the LTI 20-20. The theory underlying the LTI 20-20 would be familiar to any student of high school physics. In fact, laser speed devices operate on the same principles as military radar (police radar works somewhat differently). See 1 *McCormick on Evidence* § 204, at 880 (J. Strong 4th [\*\*18] ed. 1992). McCormick explains military radar as follows:

The radar antenna transmits microwave radiation in pulses. The equipment measures the time it takes for a pulse to reach the target and for its echo to return. Since the radiation travels at a known speed (the speed of light), this fixes the distance to the target. The changes in the distances as determined from the travel times of later pulses permit the target's velocity to be computed.

*Id.* § 204, at 880 n.17.

Laser speed measurements work exactly the same way, except that the device relies on lasers rather than microwave radiation. Laser is an acronym for "light amplification by stimulated emission of radiation." 15 *Funk & Wagnalls New Encyclopedia* 410 (R. Phillips ed., 1983).

Lasers are devices that amplify light and produce coherent light beams, ranging from infrared to ultraviolet. A light beam is coherent when its waves, or photons, propagate in step with one another. Laser light, therefore, can be made extremely intense, highly directional, and very pure in color (frequency).

*Id.*

[\*266] Light and microwaves, the building blocks of lasers and radar, respectively, occupy different [\*\*19] points on the electromagnetic spectrum but are otherwise similar. P. Tipler, *Physics* 852-54 (2d ed. 1982). According to the State's expert, the main advantage that lasers offer over radio-micro waves is that the beam is narrower and therefore easier to keep focused on the target vehicle.

A hypothetical might clarify this discussion. Our example involves a runner in a 200-meter dash. For purposes of our example, we assume that light travels at 200 meters per second. The actual speed of light is approximately 300 million meters per second, or 186,000 miles per second; our use of a different figure, however, is consistent with the relevant scientific principles and makes the calculations in our example easier.

An instant before the race begins, an observer standing at the finish line sends a laser beam toward the runner in the starting blocks. The beam reaches the runner and returns in two seconds. Thus, the distance for the round trip was 400 meters, so the runner must have been 200 meters away when the laser reached her. Five seconds later, the observer's laser device emits another light pulse, which returns in 1.5 seconds; thus, when the beam reached the runner, she [\*\*20] was 150 meters away. We can then calculate that the runner traveled fifty meters in the five-second interval between the two measurements; accordingly, she is running at an average speed of ten meters per second. 2

2 If the observer is not standing directly in front of the runner (or directly behind, if our hypothetical had placed the observer at the beginning of the track), then his measurements will understate the runner's speed. This phenomenon, known as the cosine effect, creates a potential source of error in the LTI 20-20's measurements. Because this error always favors the motorist, however, it is not at issue in this case.

*Goldstein*, 664 A.2d at 379. The Maryland court also concluded that it was not necessary for a trial court to conduct an evidentiary hearing on the scientific acceptance and reliability of a particular brand of a laser speed-detection device:

There are important considerations of judicial economy underlying the practice of limiting *Frye-Reed* to general processes, rather than brand-name products. If every brand of every instrument were subject to a discrete *Frye-Reed* evaluation, trial courts would be mired in hearings [\*\*21] concerning devices incorporating scientific principles, possibly including calculators and magnifying glasses. *See People v. Mendibles*, 199 Cal. App. 3d 1277, 245 Cal. Rptr. 553, 563 (1988) (stating that a *Frye* hearing is not required with respect to a colposcope, which the court characterized as "a weak microscope").

Moreover, the scientific consensus that forms a prerequisite for the admission of evidence would ordinarily be elusive, because, while scientists may be familiar with the general principles underlying a particular device, they may have no occasion to use the device itself. In the instant case, for example, the LTI 20-20 has little use other than for law enforcement purposes. Consequently, neither of the experts who testified at trial actually used the device in his work. . . .

We believe that the ordinary truth-seeking methods of the adversarial process will suffice to expose design flaws in the devices used to gather evidence, without requiring the courts to place a "*Frye-Reed* Seal of Approval" on individual brands. . . .

*Id.* at 381.

In *In re Admissibility of Motor Vehicle Speed Readings Produced by the LTI Marksman 20-20 Laser Speed Detection System*, 314 N.J. Super. 233, 714 A.2d 381 (N.J. Super. Ct. Law Div. 1998), [\*\*22] n7 the New Jersey Superior [\*\*267] Court, Law Division, similarly concluded that performance tests conducted by the New Jersey Department of Transportation of the LTI Marksman 20-20 Laser Speed Detection System manufactured by Laser Technology, Inc. demonstrated sufficient reliability of the laser speed detector to allow speed readings produced by such detectors to be received into evidence without the need for expert testimony in individual prosecutions. *Id.* at 391. In its opinion, the court described the way a laser speed detector is supposed to work, as follows:

A laser is an artificially generated and amplified light which is in the infrared light section of the electromagnetic wave spectrum. It is not visible to the naked eye. It is very concentrated. The laser speed detector fires a series of laser pulses at a selected remote target. When the laser light strikes the target, a portion of the light is reflected back to the detector. Since the speed of light is a known constant, by measuring the time it takes for the laser pulse to travel to the target and back, the detector is able to calculate the distance between the detector and the target. Each laser pulse [\*\*23] which is fired and reflected back establishes one distance reading. The laser speed detector fires 43 laser pulses every time the trigger on the detector is squeezed. These 43 pulses are fired in a total period of approximately one-third of a second. If the target at which the laser pulses are fired is a stationary target, each of the 43 pulses will give the same distance reading to the target, and distance will be the only thing that the detector can tell us about the target. However, if the target is moving, each of the 43 pulses will give a slightly different distance reading and the detector can then compute the velocity or speed of the target from the changes in distance divided by the known elapsed time between the firing of each of the laser pulses. In simplest terms, this is the basic theory underlying the use of lasers to calculate speed, and there can be no dispute about its fundamental validity.

714 A.2d at 383-84 (block quotation format altered).

n7 In *re Admissibility of Motor Vehicle Speed Readings Produced by the LTI Marksman 20-20 Laser Speed Detection System* is a case that provides a detailed positive evaluation of the performance of LTI 20-20 laser guns in comparison to other speed measuring devices. The court describes the results of tests, conducted by the New Jersey Department of Transportation, of the laser gun in comparison to various alternative speed measuring devices. The tests were conducted under a variety of normal driving conditions. Several local defense attorneys served as amici curiae adversaries during the proceedings.

[\*\*24]

Daniel Y. Gezari, Ph.D, who works for NASA/Goddard Space Flight Center, Infrared Astrophysics Branch, has noted that while laser and radar speed-measuring devices have several common features, they are different in several respects:

- (1) The laser gun has a very narrow beam (about three feet wide at a distance of 1000 feet), so that it can pick out a single car for measurement, while the radar beam is roughly 100 times wider (about 300 feet wide at 1000 feet) and can easily have a dozen cars in its beam simultaneously.
- (2) Laser speed guns make a direct measurement of how the position of the target changes in time . . . , while radar infers the speed from the Doppler-shifted frequency of the reflected waves.
- (3) The laser results are calculated and error-checked by a microprocessor, which verifies

the individual measurements and the final speed result. . . .

(4) Radar has the advantage of being better in poor visibility weather conditions (fog, rain, snow, etc.). However, the value of radar's bad-weather capability is questionable, since traffic stops are less likely to be made under bad weather conditions for other reasons, primarily safety concerns. [\*\*25]

(5) Radar speed guns can be set up to continuously monitor oncoming traffic without active operator attention, while the laser gun must be carefully aimed and triggered by the operator for each individual measurement.

(6) Laser speed guns are more immune to interference from natural and artificial environmental sources than radar guns. . . .

1 Campbell, Fisher & Mansfield, Defense of Speeding, Reckless Driving and Vehicular Homicide § 9a.02[6], at 9a-9 (2005).

[\*268] The foregoing explanations convince us that the laser speed detection device is technologically premised on well-accepted and reliable scientific principles.

Second, the accuracy and reliability of laser speed-detection devices for purposes of traffic speed monitoring have been explicitly affirmed by appellate courts in Maryland, Minnesota, and New Jersey, by a municipal court in Ohio, and by a superior court in New Jersey. See *Goldstein*, 664 A.2d at 381; *State v. Ali*, 679 N.W.2d 359, 364 (Minn. Ct. App. 2004) (holding that "so long as there is adequate evidence that a laser-based speed-measuring device used to support a conviction has been tested for accuracy [\*\*26] and that officers using the device have been trained in its use, a district court does not abuse its discretion in taking judicial notice of the device's general reliability of laser technology"); *State v. Abeskaron*, 326 N.J. Super. 110, 740 A.2d 690, 694 (N.J. Super. Ct. App. Div. 1999) (affirming the lower court's determination in *In re Admissibility of Motor Vehicle Speed Readings Produced by the LTI Marksman 20-20 Laser Speed Detection System* that "subject to the listed restrictions, the subject laser detector was an appropriate tool in measuring speed"); *City of Columbus v. Barton*, 106 Ohio Misc. 2d 17, 733 N.E.2d 326, 327 (Ohio Mun. Ct. 1994) (holding that the "laser speed detector is reliable and accurate as a scientific measure of the speed of a moving object, which can be used by law enforcement personnel to measure vehicle speed, provided that the device is used in accordance with certain procedures delineated by the manufacturer"); *In re Admissibility of Motor Vehicle Speed Readings Produced by the LTI Marksman 20-20 Laser Speed Detection System*, 714 A.2d at 391-92 (N.J. Super. 1998).

Finally, we conclude that the [\*\*27] laser device used by Sergeant Yamada to clock Stoa's speed satisfied all of the Hawai'i Supreme Court's requirements for accuracy. In *Tailo*, the supreme court required the accuracy of a particular radar unit to be established by proof "that the operator tested the device in accordance with accepted procedures to determine that the unit was functioning properly and that the operator was qualified by training and experience to operate the unit." *Tailo*, 70 Haw. at 582, 779 P.2d at 13 (citations and quotation marks omitted).

Sergeant Yamada testified that he performed the required functionality tests on the laser gun prior to beginning his patrol, and that the readings indicated that the device was functioning properly. He also testified that he possessed a valid certification for operating the laser gun and that he had twenty years' experience in performing traffic enforcement duties.

In light of the foregoing discussion, [HN5] we join the other states that have taken judicial notice of the scientific acceptance of the accuracy and reliability of laser speed-measuring devices.

We further hold that the prosecution presented evidence sufficient to establish [\*\*28] that the particular laser device

used by Sergeant Yamada was functioning properly and that Sergeant Yamada was qualified by training and experience to operate the device. We therefore reject Stoa's challenge to the admissibility of Sergeant Yamada's testimony on grounds of insufficient foundational evidence.

#### B. The Sufficiency of the Evidence Adduced Below

Stoa claims that the district court improperly denied her HRPP Rule 29 Motion for Judgment of Acquittal because, without the evidence of the laser reading, there was insufficient evidence to prove that she traveled in excess of the speed limit. Under Hawai'i case law,

[HN6] "[s]ubstantial evidence" as to every material element of the offense charged is credible evidence which is of sufficient quality and probative value to enable a [person] of reasonable caution to support a conclusion. And as trier of fact, the trial judge is free to make all reasonable and rational inferences under the facts in evidence, including circumstantial evidence.

*State v. Pone*, 78 Hawai'i 262, 265, 892 P.2d 455, 458 (1995) (some brackets in original, block quotation format altered) (quoting *State v. Batson*, 73 Haw. 236, 248-49, 831 P.2d 924, 931, [\*29] reconsideration denied, 73 Haw. 625, 834 P.2d 1315 (1992)).

[\*269] Based on our conclusion that the laser reading was admissible and in light of Sergeant Yamada's testimony regarding his testing of the functionality of his laser gun unit, his qualifications and experience, the posted speed limit in the area where he was performing traffic enforcement duties, the circumstances within which he used the laser gun in measuring Stoa's speed, and the forty-two-mile-per-hour reading on the laser gun, we hold that "credible evidence" of "sufficient quality and probative value" was provided to sustain the court's denial of Stoa's motion.

#### CONCLUSION

We therefore affirm the district court's determination that Stoa committed the offense of Noncompliance with Speed Limit Prohibited, in violation of *HRS* § 291C-102. However, because the district court erroneously found Stoa "guilty" of the offense, which is a civil traffic infraction rather than a crime, we vacate the judgment and remand for entry of a replacement judgment in favor of the State that complies with the applicable statutes governing traffic infractions.

**STATE OF HAWAII, Plaintiff-Appellee, v. CHERYL L. STOA,  
Defendant-Appellant**

**NO. 26272**

**INTERMEDIATE COURT OF APPEALS OF HAWAII**

*112 Haw. 260; 145 P.3d 803; 2006 Haw. App. LEXIS 397*

**August 7, 2006, Decided**

**PRIOR HISTORY:** [\*\*1] APPEAL FROM THE DISTRICT COURT OF THE FIRST CIRCUIT. HPD Traffic No. 5587958MO.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was found to have committed the traffic infraction of noncompliance with speed limit prohibited by the District Court of the First Circuit (Hawai'i). Defendant appealed.

**OVERVIEW:** Defendant argued that the trial court erred by admitting the evidence of her speed based on the laser speed measuring device used by the officer because no expert testimony was presented. The court of appeals disagreed. In light of the officer's testimony regarding his testing of the functionality of his laser gun unit, his qualifications and experience, the posted speed limit in the area where he was performing traffic enforcement duties, the circumstances within which he used the laser gun in measuring defendant's speed, and the forty-two-mile-per-hour reading on the laser gun, sufficient evidence was provided to sustain the denial of defendant's motion for judgment of acquittal. The officer testified that he performed the required functionality tests on the laser gun prior to his patrol, and the readings indicated that the device was functioning properly. He testified that he had a valid certification for operating the laser gun and he had twenty years' experience in performing traffic enforcement duties. Therefore, Hawai'i joined the other states that had taken judicial notice of the scientific acceptance of the accuracy and reliability of laser speed-measuring devices.

**OUTCOME:** The determination that defendant committed the offense was affirmed. However, because the district court erroneously found defendant "guilty" of the offense, which was a civil traffic infraction rather than a crime, the judgment was vacated and the case was remanded for entry of a replacement judgment in favor of the State that complied with the applicable statutes governing traffic infractions.

**CORE TERMS:** laser, speed, gun, radar, scientific, judicial notice, target, accuracy, reliability, detector, pulse, measurement, distance, speed limit, traffic, mile, technology, speeding, runner, beam, speed-measuring, admissible, measuring, meter, wave, frequency, reliable, functioning, tested, expert testimony

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN1] See *Haw. Rev. Stat. § 291C-102* (1993 and Supp. 2003).

***Evidence > Judicial Notice > Scientific & Technical Facts***

***Evidence > Testimony > Experts > Admissibility***

[HN2] Generally, where the admission of testimony on a scientific technique presents an issue of first impression, the technique's reliability is not a proper subject of judicial notice. To be admissible, expert testimony as to the scientific validity and reliability of the new or novel technique is required or the technique must be recognized as scientifically valid at least once by an appellate court within the trial court's jurisdiction.

***Criminal Law & Procedure > Counsel > General Overview***

***Evidence > Judicial Notice > Scientific & Technical Facts***

[HN3] Once a scientific principle is sufficiently established, a court may take judicial notice of the validity of that principle. Similarly, a court may take judicial notice of the validity of the technique applying that principle. In either case the effect is the same: judicial notice relieves the offering party of the burden of producing evidence on these issues. The scientific principle involved need not be commonly known in order to be judicially noticed; it suffices if the principle is accepted as a valid one in the appropriate scientific community. In determining the intellectual viability of the proposition, of course, the judge is free to consult any sources that he thinks are reliable, but the extent to which judges are willing to take the initiative in looking up the authoritative sources will usually be limited. Therefore, it is the task of counsel to find and to present in argument and briefs such references, excerpts and explanations as will convince the judge that the fact is certain and demonstrable. After a number of courts take judicial notice of a principle, subsequent courts begin to dispense with the production of these materials and to take judicial notice of the principle as a matter of law established by precedent.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Evidence > Scientific Evidence > General Overview***

[HN4] Evidence of the accuracy of a particular radar unit is necessary to sustain a conviction for speeding obtained solely by radar. The accuracy of a particular radar unit can be established by showing that the operator tested the device in accordance with accepted procedures to determine that the unit was functioning properly and that the operator was qualified by training and experience to operate the unit.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Evidence > Judicial Notice > Scientific & Technical Facts***

[HN5] Hawai'i joins the other states that have taken judicial notice of the scientific acceptance of the accuracy and reliability of laser speed-measuring devices.

***Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > Factual Issues***

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

***Evidence > Procedural Considerations > Circumstantial & Direct Evidence***

[HN6] "Substantial evidence" as to every material element of the offense charged is credible evidence which is of sufficient quality and probative value to enable a person of reasonable caution to support a conclusion. And as trier of fact, the trial judge is free to make all reasonable and rational inferences under the facts in evidence, including circumstantial evidence.

**COUNSEL:** On the briefs:

Cheryl L. Stoa, defendant-appellant, Pro se.

Loren J. Thomas, deputy prosecuting attorney, City and County of Honolulu, for plaintiff-appellee.

**JUDGES:** WATANABE, PRESIDING J., FOLEY, AND NAKAMURA, JJ.

**OPINION BY:** WATANABE

**OPINION:**

[\*261] OPINION OF THE COURT BY WATANABE, PRESIDING J.

This appeal concerns the admissibility of the readings from a laser device used to measure the speed of a motor vehicle.

Defendant-Appellant Cheryl L. Stoa (Stoa) contends that the District Court of the First Circuit (the district court) n1 erred in finding her "guilty" of Noncompliance with Speed Limit Prohibited, in violation of *Hawaii Revised Statutes (HRS) § 291C-102* (Supp. 2003), n2 because the district court's judgment was based solely on evidence obtained from a laser speed-measuring device and no foundational evidence of the universal acceptance of the scientific accuracy and reliability of the device was ever adduced by Plaintiff-Appellee State of Hawai'i (the State).

n1 The Honorable Peter Van Name Esser presided.

[\*\*2]

n2 *Hawaii Revised Statutes § 291C-102* (1993 and Supp. 2003) provides:

**Noncompliance with speed limit prohibited.** (a) [HN1] No person shall drive a vehicle at a speed greater than a maximum speed limit and no person shall drive a motor vehicle at a speed less than a minimum speed limit established by county ordinance.

(b) The director of transportation with respect to highways under the director's jurisdiction may place signs establishing maximum speed limits or minimum speed limits. Such signs shall be official signs and no person shall drive a vehicle at a speed greater than a maximum speed limit and no person shall drive a motor vehicle at a speed less than a minimum speed limit stated on such signs.

(c) If the maximum speed limit is exceeded by more than ten miles per hour, a surcharge of \$ 10 shall be imposed, in addition to any other penalties, and shall be deposited into the neurotrauma special fund.

We conclude that the scientific accuracy and reliability of the laser device used to clock the speed of Stoa's vehicle can be judicially [\*\*3] noticed. Accordingly, we affirm the district court's determination that Stoa was traveling in excess of the speed limit on the day in question. However, because the offense that Stoa was "found guilty" of committing is a civil traffic infraction and not a crime, we vacate the judgment and remand this case to the district court for entry of a replacement judgment in favor of the State that complies with the applicable statutes governing traffic infractions. See

*State v. Rees*, 107 Hawai'i 508, 115 P.3d 687 (App.), reconsideration denied, 108 Hawai'i 76, 116 P.3d 718, cert. denied, 108 Hawai'i 59, 116 P.3d 701 (2005).

#### FACTUAL BACKGROUND

At the November 25, 2003 trial below, Honolulu Police Department (HPD) Sergeant Milton Yamada (Sergeant Yamada), the State's only witness, testified that on August 15, 2003, he was assigned to perform traffic enforcement patrol duties in the Kailua area. Equipped with an LTI n3 20-20 laser gun (laser gun), he set up operations at 1225 Keolu Drive and faced traffic going in the makai n4 direction towards the shopping center.

n3 Although the transcript of the November 25, 2003 proceedings indicate that Honolulu Police Department Sergeant Milton Yamada stated that he was equipped with an "LT1 20-20" laser gun, the reference should have been to an "LTI 20-20" laser gun.

[\*\*4]

n4 The Hawaiian word "makai" means "on the seaside, toward the sea, in the direction of the sea." M.K. Pukui & S.H. Elbert, *Hawaiian Dictionary* 225, 114 (1986).

At approximately 9:30 a.m., he observed a vehicle going faster than the posted speed limit of twenty-five miles per hour. Aiming [\*262] his laser gun at the license plate of the vehicle from a distance of 757 feet, he locked in a reading for the vehicle's speed of forty-two miles per hour. He thereafter stopped the vehicle and cited Stoa, the vehicle's driver, for speeding.

Sergeant Yamada testified that at the time of Stoa's offense, the weather was clear, traffic was moderate, the road conditions were good, and no other vehicles were near Stoa's vehicle. There was also a clearly visible twenty-five-mile-per-hour speed limit sign posted by the City and County of Honolulu at the 1300 block, which Stoa passed as she approached Sergeant Yamada's position. At the deputy prosecutor's request and with no objection from Stoa, the district court took judicial notice that the speed limit sign was posted in accordance with the speed schedule [\*\*5] on file in the City and County of Honolulu.

Sergeant Yamada further stated that on the day he issued the citation to Stoa, he was certified to use the laser gun, having completed four hours of classroom work and four hours of road instruction on its use. He had been performing traffic enforcement duties for the entire twenty years of his HPD service. Prior to beginning his patrol that day, Sergeant Yamada performed the required series of functionality tests on the laser gun, which included the "self-test," the "display test," the "scope alignment test," and the "calibration test." The results of these tests indicated that the laser gun was working properly.

Objecting to Sergeant Yamada's testimony about the readout of the laser gun, Stoa argued that "the laser speed measurement has not been universally accepted as accurate and reliable." She also requested that the district court review some materials critical of the reliability of the LTI 20-20 laser gun that she had downloaded from the internet. However, because Stoa could not identify the specific website or publication from which the materials were gathered and thereby produce foundational evidence sufficient to assure [\*\*6] the district court that the materials came from a reputable source, the district court would not accept the materials into evidence.

At the close of Sergeant Yamada's direct examination, the district court instructed Stoa to begin her cross-examination

of Sergeant Yamada. The entire cross-examination was as follows:

Q Did you measure my speed by any other means other than laser?

A Just the laser gun.

MS. STOA: Okay. That's all I have to ask, Your Honor.

Stoa declined to testify. In open court, however, she filed a Hawai'i Rules of Penal Procedure (HRPP) Rule 29 Motion for Judgment of Acquittal and a memorandum in support of the motion. She argued therein that acquittal was warranted because the only evidence of the speed of her vehicle was obtained through the use of a laser speed-measuring device and the State "did not offer any expert testimony as to the accuracy of laser speed measurement in general or the device used by the officer in this case in particular[.]" Stoa also argued that

[t]he use of laser technology to measure the speed of an automobile constitutes "new" or "novel" evidence and has not been universally accepted as accurate [\*\*7] and reliable. Only a handful of jurisdictions have upheld judicial notice of laser speed-measuring technology at the appellate level.

In denying Stoa's Motion for Judgment of Acquittal, the district court expressed its belief that laser devices are fair to defendants because they are more accurate than pacing or police guesswork, and more scientific. The district court also stated that it was taking judicial notice of the laser gun:

So this machine helps people. It keeps officers from making mistakes. I believe--I've been handling laser trials for eight years. I'm gonna take judicial notice of that fact. I'm gonna take judicial notice of the fact that there have been literally thousands of convictions under this machine.

I'm gonna take judicial notice of the fact that a lot of officers have been trained to use the machine; and that if we have many trials on--with expert witness[es] every time we have a speeding trial in the Kaneohe [\*263] Court or the other courts, we're gonna spend all our time in speeding trials.

....

So I'm gonna take judicial notice of--this is somewhat strange--but of the number of speeding trials I've heard, the observations of the [\*\*8] officers I've heard; and I also believe there is [Intermediate Court of Appeals] authority addressing these cases. I wish I had it in front of me to quote to you, but I don't.

The court then found that the prosecution had proved, beyond a reasonable doubt, that Stoa had driven forty-two miles per hour in a twenty-five-mile-per-hour zone, or seventeen miles per hour over the speed limit, and ordered Stoa to pay an \$ 85 fine, plus \$ 37 in court costs, which the court stayed for thirty days pending notice of appeal. The district court's Notice of Entry of Judgment and/or Order and Plea/Judgment, finding Stoa "guilty" of violating *HRS* § 291C-102, was filed on December 15, 2003 and this appeal followed.

## DISCUSSION

### A. The Admissibility of Readings from a Laser Speed-Measuring Device

[HN2] Generally, "where the admission of testimony on a scientific technique presents an issue of first impression, the technique's reliability is not a proper subject of judicial notice." *State v. Ito*, 90 Hawai'i 225, 242, 978 P.2d 191, 208

112 Haw. 260, \*263; 145 P.3d 803;  
2006 Haw. App. LEXIS 397, \*\*8

(*App. 1999*) (quoting *29 Am. Jur. 2d Evidence* § 94, at 137 (1994)). [\*\*9] To be admissible, expert testimony as to the scientific validity and reliability of the new or novel technique is required or the technique must be recognized as scientifically valid at least once by an appellate court within the trial court's jurisdiction. *Ito, 90 Hawaii at 242, 978 P.2d at 208*. However,

[HN3] [o]nce a scientific principle is sufficiently established, a court may take judicial notice of the validity of that principle. Similarly, a court may take judicial notice of the validity of the technique applying that principle. In either case the effect is the same: judicial notice relieves the offering party of the burden of producing evidence on these issues.

1 P. Giannelli & E. Imwinkelried, *Scientific Evidence* § 1-2, at 2 (2d ed.1993) (footnotes omitted). An eminent treatise on evidence further points out that

the [scientific] principle involved need not be commonly known in order to be judicially noticed; it suffices if the principle is accepted as a valid one in the appropriate scientific community. In determining the intellectual viability of the proposition, of course, the judge is free to consult any sources that he [or [\*\*10] she] thinks are reliable, but the extent to which judges are willing to take the initiative in looking up the authoritative sources will usually be limited. By and large, therefore, it is the task of counsel to find and to present in argument and briefs such references, excerpts and explanations as will convince the judge that the fact is certain and demonstrable. Puzzling enough in this regard, it has been noted that "nowhere can there be found a definition of what constitutes competent or authoritative sources for purposes of verifying judicially noticed facts." *And it should be noted, after a number of courts take judicial notice of a principle, subsequent courts begin to dispense with the production of these materials and to take judicial notice of the principle as a matter of law established by precedent.*

2 *McCormick on Evidence* § 330, at 395 (footnotes omitted, emphasis added).

Id. (brackets and emphasis in original).

Stoa argues that "[n]o Appellate Court in Hawai'i has recognized widespread acceptance of the reliability or accuracy of laser technology as a means of measuring speed." She also notes that courts in several other jurisdictions have [\*\*11] held that the technique of using laser-based devices to measure vehicle speed has not reached the scientific stage of verifiable certainty so as to allow evidence from such devices to be admissible without expert testimony. She cites, for example, *Izer v. State, 236 Ga. App. 282, 511 S.E.2d 625, 627 (Ga. Ct. App. 1999)* (holding that although some courts have accepted laser evidence, "it cannot be said that a *substantial* number of courts have recognized the technique" and "[c]onsidering [\*264] the dearth of authority showing the scientific certainty of the technique, as well as the absence of expert testimony on the subject, the trial court erred in admitting the evidence"); *People v. Canulli, 341 Ill. App. 3d 361, 792 N.E.2d 438, 445, 275 Ill. Dec. 207 (Ill. App. Ct. 2003)* (holding that "the use of Lidar laser technology to measure the speed of an automobile constitutes 'new' or 'novel' evidence" and therefore, an evidentiary hearing conducted pursuant to *Frye v. United States, 54 App. D.C. 46, 293 F. 1013 (D.C. Cir. 1923)* "was necessary to determine whether these instruments were admissible as a matter of law"); and *State v. Sapphire, 2000 Ohio App. LEXIS 5767, 2000 WL 1803852, [\*\*12] \*4 (Ohio Ct. App. 2000)* (an unpublished opinion, n5 holding that the trial court committed prejudicial error by admitting the evidence of the reading of an Ultralite 20/20 laser unit because there was "nothing in the record to show that the trial court has ever received expert evidence on and determined that the laser device used in this case is dependable and accurate, and because it appears that no court of binding authority upon the Xenia Municipal Court has ever taken judicial notice of this laser device").

112 Haw. 260, \*264; 145 P.3d 803;  
2006 Haw. App. LEXIS 397, \*\*12

n5 We note that pursuant to Hawai'i Rules of Appellate Procedure Rule 35(c), "[a] memorandum opinion or unpublished dispositional order shall not be cited in any other action or proceeding except when the opinion or unpublished dispositional order establishes the law of the pending case, res judicata or collateral estoppel, or in a criminal action or proceeding involving the same respondent."

Although the Hawai'i appellate courts have not had occasion to consider the admissibility of readings from [\*\*13] a laser speed-measuring device, the Hawai'i Supreme Court has upheld a speeding conviction based on the "testimony of a single police officer who relied upon a reading from a K-15 radar speed detection device (K-15 gun) which clocked the speed of [the appellant's] vehicle at seventy miles per hour in a fifty-five mile per hour zone." *State v. Tailo*, 70 Haw. 580, 580, 779 P.2d 11, 12 (1989). n6 The issue on appeal in Tailo was "whether the State must prove the accuracy of a tuning fork used in verifying the accuracy of the K-15 gun before results of that device are admissible as evidence of a speeding violation." *Id.* at 580-81, 779 P.2d at 12. However, the supreme court took the opportunity to address the question of the admissibility of radar gun evidence as proof of a speeding violation and held:

The scientific principles upon which the radar gun is based are well established. The radar gun is a system which transmits a continuous flow of microwaves on a constant frequency which are reflected back whenever they strike a target. When the target is an approaching vehicle, the speed of the vehicle causes the deflected waves to return on [\*\*14] a different and higher frequency than those sent out. A phenomena known as the Doppler effect posits that the faster the vehicle is moving into the radar transmissions, the higher the frequency of the reflected waves received by the radar gun. The radar gun measures the difference in the frequencies of the transmitted wave and the received wave, which enables it to use the Doppler effect to calculate the speed of the approaching vehicle. *See Kopper, The Scientific Reliability of Radar Speedmeters*, 16 Md. L. Rev. 1 (1956).

Because of the strength of the scientific principles on which the radar gun is based, every recent court which has dealt with the question has taken judicial notice of the scientific reliability of radar speedmeters as recorders of speed. *See State v. Gerdes*, 291 Minn. 353, 191 N.W.2d 428 (1971); *People v. MacLaird*, 264 Cal. App. 2d 972, 71 Cal. Rptr. 191 (1968); *State v. Tomanelli*, 153 Conn. 365, 216 A.2d 625 (1966); and Annotation, *Proof, by Radar [\*\*265] or Other Mechanical or Electronic Devices, of Violation of Speed Regulations*, 47 A.L.R.3d 822, 831-35 (1973). [\*\*15] These courts have also consistently held that [HN4] evidence of the accuracy of the particular radar unit is necessary to sustain a conviction for speeding obtained solely by radar. *State v. Primm*, 4 Kan. App. 2d 314, 606 P.2d 112 (1980); Annotation, *Proof, by Radar or Other Mechanical or Electronic Devices, of Violation of Speed Regulations*, 47 A.L.R.3d 822, 837-39 (1973). "The accuracy of a particular radar unit can be established by showing that the operator tested the device in accordance with accepted procedures to determine that the unit was functioning properly and that the operator was qualified by training and experience to operate the unit." *State v. Spence*, 418 So. 2d 583, 588 (La. 1982); *Gerdes, supra*; *Primm, supra*.

*Id.* at 582, 779 P.2d at 13.

n6 Although the Hawai'i Supreme Court did not explicitly say that it was "taking judicial notice" of the accuracy of the radar technology, it noted that other courts had taken judicial notice of its accuracy when it held that a properly tested radar unit creates a presumption that the particular unit's reading is accurate. *State v. Tailo*, 70 Haw. 580, 582-83, 779 P.2d 11, 13-14 (1989).

[\*\*16]

In concluding that the reading from a radar gun was admissible as prima facie evidence of speed, the supreme court thus relied on three factors: (1) the well-established scientific principles upon which the radar gun was premised; (2) the fact that other courts had taken judicial notice of the scientific reliability of radar guns as recorders of speed; and (3) the proven accuracy of the particular radar gun used, established by evidence that (a) the device was tested according to accepted procedures and was determined to be functioning properly, and (b) the operator of the device was qualified by training and experience to operate the device. *Id.*

Applying the criteria used by the supreme court in *Tailo* to justify admission of the reading of a radar gun into evidence, we conclude that the district court properly admitted into evidence the reading of the laser gun used by Officer Yamada to measure the speed of Stoa's vehicle.

First, the laser gun is technologically premised on well-understood scientific principles.

In *Goldstein v. State*, 339 Md. 563, 664 A.2d 375 (Md. 1995), the Court of Appeals of Maryland was called upon to determine whether [\*\*17] measurements taken with an LTI 20-20 laser gun were properly admitted into evidence. At trial, each side had called a scientific expert to testify about the reliability and acceptance of the LTI 20-20 in the particular scientific community. The State's expert testified that the particular laser gun was generally accepted as reliable and capable of accurately measuring speed of a vehicle within one mile per hour. The defense expert testified that the LTI 20-20 was not generally accepted, due primarily to flaws in the particular device. However, both experts had agreed that "in theory laser technology could be used to measure the speed of a motor vehicle." *Id.* at 376.

In concluding that the results were admissible, the court provided the following explanation of the scientific reliability of laser speed-detection technology generally:

Our analysis begins by examining the operation of the LTI 20-20. The theory underlying the LTI 20-20 would be familiar to any student of high school physics. In fact, laser speed devices operate on the same principles as military radar (police radar works somewhat differently). See 1 *McCormick on Evidence* § 204, at 880 (J. Strong 4th [\*\*18] ed. 1992). McCormick explains military radar as follows:

The radar antenna transmits microwave radiation in pulses. The equipment measures the time it takes for a pulse to reach the target and for its echo to return. Since the radiation travels at a known speed (the speed of light), this fixes the distance to the target. The changes in the distances as determined from the travel times of later pulses permit the target's velocity to be computed.

*Id.* § 204, at 880 n.17.

Laser speed measurements work exactly the same way, except that the device relies on lasers rather than microwave radiation. Laser is an acronym for "light amplification by stimulated emission of radiation." 15 *Funk & Wagnalls New Encyclopedia* 410 (R. Phillips ed., 1983).

Lasers are devices that amplify light and produce coherent light beams, ranging from infrared to ultraviolet. A light beam is coherent when its waves, or photons, propagate in step with one another. Laser light, therefore, can be made extremely intense, highly directional, and very pure in color (frequency).

*Id.*

[\*266] Light and microwaves, the building blocks of lasers and radar, respectively, occupy different [\*\*19] points on the electromagnetic spectrum but are otherwise similar. P. Tipler, *Physics* 852-54 (2d ed. 1982). According to the State's expert, the main advantage that lasers offer over radio-micro waves is that the beam is narrower and therefore easier to keep focused on the target vehicle.

A hypothetical might clarify this discussion. Our example involves a runner in a 200-meter dash. For purposes of our example, we assume that light travels at 200 meters per second. The actual speed of light is approximately 300 million meters per second, or 186,000 miles per second; our use of a different figure, however, is consistent with the relevant scientific principles and makes the calculations in our example easier.

An instant before the race begins, an observer standing at the finish line sends a laser beam toward the runner in the starting blocks. The beam reaches the runner and returns in two seconds. Thus, the distance for the round trip was 400 meters, so the runner must have been 200 meters away when the laser reached her. Five seconds later, the observer's laser device emits another light pulse, which returns in 1.5 seconds; thus, when the beam reached the runner, she [\*\*20] was 150 meters away. We can then calculate that the runner traveled fifty meters in the five-second interval between the two measurements; accordingly, she is running at an average speed of ten meters per second. 2

2 If the observer is not standing directly in front of the runner (or directly behind, if our hypothetical had placed the observer at the beginning of the track), then his measurements will understate the runner's speed. This phenomenon, known as the cosine effect, creates a potential source of error in the LTI 20-20's measurements. Because this error always favors the motorist, however, it is not at issue in this case.

*Goldstein*, 664 A.2d at 379. The Maryland court also concluded that it was not necessary for a trial court to conduct an evidentiary hearing on the scientific acceptance and reliability of a particular brand of a laser speed-detection device:

There are important considerations of judicial economy underlying the practice of limiting *Frye-Reed* to general processes, rather than brand-name products. If every brand of every instrument were subject to a discrete *Frye-Reed* evaluation, trial courts would be mired in hearings [\*\*21] concerning devices incorporating scientific principles, possibly including calculators and magnifying glasses. *See People v. Mendibles*, 199 Cal. App. 3d 1277, 245 Cal. Rptr. 553, 563 (1988) (stating that a *Frye* hearing is not required with respect to a colposcope, which the court characterized as "a weak microscope").

Moreover, the scientific consensus that forms a prerequisite for the admission of evidence would ordinarily be elusive, because, while scientists may be familiar with the general principles underlying a particular device, they may have no occasion to use the device itself. In the instant case, for example, the LTI 20-20 has little use other than for law enforcement purposes. Consequently, neither of the experts who testified at trial actually used the device in his work. . . .

We believe that the ordinary truth-seeking methods of the adversarial process will suffice to expose design flaws in the devices used to gather evidence, without requiring the courts to place a "*Frye-Reed* Seal of Approval" on individual brands. . . .

*Id.* at 381.

In *In re Admissibility of Motor Vehicle Speed Readings Produced by the LTI Marksman 20-20 Laser Speed Detection System*, 314 N.J. Super. 233, 714 A.2d 381 (N.J. Super. Ct. Law Div. 1998), [\*\*22] n7 the New Jersey Superior [\*\*267] Court, Law Division, similarly concluded that performance tests conducted by the New Jersey Department of Transportation of the LTI Marksman 20-20 Laser Speed Detection System manufactured by Laser Technology, Inc. demonstrated sufficient reliability of the laser speed detector to allow speed readings produced by such detectors to be received into evidence without the need for expert testimony in individual prosecutions. *Id.* at 391. In its opinion, the court described the way a laser speed detector is supposed to work, as follows:

A laser is an artificially generated and amplified light which is in the infrared light section of the electromagnetic wave spectrum. It is not visible to the naked eye. It is very concentrated. The laser speed detector fires a series of laser pulses at a selected remote target. When the laser light strikes the target, a portion of the light is reflected back to the detector. Since the speed of light is a known constant, by measuring the time it takes for the laser pulse to travel to the target and back, the detector is able to calculate the distance between the detector and the target. Each laser pulse [\*\*23] which is fired and reflected back establishes one distance reading. The laser speed detector fires 43 laser pulses every time the trigger on the detector is squeezed. These 43 pulses are fired in a total period of approximately one-third of a second. If the target at which the laser pulses are fired is a stationary target, each of the 43 pulses will give the same distance reading to the target, and distance will be the only thing that the detector can tell us about the target. However, if the target is moving, each of the 43 pulses will give a slightly different distance reading and the detector can then compute the velocity or speed of the target from the changes in distance divided by the known elapsed time between the firing of each of the laser pulses. In simplest terms, this is the basic theory underlying the use of lasers to calculate speed, and there can be no dispute about its fundamental validity.

714 A.2d at 383-84 (block quotation format altered).

n7 In *re Admissibility of Motor Vehicle Speed Readings Produced by the LTI Marksman 20-20 Laser Speed Detection System* is a case that provides a detailed positive evaluation of the performance of LTI 20-20 laser guns in comparison to other speed measuring devices. The court describes the results of tests, conducted by the New Jersey Department of Transportation, of the laser gun in comparison to various alternative speed measuring devices. The tests were conducted under a variety of normal driving conditions. Several local defense attorneys served as amici curiae adversaries during the proceedings.

[\*\*24]

Daniel Y. Gezari, Ph.D, who works for NASA/Goddard Space Flight Center, Infrared Astrophysics Branch, has noted that while laser and radar speed-measuring devices have several common features, they are different in several respects:

- (1) The laser gun has a very narrow beam (about three feet wide at a distance of 1000 feet), so that it can pick out a single car for measurement, while the radar beam is roughly 100 times wider (about 300 feet wide at 1000 feet) and can easily have a dozen cars in its beam simultaneously.
- (2) Laser speed guns make a direct measurement of how the position of the target changes in time . . . , while radar infers the speed from the Doppler-shifted frequency of the reflected waves.
- (3) The laser results are calculated and error-checked by a microprocessor, which verifies

the individual measurements and the final speed result. . . .

(4) Radar has the advantage of being better in poor visibility weather conditions (fog, rain, snow, etc.). However, the value of radar's bad-weather capability is questionable, since traffic stops are less likely to be made under bad weather conditions for other reasons, primarily safety concerns. [\*\*25]

(5) Radar speed guns can be set up to continuously monitor oncoming traffic without active operator attention, while the laser gun must be carefully aimed and triggered by the operator for each individual measurement.

(6) Laser speed guns are more immune to interference from natural and artificial environmental sources than radar guns. . . .

1 Campbell, Fisher & Mansfield, Defense of Speeding, Reckless Driving and Vehicular Homicide § 9a.02[6], at 9a-9 (2005).

[\*268] The foregoing explanations convince us that the laser speed detection device is technologically premised on well-accepted and reliable scientific principles.

Second, the accuracy and reliability of laser speed-detection devices for purposes of traffic speed monitoring have been explicitly affirmed by appellate courts in Maryland, Minnesota, and New Jersey, by a municipal court in Ohio, and by a superior court in New Jersey. See *Goldstein*, 664 A.2d at 381; *State v. Ali*, 679 N.W.2d 359, 364 (Minn. Ct. App. 2004) (holding that "so long as there is adequate evidence that a laser-based speed-measuring device used to support a conviction has been tested for accuracy [\*\*26] and that officers using the device have been trained in its use, a district court does not abuse its discretion in taking judicial notice of the device's general reliability of laser technology"); *State v. Abeskaron*, 326 N.J. Super. 110, 740 A.2d 690, 694 (N.J. Super. Ct. App. Div. 1999) (affirming the lower court's determination in *In re Admissibility of Motor Vehicle Speed Readings Produced by the LTI Marksman 20-20 Laser Speed Detection System* that "subject to the listed restrictions, the subject laser detector was an appropriate tool in measuring speed"); *City of Columbus v. Barton*, 106 Ohio Misc. 2d 17, 733 N.E.2d 326, 327 (Ohio Mun. Ct. 1994) (holding that the "laser speed detector is reliable and accurate as a scientific measure of the speed of a moving object, which can be used by law enforcement personnel to measure vehicle speed, provided that the device is used in accordance with certain procedures delineated by the manufacturer"); *In re Admissibility of Motor Vehicle Speed Readings Produced by the LTI Marksman 20-20 Laser Speed Detection System*, 714 A.2d at 391-92 (N.J. Super. 1998).

Finally, we conclude that the [\*\*27] laser device used by Sergeant Yamada to clock Stoa's speed satisfied all of the Hawai'i Supreme Court's requirements for accuracy. In *Tailo*, the supreme court required the accuracy of a particular radar unit to be established by proof "that the operator tested the device in accordance with accepted procedures to determine that the unit was functioning properly and that the operator was qualified by training and experience to operate the unit." *Tailo*, 70 Haw. at 582, 779 P.2d at 13 (citations and quotation marks omitted).

Sergeant Yamada testified that he performed the required functionality tests on the laser gun prior to beginning his patrol, and that the readings indicated that the device was functioning properly. He also testified that he possessed a valid certification for operating the laser gun and that he had twenty years' experience in performing traffic enforcement duties.

In light of the foregoing discussion, [HN5] we join the other states that have taken judicial notice of the scientific acceptance of the accuracy and reliability of laser speed-measuring devices.

We further hold that the prosecution presented evidence sufficient to establish [\*\*28] that the particular laser device

112 Haw. 260, \*268; 145 P.3d 803;  
2006 Haw. App. LEXIS 397, \*\*28

used by Sergeant Yamada was functioning properly and that Sergeant Yamada was qualified by training and experience to operate the device. We therefore reject Stoa's challenge to the admissibility of Sergeant Yamada's testimony on grounds of insufficient foundational evidence.

#### B. The Sufficiency of the Evidence Adduced Below

Stoa claims that the district court improperly denied her HRPP Rule 29 Motion for Judgment of Acquittal because, without the evidence of the laser reading, there was insufficient evidence to prove that she traveled in excess of the speed limit. Under Hawai'i case law,

[HN6] "[s]ubstantial evidence" as to every material element of the offense charged is credible evidence which is of sufficient quality and probative value to enable a [person] of reasonable caution to support a conclusion. And as trier of fact, the trial judge is free to make all reasonable and rational inferences under the facts in evidence, including circumstantial evidence.

*State v. Pone*, 78 Hawai'i 262, 265, 892 P.2d 455, 458 (1995) (some brackets in original, block quotation format altered) (quoting *State v. Batson*, 73 Haw. 236, 248-49, 831 P.2d 924, 931, [\*29] reconsideration denied, 73 Haw. 625, 834 P.2d 1315 (1992)).

[\*269] Based on our conclusion that the laser reading was admissible and in light of Sergeant Yamada's testimony regarding his testing of the functionality of his laser gun unit, his qualifications and experience, the posted speed limit in the area where he was performing traffic enforcement duties, the circumstances within which he used the laser gun in measuring Stoa's speed, and the forty-two-mile-per-hour reading on the laser gun, we hold that "credible evidence" of "sufficient quality and probative value" was provided to sustain the court's denial of Stoa's motion.

#### CONCLUSION

We therefore affirm the district court's determination that Stoa committed the offense of Noncompliance with Speed Limit Prohibited, in violation of *HRS* § 291C-102. However, because the district court erroneously found Stoa "guilty" of the offense, which is a civil traffic infraction rather than a crime, we vacate the judgment and remand for entry of a replacement judgment in favor of the State that complies with the applicable statutes governing traffic infractions.

**STATE OF IDAHO, Plaintiff-Respondent, v. HARVEY G. HALLENBECK,  
Defendant-Appellant.**

**Docket No. 30767, 2005 Opinion No. 35**

**COURT OF APPEALS OF IDAHO**

*141 Idaho 596; 114 P.3d 154; 2005 Ida. App. LEXIS 53*

**June 2, 2005, Filed**

**SUBSEQUENT HISTORY:** [\*\*\*1] Released for Publication: June 30, 2005.

**PRIOR HISTORY:** Appeal from the District Court of the First Judicial District, State of Idaho, Bonner County. Hon. James R. Michaud, District Judge.

**DISPOSITION:** Judgment of conviction for delaying or obstructing an officer, affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was convicted for resisting, delaying or obstructing an officer. The offense was a misdemeanor. After a jury trial in the trial court, he appealed to the District Court of the First Judicial District, Bonner County, Idaho. The latter court affirmed his conviction. He appealed again, asserting that his conduct constituting the basis for the obstructing charge occurred during an alleged illegal seizure during a traffic stop.

**OVERVIEW:** The officer pulled defendant over for speeding. Defendant immediately exited his vehicle. The officer ordered him to get back into his vehicle and he complied. However, he also became confrontational and refused to furnish his license. Ultimately, defendant attempted to open his door and get out of his vehicle, pushing the door against the officer. Finally, the officer gave defendant a ticket and ended the traffic stop. But defendant then got out of his car and began shining a flashlight at the patrol car license plates, stating he needed to identify same. When defendant walked to the rear of the patrol car and ignored the officer's repeated requests that he get back in his car, he was arrested. The appellate court rejected defendant's argument that he was detained illegally after the citation was issued because the patrol car's overhead lights remained on. In any event, defendant failed to obtain a ruling on that issue at trial. Finally, the evidence was sufficient to sustain defendant's conviction because defendant delayed or obstructed the officer in the performance of a duty of his office, even if same was based solely on defendant's conduct after the citation was issued.

**OUTCOME:** Defendant's conviction was affirmed.

**CORE TERMS:** deputy, patrol car, highway, door, speeding, driver, traffic stop, obstructing, lawful, emergency,

license, patrol, flashlight, detention, exit, public officer, resisting, arrested, obstruct, delaying, pushing, trial evidence, suppression, obstructed, occurring, repeated, resisted, traffic, walked, shined

**OPINION:** [\*597] [\*\*155] LANSING, Judge

Harvey G. Hallenbeck is appealing from the district court's order affirming his misdemeanor conviction for resisting, delaying or obstructing an officer. We affirm.

**I.**

## FACTUAL & PROCEDURAL BACKGROUND

The events leading to Hallenbeck's prosecution are as follows. In the evening hours of November 14, 2002, Deputy Lehman of the Bonner County Sheriff's office was patrolling Highway 2 when he pulled over a vehicle for speeding. A videotape of the encounter shows the vehicle stopped ahead of the patrol unit, at night, just to the right of [\*\*\*2] the highway's fog line. Hallenbeck, who was the driver, immediately exited his vehicle. Lehman ordered Hallenbeck to get back into his vehicle and Hallenbeck complied. However, Hallenbeck also immediately became confrontational, denying that he had been speeding and questioning Lehman about the calibration of his radar. When asked to produce his driver's license, Hallenbeck did not cooperate. Lehman had to request it two or three times, and when Hallenbeck did eventually produce the license he held it so tightly that Lehman had to forcefully pull it from Hallenbeck's hand. Deputy Lehman then returned to his vehicle, ran a license check through dispatch, wrote out a citation for speeding, and returned to the Hallenbeck vehicle. Hallenbeck continued to be argumentative, [\*\*156] [\*598] asking Lehman in a rude manner about his training and experience as an officer. Lehman tersely but courteously explained the amount of the fine for speeding and discussed the procedures to request a court date. Hallenbeck's passenger then became argumentative, contending that the vehicle was stopped solely because it had California license plates.

At that point, Hallenbeck attempted to open the driver's door and get [\*\*\*3] out of the vehicle, pushing the door against Lehman, who was standing next to the door. Lehman pushed back and told Hallenbeck to close the door and stay in the car. Hallenbeck continued to push on the door. Lehman ordered Hallenbeck four more times to close the door and stay in the car, and he twice stated that Hallenbeck would be arrested for resisting and obstructing if he did not comply. Hallenbeck finally relented. Hallenbeck then asked the license number of Lehman's patrol unit. Lehman responded that his name and badge number were on the ticket.

The deputy then ended the traffic stop by telling Hallenbeck to "drive safe," after which he walked back toward his patrol car. Hallenbeck thereupon emerged from his vehicle, carrying a flashlight, and walked toward the patrol car. Lehman asked, "Can I help you?" Hallenbeck did not respond but shined a flashlight on the license plate of the patrol car and wrote the plate number on a pad. Hallenbeck later testified that he was gathering evidence because he had not been speeding and wanted to identify the patrol car so that he could challenge the calibration of its radar. Hallenbeck next shined the flashlight into the patrol car and then [\*\*\*4] walked to the rear of the patrol car. He later testified that he wanted to write down the make of the car for evidentiary purposes. At that point Deputy Lehman lost patience. He told Hallenbeck three times "Get back in the car or you will go to jail." When Hallenbeck did not comply, he was arrested for misdemeanor resisting, delaying or obstructing an officer, *Idaho Code* § 18-705.

Following a jury trial, Hallenbeck was found guilty. He appealed to the district court, which affirmed the conviction. This appeal followed. Hallenbeck contends he was unlawfully arrested and that the evidence adduced at trial was insufficient to sustain a conviction.

## II.

### ANALYSIS

#### A. Legality of Arrest

Hallenbeck first argues that his arrest for obstructing a police officer was unlawful. While his argument on this issue is not entirely clear, he appears to contend that he was detained illegally after the citation was issued because the patrol car's overhead emergency lights remained on, that his conduct constituting the basis for the obstructing charge occurred during this allegedly illegal seizure, and that such evidence therefore should have been suppressed [\*\*\*5] and cannot be relied upon to sustain a conviction.

Hallenbeck's argument that his detention continued after the citation had issued solely because the officer's overhead emergency lights remained on is significantly eroded by our recent decision in *State v. Roark*, 140 Idaho 868,

141 Idaho 596, \*598; 114 P.3d 154, \*\*156;  
2005 Ida. App. LEXIS 53, \*\*\*5

140 Idaho 868, 103 P.3d 481 (Ct. App. 2004). We there held,[HN1] "Although the activation of the emergency lights is a command for motorists to stop, by terms of *I.C. § 49-625* and *49-1404(1)*, the fact that the emergency lights had not yet been turned off did not constitute a continued show of authority detaining Roark in the face of at least two notifications from the officer that he was free to go." *Id. at 871, 103 P.3d at 484*. We also have grave doubts as to the validity of Hallenbeck's premise that a court must suppress evidence of criminal acts committed by a defendant occurring during the course of an illegal seizure. We need not pass upon these issues however, because Hallenbeck did not obtain a ruling on his suppression theory in the trial court. Although Hallenbeck filed a pretrial motion to suppress, the matter was never scheduled for hearing, heard, or ruled [\*\*\*6] upon by the magistrate. The evidence that Hallenbeck complains of on appeal was presented without objection at trial. [HN2] This Court will not review a trial court's alleged error on appeal absent an adverse ruling that forms the basis for the assignment of error. *State* [\*\*157] [\*599] *v. Fisher*, 123 Idaho 481, 485, 849 P.2d 942, 946 (1993).

In short, Hallenbeck cannot, at this late date, assert the jury should not have heard the evidence that it did hear after Hallenbeck abandoned any effort to obtain suppression of the evidence. Similarly,[HN3] this Court will not, on review of the sufficiency of the evidence at trial, ignore evidence that was admitted at trial without objection.

## B. Sufficiency of the Evidence

Hallenbeck next argues that the trial evidence was insufficient to show that he violated *I.C. § 18-705*, which provides:

[HN4] Every person who wilfully resists, delays or obstructs any public officer, in the discharge, or attempt to discharge, of any duty of his office or who knowingly gives a false report to any peace officer, when no other punishment is prescribed, is punishable by a fine not exceeding one thousand dollars (\$ 1,000), and imprisonment [\*\*\*7] in the county jail not exceeding one (1) year.

Hallenbeck reasons that, once the speeding citation had been issued, Deputy Lehman could no longer constitutionally detain Hallenbeck and therefore the deputy had no authority to direct or restrict Hallenbeck's movements and activities. Therefore, Hallenbeck asserts, Deputy Lehman could not lawfully order Hallenbeck to return to his own vehicle while Hallenbeck was examining the patrol car, and in ignoring that order Hallenbeck did not resist, delay or obstruct the officer in "any duty of his office."

The question of what constitutes a "duty" as that term is used in *I.C. § 18-705* was addressed by this Court in *State v. Wilkerson*, 114 Idaho 174, 755 P.2d 471 (Ct. App. 1988). n1 We there recognized that "resolution of the question presented here requires an exploration of 'the difficult, dangerous, and subtle field where the essential office of the policeman impinges upon the basic freedom of the citizen.'" *Id. at 178, 755 P.2d at 475*. We concluded:

[HN5] We hold that where an individual refuses to obey an order or obstructs an act of a public officer which is contrary [\*\*\*8] to the law, be it statute or constitution, that individual does not violate *I.C. § 18-705*. We interpret "duty" as used in that statute to encompass only those lawful and authorized acts of a public officer. To hold otherwise would clothe an officer with protection from resistance based only on his status as an officer and would render the "in the discharge, or attempt to discharge, of a duty of his office" language of the statute mere surplusage.

*Id. at 180, 755 P.2d at 477*.

n1 On review, the Idaho Supreme Court authored a five-line opinion adopting this Court's decision as "correctly decided." *State v. Wilkerson*, 115 Idaho 357, 766 P.2d 1238 (1988).

Applying that definition of "duty," we conclude that there was sufficient evidence for a jury finding that Hallenbeck resisted, delayed or obstructed Deputy Lehman in the performance of a duty of his office. We begin by noting that although Hallenbeck's argument on appeal assumes that his only conduct [\*\*\*9] at issue was his failure to comply with Lehman's final orders to return to his car, neither the charging citation nor the jury instructions limited the charge to that conduct. The citation alleged that Hallenbeck resisted and obstructed an officer by "failing to obey commands to get back into his car." And the jury instruction stating the elements of the offense instructed in the general language of the statute and did not identify the specific act or acts that were alleged to constitute the violation. Therefore, the jury could have found Hallenbeck guilty either for his conduct after the citation was issued or for his earlier behavior in attempting to exit the car by pushing the door open against Lehman's body despite the deputy's repeated instructions to close the door and stay in the car. This conduct, which resulted in a shoving match at the door between Hallenbeck and the deputy, occurred during what Hallenbeck concedes to be a lawful segment of the detention, before the deputy concluded the traffic stop. [HN6] It is beyond dispute that during a traffic stop, an officer has the authority to control the movement of the driver of the stopped vehicle. *See Pennsylvania v. Mimms*, 434 U.S. 106, 111, 54 L. Ed. 2d 331, 98 S. Ct. 330 (1977); [\*\*\*10] *State v. Butcher*, 137 Idaho 125, 131, [\*\*158] [\*600] 44 P.3d 1180, 1186 (Ct. App. 2002) ("During a lawful traffic stop, the officer may instruct the driver to exit the vehicle or to remain inside. The procedure is within the police officer's discretion and is not otherwise unlawful."). [HN7] It is also clear that Hallenbeck's acts of making physical contact and struggling with the officer are sufficient to sustain a conviction under the statute. *See State v. Wight*, 117 Idaho 604, 607, 790 P.2d 385, 388 (Ct. App. 1990) [HN8] (During a pat down search occurring during a traffic stop, the defendant's "reaction in pushing the officer constituted sufficient grounds to arrest him for obstructing and delaying."). Thus, the jury could have based its conviction on Hallenbeck's actions of attempting to exit his vehicle in contravention of Lehman's initial lawful order to get back in his vehicle and repeated lawful orders to remain in his vehicle.

Even if the finding of guilt was based solely on the later confrontation, when Hallenbeck disobeyed Lehman's orders to return from the vicinity of the patrol car to his own vehicle the verdict must be upheld. We conclude that the deputy's orders [\*\*\*11] were not beyond the scope of his authority even though the detention for the speeding violation had by then ended. [HN9] A deputy's duties include those enumerated in *I.C. § 31-2202(12)*, which directs that a sheriff shall:

[HN10] (a) Require all persons using the highways in the state to do so carefully, safely and with exercise of care for the persons, property and safety of others; [and]

. . . .

(d) Regulate traffic on all highways and roads in the state . . . .

*See also Cornell v. Harris*, 60 Idaho 87, 93, 88 P.2d 498, 500 (1939) [HN11] ("In addition to powers expressly conferred upon him by law, an officer has by implication such powers as are necessary for the due and efficient exercise of those expressly granted, or such as may be fairly implied therefrom."). Here, the traffic stop occurred at night alongside a highway with a fifty-five mile-per-hour speed limit. Both Hallenbeck's vehicle and the patrol unit were parked immediately to the right of the highway's fog line. On the videotape of the stop, other vehicles can be seen passing by intermittently. Some vehicles slow to pass, and others appear to be going at a high speed. Vehicles can [\*\*\*12] be seen crossing into the other lane of the two-lane highway to pass. In short, safety would be a concern in this circumstance. Deputy Lehman testified that when Hallenbeck was walking about conducting his inspection of the patrol car, he was in the traffic lane at times, and Lehman was concerned that an oncoming driver may not be able to see Hallenbeck standing in the road. Thus, the State showed at trial that Deputy Lehman had a legitimate basis for concern about Hallenbeck's personal safety and the safety of approaching drivers. Lehman had the authority, and in fact the duty, to safeguard persons using the highways. Therefore, the jury could properly find that Deputy Lehman was

141 Idaho 596, \*600; 114 P.3d 154, \*\*158;  
2005 Ida. App. LEXIS 53, \*\*\*12

performing a "duty" of his office when he ordered Hallenbeck to return to his own car and that by refusing to comply, Hallenbeck violated *I.C. § 18-705*.

Accordingly, the trial evidence was sufficient to support the jury's verdict, and the judgment of conviction is therefore affirmed.

**OPINION BY:** LANSING

**OPINION:** [\*597] [\*\*155] LANSING, Judge

Harvey G. Hallenbeck is appealing from the district court's order affirming his misdemeanor conviction for resisting, delaying or obstructing an officer. We affirm.

**I.**

## FACTUAL & PROCEDURAL BACKGROUND

The events leading to Hallenbeck's prosecution are as follows. In the evening hours of November 14, 2002, Deputy Lehman of the Bonner County Sheriff's office was patrolling Highway 2 when he pulled over a vehicle for speeding. A videotape of the encounter shows the vehicle stopped ahead of the patrol unit, at night, just to the right of [\*\*\*2] the highway's fog line. Hallenbeck, who was the driver, immediately exited his vehicle. Lehman ordered Hallenbeck to get back into his vehicle and Hallenbeck complied. However, Hallenbeck also immediately became confrontational, denying that he had been speeding and questioning Lehman about the calibration of his radar. When asked to produce his driver's license, Hallenbeck did not cooperate. Lehman had to request it two or three times, and when Hallenbeck did eventually produce the license he held it so tightly that Lehman had to forcefully pull it from Hallenbeck's hand. Deputy Lehman then returned to his vehicle, ran a license check through dispatch, wrote out a citation for speeding, and returned to the Hallenbeck vehicle. Hallenbeck continued to be argumentative, [\*\*156] [\*598] asking Lehman in a rude manner about his training and experience as an officer. Lehman tersely but courteously explained the amount of the fine for speeding and discussed the procedures to request a court date. Hallenbeck's passenger then became argumentative, contending that the vehicle was stopped solely because it had California license plates.

At that point, Hallenbeck attempted to open the driver's door and get [\*\*\*3] out of the vehicle, pushing the door against Lehman, who was standing next to the door. Lehman pushed back and told Hallenbeck to close the door and stay in the car. Hallenbeck continued to push on the door. Lehman ordered Hallenbeck four more times to close the door and stay in the car, and he twice stated that Hallenbeck would be arrested for resisting and obstructing if he did not comply. Hallenbeck finally relented. Hallenbeck then asked the license number of Lehman's patrol unit. Lehman responded that his name and badge number were on the ticket.

The deputy then ended the traffic stop by telling Hallenbeck to "drive safe," after which he walked back toward his patrol car. Hallenbeck thereupon emerged from his vehicle, carrying a flashlight, and walked toward the patrol car. Lehman asked, "Can I help you?" Hallenbeck did not respond but shined a flashlight on the license plate of the patrol car and wrote the plate number on a pad. Hallenbeck later testified that he was gathering evidence because he had not been speeding and wanted to identify the patrol car so that he could challenge the calibration of its radar. Hallenbeck next shined the flashlight into the patrol car and then [\*\*\*4] walked to the rear of the patrol car. He later testified that he wanted to write down the make of the car for evidentiary purposes. At that point Deputy Lehman lost patience. He told Hallenbeck three times "Get back in the car or you will go to jail." When Hallenbeck did not comply, he was arrested for misdemeanor resisting, delaying or obstructing an officer, *Idaho Code* § 18-705.

Following a jury trial, Hallenbeck was found guilty. He appealed to the district court, which affirmed the conviction. This appeal followed. Hallenbeck contends he was unlawfully arrested and that the evidence adduced at trial was insufficient to sustain a conviction.

## II.

### ANALYSIS

#### A. Legality of Arrest

Hallenbeck first argues that his arrest for obstructing a police officer was unlawful. While his argument on this issue is not entirely clear, he appears to contend that he was detained illegally after the citation was issued because the patrol car's overhead emergency lights remained on, that his conduct constituting the basis for the obstructing charge occurred during this allegedly illegal seizure, and that such evidence therefore should have been suppressed [\*\*\*5] and cannot be relied upon to sustain a conviction.

Hallenbeck's argument that his detention continued after the citation had issued solely because the officer's overhead emergency lights remained on is significantly eroded by our recent decision in *State v. Roark*, 140 Idaho 868,

141 Idaho 596, \*598; 114 P.3d 154, \*\*156;  
2005 Ida. App. LEXIS 53, \*\*\*5

140 Idaho 868, 103 P.3d 481 (Ct. App. 2004). We there held,[HN1] "Although the activation of the emergency lights is a command for motorists to stop, by terms of *I.C. § 49-625* and *49-1404(1)*, the fact that the emergency lights had not yet been turned off did not constitute a continued show of authority detaining Roark in the face of at least two notifications from the officer that he was free to go." *Id. at 871, 103 P.3d at 484*. We also have grave doubts as to the validity of Hallenbeck's premise that a court must suppress evidence of criminal acts committed by a defendant occurring during the course of an illegal seizure. We need not pass upon these issues however, because Hallenbeck did not obtain a ruling on his suppression theory in the trial court. Although Hallenbeck filed a pretrial motion to suppress, the matter was never scheduled for hearing, heard, or ruled [\*\*\*6] upon by the magistrate. The evidence that Hallenbeck complains of on appeal was presented without objection at trial. [HN2] This Court will not review a trial court's alleged error on appeal absent an adverse ruling that forms the basis for the assignment of error. *State* [\*\*157] [\*599] *v. Fisher*, 123 Idaho 481, 485, 849 P.2d 942, 946 (1993).

In short, Hallenbeck cannot, at this late date, assert the jury should not have heard the evidence that it did hear after Hallenbeck abandoned any effort to obtain suppression of the evidence. Similarly,[HN3] this Court will not, on review of the sufficiency of the evidence at trial, ignore evidence that was admitted at trial without objection.

## B. Sufficiency of the Evidence

Hallenbeck next argues that the trial evidence was insufficient to show that he violated *I.C. § 18-705*, which provides:

[HN4] Every person who wilfully resists, delays or obstructs any public officer, in the discharge, or attempt to discharge, of any duty of his office or who knowingly gives a false report to any peace officer, when no other punishment is prescribed, is punishable by a fine not exceeding one thousand dollars (\$ 1,000), and imprisonment [\*\*\*7] in the county jail not exceeding one (1) year.

Hallenbeck reasons that, once the speeding citation had been issued, Deputy Lehman could no longer constitutionally detain Hallenbeck and therefore the deputy had no authority to direct or restrict Hallenbeck's movements and activities. Therefore, Hallenbeck asserts, Deputy Lehman could not lawfully order Hallenbeck to return to his own vehicle while Hallenbeck was examining the patrol car, and in ignoring that order Hallenbeck did not resist, delay or obstruct the officer in "any duty of his office."

The question of what constitutes a "duty" as that term is used in *I.C. § 18-705* was addressed by this Court in *State v. Wilkerson*, 114 Idaho 174, 755 P.2d 471 (Ct. App. 1988). n1 We there recognized that "resolution of the question presented here requires an exploration of 'the difficult, dangerous, and subtle field where the essential office of the policeman impinges upon the basic freedom of the citizen.'" *Id. at 178, 755 P.2d at 475*. We concluded:

[HN5] We hold that where an individual refuses to obey an order or obstructs an act of a public officer which is contrary [\*\*\*8] to the law, be it statute or constitution, that individual does not violate *I.C. § 18-705*. We interpret "duty" as used in that statute to encompass only those lawful and authorized acts of a public officer. To hold otherwise would clothe an officer with protection from resistance based only on his status as an officer and would render the "in the discharge, or attempt to discharge, of a duty of his office" language of the statute mere surplusage.

*Id. at 180, 755 P.2d at 477*.

n1 On review, the Idaho Supreme Court authored a five-line opinion adopting this Court's decision as "correctly decided." *State v. Wilkerson*, 115 Idaho 357, 766 P.2d 1238 (1988).

Applying that definition of "duty," we conclude that there was sufficient evidence for a jury finding that Hallenbeck resisted, delayed or obstructed Deputy Lehman in the performance of a duty of his office. We begin by noting that although Hallenbeck's argument on appeal assumes that his only conduct [\*\*\*9] at issue was his failure to comply with Lehman's final orders to return to his car, neither the charging citation nor the jury instructions limited the charge to that conduct. The citation alleged that Hallenbeck resisted and obstructed an officer by "failing to obey commands to get back into his car." And the jury instruction stating the elements of the offense instructed in the general language of the statute and did not identify the specific act or acts that were alleged to constitute the violation. Therefore, the jury could have found Hallenbeck guilty either for his conduct after the citation was issued or for his earlier behavior in attempting to exit the car by pushing the door open against Lehman's body despite the deputy's repeated instructions to close the door and stay in the car. This conduct, which resulted in a shoving match at the door between Hallenbeck and the deputy, occurred during what Hallenbeck concedes to be a lawful segment of the detention, before the deputy concluded the traffic stop. [HN6] It is beyond dispute that during a traffic stop, an officer has the authority to control the movement of the driver of the stopped vehicle. *See Pennsylvania v. Mimms*, 434 U.S. 106, 111, 54 L. Ed. 2d 331, 98 S. Ct. 330 (1977); [\*\*\*10] *State v. Butcher*, 137 Idaho 125, 131, [\*\*158] [\*600] 44 P.3d 1180, 1186 (Ct. App. 2002) ("During a lawful traffic stop, the officer may instruct the driver to exit the vehicle or to remain inside. The procedure is within the police officer's discretion and is not otherwise unlawful."). [HN7] It is also clear that Hallenbeck's acts of making physical contact and struggling with the officer are sufficient to sustain a conviction under the statute. *See State v. Wight*, 117 Idaho 604, 607, 790 P.2d 385, 388 (Ct. App. 1990) [HN8] (During a pat down search occurring during a traffic stop, the defendant's "reaction in pushing the officer constituted sufficient grounds to arrest him for obstructing and delaying."). Thus, the jury could have based its conviction on Hallenbeck's actions of attempting to exit his vehicle in contravention of Lehman's initial lawful order to get back in his vehicle and repeated lawful orders to remain in his vehicle.

Even if the finding of guilt was based solely on the later confrontation, when Hallenbeck disobeyed Lehman's orders to return from the vicinity of the patrol car to his own vehicle the verdict must be upheld. We conclude that the deputy's orders [\*\*\*11] were not beyond the scope of his authority even though the detention for the speeding violation had by then ended. [HN9] A deputy's duties include those enumerated in *I.C. § 31-2202(12)*, which directs that a sheriff shall:

[HN10] (a) Require all persons using the highways in the state to do so carefully, safely and with exercise of care for the persons, property and safety of others; [and]

. . . .

(d) Regulate traffic on all highways and roads in the state . . . .

*See also Cornell v. Harris*, 60 Idaho 87, 93, 88 P.2d 498, 500 (1939) [HN11] ("In addition to powers expressly conferred upon him by law, an officer has by implication such powers as are necessary for the due and efficient exercise of those expressly granted, or such as may be fairly implied therefrom."). Here, the traffic stop occurred at night alongside a highway with a fifty-five mile-per-hour speed limit. Both Hallenbeck's vehicle and the patrol unit were parked immediately to the right of the highway's fog line. On the videotape of the stop, other vehicles can be seen passing by intermittently. Some vehicles slow to pass, and others appear to be going at a high speed. Vehicles can [\*\*\*12] be seen crossing into the other lane of the two-lane highway to pass. In short, safety would be a concern in this circumstance. Deputy Lehman testified that when Hallenbeck was walking about conducting his inspection of the patrol car, he was in the traffic lane at times, and Lehman was concerned that an oncoming driver may not be able to see Hallenbeck standing in the road. Thus, the State showed at trial that Deputy Lehman had a legitimate basis for concern about Hallenbeck's personal safety and the safety of approaching drivers. Lehman had the authority, and in fact the duty, to safeguard persons using the highways. Therefore, the jury could properly find that Deputy Lehman was

141 Idaho 596, \*600; 114 P.3d 154, \*\*158;  
2005 Ida. App. LEXIS 53, \*\*\*12

performing a "duty" of his office when he ordered Hallenbeck to return to his own car and that by refusing to comply, Hallenbeck violated *I.C. § 18-705*.

Accordingly, the trial evidence was sufficient to support the jury's verdict, and the judgment of conviction is therefore affirmed.

**May 31, 1985, Filed**

**PRIOR HISTORY:** [\*\*\*1]

Appeal from the Circuit Court of Carroll County; the Hon. John DeMoss, Judge, presiding.

**DISPOSITION:**

Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a jury verdict in the Circuit Court of Carroll County (Illinois), which found defendant guilty of the offense of speeding under Ill. Rev. Stat. ch. 95 1/2, para. 11-601(b) (1981). The trial court ordered defendant to pay a fine and costs.

**OVERVIEW:** Defendant was charged with speeding and plead not guilty and requested a jury trial. Defendant acted pro se. A jury found defendant guilty. On appeal, the court affirmed. The court rejected defendant's argument that the trial court erred when it denied his oral motions for continuances because there was no evidence in the appellate record to indicate that defendant ever requested a continuance. The court found that the trial court properly denied defendant's request for a continuance to allow him time to issue a subpoena to the highway commissioner because defendant did not act diligently and the potential witness would not have aided defendant's case. The court found (1) that defendant was not entitled to the assistance of the court in the jury selection process, (2) that defendant failed to establish the bias of a juror, (3) that any error in the admission of the officer's testimony as to what defendant said to him immediately after he was stopped was harmless, and (4) that the evidence was sufficient to support defendant's conviction. The state offered evidence that the radar device indicated that defendant was speeding, it was tested periodically, and it functioned properly.

**OUTCOME:** The court affirmed the judgment of the trial court against defendant.

**CORE TERMS:** juror, miles, post-trial, radar, speed limit, continuance, speed, speeding, voir dire, traveling, bias,

reasonable doubt, machine, zone, peremptory, continuance motion, impartially, clocked, miles per hour, prior to trial, guilty beyond, pro se, inaudible, sound discretion, trier of fact, fair trial, suspicion, manifest, scene, abuse of discretion

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Pretrial Motions > Continuances***

##### ***Criminal Law & Procedure > Trials > Judicial Discretion***

[HN1] The right to a continuance is not absolute, and its denial or allowance is a decision to be made within the sound discretion of the trial court. To warrant reversal of the trial court's ruling, the defendant must demonstrate that the denial of the continuance embarrassed the accused in the preparation of his defense so as to prejudice his rights. The circumstances regarding the continuance motion must be evaluated on a case-by-case basis, including the reasons presented to the trial court at the time the request is denied. The trial court should not refuse to grant a continuance where the ends of justice require that the motion be granted.

#### ***Criminal Law & Procedure > Pretrial Motions > Continuances***

##### ***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview***

[HN2] When reviewing the trial court's denial of a motion during trial to obtain a witness, the reviewing court must consider the defendant's diligence, the potential witness' testimony, and the defendant's right to a fair trial.

#### ***Civil Procedure > Pretrial Matters > Continuances***

##### ***Criminal Law & Procedure > Pretrial Motions > Continuances***

[HN3] The allowance or denial of a continuance motion to compel the presence of a witness is within the trial court's discretion. Ill. Rev. Stat. ch. 38, para. 114-4 (1981).

#### ***Civil Procedure > Parties > Self-Representation > General Overview***

##### ***Civil Procedure > Trials > Jury Trials > Jurors > Selection > General Overview***

##### ***Criminal Law & Procedure > Juries & Jurors > Challenges for Cause > General Overview***

[HN5] The burden rests with the party challenging a juror to establish that the juror possessed a disqualifying state of mind. The mere suspicion of bias in a juror is insufficient to impeach a verdict.

#### ***Criminal Law & Procedure > Juries & Jurors > Challenges to Jury Venire > Bias & Prejudice > General Overview***

[HN6] Prejudice by a juror is the forming of an opinion based upon allegations heard outside the courtroom rather than based upon facts heard during the trial.

#### ***Civil Procedure > Judicial Officers > Judges > Discretion***

##### ***Criminal Law & Procedure > Trials > Judicial Discretion***

##### ***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN7] The determination of whether a prospective juror possesses the state of mind enabling him to give to an accused a fair and impartial trial rests in the sound discretion of the trial judge, and his determination will not be set aside unless against the manifest weight of the evidence.

133 Ill. App. 3d 553, \*; 479 N.E.2d 15, \*\*;  
1985 Ill. App. LEXIS 1988, \*\*\*1; 88 Ill. Dec. 680

*Civil Procedure > Trials > Jury Trials > Jurors > Misconduct*  
*Civil Procedure > Trials > Jury Trials > Jurors > Selection > Challenges for Cause*  
*Civil Procedure > Trials > Jury Trials > Jurors > Selection > Peremptory Challenges*

[HN8] Failure to challenge a juror for cause or to exercise a peremptory challenge waives any objection to that juror.

*Civil Procedure > Appeals > Records on Appeal*  
*Criminal Law & Procedure > Appeals > Records on Appeal*  
*Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > Records*

[HN9] An appellant has the duty to provide a complete record on appeal. Any doubt arising from the incompleteness of the record will be resolved against the party prosecuting the appeal.

*Criminal Law & Procedure > Appeals > Reviewability > Waiver > General Overview*  
*Evidence > Procedural Considerations > Objections & Offers of Proof > Objections*

[HN10] The failure to object to evidence giving specific reasons for the objection constitutes a waiver of any error.

*Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview*  
*Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor*  
*Evidence > Relevance > Confusion, Prejudice & Waste of Time*

[HN11] The test of the admissibility of evidence is whether it fairly tends to prove the particular offense charged, and whether what is offered as evidence will be admitted or excluded depends upon whether it tends to make the question of guilt more or less probable; i.e., whether it is relevant. A trial court may reject offered evidence on grounds of irrelevancy if it has little probative value due to its remoteness, uncertainty or its possibly unfair prejudicial nature. The admission of evidence is within the sound discretion of the trial court, and its ruling should not be reversed absent a clear showing of abuse of that discretion.

*Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution*  
*Criminal Law & Procedure > Trials > Judicial Discretion*

[HN12] The proper standard of proof in the case for a charge of speeding is whether defendant was proved guilty beyond a reasonable doubt.

*Criminal Law & Procedure > Appeals > Standards of Review > General Overview*

[HN13] A reviewing court will not lightly overturn a jury's verdict and will not substitute its judgment for that of the trier of fact unless the evidence is so improbable as to raise a reasonable doubt of defendant's guilt.

*Criminal Law & Procedure > Appeals > Standards of Review > General Overview*

[HN14] Reversal of a guilty verdict is not warranted merely because the jury believed the prosecutor's evidence as opposed to that presented by the defendant, or because the transcript contains minor inconsistencies which the trier of fact has resolved in favor of the state.

#### **JUDGES:**

JUSTICE LINDBERG delivered the opinion of the court. HOPF and STROUSE, JJ., concur.

**OPINION BY:**

LINDBERG

**OPINION:**

[\*555] [\*\*17] Defendant, Donald R. Davenport, was charged by citation and complaint with the offense of speeding (Ill. Rev. Stat. 1981, ch. 95 1/2, par. 11 -- 601(b)), in connection with an incident occurring on August 8, 1983. After a jury trial in the circuit court of Carroll County, defendant was found guilty, his post-trial motion was denied, and he was ordered to pay a \$ 150 fine and costs. Defendant has raised five issues on appeal. Because we find no reversible errors, we affirm.

The citation and complaint indicates that defendant was arrested and ticketed for speeding on August 8, 1983, [\*\*\*2] at 7:48 p.m. in the village of Milledgeville, county of Carroll, State of Illinois. Defendant pleaded not guilty and requested a jury trial, which was held on October 31, 1983.

Acting *pro se*, defendant during the *voir dire* conducted by the court exhausted his five peremptory challenges, and the court rejected defendant's two challenges for cause. The only witnesses at trial were the arresting officer, James Haag, and defendant. Distilled to its essence, Haag's testimony was that his radar device, tested before and after the incident, indicated that defendant was traveling 53 miles per hour in a 35 miles per hour zone. In contrast, defendant stated he did not exceed the speed limit, braking as necessary in compliance with the posted speed limit signs. Defendant suggested during trial that he believed Haag was enforcing the speed laws selectively against him because Haag did not like him. In support of his theory, defendant presented testimony that Haag had previously ticketed defendant for speeding. Defendant's testimony also suggested Haag was too zealous in his enforcement of the speed laws.

Defendant was sentenced on November 18, 1983. On November 22, 1983, defendant, [\*\*\*3] through counsel, filed a post-trial motion requesting an arrest of judgment and a new trial. The only issues raised in that motion which are also raised on appeal were: (1) defendant was [\*556] not proved guilty beyond a reasonable doubt, and (2) the trial court erred by (a) denying his motions for continuances and (b) by failing to assist him during *voir dire*. Defendant also included the general assignment of error that "other errors occurred in the conduct of the trial, the ruling on Motions, and the introduction of evidence, which are general and non-specific but which require a new trial."

Defendant did not raise the issue of the admission into evidence of defendant's belligerent and profane post-arrest statements in his original post-trial motion, but instead [\*\*18] only raised this issue in his amendment to post-trial motion filed on February 17, 1984. That same day, the trial court denied defendant's post-trial motions and defendant on March 2, 1984, filed a timely notice of appeal.

Defendant raises as his first argument that the trial court erred in denying his oral motions for continuances made prior to trial and during the pendency of the trial. [\*\*\*4] The State responds that the trial court did not abuse its discretion in denying defendant's motions.

[HN1] The right to a continuance is not absolute, and its denial or allowance is a decision to be made within the sound discretion of the trial court. (*People v. Davis* (1970), 45 Ill. 2d 514, 519.) To warrant reversal of the trial court's ruling, the defendant must demonstrate that the denial of the continuance embarrassed the accused in the preparation of his defense so as to prejudice his rights. (*People v. McEwen* (1982), 104 Ill. App. 3d 410, 432 N.E.2d 1043.) The circumstances regarding the continuance motion must be evaluated on a case-by-case basis, including the reasons presented to the trial court at the time the request is denied. (*People v. Lott* (1977), 66 Ill. 2d 290, 297.) The trial court should not refuse to grant a continuance where the ends of justice require that the motion be granted. *Waltz v. Schlattman* (1980), 81 Ill. App. 3d 971, 974, 401 N.E.2d 994, 997.

133 Ill. App. 3d 553, \*556; 479 N.E.2d 15, \*\*18;  
1985 Ill. App. LEXIS 1988, \*\*\*4; 88 Ill. Dec. 680

Although defendant argues he made an oral motion for a continuance prior to the commencement of trial, no evidence of such a motion is contained either in the common law record or in the report [\*\*\*5] of proceedings. Defendant admits to the inadequacy of the record in his appellate brief: "The Motion does not appear on the trial court transcript, having been made prior to the initiation of the trial." Attempting to rectify the inadequate record, defendant's counsel cites his statement made during a hearing on defendant's post-trial motion that "[i]t is my understanding prior to trial the Defendant made a motion to continue to obtain counsel and that motion was denied." This statement cannot be relied upon to establish that the oral motion was actually made, especially where defendant's counsel admitted that his own review of the transcript failed to disclose evidence that the motion [\*557] was ever made.

During a hearing on defendant's post-trial motion, the trial court stated it did not recall defendant's ever having made the pretrial motion for a continuance.

"As to the Court denying Defendant's motion for continuance to obtain counsel, I do not recall frankly any such thing happening. This defendant has appeared before this court before at a jury trial on a speeding case and not too terribly long before this particular case. He represented himself in that case. [\*\*\*6] I would think that this court would remember if he did make a request for counsel because it would have come as somewhat of a surprise to this court. I do not recall him making any such request." Since no evidence of a motion for a continuance is found in the appellate record and since the trial court expressly stated it did not recall defendant's ever making such a motion, defendant's contention that the trial court committed error in "denying" the motion is unsupported by the record. Even if defendant did file the motion, he asserted no justification either in the trial court or this court to explain his lack of diligence in obtaining counsel. On these facts, therefore, the ends of justice did not require the trial court to have granted defendant a continuance, and the denial of the continuance motion, if the motion ever actually was made in the trial court, would not have constituted an abuse of discretion.

In contrast to the absence of any record reference concerning defendant's first continuance motion, the record does contain a reference to defendant's request for a continuance to allow him time to issue a subpoena to secure the testimony of the county highway commissioner [\*\*\*7] concerning the exact location of speed limit signs at the scene of the speeding violation. [HN2] When [\*\*19] reviewing the trial court's denial of a motion during trial to obtain a witness, the reviewing court must consider the defendant's diligence, the potential witness' testimony, and the defendant's right to a fair trial. (*People v. Williams (1981)*, 96 Ill. App. 3d 958, 422 N.E.2d 199.) [HN3] The allowance or denial of the continuance motion to compel the presence of a witness is within the trial court's discretion. Ill. Rev. Stat. 1981, ch. 38, par. 114 -- 4.

Our review of the record convinces us that no abuse of discretion occurred here, because defendant did not act diligently and the potential witness' testimony would not aid defendant in any significant way. As correctly argued by the State, defendant was aware prior to trial both of the location of the offense and that he was [\*558] charged with exceeding the 35 miles per hour speed limit. Defendant also knew that his argument at trial would be that the officer clocked his vehicle in a 40 miles per hour zone instead of a 35 miles per hour zone. Knowing these facts prior to trial, defendant should have [\*\*\*8] either deposed the county highway commissioner or subpoenaed him before the trial began. This case does not present a situation where a defendant was surprised by the State's evidence. (See, e.g., *People v. Lott (1975)*, 33 Ill. App. 3d 779, 338 N.E.2d 434.) Moreover, the witness' testimony would not aid defendant. At trial, defendant stated he sought to subpoena the commissioner "to prove what the speed limit is at the location on this traffic ticket." Even were this witness to have testified that the speed limit was 40 miles per hour, as was asserted by defendant, the State still would have proved that defendant was traveling 13 miles per hour over the posted speed limit. Accordingly, defendant's witness would not have been material, and thus, defendant's right to a fair trial was not denied when his motion for a continuance was not granted.

The second argument advanced by defendant is that the trial court precluded him from effectively using his peremptory challenges by failing to inform him of the number of challenges to which he was entitled. Defendant's argument is not convincing. [HN4] A *pro se* litigant is not entitled to any special consideration. (*People v. Siler [\*\*\*9] (1980)*, 85 Ill. App. 3d 304, 309, 406 N.E.2d 891, 895.) As the court stated in *People v. Tuczynski (1978)*, 62 Ill.

133 Ill. App. 3d 553, \*558; 479 N.E.2d 15, \*\*19;  
1985 Ill. App. LEXIS 1988, \*\*\*9; 88 Ill. Dec. 680

*App. 3d 644, 651, 378 N.E.2d 1200, 1205:*

"If his pro se representation was less effective than if he had retained an attorney, it was attributable to his decision to forego the services of counsel."

See also *People v. Tessier (1984)*, 123 Ill. App. 3d 984, 988, 463 N.E.2d 1006, 1010 ("Since the defendant was firm in his desire to represent himself, the defendant's choice to waive his right to counsel and to proceed to trial *pro se* must be honored although he conducts his defense ultimately to his own detriment").

Fatal to defendant's argument is his concession in his appellate brief that a trial court is under no duty to discuss procedure with the parties. The absence of a duty to inform undercuts defendant's contention that the court here erred in not explaining the procedures governing peremptory challenges to defendant. Moreover, defendant's claim of "prejudice" is unsustainable, for defendant exercised his five peremptory challenges allowed by law. (Compare *People v. Nathaniel (1981)*, 103 Ill. App. 3d 610, 431 N.E.2d 1080 (where trial court [\*\*\*10] committed reversible error by preventing the defendant from using all of his peremptory challenges).) Because the trial court did not prevent [\*559] defendant from using his allocated challenges, defendant's claim of prejudice based upon the trial court's failure to guide defendant through the jury selection process is without basis.

The third issue raised on appeal by defendant is that he was denied a fair trial because three jurors could not guarantee that they would act fairly and impartially. [HN5] The burden rests with the party challenging a juror to establish that the juror possessed a disqualifying state of mind. (*People v. Cole (1973)*, 54 Ill. 2d 401.) The mere suspicion of bias in a juror is insufficient to impeach a verdict. [\*\*20] (*People v. White (1980)*, 88 Ill. App. 3d 788, 410 N.E.2d 1082.) [HN6] Prejudice is "the forming of an opinion based upon allegations heard outside the courtroom rather than based upon facts heard during the trial." (*People v. Toellen (1978)*, 66 Ill. App. 3d 967, 969, 384 N.E.2d 480.) [HN7] The determination of whether a prospective juror possesses the state of mind enabling him to give to an accused a fair and impartial trial [\*\*\*11] rests in the sound discretion of the trial judge, and his determination will not be set aside unless against the manifest weight of the evidence. *People v. Cole (1973)*, 54 Ill. 2d 401, 414.

The report of proceedings revealed that two of the jurors -- Richard Picolotti and Richard Buckley -- alleged by defendant to have been biased were actually accepted by him. [HN8] Failure to challenge a juror for cause or to exercise a peremptory challenge waives any objection to that juror. (*People v. Tribett (1981)*, 98 Ill. App. 3d 663, 678, 424 N.E.2d 688.) Because defendant accepted these two jurors, he has waived any objection to their presence on the jury. Similarly, defendant's argument concerning Inez Barr deserves no consideration, because defendant exercised his peremptory challenge against her and thus, she did not sit as a juror in this case.

The claim of juror bias raised by defendant which he has not waived concerns juror Nancy Adolph. As both parties concede, the report of proceedings of the *voir dire* is seriously deficient because many of the answers given by the potential jurors are transcribed with the words "response inaudible" or "response unintelligible."

Nonetheless, [\*\*\*12] the [HN9] appellant has the duty to provide a complete record on appeal. (*People ex rel. Spicer v. Coleman (1979)*, 72 Ill. App. 3d 631, 391 N.E.2d 46.) Any doubt arising from the incompleteness of the record will be resolved against the party prosecuting the appeal. (*Hall v. Lyons (1979)*, 71 Ill. App. 3d 1023, 389 N.E.2d 1309.) In the instant case, the record discloses that the transcription of the deficient report of proceedings was completed on December 9, 1983. While this date was later than the date on which defendant had filed his initial post-trial motion, the transcript was available to defendant [\*560] more than two months prior to the date on which he filed his amendment to post-trial motion and on which the trial court heard arguments concerning his post-trial motion. Despite the availability of the transcript, however, defendant did not raise the deficiency in his amended post-trial motion filed on February 17, 1984. At the hearing on his post-trial motion held that same day, defendant's counsel made one reference to the inadequacy of the transcript.

"I find that unfortunately the transcript in the situation where the *voir dire* of the jurors indicates that

133 Ill. App. 3d 553, \*560; 479 N.E.2d 15, \*\*20;  
1985 Ill. App. LEXIS 1988, \*\*\*13; 88 Ill. Dec. 680

[\*\*\*13] almost all the responses were inaudible. We therefore have no way of knowing what those responses might have been."

His recognition of the deficiency apparently did not prompt him to rectify the record, for he has cited to no efforts at obtaining an agreed statement of facts or a bystander's report. (See 87 Ill. 2d Rules 612(c), 323(c), (d).) Because defendant elected to file the record without supplementation even though he was aware that the report of proceedings was inadequate, this case is appropriate for invocation of the rule cited previously that the incompleteness of the record will be resolved against the appellant.

Even if the merits of defendant's argument are addressed, the record reveals only one basis upon which defendant challenged Adolph for cause; that her relationship with her future son-in-law, who was employed in the law enforcement field, would render her incapable of deciding the case impartially. The record indicates that Adolph did admit she had a close friend or relative in law enforcement. However, the trial court asked all four potential jurors, including Adolph, whether they would automatically place greater weight on the testimony [\*\*21] [\*\*\*14] of a police officer over that of any other witness under oath, and the transcript, while indicating "response inaudible," also shows that the trial court did not ask any followup questions based upon their answers. Common sense suggests that the court would have probed further had any potential juror responded affirmatively. Defendant implicitly concedes this fact by failing to ever argue that Adolph actually stated during *voir dire* that she would weigh the officer's testimony more heavily. The court also asked Adolph individually the same question as was asked of all four jurors together, and again, her answer, although not transcribed, did not prompt the trial court to ask her any followup questions. Adolph also was asked whether she knew of any reason why she would find it difficult to be impartial and her response, although inaudible again, did not provoke further questioning by the court. Finally, responding to defendant's challenge against Adolph for cause because she had a relative or friend employed [\*561] in law enforcement, the trial court denied defendant's challenge for cause with one brief statement that cause had not been stated. The certainty with which [\*\*\*15] the court responded to defendant's cause challenge suggests that Adolph's answers did not indicate any bias or prejudice.

The trial court's own recollection of the *voir dire* confirms our interpretation of the record. When confronted in the post-trial motion hearing with defendant's argument that Adolph had given answers which suggested bias, the trial court expressly rejected defendant's interpretation of the *voir dire* record.

"As to the specific challenges, the one challenge was that the one lady indicated her -- perhaps her future son-in-law was a Thomson police officer. I know, and I would remember this matter, that the Court went back to ask the lady if she thought this fact that she might in the future have a son-in-law that was involved in law enforcement would effect [*sic*] her in any way as a juror. She indicated that it would not. Her response evidently was not picked up by the tape, but I can assure you that she indicated it wouldn't bother her anyway, or she would have been excused by this court."

The trial court's recollection that Adolph stated she could act impartially puts this case squarely on point with *People v. Cole (1973)*, 54 Ill. 2d [\*\*\*16] 401, 415. There, the supreme court stated that suspicion of bias does not amount to evidence of bias, the latter being necessary to establish cause. (*People v. Cole (1973)*, 54 Ill. 2d 401.) The juror challenged in *Cole* admitted during *voir dire* that he knew the State's Attorney, the assistant State's Attorney, and one of the State's witnesses, who had been his neighbor and family physician. The juror also admitted he was a friend of the sheriff and explained that another State's witness had a sister who was married to his son. Despite these numerous and potentially prejudicial relationships, the *Cole* court concluded the juror's statements that he could act impartially were sufficient to defeat the defendant's challenge for cause. While the poorly transcribed record here does not contain expressions of impartiality as clear as were present in *Cole*, the trial judge here expressly stated he remembered that the juror did not give any answers which suggested partiality or bias. Because we conclude defendant raised only a mere suspicion of bias which was dispelled by the trial court's post-trial hearing comments, he has failed to sustain his burden, and, therefore, [\*\*\*17] the trial court's denial of defendant's challenge for cause is not against the manifest weight of the evidence. *People v. Cole (1973)*, 54 Ill. 2d 401.

133 Ill. App. 3d 553, \*561; 479 N.E.2d 15, \*\*21;  
1985 Ill. App. LEXIS 1988, \*\*\*17; 88 Ill. Dec. 680

[\*562] The next error assigned by defendant is the trial court's admission into evidence of the testimony of the arresting officer as to what defendant said to him immediately after the stop. Apparently anticipating the officer's testimony, defendant initially objected before the officer gave his answers to the State's questions, arguing, "Counsel is trying to lead the witness into something that would influence the jury. The charge is speeding here; not having a conversation with the officer." After the trial court overruled the objection, the officer characterized [\*\*22] defendant's attitude after the stop as belligerent. The court sustained defendant's objection to Haag's characterization of defendant's attitude. The officer then testified that defendant, in response to a charge of speeding, asserted, "Bullshit, you fucking asshole." Defendant again objected "to any conversation that the officer and I might have had that does not directly relate to the charge of speeding," but the trial court denied [\*\*\*18] the objection, ruling that the conversation was part of the stop and the arrest.

In response to additional questioning by the State and after another objection by defendant which was characterized as "general" by the trial court, the officer recounted defendant's comments made at the scene of the stop. According to Haag, defendant stated:

"You are a fucking wimp. If you had guts and weren't a wimp you'd get a job in a real police department. We run assholes like you out the door."

Several questions and answers later, defendant twice more objected on relevancy grounds to the officer's recitation of defendant's comments at the scene, suggesting "that if the officer feels I'm guilty of disorderly conduct, he could have charge[d] me with that." The trial court overruled both objections.

As correctly noted by the trial court, defendant's objections were general and only challenged the relevance of the officer's recollection of defendant's statements. Because [HN10] the failure to object to evidence giving specific reasons for the objection constitutes a waiver of any error (*People v. Ishmael (1984), 126 Ill. App. 3d 320, 466 N.E.2d 1334*), defendant's objection based upon relevance [\*\*\*19] is the only ground properly presented for this court to consider. The supreme court recently summarized the rules regarding admissible evidence.

[HN11] "'The test of the admissibility of evidence is whether it fairly tends to prove the particular offense charged' [citation], and whether what is offered as evidence will be admitted or excluded depends upon whether it tends to make the question of guilt more or less probable; *i.e.*, whether it is relevant [citation]. A trial court may reject offered evidence on grounds of [\*563] irrelevancy if it has little probative value due to its remoteness, uncertainty or its possibly unfair prejudicial nature. [Citations.] The admission of evidence is within the sound discretion of the trial court, and its ruling should not be reversed absent a clear showing of abuse of that discretion." *People v. Ward (1984), 101 Ill. 2d 443, 455-56.*

Defendant argues that testimony concerning his profane language was not relevant to prove the offense for which he was charged and was highly prejudicial because jurors would conclude he possessed no respect for the law. The State responds that the statements are relevant because they show a [\*\*\*20] disrespect for the law and relate to his credibility. Alternatively, the State argues that the comments constitute admissions. In one sense, the testimony that defendant acted belligerently and used profane language suggests that defendant was more likely to have been speeding, as was alleged by the officer. A common reaction for one traveling within the speed limit would be to profess innocence in a polite, nonoffending way. In another sense, however, the comments attributed to defendant arguably have the potential for creating antipathy toward defendant or at least affecting the jurors' impartiality. Because the question is closely balanced, we conclude the trial court's admission of the officer's testimony does not constitute an abuse of discretion.

More importantly, the officer's testimony, even if erroneously allowed, did not contribute to defendant's conviction, and thus, any error in its introduction is harmless beyond a reasonable doubt. Harmless error is discussed together with the last issue raised by defendant -- whether defendant's conviction was against the manifest weight of the evidence -- because the adequacy of the State's proof establishes both that defendant [\*\*\*21] was proved guilty beyond a reasonable [\*23] doubt and that any error in the introduction of the officer's testimony did not contribute to defendant's conviction. Initially, [HN12] the proper standard of proof in this case is whether defendant was proved

133 Ill. App. 3d 553, \*563; 479 N.E.2d 15, \*\*23;  
1985 Ill. App. LEXIS 1988, \*\*\*21; 88 Ill. Dec. 680

guilty beyond a reasonable doubt. See *People v. Beil* (1979), 76 Ill. App. 3d 924, 395 N.E.2d 400; Ill. Rev. Stat. 1981, ch. 38, par. 2 -- 12; Ill. Rev. Stat. 1981, ch. 38, par. 3 -- 1.

The State's case was principally based upon the testimony of Officer Haag, who stated that on August 8, 1983, at approximately 7:45 p.m., he was conducting speed enforcement on the stretch of highway coming through Route 88. While set up to clock cars coming in both the north and south directions, he observed a tan Lincoln Continental southbound on Route 88 which appeared to him to be traveling in excess of the 35 miles per hour speed limit. The officer activated his radar [\*564] device, which indicated defendant's car was traveling 56 miles per hour, and observed that the car's speed rose to 57 miles per hour and then dropped suddenly to 53 miles per hour. Haag observed that the front end of the car dipped as if the driver had [\*\*\*22] rapidly applied the brakes. The posted speed limit in the stretch where defendant was clocked, Haag stated, was 35 miles per hour. At the time of the clocking, no other traffic was present on the road. During the stop, Haag issued defendant the traffic citation for traveling 53 miles per hour in a 35 miles per hour zone.

On the subject of his training and experience with radar devices, Haag stated that he had been a police officer for seven years, and had received extensive training in the use of speed devices. In 1980, Haag began and completed a training course offered by the manufacturer of the device used to clock defendant. This course required him to use the device in calculating car speeds. Also in 1980, Haag began and completed a course taught by the Illinois State Police on the operation of radar. In 1982, Haag began and completed a 40-hour instructor's course offered by the Department of Law Enforcement and thereby became qualified not only to use the radar device but also to teach others how to use it. Haag testified that on the basis of his training, he was certified to operate the K55 MPH Industries Radar Unit involved in this case. He had been using the radar [\*\*\*23] unit since 1980.

Haag testified that he conducted both an internal and external test for the calibration of the device about 20 minutes before the clocking of defendant. Both tests indicated the device was functioning properly. In addition, Haag testified, he ran the same two tests about 20 minutes after the stop. These tests likewise indicated the machine was functioning properly. Based upon these tests, Haag stated his opinion that the machine was in proper operating condition when defendant's speed was recorded by the radar device.

On cross-examination, Haag indicated he was not precisely certain where the 35 miles per hour sign was located on the highway, but was unwavering in his testimony that defendant was traveling 53 miles per hour in a 35 miles per hour zone inside the village of Milledgeville. Also, Haag stated that from the direction defendant was traveling, he necessarily would have passed three different signs posting the 35 miles per hour limit prior to being clocked. While Haag admitted that the radar device once had been sent to the manufacturer for repairs, he also testified it was tested periodically by Decatur Radar.

Testifying on his own behalf, defendant [\*\*\*24] stated that his car was equipped with a Spectrum unit which was designed to register a response [\*565] when radar units were operating in the vicinity. Defendant testified he was driving 54 miles per hour when he approached a 45 miles per hour sign. Just then, his Spectrum unit registered Haag's radar device. Turning his head to his left as he was passing the 45 miles per hour speed limit sign, defendant saw the police car and continued to reduce his speed to 30 miles per hour. Thereafter, defendant testified, Haag followed him for two miles and only arrested defendant after he had stopped for some cigarettes. On cross-examination, defendant asserted he did not buy the radar detector to avoid a ticket, but rather just to be more aware of [\*\*24] his speed. Defendant admitted, however, that the machine did not activate when he exceeded the speed limit, but instead only activated when a radar unit was operating nearby. He explained that he had begun reducing his speed before his unit indicated Haag's radar "[b]ecause I had just received a traffic ticket going into a small community at the edge of town." The State then called Haag in rebuttal, who contradicted [\*\*\*25] defendant by testifying that he did clock defendant while his car was in the 35 miles per hour zone.

In considering testimony such as that recounted above, the [HN13] reviewing court will not lightly overturn a jury's verdict and will not substitute its judgment for that of the trier of fact unless the evidence is so improbable as to raise a

133 Ill. App. 3d 553, \*565; 479 N.E.2d 15, \*\*24;  
1985 Ill. App. LEXIS 1988, \*\*\*25; 88 Ill. Dec. 680

reasonable doubt of defendant's guilt. (*People v. Molstad* (1984), 101 Ill. 2d 128.) [HN14] Reversal of a guilty verdict is not warranted merely because the jury believed the prosecutor's evidence as opposed to that presented by the defendant (*People v. West* (1981), 102 Ill. App. 3d 50, 429 N.E.2d 599), or because the transcript contains minor inconsistencies which the trier of fact has resolved in favor of the State. *People v. Devine* (1981), 101 Ill. App. 3d 158, 427 N.E.2d 1277.

The versions of the facts testified to by Haag and defendant are for the most part irreconcilable. Since the credibility of the witnesses is to be determined by the trier of fact, affirmance of the trial court is warranted on this basis alone. In addition to the officer's testimony, however, the record discloses through Haag that the radar machine clocked defendant [\*\*\*26] at 53 miles per hour. Our review of the evidence convinces us that the State established that the machine was operating properly on the day of the occurrence. Defendant offered no evidence to rebut the State's evidence that the machine was operating properly, and this failure also supports affirmance of the defendant's conviction. (See *People v. Boalbey* (1980), 90 Ill. App. 3d 738, 741, 413 N.E.2d 553, 555.) We conclude, after reviewing the entire record, that defendant was proved guilty beyond a reasonable doubt [\*566] of violating section 11 -- 601(b) of the Illinois Vehicle Code. See *Village of Schaumburg v. Pedersen* (1978), 60 Ill. App. 3d 630, 633, 377 N.E.2d 252, 254-55.

Moreover, because of the convincing nature of the State's proof, we conclude any error in the introduction of defendant's profane statements directed at the officer did not affect the jury's determination of his credibility, did not contribute to his conviction, and thus was harmless beyond a reasonable doubt.

The judgment of the circuit court of Carroll County is affirmed.

Affirmed.

**May 31, 1985, Filed**

**PRIOR HISTORY:** [\*\*\*1]

Appeal from the Circuit Court of Carroll County; the Hon. John DeMoss, Judge, presiding.

**DISPOSITION:**

Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a jury verdict in the Circuit Court of Carroll County (Illinois), which found defendant guilty of the offense of speeding under Ill. Rev. Stat. ch. 95 1/2, para. 11-601(b) (1981). The trial court ordered defendant to pay a fine and costs.

**OVERVIEW:** Defendant was charged with speeding and plead not guilty and requested a jury trial. Defendant acted pro se. A jury found defendant guilty. On appeal, the court affirmed. The court rejected defendant's argument that the trial court erred when it denied his oral motions for continuances because there was no evidence in the appellate record to indicate that defendant ever requested a continuance. The court found that the trial court properly denied defendant's request for a continuance to allow him time to issue a subpoena to the highway commissioner because defendant did not act diligently and the potential witness would not have aided defendant's case. The court found (1) that defendant was not entitled to the assistance of the court in the jury selection process, (2) that defendant failed to establish the bias of a juror, (3) that any error in the admission of the officer's testimony as to what defendant said to him immediately after he was stopped was harmless, and (4) that the evidence was sufficient to support defendant's conviction. The state offered evidence that the radar device indicated that defendant was speeding, it was tested periodically, and it functioned properly.

**OUTCOME:** The court affirmed the judgment of the trial court against defendant.

**CORE TERMS:** juror, miles, post-trial, radar, speed limit, continuance, speed, speeding, voir dire, traveling, bias,

reasonable doubt, machine, zone, peremptory, continuance motion, impartially, clocked, miles per hour, prior to trial, guilty beyond, pro se, inaudible, sound discretion, trier of fact, fair trial, suspicion, manifest, scene, abuse of discretion

#### ***Criminal Law & Procedure > Pretrial Motions > Continuances***

##### ***Criminal Law & Procedure > Trials > Judicial Discretion***

[HN1] The right to a continuance is not absolute, and its denial or allowance is a decision to be made within the sound discretion of the trial court. To warrant reversal of the trial court's ruling, the defendant must demonstrate that the denial of the continuance embarrassed the accused in the preparation of his defense so as to prejudice his rights. The circumstances regarding the continuance motion must be evaluated on a case-by-case basis, including the reasons presented to the trial court at the time the request is denied. The trial court should not refuse to grant a continuance where the ends of justice require that the motion be granted.

#### **JUDGES:**

JUSTICE LINDBERG delivered the opinion of the court. HOPF and STROUSE, JJ., concur.

**OPINION BY:**

LINDBERG

**OPINION:**

[\*555] [\*\*17] Defendant, Donald R. Davenport, was charged by citation and complaint with the offense of speeding (Ill. Rev. Stat. 1981, ch. 95 1/2, par. 11 -- 601(b)), in connection with an incident occurring on August 8, 1983. After a jury trial in the circuit court of Carroll County, defendant was found guilty, his post-trial motion was denied, and he was ordered to pay a \$ 150 fine and costs. Defendant has raised five issues on appeal. Because we find no reversible errors, we affirm.

The citation and complaint indicates that defendant was arrested and ticketed for speeding on August 8, 1983, [\*\*\*2] at 7:48 p.m. in the village of Milledgeville, county of Carroll, State of Illinois. Defendant pleaded not guilty and requested a jury trial, which was held on October 31, 1983.

Acting *pro se*, defendant during the *voir dire* conducted by the court exhausted his five peremptory challenges, and the court rejected defendant's two challenges for cause. The only witnesses at trial were the arresting officer, James Haag, and defendant. Distilled to its essence, Haag's testimony was that his radar device, tested before and after the incident, indicated that defendant was traveling 53 miles per hour in a 35 miles per hour zone. In contrast, defendant stated he did not exceed the speed limit, braking as necessary in compliance with the posted speed limit signs. Defendant suggested during trial that he believed Haag was enforcing the speed laws selectively against him because Haag did not like him. In support of his theory, defendant presented testimony that Haag had previously ticketed defendant for speeding. Defendant's testimony also suggested Haag was too zealous in his enforcement of the speed laws.

Defendant was sentenced on November 18, 1983. On November 22, 1983, defendant, [\*\*\*3] through counsel, filed a post-trial motion requesting an arrest of judgment and a new trial. The only issues raised in that motion which are also raised on appeal were: (1) defendant was [\*556] not proved guilty beyond a reasonable doubt, and (2) the trial court erred by (a) denying his motions for continuances and (b) by failing to assist him during *voir dire*. Defendant also included the general assignment of error that "other errors occurred in the conduct of the trial, the ruling on Motions, and the introduction of evidence, which are general and non-specific but which require a new trial."

Defendant did not raise the issue of the admission into evidence of defendant's belligerent and profane post-arrest statements in his original post-trial motion, but instead [\*\*18] only raised this issue in his amendment to post-trial motion filed on February 17, 1984. That same day, the trial court denied defendant's post-trial motions and defendant on March 2, 1984, filed a timely notice of appeal.

Defendant raises as his first argument that the trial court erred in denying his oral motions for continuances made prior to trial and during the pendency of the trial. [\*\*\*4] The State responds that the trial court did not abuse its discretion in denying defendant's motions.

[HN1] The right to a continuance is not absolute, and its denial or allowance is a decision to be made within the sound discretion of the trial court. (*People v. Davis* (1970), 45 Ill. 2d 514, 519.) To warrant reversal of the trial court's ruling, the defendant must demonstrate that the denial of the continuance embarrassed the accused in the preparation of his defense so as to prejudice his rights. (*People v. McEwen* (1982), 104 Ill. App. 3d 410, 432 N.E.2d 1043.) The circumstances regarding the continuance motion must be evaluated on a case-by-case basis, including the reasons presented to the trial court at the time the request is denied. (*People v. Lott* (1977), 66 Ill. 2d 290, 297.) The trial court should not refuse to grant a continuance where the ends of justice require that the motion be granted. *Waltz v. Schlattman* (1980), 81 Ill. App. 3d 971, 974, 401 N.E.2d 994, 997.

133 Ill. App. 3d 553, \*556; 479 N.E.2d 15, \*\*18;  
1985 Ill. App. LEXIS 1988, \*\*\*4; 88 Ill. Dec. 680

Although defendant argues he made an oral motion for a continuance prior to the commencement of trial, no evidence of such a motion is contained either in the common law record or in the report [\*\*\*5] of proceedings. Defendant admits to the inadequacy of the record in his appellate brief: "The Motion does not appear on the trial court transcript, having been made prior to the initiation of the trial." Attempting to rectify the inadequate record, defendant's counsel cites his statement made during a hearing on defendant's post-trial motion that "[i]t is my understanding prior to trial the Defendant made a motion to continue to obtain counsel and that motion was denied." This statement cannot be relied upon to establish that the oral motion was actually made, especially where defendant's counsel admitted that his own review of the transcript failed to disclose evidence that the motion [\*557] was ever made.

During a hearing on defendant's post-trial motion, the trial court stated it did not recall defendant's ever having made the pretrial motion for a continuance.

"As to the Court denying Defendant's motion for continuance to obtain counsel, I do not recall frankly any such thing happening. This defendant has appeared before this court before at a jury trial on a speeding case and not too terribly long before this particular case. He represented himself in that case. [\*\*\*6] I would think that this court would remember if he did make a request for counsel because it would have come as somewhat of a surprise to this court. I do not recall him making any such request." Since no evidence of a motion for a continuance is found in the appellate record and since the trial court expressly stated it did not recall defendant's ever making such a motion, defendant's contention that the trial court committed error in "denying" the motion is unsupported by the record. Even if defendant did file the motion, he asserted no justification either in the trial court or this court to explain his lack of diligence in obtaining counsel. On these facts, therefore, the ends of justice did not require the trial court to have granted defendant a continuance, and the denial of the continuance motion, if the motion ever actually was made in the trial court, would not have constituted an abuse of discretion.

In contrast to the absence of any record reference concerning defendant's first continuance motion, the record does contain a reference to defendant's request for a continuance to allow him time to issue a subpoena to secure the testimony of the county highway commissioner [\*\*\*7] concerning the exact location of speed limit signs at the scene of the speeding violation. [HN2] When [\*\*19] reviewing the trial court's denial of a motion during trial to obtain a witness, the reviewing court must consider the defendant's diligence, the potential witness' testimony, and the defendant's right to a fair trial. (*People v. Williams (1981)*, 96 Ill. App. 3d 958, 422 N.E.2d 199.) [HN3] The allowance or denial of the continuance motion to compel the presence of a witness is within the trial court's discretion. Ill. Rev. Stat. 1981, ch. 38, par. 114 -- 4.

Our review of the record convinces us that no abuse of discretion occurred here, because defendant did not act diligently and the potential witness' testimony would not aid defendant in any significant way. As correctly argued by the State, defendant was aware prior to trial both of the location of the offense and that he was [\*558] charged with exceeding the 35 miles per hour speed limit. Defendant also knew that his argument at trial would be that the officer clocked his vehicle in a 40 miles per hour zone instead of a 35 miles per hour zone. Knowing these facts prior to trial, defendant should have [\*\*\*8] either deposed the county highway commissioner or subpoenaed him before the trial began. This case does not present a situation where a defendant was surprised by the State's evidence. (See, e.g., *People v. Lott (1975)*, 33 Ill. App. 3d 779, 338 N.E.2d 434.) Moreover, the witness' testimony would not aid defendant. At trial, defendant stated he sought to subpoena the commissioner "to prove what the speed limit is at the location on this traffic ticket." Even were this witness to have testified that the speed limit was 40 miles per hour, as was asserted by defendant, the State still would have proved that defendant was traveling 13 miles per hour over the posted speed limit. Accordingly, defendant's witness would not have been material, and thus, defendant's right to a fair trial was not denied when his motion for a continuance was not granted.

The second argument advanced by defendant is that the trial court precluded him from effectively using his peremptory challenges by failing to inform him of the number of challenges to which he was entitled. Defendant's argument is not convincing. [HN4] A *pro se* litigant is not entitled to any special consideration. (*People v. Siler [\*\*\*9] (1980)*, 85 Ill. App. 3d 304, 309, 406 N.E.2d 891, 895.) As the court stated in *People v. Tuczynski (1978)*, 62 Ill.

133 Ill. App. 3d 553, \*558; 479 N.E.2d 15, \*\*19;  
1985 Ill. App. LEXIS 1988, \*\*\*9; 88 Ill. Dec. 680

*App. 3d 644, 651, 378 N.E.2d 1200, 1205:*

"If his pro se representation was less effective than if he had retained an attorney, it was attributable to his decision to forego the services of counsel."

See also *People v. Tessier (1984)*, 123 Ill. App. 3d 984, 988, 463 N.E.2d 1006, 1010 ("Since the defendant was firm in his desire to represent himself, the defendant's choice to waive his right to counsel and to proceed to trial *pro se* must be honored although he conducts his defense ultimately to his own detriment").

Fatal to defendant's argument is his concession in his appellate brief that a trial court is under no duty to discuss procedure with the parties. The absence of a duty to inform undercuts defendant's contention that the court here erred in not explaining the procedures governing peremptory challenges to defendant. Moreover, defendant's claim of "prejudice" is unsustainable, for defendant exercised his five peremptory challenges allowed by law. (Compare *People v. Nathaniel (1981)*, 103 Ill. App. 3d 610, 431 N.E.2d 1080 (where trial court [\*\*\*10] committed reversible error by preventing the defendant from using all of his peremptory challenges).) Because the trial court did not prevent [\*559] defendant from using his allocated challenges, defendant's claim of prejudice based upon the trial court's failure to guide defendant through the jury selection process is without basis.

The third issue raised on appeal by defendant is that he was denied a fair trial because three jurors could not guarantee that they would act fairly and impartially. [HN5] The burden rests with the party challenging a juror to establish that the juror possessed a disqualifying state of mind. (*People v. Cole (1973)*, 54 Ill. 2d 401.) The mere suspicion of bias in a juror is insufficient to impeach a verdict. [\*\*20] (*People v. White (1980)*, 88 Ill. App. 3d 788, 410 N.E.2d 1082.) [HN6] Prejudice is "the forming of an opinion based upon allegations heard outside the courtroom rather than based upon facts heard during the trial." (*People v. Toellen (1978)*, 66 Ill. App. 3d 967, 969, 384 N.E.2d 480.) [HN7] The determination of whether a prospective juror possesses the state of mind enabling him to give to an accused a fair and impartial trial [\*\*\*11] rests in the sound discretion of the trial judge, and his determination will not be set aside unless against the manifest weight of the evidence. *People v. Cole (1973)*, 54 Ill. 2d 401, 414.

The report of proceedings revealed that two of the jurors -- Richard Picolotti and Richard Buckley -- alleged by defendant to have been biased were actually accepted by him. [HN8] Failure to challenge a juror for cause or to exercise a peremptory challenge waives any objection to that juror. (*People v. Tribett (1981)*, 98 Ill. App. 3d 663, 678, 424 N.E.2d 688.) Because defendant accepted these two jurors, he has waived any objection to their presence on the jury. Similarly, defendant's argument concerning Inez Barr deserves no consideration, because defendant exercised his peremptory challenge against her and thus, she did not sit as a juror in this case.

The claim of juror bias raised by defendant which he has not waived concerns juror Nancy Adolph. As both parties concede, the report of proceedings of the *voir dire* is seriously deficient because many of the answers given by the potential jurors are transcribed with the words "response inaudible" or "response unintelligible."

Nonetheless, [\*\*\*12] the [HN9] appellant has the duty to provide a complete record on appeal. (*People ex rel. Spicer v. Coleman (1979)*, 72 Ill. App. 3d 631, 391 N.E.2d 46.) Any doubt arising from the incompleteness of the record will be resolved against the party prosecuting the appeal. (*Hall v. Lyons (1979)*, 71 Ill. App. 3d 1023, 389 N.E.2d 1309.) In the instant case, the record discloses that the transcription of the deficient report of proceedings was completed on December 9, 1983. While this date was later than the date on which defendant had filed his initial post-trial motion, the transcript was available to defendant [\*560] more than two months prior to the date on which he filed his amendment to post-trial motion and on which the trial court heard arguments concerning his post-trial motion. Despite the availability of the transcript, however, defendant did not raise the deficiency in his amended post-trial motion filed on February 17, 1984. At the hearing on his post-trial motion held that same day, defendant's counsel made one reference to the inadequacy of the transcript.

"I find that unfortunately the transcript in the situation where the *voir dire* of the jurors indicates that

133 Ill. App. 3d 553, \*560; 479 N.E.2d 15, \*\*20;  
1985 Ill. App. LEXIS 1988, \*\*\*13; 88 Ill. Dec. 680

[\*\*\*13] almost all the responses were inaudible. We therefore have no way of knowing what those responses might have been."

His recognition of the deficiency apparently did not prompt him to rectify the record, for he has cited to no efforts at obtaining an agreed statement of facts or a bystander's report. (See 87 Ill. 2d Rules 612(c), 323(c), (d).) Because defendant elected to file the record without supplementation even though he was aware that the report of proceedings was inadequate, this case is appropriate for invocation of the rule cited previously that the incompleteness of the record will be resolved against the appellant.

Even if the merits of defendant's argument are addressed, the record reveals only one basis upon which defendant challenged Adolph for cause; that her relationship with her future son-in-law, who was employed in the law enforcement field, would render her incapable of deciding the case impartially. The record indicates that Adolph did admit she had a close friend or relative in law enforcement. However, the trial court asked all four potential jurors, including Adolph, whether they would automatically place greater weight on the testimony [\*\*21] [\*\*\*14] of a police officer over that of any other witness under oath, and the transcript, while indicating "response inaudible," also shows that the trial court did not ask any followup questions based upon their answers. Common sense suggests that the court would have probed further had any potential juror responded affirmatively. Defendant implicitly concedes this fact by failing to ever argue that Adolph actually stated during *voir dire* that she would weigh the officer's testimony more heavily. The court also asked Adolph individually the same question as was asked of all four jurors together, and again, her answer, although not transcribed, did not prompt the trial court to ask her any followup questions. Adolph also was asked whether she knew of any reason why she would find it difficult to be impartial and her response, although inaudible again, did not provoke further questioning by the court. Finally, responding to defendant's challenge against Adolph for cause because she had a relative or friend employed [\*561] in law enforcement, the trial court denied defendant's challenge for cause with one brief statement that cause had not been stated. The certainty with which [\*\*\*15] the court responded to defendant's cause challenge suggests that Adolph's answers did not indicate any bias or prejudice.

The trial court's own recollection of the *voir dire* confirms our interpretation of the record. When confronted in the post-trial motion hearing with defendant's argument that Adolph had given answers which suggested bias, the trial court expressly rejected defendant's interpretation of the *voir dire* record.

"As to the specific challenges, the one challenge was that the one lady indicated her -- perhaps her future son-in-law was a Thomson police officer. I know, and I would remember this matter, that the Court went back to ask the lady if she thought this fact that she might in the future have a son-in-law that was involved in law enforcement would effect [*sic*] her in any way as a juror. She indicated that it would not. Her response evidently was not picked up by the tape, but I can assure you that she indicated it wouldn't bother her anyway, or she would have been excused by this court."

The trial court's recollection that Adolph stated she could act impartially puts this case squarely on point with *People v. Cole (1973)*, 54 Ill. 2d [\*\*\*16] 401, 415. There, the supreme court stated that suspicion of bias does not amount to evidence of bias, the latter being necessary to establish cause. (*People v. Cole (1973)*, 54 Ill. 2d 401.) The juror challenged in *Cole* admitted during *voir dire* that he knew the State's Attorney, the assistant State's Attorney, and one of the State's witnesses, who had been his neighbor and family physician. The juror also admitted he was a friend of the sheriff and explained that another State's witness had a sister who was married to his son. Despite these numerous and potentially prejudicial relationships, the *Cole* court concluded the juror's statements that he could act impartially were sufficient to defeat the defendant's challenge for cause. While the poorly transcribed record here does not contain expressions of impartiality as clear as were present in *Cole*, the trial judge here expressly stated he remembered that the juror did not give any answers which suggested partiality or bias. Because we conclude defendant raised only a mere suspicion of bias which was dispelled by the trial court's post-trial hearing comments, he has failed to sustain his burden, and, therefore, [\*\*\*17] the trial court's denial of defendant's challenge for cause is not against the manifest weight of the evidence. *People v. Cole (1973)*, 54 Ill. 2d 401.

133 Ill. App. 3d 553, \*561; 479 N.E.2d 15, \*\*21;  
1985 Ill. App. LEXIS 1988, \*\*\*17; 88 Ill. Dec. 680

[\*562] The next error assigned by defendant is the trial court's admission into evidence of the testimony of the arresting officer as to what defendant said to him immediately after the stop. Apparently anticipating the officer's testimony, defendant initially objected before the officer gave his answers to the State's questions, arguing, "Counsel is trying to lead the witness into something that would influence the jury. The charge is speeding here; not having a conversation with the officer." After the trial court overruled the objection, the officer characterized [\*\*22] defendant's attitude after the stop as belligerent. The court sustained defendant's objection to Haag's characterization of defendant's attitude. The officer then testified that defendant, in response to a charge of speeding, asserted, "Bullshit, you fucking asshole." Defendant again objected "to any conversation that the officer and I might have had that does not directly relate to the charge of speeding," but the trial court denied [\*\*\*18] the objection, ruling that the conversation was part of the stop and the arrest.

In response to additional questioning by the State and after another objection by defendant which was characterized as "general" by the trial court, the officer recounted defendant's comments made at the scene of the stop. According to Haag, defendant stated:

"You are a fucking wimp. If you had guts and weren't a wimp you'd get a job in a real police department. We run assholes like you out the door."

Several questions and answers later, defendant twice more objected on relevancy grounds to the officer's recitation of defendant's comments at the scene, suggesting "that if the officer feels I'm guilty of disorderly conduct, he could have charge[d] me with that." The trial court overruled both objections.

As correctly noted by the trial court, defendant's objections were general and only challenged the relevance of the officer's recollection of defendant's statements. Because [HN10] the failure to object to evidence giving specific reasons for the objection constitutes a waiver of any error ( *People v. Ishmael (1984)*, 126 Ill. App. 3d 320, 466 N.E.2d 1334), defendant's objection based upon relevance [\*\*\*19] is the only ground properly presented for this court to consider. The supreme court recently summarized the rules regarding admissible evidence.

[HN11] "'The test of the admissibility of evidence is whether it fairly tends to prove the particular offense charged' [citation], and whether what is offered as evidence will be admitted or excluded depends upon whether it tends to make the question of guilt more or less probable; *i.e.*, whether it is relevant [citation]. A trial court may reject offered evidence on grounds of [\*563] irrelevancy if it has little probative value due to its remoteness, uncertainty or its possibly unfair prejudicial nature. [Citations.] The admission of evidence is within the sound discretion of the trial court, and its ruling should not be reversed absent a clear showing of abuse of that discretion." *People v. Ward (1984)*, 101 Ill. 2d 443, 455-56.

Defendant argues that testimony concerning his profane language was not relevant to prove the offense for which he was charged and was highly prejudicial because jurors would conclude he possessed no respect for the law. The State responds that the statements are relevant because they show a [\*\*\*20] disrespect for the law and relate to his credibility. Alternatively, the State argues that the comments constitute admissions. In one sense, the testimony that defendant acted belligerently and used profane language suggests that defendant was more likely to have been speeding, as was alleged by the officer. A common reaction for one traveling within the speed limit would be to profess innocence in a polite, nonoffending way. In another sense, however, the comments attributed to defendant arguably have the potential for creating antipathy toward defendant or at least affecting the jurors' impartiality. Because the question is closely balanced, we conclude the trial court's admission of the officer's testimony does not constitute an abuse of discretion.

More importantly, the officer's testimony, even if erroneously allowed, did not contribute to defendant's conviction, and thus, any error in its introduction is harmless beyond a reasonable doubt. Harmless error is discussed together with the last issue raised by defendant -- whether defendant's conviction was against the manifest weight of the evidence -- because the adequacy of the State's proof establishes both that defendant [\*\*\*21] was proved guilty beyond a reasonable [\*23] doubt and that any error in the introduction of the officer's testimony did not contribute to defendant's conviction. Initially, [HN12] the proper standard of proof in this case is whether defendant was proved

133 Ill. App. 3d 553, \*563; 479 N.E.2d 15, \*\*23;  
1985 Ill. App. LEXIS 1988, \*\*\*21; 88 Ill. Dec. 680

guilty beyond a reasonable doubt. See *People v. Beil* (1979), 76 Ill. App. 3d 924, 395 N.E.2d 400; Ill. Rev. Stat. 1981, ch. 38, par. 2 -- 12; Ill. Rev. Stat. 1981, ch. 38, par. 3 -- 1.

The State's case was principally based upon the testimony of Officer Haag, who stated that on August 8, 1983, at approximately 7:45 p.m., he was conducting speed enforcement on the stretch of highway coming through Route 88. While set up to clock cars coming in both the north and south directions, he observed a tan Lincoln Continental southbound on Route 88 which appeared to him to be traveling in excess of the 35 miles per hour speed limit. The officer activated his radar [\*564] device, which indicated defendant's car was traveling 56 miles per hour, and observed that the car's speed rose to 57 miles per hour and then dropped suddenly to 53 miles per hour. Haag observed that the front end of the car dipped as if the driver had [\*\*\*22] rapidly applied the brakes. The posted speed limit in the stretch where defendant was clocked, Haag stated, was 35 miles per hour. At the time of the clocking, no other traffic was present on the road. During the stop, Haag issued defendant the traffic citation for traveling 53 miles per hour in a 35 miles per hour zone.

On the subject of his training and experience with radar devices, Haag stated that he had been a police officer for seven years, and had received extensive training in the use of speed devices. In 1980, Haag began and completed a training course offered by the manufacturer of the device used to clock defendant. This course required him to use the device in calculating car speeds. Also in 1980, Haag began and completed a course taught by the Illinois State Police on the operation of radar. In 1982, Haag began and completed a 40-hour instructor's course offered by the Department of Law Enforcement and thereby became qualified not only to use the radar device but also to teach others how to use it. Haag testified that on the basis of his training, he was certified to operate the K55 MPH Industries Radar Unit involved in this case. He had been using the radar [\*\*\*23] unit since 1980.

Haag testified that he conducted both an internal and external test for the calibration of the device about 20 minutes before the clocking of defendant. Both tests indicated the device was functioning properly. In addition, Haag testified, he ran the same two tests about 20 minutes after the stop. These tests likewise indicated the machine was functioning properly. Based upon these tests, Haag stated his opinion that the machine was in proper operating condition when defendant's speed was recorded by the radar device.

On cross-examination, Haag indicated he was not precisely certain where the 35 miles per hour sign was located on the highway, but was unwavering in his testimony that defendant was traveling 53 miles per hour in a 35 miles per hour zone inside the village of Milledgeville. Also, Haag stated that from the direction defendant was traveling, he necessarily would have passed three different signs posting the 35 miles per hour limit prior to being clocked. While Haag admitted that the radar device once had been sent to the manufacturer for repairs, he also testified it was tested periodically by Decatur Radar.

Testifying on his own behalf, defendant [\*\*\*24] stated that his car was equipped with a Spectrum unit which was designed to register a response [\*565] when radar units were operating in the vicinity. Defendant testified he was driving 54 miles per hour when he approached a 45 miles per hour sign. Just then, his Spectrum unit registered Haag's radar device. Turning his head to his left as he was passing the 45 miles per hour speed limit sign, defendant saw the police car and continued to reduce his speed to 30 miles per hour. Thereafter, defendant testified, Haag followed him for two miles and only arrested defendant after he had stopped for some cigarettes. On cross-examination, defendant asserted he did not buy the radar detector to avoid a ticket, but rather just to be more aware of [\*\*24] his speed. Defendant admitted, however, that the machine did not activate when he exceeded the speed limit, but instead only activated when a radar unit was operating nearby. He explained that he had begun reducing his speed before his unit indicated Haag's radar "[b]ecause I had just received a traffic ticket going into a small community at the edge of town." The State then called Haag in rebuttal, who contradicted [\*\*\*25] defendant by testifying that he did clock defendant while his car was in the 35 miles per hour zone.

In considering testimony such as that recounted above, the [HN13] reviewing court will not lightly overturn a jury's verdict and will not substitute its judgment for that of the trier of fact unless the evidence is so improbable as to raise a

133 Ill. App. 3d 553, \*565; 479 N.E.2d 15, \*\*24;  
1985 Ill. App. LEXIS 1988, \*\*\*25; 88 Ill. Dec. 680

reasonable doubt of defendant's guilt. (*People v. Molstad* (1984), 101 Ill. 2d 128.) [HN14] Reversal of a guilty verdict is not warranted merely because the jury believed the prosecutor's evidence as opposed to that presented by the defendant (*People v. West* (1981), 102 Ill. App. 3d 50, 429 N.E.2d 599), or because the transcript contains minor inconsistencies which the trier of fact has resolved in favor of the State. *People v. Devine* (1981), 101 Ill. App. 3d 158, 427 N.E.2d 1277.

The versions of the facts testified to by Haag and defendant are for the most part irreconcilable. Since the credibility of the witnesses is to be determined by the trier of fact, affirmance of the trial court is warranted on this basis alone. In addition to the officer's testimony, however, the record discloses through Haag that the radar machine clocked defendant [\*\*\*26] at 53 miles per hour. Our review of the evidence convinces us that the State established that the machine was operating properly on the day of the occurrence. Defendant offered no evidence to rebut the State's evidence that the machine was operating properly, and this failure also supports affirmance of the defendant's conviction. (See *People v. Boalbey* (1980), 90 Ill. App. 3d 738, 741, 413 N.E.2d 553, 555.) We conclude, after reviewing the entire record, that defendant was proved guilty beyond a reasonable doubt [\*566] of violating section 11 -- 601(b) of the Illinois Vehicle Code. See *Village of Schaumburg v. Pedersen* (1978), 60 Ill. App. 3d 630, 633, 377 N.E.2d 252, 254-55.

Moreover, because of the convincing nature of the State's proof, we conclude any error in the introduction of defendant's profane statements directed at the officer did not affect the jury's determination of his credibility, did not contribute to his conviction, and thus was harmless beyond a reasonable doubt.

The judgment of the circuit court of Carroll County is affirmed.

Affirmed.

Analysis

As of: Jan 31, 2007

**TONY E. ROBLES, Appellant-Defendant, vs. STATE OF INDIANA,  
Appellee-Plaintiff.**

**No. 32A01-9801-CR-23**

**COURT OF APPEALS OF INDIANA, FIRST DISTRICT**

*705 N.E.2d 183; 1998 Ind. App. LEXIS 2259*

**December 28, 1998, Filed**

**PRIOR HISTORY:** [\*\*1] APPEAL FROM THE HENDRICKS SUPERIOR COURT. The Honorable Karen M. Love, Judge. Cause No. 32D03-9703-CM-100.

**DISPOSITION:** Judgment affirmed in part and reversed in part.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of his convictions for operating a motor vehicle while intoxicated, driving while suspended, and speeding entered by the Hendricks Superior Court (Indiana). Defendant produced evidence pursuant to *Ind. Code § 9-24-18-5(g)* that his suspended license had been reinstated.

**OVERVIEW:** A police officer stopped defendant for speeding and the officer noticed that defendant appeared to be intoxicated. Defendant was transported to the police station where it was determined that his California driver's license had been suspended. Defendant was then charged with driving while suspended, speeding, and driving while intoxicated. He was convicted on all counts. On appeal, defendant contended that the evidence was insufficient to support the conviction for driving while suspended because he demonstrated at trial that his California license had been suspended in error. In reversing the conviction for driving while suspended, the court ruled that defendant satisfied his burden of proof under *Ind. Code § 9-34-18-5(g)* by presenting an order of reinstatement that provided that the suspension had been set aside the same day it was imposed. The court held that defendant demonstrated by a preponderance of the evidence that his license was valid when he was charged with driving while suspended.

**OUTCOME:** The court reversed defendant's conviction for driving while suspended because defendant demonstrated by a preponderance of the evidence that his driver's license was valid when he was charged with driving while suspended. The court affirmed defendant's convictions for operating a motor vehicle while intoxicated and speeding.

**CORE TERMS:** suspended, driving, deputy, sentencing, sentence, imprisoned, radar, indigent, license, ineffective assistance of counsel, failing to pay, intoxicated, ineffective, desired, driver's, fine, failed to demonstrate, inasmuch, state of intoxication, driving record, speeding, arrest, failure to object, preponderance, resentencing, prejudiced, indigency, possessed, tested, ineffective assistance

**OPINION BY:** BAKER

**OPINION:** [\*184] OPINION

BAKER, Judge

Appellant-defendant Tony E. Robles appeals his convictions for Operating a Motor Vehicle While Intoxicated, n1 a Class A misdemeanor; Driving While Suspended, n2 a Class A infraction; and Speeding, n3 a Class C infraction, claiming that: (1) the evidence was insufficient to support the conviction for driving while suspended; (2) trial counsel was ineffective; (3) the trial court erred in denying Robles the opportunity to make a statement at sentencing; and (4) the trial court failed to state in its sentencing order that Robles could not be imprisoned for failing to pay fines and costs.

n1 *IND. CODE § 9-30-5-2.*

n2 *IND. CODE § 9-24-18-5.*

[\*\*2]

n3 *IND. CODE § 9-21-5-13.*

**FACTS**

The facts most favorable to the judgment reveal that at approximately 1:57 a.m. on March 22, 1997, Hendricks County Sheriff's [\*185] Deputy Charles Morefield stopped Robles for speeding. Deputy Morefield's radar equipment indicated that Robles had been driving seventy-two miles per hour in a forty mile per hour zone. As Deputy Morefield approached Robles, he observed that Robles smelled of alcohol. Deputy Morefield also noticed that Robles' balance was

unsteady and that his speech was slurred. After Robles failed several field sobriety tests, he was transported to the police station where Deputy Morefield attempted to administer a breath test. Robles refused to take the test. Following Robles' arrest, the State determined that his California driver's license had been suspended. Ross was charged with speeding, driving while intoxicated and driving while suspended. Following a trial by court which commenced on December 16, 1997, Robles was convicted on all three counts. Robles was then sentenced to 365 days in jail with 357 of those days suspended. Robles also received [\*\*3] credit for the two days that he remained in jail following the arrest. The trial court imposed no fines, but ordered Robles to pay court costs, a substance evaluation fee and a probation user's fee. He now appeals.

## DISCUSSION AND DECISION

### I. Sufficiency of the Evidence--Driving While Suspended

Robles first contends that the evidence was insufficient to support the conviction for driving while suspended. Specifically, Robles asserts that the conviction for this offense must be set aside because he demonstrated at trial that his driver's license had been suspended in error by the California Department of Motor Vehicles.

[HN1] Before a defendant may be convicted for driving with a suspended license, the State must prove that he "operated a motor vehicle . . . while his driving privileges, license or permit is suspended or revoked." *I.C. § 9-24-18-5(b)*. However, a defendant may be absolved of criminal liability under this section if he establishes, by a preponderance of the evidence, that he possessed a valid driver's license. *I.C. § 9-24-18-5(g)*.

In the instant case, the only evidence the State presented at trial to establish that Robles was driving while suspended was a certified [\*\*4] copy of Robles' California driving record, dated April 3, 1997. Record at 88-90. Attached to the driving record was a copy of a letter sent to Robles on June 16, 1996, from the California Department of Motor Vehicles. That correspondence informed Robles that his driving privileges would be suspended effective November 14, 1996, because of his failure to comply with a child support order. R. at 88. Robles submitted an order of reinstatement from the California Department of Motor Vehicles during his case-in-chief, dated April 4, 1997, just one day after the State had obtained its certified copy of Robles' driving record. That order provided that the suspension had "been set aside . . . effective Nov. 14, 1996." R. at 154. While Robles' copy of the reinstatement order was not certified, the State did not object to its admission into evidence. Additionally, Robles provided a letter signed by counsel with the California Family Support Division, stating that the suspension had been "submitted in error." R. at 155-56.

While we adhere to our well-known standard of review which precludes us from reweighing the evidence, it is apparent to us that Robles satisfied his burden of proof under [\*\*5] *I.C. § 9-34-18-5(g)*. Specifically, Robles demonstrated by a preponderance of the evidence that his driver's license was valid when he was charged with driving while suspended on March 22, 1997. Thus, we are compelled to reverse Robles' conviction for that offense.

### II. Ineffective Assistance Of Counsel

Robles next contends that trial counsel was ineffective because he did not object at trial to the purported lack of foundation regarding the accuracy of the radar equipment Deputy Morefield used when stopping Robles' vehicle. Additionally, Robles claims ineffective assistance of counsel because he failed to object to the alleged prejudicial testimony of several deputies regarding Robles' state of intoxication at the time of arrest.

#### [\*186] A. Standard of Review

[HN2] To prevail on a claim of ineffective assistance of counsel, a defendant must show that (1) counsel's performance failed to meet an objective standard of reasonableness as measured by predominate professional norms, and (2) such deficient performance so prejudiced the defendant as to deprive him of a fair trial. *Spranger v. State*, 650 N.E.2d 1117, 1121 (Ind. 1995). Additionally, [HN3] this court looks to the totality of the [\*\*6] circumstances when evaluating claims of ineffective assistance of counsel. *Sharkey v. State*, 672 N.E.2d 937, 940 (Ind. Ct. App. 1996), trans.

denied. [HN4] In determining whether prejudice exists, we begin with the presumption that counsel is competent. *Pemberton v. State*, 560 N.E.2d 524, 526 (Ind. 1990). "Isolated poor strategy, inexperience, or bad tactics do not necessarily amount to ineffectiveness of counsel." Id. [HN5] In order to prove ineffective assistance due to the failure to object, a defendant must prove that an objection would have been sustained had one been made and that he was prejudiced by the failure to object. *Timberlake v. State*, 690 N.E.2d 243, 259 (Ind. 1997).

### B. Radar Equipment

[HN6] Before the results of a radar test may be admitted into evidence, the State must prove that the equipment was properly operated and regularly tested. See *Charley v. State*, 651 N.E.2d 300, 303 (Ind. Ct. App. 1995). It is unnecessary for the State to present expert testimony to explain the proper operation, reliability or maintenance of the unit. In at least one instance, this court has determined that a police officer's testimony that he tested the radar unit and [\*\*7] checked the calibration along with his explanation that the unit was in good working order and inspected annually, was sufficient to meet the foundational requirements. Id.

In the instant case, Deputy Morefield testified that the radar was working properly the night that Robles was arrested and that it had been calibrated that day. R. at 69. We also note that Robles has made no claim that the radar equipment was inaccurate or unreliable. Thus, Robles has failed to demonstrate that counsel's objection would have been sustained had one been lodged. See *Timberlake*, 690 N.E.2d at 259. As a result, Robles has failed to show that trial counsel was ineffective.

### C. Prejudicial Testimony

Robles also claims that counsel was ineffective because he failed to object to "highly prejudicial opinion testimony." Appellant's Brief at 14. Specifically, he claims that permitting the opinions of three sheriff's deputies as to whether Robles was intoxicated, constituted ineffectiveness of trial counsel.

In support of the contention that such evidence was inadmissible, Robles points to Ind. Evidence Rule 704(b) which provides that "witnesses may not testify to opinions concerning intent, [\*\*8] guilt, or innocence in a criminal case; the truth or falsity of allegations; whether a witness has testified truthfully; or legal conclusions."

At trial, the three sheriff's deputies, who had observed Robles following the arrest, testified it was their opinion that Robles was intoxicated. R. at 93, 105, 109. All three based their conclusion upon Robles' behavior and demeanor, along with their acknowledgment that they had observed other individuals in a state of intoxication. Contrary to Robles' assertions that such testimony was improper, the deputies were not testifying with respect to whether Robles was guilty or innocent of the charged offense. Moreover, this court has recognized [HN7] that law enforcement testimony regarding an individual's intoxication is admissible. *Staley v. State*, 633 N.E.2d 314, 317-18 (Ind. Ct. App. 1994); see also *Reeves v. Boyd & Sons, Inc.*, 654 N.E.2d 864, 871 (Ind. Ct. App. 1995), trans. denied (non-expert witness may give opinion of another's state of intoxication). As Robles has failed to show that an objection by defense counsel would have been sustained, he has failed to demonstrate ineffective assistance of counsel.

### III. Sentencing [\*\*9] Statement

Robles argues that the sentence should be set aside because the trial court failed to grant him an opportunity to speak [\*187] in his own behalf before the trial court imposed the sentence. Specifically, Robles asserts that the trial court erred when it did not expressly ask him if he desired to make a statement.

To resolve this issue, we first turn to the provisions of our allocution statute, [HN8] *I.C. § 35-38-1-5* which provides in relevant part that:

The court shall afford counsel for the defendant an opportunity to speak on behalf of the defendant. The defendant may also make a statement personally in his own behalf and, before pronouncing sentence, the court shall ask him

whether he wishes to make such a statement.

Here, the record reveals that the trial court did not inquire of Robles or his counsel as to whether either desired to make a statement before the sentence was imposed. Notwithstanding such an omission, Robles made no objection.

We note that in *Fields v. State*, 676 N.E.2d 27, 31 (Ind. Ct. App. 1997), trans. denied, this court remanded for resentencing when the trial court did not inquire of the defendant as to whether he desired to make a statement [\*\*10] at sentencing. In the instant case, however, the record is clear that Robles did not pose any objection at sentencing. Moreover, Robles has not made any assertion as to the content of any purported statement that he might have made, how a statement may have benefited him, or that he intended to call any witnesses to testify on his behalf.

In *Locke v. State*, 461 N.E.2d 1090, 1093 (Ind. 1984), our supreme court observed that [HN9] a defendant's failure to timely object to such an alleged error constitutes a waiver and the cause will not be remanded for resentencing. *Id.* Additionally, we have determined that a party may not sit idly by, permit the court to act in a claimed erroneous manner, and then attempt to take advantage of the alleged error at a later time. *State v. Keith*, 507 N.E.2d 245 (Ind. Ct. App. 1987). A timely objection must be lodged so that the alleged error may be promptly corrected by the trial court. *Id.*; see also *Hensley v. State*, 251 Ind. 633, 639, 244 N.E.2d 225, 228 (1969). Inasmuch as Robles did not object to the trial court's failure to grant him or his counsel the opportunity to speak before the pronouncement of the sentence, Robles has waived [\*\*11] the alleged error and is precluded from raising it for the first time on appeal.

#### IV. Imprisonment For Failure To Pay Costs

Finally, Robles contends that because he was determined to be partially indigent at the sentencing hearing, the trial court erroneously failed to state on the record that Robles could not be imprisoned for failing to pay court costs. Thus, Robles maintains that this cause must be remanded for correction of the sentencing order to expressly reflect that he cannot be imprisoned if he fails to pay those costs.

We initially note that our supreme court has determined that [HN10] a trial court should state in its sentencing order that a defendant may not be imprisoned for failing to pay a court-imposed fine if it is determined that the defendant is indigent. *Ridley v. State*, 690 N.E.2d 177, 182 (Ind. 1997); *Whitehead v. State*, 511 N.E.2d 284, 296 (Ind. 1987). [HN11] In accordance with the Costs statute, IND. CODE § 33-19-2-3, the trial court is required to conduct an indigency hearing if court costs are imposed. If it is determined that the defendant is not indigent, the trial court is required to order the defendant to pay court costs "at the time sentence is pronounced, [\*\*12] at some later date, or specified parts at designated intervals." *Id.*

Here, the record reflects that no fine was assessed against Robles. Additionally, the trial court conducted an indigency hearing at sentencing and determined that Robles was employed and only partially indigent. R. at 200. The trial judge also ordered Robles to pay a portion of the appellate costs in light of his employment and income, notwithstanding the appointment of counsel. R. at 200. After ordering Robles to pay court costs, the trial court granted him nearly seven months in which to pay them. R. at 197. At the time of sentencing, Robles did not allege or make any showing that his financial status might prevent him from paying those costs. Inasmuch as the trial judge did not find [\*188] Robles indigent at the time of sentencing with respect to an inability to pay the costs in the future, he was not required to specifically indicate in the sentencing order that Robles could not be imprisoned for failing to pay the court costs. As a result, Robles' argument fails and we decline to remand this cause to the trial court.

#### CONCLUSION

In light of our resolution of the issues set forth above, we conclude that Robles' [\*\*13] conviction for driving while suspended must be vacated, inasmuch as he demonstrated that he possessed a valid license when charged with that offense. Additionally, we note that Robles failed to demonstrate that he received ineffective assistance of trial counsel. We also conclude that the trial court's failure to ask Robles whether he desired to make a statement prior to the imposition of his sentence was not reversible error, and that this cause need not be remanded for correction of the

sentencing order when the trial court did not expressly state that Robles could not be imprisoned if he failed to pay court costs.

Judgment affirmed in part and reversed in part.

**TONY E. ROBLES, Appellant-Defendant, vs. STATE OF INDIANA,  
Appellee-Plaintiff.**

**No. 32A01-9801-CR-23**

**COURT OF APPEALS OF INDIANA, FIRST DISTRICT**

*705 N.E.2d 183; 1998 Ind. App. LEXIS 2259*

**December 28, 1998, Filed**

**PRIOR HISTORY:** [\*\*1] APPEAL FROM THE HENDRICKS SUPERIOR COURT. The Honorable Karen M. Love, Judge. Cause No. 32D03-9703-CM-100.

**DISPOSITION:** Judgment affirmed in part and reversed in part.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of his convictions for operating a motor vehicle while intoxicated, driving while suspended, and speeding entered by the Hendricks Superior Court (Indiana). Defendant produced evidence pursuant to *Ind. Code § 9-24-18-5(g)* that his suspended license had been reinstated.

**OVERVIEW:** A police officer stopped defendant for speeding and the officer noticed that defendant appeared to be intoxicated. Defendant was transported to the police station where it was determined that his California driver's license had been suspended. Defendant was then charged with driving while suspended, speeding, and driving while intoxicated. He was convicted on all counts. On appeal, defendant contended that the evidence was insufficient to support the conviction for driving while suspended because he demonstrated at trial that his California license had been suspended in error. In reversing the conviction for driving while suspended, the court ruled that defendant satisfied his burden of proof under *Ind. Code § 9-34-18-5(g)* by presenting an order of reinstatement that provided that the suspension had been set aside the same day it was imposed. The court held that defendant demonstrated by a preponderance of the evidence that his license was valid when he was charged with driving while suspended.

**OUTCOME:** The court reversed defendant's conviction for driving while suspended because defendant demonstrated by a preponderance of the evidence that his driver's license was valid when he was charged with driving while suspended. The court affirmed defendant's convictions for operating a motor vehicle while intoxicated and speeding.

**CORE TERMS:** suspended, driving, deputy, sentencing, sentence, imprisoned, radar, indigent, license, ineffective assistance of counsel, failing to pay, intoxicated, ineffective, desired, driver's, fine, failed to demonstrate, inasmuch, state of intoxication, driving record, speeding, arrest, failure to object, preponderance, resentencing, prejudiced, indigency, possessed, tested, ineffective assistance

n2 *IND. CODE* § 9-24-18-5.

[\*\*2]

n3 *IND. CODE* § 9-21-5-13.

**FACTS**

The facts most favorable to the judgment reveal that at approximately 1:57 a.m. on March 22, 1997, Hendricks County Sheriff's [\*185] Deputy Charles Morefield stopped Robles for speeding. Deputy Morefield's radar equipment indicated that Robles had been driving seventy-two miles per hour in a forty mile per hour zone. As Deputy Morefield approached Robles, he observed that Robles smelled of alcohol. Deputy Morefield also noticed that Robles' balance was

unsteady and that his speech was slurred. After Robles failed several field sobriety tests, he was transported to the police station where Deputy Morefield attempted to administer a breath test. Robles refused to take the test. Following Robles' arrest, the State determined that his California driver's license had been suspended. Ross was charged with speeding, driving while intoxicated and driving while suspended. Following a trial by court which commenced on December 16, 1997, Robles was convicted on all three counts. Robles was then sentenced to 365 days in jail with 357 of those days suspended. Robles also received [\*\*3] credit for the two days that he remained in jail following the arrest. The trial court imposed no fines, but ordered Robles to pay court costs, a substance evaluation fee and a probation user's fee. He now appeals.

## DISCUSSION AND DECISION

### I. Sufficiency of the Evidence--Driving While Suspended

Robles first contends that the evidence was insufficient to support the conviction for driving while suspended. Specifically, Robles asserts that the conviction for this offense must be set aside because he demonstrated at trial that his driver's license had been suspended in error by the California Department of Motor Vehicles.

[HN1] Before a defendant may be convicted for driving with a suspended license, the State must prove that he "operated a motor vehicle . . . while his driving privileges, license or permit is suspended or revoked." *I.C. § 9-24-18-5(b)*. However, a defendant may be absolved of criminal liability under this section if he establishes, by a preponderance of the evidence, that he possessed a valid driver's license. *I.C. § 9-24-18-5(g)*.

In the instant case, the only evidence the State presented at trial to establish that Robles was driving while suspended was a certified [\*\*4] copy of Robles' California driving record, dated April 3, 1997. Record at 88-90. Attached to the driving record was a copy of a letter sent to Robles on June 16, 1996, from the California Department of Motor Vehicles. That correspondence informed Robles that his driving privileges would be suspended effective November 14, 1996, because of his failure to comply with a child support order. R. at 88. Robles submitted an order of reinstatement from the California Department of Motor Vehicles during his case-in-chief, dated April 4, 1997, just one day after the State had obtained its certified copy of Robles' driving record. That order provided that the suspension had "been set aside . . . effective Nov. 14, 1996." R. at 154. While Robles' copy of the reinstatement order was not certified, the State did not object to its admission into evidence. Additionally, Robles provided a letter signed by counsel with the California Family Support Division, stating that the suspension had been "submitted in error." R. at 155-56.

While we adhere to our well-known standard of review which precludes us from reweighing the evidence, it is apparent to us that Robles satisfied his burden of proof under [\*\*5] *I.C. § 9-34-18-5(g)*. Specifically, Robles demonstrated by a preponderance of the evidence that his driver's license was valid when he was charged with driving while suspended on March 22, 1997. Thus, we are compelled to reverse Robles' conviction for that offense.

### II. Ineffective Assistance Of Counsel

Robles next contends that trial counsel was ineffective because he did not object at trial to the purported lack of foundation regarding the accuracy of the radar equipment Deputy Morefield used when stopping Robles' vehicle. Additionally, Robles claims ineffective assistance of counsel because he failed to object to the alleged prejudicial testimony of several deputies regarding Robles' state of intoxication at the time of arrest.

#### [\*186] A. Standard of Review

[HN2] To prevail on a claim of ineffective assistance of counsel, a defendant must show that (1) counsel's performance failed to meet an objective standard of reasonableness as measured by predominate professional norms, and (2) such deficient performance so prejudiced the defendant as to deprive him of a fair trial. *Spranger v. State*, 650 N.E.2d 1117, 1121 (*Ind.* 1995). Additionally, [HN3] this court looks to the totality of the [\*\*6] circumstances when evaluating claims of ineffective assistance of counsel. *Sharkey v. State*, 672 N.E.2d 937, 940 (*Ind. Ct. App.* 1996), trans.

denied. [HN4] In determining whether prejudice exists, we begin with the presumption that counsel is competent. *Pemberton v. State*, 560 N.E.2d 524, 526 (Ind. 1990). "Isolated poor strategy, inexperience, or bad tactics do not necessarily amount to ineffectiveness of counsel." Id. [HN5] In order to prove ineffective assistance due to the failure to object, a defendant must prove that an objection would have been sustained had one been made and that he was prejudiced by the failure to object. *Timberlake v. State*, 690 N.E.2d 243, 259 (Ind. 1997).

### B. Radar Equipment

[HN6] Before the results of a radar test may be admitted into evidence, the State must prove that the equipment was properly operated and regularly tested. See *Charley v. State*, 651 N.E.2d 300, 303 (Ind. Ct. App. 1995). It is unnecessary for the State to present expert testimony to explain the proper operation, reliability or maintenance of the unit. In at least one instance, this court has determined that a police officer's testimony that he tested the radar unit and [\*\*7] checked the calibration along with his explanation that the unit was in good working order and inspected annually, was sufficient to meet the foundational requirements. Id.

In the instant case, Deputy Morefield testified that the radar was working properly the night that Robles was arrested and that it had been calibrated that day. R. at 69. We also note that Robles has made no claim that the radar equipment was inaccurate or unreliable. Thus, Robles has failed to demonstrate that counsel's objection would have been sustained had one been lodged. See *Timberlake*, 690 N.E.2d at 259. As a result, Robles has failed to show that trial counsel was ineffective.

### C. Prejudicial Testimony

Robles also claims that counsel was ineffective because he failed to object to "highly prejudicial opinion testimony." Appellant's Brief at 14. Specifically, he claims that permitting the opinions of three sheriff's deputies as to whether Robles was intoxicated, constituted ineffectiveness of trial counsel.

In support of the contention that such evidence was inadmissible, Robles points to Ind. Evidence Rule 704(b) which provides that "witnesses may not testify to opinions concerning intent, [\*\*8] guilt, or innocence in a criminal case; the truth or falsity of allegations; whether a witness has testified truthfully; or legal conclusions."

At trial, the three sheriff's deputies, who had observed Robles following the arrest, testified it was their opinion that Robles was intoxicated. R. at 93, 105, 109. All three based their conclusion upon Robles' behavior and demeanor, along with their acknowledgment that they had observed other individuals in a state of intoxication. Contrary to Robles' assertions that such testimony was improper, the deputies were not testifying with respect to whether Robles was guilty or innocent of the charged offense. Moreover, this court has recognized [HN7] that law enforcement testimony regarding an individual's intoxication is admissible. *Staley v. State*, 633 N.E.2d 314, 317-18 (Ind. Ct. App. 1994); see also *Reeves v. Boyd & Sons, Inc.*, 654 N.E.2d 864, 871 (Ind. Ct. App. 1995), trans. denied (non-expert witness may give opinion of another's state of intoxication). As Robles has failed to show that an objection by defense counsel would have been sustained, he has failed to demonstrate ineffective assistance of counsel.

### III. Sentencing [\*\*9] Statement

Robles argues that the sentence should be set aside because the trial court failed to grant him an opportunity to speak [\*187] in his own behalf before the trial court imposed the sentence. Specifically, Robles asserts that the trial court erred when it did not expressly ask him if he desired to make a statement.

To resolve this issue, we first turn to the provisions of our allocution statute, [HN8] *I.C. § 35-38-1-5* which provides in relevant part that:

The court shall afford counsel for the defendant an opportunity to speak on behalf of the defendant. The defendant may also make a statement personally in his own behalf and, before pronouncing sentence, the court shall ask him

whether he wishes to make such a statement.

Here, the record reveals that the trial court did not inquire of Robles or his counsel as to whether either desired to make a statement before the sentence was imposed. Notwithstanding such an omission, Robles made no objection.

We note that in *Fields v. State*, 676 N.E.2d 27, 31 (Ind. Ct. App. 1997), trans. denied, this court remanded for resentencing when the trial court did not inquire of the defendant as to whether he desired to make a statement [\*\*10] at sentencing. In the instant case, however, the record is clear that Robles did not pose any objection at sentencing. Moreover, Robles has not made any assertion as to the content of any purported statement that he might have made, how a statement may have benefited him, or that he intended to call any witnesses to testify on his behalf.

In *Locke v. State*, 461 N.E.2d 1090, 1093 (Ind. 1984), our supreme court observed that [HN9] a defendant's failure to timely object to such an alleged error constitutes a waiver and the cause will not be remanded for resentencing. *Id.* Additionally, we have determined that a party may not sit idly by, permit the court to act in a claimed erroneous manner, and then attempt to take advantage of the alleged error at a later time. *State v. Keith*, 507 N.E.2d 245 (Ind. Ct. App. 1987). A timely objection must be lodged so that the alleged error may be promptly corrected by the trial court. *Id.*; see also *Hensley v. State*, 251 Ind. 633, 639, 244 N.E.2d 225, 228 (1969). Inasmuch as Robles did not object to the trial court's failure to grant him or his counsel the opportunity to speak before the pronouncement of the sentence, Robles has waived [\*\*11] the alleged error and is precluded from raising it for the first time on appeal.

#### IV. Imprisonment For Failure To Pay Costs

Finally, Robles contends that because he was determined to be partially indigent at the sentencing hearing, the trial court erroneously failed to state on the record that Robles could not be imprisoned for failing to pay court costs. Thus, Robles maintains that this cause must be remanded for correction of the sentencing order to expressly reflect that he cannot be imprisoned if he fails to pay those costs.

We initially note that our supreme court has determined that [HN10] a trial court should state in its sentencing order that a defendant may not be imprisoned for failing to pay a court-imposed fine if it is determined that the defendant is indigent. *Ridley v. State*, 690 N.E.2d 177, 182 (Ind. 1997); *Whitehead v. State*, 511 N.E.2d 284, 296 (Ind. 1987). [HN11] In accordance with the Costs statute, IND. CODE § 33-19-2-3, the trial court is required to conduct an indigency hearing if court costs are imposed. If it is determined that the defendant is not indigent, the trial court is required to order the defendant to pay court costs "at the time sentence is pronounced, [\*\*12] at some later date, or specified parts at designated intervals." *Id.*

Here, the record reflects that no fine was assessed against Robles. Additionally, the trial court conducted an indigency hearing at sentencing and determined that Robles was employed and only partially indigent. R. at 200. The trial judge also ordered Robles to pay a portion of the appellate costs in light of his employment and income, notwithstanding the appointment of counsel. R. at 200. After ordering Robles to pay court costs, the trial court granted him nearly seven months in which to pay them. R. at 197. At the time of sentencing, Robles did not allege or make any showing that his financial status might prevent him from paying those costs. Inasmuch as the trial judge did not find [\*188] Robles indigent at the time of sentencing with respect to an inability to pay the costs in the future, he was not required to specifically indicate in the sentencing order that Robles could not be imprisoned for failing to pay the court costs. As a result, Robles' argument fails and we decline to remand this cause to the trial court.

#### CONCLUSION

In light of our resolution of the issues set forth above, we conclude that Robles' [\*\*13] conviction for driving while suspended must be vacated, inasmuch as he demonstrated that he possessed a valid license when charged with that offense. Additionally, we note that Robles failed to demonstrate that he received ineffective assistance of trial counsel. We also conclude that the trial court's failure to ask Robles whether he desired to make a statement prior to the imposition of his sentence was not reversible error, and that this cause need not be remanded for correction of the

sentencing order when the trial court did not expressly state that Robles could not be imprisoned if he failed to pay court costs.

Judgment affirmed in part and reversed in part.

GARRARD, J., and ROBB, J., concur.

**STATE OF IOWA, Plaintiff-Appellee, vs. WILLIAM CLARE KNAPP III,  
Defendant-Appellant.**

**No. 4-183 / 02-2103**

**COURT OF APPEALS OF IOWA**

*2004 Iowa App. LEXIS 1049*

**September 9, 2004, Filed**

**NOTICE:** [\*1] NO DECISION HAS BEEN MADE ON PUBLICATION OF THIS OPINION. THE OPINION IS SUBJECT TO MODIFICATION OR CORRECTION BY THE COURT AND IS NOT FINAL UNTIL THE TIME FOR REHEARING OR FURTHER REVIEW HAS PASSED. AN UNPUBLISHED OPINION OF THE COURT OF APPEALS MAY NOT BE CITED BY A COURT OR BY A PARTY IN ANY OTHER ACTION.

**SUBSEQUENT HISTORY:** Reported at *State v. Knapp, 2004 Iowa App. LEXIS 1636 (Iowa Ct. App., Sept. 9, 2004)*

**PRIOR HISTORY:** Appeal from the Iowa District Court for Polk County, Joe Smith, District Associate Judge. Defendant appeals from operating a motor vehicle while under the influence conviction, first offense, raising issues of arrest and operation of intoxilizer device.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a conviction by the Iowa District Court for Polk County on a charge of operating a motor vehicle while under the influence, first offense, in violation of *Iowa Code § 321J.2* (2001). Defendant raised issues about his arrest and the operation of an Intoxilizer device.

**OVERVIEW:** The officer properly invoked the implied consent statute, *Iowa Code § 321J.6*, as the evidence established defendant was speeding, admitted to drinking beer at a friend's house, and had cases of beer in the back seat of the car. His eyes were a little watery, and he smelled of alcohol. The stop occurred at about 2:00 a.m. Defendant consented to field sobriety tests. Yet, defendant vigorously challenged the accuracy of those tests for admissibility. Even so, the enumerated circumstances were clearly sufficient to establish reasonable grounds to believe defendant operated his vehicle while intoxicated. The grounds also provided probable cause to place defendant under arrest for violation of *Iowa Code § 321J.2*. The officer's judgment to place defendant under arrest was bolstered by the result of a preliminary breath test. After arrest, defendant was administered the Intoxilizer breath test, which registered a blood alcohol concentration of .168. Contrary to defendant's challenge, the calibration and certification of the Intoxilizer instrument met the statutory and administrative requirements for accuracy. That evidence was admitted properly for

consideration by the trial judge.

**OUTCOME:** The judgment was affirmed.

**CORE TERMS:** calibration, breath test, margin of error, testing, administered, accuracy, arrest, reasonable grounds, motor vehicle, log, concentration, beer, seat, chemical test, certification, intoxicated, calibrating, enumerated, calibrated, invoked, minus, alcoholic beverage, blood alcohol, sobriety, speeding, invalid, watery, breath, odor

\* Senior Judge assigned by order pursuant to Iowa Code section 602.9206 (2003).

**OPINION BY:** SNELL

**OPINION: SNELL, S.J.**

Defendant William Knapp III was charged with operating a motor vehicle while under the influence of alcohol in violation of *Iowa Code section 321J.2* [\*2] (2001). The charge was based on an incident that occurred on March 10, 2002. Defendant waived his right to a trial by jury and stipulated to a trial on the minutes of testimony. The trial court found him guilty and sentenced him to a first offense incarceration and a fine of \$ 1000.

The operative facts show that an Urbandale police officer observed defendant's vehicle traveling on Hickman Road. The officer's radar showed that defendant was speeding. Defendant was stopped, questioned, and observed by the officer to have an odor of alcohol emanating from the car's back seat. Some cases of beer were in the back seat. Defendant's eyes were watery. He told the officer he had consumed a couple of beers at a friend's house. When defendant sat in the back of the officer's patrol car, the officer smelled the odor of an alcoholic beverage.

The officer administered three field sobriety tests and a preliminary breath test to defendant. Defendant performed poorly, leading the officer to arrest him. Defendant later submitted to an Intoxilizer breath test, which showed a blood alcohol concentration of .168.

On appeal, defendant sets forth numerous propositions claiming justification for relief. [\*3] We consolidate and summarize them for purposes of analysis. [HN1] Because they pertain to statutory interpretation and application, we review them for errors at law. *State v. Booth*, 670 N.W.2d 209, 211 (Iowa 2003). The district court's findings are binding if supported by substantial evidence. *State v. Frake*, 450 N.W.2d 817, 818 (Iowa 1990); see also *State v. Turner*, 630 N.W.2d 601, 606 n.2 (Iowa 2001).

Defendant filed a motion to suppress and a motion in limine. Error was preserved. Evidence was taken in regard to both motions.

Defendant believes the provisions of the implied consent law were improperly invoked. See *Iowa Code § 321J.6*. [HN2] That law may be invoked when the officer has reasonable grounds to believe the driver was operating a motor vehicle while intoxicated and anyone of seven enumerated conditions in the statute existed. Reasonable grounds are established when the facts and circumstances lead to a prudent person's belief that an offense has been committed. *Pointer v. Iowa Dep't of Transp.*, 546 N.W.2d 623, 625 (Iowa 1996). Both direct and circumstantial evidence may be considered [\*4] in determining if reasonable grounds exist. *Id.* at 626.

In this case, the evidence established defendant was speeding, admitted to drinking beer at a friend's house, and had cases of beer in the back seat of the car. His eyes were a little watery, and he exhibited the odor of an alcoholic beverage. The car stop by the officer occurred at about 2:00 a.m.. With the consent of defendant, the officer administered the field sobriety tests. The accuracy of those tests for admissibility is vigorously challenged by defendant.

The walk and turn test is claimed to be invalid because the officer did not instruct defendant to look at his feet during the test. The one-legged stand test is claimed to be invalid because defendant was not told to keep his legs straight. Defendant failed the tests notwithstanding these instructions would have aided not hindered him. Defendant's objection is more technical than based on any substantive difference it would make.

The horizontal gaze nystagmus test was also administered. This was claimed to be faulty on numerous grounds including that car headlights would be passing through the defendant's field of vision. We ignore the results of this [\*5] test. Even so, the enumerated circumstances are clearly sufficient to establish reasonable grounds to believe defendant was intoxicated when operating his motor vehicle. These grounds also provide probable cause to place defendant under arrest for violation of *section 321J.2*.

The officer's judgment to place defendant under arrest was bolstered by the result of a preliminary breath test. After arrest, defendant was administered the Intoxilizer breath test which registered blood alcohol concentration of .168.

Defendant challenges the admission in evidence of this test result on numerous grounds. He asserts the administrative rules were violated which require monthly calibration of the preliminary breath testing (PBT) device and maintenance of a calibration log. *Iowa Admin. Code r. 661-7.5(2)*. The calibration log for the PBT device used here showed it had been calibrated on March 2, 2002, and used on March 27, 2002. The log also identified the officer calibrating the device, listed the unit and identification number, and the calibration reading of the test. Although it is not signed by the calibrating officer, that is not required. [HN3] The administrative rule requires certification of proper [\*6] working order "within one year immediately preceding use." *Iowa Admin. Code r. 661-7.2(1)*. The Intoxilizer was properly certified.

Defendant also makes an argument based on margin of error. Under *Iowa Code section 321J.2(10)*, the results of the breath test may not be used to prove a defendant had an alcohol concentration of .10 or more "if the alcohol . . . concentration indicated by the chemical test minus the established margin of error inherent in the device or method used to conduct the chemical test does not equal or exceed" .10. Defendant's arguments focus on the margin of error caveat. He correctly says the device used here was not calibrated and certified for accuracy of breath testing above .16. However, the law does not require that. The critical area for testing for accuracy was .10. Division of Criminal Investigation Criminalist Robert Monserrate testified that the margin of error would never be great enough to bring a reading of .160 under .10. [HN4] *Iowa Code section 321J.2(10)* requires only that the result minus the established margin for error equal or exceed .10. The calibration and certification of the Intoxilizer instrument [\*7] used here met the statutory and administrative requirements for accuracy. This evidence was properly admitted for consideration by the trial judge.

Our supreme court in two recent cases approved the use of the Data Master device for testing intoxication, which is similar to the type of device used in the case here. See *State v. Stratmeier*, 672 N.W.2d 817 (Iowa 2003); *State v. Hornik*, 672 N.W.2d 836 (Iowa 2003). In both cases, questions of improper use of the device, similar to those raised here, are analyzed and found not to constitute reversible error. We deem no error has been committed by the trial court in this regard.

We have considered all of the questions raised by the defendant in appealing his conviction. The judgment of the trial court is affirmed.

**OPINION BY:** SNELL

**OPINION: SNELL, S.J.**

Defendant William Knapp III was charged with operating a motor vehicle while under the influence of alcohol in violation of *Iowa Code section 321J.2* [\*2] (2001). The charge was based on an incident that occurred on March 10, 2002. Defendant waived his right to a trial by jury and stipulated to a trial on the minutes of testimony. The trial court found him guilty and sentenced him to a first offense incarceration and a fine of \$ 1000.

The operative facts show that an Urbandale police officer observed defendant's vehicle traveling on Hickman Road. The officer's radar showed that defendant was speeding. Defendant was stopped, questioned, and observed by the officer to have an odor of alcohol emanating from the car's back seat. Some cases of beer were in the back seat. Defendant's eyes were watery. He told the officer he had consumed a couple of beers at a friend's house. When defendant sat in the back of the officer's patrol car, the officer smelled the odor of an alcoholic beverage.

The officer administered three field sobriety tests and a preliminary breath test to defendant. Defendant performed poorly, leading the officer to arrest him. Defendant later submitted to an Intoxilizer breath test, which showed a blood alcohol concentration of .168.

On appeal, defendant sets forth numerous propositions claiming justification for relief. [\*3] We consolidate and summarize them for purposes of analysis. [HN1] Because they pertain to statutory interpretation and application, we review them for errors at law. *State v. Booth*, 670 N.W.2d 209, 211 (Iowa 2003). The district court's findings are binding if supported by substantial evidence. *State v. Frake*, 450 N.W.2d 817, 818 (Iowa 1990); see also *State v. Turner*, 630 N.W.2d 601, 606 n.2 (Iowa 2001).

Defendant filed a motion to suppress and a motion in limine. Error was preserved. Evidence was taken in regard to both motions.

Defendant believes the provisions of the implied consent law were improperly invoked. See *Iowa Code § 321J.6*. [HN2] That law may be invoked when the officer has reasonable grounds to believe the driver was operating a motor vehicle while intoxicated and anyone of seven enumerated conditions in the statute existed. Reasonable grounds are established when the facts and circumstances lead to a prudent person's belief that an offense has been committed. *Pointer v. Iowa Dep't of Transp.*, 546 N.W.2d 623, 625 (Iowa 1996). Both direct and circumstantial evidence may be considered [\*4] in determining if reasonable grounds exist. *Id.* at 626.

In this case, the evidence established defendant was speeding, admitted to drinking beer at a friend's house, and had cases of beer in the back seat of the car. His eyes were a little watery, and he exhibited the odor of an alcoholic beverage. The car stop by the officer occurred at about 2:00 a.m.. With the consent of defendant, the officer administered the field sobriety tests. The accuracy of those tests for admissibility is vigorously challenged by defendant.

The walk and turn test is claimed to be invalid because the officer did not instruct defendant to look at his feet during the test. The one-legged stand test is claimed to be invalid because defendant was not told to keep his legs straight. Defendant failed the tests notwithstanding these instructions would have aided not hindered him. Defendant's objection is more technical than based on any substantive difference it would make.

The horizontal gaze nystagmus test was also administered. This was claimed to be faulty on numerous grounds including that car headlights would be passing through the defendant's field of vision. We ignore the results of this [\*5] test. Even so, the enumerated circumstances are clearly sufficient to establish reasonable grounds to believe defendant was intoxicated when operating his motor vehicle. These grounds also provide probable cause to place defendant under arrest for violation of *section 321J.2*.

The officer's judgment to place defendant under arrest was bolstered by the result of a preliminary breath test. After arrest, defendant was administered the Intoxilizer breath test which registered blood alcohol concentration of .168.

Defendant challenges the admission in evidence of this test result on numerous grounds. He asserts the administrative rules were violated which require monthly calibration of the preliminary breath testing (PBT) device and maintenance of a calibration log. *Iowa Admin. Code r. 661-7.5(2)*. The calibration log for the PBT device used here showed it had been calibrated on March 2, 2002, and used on March 27, 2002. The log also identified the officer calibrating the device, listed the unit and identification number, and the calibration reading of the test. Although it is not signed by the calibrating officer, that is not required. [HN3] The administrative rule requires certification of proper [\*6] working order "within one year immediately preceding use." *Iowa Admin. Code r. 661-7.2(1)*. The Intoxilizer was properly certified.

Defendant also makes an argument based on margin of error. Under *Iowa Code section 321J.2(10)*, the results of the breath test may not be used to prove a defendant had an alcohol concentration of .10 or more "if the alcohol . . . concentration indicated by the chemical test minus the established margin of error inherent in the device or method used to conduct the chemical test does not equal or exceed" .10. Defendant's arguments focus on the margin of error caveat. He correctly says the device used here was not calibrated and certified for accuracy of breath testing above .16. However, the law does not require that. The critical area for testing for accuracy was .10. Division of Criminal Investigation Criminalist Robert Monserrate testified that the margin of error would never be great enough to bring a reading of .160 under .10. [HN4] *Iowa Code section 321J.2(10)* requires only that the result minus the established margin for error equal or exceed .10. The calibration and certification of the Intoxilizer instrument [\*7] used here met the statutory and administrative requirements for accuracy. This evidence was properly admitted for consideration by the trial judge.

Our supreme court in two recent cases approved the use of the Data Master device for testing intoxication, which is similar to the type of device used in the case here. See *State v. Stratmeier*, 672 N.W.2d 817 (Iowa 2003); *State v. Hornik*, 672 N.W.2d 836 (Iowa 2003). In both cases, questions of improper use of the device, similar to those raised here, are analyzed and found not to constitute reversible error. We deem no error has been committed by the trial court in this regard.

We have considered all of the questions raised by the defendant in appealing his conviction. The judgment of the trial court is affirmed.

**No. 65,131**

**Court of Appeals of Kansas**

***814 P.2d 456; 1991 Kan. App. LEXIS 520***

**July 12, 1991, Filed**

**NOTICE:** [\*1]

NOT DESIGNATED FOR PUBLICATION

**PRIOR HISTORY:**

Appeal from Jefferson District Court; Gary L. Nafziger, judge.

**DISPOSITION:**

Affirmed in part, reversed in part, and remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was convicted of manufacture of marijuana, possession of marijuana without payment of tax, possession of marijuana, possession of drug paraphernalia, and speeding in a 55 miles per hour zone, in violation of *Kan. Stat. Ann. §§ 65-4127b(b)(3), 79-5204(a), 65-4127b(a)(3), 65-4152, and 8-1336* (Supp. 1990), respectively. He appealed from the judgment of the Jefferson County District Court (Kansas).

**OVERVIEW:** Defendant was stopped for speeding and consented to a search of his car. Trash bags that were inside the car held marijuana seeds and stems and a bill showing defendant's home address. Inside the trunk was found a bag containing what appeared to be marijuana. Defendant was arrested and a warrant was obtained to search his home and barn, where marijuana growing paraphernalia and plants were found. The court established a rule for determining the sufficiency of informations, holding that the failure of an information to charge a crime could be raised for the first time on appeal, even if a defendant had not first filed a motion to arrest judgment. Applying that rule, the court held that defendant's conviction for possession of marijuana without payment of tax was void. The complaint failed to charge that defendant was a dealer, an essential element of that crime pursuant to *Kan. Stat. Ann. § 79-5201(c)* (Supp. 1990). The

complaint failed to charge possession of marijuana, an element of manufacture of marijuana under *Kan. Stat. Ann. § 65-4127b(b)*. However, defendant did not show that he was prejudiced, as the possession of marijuana was inherent in the manufacture of it.

**OUTCOME:** The court reversed the judgment that convicted defendant of possession of marijuana without payment of tax. The court affirmed the judgment with regard to all other convictions.

**CORE TERMS:** marijuana, manufacture, possession of marijuana, radar, bag, controlled substance, plastic, filled, drug paraphernalia, trunk, plant, barn, payment of tax, glove, leafy, search warrant, trash, convicted, possessed, dealer, manufacturing, containers, tending, sealed, sack, constitutionally valid, arrest of judgment, fair trial, authorize, introduce

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > General Overview***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN1] Before a search warrant may issue, a magistrate should consider the totality of the circumstances presented. He should make a practical common-sense decision whether there is a fair probability that a crime has been committed and the defendant committed the crime or that contraband or evidence of a crime will be found in a particular place. On appeal, the duty of the reviewing court is simply to ensure that the magistrate issuing a warrant had a substantial basis for concluding that probable cause existed.

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Particularity***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN2] Whether the description on a warrant of the property to be seized is sufficiently specific is a question of law. An appellate court's review of conclusions of law is unlimited.

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Particularity***

[HN3] A warrant must particularly describe the person, place, or means of conveyance to be searched and the things to be seized. General warrants that give executing officers a roving commission to search where they choose are forbidden.

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Execution of Warrant***

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Particularity***

[HN4] A warrant authorizing a search for and seizure of articles of personal property tending to establish identification is defective. The United State Supreme Court has upheld the validity of a search warrant, which stated: "together with other fruits, instrumentalities and evidence of crime at a time unknown." Such a warrant does not authorize the executing officers to conduct a search for evidence of other crimes but only to search for and seize evidence relevant to the crimes the defendant was suspected of committing. The scope of such a provision is narrowed by limiting words immediately preceding it.

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Scope***

[HN5] With the exception of handwriting samples, and other writings or recordings of evidentiary value for reasons other than their testimonial content, things subject to seizure shall not include personal diaries, letters, or other writings or recordings, made solely for private use or communication to an individual occupying a family, personal or other confidential relation, other than a relation in criminal enterprise, unless such things have served or are serving a

substantial purpose in furtherance of a criminal enterprise. The immunity from search does not extend to documents sought for reasons other than their testimonial content.

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Execution of Warrant***

***Criminal Law & Procedure > Accusatory Instruments > General Overview***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN6] According to *Kan. Stat. Ann. § 22-2504*, all search warrants shall show the time and date of issuance and shall be the warrants of the magistrate issuing the same. Kansas Statutes also provide that no warrant shall be quashed or evidence suppressed because of technical irregularities not affecting the substantial rights of the accused. *Kan. Stat. Ann. § 22-2511*.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN7] Where a trial court has made findings of fact and conclusions of law, the function of an appellate court is to determine whether the findings are supported by substantial competent evidence and whether the findings are sufficient to support the trial court's conclusions of law. Substantial evidence is evidence which possesses both relevance and substance and which furnishes a substantial basis of fact from which the issues can reasonably be resolved. Stated in another way, substantial evidence is such legal and relevant evidence as a reasonable person might accept as being sufficient to support a conclusion.

***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review***

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Consent to Search > Sufficiency & Voluntariness***

***Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > Search & Seizure***

[HN8] A search warrant is not required where a search is made with consent or a waiver voluntarily, intelligently, and knowingly given. The existence and voluntariness of a consent to search and seizure is a question of fact to be decided in light of attendant circumstances by the trier of fact and will not be overturned on appeal unless clearly erroneous. The consent must be knowingly and voluntarily given without threats or coercion.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Consent to Search > Sufficiency & Voluntariness***

***Criminal Law & Procedure > Witnesses > Credibility***

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN9] The State must prove the voluntariness of a consent to search by a preponderance of the evidence. Whether the State has met its burden depends upon the credibility of the witnesses. A trial court's observations of the demeanor of law enforcement officers and a defendant during testimony is essential to deciding if the State met its burden. An appellate court cannot decide a question of fact that is based upon conflicting testimony which requires an assessment of the demeanor and credibility of the witnesses.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Consent to Search***

[HN10] Consent to look around a house does not authorize a search into containers. Consent to search a trunk of a car does not authorize police to search the passenger compartment.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

***Evidence > Scientific Evidence > General Overview***

[HN11] Evidence of accuracy of a radar unit is generally a prerequisite to the admissibility of evidence of speed

obtained by the use of a radar device. The accuracy of a particular radar unit can be established by showing that the officer tested the device in accordance with accepted procedures. Tuning forks and internal calibration devices are acceptable means of proving radar accuracy.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor  
Evidence > Scientific Evidence > General Overview***

[HN12] It is generally required that proof be offered that a radar operator is qualified to operate a radar.

***Criminal Law & Procedure > Accusatory Instruments > Complaints  
Criminal Law & Procedure > Accusatory Instruments > Indictments  
Criminal Law & Procedure > Accusatory Instruments > Informations***

[HN13] A conviction based on a complaint or information which does not sufficiently charge the offense for which the accused is convicted is void. If the facts alleged in a complaint or information do not constitute an offense in the terms and meaning of the statute upon which it is based, a complaint or information is fatally defective. A district court lacks jurisdiction over a defendant where an information is fatally defective. An information that charges an offense in the language of the statute is sufficient; however, the exact statutory words need not be used if the meaning is clear.

***Constitutional Law > Bill of Rights > Fundamental Rights > General Overview  
Criminal Law & Procedure > Accusatory Instruments > Informations  
Criminal Law & Procedure > Accusatory Instruments > Superseding Indictments***

[HN14] The Supreme Court of Kansas has recently adopted a new rule for appellate review of issues of defective informations raised for the first time on appeal. Prospectively, for all informations filed after the date of that opinion, the Court has adopted the following rule: Information defect challenges raised for the first time on appeal shall be reviewed by applying (1) the reasoning of *Kan. Stat. Ann. § 22-3201(4)* complaint/information/indictment amendment cases, as their reasoning relates to jurisdiction and the substantial rights of the defendant; (2) the common-sense test established by the Court; and (3) the rationale of the United States Court of Appeals for the Ninth Circuit. Of paramount importance, an appellate court shall look to whether the claimed defect in the information has: (a) prejudiced the defendant in the preparation of his or her defense; (b) impaired in any way defendant's ability to plead the conviction in any subsequent prosecution; or (c) limited in any way defendant's substantial rights to a fair trial under the guarantees of the Sixth Amendment to the United States Constitution and the Kan. Const. Bill of Rights § 10. If a defendant is able to establish a claim under either (a), (b), or (c), the defective information claim, raised for the first time on appeal, will be allowed. All prior cases decided contrary to this rule are overruled.

***Civil Procedure > Appeals > Reviewability > General Overview  
Criminal Law & Procedure > Accusatory Instruments > Informations  
Criminal Law & Procedure > Appeals > Reviewability > General Overview***

[HN15] When an information filed in a trial court is claimed for the first time on appeal to be defective, the sufficiency of the information should be determined on the basis of practical rather than technical considerations. Common sense is a better guide than arbitrary and artificial rules.

***Criminal Law & Procedure > Accusatory Instruments > Informations  
Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN16] When an information filed in a trial court is claimed for the first time on appeal to be defective, the information is sufficient, even if an essential averment is faulty in form, if by a fair construction the essential averment may be found within the text. All parts of the pleading must be looked to in determining its sufficiency.

***Criminal Law & Procedure > Accusatory Instruments > Informations******Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN17] When an information filed in a trial court is claimed for the first time on appeal to be defective, defects in the institution of the prosecution or in the information, other than lack of jurisdiction or the failure to charge a crime, are waived if not raised by motion prior to trial.

***Criminal Law & Procedure > Preliminary Proceedings > Entry of Pleas > Types > Nolo Contendere******Criminal Law & Procedure > Guilty Pleas > No Contest Pleas******Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN18] When an information filed in a trial court is claimed for the first time on appeal to be defective, *Kan. Stat. Ann. § 22-3208(3)* (Supp. 1989) states that lack of jurisdiction or the failure of the information to charge a crime shall be noticed by the court at any time during the pendency of the proceedings.

***Civil Procedure > Jurisdiction > General Overview******Criminal Law & Procedure > Postconviction Proceedings > Arrest of Judgment******Governments > Legislation > Statutory Remedies & Rights***

[HN19] When an information filed in a trial court is claimed for the first time on appeal to be defective, after a verdict or finding of guilty or after a plea of guilty or nolo contendere, the proper procedure for a defendant who contends either that the information does not charge a crime or that the court was without jurisdiction of the crime charged is to utilize the statutory remedy extended by the legislature for these two specific situations - a *Kan. Stat. Ann. § 22-3502* motion for arrest of judgment.

***Criminal Law & Procedure > Accusatory Instruments > Informations******Criminal Law & Procedure > Postconviction Proceedings > Arrest of Judgment******Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN20] When an information filed in a trial court is claimed for the first time on appeal to be defective, if a defendant fails to challenge the sufficiency of the information or the jurisdiction of the trial court by motion for arrest of judgment pursuant to *Kan. Stat. Ann. § 22-3502*, the issue may be raised in the appellate court for the first time, subject to the rules announced by the Supreme Court of Kansas.

***Criminal Law & Procedure > Accusatory Instruments > Informations******Criminal Law & Procedure > Postconviction Proceedings > Arrest of Judgment******Criminal Law & Procedure > Appeals > Reviewability > Time Limitations***

[HN21] When an information filed in a trial court is claimed for the first time on appeal to be defective, the orderly resolution of criminal law issues requires the timely raising of claims relating to the validity of an information. Tardily challenged informations are to be construed liberally in favor of validity. The validity of an information is to be tested by reading the information as a whole. The information is sufficient, first, if it alleges the elements of the offense charged and fairly informs the defendant of the charge and, second, if a judgment thereon will safeguard the accused from a subsequent prosecution for the same offense. The elements of the offense may be gleaned from the information as a whole. An information not challenged before verdict or finding of guilty or pursuant to *Kan. Stat. Ann. § 22-3502* by a motion for arrest of judgment will be upheld unless it is so defective that it does not, by any reasonable construction, charge an offense for which the defendant is convicted.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

[HN22] The offense of possession of marijuana without payment of tax is defined in *Kan. Stat. Ann. § 79-5204* (Supp. 1990), which provides: No dealer may possess any marijuana, domestic marijuana plant or controlled substance upon which a tax is imposed pursuant to *Kan. Stat. Ann. § 79-5202*, and amendments thereto, unless the tax has been paid as

evidenced by an official stamp or other indicia.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

[HN23] A dealer is defined in *Kan. Stat. Ann. § 79-5201(c)* (Supp. 1990) as: any person who, in violation of Kansas law, manufactures, produces, ships, transports or imports into Kansas or in any manner acquires or possesses more than 28 grams of marijuana, or more than 1 gram of any controlled substance, or 10 or more dosage units of any controlled substance with is not sold by weight.

***Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Manufacture > Elements***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

[HN24] *Kan. Stat. Ann. § 65-4152* is entitled "possession of drug paraphernalia." Section 65-4152(2) provides: No person shall use or possess with intent to use any drug paraphernalia to plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test, analyze, pack, repack, store, contain, conceal, inject, ingest, inhale or otherwise introduce into the human body a controlled substance in violation of the Uniform Controlled Substances Act.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Drug Paraphernalia > Elements***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Criminal Law & Procedure > Jury Instructions > Particular Instructions > General Overview***

[HN25] *Kan. Pattern Instructions Crim. No. 67.17* (2d ed.) requires the State to prove (1) that a defendant used or possessed with the intent to use any drug paraphernalia and (2) that the defendant did so intentionally.

***Criminal Law & Procedure > Scienter > Knowledge***

***Criminal Law & Procedure > Scienter > Specific Intent***

***Criminal Law & Procedure > Scienter > Willfulness***

[HN26] Willful conduct is conduct that is purposeful and intentional. The terms "knowing" and "intentional" are included within the term "willful." *Kan. Stat. Ann. § 21-3201(2)*.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Manufacture > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > Intent to Distribute > Elements***

[HN27] *Kan. Stat. Ann. § 65-4127b(b)(3)* (Supp. 1990) provides: Except as authorized by the Uniform Controlled Substances Act, it shall be unlawful for any person to sell, offer for sale or have in such person's possession with the intent to sell, manufacture, prescribe, administer, deliver, distribute, dispense or compound any hallucinogenic drug designated in *Kan. Stat. Ann. § 65-4105(d)*, and amendments thereto or designated in *Kan. Stat. Ann. 65-4107(g)* and amendments thereto.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Manufacture > Elements***

[HN28] The term manufacture in *Kan. Stat. Ann. § 65-4127b(b)(3)* (Supp. 1990) does not include the preparation or compounding of a controlled substance by an individual for the individual's own use. *Kan. Stat. Ann. § 65-4101(n)* (Supp. 1990).

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Manufacture > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

[HN29] *Kan. Stat. Ann. § 65-4127b(b)* (Supp. 1990) prohibits (1) the sale or manufacture, or (2) to offer for sale, or (3) possession with intent to manufacture. Thus, the State is required to prove possession with intent to manufacture.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN30] When a defendant challenges the sufficiency of the evidence to support a conviction, the standard of review on appeal is whether, after review of all the evidence, viewed in the light most favorable to the prosecution, the appellate court is convinced that a rational factfinder could have found the defendant guilty beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > Simple Possession > Elements***

***Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

***Criminal Law & Procedure > Jury Instructions > Particular Instructions > General Overview***

[HN31] The State must prove for a conviction of possession of marijuana that a defendant intentionally possessed marijuana. *Kan. Pattern Instructions Crim. No. 67.16* (2d ed.).

***Criminal Law & Procedure > Trials > Closing Arguments > Evidence Not Admitted***

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN32] No rule governing oral argument is more fundamental than that requiring counsel to confine their remarks to matters in evidence. The stating of facts not in evidence is clearly improper. If a statement is improper, the reviewing court must determine whether the argument was so prejudicial as to deny the defendant a fair trial and thus to require a new trial.

***Criminal Law & Procedure > Trials > Closing Arguments > Evidence Not Admitted***

***Criminal Law & Procedure > Trials > Closing Arguments > Inflammatory Statements***

***Criminal Law & Procedure > Appeals > Prosecutorial Misconduct > Prohibitions Against Improper Statements***

[HN33] Misconduct of a county attorney in closing argument will not always require the granting of a new trial unless such misconduct has resulted in prejudice to the extent that the accused has been denied a fair trial.

***Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation > General Overview***

***Criminal Law & Procedure > Trials > Burdens of Proof > General Overview***

[HN34] The constitutionality of a statute is presumed, all doubts must be resolved in favor of its validity, and before the statute may be stricken down, it must clearly appear the statute violates the United States Constitution. Moreover, it is the court's duty to uphold the statute under attack, if possible, rather than defeat it, and if there is any reasonable way to construe the statute as constitutionally valid, that should be done. The burden of proof is on the party challenging a statute's constitutionality.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Tax Law > State & Local Taxes > Franchise Tax > General Overview***

***Tax Law > State & Local Taxes > Sales Tax > General Overview***

[HN35] *Kan. Stat. Ann. § 79-5204* (Supp. 1990) provides for the issuance of tax stamps, labels, or other official indicia affixed to marijuana showing payment of the tax. Section 79-5204(b) also states: Any person may purchase any such stamp, label or other indicia without disclosing such person's identity.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

***Tax Law > State & Local Taxes > Administration & Proceedings > General Overview***

[HN36] Neither the director of taxation nor a public employee may reveal facts contained in a report or return required by the Kansas Drug Tax Act, nor can any information contained in such a report or return be used against the dealer in any criminal proceeding, unless independently obtained, except in connection with a proceeding involving taxes due under the Act from the taxpayer making the return.

***Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Tax Law > State & Local Taxes > Administration & Proceedings > Collection***

[HN37] *Kan. Stat. Ann. § 75-5133* provides: Except as otherwise more specifically provided by law, all information received by the director of taxation from applications for licensure or registration made or returns or reports filed under the provisions of any law imposing any excise tax administered by the director, or from any investigation conducted under such provisions, shall be confidential, and it shall be unlawful for any officer or employee of the department of revenue to divulge any such information except in accordance with other provisions of law respecting the enforcement and collection of such tax, in accordance with other provisions of law respecting the enforcement and collection of such tax in accordance with proper judicial order and as provided in *Kan. Stat. Ann. § 74-2424*, and amendments thereto.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Tax Law > State & Local Taxes > Sales Tax > Imposition of Tax***

[HN38] The Kansas Drug Tax Act does not violate due process provisions of the Fourteenth Amendment and is constitutionally valid. Because revenue collection is one of the objectives of the Act and because imposition of the tax does not expressly depend on the illegal nature of the sale or possession of marijuana, the Act is constitutionally valid under the United States Constitution.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Tax Law > State & Local Taxes > Franchise Tax > General Overview***

[HN39] The Kansas Drug Tax Act does not violate the Due Process Clause of the Fourteenth Amendment and is constitutionally valid.

***Criminal Law & Procedure > Double Jeopardy > Attachment Jeopardy***

[HN40] Under the doctrine of double jeopardy, the State may not split a single offense into separate parts. Where there is a single wrongful act, such act will not furnish the basis for more than one criminal prosecution.

***Criminal Law & Procedure > Double Jeopardy > Attachment Jeopardy***

[HN41] A test concerning whether a single transaction may constitute two separate and distinct offenses is whether the same evidence is required to sustain each charge, and if not, the fact that both charges relate to and grow out of one

transaction does not make a single offense where two distinct offenses are defined by statute.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Criminal Law & Procedure > Double Jeopardy > Attachment Jeopardy***

***Tax Law > State & Local Taxes > Franchise Tax > General Overview***

[HN42] The crimes of possession of marijuana and possession of marijuana without payment of tax are two distinct offenses. A crime under *Kan. Stat. Ann. § 79-5204(a)* (Supp. 1990) requires proof that the defendant is a dealer and that more than 28 grams of marijuana is possessed in addition to possession with intent. Furthermore, possession of marijuana is not a lesser included offense of possession of marijuana without payment of tax. A violation of *Kan. Stat. Ann. § 79-5208* for possession of a controlled substance without affixing the appropriate stamps showing payment of the tax is a separate and distinct offense from possession of marijuana or a controlled substance and one is not an included offense of the other.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Criminal Law & Procedure > Double Jeopardy > Double Jeopardy Protection > Multiple Punishments***

***Criminal Law & Procedure > Double Jeopardy > Double Jeopardy Protection > Tests***

[HN43] The Double Jeopardy Clause of the United States Constitution protects defendants in criminal proceedings from multiple punishments for the same offense. The test of whether convictions for possession and manufacture of marijuana are multiplicitous depends upon whether each offense requires proof of an essential element which the other does not.

***Criminal Law & Procedure > Accusatory Instruments > Merger of Offenses***

***Criminal Law & Procedure > Double Jeopardy > Attachment Jeopardy***

[HN44] The general principles for determining whether charges are multiplicitous are described as follows: (1) A single offense may not be divided into separate parts; generally, a single wrongful act may not furnish the basis for more than one criminal prosecution. (2) If each offense charged requires proof of a fact not required in proving the other, the offenses do not merge. (3) Where offenses are committed separately and severally, at different times and at different places, they cannot be said to arise out of a single wrongful act.

*Benjamin C. Wood*, of Overland Park, for appellant.

*Michael C. Hayes*, county attorney, and *Robert T. Stephan*, attorney general, for appellee.

**JUDGES:**

Brazil, P.J., Rulon, J., and David S. Knudson, District Judge, assigned.

**OPINION BY:**

PER CURIAM

**OPINION:**

MEMORANDUM OPINION

Thomas Guilfoyle appeals from his conviction of manufacture of marijuana, *K.S.A. 1990 Supp. 65-4127b(b)(3)*, possession of marijuana without payment of tax, *K.S.A. 1990 Supp. 79-5204(a)*, possession of marijuana, *K.S.A. 1990*

*Supp. 65-4127b(a)(3)*, possession of drug paraphernalia, *K.S.A. 65-4152*, and speeding in a 55 m.p.h. zone, *K.S.A. 1990 Supp. 8-1336*.

Highway Patrol Trooper Kyle Moomau stopped Guilfoyle for driving 67 miles per hour in a 55 miles per hour zone based on a radar reading. While asking for Guilfoyle's driver's license and proof of insurance, Moomau detected a strong odor of marijuana coming from the car. Moomau returned to his patrol car to check Guilfoyle's license and for warrants. Moomau's records' check indicated that the car Guilfoyle was driving was owned by Thomas [\*2] P. Guilfoyle, Route 1, Box 247, Perry, Kansas. Moomau then told Guilfoyle he could smell the odor of marijuana coming from Guilfoyle's car, but Guilfoyle denied having any marijuana.

When Moomau returned to Guilfoyle's car, he noticed two plastic trash bags on the back seat. Moomau asked Guilfoyle if he could search the car, and Guilfoyle verbally consented. Moomau removed the plastic bags and found marijuana seeds and stems and smelled a strong odor of marijuana. Deputy Rex Taylor opened the trunk and found a white bag, called a cry-o-vac, which is an air sealed bag. It contained what appeared to be marijuana. Moomau arrested Guilfoyle at that time.

While Guilfoyle was in custody, a warrant was issued to search Guilfoyle's home and barn. In the house, police found marijuana in several sealed "foosaver bags," some packaging equipment, a High Times Magazine, and an O'Haus scale. In the barn they found 1,756 feet of hose, grow lights, a backpack with scissors and a glove in it, some screens, and various gardening equipment. The glove and scissors tested positive for Tetrahydrocannabinol (THC). One hundred and twenty-three marijuana plants were seized from a neighbor's property. In [\*3] the neighbor's field, police also found a glove appearing to be the mate of the glove found in Guilfoyle's barn. Guilfoyle raises numerous issues on appeal.

#### 1. The search warrant.

Guilfoyle argues there was no probable cause to search his home or barn. The State responds that, based on the totality of the circumstances, the judge issuing the search warrant had a substantial basis for concluding that probable cause existed to search his residence and barn.

[HN1] Before a search warrant may issue, a magistrate should consider the totality of the circumstances presented. He should make a practical common-sense decision whether there is a fair probability that a crime has been committed and the defendant committed the crime or that contraband or evidence of a crime will be found in a particular place. *State v. Doile*, 244 Kan. 493, 769 P.2d 666 (1989). "On appeal, the duty of the reviewing court is simply to ensure that the magistrate issuing a warrant had a substantial basis for concluding that probable cause existed." 244 Kan. 493, Syl. para. 5.

Guilfoyle cites *Doile* in support of his argument there was no probable cause. In [\*4] *Doile*, an officer had viewed a marijuana cigarette in Doile's car after he had been stopped for DUI and arrested. Police found a baggie of marijuana, a mirror, and a straw with a white powdery residue in Doile's car. Five years earlier he had sold cocaine. 244 Kan. at 501. The court held that this evidence did not rise to the level of probable cause to believe Doile had contraband in his house and the cocaine seized from his house should have been suppressed. 244 Kan. at 503.

In the present case, the affidavit to search Guilfoyle's house and barn stated the following facts:

"1) Trooper Moomau first searched one of the plastic garbage sacks [from] the back seat and found contained within the plastic sack the smell of marijuana, green leafy substance, green seeds, green plant stems and a United Telephone Bill to Telephone Number (913) 597-5297, an 'Onsat' magazine with mailing label to Tom Guilfoyle, R 1, Box 247, Perry, Kansas 66073, potato peels and other kitchen type trash.

"m) The second trash bag contained eleven plastic trash bags, three paper grocery bags that were empty except for green leafy residue.

"n) Trooper [\*5] Moomau [then] did a search of the trunk area and found a plastic trash bag containing four vacuum sealed plastic bags which contained approximately one pound of green leafy substance with the weight of each bag clearly marked on the outside.

"o) That said affiant conducted a field tests on the green leafy substance from both trash sacks found in the back seat which showed a positive test for the presumption of THC.

"p) Said affiant verified that the phone number on the telephone bills found in said trash was the same given by Guilfoyle on his booking card and given out by phone company information when asking for a Perry, Kansas listing for Tom or Thomas Guilfoyle."

On these facts, it could reasonably be inferred that: (1) the items in the first plastic sack were obviously garbage and/or trash; (2) all of the sack's contents came from the same location; (3) that location was a dwelling or at least a place where food had been prepared; (4) the magazine was addressed to and the phone number belonged to the same location; (5) the address on the magazine and phone bill was the same as Guilfoyle's address obtained in Moomau's records check; (6) the phone number on the bill was the same [\*6] as given by Guilfoyle during booking; and (7) the remnants or traces of marijuana, green leafy substance, green seeds, plant stems found in the trash bag are consistent with a marijuana manufacturing and packaging operation, which would explain the source of four one pound sealed plastic bags of green leafy substance found in the trunk. Unlike *Doile*, considering the totality of the circumstances and this court's scope of review, the magistrate had a substantial basis for concluding that probable cause existed to search Guilfoyle's home and barn.

## 2. Was the warrant overbroad?

Guilfoyle argues the warrant was overbroad and constituted an unlawful general warrant.

[HN2] Whether the description on the warrant of the property to be seized is sufficiently specific is a question of law. "This court's review of conclusions of law is unlimited." *Hutchinson Nat'l Bank & Tr. Co. v. Brown*, 12 Kan. App. 2d 673, 674, 753 P.2d 1299, rev. denied 243 Kan. 778 (1988).

The warrant authorized a search of dwellings, outbuildings, and vehicles for the following: marijuana in all forms; paraphernalia commonly associated with the storage of marijuana, including [\*7] but not limited to scales, sifters, containers, and plastic bags; guns; items shot with guns, articles of personal property tending to establish the identity of persons in control of the house, vehicles, storage areas, or containers; utility company receipts, rent receipts, addressed envelopes, correspondence, and keys; trace evidence such as hair, fibers, fingerprints, notebooks, phone lists, receipt books, and accounts receivable books; and U.S. currency.

[HN3] A warrant must particularly describe the person, place, or means of conveyance to be searched and the things to be seized. *State v. Morgan*, 222 Kan. 149, 151, 563 P.2d 1056 (1977). General warrants that give executing officers a roving commission to search where they choose are forbidden. *State v. Gordon*, 221 Kan. 253, 258, 559 P.2d 312 (1977).

Guilfoyle claims that specifically the phrase "property tending to establish the identity of persons in control" of the premises too closely resembles the wording of a forbidden "general warrant" and invites a strong intrusion into personal effects and private papers. Guilfoyle cites several other jurisdictions in support of [\*8] his argument.

In *State v. Kealoha*, 62 Hawaii 166, 174, 613 P.2d 645 (1980), the Supreme Court of Hawaii held that [HN4] a warrant authorizing a search for and seizure of "articles of personal property tending to establish . . . identification" is defective. In so holding, the court distinguished the case from *Andresen v. Maryland*, 427 U.S. 463, 49 L. Ed. 2d 627, 96 S. Ct. 2737 (1976). In *Andresen*, the court upheld the validity of a search warrant, which stated: "together with other fruits, instrumentalities and evidence of crime at this [time] unknown." 427 U.S. at 479. The Court reasoned that the warrants did not authorize the executing officers to conduct a search for evidence of other crimes but only to search for and seize evidence relevant to the crimes the defendant was suspected of committing. 427 U.S. at 481-82. The scope

had also been narrowed by limiting words immediately preceding it.

The warrant in *Kealoha* was also distinguished from that in *United States v. Honore*, 450 F.2d 31 (9th Cir. 1971), [\*9] *cert. denied* 404 U.S. 1048 (1972). In *Honore*, the court found a warrant valid where it authorized seizure of "articles [of] personal property tending to establish the [identity] of the persons in control of the premises . . . including but not limited to utility company receipts, rent receipts, cancelled mail envelopes, and keys." 450 F.2d at 33.

According to the American Law Institute, Model Code of Pre-Arrest Procedure, § SS 210.3:

[HN5] "With the exception of handwriting samples, and other writings or recordings of evidentiary value for reasons other than their testimonial content, things subject to seizure . . . shall not include personal diaries, letters, or other writings or recordings, made solely for private use or communication to an individual occupying a family, personal or other confidential relation, other than a relation in criminal enterprise, unless such things have served or are serving a substantial purpose in furtherance of a criminal enterprise."

Comments to that section state the immunity from search "does not extend to documents sought for reasons other than their testimonial content."

In the instant case, the warrant, [\*10] when examined in its entirety, is not overly broad. The items listed in paragraph two of the warrant, at first blush, might appear to extend beyond the relevance of the crimes involved. But, like *Andresen*, the scope of the search is limited by the first line of paragraph number two, which states: "The following particularly described items are *contraband, evidence, fruits, or instrumentalities of said crime or crimes.*" (Emphasis added.) The "said crime or crimes" are those set out in paragraph number one, namely crimes related to possession, sale and manufacture of marijuana and possession of drug paraphernalia. Obviously, personal diaries, letters, and other items of a personal nature having no relation to the described crimes would be beyond the scope of the warrant.

The warrant to search for "property tending to establish the identify of persons in control" of the premises when considered in the context of the entire warrant and attached copy of a quitclaim deed showing Thomas Guilfoyle as grantee would reasonably be for the purpose of corroborating the other evidence of Guilfoyle's involvement and possibly the involvement of others. The warrant was not overbroad.

### 3. [\*11] Other defects in the warrant.

Guilfoyle claims the warrant was invalid because the date and time on the warrant were filled in by Trooper Moomau after he obtained the magistrate's signature. The State responds that the omission of the date and time was a technical irregularity not affecting the validity of the warrant.

Moomau testified to the following regarding the search warrant:

"Q. And what time did you write October 3rd on there?"

"A. I wrote it all in one, as far as I can tell I wrote it all in one, I don't know what I'm trying to say, at one time. I received it and wrote it.

"Q. Okay, in otherwords, it is your testimony at the same time you filled out your handwriting on the return portion indicating that you received the warrant on the third, and returned on the 4th that you also filled in the 3rd up on top here on the date of issuance, at the top of the warrant. At the same time you filled out the bottom, and that would have been the 4th?"

"A. I believe I filled it out this portion at the top at the date, I believe I filled it out at the same I started filling out date of issue, October 3, 1989 at 10:55 and then I filled this in after we completed it, I filled this in when I [\*12] returned.

"Q. Okay. Did you fill in--the portion you have just testified to, I received this warrant October, etc., you filled in that portion after presentation to the magistrate for signing?

"A. Yes."

The trial court stated it found the warrant had been issued on the 3rd, executed on the 3rd, and returned on the 4th. It determined the warrant met the warrant requirements and there was no uncertainty as to the date of issuance, execution, and return.

[HN6] According to *K.S.A. 22-2504*, "All search warrants shall show the time and date of issuance and shall be the warrants of the magistrate issuing the same." Kansas Statutes also provide that no warrant shall be quashed or evidence suppressed because of technical irregularities not affecting the substantial rights of the accused. *K.S.A. 22-2511*.

"Legislative intent is to be determined from a consideration of the entire act, and effect must be given, if possible, to the entire act and every part thereof." *Director of Property Valuation v. Golden Plains Express, Inc.*, 13 Kan. App. 2d 48, 49, 760 P.2d 1227 (1988). In the instant case, based on the trial court's finding that the warrant was in fact issued on [\*13] the 3rd and returned on the 4th, and absent any showing that Guilfoyle's substantial rights have been affected, any irregularities were technical in nature and would not justify quashing the warrant or suppressing evidence.

#### 4. Consent to search Guilfoyle's car.

Guilfoyle claims the State did not meet its burden of proving he consented to the search of his car.

"The scope of appellate review is clear. [HN7] Where the trial court has made findings of fact and conclusions of law, the function of [an appellate court] is to determine whether the findings are supported by substantial competent evidence and whether the findings are sufficient to support the trial court's conclusions of law. [Citations omitted.] Substantial evidence is evidence which possesses both relevance and substance and which furnishes a substantial basis of fact from which the issues can reasonably be resolved. [Citation omitted.] Stated in another way, 'substantial evidence' is such legal and relevant evidence as a reasonable person might accept as being sufficient to support a conclusion." *Williams Telecommunications Co. v. Gragg*, 242 Kan. 675, 676, 750 P.2d 398 (1988).

[HN8] A search warrant [\*14] is not required where a search is made with consent or a waiver voluntarily, intelligently, and knowingly given. *State v. Jakeway*, 221 Kan. 142, Syl. para. 4, 558 P.2d 113 (1976). "The existence and voluntariness of a consent to search and seizure is a question of fact to be decided in light of attendant circumstances by the trier of fact and will not be overturned on appeal unless clearly erroneous." *State v. Nicholson*, 225 Kan. 418, 423, 590 P.2d 1069 (1979). The consent must be knowingly and voluntarily given without threats or coercion. *State v. Niblock*, 230 Kan. 156, 162, 631 P.2d 661 (1981).

[HN9] The State must prove the voluntariness by a preponderance of the evidence. *State v. Buckner*, 223 Kan. 138, 143, 574 P.2d 918 (1977). Whether the State met its burden depends upon the credibility of the witnesses. The trial court's observations of the demeanor of the officers and the defendant during testimony is essential to deciding if the State met its burden. "The appellate court cannot decide a question of fact that is based upon conflicting testimony which [\*15] requires an assessment of the demeanor and credibility of the witnesses." *State v. Ruden*, 245 Kan. 95, 106, 774 P.2d 972 (1989).

At the motion to suppress, Moomau testified: "I asked him if I could search his vehicle and he verbally consented." Moomau did not tell Guilfoyle he was not required to let him search the car nor did he have Guilfoyle sign a written waiver form. Moomau testified that he recalls asking Guilfoyle if he could search the car rather than look in his car. An affidavit for prosecution stated Guilfoyle gave verbal consent to "look in" the vehicle. Moomau believes the use of "look in" rather than "searched" in the affidavit was an error.

Deputy Taylor overheard Moomau explaining to Guilfoyle he thought he smelled marijuana and asked if he could

search the car. Taylor heard Guilfoyle respond, "sure." While Moomau searched the car, Taylor watched Guilfoyle by the trunk. Taylor noticed a button and asked Guilfoyle if it opened the trunk, and he said yes. Taylor pushed the button and opened the trunk.

On the basis of the testimony at the suppression hearing, the court's finding there was voluntary and knowing consent to search the car was [\*16] not erroneous. There is nothing in the record to suggest that Guilfoyle's consent was the result of fraud, coercion, or duress or that he lacked sufficient intelligence to appreciate the consequences of such consent.

Guilfoyle claims that Moomau asked to "look in" the car, causing a search of the trunk and containers to be improper. In support of his argument, he cites *People v. Thiret*, 685 P.2d 193 (Colo. 1984) [HN10] (consent to "look around" a house did not authorize search into containers), and *State v. Johnson*, 71 Wash. 2d 239, 427 P.2d 705 (1967) (consent to search a trunk of a car did not authorize police to search the passenger compartment).

In the instant case, however, there was sufficient evidence for the trial court to find Moomau requested to *search* Guilfoyle's car; thus his argument is without merit.

#### 5. Admissibility of radar results.

Guilfoyle claims the State failed to lay the requisite foundation for admission of the radar results, which was required for the State to meet its burden of proving it had lawfully stopped him for speeding.

[HN11] Evidence of accuracy of a radar unit is generally a prerequisite to the admissibility [\*17] of evidence of speed obtained by the use of a radar device. *State v. Primm*, 4 Kan. App. 2d 314, 315, 606 P.2d 112 (1980). "The accuracy of a particular radar unit can be established by showing that the officer tested the device in accordance with accepted procedures." 4 Kan. App. 2d at 315. Tuning forks and internal calibration devices are acceptable means of proving radar accuracy. 4 Kan. App. 2d at 316.

In the present case, Moomau testified he was certified by the Kansas Highway Patrol to operate moving radar and traffic radar and that he is trained to set the radar up and check it on and off to operate it. He also testified that, whenever starting his shift, he turns the radar on, makes sure it has the power supply, and pushes the test button to make sure it is displaying the correct numbers. The light button is pushed to make sure all the light modules for the numbers are working and then a tuning fork in front of the antenna is used to make sure it has the correct read out. Thus there is evidence to infer the radar was accurately operating at the time of Guilfoyle's stop.

[HN12] It is also generally [\*18] required that proof be offered that the radar operator is qualified to operate the radar. 4 Kan. App. 2d at 316. In light of Moomau's testimony regarding his training, there was sufficient evidence to establish his qualifications to operate the radar.

#### 6. Defective complaint.

Guilfoyle argues that counts two, three, and four of the amended complaint are fatally defective for failing to allege every essential element of the crimes charged.

[HN13] A conviction based on a complaint or information which does not sufficiently charge the offense for which the accused is convicted is void. *State v. Howell & Taylor*, 226 Kan. 511, 601 P.2d 1141 (1979). "If the facts alleged in a complaint or information do not constitute an offense in the terms and meaning of the statute upon which it is based, a complaint or information is fatally defective." 226 Kan. at 513. The district court lacks jurisdiction over a defendant where an information is fatally defective. 226 Kan. at 514. An information that charges an offense in the language of the statute is sufficient; however, the exact statutory [\*19] words need not be used if the meaning is clear. *State v. Garcia*, 243 Kan. 662, 667, 763 P.2d 585 (1988).

[HN14] Our Supreme Court has recently adopted a new rule for appellate review of issues of defective informations raised for the first time on appeal. In *State v. Hall*, 246 Kan. 728, Syl. para. 12, 793 P.2d 737 (1990), the court held:

"Prospectively, for all informations filed after the date of this opinion, we adopt the following rule: Information defect challenges raised for the first time on appeal shall be reviewed by applying (1) the reasoning of *K.S.A. 22-3201(4)* complaint/information/indictment amendment cases as expressed in *State v. Switzer*, 244 Kan. 449, 769 P.2d 645 (1989), *State v. Nunn*, 244 Kan. 207, 768 P.2d 268 (1988), and *State v. Rasch*, 243 Kan. 495, 497, 758 P.2d 214 (1988), as that reasoning relates to jurisdiction and the substantial rights of the defendant; (2) the 'common-sense' test of *State v. Wade*, 244 Kan. 136, 766 P.2d 811 (1989), and *State v. Micheaux*, 242 Kan. 192, 747 P.2d 784 (1987); [\*20] and (3) the rationale of *United States v. Pheaster*, 544 F.2d 353 (9th Cir. 1976), cert. denied 429 U.S. 1099 (1977). Of paramount importance, we shall look to whether the claimed defect in the information has: (a) prejudiced the defendant in the preparation of his or her defense; (b) impaired in any way defendant's ability to plead the conviction in any subsequent prosecution; or (c) limited in any way defendant's substantial rights to a fair trial under the guarantees of the Sixth Amendment to the United States Constitution and the Kansas Constitution Bill of Rights, § 10. If a defendant is able to establish a claim under either (a), (b), or (c), the defective information claim, raised for the first time on appeal, will be allowed. All prior cases decided contrary to this rule are overruled."

The court went on to say:

[HN15] "When an information filed in the trial court after the date of this opinion is claimed for the first time on appeal to be defective:

"(a) The sufficiency of the information should be determined on the basis of practical rather than technical considerations. Common sense is a better guide than arbitrary and artificial rules. [\*21]

"(b) [HN16] The information is sufficient, even if an essential averment is faulty in form, if by a fair construction the essential averment may be found within the text. All parts of the pleading must be looked to in determining its sufficiency.

"(c) [HN17] Defects in the institution of the prosecution or in the information, other than lack of jurisdiction or the failure to charge a crime, are waived if not raised by motion prior to trial.

"(d) *K.S.A. 1989 Supp. 22-3208(3)* states that [HN18] lack of jurisdiction or the failure of the information to charge a crime shall be noticed by the court at any time during the pendency of the proceedings.

"(e) [HN19] After the verdict or finding of guilty or after a plea of guilty or nolo contendere, the proper procedure for a defendant who contends either that the information does not charge a crime or that the court was without jurisdiction of the crime charged is to utilize the statutory remedy extended by the legislature for these two specific situations--a *K.S.A. 22-3502* motion for arrest of judgment.

"(f) *K.S.A. 22-3503* authorizes the trial court to arrest judgment without motion whenever the trial court becomes aware of the existence of grounds which would require [\*22] that a motion for arrest of judgment be sustained, if filed.

"(g) [HN20] If a defendant fails to challenge the sufficiency of the information or the jurisdiction of the trial court by motion for arrest of judgment pursuant to *K.S.A. 22-3502*, the issue may be raised in the appellate court for the first time, subject to the rule announced in Syl. para. 12 and corresponding parts of this opinion.

"(h) [HN21] The orderly resolution of criminal law issues requires the timely raising of claims relating to the validity of an information. Tardily challenged informations are to be construed liberally in favor of validity. The validity of an information is to be tested by reading the information as a whole. The information is sufficient, first, if it alleges the elements of the offense charged and fairly informs the defendant of the charge and, second, if a judgment

thereon will safeguard the accused from a subsequent prosecution for the same offense. The elements of the offense may be gleaned from the information as a whole. An information not challenged before verdict or finding of guilty or pursuant to *K.S.A. 22-3502* by a motion for arrest of judgment will be upheld unless it is so defective that it does [\*23] not, by any reasonable construction, charge an offense for which the defendant is convicted." *246 Kan. 728*, Syl. para. 13.

In *State v. Waterberry*, *248 Kan. 169*, Syl. para. 2, *804 P.2d 1000 (1991)*, the court modified the prospective application of the rule in *Hall* to apply to cases pending in Kansas courts as of May 31, 1990. The notice of appeal in the instant case was filed March 30, 1990. The rule in *Hall* applies in the present case.

Count IV reads as follows:

"That on or about the 3rd day of October, 1989, the said THOMAS F. GUILFOYLE . . . did then and there . . . unlawfully, willfully and feloniously possess marijuana upon which a tax is imposed pursuant to *K.S.A. 1987 Supp. 79-5202* and had no evidence of an official stamp or other indicia, in violation of *K.S.A. 79-5204(a)*; *K.S.A. 79-5208*; Unclassified Felony."

[HN22] The offense of possession of marijuana without payment of tax is defined in *K.S.A. 1990 Supp. 79-5204*, which provides: "No dealer may possess any marijuana, domestic marijuana plant or controlled substance upon which a tax is imposed pursuant to *K.S.A. 79-5202*, and amendments thereto, unless the tax has [\*24] been paid as evidenced by an official stamp or other indicia."

Guilfoyle points out that the complaint did not allege Guilfoyle to be a dealer. [HN23] A dealer is defined in *K.S.A. 1990 Supp. 79-5201(c)* as

"any person who, in violation of Kansas law, manufactures, produces, ships, transports or imports into Kansas or in any manner acquires or possesses more than 28 grams of marijuana, or more than one gram of any controlled substance, or 10 or more dosage units of any controlled substance with is not sold by weight."

An essential element that must be proved by the State is that Guilfoyle possessed more than 28 grams of marijuana. *K.S.A. 1990 Supp. 79-5204*. Accordingly, the complaint does not sufficiently charge the offense for which Guilfoyle was convicted. Guilfoyle's conviction for possession of marijuana without payment of tax is void. *State v. Howell & Taylor*, *226 Kan. 514*.

Count III charged Guilfoyle as follows:

"THOMAS P. GUILFOYLE . . . did . . . unlawfully and willfully possess drug paraphernalia, to wit: scales, sifters and containers, knowing or under circumstances where one reasonably should know that said objects were to be used to introduce [\*25] into the human body a controlled substance."

*K.S.A. 65-4152*, [HN24] possession of drug paraphernalia, provides:

"No person shall use or possess with intent to use:

. . . .

"(2) any drug paraphernalia to plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test, analyze, pack, repack, store, contain, conceal, inject, ingest, inhale or otherwise introduce into the human body a controlled substance in violation of the uniform controlled substances act."

Guilfoyle claims count three is defective for failing to allege the use, or possession with intent to use, paraphernalia in order to introduce controlled substance into the body. Guilfoyle points out that the State moved to amend this count

of the complaint after all the evidence was in and the instructions were being argued but apparently requested the same language that already appeared in the amended complaint it had filed before trial. Guilfoyle objected before trial to the amendment of count III but not on the grounds he now claims error.

PIK Crim. 2d 67.17 [HN25] requires the State to prove (1) that the defendant used or possessed with the intent to use any drug paraphernalia and (2) that the [\*26] defendant did so intentionally.

Applying a common sense test to the review of the complaint as required by *State v. Micheaux*, 242 Kan. 192, 199, 747 P.2d 784 (1987), the present complaint is not defective. [HN26] "Willful conduct is conduct that is purposeful and intentional . . . . The terms 'knowing,' 'intentional,' . . . are included within the term 'willful.'" *K.S.A. 21-3201(2)*. The complaint charges the possession was willful and "knowing or under circumstances where one reasonably should know that said objects were to be used to introduce" a controlled substance into the human body. This language sufficiently alleges intent.

Count II charges Guilfoyle as follows: "THOMAS P. GUILFOYLE . . . did . . . unlawfully, feloniously and willfully manufacture a certain quantity of Cannabis, commonly known as marijuana."

*K.S.A. 1990 Supp. 65-4127b(b)* provides:

[HN27] "Except as authorized by the uniform controlled substances act, it shall be unlawful for any person to sell, offer for sale or have in such person's possession with the intent to sell, manufacture, prescribe, administer, deliver, distribute, dispense or compound:

. . . .

"(3) any hallucinogenic drug designated [\*27] in subsection (d) of *K.S.A. 65-4105*, and amendments thereto or designated in subsection (g) of *K.S.A. 65-4107* and amendments thereto."

[HN28] The term manufacture "does not include the preparation or compounding of a controlled substance by an individual for the individual's own use." *K.S.A. 1990 Supp. 65-4101(n)*. Thus, Guilfoyle claims, the State must allege intent to sell or distribute; otherwise no offense has been committed. The State, he argues, also failed to allege and prove possession with intent to manufacture.

*K.S.A. 1990 Supp. 65-4127b(b)* [HN29] prohibits (1) the sale or manufacture, or (2) to offer for sale, or (3) possession with intent to manufacture. Thus, the State in the instant case was required to prove possession with intent to manufacture. The complaint fails to charge possession of marijuana.

In motions regarding amending the complaint, the prosecution stated: "Count II, changed the manufacture from possession with intent to sell, all under the same statute, no statute change, no penalty section change." The complaint was amended January 23, 1990.

Guilfoyle appears to have objected to the amendment of count II. He stated:

"Thus far we have been looking at this case as possession [\*28] with intent to sell . . . I think it does charge a different theory to the offense, there may have been evidence of possession elicited at the preliminary. I don't, I'm not sure there was evidence of manufacture as opposed to possession."

In raising this issue, Guilfoyle has not shown how these alleged defects (a) prejudiced him in his defense, (b) impaired his ability to plead the conviction in any subsequent prosecution, or (c) limited his substantial rights to a fair trial.

Reviewing the complaint in a common sense manner as required in *Hall*, Guilfoyle was apprised of charges against

him. He was aware the State was charging him with manufacturing marijuana under *K.S.A. 1990 Supp. 65-4127b(b)*. Furthermore, in order to manufacture marijuana, it is necessary that marijuana be possessed. The language charging Guilfoyle sufficiently alleges the statutory elements under *K.S.A. 1990 Supp. 65-4127b(b)*.

#### 7. Sufficiency of the evidence.

Guilfoyle claims the State presented insufficient evidence to convict him of possession of marijuana, manufacture of marijuana, possession of drug paraphernalia, and possession of marijuana without payment of the drug tax. This issue is now moot as to [\*29] the drug tax conviction.

[HN30] When, as here, a defendant challenges the sufficiency of the evidence to support a conviction, the standard of review on appeal is "whether, after review of all the evidence, viewed in the light most favorable to the prosecution, the appellate court is convinced that a rational factfinder could have found the defendant guilty beyond a reasonable doubt." *State v. Graham, 247 Kan. 388, 398, 799 P.2d 1003 (1990)*.

[HN31] The State must prove for a conviction of possession of marijuana that Guilfoyle intentionally possessed marijuana. PIK Crim. 2d 67.16. A review of the evidence shows a rational factfinder could have found Guilfoyle guilty beyond a reasonable doubt of possession of marijuana, manufacture of marijuana, and possession of drug paraphernalia.

Police found marijuana in Guilfoyle's car. Moomau found a bong pipe in Guilfoyle's home, and there appeared to be residue on the pipe. Ronald E. Ewing, an investigator with the Jefferson County Sheriff's Department, testified that, upon entering the house, they found several sealed bags of a green leafy substance, which was believed to be marijuana. In an upstairs dresser, they found some [\*30] more small baggies of marijuana. Ewing got permission from Guilfoyle's neighbors to search their land. After about an hour and a half of criss-crossing through the timber, he found a cultivated marijuana field. There were 213 marijuana plants. About a third of the plants had been chopped off, meaning the buds of the plants had been taken to another location. He found a gardener's right hand glove in the field. Police also found a marijuana planter in the marijuana field. A duffel bag was found in Guilfoyle's barn. It contained hoses, a left hand gardener's glove, a pair of scissors and insect repellent. Ewing gathered four bags of marijuana from the field. A can of Spritzer Grape nonalcoholic drink was found in the field. There was a case of the same brand in Guilfoyle's basement. A water spigot was found 1,280 feet from the marijuana field; 1,756 feet (20 sections) of hose was found. Analysis of the gloves and scissors showed chemical presence of THC. A path led from the southeast corner of the property to the creek bottom to the marijuana field; a couple of paths ran between the two fields. No plants were found growing on Guilfoyle's property.

Ewing testified the growing lights, [\*31] pots, and bags of dirt were consistent with a marijuana growing operation that had been started earlier than normal in the growing season in an inside environment and then moved to an outside environment.

#### 8. Closing argument.

Guilfoyle argues the State committed error in closing argument to the jury when it made statements about him placing drugs in the hands of the jury's children. The State made the following remarks in closing: "The jury instruction doesn't say any place in that instruction that I got to wait until he harvests all of his field and he gets it all nice and neatly packaged and he puts it in your kid's hands before I charge him in manufacturing." In response to Guilfoyle's objection to the statement, the court said: "Well, we're about through. Let's wind up gentlemen."

Guilfoyle claims the statement focussed the jury on matters that were irrelevant, prejudicial, improper and was a comment on matters not in evidence. He relies on *State v. Bradford, 219 Kan. 336, 548 P.2d 812 (1976)*, in support of his claim.

In *Bradford*, the court stated: [HN32] "No rule governing oral argument is more fundamental than that requiring

counsel to confine [\*32] their remarks to matters *in evidence*. The stating of facts not in evidence is clearly improper." 219 Kan. at 340. If a statement is improper, the reviewing court must determine whether the argument was so prejudicial as to deny the defendant a fair trial and thus to require a new trial. 219 Kan. at 340.

These cases, however, do not control disposition of the present case because the State was not arguing facts not in evidence. He did not state Guilfoyle was selling to the jury's children. His comment is better characterized as an example of something not required by the law to have occurred before one can be convicted of manufacturing marijuana. Guilfoyle's claim is without merit.

Even if the statement were improper there is no reversible error. [HN33] "Misconduct of the county attorney in closing argument will not always require the granting of a new trial unless such misconduct has resulted in prejudice to the extent that the accused has been denied a fair trial." *State v. Nelson*, 223 Kan. 572, 575, 575 P.2d 547 (1978).

#### 9. Constitutionality of *K.S.A. 79-5201, et seq.*

Because the State may refile [\*33] charges against Guilfoyle for possession of marijuana without payment of tax, we will address this issue.

Guilfoyle claims the Kansas tax on marijuana and controlled substances, *K.S.A. 79-5201 et seq.*, is in reality a criminal penalty and as such is unconstitutional under the due process clause of the Fourteenth Amendment. He argues the tax operates as a criminal fine and is therefore a penalty under the law. The State responds Guilfoyle's argument is without merit because the statute has been found constitutional.

[HN34] "The constitutionality of a statute is presumed, all doubts must be resolved in favor of its validity, and before the statute may be stricken down, it must clearly appear the statute violates the constitution. Moreover, it is the court's duty to uphold the statute under attack, if possible, rather than defeat it, and if there is any reasonable way to construe the statute as constitutionally valid, that should be done. The burden of proof is on the party challenging a statute's constitutionality." *State v. Durrant*, 244 Kan. 522, Syl. para. 1, 769 P.2d 1174 (1989).

*K.S.A. 1990 Supp. 79-5204* [HN35] provides for the issuance of tax stamps, labels, [\*34] or other official indicia affixed to marijuana showing payment of the tax. Subsection (b) also states: "Any person may purchase any such stamp, label or other indicia without disclosing such person's identity."

*K.S.A. 79-5206* provides:

[HN36] "Neither the director of taxation nor a public employee may reveal facts contained in a report or return required by this act, nor can any information contained in such a report or return be used against the dealer in any criminal proceeding, unless independently obtained, except in connection with a proceeding involving taxes due under this act from the taxpayer making the return."

*K.S.A. 75-5133* provides in part:

"(a) [HN37] Except as otherwise more specifically provided by law, all information received by the director of taxation from applications for licensure or registration made or returns or reports filed under the provisions of any law imposing any excise tax administered by the director, or from any investigation conducted under such provisions, shall be confidential, and it shall be unlawful for any officer or employee of the department of revenue to divulge any such information except in accordance with other provisions of law respecting the enforcement [\*35] and collection of such tax, in accordance with other provisions of law respecting the enforcement and collection of such tax in accordance with proper judicial order and as provided in *K.S.A. 74-2424*, and amendments thereto."

In *State v. Matson*, 14 Kan. App. 2d 632, Syl. para. 4, 798 P.2d 488 (1990), rev. denied 248 Kan. (May 24, 1991) the court held that [HN38] drug tax act "does not violate due process provisions of the Fourteenth Amendment

and is constitutionally valid." In *Matson*, the defendant claimed that the tax on marijuana and controlled substances is in reality a criminal penalty and, as such, is an unconstitutional denial of due process under the *Fourteenth Amendment*. *14 Kan. App. 2d at 637*. The *Matson* court stated: "Because revenue collection is one of the objectives of the statute and because imposition of the tax does not expressly depend on the illegal nature of the sale or possession of marijuana, we hold that the statute is constitutionally valid under the United States Constitution." *14 Kan. App. 2d at 640*.

The Kansas Supreme Court was recently asked to overrule *Matson*, [\*36] which it declined to do. It also held [HN39] the Kansas Drug Tax Act does not violate the due process clause of the Fourteenth Amendment and is constitutionally valid. *State v. Berberich*, 248 Kan. 854, P.2d (1991).

Guilfoyle also claims the tax act violates the double jeopardy clause of the state and federal Constitutions. He claims that putting him on trial for possession or manufacture of marijuana and for failure to pay a tax that bears no rational relationship to the government's purported loss exposes him to multiple punishments for the same alleged criminal offenses.

[HN40] Under the doctrine of double jeopardy, the State may not split a single offense into separate parts. Where there is a single wrongful act, such act will not furnish the basis for more than one criminal prosecution. *State v. Mourning*, 233 Kan. 678, 679, 664 P.2d 857 (1983).

[HN41] "A test concerning whether a single transaction may constitute two separate and distinct offenses is whether the same evidence is required to sustain each charge, and if not, the fact that both charges relate to and grow out of one transaction does not make a single offense where two distinct [\*37] offenses are defined by statute." *Lawton v. Hand*, 186 Kan. 385, 388, 350 P.2d 28 (1960).

[HN42] The crimes of possession of marijuana and possession of marijuana without payment of tax are two distinct offenses. A crime under *K.S.A. 1990 Supp. 79-5204(a)* requires proof that the defendant is a dealer and that more than 28 grams of marijuana is possessed in addition to possession with intent. Furthermore, possession of marijuana is not a lesser included offense of possession of marijuana without payment of tax. In *State v. Berberich*, 248 Kan. at 862, the court held: "A violation of *K.S.A. 79-5208* for possession of a controlled substance without affixing the appropriate stamps showing payment of the tax is a separate and distinct offense from possession of marijuana or a controlled substance and one is not an included offense of the other." Thus, Gilfoyle's claim is without merit.

#### 10. Multiplicitous charges.

Guilfoyle argues the jury could have convicted him of manufacture of marijuana and possession of marijuana based on the same conduct. The State responds the offenses were committed separately and severally at different times and places. [\*38]

[HN43] The double jeopardy clause of the United States Constitution protects defendants in criminal proceedings from multiple punishments for the same offense. *United States v. Dinitz*, 424 U.S. 600, 606, 47 L. Ed. 2d 267, 96 S. Ct. 1075 (1976). The test of whether convictions for possession and manufacture of marijuana are multiplicitous depends upon whether each offense requires proof of an essential element which the other does not. *State v. Garnes*, 229 Kan. 368, Syl. para. 6, 624 P.2d 448 (1981).

[HN44] The general principles for determining whether charges are multiplicitous are described as follows:

"(1) A single offense may not be divided into separate parts; generally, a single wrongful act may not furnish the basis for more than one criminal prosecution.

....

"(2) If each offense charged requires proof of a fact not required in proving the other, the offenses do not merge.

....

"(3) Where offenses are committed separately and severally, at different times and at different places, they cannot be said to arise out of a single wrongful act." *State v. Garnes*, 229 Kan. at 373. [\*39]

There was evidence presented that these convictions were based on conduct occurring at different times and places. The marijuana found in Guilfoyle's car supports the conviction of possession of marijuana while the evidence of a manufacturing operation found at his home supports the conviction of manufacturing marijuana. Furthermore, the State was confined to the theory of proof at trial that the seizure of marijuana from the car forms the basis of the charge of possession of marijuana. Accordingly, the convictions are not multiplicitous.

The conviction for possession of marijuana without payment of tax is reversed; all other convictions are affirmed.

**STATE OF KANSAS, Appellee, v. THOMAS P. GUILFOYLE, Appellant**

**No. 65,131**

**Court of Appeals of Kansas**

***814 P.2d 456; 1991 Kan. App. LEXIS 520***

**July 12, 1991, Filed**

**NOTICE:** [\*1]

NOT DESIGNATED FOR PUBLICATION

**PRIOR HISTORY:**

Appeal from Jefferson District Court; Gary L. Nafziger, judge.

**DISPOSITION:**

Affirmed in part, reversed in part, and remanded.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant was convicted of manufacture of marijuana, possession of marijuana without payment of tax, possession of marijuana, possession of drug paraphernalia, and speeding in a 55 miles per hour zone, in violation of *Kan. Stat. Ann. §§ 65-4127b(b)(3), 79-5204(a), 65-4127b(a)(3), 65-4152, and 8-1336* (Supp. 1990), respectively. He appealed from the judgment of the Jefferson County District Court (Kansas).

**OVERVIEW:** Defendant was stopped for speeding and consented to a search of his car. Trash bags that were inside the car held marijuana seeds and stems and a bill showing defendant's home address. Inside the trunk was found a bag containing what appeared to be marijuana. Defendant was arrested and a warrant was obtained to search his home and barn, where marijuana growing paraphernalia and plants were found. The court established a rule for determining the sufficiency of informations, holding that the failure of an information to charge a crime could be raised for the first time on appeal, even if a defendant had not first filed a motion to arrest judgment. Applying that rule, the court held that defendant's conviction for possession of marijuana without payment of tax was void. The complaint failed to charge that defendant was a dealer, an essential element of that crime pursuant to *Kan. Stat. Ann. § 79-5201(c)* (Supp. 1990). The

complaint failed to charge possession of marijuana, an element of manufacture of marijuana under *Kan. Stat. Ann. § 65-4127b(b)*. However, defendant did not show that he was prejudiced, as the possession of marijuana was inherent in the manufacture of it.

**OUTCOME:** The court reversed the judgment that convicted defendant of possession of marijuana without payment of tax. The court affirmed the judgment with regard to all other convictions.

**CORE TERMS:** marijuana, manufacture, possession of marijuana, radar, bag, controlled substance, plastic, filled, drug paraphernalia, trunk, plant, barn, payment of tax, glove, leafy, search warrant, trash, convicted, possessed, dealer, manufacturing, containers, tending, sealed, sack, constitutionally valid, arrest of judgment, fair trial, authorize, introduce

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Probable Cause > General Overview***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN1] Before a search warrant may issue, a magistrate should consider the totality of the circumstances presented. He should make a practical common-sense decision whether there is a fair probability that a crime has been committed and the defendant committed the crime or that contraband or evidence of a crime will be found in a particular place. On appeal, the duty of the reviewing court is simply to ensure that the magistrate issuing a warrant had a substantial basis for concluding that probable cause existed.

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Particularity***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN2] Whether the description on a warrant of the property to be seized is sufficiently specific is a question of law. An appellate court's review of conclusions of law is unlimited.

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Particularity***

[HN3] A warrant must particularly describe the person, place, or means of conveyance to be searched and the things to be seized. General warrants that give executing officers a roving commission to search where they choose are forbidden.

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Execution of Warrant***

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Particularity***

[HN4] A warrant authorizing a search for and seizure of articles of personal property tending to establish identification is defective. The United State Supreme Court has upheld the validity of a search warrant, which stated: "together with other fruits, instrumentalities and evidence of crime at a time unknown." Such a warrant does not authorize the executing officers to conduct a search for evidence of other crimes but only to search for and seize evidence relevant to the crimes the defendant was suspected of committing. The scope of such a provision is narrowed by limiting words immediately preceding it.

#### ***Criminal Law & Procedure > Search & Seizure > Search Warrants > Scope***

[HN5] With the exception of handwriting samples, and other writings or recordings of evidentiary value for reasons other than their testimonial content, things subject to seizure shall not include personal diaries, letters, or other writings or recordings, made solely for private use or communication to an individual occupying a family, personal or other confidential relation, other than a relation in criminal enterprise, unless such things have served or are serving a

substantial purpose in furtherance of a criminal enterprise. The immunity from search does not extend to documents sought for reasons other than their testimonial content.

***Criminal Law & Procedure > Search & Seizure > Search Warrants > Execution of Warrant***

***Criminal Law & Procedure > Accusatory Instruments > General Overview***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN6] According to *Kan. Stat. Ann. § 22-2504*, all search warrants shall show the time and date of issuance and shall be the warrants of the magistrate issuing the same. Kansas Statutes also provide that no warrant shall be quashed or evidence suppressed because of technical irregularities not affecting the substantial rights of the accused. *Kan. Stat. Ann. § 22-2511*.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN7] Where a trial court has made findings of fact and conclusions of law, the function of an appellate court is to determine whether the findings are supported by substantial competent evidence and whether the findings are sufficient to support the trial court's conclusions of law. Substantial evidence is evidence which possesses both relevance and substance and which furnishes a substantial basis of fact from which the issues can reasonably be resolved. Stated in another way, substantial evidence is such legal and relevant evidence as a reasonable person might accept as being sufficient to support a conclusion.

***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review***

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Consent to Search > Sufficiency & Voluntariness***

***Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > Search & Seizure***

[HN8] A search warrant is not required where a search is made with consent or a waiver voluntarily, intelligently, and knowingly given. The existence and voluntariness of a consent to search and seizure is a question of fact to be decided in light of attendant circumstances by the trier of fact and will not be overturned on appeal unless clearly erroneous. The consent must be knowingly and voluntarily given without threats or coercion.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Consent to Search > Sufficiency & Voluntariness***

***Criminal Law & Procedure > Witnesses > Credibility***

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN9] The State must prove the voluntariness of a consent to search by a preponderance of the evidence. Whether the State has met its burden depends upon the credibility of the witnesses. A trial court's observations of the demeanor of law enforcement officers and a defendant during testimony is essential to deciding if the State met its burden. An appellate court cannot decide a question of fact that is based upon conflicting testimony which requires an assessment of the demeanor and credibility of the witnesses.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Consent to Search***

[HN10] Consent to look around a house does not authorize a search into containers. Consent to search a trunk of a car does not authorize police to search the passenger compartment.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

***Evidence > Scientific Evidence > General Overview***

[HN11] Evidence of accuracy of a radar unit is generally a prerequisite to the admissibility of evidence of speed

obtained by the use of a radar device. The accuracy of a particular radar unit can be established by showing that the officer tested the device in accordance with accepted procedures. Tuning forks and internal calibration devices are acceptable means of proving radar accuracy.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor  
Evidence > Scientific Evidence > General Overview***

[HN12] It is generally required that proof be offered that a radar operator is qualified to operate a radar.

***Criminal Law & Procedure > Accusatory Instruments > Complaints  
Criminal Law & Procedure > Accusatory Instruments > Indictments  
Criminal Law & Procedure > Accusatory Instruments > Informations***

[HN13] A conviction based on a complaint or information which does not sufficiently charge the offense for which the accused is convicted is void. If the facts alleged in a complaint or information do not constitute an offense in the terms and meaning of the statute upon which it is based, a complaint or information is fatally defective. A district court lacks jurisdiction over a defendant where an information is fatally defective. An information that charges an offense in the language of the statute is sufficient; however, the exact statutory words need not be used if the meaning is clear.

***Constitutional Law > Bill of Rights > Fundamental Rights > General Overview  
Criminal Law & Procedure > Accusatory Instruments > Informations  
Criminal Law & Procedure > Accusatory Instruments > Superseding Indictments***

[HN14] The Supreme Court of Kansas has recently adopted a new rule for appellate review of issues of defective informations raised for the first time on appeal. Prospectively, for all informations filed after the date of that opinion, the Court has adopted the following rule: Information defect challenges raised for the first time on appeal shall be reviewed by applying (1) the reasoning of *Kan. Stat. Ann. § 22-3201(4)* complaint/information/indictment amendment cases, as their reasoning relates to jurisdiction and the substantial rights of the defendant; (2) the common-sense test established by the Court; and (3) the rationale of the United States Court of Appeals for the Ninth Circuit. Of paramount importance, an appellate court shall look to whether the claimed defect in the information has: (a) prejudiced the defendant in the preparation of his or her defense; (b) impaired in any way defendant's ability to plead the conviction in any subsequent prosecution; or (c) limited in any way defendant's substantial rights to a fair trial under the guarantees of the Sixth Amendment to the United States Constitution and the Kan. Const. Bill of Rights § 10. If a defendant is able to establish a claim under either (a), (b), or (c), the defective information claim, raised for the first time on appeal, will be allowed. All prior cases decided contrary to this rule are overruled.

***Civil Procedure > Appeals > Reviewability > General Overview  
Criminal Law & Procedure > Accusatory Instruments > Informations  
Criminal Law & Procedure > Appeals > Reviewability > General Overview***

[HN15] When an information filed in a trial court is claimed for the first time on appeal to be defective, the sufficiency of the information should be determined on the basis of practical rather than technical considerations. Common sense is a better guide than arbitrary and artificial rules.

***Criminal Law & Procedure > Accusatory Instruments > Informations  
Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN16] When an information filed in a trial court is claimed for the first time on appeal to be defective, the information is sufficient, even if an essential averment is faulty in form, if by a fair construction the essential averment may be found within the text. All parts of the pleading must be looked to in determining its sufficiency.

***Criminal Law & Procedure > Accusatory Instruments > Informations***

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN17] When an information filed in a trial court is claimed for the first time on appeal to be defective, defects in the institution of the prosecution or in the information, other than lack of jurisdiction or the failure to charge a crime, are waived if not raised by motion prior to trial.

***Criminal Law & Procedure > Preliminary Proceedings > Entry of Pleas > Types > Nolo Contendere***

***Criminal Law & Procedure > Guilty Pleas > No Contest Pleas***

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN18] When an information filed in a trial court is claimed for the first time on appeal to be defective, *Kan. Stat. Ann. § 22-3208(3)* (Supp. 1989) states that lack of jurisdiction or the failure of the information to charge a crime shall be noticed by the court at any time during the pendency of the proceedings.

***Civil Procedure > Jurisdiction > General Overview***

***Criminal Law & Procedure > Postconviction Proceedings > Arrest of Judgment***

***Governments > Legislation > Statutory Remedies & Rights***

[HN19] When an information filed in a trial court is claimed for the first time on appeal to be defective, after a verdict or finding of guilty or after a plea of guilty or nolo contendere, the proper procedure for a defendant who contends either that the information does not charge a crime or that the court was without jurisdiction of the crime charged is to utilize the statutory remedy extended by the legislature for these two specific situations - a *Kan. Stat. Ann. § 22-3502* motion for arrest of judgment.

***Criminal Law & Procedure > Accusatory Instruments > Informations***

***Criminal Law & Procedure > Postconviction Proceedings > Arrest of Judgment***

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN20] When an information filed in a trial court is claimed for the first time on appeal to be defective, if a defendant fails to challenge the sufficiency of the information or the jurisdiction of the trial court by motion for arrest of judgment pursuant to *Kan. Stat. Ann. § 22-3502*, the issue may be raised in the appellate court for the first time, subject to the rules announced by the Supreme Court of Kansas.

***Criminal Law & Procedure > Accusatory Instruments > Informations***

***Criminal Law & Procedure > Postconviction Proceedings > Arrest of Judgment***

***Criminal Law & Procedure > Appeals > Reviewability > Time Limitations***

[HN21] When an information filed in a trial court is claimed for the first time on appeal to be defective, the orderly resolution of criminal law issues requires the timely raising of claims relating to the validity of an information. Tardily challenged informations are to be construed liberally in favor of validity. The validity of an information is to be tested by reading the information as a whole. The information is sufficient, first, if it alleges the elements of the offense charged and fairly informs the defendant of the charge and, second, if a judgment thereon will safeguard the accused from a subsequent prosecution for the same offense. The elements of the offense may be gleaned from the information as a whole. An information not challenged before verdict or finding of guilty or pursuant to *Kan. Stat. Ann. § 22-3502* by a motion for arrest of judgment will be upheld unless it is so defective that it does not, by any reasonable construction, charge an offense for which the defendant is convicted.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

[HN22] The offense of possession of marijuana without payment of tax is defined in *Kan. Stat. Ann. § 79-5204* (Supp. 1990), which provides: No dealer may possess any marijuana, domestic marijuana plant or controlled substance upon which a tax is imposed pursuant to *Kan. Stat. Ann. § 79-5202*, and amendments thereto, unless the tax has been paid as

evidenced by an official stamp or other indicia.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

[HN23] A dealer is defined in *Kan. Stat. Ann. § 79-5201(c)* (Supp. 1990) as: any person who, in violation of Kansas law, manufactures, produces, ships, transports or imports into Kansas or in any manner acquires or possesses more than 28 grams of marijuana, or more than 1 gram of any controlled substance, or 10 or more dosage units of any controlled substance with is not sold by weight.

***Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Manufacture > Elements***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

[HN24] *Kan. Stat. Ann. § 65-4152* is entitled "possession of drug paraphernalia." Section 65-4152(2) provides: No person shall use or possess with intent to use any drug paraphernalia to plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test, analyze, pack, repack, store, contain, conceal, inject, ingest, inhale or otherwise introduce into the human body a controlled substance in violation of the Uniform Controlled Substances Act.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Drug Paraphernalia > Elements***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Criminal Law & Procedure > Jury Instructions > Particular Instructions > General Overview***

[HN25] *Kan. Pattern Instructions Crim. No. 67.17* (2d ed.) requires the State to prove (1) that a defendant used or possessed with the intent to use any drug paraphernalia and (2) that the defendant did so intentionally.

***Criminal Law & Procedure > Scienter > Knowledge***

***Criminal Law & Procedure > Scienter > Specific Intent***

***Criminal Law & Procedure > Scienter > Willfulness***

[HN26] Willful conduct is conduct that is purposeful and intentional. The terms "knowing" and "intentional" are included within the term "willful." *Kan. Stat. Ann. § 21-3201(2)*.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Manufacture > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > Intent to Distribute > Elements***

[HN27] *Kan. Stat. Ann. § 65-4127b(b)(3)* (Supp. 1990) provides: Except as authorized by the Uniform Controlled Substances Act, it shall be unlawful for any person to sell, offer for sale or have in such person's possession with the intent to sell, manufacture, prescribe, administer, deliver, distribute, dispense or compound any hallucinogenic drug designated in *Kan. Stat. Ann. § 65-4105(d)*, and amendments thereto or designated in *Kan. Stat. Ann. 65-4107(g)* and amendments thereto.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Manufacture > Elements***

[HN28] The term manufacture in *Kan. Stat. Ann. § 65-4127b(b)(3)* (Supp. 1990) does not include the preparation or compounding of a controlled substance by an individual for the individual's own use. *Kan. Stat. Ann. § 65-4101(n)* (Supp. 1990).

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Manufacture > General Overview***

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

[HN29] *Kan. Stat. Ann. § 65-4127b(b)* (Supp. 1990) prohibits (1) the sale or manufacture, or (2) to offer for sale, or (3) possession with intent to manufacture. Thus, the State is required to prove possession with intent to manufacture.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN30] When a defendant challenges the sufficiency of the evidence to support a conviction, the standard of review on appeal is whether, after review of all the evidence, viewed in the light most favorable to the prosecution, the appellate court is convinced that a rational factfinder could have found the defendant guilty beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > Simple Possession > Elements***

***Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution***

***Criminal Law & Procedure > Jury Instructions > Particular Instructions > General Overview***

[HN31] The State must prove for a conviction of possession of marijuana that a defendant intentionally possessed marijuana. *Kan. Pattern Instructions Crim. No. 67.16* (2d ed.).

***Criminal Law & Procedure > Trials > Closing Arguments > Evidence Not Admitted***

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN32] No rule governing oral argument is more fundamental than that requiring counsel to confine their remarks to matters in evidence. The stating of facts not in evidence is clearly improper. If a statement is improper, the reviewing court must determine whether the argument was so prejudicial as to deny the defendant a fair trial and thus to require a new trial.

***Criminal Law & Procedure > Trials > Closing Arguments > Evidence Not Admitted***

***Criminal Law & Procedure > Trials > Closing Arguments > Inflammatory Statements***

***Criminal Law & Procedure > Appeals > Prosecutorial Misconduct > Prohibitions Against Improper Statements***

[HN33] Misconduct of a county attorney in closing argument will not always require the granting of a new trial unless such misconduct has resulted in prejudice to the extent that the accused has been denied a fair trial.

***Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation > General Overview***

***Criminal Law & Procedure > Trials > Burdens of Proof > General Overview***

[HN34] The constitutionality of a statute is presumed, all doubts must be resolved in favor of its validity, and before the statute may be stricken down, it must clearly appear the statute violates the United States Constitution. Moreover, it is the court's duty to uphold the statute under attack, if possible, rather than defeat it, and if there is any reasonable way to construe the statute as constitutionally valid, that should be done. The burden of proof is on the party challenging a statute's constitutionality.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Delivery, Distribution & Sale > General Overview***

***Tax Law > State & Local Taxes > Franchise Tax > General Overview******Tax Law > State & Local Taxes > Sales Tax > General Overview***

[HN35] *Kan. Stat. Ann. § 79-5204* (Supp. 1990) provides for the issuance of tax stamps, labels, or other official indicia affixed to marijuana showing payment of the tax. Section 79-5204(b) also states: Any person may purchase any such stamp, label or other indicia without disclosing such person's identity.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview******Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor******Tax Law > State & Local Taxes > Administration & Proceedings > General Overview***

[HN36] Neither the director of taxation nor a public employee may reveal facts contained in a report or return required by the Kansas Drug Tax Act, nor can any information contained in such a report or return be used against the dealer in any criminal proceeding, unless independently obtained, except in connection with a proceeding involving taxes due under the Act from the taxpayer making the return.

***Civil Procedure > Judgments > Relief From Judgment > Motions to Alter & Amend******Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview******Tax Law > State & Local Taxes > Administration & Proceedings > Collection***

[HN37] *Kan. Stat. Ann. § 75-5133* provides: Except as otherwise more specifically provided by law, all information received by the director of taxation from applications for licensure or registration made or returns or reports filed under the provisions of any law imposing any excise tax administered by the director, or from any investigation conducted under such provisions, shall be confidential, and it shall be unlawful for any officer or employee of the department of revenue to divulge any such information except in accordance with other provisions of law respecting the enforcement and collection of such tax, in accordance with other provisions of law respecting the enforcement and collection of such tax in accordance with proper judicial order and as provided in *Kan. Stat. Ann. § 74-2424*, and amendments thereto.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > General Overview******Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview******Tax Law > State & Local Taxes > Sales Tax > Imposition of Tax***

[HN38] The Kansas Drug Tax Act does not violate due process provisions of the Fourteenth Amendment and is constitutionally valid. Because revenue collection is one of the objectives of the Act and because imposition of the tax does not expressly depend on the illegal nature of the sale or possession of marijuana, the Act is constitutionally valid under the United States Constitution.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > General Overview******Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview******Tax Law > State & Local Taxes > Franchise Tax > General Overview***

[HN39] The Kansas Drug Tax Act does not violate the Due Process Clause of the Fourteenth Amendment and is constitutionally valid.

***Criminal Law & Procedure > Double Jeopardy > Attachment Jeopardy***

[HN40] Under the doctrine of double jeopardy, the State may not split a single offense into separate parts. Where there is a single wrongful act, such act will not furnish the basis for more than one criminal prosecution.

***Criminal Law & Procedure > Double Jeopardy > Attachment Jeopardy***

[HN41] A test concerning whether a single transaction may constitute two separate and distinct offenses is whether the same evidence is required to sustain each charge, and if not, the fact that both charges relate to and grow out of one

transaction does not make a single offense where two distinct offenses are defined by statute.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Criminal Law & Procedure > Double Jeopardy > Attachment Jeopardy***

***Tax Law > State & Local Taxes > Franchise Tax > General Overview***

[HN42] The crimes of possession of marijuana and possession of marijuana without payment of tax are two distinct offenses. A crime under *Kan. Stat. Ann. § 79-5204(a)* (Supp. 1990) requires proof that the defendant is a dealer and that more than 28 grams of marijuana is possessed in addition to possession with intent. Furthermore, possession of marijuana is not a lesser included offense of possession of marijuana without payment of tax. A violation of *Kan. Stat. Ann. § 79-5208* for possession of a controlled substance without affixing the appropriate stamps showing payment of the tax is a separate and distinct offense from possession of marijuana or a controlled substance and one is not an included offense of the other.

***Criminal Law & Procedure > Criminal Offenses > Controlled Substances > Possession > General Overview***

***Criminal Law & Procedure > Double Jeopardy > Double Jeopardy Protection > Multiple Punishments***

***Criminal Law & Procedure > Double Jeopardy > Double Jeopardy Protection > Tests***

[HN43] The Double Jeopardy Clause of the United States Constitution protects defendants in criminal proceedings from multiple punishments for the same offense. The test of whether convictions for possession and manufacture of marijuana are multiplicitous depends upon whether each offense requires proof of an essential element which the other does not.

***Criminal Law & Procedure > Accusatory Instruments > Merger of Offenses***

***Criminal Law & Procedure > Double Jeopardy > Attachment Jeopardy***

[HN44] The general principles for determining whether charges are multiplicitous are described as follows: (1) A single offense may not be divided into separate parts; generally, a single wrongful act may not furnish the basis for more than one criminal prosecution. (2) If each offense charged requires proof of a fact not required in proving the other, the offenses do not merge. (3) Where offenses are committed separately and severally, at different times and at different places, they cannot be said to arise out of a single wrongful act.

**COUNSEL:**

*Benjamin C. Wood*, of Overland Park, for appellant.

*Michael C. Hayes*, county attorney, and *Robert T. Stephan*, attorney general, for appellee.

**JUDGES:**

Brazil, P.J., Rulon, J., and David S. Knudson, District Judge, assigned.

**OPINION BY:**

PER CURIAM

**OPINION:**

MEMORANDUM OPINION

Thomas Guilfoyle appeals from his conviction of manufacture of marijuana, *K.S.A. 1990 Supp. 65-4127b(b)(3)*, possession of marijuana without payment of tax, *K.S.A. 1990 Supp. 79-5204(a)*, possession of marijuana, *K.S.A. 1990*

*Supp. 65-4127b(a)(3)*, possession of drug paraphernalia, *K.S.A. 65-4152*, and speeding in a 55 m.p.h. zone, *K.S.A. 1990 Supp. 8-1336*.

Highway Patrol Trooper Kyle Moomau stopped Guilfoyle for driving 67 miles per hour in a 55 miles per hour zone based on a radar reading. While asking for Guilfoyle's driver's license and proof of insurance, Moomau detected a strong odor of marijuana coming from the car. Moomau returned to his patrol car to check Guilfoyle's license and for warrants. Moomau's records' check indicated that the car Guilfoyle was driving was owned by Thomas [\*2] P. Guilfoyle, Route 1, Box 247, Perry, Kansas. Moomau then told Guilfoyle he could smell the odor of marijuana coming from Guilfoyle's car, but Guilfoyle denied having any marijuana.

When Moomau returned to Guilfoyle's car, he noticed two plastic trash bags on the back seat. Moomau asked Guilfoyle if he could search the car, and Guilfoyle verbally consented. Moomau removed the plastic bags and found marijuana seeds and stems and smelled a strong odor of marijuana. Deputy Rex Taylor opened the trunk and found a white bag, called a cry-o-vac, which is an air sealed bag. It contained what appeared to be marijuana. Moomau arrested Guilfoyle at that time.

While Guilfoyle was in custody, a warrant was issued to search Guilfoyle's home and barn. In the house, police found marijuana in several sealed "foosaver bags," some packaging equipment, a High Times Magazine, and an O'Haus scale. In the barn they found 1,756 feet of hose, grow lights, a backpack with scissors and a glove in it, some screens, and various gardening equipment. The glove and scissors tested positive for Tetrahydrocannabinol (THC). One hundred and twenty-three marijuana plants were seized from a neighbor's property. In [\*3] the neighbor's field, police also found a glove appearing to be the mate of the glove found in Guilfoyle's barn. Guilfoyle raises numerous issues on appeal.

#### 1. The search warrant.

Guilfoyle argues there was no probable cause to search his home or barn. The State responds that, based on the totality of the circumstances, the judge issuing the search warrant had a substantial basis for concluding that probable cause existed to search his residence and barn.

[HN1] Before a search warrant may issue, a magistrate should consider the totality of the circumstances presented. He should make a practical common-sense decision whether there is a fair probability that a crime has been committed and the defendant committed the crime or that contraband or evidence of a crime will be found in a particular place. *State v. Doile*, 244 Kan. 493, 769 P.2d 666 (1989). "On appeal, the duty of the reviewing court is simply to ensure that the magistrate issuing a warrant had a substantial basis for concluding that probable cause existed." 244 Kan. 493, Syl. para. 5.

Guilfoyle cites *Doile* in support of his argument there was no probable cause. In [\*4] *Doile*, an officer had viewed a marijuana cigarette in Doile's car after he had been stopped for DUI and arrested. Police found a baggie of marijuana, a mirror, and a straw with a white powdery residue in Doile's car. Five years earlier he had sold cocaine. 244 Kan. at 501. The court held that this evidence did not rise to the level of probable cause to believe Doile had contraband in his house and the cocaine seized from his house should have been suppressed. 244 Kan. at 503.

In the present case, the affidavit to search Guilfoyle's house and barn stated the following facts:

"1) Trooper Moomau first searched one of the plastic garbage sacks [from] the back seat and found contained within the plastic sack the smell of marijuana, green leafy substance, green seeds, green plant stems and a United Telephone Bill to Telephone Number (913) 597-5297, an 'Onsat' magazine with mailing label to Tom Guilfoyle, R 1, Box 247, Perry, Kansas 66073, potato peels and other kitchen type trash.

"m) The second trash bag contained eleven plastic trash bags, three paper grocery bags that were empty except for green leafy residue.

"n) Trooper [\*5] Moomau [then] did a search of the trunk area and found a plastic trash bag containing four vacuum sealed plastic bags which contained approximately one pound of green leafy substance with the weight of each bag clearly marked on the outside.

"o) That said affiant conducted a field tests on the green leafy substance from both trash sacks found in the back seat which showed a positive test for the presumption of THC.

"p) Said affiant verified that the phone number on the telephone bills found in said trash was the same given by Guilfoyle on his booking card and given out by phone company information when asking for a Perry, Kansas listing for Tom or Thomas Guilfoyle."

On these facts, it could reasonably be inferred that: (1) the items in the first plastic sack were obviously garbage and/or trash; (2) all of the sack's contents came from the same location; (3) that location was a dwelling or at least a place where food had been prepared; (4) the magazine was addressed to and the phone number belonged to the same location; (5) the address on the magazine and phone bill was the same as Guilfoyle's address obtained in Moomau's records check; (6) the phone number on the bill was the same [\*6] as given by Guilfoyle during booking; and (7) the remnants or traces of marijuana, green leafy substance, green seeds, plant stems found in the trash bag are consistent with a marijuana manufacturing and packaging operation, which would explain the source of four one pound sealed plastic bags of green leafy substance found in the trunk. Unlike *Doile*, considering the totality of the circumstances and this court's scope of review, the magistrate had a substantial basis for concluding that probable cause existed to search Guilfoyle's home and barn.

## 2. Was the warrant overbroad?

Guilfoyle argues the warrant was overbroad and constituted an unlawful general warrant.

[HN2] Whether the description on the warrant of the property to be seized is sufficiently specific is a question of law. "This court's review of conclusions of law is unlimited." *Hutchinson Nat'l Bank & Tr. Co. v. Brown*, 12 Kan. App. 2d 673, 674, 753 P.2d 1299, rev. denied 243 Kan. 778 (1988).

The warrant authorized a search of dwellings, outbuildings, and vehicles for the following: marijuana in all forms; paraphernalia commonly associated with the storage of marijuana, including [\*7] but not limited to scales, sifters, containers, and plastic bags; guns; items shot with guns, articles of personal property tending to establish the identity of persons in control of the house, vehicles, storage areas, or containers; utility company receipts, rent receipts, addressed envelopes, correspondence, and keys; trace evidence such as hair, fibers, fingerprints, notebooks, phone lists, receipt books, and accounts receivable books; and U.S. currency.

[HN3] A warrant must particularly describe the person, place, or means of conveyance to be searched and the things to be seized. *State v. Morgan*, 222 Kan. 149, 151, 563 P.2d 1056 (1977). General warrants that give executing officers a roving commission to search where they choose are forbidden. *State v. Gordon*, 221 Kan. 253, 258, 559 P.2d 312 (1977).

Guilfoyle claims that specifically the phrase "property tending to establish the identity of persons in control" of the premises too closely resembles the wording of a forbidden "general warrant" and invites a strong intrusion into personal effects and private papers. Guilfoyle cites several other jurisdictions in support of [\*8] his argument.

In *State v. Kealoha*, 62 Hawaii 166, 174, 613 P.2d 645 (1980), the Supreme Court of Hawaii held that [HN4] a warrant authorizing a search for and seizure of "articles of personal property tending to establish . . . identification" is defective. In so holding, the court distinguished the case from *Andresen v. Maryland*, 427 U.S. 463, 49 L. Ed. 2d 627, 96 S. Ct. 2737 (1976). In *Andresen*, the court upheld the validity of a search warrant, which stated: "together with other fruits, instrumentalities and evidence of crime at this [time] unknown." 427 U.S. at 479. The Court reasoned that the warrants did not authorize the executing officers to conduct a search for evidence of other crimes but only to search for and seize evidence relevant to the crimes the defendant was suspected of committing. 427 U.S. at 481-82. The scope

had also been narrowed by limiting words immediately preceding it.

The warrant in *Kealoha* was also distinguished from that in *United States v. Honore*, 450 F.2d 31 (9th Cir. 1971), [\*9] *cert. denied* 404 U.S. 1048 (1972). In *Honore*, the court found a warrant valid where it authorized seizure of "articles [of] personal property tending to establish the [identity] of the persons in control of the premises . . . including but not limited to utility company receipts, rent receipts, cancelled mail envelopes, and keys." 450 F.2d at 33.

According to the American Law Institute, Model Code of Pre-Arrest Procedure, § 210.3:

[HN5] "With the exception of handwriting samples, and other writings or recordings of evidentiary value for reasons other than their testimonial content, things subject to seizure . . . shall not include personal diaries, letters, or other writings or recordings, made solely for private use or communication to an individual occupying a family, personal or other confidential relation, other than a relation in criminal enterprise, unless such things have served or are serving a substantial purpose in furtherance of a criminal enterprise."

Comments to that section state the immunity from search "does not extend to documents sought for reasons other than their testimonial content."

In the instant case, the warrant, [\*10] when examined in its entirety, is not overly broad. The items listed in paragraph two of the warrant, at first blush, might appear to extend beyond the relevance of the crimes involved. But, like *Andresen*, the scope of the search is limited by the first line of paragraph number two, which states: "The following particularly described items are *contraband, evidence, fruits, or instrumentalities of said crime or crimes.*" (Emphasis added.) The "said crime or crimes" are those set out in paragraph number one, namely crimes related to possession, sale and manufacture of marijuana and possession of drug paraphernalia. Obviously, personal diaries, letters, and other items of a personal nature having no relation to the described crimes would be beyond the scope of the warrant.

The warrant to search for "property tending to establish the identify of persons in control" of the premises when considered in the context of the entire warrant and attached copy of a quitclaim deed showing Thomas Guilfoyle as grantee would reasonably be for the purpose of corroborating the other evidence of Guilfoyle's involvement and possibly the involvement of others. The warrant was not overbroad.

### 3. [\*11] Other defects in the warrant.

Guilfoyle claims the warrant was invalid because the date and time on the warrant were filled in by Trooper Moomau after he obtained the magistrate's signature. The State responds that the omission of the date and time was a technical irregularity not affecting the validity of the warrant.

Moomau testified to the following regarding the search warrant:

"Q. And what time did you write October 3rd on there?"

"A. I wrote it all in one, as far as I can tell I wrote it all in one, I don't know what I'm trying to say, at one time. I received it and wrote it.

"Q. Okay, in otherwords, it is your testimony at the same time you filled out your handwriting on the return portion indicating that you received the warrant on the third, and returned on the 4th that you also filled in the 3rd up on top here on the date of issuance, at the top of the warrant. At the same time you filled out the bottom, and that would have been the 4th?"

"A. I believe I filled it out this portion at the top at the date, I believe I filled it out at the same I started filling out date of issue, October 3, 1989 at 10:55 and then I filled this in after we completed it, I filled this in when I [\*12] returned.

"Q. Okay. Did you fill in--the portion you have just testified to, I received this warrant October, etc., you filled in that portion after presentation to the magistrate for signing?"

"A. Yes."

The trial court stated it found the warrant had been issued on the 3rd, executed on the 3rd, and returned on the 4th. It determined the warrant met the warrant requirements and there was no uncertainty as to the date of issuance, execution, and return.

[HN6] According to *K.S.A. 22-2504*, "All search warrants shall show the time and date of issuance and shall be the warrants of the magistrate issuing the same." Kansas Statutes also provide that no warrant shall be quashed or evidence suppressed because of technical irregularities not affecting the substantial rights of the accused. *K.S.A. 22-2511*.

"Legislative intent is to be determined from a consideration of the entire act, and effect must be given, if possible, to the entire act and every part thereof." *Director of Property Valuation v. Golden Plains Express, Inc.*, 13 Kan. App. 2d 48, 49, 760 P.2d 1227 (1988). In the instant case, based on the trial court's finding that the warrant was in fact issued on [\*13] the 3rd and returned on the 4th, and absent any showing that Guilfoyle's substantial rights have been affected, any irregularities were technical in nature and would not justify quashing the warrant or suppressing evidence.

#### 4. Consent to search Guilfoyle's car.

Guilfoyle claims the State did not meet its burden of proving he consented to the search of his car.

"The scope of appellate review is clear. [HN7] Where the trial court has made findings of fact and conclusions of law, the function of [an appellate court] is to determine whether the findings are supported by substantial competent evidence and whether the findings are sufficient to support the trial court's conclusions of law. [Citations omitted.] Substantial evidence is evidence which possesses both relevance and substance and which furnishes a substantial basis of fact from which the issues can reasonably be resolved. [Citation omitted.] Stated in another way, 'substantial evidence' is such legal and relevant evidence as a reasonable person might accept as being sufficient to support a conclusion." *Williams Telecommunications Co. v. Gragg*, 242 Kan. 675, 676, 750 P.2d 398 (1988).

[HN8] A search warrant [\*14] is not required where a search is made with consent or a waiver voluntarily, intelligently, and knowingly given. *State v. Jakeway*, 221 Kan. 142, Syl. para. 4, 558 P.2d 113 (1976). "The existence and voluntariness of a consent to search and seizure is a question of fact to be decided in light of attendant circumstances by the trier of fact and will not be overturned on appeal unless clearly erroneous." *State v. Nicholson*, 225 Kan. 418, 423, 590 P.2d 1069 (1979). The consent must be knowingly and voluntarily given without threats or coercion. *State v. Niblock*, 230 Kan. 156, 162, 631 P.2d 661 (1981).

[HN9] The State must prove the voluntariness by a preponderance of the evidence. *State v. Buckner*, 223 Kan. 138, 143, 574 P.2d 918 (1977). Whether the State met its burden depends upon the credibility of the witnesses. The trial court's observations of the demeanor of the officers and the defendant during testimony is essential to deciding if the State met its burden. "The appellate court cannot decide a question of fact that is based upon conflicting testimony which [\*15] requires an assessment of the demeanor and credibility of the witnesses." *State v. Ruden*, 245 Kan. 95, 106, 774 P.2d 972 (1989).

At the motion to suppress, Moomau testified: "I asked him if I could search his vehicle and he verbally consented." Moomau did not tell Guilfoyle he was not required to let him search the car nor did he have Guilfoyle sign a written waiver form. Moomau testified that he recalls asking Guilfoyle if he could search the car rather than look in his car. An affidavit for prosecution stated Guilfoyle gave verbal consent to "look in" the vehicle. Moomau believes the use of "look in" rather than "searched" in the affidavit was an error.

Deputy Taylor overheard Moomau explaining to Guilfoyle he thought he smelled marijuana and asked if he could

search the car. Taylor heard Guilfoyle respond, "sure." While Moomau searched the car, Taylor watched Guilfoyle by the trunk. Taylor noticed a button and asked Guilfoyle if it opened the trunk, and he said yes. Taylor pushed the button and opened the trunk.

On the basis of the testimony at the suppression hearing, the court's finding there was voluntary and knowing consent to search the car was [\*16] not erroneous. There is nothing in the record to suggest that Guilfoyle's consent was the result of fraud, coercion, or duress or that he lacked sufficient intelligence to appreciate the consequences of such consent.

Guilfoyle claims that Moomau asked to "look in" the car, causing a search of the trunk and containers to be improper. In support of his argument, he cites *People v. Thiret*, 685 P.2d 193 (Colo. 1984) [HN10] (consent to "look around" a house did not authorize search into containers), and *State v. Johnson*, 71 Wash. 2d 239, 427 P.2d 705 (1967) (consent to search a trunk of a car did not authorize police to search the passenger compartment).

In the instant case, however, there was sufficient evidence for the trial court to find Moomau requested to search Guilfoyle's car; thus his argument is without merit.

#### 5. Admissibility of radar results.

Guilfoyle claims the State failed to lay the requisite foundation for admission of the radar results, which was required for the State to meet its burden of proving it had lawfully stopped him for speeding.

[HN11] Evidence of accuracy of a radar unit is generally a prerequisite to the admissibility [\*17] of evidence of speed obtained by the use of a radar device. *State v. Primm*, 4 Kan. App. 2d 314, 315, 606 P.2d 112 (1980). "The accuracy of a particular radar unit can be established by showing that the officer tested the device in accordance with accepted procedures." 4 Kan. App. 2d at 315. Tuning forks and internal calibration devices are acceptable means of proving radar accuracy. 4 Kan. App. 2d at 316.

In the present case, Moomau testified he was certified by the Kansas Highway Patrol to operate moving radar and traffic radar and that he is trained to set the radar up and check it on and off to operate it. He also testified that, whenever starting his shift, he turns the radar on, makes sure it has the power supply, and pushes the test button to make sure it is displaying the correct numbers. The light button is pushed to make sure all the light modules for the numbers are working and then a tuning fork in front of the antenna is used to make sure it has the correct read out. Thus there is evidence to infer the radar was accurately operating at the time of Guilfoyle's stop.

[HN12] It is also generally [\*18] required that proof be offered that the radar operator is qualified to operate the radar. 4 Kan. App. 2d at 316. In light of Moomau's testimony regarding his training, there was sufficient evidence to establish his qualifications to operate the radar.

#### 6. Defective complaint.

Guilfoyle argues that counts two, three, and four of the amended complaint are fatally defective for failing to allege every essential element of the crimes charged.

[HN13] A conviction based on a complaint or information which does not sufficiently charge the offense for which the accused is convicted is void. *State v. Howell & Taylor*, 226 Kan. 511, 601 P.2d 1141 (1979). "If the facts alleged in a complaint or information do not constitute an offense in the terms and meaning of the statute upon which it is based, a complaint or information is fatally defective." 226 Kan. at 513. The district court lacks jurisdiction over a defendant where an information is fatally defective. 226 Kan. at 514. An information that charges an offense in the language of the statute is sufficient; however, the exact statutory [\*19] words need not be used if the meaning is clear. *State v. Garcia*, 243 Kan. 662, 667, 763 P.2d 585 (1988).

[HN14] Our Supreme Court has recently adopted a new rule for appellate review of issues of defective informations raised for the first time on appeal. In *State v. Hall*, 246 Kan. 728, Syl. para. 12, 793 P.2d 737 (1990), the court held:

"Prospectively, for all informations filed after the date of this opinion, we adopt the following rule: Information defect challenges raised for the first time on appeal shall be reviewed by applying (1) the reasoning of *K.S.A. 22-3201(4)* complaint/information/indictment amendment cases as expressed in *State v. Switzer*, 244 Kan. 449, 769 P.2d 645 (1989), *State v. Nunn*, 244 Kan. 207, 768 P.2d 268 (1988), and *State v. Rasch*, 243 Kan. 495, 497, 758 P.2d 214 (1988), as that reasoning relates to jurisdiction and the substantial rights of the defendant; (2) the 'common-sense' test of *State v. Wade*, 244 Kan. 136, 766 P.2d 811 (1989), and *State v. Micheaux*, 242 Kan. 192, 747 P.2d 784 (1987); [\*20] and (3) the rationale of *United States v. Pheaster*, 544 F.2d 353 (9th Cir. 1976), cert. denied 429 U.S. 1099 (1977). Of paramount importance, we shall look to whether the claimed defect in the information has: (a) prejudiced the defendant in the preparation of his or her defense; (b) impaired in any way defendant's ability to plead the conviction in any subsequent prosecution; or (c) limited in any way defendant's substantial rights to a fair trial under the guarantees of the Sixth Amendment to the United States Constitution and the Kansas Constitution Bill of Rights, § 10. If a defendant is able to establish a claim under either (a), (b), or (c), the defective information claim, raised for the first time on appeal, will be allowed. All prior cases decided contrary to this rule are overruled."

The court went on to say:

[HN15] "When an information filed in the trial court after the date of this opinion is claimed for the first time on appeal to be defective:

"(a) The sufficiency of the information should be determined on the basis of practical rather than technical considerations. Common sense is a better guide than arbitrary and artificial rules. [\*21]

"(b) [HN16] The information is sufficient, even if an essential averment is faulty in form, if by a fair construction the essential averment may be found within the text. All parts of the pleading must be looked to in determining its sufficiency.

"(c) [HN17] Defects in the institution of the prosecution or in the information, other than lack of jurisdiction or the failure to charge a crime, are waived if not raised by motion prior to trial.

"(d) *K.S.A. 1989 Supp. 22-3208(3)* states that [HN18] lack of jurisdiction or the failure of the information to charge a crime shall be noticed by the court at any time during the pendency of the proceedings.

"(e) [HN19] After the verdict or finding of guilty or after a plea of guilty or nolo contendere, the proper procedure for a defendant who contends either that the information does not charge a crime or that the court was without jurisdiction of the crime charged is to utilize the statutory remedy extended by the legislature for these two specific situations--a *K.S.A. 22-3502* motion for arrest of judgment.

"(f) *K.S.A. 22-3503* authorizes the trial court to arrest judgment without motion whenever the trial court becomes aware of the existence of grounds which would require [\*22] that a motion for arrest of judgment be sustained, if filed.

"(g) [HN20] If a defendant fails to challenge the sufficiency of the information or the jurisdiction of the trial court by motion for arrest of judgment pursuant to *K.S.A. 22-3502*, the issue may be raised in the appellate court for the first time, subject to the rule announced in Syl. para. 12 and corresponding parts of this opinion.

"(h) [HN21] The orderly resolution of criminal law issues requires the timely raising of claims relating to the validity of an information. Tardily challenged informations are to be construed liberally in favor of validity. The validity of an information is to be tested by reading the information as a whole. The information is sufficient, first, if it alleges the elements of the offense charged and fairly informs the defendant of the charge and, second, if a judgment

thereon will safeguard the accused from a subsequent prosecution for the same offense. The elements of the offense may be gleaned from the information as a whole. An information not challenged before verdict or finding of guilty or pursuant to *K.S.A. 22-3502* by a motion for arrest of judgment will be upheld unless it is so defective that it does [\*23] not, by any reasonable construction, charge an offense for which the defendant is convicted." *246 Kan. 728*, Syl. para. 13.

In *State v. Waterberry*, *248 Kan. 169*, Syl. para. 2, *804 P.2d 1000 (1991)*, the court modified the prospective application of the rule in *Hall* to apply to cases pending in Kansas courts as of May 31, 1990. The notice of appeal in the instant case was filed March 30, 1990. The rule in *Hall* applies in the present case.

Count IV reads as follows:

"That on or about the 3rd day of October, 1989, the said THOMAS F. GUILFOYLE . . . did then and there . . . unlawfully, willfully and feloniously possess marijuana upon which a tax is imposed pursuant to *K.S.A. 1987 Supp. 79-5202* and had no evidence of an official stamp or other indicia, in violation of *K.S.A. 79-5204(a)*; *K.S.A. 79-5208*; Unclassified Felony."

[HN22] The offense of possession of marijuana without payment of tax is defined in *K.S.A. 1990 Supp. 79-5204*, which provides: "No dealer may possess any marijuana, domestic marijuana plant or controlled substance upon which a tax is imposed pursuant to *K.S.A. 79-5202*, and amendments thereto, unless the tax has [\*24] been paid as evidenced by an official stamp or other indicia."

Guilfoyle points out that the complaint did not allege Guilfoyle to be a dealer. [HN23] A dealer is defined in *K.S.A. 1990 Supp. 79-5201(c)* as

"any person who, in violation of Kansas law, manufactures, produces, ships, transports or imports into Kansas or in any manner acquires or possesses more than 28 grams of marijuana, or more than one gram of any controlled substance, or 10 or more dosage units of any controlled substance with is not sold by weight."

An essential element that must be proved by the State is that Guilfoyle possessed more than 28 grams of marijuana. *K.S.A. 1990 Supp. 79-5204*. Accordingly, the complaint does not sufficiently charge the offense for which Guilfoyle was convicted. Guilfoyle's conviction for possession of marijuana without payment of tax is void. *State v. Howell & Taylor*, *226 Kan. 514*.

Count III charged Guilfoyle as follows:

"THOMAS P. GUILFOYLE . . . did . . . unlawfully and willfully possess drug paraphernalia, to wit: scales, sifters and containers, knowing or under circumstances where one reasonably should know that said objects were to be used to introduce [\*25] into the human body a controlled substance."

*K.S.A. 65-4152*, [HN24] possession of drug paraphernalia, provides:

"No person shall use or possess with intent to use:

. . . .

"(2) any drug paraphernalia to plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test, analyze, pack, repack, store, contain, conceal, inject, ingest, inhale or otherwise introduce into the human body a controlled substance in violation of the uniform controlled substances act."

Guilfoyle claims count three is defective for failing to allege the use, or possession with intent to use, paraphernalia in order to introduce controlled substance into the body. Guilfoyle points out that the State moved to amend this count

of the complaint after all the evidence was in and the instructions were being argued but apparently requested the same language that already appeared in the amended complaint it had filed before trial. Guilfoyle objected before trial to the amendment of count III but not on the grounds he now claims error.

PIK Crim. 2d 67.17 [HN25] requires the State to prove (1) that the defendant used or possessed with the intent to use any drug paraphernalia and (2) that the [\*26] defendant did so intentionally.

Applying a common sense test to the review of the complaint as required by *State v. Micheaux*, 242 Kan. 192, 199, 747 P.2d 784 (1987), the present complaint is not defective. [HN26] "Willful conduct is conduct that is purposeful and intentional . . . . The terms 'knowing,' 'intentional,' . . . are included within the term 'willful.'" *K.S.A. 21-3201(2)*. The complaint charges the possession was willful and "knowing or under circumstances where one reasonably should know that said objects were to be used to introduce" a controlled substance into the human body. This language sufficiently alleges intent.

Count II charges Guilfoyle as follows: "THOMAS P. GUILFOYLE . . . did . . . unlawfully, feloniously and willfully manufacture a certain quantity of Cannabis, commonly known as marijuana."

*K.S.A. 1990 Supp. 65-4127b(b)* provides:

[HN27] "Except as authorized by the uniform controlled substances act, it shall be unlawful for any person to sell, offer for sale or have in such person's possession with the intent to sell, manufacture, prescribe, administer, deliver, distribute, dispense or compound:

. . . .

"(3) any hallucinogenic drug designated [\*27] in subsection (d) of *K.S.A. 65-4105*, and amendments thereto or designated in subsection (g) of *K.S.A. 65-4107* and amendments thereto."

[HN28] The term manufacture "does not include the preparation or compounding of a controlled substance by an individual for the individual's own use." *K.S.A. 1990 Supp. 65-4101(n)*. Thus, Guilfoyle claims, the State must allege intent to sell or distribute; otherwise no offense has been committed. The State, he argues, also failed to allege and prove possession with intent to manufacture.

*K.S.A. 1990 Supp. 65-4127b(b)* [HN29] prohibits (1) the sale or manufacture, or (2) to offer for sale, or (3) possession with intent to manufacture. Thus, the State in the instant case was required to prove possession with intent to manufacture. The complaint fails to charge possession of marijuana.

In motions regarding amending the complaint, the prosecution stated: "Count II, changed the manufacture from possession with intent to sell, all under the same statute, no statute change, no penalty section change." The complaint was amended January 23, 1990.

Guilfoyle appears to have objected to the amendment of count II. He stated:

"Thus far we have been looking at this case as possession [\*28] with intent to sell . . . I think it does charge a different theory to the offense, there may have been evidence of possession elicited at the preliminary. I don't, I'm not sure there was evidence of manufacture as opposed to possession."

In raising this issue, Guilfoyle has not shown how these alleged defects (a) prejudiced him in his defense, (b) impaired his ability to plead the conviction in any subsequent prosecution, or (c) limited his substantial rights to a fair trial.

Reviewing the complaint in a common sense manner as required in *Hall*, Guilfoyle was apprised of charges against

him. He was aware the State was charging him with manufacturing marijuana under *K.S.A. 1990 Supp. 65-4127b(b)*. Furthermore, in order to manufacture marijuana, it is necessary that marijuana be possessed. The language charging Guilfoyle sufficiently alleges the statutory elements under *K.S.A. 1990 Supp. 65-4127b(b)*.

#### 7. Sufficiency of the evidence.

Guilfoyle claims the State presented insufficient evidence to convict him of possession of marijuana, manufacture of marijuana, possession of drug paraphernalia, and possession of marijuana without payment of the drug tax. This issue is now moot as to [\*29] the drug tax conviction.

[HN30] When, as here, a defendant challenges the sufficiency of the evidence to support a conviction, the standard of review on appeal is "whether, after review of all the evidence, viewed in the light most favorable to the prosecution, the appellate court is convinced that a rational factfinder could have found the defendant guilty beyond a reasonable doubt." *State v. Graham*, 247 Kan. 388, 398, 799 P.2d 1003 (1990).

[HN31] The State must prove for a conviction of possession of marijuana that Guilfoyle intentionally possessed marijuana. PIK Crim. 2d 67.16. A review of the evidence shows a rational factfinder could have found Guilfoyle guilty beyond a reasonable doubt of possession of marijuana, manufacture of marijuana, and possession of drug paraphernalia.

Police found marijuana in Guilfoyle's car. Moomau found a bong pipe in Guilfoyle's home, and there appeared to be residue on the pipe. Ronald E. Ewing, an investigator with the Jefferson County Sheriff's Department, testified that, upon entering the house, they found several sealed bags of a green leafy substance, which was believed to be marijuana. In an upstairs dresser, they found some [\*30] more small baggies of marijuana. Ewing got permission from Guilfoyle's neighbors to search their land. After about an hour and a half of criss-crossing through the timber, he found a cultivated marijuana field. There were 213 marijuana plants. About a third of the plants had been chopped off, meaning the buds of the plants had been taken to another location. He found a gardener's right hand glove in the field. Police also found a marijuana planter in the marijuana field. A duffel bag was found in Guilfoyle's barn. It contained hoses, a left hand gardener's glove, a pair of scissors and insect repellent. Ewing gathered four bags of marijuana from the field. A can of Spritzer Grape nonalcoholic drink was found in the field. There was a case of the same brand in Guilfoyle's basement. A water spigot was found 1,280 feet from the marijuana field; 1,756 feet (20 sections) of hose was found. Analysis of the gloves and scissors showed chemical presence of THC. A path led from the southeast corner of the property to the creek bottom to the marijuana field; a couple of paths ran between the two fields. No plants were found growing on Guilfoyle's property.

Ewing testified the growing lights, [\*31] pots, and bags of dirt were consistent with a marijuana growing operation that had been started earlier than normal in the growing season in an inside environment and then moved to an outside environment.

#### 8. Closing argument.

Guilfoyle argues the State committed error in closing argument to the jury when it made statements about him placing drugs in the hands of the jury's children. The State made the following remarks in closing: "The jury instruction doesn't say any place in that instruction that I got to wait until he harvests all of his field and he gets it all nice and neatly packaged and he puts it in your kid's hands before I charge him in manufacturing." In response to Guilfoyle's objection to the statement, the court said: "Well, we're about through. Let's wind up gentlemen."

Guilfoyle claims the statement focussed the jury on matters that were irrelevant, prejudicial, improper and was a comment on matters not in evidence. He relies on *State v. Bradford*, 219 Kan. 336, 548 P.2d 812 (1976), in support of his claim.

In *Bradford*, the court stated: [HN32] "No rule governing oral argument is more fundamental than that requiring

counsel to confine [\*32] their remarks to matters *in evidence*. The stating of facts not in evidence is clearly improper." 219 Kan. at 340. If a statement is improper, the reviewing court must determine whether the argument was so prejudicial as to deny the defendant a fair trial and thus to require a new trial. 219 Kan. at 340.

These cases, however, do not control disposition of the present case because the State was not arguing facts not in evidence. He did not state Guilfoyle was selling to the jury's children. His comment is better characterized as an example of something not required by the law to have occurred before one can be convicted of manufacturing marijuana. Guilfoyle's claim is without merit.

Even if the statement were improper there is no reversible error. [HN33] "Misconduct of the county attorney in closing argument will not always require the granting of a new trial unless such misconduct has resulted in prejudice to the extent that the accused has been denied a fair trial." *State v. Nelson*, 223 Kan. 572, 575, 575 P.2d 547 (1978).

#### 9. Constitutionality of *K.S.A. 79-5201, et seq.*

Because the State may refile [\*33] charges against Guilfoyle for possession of marijuana without payment of tax, we will address this issue.

Guilfoyle claims the Kansas tax on marijuana and controlled substances, *K.S.A. 79-5201 et seq.*, is in reality a criminal penalty and as such is unconstitutional under the due process clause of the Fourteenth Amendment. He argues the tax operates as a criminal fine and is therefore a penalty under the law. The State responds Guilfoyle's argument is without merit because the statute has been found constitutional.

[HN34] "The constitutionality of a statute is presumed, all doubts must be resolved in favor of its validity, and before the statute may be stricken down, it must clearly appear the statute violates the constitution. Moreover, it is the court's duty to uphold the statute under attack, if possible, rather than defeat it, and if there is any reasonable way to construe the statute as constitutionally valid, that should be done. The burden of proof is on the party challenging a statute's constitutionality." *State v. Durrant*, 244 Kan. 522, Syl. para. 1, 769 P.2d 1174 (1989).

*K.S.A. 1990 Supp. 79-5204* [HN35] provides for the issuance of tax stamps, labels, [\*34] or other official indicia affixed to marijuana showing payment of the tax. Subsection (b) also states: "Any person may purchase any such stamp, label or other indicia without disclosing such person's identity."

*K.S.A. 79-5206* provides:

[HN36] "Neither the director of taxation nor a public employee may reveal facts contained in a report or return required by this act, nor can any information contained in such a report or return be used against the dealer in any criminal proceeding, unless independently obtained, except in connection with a proceeding involving taxes due under this act from the taxpayer making the return."

*K.S.A. 75-5133* provides in part:

"(a) [HN37] Except as otherwise more specifically provided by law, all information received by the director of taxation from applications for licensure or registration made or returns or reports filed under the provisions of any law imposing any excise tax administered by the director, or from any investigation conducted under such provisions, shall be confidential, and it shall be unlawful for any officer or employee of the department of revenue to divulge any such information except in accordance with other provisions of law respecting the enforcement [\*35] and collection of such tax, in accordance with other provisions of law respecting the enforcement and collection of such tax in accordance with proper judicial order and as provided in *K.S.A. 74-2424*, and amendments thereto."

In *State v. Matson*, 14 Kan. App. 2d 632, Syl. para. 4, 798 P.2d 488 (1990), rev. denied 248 Kan. (May 24, 1991) the court held that [HN38] drug tax act "does not violate due process provisions of the Fourteenth Amendment

and is constitutionally valid." In *Matson*, the defendant claimed that the tax on marijuana and controlled substances is in reality a criminal penalty and, as such, is an unconstitutional denial of due process under the *Fourteenth Amendment*. *14 Kan. App. 2d at 637*. The *Matson* court stated: "Because revenue collection is one of the objectives of the statute and because imposition of the tax does not expressly depend on the illegal nature of the sale or possession of marijuana, we hold that the statute is constitutionally valid under the United States Constitution." *14 Kan. App. 2d at 640*.

The Kansas Supreme Court was recently asked to overrule *Matson*, [\*36] which it declined to do. It also held [HN39] the Kansas Drug Tax Act does not violate the due process clause of the Fourteenth Amendment and is constitutionally valid. *State v. Berberich*, *248 Kan. 854*, *P.2d (1991)*.

Guilfoyle also claims the tax act violates the double jeopardy clause of the state and federal Constitutions. He claims that putting him on trial for possession or manufacture of marijuana and for failure to pay a tax that bears no rational relationship to the government's purported loss exposes him to multiple punishments for the same alleged criminal offenses.

[HN40] Under the doctrine of double jeopardy, the State may not split a single offense into separate parts. Where there is a single wrongful act, such act will not furnish the basis for more than one criminal prosecution. *State v. Mourning*, *233 Kan. 678, 679, 664 P.2d 857 (1983)*.

[HN41] "A test concerning whether a single transaction may constitute two separate and distinct offenses is whether the same evidence is required to sustain each charge, and if not, the fact that both charges relate to and grow out of one transaction does not make a single offense where two distinct [\*37] offenses are defined by statute." *Lawton v. Hand*, *186 Kan. 385, 388, 350 P.2d 28 (1960)*.

[HN42] The crimes of possession of marijuana and possession of marijuana without payment of tax are two distinct offenses. A crime under *K.S.A. 1990 Supp. 79-5204(a)* requires proof that the defendant is a dealer and that more than 28 grams of marijuana is possessed in addition to possession with intent. Furthermore, possession of marijuana is not a lesser included offense of possession of marijuana without payment of tax. In *State v. Berberich*, *248 Kan. at 862*, the court held: "A violation of *K.S.A. 79-5208* for possession of a controlled substance without affixing the appropriate stamps showing payment of the tax is a separate and distinct offense from possession of marijuana or a controlled substance and one is not an included offense of the other." Thus, Gilfoyle's claim is without merit.

#### 10. Multiplicitous charges.

Guilfoyle argues the jury could have convicted him of manufacture of marijuana and possession of marijuana based on the same conduct. The State responds the offenses were committed separately and severally at different times and places. [\*38]

[HN43] The double jeopardy clause of the United States Constitution protects defendants in criminal proceedings from multiple punishments for the same offense. *United States v. Dinitz*, *424 U.S. 600, 606, 47 L. Ed. 2d 267, 96 S. Ct. 1075 (1976)*. The test of whether convictions for possession and manufacture of marijuana are multiplicitous depends upon whether each offense requires proof of an essential element which the other does not. *State v. Garnes*, *229 Kan. 368, Syl. para. 6, 624 P.2d 448 (1981)*.

[HN44] The general principles for determining whether charges are multiplicitous are described as follows:

"(1) A single offense may not be divided into separate parts; generally, a single wrongful act may not furnish the basis for more than one criminal prosecution.

....

"(2) If each offense charged requires proof of a fact not required in proving the other, the offenses do not merge.

....

"(3) Where offenses are committed separately and severally, at different times and at different places, they cannot be said to arise out of a single wrongful act." *State v. Garnes*, 229 Kan. at 373. [\*39]

There was evidence presented that these convictions were based on conduct occurring at different times and places. The marijuana found in Guilfoyle's car supports the conviction of possession of marijuana while the evidence of a manufacturing operation found at his home supports the conviction of manufacturing marijuana. Furthermore, the State was confined to the theory of proof at trial that the seizure of marijuana from the car forms the basis of the charge of possession of marijuana. Accordingly, the convictions are not multiplicitous.

The conviction for possession of marijuana without payment of tax is reversed; all other convictions are affirmed.

**STATE OF MAINE v. JAMES L. HEBERT****Law Docket No. Law-81-59****Supreme Judicial Court of Maine***437 A.2d 185; 1981 Me. LEXIS 1011***September 23, 1981, Argued****November 24, 1981, Decided****DISPOSITION:** [\*\*1]

The entry is: Judgment affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged his conviction for speeding and operating under the influence of intoxicating liquor found by the Superior Court, York County (Maine), complaining that the trial court improperly admitted evidence concerning a speedometer calibration test and that the evidence was insufficient to support the verdict.

**OVERVIEW:** Defendant was arrested for criminal speeding and operating under the influence of intoxicating liquor by a state trooper who had pulled him over. Defendant's car had been traveling 85 mph in a 50 mph zone. After he was convicted as charged, defendant claimed that the trial court erred in admitting testimony concerning a calibration test of the troopers' car speedometer and in denying his motion to acquit for lack of evidence. The court noted that the disparity in the trooper's speedometer test was never more than two mph at any one reading. Next, the court noted that the arresting officer's testimony was hearsay where he testified as to what another trooper told him as to the radar unit read. However, while the evidence was hearsay under Me. R. Evid. 801, its admission was harmless error because this testimony was merely cumulative. The court next held that the evidence of the accuracy of the trooper's speedometer went to the weight to be assigned to the speed reading and was not a foundational requirement for admission of the speedometer reading into evidence. Because the evidence was sufficient to support the conviction, the judgment was affirmed.

**OUTCOME:** The judgment was affirmed on appeal.

**CORE TERMS:** speedometer, radar, mph, speed, trooper, calibration, speeding, hearsay, calibrated, accuracy, arrest, influence of intoxicating liquor, card, arresting, tuning, forks, miles

**OPINION BY:**

VIOLETTE

**OPINION:**

[\*185] The defendant brings this timely appeal from convictions for speeding, 29 M.R.S.A. § 1252, n1 and operating under the influence [\*186] of intoxicating liquor, 29 M.R.S.A. § 1312 (Supp. 1981), following a jury trial held in Superior Court, York County, on January 26-27, 1981. Defendant claims error in the trial court's admission into evidence of testimony concerning a calibration test of the officer's car speedometer, and in the denial of his motion to acquit for lack of evidence. We affirm the two convictions.

n1 The statute reads in pertinent part:

4. *Criminal offense.* [HN1] Any person who operates a motor vehicle at a speed which exceeds, by 30 miles an hour or more, speeds fixed pursuant to section 1251 or section 1255, or which exceeds, by 30 miles an hour or more, the maximum rates of speed fixed by subsection 2 shall be guilty of a misdemeanor.

29 M.R.S.A. § 1252 (1978).

[\*\*2]

Defendant was arrested for criminal speeding and operating under the influence of intoxicating liquor on January 25, 1980, by a state trooper who had pulled him over after following Hebert's car which was passing other vehicles rapidly and far to the left side of the road. The trooper clocked the car's speed at 85 mph in a 50 mph zone. The jury could have found the following facts to be true at the time of the arrest: defendant's eyes were red and glassy, and his speech was slow; he had difficulty locating his registration and driver's license; he nearly fell over when he bent to pick something up; he could not walk a straight line without stumbling; and he had consumed at least four beers that evening.

I

At trial, the arresting officer testified that prior to the arrest, on September 12, 1979, he had calibrated his car's speedometer. This test consisted of driving his car past a stationary police vehicle which recorded the car's speed on a

radar unit. The officer testified that when his car speedometer read 40, the radar unit read 40; when his speedometer indicated 50 mph, the radar unit read 48 mph, and so on up to a speedometer reading of 80 mph when the unit indicated 78 [\*\*3] mph. The disparity between the speedometer and radar unit was never more than 2 mph at any one reading.

Defendant argues that the arresting officer's testimony was hearsay, since the trooper testified to what another trooper told him the radar unit read, and should have been excluded from evidence. We agree that this testimony was clearly hearsay as defined in M.R.Evid. 801 and therefore was improperly admitted into evidence. We find, however, that the error was harmless because the trooper's testimony was merely cumulative: the state introduced into evidence, without objection by defendant, a card entitled "Radar Check" which was a written record of the calibration test of the arresting officer's car speedometer. The card, though hearsay, was admissible into evidence under the business records exception to the hearsay rule. M.R.Evid. 803(6); *see State v. Ing*, 53 Haw. 466, 497 P.2d 575 (1972); *People v. Foster*, 27 N.Y. 2d 47, 261 N.E. 2d 389, 313 N.Y.S.2d 384 (1970) (speedometer test record is a "classic example" of a routine business record).

## II.

As his second point on appeal, defendant asserts that the officer's testimony indicating that defendant's car exceeded a [\*\*4] speed of 85 mph should not have been admitted into evidence because the accuracy of the police vehicle's speedometer had not been established. The state presented evidence that prior to the arrest, the speedometer had been calibrated for accuracy against a radar unit as hereinbefore stated, and the radar itself had been calibrated internally and by using two different tuning forks, a standard procedure for calibrating radar units. Defendant maintains that the reliability of the internal calibration and the tuning forks must also be proven. We hold that evidence of the accuracy of the speedometer goes only to the weight to be assigned the speed reading and is not a foundational requirement for admission of the speedometer reading into evidence. Therefore, the presiding justice correctly overruled defendant's objection to the admission of this evidence.

## III.

Our resolution of the issues discussed above disposes of defendant's third contention [\*187] that without the speeding evidence both convictions must fall for lack of sufficient evidence.

**OPINION BY:**

VIOLETTE

**OPINION:**

[\*185] The defendant brings this timely appeal from convictions for speeding, 29 M.R.S.A. § 1252, n1 and operating under the influence [\*186] of intoxicating liquor, 29 M.R.S.A. § 1312 (Supp. 1981), following a jury trial held in Superior Court, York County, on January 26-27, 1981. Defendant claims error in the trial court's admission into evidence of testimony concerning a calibration test of the officer's car speedometer, and in the denial of his motion to acquit for lack of evidence. We affirm the two convictions.

n1 The statute reads in pertinent part:

4. *Criminal offense.* [HN1] Any person who operates a motor vehicle at a speed which exceeds, by 30 miles an hour or more, speeds fixed pursuant to section 1251 or section 1255, or which exceeds, by 30 miles an hour or more, the maximum rates of speed fixed by subsection 2 shall be guilty of a misdemeanor.

29 M.R.S.A. § 1252 (1978).

[\*\*2]

Defendant was arrested for criminal speeding and operating under the influence of intoxicating liquor on January 25, 1980, by a state trooper who had pulled him over after following Hebert's car which was passing other vehicles rapidly and far to the left side of the road. The trooper clocked the car's speed at 85 mph in a 50 mph zone. The jury could have found the following facts to be true at the time of the arrest: defendant's eyes were red and glassy, and his speech was slow; he had difficulty locating his registration and driver's license; he nearly fell over when he bent to pick something up; he could not walk a straight line without stumbling; and he had consumed at least four beers that evening.

I

At trial, the arresting officer testified that prior to the arrest, on September 12, 1979, he had calibrated his car's speedometer. This test consisted of driving his car past a stationary police vehicle which recorded the car's speed on a

radar unit. The officer testified that when his car speedometer read 40, the radar unit read 40; when his speedometer indicated 50 mph, the radar unit read 48 mph, and so on up to a speedometer reading of 80 mph when the unit indicated 78 [\*\*3] mph. The disparity between the speedometer and radar unit was never more than 2 mph at any one reading.

Defendant argues that the arresting officer's testimony was hearsay, since the trooper testified to what another trooper told him the radar unit read, and should have been excluded from evidence. We agree that this testimony was clearly hearsay as defined in M.R.Evid. 801 and therefore was improperly admitted into evidence. We find, however, that the error was harmless because the trooper's testimony was merely cumulative: the state introduced into evidence, without objection by defendant, a card entitled "Radar Check" which was a written record of the calibration test of the arresting officer's car speedometer. The card, though hearsay, was admissible into evidence under the business records exception to the hearsay rule. M.R.Evid. 803(6); *see State v. Ing*, 53 Haw. 466, 497 P.2d 575 (1972); *People v. Foster*, 27 N.Y. 2d 47, 261 N.E. 2d 389, 313 N.Y.S.2d 384 (1970) (speedometer test record is a "classic example" of a routine business record).

## II.

**Edward Hugh FITZWATER v. STATE of Maryland****No. 466, September Term, 1983****Court of Special Appeals of Maryland*****57 Md. App. 274; 469 A.2d 909; 1984 Md. App. LEXIS 256*****January 12, 1984****PRIOR HISTORY:** [\*\*\*1]

APPEAL FROM THE CIRCUIT COURT FOR GARRETT COUNTY FRED A. THAYER, JUDGE.

**DISPOSITION:**

JUDGMENTS AFFIRMED. COSTS TO BE PAID BY APPELLANT.

**CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant appealed from his conviction and sentence entered by the Circuit Court for Garrett County (Maryland) after a jury found him guilty of resisting arrest, failure to display a license, and speeding.**OVERVIEW:** Defendant was found guilty by a jury of resisting arrest, failure to display a license, and speeding. He appealed from the trial court's judgment of conviction and from the sentencing order for him to pay fines. The court found no error in the trial court requiring no proof of maintenance records for the radar used to show that defendant was speeding because state law provided for the speed of a motor vehicle to be measured by radar. *Md. Code Ann., Cts. & Jud. Proc. § 10-301* (1974, Cum. Supp. 1983). It was sufficient to show that the equipment was properly tested and checked, that it was used by a competent operator, that proper procedures were followed, and that proper records were kept. The court ruled that the trial court was not clearly erroneous in admitting the expert testimony of a witness who had a special knowledge of the radar gained from his experience as a police officer. Because there was no rule prohibiting a witness from refreshing his recollection prior to taking the oath and testifying, the trial court did not abuse its discretion in allowing the testimony of a witness who may have looked at a folder before taking the stand. The court found no error and affirmed.**OUTCOME:** The court affirmed the trial court judgments that entered defendant's conviction of resisting arrest, failure to display a license, and speeding and that sentenced him to pay fines for those offenses. Costs were to be paid by defendant.**CORE TERMS:** recollection, radar, calibration, machine, speed, memorandum, accuracy, refresh, past recollection recorded, trooper, miles, technician, present recollection revived, special knowledge, working order, internally,

calibrated, calibrate, speeding, readout, folder, opened, van, expert testimony, appreciable, resisting arrest, state trooper, tuning fork, cross-examine, authorship

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN1] Maryland has long recognized that the speed of a motor vehicle may be measured by radar. *Md. Code Ann., Cts. & Jud. Proc. § 10-301* (1974, Cum. Supp. 1983). Although the statute does not set forth any requirements for proving the accuracy of the radar, the courts set forth some guidelines. It is sufficient to show that the equipment has been properly tested and checked, that it is manned by a competent operator, that proper operative procedures are followed, and that proper records are kept. There has to be proof to indicate that the instrument relied upon was in good working order and accurate at the time the recording was made.

#### ***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review***

##### ***Evidence > Testimony > Experts > Admissibility***

##### ***Evidence > Testimony > Experts > Helpfulness***

[HN2] The test for admissibility of expert testimony is whether the jury can receive appreciable help from the particular witness on the subject. The determination of whether the expert testimony will be of appreciable help and therefore admissible is within the sound discretion of the trial court. The court's exercise of that discretion will not be disturbed on appeal unless clearly erroneous. A witness may be competent to express an expert opinion if he is reasonably familiar with the subject under investigation, regardless of whether special knowledge is based on professional training, observation, and/or actual experience. A police officer possessing a special knowledge gained from a background of experience, in the discretion of the trial court, may be permitted to express an expert opinion in the area of that special knowledge. Once the court admits the expert testimony, the weight to be accorded it is for the trier of fact.

#### ***Evidence > Hearsay > Exceptions > Recorded Recollection > Criminal Trials***

##### ***Evidence > Testimony > Lay Witnesses > Personal Knowledge***

##### ***Evidence > Testimony > Refreshing Recollection > General Overview***

[HN3] The law regarding present recollection refreshed distinguished present recollection revived from past recollection recorded. The standards for the admission of a memorandum into evidence as past recollection recorded and those for the use of a memorandum to revive present recollection differ. The former is an exception to the hearsay rule where the memorandum is actually admitted into evidence as substantive evidence. The foundation necessary to use a memorandum to revive present recollection differs from that for the use of past recollection recorded. Past recollection recorded is where a witness, who is either devoid of a present recollection or possessed of an imperfect present recollection, desires to use a past recollection. This he proposes to do by employing some record of his past recollection. In order to introduce past recollection recorded, the general rule is that it is necessary to adduce from the witness (a) that he at one time had personal knowledge of the facts, (b) that the writing was, when made, an accurate record of the event, and (c) that after seeing the writing, he has not sufficient present independent recollection of the facts to testify accurately in regard thereto.

#### ***Civil Procedure > Judicial Officers > Judges > Discretion***

##### ***Evidence > Hearsay > Exceptions > Recorded Recollection > Criminal Trials***

##### ***Evidence > Testimony > Refreshing Recollection > Memory Aids > Writings***

[HN4] Present recollection revived is the use by a witness of some writing or other object to refresh his recollection so that he may testify about past events from present recollection. Generally, the authorities agree that none of the limiting rules for past recollection recorded have any bearing on present recollection revived and that any writing whatever is

eligible for use. On the other hand, the authorities are in agreement that in certain circumstances the expedients for stimulating recollection may be so misused that the witness may put before the court that which purports to be, but is not in fact, his recollection and knowledge and that, therefore, any writing whatever, in the circumstances, may become improper. Although no hard and fast rule can be laid down for invariable application, the predominant view today seems to be that within the sound discretion of the trial judge any memorandum or other object may be used as a stimulus to present memory, without restriction by rule as to authorship, guarantee of correctness, or time of making.

*Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview  
Evidence > Testimony > Refreshing Recollection > General Overview*

[HN5] There is no rule prohibiting a witness from refreshing his recollection prior to taking the oath and testifying.

*Civil Procedure > Appeals > Reviewability > Preservation for Review  
Criminal Law & Procedure > Juries & Jurors > General Overview*

[HN6] Rule 751 of the Maryland Rules of Procedure states that the court shall designate a juror as foreman.

**COUNSEL:**

Scott McLarty, Athens, Georgia, for appellant.

Ann E. Singleton, Assistant Attorney General, with whom were Stephen H. Sachs, Attorney General of Maryland, James L. Sherbin, State's Attorney, for Garrett County and Daun R. Weiers, Assistant State's Attorney, for Garrett County on the brief, for appellee.

**JUDGES:**

Garrity, Getty and Bell, JJ.

**OPINION BY:**

BELL

**OPINION:**

[\*276] [\*\*910] Appellant, Edward Hugh Fitzwater (Fitzwater) was found guilty by a jury in the Circuit Court for Garrett County of resisting arrest, failure to display a license, and speeding. The court sentenced Fitzwater to pay fines of: \$ 500.00 for resisting arrest; \$ 10.00 for failure to display a license; \$ 40.00 for speeding and court costs. Fitzwater timely noted an appeal, raising four issues:

[\*277] 1. Did the court err in not requiring maintenance records to establish the internal calibration of the radar?

2. Did the court err in permitting a state trooper to testify as to the accuracy of the internal calibration procedure?

[\*\*911] 3. Did the [\*\*\*2] court err regarding the use of documents by the state trooper to refresh his recollection?

4. Did the court invade the province of the jury by appointing a jury foreperson?

Our answer is no to all four questions; and we affirm.

## FACTS

On June 3, 1982, Trooper John E. Foley (Foley) stopped Fitzwater for an alleged speeding violation. Foley had detected a speed of 66 m.p.h. with the Decatur radar device mounted in the patrol vehicle and had visually observed Fitzwater's car travelling in excess of 50 m.p.h. When Foley stopped Fitzwater and requested to see his driver's license and registration, Fitzwater refused to show him either. Fitzwater refused a second request and Foley arrested Fitzwater. Due to Fitzwater's persistent resistance, Foley forcibly removed Fitzwater from his vehicle.

Trooper Foley was a certified operator of the radar. He testified at trial how the radar operated and how it was calibrated. His testimony explained that: the device, which is mounted in the patrol vehicle, projects a beam that will pick up a moving object, an indicator shows the speed of the object-vehicle. It also has a digital readout indicating the simultaneous speed of the [\*\*\*3] police vehicle.

The machine is calibrated before use by a certified operator (Foley in this case) and it has two internal checks. One is a check to make sure all lights are functioning on the machine and the other is a tuning fork check which calibrates the speed. Two tuning forks are assigned to the machine and are tuned to set speeds of 45 m.p.h. and 90 m.p.h.

[\*278] Foley, who had successfully performed both of these tests, further testified that the machine is internally calibrated by a certified technician. When the State offered the maintenance records of the internal calibration into evidence, Fitzwater objected on grounds that the State violated discovery rules by failing to list the records as an exhibit. The court sustained the objection. Fitzwater also objected to Foley's testimony regarding the internal calibration procedures and the radar readout. The ground for objection was that no foundation had been laid because the maintenance records were not admitted and Foley was not a certified technician. The court overruled this objection, stating:

"I think by this point it has been established that the use of the tuning fork calibrates the instrument, [\*\*\*4] and if it doesn't give you 45 and it doesn't give you 90, it isn't working. When it does, it is working."

Foley compared his speed on the readout of the radar device to that on the speedometer of his vehicle and it was the same. He had no indication that the radar device was not working properly and explained there were no other checkout or starting up procedures recommended for that particular machine. He stated that he had followed all of the recommended procedures "faithfully".

On cross-examination, Foley testified that he did not know how the machine worked internally or exactly why tuning forks were used to test the machine. He stated that further internal calibration was done by a certified technician working for the Maryland State Police every six months. Fitzwater's renewed objection to admission of testimony concerning calibration and the radar readout was denied, since the court accepted the trooper's testimony that external readings would not be correct if the machine's internal calibration was off. His motion for judgment of acquittal at the end of the State's case in chief was denied.

Several witnesses testified for the defense. Charles E. Stemple, Jr., an [\*\*\*5] employee of Fitzwater, testified he used the beige van for delivery of furniture and it could barely do 55 [\*279] miles per hour. William Madigan, another employee of Fitzwater, also testified that the beige van would not go over 55 miles per hour, loaded or unloaded.

[\*\*912] Fitzwater testified that he was driving the van between 45 and 55 miles per hour that afternoon and that his speedometer registered 50 miles per hour. When he was stopped, Fitzwater asked the trooper what was the probable cause. Foley responded that Fitzwater was speeding at 66 miles per hour. Fitzwater stated he asked the trooper to read him his rights since it was a criminal violation but the officer put him under arrest, grabbed him, jerked him out of the van and handcuffed him without reading him his rights. Fitzwater denied that he was resisting arrest, but explained he was just protecting himself. Additionally, Fitzwater testified that Foley changed the reading on the citation to read 66

57 Md. App. 274, \*279; 469 A.2d 909, \*\*912;  
1984 Md. App. LEXIS 256, \*\*\*5

miles per hour so that he would receive a higher number of points.

Fitzwater's motion for judgment of acquittal at the end of the case was denied and the jury returned verdicts of guilty on all three counts. [\*\*\*6]

I. *Did the court err in not requiring maintenance records to prove the accuracy of internal calibration?*

Fitzwater contends that the court erred in not requiring maintenance records to establish the accuracy of the internal calibration of the radar. Fitzwater maintains that by violating the discovery rules and thus not being able to produce the records at trial, the state failed to meet its burden to prove proper records were kept, as established by this Court in *Great Coastal Express, Inc. v. Schrufer*, 34 Md.App. 706, 369 A.2d 118 (1977).

[HN1] Maryland has long recognized that the speed of a motor vehicle may be measured by radar. Md.Code (1974, Cum.Supp.1983) *Courts and Judicial Proceedings Art.*, § 10-301. Although the statute does not set forth any requirements for proving the accuracy of the radar, the Court in *Great Coastal Express, Inc. supra*, relying on *United States v. Dreos*, 156 F.Supp. 200 (D.Md.1957) and *Villegas v. Brysor*, 494 P.2d 61, 16 Ariz.App. 456 (1972), set forth some guidelines stating at p. 715, 369 A.2d 118,

It is sufficient to show that the equipment has been properly tested and checked, that it was manned [\*\*\*7] by a competent operator, that proper operative procedures were followed, and that proper records were kept.

. . . . .

[There should be proof to indicate] the instrument relied upon was in good working order and accurate at the time the recording was made.

Applying the above principles to the case at bar, we agree with the trial court that the requirements set forth in *Great Coastal* have been met. As Judge Thayer stated:

As I read the requirements set forth [in *Great Coastal, supra.*] . . . it is sufficient to show that the equipment has been properly tested and checked, and I take it the calibration that the officer did at 4:00 when he came on duty would satisfy that. That it was manned by a competent operator, the officer has testified that he is such. That proper operative procedures were followed, I haven't heard any evidence of that at this time. And that proper records were kept, I don't know records of what, but it goes on to say that it must be shown that it was in good working order and accurate at the time the recording was made. *Now the State has a record. I've not permitted it into evidence, but the fact that there is a record, I think [\*\*\*8] is admissible. . . .* (Emphasis added).

At the time the court ruled on the objection, there was no testimony as to whether operative procedures were properly followed; however, by the end of the trial the evidence showed that Foley faithfully followed all the checkout and startup procedures. In light of the fact that Foley performed the two calibration tests, was a certified operator of that particular device and maintenance records did exist, we find this case to fall within the perimeters of *Great Coastal*. The court did not err.

[\*281] [\*\*\*913] II. *Did the court err in allowing a state trooper to testify as to the accuracy of the internal calibration of the radar?*

Fitzwater contends that since Foley was not a certified technician he was not competent to testify as to the accuracy

57 Md. App. 274, \*281; 469 A.2d 909, \*\*913;  
1984 Md. App. LEXIS 256, \*\*\*8

of the internal calibration. Fitzwater maintains that the court erred in admitting such testimony; and therefore, it had not been established that the equipment was built and operated on sound scientific principles and was in proper working order. The State, on the other hand, contends that since Foley was a qualified operator of the machine the court properly [\*\*\*9] permitted Foley's testimony as to calibration and speed detected by the radar.

[HN2] The Court of Appeals of Maryland has established the test for admissibility of expert testimony. That test is whether the jury can receive appreciable help from the particular witness on the subject. *Nizer v. Phelps*, 252 Md. 185, 249 A.2d 112 (1967). The determination of whether the expert testimony will be of appreciable help and therefore admissible is within the sound discretion of the trial court. *Nolan v. Dillon*, 261 Md. 516, 276 A.2d 36 (1971); *Terry v. State*, 34 Md.App. 99, 366 A.2d 65 (1976). The court's exercise of that discretion will not be disturbed on appeal unless clearly erroneous. *Spence v. Wiles*, 255 Md. 98, 257 A.2d 164 (1969); *Brown v. State*, 29 Md.App. 1, 349 A.2d 359 (1975). A witness may be competent to express an expert opinion if he is reasonably familiar with the subject under investigation, regardless of whether special knowledge is based on professional training, observation, and/or actual experience. *Casualty Ins. Co. v. Messenger*, 181 Md. 295, 298-99, 29 A.2d 653; *Redman v. Harold*, 279 Md. 167, 367 A.2d 472 (1977). A police officer possessing [\*\*\*10] a special knowledge gained from a background of experience, in the discretion of the trial court, may be permitted to express an expert opinion in the area of that special knowledge. *Butler v. State*, 19 Md.App. 601, 313 A.2d 554 (1974). Once the court admits the expert testimony, the weight to be accorded [\*282] it is for the trier of fact. *Duvall v. Potomac Electric*, 234 Md. 42, 47, 197 A.2d 893 (1963); *Bergeman v. State Roads Comm.*, 218 Md. 137, 142-43, 146 A.2d 48 (1958).

Applying the above principles, we find the court was not clearly erroneous and did not abuse its discretion in admitting Foley's testimony. Foley had a special knowledge of the radar gained from his experience as a police officer. In fact, he was certified on the particular radar device in his vehicle since 1978. He had specific knowledge as to the procedures used to calibrate the radar (tuning fork tests). Foley knew the instrument was internally calibrated every six months. This testimony certainly was of appreciable help to the jury. Moreover, Fitzwater had an opportunity to cross-examine Foley on his qualifications and on the actual procedures used to calibrate the radar internally. [\*\*\*11] The fact that Foley was not a certified technician was simply another factor to be considered by the jury in evaluating Foley's testimony.

Fitzwater's contention that the State did not establish that the radar was built and operated on sound scientific principles is without merit since the Legislature has specifically stated that the speed of a motor vehicle may be measured by radar. Md.Code (1974, Cum.Supp.1983) *Courts and Judicial Proceedings Art. § 10-301*. The evidence adduced at trial shows that this specific radar device was in proper working order. See Issue I, *supra*.

### III. Did the court err regarding the use of documents by Foley to refresh his recollection?

Fitzwater contends the court erred: (1) in allowing Foley to refresh his recollection by reviewing a document when the time of making, the authorship, and the accuracy of the writing had not been established; and (2) in not permitting Fitzwater's counsel to review the writing allegedly used to refresh Foley's recollection.

[\*\*914] [HN3] The law regarding present recollection refreshed was set forth by this Court in *Askins v. State*, 13 Md.App. 702, 284 [\*283] A.2d 626 (1971), which distinguished [\*\*\*12] present recollection revived from past recollection recorded. The Court stated at pp. 709-710, 284 A.2d 626:

The standards for the admission of a memorandum into evidence as past recollection recorded and those for the use of a memorandum to revive present recollection differ. The former is an exception to the hearsay rule where the memorandum is actually admitted into evidence as substantive evidence. Unfortunately, some courts have tended to lump the two together under the heading of 'refreshing recollection' and have applied the same standards to both. However, the foundation necessary to use a memorandum to revive present recollection differs from that for the use of past recollection recorded. Past recollection recorded is where 'a witness, who is either devoid of a present recollection or possessed

57 Md. App. 274, \*283; 469 A.2d 909, \*\*914;  
1984 Md. App. LEXIS 256, \*\*\*12

of an imperfect present recollection, desires to use a past recollection. This he proposes to do by employing some record of his past recollection.' The authorities are in general agreement, as to past recollection recorded, that to introduce the memorandum into evidence there must be a showing that the witness identifies the memorandum as made immediately after or contemporaneously [\*\*\*13] with the event and that the memorandum is a correct statement of those facts which the witness recorded. *Hall v. State*, 223 Md. 158, 176 [162 A.2d 751]. Stated succinctly, in order to introduce past recollection recorded, the general rule is that it is necessary to adduce from the witness '(a) that he at one time had personal knowledge of the facts, (b) that the writing was, when made, an accurate record of the event, and (c) that after seeing the writing, he has not sufficient present independent recollection of the facts to testify accurately in regard thereto.' *Kinsey v. Arizona*, 49 Ariz. 201, 65 P.2d 1141 at 1148, cited with approval in *Hall v. State*, *supra*, at 173 [162 A.2d 751].

[HN4] Present recollection revived, on the other hand, is the use by a witness of some writing or other object to refresh his recollection so that he may testify about past events [\*284] from present recollection. Generally, the authorities agree that none of the limiting rules for past recollection recorded have any bearing on present recollection revived and that any writing whatever is eligible for use. On the other hand, the authorities are in agreement that in certain circumstances [\*\*\*14] the expedients for stimulating recollection may be so misused that the witness may put before the court that which purports to be, but is not in fact, his recollection and knowledge and that, therefore, any writing whatever, in the circumstances, may become improper. Although no hard and fast rule can be laid down for invariable application, the *predominant view today seems to be that within the sound discretion of the trial judge any memorandum or other object may be used as a stimulus to present memory, without restriction by rule as to authorship, guarantee of correctness, or time of making.* *Kramer v. Commission of Internal Revenue*, 389 F.2d 236, 238 (1968) (Emphasis Added).

In the case at bar, Foley testified as to past events but from his present recollection. The State did not attempt to admit the document into evidence. Thus, the rules of present recollection revived, rather than past recollection recorded apply to the instant case. The pertinent testimony is as follows:

MR. McLARTY: Excuse me, your Honor, I'm -- I'm going to object to his using something to refresh his recollection unless I'm going to have an opportunity to review it and cross-examine him [\*\*\*15] on it. I notice he's reviewing -- he's reciting from his notes there.

THE COURT: You obviously will have an opportunity to cross-examine him.

[\*\*915] MR. McLARTY: I'd just like an opportunity to review those notes that he's using.

THE COURT: I don't see that he has opened his folder yet, Mr. McLarty.

MR. McLARTY: Okay, well I -- the State, I believe, will concede that he, in fact, had opened it and was reading from it. Is that not correct, Officer Foley?

[\*285] MR. WEIERS: It looked like he was leafing through it your Honor, a while ago.

THE COURT: All right.

By Mr. Weiers:

Q. Do you need the items in your hand to refresh your recollection, Trooper?

A. No. It would be helpful.

Q. If you do, let us know.

A. Okay.

A review of the pertinent testimony indicates that since the rules of present recollection revived apply, the court did not err. The court was not required to insure that the time of making, the authorship and the accuracy had been established. Furthermore, at most the evidence shows that Foley opened his folder prior to the time he was on the witness stand. [HN5] There is no rule prohibiting a witness from refreshing his recollection prior to [\*\*\*16] taking the oath and testifying. The court certainly did not abuse its discretion in determining that Foley had not opened his folder while on the witness stand.

Fitzwater's second allegation -- that his attorney was not permitted to see the contents of the folder -- is likewise without merit. Since the court determined that Foley was not using the document to refresh his recollection, there was no reason for Fitzwater's counsel to view it. Moreover, the request to see the document was not renewed after the court's determination.

*IV. Did the court invade the province of the jury by appointing a foreperson?*

Fitzwater contends the court deprived him of a fair trial by appointing a jury foreman. [HN6] Rule 751 of the Maryland Rules of Procedure states "the Court *shall* designate a juror as foreman". (Emphasis added). In addition, this issue was not preserved for appeal.

The court did not err.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN1] Maryland has long recognized that the speed of a motor vehicle may be measured by radar. *Md. Code Ann., Cts. & Jud. Proc. § 10-301* (1974, Cum. Supp. 1983). Although the statute does not set forth any requirements for proving the accuracy of the radar, the courts set forth some guidelines. It is sufficient to show that the equipment has been properly tested and checked, that it is manned by a competent operator, that proper operative procedures are followed, and that proper records are kept. There has to be proof to indicate that the instrument relied upon was in good working order and accurate at the time the recording was made.

#### ***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review***

##### ***Evidence > Testimony > Experts > Admissibility***

##### ***Evidence > Testimony > Experts > Helpfulness***

[HN2] The test for admissibility of expert testimony is whether the jury can receive appreciable help from the particular witness on the subject. The determination of whether the expert testimony will be of appreciable help and therefore admissible is within the sound discretion of the trial court. The court's exercise of that discretion will not be disturbed on appeal unless clearly erroneous. A witness may be competent to express an expert opinion if he is reasonably familiar with the subject under investigation, regardless of whether special knowledge is based on professional training, observation, and/or actual experience. A police officer possessing a special knowledge gained from a background of experience, in the discretion of the trial court, may be permitted to express an expert opinion in the area of that special knowledge. Once the court admits the expert testimony, the weight to be accorded it is for the trier of fact.

#### ***Evidence > Hearsay > Exceptions > Recorded Recollection > Criminal Trials***

##### ***Evidence > Testimony > Lay Witnesses > Personal Knowledge***

##### ***Evidence > Testimony > Refreshing Recollection > General Overview***

[HN3] The law regarding present recollection refreshed distinguished present recollection revived from past recollection recorded. The standards for the admission of a memorandum into evidence as past recollection recorded and those for the use of a memorandum to revive present recollection differ. The former is an exception to the hearsay rule where the memorandum is actually admitted into evidence as substantive evidence. The foundation necessary to use a memorandum to revive present recollection differs from that for the use of past recollection recorded. Past recollection recorded is where a witness, who is either devoid of a present recollection or possessed of an imperfect present recollection, desires to use a past recollection. This he proposes to do by employing some record of his past recollection. In order to introduce past recollection recorded, the general rule is that it is necessary to adduce from the witness (a) that he at one time had personal knowledge of the facts, (b) that the writing was, when made, an accurate record of the event, and (c) that after seeing the writing, he has not sufficient present independent recollection of the facts to testify accurately in regard thereto.

#### ***Civil Procedure > Judicial Officers > Judges > Discretion***

##### ***Evidence > Hearsay > Exceptions > Recorded Recollection > Criminal Trials***

##### ***Evidence > Testimony > Refreshing Recollection > Memory Aids > Writings***

[HN4] Present recollection revived is the use by a witness of some writing or other object to refresh his recollection so that he may testify about past events from present recollection. Generally, the authorities agree that none of the limiting rules for past recollection recorded have any bearing on present recollection revived and that any writing whatever is

eligible for use. On the other hand, the authorities are in agreement that in certain circumstances the expedients for stimulating recollection may be so misused that the witness may put before the court that which purports to be, but is not in fact, his recollection and knowledge and that, therefore, any writing whatever, in the circumstances, may become improper. Although no hard and fast rule can be laid down for invariable application, the predominant view today seems to be that within the sound discretion of the trial judge any memorandum or other object may be used as a stimulus to present memory, without restriction by rule as to authorship, guarantee of correctness, or time of making.

*Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview  
Evidence > Testimony > Refreshing Recollection > General Overview*

[HN5] There is no rule prohibiting a witness from refreshing his recollection prior to taking the oath and testifying.

*Civil Procedure > Appeals > Reviewability > Preservation for Review  
Criminal Law & Procedure > Juries & Jurors > General Overview*

[HN6] Rule 751 of the Maryland Rules of Procedure states that the court shall designate a juror as foreman.

**COUNSEL:**

Scott McLarty, Athens, Georgia, for appellant.

Ann E. Singleton, Assistant Attorney General, with whom were Stephen H. Sachs, Attorney General of Maryland, James L. Sherbin, State's Attorney, for Garrett County and Daun R. Weiers, Assistant State's Attorney, for Garrett County on the brief, for appellee.

**JUDGES:**

Garrity, Getty and Bell, JJ.

**OPINION BY:**

BELL

**OPINION:**

[\*276] [\*\*910] Appellant, Edward Hugh Fitzwater (Fitzwater) was found guilty by a jury in the Circuit Court for Garrett County of resisting arrest, failure to display a license, and speeding. The court sentenced Fitzwater to pay fines of: \$ 500.00 for resisting arrest; \$ 10.00 for failure to display a license; \$ 40.00 for speeding and court costs. Fitzwater timely noted an appeal, raising four issues:

[\*277] 1. Did the court err in not requiring maintenance records to establish the internal calibration of the radar?

2. Did the court err in permitting a state trooper to testify as to the accuracy of the internal calibration procedure?

[\*\*911] 3. Did the [\*\*\*2] court err regarding the use of documents by the state trooper to refresh his recollection?

4. Did the court invade the province of the jury by appointing a jury foreperson?

Our answer is no to all four questions; and we affirm.

## FACTS

On June 3, 1982, Trooper John E. Foley (Foley) stopped Fitzwater for an alleged speeding violation. Foley had detected a speed of 66 m.p.h. with the Decatur radar device mounted in the patrol vehicle and had visually observed Fitzwater's car travelling in excess of 50 m.p.h. When Foley stopped Fitzwater and requested to see his driver's license and registration, Fitzwater refused to show him either. Fitzwater refused a second request and Foley arrested Fitzwater. Due to Fitzwater's persistent resistance, Foley forcibly removed Fitzwater from his vehicle.

Trooper Foley was a certified operator of the radar. He testified at trial how the radar operated and how it was calibrated. His testimony explained that: the device, which is mounted in the patrol vehicle, projects a beam that will pick up a moving object, an indicator shows the speed of the object-vehicle. It also has a digital readout indicating the simultaneous speed of the [\*\*\*3] police vehicle.

The machine is calibrated before use by a certified operator (Foley in this case) and it has two internal checks. One is a check to make sure all lights are functioning on the machine and the other is a tuning fork check which calibrates the speed. Two tuning forks are assigned to the machine and are tuned to set speeds of 45 m.p.h. and 90 m.p.h.

[\*278] Foley, who had successfully performed both of these tests, further testified that the machine is internally calibrated by a certified technician. When the State offered the maintenance records of the internal calibration into evidence, Fitzwater objected on grounds that the State violated discovery rules by failing to list the records as an exhibit. The court sustained the objection. Fitzwater also objected to Foley's testimony regarding the internal calibration procedures and the radar readout. The ground for objection was that no foundation had been laid because the maintenance records were not admitted and Foley was not a certified technician. The court overruled this objection, stating:

"I think by this point it has been established that the use of the tuning fork calibrates the instrument, [\*\*\*4] and if it doesn't give you 45 and it doesn't give you 90, it isn't working. When it does, it is working."

Foley compared his speed on the readout of the radar device to that on the speedometer of his vehicle and it was the same. He had no indication that the radar device was not working properly and explained there were no other checkout or starting up procedures recommended for that particular machine. He stated that he had followed all of the recommended procedures "faithfully".

On cross-examination, Foley testified that he did not know how the machine worked internally or exactly why tuning forks were used to test the machine. He stated that further internal calibration was done by a certified technician working for the Maryland State Police every six months. Fitzwater's renewed objection to admission of testimony concerning calibration and the radar readout was denied, since the court accepted the trooper's testimony that external readings would not be correct if the machine's internal calibration was off. His motion for judgment of acquittal at the end of the State's case in chief was denied.

Several witnesses testified for the defense. Charles E. Stemple, Jr., an [\*\*\*5] employee of Fitzwater, testified he used the beige van for delivery of furniture and it could barely do 55 [\*279] miles per hour. William Madigan, another employee of Fitzwater, also testified that the beige van would not go over 55 miles per hour, loaded or unloaded.

[\*\*912] Fitzwater testified that he was driving the van between 45 and 55 miles per hour that afternoon and that his speedometer registered 50 miles per hour. When he was stopped, Fitzwater asked the trooper what was the probable cause. Foley responded that Fitzwater was speeding at 66 miles per hour. Fitzwater stated he asked the trooper to read him his rights since it was a criminal violation but the officer put him under arrest, grabbed him, jerked him out of the van and handcuffed him without reading him his rights. Fitzwater denied that he was resisting arrest, but explained he was just protecting himself. Additionally, Fitzwater testified that Foley changed the reading on the citation to read 66

57 Md. App. 274, \*279; 469 A.2d 909, \*\*912;  
1984 Md. App. LEXIS 256, \*\*\*5

miles per hour so that he would receive a higher number of points.

Fitzwater's motion for judgment of acquittal at the end of the case was denied and the jury returned verdicts of guilty on all three counts. [\*\*\*6]

I. *Did the court err in not requiring maintenance records to prove the accuracy of internal calibration?*

Fitzwater contends that the court erred in not requiring maintenance records to establish the accuracy of the internal calibration of the radar. Fitzwater maintains that by violating the discovery rules and thus not being able to produce the records at trial, the state failed to meet its burden to prove proper records were kept, as established by this Court in *Great Coastal Express, Inc. v. Schrufer*, 34 Md.App. 706, 369 A.2d 118 (1977).

[HN1] Maryland has long recognized that the speed of a motor vehicle may be measured by radar. Md.Code (1974, Cum.Supp.1983) *Courts and Judicial Proceedings Art.*, § 10-301. Although the statute does not set forth any requirements for proving the accuracy of the radar, the Court in *Great Coastal Express, Inc. supra*, relying on *United States v. Dreos*, 156 F.Supp. 200 (D.Md.1957) and *Villegas v. Brysor*, 494 P.2d 61, 16 Ariz.App. 456 (1972), set forth some guidelines stating at p. 715, 369 A.2d 118,

It is sufficient to show that the equipment has been properly tested and checked, that it was manned [\*\*\*7] by a competent operator, that proper operative procedures were followed, and that proper records were kept.

.....

[There should be proof to indicate] the instrument relied upon was in good working order and accurate at the time the recording was made.

Applying the above principles to the case at bar, we agree with the trial court that the requirements set forth in *Great Coastal* have been met. As Judge Thayer stated:

As I read the requirements set forth [in *Great Coastal, supra.*] . . . it is sufficient to show that the equipment has been properly tested and checked, and I take it the calibration that the officer did at 4:00 when he came on duty would satisfy that. That it was manned by a competent operator, the officer has testified that he is such. That proper operative procedures were followed, I haven't heard any evidence of that at this time. And that proper records were kept, I don't know records of what, but it goes on to say that it must be shown that it was in good working order and accurate at the time the recording was made. *Now the State has a record. I've not permitted it into evidence, but the fact that there is a record, I think [\*\*\*8] is admissible. . . .* (Emphasis added).

At the time the court ruled on the objection, there was no testimony as to whether operative procedures were properly followed; however, by the end of the trial the evidence showed that Foley faithfully followed all the checkout and startup procedures. In light of the fact that Foley performed the two calibration tests, was a certified operator of that particular device and maintenance records did exist, we find this case to fall within the perimeters of *Great Coastal*. The court did not err.

[\*281] [\*\*\*913] II. *Did the court err in allowing a state trooper to testify as to the accuracy of the internal calibration of the radar?*

Fitzwater contends that since Foley was not a certified technician he was not competent to testify as to the accuracy

57 Md. App. 274, \*281; 469 A.2d 909, \*\*913;  
1984 Md. App. LEXIS 256, \*\*\*8

of the internal calibration. Fitzwater maintains that the court erred in admitting such testimony; and therefore, it had not been established that the equipment was built and operated on sound scientific principles and was in proper working order. The State, on the other hand, contends that since Foley was a qualified operator of the machine the court properly [\*\*\*9] permitted Foley's testimony as to calibration and speed detected by the radar.

[HN2] The Court of Appeals of Maryland has established the test for admissibility of expert testimony. That test is whether the jury can receive appreciable help from the particular witness on the subject. *Nizer v. Phelps*, 252 Md. 185, 249 A.2d 112 (1967). The determination of whether the expert testimony will be of appreciable help and therefore admissible is within the sound discretion of the trial court. *Nolan v. Dillon*, 261 Md. 516, 276 A.2d 36 (1971); *Terry v. State*, 34 Md.App. 99, 366 A.2d 65 (1976). The court's exercise of that discretion will not be disturbed on appeal unless clearly erroneous. *Spence v. Wiles*, 255 Md. 98, 257 A.2d 164 (1969); *Brown v. State*, 29 Md.App. 1, 349 A.2d 359 (1975). A witness may be competent to express an expert opinion if he is reasonably familiar with the subject under investigation, regardless of whether special knowledge is based on professional training, observation, and/or actual experience. *Casualty Ins. Co. v. Messenger*, 181 Md. 295, 298-99, 29 A.2d 653; *Redman v. Harold*, 279 Md. 167, 367 A.2d 472 (1977). A police officer possessing [\*\*\*10] a special knowledge gained from a background of experience, in the discretion of the trial court, may be permitted to express an expert opinion in the area of that special knowledge. *Butler v. State*, 19 Md.App. 601, 313 A.2d 554 (1974). Once the court admits the expert testimony, the weight to be accorded [\*282] it is for the trier of fact. *Duvall v. Potomac Electric*, 234 Md. 42, 47, 197 A.2d 893 (1963); *Bergeman v. State Roads Comm.*, 218 Md. 137, 142-43, 146 A.2d 48 (1958).

Applying the above principles, we find the court was not clearly erroneous and did not abuse its discretion in admitting Foley's testimony. Foley had a special knowledge of the radar gained from his experience as a police officer. In fact, he was certified on the particular radar device in his vehicle since 1978. He had specific knowledge as to the procedures used to calibrate the radar (tuning fork tests). Foley knew the instrument was internally calibrated every six months. This testimony certainly was of appreciable help to the jury. Moreover, Fitzwater had an opportunity to cross-examine Foley on his qualifications and on the actual procedures used to calibrate the radar internally. [\*\*\*11] The fact that Foley was not a certified technician was simply another factor to be considered by the jury in evaluating Foley's testimony.

Fitzwater's contention that the State did not establish that the radar was built and operated on sound scientific principles is without merit since the Legislature has specifically stated that the speed of a motor vehicle may be measured by radar. Md.Code (1974, Cum.Supp.1983) *Courts and Judicial Proceedings Art. § 10-301*. The evidence adduced at trial shows that this specific radar device was in proper working order. See Issue I, *supra*.

### III. Did the court err regarding the use of documents by Foley to refresh his recollection?

Fitzwater contends the court erred: (1) in allowing Foley to refresh his recollection by reviewing a document when the time of making, the authorship, and the accuracy of the writing had not been established; and (2) in not permitting Fitzwater's counsel to review the writing allegedly used to refresh Foley's recollection.

[\*\*914] [HN3] The law regarding present recollection refreshed was set forth by this Court in *Askins v. State*, 13 Md.App. 702, 284 [\*283] A.2d 626 (1971), which distinguished [\*\*\*12] present recollection revived from past recollection recorded. The Court stated at pp. 709-710, 284 A.2d 626:

The standards for the admission of a memorandum into evidence as past recollection recorded and those for the use of a memorandum to revive present recollection differ. The former is an exception to the hearsay rule where the memorandum is actually admitted into evidence as substantive evidence. Unfortunately, some courts have tended to lump the two together under the heading of 'refreshing recollection' and have applied the same standards to both. However, the foundation necessary to use a memorandum to revive present recollection differs from that for the use of past recollection recorded. Past recollection recorded is where 'a witness, who is either devoid of a present recollection or possessed

57 Md. App. 274, \*283; 469 A.2d 909, \*\*914;  
1984 Md. App. LEXIS 256, \*\*\*12

of an imperfect present recollection, desires to use a past recollection. This he proposes to do by employing some record of his past recollection.' The authorities are in general agreement, as to past recollection recorded, that to introduce the memorandum into evidence there must be a showing that the witness identifies the memorandum as made immediately after or contemporaneously [\*\*\*13] with the event and that the memorandum is a correct statement of those facts which the witness recorded. *Hall v. State*, 223 Md. 158, 176 [162 A.2d 751]. Stated succinctly, in order to introduce past recollection recorded, the general rule is that it is necessary to adduce from the witness '(a) that he at one time had personal knowledge of the facts, (b) that the writing was, when made, an accurate record of the event, and (c) that after seeing the writing, he has not sufficient present independent recollection of the facts to testify accurately in regard thereto.' *Kinsey v. Arizona*, 49 Ariz. 201, 65 P.2d 1141 at 1148, cited with approval in *Hall v. State*, *supra*, at 173 [162 A.2d 751].

[HN4] Present recollection revived, on the other hand, is the use by a witness of some writing or other object to refresh his recollection so that he may testify about past events [\*284] from present recollection. Generally, the authorities agree that none of the limiting rules for past recollection recorded have any bearing on present recollection revived and that any writing whatever is eligible for use. On the other hand, the authorities are in agreement that in certain circumstances [\*\*\*14] the expedients for stimulating recollection may be so misused that the witness may put before the court that which purports to be, but is not in fact, his recollection and knowledge and that, therefore, any writing whatever, in the circumstances, may become improper. Although no hard and fast rule can be laid down for invariable application, the *predominant view today seems to be that within the sound discretion of the trial judge any memorandum or other object may be used as a stimulus to present memory, without restriction by rule as to authorship, guarantee of correctness, or time of making.* *Kramer v. Commission of Internal Revenue*, 389 F.2d 236, 238 (1968) (Emphasis Added).

In the case at bar, Foley testified as to past events but from his present recollection. The State did not attempt to admit the document into evidence. Thus, the rules of present recollection revived, rather than past recollection recorded apply to the instant case. The pertinent testimony is as follows:

MR. McLARTY: Excuse me, your Honor, I'm -- I'm going to object to his using something to refresh his recollection unless I'm going to have an opportunity to review it and cross-examine him [\*\*\*15] on it. I notice he's reviewing -- he's reciting from his notes there.

THE COURT: You obviously will have an opportunity to cross-examine him.

[\*\*915] MR. McLARTY: I'd just like an opportunity to review those notes that he's using.

THE COURT: I don't see that he has opened his folder yet, Mr. McLarty.

MR. McLARTY: Okay, well I -- the State, I believe, will concede that he, in fact, had opened it and was reading from it. Is that not correct, Officer Foley?

[\*285] MR. WEIERS: It looked like he was leafing through it your Honor, a while ago.

THE COURT: All right.

By Mr. Weiers:

Q. Do you need the items in your hand to refresh your recollection, Trooper?

A. No. It would be helpful.

Q. If you do, let us know.

A. Okay.

A review of the pertinent testimony indicates that since the rules of present recollection revived apply, the court did not err. The court was not required to insure that the time of making, the authorship and the accuracy had been established. Furthermore, at most the evidence shows that Foley opened his folder prior to the time he was on the witness stand. [HN5] There is no rule prohibiting a witness from refreshing his recollection prior to [\*\*\*16] taking the oath and testifying. The court certainly did not abuse its discretion in determining that Foley had not opened his folder while on the witness stand.

Fitzwater's second allegation -- that his attorney was not permitted to see the contents of the folder -- is likewise without merit. Since the court determined that Foley was not using the document to refresh his recollection, there was no reason for Fitzwater's counsel to view it. Moreover, the request to see the document was not renewed after the court's determination.

*IV. Did the court invade the province of the jury by appointing a foreperson?*

Fitzwater contends the court deprived him of a fair trial by appointing a jury foreman. [HN6] Rule 751 of the Maryland Rules of Procedure states "the Court *shall* designate a juror as foreman". (Emphasis added). In addition, this issue was not preserved for appeal.

The court did not err.

**State of Minnesota, Respondent, vs. Noor Mohamed Ali, Appellant.****A03-806****COURT OF APPEALS OF MINNESOTA***679 N.W.2d 359; 2004 Minn. App. LEXIS 517***May 11, 2004, Filed****PRIOR HISTORY:** [\*\*1] Hennepin County District Court. File No. 03023827.**DISPOSITION:** Affirmed.**CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant challenged a decision from the Hennepin County District Court (Minnesota), which convicted him of speeding.**OVERVIEW:** An officer observed defendant's car traveling above the posted speed limit. He used a laser to confirm his suspicions. After defendant was convicted, he sought review. In affirming, the court determined that the district court did not take judicial notice of the general reliability of laser technology. However, judicial notice was appropriate based on the testing of the laser device and the training of the officer. Also, *Minn. Stat. § 169.14*, subd. 10(a), (b) (2002) did not violate the separation-of-powers doctrine because it did not conflict with the Minnesota Rules of Evidence. Further, the district court did not abuse its discretion by admitting the laser reading to establish defendant's speed because the officer was trained, and the device had been routinely tested for accuracy. A certificate of testing and accuracy was admissible under Minn. R. Evid. 803(6) because the certificate was reliable, and it was not prepared solely for litigation purposes. Finally, the officer's visual estimate of speed was alone sufficient to support the conviction.**OUTCOME:** The decision of the district court was affirmed.**CORE TERMS:** laser, speed, radar, mph, visual, accuracy, reliability, speeding, admissible, speed-measuring, external, tested, reliable, miles, estimate, speed limit, certificate, rules of evidence, traveling, separation-of-powers, judicial notice, distance, routinely, admitting, training, trained, testing, reasonable doubt, business records, regular course**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Verdicts > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN1] In considering a claim of insufficient evidence, an appellate court reviews the record to determine whether the evidence, when viewed in the light most favorable to the conviction, is sufficient to allow the court to reach the verdict that it did. The appellate court will not disturb the verdict if the district court, acting with due regard for the presumption of innocence and the requirement of proof beyond a reasonable doubt, could reasonably conclude that the defendant was guilty of the charged offense.

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN2] When reviewing a district court's evidentiary rulings, an appellate court looks at the record as a whole to determine whether, in light of the evidence therein, the district court acted arbitrarily, capriciously, or contrary to legal usage. Evidentiary rulings rest within the sound discretion of the district court, and will not be reversed absent an abuse of that discretion.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

***Evidence > Judicial Notice > General Overview***

[HN3] The reliability of radar speedometers is accepted where there is evidence they were operated by trained personnel who have adequately tested the accuracy of the particular device by which the defendant's speed was determined. Consequently, it is proper for a trial court to take judicial notice of the reliability of radar as a means of establishing speed without requiring the operator to be qualified as an expert in the field. By analogy, so long as there is adequate evidence that a laser-based speed-measuring device used to support a conviction has been tested for accuracy and that officers using the device have been trained in its use, a district court does not abuse its discretion by taking judicial notice of the device's general reliability of laser technology.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

***Evidence > Scientific Evidence > General Overview***

[HN4] See *Minn. Stat. § 169.14*, subd. 10 (2002).

***Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation > General Overview***

[HN5] A statute is presumed to be constitutional, and a court's power to declare a statute unconstitutional is exercised with extreme caution and only when absolutely necessary.

***Governments > Courts > Authority to Adjudicate***

***Governments > Courts > Judicial Comity***

***Governments > Courts > Rule Application & Interpretation***

[HN6] While the power to establish rules of evidence lies within the inherent authority of the judiciary, courts have nevertheless enforced reasonable statutory rules of evidence as a matter of comity where the rules were not in conflict with the Minnesota Rules of Evidence.

***Constitutional Law > Separation of Powers***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Governments > Courts > Rule Application & Interpretation***

[HN7] Because *Minn. Stat. § 169.14* (2002) complies with, rather than conflicts with, the Minnesota Rules of Evidence, it does not violate the separation-of-powers doctrine.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN8] There is no requirement in the *Minn. Stat. § 169.14*, subd. 10(a) (2002) that a laser be tested in any particular manner. Rather, § 169.14, subd. 10(a)(4) requires only that the device be tested by an "accurate and reliable" external method.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview  
Evidence > Documentary Evidence > Writings > General Overview***

[HN9] *Minn. Stat. § 169.14*, subd. 10(b) (2002) specifically contemplates that records of tests made of such devices and kept in the regular course of operations of any law enforcement agency are admissible in evidence without further foundation as to the results of the tests. Nonetheless, while business records are generally admissible under Minn. R. Evid. 803(6), documents prepared solely for litigation purposes do not qualify under this exception. Minn. R. Evid. 803(6).

***Evidence > Hearsay > Exceptions > Business Records > Admissibility in Criminal Trials***

[HN10] Under Minn. R. Evid. 803(6), it is recognized that if a document is prepared in part for business purposes, but with an eye toward litigation, a court must decide if the interest in litigation sufficiently detracted from the trustworthiness of the report to preclude its admission.

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Confrontation  
Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination  
Evidence > Hearsay > Exceptions > Business Records > Admissibility in Criminal Trials***

[HN11] If business records are offered to prove an essential element of the crime or connect the defendant directly to the commission of the crime, then they must be proved through persons having personal knowledge of the element or connection and such persons must be available for cross-examination.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Testimony > Lay Witnesses > General Overview***

[HN12] The estimation of the speed of an automobile lies in a field in which a lay person gifted with reasonable intelligence, given a fair opportunity to observe, and having ordinary experience with moving vehicles may give opinion testimony.

**SYLLABUS:** 1. When there is adequate evidence that a laser-based speed-measuring device used to support a conviction has been tested for accuracy and that officers using the device have been trained in its use, a district court does not abuse its discretion by taking judicial notice of the device's general reliability.

2. Because *Minn. Stat. § 169.14, subd. 10(a), (b)* (2002), complies with, rather than conflicts with, the rules of evidence, it does not violate the separation-of-powers doctrine and is, therefore, constitutional.

3. Where the record demonstrates that a police officer is trained to use a laser-based speed-measuring device and that the device is routinely tested for accuracy by reliable internal and external methods, a district court does not abuse its discretion by admitting the laser reading under *Minn. Stat. § 169.14, subd. 10(a)*.

4. The district court did not abuse its discretion by admitting the Certificate of Testing and Accuracy into evidence under the business-records exception where the record demonstrates that the certificate was reliable [\*\*2] and was not prepared solely for litigation purposes.

5. A police officer's visual estimate of the speed of a moving vehicle is alone sufficient to support a speeding conviction where the record demonstrates that the officer received proper training in visual estimations and his observations were reasonably accurate.

**COUNSEL:** Mike Hatch, Attorney General, St. Paul, MN; and Jay M. Heffern, Minneapolis City Attorney, Marcia A. Johnson, Assistant City Attorney, Minneapolis, MN (for respondent).

Stephen V. Grigsby, Minneapolis, MN (for appellant).

**JUDGES:** Considered and decided by Peterson, Presiding Judge, Lansing, Judge, and Halbrooks, Judge.

**OPINION BY:** HALBROOKS

**OPINION:** [\*361] **HALBROOKS**, Judge

Appellant challenges his conviction of speeding, arguing that the evidence is insufficient to support the conviction and the district court erroneously admitted the results of a laser-based speed-measuring device. Because we conclude that the laser evidence was properly admitted, and that the laser reading and the officer's observations are sufficient to support appellant's conviction, we affirm.

#### **FACTS**

On March 2, 2003, Officer Jerry Johnson of the Minneapolis Police Department was on duty [\*\*3] near the intersection of Hennepin and Wilder in Minneapolis. The posted speed limit in the area is 30 mph. Officer Johnson noticed two vehicles approaching and observed that the vehicle in the center lane was overtaking the vehicle in the left lane. In order to verify his visual perception that the vehicles were speeding, Officer Johnson measured the speed of both vehicles with a Kustom Pro Laser III speed-measuring device. Officer Johnson determined that the vehicle in the left lane was traveling at 37 mph, while the vehicle [\*362] in the center lane, driven by appellant Noor Mohamed Ali, was traveling 41 mph. Officer Johnson then stopped appellant and issued him a speeding ticket.

Officer Johnson was the only witness to testify at trial. In addition to explaining the events of March 2, Officer Johnson told the court that he has been employed in the traffic division of the Minneapolis Police Department for 17 years, where he routinely investigates accidents and enforces traffic laws. Officer Johnson is certified to use laser devices. In 1990, he received training in Arizona to become a laser instructor and received additional instructor's training in 1994 through a laser manufacturer. Officer [\*\*4] Johnson has been the laser instructor for the Minneapolis Police Department since 1990.

Officer Johnson testified that the laser unit he used on March 2 is tested annually to ensure that it meets the manufacturer's specifications for output and detection and to make sure it can "clock" moving vehicles accurately. Laser testing is conducted by the police department's radio shop; once a laser passes the tests, the department issues a Certificate of Testing and Accuracy in its ordinary course of business. The laser used by Officer Johnson on March 2 was certified in May 2002, which indicated that it had passed all the necessary tests, including the Scope Alignment Test, Display and Integrity Test, Fixed Distance Test, and the Delta Distance Velocity Test. Although appellant repeatedly objected to admission of this document on the bases of hearsay, lack of foundation, and unreliability, the court admitted the certificate into evidence.

Additionally, Officer Johnson testified how he routinely tests the laser devices on the same day that they will be

used. Officer Johnson explained:

First thing I do is I turn the unit on. It goes through a series of internal checks, checking both the [\*\*5] internal computer, which converts changes and distance to speeds, and collects all the lighting dial out segments to make sure [the laser is] lighting up correctly. . . .

And then I, we have a course set up in our garage which we've measured out with steel engineering tapes with two different distances. We go through what's called a Delta Distance Check, or Difference Test. Because the basic theory of separation for the laser is to determine speeds based on changes in distance over time, using the speed of light as a basis.

So we aim it at the first measurement, get that measurement, make sure it measures it what the steel tape measures it out. Second measurement, and make sure it gets the same measurement it was supposed to, and then we push a button, puts it in the mode which will determine the difference between those two and simulate a speed based on the doubling of that distance. If it passes that test, [we] use the Scope Alignment Test to make sure there's actually a red dot in the scope that you look through. It projects the dot on the vehicle, just like a rifle scope, and make sure the red dot is aligned properly with the laser beam that comes out. And one additional [\*\*6] test that's not even required but [we] do it as a part of course, the Zero Velocity Test. Aim it at a known point in regular speed mode and make sure it gets that distance, giving you a speed, to know it's not going to detect or simulate movement on something that's not moving.

Officer Johnson later explained the Scope Alignment Test in more detail, stating:

I . . . put it in the range mode which gives, instead of pulsed light energy, it gives it steady light energy. And then I aim it at a narrow pipe about . . . two [\*363] inches in diameter at the end of the garage. And when it passes over that pipe, you'll hear a change in tone if the laser beam is striking the pipe at the exact same time as your dot moves over it. I do that both horizontally and vertically for wind and elevation and make sure it's on the exact spot where it's supposed to be.

Officer Johnson stated that it is the department's practice for officers to record the results of these tests at both the beginning and end of the officer's shift. The log sheet for March 2 was admitted into evidence over appellant's hearsay objection. The log indicates that the laser was tested and was working properly at both [\*\*7] the beginning and the end of Officer Johnson's shift.

Finally, Officer Johnson testified that he received training in 1978 on how to visually estimate the speed of a moving vehicle. He can accurately estimate the speed of a vehicle traveling at 30 mph, 50 mph, and 65 mph, within five mph. The laser's indication of 41 mph was consistent with Johnson's visual observation of the speed of appellant's vehicle. Officer Johnson also testified that he measured the speeds of numerous other vehicles on March 2, and the laser was consistent with his visual observations of the speed of those vehicles. Officer Johnson explained that

the laser merely is used as a tool to verify my visual impressions and give me an actual number to put on paper here. I mean, as a driver, as a police traffic officer for a number of years, certainly a skill I've learned is to look at vehicles and determine which ones appear to be speeding.

After considering the testimony and the arguments of both parties, the district court found appellant guilty of speeding and imposed a fine. The court stated on the record:

I find that Officer Johnson's testimony is credible with respect to the fact that he's [\*\*8] trained in determining speeds visually, that he observed [appellant] to be driving the vehicle which he believed to be driven in excess of the speed limit somewhere around 41 miles per hour, that he then used the laser

[which] . . . indicated it was 41 miles per hour. I also take note that, of course, the speed limit was 30 miles per hour. If this was a case in which Officer Johnson was here saying it was 31 miles per hour that [appellant] was going, maybe the arguments would be more persuasive; however, on the fact 11 miles per hour gap there, I find Officer Johnson's testimony credible.

This appeal follows.

## ISSUES

1. Did the district court abuse its discretion by taking judicial notice of the reliability of evidence from a laser-based speed-measuring device?
2. Does *Minn. Stat. § 169.14, subd. 10(a), (b)* (2002), violate the separation-of-powers doctrine?
3. Did the district court abuse its discretion by admitting the laser reading establishing appellant's speed on March 2, 2003?
4. Did the district court abuse its discretion by admitting the Certificate of Testing and Accuracy?
5. Is Officer Johnson's visual [\*\*9] estimate of appellant's speed sufficient to support the conviction?

## ANALYSIS

Appellant contends that the evidence is insufficient to support his conviction for speeding on the grounds that (1) the laser-device evidence was erroneously admitted and (2) Officer Johnson's visual observations [\*364] alone cannot support the verdict. [HN1] In considering a claim of insufficient evidence, this court reviews the record to determine whether the evidence, when viewed in the light most favorable to the conviction, is sufficient to allow the court to reach the verdict that it did. *State v. Webb*, 440 N.W.2d 426, 430 (Minn. 1989). We will not disturb the verdict if the district court, acting with due regard for the presumption of innocence and the requirement of proof beyond a reasonable doubt, could reasonably conclude that the defendant was guilty of the charged offense. *State v. Alton*, 432 N.W.2d 754, 756 (Minn. 1988).

[HN2] When reviewing a district court's evidentiary rulings, this court looks "at the record as a whole to determine whether, in light of the evidence therein, the district court acted arbitrarily, capriciously, or contrary to legal usage." *State v. Profit*, 591 N.W.2d 451, 464 n.3 (Minn. 1999) [\*\*10] (quotation omitted). Evidentiary rulings rest within the sound discretion of the district court, and will not be reversed absent an abuse of that discretion. *State v. Smith*, 669 N.W.2d 19, 26 (Minn. 2003).

### 1. Judicial notice of the reliability of laser technology.

Appellant argues that "the admission of the laser device without sufficient evidence of its reliability by a qualified expert amounts to a judicial noticing of the device's reliability," in violation of Minn. R. Evid. 201. While we do not agree that the court took judicial notice of the laser's reliability in this case, even if it had, there would be no abuse of discretion. In *State v. Gerdes*, 291 Minn. 353, 191 N.W.2d 428 (1971), the Minnesota Supreme Court held that district courts could take judicial notice of the reliability of radar. *Id.* at 354, 191 N.W.2d at 429. The court stated:

We are in accord with the authorities which accept [HN3] the reliability of radar speedometers where there is evidence they were operated by trained personnel who have adequately tested the accuracy of the particular device by which the defendant's speed was determined. Consequently, [\*\*11] we hold that it was proper for the trial court to take judicial notice of the reliability of radar as a means of establishing speed without requiring the operated to be qualified as an expert in the field.

*Id.* at 356, 191 N.W.2d at 430-31. This court has cited the *Gerdes* holding on several occasions. *See, e.g., State, City of St. Louis Park v. Bogren*, 410 N.W.2d 383, 385 (Minn. App. 1987) (stating that "radar is accepted as a reliable measure of speed when there is evidence of proper testing and operation by trained personnel"); *State v. Dow*, 352 N.W.2d 125, 126-27 (Minn. App. 1984) (stating that "radar speedometer results are reliable if the unit is properly tested and operated"). By analogy, so long as there is adequate evidence that a laser-based speed-measuring device used to support a conviction has been tested for accuracy and that officers using the device have been trained in its use, a district court does not abuse its discretion by taking judicial notice of the device's general reliability of laser technology.

## 2. Constitutionality of Minn. Stat. § 169.14, subd. 10 (2002). [\*\*12]

*Minn. Stat. § 169.14, subd. 10(a), (b)*, sets forth the requirements for admitting evidence from a radar or other "speed-measuring device" to show that a defendant was speeding. The statute provides:

[HN4] (a) In any prosecution in which the rate of speed of a motor vehicle is relevant, evidence of the speed as indicated on radar or other speed-measuring device [\*365] is admissible in evidence, subject to the following conditions:

- (1) the officer operating the device has sufficient training to properly operate the equipment;
- (2) the officer testifies as to the manner in which the device was set up and operated;
- (3) the device was operated with minimal distortion or interference from outside sources; and
- (4) the device was tested by an accurate and reliable external mechanism, method, or system at the time it was set up.

(b) Records of tests made of such devices and kept in the regular course of operations of any law enforcement agency are admissible in evidence without further foundation as to the results of the tests. The records shall be available to a defendant upon demand. Nothing in this subdivision shall be construed to preclude or interfere with cross [\*13] examination or impeachment of evidence of the rate of speed as indicated on the radar or speed-measuring device.

*Minn. Stat. § 169.14, subd. 10(a), (b)*.

Appellant contends that *Minn. Stat. § 169.14* (2002) is unconstitutional, asserting that it violates the separation-of-powers doctrine because the legislature has removed the judiciary's power to regulate evidentiary matters. [HN5] A statute is presumed to be constitutional, and a court's power to declare a statute unconstitutional is exercised "with extreme caution and only when absolutely necessary." *State v. Machholz*, 574 N.W.2d 415, 419 (Minn. 1998) (quotation omitted).

[HN6] While the power to establish rules of evidence lies within the inherent authority of the judiciary, *State v. Willis*, 332 N.W.2d 180, 184 (Minn. 1983), courts have nevertheless enforced "reasonable statutory rules of evidence as a matter of comity where the rules were not in conflict with the Minnesota Rules of Evidence." *State v. Larson*, 453 N.W.2d 42, 46 n.3 (Minn. 1990). Therefore, the statute may set guidelines for the admissibility of evidence from a speed-measuring [\*14] device without violating the separation-of-powers doctrine so long as it does not conflict with the rules of evidence. *See State v. McCoy*, 668 N.W.2d 425, 427 (Minn. App. 2003), review granted (Minn. Nov. 18, 2003).

Here, two rules of evidence are analogous: Minn. R. Evid. 402 ("relevant evidence is [generally] admissible") and Minn. R. Evid. 803(6) ("data compilation . . . if kept in the course of a regularly conducted business activity [is admissible] unless the source of information or the method or circumstances of preparation indicate lack of

trustworthiness"). *Minn. Stat. § 169.14* does not conflict with rule 402, as evidence from a speed-measuring device is certainly relevant in establishing that a defendant was speeding, and none of the exclusionary rules apply. Furthermore, the statute does not conflict with rule 803(6) because the device's readings are routinely written on speeding tickets in the regular course of the police department's business, and there is nothing inherently untrustworthy about the evidence. Therefore, we conclude that [HN7] because *Minn. Stat. § 169.14* complies with, rather than conflicts [\*\*15] with, the rules of evidence, it does not violate the separation-of-powers doctrine.

### 3. Admissibility of the results from the laser device used on March 2.

Although the admissibility of evidence from a laser-based speed-measuring device under *Minn. Stat. § 169.14, subd. 10(a)*, is a case of first impression, we conclude that the existing caselaw concerning the admissibility of radar evidence is analogous. For example, in *Dow*, we concluded that [\*366] radar evidence was admissible where the officer was a certified radar operator, was familiar with the radar device used, and had checked the accuracy of the radar unit by performing internal and external tests both before and after his shift. *352 N.W.2d at 126*. Specifically, we stated that "the external methods, consisting of a tuning fork and a calibrated speedometer on the squad car," were sufficient to satisfy the condition that the device be "tested by an accurate and reliable external mechanism, method, or system at the time it was set up." *Id. at 127* (quoting *Minn. Stat. § 169.14, subd. 10(a)(4)*). Likewise, in *State v. Pulos*, we held that [\*\*16] the radar evidence was admissible under *subdivision 10(a)* where the police officer was a certified radar operator who conducted internal and external checks of the radar unit, and all tests indicated that the unit was in proper working order. *406 N.W.2d 75, 76 (Minn. App. 1987)*. Additionally, in *Bogren*, we concluded that radar evidence was admissible where the officer performed external and internal calibration checks both before and after issuing the appellant's ticket, records were introduced verifying the accuracy of both the radar unit and tuning forks used in testing, the officer was certified to operate the radar unit, and there was no evidence of outside interference. *410 N.W.2d at 384-85*. The record here demonstrates that the results of the laser device used by Officer Johnson were admissible under *Minn. Stat. § 169.14, subd 10(a)*.

While appellant contends that *subdivision 10(a)(4)* is not satisfied because Officer Johnson "failed to perform an external test of moving objects," [HN8] there is no requirement in the statute that the laser be tested in any particular manner. Rather, *subdivision 10(a)(4)* requires only that the [\*\*17] device be tested by an "accurate and reliable" external method. The record shows that several external methods were routinely used to test the Minneapolis Police Department's laser devices, and that those methods were reliable in determining whether the laser was working properly or experiencing accuracy problems. Therefore, *subdivision 10(a)(4)* has been satisfied, and we reject appellant's argument that a test on moving objects was required. *See Bogren, 410 N.W.2d at 385* (rejecting appellant's claim that he was entitled to question the city about whether it was licensed by the FCC to operate radar units because *section 169.14* does not require evidence of a valid FCC license).

### 4. Admissibility of Certificate of Testing and Accuracy.

Appellant also argues that the district court abused its discretion by admitting the Certificate of Testing and Accuracy, claiming that the document was hearsay and not admissible under the business-records exception. *See Minn. R. Evid. 803(6). Minn. Stat. § 169.14, subd. 10(b)*, [HN9] specifically contemplates that "records of tests made of such devices and kept in the regular course of operations of [\*\*18] any law enforcement agency are admissible in evidence without further foundation as to the results of the tests." Nonetheless, while business records are generally admissible under rule 803(6), "documents prepared solely for litigation purposes do not qualify under this exception." *Minn. R. Evid. 803(6) 1989 comm. cmt.*

Officer Johnson testified that when a laser device passes the appropriate testing, the radio shop issues a certificate of accuracy for police officers to use "for purposes like today," i.e., court proceedings. Officer Johnson also stated that the people who prepare the certificates know that the documents are regularly brought into court. But Officer Johnson also testified that the certification document was created in the [\*367] regular course of the department's business to ensure that the laser is accurately measuring speed and meeting the "manufacturer's specifications for the output and

detection circuits." Therefore, we disagree with appellant's contention that the certification was prepared "solely for litigation purposes." The comments to rule 803(6) [HN10] recognize that "if the document is prepared in part for business purposes but with an eye toward litigation the court [\*\*19] must decide if the interest in litigation sufficiently detracted from the trustworthiness of the report to preclude its admission." Minn. R. Evid. 803(6) 1989 comm. cmt. Here, the district court specifically found that the document was "reliable" despite appellant's concerns that the department knew it could be used in court proceedings. We conclude that the district court did not abuse its discretion in admitting the certificate under the business-records exception.

Appellant also contends that "even if the business records were properly introduced, [his] confrontations rights . . . were denied by the reception of hearsay to establish an element of the crime." See *State v. Matousek*, 287 Minn. 344, 350, 178 N.W.2d 604, 608 (1970) (recognizing that [HN11] if business records "are offered to prove an essential element of the crime or connect the defendant directly to the commission of the crime, then they must be proved through persons having personal knowledge of the element or connection and such persons must be available for cross-examination"). But the certificate does not raise confrontation problems because it was not offered to prove an essential element of the [\*\*20] crime or to directly connect appellant to the commission of the crime. In *State v. Jensen*, 351 N.W.2d 29, 32-33 (Minn. App. 1984), this court concluded that business records establishing that a breathalyzer test was working properly did not pose a confrontation problem because they were "merely collateral evidence of the reliability of the breathalyzer test." Similarly, in this case, the certification document was admitted only as collateral evidence of the reliability of the tests performed by Officer Johnson. Therefore, we conclude that the certificate was properly received into evidence.

##### **5. Officer Johnson's visual observations.**

Appellant's final argument is that Officer Johnson's visual speed estimation is insufficient to establish that he was speeding. In *LeMieux v. Bishop*, 296 Minn. 372, 378, 209 N.W.2d 379, 383 (1973), the supreme court recognized that [HN12] the estimation of "the speed of an automobile lies in a field in which a lay person gifted with reasonable intelligence, given a fair opportunity to observe, and having ordinary experience with moving vehicles may give opinion testimony." Beyond having this type of "ordinary experience, [\*\*21] " Officer Johnson testified that he was trained in 1978 to accurately estimate the speed of a moving vehicle within five mph, and that he has perfected that skill over the past 25 years. The laser's indication of 41 mph for appellant's speed was consistent with Johnson's visual observation; the laser was also consistent with Johnson's visual estimates of the speed of other vehicles that day. Officer Johnson explained that "the laser merely is used as a tool to verify my visual impressions." Based on this record, we agree with the district court's conclusion that "Officer Johnson's testimony is credible with respect to the fact that he's trained in determining speeds visually [and] that he observed [appellant] to be driving the vehicle . . . in excess of the speed limit somewhere around 41 miles per hour."

[\*368] Appellant also raises concerns that the district court entertained reasonable doubt by stating, "if this was a case in which Officer Johnson was here saying it was 31 miles per hour that [appellant] was going, maybe the arguments would be more persuasive; however, on the fact 11 miles per hour gap there, I find Officer Johnson's testimony credible." But the state was required [\*\*22] to prove only that appellant was exceeding the speed limit, not that he was driving 41 mph. See *State v. Aanerud*, 374 N.W.2d 491, 492 (Minn. App. 1985). In *Aanerud*, the district court found the appellant guilty of speeding, stating, "there was reasonable doubt that [the appellant] was going fifteen miles per hour over the speed limit but there can be no doubt that he exceeded the limit by some amount." We affirmed, reasoning that

the court could have found that there was a margin of error in the radar unit's readout, which would have meant that [the appellant's] car was traveling either somewhat less or somewhat more than 45 mph [in a 30 mph zone]. This would have been sufficient to raise the reasonable doubt stated by the court without the total discrediting of the reading urged by appellant.

*Id.*

Here, Officer Johnson's visual estimate was consistent with the laser's determination that appellant was traveling 41 mph. Even if we presume a five mph margin of error, the testimony still demonstrates that appellant was traveling at least 36 mph. Therefore, Officer Johnson's visual estimate alone is sufficient to establish that appellant exceeded [\*\*23] the 30 mph speed limit.

#### **DECISION**

Although we disagree that the district court took judicial notice of the general reliability of laser technology, we conclude that where there is adequate evidence of the testing of the laser device and the training of the officer using the device to support the conviction, judicial notice is appropriate. Furthermore, we conclude that because *Minn. Stat. § 169.14, subd. 10(a), (b)* (2002), does not conflict with the rules of evidence, it does not violate the separation-of-powers doctrine and is, therefore, constitutional. Additionally, we conclude that the district court did not abuse its discretion by admitting the laser reading establishing appellant's speed on March 2, 2003, under *Minn. Stat. § 169.14, subd. 10(a)*, as the record demonstrates that Officer Johnson was trained to use the laser device and that the device was routinely tested for accuracy by reliable internal and external methods. We also find no abuse of discretion in the district court's admission of the Certificate of Testing and Accuracy under the business-records exception, as the record demonstrates that the certificate [\*\*24] was reliable and was not prepared solely for litigation purposes. Finally, we conclude that Officer Johnson's visual estimate of appellant's speed was alone sufficient to support his conviction for speeding.

**Affirmed.**

Positive

As of: Jan 31, 2007

**State of Minnesota, Respondent, vs. Noor Mohamed Ali, Appellant.****A03-806****COURT OF APPEALS OF MINNESOTA***679 N.W.2d 359; 2004 Minn. App. LEXIS 517***May 11, 2004, Filed****PRIOR HISTORY:** [\*\*1] Hennepin County District Court. File No. 03023827.**DISPOSITION:** Affirmed.**CASE SUMMARY:****PROCEDURAL POSTURE:** Defendant challenged a decision from the Hennepin County District Court (Minnesota), which convicted him of speeding.**OVERVIEW:** An officer observed defendant's car traveling above the posted speed limit. He used a laser to confirm his suspicions. After defendant was convicted, he sought review. In affirming, the court determined that the district court did not take judicial notice of the general reliability of laser technology. However, judicial notice was appropriate based on the testing of the laser device and the training of the officer. Also, *Minn. Stat. § 169.14*, subd. 10(a), (b) (2002) did not violate the separation-of-powers doctrine because it did not conflict with the Minnesota Rules of Evidence. Further, the district court did not abuse its discretion by admitting the laser reading to establish defendant's speed because the officer was trained, and the device had been routinely tested for accuracy. A certificate of testing and accuracy was admissible under Minn. R. Evid. 803(6) because the certificate was reliable, and it was not prepared solely for litigation purposes. Finally, the officer's visual estimate of speed was alone sufficient to support the conviction.**OUTCOME:** The decision of the district court was affirmed.**CORE TERMS:** laser, speed, radar, mph, visual, accuracy, reliability, speeding, admissible, speed-measuring, external, tested, reliable, miles, estimate, speed limit, certificate, rules of evidence, traveling, separation-of-powers, judicial notice, distance, routinely, admitting, training, trained, testing, reasonable doubt, business records, regular course**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Verdicts > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN1] In considering a claim of insufficient evidence, an appellate court reviews the record to determine whether the evidence, when viewed in the light most favorable to the conviction, is sufficient to allow the court to reach the verdict that it did. The appellate court will not disturb the verdict if the district court, acting with due regard for the presumption of innocence and the requirement of proof beyond a reasonable doubt, could reasonably conclude that the defendant was guilty of the charged offense.

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

***Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN2] When reviewing a district court's evidentiary rulings, an appellate court looks at the record as a whole to determine whether, in light of the evidence therein, the district court acted arbitrarily, capriciously, or contrary to legal usage. Evidentiary rulings rest within the sound discretion of the district court, and will not be reversed absent an abuse of that discretion.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

***Evidence > Judicial Notice > General Overview***

[HN3] The reliability of radar speedometers is accepted where there is evidence they were operated by trained personnel who have adequately tested the accuracy of the particular device by which the defendant's speed was determined. Consequently, it is proper for a trial court to take judicial notice of the reliability of radar as a means of establishing speed without requiring the operator to be qualified as an expert in the field. By analogy, so long as there is adequate evidence that a laser-based speed-measuring device used to support a conviction has been tested for accuracy and that officers using the device have been trained in its use, a district court does not abuse its discretion by taking judicial notice of the device's general reliability of laser technology.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***

[HN4] See *Minn. Stat. § 169.14*, subd. 10 (2002).

***Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation > General Overview***

[HN5] A statute is presumed to be constitutional, and a court's power to declare a statute unconstitutional is exercised with extreme caution and only when absolutely necessary.

***Governments > Courts > Authority to Adjudicate***

***Governments > Courts > Judicial Comity***

***Governments > Courts > Rule Application & Interpretation***

[HN6] While the power to establish rules of evidence lies within the inherent authority of the judiciary, courts have nevertheless enforced reasonable statutory rules of evidence as a matter of comity where the rules were not in conflict with the Minnesota Rules of Evidence.

***Constitutional Law > Separation of Powers***

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

***Governments > Courts > Rule Application & Interpretation***

[HN7] Because *Minn. Stat. § 169.14* (2002) complies with, rather than conflicts with, the Minnesota Rules of Evidence, it does not violate the separation-of-powers doctrine.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN8] There is no requirement in the *Minn. Stat. § 169.14*, subd. 10(a) (2002) that a laser be tested in any particular manner. Rather, § 169.14, subd. 10(a)(4) requires only that the device be tested by an "accurate and reliable" external method.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview  
Evidence > Documentary Evidence > Writings > General Overview***

[HN9] *Minn. Stat. § 169.14*, subd. 10(b) (2002) specifically contemplates that records of tests made of such devices and kept in the regular course of operations of any law enforcement agency are admissible in evidence without further foundation as to the results of the tests. Nonetheless, while business records are generally admissible under Minn. R. Evid. 803(6), documents prepared solely for litigation purposes do not qualify under this exception. Minn. R. Evid. 803(6).

***Evidence > Hearsay > Exceptions > Business Records > Admissibility in Criminal Trials***

[HN10] Under Minn. R. Evid. 803(6), it is recognized that if a document is prepared in part for business purposes, but with an eye toward litigation, a court must decide if the interest in litigation sufficiently detracted from the trustworthiness of the report to preclude its admission.

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Confrontation  
Criminal Law & Procedure > Trials > Examination of Witnesses > Cross-Examination  
Evidence > Hearsay > Exceptions > Business Records > Admissibility in Criminal Trials***

[HN11] If business records are offered to prove an essential element of the crime or connect the defendant directly to the commission of the crime, then they must be proved through persons having personal knowledge of the element or connection and such persons must be available for cross-examination.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Testimony > Lay Witnesses > General Overview***

[HN12] The estimation of the speed of an automobile lies in a field in which a lay person gifted with reasonable intelligence, given a fair opportunity to observe, and having ordinary experience with moving vehicles may give opinion testimony.

**SYLLABUS:** 1. When there is adequate evidence that a laser-based speed-measuring device used to support a conviction has been tested for accuracy and that officers using the device have been trained in its use, a district court does not abuse its discretion by taking judicial notice of the device's general reliability.

2. Because *Minn. Stat. § 169.14, subd. 10(a), (b)* (2002), complies with, rather than conflicts with, the rules of evidence, it does not violate the separation-of-powers doctrine and is, therefore, constitutional.

3. Where the record demonstrates that a police officer is trained to use a laser-based speed-measuring device and that the device is routinely tested for accuracy by reliable internal and external methods, a district court does not abuse its discretion by admitting the laser reading under *Minn. Stat. § 169.14, subd. 10(a)*.

4. The district court did not abuse its discretion by admitting the Certificate of Testing and Accuracy into evidence under the business-records exception where the record demonstrates that the certificate was reliable [\*\*2] and was not prepared solely for litigation purposes.

5. A police officer's visual estimate of the speed of a moving vehicle is alone sufficient to support a speeding conviction where the record demonstrates that the officer received proper training in visual estimations and his observations were reasonably accurate.

**COUNSEL:** Mike Hatch, Attorney General, St. Paul, MN; and Jay M. Heffern, Minneapolis City Attorney, Marcia A. Johnson, Assistant City Attorney, Minneapolis, MN (for respondent).

Stephen V. Grigsby, Minneapolis, MN (for appellant).

**JUDGES:** Considered and decided by Peterson, Presiding Judge, Lansing, Judge, and Halbrooks, Judge.

**OPINION BY:** HALBROOKS

**OPINION:** [\*361] **HALBROOKS**, Judge

Appellant challenges his conviction of speeding, arguing that the evidence is insufficient to support the conviction and the district court erroneously admitted the results of a laser-based speed-measuring device. Because we conclude that the laser evidence was properly admitted, and that the laser reading and the officer's observations are sufficient to support appellant's conviction, we affirm.

#### **FACTS**

On March 2, 2003, Officer Jerry Johnson of the Minneapolis Police Department was on duty [\*\*3] near the intersection of Hennepin and Wilder in Minneapolis. The posted speed limit in the area is 30 mph. Officer Johnson noticed two vehicles approaching and observed that the vehicle in the center lane was overtaking the vehicle in the left lane. In order to verify his visual perception that the vehicles were speeding, Officer Johnson measured the speed of both vehicles with a Kustom Pro Laser III speed-measuring device. Officer Johnson determined that the vehicle in the left lane was traveling at 37 mph, while the vehicle [\*362] in the center lane, driven by appellant Noor Mohamed Ali, was traveling 41 mph. Officer Johnson then stopped appellant and issued him a speeding ticket.

Officer Johnson was the only witness to testify at trial. In addition to explaining the events of March 2, Officer Johnson told the court that he has been employed in the traffic division of the Minneapolis Police Department for 17 years, where he routinely investigates accidents and enforces traffic laws. Officer Johnson is certified to use laser devices. In 1990, he received training in Arizona to become a laser instructor and received additional instructor's training in 1994 through a laser manufacturer. Officer [\*\*4] Johnson has been the laser instructor for the Minneapolis Police Department since 1990.

Officer Johnson testified that the laser unit he used on March 2 is tested annually to ensure that it meets the manufacturer's specifications for output and detection and to make sure it can "clock" moving vehicles accurately. Laser testing is conducted by the police department's radio shop; once a laser passes the tests, the department issues a Certificate of Testing and Accuracy in its ordinary course of business. The laser used by Officer Johnson on March 2 was certified in May 2002, which indicated that it had passed all the necessary tests, including the Scope Alignment Test, Display and Integrity Test, Fixed Distance Test, and the Delta Distance Velocity Test. Although appellant repeatedly objected to admission of this document on the bases of hearsay, lack of foundation, and unreliability, the court admitted the certificate into evidence.

Additionally, Officer Johnson testified how he routinely tests the laser devices on the same day that they will be

used. Officer Johnson explained:

First thing I do is I turn the unit on. It goes through a series of internal checks, checking both the [\*\*5] internal computer, which converts changes and distance to speeds, and collects all the lighting dial out segments to make sure [the laser is] lighting up correctly. . . .

And then I, we have a course set up in our garage which we've measured out with steel engineering tapes with two different distances. We go through what's called a Delta Distance Check, or Difference Test. Because the basic theory of separation for the laser is to determine speeds based on changes in distance over time, using the speed of light as a basis.

So we aim it at the first measurement, get that measurement, make sure it measures it what the steel tape measures it out. Second measurement, and make sure it gets the same measurement it was supposed to, and then we push a button, puts it in the mode which will determine the difference between those two and simulate a speed based on the doubling of that distance. If it passes that test, [we] use the Scope Alignment Test to make sure there's actually a red dot in the scope that you look through. It projects the dot on the vehicle, just like a rifle scope, and make sure the red dot is aligned properly with the laser beam that comes out. And one additional [\*\*6] test that's not even required but [we] do it as a part of course, the Zero Velocity Test. Aim it at a known point in regular speed mode and make sure it gets that distance, giving you a speed, to know it's not going to detect or simulate movement on something that's not moving.

Officer Johnson later explained the Scope Alignment Test in more detail, stating:

I . . . put it in the range mode which gives, instead of pulsed light energy, it gives it steady light energy. And then I aim it at a narrow pipe about . . . two [\*363] inches in diameter at the end of the garage. And when it passes over that pipe, you'll hear a change in tone if the laser beam is striking the pipe at the exact same time as your dot moves over it. I do that both horizontally and vertically for wind and elevation and make sure it's on the exact spot where it's supposed to be.

Officer Johnson stated that it is the department's practice for officers to record the results of these tests at both the beginning and end of the officer's shift. The log sheet for March 2 was admitted into evidence over appellant's hearsay objection. The log indicates that the laser was tested and was working properly at both [\*\*7] the beginning and the end of Officer Johnson's shift.

Finally, Officer Johnson testified that he received training in 1978 on how to visually estimate the speed of a moving vehicle. He can accurately estimate the speed of a vehicle traveling at 30 mph, 50 mph, and 65 mph, within five mph. The laser's indication of 41 mph was consistent with Johnson's visual observation of the speed of appellant's vehicle. Officer Johnson also testified that he measured the speeds of numerous other vehicles on March 2, and the laser was consistent with his visual observations of the speed of those vehicles. Officer Johnson explained that

the laser merely is used as a tool to verify my visual impressions and give me an actual number to put on paper here. I mean, as a driver, as a police traffic officer for a number of years, certainly a skill I've learned is to look at vehicles and determine which ones appear to be speeding.

After considering the testimony and the arguments of both parties, the district court found appellant guilty of speeding and imposed a fine. The court stated on the record:

I find that Officer Johnson's testimony is credible with respect to the fact that he's [\*\*8] trained in determining speeds visually, that he observed [appellant] to be driving the vehicle which he believed to be driven in excess of the speed limit somewhere around 41 miles per hour, that he then used the laser

[which] . . . indicated it was 41 miles per hour. I also take note that, of course, the speed limit was 30 miles per hour. If this was a case in which Officer Johnson was here saying it was 31 miles per hour that [appellant] was going, maybe the arguments would be more persuasive; however, on the fact 11 miles per hour gap there, I find Officer Johnson's testimony credible.

This appeal follows.

## ISSUES

1. Did the district court abuse its discretion by taking judicial notice of the reliability of evidence from a laser-based speed-measuring device?
2. Does *Minn. Stat. § 169.14, subd. 10(a), (b)* (2002), violate the separation-of-powers doctrine?
3. Did the district court abuse its discretion by admitting the laser reading establishing appellant's speed on March 2, 2003?
4. Did the district court abuse its discretion by admitting the Certificate of Testing and Accuracy?
5. Is Officer Johnson's visual [\*\*9] estimate of appellant's speed sufficient to support the conviction?

## ANALYSIS

Appellant contends that the evidence is insufficient to support his conviction for speeding on the grounds that (1) the laser-device evidence was erroneously admitted and (2) Officer Johnson's visual observations [\*364] alone cannot support the verdict. [HN1] In considering a claim of insufficient evidence, this court reviews the record to determine whether the evidence, when viewed in the light most favorable to the conviction, is sufficient to allow the court to reach the verdict that it did. *State v. Webb*, 440 N.W.2d 426, 430 (Minn. 1989). We will not disturb the verdict if the district court, acting with due regard for the presumption of innocence and the requirement of proof beyond a reasonable doubt, could reasonably conclude that the defendant was guilty of the charged offense. *State v. Alton*, 432 N.W.2d 754, 756 (Minn. 1988).

[HN2] When reviewing a district court's evidentiary rulings, this court looks "at the record as a whole to determine whether, in light of the evidence therein, the district court acted arbitrarily, capriciously, or contrary to legal usage." *State v. Profit*, 591 N.W.2d 451, 464 n.3 (Minn. 1999) [\*\*10] (quotation omitted). Evidentiary rulings rest within the sound discretion of the district court, and will not be reversed absent an abuse of that discretion. *State v. Smith*, 669 N.W.2d 19, 26 (Minn. 2003).

### 1. Judicial notice of the reliability of laser technology.

Appellant argues that "the admission of the laser device without sufficient evidence of its reliability by a qualified expert amounts to a judicial noticing of the device's reliability," in violation of Minn. R. Evid. 201. While we do not agree that the court took judicial notice of the laser's reliability in this case, even if it had, there would be no abuse of discretion. In *State v. Gerdes*, 291 Minn. 353, 191 N.W.2d 428 (1971), the Minnesota Supreme Court held that district courts could take judicial notice of the reliability of radar. *Id.* at 354, 191 N.W.2d at 429. The court stated:

We are in accord with the authorities which accept [HN3] the reliability of radar speedometers where there is evidence they were operated by trained personnel who have adequately tested the accuracy of the particular device by which the defendant's speed was determined. Consequently, [\*\*11] we hold that it was proper for the trial court to take judicial notice of the reliability of radar as a means of establishing speed without requiring the operated to be qualified as an expert in the field.

*Id.* at 356, 191 N.W.2d at 430-31. This court has cited the *Gerdes* holding on several occasions. *See, e.g., State, City of St. Louis Park v. Bogren*, 410 N.W.2d 383, 385 (Minn. App. 1987) (stating that "radar is accepted as a reliable measure of speed when there is evidence of proper testing and operation by trained personnel"); *State v. Dow*, 352 N.W.2d 125, 126-27 (Minn. App. 1984) (stating that "radar speedometer results are reliable if the unit is properly tested and operated"). By analogy, so long as there is adequate evidence that a laser-based speed-measuring device used to support a conviction has been tested for accuracy and that officers using the device have been trained in its use, a district court does not abuse its discretion by taking judicial notice of the device's general reliability of laser technology.

## 2. Constitutionality of Minn. Stat. § 169.14, subd. 10 (2002). [\*\*12]

*Minn. Stat. § 169.14, subd. 10(a), (b)*, sets forth the requirements for admitting evidence from a radar or other "speed-measuring device" to show that a defendant was speeding. The statute provides:

[HN4] (a) In any prosecution in which the rate of speed of a motor vehicle is relevant, evidence of the speed as indicated on radar or other speed-measuring device [\*365] is admissible in evidence, subject to the following conditions:

- (1) the officer operating the device has sufficient training to properly operate the equipment;
- (2) the officer testifies as to the manner in which the device was set up and operated;
- (3) the device was operated with minimal distortion or interference from outside sources; and
- (4) the device was tested by an accurate and reliable external mechanism, method, or system at the time it was set up.

(b) Records of tests made of such devices and kept in the regular course of operations of any law enforcement agency are admissible in evidence without further foundation as to the results of the tests. The records shall be available to a defendant upon demand. Nothing in this subdivision shall be construed to preclude or interfere with cross [\*13] examination or impeachment of evidence of the rate of speed as indicated on the radar or speed-measuring device.

*Minn. Stat. § 169.14, subd. 10(a), (b)*.

Appellant contends that *Minn. Stat. § 169.14* (2002) is unconstitutional, asserting that it violates the separation-of-powers doctrine because the legislature has removed the judiciary's power to regulate evidentiary matters. [HN5] A statute is presumed to be constitutional, and a court's power to declare a statute unconstitutional is exercised "with extreme caution and only when absolutely necessary." *State v. Machholz*, 574 N.W.2d 415, 419 (Minn. 1998) (quotation omitted).

[HN6] While the power to establish rules of evidence lies within the inherent authority of the judiciary, *State v. Willis*, 332 N.W.2d 180, 184 (Minn. 1983), courts have nevertheless enforced "reasonable statutory rules of evidence as a matter of comity where the rules were not in conflict with the Minnesota Rules of Evidence." *State v. Larson*, 453 N.W.2d 42, 46 n.3 (Minn. 1990). Therefore, the statute may set guidelines for the admissibility of evidence from a speed-measuring [\*14] device without violating the separation-of-powers doctrine so long as it does not conflict with the rules of evidence. *See State v. McCoy*, 668 N.W.2d 425, 427 (Minn. App. 2003), review granted (Minn. Nov. 18, 2003).

Here, two rules of evidence are analogous: Minn. R. Evid. 402 ("relevant evidence is [generally] admissible") and Minn. R. Evid. 803(6) ("data compilation . . . if kept in the course of a regularly conducted business activity [is admissible] unless the source of information or the method or circumstances of preparation indicate lack of

trustworthiness"). *Minn. Stat. § 169.14* does not conflict with rule 402, as evidence from a speed-measuring device is certainly relevant in establishing that a defendant was speeding, and none of the exclusionary rules apply. Furthermore, the statute does not conflict with rule 803(6) because the device's readings are routinely written on speeding tickets in the regular course of the police department's business, and there is nothing inherently untrustworthy about the evidence. Therefore, we conclude that [HN7] because *Minn. Stat. § 169.14* complies with, rather than conflicts [\*\*15] with, the rules of evidence, it does not violate the separation-of-powers doctrine.

### 3. Admissibility of the results from the laser device used on March 2.

Although the admissibility of evidence from a laser-based speed-measuring device under *Minn. Stat. § 169.14, subd. 10(a)*, is a case of first impression, we conclude that the existing caselaw concerning the admissibility of radar evidence is analogous. For example, in *Dow*, we concluded that [\*366] radar evidence was admissible where the officer was a certified radar operator, was familiar with the radar device used, and had checked the accuracy of the radar unit by performing internal and external tests both before and after his shift. *352 N.W.2d at 126*. Specifically, we stated that "the external methods, consisting of a tuning fork and a calibrated speedometer on the squad car," were sufficient to satisfy the condition that the device be "tested by an accurate and reliable external mechanism, method, or system at the time it was set up." *Id. at 127* (quoting *Minn. Stat. § 169.14, subd. 10(a)(4)*). Likewise, in *State v. Pulos*, we held that [\*\*16] the radar evidence was admissible under *subdivision 10(a)* where the police officer was a certified radar operator who conducted internal and external checks of the radar unit, and all tests indicated that the unit was in proper working order. *406 N.W.2d 75, 76 (Minn. App. 1987)*. Additionally, in *Bogren*, we concluded that radar evidence was admissible where the officer performed external and internal calibration checks both before and after issuing the appellant's ticket, records were introduced verifying the accuracy of both the radar unit and tuning forks used in testing, the officer was certified to operate the radar unit, and there was no evidence of outside interference. *410 N.W.2d at 384-85*. The record here demonstrates that the results of the laser device used by Officer Johnson were admissible under *Minn. Stat. § 169.14, subd 10(a)*.

While appellant contends that *subdivision 10(a)(4)* is not satisfied because Officer Johnson "failed to perform an external test of moving objects," [HN8] there is no requirement in the statute that the laser be tested in any particular manner. Rather, *subdivision 10(a)(4)* requires only that the [\*\*17] device be tested by an "accurate and reliable" external method. The record shows that several external methods were routinely used to test the Minneapolis Police Department's laser devices, and that those methods were reliable in determining whether the laser was working properly or experiencing accuracy problems. Therefore, *subdivision 10(a)(4)* has been satisfied, and we reject appellant's argument that a test on moving objects was required. *See Bogren, 410 N.W.2d at 385* (rejecting appellant's claim that he was entitled to question the city about whether it was licensed by the FCC to operate radar units because *section 169.14* does not require evidence of a valid FCC license).

### 4. Admissibility of Certificate of Testing and Accuracy.

Appellant also argues that the district court abused its discretion by admitting the Certificate of Testing and Accuracy, claiming that the document was hearsay and not admissible under the business-records exception. *See Minn. R. Evid. 803(6). Minn. Stat. § 169.14, subd. 10(b)*, [HN9] specifically contemplates that "records of tests made of such devices and kept in the regular course of operations of [\*\*18] any law enforcement agency are admissible in evidence without further foundation as to the results of the tests." Nonetheless, while business records are generally admissible under rule 803(6), "documents prepared solely for litigation purposes do not qualify under this exception." *Minn. R. Evid. 803(6) 1989 comm. cmt.*

Officer Johnson testified that when a laser device passes the appropriate testing, the radio shop issues a certificate of accuracy for police officers to use "for purposes like today," i.e., court proceedings. Officer Johnson also stated that the people who prepare the certificates know that the documents are regularly brought into court. But Officer Johnson also testified that the certification document was created in the [\*367] regular course of the department's business to ensure that the laser is accurately measuring speed and meeting the "manufacturer's specifications for the output and

detection circuits." Therefore, we disagree with appellant's contention that the certification was prepared "solely for litigation purposes." The comments to rule 803(6) [HN10] recognize that "if the document is prepared in part for business purposes but with an eye toward litigation the court [\*\*19] must decide if the interest in litigation sufficiently detracted from the trustworthiness of the report to preclude its admission." Minn. R. Evid. 803(6) 1989 comm. cmt. Here, the district court specifically found that the document was "reliable" despite appellant's concerns that the department knew it could be used in court proceedings. We conclude that the district court did not abuse its discretion in admitting the certificate under the business-records exception.

Appellant also contends that "even if the business records were properly introduced, [his] confrontations rights . . . were denied by the reception of hearsay to establish an element of the crime." See *State v. Matousek*, 287 Minn. 344, 350, 178 N.W.2d 604, 608 (1970) (recognizing that [HN11] if business records "are offered to prove an essential element of the crime or connect the defendant directly to the commission of the crime, then they must be proved through persons having personal knowledge of the element or connection and such persons must be available for cross-examination"). But the certificate does not raise confrontation problems because it was not offered to prove an essential element of the [\*\*20] crime or to directly connect appellant to the commission of the crime. In *State v. Jensen*, 351 N.W.2d 29, 32-33 (Minn. App. 1984), this court concluded that business records establishing that a breathalyzer test was working properly did not pose a confrontation problem because they were "merely collateral evidence of the reliability of the breathalyzer test." Similarly, in this case, the certification document was admitted only as collateral evidence of the reliability of the tests performed by Officer Johnson. Therefore, we conclude that the certificate was properly received into evidence.

##### **5. Officer Johnson's visual observations.**

Appellant's final argument is that Officer Johnson's visual speed estimation is insufficient to establish that he was speeding. In *LeMieux v. Bishop*, 296 Minn. 372, 378, 209 N.W.2d 379, 383 (1973), the supreme court recognized that [HN12] the estimation of "the speed of an automobile lies in a field in which a lay person gifted with reasonable intelligence, given a fair opportunity to observe, and having ordinary experience with moving vehicles may give opinion testimony." Beyond having this type of "ordinary experience, [\*\*21] " Officer Johnson testified that he was trained in 1978 to accurately estimate the speed of a moving vehicle within five mph, and that he has perfected that skill over the past 25 years. The laser's indication of 41 mph for appellant's speed was consistent with Johnson's visual observation; the laser was also consistent with Johnson's visual estimates of the speed of other vehicles that day. Officer Johnson explained that "the laser merely is used as a tool to verify my visual impressions." Based on this record, we agree with the district court's conclusion that "Officer Johnson's testimony is credible with respect to the fact that he's trained in determining speeds visually [and] that he observed [appellant] to be driving the vehicle . . . in excess of the speed limit somewhere around 41 miles per hour."

[\*368] Appellant also raises concerns that the district court entertained reasonable doubt by stating, "if this was a case in which Officer Johnson was here saying it was 31 miles per hour that [appellant] was going, maybe the arguments would be more persuasive; however, on the fact 11 miles per hour gap there, I find Officer Johnson's testimony credible." But the state was required [\*\*22] to prove only that appellant was exceeding the speed limit, not that he was driving 41 mph. See *State v. Aanerud*, 374 N.W.2d 491, 492 (Minn. App. 1985). In *Aanerud*, the district court found the appellant guilty of speeding, stating, "there was reasonable doubt that [the appellant] was going fifteen miles per hour over the speed limit but there can be no doubt that he exceeded the limit by some amount." We affirmed, reasoning that

the court could have found that there was a margin of error in the radar unit's readout, which would have meant that [the appellant's] car was traveling either somewhat less or somewhat more than 45 mph [in a 30 mph zone]. This would have been sufficient to raise the reasonable doubt stated by the court without the total discrediting of the reading urged by appellant.

*Id.*

Here, Officer Johnson's visual estimate was consistent with the laser's determination that appellant was traveling 41 mph. Even if we presume a five mph margin of error, the testimony still demonstrates that appellant was traveling at least 36 mph. Therefore, Officer Johnson's visual estimate alone is sufficient to establish that appellant exceeded [\*\*23] the 30 mph speed limit.

#### **DECISION**

Although we disagree that the district court took judicial notice of the general reliability of laser technology, we conclude that where there is adequate evidence of the testing of the laser device and the training of the officer using the device to support the conviction, judicial notice is appropriate. Furthermore, we conclude that because *Minn. Stat. § 169.14, subd. 10(a), (b)* (2002), does not conflict with the rules of evidence, it does not violate the separation-of-powers doctrine and is, therefore, constitutional. Additionally, we conclude that the district court did not abuse its discretion by admitting the laser reading establishing appellant's speed on March 2, 2003, under *Minn. Stat. § 169.14, subd. 10(a)*, as the record demonstrates that Officer Johnson was trained to use the laser device and that the device was routinely tested for accuracy by reliable internal and external methods. We also find no abuse of discretion in the district court's admission of the Certificate of Testing and Accuracy under the business-records exception, as the record demonstrates that the certificate [\*\*24] was reliable and was not prepared solely for litigation purposes. Finally, we conclude that Officer Johnson's visual estimate of appellant's speed was alone sufficient to support his conviction for speeding.

**Affirmed.**

**STATE OF MISSOURI, Respondent, v. MARBIS RAWLINS, Appellant****WD 51165****COURT OF APPEALS OF MISSOURI, WESTERN DISTRICT***932 S.W.2d 449; 1996 Mo. App. LEXIS 1657***October 8, 1996, Opinion Filed**

**PRIOR HISTORY:** [\*\*1] APPEAL FROM THE CIRCUIT COURT OF LAFAYETTE COUNTY. The Honorable John C. Miller, Judge.

**DISPOSITION:** Judgment of the trial court affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a decision from the Circuit Court of LaFayette County (Missouri), which convicted her of speeding in violation of *Mo. Rev. Stat. § 304.010* (1994).

**OVERVIEW:** In her first point on appeal, defendant claimed that the trial court erred by allowing the trooper to state the speed recorded by his radar device without having established a sufficient foundation for such testimony. The court found there was a sufficient foundation to establish the accuracy of the radar device at the time of the stop. The trooper testified that he tested the radar device with tuning forks at the beginning and end of his shift and, prior to stopping defendant, he had also checked the device through its internal calibration check, and it was functioning properly. Under this evidence, the results of the radar test were properly admitted. The court found no approved jury instructions. The jury instruction given was proper because it tracked the language of the statute. Because speeding under § 304.010 was a non-code offense, the trial court was correct in submitting the issue of a fine to the jury. Finally, the court found that the prosecutor could refer to a matter not in evidence because it was in retaliation to the closing argument of defense counsel.

**OUTCOME:** The court affirmed defendant's conviction.

**CORE TERMS:** radar, trooper, miles, speed, tested, closing argument, prosecutor, speeding, fine, traveling, accuracy, driving, site, defense counsel, traffic stop, courtroom, directing, tuning, fork, offense charged, guilty verdict, submitting, accurately, damaged, license, statutory language, jury instruction, state trooper, functioning, retaliation

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN1] A site test is of questionable utility in the case of a moving radar device, and therefore when moving radar is at issue, the controlling principle is that the State must prove the operational accuracy of the radar device at the time, not site, of its use in the stop at issue.

***Commercial Law (UCC) > Negotiable Instruments (Article 3) > General Overview  
Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Criminal Law & Procedure > Verdicts > General Overview***

[HN2] The Mo. App. Instructions-Crim. 3d series does not include a specific verdict directing instruction for the offense of speeding. Mo. App. Instructions-Crim. 3d 304.02 is a generic verdict directing instruction, and its Notes on Use 2 states that Mo. App. Instructions-Crim. 3d 304.02 must be followed in cases where there is no appropriate verdict directing instruction for the crime charged.

***Commercial Law (UCC) > Negotiable Instruments (Article 3) > General Overview  
Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Criminal Law & Procedure > Verdicts > General Overview***

[HN3] Because Mo. App. Instructions-Crim. 3d 304.02 is a generic instruction, it does not direct how the elements of the offense of speeding should be framed. Notes on Use 10 of Mo. App. Instructions-Crim. 3d 304.02 simply suggests a careful reading of the appropriate statutes, examination of the charge against the defendant, and consideration of the evidence. A verdict-directing instruction must contain each element of the offense charged and must require the jury to find every fact necessary to constitute essential elements of offense charged. In cases challenging the language used in verdict directors, it has been repeatedly held that a verdict directing instruction, which is not erroneous for some other reason, meets the minimum requirements when in words and effect it follows the language of the statute.

***Commercial Law (UCC) > Negotiable Instruments (Article 3) > General Overview  
Criminal Law & Procedure > Jury Instructions > Particular Instructions > General Overview  
Criminal Law & Procedure > Sentencing > Fines***

[HN4] Under Mo. App. Instructions-Crim. 3d Notes on Use 16, when the offense charged is a class A, B, C, or D felony; an A, B or C misdemeanor; an infraction; or an unclassified code offense, the issue of a fine is to be determined by the court and not submitted to the jury. When the crime charged is a non-code offense, however, the issue of a fine is submitted to the jury.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN5] The offense of speeding, under *Mo. Rev. Stat. § 304.010*, is a non-code offense.

***Criminal Law & Procedure > Trials > Closing Arguments > Evidence Not Admitted  
Criminal Law & Procedure > Appeals > Reversible Errors > General Overview  
Legal Ethics > Prosecutorial Conduct***

[HN6] While it is improper for a prosecutor in closing argument to refer to subject matter not in evidence, there is no reversible error if such references are in retaliation to the closing argument of defense counsel.

**COUNSEL:** Weldon W. Perry, Jr. Lexington, Missouri, for appellants.

Terrence M. Messonnier Lexington, Missouri, for respondents.

**JUDGES:** Before Smith, P.J., Breckenridge and Ellis, JJ. All concur.

**OPINION BY: PATRICIA BRECKENRIDGE**

**OPINION:** [\*450] Marbis D. Rawlins appeals from a conviction of speeding, in violation of § 304.010, RSMo 1994. Ms. Rawlins contends that the trial court erred by allowing a state trooper to testify that he used a radar device to determine the speed of Ms. Rawlins' vehicle without a showing that the device had been adequately tested; that the trial court erred by submitting a jury instruction which authorized a guilty verdict on a finding of any speed exceeding 70 miles per hour, and which improperly allowed the jury to set the fine; and that the trial court erred by allowing the prosecutor to assert, during closing argument, that Ms. Rawlins could pursue a separate civil action to assert her claim that the trooper acted improperly when he stopped her, as such argument was outside the scope of the record in this case.

The judgment of the trial court is [\*\*2] affirmed.

On September 24, 1994, Trooper Eric Criss of the Missouri State Highway Patrol was traveling on eastbound Interstate 70 when he observed Ms. Rawlins' vehicle traveling westbound at what he believed to be an excessive speed. When Trooper Criss [\*451] checked Ms. Rawlins' speed with his radar unit, she was traveling at 86 miles per hour. Trooper Criss crossed the median, stopped the vehicle which Ms. Rawlins was driving, and asked her for her driver's license. A radio check of the driver's license which Ms. Rawlins gave him indicated that it was not on file with the issuing state, the State of New Jersey. Also, Trooper Criss received conflicting answers when he asked Ms. Rawlins and her passenger about the purpose of their trip, which made him suspicious that she might be a drug courier. Trooper Criss informed Ms. Rawlins that she was under arrest for operating a vehicle without a valid driver's license.

Trooper Criss placed Ms. Rawlins in handcuffs and waited for a drug-sniffing dog to arrive for a search of the vehicle. No drugs were found during the search, and Ms. Rawlins was released after being given a speeding ticket for traveling 86 miles per hour in a 65 miles per hour [\*\*3] zone. The traffic stop lasted a total of two and a half hours.

At the ensuing trial for speeding, Trooper Criss described the procedures he used to ensure that the radar device was operating accurately. Trooper Criss testified that he tested his radar device with tuning forks each day, both at the beginning and at the end of his shift, as well as after each enforcement. In addition, Trooper Criss testified that he used the internal calibration within the device to test its accuracy. Trooper Criss also stated that he had followed these procedures prior to his stop of Ms. Rawlins. Trooper Criss further testified that he had received training in the use and testing of both the radar device and the tuning forks, and that he had received a certificate in connection with this training.

When Trooper Criss was then asked how fast Ms. Rawlins was driving when he checked her speed with the radar device, Ms. Rawlins' counsel objected on the ground of a "lack of foundation concerning time, nature, extent, and location of test to ensure operability and accuracy of the device on this occasion." The trial court overruled the objection, and Trooper Criss testified that the radar device clocked Ms. [\*\*4] Rawlins at 86 miles per hour.

The jury found Ms. Rawlins guilty and assessed a fine in the amount of \$ 150.00. At the time of sentencing, the trial court followed the recommendation of the jury and ordered Ms. Rawlins to pay a fine of \$ 150.00 and court costs. Ms. Rawlins appeals.

In her first point on appeal, Ms. Rawlins claims that the trial court erred by allowing Trooper Criss to state the speed recorded by his radar device without having established a sufficient foundation for such testimony. According to Ms. Rawlins, the State failed to establish the accuracy of the radar device by showing that it had been tested at a time sufficiently close to the stop or at a location near the scene of the stop.

Ms. Rawlins argues that her conviction should be reversed because this case is controlled by *City of St. Louis v. Boecker*, 370 S.W.2d 731, 737 (Mo. App. 1963), *State v. Weatherwax*, 635 S.W.2d 34, 35 (Mo. App. 1982), and *City of Jackson v. Langford*, 648 S.W.2d 927, 929 (Mo. App. 1983), which hold that a speeding conviction cannot be based

upon a radar device reading without proof that the device was tested and found to be functioning properly at the site of [\*\*5] the alleged violation and reasonably close to the time it occurred.

In **Boecker**, the officer tested the radar device with a tuning fork before he left the police station to go on duty. 370 S.W.2d at 734. In **Weatherwax**, the officer tested the radar device with tuning forks while parked in the driveway of his home prior to going on duty. 635 S.W.2d at 34-35. In **Langford**, there was no evidence of the time and place of testing. 648 S.W.2d at 929. In these cases, the courts held the evidence to be insufficient to support a conviction.

These cases, however, are not controlling. First, they involve a stationary radar device, not moving radar as we have here. As the Missouri Supreme Court noted in *State v. Calvert*, 682 S.W.2d 474, 478 (Mo. banc 1984), [HN1] a site test is of questionable utility in the case of a moving radar device, and therefore when moving radar is at issue, the controlling principle is that the State must prove the operational accuracy of the [\*452] radar device at the time, not site, of its use in the stop at issue.

With respect to the requirement that the radar device be shown to be operating accurately at the time of its [\*\*6] use relative to the violation, the **Calvert** court looked to the facts of the case. 682 S.W.2d at 477-78. There, the arresting officer tested the radar device at the beginning and end of his shift on the day of the arrest; he was aware of the possibility of external interference with the radar readings, but had never experienced any interference in the area where he arrested the defendant; he was trained to evaluate the accuracy of the radar unit and could detect and correct for any spurious readings; and he periodically checked the radar readings with his calibrated speedometer. **Id.** In finding that this evidence was sufficient proof that the radar unit was operating accurately at the time of arrest, the Missouri Supreme Court effectively rejected the more stringent requirement of **Boecker** and **Weatherwax** that the radar unit be tested reasonably close to the time of the stop. **Id.** at 478.

Other courts have utilized the Calvert standard to affirm the admission of radar test results where there was no proof of a test of the radar unit at the site of the traffic stop or reasonably close in time to the stop. *State v. Shoemaker* [\*\*7] , 798 S.W.2d 191, 193 (Mo. App. 1990); *City of Berkeley v. Stringfellow*, 783 S.W.2d 501, 504 (Mo. App. 1990); *State v. Guenther*, 744 S.W.2d 564, 565 (Mo. App. 1988).

In applying this standard to the facts of this case, we find there is sufficient foundation to establish the accuracy of the radar device at the time of Ms. Rawlins' stop. Trooper Criss testified that he tested the radar device with tuning forks at the beginning and end of his shift. Prior to stopping Ms. Rawlins, he had also checked the device through its internal calibration check, and it was functioning properly. He was trained to detect if there was any radio frequency interference in the location of Ms. Rawlins' stop and there was none. Under this evidence, the results of the radar test were properly admitted. Ms. Rawlins' first point on appeal is denied.

In her second point on appeal, Ms. Rawlins claims that the trial court erred by submitting a jury instruction which did not require a finding that she was driving at a speed of 86 miles per hour, but instead authorized a guilty verdict on a finding of any speed exceeding 70 miles per hour. Ms. Rawlins further complains that the instruction allowed the [\*\*8] jury, not the trial court, to set the fine, and she argues that such a provision was in violation of Notes on Use 2 accompanying MAI-CR3d 304.02.

[HN2] The MAI-CR3d series does not include a specific verdict directing instruction for the offense of speeding. MAI-CR3d 304.02 is a generic verdict directing instruction, and its Notes on Use 2 states that MAI-CR3d 304.02 must be followed in cases where there is no appropriate verdict directing instruction for the crime charged. In reviewing the verdict director submitted by the trial court as Instruction No. 5, we find that, although it purports to follow the format of MAI-CR3d 332.40, it also complies with the format of MAI-CR3d 304.02.

One element of Instruction No. 5, as submitted by the trial court, required that the jury find that Ms. Rawlins drove her motor vehicle "at a speed in excess of seventy miles per hour." The State's evidence was that Ms. Rawlins was traveling at 86 miles per hour, while Ms. Rawlins testified that her speed was 65 or 66 miles per hour, but in no event

greater than 70. Ms. Rawlins contends that Instruction No. 5 gave the jury a roving commission, because the jury may have found her guilty predicated upon a finding [\*\*9] of fact contrary to evidence, i.e., that she was driving at a speed of 71 to 85 miles per hour, or over 86 miles per hour.

[HN3] Because MAI-CR3d 304.02 is a generic instruction, it does not direct how the elements of the offense of speeding should be framed. Notes on Use 10 of MAI-CR3d 304.02 simply suggests a careful reading of the appropriate statutes, examination of the charge against the defendant, and consideration of the evidence. "A verdict-directing instruction must contain each element of the offense charged and must require the jury to find every fact necessary to constitute essential [\*453] elements of offense charged." *State v. Ward*, 745 S.W.2d 666, 670 (Mo. banc 1988). In cases challenging the language used in verdict directors, "it has been repeatedly held that a verdict directing instruction, which is not erroneous for some other reason, meets the minimum requirements when in words and effect it follows the language of the statute. . . ." *State v. Hammond*, 571 S.W.2d 114, 116 (Mo. banc 1978) (quoting *State v. Jones*, 365 S.W.2d 508, 515 (Mo. 1963) (citations omitted)).

Here, Instruction No. 5 incorporated the concept and a portion of the language of § [\*\*10] 304.010, which provides that no vehicle shall be "operated in excess of seventy miles per hour. . . ." Nothing in the charge or evidence of the case makes this statutory language inappropriate. From the testimony at trial, Ms. Rawlins was either driving 86 miles per hour or under 70 miles per hour. There is no contention by anyone of any other speed. The use of the statutory language in the instruction to require a finding that Ms. Rawlins was driving in excess of 70 miles per hour was not erroneous.

Ms. Rawlins next contends that the instruction was contrary to MAI-CR3d 304.02, Notes on Use 2, because it directed the jury, not the court, to set the fine. Her claim of error fails, however, because Notes on Use 16, rather than Notes on Use 2, governs the submission of punishment to the jury. [HN4] Under Notes on Use 16, when the offense charged is a class A, B, C, or D felony; an A, B or C misdemeanor; an infraction; or an unclassified code offense, the issue of a fine is to be determined by the court and not submitted to the jury. When the crime charged is a non-code offense, however, the issue of a fine is submitted to the jury.

[HN5] The offense of speeding, under § 304.010, is a non-code [\*\*11] offense. **See** *State v. Canepa*, 670 S.W.2d 205, 206 (Mo. App. 1984). Therefore, the trial court was correct in submitting the issue of a fine to the jury. **Id.** Point two is denied.

In her third point on appeal, Ms. Rawlins claims that the trial court erred by allowing the prosecutor, during the rebuttal portion of his closing argument, to make statements that were outside the scope of the record in this case. The State, on the other hand, argues that the prosecutor's remarks were a proper response to issues raised during defense counsel's closing argument.

During closing argument, defense counsel referred to the deep personal disgrace which Ms. Rawlins and her passenger felt they had experienced during the traffic stop, and emphasized that Ms. Rawlins spent two-and-a-half hours in handcuffs during a fruitless search. Defense counsel argued that Ms. Rawlins had already been punished enough by the nature of the stop and, for this reason, the jury should find her not guilty. Specifically, defense counsel stated:

Even if there was overwhelming, competent evidence in this case that she was traveling 86 miles per hour as alleged in the ticket that Trooper [\*\*12] Criss filled out here, . . . did she deserve to be treated like she was? Is that fair? Is that free? I'm here to respectfully submit to you on Marbis' behalf that the answer to those questions is no.

And how do you stop that overbearing, oppressive, intrusive governmental intervention in someone's life in these same or similar circumstances? There's only one way, ladies and gentlemen. There's only way [sic]. And that's through you jurors collectively assembled as you are in this courtroom today, because your verdict is going to send a message. It's going to send a message as to whether or not this kind of thing is going to be countenanced, approved, tolerated, acquiesced. Is it? Should it be?

....

I don't think we want that kind of overly aggressive, intrusive law enforcement in this country, in this county, predicated on threshold facts like these, escalating into a two-and-a-half-hour ordeal in the darkness, in the cold on something like this.

Ladies and gentlemen, long story short, I'm here on behalf of Marbis to ask you, when you retire to your jury room, to give her the benefit of the reasonable doubt on this occasion under the totality of these circumstances. I'm [\*\*13] here to respectfully [\*454] submit to you that if punishment is deserved under these circumstances here for a speeding episode, she's already served it. She served it out there on that highway. And we don't need to add financial insult to emotional injury. We're asking for your verdict of not guilty and the form and signature upon Verdict Form B. Thank you.

In the rebuttal portion of closing argument, the prosecutor responded to defense counsel's plea for jury nullification by arguing that if Ms. Rawlins was wrongfully damaged by the nature of the traffic stop, she would be able to pursue a claim for that damage in a separate cause of action. The prosecutor stated:

Let me start with a point Mr. Perry raised during his closing argument, that maybe, if you think about it long, you'll realize that life's not correct. He's argued that she has been damaged by what Trooper Criss did and that the only place in this country that she can come to get her rights rectified is this courtroom. Mr. Perry knows that that's not true. Mr. Perry knows there's a courtroom in Kansas City, a federal courtroom, where people who believe they've been held in violation of their rights can go and seek money damages. [\*\*14] . . . If Ms. Rawlins thinks she was damaged by that, she can file a lawsuit and recover those damages. . . . Regardless of what you do today -- even if you returned a not guilty verdict today just to avoid additional punishment, she could still go and get full recovery.

Defense counsel then objected that the prosecutor's argument was improper, and the objection was overruled by the trial court.

In her brief, Ms. Rawlins argues that the prosecutor's remarks on the issue of her ability to seek redress in a subsequent civil suit were improper because they were beyond the issues and evidence which the jury had before it in this case. But Ms. Rawlins' argument does not merit relief, for [HN6] while it is improper for a prosecutor in closing argument to refer to subject matter not in evidence, there is no reversible error if such references are in retaliation to the closing argument of defense counsel. *State v. Griffin, 745 S.W.2d 183, 185 (Mo. App. 1987)*. That is the case here, where defense counsel had invited retaliation by urging the jury to acquit his client as a way of compensating for the alleged improprieties by a state trooper. A defendant may not provoke a reply to his [\*\*15] or her own argument and then claim error. **Id.** Point denied.

The judgment of the trial court is affirmed.

**STATE OF MISSOURI, Respondent, v. MARBIS RAWLINS, Appellant****WD 51165****COURT OF APPEALS OF MISSOURI, WESTERN DISTRICT***932 S.W.2d 449; 1996 Mo. App. LEXIS 1657***October 8, 1996, Opinion Filed**

**PRIOR HISTORY:** [\*\*1] APPEAL FROM THE CIRCUIT COURT OF LAFAYETTE COUNTY. The Honorable John C. Miller, Judge.

**DISPOSITION:** Judgment of the trial court affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed a decision from the Circuit Court of LaFayette County (Missouri), which convicted her of speeding in violation of *Mo. Rev. Stat. § 304.010* (1994).

**OVERVIEW:** In her first point on appeal, defendant claimed that the trial court erred by allowing the trooper to state the speed recorded by his radar device without having established a sufficient foundation for such testimony. The court found there was a sufficient foundation to establish the accuracy of the radar device at the time of the stop. The trooper testified that he tested the radar device with tuning forks at the beginning and end of his shift and, prior to stopping defendant, he had also checked the device through its internal calibration check, and it was functioning properly. Under this evidence, the results of the radar test were properly admitted. The court found no approved jury instructions. The jury instruction given was proper because it tracked the language of the statute. Because speeding under § 304.010 was a non-code offense, the trial court was correct in submitting the issue of a fine to the jury. Finally, the court found that the prosecutor could refer to a matter not in evidence because it was in retaliation to the closing argument of defense counsel.

**OUTCOME:** The court affirmed defendant's conviction.

**CORE TERMS:** radar, trooper, miles, speed, tested, closing argument, prosecutor, speeding, fine, traveling, accuracy, driving, site, defense counsel, traffic stop, courtroom, directing, tuning, fork, offense charged, guilty verdict, submitting, accurately, damaged, license, statutory language, jury instruction, state trooper, functioning, retaliation

[HN2] The Mo. App. Instructions-Crim. 3d series does not include a specific verdict directing instruction for the offense of speeding. Mo. App. Instructions-Crim. 3d 304.02 is a generic verdict directing instruction, and its Notes on Use 2 states that Mo. App. Instructions-Crim. 3d 304.02 must be followed in cases where there is no appropriate verdict directing instruction for the crime charged.

***Commercial Law (UCC) > Negotiable Instruments (Article 3) > General Overview  
Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Criminal Law & Procedure > Verdicts > General Overview***

[HN3] Because Mo. App. Instructions-Crim. 3d 304.02 is a generic instruction, it does not direct how the elements of the offense of speeding should be framed. Notes on Use 10 of Mo. App. Instructions-Crim. 3d 304.02 simply suggests a careful reading of the appropriate statutes, examination of the charge against the defendant, and consideration of the evidence. A verdict-directing instruction must contain each element of the offense charged and must require the jury to find every fact necessary to constitute essential elements of offense charged. In cases challenging the language used in verdict directors, it has been repeatedly held that a verdict directing instruction, which is not erroneous for some other reason, meets the minimum requirements when in words and effect it follows the language of the statute.

***Commercial Law (UCC) > Negotiable Instruments (Article 3) > General Overview  
Criminal Law & Procedure > Jury Instructions > Particular Instructions > General Overview  
Criminal Law & Procedure > Sentencing > Fines***

[HN4] Under Mo. App. Instructions-Crim. 3d Notes on Use 16, when the offense charged is a class A, B, C, or D felony; an A, B or C misdemeanor; an infraction; or an unclassified code offense, the issue of a fine is to be determined by the court and not submitted to the jury. When the crime charged is a non-code offense, however, the issue of a fine is submitted to the jury.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN5] The offense of speeding, under *Mo. Rev. Stat. § 304.010*, is a non-code offense.

***Criminal Law & Procedure > Trials > Closing Arguments > Evidence Not Admitted  
Criminal Law & Procedure > Appeals > Reversible Errors > General Overview  
Legal Ethics > Prosecutorial Conduct***

[HN6] While it is improper for a prosecutor in closing argument to refer to subject matter not in evidence, there is no reversible error if such references are in retaliation to the closing argument of defense counsel.

**COUNSEL:** Weldon W. Perry, Jr. Lexington, Missouri, for appellants.

Terrence M. Messonnier Lexington, Missouri, for respondents.

**JUDGES:** Before Smith, P.J., Breckenridge and Ellis, JJ. All concur.

**OPINION BY: PATRICIA BRECKENRIDGE**

**OPINION:** [\*450] Marbis D. Rawlins appeals from a conviction of speeding, in violation of § 304.010, RSMo 1994. Ms. Rawlins contends that the trial court erred by allowing a state trooper to testify that he used a radar device to determine the speed of Ms. Rawlins' vehicle without a showing that the device had been adequately tested; that the trial court erred by submitting a jury instruction which authorized a guilty verdict on a finding of any speed exceeding 70 miles per hour, and which improperly allowed the jury to set the fine; and that the trial court erred by allowing the prosecutor to assert, during closing argument, that Ms. Rawlins could pursue a separate civil action to assert her claim that the trooper acted improperly when he stopped her, as such argument was outside the scope of the record in this case.

The judgment of the trial court is [\*\*2] affirmed.

On September 24, 1994, Trooper Eric Criss of the Missouri State Highway Patrol was traveling on eastbound Interstate 70 when he observed Ms. Rawlins' vehicle traveling westbound at what he believed to be an excessive speed. When Trooper Criss [\*451] checked Ms. Rawlins' speed with his radar unit, she was traveling at 86 miles per hour. Trooper Criss crossed the median, stopped the vehicle which Ms. Rawlins was driving, and asked her for her driver's license. A radio check of the driver's license which Ms. Rawlins gave him indicated that it was not on file with the issuing state, the State of New Jersey. Also, Trooper Criss received conflicting answers when he asked Ms. Rawlins and her passenger about the purpose of their trip, which made him suspicious that she might be a drug courier. Trooper Criss informed Ms. Rawlins that she was under arrest for operating a vehicle without a valid driver's license.

Trooper Criss placed Ms. Rawlins in handcuffs and waited for a drug-sniffing dog to arrive for a search of the vehicle. No drugs were found during the search, and Ms. Rawlins was released after being given a speeding ticket for traveling 86 miles per hour in a 65 miles per hour [\*\*3] zone. The traffic stop lasted a total of two and a half hours.

At the ensuing trial for speeding, Trooper Criss described the procedures he used to ensure that the radar device was operating accurately. Trooper Criss testified that he tested his radar device with tuning forks each day, both at the beginning and at the end of his shift, as well as after each enforcement. In addition, Trooper Criss testified that he used the internal calibration within the device to test its accuracy. Trooper Criss also stated that he had followed these procedures prior to his stop of Ms. Rawlins. Trooper Criss further testified that he had received training in the use and testing of both the radar device and the tuning forks, and that he had received a certificate in connection with this training.

When Trooper Criss was then asked how fast Ms. Rawlins was driving when he checked her speed with the radar device, Ms. Rawlins' counsel objected on the ground of a "lack of foundation concerning time, nature, extent, and location of test to ensure operability and accuracy of the device on this occasion." The trial court overruled the objection, and Trooper Criss testified that the radar device clocked Ms. [\*\*4] Rawlins at 86 miles per hour.

The jury found Ms. Rawlins guilty and assessed a fine in the amount of \$ 150.00. At the time of sentencing, the trial court followed the recommendation of the jury and ordered Ms. Rawlins to pay a fine of \$ 150.00 and court costs. Ms. Rawlins appeals.

In her first point on appeal, Ms. Rawlins claims that the trial court erred by allowing Trooper Criss to state the speed recorded by his radar device without having established a sufficient foundation for such testimony. According to Ms. Rawlins, the State failed to establish the accuracy of the radar device by showing that it had been tested at a time sufficiently close to the stop or at a location near the scene of the stop.

Ms. Rawlins argues that her conviction should be reversed because this case is controlled by *City of St. Louis v. Boecker*, 370 S.W.2d 731, 737 (Mo. App. 1963), *State v. Weatherwax*, 635 S.W.2d 34, 35 (Mo. App. 1982), and *City of Jackson v. Langford*, 648 S.W.2d 927, 929 (Mo. App. 1983), which hold that a speeding conviction cannot be based

upon a radar device reading without proof that the device was tested and found to be functioning properly at the site of [\*\*5] the alleged violation and reasonably close to the time it occurred.

In **Boecker**, the officer tested the radar device with a tuning fork before he left the police station to go on duty. 370 S.W.2d at 734. In **Weatherwax**, the officer tested the radar device with tuning forks while parked in the driveway of his home prior to going on duty. 635 S.W.2d at 34-35. In **Langford**, there was no evidence of the time and place of testing. 648 S.W.2d at 929. In these cases, the courts held the evidence to be insufficient to support a conviction.

These cases, however, are not controlling. First, they involve a stationary radar device, not moving radar as we have here. As the Missouri Supreme Court noted in *State v. Calvert*, 682 S.W.2d 474, 478 (Mo. banc 1984), [HN1] a site test is of questionable utility in the case of a moving radar device, and therefore when moving radar is at issue, the controlling principle is that the State must prove the operational accuracy of the [\*452] radar device at the time, not site, of its use in the stop at issue.

With respect to the requirement that the radar device be shown to be operating accurately at the time of its [\*\*6] use relative to the violation, the **Calvert** court looked to the facts of the case. 682 S.W.2d at 477-78. There, the arresting officer tested the radar device at the beginning and end of his shift on the day of the arrest; he was aware of the possibility of external interference with the radar readings, but had never experienced any interference in the area where he arrested the defendant; he was trained to evaluate the accuracy of the radar unit and could detect and correct for any spurious readings; and he periodically checked the radar readings with his calibrated speedometer. **Id.** In finding that this evidence was sufficient proof that the radar unit was operating accurately at the time of arrest, the Missouri Supreme Court effectively rejected the more stringent requirement of **Boecker** and **Weatherwax** that the radar unit be tested reasonably close to the time of the stop. **Id.** at 478.

Other courts have utilized the Calvert standard to affirm the admission of radar test results where there was no proof of a test of the radar unit at the site of the traffic stop or reasonably close in time to the stop. *State v. Shoemaker* [\*\*7] , 798 S.W.2d 191, 193 (Mo. App. 1990); *City of Berkeley v. Stringfellow*, 783 S.W.2d 501, 504 (Mo. App. 1990); *State v. Guenther*, 744 S.W.2d 564, 565 (Mo. App. 1988).

In applying this standard to the facts of this case, we find there is sufficient foundation to establish the accuracy of the radar device at the time of Ms. Rawlins' stop. Trooper Criss testified that he tested the radar device with tuning forks at the beginning and end of his shift. Prior to stopping Ms. Rawlins, he had also checked the device through its internal calibration check, and it was functioning properly. He was trained to detect if there was any radio frequency interference in the location of Ms. Rawlins' stop and there was none. Under this evidence, the results of the radar test were properly admitted. Ms. Rawlins' first point on appeal is denied.

In her second point on appeal, Ms. Rawlins claims that the trial court erred by submitting a jury instruction which did not require a finding that she was driving at a speed of 86 miles per hour, but instead authorized a guilty verdict on a finding of any speed exceeding 70 miles per hour. Ms. Rawlins further complains that the instruction allowed the [\*\*8] jury, not the trial court, to set the fine, and she argues that such a provision was in violation of Notes on Use 2 accompanying MAI-CR3d 304.02.

[HN2] The MAI-CR3d series does not include a specific verdict directing instruction for the offense of speeding. MAI-CR3d 304.02 is a generic verdict directing instruction, and its Notes on Use 2 states that MAI-CR3d 304.02 must be followed in cases where there is no appropriate verdict directing instruction for the crime charged. In reviewing the verdict director submitted by the trial court as Instruction No. 5, we find that, although it purports to follow the format of MAI-CR3d 332.40, it also complies with the format of MAI-CR3d 304.02.

One element of Instruction No. 5, as submitted by the trial court, required that the jury find that Ms. Rawlins drove her motor vehicle "at a speed in excess of seventy miles per hour." The State's evidence was that Ms. Rawlins was traveling at 86 miles per hour, while Ms. Rawlins testified that her speed was 65 or 66 miles per hour, but in no event

greater than 70. Ms. Rawlins contends that Instruction No. 5 gave the jury a roving commission, because the jury may have found her guilty predicated upon a finding [\*\*9] of fact contrary to evidence, i.e., that she was driving at a speed of 71 to 85 miles per hour, or over 86 miles per hour.

[HN3] Because MAI-CR3d 304.02 is a generic instruction, it does not direct how the elements of the offense of speeding should be framed. Notes on Use 10 of MAI-CR3d 304.02 simply suggests a careful reading of the appropriate statutes, examination of the charge against the defendant, and consideration of the evidence. "A verdict-directing instruction must contain each element of the offense charged and must require the jury to find every fact necessary to constitute essential [\*453] elements of offense charged." *State v. Ward*, 745 S.W.2d 666, 670 (Mo. banc 1988). In cases challenging the language used in verdict directors, "it has been repeatedly held that a verdict directing instruction, which is not erroneous for some other reason, meets the minimum requirements when in words and effect it follows the language of the statute. . . ." *State v. Hammond*, 571 S.W.2d 114, 116 (Mo. banc 1978) (quoting *State v. Jones*, 365 S.W.2d 508, 515 (Mo. 1963) (citations omitted)).

Here, Instruction No. 5 incorporated the concept and a portion of the language of § [\*\*10] 304.010, which provides that no vehicle shall be "operated in excess of seventy miles per hour. . . ." Nothing in the charge or evidence of the case makes this statutory language inappropriate. From the testimony at trial, Ms. Rawlins was either driving 86 miles per hour or under 70 miles per hour. There is no contention by anyone of any other speed. The use of the statutory language in the instruction to require a finding that Ms. Rawlins was driving in excess of 70 miles per hour was not erroneous.

Ms. Rawlins next contends that the instruction was contrary to MAI-CR3d 304.02, Notes on Use 2, because it directed the jury, not the court, to set the fine. Her claim of error fails, however, because Notes on Use 16, rather than Notes on Use 2, governs the submission of punishment to the jury. [HN4] Under Notes on Use 16, when the offense charged is a class A, B, C, or D felony; an A, B or C misdemeanor; an infraction; or an unclassified code offense, the issue of a fine is to be determined by the court and not submitted to the jury. When the crime charged is a non-code offense, however, the issue of a fine is submitted to the jury.

[HN5] The offense of speeding, under § 304.010, is a non-code [\*\*11] offense. **See** *State v. Canepa*, 670 S.W.2d 205, 206 (Mo. App. 1984). Therefore, the trial court was correct in submitting the issue of a fine to the jury. **Id.** Point two is denied.

In her third point on appeal, Ms. Rawlins claims that the trial court erred by allowing the prosecutor, during the rebuttal portion of his closing argument, to make statements that were outside the scope of the record in this case. The State, on the other hand, argues that the prosecutor's remarks were a proper response to issues raised during defense counsel's closing argument.

During closing argument, defense counsel referred to the deep personal disgrace which Ms. Rawlins and her passenger felt they had experienced during the traffic stop, and emphasized that Ms. Rawlins spent two-and-a-half hours in handcuffs during a fruitless search. Defense counsel argued that Ms. Rawlins had already been punished enough by the nature of the stop and, for this reason, the jury should find her not guilty. Specifically, defense counsel stated:

Even if there was overwhelming, competent evidence in this case that she was traveling 86 miles per hour as alleged in the ticket that Trooper [\*\*12] Criss filled out here, . . . did she deserve to be treated like she was? Is that fair? Is that free? I'm here to respectfully submit to you on Marbis' behalf that the answer to those questions is no.

And how do you stop that overbearing, oppressive, intrusive governmental intervention in someone's life in these same or similar circumstances? There's only one way, ladies and gentlemen. There's only way [sic]. And that's through you jurors collectively assembled as you are in this courtroom today, because your verdict is going to send a message. It's going to send a message as to whether or not this kind of thing is going to be countenanced, approved, tolerated, acquiesced. Is it? Should it be?

....

I don't think we want that kind of overly aggressive, intrusive law enforcement in this country, in this county, predicated on threshold facts like these, escalating into a two-and-a-half-hour ordeal in the darkness, in the cold on something like this.

Ladies and gentlemen, long story short, I'm here on behalf of Marbis to ask you, when you retire to your jury room, to give her the benefit of the reasonable doubt on this occasion under the totality of these circumstances. I'm [\*\*13] here to respectfully [\*454] submit to you that if punishment is deserved under these circumstances here for a speeding episode, she's already served it. She served it out there on that highway. And we don't need to add financial insult to emotional injury. We're asking for your verdict of not guilty and the form and signature upon Verdict Form B. Thank you.

In the rebuttal portion of closing argument, the prosecutor responded to defense counsel's plea for jury nullification by arguing that if Ms. Rawlins was wrongfully damaged by the nature of the traffic stop, she would be able to pursue a claim for that damage in a separate cause of action. The prosecutor stated:

Let me start with a point Mr. Perry raised during his closing argument, that maybe, if you think about it long, you'll realize that life's not correct. He's argued that she has been damaged by what Trooper Criss did and that the only place in this country that she can come to get her rights rectified is this courtroom. Mr. Perry knows that that's not true. Mr. Perry knows there's a courtroom in Kansas City, a federal courtroom, where people who believe they've been held in violation of their rights can go and seek money damages. [\*\*14] . . . If Ms. Rawlins thinks she was damaged by that, she can file a lawsuit and recover those damages. . . . Regardless of what you do today -- even if you returned a not guilty verdict today just to avoid additional punishment, she could still go and get full recovery.

Defense counsel then objected that the prosecutor's argument was improper, and the objection was overruled by the trial court.

In her brief, Ms. Rawlins argues that the prosecutor's remarks on the issue of her ability to seek redress in a subsequent civil suit were improper because they were beyond the issues and evidence which the jury had before it in this case. But Ms. Rawlins' argument does not merit relief, for [HN6] while it is improper for a prosecutor in closing argument to refer to subject matter not in evidence, there is no reversible error if such references are in retaliation to the closing argument of defense counsel. *State v. Griffin, 745 S.W.2d 183, 185 (Mo. App. 1987)*. That is the case here, where defense counsel had invited retaliation by urging the jury to acquit his client as a way of compensating for the alleged improprieties by a state trooper. A defendant may not provoke a reply to his [\*\*15] or her own argument and then claim error. **Id.** Point denied.

The judgment of the trial court is affirmed.

**STATE OF MISSOURI, Plaintiff-Respondent, vs. ROBERT MICHAEL PATRICK,  
Defendant-Appellant.**

**No. 20417**

**COURT OF APPEALS OF MISSOURI, SOUTHERN DISTRICT, DIVISION TWO**

*920 S.W.2d 633; 1996 Mo. App. LEXIS 716*

**April 23, 1996, FILED**

**PRIOR HISTORY:** [\*\*1]

APPEAL FROM THE CIRCUIT COURT OF RIPLEY COUNTY. Honorable W. Robert Cope, Circuit Judge.

**DISPOSITION:**

AFFIRMED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Circuit Court of Ripley County (Missouri) that found him guilty, following a jury trial, of driving a motor vehicle in excess of the speed limit set by law in *Mo. Rev. Stat. § 304.010.2*.

**OVERVIEW:** A highway patrol officer stopped and ticketed defendant for traveling 95 miles per hour in a 55 mile per hour zone. Defendant was found guilty of driving a motor vehicle in excess of the speed limit set in *§ 304.010.2*. He was sentenced to 60 days in the county jail and fined \$ 500. The court affirmed because the ticket was not a nullity and so fatally defective that the trial court had no power to amend the information due to the lack of jurisdiction. Defendant did not go to trial on the ticket, but rather on an amended information in lieu of the ticket. Whatever the defect in the ticket, the trial court still had subject matter jurisdiction over the offense and personal jurisdiction over defendant. Therefore, the trial court had the authority to permit the amendment of the information so long as the correction did not violate *Mo. R. Crim. P. 23.08* and *Mo. Rev. Stat. § 545.300*. Furthermore, the trial court did not abuse its discretion or prejudice defendant in allowing the state to file an amended information and endorse a surprise witness on the day of trial, and in denying defendant's motion for a continuance.

**OUTCOME:** The court affirmed the judgment of the trial court that convicted and sentenced defendant for driving a motor vehicle in excess of the statutory speed limit.

**CORE TERMS:** ticket, highway, radar, miles, continuance, speeding, mph, endorsement, prosecutor, driving, speed,

defense counsel, tuning, forks, amended information, maximum speed, motor vehicle, surprise, abused, traffic ticket, abuse of discretion, fatally defective, surprised, different offense, accuracy, originally charged, speed limit, disadvantaged, disadvantage, indictment

### **LexisNexis(R) Headnotes**

#### ***Civil Procedure > Jurisdiction > General Overview***

#### ***Criminal Law & Procedure > Criminal Offenses > Weapons > Use > General Overview***

#### ***Criminal Law & Procedure > Accusatory Instruments > Indictments***

[HN1] Subject matter jurisdiction of the circuit court and the sufficiency of the information or indictment are two distinct concepts. Circuit courts obviously have subject matter jurisdiction to try crimes, including the felony of unlawful use of weapons. Mo. Const. art. V, § 14(a). Cases stating that jurisdiction is dependent upon the sufficiency of the indictment or information mix separate questions. That language in those cases should not be relied on in the future. Equally inaccurate is the statement in at least one case that absence of an information deprives the trial court of jurisdiction over the person.

#### ***Civil Procedure > Jurisdiction > General Overview***

#### ***Criminal Law & Procedure > Accusatory Instruments > Informations***

#### ***Criminal Law & Procedure > Jurisdiction & Venue > General Overview***

[HN2] Whatever the defect in a ticket, the trial court still has subject matter jurisdiction over the offense and personal jurisdiction over defendant. It follows that the trial court has authority to permit amendment of an information so long as the correction does not run afoul of Mo. R. Crim. P. 23.08 and *Mo. Rev. Stat. § 545.300*.

#### ***Criminal Law & Procedure > Accusatory Instruments > Informations***

[HN3] Mo. R. Crim. P. 23.08 provides that any information may be amended at any time before verdict or finding if no additional or different offense is charged and if a defendant's substantial rights are not thereby prejudiced. No such amendment or substitution shall cause delay of a trial unless the court finds that a defendant needs further time to prepare his defense by reason of such amendment or substitution.

#### ***Criminal Law & Procedure > Accusatory Instruments > Informations***

[HN4] Mo. R. Crim. P. 23.08's statutory counterpart, *Mo. Rev. Stat. § 545.300*, also deals with amending an information and states that no such amendment shall be allowed as would operate to charge an offense different from that charged or attempted to be charged in the original information. Applying the foregoing, Missouri courts consistently hold that it is not permissible to amend an information if the effect of the amendment is to charge an offense different from the one originally charged. A lesser included offense, however, is not a different offense within the meaning of the foregoing rule.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN5] The state of Missouri has two statutes that set maximum speed limits for persons operating motor vehicles upon the highways of this state. *Mo. Rev. Stat. § 304.009*, commonly referred to as the non-point statute, set the uniform maximum speed limit at 55 miles per hour for all roads and highways of this state which are not part of the interstate system of highways. *Mo. Rev. Stat. § 304.009.1*. Drivers who are charged and convicted under *§ 304.009.1* shall not accumulate points until and unless such speed exceeds those maximums set by other state statute. *Mo. Rev. Stat. § 304.009.2*. The other statute, *Mo. Rev. Stat. § 304.010* (commonly known as the point statute), set different maximum speed limits on the highways of this state depending upon the type of highway, vehicle, and lighting conditions. The

relevant section here is *Mo. Rev. Stat. § 304.010.2(3)*, which provides that no vehicle shall be operated in excess of 60 miles per hour on any undivided highway designated and marked as a federal route when lighted lamps are required by law.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN6] The offense of driving in excess of the limits set in *Mo. Rev. Stat. § 304.010* cannot be proved without proving incidentally that the offender traveled over 55 miles per hour. At speeds over 65 miles per hour, the two offenses, i.e. driving over 55 miles per hour and driving over 65 miles per hour are identical offenses, not a greater inclusive and a lesser included. The same facts (in the over-65 range) would establish an offense against either statute, at the prosecutor's election.

***Criminal Law & Procedure > Trials > Judicial Discretion***

***Criminal Law & Procedure > Witnesses > Presentation***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > Witnesses***

[HN7] Under Mo. R. Crim. P. 23.01(f), the court has discretion to permit the late endorsement of any material witness. Absent an abuse of discretion or prejudice to the appellant, the conviction should not be overturned because a witness was endorsed on the day of trial. In exercising its discretion, the trial court should consider whether appellant waived his objection, whether the state intended to surprise or disadvantage appellant, whether appellant was actually surprised or disadvantaged, and whether the testimony could have been readily foreseen by appellant.

***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview***

***Criminal Law & Procedure > Witnesses > Presentation***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > Witnesses***

[HN8] While the court understands that Mo. R. Crim. P. 23.01(f) is intended to discourage the late endorsement of a witness, the court also recognizes that late endorsements must sometimes be permitted if they can be made without prejudice to a defendant's rights.

***Civil Procedure > Pretrial Matters > Continuances***

***Criminal Law & Procedure > Trials > Continuances***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > Continuances***

[HN9] The decision to grant or deny a continuance is a matter of trial court discretion and an appellate court will not interfere unless it clearly appears that such discretion has been abused. The party requesting the continuance bears the burden of showing prejudice, and a very strong showing is required to demonstrate an abuse of discretion.

**COUNSEL:**

Daniel T. Moore, of Poplar Bluff, for appellant.

Paul E. Oesterreicher, of Doniphan, for respondent.

**JUDGES:** Kenneth W. Shrum, Chief Judge. PREWITT, P.J. - CONCURS, PARRISH, J. - CONCURS

**OPINION BY:** Kenneth W. Shrum

**OPINION:**

[\*634] Robert Michael Patrick (Defendant) was convicted by a jury of driving a motor vehicle "in excess of the speed limit set by law" in violation of § 304.010.2, *RSMo 1994*. n1 He was sentenced in accordance with the jury's

verdict to sixty days in the county jail and fined \$ 500. Defendant appeals, contending that the trial court lacked subject matter jurisdiction because of an alleged defect in the original information. He also charges that the trial court erred in allowing the State to file an amended information and to endorse a "surprise witness" on the day of trial. Finally, Defendant claims that the trial court abused its discretion when it denied his motion for continuance. We affirm.

n1 Sections 304.009, RSMo 1994 and 304.010, RSMo 1994 set the maximum speed limits for persons driving on state highways at the time of this offense. On March 13, 1996, the Governor signed H.B. 1047, an enactment that changes maximum speed limits on most of Missouri's highways. Necessarily, this opinion is confined to an analysis of §§ 304.009 and .010, RSMo 1994.

[\*\*2]

## FACTS

From the legal file and the transcript of Defendant's trial, we summarize facts germane to Defendant's points on appeal.

On December 3, 1994, at approximately 6:30 p.m., Missouri State Highway Patrol Sergeant Ronald T. Berry was driving west on U.S. Highway 160 "just west of Highway junction 21" in Ripley County when he saw an automobile approaching him. Because of his impression that the oncoming car was "coming at me at a very high rate of speed," Berry activated the mobile radar unit in his car, whereupon it measured the speed of the vehicle at 95 miles per hour. As soon as the car passed, Berry turned around to follow and ultimately stopped it. After learning that Defendant was the operator of the vehicle, Berry completed a multi-copy, preprinted Uniform Complaint & Summons, substantially similar in form and content to Supreme Court Form 37.A. A Uniform Complaint & Summons is commonly referred to as a "traffic ticket." For convenience, we will refer to the one involved in this case as "the ticket."

Berry used an "x" on the ticket to indicate the Defendant "Did unlawfully operate" his vehicle. In the portion of the ticket that calls for a description of the violation, [\*\*3] Berry wrote, "Speeding 95/55 W/B east of 21." In other parts of the ticket, Berry wrote "95" mph as being Defendant's speed when the limit was "55" mph and also described Defendant's actions as being "in violation of 304.010 RSMo."

After issuing the ticket to Defendant, Berry checked his radar unit with tuning forks and determined that the radar was working properly at that time.

On June 16, 1995, four days before trial, the State filed a motion for leave to file an information in lieu of the ticket. The proposed information endorsed a new witness in addition to Berry; namely, Richard W. King, a patrol employee whose job duties included certification of the annual calibration of radar tuning forks and a monthly check of the accuracy of the device used to calibrate tuning forks. Defendant's counsel did not learn of the State's intention to file an information in lieu of the ticket and about the proposed endorsement of a new witness until around noon, June 19, 1995, approximately 20 hours before trial.

During the pre-trial conference on June 20th, Defendant's lawyer first moved to dismiss the charge, arguing that "no charge has been properly brought as [the ticket] lacks the necessary [\*\*4] elements." The trial court never ruled on that motion, but instead sustained the State's request to file an information [\*\*635] in lieu of the ticket. n2 Moreover, the trial court overruled Defendant's additional objection to the belated endorsement of Richard W. King as a witness and also denied Defendant's request for a continuance. The trial judge explained his ruling thusly:

"Mr. Moore, I'm having some problem in understanding exactly how the defense is prejudiced by Mr. King being able to testify today if I allow you some time to talk to him before his testimony. And we will have some time to do that and will allow you to do that. I'm having some problem in understanding what the prejudice will be since you have said or indicated on the record that this witness is pretty much cut

and dry [sic]. I think we all understand that he is going to . . . testify that he checked the radar device with tuning forks and it was working, which is an essential element of the state's case."

n2 The relevant part of the information reads:

"Defendant . . . in violation of *Section 304.010.2, RSMo.*, committed the misdemeanor of speeding . . . in that on . . . December 3, 1994, in [Ripley County, Missouri], the defendant operated a motor vehicle on a highway known as U.S. Highway 160 by speeding in excess of the speed limit set by law."

[\*\*5]

## DISCUSSION AND DECISION

### *Lack of Jurisdiction*

Defendant's first point maintains that the trial court "erred in overruling Defendant's motion to dismiss the uniform traffic ticket in that [the ticket issued by Berry] and filed by the Prosecutor was fatally defective because it only contained the legal conclusion of 'speeding', and failed to allege the necessary elements that Defendant was 'operating a motor vehicle in excess of the posted speed limit of 70 mph', in violation of *RSMo 304.010*, and, as a result of this omission, the court acquired no jurisdiction."

To support this argument, Defendant relies on *State v. Owens*, 740 S.W.2d 269 (Mo.App. 1987) and *State v. Prock*, 759 S.W.2d 854 (Mo.App. 1988), which in turn relied substantially upon *State v. Gilmore*, 650 S.W.2d 627 (Mo.banc 1983). *Gilmore* and its progeny held that if an information was insufficient, the trial court acquired no jurisdiction, and whatever transpired thereafter was a complete nullity. *Id.* at 628[2]. However, Defendant does not mention that this principle was disapproved and *Gilmore* was specifically overruled by *State v. Parkhurst*, [\*\*6] 845 S.W.2d 31 (Mo.banc 1992).

*Gilmore* and the other cases cited by Defendant predate *Parkhurst* and are of no aid under this point. In holding an information valid, *Parkhurst* stated:

[HN1] "*Gilmore* mistakenly relied on the confusing statement of law found in a number of cases that if an indictment is insufficient, the trial court acquires no jurisdiction of the subject matter. . . . Subject matter jurisdiction of the circuit court and the sufficiency of the information or indictment are two distinct concepts. . . . Circuit courts obviously have subject matter jurisdiction to try crimes, including the felony of unlawful use of weapons. Mo. Const. art. V, § 14(a). . . . Cases stating that jurisdiction is dependent upon the sufficiency of the indictment or information mix separate questions. That language in *Montgomery*, *Gilmore*, *Brooks* and other cases should not be relied on in the future.[] Equally inaccurate is the statement in at least one case that absence of an information deprives the trial court of jurisdiction over the person."

*Parkhurst*, 845 S.W.2d at 34-35 (citations, footnote omitted).

Here, Defendant [\*\*7] did not go to trial on the ticket, but rather on an amended information in lieu of the ticket. [HN2] Whatever the defect in the ticket, the trial court still had subject matter jurisdiction over the offense and personal jurisdiction over Defendant. See *Parkhurst*, 845 S.W.2d at 35; *State v. Stein*, 876 S.W.2d 623, 626 (Mo.App. 1994). It follows that the trial court had authority to permit amendment of the information so long as the correction did not run afoul of Rule 23.08 and § 545.300, *RSMo 1994*. There is no merit to Defendant's first point and it is denied.

[\*636] *Error in Allowing Amendment of Information*

We quote verbatim Defendant's second point relied on:

"The court erred in allowing the state to file, on the day of trial, an information in lieu of the uniform traffic ticket in that the information was a nullity because the uniform traffic ticket was fatally defective and one may not amend a fatally defective information due to a lack of jurisdiction, and in that the charge may not be lawfully amended because the information charged the defendant with a wholly new crime, namely a violation of *RSMo 304.010* involving speeds in excess of 70 mph, when the uniform [\*\*8] traffic ticket mentioned the speed of only 55 mph, which is in violation of *RSMo § 304.090* [sic] and *RSMo § 304.090* [sic] is not a lesser included offense of *§ 304.010*."

Our analysis and rejection of Defendant's first point is dispositive of the initial prong of his second point, i.e., that the ticket was a nullity and so fatally defective that the trial court could not amend the information "due to lack of jurisdiction." See *Parkhurst*, 845 S.W.2d at 35; *Stein*, 876 S.W.2d at 626.

Regarding the second part of Defendant's Point II, we first note Rule 23.08. [HN3] In pertinent part it provides:

"Any information may be amended . . . at any time before verdict or finding if no additional or different offense is charged and if a defendant's substantial rights are not thereby prejudiced. No such amendment or substitution shall cause delay of a trial unless the court finds that a defendant needs further time to prepare his defense by reason of such amendment or substitution."

[HN4] Rule 23.08's statutory counterpart, *§ 545.300*, also deals with amending an information and states that "no such amendment shall be allowed as would operate to charge an offense different [\*\*9] from that charged or attempted to be charged in the original information." Applying the foregoing, Missouri courts consistently hold that "it is not permissible to amend an information if the effect of the amendment is to charge an offense different from the one originally charged." *State v. Amerson*, 661 S.W.2d 852[1] (Mo.App. 1983). A lesser included offense, however, is not a different offense within the meaning of the foregoing rule. *Id.*

[HN5] Missouri has two statutes that set maximum speed limits for persons operating motor vehicles upon the highways of this state. *Section 304.009, RSMo 1994*, commonly referred to as the non-point statute, set the uniform maximum speed limit at 55 miles per hour for all roads and highways of this state which are not part of the interstate system of highways. *§ 304.009.1, RSMo 1994*. Drivers who were charged and convicted under *§ 304.009.1, RSMo 1994* "shall not accumulate points until and unless such speed exceeds those maximums set by other state statute . . ." *§ 304.009.2, RSMo 1994*.

The other statute, *§ 304.010, RSMo 1994* (commonly known as the point statute), set different maximum speed limits on the highways of this state [\*\*10] depending upon the type of highway, vehicle, and lighting conditions. The relevant section here is *§ 304.010.2(3), RSMo 1994*, which provided that no vehicle shall be operated in excess of "sixty-five miles per hour on any undivided highway designated and marked as a federal route . . . when lighted lamps are required by law . . ."

Here, the ticket as written by Berry described Defendant's violation as "speeding 95/55 w/b East of 21," and it advised that he was "driving 95 MPH . . . when limited to 55 MPH . . . in violation of 304.010." Defendant argues that because the ticket recited a limit of 55 mph, he could only be charged with a violation of 304.009; consequently the amended information charged "a completely different" crime contrary to Rule 23.08 and case authority such as *Amerson*, 661 S.W.2d 852.

That is simply not so. [HN6] The offense of driving in excess of the limits set in *§ 304.010, RSMo 1994* could not

be proved without proving incidentally that the offender traveled over 55 miles per hour. *State v. Canepa*, 671 S.W.2d 22, 23 (Mo.App. 1984). The *Canepa* court analyzed the two speeding statutes thusly: "At speeds over [65] miles per hour, the [\*\*11] two offenses, i.e. driving over [\*637] 55 miles per hour and driving over [65] miles per hour are identical offenses, not a greater inclusive and a lesser included." *Id.* at 23. "The same facts (in the over-[65] range) would establish an offense against either statute, at the prosecutor's election." *Id.*

The prosecutor in this case elected to charge Defendant with a violation of § 304.010, RSMo 1994 by filing the ticket as Berry had written it. The ticket adequately set forth the elements of the offense under § 304.010, RSMo 1994 as well as under § 304.009, RSMo 1994, i.e., driving a motor vehicle on U.S. Highway 160 at 95 miles per hour when the limit was 55 miles per hour. The amended information did not charge a different offense from that originally charged, it merely omitted a reference to a limit of 55 miles per hour and replaced it with a recital that Defendant was speeding on U.S. Highway 160 by operating a motor vehicle in excess of the limit set by § 304.010.2, RSMo 1994. There is no merit to Defendant's second point and it is denied.

#### *Witness Endorsement and Denial of Continuance*

In Defendant's third point, he contends that the trial court abused [\*\*12] its discretion by allowing the endorsement of Richard King as a witness on the morning of trial and by permitting him to testify concerning the calibration of the equipment used to check the accuracy of radar tuning forks. To support his point, Defendant relies on *State v. Stamps*, 865 S.W.2d 393 (Mo.App. 1993), which states:

[HN7] "Under rule 23.01(f), the court has discretion to permit the late endorsement of any material witness. . . . Absent an abuse of discretion or prejudice to the appellant, the conviction should not be overturned because a witness was endorsed on the day of trial. . . . In exercising its discretion, the trial court should consider whether appellant waived his objection, whether the state intended to surprise or disadvantage appellant, whether appellant was actually surprised or disadvantaged, and whether the testimony could have been readily foreseen by appellant."

*Id.* at 397[7] (citations omitted).

Defendant argues--correctly so--that he did not waive his objection to the trial court's permitting witness King to testify. His lawyer objected during the pre-trial conference, renewed that objection when King was called to testify, [\*\*13] and preserved the objection in the motion for new trial. On the other hand, we are not convinced that the State intended to surprise or disadvantage Defendant, that Defendant was actually surprised or disadvantaged, or that King's testimony was unforeseen by Defendant. The record clearly demonstrates otherwise. To illustrate, at the pre-trial conference regarding the State's request to endorse witness King, defense counsel told the court that he had tried "lots of speeding tickets before" and knew that the "state could not make a submissible case with the only witness that they had endorsed up until twenty hours ago, which was Trooper Berry." Additionally, defense counsel told the trial judge that:

"The major defense that the defendant intended to use . . . was that the state would not have a proper foundation in order to introduce the results of the radar gun into evidence. . . . I don't know whether the state intended purposefully to surprise or disadvantage the defendant, but he has certainly been surprised and will be disadvantaged if this case goes to trial today."

When asked to explain the belated witness endorsement, the prosecutor stated that he and defense counsel [\*\*14] had talked for several months about resolving the case but "it wasn't clear until last week . . . that this case was in fact going to go to trial . . ." The prosecutor continued:

"Mr. Moore, by his own statement, admits that he has known for some time there would need to be a

radio [sic] operator to lay a proper foundation. . . . [Trooper King] will only testify as to the accuracy of the tuning forks in which he calibrated at some point along with Trooper Berry. . . . I understand what Mr. Moore is talking about that he had a defense, but by his own admission he knew what the state had to prove and the state is attempting to prove that."

Defense counsel responded: "I essentially agree with Paul, but as the Court knows you [\*638] have to select a defense [and without King's testimony] we . . . have a good defense . . . because it appear[s] that the state would not be able to get the radar results into evidence . . . ." In declining an offer to interview the new witness before trial, defense counsel acknowledged that his testimony would not be a surprise.

"MR. MOORE: . . . I agree with [the prosecutor] . . . I assume that I know what it is that he will testify [\*\*15] about. It's the fact that he is here to testify is what throws a monkey wrench in the defense' [sic] whole strategy and plan. . . . I mean we have got to be able to regroup and see what other defenses are available."

Defense counsel never suggested to the trial court what other defenses he deemed available, nor has he informed this court what defenses he might have employed had he not relied on the absence of witness King.

The so-called defense relied on by Defendant was little more than a hope that procrastination by the prosecutor or prosecutorial incompetence would ultimately lead to his acquittal. By Defendant's own admission he was neither surprised by the existence of witness King nor by his testimony. He knew that such a witness existed and that his proposed testimony was essential to the State's case. [HN8] While we understand that Rule 23.01(f) is intended to discourage the late endorsement of a witness, we also recognize that "late endorsements must sometimes be permitted if they can be made without prejudice to the defendant's rights." *State v. Cobb*, 444 S.W.2d 408, 415 (Mo.banc 1969); *State v. Dees*, 639 S.W.2d 149, 157 (Mo.App. 1982). We believe [\*\*16] that this is such a case. Finding no abuse of trial court discretion in allowing the belated witness endorsement and no prejudice to Defendant, we deny Point III.

#### *Denial of Motion for Continuance*

Defendant's fourth point alleges that the trial court abused its discretion in failing to grant his request for a continuance, thus prejudicially affecting his ability to adequately prepare a defense.

[HN9] The decision to grant or deny a continuance is a matter of trial court discretion and an appellate court will not interfere unless it clearly appears that such discretion has been abused. *State v. Schaal*, 806 S.W.2d 659, 666[12] (Mo.banc 1991), cert. denied, 502 U.S. 1075, 112 S. Ct. 976, 117 L. Ed. 2d 140; *State v. Williams*, 652 S.W.2d 102, 108[4] (Mo.banc 1983). The party requesting the continuance bears the burden of showing prejudice, and a very strong showing is required to demonstrate an abuse of discretion. *Schaal*, 806 S.W.2d at 666[12]. On this record, no abuse of discretion appears.

Via his remarks to the trial judge, defense counsel demonstrated that he was an experienced trial attorney who had previously tried traffic cases involving [\*\*17] radar devices. The record also reflects that trial counsel had represented Defendant from the inception of the case. The fact that Defendant relied on the possible absence of a witness needed to establish the accuracy of the radar as his "only defense" and his "entire trial strategy" demonstrates the weakness of Defendant's position. Defendant made no showing to the trial court that he was not ready to proceed on the scheduled date because of a defense that was overlooked. Moreover, Defendant does not suggest to this court--some ten months after trial--what additional defense he could have presented had he been given more time.

We do not overlook Defendant's three arguments in support of his claim that the trial court abused its discretion in denying his motion for continuance. First, he protests that he was never arraigned on the amended charge. Second, he contends that he was never given the opportunity to conduct discovery on the new charge. Finally, Defendant complains that he could not depose the new witness.

As we explained in addressing Defendant's Point II, the amended information did not charge a different offense from that which was originally charged. Defendant offers [\*\*18] no explanation of how being deprived of a redundant arraignment or repetitious discovery prejudiced him. As to depriving Defendant of the opportunity to depose the new witness, [\*639] we reiterate our observation made in discussing Defendant's third point that defense counsel declined the opportunity to interview the new witness before trial. Given that observation, it is not surprising that Defendant does not identify any particular defense that a continuance would have given him the opportunity to present. Defendant has failed to sustain his burden of demonstrating that the denial of a continuance was prejudicial to his case. *Williams*, 652 S.W.2d at 109. There was no abuse of discretion by the trial court, particularly as Defendant had able representation. *Id.* Point IV is denied.

The judgment and sentence of the trial court are affirmed.

**STATE OF MISSOURI, Plaintiff-Respondent, vs. ROBERT MICHAEL PATRICK,  
Defendant-Appellant.**

**No. 20417**

**COURT OF APPEALS OF MISSOURI, SOUTHERN DISTRICT, DIVISION TWO**

*920 S.W.2d 633; 1996 Mo. App. LEXIS 716*

**April 23, 1996, FILED**

**PRIOR HISTORY:** [\*\*1]

APPEAL FROM THE CIRCUIT COURT OF RIPLEY COUNTY. Honorable W. Robert Cope, Circuit Judge.

**DISPOSITION:**

AFFIRMED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from a judgment of the Circuit Court of Ripley County (Missouri) that found him guilty, following a jury trial, of driving a motor vehicle in excess of the speed limit set by law in *Mo. Rev. Stat. § 304.010.2*.

**OVERVIEW:** A highway patrol officer stopped and ticketed defendant for traveling 95 miles per hour in a 55 mile per hour zone. Defendant was found guilty of driving a motor vehicle in excess of the speed limit set in *§ 304.010.2*. He was sentenced to 60 days in the county jail and fined \$ 500. The court affirmed because the ticket was not a nullity and so fatally defective that the trial court had no power to amend the information due to the lack of jurisdiction. Defendant did not go to trial on the ticket, but rather on an amended information in lieu of the ticket. Whatever the defect in the ticket, the trial court still had subject matter jurisdiction over the offense and personal jurisdiction over defendant. Therefore, the trial court had the authority to permit the amendment of the information so long as the correction did not violate *Mo. R. Crim. P. 23.08* and *Mo. Rev. Stat. § 545.300*. Furthermore, the trial court did not abuse its discretion or prejudice defendant in allowing the state to file an amended information and endorse a surprise witness on the day of trial, and in denying defendant's motion for a continuance.

**OUTCOME:** The court affirmed the judgment of the trial court that convicted and sentenced defendant for driving a motor vehicle in excess of the statutory speed limit.

**CORE TERMS:** ticket, highway, radar, miles, continuance, speeding, mph, endorsement, prosecutor, driving, speed,

defense counsel, tuning, forks, amended information, maximum speed, motor vehicle, surprise, abused, traffic ticket, abuse of discretion, fatally defective, surprised, different offense, accuracy, originally charged, speed limit, disadvantaged, disadvantage, indictment

### **LexisNexis(R) Headnotes**

#### ***Civil Procedure > Jurisdiction > General Overview***

#### ***Criminal Law & Procedure > Criminal Offenses > Weapons > Use > General Overview***

#### ***Criminal Law & Procedure > Accusatory Instruments > Indictments***

[HN1] Subject matter jurisdiction of the circuit court and the sufficiency of the information or indictment are two distinct concepts. Circuit courts obviously have subject matter jurisdiction to try crimes, including the felony of unlawful use of weapons. Mo. Const. art. V, § 14(a). Cases stating that jurisdiction is dependent upon the sufficiency of the indictment or information mix separate questions. That language in those cases should not be relied on in the future. Equally inaccurate is the statement in at least one case that absence of an information deprives the trial court of jurisdiction over the person.

#### ***Civil Procedure > Jurisdiction > General Overview***

#### ***Criminal Law & Procedure > Accusatory Instruments > Informations***

#### ***Criminal Law & Procedure > Jurisdiction & Venue > General Overview***

[HN2] Whatever the defect in a ticket, the trial court still has subject matter jurisdiction over the offense and personal jurisdiction over defendant. It follows that the trial court has authority to permit amendment of an information so long as the correction does not run afoul of Mo. R. Crim. P. 23.08 and *Mo. Rev. Stat. § 545.300*.

#### ***Criminal Law & Procedure > Accusatory Instruments > Informations***

[HN3] Mo. R. Crim. P. 23.08 provides that any information may be amended at any time before verdict or finding if no additional or different offense is charged and if a defendant's substantial rights are not thereby prejudiced. No such amendment or substitution shall cause delay of a trial unless the court finds that a defendant needs further time to prepare his defense by reason of such amendment or substitution.

#### ***Criminal Law & Procedure > Accusatory Instruments > Informations***

[HN4] Mo. R. Crim. P. 23.08's statutory counterpart, *Mo. Rev. Stat. § 545.300*, also deals with amending an information and states that no such amendment shall be allowed as would operate to charge an offense different from that charged or attempted to be charged in the original information. Applying the foregoing, Missouri courts consistently hold that it is not permissible to amend an information if the effect of the amendment is to charge an offense different from the one originally charged. A lesser included offense, however, is not a different offense within the meaning of the foregoing rule.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN5] The state of Missouri has two statutes that set maximum speed limits for persons operating motor vehicles upon the highways of this state. *Mo. Rev. Stat. § 304.009*, commonly referred to as the non-point statute, set the uniform maximum speed limit at 55 miles per hour for all roads and highways of this state which are not part of the interstate system of highways. *Mo. Rev. Stat. § 304.009.1*. Drivers who are charged and convicted under *§ 304.009.1* shall not accumulate points until and unless such speed exceeds those maximums set by other state statute. *Mo. Rev. Stat. § 304.009.2*. The other statute, *Mo. Rev. Stat. § 304.010* (commonly known as the point statute), set different maximum speed limits on the highways of this state depending upon the type of highway, vehicle, and lighting conditions. The

relevant section here is *Mo. Rev. Stat. § 304.010.2(3)*, which provides that no vehicle shall be operated in excess of 60 miles per hour on any undivided highway designated and marked as a federal route when lighted lamps are required by law.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN6] The offense of driving in excess of the limits set in *Mo. Rev. Stat. § 304.010* cannot be proved without proving incidentally that the offender traveled over 55 miles per hour. At speeds over 65 miles per hour, the two offenses, i.e. driving over 55 miles per hour and driving over 65 miles per hour are identical offenses, not a greater inclusive and a lesser included. The same facts (in the over-65 range) would establish an offense against either statute, at the prosecutor's election.

***Criminal Law & Procedure > Trials > Judicial Discretion***

***Criminal Law & Procedure > Witnesses > Presentation***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > Witnesses***

[HN7] Under Mo. R. Crim. P. 23.01(f), the court has discretion to permit the late endorsement of any material witness. Absent an abuse of discretion or prejudice to the appellant, the conviction should not be overturned because a witness was endorsed on the day of trial. In exercising its discretion, the trial court should consider whether appellant waived his objection, whether the state intended to surprise or disadvantage appellant, whether appellant was actually surprised or disadvantaged, and whether the testimony could have been readily foreseen by appellant.

***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview***

***Criminal Law & Procedure > Witnesses > Presentation***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > Witnesses***

[HN8] While the court understands that Mo. R. Crim. P. 23.01(f) is intended to discourage the late endorsement of a witness, the court also recognizes that late endorsements must sometimes be permitted if they can be made without prejudice to a defendant's rights.

***Civil Procedure > Pretrial Matters > Continuances***

***Criminal Law & Procedure > Trials > Continuances***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > Continuances***

[HN9] The decision to grant or deny a continuance is a matter of trial court discretion and an appellate court will not interfere unless it clearly appears that such discretion has been abused. The party requesting the continuance bears the burden of showing prejudice, and a very strong showing is required to demonstrate an abuse of discretion.

**COUNSEL:**

Daniel T. Moore, of Poplar Bluff, for appellant.

Paul E. Oesterreicher, of Doniphan, for respondent.

**JUDGES:** Kenneth W. Shrum, Chief Judge. PREWITT, P.J. - CONCURS, PARRISH, J. - CONCURS

**OPINION BY:** Kenneth W. Shrum

**OPINION:**

[\*634] Robert Michael Patrick (Defendant) was convicted by a jury of driving a motor vehicle "in excess of the speed limit set by law" in violation of § 304.010.2, *RSMo 1994*. n1 He was sentenced in accordance with the jury's

verdict to sixty days in the county jail and fined \$ 500. Defendant appeals, contending that the trial court lacked subject matter jurisdiction because of an alleged defect in the original information. He also charges that the trial court erred in allowing the State to file an amended information and to endorse a "surprise witness" on the day of trial. Finally, Defendant claims that the trial court abused its discretion when it denied his motion for continuance. We affirm.

n1 Sections 304.009, RSMo 1994 and 304.010, RSMo 1994 set the maximum speed limits for persons driving on state highways at the time of this offense. On March 13, 1996, the Governor signed H.B. 1047, an enactment that changes maximum speed limits on most of Missouri's highways. Necessarily, this opinion is confined to an analysis of §§ 304.009 and .010, RSMo 1994.

[\*\*2]

## FACTS

From the legal file and the transcript of Defendant's trial, we summarize facts germane to Defendant's points on appeal.

On December 3, 1994, at approximately 6:30 p.m., Missouri State Highway Patrol Sergeant Ronald T. Berry was driving west on U.S. Highway 160 "just west of Highway junction 21" in Ripley County when he saw an automobile approaching him. Because of his impression that the oncoming car was "coming at me at a very high rate of speed," Berry activated the mobile radar unit in his car, whereupon it measured the speed of the vehicle at 95 miles per hour. As soon as the car passed, Berry turned around to follow and ultimately stopped it. After learning that Defendant was the operator of the vehicle, Berry completed a multi-copy, preprinted Uniform Complaint & Summons, substantially similar in form and content to Supreme Court Form 37.A. A Uniform Complaint & Summons is commonly referred to as a "traffic ticket." For convenience, we will refer to the one involved in this case as "the ticket."

Berry used an "x" on the ticket to indicate the Defendant "Did unlawfully operate" his vehicle. In the portion of the ticket that calls for a description of the violation, [\*\*3] Berry wrote, "Speeding 95/55 W/B east of 21." In other parts of the ticket, Berry wrote "95" mph as being Defendant's speed when the limit was "55" mph and also described Defendant's actions as being "in violation of 304.010 RSMo."

After issuing the ticket to Defendant, Berry checked his radar unit with tuning forks and determined that the radar was working properly at that time.

On June 16, 1995, four days before trial, the State filed a motion for leave to file an information in lieu of the ticket. The proposed information endorsed a new witness in addition to Berry; namely, Richard W. King, a patrol employee whose job duties included certification of the annual calibration of radar tuning forks and a monthly check of the accuracy of the device used to calibrate tuning forks. Defendant's counsel did not learn of the State's intention to file an information in lieu of the ticket and about the proposed endorsement of a new witness until around noon, June 19, 1995, approximately 20 hours before trial.

During the pre-trial conference on June 20th, Defendant's lawyer first moved to dismiss the charge, arguing that "no charge has been properly brought as [the ticket] lacks the necessary [\*\*4] elements." The trial court never ruled on that motion, but instead sustained the State's request to file an information [\*\*635] in lieu of the ticket. n2 Moreover, the trial court overruled Defendant's additional objection to the belated endorsement of Richard W. King as a witness and also denied Defendant's request for a continuance. The trial judge explained his ruling thusly:

"Mr. Moore, I'm having some problem in understanding exactly how the defense is prejudiced by Mr. King being able to testify today if I allow you some time to talk to him before his testimony. And we will have some time to do that and will allow you to do that. I'm having some problem in understanding what the prejudice will be since you have said or indicated on the record that this witness is pretty much cut

and dry [sic]. I think we all understand that he is going to . . . testify that he checked the radar device with tuning forks and it was working, which is an essential element of the state's case."

n2 The relevant part of the information reads:

"Defendant . . . in violation of *Section 304.010.2, RSMo.*, committed the misdemeanor of speeding . . . in that on . . . December 3, 1994, in [Ripley County, Missouri], the defendant operated a motor vehicle on a highway known as U.S. Highway 160 by speeding in excess of the speed limit set by law."

[\*\*5]

## DISCUSSION AND DECISION

### *Lack of Jurisdiction*

Defendant's first point maintains that the trial court "erred in overruling Defendant's motion to dismiss the uniform traffic ticket in that [the ticket issued by Berry] and filed by the Prosecutor was fatally defective because it only contained the legal conclusion of 'speeding', and failed to allege the necessary elements that Defendant was 'operating a motor vehicle in excess of the posted speed limit of 70 mph', in violation of *RSMo 304.010*, and, as a result of this omission, the court acquired no jurisdiction."

To support this argument, Defendant relies on *State v. Owens*, 740 S.W.2d 269 (Mo.App. 1987) and *State v. Prock*, 759 S.W.2d 854 (Mo.App. 1988), which in turn relied substantially upon *State v. Gilmore*, 650 S.W.2d 627 (Mo.banc 1983). *Gilmore* and its progeny held that if an information was insufficient, the trial court acquired no jurisdiction, and whatever transpired thereafter was a complete nullity. *Id.* at 628[2]. However, Defendant does not mention that this principle was disapproved and *Gilmore* was specifically overruled by *State v. Parkhurst*, [\*\*6] 845 S.W.2d 31 (Mo.banc 1992).

*Gilmore* and the other cases cited by Defendant predate *Parkhurst* and are of no aid under this point. In holding an information valid, *Parkhurst* stated:

[HN1] "*Gilmore* mistakenly relied on the confusing statement of law found in a number of cases that if an indictment is insufficient, the trial court acquires no jurisdiction of the subject matter. . . . Subject matter jurisdiction of the circuit court and the sufficiency of the information or indictment are two distinct concepts. . . . Circuit courts obviously have subject matter jurisdiction to try crimes, including the felony of unlawful use of weapons. Mo. Const. art. V, § 14(a). . . . Cases stating that jurisdiction is dependent upon the sufficiency of the indictment or information mix separate questions. That language in *Montgomery*, *Gilmore*, *Brooks* and other cases should not be relied on in the future.[] Equally inaccurate is the statement in at least one case that absence of an information deprives the trial court of jurisdiction over the person."

*Parkhurst*, 845 S.W.2d at 34-35 (citations, footnote omitted).

Here, Defendant [\*\*7] did not go to trial on the ticket, but rather on an amended information in lieu of the ticket. [HN2] Whatever the defect in the ticket, the trial court still had subject matter jurisdiction over the offense and personal jurisdiction over Defendant. See *Parkhurst*, 845 S.W.2d at 35; *State v. Stein*, 876 S.W.2d 623, 626 (Mo.App. 1994). It follows that the trial court had authority to permit amendment of the information so long as the correction did not run afoul of Rule 23.08 and § 545.300, *RSMo 1994*. There is no merit to Defendant's first point and it is denied.

[\*636] *Error in Allowing Amendment of Information*

We quote verbatim Defendant's second point relied on:

"The court erred in allowing the state to file, on the day of trial, an information in lieu of the uniform traffic ticket in that the information was a nullity because the uniform traffic ticket was fatally defective and one may not amend a fatally defective information due to a lack of jurisdiction, and in that the charge may not be lawfully amended because the information charged the defendant with a wholly new crime, namely a violation of *RSMo 304.010* involving speeds in excess of 70 mph, when the uniform [\*\*8] traffic ticket mentioned the speed of only 55 mph, which is in violation of *RSMo § 304.090* [sic] and *RSMo § 304.090* [sic] is not a lesser included offense of *§ 304.010*."

Our analysis and rejection of Defendant's first point is dispositive of the initial prong of his second point, i.e., that the ticket was a nullity and so fatally defective that the trial court could not amend the information "due to lack of jurisdiction." See *Parkhurst*, 845 S.W.2d at 35; *Stein*, 876 S.W.2d at 626.

Regarding the second part of Defendant's Point II, we first note Rule 23.08. [HN3] In pertinent part it provides:

"Any information may be amended . . . at any time before verdict or finding if no additional or different offense is charged and if a defendant's substantial rights are not thereby prejudiced. No such amendment or substitution shall cause delay of a trial unless the court finds that a defendant needs further time to prepare his defense by reason of such amendment or substitution."

[HN4] Rule 23.08's statutory counterpart, *§ 545.300*, also deals with amending an information and states that "no such amendment shall be allowed as would operate to charge an offense different [\*\*9] from that charged or attempted to be charged in the original information." Applying the foregoing, Missouri courts consistently hold that "it is not permissible to amend an information if the effect of the amendment is to charge an offense different from the one originally charged." *State v. Amerson*, 661 S.W.2d 852[1] (Mo.App. 1983). A lesser included offense, however, is not a different offense within the meaning of the foregoing rule. *Id.*

[HN5] Missouri has two statutes that set maximum speed limits for persons operating motor vehicles upon the highways of this state. *Section 304.009, RSMo 1994*, commonly referred to as the non-point statute, set the uniform maximum speed limit at 55 miles per hour for all roads and highways of this state which are not part of the interstate system of highways. *§ 304.009.1, RSMo 1994*. Drivers who were charged and convicted under *§ 304.009.1, RSMo 1994* "shall not accumulate points until and unless such speed exceeds those maximums set by other state statute . . ." *§ 304.009.2, RSMo 1994*.

The other statute, *§ 304.010, RSMo 1994* (commonly known as the point statute), set different maximum speed limits on the highways of this state [\*\*10] depending upon the type of highway, vehicle, and lighting conditions. The relevant section here is *§ 304.010.2(3), RSMo 1994*, which provided that no vehicle shall be operated in excess of "sixty-five miles per hour on any undivided highway designated and marked as a federal route . . . when lighted lamps are required by law . . ."

Here, the ticket as written by Berry described Defendant's violation as "speeding 95/55 w/b East of 21," and it advised that he was "driving 95 MPH . . . when limited to 55 MPH . . . in violation of 304.010." Defendant argues that because the ticket recited a limit of 55 mph, he could only be charged with a violation of 304.009; consequently the amended information charged "a completely different" crime contrary to Rule 23.08 and case authority such as *Amerson*, 661 S.W.2d 852.

That is simply not so. [HN6] The offense of driving in excess of the limits set in *§ 304.010, RSMo 1994* could not

be proved without proving incidentally that the offender traveled over 55 miles per hour. *State v. Canepa*, 671 S.W.2d 22, 23 (Mo.App. 1984). The *Canepa* court analyzed the two speeding statutes thusly: "At speeds over [65] miles per hour, the [\*\*11] two offenses, i.e. driving over [\*637] 55 miles per hour and driving over [65] miles per hour are identical offenses, not a greater inclusive and a lesser included." *Id.* at 23. "The same facts (in the over-[65] range) would establish an offense against either statute, at the prosecutor's election." *Id.*

The prosecutor in this case elected to charge Defendant with a violation of § 304.010, RSMo 1994 by filing the ticket as Berry had written it. The ticket adequately set forth the elements of the offense under § 304.010, RSMo 1994 as well as under § 304.009, RSMo 1994, i.e., driving a motor vehicle on U.S. Highway 160 at 95 miles per hour when the limit was 55 miles per hour. The amended information did not charge a different offense from that originally charged, it merely omitted a reference to a limit of 55 miles per hour and replaced it with a recital that Defendant was speeding on U.S. Highway 160 by operating a motor vehicle in excess of the limit set by § 304.010.2, RSMo 1994. There is no merit to Defendant's second point and it is denied.

#### *Witness Endorsement and Denial of Continuance*

In Defendant's third point, he contends that the trial court abused [\*\*12] its discretion by allowing the endorsement of Richard King as a witness on the morning of trial and by permitting him to testify concerning the calibration of the equipment used to check the accuracy of radar tuning forks. To support his point, Defendant relies on *State v. Stamps*, 865 S.W.2d 393 (Mo.App. 1993), which states:

[HN7] "Under rule 23.01(f), the court has discretion to permit the late endorsement of any material witness. . . . Absent an abuse of discretion or prejudice to the appellant, the conviction should not be overturned because a witness was endorsed on the day of trial. . . . In exercising its discretion, the trial court should consider whether appellant waived his objection, whether the state intended to surprise or disadvantage appellant, whether appellant was actually surprised or disadvantaged, and whether the testimony could have been readily foreseen by appellant."

*Id.* at 397[7] (citations omitted).

Defendant argues--correctly so--that he did not waive his objection to the trial court's permitting witness King to testify. His lawyer objected during the pre-trial conference, renewed that objection when King was called to testify, [\*\*13] and preserved the objection in the motion for new trial. On the other hand, we are not convinced that the State intended to surprise or disadvantage Defendant, that Defendant was actually surprised or disadvantaged, or that King's testimony was unforeseen by Defendant. The record clearly demonstrates otherwise. To illustrate, at the pre-trial conference regarding the State's request to endorse witness King, defense counsel told the court that he had tried "lots of speeding tickets before" and knew that the "state could not make a submissible case with the only witness that they had endorsed up until twenty hours ago, which was Trooper Berry." Additionally, defense counsel told the trial judge that:

"The major defense that the defendant intended to use . . . was that the state would not have a proper foundation in order to introduce the results of the radar gun into evidence. . . . I don't know whether the state intended purposefully to surprise or disadvantage the defendant, but he has certainly been surprised and will be disadvantaged if this case goes to trial today."

When asked to explain the belated witness endorsement, the prosecutor stated that he and defense counsel [\*\*14] had talked for several months about resolving the case but "it wasn't clear until last week . . . that this case was in fact going to go to trial . . ." The prosecutor continued:

"Mr. Moore, by his own statement, admits that he has known for some time there would need to be a

radio [sic] operator to lay a proper foundation. . . . [Trooper King] will only testify as to the accuracy of the tuning forks in which he calibrated at some point along with Trooper Berry. . . . I understand what Mr. Moore is talking about that he had a defense, but by his own admission he knew what the state had to prove and the state is attempting to prove that."

Defense counsel responded: "I essentially agree with Paul, but as the Court knows you [\*638] have to select a defense [and without King's testimony] we . . . have a good defense . . . because it appear[s] that the state would not be able to get the radar results into evidence . . . ." In declining an offer to interview the new witness before trial, defense counsel acknowledged that his testimony would not be a surprise.

"MR. MOORE: . . . I agree with [the prosecutor] . . . I assume that I know what it is that he will testify [\*\*15] about. It's the fact that he is here to testify is what throws a monkey wrench in the defense' [sic] whole strategy and plan. . . . I mean we have got to be able to regroup and see what other defenses are available."

Defense counsel never suggested to the trial court what other defenses he deemed available, nor has he informed this court what defenses he might have employed had he not relied on the absence of witness King.

The so-called defense relied on by Defendant was little more than a hope that procrastination by the prosecutor or prosecutorial incompetence would ultimately lead to his acquittal. By Defendant's own admission he was neither surprised by the existence of witness King nor by his testimony. He knew that such a witness existed and that his proposed testimony was essential to the State's case. [HN8] While we understand that Rule 23.01(f) is intended to discourage the late endorsement of a witness, we also recognize that "late endorsements must sometimes be permitted if they can be made without prejudice to the defendant's rights." *State v. Cobb*, 444 S.W.2d 408, 415 (Mo.banc 1969); *State v. Dees*, 639 S.W.2d 149, 157 (Mo.App. 1982). We believe [\*\*16] that this is such a case. Finding no abuse of trial court discretion in allowing the belated witness endorsement and no prejudice to Defendant, we deny Point III.

#### *Denial of Motion for Continuance*

Defendant's fourth point alleges that the trial court abused its discretion in failing to grant his request for a continuance, thus prejudicially affecting his ability to adequately prepare a defense.

[HN9] The decision to grant or deny a continuance is a matter of trial court discretion and an appellate court will not interfere unless it clearly appears that such discretion has been abused. *State v. Schaal*, 806 S.W.2d 659, 666[12] (Mo.banc 1991), cert. denied, 502 U.S. 1075, 112 S. Ct. 976, 117 L. Ed. 2d 140; *State v. Williams*, 652 S.W.2d 102, 108[4] (Mo.banc 1983). The party requesting the continuance bears the burden of showing prejudice, and a very strong showing is required to demonstrate an abuse of discretion. *Schaal*, 806 S.W.2d at 666[12]. On this record, no abuse of discretion appears.

Via his remarks to the trial judge, defense counsel demonstrated that he was an experienced trial attorney who had previously tried traffic cases involving [\*\*17] radar devices. The record also reflects that trial counsel had represented Defendant from the inception of the case. The fact that Defendant relied on the possible absence of a witness needed to establish the accuracy of the radar as his "only defense" and his "entire trial strategy" demonstrates the weakness of Defendant's position. Defendant made no showing to the trial court that he was not ready to proceed on the scheduled date because of a defense that was overlooked. Moreover, Defendant does not suggest to this court--some ten months after trial--what additional defense he could have presented had he been given more time.

We do not overlook Defendant's three arguments in support of his claim that the trial court abused its discretion in denying his motion for continuance. First, he protests that he was never arraigned on the amended charge. Second, he contends that he was never given the opportunity to conduct discovery on the new charge. Finally, Defendant complains that he could not depose the new witness.

As we explained in addressing Defendant's Point II, the amended information did not charge a different offense from that which was originally charged. Defendant offers [\*\*18] no explanation of how being deprived of a redundant arraignment or repetitious discovery prejudiced him. As to depriving Defendant of the opportunity to depose the new witness, [\*639] we reiterate our observation made in discussing Defendant's third point that defense counsel declined the opportunity to interview the new witness before trial. Given that observation, it is not surprising that Defendant does not identify any particular defense that a continuance would have given him the opportunity to present. Defendant has failed to sustain his burden of demonstrating that the denial of a continuance was prejudicial to his case. *Williams*, 652 S.W.2d at 109. There was no abuse of discretion by the trial court, particularly as Defendant had able representation. *Id.* Point IV is denied.

The judgment and sentence of the trial court are affirmed.

Analysis

As of: Jan 31, 2007

**CITY OF SPRINGFIELD, Respondent, vs. GAREN WADDELL, Appellant.**

**No. 19414**

**COURT OF APPEALS OF MISSOURI, SOUTHERN DISTRICT, DIVISION TWO**

***904 S.W.2d 499; 1995 Mo. App. LEXIS 1284***

**July 13, 1995, FILED**

**PRIOR HISTORY:** [\*\*1]

APPEAL FROM THE CIRCUIT COURT, JUDICIAL CIRCUIT 31, SPRINGFIELD MUNICIPAL DIVISION 22.  
Honorable Todd Thornhill, Municipal Judge.

**DISPOSITION:**

AFFIRMED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant, a driver, sought review of the judgment from the Circuit Court, Judicial Circuit 31, Springfield Municipal Division 22 (Missouri), which convicted him of speeding.

**OVERVIEW:** Defendant was convicted of speeding. On appeal, defendant contended that: (1) the evidence was insufficient to support the verdict of guilty returned by the jury because there was no competent evidence to establish his speed; (2) the trial court erred in denying his motion for a change of venue; and (3) the trial court erred in denying proper legal representation. The court affirmed defendant's conviction and held that the evidence was sufficient to establish defendant's speed based on the finding that the police officer's radar unit was accurately gauging speed at the site of the violation at a reasonable proximity to the time when the radar gauged defendant's speed. The court held that the trial court did not err in denying defendant's untimely motion for a change of venue. Further, the court observed that nothing in the record suggested that defendant could not receive a fair trial by jury in the locale where the instant case was pending. Additionally, the court held that defendant had no constitutional right to counsel, since he was merely fined and not sentenced to any term of imprisonment.

**OUTCOME:** The court affirmed defendant's conviction for speeding.

**CORE TERMS:** radar, tuning fork, juror, prosecutor, conversation, mistrial, change of venue, speed, speed limit, driving, posted, mile, tested, jury misconduct, new trial, talking, ordinance, fork, bus, municipal ordinance, tuning, site, misconduct, accuracy, complains, recess, circumstantial evidence, authorize, deadline, arrest

**LexisNexis(R) Headnotes*****Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN1] Mo. R. Crim. P. 30.06(d) (1994) reads, in pertinent part: The points relied on shall state briefly and concisely what actions or rulings of the court are sought to be reviewed and wherein and why they are claimed to be erroneous.

***Criminal Law & Procedure > Trials > Burdens of Proof > General Overview******Criminal Law & Procedure > Appeals > Briefs******Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN2] An appellate court has no duty to resort to the argument portion of the brief to deduce wherein and why an appellant believes a trial court erred. Appellant has the burden of demonstrating error.

***Civil Procedure > Trials > Jury Trials > Jurors > General Overview******Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN3] The appellate court is required to take the evidence in the light most favorable to the State and to grant the State all reasonable inferences from the evidence. The appellate court disregards contrary inferences, unless they are such a natural and logical extension of the evidence that a reasonable juror would be unable to disregard them. Taking the evidence in this light, the appellate court considers whether a reasonable juror could find each of the elements beyond a reasonable doubt.

***Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > General Overview******Evidence > Procedural Considerations > Weight & Sufficiency******Evidence > Testimony > Examination > General Overview***

[HN4] An appellate court neither weighs the evidence nor judges the credibility of the witnesses. Those are tasks for the jury.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN5] A speeding conviction cannot be based on radar without proof that the unit was tested and found to be operating properly at the site of the alleged violation and reasonably close to the time it occurred.

***Criminal Law & Procedure > Appeals > Briefs******Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview******Criminal Law & Procedure > Appeals > Reviewability > Waiver > General Overview***

[HN6] An appellate court is not required to review a contention when it appears without citation of applicable authority. Absent proper explanation concerning why no authority is cited, a contention unaccompanied by citation of authority is deemed waived or abandoned.

***Evidence > Inferences & Presumptions > Inferences******Evidence > Procedural Considerations > Circumstantial & Direct Evidence***

[HN7] Circumstantial evidence is evidence that does not directly prove a fact in issue but gives rise to a logical inference that the fact exists.

***Civil Procedure > Jurisdiction > General Overview***

***Criminal Law & Procedure > Jurisdiction & Venue > Jurisdiction***

[HN8] A court has jurisdiction if it has judicial authority over the subject matter and parties.

***Criminal Law & Procedure > Jurisdiction & Venue > Jurisdiction***

[HN9] Mo. R. Ordinance and Traffic Violation Bureaus 37.08 reads: If no procedure is specially provided by Mo. R. Ordinance and Traffic Violation Bureaus 37, the judge having jurisdiction shall proceed in a manner consistent with judicial decisions, applicable statutes or other rules of the court.

***Criminal Law & Procedure > Jurisdiction & Venue > General Overview***

***Governments > Courts > Justice Courts***

[HN10] *Mo. Rev. Stat. § 479.150.2* (1994), which authorizes the State to provide by ordinance for jury trials in its municipal court, provides that such trials shall be conducted in accordance with procedures applicable before circuit courts.

***Criminal Law & Procedure > Jurisdiction & Venue > General Overview***

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Jury Trial > Petty Offenses***

[HN11] Mo. R. Ordinance and Traffic Violation Bureaus 37.61(e) pertains to jury trials of ordinance violations; it provides that such trials shall proceed in the manner provided for the trial of a misdemeanor by the rules of criminal procedure.

***Civil Procedure > Judicial Officers > Judges > General Overview***

***Criminal Law & Procedure > Pretrial Motions > Disqualification & Recusal***

[HN12] Mo. R. Crim. P. 32.07(b) governs applications for a change of judge in misdemeanor cases. The application must be filed not later than ten days before the date set for trial, unless the designation of the trial judge occurs less than ten days before trial.

***Criminal Law & Procedure > Counsel > Assignment***

[HN13] *Mo. Rev. Stat. § 600.042* (1994) reads, in pertinent part:10. The state public defender director and defenders shall provide legal services to an eligible person:(5) For whom, in a case in which he faces a loss or deprivation of liberty, any law of this state requires the appointment of counsel; however, the director and the defenders shall not be required to provide legal services to persons charged with violations of municipal ordinances.

***Constitutional Law > Bill of Rights > Fundamental Rights > Criminal Process > Assistance of Counsel***

***Criminal Law & Procedure > Counsel > Right to Counsel > Trials***

***Criminal Law & Procedure > Sentencing > Fines***

[HN14] There is no constitutional impediment to an uncounseled misdemeanor conviction where imprisonment is not imposed.

***Criminal Law & Procedure > Counsel > Right to Counsel > Trials***

***Criminal Law & Procedure > Trials > Defendant's Rights > Right to Counsel > Potential Imprisonment***

***Criminal Law & Procedure > Sentencing > Fines***

[HN15] If an accused is merely fined and not sentenced to any term of imprisonment, he has no constitutional right to counsel.

***Criminal Law & Procedure > Postconviction Proceedings > Motions for New Trial***

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN16] Mo. R. Crim. P. 29.11(d) provides that in jury tried cases, allegations of error to be preserved for appellate review must be included in a motion for new trial.

***Civil Procedure > Judgments > Relief From Judgment > Motions for New Trials***

***Criminal Law & Procedure > Juries & Jurors > Jury Deliberations > General Overview***

***Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

[HN17] Where a motion for new trial is made on account of communications to the jury during the progress of the trial, there is a rebuttable legal presumption that they were prejudicial to the moving party, and where competent evidence is offered it is the duty of the trial court to hear and consider it; when the court does so, its decision is reviewable for abuse of discretion only.

***Criminal Law & Procedure > Appeals > Briefs***

***Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN18] Appellate review is limited to matters raised in the points relied on.

**COUNSEL:**

Appellant pro se.

No appearance for respondent.

**JUDGES:** Before PREWITT, CROW and PARRISH, JJ.

**OPINION:**

[\*502] PER CURIAM. A jury in Springfield Municipal Division 22 of the Circuit Court of Judicial Circuit 31 found Appellant guilty of speeding in violation of a Springfield municipal ordinance. The jury assessed punishment at a fine of one dollar. The trial court entered judgment in accordance with the verdict.

Appellant brings this appeal per § 479.150.2(2). n1 His brief, submitted pro se, presents the following point relied on:

"1. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: the evidence does not support the verdict beyond a reasonable doubt.

A. There is no competent evidence to establish what speed the Appellant was driving.

B. Evidence was entirely circumstantial.

C. Facts and circumstances relied on by prosecution were inconsistent [sic] with each other and with the hypothesis of guilt.

2. Trial court erred in not entering a [\*\*2] judgement of not guilty that Appellant was driving in excess of the posted speed limit because: court lacked jurisdiction and thus verdict had no validity.

3. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: denial of change of venue, denial of peremptory [sic] challenge.

4. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of

the posted speed limit because: complete corruption of the record to the point of non-viability.

5. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: denial of due process of law by court's display of substantial bias and prejudice denying proper legal representation.

6. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: in permitting the prosecution to comment on Appellant's failure to call the witness.

7. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: erroneously [sic] placing burden [\*\*3] of proof of jury and witness misconduct on Appellant.

8. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: seating of improper jury."

n1 References to statutes are to RSMo 1994 except where otherwise indicated.

Rule 30.06(d) n2 sets forth the requirements for a point relied on in this appeal. Rules 37.01, 37.61(e), and 30.33; §§ 479.150.2(1)-(2) and 543.220.1. [HN1] Rule 30.06(d) reads, in pertinent part:

"The points relied on shall state briefly and concisely what actions or rulings of the court are sought to be reviewed and wherein and why they are claimed to be erroneous . . . ."

n2 Rule references are to Missouri Rules of Court (1994).

Appellant's point relied on fails to satisfy the "wherein and why" requirement of Rule 30.06(d). *City [\*\*4] of Springfield v. Rogers*, 867 S.W.2d 692, 693-94 (Mo.App. S.D. 1993); *State v. Root*, 820 S.W.2d 682, 685-86 (Mo.App. S.D. 1991). [HN2] An appellate court has no duty to resort to the argument portion of the brief to deduce wherein and why an appellant believes a trial court erred. *Root*, 820 S.W.2d at 686. Nonetheless, we have sifted the thirty pages of argument in Appellant's brief in an attempt to extract the import of each paragraph of his point. We shall address the contentions as we understand them, mindful that Appellant has the burden of demonstrating error. *State v. Harrison*, 539 S.W.2d 119, 121[1] (Mo.App. 1976).

Contention 1(A) maintains the evidence was insufficient to support the verdict of guilty returned by the jury in that there was no competent evidence to establish Appellant's speed. In addressing that contention, we are aware that Respondent was required to prove Appellant guilty beyond a [\*503] reasonable doubt. *City of Kansas City v. Oxley*, 579 S.W.2d 113, 114[1] (Mo. banc 1979). The standard of review for determining whether the evidence met that requirement is set forth in *State v. Grim*, 854 S.W.2d 403, 411[5] [\*\*5] (Mo. banc 1993), *cert. denied*, U.S. Ct. 562, 126 L. Ed. 2d 462 (1993).

[HN3] "We are required to take the evidence in the light most favorable to the State and to grant the State all reasonable inferences from the evidence. We disregard contrary inferences, unless they are such a natural and logical extension of the evidence that a reasonable juror would be unable to disregard them. Taking the evidence in this light, we consider whether a reasonable juror could find each of the elements

beyond a reasonable doubt."

As explained in *Oxley*, 579 S.W.2d at 115, [HN4] an appellate court neither weighs the evidence nor judges the credibility of the witnesses. Those are tasks for the jury. *State v. Wright*, 476 S.W.2d 581, 584[4] (Mo. 1972).

Viewed favorably to the verdict, the evidence establishes that on the morning of September 28, 1993, Officer David Larry Tuter of the Springfield Police Department was operating a radar unit on Grand Street in Springfield. The power source for the unit was the battery on Tuter's motorcycle. The motorcycle engine was "turned off."

To "set up" the radar unit at that site, Tuter performed three procedures to [\*\*6] ensure it was operating properly. First, he pushed a switch to determine whether all the tubes were working properly. He obtained a reading showing they were. Next, he did an "internal calibration" and again received a reading showing the unit was working properly. Finally, he struck a 50 mile-per-hour tuning fork in front of the unit and obtained a 50 mile-per-hour reading. He testified he followed these procedures "before and after each stop."

Asked whether he did anything else before directing the radar unit toward vehicular traffic, Tuter explained he performed a "sweep [of] the area with the radar" to detect outside interference. He observed none.

Between 10:30 and 11:00, Tuter saw a westbound Pontiac on Grand approaching his position. Tuter estimated its speed at 35 miles per hour, which exceeded the posted speed limit of 20 miles per hour. Tuter "put the radar unit into operation" and achieved a "radar lock" on the Pontiac, obtaining a reading of 36 miles per hour.

Tuter pursued the Pontiac and stopped it. Appellant was the driver. Tuter issued Appellant a citation for speeding.

One of Appellant's challenges to the sufficiency of the evidence is based on *City of St. Louis v. Boecker*, 370 S.W.2d 731 (Mo.App. 1963), and *State v. Weatherwax*, 635 S.W.2d 34 (Mo.App. W.D. 1982), which hold that [HN5] a speeding conviction cannot be based on radar without proof that the unit was tested and found to be operating properly at the site of the alleged violation and reasonably close to the time it occurred. *Boecker*, 370 S.W.2d at 737[5]; *Weatherwax*, 635 S.W.2d at 35.

Appellant maintains Tuter's testimony was insufficient to demonstrate compliance with *Boecker* and *Weatherwax* in that Tuter was unable to recall what time he calibrated the radar unit.

Asked on cross-examination what time he calibrated the unit, Tuter replied it could have been 9:30 or 10:15. That would have been anywhere between 15 and 90 minutes before Appellant's Pontiac appeared.

In *Boecker*, the officer tested the radar unit with a tuning fork before he left the police station to go on duty. 370 S.W.2d at 734. He did not test the unit at the site of the violation, and there was no evidence regarding the elapsed time between the test at the station and the violation. *Id.* In *Weatherwax*, the officer tested the radar unit with tuning forks at his home at 7:00 [\*\*8] a.m., before going on duty. 635 S.W.2d at 34-35. Some four hours later, at a different location, he used the unit to detect a speeding violation. *Id.* at 35. He did not test the unit at that site, nor did he test it again until going off duty at 4:00 p.m. *Id.* In both cases, appellate courts held the evidence insufficient to support a conviction.

Appellant, who acquired knowledge about radar in military service, asserts his research [\*\*504] disclosed no case that holds the accuracy of a radar unit can be established solely by a tuning fork.

The subject was addressed in *Boecker*, where the appellate court did not question the use of a tuning fork to test the accuracy of a radar unit "as a matter of principle." 370 S.W.2d at 736. However, *Boecker* noted the value of such a test hinged on the accuracy of the tuning fork. *Id.* Because there was no evidence that the tuning fork in *Boecker* was accurate, the appellate court had "grave doubts" that the test was sufficient to establish that the radar was functioning properly. *Id.* Despite such doubts, *Boecker* did not base reversal on the tuning fork test, but instead on the failure of the officer to test the [\*\*9] unit at the site of the violation and reasonably close to the time it occurred. *Id.* at 736-38.

Here, there was evidence regarding the accuracy of the tuning fork and radar unit. Don Oliver, who holds a "radio telephone operator's license" from the Federal Communications Commission ("FCC"), has "certified" radar units for "eight to ten years." On May 7, 1993, he certified the unit used by Tuter.

Explaining the process, Oliver testified that the frequency of the tuning fork for that unit is counted by an electronic frequency counter at his shop. Accuracy of the unit itself is tested by the tuning fork and by two other tuning forks at the shop. Oliver avowed Tuter's radar unit had these margins of error: 4/100 of a mile per hour at 30 miles per hour, 12/100 of a mile per hour at 50 miles per hour, and 5/100 of a mile per hour at 65 miles per hour.

In *State v. Moore*, 700 S.W.2d 880 (Mo.App. E.D. 1985), the arresting officer tested his radar unit with a 30-mile-per-hour tuning fork and a 70-mile-per-hour tuning fork approximately an hour before using the unit to gauge the accused's speed. *Id.* at 881. The officer repeated the procedure immediately after the arrest. [\*\*10] *Id.* The officer had tested the tuning forks by striking them in front of a frequency counter some eight months before the arrest. *Id.* 882. The conviction was affirmed.

In *State v. Shoemaker*, 798 S.W.2d 191 (Mo.App. E.D. 1990), the arresting officer tested his radar unit with tuning forks before and after using the unit to gauge the accused's speed. *Id.* at 193. The forks had been certified as accurate six months before the arrest, and were again certified as accurate five months following the arrest. *Id.* The officer also tested the ground speed of the radar unit against the speedometer on his vehicle. *Id.* The conviction was affirmed.

Here, the interval between the date Oliver certified Tuter's radar unit (including tuning fork) and the date Tuter used the unit to gauge Appellant's speed was shorter than the intervals in *Moore* and *Shoemaker*. Like the officers in those cases, Tuter performed a tuning fork test on his unit before and after stopping Appellant. Consistent with *Moore* and *Shoemaker*, we reject Appellant's claim that the evidence was insufficient to support a finding that Tuter's unit was accurately gauging speed when it gauged Appellant's [\*\*11] speed.

Appellant argues that Grand Street has four lanes, and traffic in the two eastbound lanes made it impossible for the radar to accurately gauge his speed. However, Tuter testified there were no other vehicles in the area which would have interfered with the radar reading Tuter got on Appellant's Pontiac. Credibility of Tuter's testimony was for the jury. *State v. Jeffries*, 858 S.W.2d 821, 823-24[4] (Mo.App. E.D. 1993). The jury evidently believed Tuter.

Appellant also argues that a curve in Grand Street, coupled with visual obstructions including trees, signs, poles and other objects, made it impossible for Tuter's radar "to obtain an accurate reading." Appellant presented photographs of the area to the jury in support of that hypothesis. Appellant has filed the photographs with us. They depict a street flanked by trees, signs and poles, but no more than normal for a four-lane street.

Tuter testified he saw Appellant's Pontiac when it was 250 to 300 feet east of Tuter's location. Tuter recounted there were no obstructions "to cause interference with the [\*505] radar." The jury was entitled to believe that testimony. *Jeffries*, 858 S.W.2d at 824.

Appellant [\*\*12] attacks the testimony of witness Oliver, who certified Tuter's radar unit. Appellant asserts Oliver "admitted to violating Federal, State and Local Laws in the performance of his responsibilities for the radar." In support of this accusation, Appellant cites a segment of the transcript where Oliver stated he occasionally pointed radar units at oncoming traffic when returning them after inspection.

Appellant does not (a) identify the laws violated, (b) explain how the alleged violations destroy the competency of Oliver's testimony, (c) cite any authority on the subject, or (d) explain why he cites none. [HN6] An appellate court is not required to review a contention when it appears without citation of applicable authority. *State v. Higgins*, 852 S.W.2d 172, 175[4] (Mo.App. S.D. 1993). Absent proper explanation concerning why no authority is cited, a contention unaccompanied by citation of authority is deemed waived or abandoned. *Id.* at 175[5].

Appellant also questions other aspects of the evidence, such as the power source for the radar and the length of time

his Pontiac was near the radar. Such factors were for the jury's consideration. They do not render the evidence [\*\*13] insufficient to support the verdict. Appellant's contention 1(A) is without merit.

Appellant bases contentions 1(B) and 1(C) on the premise that the evidence against him was entirely circumstantial. [HN7] Circumstantial evidence is evidence that does not directly prove a fact in issue but gives rise to a logical inference that the fact exists. *State v. Fleeer*, 851 S.W.2d 582, 598[50] (Mo.App. E.D. 1993).

Appellant cites no case holding a radar measurement of an automobile's speed is circumstantial evidence. Because of *Grim*, *supra*, 854 S.W.2d 403, we need not decide whether it is. Until *Grim*, the standard of review for sufficiency of the evidence where a criminal conviction was based on circumstantial evidence differed from the standard where a conviction was based on direct evidence. *Id.* at 405-08. *Grim* held that henceforth, the standard would be the same for all criminal convictions, whether based on direct evidence, circumstantial evidence, or both. *Id.* The standard in *Grim* is quoted earlier in this opinion. We hold the evidence in the instant case met that standard. Appellant's contentions 1(B) and 1(C), which are based on the *pre-Grim* circumstantial [\*\*14] evidence standard, provide no basis for reversal.

Contention 2 asserts the trial court "lacked jurisdiction," hence the verdict "had no validity."

[HN8] A court has jurisdiction if it has judicial authority over the subject matter and parties. *State ex rel. Furstenfeld v. Nixon*, 133 S.W. 340, 342 (Mo. 1910); *Lake Wauwanoka, Inc. v. Spain*, 622 S.W.2d 309, 314[7] (Mo.App. E.D. 1981). Appellant, as we understand his argument, does not contend the trial court lacked jurisdiction to adjudicate violations of Springfield traffic ordinances. Instead, Appellant maintains Respondent never proved Tuter's radar unit was "licensed or authorized" by the FCC. Appellant also avers Oliver violated his FCC license in testing and using radar units. These factors, says Appellant, "barred jurisdiction, and nullified any verdict derived thereof."

Appellant cites no authority in support of that hypothesis, and we are aware of none. We fail to see how lack of an FCC license for Tuter's radar unit (if indeed one was required), or how a violation by Oliver of his FCC license (if indeed any occurred), divested the trial court of jurisdiction. Contention 2 is denied.

Contention 3 complains about [\*\*15] "denial of change of venue." Appellant filed a "Motion for Change of Venue Out of Time" on the day trial began (January 10, 1994). The motion prayed that the case be transferred to Division 3 of the Circuit Court of Judicial Circuit 31 or to Dallas County, which lies in Judicial Circuit 30. The trial court denied the motion.

The motion did not cite any rule or statute authorizing the change of venue. Appellant cited none to the trial court when it took up the motion. Appellant's brief likewise cites none.

[\*506] Rule 37 governs the procedure in courts having original jurisdiction of ordinance violations. *See*: Rule 37.01. We find no provision in Rule 37 for a change of venue. n3

n3 [HN9] Rule 37.08 reads: "If no procedure is specially provided by this Rule 37, the judge having jurisdiction shall proceed in a manner consistent with judicial decisions, applicable statutes or other rules of this Court."

[HN10] *Section 479.150.2*, which authorizes Respondent to provide by ordinance for jury trials in its municipal [\*\*16] court, provides that such trials shall be conducted "in accordance with procedures applicable before circuit courts." § 479.150.2(1). It is thus arguable that Rule 32.04, which governs changes of venue for criminal cases in circuit courts, applies here. Paragraph "(b)" of the rule establishes a deadline for filing an application for a change of venue.

Assuming -- without deciding -- that § 479.150.2(1), coupled with Rule 32.04, authorizes a change of venue in a municipal ordinance violation case, Appellant has shown no error in the denial of his motion. Our study of the record

reveals Appellant filed his motion after the deadline in Rule 32.04(b). His motion tacitly concedes this, as its caption brands it "Out of Time."

Appellant cites no authority holding it is error to deny an untimely motion for change of venue, particularly where (as here) nothing in the record suggests an accused cannot receive a fair trial by jury in the locale where the case is pending. Assuming, *arguendo*, that Appellant had a right to a change of venue upon timely application -- we do not imply he did -- we hold the trial court did not err in denying Appellant's untimely application.

In his brief, Appellant [\*\*17] declares Respondent is not empowered to hold jury trials, therefore his case should have been "transferred to the appropriate circuit court." In support of that hypothesis, Appellant cites "House Bill #1386."

We are unable to find any statute pertaining to jury trials of municipal ordinance violations which was enacted as House Bill 1386. *Section 479.150.2*, which authorizes Respondent to provide by ordinance for jury trials in its municipal court, was in force when Appellant was tried. Appellant cites no authority suggesting § 479.150.2 is invalid. We find no merit in Appellant's claim of error regarding denial of his motion for change of venue.

Contention 3 also assigns error in the trial court's denial of "peremptory [sic] challenge." We gather from the argument in Appellant's brief that he refers to the trial court's denial of a "Motion for Change of Judge Out of Time" filed by Appellant on the day trial began.

The motion did not cite any rule or statute authorizing the change of judge. In oral argument to the trial court, Appellant cited Rule 37.53. Paragraph "(a)" of the rule provides it does not govern the procedure for disqualification of a judge in ordinance violation [\*\*18] cases in which there is a timely exercise of a right to a jury trial.

Appellant's brief cites no rule, statute or case demonstrating that the denial of his motion for change of judge was error.

[HN11] Rule 37.61(e) pertains to jury trials of ordinance violations; it provides that such trials "shall proceed in the manner provided for the trial of a misdemeanor by the rules of criminal procedure."

[HN12] Rule 32.07(b) governs applications for a change of judge in misdemeanor cases. The application must be filed not later than ten days before the date set for trial, unless the designation of the trial judge occurs less than ten days before trial. Here, the trial judge was designated more than ten days before the trial date.

Assuming -- without deciding -- that Rules 37.61(e) and 32.07(b), read together, authorize a change of judge in a municipal ordinance violation case tried by jury, Appellant has shown no error in the denial of his application. Appellant filed the application after the deadline in Rule 32.07(b), as indicated by the caption on the motion which brands it "Out of Time." Appellant cites no authority holding it is error to deny an untimely application for change of judge. The claim [\*\*19] of error is denied.

[\*507] Contention 4 complains about corruption of the record, but identifies no specific defect or omission. The five pages of argument on contention 4, as we comprehend them, maintain that the record does not contain every document filed in the trial court and does not show everything that occurred before and after trial. The argument mentions numerous alleged deficiencies, but makes only a general allegation of prejudice. No specific prejudice is attributed to any alleged flaw.

We have studied the argument and have found nothing in it which warrants reversal. Further discussion would serve no jurisprudential purpose. Contention 4 is denied per Rule 30.25(b).

Contention 5 complains about the trial court "denying proper legal representation." Again resorting to the argument portion of Appellant's brief, we gather this complaint is based on Appellant's alleged indigence and his belief that the

trial court was consequently required to appoint counsel for him.

[HN13] *Section 600.042* reads, in pertinent part:

"10. The [state public defender] director and defenders shall provide legal services to an eligible person:

. . .

(5) For whom, in a case in which he [\*\*20] faces a loss or deprivation of liberty, any law of this state requires the appointment of counsel; however, the director and the defenders shall not be required to provide legal services to persons charged with violations of . . . municipal ordinances."

Inasmuch as Appellant was charged with a municipal ordinance violation, he was ineligible for public defender representation.

Furthermore, some two months before trial, Appellant and the prosecutor appeared in the trial court, whereupon the prosecutor announced Respondent would not seek a jail sentence if Appellant was convicted. [HN14] There is no constitutional impediment to an uncounseled misdemeanor conviction where imprisonment is not imposed. *White v. King*, 700 S.W.2d 152, 155[7] (Mo.App. W.D. 1985). Appellant was convicted of only a municipal ordinance violation, not a misdemeanor. Furthermore, he was sentenced to only a fine and court costs. [HN15] If an accused is merely fined and not sentenced to any term of imprisonment, he has no constitutional right to counsel. *State v. Albright*, 843 S.W.2d 400, 404[11] n. 3 (Mo.App. W.D. 1992). Contention 5 is meritless.

Contention 6 asserts the trial court erred "in permitting the [\*\*21] prosecution to comment on Appellant's failure to call the witness." We divine from the argument portion of Appellant's brief that this complaint is based on a segment of the cross-examination of Appellant by the prosecutor wherein the prosecutor established that Appellant had the number of a city bus that, according to Appellant, was in front of him just before Tuter stopped him. The prosecutor's questions and Appellant's answers established that Appellant could have obtained the bus driver's name and subpoenaed him.

Appellant maintains the bus driver was equally available to the prosecution, hence the prosecutor's "comments" on Appellant's failure to call the driver were improper.

Nowhere in Tuter's testimony is there any mention of a bus, and nothing in the record indicates Respondent had knowledge of an alleged bus until Appellant mentioned one at trial. The thrust of the prosecutor's questioning was that because Appellant claimed to have written down the bus number, he could have produced the driver at trial if indeed there had been a bus at the site when Tuter stopped Appellant. The obvious implication is that no bus was there. It is thus arguable that the bus driver mentioned [\*\*22] by Appellant was not equally available to Respondent. However, we need not resolve that issue.

Appellant did not object to the prosecutor's questions which he now complains about in contention 6. Furthermore, [HN16] Rule 29.11(d) provides that in jury tried cases, allegations of error to be preserved for appellate review must be included in a motion for new trial, subject to certain exceptions which do not apply to contention 6. As explained below, Appellant failed to satisfy that requirement.

Immediately after the verdict, the trial court granted Appellant until January 28, 1994, to file a motion for a new trial. Appellant [\*508] filed several documents in the trial court within that deadline. The only one resembling a motion for a new trial was a four-page document captioned "Petition for Trial De Novo from Municipal Decision and for Relief from Imposition of Illegal and Unconstitutional Sentence and Fine." We need not decide whether it qualifies as a motion for new trial because even if it does, it fails to mention the alleged error presented by contention 6.

Because Appellant failed to object at trial to the prosecutor's questions regarding the bus driver and failed to

mention [\*\*23] the matter in a motion for new trial, contention 6 is not preserved for review. *State v. Maxwell*, 465 S.W.2d 562, 563[2] (Mo. 1971).

Contention 7 refers to both jury misconduct and witness misconduct at trial. We first address the alleged jury misconduct.

After Respondent rested its case, the trial court declared a recess, admonishing the jurors not to discuss the case among themselves or with others, or to permit anyone to discuss it in their hearing.

During the recess, Appellant moved for a mistrial because Tuter "was out there talking to the jurors." The prosecutor stated that because "this is a nonsmoking building," persons who smoke must do so outside, and Tuter (a smoker) was outside talking to someone.

In support of his motion for mistrial, Appellant presented testimony by Marbelene Pankey. She recounted she saw a police officer, identified to her as Tuter, talking to a female juror. Pankey "heard something in reference to a tuning fork." Pankey also heard the juror ask Tuter "how someone was" -- the name sounded like Kerry or Kenny. Pankey added that she saw Tuter talking to another woman whom she believed was a juror.

The trial court called Tuter into the courtroom [\*\*24] and questioned him. Tuter admitted talking to a juror but avowed he did not know her name. Tuter testified they talked three or four minutes while smoking, and the conversation did not pertain to the trial. Asked specifically whether he talked about tuning forks, Tuter replied, "No, sir."

Appellant then presented testimony by his wife in support of the motion for mistrial. She stated Tuter's conversation with the juror lasted "a good five, ten minutes."

Appellant asked the trial court whether it would be possible to call the juror as a witness on the motion for mistrial. The trial court told Appellant he could do so but it may or may not be in his best interest.

Appellant replied: "I see what you mean, Your Honor. No. I don't wish to call her."

The trial court thereupon denied the motion for mistrial.

As explained earlier, § 479.150.2(1) provides that jury trials in Respondent's municipal court shall be conducted "in accordance with procedures applicable before circuit courts." Section 494.495 provides a court may permit the jury to separate at any adjournment or recess during the trial and jury deliberation in all cases of misdemeanor or felony, except in capital cases. Consequently, [\*\*25] separation of the jurors during the recess in Appellant's trial was not error *per se*.

Appellant cites §§ 546.230 and 546.240, RSMo 1986, which formerly governed jury separation and sequestration; however, those statutes were repealed in 1989. Laws of Missouri 1989, S.B. Nos. 127 *et seq.*

[HN17] Where a motion for new trial is made on account of communications to the jury during the progress of the trial, there is a rebuttable legal presumption that they were prejudicial to the moving party, and where competent evidence is offered it is the duty of the trial court to hear and consider it; when the court does so, its decision is reviewable for abuse of discretion only. *State v. Evans*, 699 S.W.2d 514, 517[4] (Mo.App. S.D. 1985).

In our discussion of contention 6, we referred to a document filed by Appellant after the verdict which could arguably be considered a motion for new trial. In it, Appellant complained about Tuter's conversation with the juror. In adjudicating the claim of jury misconduct in contention 7, we shall assume -- without deciding -- that the document [\*509] qualifies as a motion for a new trial, thereby preserving that issue for review.

Appellant presented [\*\*26] no evidence regarding the claim of jury misconduct at the hearing on his post-verdict motions, thus all of the testimony regarding that issue was heard by the trial court before it denied the motion for

mistrial.

The truth or falsity of the testimony of Pankey, Tuter, and Appellant's wife on the issue of jury misconduct was for the trial court to determine in the exercise of sound judicial discretion. *State v. Stillings*, 882 S.W.2d 696, 700 (Mo. App. S.D. 1994); *State v. Duckett*, 849 S.W.2d 300, 305 (Mo.App. S.D. 1993). Tuter's testimony, if believed, was sufficient to rebut the presumption of prejudice. The trial court evidently found Tuter's testimony credible. On the record here, we cannot convict the trial court of abusing its discretion in that finding. Accordingly, we hold the trial court did not err in denying Appellant's motion for mistrial on the ground of jury misconduct.

Appellant complains that the trial court erroneously placed the burden of proof on him regarding jury misconduct. As we understand Appellant's brief, he bases this complaint on a statement to him by the trial court that he (Appellant) could call any witnesses he desired on the motion for mistrial. [\*\*27]

Nothing in the record indicates the trial court had the notion that it was Appellant's burden to prove Tuter's conversation with the juror was prejudicial. After Appellant presented Pankey's testimony about Tuter's conversation with the juror, it was the trial court who called Tuter into the courtroom and questioned him about the incident. After the trial court questioned Tuter, the court allowed Appellant to question him. Appellant's complaint about the burden of proof is unsupported by the record, and is denied.

We next address the complaint about witness misconduct in contention 7.

During the recess where Tuter talked to the juror, he also talked to witness Oliver who, it will be recalled "certified" Tuter's radar unit. Appellant moved for a mistrial because of that conversation, and presented testimony by Oliver and Tuter about it.

Oliver admitted talking to Tuter, but testified it was just "general conversation." Oliver denied any discussion with Tuter about Appellant's case.

Tuter admitted talking to Oliver, but avowed they were "talking about motorcycles." Tuter denied conversing with Oliver about tuning forks, radar certification, or anything else regarding Appellant's [\*\*28] case.

The testimony of Oliver and Tuter about their conversation was uncontradicted. The trial court denied the motion for mistrial.

The cases cited in our discussion of the jury misconduct issue establish that the credibility of the testimony of Oliver and Tuter about their conversation was for the trial court to determine. The trial court evidently found their testimony credible.

More importantly however, the conversation occurred *after* both of them had testified in front of the jury. Consequently, their testimony to the jury could not have been affected by their conversation. Appellant cites no case where a conviction by jury was reversed because two prosecution witnesses conversed with each other after presenting their testimony to the jury. We hold the trial court did not abuse its discretion in denying Appellant's motion for mistrial on the ground of witness misconduct.

This brings us to contention 8, Appellant's final claim of error: "seating of improper jury." Because contention 8 does not specify what was improper, we have endeavored to identify the alleged impropriety by probing the argument following contention 8.

According to the argument, an alternate juror had [\*\*29] to serve as an alternate on a jury in a case immediately after Appellant's case and was not asked whether that would be a problem. Appellant does not allege this alternate juror replaced a regular juror during his trial, and we find nothing in the record indicating that an alternate juror participated in the verdict. Furthermore, nothing in the record suggests this alternate juror was inconvenienced by serving in both

Appellant's case and the next case (if indeed that occurred), [\*510] and Appellant fails to explain how this could have been prejudicial to him.

The only other averment in the argument regarding the composition of the jury is an allegation that the jury pool "did not consist of impartial jury of the county and record shows that jury seated was biased, prejudiced, and tainted." Appellant does not explain how the record shows this, and cites nothing in the record substantiating the complaint. Contention 8 is denied.

In adjudicating this appeal, we resorted to the argument in Appellant's brief in an effort to discover the meaning of the eight numbered contentions in his point relied on. As noted early in this opinion, this is a task we were not obliged to undertake. [\*\*30] The argument contains a multitude of other complaints, accompanied by accusations of misconduct against the trial court, prosecutor and others. We have not addressed the matters referred to in the preceding sentence because we find no connection between them and anything in the point relied on. [HN18] Appellate review is limited to matters raised in the points relied on. *State v. Gooch*, 831 S.W.2d 277, 277[2] (Mo.App. S.D. 1992).

Judgment affirmed.

**CITY OF SPRINGFIELD, Respondent, vs. GAREN WADDELL, Appellant.**

**No. 19414**

**COURT OF APPEALS OF MISSOURI, SOUTHERN DISTRICT, DIVISION TWO**

***904 S.W.2d 499; 1995 Mo. App. LEXIS 1284***

**July 13, 1995, FILED**

**PRIOR HISTORY:** [\*\*1]

APPEAL FROM THE CIRCUIT COURT, JUDICIAL CIRCUIT 31, SPRINGFIELD MUNICIPAL DIVISION 22.  
Honorable Todd Thornhill, Municipal Judge.

**DISPOSITION:**

AFFIRMED

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant, a driver, sought review of the judgment from the Circuit Court, Judicial Circuit 31, Springfield Municipal Division 22 (Missouri), which convicted him of speeding.

**OVERVIEW:** Defendant was convicted of speeding. On appeal, defendant contended that: (1) the evidence was insufficient to support the verdict of guilty returned by the jury because there was no competent evidence to establish his speed; (2) the trial court erred in denying his motion for a change of venue; and (3) the trial court erred in denying proper legal representation. The court affirmed defendant's conviction and held that the evidence was sufficient to establish defendant's speed based on the finding that the police officer's radar unit was accurately gauging speed at the site of the violation at a reasonable proximity to the time when the radar gauged defendant's speed. The court held that the trial court did not err in denying defendant's untimely motion for a change of venue. Further, the court observed that nothing in the record suggested that defendant could not receive a fair trial by jury in the locale where the instant case was pending. Additionally, the court held that defendant had no constitutional right to counsel, since he was merely fined and not sentenced to any term of imprisonment.

**OUTCOME:** The court affirmed defendant's conviction for speeding.

**CORE TERMS:** radar, tuning fork, juror, prosecutor, conversation, mistrial, change of venue, speed, speed limit, driving, posted, mile, tested, jury misconduct, new trial, talking, ordinance, fork, bus, municipal ordinance, tuning, site, misconduct, accuracy, complains, recess, circumstantial evidence, authorize, deadline, arrest

[HN16] Mo. R. Crim. P. 29.11(d) provides that in jury tried cases, allegations of error to be preserved for appellate review must be included in a motion for new trial.

***Civil Procedure > Judgments > Relief From Judgment > Motions for New Trials******Criminal Law & Procedure > Juries & Jurors > Jury Deliberations > General Overview******Criminal Law & Procedure > Appeals > Standards of Review > Abuse of Discretion > General Overview***

[HN17] Where a motion for new trial is made on account of communications to the jury during the progress of the trial, there is a rebuttable legal presumption that they were prejudicial to the moving party, and where competent evidence is offered it is the duty of the trial court to hear and consider it; when the court does so, its decision is reviewable for abuse of discretion only.

***Criminal Law & Procedure > Appeals > Briefs******Criminal Law & Procedure > Appeals > Reviewability > Preservation for Review > General Overview***

[HN18] Appellate review is limited to matters raised in the points relied on.

**COUNSEL:**

Appellant pro se.

No appearance for respondent.

**JUDGES:** Before PREWITT, CROW and PARRISH, JJ.

**OPINION:**

[\*502] PER CURIAM. A jury in Springfield Municipal Division 22 of the Circuit Court of Judicial Circuit 31 found Appellant guilty of speeding in violation of a Springfield municipal ordinance. The jury assessed punishment at a fine of one dollar. The trial court entered judgment in accordance with the verdict.

Appellant brings this appeal per § 479.150.2(2). n1 His brief, submitted pro se, presents the following point relied on:

"1. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: the evidence does not support the verdict beyond a reasonable doubt.

A. There is no competent evidence to establish what speed the Appellant was driving.

B. Evidence was entirely circumstantial.

C. Facts and circumstances relied on by prosecution were inconsistent [sic] with each other and with the hypothesis of guilt.

2. Trial court erred in not entering a [\*\*2] judgement of not guilty that Appellant was driving in excess of the posted speed limit because: court lacked jurisdiction and thus verdict had no validity.

3. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: denial of change of venue, denial of peremptory [sic] challenge.

4. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of

the posted speed limit because: complete corruption of the record to the point of non-viability.

5. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: denial of due process of law by court's display of substantial bias and prejudice denying proper legal representation.

6. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: in permitting the prosecution to comment on Appellant's failure to call the witness.

7. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: erroneously [sic] placing burden [\*\*3] of proof of jury and witness misconduct on Appellant.

8. Trial court erred in not entering a judgement of not guilty that Appellant was driving in excess of the posted speed limit because: seating of improper jury."

n1 References to statutes are to RSMo 1994 except where otherwise indicated.

Rule 30.06(d) n2 sets forth the requirements for a point relied on in this appeal. Rules 37.01, 37.61(e), and 30.33; §§ 479.150.2(1)-(2) and 543.220.1. [HN1] Rule 30.06(d) reads, in pertinent part:

"The points relied on shall state briefly and concisely what actions or rulings of the court are sought to be reviewed and wherein and why they are claimed to be erroneous . . . ."

n2 Rule references are to Missouri Rules of Court (1994).

Appellant's point relied on fails to satisfy the "wherein and why" requirement of Rule 30.06(d). *City [\*\*4] of Springfield v. Rogers*, 867 S.W.2d 692, 693-94 (Mo.App. S.D. 1993); *State v. Root*, 820 S.W.2d 682, 685-86 (Mo.App. S.D. 1991). [HN2] An appellate court has no duty to resort to the argument portion of the brief to deduce wherein and why an appellant believes a trial court erred. *Root*, 820 S.W.2d at 686. Nonetheless, we have sifted the thirty pages of argument in Appellant's brief in an attempt to extract the import of each paragraph of his point. We shall address the contentions as we understand them, mindful that Appellant has the burden of demonstrating error. *State v. Harrison*, 539 S.W.2d 119, 121[1] (Mo.App. 1976).

Contention 1(A) maintains the evidence was insufficient to support the verdict of guilty returned by the jury in that there was no competent evidence to establish Appellant's speed. In addressing that contention, we are aware that Respondent was required to prove Appellant guilty beyond a [\*503] reasonable doubt. *City of Kansas City v. Oxley*, 579 S.W.2d 113, 114[1] (Mo. banc 1979). The standard of review for determining whether the evidence met that requirement is set forth in *State v. Grim*, 854 S.W.2d 403, 411[5] [\*\*5] (Mo. banc 1993), *cert. denied*, U.S. Ct. 562, 126 L. Ed. 2d 462 (1993).

[HN3] "We are required to take the evidence in the light most favorable to the State and to grant the State all reasonable inferences from the evidence. We disregard contrary inferences, unless they are such a natural and logical extension of the evidence that a reasonable juror would be unable to disregard them. Taking the evidence in this light, we consider whether a reasonable juror could find each of the elements

beyond a reasonable doubt."

As explained in *Oxley*, 579 S.W.2d at 115, [HN4] an appellate court neither weighs the evidence nor judges the credibility of the witnesses. Those are tasks for the jury. *State v. Wright*, 476 S.W.2d 581, 584[4] (Mo. 1972).

Viewed favorably to the verdict, the evidence establishes that on the morning of September 28, 1993, Officer David Larry Tuter of the Springfield Police Department was operating a radar unit on Grand Street in Springfield. The power source for the unit was the battery on Tuter's motorcycle. The motorcycle engine was "turned off."

To "set up" the radar unit at that site, Tuter performed three procedures to [\*\*6] ensure it was operating properly. First, he pushed a switch to determine whether all the tubes were working properly. He obtained a reading showing they were. Next, he did an "internal calibration" and again received a reading showing the unit was working properly. Finally, he struck a 50 mile-per-hour tuning fork in front of the unit and obtained a 50 mile-per-hour reading. He testified he followed these procedures "before and after each stop."

Asked whether he did anything else before directing the radar unit toward vehicular traffic, Tuter explained he performed a "sweep [of] the area with the radar" to detect outside interference. He observed none.

Between 10:30 and 11:00, Tuter saw a westbound Pontiac on Grand approaching his position. Tuter estimated its speed at 35 miles per hour, which exceeded the posted speed limit of 20 miles per hour. Tuter "put the radar unit into operation" and achieved a "radar lock" on the Pontiac, obtaining a reading of 36 miles per hour.

Tuter pursued the Pontiac and stopped it. Appellant was the driver. Tuter issued Appellant a citation for speeding.

One of Appellant's challenges to the sufficiency of the evidence is based on *City of St. Louis v. Boecker*, 370 S.W.2d 731 (Mo.App. 1963), and *State v. Weatherwax*, 635 S.W.2d 34 (Mo.App. W.D. 1982), which hold that [HN5] a speeding conviction cannot be based on radar without proof that the unit was tested and found to be operating properly at the site of the alleged violation and reasonably close to the time it occurred. *Boecker*, 370 S.W.2d at 737[5]; *Weatherwax*, 635 S.W.2d at 35.

Appellant maintains Tuter's testimony was insufficient to demonstrate compliance with *Boecker* and *Weatherwax* in that Tuter was unable to recall what time he calibrated the radar unit.

Asked on cross-examination what time he calibrated the unit, Tuter replied it could have been 9:30 or 10:15. That would have been anywhere between 15 and 90 minutes before Appellant's Pontiac appeared.

In *Boecker*, the officer tested the radar unit with a tuning fork before he left the police station to go on duty. 370 S.W.2d at 734. He did not test the unit at the site of the violation, and there was no evidence regarding the elapsed time between the test at the station and the violation. *Id.* In *Weatherwax*, the officer tested the radar unit with tuning forks at his home at 7:00 [\*\*8] a.m., before going on duty. 635 S.W.2d at 34-35. Some four hours later, at a different location, he used the unit to detect a speeding violation. *Id.* at 35. He did not test the unit at that site, nor did he test it again until going off duty at 4:00 p.m. *Id.* In both cases, appellate courts held the evidence insufficient to support a conviction.

Appellant, who acquired knowledge about radar in military service, asserts his research [504] disclosed no case that holds the accuracy of a radar unit can be established solely by a tuning fork.

The subject was addressed in *Boecker*, where the appellate court did not question the use of a tuning fork to test the accuracy of a radar unit "as a matter of principle." 370 S.W.2d at 736. However, *Boecker* noted the value of such a test hinged on the accuracy of the tuning fork. *Id.* Because there was no evidence that the tuning fork in *Boecker* was accurate, the appellate court had "grave doubts" that the test was sufficient to establish that the radar was functioning properly. *Id.* Despite such doubts, *Boecker* did not base reversal on the tuning fork test, but instead on the failure of the officer to test the [\*\*9] unit at the site of the violation and reasonably close to the time it occurred. *Id.* at 736-38.

Here, there was evidence regarding the accuracy of the tuning fork and radar unit. Don Oliver, who holds a "radio telephone operator's license" from the Federal Communications Commission ("FCC"), has "certified" radar units for "eight to ten years." On May 7, 1993, he certified the unit used by Tuter.

Explaining the process, Oliver testified that the frequency of the tuning fork for that unit is counted by an electronic frequency counter at his shop. Accuracy of the unit itself is tested by the tuning fork and by two other tuning forks at the shop. Oliver avowed Tuter's radar unit had these margins of error: 4/100 of a mile per hour at 30 miles per hour, 12/100 of a mile per hour at 50 miles per hour, and 5/100 of a mile per hour at 65 miles per hour.

In *State v. Moore*, 700 S.W.2d 880 (Mo.App. E.D. 1985), the arresting officer tested his radar unit with a 30-mile-per-hour tuning fork and a 70-mile-per-hour tuning fork approximately an hour before using the unit to gauge the accused's speed. *Id.* at 881. The officer repeated the procedure immediately after the arrest. [\*\*10] *Id.* The officer had tested the tuning forks by striking them in front of a frequency counter some eight months before the arrest. *Id.* 882. The conviction was affirmed.

In *State v. Shoemaker*, 798 S.W.2d 191 (Mo.App. E.D. 1990), the arresting officer tested his radar unit with tuning forks before and after using the unit to gauge the accused's speed. *Id.* at 193. The forks had been certified as accurate six months before the arrest, and were again certified as accurate five months following the arrest. *Id.* The officer also tested the ground speed of the radar unit against the speedometer on his vehicle. *Id.* The conviction was affirmed.

Here, the interval between the date Oliver certified Tuter's radar unit (including tuning fork) and the date Tuter used the unit to gauge Appellant's speed was shorter than the intervals in *Moore* and *Shoemaker*. Like the officers in those cases, Tuter performed a tuning fork test on his unit before and after stopping Appellant. Consistent with *Moore* and *Shoemaker*, we reject Appellant's claim that the evidence was insufficient to support a finding that Tuter's unit was accurately gauging speed when it gauged Appellant's [\*\*11] speed.

Appellant argues that Grand Street has four lanes, and traffic in the two eastbound lanes made it impossible for the radar to accurately gauge his speed. However, Tuter testified there were no other vehicles in the area which would have interfered with the radar reading Tuter got on Appellant's Pontiac. Credibility of Tuter's testimony was for the jury. *State v. Jeffries*, 858 S.W.2d 821, 823-24[4] (Mo.App. E.D. 1993). The jury evidently believed Tuter.

Appellant also argues that a curve in Grand Street, coupled with visual obstructions including trees, signs, poles and other objects, made it impossible for Tuter's radar "to obtain an accurate reading." Appellant presented photographs of the area to the jury in support of that hypothesis. Appellant has filed the photographs with us. They depict a street flanked by trees, signs and poles, but no more than normal for a four-lane street.

Tuter testified he saw Appellant's Pontiac when it was 250 to 300 feet east of Tuter's location. Tuter recounted there were no obstructions "to cause interference with the [\*505] radar." The jury was entitled to believe that testimony. *Jeffries*, 858 S.W.2d at 824.

Appellant [\*\*12] attacks the testimony of witness Oliver, who certified Tuter's radar unit. Appellant asserts Oliver "admitted to violating Federal, State and Local Laws in the performance of his responsibilities for the radar." In support of this accusation, Appellant cites a segment of the transcript where Oliver stated he occasionally pointed radar units at oncoming traffic when returning them after inspection.

Appellant does not (a) identify the laws violated, (b) explain how the alleged violations destroy the competency of Oliver's testimony, (c) cite any authority on the subject, or (d) explain why he cites none. [HN6] An appellate court is not required to review a contention when it appears without citation of applicable authority. *State v. Higgins*, 852 S.W.2d 172, 175[4] (Mo.App. S.D. 1993). Absent proper explanation concerning why no authority is cited, a contention unaccompanied by citation of authority is deemed waived or abandoned. *Id.* at 175[5].

Appellant also questions other aspects of the evidence, such as the power source for the radar and the length of time

his Pontiac was near the radar. Such factors were for the jury's consideration. They do not render the evidence [\*\*13] insufficient to support the verdict. Appellant's contention 1(A) is without merit.

Appellant bases contentions 1(B) and 1(C) on the premise that the evidence against him was entirely circumstantial. [HN7] Circumstantial evidence is evidence that does not directly prove a fact in issue but gives rise to a logical inference that the fact exists. *State v. Fleeer*, 851 S.W.2d 582, 598[50] (Mo.App. E.D. 1993).

Appellant cites no case holding a radar measurement of an automobile's speed is circumstantial evidence. Because of *Grim*, *supra*, 854 S.W.2d 403, we need not decide whether it is. Until *Grim*, the standard of review for sufficiency of the evidence where a criminal conviction was based on circumstantial evidence differed from the standard where a conviction was based on direct evidence. *Id.* at 405-08. *Grim* held that henceforth, the standard would be the same for all criminal convictions, whether based on direct evidence, circumstantial evidence, or both. *Id.* The standard in *Grim* is quoted earlier in this opinion. We hold the evidence in the instant case met that standard. Appellant's contentions 1(B) and 1(C), which are based on the *pre-Grim* circumstantial [\*\*14] evidence standard, provide no basis for reversal.

Contention 2 asserts the trial court "lacked jurisdiction," hence the verdict "had no validity."

[HN8] A court has jurisdiction if it has judicial authority over the subject matter and parties. *State ex rel. Furstenfeld v. Nixon*, 133 S.W. 340, 342 (Mo. 1910); *Lake Wauwanoka, Inc. v. Spain*, 622 S.W.2d 309, 314[7] (Mo.App. E.D. 1981). Appellant, as we understand his argument, does not contend the trial court lacked jurisdiction to adjudicate violations of Springfield traffic ordinances. Instead, Appellant maintains Respondent never proved Tuter's radar unit was "licensed or authorized" by the FCC. Appellant also avers Oliver violated his FCC license in testing and using radar units. These factors, says Appellant, "barred jurisdiction, and nullified any verdict derived thereof."

Appellant cites no authority in support of that hypothesis, and we are aware of none. We fail to see how lack of an FCC license for Tuter's radar unit (if indeed one was required), or how a violation by Oliver of his FCC license (if indeed any occurred), divested the trial court of jurisdiction. Contention 2 is denied.

Contention 3 complains about [\*\*15] "denial of change of venue." Appellant filed a "Motion for Change of Venue Out of Time" on the day trial began (January 10, 1994). The motion prayed that the case be transferred to Division 3 of the Circuit Court of Judicial Circuit 31 or to Dallas County, which lies in Judicial Circuit 30. The trial court denied the motion.

The motion did not cite any rule or statute authorizing the change of venue. Appellant cited none to the trial court when it took up the motion. Appellant's brief likewise cites none.

[\*506] Rule 37 governs the procedure in courts having original jurisdiction of ordinance violations. *See*: Rule 37.01. We find no provision in Rule 37 for a change of venue. n3

n3 [HN9] Rule 37.08 reads: "If no procedure is specially provided by this Rule 37, the judge having jurisdiction shall proceed in a manner consistent with judicial decisions, applicable statutes or other rules of this Court."

[HN10] *Section 479.150.2*, which authorizes Respondent to provide by ordinance for jury trials in its municipal [\*\*16] court, provides that such trials shall be conducted "in accordance with procedures applicable before circuit courts." § 479.150.2(1). It is thus arguable that Rule 32.04, which governs changes of venue for criminal cases in circuit courts, applies here. Paragraph "(b)" of the rule establishes a deadline for filing an application for a change of venue.

Assuming -- without deciding -- that § 479.150.2(1), coupled with Rule 32.04, authorizes a change of venue in a municipal ordinance violation case, Appellant has shown no error in the denial of his motion. Our study of the record

reveals Appellant filed his motion after the deadline in Rule 32.04(b). His motion tacitly concedes this, as its caption brands it "Out of Time."

Appellant cites no authority holding it is error to deny an untimely motion for change of venue, particularly where (as here) nothing in the record suggests an accused cannot receive a fair trial by jury in the locale where the case is pending. Assuming, arguendo, that Appellant had a right to a change of venue upon timely application -- we do not imply he did -- we hold the trial court did not err in denying Appellant's untimely application.

In his brief, Appellant [\*\*17] declares Respondent is not empowered to hold jury trials, therefore his case should have been "transferred to the appropriate circuit court." In support of that hypothesis, Appellant cites "House Bill #1386."

We are unable to find any statute pertaining to jury trials of municipal ordinance violations which was enacted as House Bill 1386. *Section 479.150.2*, which authorizes Respondent to provide by ordinance for jury trials in its municipal court, was in force when Appellant was tried. Appellant cites no authority suggesting § 479.150.2 is invalid. We find no merit in Appellant's claim of error regarding denial of his motion for change of venue.

Contention 3 also assigns error in the trial court's denial of "peremptory [sic] challenge." We gather from the argument in Appellant's brief that he refers to the trial court's denial of a "Motion for Change of Judge Out of Time" filed by Appellant on the day trial began.

The motion did not cite any rule or statute authorizing the change of judge. In oral argument to the trial court, Appellant cited Rule 37.53. Paragraph "(a)" of the rule provides it does not govern the procedure for disqualification of a judge in ordinance violation [\*\*18] cases in which there is a timely exercise of a right to a jury trial.

Appellant's brief cites no rule, statute or case demonstrating that the denial of his motion for change of judge was error.

[HN11] Rule 37.61(e) pertains to jury trials of ordinance violations; it provides that such trials "shall proceed in the manner provided for the trial of a misdemeanor by the rules of criminal procedure."

[HN12] Rule 32.07(b) governs applications for a change of judge in misdemeanor cases. The application must be filed not later than ten days before the date set for trial, unless the designation of the trial judge occurs less than ten days before trial. Here, the trial judge was designated more than ten days before the trial date.

Assuming -- without deciding -- that Rules 37.61(e) and 32.07(b), read together, authorize a change of judge in a municipal ordinance violation case tried by jury, Appellant has shown no error in the denial of his application. Appellant filed the application after the deadline in Rule 32.07(b), as indicated by the caption on the motion which brands it "Out of Time." Appellant cites no authority holding it is error to deny an untimely application for change of judge. The claim [\*\*19] of error is denied.

[\*507] Contention 4 complains about corruption of the record, but identifies no specific defect or omission. The five pages of argument on contention 4, as we comprehend them, maintain that the record does not contain every document filed in the trial court and does not show everything that occurred before and after trial. The argument mentions numerous alleged deficiencies, but makes only a general allegation of prejudice. No specific prejudice is attributed to any alleged flaw.

We have studied the argument and have found nothing in it which warrants reversal. Further discussion would serve no jurisprudential purpose. Contention 4 is denied per Rule 30.25(b).

Contention 5 complains about the trial court "denying proper legal representation." Again resorting to the argument portion of Appellant's brief, we gather this complaint is based on Appellant's alleged indigence and his belief that the

trial court was consequently required to appoint counsel for him.

[HN13] *Section 600.042* reads, in pertinent part:

"10. The [state public defender] director and defenders shall provide legal services to an eligible person:

. . .

(5) For whom, in a case in which he [\*\*20] faces a loss or deprivation of liberty, any law of this state requires the appointment of counsel; however, the director and the defenders shall not be required to provide legal services to persons charged with violations of . . . municipal ordinances."

Inasmuch as Appellant was charged with a municipal ordinance violation, he was ineligible for public defender representation.

Furthermore, some two months before trial, Appellant and the prosecutor appeared in the trial court, whereupon the prosecutor announced Respondent would not seek a jail sentence if Appellant was convicted. [HN14] There is no constitutional impediment to an uncounseled misdemeanor conviction where imprisonment is not imposed. *White v. King*, 700 S.W.2d 152, 155[7] (Mo.App. W.D. 1985). Appellant was convicted of only a municipal ordinance violation, not a misdemeanor. Furthermore, he was sentenced to only a fine and court costs. [HN15] If an accused is merely fined and not sentenced to any term of imprisonment, he has no constitutional right to counsel. *State v. Albright*, 843 S.W.2d 400, 404[11] n. 3 (Mo.App. W.D. 1992). Contention 5 is meritless.

Contention 6 asserts the trial court erred "in permitting the [\*\*21] prosecution to comment on Appellant's failure to call the witness." We divine from the argument portion of Appellant's brief that this complaint is based on a segment of the cross-examination of Appellant by the prosecutor wherein the prosecutor established that Appellant had the number of a city bus that, according to Appellant, was in front of him just before Tuter stopped him. The prosecutor's questions and Appellant's answers established that Appellant could have obtained the bus driver's name and subpoenaed him.

Appellant maintains the bus driver was equally available to the prosecution, hence the prosecutor's "comments" on Appellant's failure to call the driver were improper.

Nowhere in Tuter's testimony is there any mention of a bus, and nothing in the record indicates Respondent had knowledge of an alleged bus until Appellant mentioned one at trial. The thrust of the prosecutor's questioning was that because Appellant claimed to have written down the bus number, he could have produced the driver at trial if indeed there had been a bus at the site when Tuter stopped Appellant. The obvious implication is that no bus was there. It is thus arguable that the bus driver mentioned [\*\*22] by Appellant was not equally available to Respondent. However, we need not resolve that issue.

Appellant did not object to the prosecutor's questions which he now complains about in contention 6. Furthermore, [HN16] Rule 29.11(d) provides that in jury tried cases, allegations of error to be preserved for appellate review must be included in a motion for new trial, subject to certain exceptions which do not apply to contention 6. As explained below, Appellant failed to satisfy that requirement.

Immediately after the verdict, the trial court granted Appellant until January 28, 1994, to file a motion for a new trial. Appellant [\*508] filed several documents in the trial court within that deadline. The only one resembling a motion for a new trial was a four-page document captioned "Petition for Trial De Novo from Municipal Decision and for Relief from Imposition of Illegal and Unconstitutional Sentence and Fine." We need not decide whether it qualifies as a motion for new trial because even if it does, it fails to mention the alleged error presented by contention 6.

Because Appellant failed to object at trial to the prosecutor's questions regarding the bus driver and failed to

mention [\*\*23] the matter in a motion for new trial, contention 6 is not preserved for review. *State v. Maxwell*, 465 S.W.2d 562, 563[2] (Mo. 1971).

Contention 7 refers to both jury misconduct and witness misconduct at trial. We first address the alleged jury misconduct.

After Respondent rested its case, the trial court declared a recess, admonishing the jurors not to discuss the case among themselves or with others, or to permit anyone to discuss it in their hearing.

During the recess, Appellant moved for a mistrial because Tuter "was out there talking to the jurors." The prosecutor stated that because "this is a nonsmoking building," persons who smoke must do so outside, and Tuter (a smoker) was outside talking to someone.

In support of his motion for mistrial, Appellant presented testimony by Marbelene Pankey. She recounted she saw a police officer, identified to her as Tuter, talking to a female juror. Pankey "heard something in reference to a tuning fork." Pankey also heard the juror ask Tuter "how someone was" -- the name sounded like Kerry or Kenny. Pankey added that she saw Tuter talking to another woman whom she believed was a juror.

The trial court called Tuter into the courtroom [\*\*24] and questioned him. Tuter admitted talking to a juror but avowed he did not know her name. Tuter testified they talked three or four minutes while smoking, and the conversation did not pertain to the trial. Asked specifically whether he talked about tuning forks, Tuter replied, "No, sir."

Appellant then presented testimony by his wife in support of the motion for mistrial. She stated Tuter's conversation with the juror lasted "a good five, ten minutes."

Appellant asked the trial court whether it would be possible to call the juror as a witness on the motion for mistrial. The trial court told Appellant he could do so but it may or may not be in his best interest.

Appellant replied: "I see what you mean, Your Honor. No. I don't wish to call her."

The trial court thereupon denied the motion for mistrial.

As explained earlier, § 479.150.2(1) provides that jury trials in Respondent's municipal court shall be conducted "in accordance with procedures applicable before circuit courts." Section 494.495 provides a court may permit the jury to separate at any adjournment or recess during the trial and jury deliberation in all cases of misdemeanor or felony, except in capital cases. Consequently, [\*\*25] separation of the jurors during the recess in Appellant's trial was not error *per se*.

Appellant cites §§ 546.230 and 546.240, RSMo 1986, which formerly governed jury separation and sequestration; however, those statutes were repealed in 1989. Laws of Missouri 1989, S.B. Nos. 127 *et seq.*

[HN17] Where a motion for new trial is made on account of communications to the jury during the progress of the trial, there is a rebuttable legal presumption that they were prejudicial to the moving party, and where competent evidence is offered it is the duty of the trial court to hear and consider it; when the court does so, its decision is reviewable for abuse of discretion only. *State v. Evans*, 699 S.W.2d 514, 517[4] (Mo.App. S.D. 1985).

In our discussion of contention 6, we referred to a document filed by Appellant after the verdict which could arguably be considered a motion for new trial. In it, Appellant complained about Tuter's conversation with the juror. In adjudicating the claim of jury misconduct in contention 7, we shall assume -- without deciding -- that the document [\*509] qualifies as a motion for a new trial, thereby preserving that issue for review.

Appellant presented [\*\*26] no evidence regarding the claim of jury misconduct at the hearing on his post-verdict motions, thus all of the testimony regarding that issue was heard by the trial court before it denied the motion for

mistrial.

The truth or falsity of the testimony of Pankey, Tuter, and Appellant's wife on the issue of jury misconduct was for the trial court to determine in the exercise of sound judicial discretion. *State v. Stillings*, 882 S.W.2d 696, 700 (Mo. App. S.D. 1994); *State v. Duckett*, 849 S.W.2d 300, 305 (Mo.App. S.D. 1993). Tuter's testimony, if believed, was sufficient to rebut the presumption of prejudice. The trial court evidently found Tuter's testimony credible. On the record here, we cannot convict the trial court of abusing its discretion in that finding. Accordingly, we hold the trial court did not err in denying Appellant's motion for mistrial on the ground of jury misconduct.

Appellant complains that the trial court erroneously placed the burden of proof on him regarding jury misconduct. As we understand Appellant's brief, he bases this complaint on a statement to him by the trial court that he (Appellant) could call any witnesses he desired on the motion for mistrial. [\*\*27]

Nothing in the record indicates the trial court had the notion that it was Appellant's burden to prove Tuter's conversation with the juror was prejudicial. After Appellant presented Pankey's testimony about Tuter's conversation with the juror, it was the trial court who called Tuter into the courtroom and questioned him about the incident. After the trial court questioned Tuter, the court allowed Appellant to question him. Appellant's complaint about the burden of proof is unsupported by the record, and is denied.

We next address the complaint about witness misconduct in contention 7.

During the recess where Tuter talked to the juror, he also talked to witness Oliver who, it will be recalled "certified" Tuter's radar unit. Appellant moved for a mistrial because of that conversation, and presented testimony by Oliver and Tuter about it.

Oliver admitted talking to Tuter, but testified it was just "general conversation." Oliver denied any discussion with Tuter about Appellant's case.

Tuter admitted talking to Oliver, but avowed they were "talking about motorcycles." Tuter denied conversing with Oliver about tuning forks, radar certification, or anything else regarding Appellant's [\*\*28] case.

The testimony of Oliver and Tuter about their conversation was uncontradicted. The trial court denied the motion for mistrial.

The cases cited in our discussion of the jury misconduct issue establish that the credibility of the testimony of Oliver and Tuter about their conversation was for the trial court to determine. The trial court evidently found their testimony credible.

More importantly however, the conversation occurred *after* both of them had testified in front of the jury. Consequently, their testimony to the jury could not have been affected by their conversation. Appellant cites no case where a conviction by jury was reversed because two prosecution witnesses conversed with each other after presenting their testimony to the jury. We hold the trial court did not abuse its discretion in denying Appellant's motion for mistrial on the ground of witness misconduct.

This brings us to contention 8, Appellant's final claim of error: "seating of improper jury." Because contention 8 does not specify what was improper, we have endeavored to identify the alleged impropriety by probing the argument following contention 8.

According to the argument, an alternate juror had [\*\*29] to serve as an alternate on a jury in a case immediately after Appellant's case and was not asked whether that would be a problem. Appellant does not allege this alternate juror replaced a regular juror during his trial, and we find nothing in the record indicating that an alternate juror participated in the verdict. Furthermore, nothing in the record suggests this alternate juror was inconvenienced by serving in both

Appellant's case and the next case (if indeed that occurred), [\*510] and Appellant fails to explain how this could have been prejudicial to him.

The only other averment in the argument regarding the composition of the jury is an allegation that the jury pool "did not consist of impartial jury of the county and record shows that jury seated was biased, prejudiced, and tainted." Appellant does not explain how the record shows this, and cites nothing in the record substantiating the complaint. Contention 8 is denied.

In adjudicating this appeal, we resorted to the argument in Appellant's brief in an effort to discover the meaning of the eight numbered contentions in his point relied on. As noted early in this opinion, this is a task we were not obliged to undertake. [\*\*30] The argument contains a multitude of other complaints, accompanied by accusations of misconduct against the trial court, prosecutor and others. We have not addressed the matters referred to in the preceding sentence because we find no connection between them and anything in the point relied on. [HN18] Appellate review is limited to matters raised in the points relied on. *State v. Gooch*, 831 S.W.2d 277, 277[2] (Mo.App. S.D. 1992).

Judgment affirmed.

**CITY OF BERKELEY, Respondent, v. JANET ROSE STRINGFELLOW,  
Appellant**

**No. 55347****Court of Appeals of Missouri, Eastern District, Division One***783 S.W.2d 501; 1990 Mo. App. LEXIS 162***January 30, 1990, Filed****PRIOR HISTORY:** [\*\*1]

Appeal from the Circuit Court of St. Louis County, Hon. Daniel J. O'Toole.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of the judgment of the Circuit Court of St. Louis County (Missouri), which convicted her of exceeding the posted speed limit and resisting lawful arrest.

**OVERVIEW:** An officer stopped defendant's vehicle, which was clocked by radar equipment at 77 miles per hour in a 55 mile-per-hour zone. Defendant refused to sign a citation at the officer's request and the officer attempted to place her under arrest; defendant struggled and the officer had to physically drag her to his car. The trial court found defendant guilty of resisting lawful arrest in violation of a city ordinance and speeding. On appeal, the court reversed defendant's conviction for resisting a lawful arrest. The trial court lacked jurisdiction over the charge because the information failed to allege sufficient facts upon which a verdict could be predicated, in violation of Mo. Sup. Ct. R. 37.35. The information did not set forth an ordinance violated as required by Rule 37.35; nor did it allege any essential facts constituting a violation of the ordinance. In failing to raise the issue of the validity of the speeding ordinance at the first available opportunity, defendant waived it. The evidence was sufficient to support defendant's conviction of speeding.

**OUTCOME:** The court affirmed defendant's conviction of exceeding the posted speed limit. The court reversed defendant's conviction of resistance to lawful arrest.

**CORE TERMS:** ordinance, radar, lawful arrest, resisting, speed limit, posted, gun, speed, miles, exceeding, speeding, information charging, tuning, blue, police officer, refused to sign, essential facts, high rate, constituting, calibration, physically, monitoring, displayed, traveling, favorable, handcuff, checking, noticed, clocked, tested

**OPINION BY:**

CRIST

**OPINION:**

[\*502] Defendant appeals her convictions of exceeding the posted speed limit and resisting lawful arrest. We affirm the speeding charge and reverse the resistance to lawful arrest charge.

Viewed in a light most favorable to the verdict, the evidence reveals on August 1, 1987, Police Officer Richard Sounders of the City of Berkeley police department noticed a blue Chevrolet Camero driven by defendant traveling at a high rate of speed on Interstate 170. Officer activated his radar equipment which clocked the blue Camero at 77 miles per hour. The posted speed limit on Interstate 170 is 55 miles per hour.

Officer attempted to pull the defendant over. The defendant exited the Highway at Scudder Road and stopped at the top of the ramp. Officer got out of his car and approached the defendant. Officer asked for defendant's driver's license. Defendant complied but denied any wrongdoing. Officer informed defendant his radar clocked her automobile's rate of speed at 77 miles per hour. Defendant demanded [\*\*2] to see his radar equipment and officer allowed her to view it.

Officer filled out a citation and asked defendant to sign it. Defendant refused. Officer explained that by signing the citation she was only promising to appear at the given court date, not admitting exceeding the posted speed limit. Defendant continued to refuse to sign the citation. Officer explained to defendant he would have to take her into custody if she refused to [503] sign the citation. Defendant still refused to sign the citation and told officer he would have to lock her up. Officer then informed her she was under arrest. He attempted to handcuff her and was able to get a handcuff over her right hand. Thereafter a fight ensued. Defendant turned to face officer, grabbed his left arm with her hand and began to scratch his arm with her fingernails. She continued struggling and officer could not get control of her. Finally, officer had to physically push her to the ground, put his weight on top of her, and bring her hands behind her back to get them cuffed together. She still continued to struggle refusing to stand and officer was only able to get her to his car by physically dragging her. Defendant was taken [\*\*3] to Christian Northwest Hospital for the purpose of having a blood sample drawn.

Defendant was charged by information with exceeding the posted speed limit, driving while intoxicated, assault third degree on a police officer, possession of a controlled substance, and resisting a lawful arrest. City of Berkeley's municipal judge found defendant guilty on all counts. Defendant subsequently petitioned the circuit court for trial de novo. The cause was heard on August 18, 1988. The circuit court found defendant guilty of resisting lawful arrest and speeding. Defendant was fined \$ 100 for the charge of resisting lawful arrest and \$ 25 for the charge of exceeding the posted speed limit. Defendant appeals. No brief was submitted by the respondent, City of Berkeley, nor did counsel for City of Berkeley appear for oral argument.

Defendant asserts the trial court lacked jurisdiction over the resisting lawful arrest charge because the information failed to allege sufficient facts upon which a verdict could be predicted. Rule 37.34 [HN1] requires all ordinance violations be prosecuted by information. Rule 37.35 in part requires "the information . . . state the name of defendant . . . state plainly, [\*\*4] concisely, and definitely the essential facts constituting the ordinance violation charged . . . state the time and place of the ordinance violation charged . . . cite the chapter and section of the ordinance alleged to have been violated and the chapter and section providing the penalty or punishment . . ."

The information charging defendant with resisting lawful arrest states only that on August 1, 1987, at Scudder and I-170 at 6:05 p.m., Janet Rose Stringfellow did unlawfully "resist a lawful arrest." The information is signed by the arresting officer and the City of Berkeley Prosecutor. No ordinance violation appears on the information.

[HN2] Although an information charging an ordinance violation is not subject to the same degree of strictness and particularity applicable to testing the sufficiency of indictments and informations in criminal cases, it must nevertheless set forth facts which if found true would constitute the offense prohibited by the ordinance. *City of Kansas City v. Harbin*, 600 S.W.2d 589, 592 [2-5] (Mo.App. 1980), citing *City of Kansas City v. Narron*, 493 S.W.2d 394, 398 [2-4] (Mo.App. 1973).

The test for sufficiency of an information is whether [\*\*5] it states the essential elements of the offense so as to adequately apprise the defendant of the charge against her and whether final disposition of the charge will bar further prosecution for the same offense. *City of Hermann v. Huxol*, 637 S.W.2d 89, 91 [3-5] (Mo.App. 1982).

The information charging defendant with resisting lawful arrest does not comply with Rule 37.35 nor does it comply with the test for sufficiency. It does not set forth an ordinance violated as required by the rule; it does not allege any essential facts constituting a violation of an ordinance; it does not allege any elements of the crime intended to be charged. The resisting arrest information was insufficient. Because of the disposition of this offense, we need not address any of defendant's other points of alleged error concerning the resisting lawful arrest charge.

Defendant next asserts the trial court erred in claiming jurisdiction over the speeding charge because the certified copy [\*504] of the ordinance presented by City of Berkeley at trial was an ordinance which was not in effect on August 1, 1987, the date of the occurrence. However, defendant failed to object when the prosecutor presented [\*\*6] the ordinance for admission by stipulation of the parties. [HN3] Challenges to the validity of an ordinance, like challenges to the constitutionality of an ordinance must be raised at the first opportunity that good pleading and orderly procedure permit and if not so raised are deemed waived. *City of St. Louis v. Aetna Casualty and Surety Co.*, 429 S.W.2d 252, 254 [1] (Mo. 1968); *see also McDonald v. Plas*, 401 S.W.2d 929, 935 [8, 9] (Mo.App. 1966); *City of Frankford v. Davis*, 348 S.W.2d 553, 554-555 [4, 5, 6] (Mo.App. 1961). In failing to raise the issue of the validity of the ordinance at the first available opportunity, she waived her right to challenge it. Point denied.

Finally defendant contends the trial court erred in finding defendant guilty of the charge of speeding because there was insufficient evidence to support the judgment. [HN4] The evidence must be construed most strongly in favor of the result reached in the trial court and the facts in evidence and all inferences reasonably to be drawn therefrom are to be considered in a light most favorable to the city and all evidence and inferences to the contrary are to be disregarded. *City of Jackson v. Rapp*, 700 [\*\*7] S.W.2d 498, 499 [1] (Mo.App. 1985).

Officer testified at trial that on August 1, 1987 at about 6 p.m. he was on duty monitoring the traffic flow on Interstate 170 southbound. He had his radar gun with him which he had tested himself just shortly before he began monitoring traffic. His tests, which included tuning the radar gun with two different tuning forks and checking of the internal calibration to assure all the diodes were properly working, resulted in an accurate display from the radar gun. Officer also testified he is a certified radar instructor. He testified that his particular radar gun had last been certified and calibrated on June 17, 1987.

Officer testified he noticed a blue Chevrolet Camero traveling at a "very high rate of speed." The posted speed limit on Interstate 170 is 55 miles per hour. Officer pointed the radar gun out through the rear window of his vehicle and was able to track defendant's vehicle approaching the rear of his vehicle. The radar reading initially displayed a speed of 77 miles per hour and then locked in on a speed of 76 miles per hour. Officer testified no other car interfered with the radar reading of the speed of defendant's car.

The speed [\*\*8] measuring accuracy of the radar gun was shown by evidence tending to prove it was tested and shown to be accurate by the use of two separate tuning forks and by checking the internal calibration. There was sufficient evidence to support a finding the radar gun accurately displayed defendant's automobile exceeded the posted speed limit. *State v. Guenther*, 744 S.W.2d 564, 565 [1,2] (Mo.App. 1988). This point is denied.

The judgment of guilty of resisting lawful arrest is reversed. The judgment of guilty of exceeding the posted speed limit is affirmed.

**CITY OF BERKELEY, Respondent, v. JANET ROSE STRINGFELLOW,  
Appellant**

**No. 55347****Court of Appeals of Missouri, Eastern District, Division One***783 S.W.2d 501; 1990 Mo. App. LEXIS 162***January 30, 1990, Filed****PRIOR HISTORY:** [\*\*1]

Appeal from the Circuit Court of St. Louis County, Hon. Daniel J. O'Toole.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant sought review of the judgment of the Circuit Court of St. Louis County (Missouri), which convicted her of exceeding the posted speed limit and resisting lawful arrest.

**OVERVIEW:** An officer stopped defendant's vehicle, which was clocked by radar equipment at 77 miles per hour in a 55 mile-per-hour zone. Defendant refused to sign a citation at the officer's request and the officer attempted to place her under arrest; defendant struggled and the officer had to physically drag her to his car. The trial court found defendant guilty of resisting lawful arrest in violation of a city ordinance and speeding. On appeal, the court reversed defendant's conviction for resisting a lawful arrest. The trial court lacked jurisdiction over the charge because the information failed to allege sufficient facts upon which a verdict could be predicated, in violation of Mo. Sup. Ct. R. 37.35. The information did not set forth an ordinance violated as required by Rule 37.35; nor did it allege any essential facts constituting a violation of the ordinance. In failing to raise the issue of the validity of the speeding ordinance at the first available opportunity, defendant waived it. The evidence was sufficient to support defendant's conviction of speeding.

**OUTCOME:** The court affirmed defendant's conviction of exceeding the posted speed limit. The court reversed defendant's conviction of resistance to lawful arrest.

**CORE TERMS:** ordinance, radar, lawful arrest, resisting, speed limit, posted, gun, speed, miles, exceeding, speeding, information charging, tuning, blue, police officer, refused to sign, essential facts, high rate, constituting, calibration, physically, monitoring, displayed, traveling, favorable, handcuff, checking, noticed, clocked, tested

**OPINION BY:**

CRIST

**OPINION:**

[\*502] Defendant appeals her convictions of exceeding the posted speed limit and resisting lawful arrest. We affirm the speeding charge and reverse the resistance to lawful arrest charge.

Viewed in a light most favorable to the verdict, the evidence reveals on August 1, 1987, Police Officer Richard Sounders of the City of Berkeley police department noticed a blue Chevrolet Camero driven by defendant traveling at a high rate of speed on Interstate 170. Officer activated his radar equipment which clocked the blue Camero at 77 miles per hour. The posted speed limit on Interstate 170 is 55 miles per hour.

Officer attempted to pull the defendant over. The defendant exited the Highway at Scudder Road and stopped at the top of the ramp. Officer got out of his car and approached the defendant. Officer asked for defendant's driver's license. Defendant complied but denied any wrongdoing. Officer informed defendant his radar clocked her automobile's rate of speed at 77 miles per hour. Defendant demanded [\*\*2] to see his radar equipment and officer allowed her to view it.

Officer filled out a citation and asked defendant to sign it. Defendant refused. Officer explained that by signing the citation she was only promising to appear at the given court date, not admitting exceeding the posted speed limit. Defendant continued to refuse to sign the citation. Officer explained to defendant he would have to take her into custody if she refused to [503] sign the citation. Defendant still refused to sign the citation and told officer he would have to lock her up. Officer then informed her she was under arrest. He attempted to handcuff her and was able to get a handcuff over her right hand. Thereafter a fight ensued. Defendant turned to face officer, grabbed his left arm with her hand and began to scratch his arm with her fingernails. She continued struggling and officer could not get control of her. Finally, officer had to physically push her to the ground, put his weight on top of her, and bring her hands behind her back to get them cuffed together. She still continued to struggle refusing to stand and officer was only able to get her to his car by physically dragging her. Defendant was taken [\*\*3] to Christian Northwest Hospital for the purpose of having a blood sample drawn.

Defendant was charged by information with exceeding the posted speed limit, driving while intoxicated, assault third degree on a police officer, possession of a controlled substance, and resisting a lawful arrest. City of Berkeley's municipal judge found defendant guilty on all counts. Defendant subsequently petitioned the circuit court for trial de novo. The cause was heard on August 18, 1988. The circuit court found defendant guilty of resisting lawful arrest and speeding. Defendant was fined \$ 100 for the charge of resisting lawful arrest and \$ 25 for the charge of exceeding the posted speed limit. Defendant appeals. No brief was submitted by the respondent, City of Berkeley, nor did counsel for City of Berkeley appear for oral argument.

Defendant asserts the trial court lacked jurisdiction over the resisting lawful arrest charge because the information failed to allege sufficient facts upon which a verdict could be predicted. Rule 37.34 [HN1] requires all ordinance violations be prosecuted by information. Rule 37.35 in part requires "the information . . . state the name of defendant . . . state plainly, [\*\*4] concisely, and definitely the essential facts constituting the ordinance violation charged . . . state the time and place of the ordinance violation charged . . . cite the chapter and section of the ordinance alleged to have been violated and the chapter and section providing the penalty or punishment . . ."

The information charging defendant with resisting lawful arrest states only that on August 1, 1987, at Scudder and I-170 at 6:05 p.m., Janet Rose Stringfellow did unlawfully "resist a lawful arrest." The information is signed by the arresting officer and the City of Berkeley Prosecutor. No ordinance violation appears on the information.

[HN2] Although an information charging an ordinance violation is not subject to the same degree of strictness and particularity applicable to testing the sufficiency of indictments and informations in criminal cases, it must nevertheless set forth facts which if found true would constitute the offense prohibited by the ordinance. *City of Kansas City v. Harbin*, 600 S.W.2d 589, 592 [2-5] (Mo.App. 1980), citing *City of Kansas City v. Narron*, 493 S.W.2d 394, 398 [2-4] (Mo.App. 1973).

The test for sufficiency of an information is whether [\*\*5] it states the essential elements of the offense so as to adequately apprise the defendant of the charge against her and whether final disposition of the charge will bar further prosecution for the same offense. *City of Hermann v. Huxol*, 637 S.W.2d 89, 91 [3-5] (Mo.App. 1982).

The information charging defendant with resisting lawful arrest does not comply with Rule 37.35 nor does it comply with the test for sufficiency. It does not set forth an ordinance violated as required by the rule; it does not allege any essential facts constituting a violation of an ordinance; it does not allege any elements of the crime intended to be charged. The resisting arrest information was insufficient. Because of the disposition of this offense, we need not address any of defendant's other points of alleged error concerning the resisting lawful arrest charge.

Defendant next asserts the trial court erred in claiming jurisdiction over the speeding charge because the certified copy [\*504] of the ordinance presented by City of Berkeley at trial was an ordinance which was not in effect on August 1, 1987, the date of the occurrence. However, defendant failed to object when the prosecutor presented [\*\*6] the ordinance for admission by stipulation of the parties. [HN3] Challenges to the validity of an ordinance, like challenges to the constitutionality of an ordinance must be raised at the first opportunity that good pleading and orderly procedure permit and if not so raised are deemed waived. *City of St. Louis v. Aetna Casualty and Surety Co.*, 429 S.W.2d 252, 254 [1] (Mo. 1968); *see also McDonald v. Plas*, 401 S.W.2d 929, 935 [8, 9] (Mo.App. 1966); *City of Frankford v. Davis*, 348 S.W.2d 553, 554-555 [4, 5, 6] (Mo.App. 1961). In failing to raise the issue of the validity of the ordinance at the first available opportunity, she waived her right to challenge it. Point denied.

Finally defendant contends the trial court erred in finding defendant guilty of the charge of speeding because there was insufficient evidence to support the judgment. [HN4] The evidence must be construed most strongly in favor of the result reached in the trial court and the facts in evidence and all inferences reasonably to be drawn therefrom are to be considered in a light most favorable to the city and all evidence and inferences to the contrary are to be disregarded. *City of Jackson v. Rapp*, 700 [\*\*7] S.W.2d 498, 499 [1] (Mo.App. 1985).

Officer testified at trial that on August 1, 1987 at about 6 p.m. he was on duty monitoring the traffic flow on Interstate 170 southbound. He had his radar gun with him which he had tested himself just shortly before he began monitoring traffic. His tests, which included tuning the radar gun with two different tuning forks and checking of the internal calibration to assure all the diodes were properly working, resulted in an accurate display from the radar gun. Officer also testified he is a certified radar instructor. He testified that his particular radar gun had last been certified and calibrated on June 17, 1987.

Officer testified he noticed a blue Chevrolet Camero traveling at a "very high rate of speed." The posted speed limit on Interstate 170 is 55 miles per hour. Officer pointed the radar gun out through the rear window of his vehicle and was able to track defendant's vehicle approaching the rear of his vehicle. The radar reading initially displayed a speed of 77 miles per hour and then locked in on a speed of 76 miles per hour. Officer testified no other car interfered with the radar reading of the speed of defendant's car.

The speed [\*\*8] measuring accuracy of the radar gun was shown by evidence tending to prove it was tested and shown to be accurate by the use of two separate tuning forks and by checking the internal calibration. There was sufficient evidence to support a finding the radar gun accurately displayed defendant's automobile exceeded the posted speed limit. *State v. Guenther*, 744 S.W.2d 564, 565 [1,2] (Mo.App. 1988). This point is denied.

The judgment of guilty of resisting lawful arrest is reversed. The judgment of guilty of exceeding the posted speed limit is affirmed.

*635 S.W.2d 34; 1982 Mo. App. LEXIS 3573*

**April 13, 1982**

**SUBSEQUENT HISTORY:** [\*\*1]

Motion for Rehearing Overruled, Transfer Denied June 1, 1982.

**PRIOR HISTORY:** From the Circuit Court of Platte County

Criminal Appeal

Judge Abe Shafer

**DISPOSITION:**

Reversed; Defendant Ordered Discharged.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant's appeal from a judgment of the Circuit Court of Platte County (Missouri), which convicted him of speeding and imposed a fine of \$ 35, was transferred from the Missouri Supreme Court because the constitutional issues attempted to be raised had not been presented at the first opportunity.

**OVERVIEW:** Defendant drove his vehicle past a parked trooper, who trained his radar unit on defendant's vehicle and got a reading of 69 miles per hour in a 55 mile per hour zone. The trooper testified that he tested the radar unit with tuning forks before going to work four hours before stopping defendant and again when he went off duty five hours later but did not test the unit at the location where he observed defendant. A highway patrol employee testified that such units can be affected by outside influences such as power lines and neon lights and inside influences such as the heater and radio. On appeal, the court reversed the conviction. The court noted that it had previously held that it was not unreasonable to require a test of a radar unit at the site reasonably close to the time of the arrest, based on the outside factors recited in the employee's testimony. Absent evidence of such a test, the radar result was inadmissible, and the State had not established a prima facie case.

**OUTCOME:** The court reversed the circuit court judgment and ordered defendant discharged.

**CORE TERMS:** radar, arrest, tested, speed, fork, tuning, site, accuracy, mile, trooper, highway, tuning fork, patrol car, stationary, recorded, patrol, legitimate inference, serial number, calibration, laboratory, speedgun, scene, patrolman, driver, mph, proper foundation, reasonable time, undue burden, found guilty, tour of duty

**LexisNexis(R) Headnotes**

**OPINION BY:**

TURNAGE

**OPINION:**

[\*34] Ralph Weatherwax was found guilty by the court of speeding and assessed a fine of \$35. He appealed to the Supreme Court, but that court transferred the appeal here on the grounds that the constitutional issues attempted to be raised had not been presented at the first opportunity. *State v. Weatherwax*, 607 S.W.2d 692 (Mo. 1980). n1

n1 Weatherwax has filed a motion to transfer this case prior to opinion to the Supreme Court because a constitutional issue is involved. That contention has already been decided adversely to Weatherwax. The motion to transfer prior to opinion is overruled.

[\*\*2]

On this appeal the decisive issue is the failure of the patrolman to test the radar set at the site of the arrest and reasonably close to the time of the arrest. Reversed.

On December 4, 1978, Trooper Elliott of the Highway Patrol left his home at 7:00 A.M. to go on duty. While parked in his driveway, he tested his radar unit with two [\*35] tuning forks and found it to be operating properly. Shortly before 11:00 A.M., the trooper was parked beside Highway 36 when he observed an automobile driven by Weatherwax and trained his radar unit on that automobile. His radar unit indicated a reading of 69 mph in a 55 mph zone. The trooper stated he had not tested the unit since 7:00 A.M. and did not test it at the site of the arrest. He did test the unit about 4:00 P.M. on that same day when he went off duty and found it to be operating properly.

James Smith, an employee of the Highway Patrol assigned to radar repair and certification, testified. Smith testified to the tests performed on radar units to insure their accuracy. Smith testified that outside influences such as power lines

and neon lights can affect the readings obtained on the radar set used in this case. Smith also testified [\*\*3] that the operation of a heater fan in the trooper's automobile or the operation of two-way radio equipment could also affect the operation of the radar unit.

In *City of St. Louis v. Boecker*, 370 S.W.2d 731, 736[4] (Mo. App. 1963) the court reversed a conviction because the city failed to show that the radar unit had been tested at the site and reasonably close to the time of the arrest. The court stated that there could not be the slightest doubt as to the requirement for the test at the site of the arrest and reasonably close in time to that event. The basis of the court's ruling was the fact that outside factors can affect the operation of the radar unit as well as the fact that the unit can be affected by movement from place to place. At page 737[5] the court stated:

"But the requirement that proof be adduced that a radar speedmeter was tested and found to be operating properly at the site of and reasonably close to the time of an arrest should not place an undue burden on the prosecution, and should at the same time protect the rights of motorists against the possibility of error in this device which makes 'delicate measurements.' *State v. Graham, supra.*"

[\*\*4]

The State, in its brief, concedes that *Boecker* requires testing of the radar unit at the site of the arrest and reasonably close to that time, but urges this court to overrule *Boecker*. This court has no inclination to announce a rule contrary to that in *Boecker*. This for the very simple reason that the scientific evidence presented in *Boecker*, and also in this case, shows that outside factors, such as power lines, can affect the operation of a radar unit. If the rule in *Boecker* were to be abrogated, then a radar unit could be set up in any location whether or not there were outside factors which would give an incorrect reading, and the prosecution would have no burden to show that the radar unit was operating properly at the site of the arrest. As stated in *Boecker, State v. Graham*, 322 S.W.2d 188 (Mo. App. 1959) held that a radar unit is an extremely sensitive machine. As shown by the testimony in *Boecker*, and in this case, these units are sensitive to outside forces and must, therefore, be checked for accuracy at the site of the arrest. Further, as with any mechanical device, Smith testified in this case that radar units do malfunction. As stated in [\*\*5] *Boecker, supra*, [HN1] it is not an undue burden to place on the prosecution to adduce proof that the radar unit was operating properly at the site of the arrest and reasonably close in time to it.

Apparently, in an effort to overcome the failure to test the unit at the site of the arrest and reasonably close in time to that event, the State asked the trooper: "Based on your experience as a patrolman, as a driver, and your use of the radar device, did you also form an opinion as to the speed of this vehicle?" The trooper replied that by use of a combination of all three of those factors, he determined that the vehicle was traveling 69 mph. Because the radar evidence was inadmissible for failure to show that the unit was tested at the site of and reasonably close in time to the arrest, this opinion would likewise be inadmissible because the radar evidence was inextricably mingled with the other factors used by the trooper to determine speed.

It follows that the State failed to make a prima facie case when it failed to prove [\*\*36] that the radar unit was tested at the site of and reasonably close in time to the arrest.

The judgment is reversed and the defendant Weatherwax is ordered [\*\*6] discharged.

Clark, J. concurs

Pritchard, P.J., dissents in separate dissenting opinion

**DISSENT BY:**

PRITCHARD

**DISSENT:**

PRITCHARD, P.J.

Appellant was convicted of driving 69 miles per hour on U.S. Highway 36, a 55 mile per hour speed limit area. He was fined \$35.00 and costs.

The appeal was first lodged in the Supreme Court. That court held in *State v. Weatherwax*, 607 S.W.2d 692, 693 (Mo. 1980), that there was no proper raising of a constitutional question for the first time on a de novo appeal from a first trial wherein appellant was found guilty and fined \$25.00. Appellant has filed a motion in this court to retransfer his case to the Supreme Court, but that motion must be, and is, overruled because that court has already held that no timely presentation of any constitutional questions was made. The remaining issues, which are decided, relate to the admission of evidence of the result of the use of a speedgun light radar device for the contended reason that no proper foundation therefor had been laid. It is said that without that evidence, there would have been insufficient evidence for a conviction.

After this case was submitted in May, 1981, because certain findings of the trial [\*\*7] court referenced testimony of witnesses as to a foundation for the admission of the radar test results, and because that testimony was omitted from the abbreviated transcript of tape recordings, a further transcript was requested. Delay was occasioned in the further transcription of the trial tape, but it has now been received.

According to Trooper John W. Elliott, the device which he used to measure appellant's speed on December 4, 1978, at about 11:00 a.m., was a C M I Speedgun 8, with serial number 3200 30 34. He tested that device [at his residence in Hamilton, Missouri, which this court may judicially know is about 5 miles east of the intersections of U. S. Highway 36, and Highways D and J, where appellant's arrest was made. *Walsh v. Table Rock Asphalt Const. Co.*, 522 S.W.2d 116, 118, footnote 1 (Mo. App. 1975)] for accuracy when he went on duty that day a few minutes after 7:00 a.m., using two tuning forks, one for 30 miles per hour, and one for 70 miles per hour, on the moving mode (holding the tuning forks in front of the radar unit), the stationary mode, and on the patrol display. He also made a calibration check. These procedures were approved by the Patrol. The tests [\*\*8] Elliott made showed that the unit was accurate for both speeds. He had been familiarized with the unit by a field officer, had practiced with it, and it was also his responsibility to read the operations manual for each radar unit used. He had been using the Speedgun 8 for about 18 months, and other radar units for about four years. Elliott set up the radar unit with his patrol car in a stationary position, facing east, where there was a slope or uphill grade going west. The unit was placed on the driver's door, window rolled down, and its antenna was held outside the vehicle. There were no power lines in the exact location. He made the same tests on the unit when he went off duty (the place where these tests were made does not appear in the record), the results being the same as that morning. The 30 mile per hour tuning fork had a serial number C 14581, and the 70 mile per hour fork had a serial number C 14553. Appellant's speed was measured by the unit at 69 miles per hour in a 55 mile an hour speed limit zone on the highway. Elliott also gave an opinion, based upon his experience as a patrolman, a driver, and his use of the radar device, that the appellant's speed was 69 miles per [\*\*9] hour.

James W. Smith had been employed 9-1/2 years by the communications division of the Missouri Highway Patrol, assigned exclusively to radar repair and certification. He tested and certified the accuracy of radar units used by the Patrol. His extensive [\*37] qualifications and experience in electronics and the radar field were unquestioned.

Smith testified in detail as to the procedures used by him to test radar units and tuning forks in the repair shop in Jefferson City. Radar units are by Patrol policy checked annually, but on the average, they will come in on a quarterly basis. Test equipment includes a microphone, audio amplifier, frequency counting device for vibrations or pitch of the tone, and a short wave receiver for radio station WWV, run by the U. S. Bureau of Standards, located at Fort Collins, Colorado, which insures the accuracy, by cancelling out pitch or tone, of the frequency counter, which, in turn, will test the accuracy of tuning forks. Radar units are tested by master tuning forks, which are calibrated the same as (field) tuning forks. After he has run tests on radar units and tuning forks, he issues certificates of accuracy on them. The radar

unit and [\*\*10] tuning forks used by Trooper Elliott were tested by Smith on November 29, 1978, and December 26, 1978, and were found to be accurate. His certificates of accuracy were received in evidence, and serial numbers thereon correspond to those testified to by Elliott.

The majority opinion rests upon a rigid application of *City of St. Louis v. Boecker*, 370 S.W.2d 731 (Mo. App. 1963) [in which this writer participated as special judge]. The real basis for that case is that the radar unit was not tested at the (stationary) site of the arrest, and there was no evidence of when or where a single prior tuning fork test was made, thus the conviction based upon a radar speed test on June 1, 1961 (almost 21 years ago) was properly reversed. The *Boecker* case had in it references to the conclusions and recommendations of a Doctor Kopper's 1955 law review article on "The Scientific Reliability of Radar Speedmeters", 33 N.C.L.R. 352, which may have been accurate at that time. That reference, however, was not necessary to the decision which rested upon the lack of proof that the radar unit was working properly at the scene of the arrest, and it is therefore dicta. It is not necessary to [\*\*11] "overrule" the *Boecker* case, nor to write in conflict with it, because it is distinguishable upon its facts from this case.

Here, there is evidence that the radar unit and tuning forks were tested in the Jefferson City laboratory on November 29, 1978, five days before appellant's arrest, and at the same laboratory on December 22, 1978, twenty-two days after the arrest. Both laboratory tests showed the unit and tuning forks were working properly. Elliott tested it some five hours prior to the arrest, and the unit properly registered 30 and 70 miles per hour by the use of the tuning forks, albeit that it was some five miles from the scene of the arrest. And, importantly, the radar unit was tested again by Elliott upon his leaving his tour of duty that day, with the same results of speed registry as of that morning. The existence of these same facts at different times and places, showing that at *all* times the radar unit and tuning forks were working properly, gives rise to a legitimate inference that they were working properly at the time of appellant's arrest. The rule is stated in 32 C.J.S. Evidence, § 585, p. 714, "Since there is a presumption, as discussed supra §§ 124(1)-124(5), [\*\*12] of the continued existence of a fact or condition of a continuous nature, it follows that such a fact may, within the limits of relevancy, be shown to have existed at a particular time by proof of its existence at a prior time; and its existence at a subsequent time may be shown where the interval is short as compared with the natural permanent nature of the fact or condition in question." See also the extensive discussion in II Wigmore on Evidence, § 436, p. 512, et seq.; and *City of Phoenix v. Boggs*, 1 Ariz. App. 370, 403 P.2d 305, 307[1-3] (1965), where evidence was received as to a condition of a roadway both immediately before and after an accident (to give the jury an inference as to its generally dangerous condition at the time of the accident and how it happened), the court saying, "The applicable general rule, in either setting, is well established that evidence of the existence of a particular fact before and after an act in question, \* \* \* may be shown to indicate the existence of [\*38] that same condition or happening at the time of the act or accident. (Citing Arizona cases.)" Note also the cases cited in the *Boggs* case, *Millman v. United States Mortgage* [\*\*13] & *Title Co. of New Jersey*, 121 N.J.L. 28, 1 A.2d 265, 267 (1938); and *Oklahoma Natural Gas Co. v. Ross*, 131 F.2d 238, 240 (10th Cir. 1942). See Anno. 7 A.L.R.3rd 1302, "Presumption -- Condition of Property", and particularly the cases in Missouri at § 4, p. 1311, noting the relaxation of the older rule that a presumption or inference does not run backward, for example, *Liebow v. Jones Store Co.*, 303 S.W.2d 660, 665 (Mo. 1957).

These following cases support the application of the rule of legitimate inference above set forth: *Thomas v. Norfolk*, 207 Va. 12, 147 S.E.2d 727 (1966), which held that proof that a radar set had been tested at 2:30 p.m. and at 9:30 p.m., showing accuracy both times, *in the absence of evidence to the contrary*, warranted the inference that the machine was operating accurately during the interim, or at 4:00 p.m., the time of defendant's arrest. *State v. Carta*, 2 Conn. Cir. 68, 194 A.2d 544, 546[1-5] (1963), cert. den. 150 Conn. 724, 197 A.2d 932, held "The speed recorded on a radar unit may be admissible in evidence provided the accuracy of the radar unit at the time in question is established by tests made within a reasonable time [\*\*14] before and after the speed was recorded and provided the speed recorded was for the defendant's automobile." In *People v. Maniscalco*, 94 Misc.2d 915, 405 N.Y.S.2d 888 (1978), the court affirmed a conviction based upon radar unit speed readout where the officer made calibration tests and tuning fork tests when he set up the unit and after his tour of duty. There was also evidence that the tuning forks had been tested by calibration both before and after defendant's infraction. [Contrast *People v. Cunha*, 93 Misc.2d 467, 402 N.Y.S.2d 925, 926 (1978), where it was held that the People had not met the standard of "reasonable proof of accuracy" where the officer had

tested the radar unit 3-1/2 hours prior to clocking defendant's speed, but there was no testimony of testing *subsequent* to the incident.] *State v. Trantolo*, 37 Conn. Supp. 601, 430 A.2d 465 (1981), held that the test of a radar device by the use of a tuning fork both a few days before and a few days after the arrest was strongly corroborative of the officer's testimony of his speedometer reading.

There is yet another facet to this case. Although appellant's speed at the time of his arrest was recorded from [\*\*15] the *stationary* position of the patrol car, there was testimony that the CMI Speedgun 8 radar unit was adaptable for use from a *moving* patrol car whereby the speed of an oncoming vehicle could be measured. Of what use then, in that circumstance, would an on-site, approximate-time test in accordance with the *Boecker* case be? How can radar equipment be tested "at the site" if the patrol car, and the target vehicle, are constantly moving over perhaps miles of highway? Could not a legitimate inference be drawn that the moving radar unit was working properly at any arrest scene by proof that it had been tested in a reasonable time prior to and after the arrest?

The state has made a *prima facie* case that the CMI Speedgun 8 radar unit was recording accurately at the time of appellant's arrest, as per the facts of prior and subsequent tests above set forth. That is all that it is required to do, and the burden of going forward with the evidence to show that some on-site condition, circumstance did interfere with its accuracy, was upon appellant, who produced no such evidence. Officer Smith's testimony that radar units *do* malfunction does not show that it was in fact malfunctioning [\*\*16] at the time in question -- the inference of fact is otherwise. Appellant's conviction should be affirmed, because the circle of proof of proper functioning of the radar unit is complete, and thus provides a proper foundation for the readout of his speed therefrom for it to be admitted into evidence.

For the foregoing reasons, I respectfully dissent.

**State of Missouri, Respondent, v. Ralph Weatherwax, Appellant**

**No. WD32358**

**Court of Appeals of Missouri, Western District**

*635 S.W.2d 34; 1982 Mo. App. LEXIS 3573*

**April 13, 1982**

**SUBSEQUENT HISTORY:** [\*\*1]

Motion for Rehearing Overruled, Transfer Denied June 1, 1982.

**PRIOR HISTORY:** From the Circuit Court of Platte County

Criminal Appeal

Judge Abe Shafer

**DISPOSITION:**

Reversed; Defendant Ordered Discharged.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant's appeal from a judgment of the Circuit Court of Platte County (Missouri), which convicted him of speeding and imposed a fine of \$ 35, was transferred from the Missouri Supreme Court because the constitutional issues attempted to be raised had not been presented at the first opportunity.

**OVERVIEW:** Defendant drove his vehicle past a parked trooper, who trained his radar unit on defendant's vehicle and got a reading of 69 miles per hour in a 55 mile per hour zone. The trooper testified that he tested the radar unit with tuning forks before going to work four hours before stopping defendant and again when he went off duty five hours later but did not test the unit at the location where he observed defendant. A highway patrol employee testified that such units can be affected by outside influences such as power lines and neon lights and inside influences such as the heater and radio. On appeal, the court reversed the conviction. The court noted that it had previously held that it was not unreasonable to require a test of a radar unit at the site reasonably close to the time of the arrest, based on the outside factors recited in the employee's testimony. Absent evidence of such a test, the radar result was inadmissible, and the State had not established a prima facie case.

**OUTCOME:** The court reversed the circuit court judgment and ordered defendant discharged.

**CORE TERMS:** radar, arrest, tested, speed, fork, tuning, site, accuracy, mile, trooper, highway, tuning fork, patrol car, stationary, recorded, patrol, legitimate inference, serial number, calibration, laboratory, speedgun, scene, patrolman, driver, mph, proper foundation, reasonable time, undue burden, found guilty, tour of duty

**LexisNexis(R) Headnotes**

Evidence > Scientific Evidence > General Overview*

[HN1] The prosecution has the burden in a speeding case to adduce proof that the radar unit was operating properly at the site of the arrest and reasonably close in time to it.

**COUNSEL:**

H. William McIntosh, Kansas City, Missouri, Attorney for Appellant.

James A. Broshot, Kingston, Missouri, Attorney for Respondent.

**JUDGES:**

Turnage, J. Clark, J. concurs. Pritchard, P.J., dissents in separate dissenting opinion.

**OPINION BY:**

TURNAGE

**OPINION:**

[\*34] Ralph Weatherwax was found guilty by the court of speeding and assessed a fine of \$35. He appealed to the Supreme Court, but that court transferred the appeal here on the grounds that the constitutional issues attempted to be raised had not been presented at the first opportunity. *State v. Weatherwax*, 607 S.W.2d 692 (Mo. 1980). n1

n1 Weatherwax has filed a motion to transfer this case prior to opinion to the Supreme Court because a constitutional issue is involved. That contention has already been decided adversely to Weatherwax. The motion to transfer prior to opinion is overruled.

[\*\*2]

On this appeal the decisive issue is the failure of the patrolman to test the radar set at the site of the arrest and reasonably close to the time of the arrest. Reversed.

On December 4, 1978, Trooper Elliott of the Highway Patrol left his home at 7:00 A.M. to go on duty. While parked in his driveway, he tested his radar unit with two [\*35] tuning forks and found it to be operating properly. Shortly before 11:00 A.M., the trooper was parked beside Highway 36 when he observed an automobile driven by Weatherwax and trained his radar unit on that automobile. His radar unit indicated a reading of 69 mph in a 55 mph zone. The trooper stated he had not tested the unit since 7:00 A.M. and did not test it at the site of the arrest. He did test the unit about 4:00 P.M. on that same day when he went off duty and found it to be operating properly.

James Smith, an employee of the Highway Patrol assigned to radar repair and certification, testified. Smith testified to the tests performed on radar units to insure their accuracy. Smith testified that outside influences such as power lines

and neon lights can affect the readings obtained on the radar set used in this case. Smith also testified [\*\*3] that the operation of a heater fan in the trooper's automobile or the operation of two-way radio equipment could also affect the operation of the radar unit.

In *City of St. Louis v. Boecker*, 370 S.W.2d 731, 736[4] (Mo. App. 1963) the court reversed a conviction because the city failed to show that the radar unit had been tested at the site and reasonably close to the time of the arrest. The court stated that there could not be the slightest doubt as to the requirement for the test at the site of the arrest and reasonably close in time to that event. The basis of the court's ruling was the fact that outside factors can affect the operation of the radar unit as well as the fact that the unit can be affected by movement from place to place. At page 737[5] the court stated:

"But the requirement that proof be adduced that a radar speedmeter was tested and found to be operating properly at the site of and reasonably close to the time of an arrest should not place an undue burden on the prosecution, and should at the same time protect the rights of motorists against the possibility of error in this device which makes 'delicate measurements.' *State v. Graham, supra.*"

[\*\*4]

The State, in its brief, concedes that *Boecker* requires testing of the radar unit at the site of the arrest and reasonably close to that time, but urges this court to overrule *Boecker*. This court has no inclination to announce a rule contrary to that in *Boecker*. This for the very simple reason that the scientific evidence presented in *Boecker*, and also in this case, shows that outside factors, such as power lines, can affect the operation of a radar unit. If the rule in *Boecker* were to be abrogated, then a radar unit could be set up in any location whether or not there were outside factors which would give an incorrect reading, and the prosecution would have no burden to show that the radar unit was operating properly at the site of the arrest. As stated in *Boecker, State v. Graham*, 322 S.W.2d 188 (Mo. App. 1959) held that a radar unit is an extremely sensitive machine. As shown by the testimony in *Boecker*, and in this case, these units are sensitive to outside forces and must, therefore, be checked for accuracy at the site of the arrest. Further, as with any mechanical device, Smith testified in this case that radar units do malfunction. As stated in [\*\*5] *Boecker, supra*, [HN1] it is not an undue burden to place on the prosecution to adduce proof that the radar unit was operating properly at the site of the arrest and reasonably close in time to it.

Apparently, in an effort to overcome the failure to test the unit at the site of the arrest and reasonably close in time to that event, the State asked the trooper: "Based on your experience as a patrolman, as a driver, and your use of the radar device, did you also form an opinion as to the speed of this vehicle?" The trooper replied that by use of a combination of all three of those factors, he determined that the vehicle was traveling 69 mph. Because the radar evidence was inadmissible for failure to show that the unit was tested at the site of and reasonably close in time to the arrest, this opinion would likewise be inadmissible because the radar evidence was inextricably mingled with the other factors used by the trooper to determine speed.

It follows that the State failed to make a prima facie case when it failed to prove [\*\*36] that the radar unit was tested at the site of and reasonably close in time to the arrest.

The judgment is reversed and the defendant Weatherwax is ordered [\*\*6] discharged.

Clark, J. concurs

Pritchard, P.J., dissents in separate dissenting opinion

**DISSENT BY:**

PRITCHARD

**DISSENT:**

PRITCHARD, P.J.

Appellant was convicted of driving 69 miles per hour on U.S. Highway 36, a 55 mile per hour speed limit area. He was fined \$35.00 and costs.

The appeal was first lodged in the Supreme Court. That court held in *State v. Weatherwax*, 607 S.W.2d 692, 693 (Mo. 1980), that there was no proper raising of a constitutional question for the first time on a de novo appeal from a first trial wherein appellant was found guilty and fined \$25.00. Appellant has filed a motion in this court to retransfer his case to the Supreme Court, but that motion must be, and is, overruled because that court has already held that no timely presentation of any constitutional questions was made. The remaining issues, which are decided, relate to the admission of evidence of the result of the use of a speedgun light radar device for the contended reason that no proper foundation therefor had been laid. It is said that without that evidence, there would have been insufficient evidence for a conviction.

After this case was submitted in May, 1981, because certain findings of the trial [\*\*7] court referenced testimony of witnesses as to a foundation for the admission of the radar test results, and because that testimony was omitted from the abbreviated transcript of tape recordings, a further transcript was requested. Delay was occasioned in the further transcription of the trial tape, but it has now been received.

According to Trooper John W. Elliott, the device which he used to measure appellant's speed on December 4, 1978, at about 11:00 a.m., was a C M I Speedgun 8, with serial number 3200 30 34. He tested that device [at his residence in Hamilton, Missouri, which this court may judicially know is about 5 miles east of the intersections of U. S. Highway 36, and Highways D and J, where appellant's arrest was made. *Walsh v. Table Rock Asphalt Const. Co.*, 522 S.W.2d 116, 118, footnote 1 (Mo. App. 1975)] for accuracy when he went on duty that day a few minutes after 7:00 a.m., using two tuning forks, one for 30 miles per hour, and one for 70 miles per hour, on the moving mode (holding the tuning forks in front of the radar unit), the stationary mode, and on the patrol display. He also made a calibration check. These procedures were approved by the Patrol. The tests [\*\*8] Elliott made showed that the unit was accurate for both speeds. He had been familiarized with the unit by a field officer, had practiced with it, and it was also his responsibility to read the operations manual for each radar unit used. He had been using the Speedgun 8 for about 18 months, and other radar units for about four years. Elliott set up the radar unit with his patrol car in a stationary position, facing east, where there was a slope or uphill grade going west. The unit was placed on the driver's door, window rolled down, and its antenna was held outside the vehicle. There were no power lines in the exact location. He made the same tests on the unit when he went off duty (the place where these tests were made does not appear in the record), the results being the same as that morning. The 30 mile per hour tuning fork had a serial number C 14581, and the 70 mile per hour fork had a serial number C 14553. Appellant's speed was measured by the unit at 69 miles per hour in a 55 mile an hour speed limit zone on the highway. Elliott also gave an opinion, based upon his experience as a patrolman, a driver, and his use of the radar device, that the appellant's speed was 69 miles per [\*\*9] hour.

James W. Smith had been employed 9-1/2 years by the communications division of the Missouri Highway Patrol, assigned exclusively to radar repair and certification. He tested and certified the accuracy of radar units used by the Patrol. His extensive [\*37] qualifications and experience in electronics and the radar field were unquestioned.

Smith testified in detail as to the procedures used by him to test radar units and tuning forks in the repair shop in Jefferson City. Radar units are by Patrol policy checked annually, but on the average, they will come in on a quarterly basis. Test equipment includes a microphone, audio amplifier, frequency counting device for vibrations or pitch of the tone, and a short wave receiver for radio station WWV, run by the U. S. Bureau of Standards, located at Fort Collins, Colorado, which insures the accuracy, by cancelling out pitch or tone, of the frequency counter, which, in turn, will test the accuracy of tuning forks. Radar units are tested by master tuning forks, which are calibrated the same as (field) tuning forks. After he has run tests on radar units and tuning forks, he issues certificates of accuracy on them. The radar

unit and [\*\*10] tuning forks used by Trooper Elliott were tested by Smith on November 29, 1978, and December 26, 1978, and were found to be accurate. His certificates of accuracy were received in evidence, and serial numbers thereon correspond to those testified to by Elliott.

The majority opinion rests upon a rigid application of *City of St. Louis v. Boecker*, 370 S.W.2d 731 (Mo. App. 1963) [in which this writer participated as special judge]. The real basis for that case is that the radar unit was not tested at the (stationary) site of the arrest, and there was no evidence of when or where a single prior tuning fork test was made, thus the conviction based upon a radar speed test on June 1, 1961 (almost 21 years ago) was properly reversed. The *Boecker* case had in it references to the conclusions and recommendations of a Doctor Kopper's 1955 law review article on "The Scientific Reliability of Radar Speedmeters", 33 N.C.L.R. 352, which may have been accurate at that time. That reference, however, was not necessary to the decision which rested upon the lack of proof that the radar unit was working properly at the scene of the arrest, and it is therefore dicta. It is not necessary to [\*\*11] "overrule" the *Boecker* case, nor to write in conflict with it, because it is distinguishable upon its facts from this case.

Here, there is evidence that the radar unit and tuning forks were tested in the Jefferson City laboratory on November 29, 1978, five days before appellant's arrest, and at the same laboratory on December 22, 1978, twenty-two days after the arrest. Both laboratory tests showed the unit and tuning forks were working properly. Elliott tested it some five hours prior to the arrest, and the unit properly registered 30 and 70 miles per hour by the use of the tuning forks, albeit that it was some five miles from the scene of the arrest. And, importantly, the radar unit was tested again by Elliott upon his leaving his tour of duty that day, with the same results of speed registry as of that morning. The existence of these same facts at different times and places, showing that at *all* times the radar unit and tuning forks were working properly, gives rise to a legitimate inference that they were working properly at the time of appellant's arrest. The rule is stated in 32 C.J.S. Evidence, § 585, p. 714, "Since there is a presumption, as discussed supra §§ 124(1)-124(5), [\*\*12] of the continued existence of a fact or condition of a continuous nature, it follows that such a fact may, within the limits of relevancy, be shown to have existed at a particular time by proof of its existence at a prior time; and its existence at a subsequent time may be shown where the interval is short as compared with the natural permanent nature of the fact or condition in question." See also the extensive discussion in II Wigmore on Evidence, § 436, p. 512, et seq.; and *City of Phoenix v. Boggs*, 1 Ariz. App. 370, 403 P.2d 305, 307[1-3] (1965), where evidence was received as to a condition of a roadway both immediately before and after an accident (to give the jury an inference as to its generally dangerous condition at the time of the accident and how it happened), the court saying, "The applicable general rule, in either setting, is well established that evidence of the existence of a particular fact before and after an act in question, \* \* \* may be shown to indicate the existence of [\*38] that same condition or happening at the time of the act or accident. (Citing Arizona cases.)" Note also the cases cited in the *Boggs* case, *Millman v. United States Mortgage* [\*\*13] & *Title Co. of New Jersey*, 121 N.J.L. 28, 1 A.2d 265, 267 (1938); and *Oklahoma Natural Gas Co. v. Ross*, 131 F.2d 238, 240 (10th Cir. 1942). See Anno. 7 A.L.R.3rd 1302, "Presumption -- Condition of Property", and particularly the cases in Missouri at § 4, p. 1311, noting the relaxation of the older rule that a presumption or inference does not run backward, for example, *Liebow v. Jones Store Co.*, 303 S.W.2d 660, 665 (Mo. 1957).

These following cases support the application of the rule of legitimate inference above set forth: *Thomas v. Norfolk*, 207 Va. 12, 147 S.E.2d 727 (1966), which held that proof that a radar set had been tested at 2:30 p.m. and at 9:30 p.m., showing accuracy both times, *in the absence of evidence to the contrary*, warranted the inference that the machine was operating accurately during the interim, or at 4:00 p.m., the time of defendant's arrest. *State v. Carta*, 2 Conn. Cir. 68, 194 A.2d 544, 546[1-5] (1963), cert. den. 150 Conn. 724, 197 A.2d 932, held "The speed recorded on a radar unit may be admissible in evidence provided the accuracy of the radar unit at the time in question is established by tests made within a reasonable time [\*\*14] before and after the speed was recorded and provided the speed recorded was for the defendant's automobile." In *People v. Maniscalco*, 94 Misc.2d 915, 405 N.Y.S.2d 888 (1978), the court affirmed a conviction based upon radar unit speed readout where the officer made calibration tests and tuning fork tests when he set up the unit and after his tour of duty. There was also evidence that the tuning forks had been tested by calibration both before and after defendant's infraction. [Contrast *People v. Cunha*, 93 Misc.2d 467, 402 N.Y.S.2d 925, 926 (1978), where it was held that the People had not met the standard of "reasonable proof of accuracy" where the officer had

tested the radar unit 3-1/2 hours prior to clocking defendant's speed, but there was no testimony of testing *subsequent* to the incident.] *State v. Trantolo*, 37 Conn. Supp. 601, 430 A.2d 465 (1981), held that the test of a radar device by the use of a tuning fork both a few days before and a few days after the arrest was strongly corroborative of the officer's testimony of his speedometer reading.

There is yet another facet to this case. Although appellant's speed at the time of his arrest was recorded from [\*\*15] the *stationary* position of the patrol car, there was testimony that the CMI Speedgun 8 radar unit was adaptable for use from a *moving* patrol car whereby the speed of an oncoming vehicle could be measured. Of what use then, in that circumstance, would an on-site, approximate-time test in accordance with the *Boecker* case be? How can radar equipment be tested "at the site" if the patrol car, and the target vehicle, are constantly moving over perhaps miles of highway? Could not a legitimate inference be drawn that the moving radar unit was working properly at any arrest scene by proof that it had been tested in a reasonable time prior to and after the arrest?

The state has made a *prima facie* case that the CMI Speedgun 8 radar unit was recording accurately at the time of appellant's arrest, as per the facts of prior and subsequent tests above set forth. That is all that it is required to do, and the burden of going forward with the evidence to show that some on-site condition, circumstance did interfere with its accuracy, was upon appellant, who produced no such evidence. Officer Smith's testimony that radar units *do* malfunction does not show that it was in fact malfunctioning [\*\*16] at the time in question -- the inference of fact is otherwise. Appellant's conviction should be affirmed, because the circle of proof of proper functioning of the radar unit is complete, and thus provides a proper foundation for the readout of his speed therefrom for it to be admitted into evidence.

For the foregoing reasons, I respectfully dissent.

**State of Nebraska, appellee, v. Jeffrey R. Lowrey, appellant****No. 90-959****SUPREME COURT OF NEBRASKA*****239 Neb. 343; 476 N.W.2d 540; 1991 Neb. LEXIS 349*****October 25, 1991, Filed****PRIOR HISTORY:** [\*\*\*1]

Appeal from the District Court for Lancaster County, Bernard J. McGinn, Judge, on appeal thereto from the County Court for Lancaster County, Richard H. Williams, Judge.

**DISPOSITION:**

Judgment of District Court affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged a judgment of the District Court for Lancaster County (Nebraska), which affirmed a county court's finding that he was guilty of operating a motor vehicle while under the influence of alcoholic liquor and of failure to yield the right-of-way.

**OVERVIEW:** Defendant caused an accident. The officer who arrived at the scene noticed that he had the odor of alcohol on his breath. A "testing officer" was dispatched to the scene to test the defendant. Defendant was arrested for drunk driving. The county court found him guilty, and the district court affirmed. The court held that Neb. Rev. Stat. § 39-669.08(3) (Reissue 1988) authorized an officer to require a driver to submit to a preliminary test of his or her breath if the officer had reasonable grounds to believe that such person had alcohol in his or her body, had committed a moving traffic violation, or had been involved in a traffic accident. There was insufficient evidence to support a finding that the officers had reasonable grounds to believe that defendant was under the influence of alcoholic liquor so as to justify them in requiring defendant to submit to a preliminary test of his breath. The evidence that defendant was under the influence of alcohol was overwhelming. The State met its burden in establishing the accuracy of the Intoxilyzer machine used to test defendant through independent sources and in showing reasonable proof that it was functioning accurately and properly.

**OUTCOME:** The court affirmed the judgment.

**CORE TERMS:** accuracy, machine, functioning, radar, breath, detoxification, testing, tested, attachment, reasonable grounds, attenuator, beam, personal knowledge, criminal case, certificate, calibration, calibrated, sufficient evidence to

support, influence of alcohol, alcoholic liquor, motor vehicle, right-of-way, administered, reliability, laboratories, pickup, driver, watery, scene, person responsible

### **LexisNexis(R) Headnotes**

#### ***Criminal Law & Procedure > Trials > Bench Trials***

#### ***Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > General Overview***

[HN1] Factual findings of a judge who serves as the trier of fact in a criminal case will not be disturbed on appeal unless clearly wrong.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

[HN2] Neb. Rev. Stat. § 39-669.08(3) (Reissue 1988) authorizes an officer to require a driver to submit to a preliminary test of his or her breath if the officer has reasonable grounds to believe that such person has alcohol in his or her body, has committed a moving traffic violation, or has been involved in a traffic accident.

#### ***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN3] In determining the sufficiency of the evidence to support a factual conclusion made by the trial court in a criminal case, the Supreme Court of Nebraska does not resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. That determination is for the finder of fact, whose finding must be sustained if, taking the view most favorable to the State, there is sufficient evidence to support it.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

[HN4] An appropriate method for testing the breath with an Intoxilyzer is found in attachment 3 to *177 Neb. Admin. Code, ch. 1, § 007.04A3* (1987). Attachment 3 is a checklist form which was used by the law enforcement officer and was introduced into evidence. *Neb. Admin. Code, ch. 1, § 007.05D* (1987) states that only simulator solutions can be used which have been prepared as shown by a certificate of chemical analysis, which certification shall be in the form of attachment 12.

#### ***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > General Overview***

[HN5] See *Neb. Admin. Code, ch. 1, § 007.06B* (1987).

#### ***Evidence > Demonstrative Evidence > Foundational Requirements***

#### ***Evidence > Scientific Evidence > Sobriety Tests***

[HN6] Reasonable proof that an Intoxilyzer machine was accurate and functioning properly is all that is required as foundation evidence.

#### ***Evidence > Demonstrative Evidence > Foundational Requirements***

[HN7] To present "reasonable proof" that a stopwatch was operating correctly as an accurate device to measure time, the watch must be tested against a device whose instrumental integrity or reliability has been established either through proof that the testing device's accuracy has been verified through an independent test for accuracy or through proof that the testing device is the type recognized and normally used to verify accuracy in stopwatches.

**HEADNOTES:** 1. **Criminal Law: Appeal and Error.** Factual findings of a judge who serves as the trier of fact in a criminal case will not be disturbed on appeal unless clearly wrong.

2. **Trial: Appeal and Error.** In determining the sufficiency of the evidence to support a factual conclusion made by the trial court in a criminal case, this court does not resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. That determination is for the finder of fact, whose finding must be sustained if, taking the view most favorable to the State, there is sufficient evidence to support it.

3. **Drunk Driving: Evidence: Proof.** Reasonable proof that an Intoxilyzer machine was accurate and functioning properly is all that is required as foundation evidence.

**COUNSEL:**

**OPINION BY:**

PER CURIAM

**OPINION:**

[\*344] [\*\*541] Defendant appeals from an order of the district court which affirmed a judgment of the county court finding defendant guilty of operating a motor vehicle while under the influence of alcoholic liquor and of failure to yield the right-of-way. We affirm.

Errors assigned by the defendant are that (1) the trial court erred in finding that there was sufficient evidence to support a finding of reasonable grounds to believe defendant was operating a motor vehicle while under the influence of alcoholic liquor, and (2) the trial court erred in determining that there was sufficient foundation to allow the introduction of the Intoxilyzer test results at trial.

[HN1] Factual findings of a judge who serves as the trier of fact in a criminal case will not be disturbed on appeal unless clearly wrong. *State v. Grantzinger*, 235 Neb. 974, 458 N.W.2d 461 (1990).

On May 27, 1989, Lowrey caused an accident which occurred in the intersection at 27th Street and Highway 2 in Lincoln. Lowrey was heading east and turned left to go north on 27th Street when he failed to yield the right-of-way to another motorist, who [\*\*\*3] was driving his car westward on Highway 2.

Lincoln police officer Patrick Knopick arrived at the scene of the accident and approached Lowrey, who was standing in the open doorway of his pickup, leaning against the seat. The officer asked the defendant to show his driver's license, registration, and proof of insurance. Lowrey produced a driver's license, but was unable to locate the registration and proof of insurance, which were later found in Lowrey's pickup by the officer.

Knopick noticed that Lowrey was unstable on his feet, had bloodshot, watery eyes, and had the odor of alcoholic beverage [\*345] about his person and breath. Officer Knopick then asked Lowrey to step over to his police cruiser. When defendant exited his vehicle, he fell against the pickup's box. Knopick testified that Lowrey told him he would not be able to make it and that Lowrey had to hold onto the officer.

Officer Jeffrey Howard, a "testing officer," was dispatched to the scene to test the defendant. Howard determined that the defendant was not capable of participating in any field sobriety tests. He noticed that Lowrey's speech was slurred, his eyes were watery, and his eyelids were droopy. Furthermore, [\*\*\*4] he observed that defendant had a very red, flushed face; dry, smacking lips; and a staggering walk. When asked to repeat the alphabet, defendant slurred from *a* to *t*, then stopped and became confused. The officer next asked defendant to count backward from 100. Although told by the officer to stop counting at 60, Lowrey continued. Defendant was then administered an Alco-Sensor pretest, which he failed.

Defendant was then arrested for drunk driving and taken to the detoxification center for an Intoxilyzer test. After Lowrey signed the implied consent form, Officer Howard checked the maintenance, repair, and calibration of the Intoxilyzer Model 4011 AS machine. Lowrey blew into the mouthpiece attached to the machine, and the Intoxilyzer registered .157 of a gram of alcohol per 210 liters of breath. The officer then advised the defendant of his *Miranda* rights, and Lowrey confessed that he drank three bourbon and water drinks that evening.

Apparently, defendant's first argument is that there was insufficient evidence to support a finding that the officer had reasonable grounds to believe that defendant was under the influence of alcoholic liquor so as to justify him [\*\*\*5] in requiring defendant to submit to a preliminary test of his breath. See Neb. Rev. Stat. § 39-669.08 (Reissue 1988).

In the first place, defendant overlooks the fact that [HN2] § 39-669.08(3) authorizes an officer to require a driver to submit to a preliminary test of his or her breath "if the [\*\*542] officer has reasonable grounds to believe that such person has alcohol in his or her body, has committed a moving traffic violation, or has been involved in a traffic accident." Defendant was guilty of failing to yield the right-of-way and, inasmuch as the [\*346] accident caused \$ 9,000 damage to his vehicle, he was certainly involved in a traffic accident.

Be that as it may, the evidence that defendant was under the influence of alcohol was overwhelming. It seems to be the defendant's position that the officer made up his mind immediately upon arriving at the scene that the defendant was intoxicated. This is not true. Officer Knopick was asked by defendant's counsel, "[S]o the two factors upon which you based your opinion that the defendant who had been involved in a serious automobile accident was under the influence of alcohol was [sic] the odor of alcohol and bloodshot, watery [\*\*\*6] eyes alone? Correct?" To this the officer answered, "Correct." However, the decision to run a preliminary breath test was not made until after the defendant's condition seemed to be so hopeless that field sobriety tests could not be administered.

The trial court heard the evidence and made the determination that the officer had reasonable grounds to believe the defendant was intoxicated. [HN3] In determining the sufficiency of the evidence to support a factual conclusion made by the trial court in a criminal case, this court does not resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. See *State v. Green*, 238 Neb. 328, 470 N.W.2d 736 (1991). That determination is for the finder of fact, whose finding must be sustained if, taking the view most favorable to the State, there is sufficient evidence to support it. *Id.* The testimony of the officers constitutes overwhelming evidence that they had reasonable grounds to believe that Lowrey was under the influence of alcohol before they administered the preliminary breath test and arrested him. There is no [\*\*\*7] merit to defendant's first assignment of error.

Defendant next attacks the accuracy of the Intoxilyzer machine used to test him.

Officer Howard testified that the machine was working properly. He also stated that the machine had been calibrated, noting that fact from the maintenance certificate that was right next to the cabinets and over the machine.

Rex Thompson, executive director of the detoxification center, is responsible for the maintenance and calibration of the [\*347] Intoxilyzer machine that was used to test the defendant. Thompson testified that he tests the Intoxilyzer regularly. He performed a "190 day check" before and after the machine was used to test the defendant, that is, 190-day checks on March 24 and August 10, 1989. The 190-day-check sample is used to show that the Intoxilyzer does not

239 Neb. 343, \*347; 476 N.W.2d 540, \*\*542;  
1991 Neb. LEXIS 349, \*\*\*7

deviate more than 10 percent, the maximum deviation allowed. According to Thompson, the Department of Health laboratories provide an unknown solution that the detoxification center runs through the Intoxilyzer. The detoxification center sends the results back to the Department of Health laboratories, which in turn inform the detoxification center whether the test met the [\*\*\*8] standards. Thompson agreed that he had no personal knowledge of whether the Department of Health performed its task accurately.

Thompson also performed a "40 day check," which is a maintenance check, before and after May 27, 1989, the day the machine was used to test Lowrey. The machine worked properly on both days.

Further, Thompson performed a beam attenuator test before and after May 27, 1989, that is, on December 14, 1988, and July 14, 1989. The tests met the required standards. Thompson testified that the beam attenuator uses a breath simulator solution and that the accuracy of the beam attenuator test relies on the accuracy of the solution that is used. Every solution is good for 1 year or 20 uses, whichever comes first. A solution No. 27 or a solution No. 14 was used around May 27, 1989. Those solutions were tested by Ted Koperski of the Department of Health on June 3, 1988, and on May 8, 1989. Thompson had [\*\*543] no personal knowledge of whether solutions Nos. 14 and 27 were accurate, and he had to rely on Koperski's tests for the accuracy of the certificates.

Defendant argues insufficient foundation for admission of the results of the Intoxilyzer test because Thompson [\*\*\*9] had no personal knowledge of the accuracy of the solutions used in the tests to check the reliability of the Intoxilyzer. It is defendant's position that without the testimony of Koperski, the State cannot prove that the Intoxilyzer was in operating order and complied with title 177 of the Nebraska Administrative Code, [\*348] which was received in evidence.

[HN4] An appropriate method for testing the breath with an Intoxilyzer is found in attachment 3 to *177 Neb. Admin. Code, ch. 1, § 007.04A3* (1987). Attachment 3 is a checklist form which was used by the law enforcement officer and was introduced into evidence. The officer completed all the steps set forth in that attachment.

Section 007.05D states that only simulator solutions can be used which have been prepared as shown by a certificate of chemical analysis, which certification shall be in the form of attachment 12. Two exhibits were introduced which conform with attachment 12: exhibits 14C and 14H, which are certified and sworn to by Koperski, certify the accuracy and integrity of solutions Nos. 27 and 14 respectively.

[HN5] It is provided by § 007.06B that "testing devices used for direct breath testing shall have been checked within [\*\*\*10] 190 days prior to an analysis by a person responsible for maintenance and calibration." Exhibits 14D and 14E are sworn certificates of "John Blosser, agency administrator of *177 NAC 1*," for the Department of Health laboratories, that the 190-day checks on the particular Intoxilyzer were performed.

In *State v. Kudlacek*, 229 Neb. 297, 426 N.W.2d 289 (1988), this court held that [HN6] reasonable proof that an Intoxilyzer machine was accurate and functioning properly is all that is required as foundation evidence. This holding was based on an earlier decision, *State v. Snyder*, 184 Neb. 465, 168 N.W.2d 530 (1969), regarding the test of radar equipment. The defendant's position in *Snyder* was that unless there is proof that the speedometers of the patrol cars and the calibrated tuning fork were accurate, there was insufficient proof that the radar equipment was accurate and functioning properly. In other words, the defendant argued that any comparative testing devices used to determine whether the particular radar equipment was accurate and functioning properly must themselves be proved to be accurate [\*\*\*11] and functioning properly. In *Snyder*, this court held that "such a chain of evidence might have to proceed ad infinitum." *Id. at 466, 168 N.W.2d at 531.*

Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and [\*349] functioning properly is all that is required. Evidence that radar equipment was tested within a few hours of its use, by means of a calibrated tuning fork, or by a comparison with the speedometer of a motor vehicle driven through the radar field, and was functioning properly, is sufficient evidence of the

239 Neb. 343, \*349; 476 N.W.2d 540, \*\*543;  
1991 Neb. LEXIS 349, \*\*\*11

accuracy of the radar equipment.

*Id.* at 467, 168 N.W.2d at 532. See, also, *State v. Kincaid*, 235 Neb. 89, 453 N.W.2d 738 (1990).

This court noted in *State v. Chambers*, 233 Neb. 235, 240, 444 N.W.2d 667, 670 (1989), "In *Snyder and Kudlacek*, we rejected the argument that for admissibility of information from a primary instrument, the accuracy of the primary instrument, such as a measuring device, must be established by an [\*\*\*12] appropriate testing device which itself has been tested for accuracy . . . ." However, this court added:

Without some proof of reliability in the device used to test for accuracy in a primary device, a test for accuracy of the primary device is a meaningless exercise. . . . In any event, we hold that [HN7] to present "reasonable proof" that a stopwatch was operating correctly as an accurate device to measure time, the watch must be tested against a device whose instrumental integrity or reliability has [\*\*544] been established either through proof that the testing device's accuracy has been verified through an independent test for accuracy or through proof that the testing device is the type recognized and normally used to verify accuracy in stopwatches.

*Chambers*, *supra* at 241, 444 N.W.2d at 671.

The evidence shows that the Intoxilyzer had been calibrated and that Thompson, the person responsible for its maintenance and calibration, tested the Intoxilyzer regularly. He performed the 190-day checks and the 40-day checks before and after the machine was used to test the defendant. The machine checked within the required standards every [\*\*\*13] time. Furthermore, Thompson performed a beam attenuator test on the Intoxilyzer before and after it was used on the defendant. Although the beam attenuator only needs to be checked once a year, the detoxification center performs the tests at a minimum of twice per year. Although Thompson had no personal knowledge of [\*350] whether the solutions Nos. 14 and 27 were accurate, there is evidence that the solutions were tested by Koperski of the Department of Health and were found to be within acceptable limits.

In accordance with *Snyder*, *Chambers*, *Kudlacek*, and *Kincaid*, the State met its burden in establishing the solutions' accuracy through independent sources and in showing reasonable proof that the Intoxilyzer was functioning accurately and properly. To require more would be to extend the chain of evidence requirement "ad infinitum."

The judgment is affirmed.

Affirmed.

**State of Nebraska, appellee, v. Jeffrey R. Lowrey, appellant****No. 90-959****SUPREME COURT OF NEBRASKA*****239 Neb. 343; 476 N.W.2d 540; 1991 Neb. LEXIS 349*****October 25, 1991, Filed****PRIOR HISTORY:** [\*\*\*1]

Appeal from the District Court for Lancaster County, Bernard J. McGinn, Judge, on appeal thereto from the County Court for Lancaster County, Richard H. Williams, Judge.

**DISPOSITION:**

Judgment of District Court affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged a judgment of the District Court for Lancaster County (Nebraska), which affirmed a county court's finding that he was guilty of operating a motor vehicle while under the influence of alcoholic liquor and of failure to yield the right-of-way.

**OVERVIEW:** Defendant caused an accident. The officer who arrived at the scene noticed that he had the odor of alcohol on his breath. A "testing officer" was dispatched to the scene to test the defendant. Defendant was arrested for drunk driving. The county court found him guilty, and the district court affirmed. The court held that Neb. Rev. Stat. § 39-669.08(3) (Reissue 1988) authorized an officer to require a driver to submit to a preliminary test of his or her breath if the officer had reasonable grounds to believe that such person had alcohol in his or her body, had committed a moving traffic violation, or had been involved in a traffic accident. There was insufficient evidence to support a finding that the officers had reasonable grounds to believe that defendant was under the influence of alcoholic liquor so as to justify them in requiring defendant to submit to a preliminary test of his breath. The evidence that defendant was under the influence of alcohol was overwhelming. The State met its burden in establishing the accuracy of the Intoxilyzer machine used to test defendant through independent sources and in showing reasonable proof that it was functioning accurately and properly.

**OUTCOME:** The court affirmed the judgment.

**CORE TERMS:** accuracy, machine, functioning, radar, breath, detoxification, testing, tested, attachment, reasonable grounds, attenuator, beam, personal knowledge, criminal case, certificate, calibration, calibrated, sufficient evidence to

support, influence of alcohol, alcoholic liquor, motor vehicle, right-of-way, administered, reliability, laboratories, pickup, driver, watery, scene, person responsible

**OPINION BY:**

PER CURIAM

**OPINION:**

[\*344] [\*\*541] Defendant appeals from an order of the district court which affirmed a judgment of the county court finding defendant guilty of operating a motor vehicle while under the influence of alcoholic liquor and of failure to yield the right-of-way. We affirm.

Errors assigned by the defendant are that (1) the trial court erred in finding that there was sufficient evidence to support a finding of reasonable grounds to believe defendant was operating a motor vehicle while under the influence of alcoholic liquor, and (2) the trial court erred in determining that there was sufficient foundation to allow the introduction of the Intoxilyzer test results at trial.

[HN1] Factual findings of a judge who serves as the trier of fact in a criminal case will not be disturbed on appeal unless clearly wrong. *State v. Grantzinger*, 235 Neb. 974, 458 N.W.2d 461 (1990).

On May 27, 1989, Lowrey caused an accident which occurred in the intersection at 27th Street and Highway 2 in Lincoln. Lowrey was heading east and turned left to go north on 27th Street when he failed to yield the right-of-way to another motorist, who [\*\*\*3] was driving his car westward on Highway 2.

Lincoln police officer Patrick Knopick arrived at the scene of the accident and approached Lowrey, who was standing in the open doorway of his pickup, leaning against the seat. The officer asked the defendant to show his driver's license, registration, and proof of insurance. Lowrey produced a driver's license, but was unable to locate the registration and proof of insurance, which were later found in Lowrey's pickup by the officer.

Knopick noticed that Lowrey was unstable on his feet, had bloodshot, watery eyes, and had the odor of alcoholic beverage [\*345] about his person and breath. Officer Knopick then asked Lowrey to step over to his police cruiser. When defendant exited his vehicle, he fell against the pickup's box. Knopick testified that Lowrey told him he would not be able to make it and that Lowrey had to hold onto the officer.

Officer Jeffrey Howard, a "testing officer," was dispatched to the scene to test the defendant. Howard determined that the defendant was not capable of participating in any field sobriety tests. He noticed that Lowrey's speech was slurred, his eyes were watery, and his eyelids were droopy. Furthermore, [\*\*\*4] he observed that defendant had a very red, flushed face; dry, smacking lips; and a staggering walk. When asked to repeat the alphabet, defendant slurred from *a* to *t*, then stopped and became confused. The officer next asked defendant to count backward from 100. Although told by the officer to stop counting at 60, Lowrey continued. Defendant was then administered an Alco-Sensor pretest, which he failed.

Defendant was then arrested for drunk driving and taken to the detoxification center for an Intoxilyzer test. After Lowrey signed the implied consent form, Officer Howard checked the maintenance, repair, and calibration of the Intoxilyzer Model 4011 AS machine. Lowrey blew into the mouthpiece attached to the machine, and the Intoxilyzer registered .157 of a gram of alcohol per 210 liters of breath. The officer then advised the defendant of his *Miranda* rights, and Lowrey confessed that he drank three bourbon and water drinks that evening.

Apparently, defendant's first argument is that there was insufficient evidence to support a finding that the officer had reasonable grounds to believe that defendant was under the influence of alcoholic liquor so as to justify him [\*\*\*5] in requiring defendant to submit to a preliminary test of his breath. See Neb. Rev. Stat. § 39-669.08 (Reissue 1988).

In the first place, defendant overlooks the fact that [HN2] § 39-669.08(3) authorizes an officer to require a driver to submit to a preliminary test of his or her breath "if the [\*\*542] officer has reasonable grounds to believe that such person has alcohol in his or her body, has committed a moving traffic violation, or has been involved in a traffic accident." Defendant was guilty of failing to yield the right-of-way and, inasmuch as the [\*346] accident caused \$ 9,000 damage to his vehicle, he was certainly involved in a traffic accident.

Be that as it may, the evidence that defendant was under the influence of alcohol was overwhelming. It seems to be the defendant's position that the officer made up his mind immediately upon arriving at the scene that the defendant was intoxicated. This is not true. Officer Knopick was asked by defendant's counsel, "[S]o the two factors upon which you based your opinion that the defendant who had been involved in a serious automobile accident was under the influence of alcohol was [sic] the odor of alcohol and bloodshot, watery [\*\*\*6] eyes alone? Correct?" To this the officer answered, "Correct." However, the decision to run a preliminary breath test was not made until after the defendant's condition seemed to be so hopeless that field sobriety tests could not be administered.

The trial court heard the evidence and made the determination that the officer had reasonable grounds to believe the defendant was intoxicated. [HN3] In determining the sufficiency of the evidence to support a factual conclusion made by the trial court in a criminal case, this court does not resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. See *State v. Green*, 238 Neb. 328, 470 N.W.2d 736 (1991). That determination is for the finder of fact, whose finding must be sustained if, taking the view most favorable to the State, there is sufficient evidence to support it. *Id.* The testimony of the officers constitutes overwhelming evidence that they had reasonable grounds to believe that Lowrey was under the influence of alcohol before they administered the preliminary breath test and arrested him. There is no [\*\*\*7] merit to defendant's first assignment of error.

Defendant next attacks the accuracy of the Intoxilyzer machine used to test him.

Officer Howard testified that the machine was working properly. He also stated that the machine had been calibrated, noting that fact from the maintenance certificate that was right next to the cabinets and over the machine.

Rex Thompson, executive director of the detoxification center, is responsible for the maintenance and calibration of the [\*347] Intoxilyzer machine that was used to test the defendant. Thompson testified that he tests the Intoxilyzer regularly. He performed a "190 day check" before and after the machine was used to test the defendant, that is, 190-day checks on March 24 and August 10, 1989. The 190-day-check sample is used to show that the Intoxilyzer does not

239 Neb. 343, \*347; 476 N.W.2d 540, \*\*542;  
1991 Neb. LEXIS 349, \*\*\*7

deviate more than 10 percent, the maximum deviation allowed. According to Thompson, the Department of Health laboratories provide an unknown solution that the detoxification center runs through the Intoxilyzer. The detoxification center sends the results back to the Department of Health laboratories, which in turn inform the detoxification center whether the test met the [\*\*\*8] standards. Thompson agreed that he had no personal knowledge of whether the Department of Health performed its task accurately.

Thompson also performed a "40 day check," which is a maintenance check, before and after May 27, 1989, the day the machine was used to test Lowrey. The machine worked properly on both days.

Further, Thompson performed a beam attenuator test before and after May 27, 1989, that is, on December 14, 1988, and July 14, 1989. The tests met the required standards. Thompson testified that the beam attenuator uses a breath simulator solution and that the accuracy of the beam attenuator test relies on the accuracy of the solution that is used. Every solution is good for 1 year or 20 uses, whichever comes first. A solution No. 27 or a solution No. 14 was used around May 27, 1989. Those solutions were tested by Ted Koperski of the Department of Health on June 3, 1988, and on May 8, 1989. Thompson had [\*\*543] no personal knowledge of whether solutions Nos. 14 and 27 were accurate, and he had to rely on Koperski's tests for the accuracy of the certificates.

Defendant argues insufficient foundation for admission of the results of the Intoxilyzer test because Thompson [\*\*\*9] had no personal knowledge of the accuracy of the solutions used in the tests to check the reliability of the Intoxilyzer. It is defendant's position that without the testimony of Koperski, the State cannot prove that the Intoxilyzer was in operating order and complied with title 177 of the Nebraska Administrative Code, [\*348] which was received in evidence.

[HN4] An appropriate method for testing the breath with an Intoxilyzer is found in attachment 3 to *177 Neb. Admin. Code, ch. 1, § 007.04A3* (1987). Attachment 3 is a checklist form which was used by the law enforcement officer and was introduced into evidence. The officer completed all the steps set forth in that attachment.

Section 007.05D states that only simulator solutions can be used which have been prepared as shown by a certificate of chemical analysis, which certification shall be in the form of attachment 12. Two exhibits were introduced which conform with attachment 12: exhibits 14C and 14H, which are certified and sworn to by Koperski, certify the accuracy and integrity of solutions Nos. 27 and 14 respectively.

[HN5] It is provided by § 007.06B that "testing devices used for direct breath testing shall have been checked within [\*\*\*10] 190 days prior to an analysis by a person responsible for maintenance and calibration." Exhibits 14D and 14E are sworn certificates of "John Blosser, agency administrator of *177 NAC 1*," for the Department of Health laboratories, that the 190-day checks on the particular Intoxilyzer were performed.

In *State v. Kudlacek*, 229 Neb. 297, 426 N.W.2d 289 (1988), this court held that [HN6] reasonable proof that an Intoxilyzer machine was accurate and functioning properly is all that is required as foundation evidence. This holding was based on an earlier decision, *State v. Snyder*, 184 Neb. 465, 168 N.W.2d 530 (1969), regarding the test of radar equipment. The defendant's position in *Snyder* was that unless there is proof that the speedometers of the patrol cars and the calibrated tuning fork were accurate, there was insufficient proof that the radar equipment was accurate and functioning properly. In other words, the defendant argued that any comparative testing devices used to determine whether the particular radar equipment was accurate and functioning properly must themselves be proved to be accurate [\*\*\*11] and functioning properly. In *Snyder*, this court held that "such a chain of evidence might have to proceed ad infinitum." *Id. at 466, 168 N.W.2d at 531.*

Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and [\*349] functioning properly is all that is required. Evidence that radar equipment was tested within a few hours of its use, by means of a calibrated tuning fork, or by a comparison with the speedometer of a motor vehicle driven through the radar field, and was functioning properly, is sufficient evidence of the

239 Neb. 343, \*349; 476 N.W.2d 540, \*\*543;  
1991 Neb. LEXIS 349, \*\*\*11

accuracy of the radar equipment.

*Id.* at 467, 168 N.W.2d at 532. See, also, *State v. Kincaid*, 235 Neb. 89, 453 N.W.2d 738 (1990).

This court noted in *State v. Chambers*, 233 Neb. 235, 240, 444 N.W.2d 667, 670 (1989), "In *Snyder and Kudlacek*, we rejected the argument that for admissibility of information from a primary instrument, the accuracy of the primary instrument, such as a measuring device, must be established by an [\*\*\*12] appropriate testing device which itself has been tested for accuracy . . . ." However, this court added:

Without some proof of reliability in the device used to test for accuracy in a primary device, a test for accuracy of the primary device is a meaningless exercise. . . . In any event, we hold that [HN7] to present "reasonable proof" that a stopwatch was operating correctly as an accurate device to measure time, the watch must be tested against a device whose instrumental integrity or reliability has [\*\*544] been established either through proof that the testing device's accuracy has been verified through an independent test for accuracy or through proof that the testing device is the type recognized and normally used to verify accuracy in stopwatches.

*Chambers*, *supra* at 241, 444 N.W.2d at 671.

The evidence shows that the Intoxilyzer had been calibrated and that Thompson, the person responsible for its maintenance and calibration, tested the Intoxilyzer regularly. He performed the 190-day checks and the 40-day checks before and after the machine was used to test the defendant. The machine checked within the required standards every [\*\*\*13] time. Furthermore, Thompson performed a beam attenuator test on the Intoxilyzer before and after it was used on the defendant. Although the beam attenuator only needs to be checked once a year, the detoxification center performs the tests at a minimum of twice per year. Although Thompson had no personal knowledge of [\*350] whether the solutions Nos. 14 and 27 were accurate, there is evidence that the solutions were tested by Koperski of the Department of Health and were found to be within acceptable limits.

In accordance with *Snyder*, *Chambers*, *Kudlacek*, and *Kincaid*, the State met its burden in establishing the solutions' accuracy through independent sources and in showing reasonable proof that the Intoxilyzer was functioning accurately and properly. To require more would be to extend the chain of evidence requirement "ad infinitum."

The judgment is affirmed.

Affirmed.

**State of Nebraska, appellee, v. Timothy J. Kincaid, appellant****No. 89-730****SUPREME COURT OF NEBRASKA***235 Neb. 89; 453 N.W.2d 738; 1990 Neb. LEXIS 110***April 13, 1990, Filed****SUBSEQUENT HISTORY:** [\*\*\*1]

As amended May 30, 1990

**PRIOR HISTORY:**

Appeal from the District Court for Douglas County, Stephen A. Davis, Judge, on appeal thereto from the County Court for Douglas County, Richard M. Jones, Judge.

**DISPOSITION:**

Judgment of District Court affirmed as modified.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged the decision of the District Court for Douglas County (Nebraska) affirming a county court's judgment convicting defendant of speeding and sentencing him to pay a fine.

**OVERVIEW:** A police officer used radar equipment to determine that defendant's rate of speed was 75 miles per hour (mph). The officer ticketed defendant for exceeding the speed limit by 30 mph. On appeal, the court held that the State's proof that the officer tested the radar unit before the arrest using three different tests and after the arrest using a tuning fork test, all of which showed the radar was functioning properly, was sufficient proof under *Neb. Rev. Stat. § 39-664(1)* (Reissue 1988) that the radar equipment was functioning properly. The court concluded that defendant's interpretation of § 39-664(2) as requiring two officers to be present to arrest an individual for speeding was an unreasonable interpretation and that a reasonable interpretation was that there was an implied "or" between § 39-664(2)(a) and (b). The court agreed with defendant that the State failed to prove that the speed limit on the road upon which defendant was travelling was 45 mph. The court held that, under *Neb. Rev. Stat. § 39-662(2)(d)*, the speed limit was 55 mph. The court reduced defendant's fine accordingly.

**OUTCOME:** The court affirmed defendant's conviction. The court modified defendant's sentence by lowering the fine he was required to pay and affirmed the sentence as modified.

**CORE TERMS:** radar, speed, motor vehicle, functioning, radio, tuning fork, speed limit, apprehending, accuracy, recorded, calibrated, microwave, electronic device, apprehended, speedometer, measured, validly, message, arrest, tested, sensible, modified, absurd, measuring device, traveling, speeding, driving, displays, marking, driver

**OPINION:**

[\*90] [\*\*739] This is an appeal from an order of the [\*\*\*2] Douglas County District Court affirming defendant's conviction and sentence for speeding. We affirm the conviction, but reduce the fine to \$ 50.

On October 2, 1988, at approximately 3:35 p.m., Omaha Police Division Officer Brian Haskell was positioned at 110th and West Dodge Road in Omaha, conducting stationary radar checks from his marked police cruiser. He was observing traffic eastbound on Dodge when his radar sounded. Haskell observed a red Mercedes-Benz traveling at high speed in the center lane of West Dodge Road, pursued the Mercedes, and stopped it at approximately 96th and West Dodge Road. Defendant was cited for traveling 75 m.p.h. in a 45-m.p.h. zone.

Defendant pled not guilty, and the case was tried to the court without a jury. Evidence of the car's speed, as measured by the radar unit, was admitted over defendant's objection. At the close of defendant's case, the trial court found defendant guilty, fined him \$ 100, and ordered him to pay costs. He has appealed to this court, assigning several errors.

Defendant first contends, in sum, that the trial court erred in admitting into evidence the radar readout, when the foundational evidence was inadequate to establish [\*\*\*3] that the radar unit was functioning properly and adequately, as required by *Neb. Rev. Stat. § 39-664(1)*(Reissue 1988).

Section 39-664(1) provides in pertinent part:

[HN1] Before the state may offer in evidence the results of such radio microwave or other electronic speed measurement for the purpose of establishing the speed of any motor vehicle, the state shall prove the following:

(a) The measuring device was in proper working order at the time of conducting the measurement;

....

(d) The operator conducted external tests of accuracy upon the measuring device, within a reasonable time both prior to and subsequent to an arrest being made, and the measuring device was found to be in proper working order.

In *State v. Kudlacek*, 229 Neb. 297, 298, 426 N.W.2d 289, [\*91] 291 (1988), we stated that

235 Neb. 89, \*91; 453 N.W.2d 738, \*\*739;  
1990 Neb. LEXIS 110, \*\*\*3

"[e]vidence of the readings of radar equipment designed to determine the speed of moving vehicles is admissible as evidence of speed if a sufficient foundation is laid as to the accuracy of the equipment in operation." . . . "Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that [\*\*\*4] is required."

In *Kudlacek*, the State presented evidence showing that a light test, an internal calibration test, and a tuning fork test were used to test the accuracy of the radar unit. We held this evidence was sufficient for the trial judge to conclude the radar unit was functioning properly.

[\*\*740] In *State v. Snyder*, 184 Neb. 465, 168 N.W.2d 530 (1969), the defendant's speed was measured by a radar unit which was tested several hours earlier using a calibrated tuning fork and a speedometer check with another patrol car. The defendant argued on appeal to this court that in the absence of proof that the patrol car's speedometer was accurate and proof that the calibrated tuning fork was also accurate, there was insufficient proof that the radar equipment was accurate and working properly. We stated that "[i]n effect, the defendant's argument is that any comparative testing devices used to determine whether the particular radar equipment was accurate and functioning properly must themselves be proved accurate and functioning properly. We cannot agree. Such a chain of evidence might have to proceed ad infinitum." *Id. at 466, 168 N.W.2d at 531.* [\*\*\*5] We held that evidence of either test was sufficient to constitute adequate proof that the radar equipment was working properly.

[HN2] Evidence that radar equipment was tested within a few hours of its use, by means of a calibrated tuning fork, or by a comparison with the speedometer of a motor vehicle driven through the radar field, and was functioning properly, is sufficient evidence of the accuracy of the radar equipment.

*Id. at 467, 168 N.W.2d at 532.*

In the present case, Officer Haskell testified that prior to using the radar unit he performed an LED light segment test, an [\*92] internal circuitry test, and a tuning fork test, and concluded the radar was operating properly. He further testified that after issuing the citation, but prior to leaving the location, he performed the same tests and again concluded the radar unit was functioning properly. With regard to the tuning fork test, Haskell testified there were two forks, one stamped with a 35-m.p.h. marking and the other an 80-m.p.h. marking. The tuning forks were supplied by the manufacturer and were tested at the factory. He testified he struck each tuning fork, held it approximately [\*\*\*6] 1 inch in front of the radar antenna, and received a digital readout which correlated to the marking stamped on the fork. The radar unit was not calibrated using a test car. We conclude that this evidence, in light of *Kudlacek* and *Snyder*, was sufficient foundation to establish that the radar unit was operating properly.

Defendant next assigns as error the trial court's failure to dismiss the case when the State failed to prove that the arresting officer met the requirements of § 39-664(2) in apprehending him. This section provides:

[HN3] The driver of any motor vehicle measured by use of radio microwaves or other electronic device to be driving in excess of the applicable speed limit may be apprehended:

(a) If the apprehending officer has observed the recording of the speed of the motor vehicle by the radio microwaves or other electronic device;

(b) If such apprehending officer has received a radio message from an officer who observed the speed recorded and the radio message (i) has been dispatched immediately after the speed of the motor vehicle was recorded, and (ii) gives a description of the vehicle and its recorded speed; and

(c) If the apprehending officer is in uniform [\*\*\*7] or displays his or her badge of authority.

Defendant contends that because the conjunctive word "and" separates subparts (b) and (c), all three subparts are required before a speeder can be validly apprehended. In the present case, then, he could not have been validly apprehended because the arrest was effectuated by only one officer, where the statute requires at least two officers

acting in accordance [\*93] with the statute for a valid arrest.

We reject appellant's contention. [HN4] This court has often stated that while a penal statute is to be construed strictly, it is to be given a sensible construction in the context of the object sought to be accomplished, the evils and mischiefs sought to be remedied, and the purpose sought to be served. See, *In re Interest of Richter*, 226 Neb. 874, 415 N.W.2d 476 (1987); *State v. [\*\*741] Burke*, 225 Neb. 625, 408 N.W.2d 239 (1987); *State v. Hicks*, 225 Neb. 322, 404 N.W.2d 923 (1987); *State v. Lynch*, 223 Neb. 849, 394 N.W.2d 651 (1986); *State v. Ewing*, 221 Neb. 462, 378 N.W.2d 158 (1985); [\*\*\*8] *State v. Farr*, 209 Neb. 163, 306 N.W.2d 854 (1981). Although a penal statute is required to be strictly construed, such statute should be given a sensible construction with its general terms limited in construction and application to prevent injustice, oppression, or an absurd consequence. *Wounded Shield v. Gunter*, 225 Neb. 327, 405 N.W.2d 9 (1987); *State v. Valencia*, 205 Neb. 719, 290 N.W.2d 181 (1980); *State v. Robinson*, 202 Neb. 210, 274 N.W.2d 553 (1979). This court has also stated in numerous criminal cases that in construing a statute this court will, if possible, try to avoid a construction which leads to absurd, unjust, or unconscionable results, *State v. Beerbohm*, 229 Neb. 439, 427 N.W.2d 75 (1988); *State v. Bargaen*, 219 Neb. 416, 363 N.W.2d 393 (1985); *State v. Farr, supra*; and *State v. Maez*, 204 Neb. 129, 281 N.W.2d 531 (1979), and that a sensible construction will be placed upon a statute to effectuate the object of [\*\*\*9] the legislation rather than a literal meaning that would have the effect of defeating the legislative intent. *State v. Farr, supra*; *State v. Maez, supra*.

In the present case, interpreting § 39-664(2) to require two officers who are using radar to act jointly when issuing a citation for speeding is absurd. Under this interpretation of the statute, a single officer, who determined by speed radar that a vehicle was traveling in excess of the speed limit, could not validly issue a speeding citation to the driver of that vehicle, but that same officer, who had probable cause and who was acting alone, could validly arrest a suspect on the most serious felony offenses. This interpretation does not effectuate the object of the legislation, and the result of such an interpretation is absurd, especially since the scientific principles underlying [\*94] speed radar devices are widely recognized and accepted in the legal community.

We believe a more reasonable construction of § 39-664(2) would require showing subparts (a) and (c), or showing subparts (b) and (c). Therefore, the statute should be construed as reading:

The driver [\*\*\*10] of any motor vehicle measured by use of radio microwaves or other electronic device to be driving in excess of the applicable speed limit may be apprehended:

(a) If the apprehending officer, who is in uniform or displays his or her badge of authority, has observed the recording of the speed of the motor vehicle by the radio microwaves or other electronic device; *OR*

(b) If the apprehending officer, who is in uniform or displays his or her badge of authority, has received a radio message from an officer who observed the speed recorded and the radio message (i) has been dispatched immediately after the speed of the motor vehicle was recorded, and (ii) gives a description of the vehicle and its recorded speed.

We believe that this construction, allowing officers using speed radar to act alone or in groups of two or more, best achieves the purpose of the statute. Defendant's contention is without merit.

Defendant next argues that the State failed to establish that the speed limit on West Dodge Road was 45 m.p.h. We agree. The complaint filed against defendant in the county court alleged a violation of *Neb. Rev. Stat. § 39-662(2)* (Reissue 1988), in that defendant was driving 75 [\*\*\*11] m.p.h. in a 45-m.p.h. zone. That section delineates the maximum speeds for particular types of roads.

The prosecution implicitly assumes that since *Neb. Rev. Stat. § 39-663(4)* (Reissue 1988) authorizes a municipality to lower the maximum speed set forth in § 39-662(2), a violation of the lower maximum speed is also a violation of § 39-662(2), and thus an offense against the State of Nebraska. We neither reject nor accept this assumption. The

235 Neb. 89, \*94; 453 N.W.2d 738, \*\*741;  
1990 Neb. LEXIS 110, \*\*\*11

prosecution offered no evidence of a municipal ordinance reflecting that the speed limit on West Dodge Road was 45 m.p.h. The speed limit for the area in [\*\*742] question is 55 m.p.h. under § 39-662(2)(d). The speed of [\*95] defendant's car was established by competent evidence to be 75 m.p.h. Pursuant to the Waiver/Fine Schedule for Nebraska County Courts (Dec. 1, 1989), defendant's \$ 100 fine is therefore modified to \$ 50 to reflect a 20-m.p.h. speed difference.

We have examined defendant's remaining assignment of error, and it is wholly without merit. Accordingly, defendant's conviction and sentence are affirmed as modified.

Affirmed as modified.

As amended May 30, 1990

**PRIOR HISTORY:**

Appeal from the District Court for Douglas County, Stephen A. Davis, Judge, on appeal thereto from the County Court for Douglas County, Richard M. Jones, Judge.

**DISPOSITION:**

Judgment of District Court affirmed as modified.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant challenged the decision of the District Court for Douglas County (Nebraska) affirming a county court's judgment convicting defendant of speeding and sentencing him to pay a fine.

**OVERVIEW:** A police officer used radar equipment to determine that defendant's rate of speed was 75 miles per hour (mph). The officer ticketed defendant for exceeding the speed limit by 30 mph. On appeal, the court held that the State's proof that the officer tested the radar unit before the arrest using three different tests and after the arrest using a tuning fork test, all of which showed the radar was functioning properly, was sufficient proof under *Neb. Rev. Stat. § 39-664(1)* (Reissue 1988) that the radar equipment was functioning properly. The court concluded that defendant's interpretation of § 39-664(2) as requiring two officers to be present to arrest an individual for speeding was an unreasonable interpretation and that a reasonable interpretation was that there was an implied "or" between § 39-664(2)(a) and (b). The court agreed with defendant that the State failed to prove that the speed limit on the road upon which defendant was travelling was 45 mph. The court held that, under *Neb. Rev. Stat. § 39-662(2)(d)*, the speed limit was 55 mph. The court reduced defendant's fine accordingly.

**OUTCOME:** The court affirmed defendant's conviction. The court modified defendant's sentence by lowering the fine he was required to pay and affirmed the sentence as modified.

**CORE TERMS:** radar, speed, motor vehicle, functioning, radio, tuning fork, speed limit, apprehending, accuracy, recorded, calibrated, microwave, electronic device, apprehended, speedometer, measured, validly, message, arrest, tested, sensible, modified, absurd, measuring device, traveling, speeding, driving, displays, marking, driver

**OPINION:**

[\*90] [\*\*739] This is an appeal from an order of the [\*\*\*2] Douglas County District Court affirming defendant's conviction and sentence for speeding. We affirm the conviction, but reduce the fine to \$ 50.

On October 2, 1988, at approximately 3:35 p.m., Omaha Police Division Officer Brian Haskell was positioned at 110th and West Dodge Road in Omaha, conducting stationary radar checks from his marked police cruiser. He was observing traffic eastbound on Dodge when his radar sounded. Haskell observed a red Mercedes-Benz traveling at high speed in the center lane of West Dodge Road, pursued the Mercedes, and stopped it at approximately 96th and West Dodge Road. Defendant was cited for traveling 75 m.p.h. in a 45-m.p.h. zone.

Defendant pled not guilty, and the case was tried to the court without a jury. Evidence of the car's speed, as measured by the radar unit, was admitted over defendant's objection. At the close of defendant's case, the trial court found defendant guilty, fined him \$ 100, and ordered him to pay costs. He has appealed to this court, assigning several errors.

Defendant first contends, in sum, that the trial court erred in admitting into evidence the radar readout, when the foundational evidence was inadequate to establish [\*\*\*3] that the radar unit was functioning properly and adequately, as required by *Neb. Rev. Stat. § 39-664(1)*(Reissue 1988).

Section 39-664(1) provides in pertinent part:

[HN1] Before the state may offer in evidence the results of such radio microwave or other electronic speed measurement for the purpose of establishing the speed of any motor vehicle, the state shall prove the following:

(a) The measuring device was in proper working order at the time of conducting the measurement;

....

(d) The operator conducted external tests of accuracy upon the measuring device, within a reasonable time both prior to and subsequent to an arrest being made, and the measuring device was found to be in proper working order.

In *State v. Kudlacek*, 229 Neb. 297, 298, 426 N.W.2d 289, [\*91] 291 (1988), we stated that

235 Neb. 89, \*91; 453 N.W.2d 738, \*\*739;  
1990 Neb. LEXIS 110, \*\*\*3

"[e]vidence of the readings of radar equipment designed to determine the speed of moving vehicles is admissible as evidence of speed if a sufficient foundation is laid as to the accuracy of the equipment in operation." . . . "Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that [\*\*\*4] is required."

In *Kudlacek*, the State presented evidence showing that a light test, an internal calibration test, and a tuning fork test were used to test the accuracy of the radar unit. We held this evidence was sufficient for the trial judge to conclude the radar unit was functioning properly.

[\*\*740] In *State v. Snyder*, 184 Neb. 465, 168 N.W.2d 530 (1969), the defendant's speed was measured by a radar unit which was tested several hours earlier using a calibrated tuning fork and a speedometer check with another patrol car. The defendant argued on appeal to this court that in the absence of proof that the patrol car's speedometer was accurate and proof that the calibrated tuning fork was also accurate, there was insufficient proof that the radar equipment was accurate and working properly. We stated that "[i]n effect, the defendant's argument is that any comparative testing devices used to determine whether the particular radar equipment was accurate and functioning properly must themselves be proved accurate and functioning properly. We cannot agree. Such a chain of evidence might have to proceed ad infinitum." *Id. at 466, 168 N.W.2d at 531.* [\*\*\*5] We held that evidence of either test was sufficient to constitute adequate proof that the radar equipment was working properly.

[HN2] Evidence that radar equipment was tested within a few hours of its use, by means of a calibrated tuning fork, or by a comparison with the speedometer of a motor vehicle driven through the radar field, and was functioning properly, is sufficient evidence of the accuracy of the radar equipment.

*Id. at 467, 168 N.W.2d at 532.*

In the present case, Officer Haskell testified that prior to using the radar unit he performed an LED light segment test, an [\*92] internal circuitry test, and a tuning fork test, and concluded the radar was operating properly. He further testified that after issuing the citation, but prior to leaving the location, he performed the same tests and again concluded the radar unit was functioning properly. With regard to the tuning fork test, Haskell testified there were two forks, one stamped with a 35-m.p.h. marking and the other an 80-m.p.h. marking. The tuning forks were supplied by the manufacturer and were tested at the factory. He testified he struck each tuning fork, held it approximately [\*\*\*6] 1 inch in front of the radar antenna, and received a digital readout which correlated to the marking stamped on the fork. The radar unit was not calibrated using a test car. We conclude that this evidence, in light of *Kudlacek* and *Snyder*, was sufficient foundation to establish that the radar unit was operating properly.

Defendant next assigns as error the trial court's failure to dismiss the case when the State failed to prove that the arresting officer met the requirements of § 39-664(2) in apprehending him. This section provides:

[HN3] The driver of any motor vehicle measured by use of radio microwaves or other electronic device to be driving in excess of the applicable speed limit may be apprehended:

(a) If the apprehending officer has observed the recording of the speed of the motor vehicle by the radio microwaves or other electronic device;

(b) If such apprehending officer has received a radio message from an officer who observed the speed recorded and the radio message (i) has been dispatched immediately after the speed of the motor vehicle was recorded, and (ii) gives a description of the vehicle and its recorded speed; and

(c) If the apprehending officer is in uniform [\*\*\*7] or displays his or her badge of authority.

Defendant contends that because the conjunctive word "and" separates subparts (b) and (c), all three subparts are required before a speeder can be validly apprehended. In the present case, then, he could not have been validly apprehended because the arrest was effectuated by only one officer, where the statute requires at least two officers

acting in accordance [\*93] with the statute for a valid arrest.

We reject appellant's contention. [HN4] This court has often stated that while a penal statute is to be construed strictly, it is to be given a sensible construction in the context of the object sought to be accomplished, the evils and mischiefs sought to be remedied, and the purpose sought to be served. See, *In re Interest of Richter*, 226 Neb. 874, 415 N.W.2d 476 (1987); *State v. [\*\*741] Burke*, 225 Neb. 625, 408 N.W.2d 239 (1987); *State v. Hicks*, 225 Neb. 322, 404 N.W.2d 923 (1987); *State v. Lynch*, 223 Neb. 849, 394 N.W.2d 651 (1986); *State v. Ewing*, 221 Neb. 462, 378 N.W.2d 158 (1985); [\*\*\*8] *State v. Farr*, 209 Neb. 163, 306 N.W.2d 854 (1981). Although a penal statute is required to be strictly construed, such statute should be given a sensible construction with its general terms limited in construction and application to prevent injustice, oppression, or an absurd consequence. *Wounded Shield v. Gunter*, 225 Neb. 327, 405 N.W.2d 9 (1987); *State v. Valencia*, 205 Neb. 719, 290 N.W.2d 181 (1980); *State v. Robinson*, 202 Neb. 210, 274 N.W.2d 553 (1979). This court has also stated in numerous criminal cases that in construing a statute this court will, if possible, try to avoid a construction which leads to absurd, unjust, or unconscionable results, *State v. Beerbohm*, 229 Neb. 439, 427 N.W.2d 75 (1988); *State v. Bargaen*, 219 Neb. 416, 363 N.W.2d 393 (1985); *State v. Farr, supra*; and *State v. Maez*, 204 Neb. 129, 281 N.W.2d 531 (1979), and that a sensible construction will be placed upon a statute to effectuate the object of [\*\*\*9] the legislation rather than a literal meaning that would have the effect of defeating the legislative intent. *State v. Farr, supra*; *State v. Maez, supra*.

In the present case, interpreting § 39-664(2) to require two officers who are using radar to act jointly when issuing a citation for speeding is absurd. Under this interpretation of the statute, a single officer, who determined by speed radar that a vehicle was traveling in excess of the speed limit, could not validly issue a speeding citation to the driver of that vehicle, but that same officer, who had probable cause and who was acting alone, could validly arrest a suspect on the most serious felony offenses. This interpretation does not effectuate the object of the legislation, and the result of such an interpretation is absurd, especially since the scientific principles underlying [\*94] speed radar devices are widely recognized and accepted in the legal community.

We believe a more reasonable construction of § 39-664(2) would require showing subparts (a) and (c), or showing subparts (b) and (c). Therefore, the statute should be construed as reading:

The driver [\*\*\*10] of any motor vehicle measured by use of radio microwaves or other electronic device to be driving in excess of the applicable speed limit may be apprehended:

(a) If the apprehending officer, who is in uniform or displays his or her badge of authority, has observed the recording of the speed of the motor vehicle by the radio microwaves or other electronic device; *OR*

(b) If the apprehending officer, who is in uniform or displays his or her badge of authority, has received a radio message from an officer who observed the speed recorded and the radio message (i) has been dispatched immediately after the speed of the motor vehicle was recorded, and (ii) gives a description of the vehicle and its recorded speed.

We believe that this construction, allowing officers using speed radar to act alone or in groups of two or more, best achieves the purpose of the statute. Defendant's contention is without merit.

Defendant next argues that the State failed to establish that the speed limit on West Dodge Road was 45 m.p.h. We agree. The complaint filed against defendant in the county court alleged a violation of *Neb. Rev. Stat. § 39-662(2)* (Reissue 1988), in that defendant was driving 75 [\*\*\*11] m.p.h. in a 45-m.p.h. zone. That section delineates the maximum speeds for particular types of roads.

The prosecution implicitly assumes that since *Neb. Rev. Stat. § 39-663(4)* (Reissue 1988) authorizes a municipality to lower the maximum speed set forth in § 39-662(2), a violation of the lower maximum speed is also a violation of § 39-662(2), and thus an offense against the State of Nebraska. We neither reject nor accept this assumption. The

235 Neb. 89, \*94; 453 N.W.2d 738, \*\*741;  
1990 Neb. LEXIS 110, \*\*\*11

prosecution offered no evidence of a municipal ordinance reflecting that the speed limit on West Dodge Road was 45 m.p.h. The speed limit for the area in [\*\*742] question is 55 m.p.h. under § 39-662(2)(d). The speed of [\*95] defendant's car was established by competent evidence to be 75 m.p.h. Pursuant to the Waiver/Fine Schedule for Nebraska County Courts (Dec. 1, 1989), defendant's \$ 100 fine is therefore modified to \$ 50 to reflect a 20-m.p.h. speed difference.

We have examined defendant's remaining assignment of error, and it is wholly without merit. Accordingly, defendant's conviction and sentence are affirmed as modified.

Affirmed as modified.

**OPINION BY:**

BOSLAUGH

**OPINION:**

[\*297] [\*\*290] The defendant, Rodney P. Kudlacek, was convicted of driving while intoxicated, first offense, and was placed on probation for 1 year and fined \$ 100, and his driver's license was suspended for 60 days. Upon appeal to the district court, the judgment was affirmed.

The defendant has appealed to this court and contends (1) that the trial court erred in overruling his motion to suppress and (2) that the trial court erred in receiving into evidence, without sufficient foundation, the results of the Alco-Sensor preliminary breath test and the Intoxilyzer test.

The record shows that on September 1, 1985, at approximately 11:30 p.m., the defendant was stopped by Nebraska State Patrol Officer Larry E. Williams at a location [\*298] approximately 3 miles east of Alma, Nebraska, on U.S. Highway 136. The defendant was stopped because the radar unit in Officer Williams' patrol car showed the defendant's vehicle traveling at 64 m.p.h. in a 55 m.p.h. zone. Officer Williams told the defendant of the reason for the stop and at that time noticed that the defendant had a light odor of alcohol on his breath, his eyes were bloodshot [\*\*\*3] and pupils contracted, and his face was flushed. Officer Williams placed the defendant in his patrol car and administered the horizontal gaze nystagmus test, which the defendant passed. The defendant was then required to perform the walk-and-turn test and the one-leg stand, both of which he failed. Officer Williams then administered the Alco-Sensor preliminary breath test, which the defendant failed. The defendant was placed under arrest and taken to the Harlan County sheriff's office in Alma, where a chemical [\*\*291] test of his breath indicated a blood alcohol level of .133 percent.

Prior to trial the defendant filed a motion to suppress the results of the Intoxilyzer Model 4011AS test and any equilibrium test because no probable cause had existed to stop the defendant's vehicle. The hearing on the motion to suppress was held simultaneously with the trial. The court denied the motion to suppress and found that there had been probable cause to stop. The defendant contends that there was insufficient foundation evidence to establish the accuracy of the radar unit, and, therefore, the radar reading was not admissible as evidence of probable cause to stop the defendant.

"Evidence of [\*\*\*4] the readings of radar equipment designed to determine the speed of moving vehicles is admissible as evidence of speed if a sufficient foundation is laid as to the accuracy of the equipment in operation." *State v. Green*, 217 Neb. 70, 76, 348 N.W.2d 429, 433 (1984); *Peterson v. State*, 163 Neb. 669, 80 N.W.2d 688 (1957). "Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required." *State v. Snyder*, 184 Neb. 465, 467, 168 N.W.2d 530, 532 (1969).

We think the evidence was sufficient to show that the radar unit operated by Officer Williams was accurate and functioning properly. At 1:30 a.m. on September 1, 1985, Officer Williams [\*299] performed three tests on the model S-80 radar unit that was in his patrol car. The first test was the light test to determine that all light bars within the radar unit were operating. The second test involved the use of tuning forks to check the machine's calibration. Officer Williams explained that the radar unit comes with two tuning forks, one fork certified at 80 [\*\*\*5] m.p.h. and the other at 35 m.p.h. The machine is tested by turning on the radar and placing the fork in front of each radar antenna. The machine should record a reading of 80 m.p.h. for the 80 m.p.h. fork and a reading of 35 m.p.h. for the 35 m.p.h. fork.

Finally, an internal calibration test was performed by comparing the patrol window on the radar with the

229 Neb. 297, \*299; 426 N.W.2d 289, \*\*291;  
1988 Neb. LEXIS 276, \*\*\*5

speedometer in the patrol car. All three tests demonstrated that the unit was functioning properly.

The tests were performed at the end of Officer Williams' shift. Between that time and the time the defendant's vehicle was stopped, approximately 22 hours later, the radar unit was not used.

The defendant argues that because the unit was not tested immediately prior to the time the defendant's vehicle was stopped, the foundation evidence required to show the unit's accuracy was lacking.

Officer Williams testified that the State Patrol would like to have the officers calibrate the radar units at the beginning and end of each shift and that he in fact did not calibrate the unit at the beginning of the shift during which the defendant was stopped. However, he also testified that there are no regulations or procedures concerning [\*\*\*6] the testing of radar units and that the tests he performed were conducted pursuant to the normal practice in his district station. Under the facts in this case, the fact that the unit was not tested immediately prior to the time the defendant's vehicle was stopped did not create an inference that the unit was not functioning properly.

In determining the correctness of a trial court's ruling on a motion to suppress, this court will uphold a trial court's findings of fact unless those findings are clearly wrong. *State v. Rowe*, 228 Neb. 663, 423 N.W.2d 782 (1988). The evidence was sufficient for the trial court to find that the radar unit was properly functioning.

[\*300] In his second assignment of error, the defendant contends the foundational evidence was not sufficient for the trial court to receive into evidence the results of the preliminary breath test and the Intoxilyzer breath test. He specifically contends that the results from both tests should not have been admitted because the State failed to prove that the tests were properly conducted in accordance with a method currently approved by the Nebraska Department of Health, as required by [\*\*\*7] *State v. Gerber*, 206 Neb. 75, 291 N.W.2d 403 (1980).

[\*\*292] The defendant's specific complaints go to the certificate attached to the copy of the rules and regulations of the Department of Health which was received in evidence and to the simulator solution used in the maintenance of the Intoxilyzer machine.

The certificate attached to the certified copy of Neb. Admin. Code tit. 77, ch. 1 (1985), which contains the rules and regulations relating to methods and techniques approved by the Department of Health, was dated January 28, 1985, and recited that the rules were in force "up to December 22, 1984." The defendant argues that the foundation evidence was deficient because there was no showing that the rules were in effect on September 2, 1985, the date on which the defendant's breath was tested. No contention is made and no evidence was offered to suggest that the rules or regulations had been amended during the intervening period.

At the time the exhibit was offered and received in evidence the defendant made no objection to the offer, and the exhibit was received in evidence without objection. Under these circumstances any objection to the exhibit was [\*\*\*8] waived. A defendant may not predicate error on the admission of evidence to which a timely objection was not made. *State v. Blair*, 227 Neb. 742, 419 N.W.2d 868 (1988).

The defendant's second complaint relates to the certification of the beam attenuator reference standard which was performed by Deputy Christopher Becker on December 26, 1984. In that procedure, a solution, No. 65, supplied by the Department of Health is used. The solution has a known alcohol content value of .10 percent weight per volume at 34 degrees C.

[\*301] The argument is similar to that which was made in *State v. Snyder*, 184 Neb. 465, 168 N.W.2d 530 (1969), regarding the test of radar equipment. In the *Snyder* case the defendant contended that it was not sufficient to test radar equipment with a calibrated tuning fork and by using a speedometer check with another patrol car unless there is additional evidence that the comparative testing devices were also proved to be accurate and functioning properly. In regard to that argument, we said, "We cannot agree. Such a chain of evidence might have to proceed ad infinitum." *Id.* at 466, 168 N.W.2d at 531. [\*\*\*9]

229 Neb. 297, \*301; 426 N.W.2d 289, \*\*292;  
1988 Neb. LEXIS 276, \*\*\*9

We then held that reasonable proof that the equipment was accurate and functioning properly was all that was required. See, also, *Peterson v. State*, 163 Neb. 669, 80 N.W.2d 688 (1957).

We believe a similar rule is applicable in this case. Reasonable proof that the Intoxilyzer machine was accurate and functioning properly is all that is required as foundation evidence. The record in this case shows that requirement was satisfied.

The judgment of the district court is affirmed.

**OPINION BY:**

BOSLAUGH

**OPINION:**

[\*297] [\*\*290] The defendant, Rodney P. Kudlacek, was convicted of driving while intoxicated, first offense, and was placed on probation for 1 year and fined \$ 100, and his driver's license was suspended for 60 days. Upon appeal to the district court, the judgment was affirmed.

The defendant has appealed to this court and contends (1) that the trial court erred in overruling his motion to suppress and (2) that the trial court erred in receiving into evidence, without sufficient foundation, the results of the Alco-Sensor preliminary breath test and the Intoxilyzer test.

The record shows that on September 1, 1985, at approximately 11:30 p.m., the defendant was stopped by Nebraska State Patrol Officer Larry E. Williams at a location [\*298] approximately 3 miles east of Alma, Nebraska, on U.S. Highway 136. The defendant was stopped because the radar unit in Officer Williams' patrol car showed the defendant's vehicle traveling at 64 m.p.h. in a 55 m.p.h. zone. Officer Williams told the defendant of the reason for the stop and at that time noticed that the defendant had a light odor of alcohol on his breath, his eyes were bloodshot [\*\*\*3] and pupils contracted, and his face was flushed. Officer Williams placed the defendant in his patrol car and administered the horizontal gaze nystagmus test, which the defendant passed. The defendant was then required to perform the walk-and-turn test and the one-leg stand, both of which he failed. Officer Williams then administered the Alco-Sensor preliminary breath test, which the defendant failed. The defendant was placed under arrest and taken to the Harlan County sheriff's office in Alma, where a chemical [\*\*291] test of his breath indicated a blood alcohol level of .133 percent.

Prior to trial the defendant filed a motion to suppress the results of the Intoxilyzer Model 4011AS test and any equilibrium test because no probable cause had existed to stop the defendant's vehicle. The hearing on the motion to suppress was held simultaneously with the trial. The court denied the motion to suppress and found that there had been probable cause to stop. The defendant contends that there was insufficient foundation evidence to establish the accuracy of the radar unit, and, therefore, the radar reading was not admissible as evidence of probable cause to stop the defendant.

"Evidence of [\*\*\*4] the readings of radar equipment designed to determine the speed of moving vehicles is admissible as evidence of speed if a sufficient foundation is laid as to the accuracy of the equipment in operation." *State v. Green*, 217 Neb. 70, 76, 348 N.W.2d 429, 433 (1984); *Peterson v. State*, 163 Neb. 669, 80 N.W.2d 688 (1957). "Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required." *State v. Snyder*, 184 Neb. 465, 467, 168 N.W.2d 530, 532 (1969).

We think the evidence was sufficient to show that the radar unit operated by Officer Williams was accurate and functioning properly. At 1:30 a.m. on September 1, 1985, Officer Williams [\*299] performed three tests on the model S-80 radar unit that was in his patrol car. The first test was the light test to determine that all light bars within the radar unit were operating. The second test involved the use of tuning forks to check the machine's calibration. Officer Williams explained that the radar unit comes with two tuning forks, one fork certified at 80 [\*\*\*5] m.p.h. and the other at 35 m.p.h. The machine is tested by turning on the radar and placing the fork in front of each radar antenna. The machine should record a reading of 80 m.p.h. for the 80 m.p.h. fork and a reading of 35 m.p.h. for the 35 m.p.h. fork.

Finally, an internal calibration test was performed by comparing the patrol window on the radar with the

229 Neb. 297, \*299; 426 N.W.2d 289, \*\*291;  
1988 Neb. LEXIS 276, \*\*\*5

speedometer in the patrol car. All three tests demonstrated that the unit was functioning properly.

The tests were performed at the end of Officer Williams' shift. Between that time and the time the defendant's vehicle was stopped, approximately 22 hours later, the radar unit was not used.

The defendant argues that because the unit was not tested immediately prior to the time the defendant's vehicle was stopped, the foundation evidence required to show the unit's accuracy was lacking.

Officer Williams testified that the State Patrol would like to have the officers calibrate the radar units at the beginning and end of each shift and that he in fact did not calibrate the unit at the beginning of the shift during which the defendant was stopped. However, he also testified that there are no regulations or procedures concerning [\*\*\*6] the testing of radar units and that the tests he performed were conducted pursuant to the normal practice in his district station. Under the facts in this case, the fact that the unit was not tested immediately prior to the time the defendant's vehicle was stopped did not create an inference that the unit was not functioning properly.

In determining the correctness of a trial court's ruling on a motion to suppress, this court will uphold a trial court's findings of fact unless those findings are clearly wrong. *State v. Rowe*, 228 Neb. 663, 423 N.W.2d 782 (1988). The evidence was sufficient for the trial court to find that the radar unit was properly functioning.

[\*300] In his second assignment of error, the defendant contends the foundational evidence was not sufficient for the trial court to receive into evidence the results of the preliminary breath test and the Intoxilyzer breath test. He specifically contends that the results from both tests should not have been admitted because the State failed to prove that the tests were properly conducted in accordance with a method currently approved by the Nebraska Department of Health, as required by [\*\*\*7] *State v. Gerber*, 206 Neb. 75, 291 N.W.2d 403 (1980).

[\*\*292] The defendant's specific complaints go to the certificate attached to the copy of the rules and regulations of the Department of Health which was received in evidence and to the simulator solution used in the maintenance of the Intoxilyzer machine.

The certificate attached to the certified copy of Neb. Admin. Code tit. 77, ch. 1 (1985), which contains the rules and regulations relating to methods and techniques approved by the Department of Health, was dated January 28, 1985, and recited that the rules were in force "up to December 22, 1984." The defendant argues that the foundation evidence was deficient because there was no showing that the rules were in effect on September 2, 1985, the date on which the defendant's breath was tested. No contention is made and no evidence was offered to suggest that the rules or regulations had been amended during the intervening period.

At the time the exhibit was offered and received in evidence the defendant made no objection to the offer, and the exhibit was received in evidence without objection. Under these circumstances any objection to the exhibit was [\*\*\*8] waived. A defendant may not predicate error on the admission of evidence to which a timely objection was not made. *State v. Blair*, 227 Neb. 742, 419 N.W.2d 868 (1988).

The defendant's second complaint relates to the certification of the beam attenuator reference standard which was performed by Deputy Christopher Becker on December 26, 1984. In that procedure, a solution, No. 65, supplied by the Department of Health is used. The solution has a known alcohol content value of .10 percent weight per volume at 34 degrees C.

[\*301] The argument is similar to that which was made in *State v. Snyder*, 184 Neb. 465, 168 N.W.2d 530 (1969), regarding the test of radar equipment. In the *Snyder* case the defendant contended that it was not sufficient to test radar equipment with a calibrated tuning fork and by using a speedometer check with another patrol car unless there is additional evidence that the comparative testing devices were also proved to be accurate and functioning properly. In regard to that argument, we said, "We cannot agree. Such a chain of evidence might have to proceed ad infinitum." *Id.* at 466, 168 N.W.2d at 531. [\*\*\*9]

229 Neb. 297, \*301; 426 N.W.2d 289, \*\*292;  
1988 Neb. LEXIS 276, \*\*\*9

We then held that reasonable proof that the equipment was accurate and functioning properly was all that was required. See, also, *Peterson v. State*, 163 Neb. 669, 80 N.W.2d 688 (1957).

We believe a similar rule is applicable in this case. Reasonable proof that the Intoxilyzer machine was accurate and functioning properly is all that is required as foundation evidence. The record in this case shows that requirement was satisfied.

The judgment of the district court is affirmed.

**PRIOR HISTORY:** [\*1] Appeal from the District Court for Custer County: Ronald D. Olberding, Judge.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant driver sought review of an order from the District Court for Custer County (Nebraska), which entered judgment in favor of appellee director of state motor vehicle department and upheld the director's revocation of the driver's motor vehicle operator's license for one year after the driver was stopped for speeding and arrested for operating a motor vehicle while intoxicated in violation of *Neb. Rev. Stat. § 60-6,196* (Supp. 2003).

**OVERVIEW:** After the driver was stopped for speeding, a blood test that confirmed that his blood alcohol level exceeded the legal limit. In affirming, the court first rejected the assertion that the director lacked jurisdiction to revoke the driver's privileges on the grounds that the officer had not forwarded his sworn report to the director as required by *Neb. Rev. Stat. § 60-498.01* (Supp. 2003). Instead, the court concluded that, whether it came from the officer or from the driver, the sworn report was sufficient to confer jurisdiction on the director. Next, the court found no abuse of discretion or due process implications in the failure to hold a hearing on a motion to compel a witness where the driver failed to request a hearing and failed to preserve the issue for review. Similarly, the court found that the denial of the motion to compel did not violate due process because the driver had ample opportunities to be heard. Finally, the court found that the driver failed to disprove the prima facie case for revocation by not offering evidence to rebut the testimony that the officer had probable cause to believe that the driver had operated his vehicle while impaired.

**OUTCOME:** The court affirmed the trial court's judgment upholding the revocation of the driver's operator's license.

**CORE TERMS:** sworn, subpoena, hearing officer, continuance, license, motion to compel, motor vehicle, alcohol, blood, arrest, blood test, message, regulation, revocation, driver, concentration, faxed, erroneous deprivation, probable cause, arresting, chemical test, peace officer, stamped, actual physical control, arresting officer, driving, administrative hearing, subpoena duces tecum, motion to dismiss, blood sample

*Administrative Law > Judicial Review > Standards of Review > Arbitrary & Capricious Review*

*Administrative Law > Judicial Review > Standards of Review > Clearly Erroneous Review*

*Administrative Law > Judicial Review > Standards of Review > Unlawful Procedures*

[HN1] A judgment or final order rendered by a district court in a judicial review pursuant to the Administrative Procedure Act may be reversed, vacated, or modified by an appellate court for errors appearing on the record. When reviewing an order of a district court under the Administrative Procedure Act for errors appearing on the record, the inquiry is whether the decision conforms to the law, is supported by competent evidence, and is not arbitrary, capricious, or unreasonable. Whether a decision conforms to law is by definition a question of law, in connection with which an appellate court reaches a conclusion independent of that reached by the lower court.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Procedures*

*Transportation Law > Private Motor Vehicles > Operator Licenses*

[HN2] See *Neb. Rev. Stat. § 60-498.01(3)* (Supp. 2003).

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Procedures*

*Transportation Law > Private Motor Vehicles > Operator Licenses*

[HN3] See *Neb. Rev. Stat. § 60-498.01(5)(a)* (Supp. 2003).

*Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue*

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Procedures*

[HN4] In an administrative license revocation proceeding, the sworn report of the arresting officer must, at a minimum, contain the information specified in the applicable statute, in order to confer jurisdiction.

*Administrative Law > Judicial Review > Standards of Review > General Overview*

[HN5] In reviewing final administrative orders under the Administrative Procedure Act, the district court functions not as a trial court but as an intermediate court of appeals.

*Civil Procedure > Appeals > Reviewability > Preservation for Review*

[HN6] An appellate court will not consider an issue on appeal that was not presented to or passed upon by the trial court.

*Civil Procedure > Appeals > Appellate Jurisdiction > State Court Review*

*Civil Procedure > Appeals > Reviewability > Preservation for Review*

[HN7] Where a cause has been appealed to a higher appellate court from a district court exercising appellate jurisdiction, only issues properly presented to and passed upon by the district court may be raised on appeal to the higher court.

*Civil Procedure > Appeals > Reviewability > Preservation for Review*

[HN8] In the absence of plain error, where an issue is raised for the first time in the higher appellate court, it will be disregarded inasmuch as the district court cannot commit error in resolving an issue never presented and submitted for disposition.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection***

[HN9] The due process requirements of Nebraska's Constitution are similar to those of the federal Constitution. Procedural due process limits the ability of the government to deprive people of interests which constitute "liberty" or "property" interests within the meaning of the Due Process Clause and requires that parties deprived of such interests be provided adequate notice and an opportunity to be heard. The first step in a due process analysis is to identify a property or liberty interest entitled to due process protections.

***Administrative Law > Agency Adjudication > Hearings > Right to Hearing > Due Process***

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection***

***Transportation Law > Private Motor Vehicles > Operator Licenses***

[HN10] Suspension of issued motor vehicle operators' licenses involves state action that adjudicates important property interests of the licensees. In such cases, the licenses are not to be taken away without that procedural due process required by the 14th Amendment. Though the required procedures may vary according to the interests at stake in a particular context, the fundamental requirement of due process is the opportunity to be heard at a meaningful time and in a meaningful manner. Before a state may deprive a motorist of his or her driver's license, that state must provide a forum for the determination of the question and a meaningful hearing appropriate to the nature of the case. In proceedings before an administrative agency or tribunal, procedural due process requires notice, identification of the accuser, factual basis for the accusation, reasonable time and opportunity to present evidence concerning the accusation, and a hearing before an impartial board.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection***

[HN11] A number of factors are to be considered in resolving an inquiry into the specific dictates of due process: First, the private interest that will be affected by the official action; second, the risk of an erroneous deprivation of such interest through the procedures used and the probable value, if any, of additional or substitute procedural safeguards; and finally, the government's interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail.

***Administrative Law > Agency Adjudication > Prehearing Activity***

[HN12] In order to secure the testimony of witnesses with relevant information to offer at an administrative license revocation hearing, a motorist must, within 10 days of the receipt of the notice of revocation and prior to the completion of discovery, (1) identify and locate all potential witnesses, (2) determine the facts that those witnesses are expected to establish, and (3) secure or be denied the voluntary appearances of those witnesses at a hearing the time and place of which are still unknown.

***Governments > Courts > Authority to Adjudicate***

[HN13] See *Neb. Rev. Stat. § 25-21,208* (Reissue 1995).

***Administrative Law > Agency Adjudication > Hearings > General Overview***

***Administrative Law > Agency Adjudication > Prehearing Activity***

[HN14] See *247 Neb. Admin. Code, ch. 1, § 010* (2001).

***Administrative Law > Agency Adjudication > Hearings > Right to Hearing > Due Process***

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection***

[HN15] Neither a court nor an administrative agency may subjugate a litigant's due process rights under the guise of judicial economy. The concept of due process embodies the notion of fundamental fairness and defies precise definition. Due process is a flexible notion that must be decided on the facts presented in a particular case and calls for such procedural protections as the particular situation demands.

***Administrative Law > Agency Adjudication > Hearings > Evidence > General Overview  
Evidence > Procedural Considerations > Burdens of Proof > Burden Shifting  
Transportation Law > Private Motor Vehicles > Operator Licenses***

[HN16] *Neb. Rev. Stat. § 60-498.01(7)* provides in part that, upon receipt of the arresting peace officer's sworn report, the director's order of revocation has prima facie validity, and it becomes the petitioner's burden to establish by a preponderance of the evidence grounds upon which the operator's license revocation should not take effect.

**COUNSEL:** David W. Jorgensen, of Nye, Hervert, Jorgensen & Watson, P.C., for appellant.

Jon Bruning, Attorney General, and Edward G. Vierk for appellee.

**JUDGES:** Sievers, Moore, and Cassel, Judges.

**OPINION BY:** Moore

**OPINION:**

Moore, Judge.

INTRODUCTION

Micheal L. Valasek, Jr.'s motor vehicle operator's license was revoked after the director of the Nebraska Department of Motor Vehicles (Department) found that the arresting officer had probable cause to believe Valasek was operating a motor vehicle in violation of *Neb. Rev. Stat. § 60-6,196* (Supp. 2003). Valasek appealed to the district court for Custer County. The district court affirmed, and Valasek appealed that decision. We conclude that Valasek's assignments of error are without merit, and we affirm.

BACKGROUND

This appeal arises out of Valasek's arrest following a traffic stop on July 10, 2004. On that date, Sgt. Kirk Hansel of the Nebraska State Patrol stopped a motor vehicle for speeding. Hansel had obtained a radar reading which indicated that the vehicle had been traveling at 95 miles per hour. Hansel contacted the driver, [\*2] whom he identified as Valasek. Hansel noticed that Valasek had an odor of alcohol about his person. Hansel also observed that Valasek's eyes were bloodshot, that Valasek's face was flushed, and that Valasek's speech and actions were deliberate. Valasek refused to submit to most of the field sobriety tests requested by Hansel and failed a preliminary breath test. Hansel then arrested Valasek and transported him to a hospital in Broken Bow, Nebraska, where Valasek submitted to a blood test. The results of the test indicated that Valasek had a blood alcohol content of .163 grams of alcohol per 100 milliliters of blood.

On July 28, 2004, the Department received the "Notice/Sworn Report/Temporary License" (sworn report) completed by Hansel. The Department mailed a "Notice of Administrative License Revocation [and] Temporary License," dated August 3, 2004, to Valasek via certified mail. On August 11, the Department received a petition for administrative hearing from Valasek.

Due to continuances, three administrative license revocation (ALR) hearings were held in this matter. The first

hearing, on August 31, 2004, was continued upon the motion of the hearing officer in order to comply [\*3] with Valasek's discovery requests for his blood sample and in order for Valasek to subpoena the person responsible for testing his blood. The Department subsequently issued a subpoena duces tecum to Susan Rutledge, instructing Rutledge to appear by telephone at the ALR hearing scheduled for October 1. Rutledge did appear at the October 1 telephonic hearing; however, the October 1 hearing was continued on the Department's motion in order to facilitate independent testing of Valasek's blood sample.

On October 14, 2004, the Department received a fax message from Rutledge, the person responsible for testing Valasek's blood sample, regarding her unavailability for the third ALR hearing, scheduled for November 2. Rutledge's handwritten message stated, "Sorry but I will not be available for telephone conference hearing on 11/2/04. I have already received a subpoena from Otoe Co. that day." The fax message was stamped "RECEIVED" by the Department on October 14, was addressed to both the Department and Valasek's counsel, and bears a handwritten telephone number next to the name of Valasek's counsel. Although it is not clear whether Rutledge also faxed a copy to Valasek's counsel on October [\*4] 14, the record does show that the Department faxed a copy of Rutledge's message to Valasek's counsel on October 22.

On October 21, 2004, the Department received a praecipe for subpoena duces tecum from Valasek, asking that the Department issue a subpoena requiring Rutledge to appear at the upcoming third ALR hearing. The Department received a motion to compel from Valasek on October 22, asking the Department to compel the attendance of Rutledge at the November 2 ALR hearing. Valasek also stated in his motion that "[a] subpoena has been served on said witness and that she has written a memo to the attorney for [Valasek] indicating that she will not be available." On October 25, the director of the Department denied Valasek's motion to compel and sent a copy of the denial to Valasek on that date via regular first-class U.S. mail. The denial noted that Rutledge had already been subpoenaed to appear in another court on the day in question.

The third and final ALR hearing in this matter was held on November 2, 2004. The hearing officer received exhibits into evidence, including a copy of Hansel's sworn report, received by the hearing officer as exhibit 1. The hearing officer also [\*5] heard testimony from Hansel concerning his traffic stop and subsequent arrest of Valasek. In addition to the evidence outlined above concerning Hansel's stop and arrest of Valasek, Hansel testified that as a result of the arrest, he completed a sworn report to file with the Department. Hansel recognized exhibit 1 as the sworn report he filled out for Valasek. Hansel testified that he signed his sworn report in the presence of a notary and that exhibit 1 appeared to be a true and accurate copy of the document he filed. Valasek's attorney objected to the receipt of exhibit 1, stating:

I'll object to it on the reasons previously given. Further, I object on foundation, hearsay, not best evidence, no showing of compliance with 60-6,201, 60-6,197, or Title 177. I also object on the grounds that the director has not provided all of the discovery as requested, which does not allow me to maintain my burden of proof.

Earlier during the November 2 hearing, Valasek's attorney stated that he had no objections to the hearing officer's receiving all of the exhibits, "except those that are the exhibits for the sworn report and the transcript." The hearing officer overruled Valasek's [\*6] objections and received exhibit 1 into evidence.

On November 9, 2004, the director of the Department found that Hansel, the arresting officer, had probable cause to believe Valasek was operating or was in actual physical control of a motor vehicle while intoxicated, in violation of § 60-6,196, and that Valasek was operating or in actual physical control of a motor vehicle while having a blood alcohol content of .163 grams of alcohol per 100 milliliters of blood. The director revoked Valasek's operator's license for 1 year.

Valasek appealed to the district court, assigning errors similar to those assigned in this court. The only significant difference, for purposes of the present appeal, between the errors assigned to the district court and those assigned to this

court are discussed in the analysis section below. Following a hearing, the district court entered an order on March 21, 2005, agreeing with the findings of fact and conclusions of law set forth in the director's November 9, 2004, order and affirming the director's order in all respects. Valasek subsequently perfected his appeal to this court.

#### ASSIGNMENTS OF ERROR

Valasek asserts that the district court erred in (1) determining [\*7] that the director did not abuse her discretion in failing to hold a hearing on Valasek's motion to compel and determining that Valasek was not denied procedural due process as a result of this failure, (2) determining that the director did not abuse her discretion in failing to enter an order compelling Rutledge to appear at the ALR hearing and determining that Valasek was not denied procedural due process as a result of this failure, (3) finding that Hansel had probable cause to believe that Valasek was operating or in actual physical control of a motor vehicle in violation of § 60-6,196, and (4) finding that the director had jurisdiction to administratively revoke Valasek's driving privileges.

#### STANDARD OF REVIEW

[HN1] A judgment or final order rendered by a district court in a judicial review pursuant to the Administrative Procedure Act may be reversed, vacated, or modified by an appellate court for errors appearing on the record. *Hahn v. Neth*, 270 Neb. 164, 699 N.W.2d 32 (2005). When reviewing an order of a district court under the Administrative Procedure Act for errors appearing on the record, the inquiry is whether the decision conforms to the law, is supported [\*8] by competent evidence, and is not arbitrary, capricious, or unreasonable. *Id.*

Whether a decision conforms to law is by definition a question of law, in connection with which an appellate court reaches a conclusion independent of that reached by the lower court. *McCray v. Nebraska State Patrol*, 271 Neb. 1, 710 N.W.2d 300 (2006).

#### ANALYSIS

##### *Jurisdiction.*

We first address Valasek's assertion that the district court erred in finding that the director had jurisdiction to administratively revoke Valasek's driving privileges. Valasek refers us to *Neb. Rev. Stat. § 60-498.01(3)* (Supp. 2003), which provides:

[HN2] If a person arrested pursuant to section 60-6,197 submits to the chemical test of blood or breath required by that section, the test discloses the presence of alcohol in any of the concentrations specified in section 60-6,196, and the test results are available to the arresting peace officer while the arrested person is still in custody, the arresting peace officer, as agent for the director, shall verbally serve notice to the arrested person of the intention to immediately confiscate and revoke the operator's license [\*9] of such person and that the revocation will be automatic thirty days after the date of arrest unless a petition for hearing is filed within ten days after the date of arrest as provided in subsection (6) of this section. The arresting peace officer shall within ten days forward to the director a sworn report stating (a) that the person was arrested pursuant to section 60-6,197 and the reasons for such arrest, (b) that the person was requested to submit to the required test, and (c) that the person submitted to a test, the type of test to which he or she submitted, and that such test revealed the presence of alcohol in a concentration specified in section 60-6,196.

Because the results of Valasek's blood test were not available to Hansel while Valasek was in custody, § 60-498.01(5)(a) is also applicable:

[HN3] If the results of a chemical test indicate the presence of alcohol in a concentration specified in

section 60-6,196, the results are not available to the arresting peace officer while the arrested person is in custody, and the notice of revocation has not been served as required by subsection (4) of this section, the peace officer shall forward to the director a sworn [\*10] report containing the information prescribed by subsection (3) of this section within ten days after receipt of the results of the chemical test. If the sworn report is not received within ten days, the revocation shall not take effect.

Valasek argues that there is nothing in the record to show that Hansel forwarded the sworn report to the director as required. Valasek does not question the contents of the sworn report, but he argues that the mere fact that the director may have a copy of the sworn report does not indicate that the arresting officer complied with statutory requirements. Valasek observes that the petition for administrative hearing requires the driver to send a copy of the sworn report to the director, and Valasek suggests that the copy of the sworn report in the record may have been a copy furnished by Valasek, rather than by Hansel.

The Nebraska Supreme Court has held that [HN4] in an ALR proceeding, the sworn report of the arresting officer must, at a minimum, contain the information specified in the applicable statute, in order to confer jurisdiction. *Hahn v. Neth*, 270 Neb. 164, 699 N.W.2d 32 (2005). Exhibit 1, the sworn report received at the November 2, 2004, hearing, [\*11] provides that Valasek was arrested pursuant to *Neb. Rev. Stat. § 60-6,197* (Supp. 2003) and the reasons for his arrest, that Valasek was requested to submit to a chemical test, that Valasek submitted to a blood test, and that the blood test revealed the presence of alcohol in a concentration of .163 grams of alcohol per 100 milliliters of blood. Exhibit 1 also shows that the blood test results were received on July 21, 2004. Exhibit 1 was signed by Hansel and notarized on July 26 and stamped "RECEIVED" by the Department on July 28. Although Hansel did not explicitly testify at the November 2 hearing that he forwarded exhibit 1 to the Department, Hansel did identify exhibit 1 as the sworn report he filled out concerning Valasek and testified that exhibit 1 appeared "to be a true and accurate copy of the document [he] filed."

Valasek's claim that exhibit 1 might have been Valasek's copy of the sworn report is clearly without merit. The record shows that Valasek's petition for administrative hearing was stamped "RECEIVED" by the Department on August 11, 2004. It seems logical that any copies of the sworn report received by the Department with Valasek's petition [\*12] for administrative hearing would also have been stamped "RECEIVED" on August 11. Instead, exhibit 1 was stamped "RECEIVED" on July 28. Exhibit 1 contains the information specified in the applicable statute and was received by the Department within the time period specified by statute. We conclude that exhibit 1 was sufficient to confer jurisdiction on the director and that Valasek's assertions to the contrary are without merit.

#### *Hearing on Motion to Compel.*

With regard to his motion to compel, Valasek first asserts that the district court erred in determining that the director did not abuse her discretion in failing to hold a hearing on Valasek's motion to compel. Valasek also asserts that he was denied procedural due process as a result of this alleged failure. The record shows that Valasek did not request a hearing in the body of the motion itself and did not argue the issue of a hearing on his motion to compel before the hearing officer at any of the ALR hearings. Valasek did not assign the lack of a hearing as an issue in his appeal to the district court.

[HN5] In reviewing final administrative orders under the Administrative Procedure Act, the district court functions not [\*13] as a trial court but as an intermediate court of appeals. *Wolgamott v. Abramson*, 253 Neb. 350, 570 N.W.2d 818 (1997). [HN6] An appellate court will not consider an issue on appeal that was not presented to or passed upon by the trial court. *Metro. Utils. Dist. v. Neb. PSC (In re Metro. Utils. Dist.)*, 270 Neb. 494, 704 N.W.2d 237 (2005). Without having requested or raised the issue of such a hearing, Valasek may not argue that the issue was properly before either the hearing officer or the district court on appeal.

Likewise, the issue of the lack of a hearing on Valasek's motion to compel is not properly before this court. [HN7] Where a cause has been appealed to a higher appellate court from a district court exercising appellate jurisdiction, only

issues properly presented to and passed upon by the district court may be raised on appeal to the higher court. *Navrkal v. State*, 270 Neb. 391, 703 N.W.2d 247 (2005). [HN8] In the absence of plain error, where an issue is raised for the first time in the higher appellate court, it will be disregarded inasmuch as the district court cannot commit error in resolving an issue never presented and submitted for disposition. [\*14] *Id.* Valasek's assignment of error is without merit.

*Denial of Motion to Compel.*

Valasek next asserts the district court erred in determining that the director did not abuse her discretion in failing to enter an order compelling Rutledge to appear at the ALR hearing and that Valasek was not denied procedural due process as a result of this failure.

[HN9] The due process requirements of Nebraska's Constitution are similar to those of the federal Constitution. *Marshall v. Wimes*, 261 Neb. 846, 626 N.W.2d 229 (2001). Procedural due process limits the ability of the government to deprive people of interests which constitute "liberty" or "property" interests within the meaning of the *Due Process Clause* and requires that parties deprived of such interests be provided adequate notice and an opportunity to be heard. *Id.* The first step in a due process analysis is to identify a property or liberty interest entitled to due process protections. *Id.* [HN10] Suspension of issued motor vehicle operators' licenses involves state action that adjudicates important property interests of the licensees. *Id.* In such cases, the licenses are not to be taken away without that procedural [\*15] due process required by the *14th Amendment*. *Id.*

Though the required procedures may vary according to the interests at stake in a particular context, the fundamental requirement of due process is the opportunity to be heard at a meaningful time and in a meaningful manner. *Marshall v. Wimes*, *supra*. Before a state may deprive a motorist of his or her driver's license, that state must provide a forum for the determination of the question and a meaningful hearing appropriate to the nature of the case. *Id.* In proceedings before an administrative agency or tribunal, procedural due process requires notice, identification of the accuser, factual basis for the accusation, reasonable time and opportunity to present evidence concerning the accusation, and a hearing before an impartial board. *Id.*

In *Mathews v. Eldridge*, 424 U.S. 319, 96 S. Ct. 893, 47 L. Ed. 2d 18 (1976), the U.S. Supreme Court determined that [HN11] a number of factors are to be considered in resolving an inquiry into the specific dictates of due process: first, the private interest that will be affected by the official action; second, the risk of an erroneous deprivation of such interest [\*16] through the procedures used and the probable value, if any, of additional or substitute procedural safeguards; and finally, the government's interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail. *Marshall v. Wimes*, *supra*.

As to the first factor to be considered in a *Mathews* analysis, the private interest at issue in this case is Valasek's interest in continued possession of a motor vehicle operator's license. A driver's interest in his or her driving privileges is significant in today's society, as the loss of a driver's license may entail economic hardship and personal inconvenience. *Chase v. Neth*, 269 Neb. 882, 697 N.W.2d 675 (2005); *Hass v. Neth*, 265 Neb. 321, 657 N.W.2d 11 (2003); *Marshall v. Wimes*, *supra*.

The second factor to be considered under a *Mathews* analysis is the risk of an erroneous determination and the value, if any, of alternative procedures. In *Marshall v. Wimes*, *supra*, the Department refused to issue a subpoena duces tecum directing the individual who tested Scott Marshall's [\*17] blood alcohol level to appear at the ALR hearing. After the Department filed its notice of hearing, Marshall immediately filed a praecipe for subpoena duces tecum, seeking a subpoena directing the individual who tested his blood to appear at the hearing and bring with her a sample of Marshall's blood in her possession, as well as records relating to the calibration of the testing equipment. Marshall also sought a subpoena to compel the witness to appear for a deposition prior to the hearing. The praecipe was denied by the Department because it did not comply with certain regulatory requirements. The deposition request was also denied on the basis that the applicable regulations did not provide for a subpoena to compel attendance at a deposition. Marshall argued before the hearing officer and the district court that the director's application of the regulatory requirements for

subpoenas violated his due process rights.

On appeal from the district court, the Nebraska Supreme Court determined that because Marshall had the burden of establishing that he did not have more than the allowable concentration of alcohol in his blood at the time he was operating a motor vehicle, it was clear [\*18] that limitations on Marshall's ability to present evidence relevant to that determination heightened the risk of an erroneous deprivation of Marshall's interest in his operator's license. See *Marshall v. Wimes*, 261 Neb. 846, 626 N.W.2d 229 (2001). The Supreme Court also found it clear that permitting the introduction of relevant evidence has value in reducing the risk of error. *Id.* The court found this particularly true where Marshall's license was revoked primarily in reliance on the written report of the blood test that was performed and Marshall was precluded from examining the witness who performed the test to determine the test's reliability. The court determined that Marshall was entitled to inquire regarding the chain of custody of his blood sample and whether the individual who tested his blood, an employee of a State agency, complied with the relevant regulations. The court observed that the director did not refuse to issue the subpoena requested by Marshall because the evidence and testimony were irrelevant, but, rather, because of the timeliness of the praecipe. The court determined that pursuant to the relevant statutory and regulatory requirement, [\*19] [HN12] in order to secure the testimony of witnesses with relevant information to offer, a motorist must,

within 10 days of the receipt of the notice of revocation and prior to the completion of discovery, (a) identify and locate all potential witnesses, (b) determine the facts that those witnesses are expected to establish, and (c) secure or be denied the voluntary appearances of those witnesses at a hearing the time and place of which are still unknown.

*Id.* at 854-55, 626 N.W.2d at 237. See, also, § 60-498.01(6)(a); 247 Neb. Admin. Code, ch. 1, §§ 009.01 and 009.03D (2001). The court was not persuaded by the State's argument that the procedures available to Marshall in the established regulatory scheme were adequate to protect Marshall against the erroneous deprivation of his property interest.

In the present case, of course, any limitations on Valasek's ability to present evidence relevant to the determination of his blood alcohol content heighten the risk of an erroneous deprivation of Valasek's interest in his operator's license, and permitting introduction of such relevant evidence would have value in reducing the risk of [\*20] error. The present case is distinguishable, however, from *Marshall v. Wimes*, *supra*. The director in this case issued a subpoena for Rutledge which resulted in the fax message from Rutledge indicating that she would not be available for the November 2, 2004, hearing due to having received a subpoena to appear in a different court on that date. Rutledge faxed her message to the Department on October 14. The record is not clear as to whether Rutledge also faxed a copy to Valasek's counsel on October 14, but the record does show that the Department faxed a copy of Rutledge's message to Valasek's counsel on October 22. On that same date, Valasek filed his motion to compel. The Department sent the director's denial of Valasek's motion to Valasek via regular first-class U.S. mail on October 25. The denial was based on Rutledge's unavailability for the November 2 hearing.

The record does not show that Valasek took any further action to obtain Valasek's presence prior to the November 2, 2004, hearing. At the November 2 hearing, Valasek made a motion to dismiss based on Rutledge's absence from the hearing. Valasek's counsel argued that despite the subpoena requiring Rutledge's [\*21] presence in another court on that date, Rutledge had not shown that she could not appear by telephone for the 10 a.m. ALR hearing. Valasek's counsel argued further that Valasek was denied due process because he could not cross-examine a vital witness and maintain his burden of proof. The hearing officer observed that under the Department's rules and regulations, Valasek was entitled to enforce his subpoena through the district court if he so desired. The hearing officer denied Valasek's motion to dismiss and directed him to "that rule and regulation." Valasek's counsel discussed further with the hearing officer the difficulty of getting a district court to enforce the subpoena compelling Rutledge's appearance at 10 a.m. for the hearing, when it was already 10:20 a.m. Valasek's counsel stated, "I'll make my motion continually to dismiss for the reason of the denial of due process and that our participation in this hearing is not a waiver of that objection." The hearing officer

acknowledged Valasek's objection and indicated that he would issue his order denying the motion to dismiss "unless you tell me that you're going to attempt to . . . get the district court to enforce your subpoena. [\*22] " Valasek's counsel then inquired, "The mechanics, [hearing officer], though, if it was issued, how do we back date it so she can appear at this hearing?" The hearing officer indicated that such backdating was not possible, again stating that the motion to dismiss was denied and directing Valasek to use the district court to enforce the subpoena if he so desired.

We observe that *247 Neb. Admin. Code, ch. 1, § 009.07* (2001), provides that "[s]ubpoenas and orders may be enforced by the applicable district court." *Neb. Rev. Stat. § 25-21,208* (Reissue 1995) provides:

[HN13] Civil actions to which the state is a party shall, on motion of counsel on behalf of the state, have priority of trial over other civil actions; and the several district courts having jurisdiction to try actions to which the state is a party shall have power to compel attendance of witnesses, as is now had by such courts in other civil actions, and on payment of fees and mileage at the rate provided in section 81-1176 for state employees by the party desiring their attendance, may compel the attendance of witnesses from any county within the state.

We [\*23] also note the following regulations regarding continuances:

#### **010 CONTINUANCES.**

**010.01 Motions.** [HN14] Any party desiring a continuance of the hearing shall request the same in writing, stating the reasons for such request and, if required by the Director, submit proof of facts in support of such request in the time and manner specified. If a continuance is granted to either party, all persons who were served Notice of Hearing shall be notified of such continuance.

**010.02 Time.** Motions for continuance will not ordinarily be considered unless filed and received by the Director at least five (5) days prior to the time fixed for hearing.

. . . .

**010.04 Good Cause.** Continuances shall be granted only upon good cause shown.

**010.05 Content of Motion to Continue.** A timely request to change the hearing date or time must state all of the following to be considered:

**010.05A** The reason for not being able to appear at the time or date scheduled; and

**010.05B** Why that reason is beyond the requesting party's control; and

**010.05C** Any fact which establishes that the need to reschedule arose after the scheduling of the [\*24] hearing; and

**010.05D** The resulting specific undue hardship which would result if the request were to be denied.

**010.06 Failure to File Timely Motion or to State Grounds.** Any motion for continuance which is untimely filed or which fails to state facts sufficient to make a reasoned decision shall be denied unless substantial injustice would result.

*247 Neb. Admin. Code, ch. 1, § 010* (2001). "Substantial injustice" is defined as "actual violation of the right or rights of a party." *247 Neb. Admin. Code, ch. 1, § 002.09* (2001).

In the present case, there were procedures available to Valasek, beyond the subpoena for the November 2, 2004, hearing and the motion to compel, by which he could have obtained Rutledge's presence, if not at the November 2

hearing, then at a later continued hearing. Valasek may or may not have received the denial of his motion to compel in time to file a timely motion for continuance, but the regulations clearly provide a means for the director to grant a continuance in situations such as that presented by the present case. A continuance would have given Valasek the opportunity [\*25] to either obtain another subpoena or turn to the district court for assistance. We cannot say that the procedures available to Valasek in this instance were inadequate to protect him against the erroneous deprivation of his property interest.

The third and final factor to be considered in a *Mathews* analysis is the government's interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail. See *Mathews v. Eldridge*, 424 U.S. 319, 96 S. Ct. 893, 47 L. Ed. 2d 18 (1976). There is no doubt of a substantial governmental interest in protecting public health and safety by removing drunken drivers from the highways. *Hass v. Neth*, 265 Neb. 321, 657 N.W.2d 11 (2003). Clearly, an administrative agency has the right to establish procedures for compelling testimony. *Bender v. Department of Motor Vehicles*, 8 Neb. App. 290, 593 N.W.2d 27 (1999). The issue here, of course, is not whether there is a government interest in strictly enforcing a particular regulation. Rather, the question is whether Valasek was denied due process when a witness with relevant [\*26] testimony, which testimony would reduce the risk of an erroneous determination, was unavailable at the ALR hearing and Valasek did not follow available alternative procedures. The government has an interest in ensuring that the hearing will proceed in an orderly manner. See § 60-498.01(7). Although there had been several continuances in this case prior to the November 2, 2004, hearing, under the circumstances presented, we can perceive no significant additional fiscal or administrative burden that would have been placed on the government by granting a further continuance to allow Valasek to obtain testimony from Rutledge. The difficulty is, of course, that Valasek filed no such motion. One cannot silently tolerate error, gamble on a favorable result, and then complain that one guessed wrong. *Hass v. Neth*, *supra*.

[HN15] Neither a court nor an administrative agency may subjugate a litigant's due process rights under the guise of judicial economy. *Marshall v. Wimes*, 261 Neb. 846, 626 N.W.2d 229 (2001). The concept of due process embodies the notion of fundamental fairness and defies precise definition. *Id.* Due process is a flexible notion that must be [\*27] decided on the facts presented in a particular case and calls for such procedural protections as the particular situation demands. *Id.* We determine, based on the facts presented in this particular case, that Valasek's procedural due process rights were not violated by the director's denial of Valasek's motion to compel.

Valasek argues that the district court erred in determining that the director did not abuse her discretion in failing to enter an order compelling Rutledge to appear at the ALR hearing. The record shows that the director denied Valasek's motion to compel because Rutledge was not available on the date in question. Valasek argued before the hearing officer that it might have been possible for Rutledge to appear via telephone at the telephonic hearing, yet there is nothing in Rutledge's faxed message to suggest that this is so and Valasek made no offer of proof regarding this assertion. Further, Valasek did not take advantage of certain other procedural tools that were available to him. The district court's decision conforms to the law, is supported by competent evidence, and is not arbitrary, capricious, or unreasonable. See *Hahn v. Neth*, 270 Neb. 164, 699 N.W.2d 32 (2005). [\*28] Valasek's assignments of error regarding the denial of his motion to compel are without merit.

#### *Probable Cause.*

Valasek asserts that the district court erred in finding that Hansel had probable cause to believe that Valasek was operating or in actual physical control of a motor vehicle in violation of § 60-6,196. Section 60-498.01(7) [HN16] provides in relevant part that "[u]pon receipt of the arresting peace officer's sworn report, the director's order of revocation has prima facie validity and it becomes the petitioner's burden to establish by a preponderance of the evidence grounds upon which the operator's license revocation should not take effect." As discussed above, Hansel's report contains the required recitations specified in § 60-498.01(3). Hansel's report shows that Valasek was arrested pursuant to § 60-6,197 after Valasek was stopped for speeding 95 miles per hour in a 60-mile-per-hour zone. The sworn report also shows that Hansel detected the odor of alcoholic beverage about Valasek's person and that Valasek refused to submit to a majority of field sobriety tests. The report shows that Valasek was requested to submit to a chemical test,

that Valasek submitted to [\*29] a blood test, and that the blood test revealed the presence of alcohol in a concentration of .163 grams of alcohol per 100 milliliters of blood. The sworn report was properly received in evidence by the hearing officer at the ALR hearing. Accordingly, the Department established a prima facie case for the revocation of Valasek's driver's license. Hansel testified at the November 2, 2004, ALR hearing, and Valasek's attorney took the opportunity to cross-examine Hansel regarding his traffic stop and arrest of Valasek. However, in the cross-examination of Hansel, Valasek did not adduce any evidence to show that he was not driving under the influence of alcohol, nor did Valasek otherwise meet his burden of disproving the Department's prima facie case. Valasek's assignment of error is without merit.

#### CONCLUSION

The district court did not err in affirming the revocation of Valasek's operator's license.

Affirmed.

**Micheal L. Valasek, Jr., appellant, v. Beverly Neth, director, State of Nebraska,  
Department of Motor Vehicles, appellee.**

**No. A-05-387.**

**NEBRASKA COURT OF APPEALS**

***2006 Neb. App. LEXIS 123***

**July 11, 2006, Filed**

**PRIOR HISTORY:** [\*1] Appeal from the District Court for Custer County: Ronald D. Olberding, Judge.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Appellant driver sought review of an order from the District Court for Custer County (Nebraska), which entered judgment in favor of appellee director of state motor vehicle department and upheld the director's revocation of the driver's motor vehicle operator's license for one year after the driver was stopped for speeding and arrested for operating a motor vehicle while intoxicated in violation of *Neb. Rev. Stat. § 60-6,196* (Supp. 2003).

**OVERVIEW:** After the driver was stopped for speeding, a blood test that confirmed that his blood alcohol level exceeded the legal limit. In affirming, the court first rejected the assertion that the director lacked jurisdiction to revoke the driver's privileges on the grounds that the officer had not forwarded his sworn report to the director as required by *Neb. Rev. Stat. § 60-498.01* (Supp. 2003). Instead, the court concluded that, whether it came from the officer or from the driver, the sworn report was sufficient to confer jurisdiction on the director. Next, the court found no abuse of discretion or due process implications in the failure to hold a hearing on a motion to compel a witness where the driver failed to request a hearing and failed to preserve the issue for review. Similarly, the court found that the denial of the motion to compel did not violate due process because the driver had ample opportunities to be heard. Finally, the court found that the driver failed to disprove the prima facie case for revocation by not offering evidence to rebut the testimony that the officer had probable cause to believe that the driver had operated his vehicle while impaired.

**OUTCOME:** The court affirmed the trial court's judgment upholding the revocation of the driver's operator's license.

**CORE TERMS:** sworn, subpoena, hearing officer, continuance, license, motion to compel, motor vehicle, alcohol, blood, arrest, blood test, message, regulation, revocation, driver, concentration, faxed, erroneous deprivation, probable cause, arresting, chemical test, peace officer, stamped, actual physical control, arresting officer, driving, administrative hearing, subpoena duces tecum, motion to dismiss, blood sample

*Administrative Law > Judicial Review > Standards of Review > Arbitrary & Capricious Review*

*Administrative Law > Judicial Review > Standards of Review > Clearly Erroneous Review*

*Administrative Law > Judicial Review > Standards of Review > Unlawful Procedures*

[HN1] A judgment or final order rendered by a district court in a judicial review pursuant to the Administrative Procedure Act may be reversed, vacated, or modified by an appellate court for errors appearing on the record. When reviewing an order of a district court under the Administrative Procedure Act for errors appearing on the record, the inquiry is whether the decision conforms to the law, is supported by competent evidence, and is not arbitrary, capricious, or unreasonable. Whether a decision conforms to law is by definition a question of law, in connection with which an appellate court reaches a conclusion independent of that reached by the lower court.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Procedures*

*Transportation Law > Private Motor Vehicles > Operator Licenses*

[HN2] See *Neb. Rev. Stat. § 60-498.01(3)* (Supp. 2003).

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Procedures*

*Transportation Law > Private Motor Vehicles > Operator Licenses*

[HN3] See *Neb. Rev. Stat. § 60-498.01(5)(a)* (Supp. 2003).

*Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue*

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Procedures*

[HN4] In an administrative license revocation proceeding, the sworn report of the arresting officer must, at a minimum, contain the information specified in the applicable statute, in order to confer jurisdiction.

*Administrative Law > Judicial Review > Standards of Review > General Overview*

[HN5] In reviewing final administrative orders under the Administrative Procedure Act, the district court functions not as a trial court but as an intermediate court of appeals.

*Civil Procedure > Appeals > Reviewability > Preservation for Review*

[HN6] An appellate court will not consider an issue on appeal that was not presented to or passed upon by the trial court.

*Civil Procedure > Appeals > Appellate Jurisdiction > State Court Review*

*Civil Procedure > Appeals > Reviewability > Preservation for Review*

[HN7] Where a cause has been appealed to a higher appellate court from a district court exercising appellate jurisdiction, only issues properly presented to and passed upon by the district court may be raised on appeal to the higher court.

*Civil Procedure > Appeals > Reviewability > Preservation for Review*

[HN8] In the absence of plain error, where an issue is raised for the first time in the higher appellate court, it will be disregarded inasmuch as the district court cannot commit error in resolving an issue never presented and submitted for disposition.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection***

[HN9] The due process requirements of Nebraska's Constitution are similar to those of the federal Constitution. Procedural due process limits the ability of the government to deprive people of interests which constitute "liberty" or "property" interests within the meaning of the Due Process Clause and requires that parties deprived of such interests be provided adequate notice and an opportunity to be heard. The first step in a due process analysis is to identify a property or liberty interest entitled to due process protections.

***Administrative Law > Agency Adjudication > Hearings > Right to Hearing > Due Process***

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection***

***Transportation Law > Private Motor Vehicles > Operator Licenses***

[HN10] Suspension of issued motor vehicle operators' licenses involves state action that adjudicates important property interests of the licensees. In such cases, the licenses are not to be taken away without that procedural due process required by the 14th Amendment. Though the required procedures may vary according to the interests at stake in a particular context, the fundamental requirement of due process is the opportunity to be heard at a meaningful time and in a meaningful manner. Before a state may deprive a motorist of his or her driver's license, that state must provide a forum for the determination of the question and a meaningful hearing appropriate to the nature of the case. In proceedings before an administrative agency or tribunal, procedural due process requires notice, identification of the accuser, factual basis for the accusation, reasonable time and opportunity to present evidence concerning the accusation, and a hearing before an impartial board.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection***

[HN11] A number of factors are to be considered in resolving an inquiry into the specific dictates of due process: First, the private interest that will be affected by the official action; second, the risk of an erroneous deprivation of such interest through the procedures used and the probable value, if any, of additional or substitute procedural safeguards; and finally, the government's interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail.

***Administrative Law > Agency Adjudication > Prehearing Activity***

[HN12] In order to secure the testimony of witnesses with relevant information to offer at an administrative license revocation hearing, a motorist must, within 10 days of the receipt of the notice of revocation and prior to the completion of discovery, (1) identify and locate all potential witnesses, (2) determine the facts that those witnesses are expected to establish, and (3) secure or be denied the voluntary appearances of those witnesses at a hearing the time and place of which are still unknown.

***Governments > Courts > Authority to Adjudicate***

[HN13] See *Neb. Rev. Stat. § 25-21,208* (Reissue 1995).

***Administrative Law > Agency Adjudication > Hearings > General Overview***

***Administrative Law > Agency Adjudication > Prehearing Activity***

[HN14] See *247 Neb. Admin. Code, ch. 1, § 010* (2001).

***Administrative Law > Agency Adjudication > Hearings > Right to Hearing > Due Process***

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection***

[HN15] Neither a court nor an administrative agency may subjugate a litigant's due process rights under the guise of judicial economy. The concept of due process embodies the notion of fundamental fairness and defies precise definition. Due process is a flexible notion that must be decided on the facts presented in a particular case and calls for such procedural protections as the particular situation demands.

**OPINION BY:** Moore

**OPINION:**

Moore, Judge.

**INTRODUCTION**

Micheal L. Valasek, Jr.'s motor vehicle operator's license was revoked after the director of the Nebraska Department of Motor Vehicles (Department) found that the arresting officer had probable cause to believe Valasek was operating a motor vehicle in violation of *Neb. Rev. Stat. § 60-6,196* (Supp. 2003). Valasek appealed to the district court for Custer County. The district court affirmed, and Valasek appealed that decision. We conclude that Valasek's assignments of error are without merit, and we affirm.

**BACKGROUND**

This appeal arises out of Valasek's arrest following a traffic stop on July 10, 2004. On that date, Sgt. Kirk Hansel of the Nebraska State Patrol stopped a motor vehicle for speeding. Hansel had obtained a radar reading which indicated that the vehicle had been traveling at 95 miles per hour. Hansel contacted the driver, [\*2] whom he identified as Valasek. Hansel noticed that Valasek had an odor of alcohol about his person. Hansel also observed that Valasek's eyes were bloodshot, that Valasek's face was flushed, and that Valasek's speech and actions were deliberate. Valasek refused to submit to most of the field sobriety tests requested by Hansel and failed a preliminary breath test. Hansel then arrested Valasek and transported him to a hospital in Broken Bow, Nebraska, where Valasek submitted to a blood test. The results of the test indicated that Valasek had a blood alcohol content of .163 grams of alcohol per 100 milliliters of blood.

On July 28, 2004, the Department received the "Notice/Sworn Report/Temporary License" (sworn report) completed by Hansel. The Department mailed a "Notice of Administrative License Revocation [and] Temporary License," dated August 3, 2004, to Valasek via certified mail. On August 11, the Department received a petition for administrative hearing from Valasek.

Due to continuances, three administrative license revocation (ALR) hearings were held in this matter. The first

hearing, on August 31, 2004, was continued upon the motion of the hearing officer in order to comply [\*3] with Valasek's discovery requests for his blood sample and in order for Valasek to subpoena the person responsible for testing his blood. The Department subsequently issued a subpoena duces tecum to Susan Rutledge, instructing Rutledge to appear by telephone at the ALR hearing scheduled for October 1. Rutledge did appear at the October 1 telephonic hearing; however, the October 1 hearing was continued on the Department's motion in order to facilitate independent testing of Valasek's blood sample.

On October 14, 2004, the Department received a fax message from Rutledge, the person responsible for testing Valasek's blood sample, regarding her unavailability for the third ALR hearing, scheduled for November 2. Rutledge's handwritten message stated, "Sorry but I will not be available for telephone conference hearing on 11/2/04. I have already received a subpoena from Otoe Co. that day." The fax message was stamped "RECEIVED" by the Department on October 14, was addressed to both the Department and Valasek's counsel, and bears a handwritten telephone number next to the name of Valasek's counsel. Although it is not clear whether Rutledge also faxed a copy to Valasek's counsel on October [\*4] 14, the record does show that the Department faxed a copy of Rutledge's message to Valasek's counsel on October 22.

On October 21, 2004, the Department received a praecipe for subpoena duces tecum from Valasek, asking that the Department issue a subpoena requiring Rutledge to appear at the upcoming third ALR hearing. The Department received a motion to compel from Valasek on October 22, asking the Department to compel the attendance of Rutledge at the November 2 ALR hearing. Valasek also stated in his motion that "[a] subpoena has been served on said witness and that she has written a memo to the attorney for [Valasek] indicating that she will not be available." On October 25, the director of the Department denied Valasek's motion to compel and sent a copy of the denial to Valasek on that date via regular first-class U.S. mail. The denial noted that Rutledge had already been subpoenaed to appear in another court on the day in question.

The third and final ALR hearing in this matter was held on November 2, 2004. The hearing officer received exhibits into evidence, including a copy of Hansel's sworn report, received by the hearing officer as exhibit 1. The hearing officer also [\*5] heard testimony from Hansel concerning his traffic stop and subsequent arrest of Valasek. In addition to the evidence outlined above concerning Hansel's stop and arrest of Valasek, Hansel testified that as a result of the arrest, he completed a sworn report to file with the Department. Hansel recognized exhibit 1 as the sworn report he filled out for Valasek. Hansel testified that he signed his sworn report in the presence of a notary and that exhibit 1 appeared to be a true and accurate copy of the document he filed. Valasek's attorney objected to the receipt of exhibit 1, stating:

I'll object to it on the reasons previously given. Further, I object on foundation, hearsay, not best evidence, no showing of compliance with 60-6,201, 60-6,197, or Title 177. I also object on the grounds that the director has not provided all of the discovery as requested, which does not allow me to maintain my burden of proof.

Earlier during the November 2 hearing, Valasek's attorney stated that he had no objections to the hearing officer's receiving all of the exhibits, "except those that are the exhibits for the sworn report and the transcript." The hearing officer overruled Valasek's [\*6] objections and received exhibit 1 into evidence.

On November 9, 2004, the director of the Department found that Hansel, the arresting officer, had probable cause to believe Valasek was operating or was in actual physical control of a motor vehicle while intoxicated, in violation of § 60-6,196, and that Valasek was operating or in actual physical control of a motor vehicle while having a blood alcohol content of .163 grams of alcohol per 100 milliliters of blood. The director revoked Valasek's operator's license for 1 year.

Valasek appealed to the district court, assigning errors similar to those assigned in this court. The only significant difference, for purposes of the present appeal, between the errors assigned to the district court and those assigned to this

court are discussed in the analysis section below. Following a hearing, the district court entered an order on March 21, 2005, agreeing with the findings of fact and conclusions of law set forth in the director's November 9, 2004, order and affirming the director's order in all respects. Valasek subsequently perfected his appeal to this court.

#### ASSIGNMENTS OF ERROR

Valasek asserts that the district court erred in (1) determining [\*7] that the director did not abuse her discretion in failing to hold a hearing on Valasek's motion to compel and determining that Valasek was not denied procedural due process as a result of this failure, (2) determining that the director did not abuse her discretion in failing to enter an order compelling Rutledge to appear at the ALR hearing and determining that Valasek was not denied procedural due process as a result of this failure, (3) finding that Hansel had probable cause to believe that Valasek was operating or in actual physical control of a motor vehicle in violation of § 60-6,196, and (4) finding that the director had jurisdiction to administratively revoke Valasek's driving privileges.

#### STANDARD OF REVIEW

[HN1] A judgment or final order rendered by a district court in a judicial review pursuant to the Administrative Procedure Act may be reversed, vacated, or modified by an appellate court for errors appearing on the record. *Hahn v. Neth*, 270 Neb. 164, 699 N.W.2d 32 (2005). When reviewing an order of a district court under the Administrative Procedure Act for errors appearing on the record, the inquiry is whether the decision conforms to the law, is supported [\*8] by competent evidence, and is not arbitrary, capricious, or unreasonable. *Id.*

Whether a decision conforms to law is by definition a question of law, in connection with which an appellate court reaches a conclusion independent of that reached by the lower court. *McCray v. Nebraska State Patrol*, 271 Neb. 1, 710 N.W.2d 300 (2006).

#### ANALYSIS

##### *Jurisdiction.*

We first address Valasek's assertion that the district court erred in finding that the director had jurisdiction to administratively revoke Valasek's driving privileges. Valasek refers us to *Neb. Rev. Stat. § 60-498.01(3)* (Supp. 2003), which provides:

[HN2] If a person arrested pursuant to section 60-6,197 submits to the chemical test of blood or breath required by that section, the test discloses the presence of alcohol in any of the concentrations specified in section 60-6,196, and the test results are available to the arresting peace officer while the arrested person is still in custody, the arresting peace officer, as agent for the director, shall verbally serve notice to the arrested person of the intention to immediately confiscate and revoke the operator's license [\*9] of such person and that the revocation will be automatic thirty days after the date of arrest unless a petition for hearing is filed within ten days after the date of arrest as provided in subsection (6) of this section. The arresting peace officer shall within ten days forward to the director a sworn report stating (a) that the person was arrested pursuant to section 60-6,197 and the reasons for such arrest, (b) that the person was requested to submit to the required test, and (c) that the person submitted to a test, the type of test to which he or she submitted, and that such test revealed the presence of alcohol in a concentration specified in section 60-6,196.

Because the results of Valasek's blood test were not available to Hansel while Valasek was in custody, § 60-498.01(5)(a) is also applicable:

[HN3] If the results of a chemical test indicate the presence of alcohol in a concentration specified in

section 60-6,196, the results are not available to the arresting peace officer while the arrested person is in custody, and the notice of revocation has not been served as required by subsection (4) of this section, the peace officer shall forward to the director a sworn [\*10] report containing the information prescribed by subsection (3) of this section within ten days after receipt of the results of the chemical test. If the sworn report is not received within ten days, the revocation shall not take effect.

Valasek argues that there is nothing in the record to show that Hansel forwarded the sworn report to the director as required. Valasek does not question the contents of the sworn report, but he argues that the mere fact that the director may have a copy of the sworn report does not indicate that the arresting officer complied with statutory requirements. Valasek observes that the petition for administrative hearing requires the driver to send a copy of the sworn report to the director, and Valasek suggests that the copy of the sworn report in the record may have been a copy furnished by Valasek, rather than by Hansel.

The Nebraska Supreme Court has held that [HN4] in an ALR proceeding, the sworn report of the arresting officer must, at a minimum, contain the information specified in the applicable statute, in order to confer jurisdiction. *Hahn v. Neth*, 270 Neb. 164, 699 N.W.2d 32 (2005). Exhibit 1, the sworn report received at the November 2, 2004, hearing, [\*11] provides that Valasek was arrested pursuant to *Neb. Rev. Stat. § 60-6,197* (Supp. 2003) and the reasons for his arrest, that Valasek was requested to submit to a chemical test, that Valasek submitted to a blood test, and that the blood test revealed the presence of alcohol in a concentration of .163 grams of alcohol per 100 milliliters of blood. Exhibit 1 also shows that the blood test results were received on July 21, 2004. Exhibit 1 was signed by Hansel and notarized on July 26 and stamped "RECEIVED" by the Department on July 28. Although Hansel did not explicitly testify at the November 2 hearing that he forwarded exhibit 1 to the Department, Hansel did identify exhibit 1 as the sworn report he filled out concerning Valasek and testified that exhibit 1 appeared "to be a true and accurate copy of the document [he] filed."

Valasek's claim that exhibit 1 might have been Valasek's copy of the sworn report is clearly without merit. The record shows that Valasek's petition for administrative hearing was stamped "RECEIVED" by the Department on August 11, 2004. It seems logical that any copies of the sworn report received by the Department with Valasek's petition [\*12] for administrative hearing would also have been stamped "RECEIVED" on August 11. Instead, exhibit 1 was stamped "RECEIVED" on July 28. Exhibit 1 contains the information specified in the applicable statute and was received by the Department within the time period specified by statute. We conclude that exhibit 1 was sufficient to confer jurisdiction on the director and that Valasek's assertions to the contrary are without merit.

#### *Hearing on Motion to Compel.*

With regard to his motion to compel, Valasek first asserts that the district court erred in determining that the director did not abuse her discretion in failing to hold a hearing on Valasek's motion to compel. Valasek also asserts that he was denied procedural due process as a result of this alleged failure. The record shows that Valasek did not request a hearing in the body of the motion itself and did not argue the issue of a hearing on his motion to compel before the hearing officer at any of the ALR hearings. Valasek did not assign the lack of a hearing as an issue in his appeal to the district court.

[HN5] In reviewing final administrative orders under the Administrative Procedure Act, the district court functions not [\*13] as a trial court but as an intermediate court of appeals. *Wolgamott v. Abramson*, 253 Neb. 350, 570 N.W.2d 818 (1997). [HN6] An appellate court will not consider an issue on appeal that was not presented to or passed upon by the trial court. *Metro. Utils. Dist. v. Neb. PSC (In re Metro. Utils. Dist.)*, 270 Neb. 494, 704 N.W.2d 237 (2005). Without having requested or raised the issue of such a hearing, Valasek may not argue that the issue was properly before either the hearing officer or the district court on appeal.

Likewise, the issue of the lack of a hearing on Valasek's motion to compel is not properly before this court. [HN7] Where a cause has been appealed to a higher appellate court from a district court exercising appellate jurisdiction, only

issues properly presented to and passed upon by the district court may be raised on appeal to the higher court. *Navrkal v. State*, 270 Neb. 391, 703 N.W.2d 247 (2005). [HN8] In the absence of plain error, where an issue is raised for the first time in the higher appellate court, it will be disregarded inasmuch as the district court cannot commit error in resolving an issue never presented and submitted for disposition. [\*14] *Id.* Valasek's assignment of error is without merit.

*Denial of Motion to Compel.*

Valasek next asserts the district court erred in determining that the director did not abuse her discretion in failing to enter an order compelling Rutledge to appear at the ALR hearing and that Valasek was not denied procedural due process as a result of this failure.

[HN9] The due process requirements of Nebraska's Constitution are similar to those of the federal Constitution. *Marshall v. Wimes*, 261 Neb. 846, 626 N.W.2d 229 (2001). Procedural due process limits the ability of the government to deprive people of interests which constitute "liberty" or "property" interests within the meaning of the *Due Process Clause* and requires that parties deprived of such interests be provided adequate notice and an opportunity to be heard. *Id.* The first step in a due process analysis is to identify a property or liberty interest entitled to due process protections. *Id.* [HN10] Suspension of issued motor vehicle operators' licenses involves state action that adjudicates important property interests of the licensees. *Id.* In such cases, the licenses are not to be taken away without that procedural [\*15] due process required by the *14th Amendment*. *Id.*

Though the required procedures may vary according to the interests at stake in a particular context, the fundamental requirement of due process is the opportunity to be heard at a meaningful time and in a meaningful manner. *Marshall v. Wimes*, *supra*. Before a state may deprive a motorist of his or her driver's license, that state must provide a forum for the determination of the question and a meaningful hearing appropriate to the nature of the case. *Id.* In proceedings before an administrative agency or tribunal, procedural due process requires notice, identification of the accuser, factual basis for the accusation, reasonable time and opportunity to present evidence concerning the accusation, and a hearing before an impartial board. *Id.*

In *Mathews v. Eldridge*, 424 U.S. 319, 96 S. Ct. 893, 47 L. Ed. 2d 18 (1976), the U.S. Supreme Court determined that [HN11] a number of factors are to be considered in resolving an inquiry into the specific dictates of due process: first, the private interest that will be affected by the official action; second, the risk of an erroneous deprivation of such interest [\*16] through the procedures used and the probable value, if any, of additional or substitute procedural safeguards; and finally, the government's interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail. *Marshall v. Wimes*, *supra*.

As to the first factor to be considered in a *Mathews* analysis, the private interest at issue in this case is Valasek's interest in continued possession of a motor vehicle operator's license. A driver's interest in his or her driving privileges is significant in today's society, as the loss of a driver's license may entail economic hardship and personal inconvenience. *Chase v. Neth*, 269 Neb. 882, 697 N.W.2d 675 (2005); *Hass v. Neth*, 265 Neb. 321, 657 N.W.2d 11 (2003); *Marshall v. Wimes*, *supra*.

The second factor to be considered under a *Mathews* analysis is the risk of an erroneous determination and the value, if any, of alternative procedures. In *Marshall v. Wimes*, *supra*, the Department refused to issue a subpoena duces tecum directing the individual who tested Scott Marshall's [\*17] blood alcohol level to appear at the ALR hearing. After the Department filed its notice of hearing, Marshall immediately filed a praecipe for subpoena duces tecum, seeking a subpoena directing the individual who tested his blood to appear at the hearing and bring with her a sample of Marshall's blood in her possession, as well as records relating to the calibration of the testing equipment. Marshall also sought a subpoena to compel the witness to appear for a deposition prior to the hearing. The praecipe was denied by the Department because it did not comply with certain regulatory requirements. The deposition request was also denied on the basis that the applicable regulations did not provide for a subpoena to compel attendance at a deposition. Marshall argued before the hearing officer and the district court that the director's application of the regulatory requirements for

subpoenas violated his due process rights.

On appeal from the district court, the Nebraska Supreme Court determined that because Marshall had the burden of establishing that he did not have more than the allowable concentration of alcohol in his blood at the time he was operating a motor vehicle, it was clear [\*18] that limitations on Marshall's ability to present evidence relevant to that determination heightened the risk of an erroneous deprivation of Marshall's interest in his operator's license. See *Marshall v. Wimes*, 261 Neb. 846, 626 N.W.2d 229 (2001). The Supreme Court also found it clear that permitting the introduction of relevant evidence has value in reducing the risk of error. *Id.* The court found this particularly true where Marshall's license was revoked primarily in reliance on the written report of the blood test that was performed and Marshall was precluded from examining the witness who performed the test to determine the test's reliability. The court determined that Marshall was entitled to inquire regarding the chain of custody of his blood sample and whether the individual who tested his blood, an employee of a State agency, complied with the relevant regulations. The court observed that the director did not refuse to issue the subpoena requested by Marshall because the evidence and testimony were irrelevant, but, rather, because of the timeliness of the praecipe. The court determined that pursuant to the relevant statutory and regulatory requirement, [\*19] [HN12] in order to secure the testimony of witnesses with relevant information to offer, a motorist must,

within 10 days of the receipt of the notice of revocation and prior to the completion of discovery, (a) identify and locate all potential witnesses, (b) determine the facts that those witnesses are expected to establish, and (c) secure or be denied the voluntary appearances of those witnesses at a hearing the time and place of which are still unknown.

*Id.* at 854-55, 626 N.W.2d at 237. See, also, § 60-498.01(6)(a); 247 Neb. Admin. Code, ch. 1, §§ 009.01 and 009.03D (2001). The court was not persuaded by the State's argument that the procedures available to Marshall in the established regulatory scheme were adequate to protect Marshall against the erroneous deprivation of his property interest.

In the present case, of course, any limitations on Valasek's ability to present evidence relevant to the determination of his blood alcohol content heighten the risk of an erroneous deprivation of Valasek's interest in his operator's license, and permitting introduction of such relevant evidence would have value in reducing the risk of [\*20] error. The present case is distinguishable, however, from *Marshall v. Wimes*, *supra*. The director in this case issued a subpoena for Rutledge which resulted in the fax message from Rutledge indicating that she would not be available for the November 2, 2004, hearing due to having received a subpoena to appear in a different court on that date. Rutledge faxed her message to the Department on October 14. The record is not clear as to whether Rutledge also faxed a copy to Valasek's counsel on October 14, but the record does show that the Department faxed a copy of Rutledge's message to Valasek's counsel on October 22. On that same date, Valasek filed his motion to compel. The Department sent the director's denial of Valasek's motion to Valasek via regular first-class U.S. mail on October 25. The denial was based on Rutledge's unavailability for the November 2 hearing.

The record does not show that Valasek took any further action to obtain Valasek's presence prior to the November 2, 2004, hearing. At the November 2 hearing, Valasek made a motion to dismiss based on Rutledge's absence from the hearing. Valasek's counsel argued that despite the subpoena requiring Rutledge's [\*21] presence in another court on that date, Rutledge had not shown that she could not appear by telephone for the 10 a.m. ALR hearing. Valasek's counsel argued further that Valasek was denied due process because he could not cross-examine a vital witness and maintain his burden of proof. The hearing officer observed that under the Department's rules and regulations, Valasek was entitled to enforce his subpoena through the district court if he so desired. The hearing officer denied Valasek's motion to dismiss and directed him to "that rule and regulation." Valasek's counsel discussed further with the hearing officer the difficulty of getting a district court to enforce the subpoena compelling Rutledge's appearance at 10 a.m. for the hearing, when it was already 10:20 a.m. Valasek's counsel stated, "I'll make my motion continually to dismiss for the reason of the denial of due process and that our participation in this hearing is not a waiver of that objection." The hearing officer

acknowledged Valasek's objection and indicated that he would issue his order denying the motion to dismiss "unless you tell me that you're going to attempt to . . . get the district court to enforce your subpoena. [\*22] " Valasek's counsel then inquired, "The mechanics, [hearing officer], though, if it was issued, how do we back date it so she can appear at this hearing?" The hearing officer indicated that such backdating was not possible, again stating that the motion to dismiss was denied and directing Valasek to use the district court to enforce the subpoena if he so desired.

We observe that *247 Neb. Admin. Code, ch. 1, § 009.07* (2001), provides that "[s]ubpoenas and orders may be enforced by the applicable district court." *Neb. Rev. Stat. § 25-21,208* (Reissue 1995) provides:

[HN13] Civil actions to which the state is a party shall, on motion of counsel on behalf of the state, have priority of trial over other civil actions; and the several district courts having jurisdiction to try actions to which the state is a party shall have power to compel attendance of witnesses, as is now had by such courts in other civil actions, and on payment of fees and mileage at the rate provided in section 81-1176 for state employees by the party desiring their attendance, may compel the attendance of witnesses from any county within the state.

We [\*23] also note the following regulations regarding continuances:

#### **010 CONTINUANCES.**

**010.01 Motions.** [HN14] Any party desiring a continuance of the hearing shall request the same in writing, stating the reasons for such request and, if required by the Director, submit proof of facts in support of such request in the time and manner specified. If a continuance is granted to either party, all persons who were served Notice of Hearing shall be notified of such continuance.

**010.02 Time.** Motions for continuance will not ordinarily be considered unless filed and received by the Director at least five (5) days prior to the time fixed for hearing.

. . . .

**010.04 Good Cause.** Continuances shall be granted only upon good cause shown.

**010.05 Content of Motion to Continue.** A timely request to change the hearing date or time must state all of the following to be considered:

**010.05A** The reason for not being able to appear at the time or date scheduled; and

**010.05B** Why that reason is beyond the requesting party's control; and

**010.05C** Any fact which establishes that the need to reschedule arose after the scheduling of the [\*24] hearing; and

**010.05D** The resulting specific undue hardship which would result if the request were to be denied.

**010.06 Failure to File Timely Motion or to State Grounds.** Any motion for continuance which is untimely filed or which fails to state facts sufficient to make a reasoned decision shall be denied unless substantial injustice would result.

*247 Neb. Admin. Code, ch. 1, § 010* (2001). "Substantial injustice" is defined as "actual violation of the right or rights of a party." *247 Neb. Admin. Code, ch. 1, § 002.09* (2001).

In the present case, there were procedures available to Valasek, beyond the subpoena for the November 2, 2004, hearing and the motion to compel, by which he could have obtained Rutledge's presence, if not at the November 2

hearing, then at a later continued hearing. Valasek may or may not have received the denial of his motion to compel in time to file a timely motion for continuance, but the regulations clearly provide a means for the director to grant a continuance in situations such as that presented by the present case. A continuance would have given Valasek the opportunity [\*25] to either obtain another subpoena or turn to the district court for assistance. We cannot say that the procedures available to Valasek in this instance were inadequate to protect him against the erroneous deprivation of his property interest.

The third and final factor to be considered in a *Mathews* analysis is the government's interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail. See *Mathews v. Eldridge*, 424 U.S. 319, 96 S. Ct. 893, 47 L. Ed. 2d 18 (1976). There is no doubt of a substantial governmental interest in protecting public health and safety by removing drunken drivers from the highways. *Hass v. Neth*, 265 Neb. 321, 657 N.W.2d 11 (2003). Clearly, an administrative agency has the right to establish procedures for compelling testimony. *Bender v. Department of Motor Vehicles*, 8 Neb. App. 290, 593 N.W.2d 27 (1999). The issue here, of course, is not whether there is a government interest in strictly enforcing a particular regulation. Rather, the question is whether Valasek was denied due process when a witness with relevant [\*26] testimony, which testimony would reduce the risk of an erroneous determination, was unavailable at the ALR hearing and Valasek did not follow available alternative procedures. The government has an interest in ensuring that the hearing will proceed in an orderly manner. See § 60-498.01(7). Although there had been several continuances in this case prior to the November 2, 2004, hearing, under the circumstances presented, we can perceive no significant additional fiscal or administrative burden that would have been placed on the government by granting a further continuance to allow Valasek to obtain testimony from Rutledge. The difficulty is, of course, that Valasek filed no such motion. One cannot silently tolerate error, gamble on a favorable result, and then complain that one guessed wrong. *Hass v. Neth*, *supra*.

[HN15] Neither a court nor an administrative agency may subjugate a litigant's due process rights under the guise of judicial economy. *Marshall v. Wimes*, 261 Neb. 846, 626 N.W.2d 229 (2001). The concept of due process embodies the notion of fundamental fairness and defies precise definition. *Id.* Due process is a flexible notion that must be [\*27] decided on the facts presented in a particular case and calls for such procedural protections as the particular situation demands. *Id.* We determine, based on the facts presented in this particular case, that Valasek's procedural due process rights were not violated by the director's denial of Valasek's motion to compel.

Valasek argues that the district court erred in determining that the director did not abuse her discretion in failing to enter an order compelling Rutledge to appear at the ALR hearing. The record shows that the director denied Valasek's motion to compel because Rutledge was not available on the date in question. Valasek argued before the hearing officer that it might have been possible for Rutledge to appear via telephone at the telephonic hearing, yet there is nothing in Rutledge's faxed message to suggest that this is so and Valasek made no offer of proof regarding this assertion. Further, Valasek did not take advantage of certain other procedural tools that were available to him. The district court's decision conforms to the law, is supported by competent evidence, and is not arbitrary, capricious, or unreasonable. See *Hahn v. Neth*, 270 Neb. 164, 699 N.W.2d 32 (2005). [\*28] Valasek's assignments of error regarding the denial of his motion to compel are without merit.

#### *Probable Cause.*

Valasek asserts that the district court erred in finding that Hansel had probable cause to believe that Valasek was operating or in actual physical control of a motor vehicle in violation of § 60-6,196. Section 60-498.01(7) [HN16] provides in relevant part that "[u]pon receipt of the arresting peace officer's sworn report, the director's order of revocation has prima facie validity and it becomes the petitioner's burden to establish by a preponderance of the evidence grounds upon which the operator's license revocation should not take effect." As discussed above, Hansel's report contains the required recitations specified in § 60-498.01(3). Hansel's report shows that Valasek was arrested pursuant to § 60-6,197 after Valasek was stopped for speeding 95 miles per hour in a 60-mile-per-hour zone. The sworn report also shows that Hansel detected the odor of alcoholic beverage about Valasek's person and that Valasek refused to submit to a majority of field sobriety tests. The report shows that Valasek was requested to submit to a chemical test,

that Valasek submitted to [\*29] a blood test, and that the blood test revealed the presence of alcohol in a concentration of .163 grams of alcohol per 100 milliliters of blood. The sworn report was properly received in evidence by the hearing officer at the ALR hearing. Accordingly, the Department established a prima facie case for the revocation of Valasek's driver's license. Hansel testified at the November 2, 2004, ALR hearing, and Valasek's attorney took the opportunity to cross-examine Hansel regarding his traffic stop and arrest of Valasek. However, in the cross-examination of Hansel, Valasek did not adduce any evidence to show that he was not driving under the influence of alcohol, nor did Valasek otherwise meet his burden of disproving the Department's prima facie case. Valasek's assignment of error is without merit.

#### CONCLUSION

The district court did not err in affirming the revocation of Valasek's operator's license.

Affirmed.

**State of Nebraska, appellee, v. Sterling T. Huff, appellant.****No. A-03-788.****NEBRASKA COURT OF APPEALS*****2004 Neb. App. LEXIS 117*****May 18, 2004, Filed**

**PRIOR HISTORY:** [\*1] Appeal from the District Court for Banner County, Kristine R. Cecava, Judge, on appeal thereto from the County Court for Banner County, James T. Hansen, Judge.

**DISPOSITION:** Judgment of District Court affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from an order of the District Court for Banner County (Nebraska), which affirmed his conviction and fine for speeding imposed in a county court.

**OVERVIEW:** A state patrol trooper issued defendant a citation for speeding, specifically for driving 78 miles per hour (mph) in a 65-mph zone. The court held that the information in the citation was sufficient to show that the maximum speed allowed for the vehicle defendant was driving and at the location where he was driving was 65 mph. Although the officer testified that there was a two mph margin of error when the radar unit was in its moving mode, the precise amount by which a speed was exceeded was not an essential element of the offense of speeding. It was necessary only that the evidence show the limit was exceeded. Despite the margin of error, the fine and the loss of points against defendant's driving record were the same whether defendant was traveling 76 or 80 mph. The officer's testimony showed that all of the necessary foundational requirements of *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998) had been met and that the radar unit was working properly. Sufficient evidence supported the conviction. There was no Brady violation because the radar unit's margin of error was not exculpatory evidence as it was neither favorable to defendant nor material to his guilt or punishment.

**OUTCOME:** The court affirmed the trial court's order finding defendant guilty of speeding.

**CORE TERMS:** radar, speed, driving, maximum speed, speeding, tuning, fork, margin of error, tuning fork, directed verdict, speed limit, accuracy, patrol car, measurement, guilt, calibration, self-test, fine, zone, electronic, mechanical, microwave, radio, essential element, working order, overruling, traveling, assigns, assignment of error, favorable

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Traffic Regulation Violations > General Overview***

[HN1] A prosecution for a traffic infraction is a criminal proceeding.

***Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview***

***Criminal Law & Procedure > Witnesses > Credibility***

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN2] In reviewing a criminal conviction, an appellate court does not resolve conflicts in the evidence, pass on the credibility of witnesses, or reweigh the evidence. Such matters are for the finder of fact, and a conviction will be affirmed, in the absence of prejudicial error, if the properly admitted evidence, viewed and construed most favorably to the State, is sufficient to support the conviction.

***Criminal Law & Procedure > Trials > Bench Trials***

***Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > General Overview***

[HN3] In a bench trial of a criminal case, the trial court's findings have the effect of a jury verdict and will not be set aside unless clearly erroneous.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN4] When reviewing a criminal conviction for sufficiency of the evidence to sustain the conviction, the relevant question for an appellate court is whether, after viewing the evidence in the light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN5] See *Neb. Rev. Stat. § 60-6,194* (Reissue 1998).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN6] The precise amount by which a speed was exceeded is not an essential element of the offense of speeding; it is necessary only that the evidence show the limit was exceeded.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN7] *Neb. Rev. Stat. § 60-6,194* states that the speed at which a defendant is alleged to have driven is an essential element of the offense. The statute does not require that the defendant's "exact" speed be proved.

***Governments > Legislation > Interpretation***

[HN8] In the absence of anything indicating to the contrary, statutory language is to be given its plain and ordinary meaning, and when the words of a statute are plain, direct, and unambiguous, no interpretation is necessary or will be indulged to ascertain their meaning.

***Governments > Legislation > Interpretation***

[HN9] is not within the province of the courts to read a meaning into a statute that is not there, nor to read anything direct and plain out of a statute.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN10] A conviction for speeding, pursuant to *Neb. Rev. Stat. § 60-6,194*, does not require the State to prove that the defendant had specific notice of the speed limit.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Objections & Offers of Proof > Objections  
Evidence > Scientific Evidence > General Overview***

[HN11] Pursuant to *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998), a radar readout may be accepted as competent evidence of the speed of a motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue. However, before evidence of a vehicular speed determined by use of radar equipment is admissible, the State, as required by § 60-6,192(1)(d), must establish the equipment's accuracy when the determination of speed was made. Section 60-6,192 specifies the requirements for admissibility of evidence from a radar device.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN12] See *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN13] Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required under *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998).

***Civil Procedure > Trials > Judgment as Matter of Law > Directed Verdicts***

***Criminal Law & Procedure > Trials > Motions for Acquittal***

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN14] When a motion for directed verdict made at the close of all the evidence is overruled by the trial court, appellate review is controlled by the rule that a directed verdict is proper only where reasonable minds cannot differ and can draw but one conclusion from the evidence, and the issues should be decided as a matter of law.

***Criminal Law & Procedure > Trials > Motions for Acquittal***

***Criminal Law & Procedure > Verdicts > General Overview***

[HN15] In a criminal case, a court can direct a verdict only when there is a complete failure of evidence to establish an essential element of the crime charged or the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained. If there is any evidence which will sustain a finding for the party against whom a motion for directed verdict is made, the case may not be decided as a matter of law, and a verdict may not be directed.

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > General Overview***

[HN16] See *Neb. Rev. Stat. § 29-1912(1)* (Reissue 1995).

***Criminal Law & Procedure > Discovery & Inspection > Brady Materials***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN17] The suppression by the State of evidence favorable to and requested by an accused violates due process where the evidence is material to the guilt of the defendant.

**COUNSEL:** Sterling T. Huff, of Island, Huff & Nichols, P.C., L.L.O., pro se.

Jon Bruning, Attorney General, and James D. Smith for appellee.

**JUDGES:** Carlson, Moore, and Cassel, Judges.

**OPINION BY:** Carlson

**OPINION:**

Carlson, Judge. INTRODUCTION

Sterling T. Huff appeals from an order of the district court for Banner County affirming his conviction and fine for speeding imposed in the county court for Banner County. We affirm.

BACKGROUND

On June 5, 2002, Nebraska State Patrol Trooper Manuel Jiminez issued Huff a citation for speeding, specifically for driving 78 m.p.h. in a 65-m.p.h. zone. Huff pled not guilty. On July 10, Huff filed a motion for *Brady* material, which motion was subsequently overruled. See *Brady v. Maryland*, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963). A bench trial was held on September 19.

At trial, Jiminez was the only witness to testify. He was first called as a witness by the State, and after the State rested, he was recalled by Huff. Jiminez testified [\*2] that he has been a trooper with the State Patrol since July 1996. Jiminez testified that he has training in radar detection and has been operating radar equipment from the time he became a trooper up to the time of trial. Jiminez stated that he was certified in the proper use of radar equipment and that his certification was in effect on the date he stopped Huff. Jiminez testified that he was also trained to determine vehicle speeds by visual observation and trained to ascertain the speed of approaching vehicles based on Doppler sounds that emanate from the radar unit.

Jiminez testified that since he became a trooper, his patrol car has always been equipped with a Stalker Dual SL radar unit, and that that is what his car was equipped with on June 5, 2002. He testified that the radar unit in his patrol car and the tuning forks used to check the calibration of the unit had a certificate of calibration and accuracy to show that the unit itself and the tuning forks were in proper working order. He testified that a State Patrol technician checks the radar unit and the tuning forks for calibration and accuracy on a yearly basis and then issues a certificate indicating that it is all in [\*3] proper working order.

Jiminez testified that there are daily tests performed on the radar unit in his patrol car to determine whether the unit is in proper working order. He testified that at the beginning of his shift, he presses a button on the unit which causes the unit to conduct a "self-test." Jiminez stated that when the unit is done with the self-test, the unit indicates whether it passed or failed the test. He further testified that the unit automatically performs a self-test every 10 minutes and that it beeps four times if it passes the test. Jiminez testified that he also performs a "tuning fork test" using the two tuning forks that are a part of the radar unit in his patrol car. The tuning fork test checks the calibration of the radar unit. He testified that he performs the tuning fork test at the beginning and end of every shift.

Jiminez testified that at the beginning of his shift on June 5, 2002, he activated the radar unit's self-test and performed the tuning fork test. He testified that based on the results of the tests, the unit was working properly. Jiminez testified that on June 5, he also performed the tuning fork test at the end of his shift. He testified that [\*4] based on the results of the external tests of accuracy he performed on the radar unit both prior to and subsequent to issuing the citation to Huff, the radar unit was working properly.

Jiminez testified that on June 5, 2002, between the time he started his shift at 4 p.m. and the time he stopped Huff at 10:03 p.m., the radar unit was performing the self-test every 10 minutes, and that the tests gave no indication that the

unit was not working properly. Jiminez further testified that based on his background, training, and experience, at the time he activated the radar unit to determine Huff's speed, the radar unit was being operated in such a manner and under such conditions as to allow the minimum possibility of distortion and outside interference.

Jiminez testified that at about 10:03 p.m. on June 5, 2002, he was on duty and was patrolling near mile marker 47 on Highway 71, which marker is in Banner County, south of the city of Scottsbluff. Jiminez testified that at this time, he observed a red Chevrolet Corvette traveling in the opposite direction than he was going, and that he estimated the vehicle to be traveling faster than the speed limit. He testified that he also used the [\*5] Doppler sounds from the radar unit to ascertain the speed of the vehicle. Jiminez said that he then activated the "moving mode" of his radar unit to get a radar reading on the vehicle. Jiminez explained that the moving mode is used when the patrol car is moving rather than in a stationary position. Jiminez recalled that the radar unit indicated that the vehicle was traveling 78 m.p.h. Jiminez testified that he then turned his patrol car around and stopped the vehicle and that the driver identified himself as Huff. Jiminez further testified that the radar unit has a margin of error in the moving mode of plus or minus 2 m.p.h. He further testified that the radar unit automatically rounds the number it records down to the nearest whole number and that that is the number it displays.

Jiminez testified that since January 1997, he has patrolled the area where Huff was stopped. He testified that there are posted speed limit signs in the area and that the posted speed limit is 65 m.p.h.

At the end of the State's case, Huff moved for a directed verdict, and the trial court took the motion under advisement. At the conclusion of the evidence, Huff renewed his motion for directed verdict, and [\*6] the trial court again took the motion under advisement.

In an order dated December 3, 2002, the trial court overruled Huff's motion for directed verdict and found Huff guilty of speeding 78 m.p.h. in a 65-m.p.h. zone. Huff was ordered to pay a fine of \$ 75, plus court costs. Huff appealed to the district court, which affirmed the trial court's order.

#### ASSIGNMENTS OF ERROR

Huff assigns five errors, which we consolidate into three. Huff assigns that the trial court erred in (1) finding that the State presented sufficient evidence to support the conviction, (2) overruling his motion for directed verdict, and (3) overruling his motion for *Brady* material.

#### STANDARD OF REVIEW

[HN1] A prosecution for a traffic infraction is a criminal proceeding. See, *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Knoles*, 199 Neb. 211, 256 N.W.2d 873 (1977).

[HN2] In reviewing a criminal conviction, an appellate court does not resolve conflicts in the evidence, pass on the credibility of witnesses, or reweigh the evidence. Such matters are for the finder of fact, and a conviction will be affirmed, in the absence of prejudicial error, if the properly admitted evidence, [\*7] viewed and construed most favorably to the State, is sufficient to support the conviction. *State v. Jackson*, 264 Neb. 420, 648 N.W.2d 282 (2002); *State v. Long*, 264 Neb. 85, 645 N.W.2d 553 (2002). [HN3] In a bench trial of a criminal case, the trial court's findings have the effect of a jury verdict and will not be set aside unless clearly erroneous. *State v. Blackman*, 254 Neb. 941, 580 N.W.2d 546 (1998); *State v. Hansen*, 252 Neb. 489, 562 N.W.2d 840 (1997).

[HN4] When reviewing a criminal conviction for sufficiency of the evidence to sustain the conviction, the relevant question for an appellate court is whether, after viewing the evidence in the light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt. *State v. Jackson*, *supra*; *State v. Canaday*, 263 Neb. 566, 641 N.W.2d 13 (2002).

#### ANALYSIS

Huff first assigns that the trial court erred in finding that the State presented sufficient evidence to support the conviction. Huff makes several arguments in support of this assignment of error. Huff first argues [\*8] that the citation issued by Jiminez did not meet the requirements of *Neb. Rev. Stat. § 60-6,194* (Reissue 1998). *Section 60-6,194* provides in part:

[HN5] (1) In every charge of violation of any speed regulation in the Nebraska Rules of the Road, the complaint and the summons or notice to appear shall specify the speed at which defendant is alleged to have driven and the maximum speed for the type of vehicle involved applicable within the district or at the location. The speed at which defendant is alleged to have driven and the maximum speed are essential elements of the offense and shall be proved by competent evidence.

Huff alleges that the citation fails to identify the model of his vehicle with any particularity, which model he claims would have bearing on the maximum speed allowed, and that the citation fails to identify the maximum speed allowed. We determine that this argument is without merit. The citation identifies the make, style, model, year, and color of Huff's vehicle and states that Huff was being cited for unlawfully committing the offense of speeding 78 m.p.h. in a 65-m.p.h. zone. We conclude that this information was sufficient [\*9] to show that the maximum speed allowed for the vehicle Huff was driving and at the location where he was driving was 65 m.p.h.

Huff next argues that the State failed to prove the maximum speed allowed at the location where Huff was stopped for speeding, which fact is an essential element of the offense of speeding. Jiminez testified that since January 1997, he has patrolled the area where Huff was stopped. He testified that there are posted speed limit signs in the area and that the posted speed limit is 65 m.p.h. We conclude that Jiminez' testimony was sufficient evidence to show the maximum speed allowed as required by *§ 60-6,194*.

Huff also argues that the State failed to present evidence to show what type of road Highway 71 is under *Neb. Rev. Stat. § 60-6,186* (Reissue 1998), which evidence he alleges was necessary to support the maximum speed element. *Section 60-6,186* sets forth the maximum speed limits for different types or categories of roads. For example, *§ 60-6,186(1)(f)* states that the maximum speed limit is 65 m.p.h. upon an expressway that is part of the state highway system.

Pursuant to *§ 60-6,194*, the State had to prove the maximum speed [\*10] allowed at the location where Huff was stopped. As we previously concluded, the State proved the maximum speed allowed through Jiminez' testimony. Thus, it was not necessary for the State to present evidence as to what type of road Highway 71 is under *§ 60-6,186*.

Huff next argues that due to the margin of error in the radar reading, the State failed to prove the exact speed at which Huff was driving. Huff contends that because Jiminez testified that there is a 2-m.p.h. margin of error when the radar unit is in its moving mode and because the radar reading showed that Huff was driving 78 m.p.h., he could have been driving anywhere between 76 and 80 m.p.h. [HN6] The precise amount by which a speed was exceeded is not an essential element of the offense of speeding; it is necessary only that the evidence show the limit was exceeded. *State v. Chambers*, 241 Neb. 66, 486 N.W.2d 481 (1992). See *Melanson v. State*, 188 Neb. 446, 197 N.W.2d 401 (1972).

In addition, *§ 60-6,194* states that [HN7] the speed at which a defendant is alleged to have driven is an essential element of the offense. The statute does not require that the defendant's "exact" speed be proved. [HN8] In [\*11] the absence of anything indicating to the contrary, statutory language is to be given its plain and ordinary meaning, and when the words of a statute are plain, direct, and unambiguous, no interpretation is necessary or will be indulged to ascertain their meaning. *State v. Burlison*, 255 Neb. 190, 583 N.W.2d 31 (1998); *State v. Atkins*, 250 Neb. 315, 549 N.W.2d 159 (1996). It [HN9] is not within the province of the courts to read a meaning into a statute that is not there, nor to read anything direct and plain out of a statute. *Id.*

Huff was charged with driving 78 m.p.h. in a 65-m.p.h. zone. Under *Neb. Rev. Stat. § 60-682.01* (Reissue 1998), a person convicted for traveling 11 to 15 m.p.h. over the speed limit is fined \$ 75. Thus, a conviction for driving 78 m.p.h.

in a 65-m.p.h. zone results in a \$ 75 fine. The minimum speed Huff could have possibly been driving was 76 m.p.h., which would result in the same \$ 75 fine as a conviction for driving 78 m.p.h. See § 60-682.01(1)(c). Similarly, the maximum speed Huff could have been driving was 80 m.p.h., which would also result in a \$ 75 fine. We also note that a conviction for [\*12] driving any speed between 76 and 80 m.p.h. in a 65-m.p.h. zone results in the same loss of points against a defendant's driving record. See *Neb. Rev. Stat. § 60-4,182(10)(c)* (Supp. 2001). We conclude that despite the margin of error, the State presented sufficient evidence to show the speed at which Huff's vehicle was traveling.

Huff next argues that the State failed to prove that he knew or should have known what the speed limit was at the location where he was cited for speeding. Huff contends that pursuant to § 60-6,186 and *Neb. Rev. Stat. § 60-6,190* (Reissue 1998), a driver is entitled to reasonable notice of the speed limit via signs erected by the Nebraska Department of Roads, and that there is no evidence Huff had such notice. [HN10] A conviction for speeding, pursuant to § 60-6,194, does not require the State to prove that the defendant had specific notice of the speed limit. This argument is without merit.

Huff also argues that the radar reading was inadmissible because it lacked sufficient foundation and that his objection to such evidence should have been sustained. [HN11] Pursuant to *Neb. Rev. Stat. § 60-6,192(1)* [\*13] (Reissue 1998), a radar readout may be accepted as competent evidence of the speed of a motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue. However, before evidence of a vehicular speed determined by use of radar equipment is admissible, the State, as required by § 60-6,192(1)(d), must establish the equipment's accuracy when the determination of speed was made. See, *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Kudlacek*, 229 Neb. 297, 426 N.W.2d 289 (1988). Section 60-6,192 specifies the requirements for admissibility of evidence from a radar device:

[HN12] (1) . . . Before the state may offer in evidence the results of such radio microwave, mechanical, or electronic speed measurement device for the purpose of establishing the speed of any motor vehicle, the state shall prove the following:

- (a) The radio microwave, mechanical, or electronic speed measurement device was in proper working order at the time of conducting the measurement;
- (b) The radio microwave, mechanical, or electronic speed measurement device was being operated in such a manner and under such conditions so as to allow [\*14] a minimum possibility of distortion or outside interference;
- (c) The person operating the radio microwave, mechanical, or electronic speed measurement device and interpreting such measurement was qualified by training and experience to properly test and operate the radio microwave, mechanical, or electronic speed measurement device; and
- (d) The operator conducted external tests of accuracy upon the radio microwave, mechanical, or electronic speed measurement device, within a reasonable time both prior to and subsequent to an arrest being made, and the device was found to be in proper working order.

[HN13] Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required. *State v. Lomack, supra*; *State v. Kudlacek, supra*.

Huff relies on *State v. Lomack, supra*, which held that the evidence presented concerning the radar unit lacked the required indicia of accuracy. The Nebraska Supreme Court determined that the evidence failed to establish that the tuning fork used to test the radar unit was particularly designed and intended for testing the radar [\*15] unit in question and that the evidence thereby failed to show that the tuning fork was in any way associated with the radar unit tested. Further, there was no evidence that the tuning fork itself was in any way properly tested, calibrated, or certified as a

reliable gauge of a radar unit's accuracy. Huff argues that the present case is similar to *State v. Lomack, supra*, because Jiminez' testimony failed to establish that the tuning forks he used were designed and intended for testing the radar unit in his car. Huff further contends that there was no evidence that the tuning forks were properly tested, calibrated, or certified as a reliable gauge of the radar unit's accuracy.

Jiminez testified that the tuning forks he uses are part of the radar unit in his patrol car and that those particular tuning forks and his radar unit are always used together. Jiminez also testified that a certificate of calibration and accuracy was issued by a State Patrol technician for the radar unit in his patrol car and for the tuning forks used to check the calibration of the unit. Thus, the tuning forks had been tested and certified. The fact that the certificate was issued for the radar [\*16] unit and the tuning forks together demonstrates that the tuning forks are intended for that particular unit. This case is not similar to *State v. Lomack, supra*. Rather, Jiminez' testimony showed that all of the necessary foundational requirements of § 60-6,192 had been met. He testified that at the beginning of his shift, he activates a self-test on the radar unit, and that the unit indicates whether it has passed or failed the test. Jiminez further testified that the unit also runs an automatic self-test every 10 minutes. Finally, Jiminez testified that he performs a tuning fork test at the beginning and end of every shift, which test checks the calibration of the radar unit. Jiminez testified that on June 5, 2002, he performed the tuning fork test both prior to and subsequent to issuing Huff the citation, and that the unit was working properly. Accordingly, Huff's argument that there was insufficient foundation for evidence of the radar readout is without merit. We conclude that all of Huff's arguments in support of his first assignment of error alleging that the State presented insufficient evidence are without merit.

Huff also assigns that the trial court erred [\*17] in overruling his motion for directed verdict. [HN14] When a motion for directed verdict made at the close of all the evidence is overruled by the trial court, appellate review is controlled by the rule that a directed verdict is proper only where reasonable minds cannot differ and can draw but one conclusion from the evidence, and the issues should be decided as a matter of law. *McClure v. Forsman*, 266 Neb. 90, 662 N.W.2d 566 (2003); *Moyer v. Nebraska City Airport Auth.*, 265 Neb. 201, 655 N.W.2d 855 (2003).

[HN15] In a criminal case, a court can direct a verdict only when there is a complete failure of evidence to establish an essential element of the crime charged or the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained. *State v. Segura*, 265 Neb. 903, 660 N.W.2d 512 (2003); *State v. Canady*, 263 Neb. 552, 641 N.W.2d 43 (2002). If there is any evidence which will sustain a finding for the party against whom a motion for directed verdict is made, the case may not be decided as a matter of law, and a verdict may not be directed. *Id.*

We have concluded [\*18] that there was sufficient evidence for the trial court to find beyond a reasonable doubt that Huff was guilty of speeding. Having so concluded, we cannot say that there is a complete failure of evidence to establish an essential element of the crime charged or that the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained. As such, Huff's assignment of error regarding his motion for directed verdict is without merit.

Finally, Huff assigns that the trial court erred in overruling his motion for *Brady* material. In Huff's motion, he requested, among other things, that the court order the State to produce any information it had which was related to the margin of error of the radar unit. In Huff's brief, he contends that the margin of error is exculpatory evidence that the State should have disclosed prior to trial. However, Huff's motion does not mention "exculpatory evidence" and the motion appears to be a motion for discovery. We first note that because this case involves a traffic violation, Huff does not have a statutory right to discovery. *Neb. Rev. Stat. § 29-1912(1)* (Reissue [\*19] 1995) provides for pretrial discovery in criminal cases [HN16] "when a defendant is charged with a felony or when a defendant is charged with a misdemeanor or a violation of a city or village ordinance for which imprisonment is a possible penalty . . . ." The traffic violation with which Huff was charged does not fit within the parameters of § 29-1912.

However, the U.S. Constitution requires the State to disclose exculpatory material to an accused. *Brady v. Maryland*, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963), recognized that [HN17] the suppression by the State of

evidence favorable to and requested by an accused violates due process where the evidence is material to the guilt of the defendant. *State v. Phelps*, 241 Neb. 707, 490 N.W.2d 676 (1992); *State v. Meis*, 217 Neb. 770, 351 N.W.2d 79 (1984).

"The heart of the holding in *Brady* is the prosecution's suppression of evidence, in the face of a defense production request, where the evidence is favorable to the accused and is material either to guilt or to punishment. Important, then, are (a) suppression by the prosecution after a request by the defense, (b) the evidence's [\*20] favorable character for the defense, and (c) the materiality of the evidence."

*State v. Phelps*, 241 Neb. at 730-31, 490 N.W.2d at 692, quoting *Moore v. Illinois*, 408 U.S. 786, 92 S. Ct. 2562, 33 L. Ed. 2d 706 (1972).

The radar unit's margin of error was not exculpatory evidence, because it was neither favorable to Huff nor material to his guilt or to his punishment. As stated previously, the radar unit showed that Huff was driving 78 m.p.h. Given the margin of error of plus or minus 2 m.p.h., the minimum speed at which Huff could have possibly been driving was 76 m.p.h. Assuming this to have been Huff's speed, Huff would still be guilty of speeding and would be subject to the same \$ 75 fine as if he had been driving 78 m.p.h. as alleged in the citation. The maximum speed at which Huff could have been driving, based on the margin of error, is 80 m.p.h., and a finding of guilt at this speed would also subject Huff to the same \$ 75 fine. Clearly, the evidence regarding the radar unit's margin of error was not exculpatory. Huff's assignment of error is without merit.

#### CONCLUSION

Based on the preceding analysis, we conclude that the State presented [\*21] sufficient evidence to support a finding of guilt on the charge of speeding. We further conclude that the trial court did not err in overruling Huff's motion for *Brady* material. Accordingly, we affirm the order of the district court affirming the trial court's order finding Huff guilty of speeding.

Affirmed.

**State of Nebraska, appellee, v. Sterling T. Huff, appellant.****No. A-03-788.****NEBRASKA COURT OF APPEALS*****2004 Neb. App. LEXIS 117*****May 18, 2004, Filed**

**PRIOR HISTORY:** [\*1] Appeal from the District Court for Banner County, Kristine R. Cecava, Judge, on appeal thereto from the County Court for Banner County, James T. Hansen, Judge.

**DISPOSITION:** Judgment of District Court affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed from an order of the District Court for Banner County (Nebraska), which affirmed his conviction and fine for speeding imposed in a county court.

**OVERVIEW:** A state patrol trooper issued defendant a citation for speeding, specifically for driving 78 miles per hour (mph) in a 65-mph zone. The court held that the information in the citation was sufficient to show that the maximum speed allowed for the vehicle defendant was driving and at the location where he was driving was 65 mph. Although the officer testified that there was a two mph margin of error when the radar unit was in its moving mode, the precise amount by which a speed was exceeded was not an essential element of the offense of speeding. It was necessary only that the evidence show the limit was exceeded. Despite the margin of error, the fine and the loss of points against defendant's driving record were the same whether defendant was traveling 76 or 80 mph. The officer's testimony showed that all of the necessary foundational requirements of *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998) had been met and that the radar unit was working properly. Sufficient evidence supported the conviction. There was no Brady violation because the radar unit's margin of error was not exculpatory evidence as it was neither favorable to defendant nor material to his guilt or punishment.

**OUTCOME:** The court affirmed the trial court's order finding defendant guilty of speeding.

**CORE TERMS:** radar, speed, driving, maximum speed, speeding, tuning, fork, margin of error, tuning fork, directed verdict, speed limit, accuracy, patrol car, measurement, guilt, calibration, self-test, fine, zone, electronic, mechanical, microwave, radio, essential element, working order, overruling, traveling, assigns, assignment of error, favorable

[HN3] In a bench trial of a criminal case, the trial court's findings have the effect of a jury verdict and will not be set aside unless clearly erroneous.

***Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN4] When reviewing a criminal conviction for sufficiency of the evidence to sustain the conviction, the relevant question for an appellate court is whether, after viewing the evidence in the light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN5] See *Neb. Rev. Stat. § 60-6,194* (Reissue 1998).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN6] The precise amount by which a speed was exceeded is not an essential element of the offense of speeding; it is necessary only that the evidence show the limit was exceeded.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN7] *Neb. Rev. Stat. § 60-6,194* states that the speed at which a defendant is alleged to have driven is an essential element of the offense. The statute does not require that the defendant's "exact" speed be proved.

***Governments > Legislation > Interpretation***

[HN8] In the absence of anything indicating to the contrary, statutory language is to be given its plain and ordinary meaning, and when the words of a statute are plain, direct, and unambiguous, no interpretation is necessary or will be indulged to ascertain their meaning.

***Governments > Legislation > Interpretation***

[HN9] is not within the province of the courts to read a meaning into a statute that is not there, nor to read anything direct and plain out of a statute.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN10] A conviction for speeding, pursuant to *Neb. Rev. Stat. § 60-6,194*, does not require the State to prove that the defendant had specific notice of the speed limit.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Objections & Offers of Proof > Objections  
Evidence > Scientific Evidence > General Overview***

[HN11] Pursuant to *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998), a radar readout may be accepted as competent evidence of the speed of a motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue. However, before evidence of a vehicular speed determined by use of radar equipment is admissible, the State, as required by § 60-6,192(1)(d), must establish the equipment's accuracy when the determination of speed was made. Section 60-6,192 specifies the requirements for admissibility of evidence from a radar device.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN12] See *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Scientific Evidence > General Overview***

[HN13] Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required under *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998).

***Civil Procedure > Trials > Judgment as Matter of Law > Directed Verdicts***

***Criminal Law & Procedure > Trials > Motions for Acquittal***

***Criminal Law & Procedure > Appeals > Standards of Review > General Overview***

[HN14] When a motion for directed verdict made at the close of all the evidence is overruled by the trial court, appellate review is controlled by the rule that a directed verdict is proper only where reasonable minds cannot differ and can draw but one conclusion from the evidence, and the issues should be decided as a matter of law.

***Criminal Law & Procedure > Trials > Motions for Acquittal***

***Criminal Law & Procedure > Verdicts > General Overview***

[HN15] In a criminal case, a court can direct a verdict only when there is a complete failure of evidence to establish an essential element of the crime charged or the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained. If there is any evidence which will sustain a finding for the party against whom a motion for directed verdict is made, the case may not be decided as a matter of law, and a verdict may not be directed.

***Criminal Law & Procedure > Discovery & Inspection > Discovery by Defendant > General Overview***

**OPINION BY:** Carlson

**OPINION:**

Carlson, Judge. INTRODUCTION

Sterling T. Huff appeals from an order of the district court for Banner County affirming his conviction and fine for speeding imposed in the county court for Banner County. We affirm.

BACKGROUND

On June 5, 2002, Nebraska State Patrol Trooper Manuel Jiminez issued Huff a citation for speeding, specifically for driving 78 m.p.h. in a 65-m.p.h. zone. Huff pled not guilty. On July 10, Huff filed a motion for *Brady* material, which motion was subsequently overruled. See *Brady v. Maryland*, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963). A bench trial was held on September 19.

At trial, Jiminez was the only witness to testify. He was first called as a witness by the State, and after the State rested, he was recalled by Huff. Jiminez testified [\*2] that he has been a trooper with the State Patrol since July 1996. Jiminez testified that he has training in radar detection and has been operating radar equipment from the time he became a trooper up to the time of trial. Jiminez stated that he was certified in the proper use of radar equipment and that his certification was in effect on the date he stopped Huff. Jiminez testified that he was also trained to determine vehicle speeds by visual observation and trained to ascertain the speed of approaching vehicles based on Doppler sounds that emanate from the radar unit.

Jiminez testified that since he became a trooper, his patrol car has always been equipped with a Stalker Dual SL radar unit, and that that is what his car was equipped with on June 5, 2002. He testified that the radar unit in his patrol car and the tuning forks used to check the calibration of the unit had a certificate of calibration and accuracy to show that the unit itself and the tuning forks were in proper working order. He testified that a State Patrol technician checks the radar unit and the tuning forks for calibration and accuracy on a yearly basis and then issues a certificate indicating that it is all in [\*3] proper working order.

Jiminez testified that there are daily tests performed on the radar unit in his patrol car to determine whether the unit is in proper working order. He testified that at the beginning of his shift, he presses a button on the unit which causes the unit to conduct a "self-test." Jiminez stated that when the unit is done with the self-test, the unit indicates whether it passed or failed the test. He further testified that the unit automatically performs a self-test every 10 minutes and that it beeps four times if it passes the test. Jiminez testified that he also performs a "tuning fork test" using the two tuning forks that are a part of the radar unit in his patrol car. The tuning fork test checks the calibration of the radar unit. He testified that he performs the tuning fork test at the beginning and end of every shift.

Jiminez testified that at the beginning of his shift on June 5, 2002, he activated the radar unit's self-test and performed the tuning fork test. He testified that based on the results of the tests, the unit was working properly. Jiminez testified that on June 5, he also performed the tuning fork test at the end of his shift. He testified that [\*4] based on the results of the external tests of accuracy he performed on the radar unit both prior to and subsequent to issuing the citation to Huff, the radar unit was working properly.

Jiminez testified that on June 5, 2002, between the time he started his shift at 4 p.m. and the time he stopped Huff at 10:03 p.m., the radar unit was performing the self-test every 10 minutes, and that the tests gave no indication that the

unit was not working properly. Jiminez further testified that based on his background, training, and experience, at the time he activated the radar unit to determine Huff's speed, the radar unit was being operated in such a manner and under such conditions as to allow the minimum possibility of distortion and outside interference.

Jiminez testified that at about 10:03 p.m. on June 5, 2002, he was on duty and was patrolling near mile marker 47 on Highway 71, which marker is in Banner County, south of the city of Scottsbluff. Jiminez testified that at this time, he observed a red Chevrolet Corvette traveling in the opposite direction than he was going, and that he estimated the vehicle to be traveling faster than the speed limit. He testified that he also used the [\*5] Doppler sounds from the radar unit to ascertain the speed of the vehicle. Jiminez said that he then activated the "moving mode" of his radar unit to get a radar reading on the vehicle. Jiminez explained that the moving mode is used when the patrol car is moving rather than in a stationary position. Jiminez recalled that the radar unit indicated that the vehicle was traveling 78 m.p.h. Jiminez testified that he then turned his patrol car around and stopped the vehicle and that the driver identified himself as Huff. Jiminez further testified that the radar unit has a margin of error in the moving mode of plus or minus 2 m.p.h. He further testified that the radar unit automatically rounds the number it records down to the nearest whole number and that that is the number it displays.

Jiminez testified that since January 1997, he has patrolled the area where Huff was stopped. He testified that there are posted speed limit signs in the area and that the posted speed limit is 65 m.p.h.

At the end of the State's case, Huff moved for a directed verdict, and the trial court took the motion under advisement. At the conclusion of the evidence, Huff renewed his motion for directed verdict, and [\*6] the trial court again took the motion under advisement.

In an order dated December 3, 2002, the trial court overruled Huff's motion for directed verdict and found Huff guilty of speeding 78 m.p.h. in a 65-m.p.h. zone. Huff was ordered to pay a fine of \$ 75, plus court costs. Huff appealed to the district court, which affirmed the trial court's order.

#### ASSIGNMENTS OF ERROR

Huff assigns five errors, which we consolidate into three. Huff assigns that the trial court erred in (1) finding that the State presented sufficient evidence to support the conviction, (2) overruling his motion for directed verdict, and (3) overruling his motion for *Brady* material.

#### STANDARD OF REVIEW

[HN1] A prosecution for a traffic infraction is a criminal proceeding. See, *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Knoles*, 199 Neb. 211, 256 N.W.2d 873 (1977).

[HN2] In reviewing a criminal conviction, an appellate court does not resolve conflicts in the evidence, pass on the credibility of witnesses, or reweigh the evidence. Such matters are for the finder of fact, and a conviction will be affirmed, in the absence of prejudicial error, if the properly admitted evidence, [\*7] viewed and construed most favorably to the State, is sufficient to support the conviction. *State v. Jackson*, 264 Neb. 420, 648 N.W.2d 282 (2002); *State v. Long*, 264 Neb. 85, 645 N.W.2d 553 (2002). [HN3] In a bench trial of a criminal case, the trial court's findings have the effect of a jury verdict and will not be set aside unless clearly erroneous. *State v. Blackman*, 254 Neb. 941, 580 N.W.2d 546 (1998); *State v. Hansen*, 252 Neb. 489, 562 N.W.2d 840 (1997).

[HN4] When reviewing a criminal conviction for sufficiency of the evidence to sustain the conviction, the relevant question for an appellate court is whether, after viewing the evidence in the light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt. *State v. Jackson*, *supra*; *State v. Canaday*, 263 Neb. 566, 641 N.W.2d 13 (2002).

#### ANALYSIS

Huff first assigns that the trial court erred in finding that the State presented sufficient evidence to support the conviction. Huff makes several arguments in support of this assignment of error. Huff first argues [\*8] that the citation issued by Jiminez did not meet the requirements of *Neb. Rev. Stat. § 60-6,194* (Reissue 1998). *Section 60-6,194* provides in part:

[HN5] (1) In every charge of violation of any speed regulation in the Nebraska Rules of the Road, the complaint and the summons or notice to appear shall specify the speed at which defendant is alleged to have driven and the maximum speed for the type of vehicle involved applicable within the district or at the location. The speed at which defendant is alleged to have driven and the maximum speed are essential elements of the offense and shall be proved by competent evidence.

Huff alleges that the citation fails to identify the model of his vehicle with any particularity, which model he claims would have bearing on the maximum speed allowed, and that the citation fails to identify the maximum speed allowed. We determine that this argument is without merit. The citation identifies the make, style, model, year, and color of Huff's vehicle and states that Huff was being cited for unlawfully committing the offense of speeding 78 m.p.h. in a 65-m.p.h. zone. We conclude that this information was sufficient [\*9] to show that the maximum speed allowed for the vehicle Huff was driving and at the location where he was driving was 65 m.p.h.

Huff next argues that the State failed to prove the maximum speed allowed at the location where Huff was stopped for speeding, which fact is an essential element of the offense of speeding. Jiminez testified that since January 1997, he has patrolled the area where Huff was stopped. He testified that there are posted speed limit signs in the area and that the posted speed limit is 65 m.p.h. We conclude that Jiminez' testimony was sufficient evidence to show the maximum speed allowed as required by *§ 60-6,194*.

Huff also argues that the State failed to present evidence to show what type of road Highway 71 is under *Neb. Rev. Stat. § 60-6,186* (Reissue 1998), which evidence he alleges was necessary to support the maximum speed element. *Section 60-6,186* sets forth the maximum speed limits for different types or categories of roads. For example, *§ 60-6,186(1)(f)* states that the maximum speed limit is 65 m.p.h. upon an expressway that is part of the state highway system.

Pursuant to *§ 60-6,194*, the State had to prove the maximum speed [\*10] allowed at the location where Huff was stopped. As we previously concluded, the State proved the maximum speed allowed through Jiminez' testimony. Thus, it was not necessary for the State to present evidence as to what type of road Highway 71 is under *§ 60-6,186*.

Huff next argues that due to the margin of error in the radar reading, the State failed to prove the exact speed at which Huff was driving. Huff contends that because Jiminez testified that there is a 2-m.p.h. margin of error when the radar unit is in its moving mode and because the radar reading showed that Huff was driving 78 m.p.h., he could have been driving anywhere between 76 and 80 m.p.h. [HN6] The precise amount by which a speed was exceeded is not an essential element of the offense of speeding; it is necessary only that the evidence show the limit was exceeded. *State v. Chambers*, 241 Neb. 66, 486 N.W.2d 481 (1992). See *Melanson v. State*, 188 Neb. 446, 197 N.W.2d 401 (1972).

In addition, *§ 60-6,194* states that [HN7] the speed at which a defendant is alleged to have driven is an essential element of the offense. The statute does not require that the defendant's "exact" speed be proved. [HN8] In [\*11] the absence of anything indicating to the contrary, statutory language is to be given its plain and ordinary meaning, and when the words of a statute are plain, direct, and unambiguous, no interpretation is necessary or will be indulged to ascertain their meaning. *State v. Burlison*, 255 Neb. 190, 583 N.W.2d 31 (1998); *State v. Atkins*, 250 Neb. 315, 549 N.W.2d 159 (1996). It [HN9] is not within the province of the courts to read a meaning into a statute that is not there, nor to read anything direct and plain out of a statute. *Id.*

Huff was charged with driving 78 m.p.h. in a 65-m.p.h. zone. Under *Neb. Rev. Stat. § 60-682.01* (Reissue 1998), a person convicted for traveling 11 to 15 m.p.h. over the speed limit is fined \$ 75. Thus, a conviction for driving 78 m.p.h.

in a 65-m.p.h. zone results in a \$ 75 fine. The minimum speed Huff could have possibly been driving was 76 m.p.h., which would result in the same \$ 75 fine as a conviction for driving 78 m.p.h. See § 60-682.01(1)(c). Similarly, the maximum speed Huff could have been driving was 80 m.p.h., which would also result in a \$ 75 fine. We also note that a conviction for [\*12] driving any speed between 76 and 80 m.p.h. in a 65-m.p.h. zone results in the same loss of points against a defendant's driving record. See *Neb. Rev. Stat. § 60-4,182(10)(c)* (Supp. 2001). We conclude that despite the margin of error, the State presented sufficient evidence to show the speed at which Huff's vehicle was traveling.

Huff next argues that the State failed to prove that he knew or should have known what the speed limit was at the location where he was cited for speeding. Huff contends that pursuant to § 60-6,186 and *Neb. Rev. Stat. § 60-6,190* (Reissue 1998), a driver is entitled to reasonable notice of the speed limit via signs erected by the Nebraska Department of Roads, and that there is no evidence Huff had such notice. [HN10] A conviction for speeding, pursuant to § 60-6,194, does not require the State to prove that the defendant had specific notice of the speed limit. This argument is without merit.

Huff also argues that the radar reading was inadmissible because it lacked sufficient foundation and that his objection to such evidence should have been sustained. [HN11] Pursuant to *Neb. Rev. Stat. § 60-6,192(1)* [\*13] (Reissue 1998), a radar readout may be accepted as competent evidence of the speed of a motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue. However, before evidence of a vehicular speed determined by use of radar equipment is admissible, the State, as required by § 60-6,192(1)(d), must establish the equipment's accuracy when the determination of speed was made. See, *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Kudlacek*, 229 Neb. 297, 426 N.W.2d 289 (1988). Section 60-6,192 specifies the requirements for admissibility of evidence from a radar device:

[HN12] (1) . . . Before the state may offer in evidence the results of such radio microwave, mechanical, or electronic speed measurement device for the purpose of establishing the speed of any motor vehicle, the state shall prove the following:

- (a) The radio microwave, mechanical, or electronic speed measurement device was in proper working order at the time of conducting the measurement;
- (b) The radio microwave, mechanical, or electronic speed measurement device was being operated in such a manner and under such conditions so as to allow [\*14] a minimum possibility of distortion or outside interference;
- (c) The person operating the radio microwave, mechanical, or electronic speed measurement device and interpreting such measurement was qualified by training and experience to properly test and operate the radio microwave, mechanical, or electronic speed measurement device; and
- (d) The operator conducted external tests of accuracy upon the radio microwave, mechanical, or electronic speed measurement device, within a reasonable time both prior to and subsequent to an arrest being made, and the device was found to be in proper working order.

[HN13] Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required. *State v. Lomack, supra*; *State v. Kudlacek, supra*.

Huff relies on *State v. Lomack, supra*, which held that the evidence presented concerning the radar unit lacked the required indicia of accuracy. The Nebraska Supreme Court determined that the evidence failed to establish that the tuning fork used to test the radar unit was particularly designed and intended for testing the radar [\*15] unit in question and that the evidence thereby failed to show that the tuning fork was in any way associated with the radar unit tested. Further, there was no evidence that the tuning fork itself was in any way properly tested, calibrated, or certified as a

reliable gauge of a radar unit's accuracy. Huff argues that the present case is similar to *State v. Lomack, supra*, because Jiminez' testimony failed to establish that the tuning forks he used were designed and intended for testing the radar unit in his car. Huff further contends that there was no evidence that the tuning forks were properly tested, calibrated, or certified as a reliable gauge of the radar unit's accuracy.

Jiminez testified that the tuning forks he uses are part of the radar unit in his patrol car and that those particular tuning forks and his radar unit are always used together. Jiminez also testified that a certificate of calibration and accuracy was issued by a State Patrol technician for the radar unit in his patrol car and for the tuning forks used to check the calibration of the unit. Thus, the tuning forks had been tested and certified. The fact that the certificate was issued for the radar [\*16] unit and the tuning forks together demonstrates that the tuning forks are intended for that particular unit. This case is not similar to *State v. Lomack, supra*. Rather, Jiminez' testimony showed that all of the necessary foundational requirements of § 60-6,192 had been met. He testified that at the beginning of his shift, he activates a self-test on the radar unit, and that the unit indicates whether it has passed or failed the test. Jiminez further testified that the unit also runs an automatic self-test every 10 minutes. Finally, Jiminez testified that he performs a tuning fork test at the beginning and end of every shift, which test checks the calibration of the radar unit. Jiminez testified that on June 5, 2002, he performed the tuning fork test both prior to and subsequent to issuing Huff the citation, and that the unit was working properly. Accordingly, Huff's argument that there was insufficient foundation for evidence of the radar readout is without merit. We conclude that all of Huff's arguments in support of his first assignment of error alleging that the State presented insufficient evidence are without merit.

Huff also assigns that the trial court erred [\*17] in overruling his motion for directed verdict. [HN14] When a motion for directed verdict made at the close of all the evidence is overruled by the trial court, appellate review is controlled by the rule that a directed verdict is proper only where reasonable minds cannot differ and can draw but one conclusion from the evidence, and the issues should be decided as a matter of law. *McClure v. Forsman*, 266 Neb. 90, 662 N.W.2d 566 (2003); *Moyer v. Nebraska City Airport Auth.*, 265 Neb. 201, 655 N.W.2d 855 (2003).

[HN15] In a criminal case, a court can direct a verdict only when there is a complete failure of evidence to establish an essential element of the crime charged or the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained. *State v. Segura*, 265 Neb. 903, 660 N.W.2d 512 (2003); *State v. Canady*, 263 Neb. 552, 641 N.W.2d 43 (2002). If there is any evidence which will sustain a finding for the party against whom a motion for directed verdict is made, the case may not be decided as a matter of law, and a verdict may not be directed. *Id.*

We have concluded [\*18] that there was sufficient evidence for the trial court to find beyond a reasonable doubt that Huff was guilty of speeding. Having so concluded, we cannot say that there is a complete failure of evidence to establish an essential element of the crime charged or that the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained. As such, Huff's assignment of error regarding his motion for directed verdict is without merit.

Finally, Huff assigns that the trial court erred in overruling his motion for *Brady* material. In Huff's motion, he requested, among other things, that the court order the State to produce any information it had which was related to the margin of error of the radar unit. In Huff's brief, he contends that the margin of error is exculpatory evidence that the State should have disclosed prior to trial. However, Huff's motion does not mention "exculpatory evidence" and the motion appears to be a motion for discovery. We first note that because this case involves a traffic violation, Huff does not have a statutory right to discovery. *Neb. Rev. Stat. § 29-1912(1)* (Reissue [\*19] 1995) provides for pretrial discovery in criminal cases [HN16] "when a defendant is charged with a felony or when a defendant is charged with a misdemeanor or a violation of a city or village ordinance for which imprisonment is a possible penalty . . . ." The traffic violation with which Huff was charged does not fit within the parameters of § 29-1912.

However, the U.S. Constitution requires the State to disclose exculpatory material to an accused. *Brady v. Maryland*, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963), recognized that [HN17] the suppression by the State of

evidence favorable to and requested by an accused violates due process where the evidence is material to the guilt of the defendant. *State v. Phelps*, 241 Neb. 707, 490 N.W.2d 676 (1992); *State v. Meis*, 217 Neb. 770, 351 N.W.2d 79 (1984).

"The heart of the holding in *Brady* is the prosecution's suppression of evidence, in the face of a defense production request, where the evidence is favorable to the accused and is material either to guilt or to punishment. Important, then, are (a) suppression by the prosecution after a request by the defense, (b) the evidence's [\*20] favorable character for the defense, and (c) the materiality of the evidence."

*State v. Phelps*, 241 Neb. at 730-31, 490 N.W.2d at 692, quoting *Moore v. Illinois*, 408 U.S. 786, 92 S. Ct. 2562, 33 L. Ed. 2d 706 (1972).

The radar unit's margin of error was not exculpatory evidence, because it was neither favorable to Huff nor material to his guilt or to his punishment. As stated previously, the radar unit showed that Huff was driving 78 m.p.h. Given the margin of error of plus or minus 2 m.p.h., the minimum speed at which Huff could have possibly been driving was 76 m.p.h. Assuming this to have been Huff's speed, Huff would still be guilty of speeding and would be subject to the same \$ 75 fine as if he had been driving 78 m.p.h. as alleged in the citation. The maximum speed at which Huff could have been driving, based on the margin of error, is 80 m.p.h., and a finding of guilt at this speed would also subject Huff to the same \$ 75 fine. Clearly, the evidence regarding the radar unit's margin of error was not exculpatory. Huff's assignment of error is without merit.

#### CONCLUSION

Based on the preceding analysis, we conclude that the State presented [\*21] sufficient evidence to support a finding of guilt on the charge of speeding. We further conclude that the trial court did not err in overruling Huff's motion for *Brady* material. Accordingly, we affirm the order of the district court affirming the trial court's order finding Huff guilty of speeding.

Affirmed.

**State of Nebraska, appellee, v. Clark G. Nichols, appellant.****No. A-03-787.****NEBRASKA COURT OF APPEALS****2004 Neb. App. LEXIS 95****April 20, 2004, Filed****NOTICE:** [\*1] NOT DESIGNATED FOR PERMANENT PUBLICATION**PRIOR HISTORY:** Appeal from the District Court for Banner County, Kristine R. Cecava, Judge, on appeal thereto from the County Court for Banner County, James T. Hansen, Judge.**DISPOSITION:** Judgment of district court affirmed.**CASE SUMMARY:****PROCEDURAL POSTURE:** After denying defendant's motion for a directed verdict, the trial court found defendant guilty of speeding 75 m.p.h. in a 65 m.p.h. zone. Defendant was ordered to pay a fine of \$ 25, plus court costs. Defendant appealed to the District Court for Banner County (Nebraska), which affirmed the trial court's order. Defendant appealed.**OVERVIEW:** Defendant argued that his citation did not meet the requirements of *Neb. Rev. Stat. § 60-6,194* (Reissue 1998). Defendant alleged that the citation failed to identify the model of his vehicle with any particularity, which model he claimed would have had a bearing on the maximum speed allowed, and that it failed to identify the maximum speed allowed. The appellate court determined that argument was without merit. The citation identified the make, style, model, year, and color of defendant's vehicle and stated that defendant was being cited for unlawfully committing the offense of speeding 75 m.p.h. in a 65-m.p.h. zone. That information was sufficient to show that the maximum speed allowed for the vehicle defendant was driving and at the location where he was driving was 65 m.p.h. Defendant also claimed that the trial court erred in overruling his motion for Brady material. He requested that the court order the State to produce any information it had relating to the margin of error of the radar unit. The appellate court held that the radar unit's margin of error was not exculpatory evidence, as it was neither favorable to defendant nor material to his guilt or punishment.**OUTCOME:** The judgment of the trial court was affirmed.**CORE TERMS:** radar, speed, driving, speeding, maximum speed, tuning, fork, margin of error, directed verdict, accuracy, zone, speed limit, measurement, calibration, fine, guilt, self-test, traveling, tuning fork, electronic,

mechanical, microwave, radio, essential element, working order, certificate, overruling, tested, assigns, assignment of error

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*

[HN6] *Neb. Rev. Stat. § 60-6,186* (Reissue 1998), sets forth the maximum speed limits for different types or categories of road.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*  
*Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution*

[HN7] Pursuant to *Neb. Rev. Stat. § 60-6,194* (Reissue 1998), the state has to prove the maximum speed allowed at the location where a defendant is stopped.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements*  
*Evidence > Procedural Considerations > Weight & Sufficiency*

[HN8] The precise amount by which a speed was exceeded is not an essential element of the offense of speeding; it is necessary only that the evidence show that the limit was exceeded.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Weight & Sufficiency***

[HN9] *Neb. Rev. Stat. § 60-6,194* (Reissue 1998), states that the speed at which a defendant is alleged to have driven is an essential element of the offense. The statute does not require that the defendant's "exact" speed be proved.

***Governments > Legislation > Interpretation***

[HN10] In the absence of anything indicating to the contrary, statutory language is to be given its plain and ordinary meaning, and when the words of a statute are plain, direct, and unambiguous, no interpretation is necessary or will be indulged to ascertain their meaning.

***Governments > Legislation > Interpretation***

[HN11] It is not within the province of the courts to read a meaning into a statute that is not there, nor to read anything direct and plain out of a statute.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Criminal Law & Procedure > Sentencing > Fines***

[HN12] A conviction for driving 75 m.p.h. in a 65-m.p.h. zone results in a \$ 25 fine, whereas a conviction for driving 76 m.p.h. in a 65-m.p.h. zone results in a \$ 75 fine. *Neb. Rev. Stat. § 60-682.01* (Reissue 1998). Similarly, a conviction for driving 77 or 78 m.p.h. in a 65-m.p.h. zone results in a \$ 75 fine.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN13] A conviction for driving 74 or 75 m.p.h. in a 65-m.p.h. zone results in the loss of 1 or 2 points against a defendant's driving record, whereas a conviction for driving 76 to 78 m.p.h. therein results in the loss of 2 points against a defendant's driving record. *Neb. Rev. Stat. § 60-4,182(10)(b) and (c)* (Supp. 2001).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN14] A conviction for speeding, pursuant to *Neb. Rev. Stat. § 60-6,194* (Reissue 1998), does not require the state to prove that a defendant had specific notice of the speed limit.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Objections & Offers of Proof > Objections***

[HN15] Pursuant to *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998), a radar readout may be accepted as competent evidence of the speed of a motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue. However, before evidence of a vehicular speed determined by use of radar equipment is admissible, the state, as required by § 60-6,192(1)(d), must establish the equipment's accuracy when the determination of speed was made.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN16] *Neb. Rev. Stat. § 60-6,192* (Reissue 1998), specifies the requirements for admissibility of evidence from a radar device.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***  
[HN17] See *Neb. Rev. Stat. § 60-6,192* (Reissue 1998).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor  
Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***  
[HN18] Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required for admissibility of evidence from a radar device.

***Civil Procedure > Trials > Judgment as Matter of Law > Directed Verdicts  
Criminal Law & Procedure > Trials > Motions for Acquittal  
Criminal Law & Procedure > Appeals > Standards of Review > General Overview***  
[HN19] When a motion for directed verdict made at the close of all the evidence is overruled by the trial court, appellate review is controlled by the rule that a directed verdict is proper only where reasonable minds cannot differ and can draw but one conclusion from the evidence, and the issues should be decided as a matter of law.

***Criminal Law & Procedure > Trials > Motions for Acquittal***  
[HN20] In a criminal case, a court can direct a verdict only when there is a complete failure of evidence to establish an essential element of the crime charged or the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained.

***Civil Procedure > Trials > Judgment as Matter of Law > General Overview  
Criminal Law & Procedure > Trials > Motions for Acquittal***  
[HN21] If there is any evidence which will sustain a finding for the party against whom a motion for directed verdict is made, the case may not be decided as a matter of law, and a verdict may not be directed.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Criminal Law & Procedure > Discovery & Inspection > Brady Materials  
Governments > Legislation > Statutory Remedies & Rights***  
[HN22] In cases involving traffic violations, a defendant does not have a statutory right to discovery. *Neb. Rev. Stat. § 29-1912(1)* (Reissue 1995) provides for pretrial discovery in criminal cases when a defendant is charged with a felony or when a defendant is charged with a misdemeanor or a violation of a city or village ordinance for which imprisonment is a possible penalty.

***Criminal Law & Procedure > Discovery & Inspection > Brady Materials***  
[HN23] The U.S. Constitution requires the state to disclose exculpatory material to an accused.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection  
Criminal Law & Procedure > Discovery & Inspection > Brady Materials  
Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***  
[HN24] The suppression by the state of evidence favorable to and requested by an accused violates due process where the evidence is material to the guilt of the defendant.

***Criminal Law & Procedure > Discovery & Inspection > Brady Materials***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN25] The heart of the holding in *Brady* is the prosecution's suppression of evidence, in the face of a defense production request, where the evidence is favorable to the accused and is material either to guilt or to punishment. Important, then, are: (1) suppression by the prosecution after a request by the defense; (2) the evidence's favorable character for the defense; and (3) the materiality of the evidence.

**COUNSEL:** Sterling T. Huff, of Island, Huff & Nichols, P.C., L.L.O., for appellant.

Jon Bruning, Attorney General, and James D. Smith for appellee.

**JUDGES:** Carlson, Moore, and Cassel, Judges.

**OPINION BY:** Carlson

**OPINION:**

Carlson, Judge. INTRODUCTION

Clark G. Nichols appeals from an order of the district court for Banner County affirming his conviction and fine for speeding imposed in the county court for Banner County. We affirm.

## BACKGROUND

On June 1, 2002, Nichols was traveling southbound on Highway 71 in Banner County and was stopped by Nebraska State Patrol Trooper Jeff Wallace. Wallace issued Nichols a citation for speeding, specifically for driving 75 m.p.h. in a 65-m.p.h. zone. Nichols pled not guilty. On July 10, Nichols filed a motion for *Brady* material, which motion was subsequently overruled. See *Brady v. Maryland*, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963). A bench trial was held on September 19.

At trial, Wallace [\*2] was the only witness to testify. He was first called by the State, and after the State rested, he was recalled by Nichols. Wallace testified that he has been a trooper with the State Patrol since December 1995. Wallace testified that he has training in radar detection and has operated radar equipment for approximately the past 7 years in the course of his job. He testified that he is specifically tested and trained in the use of the Stalker radar unit. Wallace stated that he was certified in the proper use of radar equipment and that his certification was in effect on the date he stopped Nichols. Wallace testified that he was also trained to determine vehicle speeds by visual observation and trained to ascertain the speed of approaching vehicles based on Doppler sounds that emanate from the radar unit.

Wallace testified that the patrol car he drives has a Stalker radar unit. Wallace stated that on the day Nichols was cited for speeding, the radar unit in Wallace's car and the two tuning forks used to check the calibration of the radar unit had a certificate of calibration and accuracy showing their proper working order. Wallace testified that a technician within the State Patrol tests [\*3] the radar unit and the tuning forks to make sure they are working properly. A certificate of calibration and accuracy, Wallace testified, is then issued for that particular unit and for the two tuning forks to show that it is all in proper working order. Wallace testified that such certificate is necessary for the radar unit to be put into service.

Wallace testified that there are daily tests performed on the radar unit in his patrol car to determine whether it is in proper working order. He testified that when he turns on the radar unit at the beginning of his shift, the unit performs a "power-on test" in which it automatically checks all its indicator light segments to make sure they are working properly. Wallace testified that he next depresses a button on the unit which causes it to perform a "self-test" in which the unit goes through a series of tests. When the unit is done with the self-test, Wallace stated, it makes a distinctive tone to indicate that it passed the self-test. Wallace testified that he can also activate the self-test at any time during his shift.

Wallace testified that the unit also runs an automatic self-test every 10 minutes and, again, makes a distinctive [\*4] tone to indicate that it is working properly. Wallace testified that he also performs a "tuning fork test" using the two tuning forks that are included with his radar unit, which test checks the calibration of the radar unit. He testified that the radar unit would be immediately taken out of service if it did not produce readings in accordance with the tuning forks. Wallace testified that he calibrates his radar unit with the tuning forks at the beginning and end of every shift, including on the day he issued Nichols the citation for speeding. Wallace testified that based on the results of the tests of accuracy that he performed on the radar unit before and after he issued the citation to Nichols, the radar unit was working properly. Wallace further testified that based on his background, training, and experience, at the time he activated the radar unit to determine Nichols' speed, the radar unit was being operated in such manner and under such conditions as to allow the minimum possibility of distortion and interference.

Wallace testified that on June 1, 2002, at approximately 7:37 a.m., he was on duty and was traveling northbound on Highway 71 near mile marker 48 in Banner County. [\*5] He testified that at this time, he observed a maroon Oldsmobile 98 traveling southbound which appeared to be traveling over the speed limit. Wallace also testified that the Doppler sounds coming from the radar unit indicated that the vehicle was speeding. Wallace said that he then activated the "moving mode" of his radar unit to get a radar reading on the vehicle. Wallace explained that the moving mode is used when the patrol car is moving rather than parked. Wallace recalled that the radar unit indicated that the vehicle was traveling 76 m.p.h. Wallace said that he then stopped the vehicle and that the driver identified himself as Nichols. Wallace explained that although the radar had shown a reading of 76 m.p.h., he gave Nichols "a break" by writing the citation he issued for 75 m.p.h. Wallace further testified that the radar unit has a margin of error in the moving mode of plus or minus 2 m.p.h. He further testified that the radar unit automatically rounds the number it records down to the next whole number and that that is the number it displays.

Wallace further testified that he has patrolled the area in which Nichols was stopped for approximately 6 to 7 years and that he is [\*6] acquainted with the speed limit for that area. He testified that the posted speed limit in the area where he recorded the speed of Nichols' vehicle is 65 m.p.h.

At the end of the State's case, Nichols moved for a directed verdict but asked the court to refrain from ruling on the motion until after Nichols presented his evidence. The trial court granted such request and took the motion under advisement. At the conclusion of the evidence, Nichols renewed his motion for a directed verdict, and the trial court took the motion under advisement.

In an order dated December 3, 2002, the trial court overruled Nichols' motion for a directed verdict and found Nichols guilty of speeding 75 m.p.h. in a 65-m.p.h. zone. Nichols was ordered to pay a fine of \$ 25, plus court costs. Nichols appealed to the district court, which affirmed the trial court's order.

#### ASSIGNMENTS OF ERROR

Nichols assigns five errors, which we consolidate into three. Nichols assigns that the trial court erred in (1) finding that the State presented sufficient evidence to support the conviction, (2) overruling his motion for a directed verdict, and (3) overruling his motion for *Brady* material.

#### STANDARD OF REVIEW

[HN1] A [\*7] prosecution for a traffic infraction is a criminal proceeding. See, *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Knoles*, 199 Neb. 211, 256 N.W.2d 873 (1977).

[HN2] In reviewing a criminal conviction, an appellate court does not resolve conflicts in the evidence, pass on the credibility of witnesses, or reweigh the evidence; such matters are for the finder of fact, and a conviction will be affirmed, in the absence of prejudicial error, if the evidence admitted at trial, viewed and construed most favorably to the State, is sufficient to support the conviction. *State v. Jackson*, 264 Neb. 420, 648 N.W.2d 282 (2002); *State v. Long*, 264 Neb. 85, 645 N.W.2d 553 (2002). [HN3] In a bench trial of a criminal case, the trial court's findings have the effect

of a jury verdict and will not be set aside unless clearly erroneous. *State v. Blackman*, 254 Neb. 941, 580 N.W.2d 546 (1998); *State v. Hansen*, 252 Neb. 489, 562 N.W.2d 840 (1997).

[HN4] When reviewing a criminal conviction for sufficiency of the evidence to sustain the conviction, the relevant question for an appellate court is whether, [\*8] after viewing the evidence in the light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt. *State v. Jackson*, *supra*; *State v. Canaday*, 263 Neb. 566, 641 N.W.2d 13 (2002).

#### ANALYSIS

Nichols first assigns that the trial court erred in finding that the State presented sufficient evidence to support the conviction. Nichols makes several arguments in support of this assignment of error. Nichols first argues that the citation he was issued by Wallace did not meet the requirements of *Neb. Rev. Stat. § 60-6,194* (Reissue 1998). *Section 60-6,194* provides in part:

(1) [HN5] In every charge of violation of any speed regulation in the Nebraska Rules of the Road, the complaint and the summons or notice to appear shall specify the speed at which defendant is alleged to have driven and the maximum speed for the type of vehicle involved applicable within the district or at the location. The speed at which defendant is alleged to have driven and the maximum speed are essential elements of the offense and shall be proved by competent evidence.

[\*9]

Nichols alleges that the citation fails to identify the model of his vehicle with any particularity, which model he claims would have bearing on the maximum speed allowed, and that the citation fails to identify the maximum speed allowed. We determine that this argument is without merit. The citation identifies the make, style, model, year, and color of Nichols' vehicle and states that Nichols was being cited for unlawfully committing the offense of speeding 75 m.p.h. in a 65-m.p.h. zone. We conclude that this information was sufficient to show that the maximum speed allowed for the vehicle Nichols was driving and at the location where he was driving was 65 m.p.h.

Nichols next argues that the State failed to prove the maximum speed allowed at the location where he was stopped for speeding, which fact is an essential element of the offense of speeding. As noted above, Wallace testified that he has patrolled the area where Nichols was stopped for 6 to 7 years and that he is acquainted with the posted speed limit in that area. He testified that the posted speed limit is 65 m.p.h. We conclude that Wallace's testimony was sufficient evidence to show maximum speed as required by *§ 60-6,194*. [\*10]

Nichols also argues that the State failed to present evidence to show what type of road Highway 71 is under *Neb. Rev. Stat. § 60-6,186* (Reissue 1998), which evidence he alleges was necessary to support the maximum speed element. *Section 60-6,186* [HN6] sets forth the maximum speed limits for different types or categories of road. For example, *§ 60-6,186(1)(f)* states that the maximum speed limit is 65 m.p.h. upon an expressway that is part of the state highway system.

[HN7] Pursuant to *§ 60-6,194*, the State had to prove the maximum speed allowed at the location where Nichols was stopped. As we previously concluded, the State proved the maximum speed through Wallace's testimony. Thus, it was not necessary for the State to present evidence as to what type of road Highway 71 is under *§ 60-6,186*.

Nichols next argues that due to the margin of error in the radar reading, the State failed to prove the exact speed at which Nichols was driving. Nichols contends that because Wallace testified that there is a 2-m.p.h. margin of error when the radar unit is in its moving mode and the radar reading showed that he was driving 76 m.p.h., he could have been driving anywhere between [\*11] 74 and 78 m.p.h. [HN8] The precise amount by which a speed was exceeded is not an essential element of the offense of speeding; it is necessary only that the evidence show that the limit was exceeded. *State v. Chambers*, 241 Neb. 66, 486 N.W.2d 481 (1992); *Melanson v. State*, 188 Neb. 446, 197 N.W.2d 401

(1972).

In addition, § 60-6,194 [HN9] states that the speed at which a defendant is alleged to have driven is an essential element of the offense. The statute does not require that the defendant's "exact" speed be proved. [HN10] In the absence of anything indicating to the contrary, statutory language is to be given its plain and ordinary meaning, and when the words of a statute are plain, direct, and unambiguous, no interpretation is necessary or will be indulged to ascertain their meaning. *State v. Burlison*, 255 Neb. 190, 583 N.W.2d 31 (1998); *State v. Atkins*, 250 Neb. 315, 549 N.W.2d 159 (1996). [HN11] It is not within the province of the courts to read a meaning into a statute that is not there, nor to read anything direct and plain out of a statute. *State v. Burlison*, *supra*; *State v. Atkins*, *supra*.

Nichols [\*12] was charged with driving 75 m.p.h. in a 65-m.p.h. zone. Nichols was already given "a break" when Wallace issued the citation for driving 75 m.p.h., rather than 76 m.p.h. in accordance with the radar reading. [HN12] A conviction for driving 75 m.p.h. in a 65-m.p.h. zone results in a \$ 25 fine, whereas a conviction for driving 76 m.p.h. in a 65-m.p.h. zone results in a \$ 75 fine. See *Neb. Rev. Stat. § 60-682.01* (Reissue 1998). Similarly, a conviction for driving 77 or 78 m.p.h. in a 65-m.p.h. zone results in a \$ 75 fine. The minimum speed at which Nichols could have been driving was 74 m.p.h., which would result in the same fine as 75 m.p.h. See § 60-682.01. We also note that [HN13] a conviction for driving 74 or 75 m.p.h. in a 65-m.p.h. zone results in the loss of 1 or 2 points against a defendant's driving record, whereas a conviction for driving 76 to 78 m.p.h. therein results in the loss of 2 points against a defendant's driving record. See *Neb. Rev. Stat. § 60-4,182(10)(b) and (c)* (Supp. 2001). We conclude that despite the margin of error, the State presented sufficient evidence to show the speed at which Nichols' vehicle was traveling. [\*13]

Nichols next argues that the State failed to prove that he knew or should have known what the speed limit was at the location where he was cited for speeding. Nichols contends that under § 60-6,186 and *Neb. Rev. Stat. § 60-6,190* (Reissue 1998), a driver is entitled to reasonable notice of the speed limit via signs erected by the Nebraska Department of Roads and that there is no evidence that Nichols had such notice. [HN14] A conviction for speeding, pursuant to § 60-6,194, does not require the State to prove that the defendant had specific notice of the speed limit. This argument is without merit.

Nichols also argues that the radar reading was inadmissible because it lacked sufficient foundation and that his objection to such evidence should have been sustained. [HN15] Pursuant to *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998), a radar readout may be accepted as competent evidence of the speed of a motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue. However, before evidence of a vehicular speed determined by use of radar equipment is admissible, the State, as required by § 60-6,192(1)(d), must establish [\*14] the equipment's accuracy when the determination of speed was made. See, *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Kudlacek*, 229 Neb. 297, 426 N.W.2d 289 (1988). Section 60-6,192 [HN16] specifies the requirements for admissibility of evidence from a radar device:

- (1) . . . [HN17] Before the state may offer in evidence the results of such radio microwave, mechanical, or electronic speed measurement device for the purpose of establishing the speed of any motor vehicle, the state shall prove the following:
  - (a) The radio microwave, mechanical, or electronic speed measurement device was in proper working order at the time of conducting the measurement;
  - (b) The radio microwave, mechanical, or electronic speed measurement device was being operated in such a manner and under such conditions so [sic] as to allow a minimum possibility of distortion or outside interference;
  - (c) The person operating the radio microwave, mechanical, or electronic speed measurement device and interpreting such measurement was qualified by training and experience to properly test and operate the radio microwave, mechanical, or electronic speed measurement device; [\*15] and
  - (d) The operator conducted external tests of accuracy upon the radio microwave, mechanical, or electronic speed measurement device, within a reasonable time both prior to and subsequent to an arrest being made, and the device was found to be in proper working order.

[HN18] Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required. *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Kudlacek*, 229 Neb. 297, 426 N.W.2d 289 (1988).

Nichols relies on *State v. Lomack*, *supra*, which held that the evidence presented concerning the radar unit lacked the required indicia of accuracy. The Nebraska Supreme Court determined that the evidence failed to establish that the tuning fork used to test the radar unit was particularly designed and intended for testing the radar unit in question and that the evidence thereby failed to show that the tuning fork was in any way associated with the radar unit tested. Next, there was no evidence that the tuning fork itself was in any way properly tested, calibrated, or certified as a reliable gauge of a radar [\*16] unit's accuracy. Nichols argues that the present case is similar to *State v. Lomack*, *supra*, because Wallace's testimony failed to establish that the tuning forks he used were designed and intended for testing the radar unit in Wallace's car. He further contends that there was no evidence that the tuning forks were properly tested, calibrated, or certified as a reliable gauge of the radar unit's accuracy.

Wallace testified that the radar unit in his car came with the two tuning forks he uses to check the calibration of the unit. Wallace also testified that a certificate of calibration and accuracy was issued for the radar unit in his patrol car and the tuning forks used to check the calibration of the unit. Thus, the tuning forks had been tested and certified. The fact that the certificate was issued for the radar unit and the tuning forks together demonstrates that the tuning forks are intended for that particular unit. This case is not similar to *State v. Lomack*, *supra*. Rather, Wallace's testimony showed that all of the necessary foundational requirements of § 60-6,192 had been met. As noted above, he testified that the radar unit performs a "power-on [\*17] test" when it is turned on which checks its indicator light segments. He testified that he next activates a "self-test" in which the unit goes through a series of tests. Wallace further testified that the unit also runs an automatic self-test every 10 minutes. Finally, Wallace testified that he performs a "tuning fork test" which checks the calibration of the radar unit. Wallace testified that on June 1, 2002, he performed the tuning fork test prior to and subsequently to issuing Nichols the citation, and that the unit was working properly. Accordingly, Nichols' argument that there was insufficient foundation for evidence of the radar readout is without merit. We conclude that all of Nichols' arguments in support of his first assignment of error alleging that the State presented insufficient evidence are without merit.

Nichols also assigns that the trial court erred in overruling his motion for directed verdict. [HN19] When a motion for directed verdict made at the close of all the evidence is overruled by the trial court, appellate review is controlled by the rule that a directed verdict is proper only where reasonable minds cannot differ and can draw but one conclusion from the evidence, [\*18] and the issues should be decided as a matter of law. *McClure v. Forsman*, 266 Neb. 90, 662 N.W.2d 566 (2003); *Moyer v. Nebraska City Airport Auth.*, 265 Neb. 201, 655 N.W.2d 855 (2003).

[HN20] In a criminal case, a court can direct a verdict only when there is a complete failure of evidence to establish an essential element of the crime charged or the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained. *State v. Segura*, 265 Neb. 903, 660 N.W.2d 512 (2003); *State v. Canady*, 263 Neb. 552, 641 N.W.2d 43 (2002). [HN21] If there is any evidence which will sustain a finding for the party against whom a motion for directed verdict is made, the case may not be decided as a matter of law, and a verdict may not be directed. *Id.*

We have concluded that there was sufficient evidence for the trial court to find beyond a reasonable doubt that Nichols was guilty of speeding. Having so concluded, we cannot say that there is a complete failure of evidence to establish an essential element of the crime charged or that the evidence is so doubtful in character, lacking [\*19] probative value, that a finding of guilt based on such evidence cannot be sustained. Therefore, Nichols' assignment of error regarding his motion for directed verdict is without merit.

Finally, Nichols assigns that the trial court erred in overruling his motion for *Brady* material. In his motion, Nichols requested, among other things, that the court order the State to produce any information it had related to the margin of

error of the radar unit. In his brief, Nichols contends that the margin of error is exculpatory evidence that the State should have disclosed prior to trial. However, Nichols' motion does not mention "exculpatory evidence" and the motion appears to be a motion for discovery. We first note that because this [HN22] case involves a traffic violation, Nichols does not have a statutory right to discovery. *Neb. Rev. Stat. § 29-1912(1)* (Reissue 1995) provides for pretrial discovery in criminal cases "when a defendant is charged with a felony or when a defendant is charged with a misdemeanor or a violation of a city or village ordinance for which imprisonment is a possible penalty . . . ." The traffic violation with which Nichols was charged does [\*20] not fit within the parameters of § 29-1912.

However, [HN23] the U.S. Constitution requires the State to disclose exculpatory material to an accused. *Brady v. Maryland*, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963), recognized that [HN24] the suppression by the State of evidence favorable to and requested by an accused violates due process where the evidence is material to the guilt of the defendant. *State v. Phelps*, 241 Neb. 707, 490 N.W.2d 676 (1992); *State v. Meis*, 217 Neb. 770, 351 N.W.2d 79 (1984).

[HN25] "The heart of the holding in *Brady* is the prosecution's suppression of evidence, in the face of a defense production request, where the evidence is favorable to the accused and is material either to guilt or to punishment. Important, then, are (a) suppression by the prosecution after a request by the defense, (b) the evidence's favorable character for the defense, and (c) the materiality of the evidence."

*State v. Phelps*, 241 Neb. at 730-31, 490 N.W.2d at 692, quoting *Moore v. Illinois*, 408 U.S. 786, 92 S. Ct. 2562, 33 L. Ed. 2d 706 (1972).

The radar unit's margin of error was not exculpatory [\*21] evidence, as it was neither favorable to Nichols nor material to his guilt or to his punishment. As stated previously, the radar unit showed that Nichols was driving 76 m.p.h. Given the margin of error of plus or minus 2 m.p.h. as testified to by Wallace, the minimum speed at which Nichols could have possibly been driving was 74 m.p.h. Assuming this to have been Nichols' speed, Nichols would still be guilty of speeding and would be subject to the same \$ 25 fine as if he had been driving 75 m.p.h. as alleged in the citation. The maximum speed at which Nichols could have been driving, based on the margin of error, is 78 m.p.h., and a finding of guilt of this speed would subject Nichols to a higher fine of \$ 75. Clearly, the evidence regarding the radar unit's margin of error was not exculpatory. Nichols' assignment of error is without merit.

## CONCLUSION

Based on the preceding analysis, we conclude that the State presented sufficient evidence to support a finding of guilt on the charge of speeding. We further conclude that the trial court did not err in overruling Nichols' motion for *Brady* material. Accordingly, we affirm the order of the district court affirming the trial court's [\*22] order finding Nichols guilty of speeding.

Affirmed.

**State of Nebraska, appellee, v. Clark G. Nichols, appellant.****No. A-03-787.****NEBRASKA COURT OF APPEALS****2004 Neb. App. LEXIS 95****April 20, 2004, Filed****NOTICE:** [\*1] NOT DESIGNATED FOR PERMANENT PUBLICATION**PRIOR HISTORY:** Appeal from the District Court for Banner County, Kristine R. Cecava, Judge, on appeal thereto from the County Court for Banner County, James T. Hansen, Judge.**DISPOSITION:** Judgment of district court affirmed.**CASE SUMMARY:****PROCEDURAL POSTURE:** After denying defendant's motion for a directed verdict, the trial court found defendant guilty of speeding 75 m.p.h. in a 65 m.p.h. zone. Defendant was ordered to pay a fine of \$ 25, plus court costs. Defendant appealed to the District Court for Banner County (Nebraska), which affirmed the trial court's order. Defendant appealed.**OVERVIEW:** Defendant argued that his citation did not meet the requirements of *Neb. Rev. Stat. § 60-6,194* (Reissue 1998). Defendant alleged that the citation failed to identify the model of his vehicle with any particularity, which model he claimed would have had a bearing on the maximum speed allowed, and that it failed to identify the maximum speed allowed. The appellate court determined that argument was without merit. The citation identified the make, style, model, year, and color of defendant's vehicle and stated that defendant was being cited for unlawfully committing the offense of speeding 75 m.p.h. in a 65-m.p.h. zone. That information was sufficient to show that the maximum speed allowed for the vehicle defendant was driving and at the location where he was driving was 65 m.p.h. Defendant also claimed that the trial court erred in overruling his motion for Brady material. He requested that the court order the State to produce any information it had relating to the margin of error of the radar unit. The appellate court held that the radar unit's margin of error was not exculpatory evidence, as it was neither favorable to defendant nor material to his guilt or punishment.**OUTCOME:** The judgment of the trial court was affirmed.**CORE TERMS:** radar, speed, driving, speeding, maximum speed, tuning, fork, margin of error, directed verdict, accuracy, zone, speed limit, measurement, calibration, fine, guilt, self-test, traveling, tuning fork, electronic,

mechanical, microwave, radio, essential element, working order, certificate, overruling, tested, assigns, assignment of error

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Traffic Regulation Violations > General Overview*

[HN1] A prosecution for a traffic infraction is a criminal proceeding.

*Criminal Law & Procedure > Trials > Examination of Witnesses > General Overview*

*Criminal Law & Procedure > Witnesses > Credibility*

*Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence*

[HN2] In reviewing a criminal conviction, an appellate court does not resolve conflicts in the evidence, pass on the credibility of witnesses, or reweigh the evidence; such matters are for the finder of fact, and a conviction will be affirmed, in the absence of prejudicial error, if the evidence admitted at trial, viewed and construed most favorably to the state, is sufficient to support the conviction.

*Criminal Law & Procedure > Trials > Bench Trials*

*Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > General Overview*

[HN3] In a bench trial of a criminal case, the trial court's findings have the effect of a jury verdict and will not be set aside unless clearly erroneous.

*Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence*

*Evidence > Procedural Considerations > Weight & Sufficiency*

[HN4] When reviewing a criminal conviction for sufficiency of the evidence to sustain the conviction, the relevant question for an appellate court is whether, after viewing the evidence in the light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*

[HN5] See *Neb. Rev. Stat. § 60-6,194* (Reissue 1998).

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*

[HN6] *Neb. Rev. Stat. § 60-6,186* (Reissue 1998), sets forth the maximum speed limits for different types or categories of road.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview*

*Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution*

[HN7] Pursuant to *Neb. Rev. Stat. § 60-6,194* (Reissue 1998), the state has to prove the maximum speed allowed at the location where a defendant is stopped.

*Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements*

*Evidence > Procedural Considerations > Weight & Sufficiency*

[HN8] The precise amount by which a speed was exceeded is not an essential element of the offense of speeding; it is necessary only that the evidence show that the limit was exceeded.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Weight & Sufficiency***

[HN9] *Neb. Rev. Stat. § 60-6,194* (Reissue 1998), states that the speed at which a defendant is alleged to have driven is an essential element of the offense. The statute does not require that the defendant's "exact" speed be proved.

***Governments > Legislation > Interpretation***

[HN10] In the absence of anything indicating to the contrary, statutory language is to be given its plain and ordinary meaning, and when the words of a statute are plain, direct, and unambiguous, no interpretation is necessary or will be indulged to ascertain their meaning.

***Governments > Legislation > Interpretation***

[HN11] It is not within the province of the courts to read a meaning into a statute that is not there, nor to read anything direct and plain out of a statute.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Criminal Law & Procedure > Sentencing > Fines***

[HN12] A conviction for driving 75 m.p.h. in a 65-m.p.h. zone results in a \$ 25 fine, whereas a conviction for driving 76 m.p.h. in a 65-m.p.h. zone results in a \$ 75 fine. *Neb. Rev. Stat. § 60-682.01* (Reissue 1998). Similarly, a conviction for driving 77 or 78 m.p.h. in a 65-m.p.h. zone results in a \$ 75 fine.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN13] A conviction for driving 74 or 75 m.p.h. in a 65-m.p.h. zone results in the loss of 1 or 2 points against a defendant's driving record, whereas a conviction for driving 76 to 78 m.p.h. therein results in the loss of 2 points against a defendant's driving record. *Neb. Rev. Stat. § 60-4,182(10)(b) and (c)* (Supp. 2001).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements***

[HN14] A conviction for speeding, pursuant to *Neb. Rev. Stat. § 60-6,194* (Reissue 1998), does not require the state to prove that a defendant had specific notice of the speed limit.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Objections & Offers of Proof > Objections***

[HN15] Pursuant to *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998), a radar readout may be accepted as competent evidence of the speed of a motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue. However, before evidence of a vehicular speed determined by use of radar equipment is admissible, the state, as required by § 60-6,192(1)(d), must establish the equipment's accuracy when the determination of speed was made.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***

[HN16] *Neb. Rev. Stat. § 60-6,192* (Reissue 1998), specifies the requirements for admissibility of evidence from a radar device.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor***  
[HN17] See *Neb. Rev. Stat. § 60-6,192* (Reissue 1998).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Evidence > Procedural Considerations > Exclusion & Preservation by Prosecutor  
Evidence > Procedural Considerations > Preliminary Questions > Admissibility of Evidence > General Overview***  
[HN18] Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required for admissibility of evidence from a radar device.

***Civil Procedure > Trials > Judgment as Matter of Law > Directed Verdicts  
Criminal Law & Procedure > Trials > Motions for Acquittal  
Criminal Law & Procedure > Appeals > Standards of Review > General Overview***  
[HN19] When a motion for directed verdict made at the close of all the evidence is overruled by the trial court, appellate review is controlled by the rule that a directed verdict is proper only where reasonable minds cannot differ and can draw but one conclusion from the evidence, and the issues should be decided as a matter of law.

***Criminal Law & Procedure > Trials > Motions for Acquittal***  
[HN20] In a criminal case, a court can direct a verdict only when there is a complete failure of evidence to establish an essential element of the crime charged or the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained.

***Civil Procedure > Trials > Judgment as Matter of Law > General Overview  
Criminal Law & Procedure > Trials > Motions for Acquittal***  
[HN21] If there is any evidence which will sustain a finding for the party against whom a motion for directed verdict is made, the case may not be decided as a matter of law, and a verdict may not be directed.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview  
Criminal Law & Procedure > Discovery & Inspection > Brady Materials  
Governments > Legislation > Statutory Remedies & Rights***  
[HN22] In cases involving traffic violations, a defendant does not have a statutory right to discovery. *Neb. Rev. Stat. § 29-1912(1)* (Reissue 1995) provides for pretrial discovery in criminal cases when a defendant is charged with a felony or when a defendant is charged with a misdemeanor or a violation of a city or village ordinance for which imprisonment is a possible penalty.

***Criminal Law & Procedure > Discovery & Inspection > Brady Materials***  
[HN23] The U.S. Constitution requires the state to disclose exculpatory material to an accused.

***Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process > Scope of Protection  
Criminal Law & Procedure > Discovery & Inspection > Brady Materials  
Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***  
[HN24] The suppression by the state of evidence favorable to and requested by an accused violates due process where the evidence is material to the guilt of the defendant.

***Criminal Law & Procedure > Discovery & Inspection > Brady Materials***

***Criminal Law & Procedure > Pretrial Motions > Suppression of Evidence***

[HN25] The heart of the holding in *Brady* is the prosecution's suppression of evidence, in the face of a defense production request, where the evidence is favorable to the accused and is material either to guilt or to punishment. Important, then, are: (1) suppression by the prosecution after a request by the defense; (2) the evidence's favorable character for the defense; and (3) the materiality of the evidence.

**COUNSEL:** Sterling T. Huff, of Island, Huff & Nichols, P.C., L.L.O., for appellant.

Jon Bruning, Attorney General, and James D. Smith for appellee.

**JUDGES:** Carlson, Moore, and Cassel, Judges.

**OPINION BY:** Carlson

**OPINION:**

Carlson, Judge. INTRODUCTION

Clark G. Nichols appeals from an order of the district court for Banner County affirming his conviction and fine for speeding imposed in the county court for Banner County. We affirm.

**BACKGROUND**

On June 1, 2002, Nichols was traveling southbound on Highway 71 in Banner County and was stopped by Nebraska State Patrol Trooper Jeff Wallace. Wallace issued Nichols a citation for speeding, specifically for driving 75 m.p.h. in a 65-m.p.h. zone. Nichols pled not guilty. On July 10, Nichols filed a motion for *Brady* material, which motion was subsequently overruled. See *Brady v. Maryland*, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963). A bench trial was held on September 19.

At trial, Wallace [\*2] was the only witness to testify. He was first called by the State, and after the State rested, he was recalled by Nichols. Wallace testified that he has been a trooper with the State Patrol since December 1995. Wallace testified that he has training in radar detection and has operated radar equipment for approximately the past 7 years in the course of his job. He testified that he is specifically tested and trained in the use of the Stalker radar unit. Wallace stated that he was certified in the proper use of radar equipment and that his certification was in effect on the date he stopped Nichols. Wallace testified that he was also trained to determine vehicle speeds by visual observation and trained to ascertain the speed of approaching vehicles based on Doppler sounds that emanate from the radar unit.

Wallace testified that the patrol car he drives has a Stalker radar unit. Wallace stated that on the day Nichols was cited for speeding, the radar unit in Wallace's car and the two tuning forks used to check the calibration of the radar unit had a certificate of calibration and accuracy showing their proper working order. Wallace testified that a technician within the State Patrol tests [\*3] the radar unit and the tuning forks to make sure they are working properly. A certificate of calibration and accuracy, Wallace testified, is then issued for that particular unit and for the two tuning forks to show that it is all in proper working order. Wallace testified that such certificate is necessary for the radar unit to be put into service.

Wallace testified that there are daily tests performed on the radar unit in his patrol car to determine whether it is in proper working order. He testified that when he turns on the radar unit at the beginning of his shift, the unit performs a "power-on test" in which it automatically checks all its indicator light segments to make sure they are working properly. Wallace testified that he next depresses a button on the unit which causes it to perform a "self-test" in which the unit goes through a series of tests. When the unit is done with the self-test, Wallace stated, it makes a distinctive tone to indicate that it passed the self-test. Wallace testified that he can also activate the self-test at any time during his shift.

Wallace testified that the unit also runs an automatic self-test every 10 minutes and, again, makes a distinctive [\*4] tone to indicate that it is working properly. Wallace testified that he also performs a "tuning fork test" using the two tuning forks that are included with his radar unit, which test checks the calibration of the radar unit. He testified that the radar unit would be immediately taken out of service if it did not produce readings in accordance with the tuning forks. Wallace testified that he calibrates his radar unit with the tuning forks at the beginning and end of every shift, including on the day he issued Nichols the citation for speeding. Wallace testified that based on the results of the tests of accuracy that he performed on the radar unit before and after he issued the citation to Nichols, the radar unit was working properly. Wallace further testified that based on his background, training, and experience, at the time he activated the radar unit to determine Nichols' speed, the radar unit was being operated in such manner and under such conditions as to allow the minimum possibility of distortion and interference.

Wallace testified that on June 1, 2002, at approximately 7:37 a.m., he was on duty and was traveling northbound on Highway 71 near mile marker 48 in Banner County. [\*5] He testified that at this time, he observed a maroon Oldsmobile 98 traveling southbound which appeared to be traveling over the speed limit. Wallace also testified that the Doppler sounds coming from the radar unit indicated that the vehicle was speeding. Wallace said that he then activated the "moving mode" of his radar unit to get a radar reading on the vehicle. Wallace explained that the moving mode is used when the patrol car is moving rather than parked. Wallace recalled that the radar unit indicated that the vehicle was traveling 76 m.p.h. Wallace said that he then stopped the vehicle and that the driver identified himself as Nichols. Wallace explained that although the radar had shown a reading of 76 m.p.h., he gave Nichols "a break" by writing the citation he issued for 75 m.p.h. Wallace further testified that the radar unit has a margin of error in the moving mode of plus or minus 2 m.p.h. He further testified that the radar unit automatically rounds the number it records down to the next whole number and that that is the number it displays.

Wallace further testified that he has patrolled the area in which Nichols was stopped for approximately 6 to 7 years and that he is [\*6] acquainted with the speed limit for that area. He testified that the posted speed limit in the area where he recorded the speed of Nichols' vehicle is 65 m.p.h.

At the end of the State's case, Nichols moved for a directed verdict but asked the court to refrain from ruling on the motion until after Nichols presented his evidence. The trial court granted such request and took the motion under advisement. At the conclusion of the evidence, Nichols renewed his motion for a directed verdict, and the trial court took the motion under advisement.

In an order dated December 3, 2002, the trial court overruled Nichols' motion for a directed verdict and found Nichols guilty of speeding 75 m.p.h. in a 65-m.p.h. zone. Nichols was ordered to pay a fine of \$ 25, plus court costs. Nichols appealed to the district court, which affirmed the trial court's order.

#### ASSIGNMENTS OF ERROR

Nichols assigns five errors, which we consolidate into three. Nichols assigns that the trial court erred in (1) finding that the State presented sufficient evidence to support the conviction, (2) overruling his motion for a directed verdict, and (3) overruling his motion for *Brady* material.

#### STANDARD OF REVIEW

[HN1] A [\*7] prosecution for a traffic infraction is a criminal proceeding. See, *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Knoles*, 199 Neb. 211, 256 N.W.2d 873 (1977).

[HN2] In reviewing a criminal conviction, an appellate court does not resolve conflicts in the evidence, pass on the credibility of witnesses, or reweigh the evidence; such matters are for the finder of fact, and a conviction will be affirmed, in the absence of prejudicial error, if the evidence admitted at trial, viewed and construed most favorably to the State, is sufficient to support the conviction. *State v. Jackson*, 264 Neb. 420, 648 N.W.2d 282 (2002); *State v. Long*, 264 Neb. 85, 645 N.W.2d 553 (2002). [HN3] In a bench trial of a criminal case, the trial court's findings have the effect

of a jury verdict and will not be set aside unless clearly erroneous. *State v. Blackman*, 254 Neb. 941, 580 N.W.2d 546 (1998); *State v. Hansen*, 252 Neb. 489, 562 N.W.2d 840 (1997).

[HN4] When reviewing a criminal conviction for sufficiency of the evidence to sustain the conviction, the relevant question for an appellate court is whether, [\*8] after viewing the evidence in the light most favorable to the prosecution, any rational trier of fact could have found the essential elements of the crime beyond a reasonable doubt. *State v. Jackson*, *supra*; *State v. Canaday*, 263 Neb. 566, 641 N.W.2d 13 (2002).

#### ANALYSIS

Nichols first assigns that the trial court erred in finding that the State presented sufficient evidence to support the conviction. Nichols makes several arguments in support of this assignment of error. Nichols first argues that the citation he was issued by Wallace did not meet the requirements of *Neb. Rev. Stat. § 60-6,194* (Reissue 1998). *Section 60-6,194* provides in part:

(1) [HN5] In every charge of violation of any speed regulation in the Nebraska Rules of the Road, the complaint and the summons or notice to appear shall specify the speed at which defendant is alleged to have driven and the maximum speed for the type of vehicle involved applicable within the district or at the location. The speed at which defendant is alleged to have driven and the maximum speed are essential elements of the offense and shall be proved by competent evidence.

[\*9]

Nichols alleges that the citation fails to identify the model of his vehicle with any particularity, which model he claims would have bearing on the maximum speed allowed, and that the citation fails to identify the maximum speed allowed. We determine that this argument is without merit. The citation identifies the make, style, model, year, and color of Nichols' vehicle and states that Nichols was being cited for unlawfully committing the offense of speeding 75 m.p.h. in a 65-m.p.h. zone. We conclude that this information was sufficient to show that the maximum speed allowed for the vehicle Nichols was driving and at the location where he was driving was 65 m.p.h.

Nichols next argues that the State failed to prove the maximum speed allowed at the location where he was stopped for speeding, which fact is an essential element of the offense of speeding. As noted above, Wallace testified that he has patrolled the area where Nichols was stopped for 6 to 7 years and that he is acquainted with the posted speed limit in that area. He testified that the posted speed limit is 65 m.p.h. We conclude that Wallace's testimony was sufficient evidence to show maximum speed as required by *§ 60-6,194*. [\*10]

Nichols also argues that the State failed to present evidence to show what type of road Highway 71 is under *Neb. Rev. Stat. § 60-6,186* (Reissue 1998), which evidence he alleges was necessary to support the maximum speed element. *Section 60-6,186* [HN6] sets forth the maximum speed limits for different types or categories of road. For example, *§ 60-6,186(1)(f)* states that the maximum speed limit is 65 m.p.h. upon an expressway that is part of the state highway system.

[HN7] Pursuant to *§ 60-6,194*, the State had to prove the maximum speed allowed at the location where Nichols was stopped. As we previously concluded, the State proved the maximum speed through Wallace's testimony. Thus, it was not necessary for the State to present evidence as to what type of road Highway 71 is under *§ 60-6,186*.

Nichols next argues that due to the margin of error in the radar reading, the State failed to prove the exact speed at which Nichols was driving. Nichols contends that because Wallace testified that there is a 2-m.p.h. margin of error when the radar unit is in its moving mode and the radar reading showed that he was driving 76 m.p.h., he could have been driving anywhere between [\*11] 74 and 78 m.p.h. [HN8] The precise amount by which a speed was exceeded is not an essential element of the offense of speeding; it is necessary only that the evidence show that the limit was exceeded. *State v. Chambers*, 241 Neb. 66, 486 N.W.2d 481 (1992); *Melanson v. State*, 188 Neb. 446, 197 N.W.2d 401

(1972).

In addition, § 60-6,194 [HN9] states that the speed at which a defendant is alleged to have driven is an essential element of the offense. The statute does not require that the defendant's "exact" speed be proved. [HN10] In the absence of anything indicating to the contrary, statutory language is to be given its plain and ordinary meaning, and when the words of a statute are plain, direct, and unambiguous, no interpretation is necessary or will be indulged to ascertain their meaning. *State v. Burlison*, 255 Neb. 190, 583 N.W.2d 31 (1998); *State v. Atkins*, 250 Neb. 315, 549 N.W.2d 159 (1996). [HN11] It is not within the province of the courts to read a meaning into a statute that is not there, nor to read anything direct and plain out of a statute. *State v. Burlison*, *supra*; *State v. Atkins*, *supra*.

Nichols [\*12] was charged with driving 75 m.p.h. in a 65-m.p.h. zone. Nichols was already given "a break" when Wallace issued the citation for driving 75 m.p.h., rather than 76 m.p.h. in accordance with the radar reading. [HN12] A conviction for driving 75 m.p.h. in a 65-m.p.h. zone results in a \$ 25 fine, whereas a conviction for driving 76 m.p.h. in a 65-m.p.h. zone results in a \$ 75 fine. See *Neb. Rev. Stat. § 60-682.01* (Reissue 1998). Similarly, a conviction for driving 77 or 78 m.p.h. in a 65-m.p.h. zone results in a \$ 75 fine. The minimum speed at which Nichols could have been driving was 74 m.p.h., which would result in the same fine as 75 m.p.h. See § 60-682.01. We also note that [HN13] a conviction for driving 74 or 75 m.p.h. in a 65-m.p.h. zone results in the loss of 1 or 2 points against a defendant's driving record, whereas a conviction for driving 76 to 78 m.p.h. therein results in the loss of 2 points against a defendant's driving record. See *Neb. Rev. Stat. § 60-4,182(10)(b) and (c)* (Supp. 2001). We conclude that despite the margin of error, the State presented sufficient evidence to show the speed at which Nichols' vehicle was traveling. [\*13]

Nichols next argues that the State failed to prove that he knew or should have known what the speed limit was at the location where he was cited for speeding. Nichols contends that under § 60-6,186 and *Neb. Rev. Stat. § 60-6,190* (Reissue 1998), a driver is entitled to reasonable notice of the speed limit via signs erected by the Nebraska Department of Roads and that there is no evidence that Nichols had such notice. [HN14] A conviction for speeding, pursuant to § 60-6,194, does not require the State to prove that the defendant had specific notice of the speed limit. This argument is without merit.

Nichols also argues that the radar reading was inadmissible because it lacked sufficient foundation and that his objection to such evidence should have been sustained. [HN15] Pursuant to *Neb. Rev. Stat. § 60-6,192(1)* (Reissue 1998), a radar readout may be accepted as competent evidence of the speed of a motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue. However, before evidence of a vehicular speed determined by use of radar equipment is admissible, the State, as required by § 60-6,192(1)(d), must establish [\*14] the equipment's accuracy when the determination of speed was made. See, *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Kudlacek*, 229 Neb. 297, 426 N.W.2d 289 (1988). Section 60-6,192 [HN16] specifies the requirements for admissibility of evidence from a radar device:

- (1) . . . [HN17] Before the state may offer in evidence the results of such radio microwave, mechanical, or electronic speed measurement device for the purpose of establishing the speed of any motor vehicle, the state shall prove the following:
  - (a) The radio microwave, mechanical, or electronic speed measurement device was in proper working order at the time of conducting the measurement;
  - (b) The radio microwave, mechanical, or electronic speed measurement device was being operated in such a manner and under such conditions so [sic] as to allow a minimum possibility of distortion or outside interference;
  - (c) The person operating the radio microwave, mechanical, or electronic speed measurement device and interpreting such measurement was qualified by training and experience to properly test and operate the radio microwave, mechanical, or electronic speed measurement device; [\*15] and
  - (d) The operator conducted external tests of accuracy upon the radio microwave, mechanical, or electronic speed measurement device, within a reasonable time both prior to and subsequent to an arrest being made, and the device was found to be in proper working order.

[HN18] Reasonable proof that the particular radar equipment employed on a specific occasion was accurate and functioning properly is all that is required. *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991); *State v. Kudlacek*, 229 Neb. 297, 426 N.W.2d 289 (1988).

Nichols relies on *State v. Lomack*, *supra*, which held that the evidence presented concerning the radar unit lacked the required indicia of accuracy. The Nebraska Supreme Court determined that the evidence failed to establish that the tuning fork used to test the radar unit was particularly designed and intended for testing the radar unit in question and that the evidence thereby failed to show that the tuning fork was in any way associated with the radar unit tested. Next, there was no evidence that the tuning fork itself was in any way properly tested, calibrated, or certified as a reliable gauge of a radar [\*16] unit's accuracy. Nichols argues that the present case is similar to *State v. Lomack*, *supra*, because Wallace's testimony failed to establish that the tuning forks he used were designed and intended for testing the radar unit in Wallace's car. He further contends that there was no evidence that the tuning forks were properly tested, calibrated, or certified as a reliable gauge of the radar unit's accuracy.

Wallace testified that the radar unit in his car came with the two tuning forks he uses to check the calibration of the unit. Wallace also testified that a certificate of calibration and accuracy was issued for the radar unit in his patrol car and the tuning forks used to check the calibration of the unit. Thus, the tuning forks had been tested and certified. The fact that the certificate was issued for the radar unit and the tuning forks together demonstrates that the tuning forks are intended for that particular unit. This case is not similar to *State v. Lomack*, *supra*. Rather, Wallace's testimony showed that all of the necessary foundational requirements of § 60-6,192 had been met. As noted above, he testified that the radar unit performs a "power-on [\*17] test" when it is turned on which checks its indicator light segments. He testified that he next activates a "self-test" in which the unit goes through a series of tests. Wallace further testified that the unit also runs an automatic self-test every 10 minutes. Finally, Wallace testified that he performs a "tuning fork test" which checks the calibration of the radar unit. Wallace testified that on June 1, 2002, he performed the tuning fork test prior to and subsequently to issuing Nichols the citation, and that the unit was working properly. Accordingly, Nichols' argument that there was insufficient foundation for evidence of the radar readout is without merit. We conclude that all of Nichols' arguments in support of his first assignment of error alleging that the State presented insufficient evidence are without merit.

Nichols also assigns that the trial court erred in overruling his motion for directed verdict. [HN19] When a motion for directed verdict made at the close of all the evidence is overruled by the trial court, appellate review is controlled by the rule that a directed verdict is proper only where reasonable minds cannot differ and can draw but one conclusion from the evidence, [\*18] and the issues should be decided as a matter of law. *McClure v. Forsman*, 266 Neb. 90, 662 N.W.2d 566 (2003); *Moyer v. Nebraska City Airport Auth.*, 265 Neb. 201, 655 N.W.2d 855 (2003).

[HN20] In a criminal case, a court can direct a verdict only when there is a complete failure of evidence to establish an essential element of the crime charged or the evidence is so doubtful in character, lacking probative value, that a finding of guilt based on such evidence cannot be sustained. *State v. Segura*, 265 Neb. 903, 660 N.W.2d 512 (2003); *State v. Canady*, 263 Neb. 552, 641 N.W.2d 43 (2002). [HN21] If there is any evidence which will sustain a finding for the party against whom a motion for directed verdict is made, the case may not be decided as a matter of law, and a verdict may not be directed. *Id.*

We have concluded that there was sufficient evidence for the trial court to find beyond a reasonable doubt that Nichols was guilty of speeding. Having so concluded, we cannot say that there is a complete failure of evidence to establish an essential element of the crime charged or that the evidence is so doubtful in character, lacking [\*19] probative value, that a finding of guilt based on such evidence cannot be sustained. Therefore, Nichols' assignment of error regarding his motion for directed verdict is without merit.

Finally, Nichols assigns that the trial court erred in overruling his motion for *Brady* material. In his motion, Nichols requested, among other things, that the court order the State to produce any information it had related to the margin of

error of the radar unit. In his brief, Nichols contends that the margin of error is exculpatory evidence that the State should have disclosed prior to trial. However, Nichols' motion does not mention "exculpatory evidence" and the motion appears to be a motion for discovery. We first note that because this [HN22] case involves a traffic violation, Nichols does not have a statutory right to discovery. *Neb. Rev. Stat. § 29-1912(1)* (Reissue 1995) provides for pretrial discovery in criminal cases "when a defendant is charged with a felony or when a defendant is charged with a misdemeanor or a violation of a city or village ordinance for which imprisonment is a possible penalty . . . ." The traffic violation with which Nichols was charged does [\*20] not fit within the parameters of § 29-1912.

However, [HN23] the U.S. Constitution requires the State to disclose exculpatory material to an accused. *Brady v. Maryland*, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963), recognized that [HN24] the suppression by the State of evidence favorable to and requested by an accused violates due process where the evidence is material to the guilt of the defendant. *State v. Phelps*, 241 Neb. 707, 490 N.W.2d 676 (1992); *State v. Meis*, 217 Neb. 770, 351 N.W.2d 79 (1984).

[HN25] "The heart of the holding in *Brady* is the prosecution's suppression of evidence, in the face of a defense production request, where the evidence is favorable to the accused and is material either to guilt or to punishment. Important, then, are (a) suppression by the prosecution after a request by the defense, (b) the evidence's favorable character for the defense, and (c) the materiality of the evidence."

*State v. Phelps*, 241 Neb. at 730-31, 490 N.W.2d at 692, quoting *Moore v. Illinois*, 408 U.S. 786, 92 S. Ct. 2562, 33 L. Ed. 2d 706 (1972).

The radar unit's margin of error was not exculpatory [\*21] evidence, as it was neither favorable to Nichols nor material to his guilt or to his punishment. As stated previously, the radar unit showed that Nichols was driving 76 m.p.h. Given the margin of error of plus or minus 2 m.p.h. as testified to by Wallace, the minimum speed at which Nichols could have possibly been driving was 74 m.p.h. Assuming this to have been Nichols' speed, Nichols would still be guilty of speeding and would be subject to the same \$ 25 fine as if he had been driving 75 m.p.h. as alleged in the citation. The maximum speed at which Nichols could have been driving, based on the margin of error, is 78 m.p.h., and a finding of guilt of this speed would subject Nichols to a higher fine of \$ 75. Clearly, the evidence regarding the radar unit's margin of error was not exculpatory. Nichols' assignment of error is without merit.

## CONCLUSION

Based on the preceding analysis, we conclude that the State presented sufficient evidence to support a finding of guilt on the charge of speeding. We further conclude that the trial court did not err in overruling Nichols' motion for *Brady* material. Accordingly, we affirm the order of the district court affirming the trial court's [\*22] order finding Nichols guilty of speeding.

Affirmed.

Haghighi, deceased, appellant, v. State of Nebraska et al., appellees.**

**No. A-01-275.**

**NEBRASKA COURT OF APPEALS**

*2002 Neb. App. LEXIS 226*

**August 27, 2002, Filed**

**NOTICE:** [\*1] NOT DESIGNATED FOR PERMANENT PUBLICATION.

**PRIOR HISTORY:** Appeal from the District Court for Hamilton County: Michael Owens, Judge.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Plaintiff, decedent's wife and his estate's personal representative, sued defendants, the State, its highway construction contractor, and its subcontractor, for wrongful death under the State Tort Claims Act. The jury returned a verdict for the contractor and subcontractor, and the District Court for Hamilton County, Nebraska, entered judgment for the State and dismissed the wife's amended petition. The wife appealed as to all defendants.

**OVERVIEW:** The suit arose out of a two-vehicle accident on a temporary road diverting traffic from a state highway. The wife alleged defendants were negligent in planning and building the temporary road, and in choosing and maintaining the traffic control devices used to warn motorists of the diversion from the highway. The wife's principal issues on appeal concerned the district court's denial of a motion for mistrial made during jury selection, the admissibility of expert and lay witness testimony, and certain jury instructions. During voir dire a potential juror responded to a question by counsel by stating that he was familiar with the case because he had been the insurance agent for the driver that collided with the decedent. The wife asserted that the failure to give the jury a limiting instruction to disregard the juror's comment was grounds for a mistrial. The appellate court disagreed, finding that the prospective juror's statement was not clearly a violation of the rule against mentioning liability insurance in a personal injury action, that the wife did not request a limiting instruction, and that the district court had expeditiously excused the potential juror without further ado.

**OUTCOME:** The court affirmed the jury's verdict for the contractor and the subcontractor, as well as the district court's order finding for the State and dismissing the wife's amended petition.

**CORE TERMS:** shoofly, curve, speed, radius, trooper, fog, barricade, driver, juror, collision, highway, speed limit,

measurement, calculation, interrogatory, mistrial, traffic, traffic control, disclosure, speeding, driving, posted, visibility, prejudiced, weather, abuse of discretion, driven, track, relevancy, objected

### **LexisNexis(R) Headnotes**

#### ***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review***

[HN1] On an appeal from a judgment rendered in an action brought under the State Tort Claims Act, the findings of the trial court will not be disturbed unless clearly wrong.

#### ***Civil Procedure > Trials > Bench Trials***

#### ***Civil Procedure > Judgments > General Overview***

#### ***Civil Procedure > Appeals > Standards of Review > General Overview***

[HN2] In reviewing a judgment awarded in a bench trial, an appellate court does not reweigh evidence but considers the judgment in the light most favorable to the successful party.

#### ***Civil Procedure > Appeals > Standards of Review > Substantial Evidence > General Overview***

#### ***Evidence > Procedural Considerations > Weight & Sufficiency***

[HN3] A jury verdict will not be set aside unless clearly wrong, and it is sufficient if any competent evidence is presented to the jury upon which it could find for the successful party. In determining the sufficiency of the evidence to sustain a verdict in a civil case, an appellate court considers the evidence most favorably to the successful party and resolves evidential conflicts in favor of such party, who is entitled to every reasonable inference deducible from the evidence.

#### ***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview***

#### ***Civil Procedure > Trials > Motions for Mistrial***

#### ***Criminal Law & Procedure > Trials > Motions for Mistrial***

[HN4] A mistrial is properly granted when an event occurs during the course of a trial which is of such a nature that its damaging effects cannot be removed by proper admonition or instruction to the jury and would thus result in preventing a fair trial.

#### ***Civil Procedure > Appeals > Standards of Review > Abuse of Discretion***

[HN5] A motion for mistrial is directed to the discretion of the trial court. Its ruling will not be disturbed on appeal absent a showing of abuse of that discretion.

#### ***Civil Procedure > Trials > Motions for Mistrial***

[HN6] Any reference to insurance where its presence or absence is tangential to the facts at issue should be carefully scrutinized. But, it is not every casual or inadvertent reference to an insurance company in the course of trial that will necessitate a mistrial. Whether the disclosure is such as to constitute error depends essentially on the facts and circumstances peculiar to the case under consideration.

#### ***Civil Procedure > Trials > Jury Trials > Jurors > General Overview***

#### ***Civil Procedure > Appeals > Standards of Review > Abuse of Discretion***

[HN7] On appeal, the party asserting an abuse of discretion has the burden of proving that claim.

***Evidence > Procedural Considerations > Rulings on Evidence***

[HN8] In proceedings where the Nebraska Rules of Evidence apply, the admission of evidence is controlled by rule and not by judicial discretion, except where judicial discretion is a factor involved in assessing admissibility.

***Civil Procedure > Judicial Officers > Judges > Discretion******Evidence > Procedural Considerations > Rulings on Evidence***

[HN9] Admission of expert witness testimony is ordinarily within the discretion of the trial court, and its ruling will be upheld in the absence of an abuse of discretion. An abuse of discretion occurs when the trial judge's reasons or rulings are clearly untenable, unfairly depriving a litigant of a substantial right and denying just results in matters submitted for disposition.

***Evidence > Testimony > Experts > Helpfulness***

[HN10] If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify thereto in the form of an opinion or otherwise. *Neb. Rev. Stat. § 27-702* (Reissue 1995).

***Civil Procedure > Discovery > Misconduct******Civil Procedure > Appeals > Standards of Review > Abuse of Discretion******Criminal Law & Procedure > Discovery & Inspection > Discovery Misconduct***

[HN11] Determination of an appropriate sanction for failure to comply with a discovery request rests with the trial court's discretion, which will not be disturbed on appeal absent a showing of an abuse of that discretion. Preclusion of an expert witness' testimony (or a portion thereof), as a sanction for noncompliance with the discovery rules, may be an appropriate sanction.

***Civil Procedure > Trials > Closing Arguments > Improper Remarks******Civil Procedure > Trials > Closing Arguments > Objections******Civil Procedure > Appeals > Reviewability > Preservation for Review***

[HN12] In order to preserve, as ground for appeal, opponent's misconduct during closing argument, an aggrieved party must have objected to the allegedly improper remarks no later than the conclusion of argument.

***Evidence > Relevance > Relevant Evidence***

[HN13] Relevant evidence means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence. *Neb. Rev. Stat. § 27-401* (Reissue 1995)

***Civil Procedure > Appeals > Standards of Review > Reversible Errors******Evidence > Procedural Considerations > Rulings on Evidence***

[HN14] The exercise of judicial discretion is implicit in determinations of relevancy, and a trial court's decision regarding relevancy will not be reversed absent an abuse of discretion. To constitute reversible error in a civil case, the admission or exclusion of evidence must unfairly prejudice a substantial right of a litigant complaining about evidence admitted or excluded.

***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review******Evidence > Procedural Considerations > Rulings on Evidence******Evidence > Testimony > Experts > General Overview***

[HN15] There is no exact standard for determining when one qualifies as an expert, and a trial court's factual finding

that a witness qualifies as an expert will be upheld on appeal unless clearly erroneous.

***Evidence > Testimony > Experts > General Overview***

[HN16] Whether one qualifies as an expert depends on the factual basis or reality underlying the witness's title or claim to expertise. Experts or skilled witnesses will be considered qualified if, and only if, they possess special skill or knowledge respecting the subject matter involved so superior to that of persons in general as to make the expert's formation of a judgment a fact of probative value.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Evidence > Testimony > Examination > General Overview***

[HN17] Proof of speed for purposes besides a criminal conviction for speeding can be by other means such as visual observations.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN18] See *Neb. Rev. Stat. § 60-6,185* (Reissue 1998).

***Civil Procedure > Appeals > Standards of Review > Abuse of Discretion***

[HN19] Conduct of final argument is within the discretion of the trial court, and absent an abuse of that discretion, the trial court's ruling regarding final argument will not be disturbed.

***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview***

***Civil Procedure > Appeals > Standards of Review > De Novo Review***

***Civil Procedure > Appeals > Standards of Review > Reversible Errors***

[HN20] Whether a jury instruction given by a trial court is correct is a question of law. When reviewing questions of law, an appellate court has an obligation to resolve the questions independently of the conclusion reached by the trial court. In an appeal based on a claim of an erroneous jury instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant. To establish reversible error from a trial court's refusal to give a requested instruction, an appellant must prove that (1) the tendered instruction is a correct statement of the law, (2) the tendered instruction is warranted by the evidence, and (3) the appellant was prejudiced by the court's refusal to give the tendered instruction.

***Civil Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Prejudicial Errors***

***Criminal Law & Procedure > Appeals > Reversible Errors > Evidence***

***Criminal Law & Procedure > Appeals > Reversible Errors > Jury Instructions***

[HN21] In the context of a claim of reversible error from a trial court's refusal to give a requested instruction, all the jury instructions must be read together, and if, taken as a whole, they correctly state the law, are not misleading, and adequately cover the issues supported by the pleadings and the evidence, there is no prejudicial error necessitating a reversal.

**COUNSEL:** Daniel M. Placzek, of Leininger, Smith, Johnson, Baack, Placzek, Steele & Allen, for appellant.

Jeffrey H. Jacobsen and Bradley D. Holbrook, of Jacobsen, Orr, Nelson, Wright & Lindstrom, P.C., for appellee All Road Barricades.

Robert S. Keith and Jason R. Yungtum, of Engles, Ketcham, Olson & Keith, P.C., for appellee United Contractors, Inc.

Don Stenberg, Attorney General, and Matthew F. Gaffey for appellee State of Nebraska.

**JUDGES:** Hannon, Sievers, and Moore, Judges.

**OPINION BY:** Sievers

**OPINION:**

Sievers, Judge.

This wrongful death action against the State, its highway construction contractor, and its subcontractor stems from a two-vehicle accident on a temporary road diverting traffic from a state highway. The operative petition alleged the defendants were negligent in planning and building the temporary road, referred to as a "shoofly," as well as in choosing and maintaining the traffic control devices used to warn motorists of the diversion from the highway. The main issues are the overruling of a motion for mistrial made during jury selection, [\*2] the admissibility of expert and lay witness testimony, and certain jury instructions.

#### FACTUAL BACKGROUND

Shahrokh H. Haghighi (Haghighi) was driving five passengers in a 1991 Plymouth Voyager van eastbound from Grand Island to Aurora, Nebraska, on U.S. Highway 34 on the morning of September 14, 1997. Vicki Schwaninger, a nurse who regularly commuted to Grand Island to work, left Aurora for Grand Island in her 1984 Pontiac Bonneville, also driving on Highway 34. Although the sun had risen, fog reduced visibility to between 50 and 100 yards in the area. About 4 miles west of Aurora, the temporary "shoofly" road diverted traffic away from and then back onto Highway 34. It was constructed north of the highway in May 1997 during a railroad overpass project called the Aurora West Viaduct.

At about 8:45 a.m., as she approached the "shoofly" from the east, Schwaninger encountered at least seven signs at different points along the highway warning of the construction zone and diversion of traffic from Highway 34. A reverse curve sign that advised of a 45-m.p.h. speed limit was posted near the "shoofly" entrance. The established highway was blocked by barrels and three barricades where the [\*3] "shoofly" began on the east end of the project. The barricades were "staggered" along the inner edge of the curve, directing traffic from Highway 34 so as to "channel" traffic onto the "shoofly." Each barricade was topped by a yellow "Type A" light which was not on at that time because "Type A" lights are designed to flash only at night regardless of the weather conditions, such as fog. Although she was supposed to move to the right, off the highway and onto the "shoofly," Schwaninger's car proceeded straight, crossed the yellow, solid, double centerline of the road, and entered the eastbound lane. Her car collided with Haghighi's eastbound van as it was about to exit the "shoofly" by turning left to reenter the permanent highway. As a result of the collision, Haghighi and Schwaninger both were killed.

#### PROCEDURAL BACKGROUND

Virginia J. Haghighi (Virginia), Haghighi's wife and his estate's personal representative, filed an amended petition in Hamilton County District Court against the State, pursuant to the State Tort Claims Act, as well as against the project contractor, United Contractors, Inc. (United), and the project subcontractor, All Road Barricades, Inc. (All Road) (collectively [\*4] the defendants), alleging Haghighi's wrongful death. The court reported in a pretrial order that all matters would be tried to a jury but that the jury's verdict with respect to the State would be only advisory. Virginia's amended petition included 13 allegations that the defendants negligently designed and built the "shoofly." The allegations relevant to this appeal are: (1) The "reverse turns" located at the east end of the "shoofly" were built with "turn radii" smaller than provided for by the project's specifications and plans, (2) there was a failure to properly calculate the safe speed for negotiating turns to enter and leave the "shoofly," (3) there were not "steady or flashing burn" lights on the barricades that were properly maintained and operating at the time of the accident, and (4) there was a failure to properly paint appropriate lines, including edge lines and fog lines, on the highway in the area where the

Schwaninger-Haghighi collision occurred.

In her "Answers to Interrogatories," Virginia identified as an expert witness James Summers, a consulting engineer she hired to perform "accident reconstruction," which Summers characterized as "Documenting that site." Virginia [\*5] said that Summers would testify to how far each vehicle skidded before impact, the speed of each vehicle at the start of its respective skid, and the vehicles' speeds at the time of impact. In response to a query about the substance of the facts and opinions to which her experts were expected to testify, Virginia wrote, "Mr. Summers' opinions are based on his education and experience; measurements and observations made at the accident site . . ." Virginia's "Answers to Interrogatories" also mentioned James Loumiet, whose curriculum vitae identified him as a Missouri-based accident reconstructionist who possesses a mechanical engineering degree but who is unlicensed as an engineer. According to Virginia, Loumiet would testify "that the safe design speed of the turn where the accident occurred was 21 miles per hour and that given the difference between the safe speed of the turn and a speed limit of the roadway, the turn was hazardous to the motoring public."

During jury selection, the trial court asked whether any of the prospective jurors were familiar with the case. One juror stated he knew of the case because he had been Schwaninger's insurance agent. The court excused this juror [\*6] without further questioning. At the conclusion of voir dire, Virginia did not pass the jury for cause and moved for a mistrial. The trial judge said, "I tried to handle that as quickly as I could by getting [the juror] in the back of the courtroom, and I guess I just don't see that there was any real violation of the insurance rule." Finding that the juror's statement did not prejudice Virginia, the court overruled her motion for mistrial.

United moved to have Summers' testimony limited to his previously disclosed opinions. United's motion noted that Virginia's opening statement alluded to the fact that Summers would testify to the degree of curvature of the road where the Schwaninger-Haghighi collision occurred. United pointed out that Virginia had not disclosed in her "Answers to Interrogatories" that Summers would testify to the curve radius and that in Summers' deposition, he specifically stated he would offer no opinion of the "geometry." United also introduced two opinion letters from Summers, neither of which included an indication that he was going to testify to the curve radius. The trial court found that Summers' testimony would be limited to the issues addressed in Virginia's [\*7] "Answers to Interrogatories," a prior deposition of Summers, and his letters. According to the court, the defendants would be prejudiced by Summers' testimony about his calculated curve radius of the "shoofly" where the Schwaninger-Haghighi accident occurred because it constituted expert testimony that Virginia failed to disclose in her "Answers to Interrogatories."

Later at trial, Summers explained how he took measurements at the scene and several diagrams of the scene drawn from his measurements and observations were admitted as evidence. Virginia attempted to elicit testimony from him about whether one needed to be an engineer to calculate a curve's radius. The State and United objected on the basis of foundation, the court sustained the objection, and Virginia made an offer of proof. Outside the jury's presence, Summers testified that his calculations showed that the curve radius where the Schwaninger-Haghighi accident occurred measured 198 feet although it was intended to measure 1,909 feet or 582 meters, according to the construction plans. After the offer of proof, the defendants renewed their objection, which the trial court sustained. In short, according to Summers, the curve [\*8] as built was much sharper than the plans called for.

Loumiet testified before the jury that the plans showed that the radius of the first curve on the east end of the "shoofly," where the Schwaninger-Haghighi accident occurred, was to be 582 meters, or 1,910 feet. He said that he reviewed the survey, Summers' diagrams, and photographs of the site to determine that the radius of the curve where the collision occurred was only 205 feet. According to Loumiet, the safe speed to drive the "shoofly," regardless of the weather conditions, was 23 m.p.h. Further, he said that a vehicle driven faster than 45 m.p.h. would lose traction on the curves and its tires would slide. Loumiet also said that in his opinion, the lack of a continuous fog line between Highway 34 and the "shoofly" would confuse drivers, and that such lack, considered together with the other "inadequacies of the work zone," was a proximate cause of the Schwaninger-Haghighi accident.

John Martin, United's supervisor at the time of the Aurora West Viaduct project, testified that he had driven

through the "shoofly" at a speed of 45 m.p.h. or faster without any problems. Martin also testified that he had driven through the construction [\*9] zone during the daytime when visibility was low--and probably while fog was present--and that the traffic control devices were visible. He said he had observed traffic flow through the "shoofly" and that nothing indicated that 45 m.p.h. was an unsafe speed. Russel Higgins, the district construction engineer for the Nebraska Department of Roads at that time, said he drove through the "shoofly" at 55 m.p.h. and experienced no problem keeping his car within its own lane. Higgins also said that the 2-year project was designed in anticipation that inclement weather, including fog, would occur at some time. Martin further testified that the State "staked" the "shoofly" and that United did not doublecheck the measurements because it was the State's responsibility to correctly follow the construction plan. However, he admitted that it was United's responsibility to ensure that the "staking" conformed to the plans, although he observed that surveying was not a bid item in United's contract with the State.

Ross Lyon, a Nebraska State Patrol trooper, testified that he investigated the Schwaninger-Haghighi collision. He said that he had worked as a trooper since 1989 and had investigated traffic [\*10] accidents between that time and the accident at issue here. During direct examination, Virginia established Trooper Lyon's position as an accident investigator for this particular collision and asked him about the tire marks he measured and his testing of the barricade lights. Trooper Lyon testified that it was foggy at the scene of the accident and that he tested at least one of the lights on the three barricades blocking access to the old highway. He noted that when he covered the light with a firefighter's coat in order to simulate darkness, the light did not activate.

On cross-examination, after Virginia's foundation objection was overruled, Trooper Lyon stated that he examined Schwaninger's car after the accident. He testified that he determined from the filaments in her undamaged headlight and taillights that they were not on at the time of the collision. On redirect, Trooper Lyon responded to Virginia's question about examining the headlight filaments at the accident scene by stating that he was trained to conduct such an analysis.

Kevin Brewer, a professor of civil engineering and a consulting engineer specializing in traffic engineering, testified that he had conducted studies [\*11] involving human interaction with traffic control devices. The State asked Brewer whether he was familiar with studies and technical literature showing how drivers "track through curves." Virginia objected that it had not been disclosed that Brewer would opine about how drivers react to traffic control devices, but the court decided the question was within the disclosure made and overruled Virginia's objection. Brewer testified that drivers negotiating curves relied on the centerline of the road for guidance more than the fog line. Brewer also testified that even under low visibility conditions during the day, the reflectivity of the traffic control devices is more useful to drivers than the low-level illumination provided by flashing lights.

Nebraska State Patrol Trooper Dan Bartling testified that he stopped Schwaninger for speeding through the east end of the "shoofly" on August 18, 1997, although he did not testify to the speed at which she was clocked, as the trial court agreed with Virginia that insufficient foundation had been laid concerning the calibration of his radar unit. We do not repeat the details of the attempt to lay foundation.

Richard Kwiatkowski, the Department [\*12] of Roads' manager for the Aurora West Viaduct project, testified that he was required to follow § 422.02 of the "1996 Metric Supplemental Specifications to Standard Specifications for Highway Construction, Series 1985," published by the Nebraska Department of Roads and dealing with temporary traffic control devices. He later referred to that manual as containing only "guidelines," but then again confirmed that he was required to follow § 422.02. Section 422.02(9)(b) provides, "All lights shall be turned on from sunset to sunrise or when visibility is less than 400 m." But Kwiatkowski also testified that United recommended the "Type A" lights which operate only at night regardless of the presence of fog, that these lights are on an approved products list, and that United's recommendation was submitted to the materials and test division of the Department of Roads. Daniel Waddle, a signing and marking engineer in the traffic engineering division of the Department of Roads, testified that the State no longer used "Type C" steady-burning lights because it was difficult to ensure batteries in them were functioning and because the lights were only marginally effective. Kwiatkowski further [\*13] testified that All Road was responsible for locating the traffic control devices and maintaining them, but that All Road cooperated with United to ensure the traffic control devices stayed in the proper position.

At the jury instruction conference, Virginia proposed the addition of two paragraphs to her allegations of negligence against United in instruction No. 6. One paragraph alleged the building of the reverse turns at the east end of the "shoofly" with a smaller radius than provided for in the project's plans and specifications. The other paragraph alleged a failure to equip the barricades with lights activated and operating at the time of the Schwaninger-Haghighi accident. Virginia also proposed including this paragraph in her allegations of negligence against All Road. The trial court included the first paragraph in instruction No. 6 but did not adopt the second paragraph alleging negligence by United and All Road concerning the lights on the barricades.

During closing arguments, United speculated that Summers did not testify to the length of the curve radius of the "shoofly" where the Schwaninger-Haghighi collision occurred either because Summers lacked confidence in making [\*14] that calculation from the measurements he provided in his diagrams or because Virginia did not like the result of his curve radius calculation. Virginia did not object to this characterization of the evidence. In its closing argument, the State said that the contract between it and a contractor may be modified. Virginia objected that the State was not properly characterizing the evidence, but the trial court allowed the State to continue. The State alleged that the contract between it and United was changed to reflect that United would choose the type of lights to use on the barricades and that the State approved the choice of the "Type A" lights, which do not function in the fog except at night.

The jury returned a verdict for United and All Road, and the trial court entered judgment for those defendants. As to the State, the court found that Virginia alleged that it failed to properly design the "shoofly" and improperly determined the safe speed for motorists approaching and driving through the "shoofly." The trial court reviewed the evidence and determined that the State was not negligent in any of the respects alleged by Virginia. The trial court entered judgment for the State [\*15] and dismissed Virginia's amended petition. Virginia appeals as to all defendants.

#### ASSIGNMENTS OF ERROR

Virginia assigns error, restated and reordered as follows, to the trial court's (1) overruling her motion for mistrial made during jury selection; (2) failing to admit Summers' testimony concerning his measurements and calculations of the radius of the curve where the Schwaninger-Haghighi accident occurred; (3) admitting without proper foundation testimony that others had driven through the "shoofly" at 45 m.p.h. or faster without incident; (4) receiving expert testimony from Trooper Lyon regarding his opinion that neither the van's nor the car's headlights were on at the time of the collision; (5) admitting Brewer's opinion of how drivers "track through curves"; (6) admitting Trooper Bartling's testimony that he stopped Schwaninger in the east end of the "shoofly" for exceeding the posted speed limit when there was no established foundation for the traffic stop, i.e., that the radar device was properly calibrated and operating correctly and that the conditions existing at the time of that stop were the same as those that existed the morning of the accident; (7) overruling Virginia's [\*16] objection to the State's comment during closing argument that it had modified its contract with United, on the ground that the statement was not supported by the evidence or pleadings; and (8) failing to instruct the jury on all the theories alleged by Virginia against the defendants when they were supported by the evidence.

#### STANDARD OF REVIEW

With respect to the judgment for the State, [HN1] on an appeal from a judgment rendered in an action brought under the State Tort Claims Act, the findings of the trial court will not be disturbed unless clearly wrong. *Sharkey v. Board of Regents*, 260 Neb. 166, 615 N.W.2d 889 (2000). [HN2] In reviewing a judgment awarded in a bench trial, an appellate court does not reweigh evidence but considers the judgment in the light most favorable to the successful party. *Anderson/Couvillon v. Nebraska Dept. of Soc. Servs.*, 253 Neb. 813, 572 N.W.2d 362 (1998). [HN3] A jury verdict will not be set aside unless clearly wrong, and it is sufficient if any competent evidence is presented to the jury upon which it could find for the successful party. *Patterson v. City of Lincoln*, 250 Neb. 382, 550 N.W.2d 650 (1996). In determining [\*17] the sufficiency of the evidence to sustain a verdict in a civil case, an appellate court considers the evidence most favorably to the successful party and resolves evidential conflicts in favor of such party, who is entitled to every reasonable inference deducible from the evidence. *Id.* Other applicable standards of review will be set forth as

necessary.

#### ANALYSIS

##### *Overruling Motion for Mistrial Made During Voir Dire.*

During jury selection, the court asked, "Do any of you know anything about this case either by talking to someone or reading about it in the newspaper?" One prospective juror said, "Well, I was the insurance agent for Vicki Schwaninger." The court excused the juror without further questioning, but Virginia asserts that the failure to give the jury a limiting instruction to disregard the juror's comment was grounds for a mistrial. She also asserts that the suggestion that Schwaninger possessed "liability coverage is almost certain to be incapable of being removed once the suggestion is set in place." Brief for appellant at 28. Virginia notes that the defendants argued that Schwaninger's negligence was the sole, proximate cause of the collision. She concludes that [\*18] because Schwaninger was not a party to the lawsuit, the juror's comment greatly prejudiced her in that the jury panel had information that a person not present in the lawsuit and whom the defendants blamed for the accident had insurance.

[HN4] A mistrial is properly granted when an event occurs during the course of a trial which is of such a nature that its damaging effects cannot be removed by proper admonition or instruction to the jury and would thus result in preventing a fair trial. *State v. Harker*, 1 Neb. App. 438, 498 N.W.2d 345 (1993). [HN5] A motion for mistrial is directed to the discretion of the trial court. Its ruling will not be disturbed on appeal absent a showing of abuse of that discretion. *Nichols v. Busse*, 243 Neb. 811, 503 N.W.2d 173 (1993). [HN6] Any reference to insurance where its presence or absence is tangential to the facts at issue should be carefully scrutinized. *Stumpf v. Nintendo of America*, 257 Neb. 920, 601 N.W.2d 735 (1999). But, it is not every casual or inadvertent reference to an insurance company in the course of trial that will necessitate a mistrial. *Id.* See *Lange Bldg. & Farm Supply v. Open Circle "R"*, 216 Neb. 1, 342 N.W.2d 360 (1983). [\*19] Whether the disclosure is such as to constitute error depends essentially on the facts and circumstances peculiar to the case under consideration. *Stumpf v. Nintendo of America*, *supra*.

Typically, in cases in which insurance is mentioned and a motion for mistrial follows, the defendant or plaintiff questioned a witness who responded by mentioning the presence or absence of insurance. See, *Lange Bldg. & Farm Supply v. Open Circle "R"*, *supra*; *Stumpf v. Nintendo of America*, *supra*. Here, "insurance" was unexpectedly mentioned during voir dire when the court inquired of the potential jurors' knowledge of the Schwaninger-Haghighi case. It would be difficult to predict that the judge's completely proper question would elicit such a response. In *Bergendahl v. Rabeler*, 131 Neb. 538, 268 N.W. 459 (1936), the Nebraska Supreme Court held that during a proceeding to impanel a jury in an action to recover damages alleged to have arisen from negligence, counsel should scrupulously avoid any act, statement, or question of such a nature as might inform the jurors as to whether or not the defendant is indemnified by one not a party [\*20] to the action against having to pay any verdict the jury may render against him. That holding influenced the decision in *Nama v. Shada*, 150 Neb. 362, 34 N.W.2d 650 (1948), an action for personal injuries and property damage resulting from an automobile accident. But, in *Nama*, the court found that a prospective juror's reference to the defendant's insurance coverage pertained to life, rather than automobile, insurance and that thus, the jury was not misled to believe that the defendant was indemnified against paying damages if a verdict was entered against him.

In the instant case, it was not counsel but the trial judge who asked the question that elicited a response indicating that Schwaninger had an "insurance agent." The prospective juror's response does not inform whether Schwaninger had either liability insurance on her automobile or a possible settlement between Schwaninger's insurance company and Virginia. What one derives from the juror's volunteered statement is open to speculation. The court's phrasing of the question asking whether any of the prospective jurors knew "anything about this case" does not necessarily imply that the insurance agent knew of [\*21] the case because Schwaninger acquired automobile accident insurance through him. It is equally possible that he was Schwaninger's life insurance agent or handled her medical insurance. [HN7] On appeal, the party asserting an abuse of discretion has the burden of proving that claim. *Bailey v. AMISUB*, 1 Neb. App. 56, 489 N.W.2d 323 (1992). The prospective juror's statement is not such that the other prospective jurors could only conclude from it that Schwaninger had automobile liability insurance that had inured to Virginia's benefit. The

prospective juror's statement is not clearly a violation of the rule against mentioning liability insurance in a personal injury action.

The court could have instructed the jury to disregard the mention of Schwaninger's insurance, but Virginia did not request such a limiting instruction. Further, such an instruction obviously runs the risk of calling attention to a matter which may not have been noticed or heard by all prospective jurors. And, the court handled the matter expeditiously by excusing the potential juror without further ado. The trial judge was in the unique position to observe the matter firsthand. On the basis of the record [\*22] before us, we cannot say that the trial court abused its discretion by handling this matter quickly and without fanfare, and we find no basis to say now that a mistrial should have been declared.

*Excluding Testimony of Calculation of "Shoofly" Curve Radius.*

The trial court's decision to limit Summers' testimony to the facts and opinions provided in Virginia's "Answers to Interrogatories" precluded him from testifying to his calculation of the curve radius of the "shoofly" where the Schwaninger-Haghighi collision occurred. Virginia argues that Summers' testimony was not expert opinion testimony, but even if the testimony was so characterized, the defendants would not have been surprised or prejudiced by the admission of Summers' calculation of the curve radius.

[HN8] In proceedings where the Nebraska Rules of Evidence apply, the admission of evidence is controlled by rule and not by judicial discretion, except where judicial discretion is a factor involved in assessing admissibility. *Holden v. Wal-Mart Stores*, 259 Neb. 78, 608 N.W.2d 187 (2000); *Woollen v. State*, 256 Neb. 865, 593 N.W.2d 729 (1999). [HN9] Admission of expert witness testimony is ordinarily [\*23] within the discretion of the trial court, and its ruling will be upheld in the absence of an abuse of discretion. *Id.* See *Fales v. Books*, 5 Neb. App. 372, 558 N.W.2d 831 (1997). An abuse of discretion occurs when the trial judge's reasons or rulings are clearly untenable, unfairly depriving a litigant of a substantial right and denying just results in matters submitted for disposition. *Holden v. Wal-Mart Stores, supra*.

[HN10] If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify thereto in the form of an opinion or otherwise. *Neb. Rev. Stat. § 27-702* (Reissue 1995). Virginia disputes that Summers' calculation of the curve radius of the "shoofly" where the Schwaninger-Haghighi accident occurred from his admissible measurements is an expert opinion such that she needed to disclose it on her "Answers to Interrogatories." She claims it is merely a calculation from known facts.

Virginia failed to specifically reveal in her "Answers to Interrogatories" [\*24] that Summers would testify to the curve radius in response to the defendants' specific request. Subpart "c" of "Interrogatory No. 15" asks for "the substance of the *facts* and the opinions to which the expert is expected to testify." (Emphasis supplied.) Here, the assertion--be it fact, opinion, or some combination thereof--that the curve radius was too short, making the curve too sharp, which in turn made the posted speed limit too high, is the core of Virginia's claim and her expert's supporting testimony. We have no trouble in concluding that disclosure of the radius of the curve should have been made.

Virginia also argues that the defendants would not have been prejudiced by this evidence from Summers. But, the allegedly "too short" radius of the curve was the key to Virginia's case, and failing to disclose it cannot help but prejudice the defendant's trial preparation. While she contends that her "Answers to Interrogatories" disclosed that Summers made observations and measurements at the accident site, we think that the request for "[a] summary of the grounds of each opinion" mandates disclosure of why the speed limit was too high, which requires disclosure of the curve [\*25] radius. Virginia should have disclosed this expected testimony.

She also contends that Summers' diagrams necessarily incorporating the curve's radius were disclosed before trial and admitted into evidence. But, nowhere on the diagrams admitted into evidence do we see Summers' calculation of the curve's radius. Virginia further contends that her other expert, Loumiet, used this information to calculate the curve radius; that the defendants knew this calculation was a key issue of the case; and that they were prepared to address it

via their own experts' testimony.

But, the point here is that "trial by ambush and surprise" has been replaced by disclosure, and disclosure of this key portion of Summers' findings, regardless of whether it was a fact he found or an opinion he held, was not made. [HN11] Determination of an appropriate sanction for failure to comply with a discovery request rests with the trial court's discretion, which will not be disturbed on appeal absent a showing of an abuse of that discretion. *Booth v. Blueberry Hill Restaurants*, 245 Neb. 490, 513 N.W.2d 867 (1994). Preclusion of an expert witness' testimony (or a portion thereof), as a sanction for noncompliance [\*26] with the discovery rules, may be an appropriate sanction. *Norquay v. Union Pacific Railroad*, 225 Neb. 527, 407 N.W.2d 146 (1987).

Moreover, Loumiet testified that he used Summers' measurements to determine the calculation of the curve radius, and he testified to that result. Notably, Loumiet's measurement of the curve radius corroborated the measurement Summers would have testified to, had he been permitted to do so by the court. Thus, Virginia was able to get Summers' curve radius number before the jury and judge, albeit by her other expert.

Nonetheless, Virginia contends that exclusion of Summers' findings actually prejudiced her because it gave the appearance that his findings differed from Loumiet's results. Virginia supports this last contention by pointing out that United mentioned during closing arguments that Virginia did not ask Summers about the curve radius for fear that his opinion would contradict Loumiet's opinion based on Summers' measurements. While the comments of counsel for United do not properly reflect why Summers did not testify on this point and constitute an inaccurate and improper commentary on the evidence, the record shows that Virginia [\*27] did not object; nor is this matter assigned and argued as error. Thus, while the comment was improper, as counsel knew that Summers' testimony had been restricted by the court's ruling, the matter was not preserved for appellate review. *State v. Lotter*, 255 Neb. 456, 586 N.W.2d 591 (1998) (objection made to opposing counsel's argument after jury has retired generally is not timely and will not be reviewed on appeal); *Martindale v. Weir*, 254 Neb. 517, 577 N.W.2d 287 (1998) [HN12] (in order to preserve, as ground for appeal, opponent's misconduct during closing argument, aggrieved party must have objected to improper remarks no later than at conclusion of argument). In conclusion, the remarks made during closing do not make the trial court's ruling excluding Summers' testimony of the curve radius of the "shoofly" where the Schwaninger-Haghighi accident occurred an abuse of its discretion.

#### *Admissibility of Testimony of Speeds Driven Through "Shoofly."*

Virginia asserts that the trial court abused its discretion by admitting the testimony of Martin and Higgins that they had driven the "shoofly" at speeds of or exceeding 45 m.p.h. and had seen others driving [\*28] the "shoofly" without incident, because the defendants failed to establish the proper foundation and relevance of this testimony. She claims this testimony was unreliable, inadmissible, and prejudicial. Virginia bases this assertion on the fact that the witnesses did not testify that the weather and traffic conditions existing at the time they passed through the "shoofly" were substantially similar to the conditions existing at the time of the Schwaninger-Haghighi collision.

Martin testified that he drove through the "shoofly" several times a day during the construction period when visibility was low--and probably while fog was present--and that he could see the traffic control devices. Further, he testified that he observed others drive through the "shoofly" without problem and that 45 m.p.h. did not appear to be an unsafe speed. Higgins said he drove through the "shoofly" on a weekly basis and experienced no problem keeping his car in its lane while driving 55 m.p.h. Higgins added that the 2-year construction project was designed with the knowledge that inclement weather, including fog, would occur during that span of time.

We analyze Virginia's argument about this evidence from [\*29] the standpoint of relevancy. [HN13] Relevant evidence means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence. *Neb. Rev. Stat. § 27-401* (Reissue 1995). [HN14] The exercise of judicial discretion is implicit in determinations of relevancy, and a trial court's decision regarding relevancy will not be reversed absent an abuse of discretion. *Sacco v. Carothers*, 257 Neb.

672, 601 N.W.2d 493 (1999). To constitute reversible error in a civil case, the admission or exclusion of evidence must unfairly prejudice a substantial right of a litigant complaining about evidence admitted or excluded. *Id.*

One of Virginia's allegations is that the defendants were negligent in setting a 45-m.p.h. speed limit for the "shoofly" because it was an unsafe speed given her experts' calculation of the radius of the curve. Loumiet testified that the speed at which the "shoofly" curve could be driven without feeling excessive amounts of discomfort that would prompt the driver to take some "evasive" action, such as braking or flattening the [\*30] path of the curve, was 23 m.p.h. He also testified that the critical speed for that curve was 45 m.p.h. Loumiet defined critical speed as the speed above which a vehicle's tires lose traction on the roadway and the vehicle begins to slide. Loumiet ultimately concluded that the advisory speed limit for the curve should have been 20 m.p.h. The defendants' witnesses, Martin and Higgins, testified that they drove through the "shoofly" at 45 m.p.h. or faster on a regular basis and did not feel discomfort. Neither did their vehicles skid sideways, as Loumiet's testimony would have them doing at that speed. Their testimony was relevant to determining whether the defendants were negligent in approving a 45-m.p.h. advisory speed limit for the "shoofly." Additionally, the testimony rebutted Loumiet's testimony that the advisory speed limit should have been 20 m.p.h., regardless of the weather conditions. Martin and Higgins were closely acquainted with the "shoofly" and had driven it many times, and as mentioned above, their personal experience was relevant. It was not reversible error for the trial court to admit their testimony as to this issue.

*Admissibility of Opinion of Each Vehicle's [\*31] Use of Headlights.*

Trooper Lyon testified over Virginia's objection that his examination of both vehicles' headlight and taillight filaments revealed that neither vehicle's lights were on at the time of the Schwaninger-Haghighi collision. Virginia argues that the trial court should have sustained her objection to his testimony because the defendants failed to establish Trooper Lyon's expertise in this area.

[HN15] There is no exact standard for determining when one qualifies as an expert, and a trial court's factual finding that a witness qualifies as an expert will be upheld on appeal unless clearly erroneous. *Main Street Movies v. Wellman*, 251 Neb. 367, 557 N.W.2d 641 (1997). [HN16] Whether one qualifies as an expert depends on the factual basis or reality underlying the witness' title or claim to expertise. *Id.* Experts or skilled witnesses will be considered qualified if, and only if, they possess special skill or knowledge respecting the subject matter involved so superior to that of persons in general as to make the expert's formation of a judgment a fact of probative value. *Ashby v. First Data Resources*, 242 Neb. 529, 497 N.W.2d 330 (1993).

In the [\*32] instant case, the day after Trooper Lyon testified, Virginia made a motion to strike all of his testimony because he was not qualified as an "expert filament reader." But, the trial court agreed with the defendants' argument that Virginia had qualified Trooper Lyon as such an expert when she asked on redirect examination whether he performed the analysis at the accident site and he replied that he "had some training on that." Therefore, the court overruled Virginia's motion to strike. We note that Virginia also qualified Trooper Lyon as an accident reconstruction expert during her direct examination of him in order to elicit his testimony as to the length of tire marks at the scene. In our opinion, headlight filament analysis is part of accident reconstruction and Trooper Lyon's opinion on this issue was relevant and of some probative value. Therefore, we find that the trial court did not clearly err in determining that Virginia herself qualified Trooper Lyon as an expert whose opinion as to whether the Schwaninger car's and Haghighi van's lights were on or off at the time of the accident should be admitted. Virginia also argues that the admission of Trooper Lyon's testimony prejudiced [\*33] her because it was offered to rebut her evidence that fog severely restricted the drivers' visibility or to demonstrate Schwaninger's negligence. However, the evidence was admitted without limitation, and the jury was free to use it for any purpose--including reasoning that if the vision of the drivers was restricted by the fog, they would have had their lights on.

*Expert's Testimony Regarding How Drivers "Track Through Curves."*

Over Virginia's objection, Brewer testified concerning various studies and technical literature on which he based

his opinion of how drivers "track through curves." Virginia alleges a lack of evidence that the driving conditions analyzed in the "studies and technical literature" were similar to those existing at the time of the Schwaninger-Haghighi collision.

We again begin with the proposition that the admissibility of this testimony is determined by its relevance. See § 27-401. The exercise of judicial discretion is implicit in determinations of relevancy, and a trial court's decision regarding relevancy will not be reversed absent an abuse of discretion. *Sacco v. Carothers*, 257 Neb. 672, 601 N.W.2d 493 (1999).

In the instant case, [\*34] Loumiet testified that the fog line as it existed before construction of the "shoofly" had not been completely obliterated as required and that a gap existed between the old and new fog lines. According to Loumiet, pavement markings in areas of poor visibility are critical for drivers to maintain their position on the road. He opined that the failure to erase the old fog line and create a continuous fog line between Highway 34 and the "shoofly" was evidence of negligence. He further opined that the "inadequacies of the work zone" were a causative factor in the Schwaninger-Haghighi collision. Therefore, Brewer's testimony that drivers "track through curves" by relying on the centerline rather than the fog line was offered to rebut Loumiet's testimony and was relevant. It is, of course, not for us to choose between the two witnesses.

Virginia further alleges that Brewer's opinions were not revealed by the State in its pretrial disclosures. She concludes that because the court sustained the defendants' objections to Summers' testimony, the trial court abused its discretion by failing to rule consistently concerning the admissibility of expert testimony, thereby prejudicing Virginia. [\*35] We observe that the State revealed that "Dr. Brewer is expected to render the following opinions: 1. The roadway containing the location where the collision occurred was properly signed, marked and maintained under generally accepted engineering standards." If, as Brewer opined, drivers "track through curves" using the centerline, then the "shoofly" was at least arguably properly marked as set forth in the "defendant's third supplemental answer to plaintiff's interrogatories." This testimony contrasts with Loumiet's testimony that a continuous fog line was needed to qualify the "shoofly" as properly marked.

Admission of expert witness testimony is ordinarily within the discretion of the trial court, and its ruling will be upheld in the absence of an abuse of discretion. *Woollen v. State*, 256 Neb. 865, 593 N.W.2d 729 (1999). See *Fales v. Books*, 5 Neb. App. 372, 558 N.W.2d 831 (1997). We find no abuse of discretion in the trial court's admission of Brewer's testimony, because the State's disclosure of Brewer's expected opinions was sufficiently broad to include his testimony that drivers "track through curves" by using the centerline rather than the [\*36] fog line.

*Testimony Schwaninger Was Previously Stopped for Exceeding Speed Limit.*

Following her voir dire examination of Trooper Bartling, Virginia objected to further testimony from him because he was not able to provide sufficient foundation to show that his radar unit was properly calibrated when he stopped Schwaninger on August 18, 1997. The problem was that Trooper Bartling was unable to say that the tuning forks used to check the accuracy of the radar unit had been calibrated within the preceding year. The trial court sustained Virginia's objection to the extent that Trooper Bartling was not allowed to testify to the speed at which he clocked Schwaninger on August 18. After the ruling on this objection, Trooper Bartling did testify, without objection, that he issued Schwaninger a citation for speeding in the "shoofly" where the posted speed limit was 45 m.p.h.

Virginia cites *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991), for the proposition that a lack of foundation establishing that the radar device used by Trooper Bartling to clock Schwaninger was calibrated and operating properly precludes testimony that Schwaninger had been stopped for [\*37] speeding. We do not disagree with this broad proposition because *Neb. Rev. Stat. § 60-6,192* (Reissue 1998) provides that "the results of such radio microwave, mechanical, or electronic speed measurement device may be accepted as competent evidence of the speed of such motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue" when the equipment is properly

calibrated. Here, proper calibration was not shown and the trial court did not let in the evidence of the speed at which Schwaninger was clocked. However, the question largely involves whether her actual speed on August 18, 1997, was "in issue." *State v. Hill*, 254 Neb. 460, 577 N.W.2d 259 (1998), is an example of where speed is not at issue. There, the court said that where the evidence of speed was not to establish a driver's rate of travel on a speeding charge, but was introduced as one piece of evidence tending to establish that the driver operated a vehicle in such a manner as to indicate an indifferent or wanton disregard for the safety of persons or property, that speed was not "at issue" under § 60-6,192 and therefore did not need to be corroborated [\*38] by a microwave, mechanical, or electronic speed measurement device. 254 Neb. at 465, 577 N.W.2d at 264. [HN17] Clearly, proof of speed for purposes besides a criminal conviction for speeding can be by other means such as visual observations. *Taylor v. Wimes*, 10 Neb. App. 432, 632 N.W.2d 366 (2001).

Here, the matter at issue was not whether Schwaninger had committed a crime on August 18, 1997, by driving at a particular speed. Therefore, her actual speed on August 18 was not in issue. Instead, the evidence of the prior speeding ticket went to the issue of whether she had knowledge or notice of the posted speed limit in the "shoofly." The issuance of the speeding ticket, regardless of how fast she was clocked, tends to prove her knowledge of the speed limit. Additionally, it is of no small significance that Trooper Bartling testified without objection that he wrote Schwaninger a citation for speeding.

As part of this assignment of error, Virginia again argues the defendants' failure to establish that the conditions existing on the date of Trooper Bartling's stop of Schwaninger were the same conditions as existed at the time of the Schwaninger-Haghighi accident. [\*39] While Virginia repeatedly advances what we take to be a foundational argument that the defendants' evidence failed to show the same conditions as those that existed the morning of the accident, our basic difficulty with this argument is that the core of Virginia's case does not depend on the weather or lighting conditions. Instead, her case rests on the premise that the curve was built too sharp, making the posted speed limit of 45 m.p.h. the crucial speed at which a vehicle could not hold to its lane in the curve--regardless of conditions. Thus, the conditions at the time of the accident play little or no role in Virginia's proof of negligence. And, we might add that even if such conditions were at issue, it was Schwaninger's duty as the driver of a vehicle to take the conditions into account in determining the speed she would drive the "shoofly." [HN18] *Neb. Rev. Stat., § 60-6,185* (Reissue 1998) provides:

No person shall drive a vehicle on a highway at a speed greater than is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing. A person shall drive at a safe and appropriate speed when approaching and [\*40] crossing an intersection or railroad grade crossing, when approaching and going around a curve, when approaching a hillcrest, when traveling upon any narrow or winding roadway, and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions. Virginia characterizes Trooper Bartling's testimony that Schwaninger was exceeding the posted advisory speed limit of 45 m.p.h. while driving through the "shoofly" a month before the collision between her car and the Haghighi van as evidence of a similar occurrence.

But, in addition to proof of notice of the posted speed limit, it is also evidence introduced to rebut Loumiet's testimony that a vehicle traveling in its own lane could not navigate through the eastern end of the "shoofly" at a speed exceeding 45 m.p.h. without the driver's losing control--regardless of the environmental conditions. The admission of Trooper Bartling's testimony without proof of the same conditions as existed the morning of the accident does not render his testimony inadmissible on the basis of foundation or relevancy, given the absolute position of Virginia's experts that this curve could not be driven at 45 [\*41] m.p.h. In conclusion, the trial court did not abuse its discretion by admitting the testimony from Trooper Bartling that he issued a speeding citation to Schwaninger on August 18, 1997, while she was driving in the "shoofly" which had a posted speed limit of 45 m.p.h.

*Contract Modification Alleged by  
State in its Closing Argument.*

Virginia notes that neither the State nor United ever alleged in their pleadings a modification of the contract between them or an agreement not to enforce certain contractual provisions. Virginia referred specifically to § 422.02(9)(b) of the "1996 Metric Supplemental Specifications to Standard Specifications for Highway Construction, Series 1985," published by the Nebraska Department of Roads, which provides, "All lights shall be turned on from sunset to sunrise or when visibility is less than 400 m." She points out that Kwiatkowski testified that these standard specifications became part of every construction contract in the state and were in force at the time of this construction project. Kwiatkowski also testified that he was required to follow § 422.02. But, the State said during closing arguments that it and United agreed not to enforce [\*42] a provision of the contract, which agreement shifted the burden of proposing the type of lights used to United, subject to the State's approval of that recommendation. Virginia objected, citing mischaracterization of the evidence, but the trial court allowed the State to "continue." She argues that she was prejudiced by the State's closing statement.

[HN19] Conduct of final argument is within the discretion of the trial court, and absent an abuse of that discretion, the trial court's ruling regarding final argument will not be disturbed. *Haag v. Bongers*, 256 Neb. 170, 589 N.W.2d 318 (1999); *Bailey v. AMISUB*, 1 Neb. App. 56, 489 N.W.2d 323 (1992). Our review of the record shows that Kwiatkowski testified that United recommended "Type A" lights for use on the barricades although they do not meet the requirement of activating when visibility is less than 400 meters because they flash only at night. And, Kwiatkowski testified that these lights were on the State's approved products list and that United's recommendation to use "Type A" lights was submitted to the materials and test division of the Department of Roads for the State's approval. Clearly, there was [\*43] evidence of a contractual modification from Kwiatkowski's uncontroverted testimony that United was allowed to recommend the type of lights used on the barricades, albeit subject to the State's approval. Thus, this assignment of error is without merit.

*Statement of Case: Content of Jury Instruction No. 6.*

Virginia asserts that at the jury instruction conference, she requested the addition of two paragraphs to her allegations of negligence against United set forth in instruction No. 6, and that the court erred by not including these paragraphs in that instruction. One paragraph reads, "In building the reverse turns at the east edge of the construction site with a radius smaller than that provided for in the plans and specifications in the project." Our review of the record shows that the trial court used this precise language. Thus, this assignment of error lacks merit.

The other requested paragraph reads, "In failing to equip the barricades of the subject work zone with lights activated and operating at the time of the accident." Virginia also requested that the court add this paragraph to the allegations of negligence made against All Road. Virginia argues that because she presented [\*44] evidence of these defendants' duties to ensure light activation and operation, as found in the "1996 Supplemental Specifications to Standard Specifications for Highway Construction, Series 1985," the court's failure to instruct the jury on this theory prevented the jury from considering the evidence against either of these defendants.

[HN20] Whether a jury instruction given by a trial court is correct is a question of law. *Nebraska Nutrients v. Shepherd*, 261 Neb. 723, 626 N.W.2d 472 (2001). When reviewing questions of law, an appellate court has an obligation to resolve the questions independently of the conclusion reached by the trial court. *Id.* In an appeal based on a claim of an erroneous jury instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant. *Id.* To establish reversible error from a trial court's refusal to give a requested instruction, an appellant must prove that (1) the tendered instruction is a correct statement of the law, (2) the tendered instruction is warranted by the evidence, and (3) the appellant was prejudiced by the court's refusal [\*45] to give the tendered instruction. *Id.*; *Austin v. State Farm Mut. Auto. Ins. Co.*, 261 Neb. 697, 625 N.W.2d 213 (2001).

The evidence shows that United recommended the "Type A" lights used on the barricades and had some responsibility for maintaining the position of the barricades. The evidence also shows that All Road was responsible for maintaining the lights, i.e., ensuring their functioning. And, although it was foggy the morning of the

Schwaninger-Haghighi accident, the lights were not meant to be activated during the day even by fog. Trooper Lyon's testimony was that a light on a barricade failed to activate when he tested it by draping a firefighter's coat over it. Thus, there was evidence that the lights may not have been functioning as intended, but the lights used would not have been on at the time of the accident in any event because it was daylight.

The court did not give a specific instruction about the lights, but, rather, instructed the jury that Virginia claimed that United and All Road were negligent "in erecting and maintaining signs, barricades, lights, and pavement markings in such a manner as to confuse or disorient motorists traveling around [\*46] and through the construction site." Thus, the matter of whether the lights were proper was clearly before the jury for its consideration.

[HN21] Moreover, all the jury instructions must be read together, and if, taken as a whole, they correctly state the law, are not misleading, and adequately cover the issues supported by the pleadings and the evidence, there is no prejudicial error necessitating a reversal. *Sedlak Aerial Spray v. Miller*, 251 Neb. 45, 555 N.W.2d 32 (1996); *Fales v. Books*, 5 Neb. App. 372, 558 N.W.2d 831 (1997). The trial court's broad instruction on signage and lights certainly includes Virginia's allegation that United and All Road failed to equip the barricades with lights which should have been operating at the time of the accident. The instruction encompasses Virginia's allegation that the lights on the barricades were not the proper type of light and did not function as would be expected at the time of the accident. Therefore, we conclude that this assignment of error is without merit.

#### CONCLUSION

We have considered the entire record in light of the assignments of error and find no error. Thus, we affirm the jury's verdict for United [\*47] and All Road, as well as the court's order finding for the State and dismissing Virginia's amended petition.

**DISPOSITION:** Affirmed.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Plaintiff, decedent's wife and his estate's personal representative, sued defendants, the State, its highway construction contractor, and its subcontractor, for wrongful death under the State Tort Claims Act. The jury returned a verdict for the contractor and subcontractor, and the District Court for Hamilton County, Nebraska, entered judgment for the State and dismissed the wife's amended petition. The wife appealed as to all defendants.

**OVERVIEW:** The suit arose out of a two-vehicle accident on a temporary road diverting traffic from a state highway. The wife alleged defendants were negligent in planning and building the temporary road, and in choosing and maintaining the traffic control devices used to warn motorists of the diversion from the highway. The wife's principal issues on appeal concerned the district court's denial of a motion for mistrial made during jury selection, the admissibility of expert and lay witness testimony, and certain jury instructions. During voir dire a potential juror responded to a question by counsel by stating that he was familiar with the case because he had been the insurance agent for the driver that collided with the decedent. The wife asserted that the failure to give the jury a limiting instruction to disregard the juror's comment was grounds for a mistrial. The appellate court disagreed, finding that the prospective juror's statement was not clearly a violation of the rule against mentioning liability insurance in a personal injury action, that the wife did not request a limiting instruction, and that the district court had expeditiously excused the potential juror without further ado.

**OUTCOME:** The court affirmed the jury's verdict for the contractor and the subcontractor, as well as the district court's order finding for the State and dismissing the wife's amended petition.

**CORE TERMS:** shoofly, curve, speed, radius, trooper, fog, barricade, driver, juror, collision, highway, speed limit,

measurement, calculation, interrogatory, mistrial, traffic, traffic control, disclosure, speeding, driving, posted, visibility, prejudiced, weather, abuse of discretion, driven, track, relevancy, objected

### **LexisNexis(R) Headnotes**

#### ***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review***

[HN1] On an appeal from a judgment rendered in an action brought under the State Tort Claims Act, the findings of the trial court will not be disturbed unless clearly wrong.

#### ***Civil Procedure > Trials > Bench Trials***

#### ***Civil Procedure > Judgments > General Overview***

#### ***Civil Procedure > Appeals > Standards of Review > General Overview***

[HN2] In reviewing a judgment awarded in a bench trial, an appellate court does not reweigh evidence but considers the judgment in the light most favorable to the successful party.

#### ***Civil Procedure > Appeals > Standards of Review > Substantial Evidence > General Overview***

#### ***Evidence > Procedural Considerations > Weight & Sufficiency***

[HN3] A jury verdict will not be set aside unless clearly wrong, and it is sufficient if any competent evidence is presented to the jury upon which it could find for the successful party. In determining the sufficiency of the evidence to sustain a verdict in a civil case, an appellate court considers the evidence most favorably to the successful party and resolves evidential conflicts in favor of such party, who is entitled to every reasonable inference deducible from the evidence.

#### ***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview***

#### ***Civil Procedure > Trials > Motions for Mistrial***

#### ***Criminal Law & Procedure > Trials > Motions for Mistrial***

[HN4] A mistrial is properly granted when an event occurs during the course of a trial which is of such a nature that its damaging effects cannot be removed by proper admonition or instruction to the jury and would thus result in preventing a fair trial.

#### ***Civil Procedure > Appeals > Standards of Review > Abuse of Discretion***

[HN5] A motion for mistrial is directed to the discretion of the trial court. Its ruling will not be disturbed on appeal absent a showing of abuse of that discretion.

#### ***Civil Procedure > Trials > Motions for Mistrial***

[HN6] Any reference to insurance where its presence or absence is tangential to the facts at issue should be carefully scrutinized. But, it is not every casual or inadvertent reference to an insurance company in the course of trial that will necessitate a mistrial. Whether the disclosure is such as to constitute error depends essentially on the facts and circumstances peculiar to the case under consideration.

#### ***Civil Procedure > Trials > Jury Trials > Jurors > General Overview***

#### ***Civil Procedure > Appeals > Standards of Review > Abuse of Discretion***

[HN7] On appeal, the party asserting an abuse of discretion has the burden of proving that claim.

***Evidence > Procedural Considerations > Rulings on Evidence***

[HN8] In proceedings where the Nebraska Rules of Evidence apply, the admission of evidence is controlled by rule and not by judicial discretion, except where judicial discretion is a factor involved in assessing admissibility.

***Civil Procedure > Judicial Officers > Judges > Discretion******Evidence > Procedural Considerations > Rulings on Evidence***

[HN9] Admission of expert witness testimony is ordinarily within the discretion of the trial court, and its ruling will be upheld in the absence of an abuse of discretion. An abuse of discretion occurs when the trial judge's reasons or rulings are clearly untenable, unfairly depriving a litigant of a substantial right and denying just results in matters submitted for disposition.

***Evidence > Testimony > Experts > Helpfulness***

[HN10] If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify thereto in the form of an opinion or otherwise. *Neb. Rev. Stat. § 27-702* (Reissue 1995).

***Civil Procedure > Discovery > Misconduct******Civil Procedure > Appeals > Standards of Review > Abuse of Discretion******Criminal Law & Procedure > Discovery & Inspection > Discovery Misconduct***

[HN11] Determination of an appropriate sanction for failure to comply with a discovery request rests with the trial court's discretion, which will not be disturbed on appeal absent a showing of an abuse of that discretion. Preclusion of an expert witness' testimony (or a portion thereof), as a sanction for noncompliance with the discovery rules, may be an appropriate sanction.

***Civil Procedure > Trials > Closing Arguments > Improper Remarks******Civil Procedure > Trials > Closing Arguments > Objections******Civil Procedure > Appeals > Reviewability > Preservation for Review***

[HN12] In order to preserve, as ground for appeal, opponent's misconduct during closing argument, an aggrieved party must have objected to the allegedly improper remarks no later than the conclusion of argument.

***Evidence > Relevance > Relevant Evidence***

[HN13] Relevant evidence means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence. *Neb. Rev. Stat. § 27-401* (Reissue 1995)

***Civil Procedure > Appeals > Standards of Review > Reversible Errors******Evidence > Procedural Considerations > Rulings on Evidence***

[HN14] The exercise of judicial discretion is implicit in determinations of relevancy, and a trial court's decision regarding relevancy will not be reversed absent an abuse of discretion. To constitute reversible error in a civil case, the admission or exclusion of evidence must unfairly prejudice a substantial right of a litigant complaining about evidence admitted or excluded.

***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review******Evidence > Procedural Considerations > Rulings on Evidence******Evidence > Testimony > Experts > General Overview***

[HN15] There is no exact standard for determining when one qualifies as an expert, and a trial court's factual finding

that a witness qualifies as an expert will be upheld on appeal unless clearly erroneous.

***Evidence > Testimony > Experts > General Overview***

[HN16] Whether one qualifies as an expert depends on the factual basis or reality underlying the witness's title or claim to expertise. Experts or skilled witnesses will be considered qualified if, and only if, they possess special skill or knowledge respecting the subject matter involved so superior to that of persons in general as to make the expert's formation of a judgment a fact of probative value.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > Elements  
Evidence > Testimony > Examination > General Overview***

[HN17] Proof of speed for purposes besides a criminal conviction for speeding can be by other means such as visual observations.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN18] See *Neb. Rev. Stat. § 60-6,185* (Reissue 1998).

***Civil Procedure > Appeals > Standards of Review > Abuse of Discretion***

[HN19] Conduct of final argument is within the discretion of the trial court, and absent an abuse of that discretion, the trial court's ruling regarding final argument will not be disturbed.

***Civil Procedure > Trials > Jury Trials > Jury Instructions > General Overview***

***Civil Procedure > Appeals > Standards of Review > De Novo Review***

***Civil Procedure > Appeals > Standards of Review > Reversible Errors***

[HN20] Whether a jury instruction given by a trial court is correct is a question of law. When reviewing questions of law, an appellate court has an obligation to resolve the questions independently of the conclusion reached by the trial court. In an appeal based on a claim of an erroneous jury instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant. To establish reversible error from a trial court's refusal to give a requested instruction, an appellant must prove that (1) the tendered instruction is a correct statement of the law, (2) the tendered instruction is warranted by the evidence, and (3) the appellant was prejudiced by the court's refusal to give the tendered instruction.

***Civil Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Prejudicial Errors***

***Criminal Law & Procedure > Appeals > Reversible Errors > Evidence***

***Criminal Law & Procedure > Appeals > Reversible Errors > Jury Instructions***

[HN21] In the context of a claim of reversible error from a trial court's refusal to give a requested instruction, all the jury instructions must be read together, and if, taken as a whole, they correctly state the law, are not misleading, and adequately cover the issues supported by the pleadings and the evidence, there is no prejudicial error necessitating a reversal.

**COUNSEL:** Daniel M. Placzek, of Leininger, Smith, Johnson, Baack, Placzek, Steele & Allen, for appellant.

Jeffrey H. Jacobsen and Bradley D. Holbrook, of Jacobsen, Orr, Nelson, Wright & Lindstrom, P.C., for appellee All Road Barricades.

Robert S. Keith and Jason R. Yungtum, of Engles, Ketcham, Olson & Keith, P.C., for appellee United Contractors, Inc.

Don Stenberg, Attorney General, and Matthew F. Gaffey for appellee State of Nebraska.

**JUDGES:** Hannon, Sievers, and Moore, Judges.

**OPINION BY:** Sievers

**OPINION:**

Sievers, Judge.

This wrongful death action against the State, its highway construction contractor, and its subcontractor stems from a two-vehicle accident on a temporary road diverting traffic from a state highway. The operative petition alleged the defendants were negligent in planning and building the temporary road, referred to as a "shoofly," as well as in choosing and maintaining the traffic control devices used to warn motorists of the diversion from the highway. The main issues are the overruling of a motion for mistrial made during jury selection, [\*2] the admissibility of expert and lay witness testimony, and certain jury instructions.

#### FACTUAL BACKGROUND

Shahrokh H. Haghighi (Haghighi) was driving five passengers in a 1991 Plymouth Voyager van eastbound from Grand Island to Aurora, Nebraska, on U.S. Highway 34 on the morning of September 14, 1997. Vicki Schwaninger, a nurse who regularly commuted to Grand Island to work, left Aurora for Grand Island in her 1984 Pontiac Bonneville, also driving on Highway 34. Although the sun had risen, fog reduced visibility to between 50 and 100 yards in the area. About 4 miles west of Aurora, the temporary "shoofly" road diverted traffic away from and then back onto Highway 34. It was constructed north of the highway in May 1997 during a railroad overpass project called the Aurora West Viaduct.

At about 8:45 a.m., as she approached the "shoofly" from the east, Schwaninger encountered at least seven signs at different points along the highway warning of the construction zone and diversion of traffic from Highway 34. A reverse curve sign that advised of a 45-m.p.h. speed limit was posted near the "shoofly" entrance. The established highway was blocked by barrels and three barricades where the [\*3] "shoofly" began on the east end of the project. The barricades were "staggered" along the inner edge of the curve, directing traffic from Highway 34 so as to "channel" traffic onto the "shoofly." Each barricade was topped by a yellow "Type A" light which was not on at that time because "Type A" lights are designed to flash only at night regardless of the weather conditions, such as fog. Although she was supposed to move to the right, off the highway and onto the "shoofly," Schwaninger's car proceeded straight, crossed the yellow, solid, double centerline of the road, and entered the eastbound lane. Her car collided with Haghighi's eastbound van as it was about to exit the "shoofly" by turning left to reenter the permanent highway. As a result of the collision, Haghighi and Schwaninger both were killed.

#### PROCEDURAL BACKGROUND

Virginia J. Haghighi (Virginia), Haghighi's wife and his estate's personal representative, filed an amended petition in Hamilton County District Court against the State, pursuant to the State Tort Claims Act, as well as against the project contractor, United Contractors, Inc. (United), and the project subcontractor, All Road Barricades, Inc. (All Road) (collectively [\*4] the defendants), alleging Haghighi's wrongful death. The court reported in a pretrial order that all matters would be tried to a jury but that the jury's verdict with respect to the State would be only advisory. Virginia's amended petition included 13 allegations that the defendants negligently designed and built the "shoofly." The allegations relevant to this appeal are: (1) The "reverse turns" located at the east end of the "shoofly" were built with "turn radii" smaller than provided for by the project's specifications and plans, (2) there was a failure to properly calculate the safe speed for negotiating turns to enter and leave the "shoofly," (3) there were not "steady or flashing burn" lights on the barricades that were properly maintained and operating at the time of the accident, and (4) there was a failure to properly paint appropriate lines, including edge lines and fog lines, on the highway in the area where the

Schwaninger-Haghighi collision occurred.

In her "Answers to Interrogatories," Virginia identified as an expert witness James Summers, a consulting engineer she hired to perform "accident reconstruction," which Summers characterized as "Documenting that site." Virginia [\*5] said that Summers would testify to how far each vehicle skidded before impact, the speed of each vehicle at the start of its respective skid, and the vehicles' speeds at the time of impact. In response to a query about the substance of the facts and opinions to which her experts were expected to testify, Virginia wrote, "Mr. Summers' opinions are based on his education and experience; measurements and observations made at the accident site . . ." Virginia's "Answers to Interrogatories" also mentioned James Loumiet, whose curriculum vitae identified him as a Missouri-based accident reconstructionist who possesses a mechanical engineering degree but who is unlicensed as an engineer. According to Virginia, Loumiet would testify "that the safe design speed of the turn where the accident occurred was 21 miles per hour and that given the difference between the safe speed of the turn and a speed limit of the roadway, the turn was hazardous to the motoring public."

During jury selection, the trial court asked whether any of the prospective jurors were familiar with the case. One juror stated he knew of the case because he had been Schwaninger's insurance agent. The court excused this juror [\*6] without further questioning. At the conclusion of voir dire, Virginia did not pass the jury for cause and moved for a mistrial. The trial judge said, "I tried to handle that as quickly as I could by getting [the juror] in the back of the courtroom, and I guess I just don't see that there was any real violation of the insurance rule." Finding that the juror's statement did not prejudice Virginia, the court overruled her motion for mistrial.

United moved to have Summers' testimony limited to his previously disclosed opinions. United's motion noted that Virginia's opening statement alluded to the fact that Summers would testify to the degree of curvature of the road where the Schwaninger-Haghighi collision occurred. United pointed out that Virginia had not disclosed in her "Answers to Interrogatories" that Summers would testify to the curve radius and that in Summers' deposition, he specifically stated he would offer no opinion of the "geometry." United also introduced two opinion letters from Summers, neither of which included an indication that he was going to testify to the curve radius. The trial court found that Summers' testimony would be limited to the issues addressed in Virginia's [\*7] "Answers to Interrogatories," a prior deposition of Summers, and his letters. According to the court, the defendants would be prejudiced by Summers' testimony about his calculated curve radius of the "shoofly" where the Schwaninger-Haghighi accident occurred because it constituted expert testimony that Virginia failed to disclose in her "Answers to Interrogatories."

Later at trial, Summers explained how he took measurements at the scene and several diagrams of the scene drawn from his measurements and observations were admitted as evidence. Virginia attempted to elicit testimony from him about whether one needed to be an engineer to calculate a curve's radius. The State and United objected on the basis of foundation, the court sustained the objection, and Virginia made an offer of proof. Outside the jury's presence, Summers testified that his calculations showed that the curve radius where the Schwaninger-Haghighi accident occurred measured 198 feet although it was intended to measure 1,909 feet or 582 meters, according to the construction plans. After the offer of proof, the defendants renewed their objection, which the trial court sustained. In short, according to Summers, the curve [\*8] as built was much sharper than the plans called for.

Loumiet testified before the jury that the plans showed that the radius of the first curve on the east end of the "shoofly," where the Schwaninger-Haghighi accident occurred, was to be 582 meters, or 1,910 feet. He said that he reviewed the survey, Summers' diagrams, and photographs of the site to determine that the radius of the curve where the collision occurred was only 205 feet. According to Loumiet, the safe speed to drive the "shoofly," regardless of the weather conditions, was 23 m.p.h. Further, he said that a vehicle driven faster than 45 m.p.h. would lose traction on the curves and its tires would slide. Loumiet also said that in his opinion, the lack of a continuous fog line between Highway 34 and the "shoofly" would confuse drivers, and that such lack, considered together with the other "inadequacies of the work zone," was a proximate cause of the Schwaninger-Haghighi accident.

John Martin, United's supervisor at the time of the Aurora West Viaduct project, testified that he had driven

through the "shoofly" at a speed of 45 m.p.h. or faster without any problems. Martin also testified that he had driven through the construction [\*9] zone during the daytime when visibility was low--and probably while fog was present--and that the traffic control devices were visible. He said he had observed traffic flow through the "shoofly" and that nothing indicated that 45 m.p.h. was an unsafe speed. Russel Higgins, the district construction engineer for the Nebraska Department of Roads at that time, said he drove through the "shoofly" at 55 m.p.h. and experienced no problem keeping his car within its own lane. Higgins also said that the 2-year project was designed in anticipation that inclement weather, including fog, would occur at some time. Martin further testified that the State "staked" the "shoofly" and that United did not doublecheck the measurements because it was the State's responsibility to correctly follow the construction plan. However, he admitted that it was United's responsibility to ensure that the "staking" conformed to the plans, although he observed that surveying was not a bid item in United's contract with the State.

Ross Lyon, a Nebraska State Patrol trooper, testified that he investigated the Schwaninger-Haghighi collision. He said that he had worked as a trooper since 1989 and had investigated traffic [\*10] accidents between that time and the accident at issue here. During direct examination, Virginia established Trooper Lyon's position as an accident investigator for this particular collision and asked him about the tire marks he measured and his testing of the barricade lights. Trooper Lyon testified that it was foggy at the scene of the accident and that he tested at least one of the lights on the three barricades blocking access to the old highway. He noted that when he covered the light with a firefighter's coat in order to simulate darkness, the light did not activate.

On cross-examination, after Virginia's foundation objection was overruled, Trooper Lyon stated that he examined Schwaninger's car after the accident. He testified that he determined from the filaments in her undamaged headlight and taillights that they were not on at the time of the collision. On redirect, Trooper Lyon responded to Virginia's question about examining the headlight filaments at the accident scene by stating that he was trained to conduct such an analysis.

Kevin Brewer, a professor of civil engineering and a consulting engineer specializing in traffic engineering, testified that he had conducted studies [\*11] involving human interaction with traffic control devices. The State asked Brewer whether he was familiar with studies and technical literature showing how drivers "track through curves." Virginia objected that it had not been disclosed that Brewer would opine about how drivers react to traffic control devices, but the court decided the question was within the disclosure made and overruled Virginia's objection. Brewer testified that drivers negotiating curves relied on the centerline of the road for guidance more than the fog line. Brewer also testified that even under low visibility conditions during the day, the reflectivity of the traffic control devices is more useful to drivers than the low-level illumination provided by flashing lights.

Nebraska State Patrol Trooper Dan Bartling testified that he stopped Schwaninger for speeding through the east end of the "shoofly" on August 18, 1997, although he did not testify to the speed at which she was clocked, as the trial court agreed with Virginia that insufficient foundation had been laid concerning the calibration of his radar unit. We do not repeat the details of the attempt to lay foundation.

Richard Kwiatkowski, the Department [\*12] of Roads' manager for the Aurora West Viaduct project, testified that he was required to follow § 422.02 of the "1996 Metric Supplemental Specifications to Standard Specifications for Highway Construction, Series 1985," published by the Nebraska Department of Roads and dealing with temporary traffic control devices. He later referred to that manual as containing only "guidelines," but then again confirmed that he was required to follow § 422.02. Section 422.02(9)(b) provides, "All lights shall be turned on from sunset to sunrise or when visibility is less than 400 m." But Kwiatkowski also testified that United recommended the "Type A" lights which operate only at night regardless of the presence of fog, that these lights are on an approved products list, and that United's recommendation was submitted to the materials and test division of the Department of Roads. Daniel Waddle, a signing and marking engineer in the traffic engineering division of the Department of Roads, testified that the State no longer used "Type C" steady-burning lights because it was difficult to ensure batteries in them were functioning and because the lights were only marginally effective. Kwiatkowski further [\*13] testified that All Road was responsible for locating the traffic control devices and maintaining them, but that All Road cooperated with United to ensure the traffic control devices stayed in the proper position.

At the jury instruction conference, Virginia proposed the addition of two paragraphs to her allegations of negligence against United in instruction No. 6. One paragraph alleged the building of the reverse turns at the east end of the "shoofly" with a smaller radius than provided for in the project's plans and specifications. The other paragraph alleged a failure to equip the barricades with lights activated and operating at the time of the Schwaninger-Haghighi accident. Virginia also proposed including this paragraph in her allegations of negligence against All Road. The trial court included the first paragraph in instruction No. 6 but did not adopt the second paragraph alleging negligence by United and All Road concerning the lights on the barricades.

During closing arguments, United speculated that Summers did not testify to the length of the curve radius of the "shoofly" where the Schwaninger-Haghighi collision occurred either because Summers lacked confidence in making [\*14] that calculation from the measurements he provided in his diagrams or because Virginia did not like the result of his curve radius calculation. Virginia did not object to this characterization of the evidence. In its closing argument, the State said that the contract between it and a contractor may be modified. Virginia objected that the State was not properly characterizing the evidence, but the trial court allowed the State to continue. The State alleged that the contract between it and United was changed to reflect that United would choose the type of lights to use on the barricades and that the State approved the choice of the "Type A" lights, which do not function in the fog except at night.

The jury returned a verdict for United and All Road, and the trial court entered judgment for those defendants. As to the State, the court found that Virginia alleged that it failed to properly design the "shoofly" and improperly determined the safe speed for motorists approaching and driving through the "shoofly." The trial court reviewed the evidence and determined that the State was not negligent in any of the respects alleged by Virginia. The trial court entered judgment for the State [\*15] and dismissed Virginia's amended petition. Virginia appeals as to all defendants.

#### ASSIGNMENTS OF ERROR

Virginia assigns error, restated and reordered as follows, to the trial court's (1) overruling her motion for mistrial made during jury selection; (2) failing to admit Summers' testimony concerning his measurements and calculations of the radius of the curve where the Schwaninger-Haghighi accident occurred; (3) admitting without proper foundation testimony that others had driven through the "shoofly" at 45 m.p.h. or faster without incident; (4) receiving expert testimony from Trooper Lyon regarding his opinion that neither the van's nor the car's headlights were on at the time of the collision; (5) admitting Brewer's opinion of how drivers "track through curves"; (6) admitting Trooper Bartling's testimony that he stopped Schwaninger in the east end of the "shoofly" for exceeding the posted speed limit when there was no established foundation for the traffic stop, i.e., that the radar device was properly calibrated and operating correctly and that the conditions existing at the time of that stop were the same as those that existed the morning of the accident; (7) overruling Virginia's [\*16] objection to the State's comment during closing argument that it had modified its contract with United, on the ground that the statement was not supported by the evidence or pleadings; and (8) failing to instruct the jury on all the theories alleged by Virginia against the defendants when they were supported by the evidence.

#### STANDARD OF REVIEW

With respect to the judgment for the State, [HN1] on an appeal from a judgment rendered in an action brought under the State Tort Claims Act, the findings of the trial court will not be disturbed unless clearly wrong. *Sharkey v. Board of Regents*, 260 Neb. 166, 615 N.W.2d 889 (2000). [HN2] In reviewing a judgment awarded in a bench trial, an appellate court does not reweigh evidence but considers the judgment in the light most favorable to the successful party. *Anderson/Couvillon v. Nebraska Dept. of Soc. Servs.*, 253 Neb. 813, 572 N.W.2d 362 (1998). [HN3] A jury verdict will not be set aside unless clearly wrong, and it is sufficient if any competent evidence is presented to the jury upon which it could find for the successful party. *Patterson v. City of Lincoln*, 250 Neb. 382, 550 N.W.2d 650 (1996). In determining [\*17] the sufficiency of the evidence to sustain a verdict in a civil case, an appellate court considers the evidence most favorably to the successful party and resolves evidential conflicts in favor of such party, who is entitled to every reasonable inference deducible from the evidence. *Id.* Other applicable standards of review will be set forth as

necessary.

#### ANALYSIS

##### *Overruling Motion for Mistrial Made During Voir Dire.*

During jury selection, the court asked, "Do any of you know anything about this case either by talking to someone or reading about it in the newspaper?" One prospective juror said, "Well, I was the insurance agent for Vicki Schwaninger." The court excused the juror without further questioning, but Virginia asserts that the failure to give the jury a limiting instruction to disregard the juror's comment was grounds for a mistrial. She also asserts that the suggestion that Schwaninger possessed "liability coverage is almost certain to be incapable of being removed once the suggestion is set in place." Brief for appellant at 28. Virginia notes that the defendants argued that Schwaninger's negligence was the sole, proximate cause of the collision. She concludes that [\*18] because Schwaninger was not a party to the lawsuit, the juror's comment greatly prejudiced her in that the jury panel had information that a person not present in the lawsuit and whom the defendants blamed for the accident had insurance.

[HN4] A mistrial is properly granted when an event occurs during the course of a trial which is of such a nature that its damaging effects cannot be removed by proper admonition or instruction to the jury and would thus result in preventing a fair trial. *State v. Harker*, 1 Neb. App. 438, 498 N.W.2d 345 (1993). [HN5] A motion for mistrial is directed to the discretion of the trial court. Its ruling will not be disturbed on appeal absent a showing of abuse of that discretion. *Nichols v. Busse*, 243 Neb. 811, 503 N.W.2d 173 (1993). [HN6] Any reference to insurance where its presence or absence is tangential to the facts at issue should be carefully scrutinized. *Stumpf v. Nintendo of America*, 257 Neb. 920, 601 N.W.2d 735 (1999). But, it is not every casual or inadvertent reference to an insurance company in the course of trial that will necessitate a mistrial. *Id.* See *Lange Bldg. & Farm Supply v. Open Circle "R"*, 216 Neb. 1, 342 N.W.2d 360 (1983). [\*19] Whether the disclosure is such as to constitute error depends essentially on the facts and circumstances peculiar to the case under consideration. *Stumpf v. Nintendo of America*, *supra*.

Typically, in cases in which insurance is mentioned and a motion for mistrial follows, the defendant or plaintiff questioned a witness who responded by mentioning the presence or absence of insurance. See, *Lange Bldg. & Farm Supply v. Open Circle "R"*, *supra*; *Stumpf v. Nintendo of America*, *supra*. Here, "insurance" was unexpectedly mentioned during voir dire when the court inquired of the potential jurors' knowledge of the Schwaninger-Haghighi case. It would be difficult to predict that the judge's completely proper question would elicit such a response. In *Bergendahl v. Rabeler*, 131 Neb. 538, 268 N.W. 459 (1936), the Nebraska Supreme Court held that during a proceeding to impanel a jury in an action to recover damages alleged to have arisen from negligence, counsel should scrupulously avoid any act, statement, or question of such a nature as might inform the jurors as to whether or not the defendant is indemnified by one not a party [\*20] to the action against having to pay any verdict the jury may render against him. That holding influenced the decision in *Nama v. Shada*, 150 Neb. 362, 34 N.W.2d 650 (1948), an action for personal injuries and property damage resulting from an automobile accident. But, in *Nama*, the court found that a prospective juror's reference to the defendant's insurance coverage pertained to life, rather than automobile, insurance and that thus, the jury was not misled to believe that the defendant was indemnified against paying damages if a verdict was entered against him.

In the instant case, it was not counsel but the trial judge who asked the question that elicited a response indicating that Schwaninger had an "insurance agent." The prospective juror's response does not inform whether Schwaninger had either liability insurance on her automobile or a possible settlement between Schwaninger's insurance company and Virginia. What one derives from the juror's volunteered statement is open to speculation. The court's phrasing of the question asking whether any of the prospective jurors knew "anything about this case" does not necessarily imply that the insurance agent knew of [\*21] the case because Schwaninger acquired automobile accident insurance through him. It is equally possible that he was Schwaninger's life insurance agent or handled her medical insurance. [HN7] On appeal, the party asserting an abuse of discretion has the burden of proving that claim. *Bailey v. AMISUB*, 1 Neb. App. 56, 489 N.W.2d 323 (1992). The prospective juror's statement is not such that the other prospective jurors could only conclude from it that Schwaninger had automobile liability insurance that had inured to Virginia's benefit. The

prospective juror's statement is not clearly a violation of the rule against mentioning liability insurance in a personal injury action.

The court could have instructed the jury to disregard the mention of Schwaninger's insurance, but Virginia did not request such a limiting instruction. Further, such an instruction obviously runs the risk of calling attention to a matter which may not have been noticed or heard by all prospective jurors. And, the court handled the matter expeditiously by excusing the potential juror without further ado. The trial judge was in the unique position to observe the matter firsthand. On the basis of the record [\*22] before us, we cannot say that the trial court abused its discretion by handling this matter quickly and without fanfare, and we find no basis to say now that a mistrial should have been declared.

*Excluding Testimony of Calculation of "Shoofly" Curve Radius.*

The trial court's decision to limit Summers' testimony to the facts and opinions provided in Virginia's "Answers to Interrogatories" precluded him from testifying to his calculation of the curve radius of the "shoofly" where the Schwaninger-Haghighi collision occurred. Virginia argues that Summers' testimony was not expert opinion testimony, but even if the testimony was so characterized, the defendants would not have been surprised or prejudiced by the admission of Summers' calculation of the curve radius.

[HN8] In proceedings where the Nebraska Rules of Evidence apply, the admission of evidence is controlled by rule and not by judicial discretion, except where judicial discretion is a factor involved in assessing admissibility. *Holden v. Wal-Mart Stores*, 259 Neb. 78, 608 N.W.2d 187 (2000); *Woollen v. State*, 256 Neb. 865, 593 N.W.2d 729 (1999). [HN9] Admission of expert witness testimony is ordinarily [\*23] within the discretion of the trial court, and its ruling will be upheld in the absence of an abuse of discretion. *Id.* See *Fales v. Books*, 5 Neb. App. 372, 558 N.W.2d 831 (1997). An abuse of discretion occurs when the trial judge's reasons or rulings are clearly untenable, unfairly depriving a litigant of a substantial right and denying just results in matters submitted for disposition. *Holden v. Wal-Mart Stores, supra*.

[HN10] If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify thereto in the form of an opinion or otherwise. *Neb. Rev. Stat. § 27-702* (Reissue 1995). Virginia disputes that Summers' calculation of the curve radius of the "shoofly" where the Schwaninger-Haghighi accident occurred from his admissible measurements is an expert opinion such that she needed to disclose it on her "Answers to Interrogatories." She claims it is merely a calculation from known facts.

Virginia failed to specifically reveal in her "Answers to Interrogatories" [\*24] that Summers would testify to the curve radius in response to the defendants' specific request. Subpart "c" of "Interrogatory No. 15" asks for "the substance of the *facts* and the opinions to which the expert is expected to testify." (Emphasis supplied.) Here, the assertion--be it fact, opinion, or some combination thereof--that the curve radius was too short, making the curve too sharp, which in turn made the posted speed limit too high, is the core of Virginia's claim and her expert's supporting testimony. We have no trouble is concluding that disclosure of the radius of the curve should have been made.

Virginia also argues that the defendants would not have been prejudiced by this evidence from Summers. But, the allegedly "too short" radius of the curve was the key to Virginia's case, and failing to disclose it cannot help but prejudice the defendant's trial preparation. While she contends that her "Answers to Interrogatories" disclosed that Summers made observations and measurements at the accident site, we think that the request for "[a] summary of the grounds of each opinion" mandates disclosure of why the speed limit was too high, which requires disclosure of the curve [\*25] radius. Virginia should have disclosed this expected testimony.

She also contends that Summers' diagrams necessarily incorporating the curve's radius were disclosed before trial and admitted into evidence. But, nowhere on the diagrams admitted into evidence do we see Summers' calculation of the curve's radius. Virginia further contends that her other expert, Loumiet, used this information to calculate the curve radius; that the defendants knew this calculation was a key issue of the case; and that they were prepared to address it

via their own experts' testimony.

But, the point here is that "trial by ambush and surprise" has been replaced by disclosure, and disclosure of this key portion of Summers' findings, regardless of whether it was a fact he found or an opinion he held, was not made. [HN11] Determination of an appropriate sanction for failure to comply with a discovery request rests with the trial court's discretion, which will not be disturbed on appeal absent a showing of an abuse of that discretion. *Booth v. Blueberry Hill Restaurants*, 245 Neb. 490, 513 N.W.2d 867 (1994). Preclusion of an expert witness' testimony (or a portion thereof), as a sanction for noncompliance [\*26] with the discovery rules, may be an appropriate sanction. *Norquay v. Union Pacific Railroad*, 225 Neb. 527, 407 N.W.2d 146 (1987).

Moreover, Loumiet testified that he used Summers' measurements to determine the calculation of the curve radius, and he testified to that result. Notably, Loumiet's measurement of the curve radius corroborated the measurement Summers would have testified to, had he been permitted to do so by the court. Thus, Virginia was able to get Summers' curve radius number before the jury and judge, albeit by her other expert.

Nonetheless, Virginia contends that exclusion of Summers' findings actually prejudiced her because it gave the appearance that his findings differed from Loumiet's results. Virginia supports this last contention by pointing out that United mentioned during closing arguments that Virginia did not ask Summers about the curve radius for fear that his opinion would contradict Loumiet's opinion based on Summers' measurements. While the comments of counsel for United do not properly reflect why Summers did not testify on this point and constitute an inaccurate and improper commentary on the evidence, the record shows that Virginia [\*27] did not object; nor is this matter assigned and argued as error. Thus, while the comment was improper, as counsel knew that Summers' testimony had been restricted by the court's ruling, the matter was not preserved for appellate review. *State v. Lotter*, 255 Neb. 456, 586 N.W.2d 591 (1998) (objection made to opposing counsel's argument after jury has retired generally is not timely and will not be reviewed on appeal); *Martindale v. Weir*, 254 Neb. 517, 577 N.W.2d 287 (1998) [HN12] (in order to preserve, as ground for appeal, opponent's misconduct during closing argument, aggrieved party must have objected to improper remarks no later than at conclusion of argument). In conclusion, the remarks made during closing do not make the trial court's ruling excluding Summers' testimony of the curve radius of the "shoofly" where the Schwaninger-Haghighi accident occurred an abuse of its discretion.

#### *Admissibility of Testimony of Speeds Driven Through "Shoofly."*

Virginia asserts that the trial court abused its discretion by admitting the testimony of Martin and Higgins that they had driven the "shoofly" at speeds of or exceeding 45 m.p.h. and had seen others driving [\*28] the "shoofly" without incident, because the defendants failed to establish the proper foundation and relevance of this testimony. She claims this testimony was unreliable, inadmissible, and prejudicial. Virginia bases this assertion on the fact that the witnesses did not testify that the weather and traffic conditions existing at the time they passed through the "shoofly" were substantially similar to the conditions existing at the time of the Schwaninger-Haghighi collision.

Martin testified that he drove through the "shoofly" several times a day during the construction period when visibility was low--and probably while fog was present--and that he could see the traffic control devices. Further, he testified that he observed others drive through the "shoofly" without problem and that 45 m.p.h. did not appear to be an unsafe speed. Higgins said he drove through the "shoofly" on a weekly basis and experienced no problem keeping his car in its lane while driving 55 m.p.h. Higgins added that the 2-year construction project was designed with the knowledge that inclement weather, including fog, would occur during that span of time.

We analyze Virginia's argument about this evidence from [\*29] the standpoint of relevancy. [HN13] Relevant evidence means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence. *Neb. Rev. Stat. § 27-401* (Reissue 1995). [HN14] The exercise of judicial discretion is implicit in determinations of relevancy, and a trial court's decision regarding relevancy will not be reversed absent an abuse of discretion. *Sacco v. Carothers*, 257 Neb.

672, 601 N.W.2d 493 (1999). To constitute reversible error in a civil case, the admission or exclusion of evidence must unfairly prejudice a substantial right of a litigant complaining about evidence admitted or excluded. *Id.*

One of Virginia's allegations is that the defendants were negligent in setting a 45-m.p.h. speed limit for the "shoofly" because it was an unsafe speed given her experts' calculation of the radius of the curve. Loumiet testified that the speed at which the "shoofly" curve could be driven without feeling excessive amounts of discomfort that would prompt the driver to take some "evasive" action, such as braking or flattening the [\*30] path of the curve, was 23 m.p.h. He also testified that the critical speed for that curve was 45 m.p.h. Loumiet defined critical speed as the speed above which a vehicle's tires lose traction on the roadway and the vehicle begins to slide. Loumiet ultimately concluded that the advisory speed limit for the curve should have been 20 m.p.h. The defendants' witnesses, Martin and Higgins, testified that they drove through the "shoofly" at 45 m.p.h. or faster on a regular basis and did not feel discomfort. Neither did their vehicles skid sideways, as Loumiet's testimony would have them doing at that speed. Their testimony was relevant to determining whether the defendants were negligent in approving a 45-m.p.h. advisory speed limit for the "shoofly." Additionally, the testimony rebutted Loumiet's testimony that the advisory speed limit should have been 20 m.p.h., regardless of the weather conditions. Martin and Higgins were closely acquainted with the "shoofly" and had driven it many times, and as mentioned above, their personal experience was relevant. It was not reversible error for the trial court to admit their testimony as to this issue.

*Admissibility of Opinion of Each Vehicle's [\*31] Use of Headlights.*

Trooper Lyon testified over Virginia's objection that his examination of both vehicles' headlight and taillight filaments revealed that neither vehicle's lights were on at the time of the Schwaninger-Haghighi collision. Virginia argues that the trial court should have sustained her objection to his testimony because the defendants failed to establish Trooper Lyon's expertise in this area.

[HN15] There is no exact standard for determining when one qualifies as an expert, and a trial court's factual finding that a witness qualifies as an expert will be upheld on appeal unless clearly erroneous. *Main Street Movies v. Wellman*, 251 Neb. 367, 557 N.W.2d 641 (1997). [HN16] Whether one qualifies as an expert depends on the factual basis or reality underlying the witness' title or claim to expertise. *Id.* Experts or skilled witnesses will be considered qualified if, and only if, they possess special skill or knowledge respecting the subject matter involved so superior to that of persons in general as to make the expert's formation of a judgment a fact of probative value. *Ashby v. First Data Resources*, 242 Neb. 529, 497 N.W.2d 330 (1993).

In the [\*32] instant case, the day after Trooper Lyon testified, Virginia made a motion to strike all of his testimony because he was not qualified as an "expert filament reader." But, the trial court agreed with the defendants' argument that Virginia had qualified Trooper Lyon as such an expert when she asked on redirect examination whether he performed the analysis at the accident site and he replied that he "had some training on that." Therefore, the court overruled Virginia's motion to strike. We note that Virginia also qualified Trooper Lyon as an accident reconstruction expert during her direct examination of him in order to elicit his testimony as to the length of tire marks at the scene. In our opinion, headlight filament analysis is part of accident reconstruction and Trooper Lyon's opinion on this issue was relevant and of some probative value. Therefore, we find that the trial court did not clearly err in determining that Virginia herself qualified Trooper Lyon as an expert whose opinion as to whether the Schwaninger car's and Haghighi van's lights were on or off at the time of the accident should be admitted. Virginia also argues that the admission of Trooper Lyon's testimony prejudiced [\*33] her because it was offered to rebut her evidence that fog severely restricted the drivers' visibility or to demonstrate Schwaninger's negligence. However, the evidence was admitted without limitation, and the jury was free to use it for any purpose--including reasoning that if the vision of the drivers was restricted by the fog, they would have had their lights on.

*Expert's Testimony Regarding How Drivers "Track Through Curves."*

Over Virginia's objection, Brewer testified concerning various studies and technical literature on which he based

his opinion of how drivers "track through curves." Virginia alleges a lack of evidence that the driving conditions analyzed in the "studies and technical literature" were similar to those existing at the time of the Schwaninger-Haghighi collision.

We again begin with the proposition that the admissibility of this testimony is determined by its relevance. See § 27-401. The exercise of judicial discretion is implicit in determinations of relevancy, and a trial court's decision regarding relevancy will not be reversed absent an abuse of discretion. *Sacco v. Carothers*, 257 Neb. 672, 601 N.W.2d 493 (1999).

In the instant case, [\*34] Loumiet testified that the fog line as it existed before construction of the "shoofly" had not been completely obliterated as required and that a gap existed between the old and new fog lines. According to Loumiet, pavement markings in areas of poor visibility are critical for drivers to maintain their position on the road. He opined that the failure to erase the old fog line and create a continuous fog line between Highway 34 and the "shoofly" was evidence of negligence. He further opined that the "inadequacies of the work zone" were a causative factor in the Schwaninger-Haghighi collision. Therefore, Brewer's testimony that drivers "track through curves" by relying on the centerline rather than the fog line was offered to rebut Loumiet's testimony and was relevant. It is, of course, not for us to choose between the two witnesses.

Virginia further alleges that Brewer's opinions were not revealed by the State in its pretrial disclosures. She concludes that because the court sustained the defendants' objections to Summers' testimony, the trial court abused its discretion by failing to rule consistently concerning the admissibility of expert testimony, thereby prejudicing Virginia. [\*35] We observe that the State revealed that "Dr. Brewer is expected to render the following opinions: 1. The roadway containing the location where the collision occurred was properly signed, marked and maintained under generally accepted engineering standards." If, as Brewer opined, drivers "track through curves" using the centerline, then the "shoofly" was at least arguably properly marked as set forth in the "defendant's third supplemental answer to plaintiff's interrogatories." This testimony contrasts with Loumiet's testimony that a continuous fog line was needed to qualify the "shoofly" as properly marked.

Admission of expert witness testimony is ordinarily within the discretion of the trial court, and its ruling will be upheld in the absence of an abuse of discretion. *Woollen v. State*, 256 Neb. 865, 593 N.W.2d 729 (1999). See *Fales v. Books*, 5 Neb. App. 372, 558 N.W.2d 831 (1997). We find no abuse of discretion in the trial court's admission of Brewer's testimony, because the State's disclosure of Brewer's expected opinions was sufficiently broad to include his testimony that drivers "track through curves" by using the centerline rather than the [\*36] fog line.

*Testimony Schwaninger Was Previously Stopped for Exceeding Speed Limit.*

Following her voir dire examination of Trooper Bartling, Virginia objected to further testimony from him because he was not able to provide sufficient foundation to show that his radar unit was properly calibrated when he stopped Schwaninger on August 18, 1997. The problem was that Trooper Bartling was unable to say that the tuning forks used to check the accuracy of the radar unit had been calibrated within the preceding year. The trial court sustained Virginia's objection to the extent that Trooper Bartling was not allowed to testify to the speed at which he clocked Schwaninger on August 18. After the ruling on this objection, Trooper Bartling did testify, without objection, that he issued Schwaninger a citation for speeding in the "shoofly" where the posted speed limit was 45 m.p.h.

Virginia cites *State v. Lomack*, 239 Neb. 368, 476 N.W.2d 237 (1991), for the proposition that a lack of foundation establishing that the radar device used by Trooper Bartling to clock Schwaninger was calibrated and operating properly precludes testimony that Schwaninger had been stopped for [\*37] speeding. We do not disagree with this broad proposition because *Neb. Rev. Stat. § 60-6,192* (Reissue 1998) provides that "the results of such radio microwave, mechanical, or electronic speed measurement device may be accepted as competent evidence of the speed of such motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue" when the equipment is properly

calibrated. Here, proper calibration was not shown and the trial court did not let in the evidence of the speed at which Schwaninger was clocked. However, the question largely involves whether her actual speed on August 18, 1997, was "in issue." *State v. Hill*, 254 Neb. 460, 577 N.W.2d 259 (1998), is an example of where speed is not at issue. There, the court said that where the evidence of speed was not to establish a driver's rate of travel on a speeding charge, but was introduced as one piece of evidence tending to establish that the driver operated a vehicle in such a manner as to indicate an indifferent or wanton disregard for the safety of persons or property, that speed was not "at issue" under § 60-6,192 and therefore did not need to be corroborated [\*38] by a microwave, mechanical, or electronic speed measurement device. 254 Neb. at 465, 577 N.W.2d at 264. [HN17] Clearly, proof of speed for purposes besides a criminal conviction for speeding can be by other means such as visual observations. *Taylor v. Wimes*, 10 Neb. App. 432, 632 N.W.2d 366 (2001).

Here, the matter at issue was not whether Schwaninger had committed a crime on August 18, 1997, by driving at a particular speed. Therefore, her actual speed on August 18 was not in issue. Instead, the evidence of the prior speeding ticket went to the issue of whether she had knowledge or notice of the posted speed limit in the "shoofly." The issuance of the speeding ticket, regardless of how fast she was clocked, tends to prove her knowledge of the speed limit. Additionally, it is of no small significance that Trooper Bartling testified without objection that he wrote Schwaninger a citation for speeding.

As part of this assignment of error, Virginia again argues the defendants' failure to establish that the conditions existing on the date of Trooper Bartling's stop of Schwaninger were the same conditions as existed at the time of the Schwaninger-Haghighi accident. [\*39] While Virginia repeatedly advances what we take to be a foundational argument that the defendants' evidence failed to show the same conditions as those that existed the morning of the accident, our basic difficulty with this argument is that the core of Virginia's case does not depend on the weather or lighting conditions. Instead, her case rests on the premise that the curve was built too sharp, making the posted speed limit of 45 m.p.h. the crucial speed at which a vehicle could not hold to its lane in the curve--regardless of conditions. Thus, the conditions at the time of the accident play little or no role in Virginia's proof of negligence. And, we might add that even if such conditions were at issue, it was Schwaninger's duty as the driver of a vehicle to take the conditions into account in determining the speed she would drive the "shoofly." [HN18] *Neb. Rev. Stat., § 60-6,185* (Reissue 1998) provides:

No person shall drive a vehicle on a highway at a speed greater than is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing. A person shall drive at a safe and appropriate speed when approaching and [\*40] crossing an intersection or railroad grade crossing, when approaching and going around a curve, when approaching a hillcrest, when traveling upon any narrow or winding roadway, and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions. Virginia characterizes Trooper Bartling's testimony that Schwaninger was exceeding the posted advisory speed limit of 45 m.p.h. while driving through the "shoofly" a month before the collision between her car and the Haghighi van as evidence of a similar occurrence.

But, in addition to proof of notice of the posted speed limit, it is also evidence introduced to rebut Loumiet's testimony that a vehicle traveling in its own lane could not navigate through the eastern end of the "shoofly" at a speed exceeding 45 m.p.h. without the driver's losing control--regardless of the environmental conditions. The admission of Trooper Bartling's testimony without proof of the same conditions as existed the morning of the accident does not render his testimony inadmissible on the basis of foundation or relevancy, given the absolute position of Virginia's experts that this curve could not be driven at 45 [\*41] m.p.h. In conclusion, the trial court did not abuse its discretion by admitting the testimony from Trooper Bartling that he issued a speeding citation to Schwaninger on August 18, 1997, while she was driving in the "shoofly" which had a posted speed limit of 45 m.p.h.

*Contract Modification Alleged by  
State in its Closing Argument.*

Virginia notes that neither the State nor United ever alleged in their pleadings a modification of the contract between them or an agreement not to enforce certain contractual provisions. Virginia referred specifically to § 422.02(9)(b) of the "1996 Metric Supplemental Specifications to Standard Specifications for Highway Construction, Series 1985," published by the Nebraska Department of Roads, which provides, "All lights shall be turned on from sunset to sunrise or when visibility is less than 400 m." She points out that Kwiatkowski testified that these standard specifications became part of every construction contract in the state and were in force at the time of this construction project. Kwiatkowski also testified that he was required to follow § 422.02. But, the State said during closing arguments that it and United agreed not to enforce [\*42] a provision of the contract, which agreement shifted the burden of proposing the type of lights used to United, subject to the State's approval of that recommendation. Virginia objected, citing mischaracterization of the evidence, but the trial court allowed the State to "continue." She argues that she was prejudiced by the State's closing statement.

[HN19] Conduct of final argument is within the discretion of the trial court, and absent an abuse of that discretion, the trial court's ruling regarding final argument will not be disturbed. *Haag v. Bongers*, 256 Neb. 170, 589 N.W.2d 318 (1999); *Bailey v. AMISUB*, 1 Neb. App. 56, 489 N.W.2d 323 (1992). Our review of the record shows that Kwiatkowski testified that United recommended "Type A" lights for use on the barricades although they do not meet the requirement of activating when visibility is less than 400 meters because they flash only at night. And, Kwiatkowski testified that these lights were on the State's approved products list and that United's recommendation to use "Type A" lights was submitted to the materials and test division of the Department of Roads for the State's approval. Clearly, there was [\*43] evidence of a contractual modification from Kwiatkowski's uncontroverted testimony that United was allowed to recommend the type of lights used on the barricades, albeit subject to the State's approval. Thus, this assignment of error is without merit.

*Statement of Case: Content of Jury Instruction No. 6.*

Virginia asserts that at the jury instruction conference, she requested the addition of two paragraphs to her allegations of negligence against United set forth in instruction No. 6, and that the court erred by not including these paragraphs in that instruction. One paragraph reads, "In building the reverse turns at the east edge of the construction site with a radius smaller than that provided for in the plans and specifications in the project." Our review of the record shows that the trial court used this precise language. Thus, this assignment of error lacks merit.

The other requested paragraph reads, "In failing to equip the barricades of the subject work zone with lights activated and operating at the time of the accident." Virginia also requested that the court add this paragraph to the allegations of negligence made against All Road. Virginia argues that because she presented [\*44] evidence of these defendants' duties to ensure light activation and operation, as found in the "1996 Supplemental Specifications to Standard Specifications for Highway Construction, Series 1985," the court's failure to instruct the jury on this theory prevented the jury from considering the evidence against either of these defendants.

[HN20] Whether a jury instruction given by a trial court is correct is a question of law. *Nebraska Nutrients v. Shepherd*, 261 Neb. 723, 626 N.W.2d 472 (2001). When reviewing questions of law, an appellate court has an obligation to resolve the questions independently of the conclusion reached by the trial court. *Id.* In an appeal based on a claim of an erroneous jury instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant. *Id.* To establish reversible error from a trial court's refusal to give a requested instruction, an appellant must prove that (1) the tendered instruction is a correct statement of the law, (2) the tendered instruction is warranted by the evidence, and (3) the appellant was prejudiced by the court's refusal [\*45] to give the tendered instruction. *Id.*; *Austin v. State Farm Mut. Auto. Ins. Co.*, 261 Neb. 697, 625 N.W.2d 213 (2001).

The evidence shows that United recommended the "Type A" lights used on the barricades and had some responsibility for maintaining the position of the barricades. The evidence also shows that All Road was responsible for maintaining the lights, i.e., ensuring their functioning. And, although it was foggy the morning of the

Schwaninger-Haghighi accident, the lights were not meant to be activated during the day even by fog. Trooper Lyon's testimony was that a light on a barricade failed to activate when he tested it by draping a firefighter's coat over it. Thus, there was evidence that the lights may not have been functioning as intended, but the lights used would not have been on at the time of the accident in any event because it was daylight.

The court did not give a specific instruction about the lights, but, rather, instructed the jury that Virginia claimed that United and All Road were negligent "in erecting and maintaining signs, barricades, lights, and pavement markings in such a manner as to confuse or disorient motorists traveling around [\*46] and through the construction site." Thus, the matter of whether the lights were proper was clearly before the jury for its consideration.

[HN21] Moreover, all the jury instructions must be read together, and if, taken as a whole, they correctly state the law, are not misleading, and adequately cover the issues supported by the pleadings and the evidence, there is no prejudicial error necessitating a reversal. *Sedlak Aerial Spray v. Miller*, 251 Neb. 45, 555 N.W.2d 32 (1996); *Fales v. Books*, 5 Neb. App. 372, 558 N.W.2d 831 (1997). The trial court's broad instruction on signage and lights certainly includes Virginia's allegation that United and All Road failed to equip the barricades with lights which should have been operating at the time of the accident. The instruction encompasses Virginia's allegation that the lights on the barricades were not the proper type of light and did not function as would be expected at the time of the accident. Therefore, we conclude that this assignment of error is without merit.

#### CONCLUSION

We have considered the entire record in light of the assignments of error and find no error. Thus, we affirm the jury's verdict for United [\*47] and All Road, as well as the court's order finding for the State and dismissing Virginia's amended petition.

Affirmed.

Questioned

As of: Jan 31, 2007

**State of Nebraska, Appellee, v. Russell J. Hiemstra, Appellant.****No. A-97-526.****NEBRASKA COURT OF APPEALS*****6 Neb. App. 940; 579 N.W.2d 550; 1998 Neb. App. LEXIS 72*****May 5, 1998, Filed**

**PRIOR HISTORY:** [\*\*\*1] Appeal from the District Court for Buffalo County, John P. Icenogle, Judge, on appeal thereto from the County Court for Buffalo County, Graten D. Beavers, Judge.

**DISPOSITION:** AFFIRMED IN PART, AND IN PART REVERSED AND REMANDED FOR A NEW TRIAL.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed an order from the District Court for Buffalo County (Nebraska), which denied his motion to suppress and affirmed a trial court's order convicting him of driving under the influence (DUI) of an alcoholic liquor or drug.

**OVERVIEW:** Defendant was convicted in the trial court following a jury trial of DUI. Defendant appealed to the district court, which affirmed the trial court's judgment of conviction. On further appeal, defendant argued that his constitutional rights were violated when his vehicle was stopped for speeding and that the trial court erred in admitting the results of his blood test and in instructing the jury as to the meaning of "driving under the influence." The court affirmed in part and in part reversed and remanded for a new trial. The court concluded that an initial stop did not violate defendant's constitutional rights and that defendant was not prejudiced by the trial court's refusal to give his suggested jury instruction. The court found, however, that the trial court erred in admitting defendant's blood test results because the state failed to show that a qualified person, pursuant to *Neb. Rev. Stat. § 60-6,201*, drew defendant's blood. The court concluded that when read in their entirety, the jury instructions accurately and fairly presented the law of DUI.

**OUTCOME:** The court affirmed the district court's ruling denying defendant's motion to suppress, but reversed the district court's judgment affirming defendant's conviction for DUI and remanded the cause for a new trial.

**CORE TERMS:** blood, blood test, machine, probable cause, driving, speed, urine test, alcohol, motion to suppress, jury instruction, admitting, correctly, testing, breath, drawing, prejudiced, speeding, tendered, foot, motor vehicle, speed limit, jury trial, corroborated, licensed, miles, electronic, mechanical, microwave, reagent, ampoule

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > Credibility of Witnesses******Criminal Law & Procedure > Witnesses > Credibility******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN1] In reviewing a criminal conviction, it is not the province of the appellate court to resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. Such matters are for the finder of fact, and the verdict of the jury must be sustained if, taking the view most favorable to the state, there is sufficient evidence to support it. With regard to questions of law, an appellate court is obligated to reach a conclusion independent of the decision reached by the trial court.

***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review******Civil Procedure > Appeals > Standards of Review > De Novo Review******Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > Findings of Fact***

[HN2] Regarding motions to suppress, the Nebraska Supreme Court has recently held that ultimate determinations of reasonable suspicion and probable cause are reviewed de novo and findings of fact are reviewed for clear error, giving due weight to the inferences drawn from those facts by the trial judge. In reviewing the trial court's ruling on a motion to suppress, an appellate court considers all the evidence from the trial as well as from the hearing on the motion.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN3] The test to determine if an investigative stop was justified is whether the police officer had a reasonable suspicion, based on articulable facts, which indicated that a crime had occurred, was occurring, or was about to occur and that the suspect might be involved. In addition, when an officer observes a traffic offense -- however minor -- he has probable cause to stop the driver of the vehicle.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN4] Neb. Rev. Stat. § 60-6, 192 (Reissue 1993) states: Determinations made regarding the speed of any motor vehicle based upon the visual observation of any peace officer, while being competent evidence for all other purposes, shall be corroborated by the use of a radio microwave, mechanical, or electronic speed measurement device. The results of such radio microwave, mechanical, or electronic speed measurement device may be accepted as competent evidence of the speed of such motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Testimony > Experts > Criminal Trials***

[HN5] When testimony regarding speed is used to establish some charge other than speeding, an officer's testimony need not be corroborated.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility******Evidence > Scientific Evidence > Blood Alcohol******Healthcare Law > Business Administration & Organization > Licenses > General Overview***

[HN6] The drawing of blood and the admissibility of test results are controlled by Neb. Rev. Stat. § 60-6, 201 (Reissue 1993), which provides in part:(3) To be considered valid, tests of blood shall be performed according to methods approved by the Department of Health and by an individual possessing a valid permit issued by such department for such purpose, except that a physician, registered nurse, or other trained person employed by a licensed institution or facility which is defined in Neb. Rev. Stat. § 71-2017.01 may withdraw blood for the purpose of a test to determine the

alcohol concentration.

***Evidence > Testimony > Lay Witnesses > Personal Knowledge***

[HN7] Pursuant to Neb. Evid. R. 602, a witness may not testify to something of which the witness has no personal knowledge. *Neb. Rev. Stat. § 27-602* (Reissue 1995).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

***Evidence > Scientific Evidence > Blood Alcohol***

***Evidence > Scientific Evidence > Blood & Bodily Fluids***

[HN8] While the police cannot hamper a motorist's efforts to obtain independent testing, they are under no duty to assist in obtaining such testing beyond allowing telephone calls to secure the test.

***Evidence > Scientific Evidence > Blood Alcohol***

[HN9] The fact that the sealed ampoules are delivered by the manufacturer of the breathalyzer machine for exclusive use in such machine plus the additional fact of regular spot checking of the ampoules is sufficient prima facie proof that the chemicals in any one ampoule are of the proper kind and mixed to the proper proportion.

***Civil Procedure > Appeals > Standards of Review > Reversible Errors***

***Criminal Law & Procedure > Jury Instructions > Requests to Charge***

***Criminal Law & Procedure > Appeals > Reversible Errors > General Overview***

[HN10] To establish reversible error from a court's refusal to give a requested instruction, an appellant has the burden to show that (1) the tendered instruction is a correct statement of the law; (2) the tendered instruction is warranted by the evidence; and (3) the appellant was prejudiced by the court's refusal to give the tendered instruction. In an appeal based on the claim of an erroneous instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant.

***Criminal Law & Procedure > Jury Instructions > Particular Instructions > Use of Particular Evidence***

***Criminal Law & Procedure > Appeals > Standards of Review > Harmless & Invited Errors > General Overview***

[HN11] Jury instructions must be read as a whole, and if they fairly present the law so that the jury could not be misled, there is no prejudicial error.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Implied Consent > Warning Requirements***

***Criminal Law & Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Evidence***

***Evidence > Procedural Considerations > Rulings on Evidence***

[HN12] In a jury trial of a criminal case, an erroneous evidential ruling results in prejudice to a defendant unless the state demonstrates that the error was harmless beyond a reasonable doubt. An error is harmless when the improper admission of evidence did not materially influence the jury to reach a verdict adverse to the substantial rights of the defendant.

**HEADNOTES: 1. Convictions: Appeal and Error.** In reviewing a criminal conviction, it is not the province of the appellate court to resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. Such matters are for the finder of fact, and the verdict of the jury must be sustained if, taking the view most favorable to the State, there is sufficient evidence to support it.

2. **Judgments: Appeal and Error.** With regard to questions of law, an appellate court is obligated to reach a conclusion independent of the decision reached by the trial court.
3. **Probable Cause: Appeal and Error.** Determinations of reasonable suspicion and probable cause are reviewed de novo and findings of fact are reviewed for clear error, giving due weight to the inferences drawn from those facts by the trial judge.
4. **Motions to Suppress: Appeal and Error.** In reviewing the trial [\*\*\*2] court's ruling on a motion to suppress, an appellate court considers all the evidence from the trial as well as from the hearing on the motion.
5. **Criminal Law: Investigative Stops: Police Officers and Sheriffs: Probable Cause.** The test to determine if an investigative stop was justified is whether the police officer had a reasonable suspicion, based on articulable facts, which indicated that a crime had occurred, was occurring, or was about to occur and that the suspect might be involved.
6. **Motor Vehicles: Investigative Stops: Police Officers and Sheriffs: Probable Cause.** When an officer observes a traffic offense -- however minor -- he has probable cause to stop the driver of the vehicle.
7. **Criminal Law: Motor Vehicles: Police Officers and Sheriffs: Testimony: Corroboration.** When testimony regarding speed is used to establish some charge other than speeding, the officer's testimony need not be corroborated.
8. **Trial: Evidence: Blood, Breath, and Urine Tests.** The drawing of blood and the admissibility of test results are controlled by *Neb. Rev. Stat. § 60-6,201* (Reissue 1993).
9. **Administrative Law: Licenses and Permits: Health [\*\*\*3] Care Providers: Blood, Breath, and Urine Tests.** To be considered valid, tests of blood shall be performed according to methods approved by the Department of Health and by an individual possessing a valid permit issued by such department for such purpose, except that a physician, registered nurse, or other trained person employed by a licensed institution or facility which is statutorily defined may withdraw blood for the purpose of a test to determine the alcohol concentration.
10. **Rules of Evidence: Witnesses: Testimony.** Pursuant to Neb. Evid. R. 602, *Neb. Rev. Stat. § 27-602* (Reissue 1995), a witness may not testify to something of which the witness has no personal knowledge.
11. **Drunk Driving: Police Officers and Sheriffs: Blood, Breath, and Urine Tests.** While the police cannot hamper a motorist's efforts to obtain independent testing, they are under no duty to assist in obtaining such testing beyond allowing telephone calls to secure the test.
12. **Blood, Breath, and Urine Tests: Witnesses: Testimony.** A competent witness must establish where the NALCO calibration standard used to determine if a Breathalyzer machine is operating correctly came [\*\*\*4] from, how it was received, under what conditions it was kept and preserved, and what spot checks were made to determine its validity.
13. **Jury Instructions: Proof: Appeal and Error.** To establish reversible error from a court's refusal to give a requested instruction, an appellant has the burden to show that (1) the tendered instruction is a correct statement of the law; (2) the tendered instruction is warranted by the evidence; and (3) the appellant was prejudiced by the court's refusal to give the tendered instruction.
14. **Jury Instructions: Proof: Appeal and Error.** In an appeal based on the claim of an erroneous instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant.
15. **Jury Instructions: Appeal and Error.** Jury instructions must be read as a whole, and if they fairly present the law

so that the jury could not be misled, there is no prejudicial error.

**16. Criminal Law: Trial: Juries: Evidence: Appeal and Error.** In a jury trial of a criminal case, an erroneous evidential ruling results in prejudice to a defendant unless the State [\*\*\*5] demonstrates that the error was harmless beyond a reasonable doubt.

**17. Criminal Law: Trial: Juries: Evidence: Convictions: Appeal and Error.** After a jury trial where prejudicial evidence was erroneously admitted, if sufficient evidence exists to support the conviction, the cause may be remanded for further proceedings, but if the evidence is not sufficient, the cause must be dismissed.

**COUNSEL:** David W. Jorgensen, of Nye, Hervert, Jorgensen & Watson, P.C., for appellant.

Don Stenberg, Attorney General, and Jay C. Hinsley for appellee.

**JUDGES:** HANNON, IRWIN, and MUES, Judges.

**OPINION BY:** HANNON

**OPINION:** [\*942]

[\*\*554] HANNON, Judge.

The appellant, Russell J. Hiemstra, was convicted following a jury trial in Buffalo County Court of driving under the influence (DUI) of an alcoholic liquor or drug. The county court sentenced Hiemstra to 6 months' probation, fined him \$ 250, ordered him to pay court costs, suspended his driving privileges for 60 days, and ordered him to provide the court with written proof of his attendance at an alcohol education class and three Alcoholics Anonymous classes. Hiemstra appealed to the district court, which affirmed the county court's judgment of conviction. Hiemstra [\*\*\*6] now appeals to this court, arguing that his constitutional rights were violated when his vehicle was stopped for speeding and that the trial court erred in admitting the results of his blood test and in instructing the jury as to the meaning of "driving under the influence." We conclude that the initial stop did not violate Hiemstra's constitutional rights and that Hiemstra was not prejudiced by the trial court's refusal to give his suggested jury instruction. However, we find that the trial court erred in admitting the blood test results. Therefore, we affirm the trial court's ruling denying Hiemstra's motion to suppress, but we reverse the conviction and remand the cause for a new trial.

#### I. FACTUAL BACKGROUND

The following evidence was presented at the hearing on Hiemstra's motion to suppress. At approximately 1:10 a.m. on August 25, 1996, Officer Kevin Thompson, who testified he was trained to visually estimate speed, was patrolling the downtown Kearney, Nebraska, area when he visually observed Hiemstra's vehicle going too fast. Thompson then followed Hiemstra's vehicle, and Thompson's speedometer indicated Hiemstra was driving faster than 45 miles per hour. Thompson estimated [\*\*\*7] that both his and Hiemstra's vehicles were traveling approximately 20 miles over the speed limit.

Thompson testified that he stopped the vehicle and that when he first made contact with Hiemstra, he detected the odor of alcohol and saw beer cans throughout the vehicle as well as two [\*943] coolers. Thompson also noticed that Hiemstra's speech was slurred. Thompson gave the following testimony:

Q- When you first initiated the traffic stop and approached the vehicle, what did you say to the driver?

A- I asked him if he knew why he was being pulled over.

Q- And how did he respond?

A- He just said that he was being stupid.

Q- And did he say anything further?

A- And I asked him if -- what he meant by that and he said because he was speeding.

Both Thompson and Hiemstra returned to the police car, where Hiemstra performed several sobriety tests. Hiemstra was instructed to repeat the letters of the alphabet. Thompson testified that Hiemstra did not commit any letter errors but that there were slurs in his speech. Hiemstra was then asked to count from 20 to 39 and then from 39 back down to 20. Thompson testified there were no numerical errors from 20 to 39, just slurs in Hiemstra's speech. [\*\*\*8] When counting from 39 to 20, Hiemstra stopped at 25, asked Thompson if that was sufficient, and was told to continue as instructed.

Hiemstra was then instructed to stand and raise either foot approximately 3 to 6 inches off the ground and count from 1,001 to 1,030. Thompson told Hiemstra that after completing the test, he was to put his foot down and say "stop." Thompson testified that on his first attempt, Hiemstra put his foot down on the count of 3. On his second attempt, Hiemstra put his foot down on the count of 3, continued, and then put his foot down on the count of 9. On the third attempt, Hiemstra put his foot down on the count of 12. Finally, Hiemstra was instructed to perform the walk-and-turn sobriety test. Thompson testified that Hiemstra missed three heel-to-toe steps on the first set of nine, missed seven of the second set of nine, and did not count out loud as instructed.

Thompson testified that Hiemstra smelled of alcohol and that his eyes were bloodshot, his speech was slurred at times, and his balance and mental state were impaired. Thompson testified that based on his experience [\*\*555] as an officer, his training in DUI investigations, and his personal experience with [\*\*\*9] alcohol, he [\*944] believed that Hiemstra was an impaired driver when he was stopped.

Thompson arrested Hiemstra and drove him to the Good Samaritan Hospital for a blood test. Thompson testified that he read a *Miranda* form to Hiemstra and asked him if he understood his rights, and that Hiemstra then signed the form. The court received a document showing Thompson's signature as the witnessing officer and Hiemstra's signatures indicating that he both understood and waived his *Miranda* rights. Thompson testified he asked Hiemstra how much he had to drink and Hiemstra told him he drank four to five cans of beer. Thompson also testified that Hiemstra stated "[he had] been drinking for two hours from 10 o'clock until 11 o'clock [sic]" but then stated he had his last drink at 1 o'clock.

In his motion to suppress, Hiemstra alleged that all the evidence obtained should be suppressed because the initial stop violated the 4th, 5th, and 14th Amendments to the U.S. Constitution and article I, §§ 3 and 7, of the Nebraska Constitution. Hiemstra also moved the court to suppress any statements made while he was in custody but before the *Miranda* warnings were given. Hiemstra alleged that such [\*\*\*10] statements violated his Fifth Amendment guarantee against self-incrimination. Finally, Hiemstra requested that the court suppress the results of the blood test because Thompson did not have probable cause to request the test. The court overruled Hiemstra's motion.

At trial, Thompson testified to essentially the same version of the facts as during the hearing on the motion to suppress. Thompson stated that Hiemstra was under the influence when he was arrested. Thompson testified that after arresting Hiemstra, Thompson read him a post arrest chemical advisement form, which Hiemstra signed.

The court received a "Post Arrest Chemical Test Advisement" form signed by Thompson which was marked to read, "I hereby direct a test of your X blood \_ breath X urine to determine the X alcohol \_ drug content." Thompson testified he did not give Hiemstra a urine test or the opportunity to take a urine test. Outside the presence of the jury, Hiemstra's attorney claimed that Thompson's marks directing both a urine and a blood test were inconsistent with Nebraska statutes and asked the court to [\*945] suppress any testimony regarding the blood test. The court denied this request.

Thompson explained [\*\*\*11] why he did not give Hiemstra a speeding citation: "The main reason is because I didn't have a radar lock on the defendant in this case and the second reason for not giving him a ticket is he's already -- he already has a DUI pending. I didn't feel the need to hammer the guy."

Tyler Schwartz, a medical technologist employed by Good Samaritan Hospital, testified that he did not recall drawing blood from Hiemstra on August 25, 1996. However, the court received a document identified by Schwartz as a "Legal Alcohol on Body Fluid" form. Schwartz testified he signed and dated the document and wrote down a time. "Russell J. Hiemstra" is listed on the document as the "Subject Name," and the document shows that blood was obtained by Schwartz at "0150" on August 25. Additional facts regarding Schwartz' testimony will be discussed later in this opinion.

Diane Stevens, a medical technologist employed by Good Samaritan Hospital, testified that she tests blood for legal blood alcohol content using a machine called the Abbott TDx. The court received Stevens' Class A permit, which allows her to perform testing for body fluid alcohol content. Stevens testified, over objection, that Hiemstra's body [\*\*\*12] fluid alcohol content was .18 of 1 gram per 100 milliliters. Additional facts regarding the blood test will be discussed later in this opinion.

Hiemstra's motions to dismiss or, in the alternative, for a directed verdict at the conclusion of the State's evidence and at the conclusion of Hiemstra's evidence were denied. Hiemstra was convicted of DUI, and he appealed to the district court. The district court for Buffalo County affirmed the trial court's judgment of conviction.

## II. ASSIGNMENTS OF ERROR

Hiemstra claims the trial court erred (1) in failing to find that the stop of his vehicle [\*\*556] violated the 4th and 14th Amendments to the U.S. Constitution and article I, §§ 3 and 7, of the Nebraska Constitution; (2) in receiving the blood test results even though the person drawing the blood was not qualified; (3) in receiving the blood test results even though the arresting officer did not [\*946] provide Hiemstra a urine test; (4) in receiving the blood test results even though the person testing his blood did not conform to title 177 (177 Neb. Admin. Code, ch. 1, § 006.04D (1990)) requirements; and (5) in instructing the jury as to the definition of "driving under the influence."

## III. STANDARD [\*\*\*13] OF REVIEW

[1] [HN1] In reviewing a criminal conviction, it is not the province of the appellate court to resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. Such matters are for the finder of fact, and the verdict of the jury must be sustained if, taking the view most favorable to the State, there is sufficient evidence to support it. *State v. Woods*, 249 Neb. 138, 542 N.W.2d 410 (1996).

[2] With regard to questions of law, an appellate court is obligated to reach a conclusion independent of the decision reached by the trial court. *State v. Champoux*, 252 Neb. 769, 566 N.W.2d 763 (1997).

## IV. ANALYSIS

### 1. VEHICLE STOP

[3,4] Hiemstra claims the trial court erred in overruling his motion to suppress. Specifically, Hiemstra contends the trial court erred in failing to find that the stop of his vehicle violated his constitutional rights. [HN2] Regarding motions to suppress, the Nebraska Supreme Court has recently held that "ultimate determinations of reasonable suspicion and probable cause are reviewed de novo and findings of fact are reviewed for clear error, giving due weight to the inferences [\*\*\*14] drawn from those facts by the trial judge." *State v. McCleery*, 251 Neb. 940, 942, 560 N.W.2d 789, 790 (1997). In reviewing the trial court's ruling on a motion to suppress, an appellate court considers all the evidence from the trial as well as from the hearing on the motion. *State v. Case*, 4 Neb. App. 885, 553 N.W.2d 173 (1996).

6 Neb. App. 940, \*946; 579 N.W.2d 550, \*\*556;  
1998 Neb. App. LEXIS 72, \*\*\*14

[5, 6] [HN3] The test to determine if an investigative stop was justified is whether the police officer had a reasonable suspicion, based on articulable facts, which indicated that a crime had occurred, was occurring, or was about to occur and that the suspect [\*947] might be involved. See, *State v. Bowers*, 250 Neb. 151, 548 N.W.2d 725 (1996); *State v. Smith*, 4 Neb. App. 219, 540 N.W.2d 374 (1995). In addition, "when an officer observes a traffic offense -- however minor -- he has probable cause to stop the driver of the vehicle." *State v. Chronister*, 3 Neb. App. 281, 285, 526 N.W.2d 98, 103 (1995), quoting *U.S. v. Cummins*, 920 F.2d 498 (8th Cir. 1990), cert. denied 502 U.S. 962, 112 S. Ct. 428, 116 L. Ed. 2d 448 (1991).

Hiemstra argues that "at no time was there ever any evidence offered to show whether or not Hiemstra was in fact exceeding [\*\*\*15] any speed limit or violating any law." Brief for appellant at 12. Thompson's stop was based on his visual observation that Hiemstra was traveling in excess of the speed limit. Thompson testified that the speed limit in the area ranged from 20 to 25 miles per hour. Thompson stated that when following Hiemstra, he was driving in excess of 45 miles per hour. As such, Thompson had probable cause to stop Hiemstra because Hiemstra was violating the speed limit.

[7] Hiemstra also argues that "no testimony was offered to show that Thompson's estimation was corroborated with mechanical, electronic or radio microwave devices." Brief for appellant at 13. This argument is similar to that used in *State v. Howard*, 253 Neb. 523, 571 N.W.2d 308 (1997). In *Howard*, the defendant argued that officer's testimony that the defendant was driving over 100 miles per hour had to be corroborated by a radio microwave, mechanical, or electronic speed measurement device in accordance with Neb. Rev. Stat. § 60-6, 192 (Reissue 1993). [HN4] Section 60-6, 192 states:

Determinations made regarding the speed of any motor vehicle based upon the visual observation of any peace officer, while being [\*557] competent evidence [\*\*\*16] for all other purposes, shall be corroborated by the use of a radio microwave, mechanical, or electronic speed measurement device. The results of such radio microwave, mechanical, or electronic speed measurement device may be accepted as competent evidence of the speed of such motor vehicle in any court or legal proceeding when the *speed of the vehicle is at issue*.

(Emphasis supplied.) The court held that [HN5] when testimony regarding speed is used to establish some charge other than [\*948] speeding, the officer's testimony need not be corroborated. *State v. Howard, supra*.

As in *Howard*, the actual speed of Hiemstra's vehicle is not at issue. Hiemstra was not charged with speeding. Thompson's estimate was used to establish that he had probable cause for stopping Hiemstra. Hiemstra's first assignment of error is without merit.

## 2. INADMISSIBILITY OF BLOOD TEST RESULTS

Hiemstra argues the trial court erred in admitting his blood test results for three reasons. First, the person who drew Hiemstra's blood was not qualified under *Neb. Rev. Stat. § 60-6,201* (Reissue 1993). Second, the arresting officer failed to provide Hiemstra a urine test. Third, the State failed to show the [\*\*\*17] requirements of title 177 (*177 Neb. Admin. Code, ch. 1, § 006.04D* (1990)) were complied with. We will address each argument in turn.

### (a) Qualifications of Person Drawing Blood

[8,9] Hiemstra argues the trial court erred in receiving Hiemstra's blood test results because the person drawing Hiemstra's blood was not qualified. [HN6] The drawing of blood and the admissibility of test results are controlled by § 60-6,201, which provides in pertinent part:

(3) To be considered valid, tests of blood . . . shall be performed according to methods approved by the Department of Health and by an individual possessing a valid permit issued by such department for such purpose, *except that a physician, registered nurse, or other trained person employed by a licensed institution or facility which is defined in section 71-2017.01 . . . may withdraw blood for the purpose of a*

test to determine the alcohol concentration . . . .  
(Emphasis supplied.)

In the instant case, Schwartz drew Hiemstra's blood and had no valid permit to do so. Schwartz was asked the following questions: "Q- And to the best of your knowledge, is Good Samaritan Hospital a certified hospital? A- Yes. . . . Q- Do you know [\*\*\*18] if the State of Nebraska requires a certification or permit for one who draws blood? A- I don't know."

[\*949] [10] [HN7] Pursuant to Neb. Evid. R. 602, a witness may not testify to something of which the witness has no personal knowledge. See, *Neb. Rev. Stat. § 27-602* (Reissue 1995); *State v. Merrill*, 252 Neb. 736, 566 N.W.2d 742 (1997); *Sedlak Aerial Spray v. Miller*, 251 Neb. 45, 555 N.W.2d 32 (1996). Schwartz' testimony did not evidence that he possessed personal knowledge that Good Samaritan Hospital was or was not a certified hospital or that he even knew the significance of "certified." Indeed, the question was framed so that Schwartz could answer in the affirmative even if he did not know whether the hospital was licensed. As such, Schwartz' statements did not demonstrate that Good Samaritan Hospital is a licensed institution or facility as required by § 60-6,201(3).

We also note that on September 15, 1997, the State filed a "Suggestion of Remand" stating that remand to the district court for a new trial was appropriate because "the State failed to present evidence that the person drawing Hiemstra's blood was employed by a 'licensed institution or facility' as required by *Neb. [\*\*\*19] Rev. Stat. § 60-6,201(3)* (1993)." Nonetheless, in its brief, the State argued that Hiemstra's failure "to object to Schwartz' testimony that Schwartz had drawn a blood sample from Hiemstra" was "a waiver of his right to now raise the issue on appeal." Brief for appellee at 10-11.

The argument in the State's brief is without merit. The State argues Hiemstra needed to object when Schwartz testified that he drew Hiemstra's blood. The evidence shows that Schwartz did, in fact, draw a blood [\*\*558] sample from Hiemstra; thus, an objection at that time was unwarranted. Instead, Hiemstra objected on the basis of insufficient foundation when the blood test results were offered. Hiemstra's objection was timely.

Based on the evidence, the trial court erred in admitting the results of Hiemstra's blood test because the State failed to show that a qualified person, pursuant to § 60-6,201, drew Hiemstra's blood.

(b) Failure to Provide Urine Test

The court received a "Post Arrest Chemical Test Advisement" form which had "Russell J. Hiemstra" listed at the top. Thompson testified, and the evidence shows that he placed checkmarks on the form, causing it to read, "I hereby direct a [\*950] test of your X [\*\*\*20] blood [and] X urine to determine the X alcohol . . . content." The form was signed by Thompson as the "Advising Officer" and was also signed by Hiemstra. Only Hiemstra's blood was tested. Hiemstra argues:

Section 60-6, 199 Neb. R.R.S. generally provides that an arrested person, when advised that they will have a chemical test of their blood, breath or urine test performed, may *request* a second test, and if the second test is not provided then the first test would be inadmissible. . . . Because of the failure of the arresting officer to *provide* the second test, the first test should not have been received as evidence.  
(Emphasis supplied.) Brief for appellant at 23.

[11] Hiemstra notes the statute states an arrested person may *request* a second test. See *Neb. Rev. Stat. § 60-6, 199* (Reissue 1993). Hiemstra then argues the blood test is inadmissible because a second test was not *provided*. There is no evidence Hiemstra requested a urine test. The Supreme Court has stated that [HN8] "while . . . the police cannot hamper a motorist's efforts to obtain independent testing, they are under no duty to assist in obtaining such testing beyond allowing telephone calls [\*\*\*21] to secure the test." *State v. Dake*, 247 Neb. 579, 584, 529 N.W.2d 46, 49 (1995). Therefore, Thompson had no duty to *provide* a urine test for Hiemstra. In addition, the fact that no urine test was performed does not affect the admissibility of the blood test, and Hiemstra provides us with no law to the contrary.

6 Neb. App. 940, \*950; 579 N.W.2d 550, \*\*558;  
1998 Neb. App. LEXIS 72, \*\*\*21

There is no evidence this error misled Hiemstra to his prejudice or somehow caused him to not request a urine test. Hiemstra's third assignment of error is without merit.

(c) Failure to Show Abbott TDx Was Working as Required by Title 177

Hiemstra argues the trial court erroneously admitted the blood test results because the requirements of title 177 (177 Neb. Admin. Code, ch. 1, § 006.04D (1990)) were not satisfied. Specifically, Hiemstra argues that "the use of a known substance to obtain a low, medium and high control and the use of refrigerated reagent packs" are required by title 177. Brief for appellant at 28. Title 177 was entered into evidence and lists the following requirements under the heading "Radiative Energy Attenuation Utilizing The Abbott TDx Analyzer:"

[\*951] 006.04D1 The radiative energy attenuation method . . . must be performed in a manner to [\*\*\*22] include at least the following technique:

. . . .

006.04D1g Also upon completion of analysis, remove the carousel and discard its contents. If the reagent pack is not to be used immediately again, remove and store it at 2 to 8 degrees C.

. . . .

006.04D1j Each test run shall include a low, medium, and high control. If runs contain more than twelve specimens, the controls shall be placed after the last specimens for a chemical test on the carousel.

Hiemstra's argument is twofold. First, the State failed to prove the reagent pack was properly refrigerated. Second, the State failed to identify or verify the contents of the control used to demonstrate the Abbott TDx was working properly.

Stevens testified generally that she followed all of the policies and procedures of title 177. Such general testimony is a conclusion and is insufficient to show that title 177 requirements were complied with. Specifically, the State failed to question Stevens [\*559] about the refrigeration of the reagent pack. Therefore, the State failed to prove that title 177 was complied with, and the trial court erred in admitting the blood test results.

Hiemstra also contends his blood test results were [\*\*\*23] erroneously admitted because the State failed to verify the contents of the control used to demonstrate the Abbott TDx was working properly. Hiemstra's argument is very similar to that in *State v. Gerber*, 206 Neb. 75, 291 N.W.2d 403 (1980), overruled on other grounds, *State v. Obermier*, 241 Neb. 802, 490 N.W.2d 693 (1992). In *Gerber*, the defendant was convicted of driving under the influence and claimed the lower court erred in admitting the results of his Breathalyzer test. The officer who administered the test testified that an ampul containing an amount of ethyl alcohol, referred to as a "NALCO standard," *id.* at 79, 291 N.W.2d at 406, is used to determine if the machine is operating correctly. (An ampule, ampul, or ampoule is "a sealed glass or plastic bulb containing solutions for hypodermic injection." Webster's Encyclopedic Unabridged Dictionary of the [\*952] English Language 51 (1989).) The NALCO standard is attached to the machine, and if operating correctly, the machine registers a number that matches the number on the ampul. The officer conceded that determining whether the machine is working depends on whether the alcohol content of the NALCO standard is, in fact, [\*\*\*24] as reflected on the ampul.

[12] The officer in *Gerber* testified that he did not know who prepared the NALCO standard and did not know where the NALCO standard came from or its actual alcohol content. The officer admitted he did not know if the machine was operating correctly at the time the defendant was tested. The *Gerber* court held that a competent witness must establish where the NALCO calibration standard used to determine if a Breathalyzer machine is operating correctly came from, how it was received, under what conditions it was kept and preserved, and what spot checks were

6 Neb. App. 940, \*952; 579 N.W.2d 550, \*\*559;  
1998 Neb. App. LEXIS 72, \*\*\*24

made to determine its validity. The court quoted the following statement with approval:

[HN9] "The fact that the *sealed* ampoules are delivered by the manufacturer of the breathalyzer machine for exclusive use in such machine plus the additional fact of regular spot checking of the ampoules is, in our opinion, sufficient *prima facie* proof that the chemicals in any one ampoule are of the proper kind and mixed to the proper proportion."

(Emphasis in original.) 206 Neb. at 90, 291 N.W.2d at 411 (quoting *State v. Baker*, 56 Wash. 2d 846, 355 P.2d 806 (1960)). The *Gerber* court held [\*\*\*25] the test inadmissible because the State failed to prove the necessary requirements were met.

In the instant case, Stevens testified that a known substance, called a control, is very important in determining whether the machine is working properly. Stevens testified that she receives a known substance, in a vial or a tube, from a manufacturer. Included with the substance is a certificate from the manufacturer stating the bottle contains a certain amount of ethanol. The bill of exceptions contains the following testimony:

Q- . . . You get this known substance and my only question is, before you use it in the machine, what do you do to make sure that the known substance is what it purports to be?

[\*953] A- Okay, the known substance has a known value on it. So I run it and if I get the known value on it, I assume that it's what it's supposed to be because I got the value they told me I would get.

Q- And that's based not upon your test, but what some piece of paper says?

A- They ran it and got this answer, I rerun it, get the same answer.

Stevens also testified that Good Samaritan Hospital did not have a policy or procedure of periodically testing blood kits to make sure that the [\*\*\*26] contents of the test tubes were what they purported to be.

Based on *Gerber*, *supra*, we find that the trial court erred in admitting the results of Hiemstra's blood test because there was no testimony or evidence identifying the contents of the control, showing how the control was received, detailing under what conditions the control was kept and preserved, and identifying what spot checks were made to determine the validity of the control.

### [\*\*560] 3. JURY INSTRUCTIONS

Hiemstra argues that "the definition of under the influence as given by the Court is not appropriate and is an incorrect statement of the law. The problem with the Court's instruction is that it causes the jury to try to guess at what Hiemstra's normal body or mental faculties would be." Brief for appellant at 29. Over objection, the trial court gave the following instruction defining "under the influence:"

A person is under the influence of alcoholic liquor if such person is impaired because of his or her[]consumption of alcohol in the capacity to think and act correctly and efficiently, to the extent as to have lost an appreciable degree of the normal control of his or her body or mental faculties.

Hiemstra [\*\*\*27] proposed the following instruction: "The phrase 'under the influence of alcoholic liquor' means the ingestion of alcohol in an amount sufficient to impair to any appreciable degree the ability to operate a motor vehicle in a prudent and cautious manner."

[\*954] [13, 14] [HN10] To establish reversible error from a court's refusal to give a requested instruction, an appellant has the burden to show that (1) the tendered instruction is a correct statement of the law; (2) the tendered instruction is warranted by the evidence; and (3) the appellant was prejudiced by the court's refusal to give the tendered instruction. *State v. Reynolds*, 235 Neb. 662, 457 N.W.2d 405 (1990). In an appeal based on the claim of an erroneous

6 Neb. App. 940, \*954; 579 N.W.2d 550, \*\*560;  
1998 Neb. App. LEXIS 72, \*\*\*27

instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant. *State v. McHenry*, 250 Neb. 614, 550 N.W.2d 364 (1996); *State v. Ryan*, 249 Neb. 218, 543 N.W.2d 128 (1996).

[15] The language of Hiemstra's proposed jury instruction is very similar to that of NJI2d Crim. 7.52. We conclude that Hiemstra's proposed instruction is a correct statement of the law and note [\*\*\*28] that the court's instruction seems to require evidence of the individual defendant's "normal control of his or her body," whereas the NJI2d Crim. 7.52 instruction does not contain this weakness. Hiemstra also satisfies the second requirement that the instruction must be warranted by the evidence. Since Hiemstra was charged with "driving under the influence," a jury instruction defining that term was certainly warranted. However, Hiemstra fails to establish that his rights were prejudiced by the court's failure to give the suggested jury instruction. We assume that Hiemstra is arguing his rights were prejudiced because the given jury instruction is an incorrect statement of the law. We recognize that the given jury instruction contains the weakness cited above and is therefore somewhat confusing, while the language of NJI2d Crim. 7.52 is considerably clearer. However, the Supreme Court has stated that [HN11] jury instructions must be read as a whole, and if they fairly present the law so that the jury could not be misled, there is no prejudicial error. *State v. Brunzo*, 248 Neb. 176, 532 N.W.2d 296 (1995).

We must examine the jury instructions in their entirety. Jury instruction No. 4 [\*\*\*29] generally explains the material elements of driving under the influence; specifically, that the defendant was in actual physical control of a motor vehicle while under the influence of alcohol or while having a concentration of .10 of 1 [\*955] gram or more of alcohol per 100 milliliters of his blood. Jury instruction No. 5 explains that Neb. Rev. Stat. § 60-6, 196 (Reissue 1993) makes it unlawful for any person to operate or be in actual physical control of a motor vehicle while under the influence of alcohol or while having a concentration of .10 of 1 gram of alcohol or more per 100 milliliters of his or her blood.

When read in their entirety, the jury instructions accurately and fairly present the law of DUI. Therefore, Hiemstra has failed to meet his burden and demonstrate that his rights were prejudiced by the court's failure to give the suggested jury instruction. Hiemstra's final assignment of error is without merit. However, upon remand, we remind the trial court that as long as there is a Nebraska jury instruction that accurately states the law and applies to the case, it is the instruction which should be given. *State v. Jimenez*, 3 Neb. App. 421, 530 N.W.2d 257 (1995), *aff'd* [\*\*\*30] *as modified* 248 Neb. 255, 533 N.W.2d 913.

#### [\*\*561] 4. EFFECT OF ERRORS

[16] Hiemstra urges that the admission of the blood test results necessitates the dismissal of his case. However, in *State v. Hingst*, 251 Neb. 535, 557 N.W.2d 681 (1997), the Supreme Court reached a different conclusion in a factually similar case. In *Hingst*, the defendant was also convicted of DUI. On appeal, the court held that the trial court committed plain error when it failed to exclude the chemical test results because the defendant was not properly advised before the test was taken. However, the State argued that the record contained other evidence sufficient to sustain the conviction. On further review, the Supreme Court stated, [HN12] "In a jury trial of a criminal case, an erroneous evidential ruling results in prejudice to a defendant unless the State demonstrates that the error was harmless beyond a reasonable doubt." *Id.* at 537, 557 N.W.2d at 683. "An error is harmless when the improper admission of evidence did not materially influence the jury to reach a verdict adverse to the substantial rights of the defendant." *Id.* at 538, 557 N.W.2d at 683.

[17] The Supreme Court noted the record contained [\*\*\*31] evidence that at the time of arrest, the defendant's eyes were bloodshot, he smelled of alcohol, his speech was slurred, and he failed twice to correctly recite the alphabet. However, the Supreme [\*956] Court was unable to determine which evidence the jury relied on in convicting the defendant. The Supreme Court held that after a jury trial where prejudicial evidence was erroneously admitted, if sufficient evidence exists to support the conviction, the cause may be remanded for further proceedings, but if the evidence is not sufficient, the cause must be dismissed. The Supreme Court found that sufficient evidence existed upon which a jury could, on remand, find the defendant guilty of DUI; accordingly, the Supreme Court affirmed this court's

6 Neb. App. 940, \*956; 579 N.W.2d 550, \*\*561;  
1998 Neb. App. LEXIS 72, \*\*\*31

decision reversing the conviction and remanding the cause for a new trial.

#### V. CONCLUSION

As in *Hingst*, in this case, the trial court erred in admitting Hiemstra's blood test results, as determined above. We cannot say that this error was harmless beyond a reasonable doubt. However, the record contains independent evidence to support Hiemstra's conviction. Thompson's testimony establishes that Hiemstra was driving under the influence. Thus, we find [\*\*\*32] that there is sufficient evidence to support the conviction. Accordingly, we affirm the trial court's ruling denying Hiemstra's motion to suppress, but we reverse the judgment of conviction and remand the cause for a new trial.

AFFIRMED IN PART, AND IN PART REVERSED AND REMANDED FOR A NEW TRIAL.

**State of Nebraska, Appellee, v. Russell J. Hiemstra, Appellant.****No. A-97-526.****NEBRASKA COURT OF APPEALS*****6 Neb. App. 940; 579 N.W.2d 550; 1998 Neb. App. LEXIS 72*****May 5, 1998, Filed**

**PRIOR HISTORY:** [\*\*\*1] Appeal from the District Court for Buffalo County, John P. Icenogle, Judge, on appeal thereto from the County Court for Buffalo County, Graten D. Beavers, Judge.

**DISPOSITION:** AFFIRMED IN PART, AND IN PART REVERSED AND REMANDED FOR A NEW TRIAL.

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendant appealed an order from the District Court for Buffalo County (Nebraska), which denied his motion to suppress and affirmed a trial court's order convicting him of driving under the influence (DUI) of an alcoholic liquor or drug.

**OVERVIEW:** Defendant was convicted in the trial court following a jury trial of DUI. Defendant appealed to the district court, which affirmed the trial court's judgment of conviction. On further appeal, defendant argued that his constitutional rights were violated when his vehicle was stopped for speeding and that the trial court erred in admitting the results of his blood test and in instructing the jury as to the meaning of "driving under the influence." The court affirmed in part and in part reversed and remanded for a new trial. The court concluded that an initial stop did not violate defendant's constitutional rights and that defendant was not prejudiced by the trial court's refusal to give his suggested jury instruction. The court found, however, that the trial court erred in admitting defendant's blood test results because the state failed to show that a qualified person, pursuant to *Neb. Rev. Stat. § 60-6,201*, drew defendant's blood. The court concluded that when read in their entirety, the jury instructions accurately and fairly presented the law of DUI.

**OUTCOME:** The court affirmed the district court's ruling denying defendant's motion to suppress, but reversed the district court's judgment affirming defendant's conviction for DUI and remanded the cause for a new trial.

**CORE TERMS:** blood, blood test, machine, probable cause, driving, speed, urine test, alcohol, motion to suppress, jury instruction, admitting, correctly, testing, breath, drawing, prejudiced, speeding, tendered, foot, motor vehicle, speed limit, jury trial, corroborated, licensed, miles, electronic, mechanical, microwave, reagent, ampoule

**LexisNexis(R) Headnotes**

***Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > Credibility of Witnesses******Criminal Law & Procedure > Witnesses > Credibility******Criminal Law & Procedure > Appeals > Standards of Review > Substantial Evidence***

[HN1] In reviewing a criminal conviction, it is not the province of the appellate court to resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. Such matters are for the finder of fact, and the verdict of the jury must be sustained if, taking the view most favorable to the state, there is sufficient evidence to support it. With regard to questions of law, an appellate court is obligated to reach a conclusion independent of the decision reached by the trial court.

***Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review******Civil Procedure > Appeals > Standards of Review > De Novo Review******Criminal Law & Procedure > Appeals > Standards of Review > Clearly Erroneous Review > Findings of Fact***

[HN2] Regarding motions to suppress, the Nebraska Supreme Court has recently held that ultimate determinations of reasonable suspicion and probable cause are reviewed de novo and findings of fact are reviewed for clear error, giving due weight to the inferences drawn from those facts by the trial judge. In reviewing the trial court's ruling on a motion to suppress, an appellate court considers all the evidence from the trial as well as from the hearing on the motion.

***Criminal Law & Procedure > Search & Seizure > Warrantless Searches > Investigative Stops***

[HN3] The test to determine if an investigative stop was justified is whether the police officer had a reasonable suspicion, based on articulable facts, which indicated that a crime had occurred, was occurring, or was about to occur and that the suspect might be involved. In addition, when an officer observes a traffic offense -- however minor -- he has probable cause to stop the driver of the vehicle.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview***

[HN4] Neb. Rev. Stat. § 60-6, 192 (Reissue 1993) states: Determinations made regarding the speed of any motor vehicle based upon the visual observation of any peace officer, while being competent evidence for all other purposes, shall be corroborated by the use of a radio microwave, mechanical, or electronic speed measurement device. The results of such radio microwave, mechanical, or electronic speed measurement device may be accepted as competent evidence of the speed of such motor vehicle in any court or legal proceeding when the speed of the vehicle is at issue.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Speeding > General Overview******Evidence > Testimony > Experts > Criminal Trials***

[HN5] When testimony regarding speed is used to establish some charge other than speeding, an officer's testimony need not be corroborated.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility******Evidence > Scientific Evidence > Blood Alcohol******Healthcare Law > Business Administration & Organization > Licenses > General Overview***

[HN6] The drawing of blood and the admissibility of test results are controlled by Neb. Rev. Stat. § 60-6, 201 (Reissue 1993), which provides in part:(3) To be considered valid, tests of blood shall be performed according to methods approved by the Department of Health and by an individual possessing a valid permit issued by such department for such purpose, except that a physician, registered nurse, or other trained person employed by a licensed institution or facility which is defined in Neb. Rev. Stat. § 71-2017.01 may withdraw blood for the purpose of a test to determine the

alcohol concentration.

***Evidence > Testimony > Lay Witnesses > Personal Knowledge***

[HN7] Pursuant to Neb. Evid. R. 602, a witness may not testify to something of which the witness has no personal knowledge. *Neb. Rev. Stat. § 27-602* (Reissue 1995).

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Admissibility***

***Evidence > Scientific Evidence > Blood Alcohol***

***Evidence > Scientific Evidence > Blood & Bodily Fluids***

[HN8] While the police cannot hamper a motorist's efforts to obtain independent testing, they are under no duty to assist in obtaining such testing beyond allowing telephone calls to secure the test.

***Evidence > Scientific Evidence > Blood Alcohol***

[HN9] The fact that the sealed ampoules are delivered by the manufacturer of the breathalyzer machine for exclusive use in such machine plus the additional fact of regular spot checking of the ampoules is sufficient prima facie proof that the chemicals in any one ampoule are of the proper kind and mixed to the proper proportion.

***Civil Procedure > Appeals > Standards of Review > Reversible Errors***

***Criminal Law & Procedure > Jury Instructions > Requests to Charge***

***Criminal Law & Procedure > Appeals > Reversible Errors > General Overview***

[HN10] To establish reversible error from a court's refusal to give a requested instruction, an appellant has the burden to show that (1) the tendered instruction is a correct statement of the law; (2) the tendered instruction is warranted by the evidence; and (3) the appellant was prejudiced by the court's refusal to give the tendered instruction. In an appeal based on the claim of an erroneous instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant.

***Criminal Law & Procedure > Jury Instructions > Particular Instructions > Use of Particular Evidence***

***Criminal Law & Procedure > Appeals > Standards of Review > Harmless & Invited Errors > General Overview***

[HN11] Jury instructions must be read as a whole, and if they fairly present the law so that the jury could not be misled, there is no prejudicial error.

***Criminal Law & Procedure > Criminal Offenses > Vehicular Crimes > Driving Under the Influence > Blood Alcohol & Field Sobriety > Implied Consent > Warning Requirements***

***Criminal Law & Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Evidence***

***Evidence > Procedural Considerations > Rulings on Evidence***

[HN12] In a jury trial of a criminal case, an erroneous evidential ruling results in prejudice to a defendant unless the state demonstrates that the error was harmless beyond a reasonable doubt. An error is harmless when the improper admission of evidence did not materially influence the jury to reach a verdict adverse to the substantial rights of the defendant.

**HEADNOTES: 1. Convictions: Appeal and Error.** In reviewing a criminal conviction, it is not the province of the appellate court to resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. Such matters are for the finder of fact, and the verdict of the jury must be sustained if, taking the view most favorable to the State, there is sufficient evidence to support it.

Don Stenberg, Attorney General, and Jay C. Hinsley for appellee.

**JUDGES:** HANNON, IRWIN, and MUES, Judges.

**OPINION BY:** HANNON

**OPINION:** [\*942]

[\*\*554] HANNON, Judge.

The appellant, Russell J. Hiemstra, was convicted following a jury trial in Buffalo County Court of driving under the influence (DUI) of an alcoholic liquor or drug. The county court sentenced Hiemstra to 6 months' probation, fined him \$ 250, ordered him to pay court costs, suspended his driving privileges for 60 days, and ordered him to provide the court with written proof of his attendance at an alcohol education class and three Alcoholics Anonymous classes. Hiemstra appealed to the district court, which affirmed the county court's judgment of conviction. Hiemstra [\*\*\*6] now appeals to this court, arguing that his constitutional rights were violated when his vehicle was stopped for speeding and that the trial court erred in admitting the results of his blood test and in instructing the jury as to the meaning of "driving under the influence." We conclude that the initial stop did not violate Hiemstra's constitutional rights and that Hiemstra was not prejudiced by the trial court's refusal to give his suggested jury instruction. However, we find that the trial court erred in admitting the blood test results. Therefore, we affirm the trial court's ruling denying Hiemstra's motion to suppress, but we reverse the conviction and remand the cause for a new trial.

#### I. FACTUAL BACKGROUND

The following evidence was presented at the hearing on Hiemstra's motion to suppress. At approximately 1:10 a.m. on August 25, 1996, Officer Kevin Thompson, who testified he was trained to visually estimate speed, was patrolling the downtown Kearney, Nebraska, area when he visually observed Hiemstra's vehicle going too fast. Thompson then followed Hiemstra's vehicle, and Thompson's speedometer indicated Hiemstra was driving faster than 45 miles per hour. Thompson estimated [\*\*\*7] that both his and Hiemstra's vehicles were traveling approximately 20 miles over the speed limit.

Thompson testified that he stopped the vehicle and that when he first made contact with Hiemstra, he detected the odor of alcohol and saw beer cans throughout the vehicle as well as two [\*943] coolers. Thompson also noticed that Hiemstra's speech was slurred. Thompson gave the following testimony:

Q- When you first initiated the traffic stop and approached the vehicle, what did you say to the driver?

A- I asked him if he knew why he was being pulled over.

Q- And how did he respond?

A- He just said that he was being stupid.

Q- And did he say anything further?

A- And I asked him if -- what he meant by that and he said because he was speeding.

Both Thompson and Hiemstra returned to the police car, where Hiemstra performed several sobriety tests. Hiemstra was instructed to repeat the letters of the alphabet. Thompson testified that Hiemstra did not commit any letter errors but that there were slurs in his speech. Hiemstra was then asked to count from 20 to 39 and then from 39 back down to 20. Thompson testified there were no numerical errors from 20 to 39, just slurs in Hiemstra's speech. [\*\*\*8] When counting from 39 to 20, Hiemstra stopped at 25, asked Thompson if that was sufficient, and was told to continue as instructed.

Hiemstra was then instructed to stand and raise either foot approximately 3 to 6 inches off the ground and count from 1,001 to 1,030. Thompson told Hiemstra that after completing the test, he was to put his foot down and say "stop." Thompson testified that on his first attempt, Hiemstra put his foot down on the count of 3. On his second attempt, Hiemstra put his foot down on the count of 3, continued, and then put his foot down on the count of 9. On the third attempt, Hiemstra put his foot down on the count of 12. Finally, Hiemstra was instructed to perform the walk-and-turn sobriety test. Thompson testified that Hiemstra missed three heel-to-toe steps on the first set of nine, missed seven of the second set of nine, and did not count out loud as instructed.

Thompson testified that Hiemstra smelled of alcohol and that his eyes were bloodshot, his speech was slurred at times, and his balance and mental state were impaired. Thompson testified that based on his experience [\*\*555] as an officer, his training in DUI investigations, and his personal experience with [\*\*\*9] alcohol, he [\*944] believed that Hiemstra was an impaired driver when he was stopped.

Thompson arrested Hiemstra and drove him to the Good Samaritan Hospital for a blood test. Thompson testified that he read a *Miranda* form to Hiemstra and asked him if he understood his rights, and that Hiemstra then signed the form. The court received a document showing Thompson's signature as the witnessing officer and Hiemstra's signatures indicating that he both understood and waived his *Miranda* rights. Thompson testified he asked Hiemstra how much he had to drink and Hiemstra told him he drank four to five cans of beer. Thompson also testified that Hiemstra stated "[he had] been drinking for two hours from 10 o'clock until 11 o'clock [sic]" but then stated he had his last drink at 1 o'clock.

In his motion to suppress, Hiemstra alleged that all the evidence obtained should be suppressed because the initial stop violated the 4th, 5th, and 14th Amendments to the U.S. Constitution and article I, §§ 3 and 7, of the Nebraska Constitution. Hiemstra also moved the court to suppress any statements made while he was in custody but before the *Miranda* warnings were given. Hiemstra alleged that such [\*\*\*10] statements violated his Fifth Amendment guarantee against self-incrimination. Finally, Hiemstra requested that the court suppress the results of the blood test because Thompson did not have probable cause to request the test. The court overruled Hiemstra's motion.

At trial, Thompson testified to essentially the same version of the facts as during the hearing on the motion to suppress. Thompson stated that Hiemstra was under the influence when he was arrested. Thompson testified that after arresting Hiemstra, Thompson read him a post arrest chemical advisement form, which Hiemstra signed.

The court received a "Post Arrest Chemical Test Advisement" form signed by Thompson which was marked to read, "I hereby direct a test of your X blood \_ breath X urine to determine the X alcohol \_ drug content." Thompson testified he did not give Hiemstra a urine test or the opportunity to take a urine test. Outside the presence of the jury, Hiemstra's attorney claimed that Thompson's marks directing both a urine and a blood test were inconsistent with Nebraska statutes and asked the court to [\*945] suppress any testimony regarding the blood test. The court denied this request.

Thompson explained [\*\*\*11] why he did not give Hiemstra a speeding citation: "The main reason is because I didn't have a radar lock on the defendant in this case and the second reason for not giving him a ticket is he's already -- he already has a DUI pending. I didn't feel the need to hammer the guy."

Tyler Schwartz, a medical technologist employed by Good Samaritan Hospital, testified that he did not recall drawing blood from Hiemstra on August 25, 1996. However, the court received a document identified by Schwartz as a "Legal Alcohol on Body Fluid" form. Schwartz testified he signed and dated the document and wrote down a time. "Russell J. Hiemstra" is listed on the document as the "Subject Name," and the document shows that blood was obtained by Schwartz at "0150" on August 25. Additional facts regarding Schwartz' testimony will be discussed later in this opinion.

Diane Stevens, a medical technologist employed by Good Samaritan Hospital, testified that she tests blood for legal blood alcohol content using a machine called the Abbott TDx. The court received Stevens' Class A permit, which allows her to perform testing for body fluid alcohol content. Stevens testified, over objection, that Hiemstra's body [\*\*\*12] fluid alcohol content was .18 of 1 gram per 100 milliliters. Additional facts regarding the blood test will be discussed later in this opinion.

Hiemstra's motions to dismiss or, in the alternative, for a directed verdict at the conclusion of the State's evidence and at the conclusion of Hiemstra's evidence were denied. Hiemstra was convicted of DUI, and he appealed to the district court. The district court for Buffalo County affirmed the trial court's judgment of conviction.

## II. ASSIGNMENTS OF ERROR

Hiemstra claims the trial court erred (1) in failing to find that the stop of his vehicle [\*\*556] violated the 4th and 14th Amendments to the U.S. Constitution and article I, §§ 3 and 7, of the Nebraska Constitution; (2) in receiving the blood test results even though the person drawing the blood was not qualified; (3) in receiving the blood test results even though the arresting officer did not [\*946] provide Hiemstra a urine test; (4) in receiving the blood test results even though the person testing his blood did not conform to title 177 (177 Neb. Admin. Code, ch. 1, § 006.04D (1990)) requirements; and (5) in instructing the jury as to the definition of "driving under the influence."

## III. STANDARD [\*\*\*13] OF REVIEW

[1] [HN1] In reviewing a criminal conviction, it is not the province of the appellate court to resolve conflicts in the evidence, pass on the credibility of witnesses, determine the plausibility of explanations, or weigh the evidence. Such matters are for the finder of fact, and the verdict of the jury must be sustained if, taking the view most favorable to the State, there is sufficient evidence to support it. *State v. Woods*, 249 Neb. 138, 542 N.W.2d 410 (1996).

[2] With regard to questions of law, an appellate court is obligated to reach a conclusion independent of the decision reached by the trial court. *State v. Champoux*, 252 Neb. 769, 566 N.W.2d 763 (1997).

## IV. ANALYSIS

### 1. VEHICLE STOP

[3,4] Hiemstra claims the trial court erred in overruling his motion to suppress. Specifically, Hiemstra contends the trial court erred in failing to find that the stop of his vehicle violated his constitutional rights. [HN2] Regarding motions to suppress, the Nebraska Supreme Court has recently held that "ultimate determinations of reasonable suspicion and probable cause are reviewed de novo and findings of fact are reviewed for clear error, giving due weight to the inferences [\*\*\*14] drawn from those facts by the trial judge." *State v. McCleery*, 251 Neb. 940, 942, 560 N.W.2d 789, 790 (1997). In reviewing the trial court's ruling on a motion to suppress, an appellate court considers all the evidence from the trial as well as from the hearing on the motion. *State v. Case*, 4 Neb. App. 885, 553 N.W.2d 173 (1996).

6 Neb. App. 940, \*946; 579 N.W.2d 550, \*\*556;  
1998 Neb. App. LEXIS 72, \*\*\*14

[5, 6] [HN3] The test to determine if an investigative stop was justified is whether the police officer had a reasonable suspicion, based on articulable facts, which indicated that a crime had occurred, was occurring, or was about to occur and that the suspect [\*947] might be involved. See, *State v. Bowers*, 250 Neb. 151, 548 N.W.2d 725 (1996); *State v. Smith*, 4 Neb. App. 219, 540 N.W.2d 374 (1995). In addition, "when an officer observes a traffic offense -- however minor -- he has probable cause to stop the driver of the vehicle." *State v. Chronister*, 3 Neb. App. 281, 285, 526 N.W.2d 98, 103 (1995), quoting *U.S. v. Cummins*, 920 F.2d 498 (8th Cir. 1990), cert. denied 502 U.S. 962, 112 S. Ct. 428, 116 L. Ed. 2d 448 (1991).

Hiemstra argues that "at no time was there ever any evidence offered to show whether or not Hiemstra was in fact exceeding [\*\*\*15] any speed limit or violating any law." Brief for appellant at 12. Thompson's stop was based on his visual observation that Hiemstra was traveling in excess of the speed limit. Thompson testified that the speed limit in the area ranged from 20 to 25 miles per hour. Thompson stated that when following Hiemstra, he was driving in excess of 45 miles per hour. As such, Thompson had probable cause to stop Hiemstra because Hiemstra was violating the speed limit.

[7] Hiemstra also argues that "no testimony was offered to show that Thompson's estimation was corroborated with mechanical, electronic or radio microwave devices." Brief for appellant at 13. This argument is similar to that used in *State v. Howard*, 253 Neb. 523, 571 N.W.2d 308 (1997). In *Howard*, the defendant argued that officer's testimony that the defendant was driving over 100 miles per hour had to be corroborated by a radio microwave, mechanical, or electronic speed measurement device in accordance with Neb. Rev. Stat. § 60-6, 192 (Reissue 1993). [HN4] Section 60-6, 192 states:

Determinations made regarding the speed of any motor vehicle based upon the visual observation of any peace officer, while being [\*557] competent evidence [\*\*\*16] for all other purposes, shall be corroborated by the use of a radio microwave, mechanical, or electronic speed measurement device. The results of such radio microwave, mechanical, or electronic speed measurement device may be accepted as competent evidence of the speed of such motor vehicle in any court or legal proceeding when the *speed of the vehicle is at issue*.

(Emphasis supplied.) The court held that [HN5] when testimony regarding speed is used to establish some charge other than [\*948] speeding, the officer's testimony need not be corroborated. *State v. Howard, supra*.

As in *Howard*, the actual speed of Hiemstra's vehicle is not at issue. Hiemstra was not charged with speeding. Thompson's estimate was used to establish that he had probable cause for stopping Hiemstra. Hiemstra's first assignment of error is without merit.

## 2. INADMISSIBILITY OF BLOOD TEST RESULTS

Hiemstra argues the trial court erred in admitting his blood test results for three reasons. First, the person who drew Hiemstra's blood was not qualified under *Neb. Rev. Stat. § 60-6,201* (Reissue 1993). Second, the arresting officer failed to provide Hiemstra a urine test. Third, the State failed to show the [\*\*\*17] requirements of title 177 (*177 Neb. Admin. Code, ch. 1, § 006.04D* (1990)) were complied with. We will address each argument in turn.

### (a) Qualifications of Person Drawing Blood

[8,9] Hiemstra argues the trial court erred in receiving Hiemstra's blood test results because the person drawing Hiemstra's blood was not qualified. [HN6] The drawing of blood and the admissibility of test results are controlled by § 60-6,201, which provides in pertinent part:

(3) To be considered valid, tests of blood . . . shall be performed according to methods approved by the Department of Health and by an individual possessing a valid permit issued by such department for such purpose, *except that a physician, registered nurse, or other trained person employed by a licensed institution or facility which is defined in section 71-2017.01 . . . may withdraw blood for the purpose of a*

test to determine the alcohol concentration . . . .  
(Emphasis supplied.)

In the instant case, Schwartz drew Hiemstra's blood and had no valid permit to do so. Schwartz was asked the following questions: "Q- And to the best of your knowledge, is Good Samaritan Hospital a certified hospital? A- Yes. . . . Q- Do you know [\*\*\*18] if the State of Nebraska requires a certification or permit for one who draws blood? A- I don't know."

[\*949] [10] [HN7] Pursuant to Neb. Evid. R. 602, a witness may not testify to something of which the witness has no personal knowledge. See, *Neb. Rev. Stat. § 27-602* (Reissue 1995); *State v. Merrill*, 252 Neb. 736, 566 N.W.2d 742 (1997); *Sedlak Aerial Spray v. Miller*, 251 Neb. 45, 555 N.W.2d 32 (1996). Schwartz' testimony did not evidence that he possessed personal knowledge that Good Samaritan Hospital was or was not a certified hospital or that he even knew the significance of "certified." Indeed, the question was framed so that Schwartz could answer in the affirmative even if he did not know whether the hospital was licensed. As such, Schwartz' statements did not demonstrate that Good Samaritan Hospital is a licensed institution or facility as required by § 60-6,201(3).

We also note that on September 15, 1997, the State filed a "Suggestion of Remand" stating that remand to the district court for a new trial was appropriate because "the State failed to present evidence that the person drawing Hiemstra's blood was employed by a 'licensed institution or facility' as required by *Neb. [\*\*\*19] Rev. Stat. § 60-6,201(3)* (1993)." Nonetheless, in its brief, the State argued that Hiemstra's failure "to object to Schwartz' testimony that Schwartz had drawn a blood sample from Hiemstra" was "a waiver of his right to now raise the issue on appeal." Brief for appellee at 10-11.

The argument in the State's brief is without merit. The State argues Hiemstra needed to object when Schwartz testified that he drew Hiemstra's blood. The evidence shows that Schwartz did, in fact, draw a blood [\*\*558] sample from Hiemstra; thus, an objection at that time was unwarranted. Instead, Hiemstra objected on the basis of insufficient foundation when the blood test results were offered. Hiemstra's objection was timely.

Based on the evidence, the trial court erred in admitting the results of Hiemstra's blood test because the State failed to show that a qualified person, pursuant to § 60-6,201, drew Hiemstra's blood.

#### (b) Failure to Provide Urine Test

The court received a "Post Arrest Chemical Test Advisement" form which had "Russell J. Hiemstra" listed at the top. Thompson testified, and the evidence shows that he placed checkmarks on the form, causing it to read, "I hereby direct a [\*950] test of your X [\*\*\*20] blood [and] X urine to determine the X alcohol . . . content." The form was signed by Thompson as the "Advising Officer" and was also signed by Hiemstra. Only Hiemstra's blood was tested. Hiemstra argues:

Section 60-6, 199 Neb. R.R.S. generally provides that an arrested person, when advised that they will have a chemical test of their blood, breath or urine test performed, may *request* a second test, and if the second test is not provided then the first test would be inadmissible. . . . Because of the failure of the arresting officer to *provide* the second test, the first test should not have been received as evidence.  
(Emphasis supplied.) Brief for appellant at 23.

[11] Hiemstra notes the statute states an arrested person may *request* a second test. See *Neb. Rev. Stat. § 60-6, 199* (Reissue 1993). Hiemstra then argues the blood test is inadmissible because a second test was not *provided*. There is no evidence Hiemstra requested a urine test. The Supreme Court has stated that [HN8] "while . . . the police cannot hamper a motorist's efforts to obtain independent testing, they are under no duty to assist in obtaining such testing beyond allowing telephone calls [\*\*\*21] to secure the test." *State v. Dake*, 247 Neb. 579, 584, 529 N.W.2d 46, 49 (1995). Therefore, Thompson had no duty to *provide* a urine test for Hiemstra. In addition, the fact that no urine test was performed does not affect the admissibility of the blood test, and Hiemstra provides us with no law to the contrary.

6 Neb. App. 940, \*950; 579 N.W.2d 550, \*\*558;  
1998 Neb. App. LEXIS 72, \*\*\*21

There is no evidence this error misled Hiemstra to his prejudice or somehow caused him to not request a urine test. Hiemstra's third assignment of error is without merit.

(c) Failure to Show Abbott TDx Was Working as Required by Title 177

Hiemstra argues the trial court erroneously admitted the blood test results because the requirements of title 177 (177 Neb. Admin. Code, ch. 1, § 006.04D (1990)) were not satisfied. Specifically, Hiemstra argues that "the use of a known substance to obtain a low, medium and high control and the use of refrigerated reagent packs" are required by title 177. Brief for appellant at 28. Title 177 was entered into evidence and lists the following requirements under the heading "Radiative Energy Attenuation Utilizing The Abbott TDx Analyzer:"

[\*951] 006.04D1 The radiative energy attenuation method . . . must be performed in a manner to [\*\*\*22] include at least the following technique:

. . . .

006.04D1g Also upon completion of analysis, remove the carousel and discard its contents. If the reagent pack is not to be used immediately again, remove and store it at 2 to 8 degrees C.

. . . .

006.04D1j Each test run shall include a low, medium, and high control. If runs contain more than twelve specimens, the controls shall be placed after the last specimens for a chemical test on the carousel.

Hiemstra's argument is twofold. First, the State failed to prove the reagent pack was properly refrigerated. Second, the State failed to identify or verify the contents of the control used to demonstrate the Abbott TDx was working properly.

Stevens testified generally that she followed all of the policies and procedures of title 177. Such general testimony is a conclusion and is insufficient to show that title 177 requirements were complied with. Specifically, the State failed to question Stevens [\*559] about the refrigeration of the reagent pack. Therefore, the State failed to prove that title 177 was complied with, and the trial court erred in admitting the blood test results.

Hiemstra also contends his blood test results were [\*\*\*23] erroneously admitted because the State failed to verify the contents of the control used to demonstrate the Abbott TDx was working properly. Hiemstra's argument is very similar to that in *State v. Gerber*, 206 Neb. 75, 291 N.W.2d 403 (1980), overruled on other grounds, *State v. Obermier*, 241 Neb. 802, 490 N.W.2d 693 (1992). In *Gerber*, the defendant was convicted of driving under the influence and claimed the lower court erred in admitting the results of his Breathalyzer test. The officer who administered the test testified that an ampul containing an amount of ethyl alcohol, referred to as a "NALCO standard," *id.* at 79, 291 N.W.2d at 406, is used to determine if the machine is operating correctly. (An ampule, ampul, or ampoule is "a sealed glass or plastic bulb containing solutions for hypodermic injection." Webster's Encyclopedic Unabridged Dictionary of the [\*952] English Language 51 (1989).) The NALCO standard is attached to the machine, and if operating correctly, the machine registers a number that matches the number on the ampul. The officer conceded that determining whether the machine is working depends on whether the alcohol content of the NALCO standard is, in fact, [\*\*\*24] as reflected on the ampul.

[12] The officer in *Gerber* testified that he did not know who prepared the NALCO standard and did not know where the NALCO standard came from or its actual alcohol content. The officer admitted he did not know if the machine was operating correctly at the time the defendant was tested. The *Gerber* court held that a competent witness must establish where the NALCO calibration standard used to determine if a Breathalyzer machine is operating correctly came from, how it was received, under what conditions it was kept and preserved, and what spot checks were

6 Neb. App. 940, \*952; 579 N.W.2d 550, \*\*559;  
1998 Neb. App. LEXIS 72, \*\*\*24

made to determine its validity. The court quoted the following statement with approval:

[HN9] "The fact that the *sealed* ampoules are delivered by the manufacturer of the breathalyzer machine for exclusive use in such machine plus the additional fact of regular spot checking of the ampoules is, in our opinion, sufficient *prima facie* proof that the chemicals in any one ampoule are of the proper kind and mixed to the proper proportion."

(Emphasis in original.) 206 Neb. at 90, 291 N.W.2d at 411 (quoting *State v. Baker*, 56 Wash. 2d 846, 355 P.2d 806 (1960)). The *Gerber* court held [\*\*\*25] the test inadmissible because the State failed to prove the necessary requirements were met.

In the instant case, Stevens testified that a known substance, called a control, is very important in determining whether the machine is working properly. Stevens testified that she receives a known substance, in a vial or a tube, from a manufacturer. Included with the substance is a certificate from the manufacturer stating the bottle contains a certain amount of ethanol. The bill of exceptions contains the following testimony:

Q- . . . You get this known substance and my only question is, before you use it in the machine, what do you do to make sure that the known substance is what it purports to be?

[\*953] A- Okay, the known substance has a known value on it. So I run it and if I get the known value on it, I assume that it's what it's supposed to be because I got the value they told me I would get.

Q- And that's based not upon your test, but what some piece of paper says?

A- They ran it and got this answer, I rerun it, get the same answer.

Stevens also testified that Good Samaritan Hospital did not have a policy or procedure of periodically testing blood kits to make sure that the [\*\*\*26] contents of the test tubes were what they purported to be.

Based on *Gerber*, *supra*, we find that the trial court erred in admitting the results of Hiemstra's blood test because there was no testimony or evidence identifying the contents of the control, showing how the control was received, detailing under what conditions the control was kept and preserved, and identifying what spot checks were made to determine the validity of the control.

### [\*\*560] 3. JURY INSTRUCTIONS

Hiemstra argues that "the definition of under the influence as given by the Court is not appropriate and is an incorrect statement of the law. The problem with the Court's instruction is that it causes the jury to try to guess at what Hiemstra's normal body or mental faculties would be." Brief for appellant at 29. Over objection, the trial court gave the following instruction defining "under the influence:"

A person is under the influence of alcoholic liquor if such person is impaired because of his or her[]consumption of alcohol in the capacity to think and act correctly and efficiently, to the extent as to have lost an appreciable degree of the normal control of his or her body or mental faculties.

Hiemstra [\*\*\*27] proposed the following instruction: "The phrase 'under the influence of alcoholic liquor' means the ingestion of alcohol in an amount sufficient to impair to any appreciable degree the ability to operate a motor vehicle in a prudent and cautious manner."

[\*954] [13, 14] [HN10] To establish reversible error from a court's refusal to give a requested instruction, an appellant has the burden to show that (1) the tendered instruction is a correct statement of the law; (2) the tendered instruction is warranted by the evidence; and (3) the appellant was prejudiced by the court's refusal to give the tendered instruction. *State v. Reynolds*, 235 Neb. 662, 457 N.W.2d 405 (1990). In an appeal based on the claim of an erroneous

6 Neb. App. 940, \*954; 579 N.W.2d 550, \*\*560;  
1998 Neb. App. LEXIS 72, \*\*\*27

instruction, the appellant has the burden to show that the questioned instruction was prejudicial or otherwise adversely affected a substantial right of the appellant. *State v. McHenry*, 250 Neb. 614, 550 N.W.2d 364 (1996); *State v. Ryan*, 249 Neb. 218, 543 N.W.2d 128 (1996).

[15] The language of Hiemstra's proposed jury instruction is very similar to that of NJI2d Crim. 7.52. We conclude that Hiemstra's proposed instruction is a correct statement of the law and note [\*\*\*28] that the court's instruction seems to require evidence of the individual defendant's "normal control of his or her body," whereas the NJI2d Crim. 7.52 instruction does not contain this weakness. Hiemstra also satisfies the second requirement that the instruction must be warranted by the evidence. Since Hiemstra was charged with "driving under the influence," a jury instruction defining that term was certainly warranted. However, Hiemstra fails to establish that his rights were prejudiced by the court's failure to give the suggested jury instruction. We assume that Hiemstra is arguing his rights were prejudiced because the given jury instruction is an incorrect statement of the law. We recognize that the given jury instruction contains the weakness cited above and is therefore somewhat confusing, while the language of NJI2d Crim. 7.52 is considerably clearer. However, the Supreme Court has stated that [HN11] jury instructions must be read as a whole, and if they fairly present the law so that the jury could not be misled, there is no prejudicial error. *State v. Brunzo*, 248 Neb. 176, 532 N.W.2d 296 (1995).

We must examine the jury instructions in their entirety. Jury instruction No. 4 [\*\*\*29] generally explains the material elements of driving under the influence; specifically, that the defendant was in actual physical control of a motor vehicle while under the influence of alcohol or while having a concentration of .10 of 1 [\*955] gram or more of alcohol per 100 milliliters of his blood. Jury instruction No. 5 explains that Neb. Rev. Stat. § 60-6, 196 (Reissue 1993) makes it unlawful for any person to operate or be in actual physical control of a motor vehicle while under the influence of alcohol or while having a concentration of .10 of 1 gram of alcohol or more per 100 milliliters of his or her blood.

When read in their entirety, the jury instructions accurately and fairly present the law of DUI. Therefore, Hiemstra has failed to meet his burden and demonstrate that his rights were prejudiced by the court's failure to give the suggested jury instruction. Hiemstra's final assignment of error is without merit. However, upon remand, we remind the trial court that as long as there is a Nebraska jury instruction that accurately states the law and applies to the case, it is the instruction which should be given. *State v. Jimenez*, 3 Neb. App. 421, 530 N.W.2d 257 (1995), *aff'd* [\*\*\*30] *as modified* 248 Neb. 255, 533 N.W.2d 913.

#### [\*\*561] 4. EFFECT OF ERRORS

[16] Hiemstra urges that the admission of the blood test results necessitates the dismissal of his case. However, in *State v. Hingst*, 251 Neb. 535, 557 N.W.2d 681 (1997), the Supreme Court reached a different conclusion in a factually similar case. In *Hingst*, the defendant was also convicted of DUI. On appeal, the court held that the trial court committed plain error when it failed to exclude the chemical test results because the defendant was not properly advised before the test was taken. However, the State argued that the record contained other evidence sufficient to sustain the conviction. On further review, the Supreme Court stated, [HN12] "In a jury trial of a criminal case, an erroneous evidential ruling results in prejudice to a defendant unless the State demonstrates that the error was harmless beyond a reasonable doubt." *Id.* at 537, 557 N.W.2d at 683. "An error is harmless when the improper admission of evidence did not materially influence the jury to reach a verdict adverse to the substantial rights of the defendant." *Id.* at 538, 557 N.W.2d at 683.

[17] The Supreme Court noted the record contained [\*\*\*31] evidence that at the time of arrest, the defendant's eyes were bloodshot, he smelled of alcohol, his speech was slurred, and he failed twice to correctly recite the alphabet. However, the Supreme [\*956] Court was unable to determine which evidence the jury relied on in convicting the defendant. The Supreme Court held that after a jury trial where prejudicial evidence was erroneously admitted, if sufficient evidence exists to support the conviction, the cause may be remanded for further proceedings, but if the evidence is not sufficient, the cause must be dismissed. The Supreme Court found that sufficient evidence existed upon which a jury could, on remand, find the defendant guilty of DUI; accordingly, the Supreme Court affirmed this court's

6 Neb. App. 940, \*956; 579 N.W.2d 550, \*\*561;  
1998 Neb. App. LEXIS 72, \*\*\*31

decision reversing the conviction and remanding the cause for a new trial.

#### V. CONCLUSION

As in *Hingst*, in this case, the trial court erred in admitting Hiemstra's blood test results, as determined above. We cannot say that this error was harmless beyond a reasonable doubt. However, the record contains independent evidence to support Hiemstra's conviction. Thompson's testimony establishes that Hiemstra was driving under the influence. Thus, we find [\*\*\*32] that there is sufficient evidence to support the conviction. Accordingly, we affirm the trial court's ruling denying Hiemstra's motion to suppress, but we reverse the judgment of conviction and remand the cause for a new trial.

AFFIRMED IN PART, AND IN PART REVERSED AND REMANDED FOR A NEW TRIAL.

**IN THE MATTER OF THE ADMISSIBILITY OF MOTOR VEHICLE SPEED  
READINGS PRODUCED BY THE LTI MARKSMAN 20-20 LASER SPEED  
DETECTION SYSTEM.**

**Appeal No. 96-029**

**SUPERIOR COURT OF NEW JERSEY, LAW DIVISION, MORRIS COUNTY**

*314 N.J. Super. 211; 714 A.2d 370; 1996 N.J. Super. LEXIS 533*

**June 13, 1996, Decided**

**SUBSEQUENT HISTORY:** [\*\*\*1]

APPROVED FOR PUBLICATION MAY 27, 1998. As Corrected June 14, 1996. As Corrected June 20, 1996.

Supplementary Proceedings of March 20, 1998, Reported at: *314 N.J. Super. 233, 714 A.2d 381, 1998 N.J. Super. LEXIS 329.*

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendants with speeding violations pending in the municipal courts of Rockaway Township and Parsippany-Troy Hills Township (New Jersey) and the prosecutor for those townships requested the court to conduct a comprehensive evidentiary hearing pertaining to the admissibility of speed readings produced by a laser speed detector.

**OVERVIEW:** Several defendants with speeding violation cases pending in municipal court filed motions challenging the admissibility of speed readings produced by laser speed detectors that state police had recently begun to use. The court conducted a comprehensive evidentiary hearing on all the municipal cases and heard all pending evidentiary motions. The court found that although the general concept of using lasers to measure speed was widely accepted in the scientific community and was valid, evidence did not show that the laser speed detector was accurate and reliable enough to be used for law enforcement purposes. No one other than the manufacturer knew how the detector's error trapping device functioned and consequently the error trapping could not be evaluated. Moreover, there was a lack of acceptable performance testing of the detector. The court prohibited the use of speed readings obtained by the laser speed detector, as well as evidence based on those readings, in the pending municipal cases.

**OUTCOME:** The court prohibited the use of speed readings obtained by laser speed detectors and the evidence based on those readings in the pending municipal cases. Although the concept of using lasers to measure speed was widely accepted in the scientific community and was valid, the detectors' error trapping device could not be properly evaluated and there was a lack of acceptable performance testing.

**OPINION:**

[\*212] [\*\*\*371] STANTON, A.J.S.C.

This proceeding involves the reliability of a device known as the LTI Marksman 20-20 Laser Speed Detection System manufactured by Laser Technology, Inc. For ease of expression, I shall hereafter usually refer to this device as the "laser speed detector" or the "detector". The New Jersey State Police have recently purchased 23 of the detectors and have begun to deploy them in their motor vehicle law enforcement operations. More particularly, a number of the detectors have been used along Interstate Route 80 in the Township of Rockaway and in the Township of Parsippany-Troy Hills in Morris County and numerous speeding tickets have been issued based upon readings produced by the detectors.

Because the laser speed detector has only recently been put into use in New Jersey, its reliability in establishing the speed of a motor vehicle [\*\*\*2] has not been adjudicated in any New Jersey court. A number of defendants in speeding violation cases pending in the Municipal Court of Rockaway Township and in the Municipal Court of Parsippany-Troy Hills Township have filed motions challenging the admissibility of speed readings produced by the [\*213] detector. Approximately 30 pending municipal court cases are affected by those motions. In an effort to avoid numerous separate evidentiary hearings in the municipal courts and in an effort to obtain a comprehensive ruling that would bind a large number of municipal courts, various defense attorneys and Michael M. Rubbinaccio, who is the municipal prosecutor for both Rockaway Township and Parsippany-Troy Hills Township, have requested the Law Division of the Superior Court for Morris County to conduct a comprehensive evidentiary hearing including all of the evidentiary motions presently pending in the two municipal courts. I agreed to conduct such an evidentiary hearing in the Superior Court. Because of the potentially widespread implications of any ruling which might be made, the Attorney General of New Jersey was invited to participate in the hearing. The Attorney General decided not to participate [\*\*\*3] formally in the hearing, apparently because she was satisfied that Mr. Rubbinaccio would adequately represent the interest of the State in the proceeding, but her office has given significant informal assistance to Mr. Rubbinaccio, as have the State Police. I conducted an extensive evidentiary hearing on five court days from May 20 to June 4, 1996. On June 5, with the consent of all counsel, I went with State Police Sergeant Robert Ricker to a site on Interstate Route 287 south of Morristown and observed him while he operated the laser speed detector. I also spent some time operating the detector myself.

The laser speed detector is a compact, hand-held device which is covered by United States Patent Number 5,359,404. The patent gives the following summary of the invention embodied in the laserspeed detector:

The invention comprises a laser speed detector comprising a laser range-finder, a sighting scope for a user to visually select a target with an operably-disposed trigger for triggering operation of the detector upon the selected target, and a microprocessor-based microcontroller which is controllingly and communicatively interconnected to the laser range-finder. In a highly [\*\*\*4] preferred embodiment, the instrument is small enough to be easily hand-held.

The laser range-finder, under the supervision of the controller, fires a series of laser pulses at a selected remote target at [\*\*372] known time intervals, and detects reflected laser light from each pulse. Preferably, the pulses are fired at equally-spaced intervals. The laser range-finder further determines count data reflective of the [\*214] time-of-flight of each pulse to the target and back, and provides these data to the control means. These count data comprise the respective arrival times of a REF (reference) pulse representing the firing time of the laser pulse, and an RX pulse representing reflected laser pulse light.

The microcontroller is configured to read these count values and to compute from them, the time-of-flight of the laser pulse and in turn, the distance to the target. The controller then computes the velocity of the target relative to the speed detector from the change in distance to the target divided by the known elapsed time between firing of the pulses.

The laser range-finder has several notable features which provide significant improvement in accuracy and reliability (not necessarily [\*\*\*5] listed in order of importance). First, a crystal clock-based timing analysis circuit including a gating circuit which is a digital logic, edge-sensitive gate for which both the "opening" and the "closing" of the time window can be selectably set by the microcontroller. In a preferred embodiment, the microcontroller is configured to alternately widen and narrow the window to selectively lock on "true" RX pulses and exclude pulses due to noise or other factors.

Second, the timing analysis circuitry is constructed to generate self-calibration pulses and to process them in the same manner as the REF and RX pulses, thereby producing a set of calibration interpolation counts. The controller uses these calibration interpolation counts along with the REF and RX interpolation counts to compute self-calibrated values of the respective fractional portions of the clock periods at which the REF and RX pulses arrived. The self-calibration pulses comprise a pair of pulses, referred to for simplicity as TMIN and TMAX, which differ by a known integral number of clock periods (with neither TMIN nor TMAX being zero). Together, TMIN and TMAX define an expanded interpolation interval within which [\*\*\*6] the fractional portions of the RX and REF arrival times are interpolated. This self-calibrating interpolation provides greatly enhanced resolution and accuracy of distance measurements based on elapsed time.

Third, the laser range-finder has a first collimator which directs a major portion of an outgoing laser pulse toward the selected target, and a second collimator which redirects a minor portion of the laser pulse to produce a timing reference signal. In one embodiment, the minor portion of the laser pulse is sent to a second light detector separate from a first light detector (here embodied as a silicon avalanche photodiode detector or "APD") which focusses and receives reflected laser light. Alternatively, the minor portion of the laser pulse is sent to the same detector which detects the returned laser light.

Dr. Daniel Y. Gezari, an astro-physicist who has been employed at the National Aeronautics and Space Administration Space Flight Center for the past 18 years, testified with respect to the general scientific concepts involved in the use of lasers to measure distance and, derivatively, speed. Lasers have been used as a standard tool for the measurement of distances [\*\*\*7] by astro-physicists and other space scientists for a number of years. Mr. Jeremy [\*215] Dunne, a vice president of Laser Technology, Inc. and the designer and inventor of the laser speed detector in question, testified extensively about the scientific concepts involved and about the design and practical operation of the detector. New Jersey State Police Sergeant Robert Ricker, testified about the training of State Police officers in the use of the laser speed detector and about the experience which he and other officers have had with the detector in the field. Mr. Walter Smith, an employee of the Office of the New Jersey State Superintendent of Weights and Measures testified

about testing of the laser speed detector which had been done by his agency. Mr. Bryan Traynor, an official of the National Highway Traffic and Safety Administration, an agency of the United States Department of Transportation, testified [\*\*373] about testing of the laser speed detector which had been done under the auspices of his agency.

A laser is an artificially generated and amplified light which is in the infrared light section of the electromagnetic wave spectrum. It is not visible to the naked eye. It is very concentrated. [\*\*\*8] The laser speed detector fires a series of laser pulses at a selected remote target. When the laser light strikes the target, a portion of the light is reflected back to the detector. Since the speed of light is a known constant, by measuring the time which it takes for the laser pulse to travel to the target and back, the detector is able to calculate the distance between the detector and the target. Each laser pulse which is fired and reflected back establishes one distance reading. The laser speed detector fires 43 laser pulses every time the trigger on the detector is squeezed. These 43 pulses are fired in a total period of approximately one-third of a second. If the target at which the laser pulses are fired is a stationary target, each of the 43 pulses will give the same distance reading to the target, and distance will be the only thing that the detector can tell us about the target. However, if the target is moving, each of the 43 pulses will give a slightly different distance reading and the detector can then compute the velocity or speed of the target from the changes in distance divided by the known elapsed time between the firing of each of the laser pulses. In [\*216] simplest [\*\*\*9] terms, this is the basic theory underlying the use of lasers to calculate speed, and there can be no dispute about its fundamental validity.

There are, however, both conceptual and practical problems which have to be overcome in designing and constructing a reliable laser speed detector. The detector works by measuring the time it takes a laser pulse which it transmits to go out to a target and come back. However, there are many other pulses in the environment of the detector which can interact upon it, and the detector must be programmed to distinguish between those "false" pulses and the "true" pulses which it has transmitted.

As mentioned above, the laser is very concentrated and has a characteristically narrow beam. At a point 1,000 feet away from the detector, a laser beam is about three to three and one-half feet wide and has a height of about three feet. This may be contrasted with the beam of radar which is about 320 feet wide at a point 1,000 feet away from the radar transmitter. Although the laser beam is much more concentrated than the radar beam, it is far from being a true pinpoint. As the three by three and one-half foot laser beam strikes the very irregular surface [\*\*\*10] of a moving motor vehicle, it does not hit a single, highly-reflective point on the vehicle. In effect, it splashes over a portion of the vehicle. This is true even though operators are trained to fire at the front license plate area of the vehicle, because the beam is considerably larger than the license plate. Indeed, depending upon the angle at which the beam hits a vehicle, and depending upon the vehicle's location with respect to other vehicles on the highway, particularly a multi-lane highway, it is conceivable that a portion of the beam splashes onto another vehicle. For reasons which will become apparent when I discuss possible sweep error, there is a sense in which it is important for the detector to be programmed so that it can distinguish the point on a vehicle from which the return impulse is coming.

It is important for the laser detection device to measure distances between it and a motor vehicle at the same point on the [\*217] motor vehicle. In traffic law enforcement, the ultimate use of the detector is to fix the speed of a vehicle. However, the primary measurement made by the detector is distance. (In this respect, the detector contrasts with the Doppler radar units employed [\*\*\*11] in police work. The Doppler radar units compute speed from differences in frequency between microwaves. For them, distance is not significant.) This distinction is important, because, although the entire vehicle travels at the same speed, not every point on the vehicle is the same distance away from the detector. A vehicle traveling along a highway at 60 miles per hour travels 88 feet in a second. In the one-third second which elapses while the laser speed detector is firing 43 pulses at the vehicle, the vehicle will travel 29.33 feet. If the laser pulses being fired by the detector were allowed to sweep [\*\*374] from the front grille of the vehicle to the windshield of the vehicle during the one-third of the second the pulses were being fired, the pulses reflecting back from the windshield would be four feet farther away than the pulses reflecting back from the front grille. Unless the detector has an appropriate error trapping program built into it, the detector would conclude that the vehicle traveled 33.33 feet instead of the 29.33 feet which it actually traveled, and the detector would show the speed of the vehicle as being 68 miles per hour instead of the correct 60 miles per hour. This [\*\*\*12] would be what is known as "sweep" error. If the

detector were allowed to sweep for ten feet along a vehicle, that would lead to about 20 miles per hour being erroneously added to the calculation of the vehicle's speed. If the detector were allowed somehow to pan from one vehicle to another vehicle in a way which would lead to a distance differential of 30 feet, that would convert to a speed reading 60 miles per hour too high.

The inventor of the laser speed detector is clearly aware of many of the conceptual and practical problems involved and has designed computer programs and hardware mechanisms designed to trap a variety of errors. The State's expert, Dr. Gezari, submitted a report which had this to say on the subject of error trapping:

[\*218] One of the basic operating features of the LTI 20-20 is an error trapping algorithm which tests the integrity of the received data. Thirty to forty data pulses received must have the correct pulse shape, rise time, duration, color and basic time sequence to be considered valid data fit for analysis. If at least thirty received impulses do not fit the criteria the data is rejected and no velocity is calculated. Other criteria are also used [\*\*\*13] by the manufacturer to identify valid pulses having to do with actual vehicle characteristics--acceleration/deceleration parameters, change in target direction, etc. The LTI 20-20 speed gun will display error messages if no velocity is calculated informing the operator as to the reason no answer was given or no velocity was calculated. These error messages do not indicate errors were made; they simply identify the reason that no calculation was made. The error trapping approach used in data analysis further insures that factors such as steadiness of the gun during the measurement, weather conditions, motion of other objects nearby, etc. do not affect the accuracy of the speed reading calculated.

The electrocomputer circuitry of the LTI 20-20 speed gun uses sophisticated techniques including pulse stretching algorithm, statistical data analysis techniques, etc. to provide fully adequate timing accuracy in the generation and detection of laser pulses resulting in typical velocity measurement accuracies of +/- 1 mile per hour or better for typical highway speed measurements.

The inventor and designer of the detector, also testified fairly extensively with respect to his efforts [\*\*\*14] to eliminate inconsistent data and to trap error. One of the mathematical techniques to screen out inconsistent and erroneous readings is a procedure called the "average of least squares". That procedure was discussed at some length by Mr. Dunne and by three of the defense experts, and an exhibit setting forth a partial test program for least square speed error was admitted in evidence. The average of least squares is a common procedure which can eliminate inconsistency and error in a variety of applications, but it is only a limited part of the error trapping techniques which are purportedly built into the laser speed detector.

At this point, it is important to note a very significant difficulty. That difficulty lies in the fact that Laser Technology, Inc., the manufacturer of the laser speed detector, is unwilling to disclose the details of the error trapping programs and devices built into the detector on the ground that such information is proprietary information which gives it an important competitive advantage which it should not be required to disclose. The result is that no one outside of the employ of the manufacturer knows the details of [\*219] the error trapping techniques which [\*\*\*15] are being employed in the detector. This means that there is no way for any independent expert to test the adequacy of the procedures or the internal logic of any of the programs being employed.

[\*\*375] I can understand why the manufacturer would be reluctant to disclose its proprietary information to experts retained by defendants, even under a strong and tightly drawn protective order. But, surely, techniques could be developed for disclosure to governmental agencies or to non-governmental independent testing institutions which would protect the manufacturer from any misappropriation of its intellectual property by a competitor. I note that I myself do not have the ability to analyze and evaluate the error trapping techniques involved in the detector, and I myself would not be able to do anything useful with the details of the techniques if they were disclosed to me. However, there are many experts available to government agencies and to non-governmental testing organizations who could effectively evaluate those techniques and tell us whether they appear to be adequate and have good internal logic. Under the total circumstances of this case, I have not thought it appropriate to order disclosure [\*\*\*16] of the proprietary data involved. This leaves the data securely intact in terms of the proprietary interests of the manufacturer, but it also places

the manufacturer in the position of losing the probative advantage of having its methodology validated by reliable experts not in the employ of the manufacturer.

Three expert witnesses testified for the defendants. They were Mr. Henry Roberts, a retired electrical engineer, Mr. Jim Coleman, an engineer who works for a defense contractor and has considerable experience with the design of electronic appliances used to measure velocity, and Mr. Paul S. Greenberg, an employee of the National Aeronautics and Space Administration who has considerable experience working with lasers to measure velocity in space applications. Each of these experts testified at considerable length with respect to a variety of conceptual and practical problems which they found with the application of laser technology [\*220] to the measurement of speed in motor vehicles. Unfortunately, none of the defense experts had the advantage of having worked with the laser speed detector involved in our case and none had conducted any testing of this detector.

The State presented [\*\*\*17] documentary evidence and testimony to the effect that the laser speed detector has been approved for use by law enforcement agencies in the United Kingdom, Sweden, Germany and Austria. It has also been approved for use by the Royal Canadian Mounted Police. The detector is being used by state and local law enforcement agencies in a fairly large number of states. In *Goldstein v. State of Maryland*, 339 Md. 563, 664 A.2d 375 (1995), Maryland's highest court has approved the general concept of admitting laser speed measurements into evidence in judicial proceedings in a case in which the LTI 20-20 Laser Speed Detection System was involved. The Court of Appeals did not reach the issue of the reliability of the particular device.

The State produced a certificate issued by the Office of the New Jersey State Superintendent of Weights and Measures which reads: "This certifies that Laser Speed Detection Instrument Serial Number 008999 has been compared with standards of the State of New Jersey in possession of the State Superintendent of Weights and Measures. The error found in the time base component will result in an error of less than 0.030 MPH at any speed. [\*\*\*18] Agency certified for New Jersey State Police."

The State has also presented a final report issued by the National Highway Traffic Safety Administration of the United States Department of Transportation, issued in February, 1995, establishing "Model Minimum Performance specifications for Lidar Speed Measurement Devices". (The laser speed detector is a lidar speed measurement device.) The Model Minimum Performance Specifications were developed in response to a request for standards made by the International Association of Chiefs of Police. Purportedly, the laser speed detector meets the standards embodied in the Model Minimum Performance Specifications and [\*221] it appears to have been recommended for inclusion on a list of products suitable for purchase by law enforcement agencies.

At first glance, the list of foreign governments which have in some way approved the laser speed detector for use by their law enforcement agencies, the list of states of the [\*\*376] United States which have allowed the detector to be used by law enforcement agencies, the certification issued by the New Jersey Superintendent of Weights and Measures, the issuance of Model Minimum Performance Specifications by the National [\*\*\*19] Highway Traffic Safety Administration and the approval of the general validity of using laser speed measurements in judicial proceedings by the Court of Appeals of Maryland appear to constitute a rather strong endorsement of the validity of the laser speed detector. However, on closer examination, the endorsements appear to be somewhat hollow in terms of using them to make a realistic assessment of the reliability of the detector. A number of American and foreign governmental agencies (or testing organizations working with them) have subjected mechanical components of the laser speed detector to limited testing and there has been some limited testing under conditions not reflective of actual highway circumstances of the detector's ability to measure the speed of a motor vehicle which was actually being driven towards the detector. There was also very limited testing in Colorado by two state police sergeants of the laser speed detector and a similar device made by a competitor under actual highway conditions. The officers tracked the same vehicles with competing laser speed measurement devices and compared the results. Less than 100 vehicles were tracked by the officers. The competing [\*\*\*20] laser speed measurement devices produced results which were roughly consistent with each other, although a few readings were widely inconsistent. The Colorado study is not particularly useful because the actual speeds of the vehicles were not known and they were not measured by any device other than the two competing laser

speed measurement devices.

[\*222] The certificate issued by the New Jersey State Superintendent of Weights and Measures quoted above on its face seems impressive. On analysis, the certification does not actually say much about the reliability of the detector. The testimony of Mr. Smith during our hearings established that what actually occurred was that the frequency of the time base component of the detector was measured and was found to be as stated. This means that the time base component of the detector is functioning as specified, and, *if every other component and program of the detector is functioning as it is supposed to*, then there will be no error greater than 0.030 MPH at any speed. The time base component is an important element in the detector. If it were not functioning properly, the results produced by the detector would be unreliable. However, the fact [\*\*\*21] that it is found to be functioning properly does not mean that the results produced by the detector are reliable, unless everything else works as it is supposed to, and no effort was made to test whether everything else did work as it was supposed to. In short, the certification turns out to be a very limited one.

The Model Minimum Performance Specifications issued by the National Highway Safety Administration also end up not being as impressive as they appear to be at first blush. One obvious deficiency is that the speed accuracy test called for by the Specifications does not approach the conditions which exist on real highways. The testing of the speed of actual vehicles contemplated by the Specifications is really testing under closed circuit test track conditions. A tripod is used to hold the device steady and retro-reflective areas may be temporarily affixed to the vehicle to increase the amplitude of the laser pulse echoes. The testing procedures involved might be a useful first step in a more comprehensive testing program, but the reality is that vehicles do not travel along our highways one at a time, tripods are not used and retro-reflective areas are not attached to vehicles [\*\*\*22] being driven along the highways. The reality is that the shape of motor vehicles is highly irregular and their surfaces reflect pulses off at many angles, with the result that most of the incoming pulse is not [\*223] sent back towards the detector. The challenge is to devise a program for the detector which can capture reliable pulses off the irregular shape of an actual motor vehicle. If the motor vehicle is equipped with a retro-reflective area which is affixed to the vehicle for the explicit purpose of making it more likely that a larger part of the incoming pulse will be reflected straight back at the detector, that renders the test largely meaningless in terms of the ability to [\*\*377] recapture and identify pulses reliably from motor vehicles as they are actually driven along our highways. The Model Minimum Performance Specifications also suffer from the serious deficiency that they do not require the manufacturer of the device to disclose the actual error trapping programs and mechanisms contained in its device.

Some of the objections posed by the defense experts, particularly by Mr. Roberts, seem to me to have been somewhat overstated. The defense experts appropriately pointed to many possible [\*\*\*23] errors in the application of laser to the measurement of motor vehicle speed, but they suggested at times that it was almost conceptually impossible for those errors to be overcome. I think it is fairly clear that at least the most egregious errors have probably been eliminated from the laser speed detector. In this regard, it is important to take note of the experience which members of the New Jersey State Police have had with the use of the laser speed detector on our highways.

Sergeant Ricker testified about the classroom training and field training which State Police officers receive before they are certified as being qualified to use the laser speed detector. He also testified about the field practice which they must have with the detector before they are able to issue summonses. He detailed the operational checks which are made on each individual laser speed detector every day by an officer before the unit is used. He also spoke of the experience which he and other members of the State Police have had in the months during which they have been using the detector. I note that Sergeant Ricker's testimony about the training of members of the State Police who use the detector [\*224] satisfies [\*\*\*24] me that the members of the State Police are adequately trained in the use of the detector and that it is not likely that errors will be made in its use because of lack of training or skill in the operator of the individual laser speed detector.

By this time, officers of the State Police operating under normal traffic enforcement conditions have obtained speed readings with the laser speed detector on thousands of motor vehicles. They do not keep comprehensive data with

314 N.J. Super. 211, \*224; 714 A.2d 370, \*\*377;  
1996 N.J. Super. LEXIS 533, \*\*\*24

respect to the conditions under which they are obtaining the readings, and they are not simultaneously taking readings on targeted vehicles with other kinds of devices which have previously been found to be reliable. Accordingly, the experience of the State Police does not establish the degree of accuracy of the laser speed detector. However, it seems clear to me that the State Police are getting readings from the detector which are at least broadly sensible. State Police officers who take readings on a target vehicle on an interstate highway where their experience leads them to believe that the flow of traffic is probably moving in the 65 to 75 mile an hour range and where their visual observation leads them to believe [\*\*\*25] that a particular vehicle is probably going around 70 miles an hour are not getting bizarre readings. They are not firing the laser speed detector device at a vehicle which they think is going around 70 miles an hour and getting readings in the range of 40 miles an hour or readings in the range of 95 miles an hour. They are getting readings which are fairly close to where they expect them to be. They are also not encountering many motorists who claim that the speeds being attributed to them are way out of line. This leads me to conclude that the error trapping mechanisms and programs contained in the laser speed detector are eliminating the most serious potential errors.

My own limited experience in observing Sergeant Ricker use the laser speed detector and my own limited experience in using it myself reinforced the view that the error trapping is in fact getting rid of at least the worst errors.

[\*225] The field view of the operation of the operation of the laser detector which I conducted on June 5 took place on Interstate Route 287 at a location a little south of Morristown. We were located in the center median of the highway and were taking readings on motor vehicles traveling in the [\*\*\*26] three northbound lanes. Sergeant Ricker and I used the same unit in succession. He was able to get a much higher percentage of speed readings from vehicles which he targeted than I was able to get from vehicles which I targeted. I frequently got an error [\*\*378] message from the detector when I targeted a vehicle. As noted in the report of Dr. Gezari quoted above, an error message does not mean that the detector has made an erroneous calculation of speed. It means that the detector does not make a calculation of speed because something has occurred (usually a mistake by the operator) which makes it impossible for the detector to compute the speed correctly. My getting frequent error messages was, of course, highly consistent with the fact that I had had no formal training in the operation of the device and no experience in using it. Also, the particular error messages which I got were consistent with my sense of what was occurring around me. For example, I found it much easier to get a speed reading on vehicles traveling in the left lane of the highway than on vehicles traveling in the center lane or the right lane. The relative ease of getting readings on vehicles in the left lane was what [\*\*\*27] I expected based on the testimony in this case, because I was able to get a much clearer and unobstructed shot on those vehicles, given the fact that I was standing in the center median of the highway. When I did get an error reading on a targeted vehicle in the left lane, it was usually "E03" which indicated poor aiming or panning, and when I got such a message I was frequently conscious of having been unsteady when I depressed the trigger. Although I was successful in getting some speed readings on vehicles in the right lane, I very frequently got error messages when I attempted to target them, and the message was usually "E02" which indicated that another vehicle intruded between me and the targeted vehicle. When I got such an error message, I was usually conscious of [\*226] the fact that I had mistimed my depression of the trigger in the sense that I was aware that an intervening vehicle in the center lane or left lane was closely crowding my line of sight to the targeted vehicle. I also notice that the speed readings which I did obtain were consistent with what I expected them to be based on my experience as a motorist and based on what I was observing with respect to the traffic moving [\*\*\*28] in front of me.

In urging me to find that the laser speed detector is a reliable device for measuring the speed of motor vehicles and in urging me to rule that the defendants may be convicted of motor vehicle violations based upon readings produced by the detector, the State points to the various approvals which have been granted to the detector by the agencies and organizations mentioned earlier in this opinion. The State has also pointed to the moderately widespread use of the detector in a number of state and local police departments in this country and in a number of law enforcement agencies in foreign countries. The State also urges me to take notice of the fact that the principle of using lasers to measure speed is broadly accepted as being scientifically sound.

The State has called my attention to cases such as *State v. Wojtkowiak*, 170 N.J. Super. 44, 405 A.2d 477 (Law Div.1979), reversed, 174 N.J. Super. 460, 416 A.2d 975 (App. Div.1980) (approving use of K-55 Doppler Radar device),

314 N.J. Super. 211, \*226; 714 A.2d 370, \*\*378;  
1996 N.J. Super. LEXIS 533, \*\*\*28

and *Romano v. Kimmelman*, 96 N.J. 66, 474 A.2d 1 (1984). It is argued that there has been wide acceptance of the scientific techniques involved in the laser speed detector [\*\*\*29] and there has been wide approval of the detector itself and that the Court should accept the detector as being a reliable device for measuring speed when used by a properly trained police officer. *State v. Wojtkowiak* and *Romano v. Kimmelman* can be read in a way which is broadly supportive of the State's position in the present case, but my view of those cases and others cited in the State's brief is that they do not require me to accept the laser speed detector as being reliable, given the proofs and analysis which have been presented in our present case.

[\*227] After considering all of the proofs and the analysis and the argument presented, I am satisfied that the general concept of using lasers to measure speed is widely accepted in the relevant scientific communities and is valid. I am, however, not satisfied that the laser speed detector device is accurate and reliable enough to be used for law enforcement purposes. Accordingly, I will not permit speed readings obtained by the use of the laser speed detector to be used in any of the motor vehicle law violation cases pending in the municipal courts of the Township of Rockaway and the Township of Parsippany-Troy Hills, and I will [\*\*\*30] also order that evidence [\*\*379] based on such speed readings may not be presented in any municipal court in the County of Morris or the County of Sussex at the present time.

I reach the conclusion just stated with considerable reluctance. If the laser speed detector were known to be accurate and reliable, it would, in my judgment, be markedly superior to radar in many situations that exist on the highways, roads and streets of New Jersey. New Jersey is a very densely populated state and its highways, roads and streets are crowded with traffic. Traffic flow along our interstate routes tends to be dense with traffic flow tending to be heavy in all lanes at almost all times. Wide beam radar under those circumstances requires the exercise of considerable skill and judgment by the operator in order to identify a speeding vehicle. The laser speed detector (assuming its accuracy and reliability) can much more readily target an individual vehicle in a heavy traffic flow than can radar. I am also aware of the fact that radar detectors are in very wide use among motorists, particularly among truckers, and they make it possible for chronic and persistent speeders to frustrate detection by radar. I [\*\*\*31] see the laser speed detector as being potentially an extremely useful tool in enforcing speed laws in New Jersey.

My frustration is deepened by the fact that I suspect that the laser speed detector may be accurate and reliable. The problem is that I cannot be reasonably sure that it is accurate and reliable under the proofs and analysis which have been presented in this [\*228] case. As I see it, there are two major obstacles to the acceptance of the laser speed detector as being accurate and reliable at the present time. The first obstacle is that no one other than the manufacturer knows the details of how the error trapping in the detector works. As noted above, the manufacturer has declined to release the details on the ground that this would compromise the confidentiality of proprietary information which is essential to its maintaining its business advantage over competitors. The lack of access to detailed information about error trapping is important because there are many factors which could interfere with an accurate calculation of speed by the laser speed detector. Error trapping programs must comprehensively deal with the wide range of potential sources of error and they must deal [\*\*\*32] with those potential errors pursuant to programs whose inner logic is sound. If no one other than the manufacturer knows the details of the error trapping mechanics and programs, there is no way of evaluating their conceptual validity through intellectual evaluation.

The absence of detailed knowledge about the workings of the error trapping procedures in the laser speed detector is not necessarily an insurmountable obstacle to accepting the detector as being accurate and reliable. Even if we did know all the details of the error trapping procedures and could subject them to thorough intellectual analysis, and even if that analysis showed that they were conceptually sound, we would still need to have adequate performance testing of the laser speed detector under conditions which exist on our highways before we could accept it as reliable. Indeed, if we had adequate operational testing of the laser speed detector under actual highway conditions, we might be able to accept the detector as being reliable even though we did not have complete details about the way in which the error trapping procedures are designed and programmed. Good performance testing might conceivably put us in a position [\*\*\*33] of being sure that the detector in fact worked reliably, although we were not sure precisely how it managed to achieve its results. This leads us to the lack of acceptable performance testing in this case.

1996 N.J. Super. LEXIS 533, \*\*\*33

[\*229] We know that there are many factors which could affect the accuracy of the laser speed reading. There is no way of knowing whether the laser speed detector successfully copes with those problems in the absence of detailed performance tests which deal rather comprehensively with potential error producing factors and which record results in a way which makes it possible for other persons to evaluate the tests and to replicate them.

In principle, it should be relatively easy to design performance tests which would let independent observers know how accurate the laser detector device truly is. The tests [\*\*380] would have to include vehicles of varying sizes and shapes. They would have to be conducted under various conditions of traffic flow along actual highways and roads. They would have to be conducted at different times of the day under varying climatic conditions. They would have to involve target vehicles whose speed was reliably established either by controlling the driver of the vehicle [\*\*\*34] or through simultaneous measurement of its speed by a reliable device other than the laser speed detector. The test data would have to be accurately recorded and reproduced for examination, analysis and replication by other persons and agencies. The factors that I have mentioned are illustrative, not exhaustive. Absent this kind of testing, I do not see how we can have any real confidence that the detector is sufficiently accurate.

I note that the Model Minimum Performance Specifications for Lidar Speed Measurement Devices issued by the National Highway Traffic Safety Administration in February 1995 state that the standard for speed measurement accuracy should be that the device would be within a tolerance of no more than one mile per hour in excess of the true speed and no more than two miles an hour below the true speed. The manufacturer in our case, Laser Technology, Inc., claims that the laser speed detector meets that standard. But there is no way in which we can be sure of that, in my judgment, under the present proofs. I do not think we can even be sure that the device is accurate over a wide range of conditions and with respect to a wide range of vehicles within a tolerance [\*\*\*35] of plus or minus five miles per hour. I suspect that the device is probably measuring speed within a [\*230] tolerance of plus or minus ten miles per hour, or we would be getting much more negative feedback from police officers and from motorists than has thus far been obtained.

The fundamental point is that there is no way of being sure under the present state of the proofs and analysis how accurate the detector is. I point out that [HN1] a belief that the device is broadly accurate is not sufficient. If I were presented with a reading in a particular case indicating that a motorist was traveling 72 miles an hour in a 55 mile an hour zone, I would feel quite confident that the motorist was exceeding the 55 mile an hour speed limit. I would not feel confident that he was going 72 miles an hour. I would not feel confident that he was going 70 miles an hour. I could probably satisfy myself that he was going at least 65 miles an hour, but I might have some slight reservation about that. Under the laws of our state (and under the laws of many states) the degree to which somebody is exceeding the speed limit is important. The penalties both in terms of fines and points against one's license increase [\*\*\*36] with the increase of speed in excess of the limit. If police officers and municipal court judges do not have a good handle on the range of accuracy of the detector, it becomes difficult to enforce the speeding laws in a way which is predictable, uniform and fair. I do not think it would be necessary to have a range as tight as the plus one mile minus two mile range of the Model Minimum Performance Specifications. Perhaps a range as wide as plus or minus five miles per hour would be sufficient. We do need to know what the range is.

I recognize that courts should not routinely require thorough performance testing of every conceivable device that might be used in the course of law enforcement, or of every conceivable device whose efficacy comes into question in civil litigation. Frequently, common knowledge or the rather conclusory testimony of informed experts might be sufficient. But we are dealing here with a major innovation in law enforcement techniques. We are [\*231] dealing here with something that could readily be tested in ways which would satisfy most reasonable observers that the device was reliable or not. Although I think there should be a number of comprehensive performance testing [\*\*\*37] programs carried out with respect to a device like the laser speed detector, I do not suggest that performance tests need be conducted by every state, much less by every local police department that might want to use the laser speed detector. If adequate tests were conducted by an agency or agencies outside of New Jersey, and if the detailed data with respect to those tests were published and were available for analysis and replication, there is no reason why [\*\*381] New Jersey or any other state or entity would have to conduct repetitious and expensive tests once there had been sufficient testing

314 N.J. Super. 211, \*231; 714 A.2d 370, \*\*381;  
1996 N.J. Super. LEXIS 533, \*\*\*37

to establish the reliability of the detector. I note that it probably is fair to expect the manufacturer itself to conduct performance testing and to have detailed data with respect to it. Laser Technology, Inc. has no recorded data.

I realize that courts should be hesitant about rulings which impose costs and burdens on litigants. However, it is important to note that highway safety and the fair and efficient enforcement of motor vehicle laws which are designed to promote highway safety are matters of very great concern and they are matters which involve enormous expenditures every year in this [\*\*\*38] country. In 1994, 40,676 lives were lost on the highways, roads and streets of the United States. I do not know what the exact figures are, but I am sure that in any given year various governmental entities in the United States spend billions of dollars on the enforcement of motor vehicle laws, health insurance companies pay billions of dollars to pay for the injuries received by people in motor vehicle accidents and casualty insurance companies pay billions of dollars for such injuries and for property loss. Surely, a society such as ours can figure out some way to come up with the very modest amount of money which would be involved in subjecting an important device such as the laser speed detector to adequate performance testing.

[\*232] I think it slightly ironic that at one point during the trial of the present case the State suggested that the defendants were somehow remiss for not having conducted adequate tests on the laser speed detector. That suggestion was made when I asked the prosecutor about the absence of meaningful performance testing by the manufacturer or by some governmental entity or some public interest testing group. The defendants in this case are people who are charged [\*\*\*39] with relatively minor traffic violations which would, if they were found guilty, result in modest fines, points against their licenses, insurance surcharges and, perhaps, in some cases, loss of a motor vehicle driver's license. The defendants, of course, have an interest in this case, but they do not begin to have an economic stake which would justify the kind of expenditures which would be involved, and they do not have the resources of time, talent and personnel to conduct the testing. There should be adequate performancetesting, but it would not be reasonable to expect it to come from the defendants or from people broadly situated as they are.

#### *ORDER*

For the reasons expressed in the foregoing Opinion, speed readings produced by the LTI Marksman 20-20 Laser Speed Detection System shall not be used in the prosecution of any case arising under the motor vehicle laws now pending in the Municipal Court of the Township of Rockaway or in the Municipal Court of the Township of Parsippany-Troy Hills.

IT IS FURTHER ORDERED that, until further Order of the Superior Court, no municipal court in Morris County and no municipal court in Sussex County shall receive in evidence a speed [\*\*\*40] reading generated by the LTI Marksman 20-20 Laser Speed Detection System in connection with any prosecution arising under the motor vehicle laws.

**June 13, 1996, Decided**

**SUBSEQUENT HISTORY:** [\*\*\*1]

APPROVED FOR PUBLICATION MAY 27, 1998. As Corrected June 14, 1996. As Corrected June 20, 1996.

Supplementary Proceedings of March 20, 1998, Reported at: *314 N.J. Super. 233, 714 A.2d 381, 1998 N.J. Super. LEXIS 329.*

**CASE SUMMARY:**

**PROCEDURAL POSTURE:** Defendants with speeding violations pending in the municipal courts of Rockaway Township and Parsippany-Troy Hills Township (New Jersey) and the prosecutor for those townships requested the court to conduct a comprehensive evidentiary hearing pertaining to the admissibility of speed readings produced by a laser speed detector.

**OVERVIEW:** Several defendants with speeding violation cases pending in municipal court filed motions challenging the admissibility of speed readings produced by laser speed detectors that state police had recently begun to use. The court conducted a comprehensive evidentiary hearing on all the municipal cases and heard all pending evidentiary motions. The court found that although the general concept of using lasers to measure speed was widely accepted in the scientific community and was valid, evidence did not show that the laser speed detector was accurate and reliable enough to be used for law enforcement purposes. No one other than the manufacturer knew how the detector's error trapping device functioned and consequently the error trapping could not be evaluated. Moreover, there was a lack of acceptable performance testing of the detector. The court prohibited the use of speed readings obtained by the laser speed detector, as well as evidence based on those readings, in the pending municipal cases.

**OUTCOME:** The court prohibited the use of speed readings obtained by laser speed detectors and the evidence based on those readings in the pending municipal cases. Although the concept of using lasers to measure speed was widely accepted in the scientific community and was valid, the detectors' error trapping device could not be properly evaluated and there was a lack of acceptable performance testing.

**OPINION:**

[\*212] [\*\*\*371] STANTON, A.J.S.C.

This proceeding involves the reliability of a device known as the LTI Marksman 20-20 Laser Speed Detection System manufactured by Laser Technology, Inc. For ease of expression, I shall hereafter usually refer to this device as the "laser speed detector" or the "detector". The New Jersey State Police have recently purchased 23 of the detectors and have begun to deploy them in their motor vehicle law enforcement operations. More particularly, a number of the detectors have been used along Interstate Route 80 in the Township of Rockaway and in the Township of Parsippany-Troy Hills in Morris County and numerous speeding tickets have been issued based upon readings produced by the detectors.

Because the laser speed detector has only recently been put into use in New Jersey, its reliability in establishing the speed of a motor vehicle [\*\*\*2] has not been adjudicated in any New Jersey court. A number of defendants in speeding violation cases pending in the Municipal Court of Rockaway Township and in the Municipal Court of Parsippany-Troy Hills Township have filed motions challenging the admissibility of speed readings produced by the [\*213] detector. Approximately 30 pending municipal court cases are affected by those motions. In an effort to avoid numerous separate evidentiary hearings in the municipal courts and in an effort to obtain a comprehensive ruling that would bind a large number of municipal courts, various defense attorneys and Michael M. Rubbinaccio, who is the municipal prosecutor for both Rockaway Township and Parsippany-Troy Hills Township, have requested the Law Division of the Superior Court for Morris County to conduct a comprehensive evidentiary hearing including all of the evidentiary motions presently pending in the two municipal courts. I agreed to conduct such an evidentiary hearing in the Superior Court. Because of the potentially widespread implications of any ruling which might be made, the Attorney General of New Jersey was invited to participate in the hearing. The Attorney General decided not to participate [\*\*\*3] formally in the hearing, apparently because she was satisfied that Mr. Rubbinaccio would adequately represent the interest of the State in the proceeding, but her office has given significant informal assistance to Mr. Rubbinaccio, as have the State Police. I conducted an extensive evidentiary hearing on five court days from May 20 to June 4, 1996. On June 5, with the consent of all counsel, I went with State Police Sergeant Robert Ricker to a site on Interstate Route 287 south of Morristown and observed him while he operated the laser speed detector. I also spent some time operating the detector myself.

The laser speed detector is a compact, hand-held device which is covered by United States Patent Number 5,359,404. The patent gives the following summary of the invention embodied in the laserspeed detector:

The invention comprises a laser speed detector comprising a laser range-finder, a sighting scope for a user to visually select a target with an operably-disposed trigger for triggering operation of the detector upon the selected target, and a microprocessor-based microcontroller which is controllingly and communicatively interconnected to the laser range-finder. In a highly [\*\*\*4] preferred embodiment, the instrument is small enough to be easily hand-held.

The laser range-finder, under the supervision of the controller, fires a series of laser pulses at a selected remote target at [\*\*372] known time intervals, and detects reflected laser light from each pulse. Preferably, the pulses are fired at equally-spaced intervals. The laser range-finder further determines count data reflective of the [\*214] time-of-flight of each pulse to the target and back, and provides these data to the control means. These count data comprise the respective arrival times of a REF (reference) pulse representing the firing time of the laser pulse, and an RX pulse representing reflected laser pulse light.

The microcontroller is configured to read these count values and to compute from them, the time-of-flight of the laser pulse and in turn, the distance to the target. The controller then computes the velocity of the target relative to the speed detector from the change in distance to the target divided by the known elapsed time between firing of the pulses.

The laser range-finder has several notable features which provide significant improvement in accuracy and reliability (not necessarily [\*\*\*5] listed in order of importance). First, a crystal clock-based timing analysis circuit including a gating circuit which is a digital logic, edge-sensitive gate for which both the "opening" and the "closing" of the time window can be selectably set by the microcontroller. In a preferred embodiment, the microcontroller is configured to alternately widen and narrow the window to selectively lock on "true" RX pulses and exclude pulses due to noise or other factors.

Second, the timing analysis circuitry is constructed to generate self-calibration pulses and to process them in the same manner as the REF and RX pulses, thereby producing a set of calibration interpolation counts. The controller uses these calibration interpolation counts along with the REF and RX interpolation counts to compute self-calibrated values of the respective fractional portions of the clock periods at which the REF and RX pulses arrived. The self-calibration pulses comprise a pair of pulses, referred to for simplicity as TMIN and TMAX, which differ by a known integral number of clock periods (with neither TMIN nor TMAX being zero). Together, TMIN and TMAX define an expanded interpolation interval within which [\*\*\*6] the fractional portions of the RX and REF arrival times are interpolated. This self-calibrating interpolation provides greatly enhanced resolution and accuracy of distance measurements based on elapsed time.

Third, the laser range-finder has a first collimator which directs a major portion of an outgoing laser pulse toward the selected target, and a second collimator which redirects a minor portion of the laser pulse to produce a timing reference signal. In one embodiment, the minor portion of the laser pulse is sent to a second light detector separate from a first light detector (here embodied as a silicon avalanche photodiode detector or "APD") which focusses and receives reflected laser light. Alternatively, the minor portion of the laser pulse is sent to the same detector which detects the returned laser light.

Dr. Daniel Y. Gezari, an astro-physicist who has been employed at the National Aeronautics and Space Administration Space Flight Center for the past 18 years, testified with respect to the general scientific concepts involved in the use of lasers to measure distance and, derivatively, speed. Lasers have been used as a standard tool for the measurement of distances [\*\*\*7] by astro-physicists and other space scientists for a number of years. Mr. Jeremy [\*215] Dunne, a vice president of Laser Technology, Inc. and the designer and inventor of the laser speed detector in question, testified extensively about the scientific concepts involved and about the design and practical operation of the detector. New Jersey State Police Sergeant Robert Ricker, testified about the training of State Police officers in the use of the laser speed detector and about the experience which he and other officers have had with the detector in the field. Mr. Walter Smith, an employee of the Office of the New Jersey State Superintendent of Weights and Measures testified

about testing of the laser speed detector which had been done by his agency. Mr. Bryan Traynor, an official of the National Highway Traffic and Safety Administration, an agency of the United States Department of Transportation, testified [\*\*373] about testing of the laser speed detector which had been done under the auspices of his agency.

A laser is an artificially generated and amplified light which is in the infrared light section of the electromagnetic wave spectrum. It is not visible to the naked eye. It is very concentrated. [\*\*\*8] The laser speed detector fires a series of laser pulses at a selected remote target. When the laser light strikes the target, a portion of the light is reflected back to the detector. Since the speed of light is a known constant, by measuring the time which it takes for the laser pulse to travel to the target and back, the detector is able to calculate the distance between the detector and the target. Each laser pulse which is fired and reflected back establishes one distance reading. The laser speed detector fires 43 laser pulses every time the trigger on the detector is squeezed. These 43 pulses are fired in a total period of approximately one-third of a second. If the target at which the laser pulses are fired is a stationary target, each of the 43 pulses will give the same distance reading to the target, and distance will be the only thing that the detector can tell us about the target. However, if the target is moving, each of the 43 pulses will give a slightly different distance reading and the detector can then compute the velocity or speed of the target from the changes in distance divided by the known elapsed time between the firing of each of the laser pulses. In [\*216] simplest [\*\*\*9] terms, this is the basic theory underlying the use of lasers to calculate speed, and there can be no dispute about its fundamental validity.

There are, however, both conceptual and practical problems which have to be overcome in designing and constructing a reliable laser speed detector. The detector works by measuring the time it takes a laser pulse which it transmits to go out to a target and come back. However, there are many other pulses in the environment of the detector which can interact upon it, and the detector must be programmed to distinguish between those "false" pulses and the "true" pulses which it has transmitted.

As mentioned above, the laser is very concentrated and has a characteristically narrow beam. At a point 1,000 feet away from the detector, a laser beam is about three to three and one-half feet wide and has a height of about three feet. This may be contrasted with the beam of radar which is about 320 feet wide at a point 1,000 feet away from the radar transmitter. Although the laser beam is much more concentrated than the radar beam, it is far from being a true pinpoint. As the three by three and one-half foot laser beam strikes the very irregular surface [\*\*\*10] of a moving motor vehicle, it does not hit a single, highly-reflective point on the vehicle. In effect, it splashes over a portion of the vehicle. This is true even though operators are trained to fire at the front license plate area of the vehicle, because the beam is considerably larger than the license plate. Indeed, depending upon the angle at which the beam hits a vehicle, and depending upon the vehicle's location with respect to other vehicles on the highway, particularly a multi-lane highway, it is conceivable that a portion of the beam splashes onto another vehicle. For reasons which will become apparent when I discuss possible sweep error, there is a sense in which it is important for the detector to be programmed so that it can distinguish the point on a vehicle from which the return impulse is coming.

It is important for the laser detection device to measure distances between it and a motor vehicle at the same point on the [\*217] motor vehicle. In traffic law enforcement, the ultimate use of the detector is to fix the speed of a vehicle. However, the primary measurement made by the detector is distance. (In this respect, the detector contrasts with the Doppler radar units employed [\*\*\*11] in police work. The Doppler radar units compute speed from differences in frequency between microwaves. For them, distance is not significant.) This distinction is important, because, although the entire vehicle travels at the same speed, not every point on the vehicle is the same distance away from the detector. A vehicle traveling along a highway at 60 miles per hour travels 88 feet in a second. In the one-third second which elapses while the laser speed detector is firing 43 pulses at the vehicle, the vehicle will travel 29.33 feet. If the laser pulses being fired by the detector were allowed to sweep [\*\*374] from the front grille of the vehicle to the windshield of the vehicle during the one-third of the second the pulses were being fired, the pulses reflecting back from the windshield would be four feet farther away than the pulses reflecting back from the front grille. Unless the detector has an appropriate error trapping program built into it, the detector would conclude that the vehicle traveled 33.33 feet instead of the 29.33 feet which it actually traveled, and the detector would show the speed of the vehicle as being 68 miles per hour instead of the correct 60 miles per hour. This [\*\*\*12] would be what is known as "sweep" error. If the

detector were allowed to sweep for ten feet along a vehicle, that would lead to about 20 miles per hour being erroneously added to the calculation of the vehicle's speed. If the detector were allowed somehow to pan from one vehicle to another vehicle in a way which would lead to a distance differential of 30 feet, that would convert to a speed reading 60 miles per hour too high.

The inventor of the laser speed detector is clearly aware of many of the conceptual and practical problems involved and has designed computer programs and hardware mechanisms designed to trap a variety of errors. The State's expert, Dr. Gezari, submitted a report which had this to say on the subject of error trapping:

[\*218] One of the basic operating features of the LTI 20-20 is an error trapping algorithm which tests the integrity of the received data. Thirty to forty data pulses received must have the correct pulse shape, rise time, duration, color and basic time sequence to be considered valid data fit for analysis. If at least thirty received impulses do not fit the criteria the data is rejected and no velocity is calculated. Other criteria are also used [\*\*\*13] by the manufacturer to identify valid pulses having to do with actual vehicle characteristics--acceleration/deceleration parameters, change in target direction, etc. The LTI 20-20 speed gun will display error messages if no velocity is calculated informing the operator as to the reason no answer was given or no velocity was calculated. These error messages do not indicate errors were made; they simply identify the reason that no calculation was made. The error trapping approach used in data analysis further insures that factors such as steadiness of the gun during the measurement, weather conditions, motion of other objects nearby, etc. do not affect the accuracy of the speed reading calculated.

The electrocomputer circuitry of the LTI 20-20 speed gun uses sophisticated techniques including pulse stretching algorithm, statistical data analysis techniques, etc. to provide fully adequate timing accuracy in the generation and detection of laser pulses resulting in typical velocity measurement accuracies of +/- 1 mile per hour or better for typical highway speed measurements.

The inventor and designer of the detector, also testified fairly extensively with respect to his efforts [\*\*\*14] to eliminate inconsistent data and to trap error. One of the mathematical techniques to screen out inconsistent and erroneous readings is a procedure called the "average of least squares". That procedure was discussed at some length by Mr. Dunne and by three of the defense experts, and an exhibit setting forth a partial test program for least square speed error was admitted in evidence. The average of least squares is a common procedure which can eliminate inconsistency and error in a variety of applications, but it is only a limited part of the error trapping techniques which are purportedly built into the laser speed detector.

At this point, it is important to note a very significant difficulty. That difficulty lies in the fact that Laser Technology, Inc., the manufacturer of the laser speed detector, is unwilling to disclose the details of the error trapping programs and devices built into the detector on the ground that such information is proprietary information which gives it an important competitive advantage which it should not be required to disclose. The result is that no one outside of the employ of the manufacturer knows the details of [\*219] the error trapping techniques which [\*\*\*15] are being employed in the detector. This means that there is no way for any independent expert to test the adequacy of the procedures or the internal logic of any of the programs being employed.

[\*\*375] I can understand why the manufacturer would be reluctant to disclose its proprietary information to experts retained by defendants, even under a strong and tightly drawn protective order. But, surely, techniques could be developed for disclosure to governmental agencies or to non-governmental independent testing institutions which would protect the manufacturer from any misappropriation of its intellectual property by a competitor. I note that I myself do not have the ability to analyze and evaluate the error trapping techniques involved in the detector, and I myself would not be able to do anything useful with the details of the techniques if they were disclosed to me. However, there are many experts available to government agencies and to non-governmental testing organizations who could effectively evaluate those techniques and tell us whether they appear to be adequate and have good internal logic. Under the total circumstances of this case, I have not thought it appropriate to order disclosure [\*\*\*16] of the proprietary data involved. This leaves the data securely intact in terms of the proprietary interests of the manufacturer, but it also places

the manufacturer in the position of losing the probative advantage of having its methodology validated by reliable experts not in the employ of the manufacturer.
